**Assessment Requirements for TLIF3022
Implement/monitor procedures when
warehousing/storing dangerous
goods/hazardous substances**

Release: 1

Assessment Requirements for TLIF3022 Implement/monitor procedures when warehousing/storing dangerous goods/hazardous substances

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- assessing handling and storing precautions and requirements for dangerous goods and hazardous substances
- communicating effectively with others when storing or warehousing dangerous goods and hazardous substances
- completing relevant documentation
- determining required permits
- identifying containers and goods coding, markings, labels and emergency information panels for the mode of transport/storage selected
- identifying dangerous goods and hazardous substances special requirements
- identifying dangerous goods and hazardous substances from labels, IMDG markings, HAZCHEM signs and other relevant identification criteria
- identifying job and site hazards, and planning work to minimise risks
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- planning own work including predicting consequences and identifying improvements
- reading and interpreting relevant instructions, procedures, information and signs
- selecting and using required personal protective equipment conforming to industry and WHS/OHS standards
- storing dangerous goods and hazardous substances safely

- working collaboratively with others when storing or warehousing dangerous goods and hazardous substances
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- equipment applications, capacities, configurations, safety hazards and control measures
- housekeeping standards and procedures
- permit and licence requirements
- problems that may occur when storing or warehousing dangerous goods and hazardous substances and action that can be taken to resolve these problems
- relevant regulations and codes for storing dangerous goods and hazardous substances
- risks for storing dangerous goods and hazardous substances and related precautions to control risk
- workplace procedures for handling and storing dangerous goods and hazardous substances.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
