# **Assessment Requirements for TLIF0007 Manage a fatigue risk management system**

**Release: 1**

# Assessment Requirements for TLIF0007 Manage a fatigue risk management system

## Modification History

**Release 1.** This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant work health and safety (WHS)/occupational health and safety (OHS) legislation
- applying strategies to address signs and symptoms of heavy vehicle driver fatigue
- applying workplace fatigue risk management policies and procedures
- communicating effectively with relevant personnel
- complying with Heavy Vehicle National Law (HVNL) fatigue management requirements
- identifying fatigue risk factors for heavy vehicle drivers
- identifying, preparing and actioning non-compliance reports
- identifying relevant documentation on fatigue risk management and HVNL
- implementing a road transport fatigue risk management system
- implementing compliance with trip, work and rest requirements
- monitoring and maintaining work diaries/records and all relevant workplace documentation in accordance with workplace procedures and HVNL
- participating in internal reviews and periodic audits
- planning and monitoring heavy vehicle trips
- providing training on the fatigue risk management system
- recognising non-compliance with fatigue risk management strategies and HVNL, and taking appropriate corrective action.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- actions required to address non-compliance with fatigue risk management procedures within the supply chain
- fatigue management signs, symptoms and strategies
- fatigue risk management hierarchy of risk control

- fatigue risk management principles
- heavy vehicle fatigue risk management workplace policies and procedures
- non-compliance and penalties related to relevant driver fatigue legislation
- parties within the chain of responsibility, including:
  - consignors/consignees
  - drivers and owner drivers
  - employers, prime contractors and operators
  - loaders
  - loading managers
  - packers
  - schedulers
- periodic audit requirements
- principal obligations relating to fatigue risk management in HVNL including:
  - consideration of traffic conditions in managing speed and fatigue
  - fatigue, work and rest options
  - loading and unloading heavy vehicles
  - securing loads
  - trip conditions including vehicle dimension and load limits
- processes and resources for assessing heavy vehicle driver fatigue management competence
- program for assisting drivers to assess their level of fatigue and evaluate their fitness for work in accordance with HVNL
- record keeping responsibilities and HVNL compliance obligations
- relevant WHS/OHS legislation
- risk mitigation control measures
- road transport fatigue risk management system
- strategies and requirements to ensure management of fatigue
- training resources for the workplace's fatigue risk management system
- training programs for heavy vehicle transport operators operating under a fatigue risk management system.

## Assessment Conditions

Registered Training Organisations (RTOs) are required to be approved by the National Heavy Vehicle Regulator (NHVR) to deliver and assess this unit for NHVR accreditation purposes.

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy

requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, HVNL, codes of practice and operation manuals.
