TLIX4011 Conduct logistics support analysis activities

Release: 1

TLIX4011 Conduct logistics support analysis activities

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to conduct logistics support analysis activities in accordance with relevant organisational policy and procedures.

It includes the requirement to conduct a range of processes including capturing, recording, recovering and analysing data; maintaining associated workplace networks; and stakeholder requirements.

This unit was developed for logistics specialists working within materiel logistics but is applicable to individuals in broader logistics roles.

Typically these individuals work independently or as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

X – Logistics

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
