Assessment Requirements for TLIX6049 Undertake provisioning in support of deployed operations

Assessment Requirements for TLIX6049 Undertake provisioning in support of deployed operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- analysing and validating numerical information accurately and completing mathematical calculations
- analysing task complexities such as limitations, freedoms, vulnerabilities, time limitations
- applying a broad range of problem-solving strategies to planning outcomes
- calculating provisioning requirements of all classes of supply
- engaging with a range of stakeholders to research and collate provisioning information
- identifying accurately, inputs required to undertake provisioning in accordance with operational task
- interpreting policies and procedures
- interpreting policy and instructions, and applying this information to actions and tasks
- making informed decisions that align with organisational requirements
- managing own planning tasks in accordance with organisational requirements
- moving forward despite task difficulty
- preparing and issuing instructions that clearly communicate intent and tasks
- producing provisioning outputs required to support distribution planning
- undertaking analysis to determine where internal and external factors impact on logistics support requirements, and adjusting planning accordingly
- using appropriate information technology and software.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- composition and capability of supply systems and installations
- environmental considerations in provisioning
- fundamentals of sustainment to deployed provisioning
- imperatives of supply
- logistics support concepts
- national support base that supports procurement
- organisation, its function and logistics support capabilities
- organisational policy and procedure relating to procurement and provisioning
- organisational role relevant to specialist logistics support
- organisational role relevant to specialist provisioning
- organisational writing conventions
- planning processes as they apply to deployed operations
- provisioning calculation processes
- relevant risk factors as they apply to deployed operations
- time and stockholding factors, and their effect on provisioning.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
