TLIX5012 Develop and review materiel sustainment plans

Release: 1

TLIX5012 Develop and review materiel sustainment plans

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to develop and review materiel sustainment plans and associated subordinate plans to ensure efficient and effective delivery of materiel sustainment across the materiel and materiel system life cycle.

This unit was developed for materiel sustainment specialists working within materiel logistics but is applicable to individuals in broader logistics roles.

Typically these individuals work independently or as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs. All activities are carried out in accordance with relevant organisational policy and procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

X – Logistics

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Identify materiel sustainment

1.1 Materiel sustainment planning requirements are identified in accordance with organisational policy and procedures

requirements

- 1.2 Sources of information relevant to material sustainment are identified and relevant information is accessed in accordance with organisational policy and procedures
