TLIO5017 Manage security of storage facilities

Release: 1

TLIO5017 Manage security of storage facilities

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to manage security of storage facilities as part of work undertaken in various contexts within the transport and logistics industry.

It includes assessing security risks, specifying security requirements and implementing, monitoring and reviewing storage security plan performance.

The unit generally applies to those who lead individuals or teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

O - Security

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Assess security risks	1.1 Records of security breaches, thefts and damage are reviewed to identify past security storage incidents
	1.2 Potential risks to the security of stock, personnel, facilities, information and equipment are identified, considering internal and external factors
	1.3 Discrepancies between identified risk and current storage security situations are noted

2	Specify security requirements	2.1	Decisions and adjustments to storage security equipment and procedures are made based on risk assessment
		2.2	Questions and feedback from stakeholders are sought and responded to promptly
		2.3	Finalised storage security plan offering optimal security of storage facility is devised taking into account all feedback and assessments of security risks
3	Implement storage security plan	3.1	Storage security plan is implemented and appropriate workplace personnel are informed
		3.2	Staff competency requirements to implement security plan are addressed with required training
		3.3	Equipment and needs for improvements are allocated and/or obtained
		3.4	Storage security plan, policies and procedures are trialled in conjunction with a system for feedback to identify and suggest further improvements
4	Monitor and review storage security plan performance	4.1	Security reports are collated and categorised
		4.2	Reports are compared to identify trends in breaches
		4.3	Security procedures are modified to rectify identified gaps

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIO5017A Manage security of storage facilities.
