Assessment Requirements for TLIX0076 Plan logistics support for deployed operations

Assessment Requirements for TLIX0076 Plan logistics support for deployed operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- analysing and validating numerical information accurately
- analysing task complexities such as limitations, freedoms, vulnerabilities, environmental considerations and time limitations
- applying a broad range of problem-solving strategies to planning outcomes
- applying planning process in response to a logistics support task in a deployed setting
- applying relevant organisational policy and procedures
- communicating effectively with stakeholders
- identifying potential solutions to problems or challenges to progress operations
- interpreting instructions and applying to actions and tasks
- interpreting policies and procedures
- making decisive, informed decisions that align with organisational requirements
- managing own planning tasks in accordance with organisational requirements
- preparing and issuing instructions that clearly communicate intent and operational tasks
- undertaking analysis to determine where internal and external factors impact on logistics support requirements and adjusting plans accordingly
- using appropriate information technology and software.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- communication techniques and protocols
- environment consideration in planning logistics support
- logistics and deployment concepts
- organisation function and logistics capabilities
- organisational policy and procedures pertaining to logistics and deployment
- organisational role relevant to specialist logistics support
- organisational writing conventions
- planning processes relevant to logistics support in deployed operations

- risks to logistics support
- specialist understanding of customer and stakeholder requirements.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.
