Assessment Requirements for TLIW2037
Clip and secure points

Release: 1

Assessment Requirements for TLIW2037 Clip and secure points

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating effectively with individuals and/or groups
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- identifying position of points and adjusting them in accordance with workplace requirements
- placing points clip in accordance with workplace procedures
- reading and interpreting relevant organisational and/or network owner procedures for placing and removing points, clips and safety devices
- removing points clip in accordance with workplace procedures
- restoring points to correct position in accordance with workplace procedures
- working within timeframes typically expected for the work function and industrial environment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- organisational and/or network owner procedures for placing and removing points clips and lock/tag
- relevant rail danger zones
- relevant sections of applicable state/territory legislated rail safety requirements, codes of practice and/or guidelines.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate rail corridor workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation with terminology as defined by the relevant Rail Infrastructure Manager safeworking system including workplace procedures, regulations, rules and codes of practice.
