TLIX0055 Conduct configuration management

Release: 1

TLIX0055 Conduct configuration management

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to conduct configuration management activities in accordance with relevant organisational policy and procedures.

It includes preparing for, conducting, monitoring and reporting on configuration management activities. It also includes maintaining configuration management records in accordance with relevant organisational policy and procedures.

The range of activities to be conducted includes collecting, storing, recording, recovering and analysing data; maintaining associated workplace networks; and stakeholder requirements.

This unit was developed for configuration management specialists working within materiel logistics but may be applicable to individuals in broader logistics roles.

Individuals work independently or as part of a team under direct or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

X – Logistics

Unit Sector
