**Assessment Requirements for TLIX5037
Plan logistics support for deployed
operations**

Release: 1

Assessment Requirements for TLIX5037 Plan logistics support for deployed operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- analysing and validating numerical information accurately
- analysing task complexities such as limitations, freedoms, vulnerabilities, environmental considerations and time limitations
- applying a broad range of problem-solving strategies to planning outcomes
- applying relevant organisational policy and procedures
- applying planning process in response to a logistics support task in a deployed setting
- communicating effectively verbally and in writing
- interpreting instructions and applying to actions and tasks
- interpreting policies and procedures
- making decisive, informed decisions that align with organisational requirements
- managing own planning tasks in accordance with organisational requirements
- moving forward despite planning task difficulty
- preparing and issuing instructions that clearly communicate intent and operational tasks
- undertaking analysis to determine where internal and external factors impact on logistics support requirements and adjusting plans accordingly
- using appropriate information technology and software

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- environment consideration in planning logistics support
- logistics concepts
- organisation, its function and logistics capabilities
- organisational policy and procedures pertaining to logistics
- organisational role relevant to specialist logistics support

- organisational writing conventions
- planning process
- risks to logistics support
- specialist understanding of customer and stakeholder requirements.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
