TLIL4081 Ensure competency of rail safety workers

Release: 1

TLIL4081 Ensure competency of rail safety workers

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to ensure the competency of rail safety workers.

It includes identifying, implementing and monitoring requirements for managing the competency of rail safety workers.

Work must be carried out in compliance with rail industry standards, rules, regulations and organisational procedures.

The unit generally applies to those with responsibility for resource coordination and allocation, and for leading others individually or in teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

L – Resource Management

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Confirm re/certification requirements for rail safety workers	1.1 Rail safety worker activities/tasks being undertaken within an organisation are identified
	1.2 Task analysis is conducted in accordance with organisational policies and procedures

	1.3	Safety task analysis is conducted to identify the skills and knowledge required to carry out rail safety work
	1.4	Existing competency standards are identified and validated against rail safety work to be carried out
	1.5	Where no competency standards currently exist, methods by which they can be developed or alternative methods for determining competency are identified
2 Implement, manage and monitor rail safety worker systems	2.1	Competency training and assessment plans are identified, developed and/or implemented for all activities being carried out by rail safety workers
	2.2	Appropriate training and assessment providers are identified and delivery plans are developed to meet organisational and regulatory requirements
	2.3	Rail safety worker register is developed and maintained in accordance with regulatory requirements
	2.4	Training and assessment records are captured and maintained in accordance with regulatory and organisational requirements
	2.5	Individual rail safety worker identification system is developed and/or implemented in accordance with regulatory and organisational requirements
	2.6	Rail safety worker information system is monitored and amended as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

| Australian Industry Standards

Unit Mapping Information

This unit replaces and is equivalent to TLIL4081A Ensure competency of rail safety workers.
