TLI Transport and Logistics Training Package

Release: 3.0

CONTENTS

TLI10115 Certificate I in Transport and Logistics (Pathways)....44
TLI11215 Certificate I in Warehousing Operations....46
TLI11315 Certificate I in Logistics....48
TLI21216 Certificate II in Driving Operations....51
TLI21315 Certificate II in Rail Infrastructure....58
TLI21416 Certificate II in Stevedoring....63
TLI21616 Certificate II in Warehousing Operations....67
TLI21716 Certificate II in Road Transport Yard Operations (Freight Handler)....72
TLI21815 Certificate II in Logistics....76
TLI21915 Certificate II in Track Protection....79
TLI22015 Certificate II in Shunting....82
TLI22115 Certificate II in Rail Track Vehicle Driving....85
TLI22215 Certificate II in Tram or Light Rail Infrastructure....89
TLI22315 Certificate II in Rail Customer Service....92
TLI22416 Certificate II in Furniture Removal....95
TLI31216 Certificate III in Driving Operations....98
TLI31316 Certificate III in International Freight Forwarding (Operator)....110
TLI31415 Certificate III in Rail Driving....113
TLI31616 Certificate III in Warehousing Operations....116
TLI31716 Certificate III in Mobile Crane Operations....121
TLI31815 Certificate III in Rail Track Surfacing....124
TLI31915 Certificate III in Mechanical Rail Signalling....127
TLI32115 Certificate III in Rail Structures....131
TLI32315 Certificate III in Electric Passenger Train Guard....135
TLI32416 Certificate III in Logistics....138
TLI32515 Certificate III in Rail Infrastructure....142
TLI32615 Certificate III in Rail Signalling....148
TLI32715 Certificate III in Track Protection....151
TLI32815 Certificate III in Rail Yard Coordination....154
TLI32915 Certificate III in Tram or Light Rail Infrastructure....157
TLI33015 Certificate III in Heritage Locomotive Assistant or Steam Locomotive Fireman160
TLI33115 Certificate III in Rail Customer Service....163
TLI33215 Certificate III in Terminal Train Driving....166
TLI33316 Certificate III in Furniture Removal....169
TLI33416 Certificate III in Waste Driving Operations....172
TLI33516 Certificate III in Stevedoring....177
TLI40115 Certificate IV in Rail Safety Investigation....184
TLI41216 Certificate IV in Transport and Logistics (Road Transport - Car Driving Instruction)....186
TLI41316 Certificate IV in Transport and Logistics (Road Transport - Heavy Vehicle Driving Instruction)....188
TLI41416 Certificate IV in Transport and Logistics (Road Transport - Motorcycle Riding Instruction)....191
TLI41515 Certificate IV in Materiel Logistics....193
TLI41616 Certificate IV in International Freight Forwarding (Senior Operator)....197
TLI41715 Certificate IV in Stevedoring Operations....199
TLI41816 Certificate IV in Warehousing Operations....202
TLI41916 Certificate IV in Mobile Crane Operations....205
TLI42016 Certificate IV in Logistics....209

TLI42116 Certificate IV in Driving Operations....214
TLI42215 Certificate IV in Rail Network Control....219
TLI42315 Certificate IV in Rail Infrastructure....222
TLI42415 Certificate IV in Rail Safety Management....226
TLI42516 Certificate IV in Traffic Operations....229
TLI42615 Certificate IV in Train Driving....233
TLI42715 Certificate IV in Tram/Light Rail Control....238
TLI50215 Diploma of Materiel Logistics....241
TLI50316 Diploma of International Freight Forwarding....245
TLI50415 Diploma of Logistics....248
TLI50515 Diploma of Deployment Logistics....252
TLI50615 Diploma of Rail Operations Management....257
TLI50716 Diploma of Bus and Coach Operations....261
TLI50816 Diploma of Customs Broking....264
TLI60115 Advanced Diploma of Materiel Logistics....267
TLI60215 Advanced Diploma of Deployment Logistics....271
AHCARB202A Fell small trees....275
AHCARB205A Operate and maintain chainsaws....280
AHCOHS501A Manage Occupational Health and Safety (OHS) processes....286
AURVGA3002 Recover vehicles....294
BSBADM409 Coordinate business resources....303
Assessment Requirements for BSBADM409 Coordinate business resources....306
BSBADM502 Manage meetings....308
Assessment Requirements for BSBADM502 Manage meetings....312
BSBCMM301 Process customer complaints....314
Assessment Requirements for BSBCMM301 Process customer complaints....317
BSBCMM401 Make a presentation....319
Assessment Requirements for BSBCMM401 Make a presentation....322
BSBCOM501 Identify and interpret compliance requirements....324
Assessment Requirements for BSBCOM501 Identify and interpret compliance requirements....328
BSBCOM601 Research compliance requirements and issues....330
Assessment Requirements for BSBCOM601 Research compliance requirements and issues334
BSBCUS201 Deliver a service to customers....336
Assessment Requirements for BSBCUS201 Deliver a service to customers....339
BSBCUS301 Deliver and monitor a service to customers....341
Assessment Requirements for BSBCUS301 Deliver and monitor a service to customers.345
BSBCUS401 Coordinate implementation of customer service strategies....347
Assessment Requirements for BSBCUS401 Coordinate implementation of customer service strategies....350
BSBCUS501 Manage quality customer service....352
Assessment Requirements for BSBCUS501 Manage quality customer service....355
BSBFIA303 Process accounts payable and receivable....357
Assessment Requirements for BSBFIA303 Process accounts payable and receivable....361
BSBFIM501 Manage budgets and financial plans....363
Assessment Requirements for BSBFIM501 Manage budgets and financial plans....366
BSBHRM405 Support the recruitment, selection and induction of staff....368
Assessment Requirements for BSBHRM405 Support the recruitment, selection and induction of staff....372
BSBHRM513 Manage workforce planning....374
Assessment Requirements for BSBHRM513 Manage workforce planning....378
BSBINM401 Implement workplace information system....380
Assessment Requirements for BSBINM401 Implement workplace information system..383

BSBINM501 Manage an information or knowledge management system 385
Assessment Requirements for BSBINM501 Manage an information or knowledge management system 389
BSBINN502 Build and sustain an innovative work environment 391
Assessment Requirements for BSBINN502 Build and sustain an innovative work environment 395
BSBITU101 Operate a personal computer 397
Assessment Requirements for BSBITU101 Operate a personal computer 400
BSBITU102 Develop keyboard skills 402
Assessment Requirements for BSBITU102 Develop keyboard skills 405
BSBLDR403 Lead team effectiveness 407
Assessment Requirements for BSBLDR403 Lead team effectiveness 410
BSBMGT401 Show leadership in the workplace 412
Assessment Requirements for BSBMGT401 Show leadership in the workplace 416
BSBMGT402 Implement operational plan 418
Assessment Requirements for BSBMGT402 Implement operational plan 422
BSBMGT403 Implement continuous improvement 424
Assessment Requirements for BSBMGT403 Implement continuous improvement 427
BSBMGT502 Manage people performance 429
Assessment Requirements for BSBMGT502 Manage people performance 433
BSBMGT516 Facilitate continuous improvement 435
Assessment Requirements for BSBMGT516 Facilitate continuous improvement 439
BSBMGT517 Manage operational plan 441
Assessment Requirements for BSBMGT517 Manage operational plan 445
BSBMGT605 Provide leadership across the organisation 447
Assessment Requirements for BSBMGT605 Provide leadership across the organisation 451
BSBMGT616 Develop and implement strategic plans 453
Assessment Requirements for BSBMGT616 Develop and implement strategic plans 457
BSBMGT617 Develop and implement a business plan 459
Assessment Requirements for BSBMGT617 Develop and implement a business plan 463
BSBMKG513 Promote products and services to international markets 465
Assessment Requirements for BSBMKG513 Promote products and services to international markets 469
BSBPMG409 Apply project scope management techniques 471
Assessment Requirements for BSBPMG409 Apply project scope management techniques 474
BSBPMG416 Apply project procurement procedures 476
Assessment Requirements for BSBPMG416 Apply project procurement procedures 479
BSBPMG512 Manage project time 481
Assessment Requirements for BSBPMG512 Manage project time 484
BSBPMG514 Manage project cost 486
Assessment Requirements for BSBPMG514 Manage project cost 489
BSBPMG515 Manage project human resources 491
Assessment Requirements for BSBPMG515 Manage project human resources 494
BSBPMG516 Manage project information and communication 496
Assessment Requirements for BSBPMG516 Manage project information and communication 499
BSBPMG518 Manage project procurement 501
Assessment Requirements for BSBPMG518 Manage project procurement 505
BSBPMG522 Undertake project work 507
Assessment Requirements for BSBPMG522 Undertake project work 511
BSBPMG604 Direct cost management of a project program 513
Assessment Requirements for BSBPMG604 Direct cost management of a project program 516
BSBPMG606 Direct human resources management of a project program 518

Assessment Requirements for BSBPMG606 Direct human resources management of a project program 522
BSBPMG609 Direct procurement and contracting for a project program 524
Assessment Requirements for BSBPMG609 Direct procurement and contracting for a project program 528
BSBPUR301 Purchase goods and services 530
Assessment Requirements for BSBPUR301 Purchase goods and services 533
BSBREL401 Establish networks 535
Assessment Requirements for BSBREL401 Establish networks 538
BSBREL402 Build client relationships and business networks 540
Assessment Requirements for BSBREL402 Build client relationships and business networks 544
BSBRKG304 Maintain business records 546
Assessment Requirements for BSBRKG304 Maintain business records 549
BSBRSK401 Identify risk and apply risk management processes 551
Assessment Requirements for BSBRSK401 Identify risk and apply risk management processes 554
BSBRSK501 Manage risk 556
Assessment Requirements for BSBRSK501 Manage risk 560
BSBSUS501 Develop workplace policy and procedures for sustainability 562
Assessment Requirements for BSBSUS501 Develop workplace policy and procedures for sustainability 566
BSBWHS303 Participate in WHS hazard identification, risk assessment and risk control 568
Assessment Requirements for BSBWHS303 Participate in WHS hazard identification, risk assessment and risk control 572
BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements 574
Assessment Requirements for BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements 578
BSBWHS501 Ensure a safe workplace 580
Assessment Requirements for BSBWHS501 Ensure a safe workplace 584
BSBWOR201 Manage personal stress in the workplace 586
Assessment Requirements for BSBWOR201 Manage personal stress in the workplace 590
BSBWOR301 Organise personal work priorities and development 592
Assessment Requirements for BSBWOR301 Organise personal work priorities and development 595
BSBWOR501 Manage personal work priorities and professional development 597
Assessment Requirements for BSBWOR501 Manage personal work priorities and professional development 600
BSBWOR502 Lead and manage team effectiveness 602
Assessment Requirements for BSBWOR502 Lead and manage team effectiveness 606
BSBWRK411 Support employee and industrial relations procedures 608
Assessment Requirements for BSBWRK411 Support employee and industrial relations procedures 611
BSBWRK510 Manage employee relations 613
Assessment Requirements for BSBWRK510 Manage employee relations 617
BSBWRT301 Write simple documents 619
Assessment Requirements for BSBWRT301 Write simple documents 622
CHCCCS020 Respond effectively to behaviours of concern 624
Assessment Requirements for CHCCCS020 Respond effectively to behaviours of concern 627
CPCCCM2007B Use explosive power tools 629
CPCCCM2008B Erect and dismantle restricted height scaffolding 639
CPCCCM2010B Work safely at heights 649

Approved Page 5 of 6048

CPCCCM3003A Work safely around power sources, services and assets 657
CPCCCO3054A Operate concrete agitator trucks 667
CPCCLDG3001A Licence to perform dogging 676
CPCCLRG3001A Licence to perform rigging basic level 686
CPCCLRG3002A Licence to perform rigging intermediate level 699
CPCCOHS1001A Work safely in the construction industry 711
CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry 722
CPCCSF2003A Cut and bend materials using oxy-LPG equipment 736
CPPSEC5001A Establish and maintain an Occupational Health and Safety system 746
CPPWMT3011A Respond to waste emergencies 756
CPPWMT3015A Move waste using loadshifting equipment 766
CPPWMT3044A Identify wastes and hazards 777
FDFFS2001A Implement the food safety program and procedures 784
FDFFS3001A Monitor the implementation of quality and food safety programs 793
FPICOT3261 Transport forestry logs using trucks 804
HLTAID001 Provide cardiopulmonary resuscitation 815
Assessment Requirements for HLTAID001 Provide cardiopulmonary resuscitation 818
HLTAID002 Provide basic emergency life support 821
Assessment Requirements for HLTAID002 Provide basic emergency life support 824
HLTAID003 Provide first aid 828
Assessment Requirements for HLTAID003 Provide first aid 831
HLTAID006 Provide advanced first aid 835
Assessment Requirements for HLTAID006 Provide advanced first aid 839
HLTWHS006 Manage personal stressors in the work environment 844
Assessment Requirements for HLTWHS006 Manage personal stressors in the work environment 846
MARC022 Perform mooring and unmooring activities 848
Assessment Requirements for MARC022 Perform mooring and unmooring activities 853
MARE002 Communicate during mooring and unmooring activities 857
Assessment Requirements for MARE002 Communicate during mooring and unmooring activities 861
MARF017 Follow work health and safety, and emergency procedures during mooring and unmooring activities 864
Assessment Requirements for MARF017 Follow work health and safety, and emergency procedures during mooring and unmooring activities 868
MEM12023A Perform engineering measurements 872
MEM18001C Use hand tools 878
MEM24001B Perform basic penetrant testing 884
MEM24003B Perform basic magnetic particle testing 891
MEM24012C Apply metallurgy principles 898
MSS402080A Undertake root cause analysis 905
NWP227B Control vegetation on a site 912
PMC552061C Deliver concrete to site 918
PSPGOV205B Participate in workplace change 926
PSPGOV306B Implement change 932
PSPGOV404B Develop and implement work unit plans 938
PSPGOV406B Gather and analyse information 945
PSPGOV413A Compose complex workplace documents 953
PSPGOV421A Exercise delegations 961
PSPGOV503B Coordinate resource allocation and usage 967
PSPGOV504B Undertake research and analysis 973
PSPGOV506A Support workplace coaching and mentoring 981

