Assessment Requirements for TLIF4069
Monitor and respond to traffic flow
Assessment Requirements for TLIF4069 Monitor and respond to traffic flow

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating effectively with others
- completing documentation related to monitoring and responding to traffic flow within a road network control room
- identifying changes to traffic flow, including abnormal traffic flow
- implementing contingency plans
- interpreting and following procedures and prioritising work
- maintaining traffic flow on a road network
- operating a traffic management system
- operating and adapting to differences in equipment and systems in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- reporting and/or rectifying identified problems and faults promptly, in accordance with regulatory requirements and workplace procedures
- using intelligent transport systems (ITSs) such as:
  - variable message signs
  - variable speed limit signs
  - lane use management signs
- working collaboratively with others when responding to and monitoring traffic flow within a road network control room.

Knowledge Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and include knowledge of:

- relevant environmental protection regulations
- relevant ITSs and related operational procedures used in a road network control room
• workplace procedures and guidelines for monitoring and responding to traffic flow when operating a road network control room, including relevant work health and safety (WHS)/occupational health and safety (OHS) procedures and guidelines.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so. Where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

• a range of relevant exercises, case studies and/or simulations
• applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
• relevant materials, tools, equipment and personal protective equipment currently used in industry.
