Assessment Requirements for TLIW0002 Clean and inspect pooled equipment

Release: 1

Assessment Requirements for TLIW0002 Clean and inspect pooled equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment in accordance with operating procedures
- applying precautions and required action to minimise, control or eliminate identified hazards
- communicating effectively with relevant personnel
- identifying, selecting and using relevant equipment
- inspecting pooled equipment to workplace standards
- interpreting and following relevant instructions, procedures, information and signs
- maintaining cleaning tools and equipment
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- tagging damaged pooled equipment for repair, recycling or disposal
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- documentation and recording requirements for cleaning and inspecting pooled equipment
- equipment used for cleaning and inspecting pooled equipment and the precautions and procedures that should be followed in its use
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for cleaning and inspecting pooled equipment
- potential problems and possible solutions for cleaning and inspecting pooled equipment
- relevant WHS/OHS and environmental protection procedures and guidelines
- relevant legislation, regulations, codes of practice and industry guidelines relating to cleaning and inspecting pooled equipment
- site layout and obstacles
- workplace procedures and policies for cleaning and inspecting pooled equipment including test methods for pooled equipment strength and integrity

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.
