TLIX5013 Develop materiel sustainment processes and procedures

Release: 1

TLIX5013 Develop materiel sustainment processes and procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to develop organisational materiel sustainment processes and procedures.

It includes anticipating and confirming the need for development, the development processes, gathering and analysing information, determining direction, and drafting, releasing and promoting the process. It includes the initial development of procedures integral to the processes.

This unit was developed for materiel sustainment specialists working within materiel logistics but is applicable to individuals in broader logistics roles.

Typically these individuals work independently or as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs. All activities are carried out in accordance with relevant organisational policy and procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

X – Logistics

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential   Performance criteria describe the performance needed to

outcomes.	demonstrate achievement of the element.
