**Release: 1**

# Assessment Requirements for TLIX6002 Contribute to materiel logistics strategies

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adhering to relevant work health and safety (WHS)/occupational health and safety (OHS) requirements
- analysing materiel logistics information to determine where internal and external factors impact on the materiel logistics environment, and adjusting strategic planning activities accordingly
- applying project management knowledge when contributing to materiel logistics strategies
- building and sustaining positive relationships with team members, stakeholders and clients
- committing to action, even in cases of limited information and conditions of uncertainty
- consulting and negotiating with internal and external stakeholders and resolving potential areas of conflict or concern to ensure overall objectives are achieved
- displaying resilience by continuing to move forward despite criticism or setbacks
- exercising judgement by using intelligence and common sense to shape strategic thinking
- identifying requirements for contribution and adjusting them as necessary to ensure they meet objectives
- identifying, assessing, and prioritising competing objectives to facilitate development of overall materiel logistics strategy
- initiating and efficiently monitoring processes
- initiating remedial action required
- managing time and prioritising work to ensure objectives are met in accordance with required schedule
- preparing complex and sensitive material, presenting information confidently and selecting appropriate medium for maximum communication effect to influence a range of audiences
- sourcing information on best practice approaches adopted in public and private sectors, demonstrating an insight into how industry operates and business drivers that influence industry with their dealings, including environmental and sustainability issues
- undertaking research and analysis to determine operational concepts and strategic objectives, and to identify impacts on materiel logistics environment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- acquisition processes
- business processes
- capability performance measurement
- codification and cataloguing processes
- costing, which may include life cycle costing
- external environment scanning relating to environmental, sustainable, social, political, economic and technological developments
- industrial base capability
- integrated logistics support
- international agreements and arrangements
- interoperability
- legislative and regulatory environment as it relates to materiel logistics
- logistics governance
- logistics support analysis principles and processes
- materiel logistics
- materiel system components
- organisational policy and procedures
- outsourcing/insourcing
- performance measurement
- project management
- strategic planning methodology
- supply chain concepts
- technical regulation
- value chain concepts.

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- computer and relevant software
- legislation, guidelines, procedures and protocols relating to materiel logistics
- materiel logistics plans.