PSPGOV511A Provide leadership....991
PSPGOV512A Use complex workplace communication strategies....999
PSPGOV513A Refine complex workplace documents....1007
PSPGOV515A Develop and use political nous....1015
PSPGOV516A Develop and use emotional intelligence....1021
PSPGOV518A Benchmark performance....1028
PSPGOV519A Manage performance....1036
PSPGOV524A Interpret data and related statistics....1044
PSPGOV602B Establish and maintain strategic networks....1050
PSPGOV605A Persuade and influence opinion....1056
PSPGOV606A Prepare high-level/sensitive written materials....1065
PSPHR504A Implement workforce planning and succession strategies....1073
PSPHR620A Manage organisational development....1081
PSPMNGT602B Manage resources....1089
PSPMNGT608B Manage risk....1096
PSPMNGT610A Manage public sector financial resources....1107
PSPMNGT613A Develop partnering arrangements....1115
PSPMNGT615A Influence workforce effectiveness....1122
PSPMNGT701B Provide strategic direction....1131
PSPPM401B Design simple projects....1138
PSPPM402B Manage simple projects....1149
PSPPM403B Close simple projects....1158
PSPPM504A Carry out complex project activities....1166
PSPPOL404A Support policy implementation....1175
PSPPOL602A Provide policy advice....1181
PSPPOL603A Manage policy implementation....1188
PSPPROC303A Carry out basic procurement....1194
PSPPROC405C Dispose of assets....1201
PSPPROC411A Plan procurement....1208
PSPPROC412A Develop and distribute requests for offers....1217
PSPPROC413A Select providers and develop contracts....1226
PSPPROC414A Manage contracts....1233
PSPPROC503B Manage contract performance....1243
PSPPROC504B Finalise contracts....1253
PSPPROC505A Manage procurement risk....1260
PSPPROC506A Plan to manage a contract....1267
PSPPROC603C Divest strategic assets....1277
PSPPROC604B Plan for strategic procurement....1284
PSPPROC605B Coordinate strategic procurement....1293
PSPPROC606B Negotiate strategic procurement....1303
PSPPROC607A Manage strategic contracts....1312
PSPPROC704A Influence and define strategic procurement....1321
PSPPROC705A Establish strategic procurement context....1328
PSPREG411A Gather information through interviews....1338
PSPREG418A Advise on progress of investigations....1347
PSPSEC602A Manage security awareness....1353
PUACOM007B Liaise with other organisations....1359
PUADEFVH001A Conduct recovery vehicle operations in a field environment....1363
PUADEFVH002A Extract disabled equipment using winching techniques in a field environment....1371
PUAOPE001B Supervise response....1378
PUAWER005B Operate as part of an emergency control organisation....1388
RIIBEF402D Supervise on-site operations....1394

Assessment Requirements for RIIBEF402D Supervise on-site operations....1397
RIICBS312D Conduct bitumen tanker operations....1400
Assessment Requirements for RIICBS312D Conduct bitumen tanker operations....1403
RIICCM201D Carry out measurements and calculations....1406
Assessment Requirements for RIICCM201D Carry out measurements and calculations1408
RIICCM203D Read and interpret plans and job specifications....1411
Assessment Requirements for RIICCM203D Read and interpret plans and job specifications....1413
RIICCM205D Carry out manual excavation....1416
Assessment Requirements for RIICCM205D Carry out manual excavation....1419
RIICCM207D Spread and compact materials manually....1422
Assessment Requirements for RIICCM207D Spread and compact materials manually1425
RIICCM208D Carry out basic levelling....1428
Assessment Requirements for RIICCM208D Carry out basic levelling....1431
RIICCM209D Carry out concrete work....1434
Assessment Requirements for RIICCM209D Carry out concrete work....1437
RIIHAN301D Operate elevating work platform....1440
Assessment Requirements for RIIHAN301D Operate elevating work platform....1443
RIIMPO317D Conduct roller operations....1446
Assessment Requirements for RIIMPO317D Conduct roller operations....1449
RIIMPO318D Conduct civil construction skid steer loader operations....1453
Assessment Requirements for RIIMPO318D Conduct civil construction skid steer loader operations....1456
RIIMPO319D Conduct backhoe/loader operations....1460
Assessment Requirements for RIIMPO319D Conduct backhoe/loader operations....1463
RIIMPO320D Conduct civil construction excavator operations....1467
Assessment Requirements for RIIMPO320D Conduct civil construction excavator operations....1470
RIIMPO321D Conduct civil construction wheeled front end loader operations....1474
Assessment Requirements for RIIMPO321D Conduct civil construction wheeled front end loader operations....1477
RIIMPO322D Conduct civil construction tracked front end loader operations....1481
Assessment Requirements for RIIMPO322D Conduct civil construction tracked front end loader operations....1484
RIIMPO326D Conduct civil construction water cart operations....1488
Assessment Requirements for RIIMPO326D Conduct civil construction water cart operations....1491
RIIRIS401D Apply site risk management system....1495
Assessment Requirements for RIIRIS401D Apply site risk management system....1498
RIIWHS202D Enter and work in confined spaces....1501
Assessment Requirements for RIIWHS202D Enter and work in confined spaces....1504
RIIWHS204D Work safely at heights....1507
Assessment Requirements for RIIWHS204D Work safely at heights....1510
RIIWHS205D Control traffic with stop-slow bat....1513
Assessment Requirements for RIIWHS205D Control traffic with stop-slow bat....1515
RIIWHS302D Implement traffic management plan....1518
Assessment Requirements for RIIWHS302D Implement traffic management plan....1521
SIRCDIS302 Deliver medicines to customers outside the pharmacy....1524
SIRCHCS201 Support the supply of Pharmacy Medicines and Pharmacist Only Medicines1531
SITHFAB201 Provide responsible service of alcohol....1539
SITXCOM401 Manage conflict....1550
SITXEVT605 Develop event transport plans....1557
SITXFIN402 Manage finances within a budget....1566

Approved Page 8 of 6048

TLI10115 Certificate I in Transport and Logistics (Pathways)

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This qualification is a cross-sector certificate using units in the TLI Transport and Logistics Training Package, which provides a pathway for those who have had limited access to formal vocational and education training such as young unemployed people, early school leavers and students at risk, older unemployed people, Indigenous groups, geographically disadvantaged, and people with learning difficulties.

It is also designed to assist Year 9 and 10 students as a framework for a structured workplace learning program, and to develop employability and technical skills required by those commencing a career in the Transport and Logistics Industry.

The breadth, depth and complexity of knowledge and skills in this qualification would prepare a person to perform a defined range of activities, most of which may be routine and predictable.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **7 units of competency** comprising:

3 core units listed below plus

1 technical elective unit from the technical elective units listed below **plus**

3 general elective units may be selected from this Training Package or from any relevant nationally endorsed Training Package or accredited course.

The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIPC1001 Demonstrate care and apply safe practices at work

TLIPC1002 Adapt to work requirements in the transport and logistics industry

TLIPC1003 Apply effective work practices

Technical elective units

TLIPC1004 Complete courier delivery operations

TLIPC1005 Complete small store operations

General elective units

3 general elective units to be selected from this Training Package or any relevant nationally endorsed Training Package or accredited course.

Qualification Mapping Information

This qualification replaces and is equivalent to TLIPC110 Certificate I in Transport and Logistics (Pathways).

TLI11215 Certificate I in Warehousing Operations

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for the Warehousing and Storage Industry.

The breadth, depth and complexity of knowledge and skills in this qualification would prepare a person to perform a defined range of activities, most of which may be routine and predictable.

No licensing legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **10 units of competency** comprising:

2 core units listed below plus

8 general elective units from the general elective units list below. Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified in the unit are complied with.

Core units

TLIF1001	Follow work health and safety procedures
TLIL1001	Complete workplace orientation and induction procedures

General elective units

TLIA1001	Secure cargo

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIA2011	Package goods
TLIA2012	Pick and process orders
TLIA2022	Participate in stocktakes
TLIB1031	Clean up plant, equipment and worksite
TLIC1013	Ride courier/delivery bicycle
TLID1001	Shift materials safely using manual handling methods
TLID1002	Shift a load using manually-operated equipment
TLIE1003	Participate in basic workplace communication
TLIE1005	Carry out basic workplace calculations
TLIF1002	Conduct housekeeping activities
TLIF1009	Conduct cleaning operations in enclosed spaces
TLIG1001	Work effectively with others
TLII1002	Apply customer service skills
TLIU1013	Prepare for environmentally sustainable work practices

Qualification Mapping Information

This qualification replaces and is equivalent to TLI11210 Certificate I in Warehousing Operations.

TLI11315 Certificate I in Logistics

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is an entry level qualification for the Transport and Logistics Industry. It involves the breadth, depth and complexity of knowledge and skills required to prepare a person to perform a defined range of activities, most of which may be routine and predictable.

Job roles:

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Logistics Assistant
- Logistics General Hand.

No licensing legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **7 units of competency** comprising:

3 core units listed below plus

4 general elective units from the general elective units listed below. Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIG1001	Work effectively with others
TLIPC1001	Demonstrate care and apply safe practices at work

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIPC1002	Adapt to work requirements in the transport and logistics industry

General elective units

BSBITU101	Operate a personal computer
BSBITU102	Develop keyboard skills
TLIA1001	Secure cargo
TLIA2013	Receive goods
TLIA2020	Replenish stock
TLIA2021	Despatch stock
TLIA2022	Participate in stocktakes
TLIB1024	Clean transportation units and facilities for passenger use
TLIB1028	Maintain and use hand tools
TLIB1030	Undertake general site maintenance
TLIB1031	Clean up plant, equipment and worksite
TLID1001	Shift materials safely using manual handling methods
TLID1002	Shift a load using manually-operated equipment
TLIE1003	Participate in basic workplace communication
TLIE1005	Carry out basic workplace calculations

TLI21216 Certificate II in Driving Operations

Modification History

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package.

Packaging rules for the elective units have been clarified.

The following unit has been added to the general elective units:

- TLIF0005 Apply a fatigue risk management system.

Release 1. This is first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in driving operation job roles within the Transport and Logistics industry.

It involves a prescribed range of tasks involving known routines and procedures, and taking some accountability for the quality of work outcomes.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Courier driver
- Express driver
- Pickup and Delivery driver
- Priority driver
- Taxi Truck driver
- Taxi driver
- Tow Truck driver.

Successful achievement of the licencing units within the qualification must align with licencing and regulatory requirements applicable to driving and state/territory regulatory requirements.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Packaging Rules A total of **18 units of competency** comprising**:**

© Commonwealth of Australia, 2025 Industry Skills Australia

6 core units listed below **plus**

1 licensing/industry elective unit relevant to the vehicle type applicable to the job role from the licensing/industry elective units listed below **plus**

All units within one of the **specialist elective groups** (job roles) from Group A, Group B, Group C, Group D or Group E listed below **plus**

4 general elective units from the general elective units listed below if selecting Group E **or**

5 general elective units from the general elective units listed below if selecting Group A, Group C, Group D **or**

6 general elective units from the general elective units listed below if selecting Group B.

Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The units must contribute to the vocational outcomes of the qualification.

Elective units can only be counted once towards the qualification packaging rules i.e. if a unit is listed in both a specialist elective group and the general elective group, it can only be counted as one of the elective units required.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLID1001	Shift materials safely using manual handling methods
TLIE1005	Carry out basic workplace calculations
TLIF1001	Follow work health and safety procedures
TLIF2010	Apply fatigue management strategies
TLIH2001	Interpret road maps and navigate pre-determined routes
TLIL1001	Complete workplace orientation/induction procedures

Licensing/Industry elective units

TLIC1051	Operate commercial vehicle

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIC2002	Drive light rigid vehicle
TLIC2009	Drive taxi
TLIC2012	Ride courier/delivery motorcycle
TLIC3003	Drive medium rigid vehicle
TLIC3004	Drive heavy rigid vehicle
TLILIC2014	Licence to drive a light rigid vehicle
TLILIC2015	Licence to drive a medium rigid vehicle
TLILIC2016	Licence to drive a heavy rigid vehicle

Specialist elective units

Select one group (job role) from the following options:

Group A: Medium Freight

Group B: Tow Truck

Group C: Taxi

Group D: Community Service

Group E: General

Group A: Medium Freight

TLIB2004	Carry out vehicle inspection
TLID2004	Load and unload goods/cargo
TLIE2008	Process workplace documentation
TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures
TLIF2006	Apply accident-emergency procedures
TLII1002	Apply customer service skills

Group B: Tow Truck

TLIB2079	Set up and secure a towing situation
TLIC3035	Manage the operation of a tow truck

© Commonwealth of Australia, 2025 Industry Skills Australia

TLID2004	Load and unload goods/cargo
TLIE2008	Process workplace documentation
TLII1002	Apply customer service skills

Group C: Taxi

TLIB2090	Use communication systems in a taxi
TLIF2072	Comply with safety and security procedures
TLIH3004	Identify major roads, services and attractions
TLII2019	Provide taxi customer service
TLIL2060	Complete induction to the transport industry
TLIP2037	Carry out financial transactions and maintain records

Group D: Community Service

TLIB2004	Carry out vehicle inspection
TLIC3011	Transport passengers with disabilities
TLID2004	Load and unload goods/cargo
TLIE2008	Process workplace documentation
TLIF2019	Ensure a safe on-board passenger and working environment
TLIJ2001	Apply quality procedures

Group E: General

TLIA1001	Secure cargo
TLIB2004	Carry out vehicle inspection
TLID2004	Load and unload goods/cargo
TLIE1003	Participate in basic workplace communication

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIE2008	Process workplace documentation
TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures
TLII1002	Apply customer service skills

General elective units

TLIA1001	Secure cargo
TLIA2041	Manually sort mail and parcels
TLIA2042	Despatch mail
TLIA2043	Consolidate mail
TLIA2044	Carry out delivery operations
TLIA2045	Process international parcels and letters
TLIA2046	Process parcels and letters
TLIA2047	Stream mail
TLIB1080	Use, clean and maintain towing equipment
TLIB2004	Carry out vehicle inspection
TLIB2079	Set up and secure a towing situation
TLIB2090	Use communication systems in a taxi
TLIC1013	Ride courier/delivery bicycle
TLIC1051	Operate commercial vehicle
TLIC2012	Ride courier/delivery motorcycle
TLIC2040	Provide wheelchair accessible taxi services to passengers with disabilities
TLIC2049	Operate heavy vehicle on unsealed roads
TLIC3011	Transport passengers with disabilities
TLIC3035	Manage the operation of a tow truck

© Commonwealth of Australia, 2025 Industry Skills Australia

TLID2004	Load and unload goods/cargo
TLID2029	Prepare articles for delivery
TLIE1003	Participate in basic workplace communication
TLIE2008	Process workplace documentation
TLIE3004	Prepare workplace documents
TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures
TLIF0005	Apply a fatigue risk management system
TLIF2006	Apply accident-emergency procedures
TLIF2019	Ensure a safe on-board passenger and working environment
TLIF2072	Comply with safety and security procedures
TLIF3091	Apply awareness of dangerous goods and hazardous materials requirements
TLIH3002	Plan and navigate routes
TLIH3004	Identify major roads, services and attractions
TLII1002	Apply customer service skills
TLII2019	Provide taxi customer service
TLIJ2001	Apply quality procedures
TLIK2003	Apply keyboard skills
TLIK2010	Use infotechnology devices in the workplace
TLIL2060	Complete induction to the transport industry
TLILIC2014	Licence to drive a light rigid vehicle

© Commonwealth of Australia, 2025 Industry Skills Australia

TLILIC2015	Licence to drive a medium rigid vehicle
TLILIC2016	Licence to drive a heavy rigid vehicle
TLIO2021	Follow security procedures when working with goods and cargo
TLIP2030	Conduct courier/delivery cash transactions
TLIP2037	Carry out financial transactions and maintain records
TLIU1009	Monitor plant and equipment in an environmentally sustainable manner

Qualification Mapping Information

This qualification replaces but is **not** equivalent to TLI21710 Certificate II in Road Transport Yard Operations (Freight Handler).

TLI21315 Certificate II in Rail Infrastructure

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for a person engaged in basic operations within the rail infrastructure environment undertaking a range of tasks involving known routines and procedures, and taking some responsibility for the quality of work outcomes.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

Rail Infrastructure – Track Work

- Track Worker
- Track Installer
- Track Maintainer

Rail Infrastructure – Structures

- Structures Maintainer

Rail Infrastructure – Track Surfacing

- Plant Operator
- Mobile Plant Operator
- Way Gang Driver.

