**Assessment Requirements for TLIX5019
Provide specialist materiel sustainment
advice**

Release: 1

Assessment Requirements for TLIX5019 Provide specialist materiel sustainment advice

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- approaching negotiations with a clear understanding of key issues and persuasively negotiating to ensure materiel sustainment considerations are addressed
- communicating materiel sustainment information clearly
- displaying insight into how industry operates and drivers that influence industry dealings
- displaying resilience by continuing to move forward despite criticism or setbacks
- focusing on communicating materiel sustainment advice clearly, presenting information confidently and selecting appropriate medium for communication to influence a range of audiences
- focusing on gaining a clear understanding of others' comments by listening and adapting to audience to ensure materiel sustainment considerations are addressed
- identifying, reviewing and analysing information that may impact on the materiel sustainment program or may be impacted by the materiel sustainment program, including environmental and sustainability issues
- liaising with stakeholders to harness information and opportunities that may impact on materiel sustainment program
- preparing and presenting reports that may be complex, to inform and/or to succinctly present an argument to enable results to be achieved
- providing and receiving feedback in a constructive manner.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- analysis process to provide specialist materiel sustainment
- duty of care as it applies to materiel sustainment
- information sources for providing materiel sustainment
- level of written communication required to prepare letters and reports
- materiel logistics (materiel sustainment and integrated logistics support)
- organisational guidelines and standards
- organisational policy and procedures
- own role in relation to wider organisational or project context
- product knowledge related to systems and/or equipment in service in the organisation
- professional codes of practice
- research techniques for providing materiel sustainment
- specialist materiel sustainment
- verbal communication techniques for providing materiel sustainment.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- computer and relevant software
- legislation, guidelines, procedures and protocols relating to materiel sustainment
- specialist material sustainment plans.
