Assessment Requirements for TLIX4028

Apply knowledge of logistics

Release: 2

Assessment Requirements for TLIX4028 Apply knowledge of logistics

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Updated wording to Application and Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adhering to relevant logistics requirements
- analysing and interpreting logistics information to determine where internal and external factors impact on the logistics requirements, and adjusting planning accordingly
- applying knowledge of logistics to assist work and to guide problem solving
- communicating key logistics information clearly, presenting information confidently and selecting the appropriate communication medium for a range of audiences
- using appropriate information technology and software.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- logistics information or information systems
- logistics knowledge relevant to the work performed
- relevant and industry-specific information regarding the support to capability and support to operations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the

time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.