Please note: RTO to insert on the testamur, the specialist elective unit group selected from the group choice below.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

© Commonwealth of Australia, 2025 Industry Skills Australia

Packaging Rules

A total of **16 units of competency** comprising:

7 core units listed below **plus**

All units within one of the **specialist elective unit groups** (job roles) from Group A, Group B or Group C listed below **plus**

3 general elective units from the general elective units listed below if selecting Group A or Group C **or**
4 general elective units from the general elective units listed below if selecting Group B.

The **general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

The following imported units have a prerequisite unit:

- CPCCCM2007B Use explosive power tools
- CPCCCM2008B Erect and dismantle restricted height scaffolding.

Core units

TLIB1028	Maintain and use hand tools
TLID1001	Shift materials safely using manual handling methods
TLIE1003	Participate in basic workplace communication
TLIF1001	Follow work health and safety procedures
TLIF2010	Apply fatigue management strategies
TLIF2080	Safely access the rail corridor
TLIU2008	Apply environmental procedures to rail infrastructure

Specialist elective units

Select all units from one of the following specialist elective groups:

Group A: Track Work

Group B: Structures

Group C: Track Surfacing.

Group A: Track Work

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIB2085	Apply track fundamentals
TLIB2092	Operate minor mechanical equipment
TLIS2030	Carry out track ballasting
TLIS2031	Install railway sleepers
TLIS2034	Install and repair rail fastening systems
TLIS2044	Carry out rail installation

Group B: Structures

RIICCM201D	Carry out measurements and calculations
RIICCM203D	Read and interpret plans and job specifications
TLIB2084	Carry out routine maintenance of structures
TLIB2086	Apply awareness of structures fundamentals
TLIB2092	Operate minor mechanical equipment

Group C: Track Surfacing

TLIB1093	Clean equipment and restore worksite
TLIB2001	Check and assess operational capabilities of equipment
TLIB2085	Apply track fundamentals
TLIB2091	Measure and record track geometry
TLIS2030	Carry out track ballasting
TLIC2058	Travel medium or heavy self-propelled on-track equipment
OR	
TLIC2059	Propel and operate light on-track equipment

General elective units

CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry
CPCCCM2007B	Use explosive power tools

© Commonwealth of Australia, 2025 Industry Skills Australia

CPCCCM2008B	Erect and dismantle restricted height scaffolding
RIICCM205D	Carry out manual excavation
RIICCM207D	Spread and compact materials manually
RIICCM208D	Carry out basic levelling
RIICCM209D	Carry out concrete work
RIIHAN301D	Operate elevating work platform
RIIMPO317D	Conduct roller operations
RIIMPO318D	Conduct civil construction skid steer loader operations
RIIMPO319D	Conduct backhoe/loader operations
RIIMPO320D	Conduct civil construction excavator operations
RIIMPO321D	Conduct civil construction wheeled front end loader operations
RIIMPO322D	Conduct civil construction tracked front end loader operations
RIIMPO326D	Conduct civil construction water cart operations
RIIWHS204D	Work safely at heights
RIIWHS205D	Control traffic with stop-slow bat
RIIWHS302D	Implement traffic management plan
TLIB1093	Clean equipment and restore worksite
TLIB2034	Maintain poles and associated hardware
TLIB2091	Measure and record track geometry
TLIB2097	Install and maintain guard rails
TLIB2121	Maintain rail joints
TLIC3045	Operate road/rail vehicle
TLIF2062	Apply awareness of safeworking rules and regulations
TLIG1001	Work effectively with others
TLIK2010	Use infotechnology devices in the workplace
TLIS2004	Install and maintain rail bonding systems

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIS2020	Install overhead wiring structure
TLIS2027	Install and maintain surface track drainage
TLIS2033	Install and repair temporary track supports
TLIS2034	Install and repair rail fastening systems
TLIS2035	Install and repair fences and gates
TLIW2001	Operate under track protection rules
TLIW2028	Identify the principles of ballast cleaning operations
TLIW2029	Identify the principles of ballast regulator operations
TLIW2030	Identify the principles of dynamic track stabaliser operations
TLIW2031	Identify the principles of self-propelled rail grinder operations
TLIW2032	Identify the principles of tamping machine operations
TLIW2033	Identify the principles of mechanised track laying operations
TLIW2038	Place and remove temporary speed restriction equipment
TLIW3035	Heat and cut materials using oxy-LPG equipment for the rail industry

Qualification Mapping Information

This qualification replaces and is equivalent to TLI21311 Certificate II in Rail Infrastructure.

TLI21416 Certificate II in Stevedoring

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in operational roles within a stevedoring environment. It involves a range of tasks involving known routines and procedures, and taking some responsibility for the quality of work outcomes.

Successful achievement of the licensing units within the qualification must align with applicable licensing and regulatory requirements.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Stevedore.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **16 units of competency** comprising:

8 core units listed below **plus**

5 technical elective units listed below **plus**

3 general elective units from either the general elective units listed below or from the remaining technical elective units listed below or from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure

© Commonwealth of Australia, 2025 Industry Skills Australia

that all prerequisite units specified are complied with.

Core units

TLIA2050	Lash and unlash cargo and containers
TLID1001	Shift materials safely using manual handling methods
TLIE1003	Participate in basic workplace communication
TLIF1001	Follow work health and safety procedures
TLIF2006	Apply accident-emergency procedures
TLIF2010	Apply fatigue management strategies
TLIG1001	Work effectively with others
TLIU1009	Monitor plant and equipment in an environmentally sustainable manner

Technical elective units

TLIB2001	Check and assess operational capabilities of equipment
TLIC1051	Operate commercial vehicle
TLIC2002	Drive light rigid vehicle
TLIC3004	Drive heavy rigid vehicle
TLIC3005	Drive heavy combination vehicle
TLID2003	Handle dangerous goods/hazardous substances
TLID2004	Load and unload goods/cargo
TLID2010	Operate a forklift
TLID2012	Operate specialised load shifting equipment
TLID2045	Operate specialised light load shifting equipment
TLID2047	Prepare cargo for transfer with slings
TLID3011	Conduct specialised forklift operations
TLID3040	Control lift and movement of crane

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIE2007	Use communications systems
TLIE2008	Process workplace documentation
TLIF2068	Work at height in the stevedoring industry
TLIF3060	Control traffic as a pilot vehicle operator
TLIK2010	Use infotechnology devices in the workplace
TLIL1001	Complete workplace orientation/induction procedures
TLILIC2001	Licence to operate a forklift truck
TLILIC2005	Licence to operate a boom-type elevating work platform (boom length 11 metres or more)

General elective units

HLTAID002	Provide basic emergency life support
MARC022	Perform mooring and unmooring activities
MARE002	Communicate during mooring and unmooring activities
MARF017	Follow work health and safety, and emergency procedures during mooring and unmooring activities
TLIA2003	Connect and disconnect reefer units
TLIA2009	Complete and check import/export documentation
TLIA2014	Use product knowledge to complete work operations
TLID2013	Move materials mechanically using automated equipment
TLID2022	Conduct weighbridge operations
TLIE1005	Carry out basic workplace calculations
TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures
TLIF1002	Conduct housekeeping activities

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIF2018	Operate firefighting equipment
TLIG2007	Work in a socially diverse environment
TLII1002	Apply customer service skills
TLIJ2001	Apply quality procedures
TLIK2003	Apply keyboard skills
TLIL2008	Complete routine administrative tasks
TLIO2021	Follow security procedures when working with goods and cargo

TLI21716 Certificate II in Road Transport Yard Operations (Freight Handler)

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in freight handling within the road transport yard environment.

It involves a prescribed range of tasks involving known routines and procedures, and taking some accountability for the quality of work outcomes.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Freight Handler.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **18 units of competency** comprising:

7 core units listed below **plus**

11 general elective units from the general elective units listed below. Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

© Commonwealth of Australia, 2025 Industry Skills Australia

Core units

TLID1001	Shift materials safely using manual handling methods
TLID2004	Load and unload goods/cargo
TLIE1003	Participate in basic workplace communication
TLIE1005	Carry out basic workplace calculations
TLIE2008	Process workplace documentation
TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures
TLIF1001	Follow work health and safety procedures

General elective units

TLIA2011	Package goods
TLIA2012	Pick and process orders
TLIA2013	Receive goods
TLIA2041	Manually sort mail and parcels
TLIA2042	Despatch mail
TLIA2043	Consolidate mail
TLIA2045	Process international parcels and letters
TLIA2046	Process parcels and letters
TLIA2047	Stream mail
TLIB2001	Check and assess operational capabilities of equipment
TLIC2050	Operate a terminal tractor
TLID2010	Operate a forklift
TLID2012	Operate specialised load shifting equipment
TLID2013	Move materials mechanically using automated equipment
TLID2016	Load and unload explosives and dangerous goods
TLID2018	Handle furniture and effects

© Commonwealth of Australia, 2025 Industry Skills Australia

TLID2022	Conduct weighbridge operations
TLID2029	Prepare articles for delivery
TLID2045	Operate specialised light load shifting equipment
TLID2047	Prepare cargo for transfer with slings
TLIE2001	Present routine workplace information
TLIE2007	Use communications systems
TLIF1002	Conduct housekeeping activities
TLIF2006	Apply accident-emergency procedures
TLIF2010	Apply fatigue management strategies
TLIF2012	Apply safe procedures when handling/ transporting dangerous goods or explosives
TLIG2007	Work in a socially diverse environment
TLIH2001	Interpret road maps and navigate pre-determined routes
TLII1002	Apply customer service skills
TLIJ2001	Apply quality procedures
TLIK2007	Perform electronic data interchange to transmit shipping documentation
TLIK2010	Use infotechnology devices in the workplace
TLIL1001	Complete workplace orientation/induction procedures
TLIL2008	Complete routine administrative tasks
TLIL2031	Monitor and process attendance records
TLILIC2001	Licence to operate a forklift truck
TLILIC2002	Licence to operate an order picking forklift truck
TLIO2011	Provide revenue protection measures
TLIO2021	Follow security procedures when working with goods and cargo
TLIP2014	Capture records into a records keeping system

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIP2017	Maintain control of records
TLIP2018	Provide information from and about records
TLIP2024	Conduct financial transactions
TLIP2029	Prepare and process financial documents
TLIP2032	Maintain petty cash account
TLIP2033	Sell products and services
TLIU1009	Monitor plant and equipment in an environmentally sustainable manner

TLI22115 Certificate II in Rail Track Vehicle Driving

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for a person driving a medium/heavy rail track vehicle from one location to another over main line track.

It involves a broad range of skilled applications in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Track Vehicle Operator/Driver
- Track Machine Driver.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **17 units of competency** comprising:

11 core units listed below **plus**

6 general elective units from the g**eneral elective units** listed below. **Up to 3 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIC2075	Drive and monitor medium or heavy self-propelled on-track equipment
TLIC2076	Establish and operate braking system on medium/heavy self-propelled on-track equipment
TLIC2078	Identify and respond to signals and trackside signs
TLIC2080	Start up, shut down and stable medium/heavy self-propelled on-track equipment
TLIE1003	Participate in basic workplace communication
TLIF1001	Follow work health and safety procedures
TLIF2010	Apply fatigue management strategies
TLIF2080	Safely access the rail corridor
TLIF2106	Respond to emergencies and abnormal situations when driving medium/heavy on-track vehicles
TLIU2008	Apply environmental procedures to rail infrastructure
TLIW2001	Operate under track protection rules

General elective units

TLIB1028	Maintain and use hand tools
TLIB1093	Clean equipment and restore worksites
TLIB2001	Check and assess operational capabilities of equipment
TLIB2085	Apply track fundamentals
TLIB2091	Measure and record track geometry
TLIB2130	Diagnose and rectify minor faults on on-track vehicles
TLIB2133	Test medium/heavy track vehicle braking system
TLIC0083	Access rail track to travel track vehicle under a proceed authority
TLIC0084	Access rail track to travel track vehicles under manual block working conditions
TLIC2054	Access rail track to run track vehicle within defined worksite
TLIC2074	Couple and uncouple track maintenance vehicles

© Commonwealth of Australia, 2025 Industry Skills Australia

TLID1001	Shift materials safely using manual handling methods
TLIE2008	Process workplace documentation
TLIE2031	Use communication systems for on-track vehicle operations
TLIF2006	Apply accident-emergency procedures
TLIF2018	Operate firefighting equipment
TLIF3058	Apply safeworking rules and regulations to rail functions
TLIF3091	Apply awareness of dangerous goods and hazardous materials requirements
TLII4022	Identify and meet customer requirements
TLIK2010	Use infotechnology devices in the workplace
TLIS2030	Carry out track ballasting
TLIW2028	Identify the principles of ballast cleaning operations
TLIW2029	Identify the principles of ballast regulator operations
TLIW2030	Identify the principles of dynamic track stabaliser operations
TLIW2031	Identify the principles of self-propelled rail grinder operations
TLIW2032	Identify the principles of tamping machine operations
TLIW2033	Identify the principles of mechanised track laying operations
TLIW2037	Clip and secure points
TLIW3026	Operate stand alone signalling/point control equipment

TLI31216 Certificate III in Driving Operations

Modification History

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package.

Packaging rules for the elective units have been clarified.

The following units have been added to the general elective units:

- TLIF0005 Apply a fatigue risk management system

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in driving operation job roles within the Transport and Logistics Industry.

It involves a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, with some discretion and judgement in selecting equipment, services or contingency measures and within known time constraints.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Agitator Driver
- Bus Driver
- Line Haul Driver
- Local Heavy General Freight Driver
- Pilot Vehicle Driver
- Tip Truck Driver.

Successful achievement of the licensing units within the qualification must align with licensing and regulatory requirements applicable to driving and state/territory regulatory requirements.

Entry Requirements

There are no entry requirements for this qualification.

© Commonwealth of Australia, 2025 Industry Skills Australia

Packaging Rules

A total of **18 units of competency** comprising**:**

6 core units listed below **plus**

1 licensing/industry elective unit relevant to the vehicle type applicable to the job role from the licensing/industry elective units listed below **plus**

All units within one of the **specialist elective groups** (job roles) from Group A, Group B, Group C, Group D, Group E, Group F, Group G, Group H, Group I, Group K, Group L, or Group M listed below **plus**

4 general elective units from the general elective units listed below if selecting Group B, Group K (depending on job role), Group M **or**

5 general elective units from the general elective units listed below if selecting Group K (depending on job role), Group L, **or**

6 general elective units from the general elective units listed below if selecting Group A, Group C, Group D, Group E, Group F, Group G, Group H or Group I.

Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The units must contribute to the vocational outcomes of the qualification.

Elective units can only be counted once towards the qualification packaging rules i.e. if a unit is listed in both a specialist elective group and the general elective group, it can only be counted as one of the elected units required.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

The following imported units have a prerequisite unit:

- CPCCCO3054A Operate concrete agitator trucks
- UEGNSG614A Load, unload, exchange and connect LPG cylinders.

Core units

TLID1001	Shift materials safely using manual handling methods
TLIE1005	Carry out basic workplace calculations
TLIF1001	Follow work health and safety procedures
TLIF2010	Apply fatigue management strategies
TLIH2001	Interpret road maps and navigate pre-determined routes
TLIL1001	Complete workplace orientation/induction procedures

Licensing/Industry elective units

TLIC1051	Operate commercial vehicle

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIC2002	Drive light rigid vehicle
TLIC3003	Drive medium rigid vehicle
TLIC3004	Drive heavy rigid vehicle
TLIC3005	Drive heavy combination vehicle
TLIC4006	Drive multi-combination vehicle
TLILIC2014	Licence to drive a light rigid vehicle
TLILIC2015	Licence to drive a medium rigid vehicle
TLILIC2016	Licence to drive a heavy rigid vehicle
TLILIC3017	Licence to drive a heavy combination vehicle
TLILIC3018	Licence to drive a multi-combination vehicle

Specialist elective units

Select one group (job role) from the following options:

Group A: Heavy General Freight

Group B: Agitator

Group C: Bus

Group D: Refrigerated

Group E: Pilot Vehicle

Group F: Dry/Liquid

Group G: Car Carrier

Group H: Livestock

Group I: Wood Products

Group K: Dangerous Goods

Group L: Over Dimensional

Group M: Tip Truck.

