Assessment Requirements for TLIO3015 Maintain security of railway property and revenue

Assessment Requirements for TLIO3015 Maintain security of railway property and revenue

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant workplace procedures
- communicating, consulting and negotiating effectively with others when maintaining the security of railway property and revenue
- completing documentation related to the security of railway property and revenue
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of security equipment and taking appropriate action as required
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading and interpreting relevant instructions, procedures, information and manuals
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant equipment and materials
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working collaboratively with others when maintaining the security of railway property and revenue
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- cash-handling procedures
- communications and negotiation requirements for maintaining the security of railway property and revenue
- documentation, reporting and record requirements
- emergency management plan
- equipment and materials used when maintaining the security of railway property and revenue, and precautions and procedures that should be followed in their use
- insurance and public liability implications
- problems that may occur when maintaining the security of railway property and revenue, and appropriate action that can be taken to resolve these problems
- regulations and codes of practice relevant to maintaining the security of railway property and revenue
- relevant rail danger zones
- relevant work health and safety (WHS)/occupational health and safety (OHS) procedures and guidelines
- security management plan
- workplace procedures and policies for maintaining the security of railway property and revenue
- workplace security layout
- workplace security systems and requirements.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate rail workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry

- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
