Assessment Requirements for TLIF0017 Implement safeworking rules and regulations for network control activities

Release: 1

Assessment Requirements for TLIF0017 Implement safeworking rules and regulations for network control activities

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant safeworking system and workplace procedures
- communicating effectively with others
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- reading, interpreting and following relevant rules, regulations and instructions
- working collaboratively with others to fulfil safeworking requirements applicable to the rail operations concerned.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- communications protocols as they relate to the functions of the safeworking systems concerned
- route integrity requirements, including general requirements, position of points and route occupancy requirements
- safeworking system rules and protocols applicable to own area of responsibility and/or control including types, requirements and limitations
- safeworking systems and occupancy authority
- terminology as defined by the applicable Rail Infrastructure Manager
- workplace safeworking records and documentation.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory

requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate rail workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation and terminology as defined by the relevant Rail Infrastructure Manager safeworking system, including workplace procedures, regulations, rules and codes of practice.