Group A: Heavy General Freight

TLIA1001	Secure cargo
TLIB2004	Carry out vehicle inspection
TLID2004	Load and unload goods/cargo

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIE2008	Process workplace documentation
TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures

Group B: Agitator

	Deliver concrete to site
PMC552061C	
TLIB2004	Carry out vehicle inspection
TLID2004	Load and unload goods/cargo
TLIE2007	Use communications systems
TLIE2008	Process workplace documentation
TLIF0001	Apply chain of responsibility, legislation, regulations and workplace procedures
TLIJ2001	Apply quality procedures

Group C: Bus

TLIB2004	Carry out vehicle inspection
TLIC3011	Transport passengers with disabilities
TLIC3042	Operate coach/bus
TLIG2007	Work in a socially diverse environment
TLII3009	Provide on-board services to customers

Group D: Refrigerated

TLIA4025	Regulate temperature controlled stock
TLIB2004	Carry out vehicle inspection
TLIB3006	Carry out inspection of vehicles designed to carry special loads
TLID2004	Load and unload goods/cargo
TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures

Group E: Pilot Vehicle

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIB2004	Carry out vehicle inspection
TLIC3010	Pilot or escort oversized and/or overmassed loads
TLIE3009	Use pilot and escort communication
TLIF3013	Coordinate breakdowns and emergencies
TLIF3060	Control traffic as a pilot vehicle operator

Group F: Dry/Liquid

TLIB2004	Carry out vehicle inspection
TLID2021	Use specialised bulk transfer equipment (dry)
TLID3024	Use specialised liquid bulk transfer equipment (gravity/pressurised)
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures

Group G: Car Carrier

TLIA1001	Secure cargo
TLIB3006	Carry out inspection of vehicles designed to carry special loads
TLID2004	Load and unload goods/cargo
TLID3014	Load and unload vehicles carrying special loads
TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures

Group H: Livestock

TLID3014	Load and unload vehicles carrying special loads
TLID3020	Care for livestock in transit
TLIE2008	Process workplace documentation
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures

Group I: Wood Products

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIA1001	Secure cargo
TLIB2004	Carry out vehicle inspection
TLIB3006	Carry out inspection of vehicles designed to carry special loads
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures

Group K: Dangerous Goods

TLID2003	Handle dangerous goods/hazardous substances
TLID2016	Load and unload explosives/dangerous goods
TLID3015	Identify and label explosives/dangerous goods
TLID3027	Prepare for transport of dangerous goods
TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures

Selection of both **or** one of the following depending on job role:

TLILIC0001	Licence to transport dangerous goods by road
UEGNSG614A	Load, unload, exchange and connect LPG cylinders

Group L: Over Dimensional

TLIA1001	Secure cargo
TLIB3006	Carry out inspection of vehicles designed to carry special loads
TLID3014	Load and unload vehicles carrying special loads
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIE3009	Use pilot and escort communication
TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures

Group M: Tip Truck

TLIB2004	Carry out vehicle inspection
TLIC0004	Operate a tip truck

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIE2008	Process workplace documentation
TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures
TLIF3013	Coordinate breakdowns and emergencies
TLIG1001	Work effectively with others
TLII1002	Apply customer service skills

General elective units

CPCCCO3054A	Operate concrete agitator trucks
CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry
CPPWMT3011A	Respond to waste emergencies
CPPWMT3015A	Move waste using loadshifting equipment
CPPWMT3044A	Identify wastes and hazards
FPICOT3261	Transport forestry logs using trucks
HLTWHS006	Manage personal stressors in the work environment
PMC552061C	Deliver concrete to site
TLIA1001	Secure cargo
TLIA2003	Connect and disconnect reefer units
TLIA3002	Maintain container/cargo records
TLIA3004	Process receipt and delivery of containers and cargo
TLIA3008	Transfer cargo
TLIA3015	Complete receival/despatch documentation
TLIA4005	Check and evaluate records and documentation
TLIA4025	Regulate temperature controlled stock
TLIB1024	Clean transportation units and facilities for passenger use
TLIB1028	Maintain and use hand tools

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIB1031	Clean up plant, equipment and worksite
TLIB2001	Check and assess operational capabilities of equipment
TLIB2003	Carry out vehicle servicing and maintenance
TLIB2004	Carry out vehicle inspection
TLIB2008	Carry out inspection of trailers
TLIB2009	Check conveyor operational status
TLIB2022	Diagnose and rectify minor faults
TLIB2023	Provide sanitation and water services support to passenger transportation units
TLIB2029	Use and maintain minor mechanical equipment
TLIB2073	Clean road tankers
TLIB2119	Carry out maintenance of trailers
TLIB3005	Carry out maintenance of vehicles designed to carry special loads
TLIB3006	Carry out inspection of vehicles designed to carry special loads
TLIB3014	Load and unload wheeled or tracked crane
TLIB3015	Undertake site inspection
TLIB3016	De-rig, pack and store tools and equipment
TLIB3017	Assemble and dismantle boom or jib
TLIC2025	Operate four wheel drive vehicle
TLIC2049	Operate heavy vehicle on unsealed roads
TLIC3010	Pilot or escort oversized and/or overmassed loads
TLIC3011	Transport passengers with disabilities
TLIC3063	Operate vehicle carrying special loads
TLIC3064	Operate car carrier vehicle
TLIC3071	Operate an agitator
TLID1002	Shift a load using manually-operated equipment

© Commonwealth of Australia, 2025 Industry Skills Australia

TLID2003	Handle dangerous goods/hazardous substances
TLID2004	Load and unload goods/cargo
TLID2012	Operate specialised load shifting equipment
TLID2013	Move materials mechanically using automated equipment
TLID2016	Load and unload explosives/dangerous goods
TLID2021	Use specialised bulk transfer equipment (dry)
TLID2022	Conduct weighbridge operations
TLID2045	Operate specialised light load shifting equipment
TLID2047	Prepare cargo for transfer with slings
TLID3014	Load and unload vehicles carrying special loads
TLID3015	Identify and label explosives/dangerous goods
TLID3020	Care for livestock in transit
TLID3023	Use specialised liquid bulk gas transfer equipment
TLID3024	Use specialised liquid bulk transfer equipment (gravity/pressurised)
TLID3027	Prepare for transport of dangerous goods
TLID3031	Rig load
TLID3033	Operate a vehicle-mounted loading crane
TLID3035	Operate a boom type elevating work platform
TLID3036	Lift and move load using mobile crane
TLID3046	Operate container side lifter
TLID4032	Plan and conduct specialised lift
TLIE1003	Participate in basic workplace communication
TLIE2007	Use communications systems
TLIE2008	Process workplace documentation
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIE3004	Prepare workplace documents

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIE3009	Use pilot and escort communication
TLIE3012	Consolidate manifest documentation
TLIE3016	Estimate/calculate load shifting requirements for a mobile crane
TLIE3026	Carry out advanced calculations in the transport and logistics industry
TLIE3028	Complete a work diary in the road transport industry
TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures
TLIF0002	Administer chain of responsibility policies and procedures
TLIF0005	Apply a fatigue risk management system
TLIF1002	Conduct housekeeping activities
TLIF1009	Conduct cleaning operations in enclosed spaces
TLIF2006	Apply accident-emergency procedures
TLIF2012	Apply safe procedures when handling/transporting dangerous goods or explosives
TLIF2018	Operate firefighting equipment
TLIF2019	Ensure a safe on-board passenger and working environment
TLIF3013	Coordinate breakdowns and emergencies
TLIF3060	Control traffic as a pilot vehicle operator
TLIF3063	Administer the implementation of fatigue management strategies
TLIF3091	Apply awareness of dangerous goods and hazardous materials requirements
TLIF4014	Develop and maintain a safe workplace
TLIF4065	Ensure compliance with Australian Dangerous Goods Code
TLIG1001	Work effectively with others
TLIG2007	Work in a socially diverse environment
TLIH3002	Plan and navigate routes
TLIH3004	Identify major roads, services and attractions

© Commonwealth of Australia, 2025 Industry Skills Australia

TLII1002	Apply customer service skills
TLII3003	Provide customer service in transport vehicles/vessels
TLII3004	Manage camping procedures for coaches and buses
TLII3009	Provide on-board services to customers
TLII3010	Provide travel information to customers
TLIJ2001	Apply quality procedures
TLIJ3002	Apply quality systems
TLIJ3005	Sample, inspect and test products to specifications
TLIK2003	Apply keyboard skills
TLIK2010	Use infotechnology devices in the workplace
TLIL2008	Complete routine administrative tasks
TLIL2046	Handle customer luggage/property
TLIL2060	Complete induction to the transport industry
TLIL4005	Apply conflict/grievance resolution strategies
TLIL4009	Manage personal work priorities and professional development
TLIL4010	Assess and confirm customer transport requirements
TLIL4034	Arrange alternative passenger transport
TLILIC0012	Licence to operate a vehicle loading crane (capacity 10 metre tonnes and above)
TLILIC2014	Licence to drive a light rigid vehicle
TLILIC2015	Licence to drive a medium rigid vehicle
TLILIC2016	Licence to drive a heavy rigid vehicle
TLILIC3017	Licence to drive a heavy combination vehicle
TLILIC3018	Licence to drive a multi-combination vehicle
TLIO1002	Follow security procedures when working with passengers and personnel
TLIO2003	Undertake loading and unloading in a designated secured environment

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIO2011	Provide revenue protection measures
TLIO2021	Follow security procedures when working with goods and cargo
TLIO3004	Conduct control procedures for transferring explosives/dangerous/ hazardous/high risk goods
TLIO3007	Undertake emergency response action to a security threat
TLIO3012	Manage disruptive and/or unlawful behaviour
TLIO3016	Apply and monitor workplace security procedures
TLIP2024	Conduct financial transactions
TLIP2029	Prepare and process financial documents
TLIP2032	Maintain petty cash account
TLIP3026	Maintain financial records in a small business
TLIU1009	Monitor plant and equipment in an environmentally sustainable manner
TLIU3014	Operate vehicle in an environmentally sustainable manner
UEGNSG005A	Prepare to work in the gas industry
UEGNSG141A	Apply Workplace Health and Safety regulations, codes and practices in the gas supply industry
UEGNSG601A	Assess the operational capability of gas safety equipment on tankers

TLI31316 Certificate III in International Freight Forwarding (Operator)

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in international freight forwarding job roles at an operational level, within the International Freight Forwarding Industry.

It involves a broad range of skilled applications, applied in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **13 units of competency** comprising:

8 core units listed below **plus**

5 general elective units from the general elective units listed below. Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIA2009 Complete and check import/export documentation

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIA4033	Organise international transport of freight
TLIE1003	Participate in basic workplace communication
TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures
TLIF1001	Follow work health and safety procedures
TLIG1001	Work effectively with others
TLII0002	Provide freight forwarding information and customer service
TLIK2007	Perform electronic data interchange to transmit shipping documentation

General elective units

TLIA0001	Complete import procedures
TLIA0002	Prepare cargo for export
TLIA3010	Coordinate goods to bond premises
TLIA4031	Consolidate freight
TLIA4032	Organise transport of freight or goods
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIF4065	Ensure compliance with Australian Dangerous Goods Code
TLIJ2001	Apply quality procedures
TLIJ3002	Apply quality systems
TLIO2021	Follow security procedures when working with goods and cargo

TLI31415 Certificate III in Rail Driving

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for a person who drives a light rail train or tram, or operates a monorail within a metropolitan or suburban transport environment.

It involves a broad range of skilled applications applied in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Tram Driver
- Light Rail Driver
- Monorail Operator.

No licensing legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **16 units** of competency comprising:

8 core units listed below **plus**

All units within one of the **specialist elective unit groups** (job roles) from Group A or Group B listed below **plus**

3 general elective units from the general elective units listed below. Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

© Commonwealth of Australia, 2025 Industry Skills Australia

Core units

TLIE1003	Participate in basic workplace communication
TLIE2007	Use communications systems
TLIE2008	Process workplace documentation
TLIF1001	Follow work health and safety procedures
TLIF2006	Apply accident-emergency procedures
TLIF2010	Apply fatigue management strategies
TLIG1001	Work effectively with others
TLII1002	Apply customer service skills

Specialist elective units

Group A: Tram/Light Rail

TLIB3078	Inspect, prepare and start an electric tram
TLIC3032	Operate and monitor a passenger electric tram
TLIC3033	Drive an electric tram to operational requirements
TLIC3034	Berth and shut down an electric tram
TLIF4061	Respond to electric tram-driving emergencies and abnormal situations

Group B: Monorail

TLIC3039	Operate and monitor a monorail train
TLID1001	Shift materials safely using manual handling methods
TLIE1005	Carry out basic workplace calculations
TLIO2011	Provide revenue protection measures
TLIO3012	Manage disruptive and/or unlawful behaviour

General elective units

TLIB2001	Check and assess operational capabilities of equipment
TLIB3002	Test equipment and isolate faults
TLIC3011	Transport passengers with disabilities

© Commonwealth of Australia, 2025 Industry Skills Australia

TLID1001	Shift materials safely using manual handling methods
TLIE1005	Carry out basic workplace calculations
TLIF3058	Apply safeworking rules and regulations to rail functions
TLIG2007	Work in a socially diverse environment
TLIO2011	Provide revenue protection measures
TLIP2033	Sell products and services

Qualification Mapping Information

This qualification replaces and is equivalent to TLI31410 Certificate III in Rail Driving.

TLI31616 Certificate III in Warehousing Operations

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for the Warehousing and Storage Industry.

