Respond to abnormal situations and  
emergencies when operating rail traffic**

**Release: 1**

# Assessment Requirements for TLIF0028 Respond to abnormal situations and emergencies when operating rail traffic

## Modification History

**Release 1.** This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- allocating attention according to priorities
- challenging communication errors including safety critical errors, incomplete, unclear or ambiguous information
- communicating effectively and working collaboratively with others including communicating factual information to create confidence and trust
- completing relevant documentation and reports
- identifying job hazards and taking required actions to minimise, control or eliminate identified hazards
- modifying activities depending on workplace contexts, risk situations and environments
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, workplace procedures and information
- selecting and operating electronic communications equipment in accordance with workplace protocols
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- abnormal situations and emergencies that may occur when operating rail traffic
- documentation and reporting requirements
- emergency procedures and/or emergency response plan
- environmental protection legislation, procedures and guidelines
- focus of operation of work systems, equipment, management and site operating systems when responding to abnormal situations and emergencies when operating rail traffic
- hazards that may occur that can lead to emergencies, and related hazard control strategies
- possible responses to identified abnormal situations and emergencies when operating rail traffic

- problems that may occur when responding to abnormal situations and emergencies when operating rail traffic and actions that can be taken to resolve these problems
- safety critical communication requirements
- state/territory legislated rail safety requirements, codes of practice and/or guidelines
- work health and safety (WHS)/occupational health and safety (OHS) legislation, workplace procedures and guidelines
- workplace procedures and policies for identifying and responding to abnormal situations and emergencies when operating rail traffic.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate rail corridor workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
