# Assessment Requirements for TLIX0068 Manage configuration management processes

# Assessment Requirements for TLIX0068 Manage configuration management processes

## Modification History

**Release 1.** This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- adhering to relevant work health and safety (WHS)/occupational health and safety (OHS) requirements
- applying configuration management and project management knowledge relevant to configuration management processes
- focusing on clearly communicating configuration management processes, presenting information accurately and selecting appropriate medium for communication to a range of audiences
- identifying and establishing configuration management operation processes
- identifying, acquiring and adjusting resources as required to ensure effective and efficient performance of processes
- identifying, reviewing and analysing information that may impact on configuration management processes, or may be impacted by configuration management processes
- incorporating feedback and analysis of information to overcome challenges or setbacks
- initiating and efficiently monitoring processes
- initiating any remedial action required
- managing configuration management processes effectively and efficiently
- negotiating and communicating effectively with key internal and external stakeholders and resolving potential areas of conflict or concern to ensure overall configuration management objectives are achieved
- undertaking research and analysis to identify and develop configuration management processes
- using appropriate information management systems
- using organisational strategic objectives to identify and assess potential alliances and effective strategies.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- codification and cataloguing processes

- configuration management principles and processes
- industrial base capability
- legislative and regulatory environment, including relevant environmental and sustainability issues
- logistics governance
- management processes relevant to configuration management
- organisational policy and procedures
- organisational role relevant to configuration management
- product knowledge related to systems in service in the organisation
- safety, legislative and statutory requirements, including relevant environmental and sustainability issues.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.
