- applying precautions and required action to minimise, control or eliminate identified hazards
- developing and implementing risk mitigation controls appropriate to the situation
- evaluating risk mitigation controls and implementing identified amendments in accordance with workplace policies and procedures
- identifying and reporting occupational hazards and risks in accordance with workplace policies and procedures
- identifying emergency stopping systems
- reading interpreting and following relevant instructions, procedures, information and signs
- reporting unsuitable personal protective equipment (PPE) in accordance with workplace policies and procedures
- selecting and using required PPE in accordance with organisational, industry and WHS/OHS standards
- using communications strategies effectively, including:
 - communications equipment such as a buzzer, two-way radio or horn
 - documented hand or other signals and workplace alerts.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and include knowledge of:

- communications strategies
- relevant WHS/OHS legislation, regulations, codes of practice, standards, policies and procedures
- relevant state/territory road and traffic authority road rules, regulations and permits
- workplace documentation, policies and procedures
- workplace alerts and signals
- workplace policies and risk assessment procedures for workers standing on a platform, including:
 - safely positioning feet and hands
 - maximum vehicle speed limits
 - alighting from and boarding vehicle
 - restrictions on riding on a platform.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.
