Assessment Requirements for TLIX4008 Conduct integrated logistics support activities

Release: 1

Assessment Requirements for TLIX4008 Conduct integrated logistics support activities

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adhering to and applying relevant data and information management processes
- analysing data and information
- applying relevant integrated logistics support and project management knowledge
- applying integrated logistics support knowledge to assist in work and to guide problem solving
- consulting and negotiating with internal and external stakeholders, and resolving potential areas of conflict or concern to ensure overall objectives are achieved
- displaying resilience by continuing to move forward despite criticism or setbacks
- identifying relationships between organisational goals and recognising how own work contributes to achieving these goals
- identifying, reviewing and analysing relevant information that may impact on or be impacted by integrated logistics support activities
- managing time and prioritising work to ensure objectives are met in accordance with required schedule
- undertaking performance measurement to enable objectives to be measured against defined parameters
- using appropriate information technology and software
- using materiel logistics program strategic objectives to identify long-term factors and external considerations for conducting integrated logistics support activities.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- integrated logistics support processes
- level of written communication required to prepare correspondence and reports
- organisational policy and procedures related to integrated logistics support
- organisational role relevant to integrated logistics support
- product knowledge related to systems and/or equipment in service in the organisation
- reliability, availability and maintainability
- safety, legislative and statutory requirements, including relevant environmental and sustainability issues

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- computer and relevant software
- legislation, guidelines, procedures and protocols relating to integrated logistics support
- integrated logistics support plans and associated subordinate plans.
