plan**

**Release: 1**

# Assessment Requirements for TLIP5004 Develop a transport and logistics business plan

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment in accordance with standard operating procedures
- applying relevant legislation and workplace procedures
- communicating effectively with others when developing a transport and logistics business plan
- completing documentation related to work activities and the development of a transport and logistics business plan
- modifying activities to cater for variations in workplace contexts and environment
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- planning and organising business systems and activities
- prioritising work and coordinating self and others in relation to workplace activities
- providing leadership and working collaboratively with others when developing a transport and logistics business plan
- reading and interpreting business and market data, regulatory requirements and other planning information relevant to the development of a transport and logistics business plan
- reporting and/or rectifying identified problems promptly, in accordance with workplace procedures
- selecting and applying appropriate technology, information systems and procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- application of current competencies within functional activity
- application of relevant Australian and international standards and associated certification requirements
- Australian and international regulations, codes of practice and legislative requirements relevant to business operations
- equipment applications, capacities, configurations, safety hazards and control
- operational competitor and internal business systems, resources, management and workplace operating systems
- hazards that may exist in the operation of a transport and logistics business, and ways of controlling the risks involved
- market and other external environmental factors including the regulatory environment
- organisational strengths and weaknesses including the competencies of individuals in the team/group
- problems that may occur during the development of a transport and logistics business plan, and action that can be taken to report or resolve these problems
- relevant workplace documentation procedures
- resource availability including the competencies of individuals in the team/group
- workplace processes for developing a transport and logistics business plan.

## **Assessment Conditions**

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