It involves a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, with some discretion and judgement in selecting equipment, services or contingency measures and within known time constraints.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **19 units of competency** comprising:

3 core units listed below **plus**

16 general elective units from the general elective units listed below. Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures
TLIF1001	Follow work health and safety procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIL1001 Complete workplace orientation/induction procedures

General elective units

BSBCUS301 Deliver and monitor a service to customers

BSBWOR301 Organise personal work priorities and development

TLIA3004 Process receipt and delivery of containers and cargo

TLIA3010 Coordinate goods to bond premises

TLIA3015 Complete receival/despatch documentation

TLIA3016 Use inventory systems to organise stock control

TLIA3017 Identify products and store to specifications

TLIA3018 Organise despatch operations

TLIA3019 Organise receival operations

TLIA3024 Organise warehouse records operations

TLIA3026 Monitor storage facilities

TLIA3038 Control and order stock

TLIA3039 Receive and store stock

TLIB2001 Check and assess operational capabilities of equipment

TLIB3002 Test equipment and isolate faults

TLID2010 Operate a forklift

TLID2013 Move materials mechanically using automated equipment

TLID3011 Conduct specialised forklift operations

TLID3014 Load and unload vehicles carrying special loads

TLID3015 Identify and label explosives/dangerous goods

TLID3023 Use specialised liquid bulk gas transfer equipment

TLID3024 Use specialised liquid bulk transfer equipment (gravity/pressurised)

© Commonwealth of Australia, 2025 Industry Skills Australia

TLID3027	Prepare for transport of dangerous goods
TLID3031	Rig load
TLID3033	Operate a vehicle-mounted loading crane
TLID3035	Operate a boom type elevating work platform
TLID3036	Lift and move load using a mobile crane
TLID3040	Control lift and movement of crane
TLID3043	Shift loads using gantry equipment
TLID3044	Shift loads using cranes
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIE3004	Prepare workplace documents
TLIE3012	Consolidate manifest documentation
TLIE3015	Undertake rigger/dogger and driver communication
TLIE3016	Estimate/calculate load shifting requirements for a mobile crane
TLIF0002	Administer chain of responsibility policies and procedures
TLIF3003	Implement and monitor work health and safety procedures
TLIF3004	Organise work health and safety procedures in the workplace
TLIF3022	Implement/monitor procedures when warehousing/storing dangerous goods/hazardous substances
TLIF3091	Apply awareness of dangerous goods and hazardous materials requirements
TLIG3002	Lead a work team or group
TLIJ3002	Apply quality systems
TLIJ3005	Sample, inspect and test products to specifications
TLIJ3006	Implement grain protection procedures
TLIL3002	Undertake employee payroll activities
TLIL3003	Conduct induction process

© Commonwealth of Australia, 2025 Industry Skills Australia

TLILIC2001	Licence to operate a forklift truck
TLILIC2002	Licence to operate an order picking forklift truck
TLIO2021	Follow security procedures when working with goods and cargo
TLIO3004	Conduct control procedures for transferring explosives/dangerous/hazardous/high risk goods
TLIO3016	Apply and monitor workplace security procedures
TLIP3015	Document a records system
TLIP3016	Identify and classify records to be captured
TLIP3019	Provide records retrieval service
TLIP3020	Sentence records
TLIP3021	Undertake disposal program
TLIP3022	Undertake movement of records
TLIP3023	Destroy records
TLIP3026	Maintain financial records in a small business
TLIU2012	Participate in environmentally sustainable work practices
TLIU3011	Implement and monitor environmentally sustainable work practices
TLIW2018	Operate hand held air/power equipment for production processes
TLIW2019	Apply surface coatings using a spray gun
TLIW2022	Manufacture pallets using automated methods
TLIW2024	Dock boards using computer programmed machinery
TLIW2025	Dock boards on mechanical feeds
TLIW3006	Operate computerised mail and parcels sorting equipment
TLIW3007	Code and coordinate video-coding operations
TLIW3008	Carry out culler facer canceller operations

TLI31716 Certificate III in Mobile Crane Operations

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This qualification is designed for mobile crane operation within the Transport and Logistics Industry and other industries.

It involves a broad range of skilled applications applied in a wide variety of contexts.

Successful achievement of the high risk work (HRW) and heavy vehicle licensing units in the qualification must align with applicable licensing and regulatory requirements.

People seeking certification for HRW licensing units should check the requirements with Safe Work Australia.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **17 units of competency** comprising:

12 core units listed below **plus**

5 general elective units from the general elective units listed below. **Up to 3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

The following units have prerequisite units:

- CPCCCM2010B Work safely at heights

© Commonwealth of Australia, 2025 Industry Skills Australia

- CPCCCM3003A Work safely around power sources, services and assets.

Note:

To comply with the National Standard for Licensing Persons Performing High Risk Work, TLILIC3006 Licence to operate a non-slewing mobile crane (greater than 3 tonnes capacity) must be achieved before commencing TLILIC3008 Licence to operate a slewing mobile crane (up to 20 tonnes).

Core units

CPCCCM2010B	Work safely at heights
CPCCCM3003A	Work safely around power sources, services and assets
CPCCLDG3001A	Licence to perform dogging
CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry
TLIB3013	Maintain mobile cranes
TLID1001	Shift materials safely using manual handling methods
TLIE2008	Process workplace documentation
TLIF2006	Apply accident-emergency procedures
TLIF3084	Follow mobile crane safety procedures
TLILIC3006	Licence to operate a non-slewing mobile crane (greater than 3 tonnes capacity)
TLILIC3008	Licence to operate a slewing mobile crane (up to 20 tonnes)
TLIU1009	Monitor plant and equipment in an environmentally sustainable manner

General elective units

CPCCOHS1001A	Work safely in the construction industry
HLTAID003	Provide first aid
HLTAID006	Provide advanced first aid
TLIA1001	Secure cargo
TLIB2001	Check and assess operational capabilities of equipment
TLIB3011	Set up and rig crane for lift

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIB3012	Plan job and set up work areas
TLIB3015	Undertake site inspection
TLIB3016	De-rig, pack and store tools and equipment
TLIC3004	Drive heavy rigid vehicle
TLIC3005	Drive heavy combination vehicle
TLID3031	Rig load
TLIF1002	Conduct housekeeping activities
TLIF2010	Apply fatigue management strategies
TLILIC2005	Licence to operate a boom-type elevating work platform (boom length 11 metres or more)

Qualification Mapping Information

This qualification replaces and is equivalent to TLI31710 Certificate III in Mobile Crane Operations.

TLI31815 Certificate III in Rail Track Surfacing

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for a person engaged in the installation and maintenance of mechanical rail track and the operation of track surfacing and other track equipment.

It involves a broad range of skilled applications in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles

Job roles and titles vary across different sectors. A possible job title relevant to this qualification includes:

- Rail track surfacer.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

The entry requirement for this qualification is TLI21315 Certificate II in Rail Infrastructure (Track Surfacing) or relevant industry experience gained by working within the rail infrastructure environment.

Packaging Rules

A total of **11 units of competency** comprising:

7 core units listed below **plus**

4 general elective units from the general elective units listed below. Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIB3094	Check and repair track geometry
TLIE2007	Use communications systems
TLIE2029	Conduct workplace information briefings
TLIF3003	Implement and monitor work health and safety procedures
TLIJ3002	Apply quality systems
TLIS3026	Implement track maintenance and construction
TLIS3039	Measure and mark track for resurfacing

General elective units

TLIB2092	Operate minor mechanical equipment
TLIC3045	Operate road/rail vehicle
TLIE2008	Process workplace documentation
TLIF2006	Apply accident-emergency procedures
TLIF3058	Apply safeworking rules and regulations to rail functions
TLIF3089	Implement fatigue management policies and procedures for rail infrastructure
TLIG1001	Work effectively with others
TLIG3002	Lead a work team or group
TLIK2010	Use infotechnology devices in the workplace
TLIS2034	Install and repair rail fastening systems
TLIS3025	Implement ballast unloading
TLIU4001	Implement and monitor environmental protection policies and procedures
TLIW2028	Identify the principles of ballast cleaning operations
TLIW2029	Identify the principles of ballast regulator operations
TLIW2030	Identify the principles of dynamic track stabaliser operations
TLIW2031	Identify the principles of self-propelled rail grinder operations
TLIW2032	Identify the principles of tamping machine operations

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIW2033 Identify the principles of mechanised track laying operations

Qualification Mapping Information

This qualification replaces and is equivalent to TLI31811 Certificate III in Rail Track Surfacing.

TLI31915 Certificate III in Mechanical Rail Signalling

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for a person engaged in the installation and maintenance of mechanical rail signalling equipment.

It involves a broad range of skilled applications in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles

Job roles and titles vary across different sectors. A possible job title relevant to this qualification includes:

- Mechanical rail signaller.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

The entry requirement for this qualification is the **7 core units** of competency from TLI21315 Certificate II in Rail Infrastructure listed below or relevant industry experience gained by working within the rail infrastructure environment.

Entry requirement units

TLIB1028	Maintain and use hand tools
TLID1001	Shift materials safely using manual handling methods
TLIE1003	Participate in basic workplace communication
TLIF1001	Follow work health and safety procedures
TLIF2010	Apply fatigue management strategies
TLIF2080	Safely access the rail corridor

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIU2008	Apply environmental procedures to rail infrastructure

Packaging Rules

A total of **18 units of competency** comprising:

11 core units listed below **plus**

7 general elective units from the general elective units listed below. Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

The following imported unit has a prerequisite unit:

- UETTDRRF02B Perform pole top rescue.

Core units

RIICCM201D	Carry out measurements and calculations
RIICCM203D	Read and interpret plans and job specifications
TLIB3046	Service and clean mechanical signalling equipment and infrastructure
TLIB3047	Repair and adjust mechanical signalling equipment and infrastructure
TLIB3048	Carry out off-site repair, overhaul and assembly of mechanical signalling equipment
TLIB3053	Maintain mechanical signalling locking and interlocking devices
TLIB3120	Test mechanical signalling equipment and isolate faults
TLIE2008	Process workplace documentation
TLIF2062	Apply awareness of safeworking rules and regulations
TLIK2010	Use infotechnology devices in the workplace
TLIS3005	Install mechanical infrastructure for signalling

General elective units

HLTAID001	Provide cardiopulmonary resuscitation

© Commonwealth of Australia, 2025 Industry Skills Australia

NWP227B	Control vegetation on a site
RIIHAN301D	Operate elevating work platform
RIIWHS202D	Enter and work in confined spaces
RIIWHS204D	Work safely at heights
RIIWHS205D	Control traffic with stop-slow bat
TAEASS401B	Plan assessment activities and processes
TAEASS402B	Assess competence
TAEDEL301A	Provide work skill instruction
TLIA3039	Receive and store stock
TLIB1093	Clean equipment and restore worksite
TLIE2007	Use communications systems
TLIE2029	Conduct workplace information briefings
TLIF2006	Apply accident-emergency procedures
TLIF3013	Coordinate breakdowns and emergencies
TLIF3058	Apply safeworking rules and regulations to rail functions
TLIG1001	Work effectively with others
TLIG3002	Lead a work team or group
TLII1002	Apply customer service skills
TLIS2004	Install and maintain rail bonding systems
TLIS3023	Erect and mount structures and housings for signalling equipment
TLIW3035	Heat and cut materials using oxy-LPG equipment for the rail industry
UETTDRRF02B	Perform pole top rescue

© Commonwealth of Australia, 2025 Industry Skills Australia

Qualification Mapping Information

This qualification replaces and is equivalent to TLI31913 Certificate III in Mechanical Rail Signalling.

TLI32115 Certificate III in Rail Structures

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for a person engaged in the rail infrastructure environment who performs tasks involving checking and repairing structures through a broad range of skilled applications in a wide variety of contexts. It may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to the job role groups listed below include:

Steel/Concrete/Masonry Structures Maintenance

- Senior structures maintainer

Timber Structures Maintenance

- Senior structures maintainer.

Please note: RTO to insert on the testamur, the specialist elective group selected from the group choice below.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

The entry requirement for this qualification is TLI21315 Certificate II in Rail Infrastructure (Structures) or relevant industry experience gained by working in the rail infrastructure (structures) environment.

Packaging Rules

A total of **11 units of competency** comprising:

6 core units listed below **plus**

All units within one of the **specialist elective unit groups** from Group A or Group B listed

© Commonwealth of Australia, 2025 Industry Skills Australia

below **plus**

2 general elective units from the general elective units listed below if selecting Group A **or**
3 general elective units from the general elective units listed below if selecting Group B.

Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

The following imported units have a prerequisite unit:

- MEM24001B Perform basic penetrant testing
- MEM24003B Perform basic magnetic particle testing.

Core units

TLIE2007	Use communications systems
TLIE2029	Conduct workplace information briefings
TLIF3003	Implement and monitor work health and safety procedures
TLIJ3002	Apply quality systems
TLIS2013	Install minor structures
TLIS3029	Implement structures maintenance and installation of minor structures

Specialist elective units

Select all units from one of the following specialist elective groups:

- Group A: Steel/Concrete/Masonry Structures Maintenance
- Group B: Timber Structures Maintenance.

Group A: Steel/Concrete/Masonry Structures Maintenance

TLIB2082	Repair steel structures
TLIB2083	Maintain bridge bearings
TLIB2096	Repair concrete/masonry structures

Group B: Timber Structures Maintenance

TLIB2081	Repair timber structures
TLIS2028	Install and replace transoms

© Commonwealth of Australia, 2025 Industry Skills Australia

General elective units

MEM18001C	Use hand tools
MEM24001B	Perform basic penetrant testing
MEM24003B	Perform basic magnetic particle testing
TLIB2092	Operate minor mechanical equipment
TLIB2097	Install and maintain guard rails
TLIE2008	Process workplace documentation
TLIF2006	Apply accident-emergency procedures
TLIF3058	Apply safeworking rules and regulations to rail functions
TLIF3089	Implement fatigue management policies and procedures for rail infrastructure
TLIG1001	Work effectively with others
TLII1002	Apply customer service skills
TLIS2012	Install and service rail lubrication equipment
TLIS2027	Install and maintain surface track drainage
TLIS2028	Install and replace transoms
TLIS2033	Install and repair temporary track supports
TLIS2034	Install and repair rail fastening systems
TLIS2035	Install and repair fences and gates
TLIS3037	Install and repair rail earthworks
TLIU4001	Implement and monitor environmental protection policies and procedures
TLIW3034	Apply protective coating systems to structures
TLIW3035	Heat and cut materials using oxy-LPG equipment for the rail industry

© Commonwealth of Australia, 2025 Industry Skills Australia

Qualification Mapping Information

This qualification replaces and is equivalent to TLI32111 Certificate III in Rail Structures.

TLI32315 Certificate III in Electric Passenger Train Guard

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for a person engaged in the duties of an electric passenger train guard within a metropolitan train system.

It involves a broad range of skilled applications applied in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **20 units** of competency comprising:

13 core units listed below **plus**

7 general elective units from the general elective units listed below. Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIB2104	Identify, diagnose and rectify faults on electric passenger trains
TLIB2111	Assist with testing train braking system on electric passenger train
TLIB3112	Prepare electric passenger train as part of guard duties
TLIC3052	Assist with shunting, coupling and uncoupling electric passenger

© Commonwealth of Australia, 2025 Industry Skills Australia

	trains
TLIC3057	Perform guard duties as part of electric passenger train operations
TLIE2008	Process workplace documentation
TLIE3021	Work and communicate effectively with others
TLIF1001	Follow work health and safety procedures
TLIF2006	Apply accident-emergency procedures
TLIF2010	Apply fatigue management strategies
TLIF3058	Apply safeworking rules and regulations to rail functions
TLII3020	Provide assistance to customers
TLIK2010	Use infotechnology devices in the workplace

General elective units

BSBWOR301	Organise personal work priorities and development
HLTAID003	Provide first aid
TLIB1028	Maintain and use hand tools
TLID1001	Shift materials safely using manual handling methods
TLIF2018	Operate firefighting equipment
TLIF2019	Ensure a safe on-board passenger and working environment
TLIG2007	Work in a socially diverse environment
TLIK2003	Apply keyboard skills
TLIO3012	Manage disruptive and/or unlawful behaviour
TLIU1009	Monitor plant and equipment in an environmentally sustainable manner
TLIU2012	Participate in environmentally sustainable work practices
SITXCOM401	Manage conflict

© Commonwealth of Australia, 2025 Industry Skills Australia

Qualification Mapping Information

This qualification replaces and is equivalent to TLI32310 Certificate III in Electric Passenger Train Guard.

TLI32416 Certificate III in Logistics

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in logistics operations within the Transport and Logistics Industry.

It involves a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in selecting equipment, services or contingency measures within known time constraints. It may also include responsibility for coordinating the work of others.

