TLIL0027 Ensure competency of rail safety workers

Release: 1

TLIL0027 Ensure competency of rail safety workers

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to ensure the competency of rail safety workers.

It includes identifying, implementing and monitoring requirements for managing the competency of rail safety workers.

Work must be carried out in compliance with rail network standards, rules, regulations and procedures.

The unit generally applies to those with responsibility for resource coordination and allocation, and for leading others individually or in teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

L – Resource Management

Unit Sector

Rail sector.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Confirm competence requirements for rail safety workers

1.1 Rail safety worker activities and/or tasks being undertaken within an organisation are identified and mapped in accordance with rail transport operator and rail safety

		legislation requirements
	1.2	Task analysis is conducted in accordance with workplace policies and procedures
	1.3	Safety task analysis is conducted to identify the skills and knowledge required to carry out rail safety work in accordance with the relevant rail network rules and procedures
	1.4	Existing competency standards are identified and validated against relevant rail safety work to be carried out
	1.5	Where no competency standards currently exist, the knowledge and skills of the worker are assessed to enable the worker to carry out the rail safety work safely
2	Implement, manage and monitor rail safety worker systems	
	2.1	Competency training and assessment plans are identified, monitored and reviewed in accordance with the relevant rail transport operator and rail safety legislation requirements
	2.2	Appropriate training and assessment providers are identified, and delivery and assessment plans are developed to meet organisational and regulatory requirements
	2.3	Rail safety worker competency register is monitored and maintained in accordance with relevant rail transport operator and rail safety legislation requirements
	2.4	Training and assessment records are maintained in accordance with relevant rail transport operator and rail safety legislation requirements
	2.5	Individual rail safety worker identification is checked in accordance with relevant rail transport operator and rail safety legislation requirements
	2.6	Rail safety worker information evidence

is gathered and provided in accordance with relevant rail transport operator and rail safety legislation requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIL4081 Ensure competency of rail safety workers.
