**Assessment Requirements for TLIF3087
Follow work health and safety, and
environmental procedures in the rail
industry**

Release: 2

Assessment Requirements for TLIF3087 Follow work health and safety, and environmental procedures in the rail industry

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating and consulting effectively with others
- completing relevant documentation in accordance with workplace procedures
- identifying job and environmental hazards and taking required action to minimise, control or eliminate identified hazards
- interpreting and following operational instructions and prioritising work
- operating and adapting to differences in equipment in accordance with operational procedures
- reading and interpreting relevant safety-related information, workplace procedures and codes of practice
- reporting and rectifying faults and malfunctions promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) in accordance with industry and work health and safety (WHS)/occupational health and safety (OHS) regulations
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- emergency management plan and evacuation procedures
- location and use of safety alarms and emergency communications systems
- relevant environmental protection regulations
- relevant sections of state/territory legislated rail safety requirements, relevant codes of practice and/or guidelines

- relevant WHS/OHS procedures, rail industry standards, rules, codes of practice and guidelines
- reporting procedures for unsafe situations, fire hazards, broken or damaged equipment or fittings, sickness and accidents
- signs and signals used for WHS/OHS warnings
- site layout and obstacles
- typical problems that can occur when caring for the environment when carrying out work activities in the rail industry
- workplace procedures and guidelines for caring for the environment during workplace operations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate rail workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.