Successful achievement of the licensing units within the qualification must align with applicable licensing and regulatory requirements.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Logistics Administration Officer
- Logistics Service Clerk.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of 13 units of competency comprising:

2 core unit listed below **plus**

6 technical elective units from the technical elective units listed below **plus**

© Commonwealth of Australia, 2025 Industry Skills Australia

5 general elective units from the general elective units or remaining technical elective units listed below. Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIE3004	Prepare workplace documents
TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures

Technical elective units

BSBCUS301	Deliver and monitor a service to customers
TLIA3002	Maintain container/cargo records
TLIA3015	Complete receival/despatch documentation
TLIA3016	Use inventory systems to organise stock control
TLIA3017	Identify products and store to specifications
TLIA3018	Organise despatch operations
TLIA3019	Organise receival operations
TLIA3023	Coordinate stocktakes
TLIA3024	Organise warehouse records operations
TLIA3038	Control and order stock
TLIA3039	Receive and store stock
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIE3012	Consolidate manifest documentation
TLIE3018	Maintain freight records

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIF0002	Administer chain of responsibility policies and procedures
TLIF1001	Follow work health and safety procedures
TLIF3003	Implement and monitor work health and safety procedures
TLIF3063	Administer the implementation of fatigue management strategies
TLIH3004	Identify major roads, services and attractions
TLIP3027	Organise freight invoicing and payment
TLIU2012	Participate in environmentally sustainable work practices

General elective units

BSBCMM301	Process customer complaints
BSBPUR301	Purchase goods and services
BSBWOR301	Organise personal work priorities and development
MSS402080A	Undertake root cause analysis
TLIA3010	Coordinate goods to bond premises
TLID1001	Shift materials safely using manual handling methods
TLIE2007	Use communications systems
TLIG3002	Lead a work team or group
TLIJ3002	Apply quality systems
TLIK2010	Use infotechnology devices in the workplace
TLIL3002	Undertake employee payroll activities
TLIL3003	Conduct induction process
TLILIC2001	Licence to operate a forklift truck

© Commonwealth of Australia, 2025 Industry Skills Australia

TLILIC2002	Licence to operate an order picking forklift truck
TLIO3007	Undertake emergency response action to a security threat
TLIO3016	Apply and monitor workplace security procedures
TLIP3015	Document a records system
TLIP3016	Identify and classify records to be captured
TLIP3019	Provide records retrieval service
TLIP3020	Sentence records
TLIP3021	Undertake disposal program
TLIP3022	Undertake movement of records
TLIP3023	Destroy records
TLIP3026	Maintain financial records in a small business

Qualification Mapping Information

This qualification replaces but is **not** equivalent to TLI32410 Certificate III in Logistics.

TLI32515 Certificate III in Rail Infrastructure

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for a person engaged in the rail infrastructure environment who performs tasks involving a broad range of skilled applications in a wide variety of contexts. It may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

Rail Infrastructure – Track Maintenance

- Senior track maintainer
- Ganger

Rail Infrastructure – Track Construction

- Senior track installer
- Ganger

Rail Infrastructure – Turnout Construction

- Specialist track installer
- Ganger

Rail Infrastructure – Track Welding

- Track welder

Rail Infrastructure – Track Examination

- Track examiner

Rail Infrastructure – Rail Testing

- Rail tester

Rail Infrastructure – Timber/Composite Turnout Construction

- Turnout builder
- Points and crossings builder

Rail Infrastructure – Concrete/Steel Turnout Construction

- Turnout builder

© Commonwealth of Australia, 2025 Industry Skills Australia

- Points and crossings builder

Rail Infrastructure – Track Drainage Maintenance

- Track drainage maintainer.

Please note: RTO to insert on the testamur, the specialist elective unit group selected from the group choice below.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

The entry requirement for this qualification is TLI21315 Certificate II in Rail Infrastructure (Track Work) or relevant industry experience gained by working in the rail infrastructure environment.

Packaging Rules

A total of **11 units of competency** comprising:

5 core units listed below plus

All units within one of the **specialist elective unit groups** (job roles) listed below **plus**

A **minimum of 2 general elective units** and **a maximum of 4 general elective units** from the **general elective units** listed below (depending on the specialist elective group or job role selected).

Up to **2 of the general electives units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

RIICCM201D	Carry out measurements and calculations
TLIE2007	Use communications systems
TLIE2029	Conduct workplace information briefings
TLIF3003	Implement and monitor work health and safety procedures
TLIJ3002	Apply quality systems

© Commonwealth of Australia, 2025 Industry Skills Australia

Specialist elective units

Select all units from one of the following specialist elective groups:

- Group A: Track Maintenance
- Group B: Track Construction
- Group C: Turnout Construction
- Group D: Track Welding
- Group E: Track Examination
- Group F: Rail Testing
- Group G: Timber/Composite Turnout Construction
- Group H: Concrete/Steel Turnout Construction
- Group I: Track Drainage Maintenance.

Group A: Track Maintenance

RIICCM203D	Read and interpret plans and job specifications
TLIB3094	Check and repair track geometry
TLIB3095	Check and repair points and crossings
TLIS3026	Implement track maintenance and construction

Group B: Track Construction

RIICCM203D	Read and interpret plans and job specifications
TLIB3094	Check and repair track geometry
TLIS3026	Implement track maintenance and construction

Group C: Turnout Construction

RIICCM203D	Read and interpret plans and job specifications
TLIS3026	Implement track maintenance and construction
TLIS3045	Install turnouts

Group D: Track Welding

RIICCM203D	Read and interpret plans and job specifications
TLIW2012	Grind rails
TLIW3015	Weld rail using aluminothermic welding process
TLIW3035	Heat and cut materials using oxy-LPG equipment for the rail industry

© Commonwealth of Australia, 2025 Industry Skills Australia

Group E: Track Examination

TLIB3099	Examine track infrastructure
TLIB3100	Visually inspect track infrastructure

Group F: Rail Testing

TLIS3010	Test rail using ultrasonic equipment
TLIS3011	Test rail using nondestructive testing equipment

Group G: Timber/Composite Turnout Construction

RIICCM203D	Read and interpret plans and job specifications
TLIS3041	Construct timber or composite points and crossings

Group H: Concrete/Steel Turnout Construction

RIICCM203D	Read and interpret plans and job specifications
TLIS3040	Construct concrete or steel points and crossings

Group I: Track Drainage Maintenance

RIICCM203D	Read and interpret plans and job specifications
TLIS2027	Install and maintain surface track drainage

General elective units

AHCARB202A	Fell small trees
AHCARB205A	Operate and maintain chainsaws
NWP227B	Control vegetation on a site
RIIRIS401D	Apply site risk management system
TLIB2091	Measure and record track geometry
TLIB2097	Install and maintain guard rails
TLIB3040	Inspect poles and associated hardware
TLIB3099	Examine track infrastructure
TLIB3102	Adjust rail
TLIB4071	Install and maintain pole mounted switches and transformers

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIC2058	Travel medium or heavy self-propelled on-track equipment
TLIC3045	Operate road/rail vehicle
TLIE2008	Process workplace documentation
TLIF2006	Apply accident-emergency procedures
TLIF3058	Apply safeworking rules and regulations to rail functions
TLIF3089	Implement fatigue management policies and procedures for rail infrastructure
TLIG1001	Work effectively with others
TLIG3002	Lead a work team or group
TLII1002	Apply customer service skills
TLIS2012	Install and service rail lubrication equipment
TLIS2027	Install and maintain surface track drainage
TLIS2033	Install and repair temporary track supports
TLIS2035	Install and repair fences and gates
TLIS3025	Implement ballast unloading
TLIS3026	Implement track maintenance and construction
TLIS3037	Install and repair rail earthworks
TLIU4001	Implement and monitor environmental protection policies and procedures
TLIW3013	Grind switches and crossings
TLIW3016	Weld rail using flashbutt welding process
TLIW3027	Operate minor track equipment

Qualification Mapping Information

This qualification replaces and is equivalent to TLI32511 Certificate III in Rail Infrastructure.

TLI32615 Certificate III in Rail Signalling

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for a person engaged in controlling rail traffic movements and operations within a defined or local area.

It involves a broad range of skilled applications applied in a wide variety of contexts, which may involve application of some discretion and judgment in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Signaller
- Area controller
- Yard controller.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **12 units** of competency comprising:

8 core units listed below **plus**

4 general elective units from the general elective units listed below. Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIE3022	Complete workplace documents
TLIE3023	Use electronic communication systems
TLIF1001	Follow work health and safety procedures
TLIF2010	Apply fatigue management strategies
TLIF3058	Apply safeworking rules and regulations to rail functions
TLIF3085	Apply local incident response procedures
TLIL3071	Control and coordinate local rail traffic movement
TLIL3072	Operate signal panel or equipment

General elective units

BSBITU101	Operate a personal computer
BSBWOR201	Manage personal stress in the workplace
BSBWRT301	Write simple documents
TLIB3118	Apply awareness of railway fundamentals
TLIF3091	Apply awareness of dangerous goods and hazardous materials requirements
TLIG1001	Work effectively with others
TLIG2007	Work in a socially diverse environment
TLIJ2001	Apply quality procedures
TLIU2012	Participate in environmentally sustainable work practices
TLIW3026	Operate stand alone signalling/point control equipment

Qualification Mapping Information

This qualification replaces and is equivalent to TLI32611 Certificate III in Rail Signalling.

TLI32715 Certificate III in Track Protection

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for a person engaged in the rail infrastructure environment who performs tasks involving track protection in a variety of contexts.

It may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles

Job roles and titles vary across different sectors. A possible job title relevant to this qualification includes:

- Track protection officer.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

The entry requirement for this qualification is TLI21915 Certificate II in Track Protection or relevant industry experience gained by working in the rail infrastructure environment providing track protection services.

Packaging Rules

A total of **11 units of competency** comprising:

5 core units listed below **plus**

3 specialist elective units from the specialist elective units listed below **plus**

3 general elective units from the general elective units listed below or the remaining specialist elective units listed below. Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

© Commonwealth of Australia, 2025 Industry Skills Australia

Core units

TLIE2029	Conduct workplace information briefings
TLIF3003	Implement and monitor work health and safety procedures
TLIF3083	Conduct track protection assessment
TLIJ3002	Apply quality systems
TLIL3065	Implement a track occupancy authority

Specialist elective units

TLIC2081	Pilot rail traffic within work on track authority limits
TLIF2097	Use audible track warning devices
TLIL3082	Implement absolute signal blocking
TLIL3083	Implement a track work authority and manage rail traffic through worksites
TLIL3084	Implement a local possession authority
TLIL4069	Plan and coordinate protection for multiple worksites within limits of a work on track authority
TLIW2039	Place and remove permanent way stop boards
TLIW3026	Operate stand alone signalling/point control equipment

General elective units

RIIRIS401D	Apply site risk management system
TLIC3045	Operate road/rail vehicle
TLIF2006	Apply accident-emergency procedures
TLIF2062	Apply awareness of safeworking rules and regulations
TLIF3058	Apply safeworking rules and regulations to rail functions
TLIF3089	Implement fatigue management policies and procedures for rail infrastructure
TLIG3002	Lead a work team or group
TLII1002	Apply customer service skills

TLI32815 Certificate III in Rail Yard Coordination

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for a person engaged in the rail yard or terminal environment.

It involves a broad range of skilled applications, applied in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles

This qualification is aligned to the following defined roles:

- Yard Coordinator
- Terminal Coordinator.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **18 units of competency** comprising:

12 core units listed below **plus**

6 general elective units from the general elective units listed below. Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIB2122	Apply awareness of fundamentals of rail operations in yards or sidings
TLIE3021	Work and communicate effectively with others

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIE3022	Complete workplace documents
TLIF2006	Apply accident-emergency procedures
TLIF2010	Apply fatigue management strategies
TLIF2080	Safely access the rail corridor
TLIF3058	Apply safeworking rules and regulations to rail functions
TLIF3083	Conduct track protection assessment
TLIF3085	Apply local incident response procedures
TLIF3087	Follow work health and safety, and environmental procedures in the rail industry
TLIG4006	Facilitate work teams
TLIL4038	Organise marshalling and shunting operations

General elective units

TLIB2131	Prepare train
TLIB3018	Conduct full train examination
TLIB3021	Conduct train roll-by inspection
TLIB3129	Conduct pre-movement checks on rolling stock
TLIC3017	Shunt rolling stock
TLIF3091	Apply awareness of dangerous goods and hazardous materials requirements
TLIW2041	Clip points and apply rail safety equipment
TLIW3026	Operate stand alone signalling/point control equipment

Qualification Mapping Information

This qualification replaces and is equivalent to TLI32813 Certificate III in Rail Yard Coordination.

TLI32915 Certificate III in Tram or Light Rail Infrastructure

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for a person engaged in the tram or light rail infrastructure environment who performs tasks involving a broad range of skilled applications applied in a wide variety of contexts, which may involve application of some discretion and judgment in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles

This qualification is aligned to the following defined roles:

- Tram Infrastructure Track Worker Level 4
- Light Rail Track Worker.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

The entry requirement for this qualification is TLI22215 Certificate II in Tram or Light Rail Infrastructure or equivalent vocational experience working within the rail infrastructure environment.

Packaging Rules

A total of **11 units of competency** comprising:

6 core units listed below **plus**

5 general elective units from the general elective units listed below. Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

© Commonwealth of Australia, 2025 Industry Skills Australia

Core units

RIICCM203D	Read and interpret plans and job specifications
TLIC3003	Drive medium rigid vehicle
TLIE2007	Use communications systems
TLIE2008	Process workplace documentation
TLIW3035	Heat and cut materials using oxy-LPG equipment for the rail industry
TLIW3042	Grind rail on tram/light rail systems

General elective units

AHCARB205A	Operate and maintain chainsaws
CPCCLDG3001A	Licence to perform dogging
TAEDEL301A	Provide work skill instruction
TLIB2097	Install and maintain guard rails
TLIC3045	Operate road/rail vehicle
TLID2010	Operate a forklift
TLID3033	Operate a vehicle-mounted loading crane
TLIE2029	Conduct workplace information briefings
TLIF2006	Apply accident-emergency procedures
TLIF3003	Implement and monitor work health and safety procedures
TLIG1001	Work effectively with others
TLIG2007	Work in a socially diverse environment
TLIG3002	Lead a work team or group
TLII1002	Apply customer service skills
TLIW3013	Grind switches and crossings
TLIW3043	Weld rail on tram/light rail systems using electric welding process

TLI33015 Certificate III in Heritage Locomotive Assistant or Steam Locomotive Fireman

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for a person who carries out the duties of a locomotive assistant on a heritage locomotive or fireman on a steam locomotive.

This job involves the performance of a broad range of skilled applications applied in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles

This qualification is aligned to the following defined roles:

- Group A: Heritage Locomotive Assistant
- Group B: Steam Locomotive Fireman.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **14 units of competency** comprising:

- **8 core units** listed below **plus**
- **2 specialist elective units** from within either Group A or Group B, listed below **plus**
- **4 general elective units** from the **general elective units** listed below. Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.
- Where imported units are selected, care must be taken to ensure that all prerequisite units

© Commonwealth of Australia, 2025 Industry Skills Australia

specified are complied with.

