TLIF4101 Implement and maintain a rail safety culture

Release: 2

TLIF4101 Implement and maintain a rail safety culture

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to implement and maintain a rail safety culture within a rail organisation in accordance with organisational safety management system.

People achieving competence in this unit must be able to assess compliance with safety culture requirements and confirm that organisational policies and practices are consistent with principles that support the development of a positive safety culture.

Applying this unit in the workplace will involve promoting the benefits of developing a positive safety culture such as:

- awareness and recognition of safety improvement opportunities
- encouraging open communication
- executive safety role of line management
- importance of leadership and commitment of senior management
- involving rail safety workers at all levels
- positively addressing human factors
- promoting a just culture and environment
- willingness to devote resources to safety.

A just culture and environment are based on occurrence investigation, which acknowledges human error and encourages honest reporting of errors while establishing clear accountability for errors.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Rail Sector.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Explain key principles relating to a rail safety culture	1.1	Current information related to rail safety is obtained and confirmed in accordance with organisational policies and procedures
		1.2	Principles that encourage a rail safety culture are identified and promoted to people within an organisation in accordance with organisational policies, procedures and guidelines
2	Apply rail safety culture to organisational activities	2.1	Concepts related to a positive rail safety culture are promoted to people within an organisation using appropriate communications strategies
		2.2	Integration of a positive rail safety culture within an organisation is identified and implemented
		2.3	Rail safety information is used to crosscheck the presence or absence of a rail safety culture within all organisational rail safety documentation and practices
		2.4	Rail safety culture is applied equally with engineering, technical and other factors that reduce the potential for incidents
		2.5	Documentation that includes information related to the safety culture are clearly expressed in appropriate terms to reinforce general understanding within an organisation
		2.6	Behaviours and skills required for safe and effective work performance are identified and their contribution to a rail safety culture is promoted within an organisation

3	Review safety culture within an organisation	3.1	Behaviour of personnel is monitored to determine whether a positive rail safety culture exists
		3.2	Resources committed to rail safety activities relative to the size and complexity of operations are evaluated
		3.3	Attitudes, behaviours or systems that might be detrimental to a positive rail safety culture are identified and corrective actions are determined
		3.4	Evidence of just culture principles are identified and promoted in accordance with organisational policies and procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIF4101A Implement and maintain a rail safety culture.
