Assessment Requirements for TLIX0058 Conduct materiel logistics activities

Release: 1

Assessment Requirements for TLIX0058 Conduct materiel logistics activities

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- adhering to and applying relevant data and information management processes
- analysing and evaluating information, and determining how it may be impacted by materiel logistics activities or how materiel logistics activities may be impacted by the information being considered
- analysing data and information
- applying relevant materiel logistics knowledge to work and to guide problem solving
- consulting and negotiating with internal and external stakeholders, and resolving potential areas of conflict or concern to ensure overall objectives are achieved
- identifying relationships between organisational goals and recognising how own work contributes to achieving these goals
- identifying, reviewing and analysing relevant information that may impact on or be impacted by integrated logistics support activities
- incorporating feedback and analysis of information to overcome challenges or setbacks
- managing time and prioritising work to ensure objectives are met in accordance with required schedule
- undertaking performance measurement to enable objectives to be measured against defined parameters
- using appropriate information management systems
- using materiel logistics program strategic objectives to identify long-term factors and external considerations for conducting integrated logistics support activities.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- integrated logistics support
- level of written communication required to prepare correspondence and reports
- materiel logistics processes
- materiel sustainment

- organisational policy and procedures related to materiel logistics
- organisational role relevant to materiel logistics
- product knowledge related to systems and equipment in service in the organisation
- consideration of reliability, availability and maintainability factors
- safety, legislative and statutory requirements, including relevant environmental and sustainability issues.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.
