TLIX0060 Develop and review materiel logistics plans

Release: 1

TLIX0060 Develop and review materiel logistics plans

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to develop and review materiel logistics support plans including associated subordinate plans to ensure efficient and effective delivery of materiel logistics throughout the materiel system life cycle.

This unit was developed for integrated logistics support specialists working in materiel logistics including integrated logistics support roles or materiel sustainment roles and may be applicable to individuals in broader logistics roles.

Individuals work independently or as part of a team under direct or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs. All activities are carried out in accordance with relevant organisational policy and procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

X – Logistics

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
