TLIS2033 Install and repair temporary track supports

Release: 1

TLIS2033 Install and repair temporary track supports

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to install and repair temporary track supports in accordance with safeworking and regulatory requirements, and workplace procedures.

It includes determining job requirements, preparing and installing temporary support and completing documentation.

People achieving competence in this unit will need to fulfil the applicable state/territory legislated rail safety requirements and to comply with relevant codes of practice and/or guidelines.

Work is performed under some supervision, generally within a team environment. It involves the application of routine operational principles and procedures when installing and repairing temporary track supports, as part of workplace activities across a variety of operational contexts within the Australian rail system.

Operators of mechanised equipment must have undertaken training and, where appropriate, hold the relevant licence, permit or certificate and be recognised as competent for the class of machinery being used.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

S – Construction and Installation

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Prepare for work

- 1.1 Worksite is identified
- 1.2 Hazards are identified, risks are assessed and control measures are implemented
- 1.3 Plant, equipment and materials are organised to meet the scope of the job and installation type

2 Install or repair temporary support

- 2.1 Foundation is prepared as required, in accordance with site requirements and specifications
- 2.2 Component surfaces are treated with appropriate coating as required to prevent degradation of components
- 2.3 Temporary support is installed in accordance with workplace standards and procedures
- 2.4 Level and alignment is adjusted to running surface to ensure correct geometry and profile
- 2.5 Temporary support is adjusted/readjusted and secured as required, to ensure full bearing is achieved for integrity and safety of structure

3 Complete documentation

- 3.1 Required documentation procedures and processes are confirmed
- 3.2 Documentation is filed in legibly and proofread
- 3.3 Documentation is processed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIS2033A Install and repair temporary track supports.