Core units

TLIB3126	Assist in the testing of heritage train braking systems
TLID1001	Shift materials safely using manual handling methods
TLIE2008	Process workplace documentation
TLIF2006	Apply accident-emergency procedures
TLIF2010	Apply fatigue management strategies
TLIF3058	Apply safeworking rules and regulations to rail functions
TLIF3087	Follow work health and safety, and environmental procedures in the rail industry
TLIW3026	Operate stand alone signalling/point control equipment

Specialist elective units

Group A: Heritage Locomotive Assistant

TLIB3123	Apply awareness of motive power unit fundamentals
TLIC3072	Conduct the duties of an assistant on a heritage locomotive

Group B: Steam Locomotive Fireman

TLIB3124	Apply awareness of steam locomotive fundamentals
TLIC3073	Fire a steam locomotive

General elective units

TLIB2001	Check and assess operational capabilities of equipment
TLIB3002	Test equipment and isolate faults
TLIB3021	Conduct train roll-by inspection
TLIB3026	Prepare for train operation
TLIC3017	Shunt rolling stock
TLIE2007	Use communications systems
TLIF2018	Operate firefighting equipment

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIF2080	Safely access the rail corridor
TLIF3091	Apply awareness of dangerous goods and hazardous materials requirements
TLII4022	Identify and meet customer requirements

Qualification Mapping Information

This qualification replaces and is equivalent to TLI33013 Certificate III in Heritage Locomotive Assistant or Steam Locomotive Fireman.

TLI33215 Certificate III in Terminal Train Driving

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for a person engaged in terminal train driving.

This qualification requires the application of a broad range of knowledge and skills in varied contexts to undertake skilled work within a terminal train driving environment.

This qualification requires the skills and knowledge to:

- interpret and act on available information
- apply and communicate known solutions to a variety of predictable problems and to deal with unforseen contingencies using known solutions
- provide technical information to a variety of specialist and non-specialist audiences
- undertake routine and some non-routine tasks in a range of skilled operations.

These skills and knowledge will be applied to known routines, methods, procedures and time constraints while taking responsibility for own outputs.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Terminal Operator
- Terminal Train Driver
- Yard Terminal Driver.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **17 units** of competency comprising:

9 core units listed below **plus**

© Commonwealth of Australia, 2025 Industry Skills Australia

8 general elective units from the general elective units listed below. Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIB0132	Start up and shut down a single locomotive
TLIB2131	Prepare train
TLIB3123	Apply awareness of motive power unit fundamentals
TLIC0079	Operate a motive power unit within defined limits
TLIC3027	Stable a motive power unit
TLIE2007	Use communications systems
TLIF2010	Apply fatigue management strategies
TLIF3058	Apply safeworking rules and regulations to rail functions
TLIU2012	Participate in environmentally sustainable work practices

General elective units

HLTAID003	Provide first aid
TLIB2122	Apply awareness of fundamentals of rail operations in yards or sidings
TLIB3018	Conduct full train examination
TLIB3019	Test train braking system
TLIB3021	Conduct train roll-by inspection
TLIB3113	Diagnose and rectify minor faults on motive power units and rolling stock
TLIB3118	Apply awareness of railway fundamentals
TLIB4078	Carry out a train roll-by inspection
TLIB4079	Conduct a general train examination
TLIB4081	Provision a motive power unit
TLIB4082	Set up motive power units in multi-coupled consist

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIC3017	Shunt rolling stock
TLIC3048	Shunt, couple and uncouple electric passenger trains
TLIC3082	Operate a locomotive by portable remote control
TLIC4074	Shunt, couple and uncouple rail vehicles
TLIE1005	Carry out basic workplace calculations
TLIE2008	Process workplace documentation
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIF2018	Operate firefighting equipment
TLIF2080	Safely access the rail corridor
TLIF3085	Apply local incident response procedures
TLIF3091	Apply awareness of dangerous goods and hazardous materials requirements
TLIK2010	Use infotechnology devices in the workplace
TLIL2048	Prepare for train departure
TLIW2041	Clip points and apply rail safety equipment
TLIW3026	Operate stand alone signalling/point control equipment

Qualification Mapping Information

This qualification replaces and is equivalent to TLI33213 Certificate III in Terminal Train Driving.

TLI33516 Certificate III in Stevedoring

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in operational roles in a stevedoring environment.

It involves a broad range of skilled applications applied in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Clerical Officer
- Crane Operator
- Equipment Controller
- Equipment Operator
- Team Leader.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

The entry requirement for this qualification is the **8 core** units of competency from TLI21416 Certificate II in Stevedoring listed below.

Entry requirement units

TLIA2050 Lash and unlash cargo and containers

TLID1001 Shift materials safely using manual handling methods

TLIE1003 Participate in basic workplace communication

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIF1001	Follow work health and safety procedures
TLIF2006	Apply accident-emergency procedures
TLIF2010	Apply fatigue management strategies
TLIG1001	Work effectively with others
TLIU1009	Monitor plant and equipment in an environmentally sustainable manner

Packaging Rules

A total of **13 units of competency** comprising:

4 core units listed below **plus**

All units within one of the **specialist elective unit groups** (job roles) listed below **plus**

A **minimum of 4 general elective units** and a **maximum of 5 general elective units** listed below (depending on the specialist elective group or job role selected), or the remaining specialist elective units listed below.

Up to 2 of the general elective units may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

BSBWHS303	Participate in WHS hazard identification, risk assessment and risk control
TLIE2008	Process workplace documentation
TLIE3021	Work and communicate effectively with others
TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures

Specialist elective units

Select all units from one of the following specialist elective groups:

- Group A: Team Leading

© Commonwealth of Australia, 2025 Industry Skills Australia

- Group B: Clerical
- Group C: Equipment Operations
- Group D: Reefer Operations
- Group E: Equipment Control
- Group F: Crane Operations.

Group A: Team Leading

TLIF3003	Implement and monitor work health and safety procedures
TLIG3002	Lead a work team or group
TLIL4005	Apply conflict/grievance resolution strategies
TLIO3016	Apply and monitor workplace security procedures

Group B: Clerical

TLIA2009	Complete and check import/export documentation
TLIA3004	Process receipt and delivery of containers and cargo
TLIK2010	Use infotechnology devices in the workplace
TLIO2021	Follow security procedures when working with goods and cargo

Group C: Equipment Operations

TLIB2001	Check and assess operational capabilities of equipment
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIO2021	Follow security procedures when working with goods and cargo

Note: must choose at least one of the following units

TLID2012	Operate specialised load shifting equipment
TLID2045	Operate specialised light load shifting equipment

Group D: Reefer Operations

TLIA2003	Connect and disconnect reefer units
TLIA3002	Maintain container/cargo records
TLIF2068	Work at height in the stevedoring industry

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIK2010	Use infotechnology devices in the workplace
TLIO2021	Follow security procedures when working with goods and cargo

Group E: Equipment Control

TLIA3055	Coordinate terminal/wharf equipment operations
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIK2010	Use infotechnology devices in the workplace
TLIO2021	Follow security procedures when working with goods and cargo

Group F: Crane Operations

TLIB2001	Check and assess operational capabilities of equipment
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIE3015	Undertake rigger/dogger and driver communication
TLIO2021	Follow security procedures when working with goods and cargo

Note: must choose at least one of the following units

TLID3043	Shift loads using gantry equipment
TLID3044	Shift loads using cranes
TLID3047	Shift loads using ship mounted crane

General elective units

CPCCLDG3001A	Licence to perform dogging
HLTAID003	Provide first aid
TLIA2003	Connect and disconnect reefer units
TLIA2009	Complete and check import/export documentation
TLIA3002	Maintain container/cargo records
TLIA3004	Process receipt and delivery of containers and cargo

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIA3008	Transfer cargo
TLIA3055	Coordinate terminal/wharf equipment operations
TLIB2001	Check and assess operational capabilities of equipment
TLIB3011	Set up and rig crane for lift
TLIB3012	Plan job and set up work areas
TLIB3013	Maintain mobile cranes
TLIB3016	De-rig, pack and store tools and equipment
TLIB3017	Assemble and dismantle boom or jib
TLIC2002	Drive light rigid vehicle
TLIC3003	Drive medium rigid vehicle
TLIC3004	Drive heavy rigid vehicle
TLIC3005	Drive heavy combination vehicle
TLIC4006	Drive multi-combination vehicle
TLID2003	Handle dangerous goods/hazardous substances
TLID2004	Load and unload goods/cargo
TLID2010	Operate a forklift
TLID2012	Operate specialised load shifting equipment
TLID2021	Use specialised bulk transfer equipment (dry)
TLID2022	Conduct weighbridge operations
TLID2047	Prepare cargo for transfer with slings
TLID3011	Conduct specialised forklift operations
TLID3035	Operate a boom type elevating work platform
TLID3040	Control lift and movement of crane
TLID4008	Monitor crane operations
TLID4009	Direct crane operations
TLID4032	Plan and conduct specialised lift

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIE2008	Process workplace documentation
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIE3015	Undertake rigger/dogger and driver communication
TLIE3016	Estimate/calculate load shifting requirements for a mobile crane
TLIF2010	Apply fatigue management strategies
TLIF2068	Work at height in the stevedoring industry
TLIF2080	Safely access the rail corridor
TLIF3013	Coordinate breakdowns and emergencies
TLIF3084	Follow mobile crane safety procedures
TLIG2007	Work in a socially diverse environment
TLIJ3002	Apply quality systems
TLIK2003	Apply keyboard skills
TLIK2010	Use infotechnology devices in the workplace
TLILIC2001	Licence to operate a forklift truck
TLILIC2005	Licence to operate a boom-type elevating work platform (boom length 11 metres or more)
TLILIC3003	Licence to operate a bridge and gantry crane
TLILIC3004	Licence to operate a derrick crane
TLILIC3006	Licence to operate a non-slewing mobile crane (greater than 3 tonnes capacity)
TLILIC3007	Licence to operate a portal boom crane
TLILIC3008	Licence to operate a slewing mobile crane (up to 20 tonnes)
TLILIC3019	Licence to operate a reach stacker (greater than 3 tonnes capacity)
TLILIC4009	Licence to operate a slewing mobile crane (up to 60 tonnes)

© Commonwealth of Australia, 2025 Industry Skills Australia

TLILIC4010	Licence to operate a slewing mobile crane (up to 100 tonnes)
TLILIC4011	Licence to operate a slewing mobile crane (over 100 tonnes)
TLIO3016	Apply and monitor workplace security procedures
TLIU1009	Monitor plant and equipment in an environmentally sustainable manner

Qualification Mapping Information

This qualification replaces and is equivalent to TLI33513 Certificate III in Stevedoring.

TLI40115 Certificate IV in Rail Safety Investigation

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for a person who undertakes a rail safety investigation within the rail industry in accordance with regulator, rail industry standards, rules and operational procedures.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **18 units of competency** comprising:

14 core units listed below **plus**

4 general elective units. The **general elective units** may be selected from the general elective units listed below and up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

BSBRSK401	Identify risk and apply risk management processes
PSPREG411A	Gather information through interviews
PSPREG418A	Advise on progress of investigations
TLIB3118	Apply awareness of railway fundamentals
TLIE3022	Complete workplace documents

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIE4030	Prepare rail safety reports
TLIF2062	Apply awareness of safeworking rules and regulations
TLIF2080	Safely access the rail corridor
TLIF3083	Conduct track protection assessment
TLIF4088	Implement and coordinate rail safety and WHS risk-control strategies
TLIF4100	Identify and meet rail safety regulatory compliance requirements
TLIF4107	Respond to notifiable rail safety occurrences
TLIF5017	Investigate rail safety incidents
TLIG4006	Facilitate work teams

General elective units

TLIB4042	Conduct inspection of safeworking procedures and infrastructure
TLIF3085	Apply local incident response procedures
TLIF4101	Implement and maintain a rail safety culture

Qualification Mapping Information

This is the first release of this qualification in the TLI Transport and Logistics Training Package.

TLI41216 Certificate IV in Transport and Logistics (Road Transport - Car Driving Instruction)

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This qualification is for those engaged in driving instructor job roles within the Transport and Logistics Industry.

It includes the performance of a broad range of skilled applications including requirements to evaluate and analyse current practices, to develop new criteria and procedures for performing current practices, and to provide some leadership and guidance to others in applying skills and planning skill development.

This qualification is currently cited as meeting part of the requirements for certification as a Motor Vehicle Driving Instructor, as defined by relevant state/territory licensing and regulatory requirements.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **12 units of competency** comprising:

12 core units listed below

Core units

BSBRKG304	Maintain business records
TAEDEL301A	Provide work skill instruction
TAEDES401A	Design and develop learning programs
TLIC1051	Operate a commercial vehicle

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIC3036	Apply safe car driving behaviours
TLIF1001	Follow work health and safety procedures
TLIG2007	Work in a socially diverse environment
TLII1002	Apply customer service skills
TLIL2060	Complete induction to the transport industry
TLIL4009	Manage personal work priorities and professional development
TLIM0001	Conduct learner driver training
TLIM4001	Develop safe car driving behaviours in others

Qualification Mapping Information

This qualification replaces but is **not** equivalent to TLI41210 Certificate IV in Transport and Logistics (Road Transport - Car Driving Instruction).

TLI41316 Certificate IV in Transport and Logistics (Road Transport - Heavy Vehicle Driving Instruction)

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in heavy vehicle driving instructor job roles within the Transport and Logistics Industry.

It includes the performance of a broad range of skilled applications including requirements to evaluate and analyse current practices, to develop new criteria and procedures for performing current practices, and to provide some leadership and guidance to others in applying skills and planning skill development.

This qualification is currently cited as meeting part of the requirements for certification as a Heavy Vehicle Driving Instructor, as defined by relevant state/territory licensing and regulatory requirements.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **14 units of competency** comprising:

13 core units listed below **plus**

1 industry elective unit from the industry elective units listed below, relevant to the vehicle type applicable to the job role.

Core units

BSBRKG304 Maintain business records

TAEDEL301A Provide work skill instruction

TAEDES401A Design and develop learning programs

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIC3037	Apply safe heavy vehicle driving behaviours
TLIF1001	Follow work health and safety procedures
TLIF2010	Apply fatigue management strategies
TLIF4066	Implement and supervise transport regulations compliance systems
TLIG2007	Work in a socially diverse environment
TLII1002	Apply customer service skills
TLIL2060	Complete induction to the transport industry
TLIL4009	Manage personal work priorities and professional development
TLIM0002	Conduct heavy vehicle learner driver training
TLIM4002	Develop safe heavy vehicle driving behaviours in others

Industry elective units

TLIC2002	Drive light rigid vehicle
TLIC3003	Drive medium rigid vehicle
TLIC3004	Drive heavy rigid vehicle
TLIC3005	Drive heavy combination vehicle
TLIC4006	Drive multi-combination vehicle

Qualification Mapping Information

This qualification replaces but is **not** equivalent to TLI41310 Certificate IV in Transport and Logistics (Road Transport - Heavy Vehicle Driving Instruction).

TLI41515 Certificate IV in Materiel Logistics

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for a person who is engaged in the Logistics Industry in a variety of integrated logistics and materiel sustainment roles.

Successful achievement of this qualification requires a person to perform a broad range of skilled applications including requirements to evaluate and analyse current practices, develop new criteria and procedures for performing current practices, and to provide some leadership and guidance to others.

This qualification is targeted at practitioners from the logistics support discipline with at least twelve months' experience. Practitioners from the inventory management, data management, maintenance system management and integrated logistics support (acquisition and sustainment) job streams would benefit from this qualification.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **17 units of competency** comprising:

4 core units listed below **plus**

3 logistics elective units from the logistics elective units listed below **plus**

4 technical elective units from the technical elective units listed below **plus**

6 general elective units from the general elective units or remaining logistics or technical elective units listed below. Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units are

complied with.

