Assessment Requirements for TLIF5020 Manage emergencies

Assessment Requirements for TLIF5020 Manage emergencies

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor wording changes and reordering in Knowledge Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist during emergency situations
- applying relevant legislation and workplace procedures
- communicating effectively with others when managing emergency situations
- completing documentation related to managing emergency situations
- conducting interviews and taking statements
- following emergency response plan and procedures
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- operating electronic communications equipment to required protocol
- preparing reports and recommendations
- reading and interpreting instructions, procedures, information and signs relevant to managing emergency situations
- selecting and using relevant computer/communication/office equipment required for managing emergency situations
- working collaboratively with others when managing emergency situations
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian codes of practice, regulations and safe working systems relevant to managing emergencies, including the Australian Dangerous Goods (ADG) Code
- data collection and analysis techniques required when managing emergency situations
- documentation and reporting requirements for managing emergency situations
- hazards that may occur in transport and allied industries that can lead to emergency situations, and related hazard control strategies including:
  - collision
  - contact with human and biological waste
  - derailment of trains
  - fire and explosion
  - handling hot food and equipment
  - handling, storage and carriage of dangerous goods and other hazardous substances
  - handling, storage and carriage of explosives
  - infectious and contagious diseases
  - self-closing doors
  - sharp objects
  - sudden and unexpected movement
  - syringes and drugs
- operational work systems, equipment, management and site operating systems for managing emergency situations
- problems that may occur when managing emergencies and appropriate action that can be taken to resolve these problems
- relevant state/territory safety legislation, from applicable state/territory together with any codes of practice, industry standards and/or guidelines
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- workplace procedures and policies for managing emergency situations, including the elements of an emergency response plan and first aid procedures.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, emergency response plan, regulations, codes of practice and operation manuals.
