Assessment Requirements for TLIF0027

Perform lookout duties

Release: 1

Assessment Requirements for TLIF0027 Perform lookout duties

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- communicating effectively with individuals and work groups
- complying with worksite protection plan
- complying with relevant system of safeworking rules and workplace procedures
- identifying job hazards including unsafe and ineffective lookout positions and taking required actions to minimise, control or eliminate identified hazards
- providing sufficient warning time for workers and equipment to move to a safe place
- taking up lookout position that enables effective communication of rail traffic movements
- using hand signals, with or without a flag or light, to communicate with rail traffic crew in accordance with workplace instructions.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- audible warning equipment and its use
- emergency management plan and workplace procedures
- rail terminology as defined by the applicable Rail Infrastructure Manager
- relevant rail danger zones and systems of safeworking
- relevant Rail Infrastructure Manager policies, procedures, rules and protocols for identifying unsafe situations or emergencies
- relevant Rail Infrastructure Manager rules, procedures and protocols.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate rail corridor workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant protection plan exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation and terminology as defined by the relevant Rail Infrastructure Manager systems of safeworking including workplace procedures, regulations, rules and codes of practice.
