# **TLIX0065 Maintain technical data and information**

**Release: 1**

# TLIX0065 Maintain technical data and information

## Modification History

**Release 1.** This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Application

This unit involves the skills and knowledge required to maintain technical data and information.

It includes collating and updating technical data and information systems and preparing reports from organisation's technical data management systems in good order on a day-to-day basis in accordance with relevant organisational policy and procedures.

This unit was developed for individuals involved in design, development and maintenance of technical data but is applicable to individuals in broader logistics roles.

Individuals work independently or as part of a team under direct or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs. All activities are carried out in accordance with relevant organisational policy and procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

X – Logistics

## Unit Sector
