**Assessment Requirements for TLID3023
Use specialised liquid bulk gas transfer
equipment**

Release: 2

Assessment Requirements for TLID3023 Use specialised liquid bulk gas transfer equipment

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Minor changes to unit Application
- Minor changes to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required actions to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of transfer equipment
- operating and adapting to differences in transfer equipment in accordance with workplace procedures
- reading and interpreting relevant instructions, workplace procedures, information and signs
- reporting and/or rectifying identified problems, faults, or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- working systematically with required attention to detail without injury to self or others, or damage to product or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- current Australian Dangerous Goods (ADG) Code and relevant state/territory mass and loading regulations as they apply to vehicles transporting liquid bulk gas
- hazard management consistent with the principle of hierarchy of risk control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment (PPE)
- housekeeping standards and procedures
- methods of securing a vehicle following transferring liquid bulk gas
- relevant permit and licence requirements
- risks when transferring liquid bulk gas and related precautions to control the risk
- work health and safety (WHS)/occupational health and safety (OHS) procedures and guidelines for using specialised bulk transfer equipment
- workplace procedures and policies for efficiently using specialised equipment to transfer liquid bulk gas.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including legislation, regulations, current ADG Code, codes of practice, workplace procedures and operation manuals.
