Assessment Requirements for TLIO2021 Follow security procedures when working with goods and cargo

Assessment Requirements for TLIO2021 Follow security procedures when working with goods and cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment, facilities, cargo and passengers
- applying procedures for security checks and precautions within limits of own role and responsibilities
- applying relevant legislation and workplace procedures
- communicating effectively with others when following security procedures
- completing required documentation and reports related to security procedures
- following established response plan and procedures
- identifying and solving and/or reporting problems that arise when following security procedures
- identifying signs of disruption to goods and cargo
- modifying activities depending on workplace contexts, risk situations and environments
- reading and interpreting relevant instructions, procedures, applicable regulatory requirements, labels, markings, ID cards and other information
- recognising signs of pillage, theft and interference with goods, cargo and mail
- recognising signs of security threats and situations
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- responding to a possible security threat
- selecting and using relevant communications and other equipment
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- applicable measures for securing specified locations (such as transport terminals, storage facilities) and transport vehicles, trains, vessels or aircraft
- applicable transport security legislation including relevant international, national, state/territory acts, regulations codes and/or guidelines
- common security problems that may occur when carrying out operations in the transport and logistics industries, and action that can be taken to address and resolve these problems
- common security threats and situations that may occur in transport and logistics industries, and related roles and responsibilities of personnel when reporting and responding to these security threats and situations
- layout of worksite, vehicle, train, vessel or aircraft and operating procedures
- operational work systems, equipment, management and site operating systems
- procedures for operating electronic communications equipment and required protocol
- relevant documentation and reporting requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- relevant quarantine and bond regulations and requirements
- relevant workplace security program, policies and procedures for responding to security threats, situations and emergencies
- signs of pillaging, theft and interference with goods, cargo and mail.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry

- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
