Assessment Requirements for TLIF2097
Use audible track warning devices
Assessment Requirements for TLIF2097 Use audible track warning devices

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing and transporting, placing, removing and disposing of audible track warning devices (ATWDs)
- communicating effectively with individuals and groups
- completing documentation
- complying with site safety plans, work health and safety (WHS)/occupational health and safety (OHS) regulations and rail safety regulatory requirements
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- reading and interpreting organisational procedures for placing and removing ATWDs.

Knowledge Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- organisational procedures for lost and stolen ATWDs
- organisational procedures for placing and removing ATWDs
- relevant ATWDs and/or railway track signal workplace procedures for storing and transporting dangerous goods
- relevant rail danger zones
- relevant rail safety, WHS/OHS and environmental procedures and regulations.

Assessment Conditions
As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of
As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Practical assessment must occur in an appropriate range of situations in a rail corridor workplace.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, rail industry standards, Australian Dangerous Goods (ADG) Code, codes of practice and operation manuals.
