**Assessment Requirements for TLIF4099
Develop an application for, or variation to,
rail accreditation**

Release: 1

Assessment Requirements for TLIF4099 Develop an application for, or variation to, rail accreditation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to changes in legislation and regulations as they relate to rail accreditation application activities
- applying relevant legislation and workplace procedures
- communicating effectively with others
- developing a new application, exemption, notification of change or variation to an accreditation
- identifying relevant internal and external contact people
- reading and interpreting relevant documentation
- working collaboratively with employees and management.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- components of and policies and procedures related to rail accreditation systems
- organisational systems for risk management and risk mitigation
- relevant legislation, regulations, permit and licence requirements related to rail accreditation and rail safety management systems
- responsibilities of organisation and individual employees related to rail accreditation systems
- workplace procedures and instructions for notifiable occurrence reports.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate rail workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
