Assessment Requirements for TLIW5004 Manage train planning

Release: 1

Assessment Requirements for TLIW5004 Manage train planning

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing and using rail industry standards and codes of practice
- applying relevant legislation and workplace procedures
- developing and implementing strategies to optimise train planning
- identifying job hazards and required action to minimise, control or eliminate identified hazards
- researching relevant information.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- capacity of network
- changes in rail industry operations and technology with implications for rail planning
- key concepts and definitions relating to rail operations
- key principles and practices associated with railway operations
- key rail industry regulatory requirements and standards
- rail industry and rail industry terminology, including terminology used in rail industry standards
- rail regulatory framework
- rail safety operating principles
- relevant duty holders
- relevant information to manage train planning
- relevant rail industry standards and codes of practice
- relevant rail safety, work health and safety (WHS)/occupational health and safety (OHS) and environmental legislation related to train planning and running
- train planning and management systems.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in rail workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate rail workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, rail industry standards, codes of practice and operation manuals.
