- methods for identifying stakeholder integrity
- policies and procedures relevant to supply chain ethical practice
- product provenance
- review and report requirements
- supply chain stakeholders
- sustainability and welfare practices and issues in supply chains
- types of unethical practices in supply chains.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so. Where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to a range of

- exercises, case studies or simulations
- materials, tools and digital supply chain equipment used in industry
- documentation including organisational policies and procedures, industry standards, legislation, regulations, codes of practice, operational manuals and equipment specifications.
