**Release: 1**

# Assessment Requirements for TLIL4078 Coordinate fleet control logistics

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- applying relevant statutory requirements, codes of practice and local government by-laws
- communicating and negotiating effectively with others
- ensuring the application of fatigue management knowledge and techniques by drivers
- interpreting and responding to customer requirements
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- planning work activities, predicting consequences and identifying improvements
- reading, interpreting and following relevant instructions, procedures and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with workplace procedures
- selecting and appropriately applying technology, information systems and procedures to complete workplace tasks
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- computerised fleet management and scheduling system/s and guidelines for their use
- factors affecting scheduling in the road transport industry
- operational marketing systems and resources
- operational transport logistic systems, resources, management and workplace operating systems
- problems that may occur and appropriate action that can be taken to minimise or respond to them
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection policies and procedures
- relevant regulatory and code requirements
- workplace protocols and procedures for coordinating fleet control logistics.

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.
