TLIL3082 Implement absolute signal blocking

Release: 2

TLIL3082 Implement absolute signal blocking

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to apply absolute signal blocking (ASB) protection for the infrastructure and work group on a rail network during rail work activities by utilising a signal system managed by a Network Control Officer, in accordance with Rail Infrastructure Manager, legislative and regulatory requirements.

People achieving competence in this unit will need to fulfil the applicable state/territory legislated rail safety requirements and to comply with relevant codes of practice and/or guidelines.

The unit includes the application of Rail Infrastructure Manager rules, procedures and protocols for rail safety but does not include the implementation of worksite protection.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

L – Resource Management

Unit Sector

Rail sector.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|--|---|
| 1 Prepare for absolute signal blocking protection | 1.1 Worksite protection plan is sourced and read for the terms of ASB protection
1.2 Network Control Officer is notified of intention to use ASB protection
1.3 Protection officer is advised of Network Control Officer's decision |
| 2 Apply absolute signal blocking protection | 2.1 Permission to apply ASB is requested from Network Control Officer
2.2 Permission to apply ASB is documented in accordance with Rail Infrastructure Manager and/or organisational requirements
2.3 Protection officer is advised ASB has been applied |
| 3 End absolute signal blocking protection | 3.1 Communication is maintained with Network Control Officer to confirm completion of work activity and track is safe for rail traffic
3.2 Permission to remove ASB protection is documented in accordance with Rail Infrastructure Manager and/or organisational requirements
3.3 Network Control Officer is informed of completion of work |
| 4 Manage unsafe situations or emergencies | 4.1 Unsafe situations and/or emergencies are identified
4.2 Work group is instructed to move to a safe place
4.3 Appropriate action is taken to minimise risk and/or injury in accordance with workplace procedures
4.4 Emergencies and/or incidents are recorded and reported to relevant personnel in accordance with workplace procedures |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIL3082A Implement absolute signal blocking.