Core units

PSPGOV404B	Develop and implement work unit plans
PSPGOV413A	Compose complex workplace documents
PSPPROC303A	Carry out basic procurement
TLIX4028	Apply knowledge of logistics

Logistics elective units

TLIX4007	Implement and monitor integrated logistics support plans
TLIX4008	Conduct integrated logistics support activities
TLIX4009	Apply integrated logistics support processes and procedures
TLIX4011	Conduct logistics support analysis activities
TLIX4016	Implement and monitor materiel sustainment plans
TLIX4017	Conduct materiel sustainment activities
TLIX4018	Apply materiel sustainment processes and procedures
TLIX4022	Implement and monitor configuration management plans
TLIX4023	Conduct configuration management activities
TLIX4024	Apply configuration management processes and procedures

Technical elective units

TLIP5036	Manage assets
TLIX4026	Apply codification and cataloguing processes and procedures
TLIX4027	Assess maintenance spares and manage repairable items
TLIX4029	Apply knowledge of integrated logistics support
TLIX4030	Apply knowledge of materiel sustainment
TLIX4031	Apply knowledge of configuration management
TLIX4032	Apply knowledge of technical regulatory framework

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIX4034	Apply technical risk management systems and techniques
TLIX4035	Maintain technical data and information

General elective units

BSBADM409	Coordinate business resources
BSBCOM501	Identify and interpret compliance requirements
BSBINM401	Implement workplace information system
BSBLDR403	Lead team effectiveness
BSBWHS401	Implement and monitor WHS policies, procedures and programs to meet legislative requirements
BSBMGT403	Implement continuous improvement
BSBREL401	Establish networks
BSBRSK401	Identify risk and apply risk management processes
PSPGOV406B	Gather and analyse information
PSPGOV421A	Exercise delegations
PSPPM401B	Design simple projects
PSPPM402B	Manage simple projects
PSPPM403B	Close simple projects
PSPPROC405C	Dispose of assets
PSPPROC411A	Plan procurement
PSPPROC412A	Develop and distribute requests for offers
PSPPROC413A	Select providers and develop contracts
PSPPROC414A	Manage contracts
TLIR4001	Monitor supplier performance
TLIU4001	Implement and monitor environmental protection policies and procedures
TLIX4033	Apply technical regulatory framework compliance management systems

TLI41616 Certificate IV in International Freight Forwarding (Senior Operator)

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in international freight forwarding job roles at a senior operational level within the International Freight Forwarding Industry.

It involves a broad range of skilled applications including evaluating and analysing current practices, developing new criteria and procedures for performing current practices, and providing some leadership and guidance to others.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **11 units of competency** comprising:

6 core units listed below **plus**

5 general elective units from the general elective units listed below. Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIA4031 Consolidate freight

TLIA5035 Manage international freight transfer

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIE3002 Estimate/calculate mass, area and quantify dimensions

TLIF0001 Apply chain of responsibility legislation, regulations and workplace procedures

TLII0001 Market international freight forwarding services

TLIO2021 Follow security procedures when working with goods and cargo

General elective units

TLIA4032 Organise transport of freight or goods

TLIA4033 Organise international transport of freight

TLID2003 Handle dangerous goods/hazardous substances

TLII0002 Provide freight forwarding information and customer service

TLIL4010 Assess and confirm customer transport requirements

TLIL5026 Manage export logistics

TLIM4004 Mentor individuals or small groups

TLIR4001 Monitor supplier performance

TLIR4002 Source goods/services and evaluate contractors

Qualification Mapping Information

This qualification replaces but is **not** equivalent to TLI41610 Certificate IV in International Freight Forwarding (Senior Operator).

TLI41715 Certificate IV in Stevedoring Operations

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This qualification is for a person engaged in operational roles within a stevedoring environment. It involves a broad range of skilled applications including evaluating and analysing current practices, developing new criteria and procedures for performing current practices, and providing some leadership and guidance to others.

Successful achievement of the licensing units within the qualification must align with applicable licensing and regulatory requirements.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Stevedore Shift Foreperson
- Stevedore Charge Foreperson.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **15 units of competency** comprising:

9 core units listed below plus

6 general elective units from the general elective units listed below. Up to **3 of the general elective units** may be selected from any relevant endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

© Commonwealth of Australia, 2025 Industry Skills Australia

Core units

TLIA4006	Organise and monitor terminal/wharf operations
TLIE4006	Collect, analyse and present workplace data and information
TLIF4007	Implement and coordinate accident-emergency procedures
TLIF4014	Develop and maintain a safe workplace
TLIF4064	Manage fatigue management policy and procedures
TLIG4006	Facilitate work teams
TLIL4005	Apply conflict/grievance resolution strategies
TLIL4033	Promote effective workplace practice
TLIU4001	Implement and monitor environmental protection policies and procedures

Elective units

BSBRSK401	Identify risk and apply risk management processes
CPCCLDG3001A	Licence to perform dogging
TLIA4005	Check and evaluate records and documentation
TLIA4040	Implement and monitor stevedoring regulations
TLIA4063	Coordinate stevedoring clerical functions
TLID4008	Monitor crane operations
TLID4009	Direct crane operations
TLIE2007	Use communications systems
TLIE3015	Undertake rigger/dogger and driver communication
TLIF3022	Implement/monitor procedures when warehousing/storing dangerous goods/hazardous substances
TLII4001	Coordinate quality customer service
TLIJ3002	Apply quality systems
TLIK2010	Use infotechnology devices in the workplace

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIL2031	Monitor and process attendance records
TLIL4009	Manage personal work priorities and professional development
TLIL4010	Assess and confirm customer transport requirements
TLIL4032	Implement equal employment equity strategies
TLIL4037	Apply and amend rosters
TLIM4004	Mentor individuals or small groups
TLIO3016	Apply and monitor workplace security procedures
TLIP4001	Develop plans to meet customer and organisation needs
TLIP4002	Facilitate and capitalise on change in the workplace
TLIP4003	Implement, maintain and evaluate dangerous goods transport procedures within the workplace
TLIP4005	Manage workplace information

Qualification Mapping Information

This qualification replaces and is equivalent to TLI41710 Certificate IV in Stevedoring Operations.

TLI41816 Certificate IV in Warehousing Operations

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for the Warehousing and Storage Industry.

It involves a broad range of skilled applications including requirements to evaluate and analyse current practices, to develop new criteria and procedures for performing current practices, and to provide leadership and guidance to others in applying skills and planning skill development.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of 21 units of competency comprising:

3 core units listed below **plus**

18 general elective units from the general elective units listed below. Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures
TLIF1001	Follow work health and safety procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIL1001 Complete workplace orientation/induction procedures

General elective units

TLIA4025 Regulate temperature controlled stock

TLIA4028 Assess and monitor optimum stock levels

TLIA4031 Consolidate freight

TLIA4032 Organise transport of freight or goods

TLID2010 Operate a forklift

TLIE4006 Collect, analyse and present workplace data and information

TLIE4013 Apply workplace statistics

TLIF0002 Administer chain of responsibility policies and procedures

TLIF4007 Implement and coordinate accident-emergency procedures

TLIF4014 Develop and maintain a safe workplace

TLIG3002 Lead a work team or group

TLIG4005 Organise transport workload

TLIG4006 Facilitate work teams

TLII4001 Coordinate quality customer service

TLII4005 Market services and products to clients

TLIJ3002 Apply quality systems

TLIL4005 Apply conflict/grievance resolution strategies

TLIL4009 Manage personal work priorities and professional development

TLIL4010 Assess and confirm customer transport requirements

TLIL4021 Coordinate the erection and dismantling of temporary storage facilities

TLIL4032 Implement equal employment equity strategies

TLIL4033 Promote effective workplace practice

TLIL4036 Develop rosters

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIL4037	Apply and amend rosters
TLILIC2001	Licence to operate a forklift truck
TLILIC2002	Licence to operate an order picking forklift truck
TLIM4004	Mentor individuals or small groups
TLIP4001	Develop plans to meet customer and organisation needs
TLIP4002	Facilitate and capitalise on change in the workplace
TLIP4005	Manage workplace information
TLIP4031	Maintain customer credit accounts and services
TLIR4001	Monitor supplier performance
TLIR4002	Source goods/services and evaluate contractors
TLIU0001	Develop workplace policy and procedures for environmental sustainability
TLIU3011	Implement and monitor environmentally sustainable work practices
TLIU4001	Implement and monitor environmental protection policies and procedures

TLI41916 Certificate IV in Mobile Crane Operations

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This qualification is designed for mobile crane operation within the Transport and Logistics Industry and other industries. It involves a broad range of skilled applications applied in a wide variety of contexts.

Successful achievement of the high risk work (HRW) and heavy vehicle licensing units in the qualification must align with licensing and regulatory requirements.

People seeking certification for HRW licensing units should check the requirements with Safe Work Australia.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **20 units of competency** comprising:

10 core units listed below **plus**

10 elective units, of which **1 electi**ve unit must be taken from Group A elective units listed below and 6 elective units must be taken from Group B elective units listed below **plus**

The remaining **3 elective units** may be selected from Group A or Group B or from any relevant nationally endorsed Training Package or accredited course.

The elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

The following units have a prerequisite unit:

© Commonwealth of Australia, 2025 Industry Skills Australia

- CPCCCM2010B Work safely at heights
- CPCCCM3003A Work safely around power sources, services and assets
- CPCCLRG3001A Licence to perform rigging basic level
- CPCCLRG3002A Licence to perform rigging intermediate level

Note:

To comply with the National Standards for Licensing Persons Performing High Risk Work, there is a requirement to achieve TLILIC3006 Licence to operate a non-slewing mobile crane (greater than 3 tonnes capacity) before commencing the selected slewing mobile crane licence unit.

Applying for a high risk work licence for TLILIC3006 Licence to operate a non-slewing mobile crane (greater than 3 tonnes capacity) is not a requirement if the selected mobile slewing crane licence is being applied for, as this licence covers TLILIC3006 Licence to operate a non-slewing mobile crane.

Core units

CPCCCM2010B	Work safely at heights
CPCCCM3003A	Work safely around power sources, services and assets
CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry
TLIB3013	Maintain mobile cranes
TLID1001	Shift materials safely using manual handling methods
TLIE2008	Process workplace documentation
TLIF2006	Apply accident-emergency procedures
TLIF3084	Follow mobile crane safety procedures
TLILIC3006	Licence to operate a non-slewing mobile crane (greater than 3 tonnes capacity)
TLIU1009	Monitor plant and equipment in an environmentally sustainable manner

Elective units

Group A: High Risk Licensing

CPCCLDG3001A	Licence to perform dogging
CPCCLRG3001A	Licence to perform rigging basic level
CPCCLRG3002A	Licence to perform rigging intermediate level

© Commonwealth of Australia, 2025 Industry Skills Australia

TLILIC4009	Licence to operate a slewing mobile crane (up to 60 tonnes)
TLILIC4010	Licence to operate a slewing mobile crane (up to 100 tonnes)
TLILIC4011	Licence to operate a slewing mobile crane (over 100 tonnes)

Group B: General

CPCCOHS1001A	Work safely in the construction industry
HLTAID003	Provide first aid
HLTAID006	Provide advanced first aid
TLIA1001	Secure cargo
TLIB2001	Check and assess operational capabilities of equipment
TLIB3011	Set up and rig crane for lift
TLIB3012	Plan job and set up work areas
TLIB3015	Undertake site inspection
TLIB3016	De-rig, pack and store tools and equipment
TLIC3004	Drive heavy rigid vehicle
TLIC3005	Drive heavy combination vehicle
TLIC3010	Pilot or escort oversized and/or overmassed loads
TLIC4006	Drive multi-combination vehicle
TLID3031	Rig load
TLID4032	Plan and conduct specialised lift
TLIE3009	Use pilot and escort communication
TLIF1002	Conduct housekeeping activities
TLIF2010	Apply fatigue management strategies
TLILIC2005	Licence to operate a boom-type elevating work platform (boom length 11 metres or more)
TLIP4010	Assess lift requirements and provide quotation

TLI42016 Certificate IV in Logistics

Modification History

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package.

Packaging rules for the elective units have been clarified.

The following units have been added to the general elective units:

- TLIF0006 Administer a fatigue risk management system
- TLIF0007 Manage a fatigue risk management system

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in logistics operations in the Transport and Logistics Industry in a variety of operational roles.

It involves a broad range of skilled applications including requirements to evaluate and analyse current practices, to develop new criteria and procedures for performing current practices, and to provide leadership and guidance to others in applying skills and planning skill development.

Successful achievement of the licensing units within the qualification must align with applicable licensing and regulatory requirements.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Logistics Coordinator
- Logistics Supervisor.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **15 units of competency** comprising:

2 core unit listed below **plus**

© Commonwealth of Australia, 2025 Industry Skills Australia

7 technical elective units from the technical elective units listed below **plus**

6 general elective units from the general elective units or remaining technical elective units listed below. Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Elective units can only be counted once towards the qualification packaging rules i.e. if a unit is listed in both a technical elective group and the general elective group, it can only be counted as one of the elective units required.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures
TLIX4028	Apply knowledge of logistics

Technical elective units

PSPPCM004	Plan procurement
TLIA4028	Assess and monitor optimum stock levels
TLIA4032	Organise transport of freight or goods
TLIA4033	Organise international transport of freight
TLIA4062	Implement safety stock systems
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIE4013	Apply workplace statistics
TLIF0002	Administer chain of responsibility policies and procedures
TLIF3063	Administer the implementation of fatigue management strategies
TLIF4014	Develop and maintain a safe workplace
TLIF4065	Ensure compliance with Australian Dangerous Goods Code
TLIF4066	Implement and supervise transport regulations compliance systems
TLIG4005	Organise transport workload
TLII4001	Coordinate quality customer service
TLIL4030	Control a furniture warehouse
TLIL4070	Work effectively in the transport and logistics industry

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIL4078	Coordinate fleet control logistics
TLIP4003	Implement, maintain and evaluate dangerous goods transport procedures within the workplace
TLIP4013	Implement and monitor logistics planning and processes
TLIP4038	Monitor a supply chain operation
TLIP4039	Monitor transport operations
TLIP4040	Monitor warehouse operations
TLIR4001	Monitor supplier performance
TLIR4002	Source goods/services and evaluate contractors
TLIR4003	Negotiate a contract
TLIR4008	Implement and supervise stocktaking procedures
TLIR4009	Implement purchasing systems
TLIR4010	Plan purchasing
TLIR4012	Conduct international purchasing
TLIU3011	Implement and monitor environmentally sustainable work practices

General elective units

BSBCUS401	Coordinate implementation of customer service strategies
BSBHRM405	Support the recruitment, selection and induction of staff
BSBMGT403	Implement continuous improvement
BSBRSK401	Identify risk and apply risk management processes
BSBWHS401	Implement and monitor WHS policies, procedures and programs to meet legislative requirements
HLTAID003	Provide first aid
HLTAID006	Provide advanced first aid
PSPGOV404B	Develop and implement work unit plans
PSPGOV406B	Gather and analyse information

© Commonwealth of Australia, 2025 Industry Skills Australia

PSPGOV413A	Compose complex workplace documents
PSPPROC411A	Plan procurement
SITXFIN402	Manage finances within a budget
TLIA4005	Check and evaluate records and documentation
TLID1001	Shift materials safely using manual handling methods
TLIE3012	Consolidate manifest documentation
TLIF0002	Administer chain of responsibility policies and procedures
TLIF0006	Administer a fatigue risk management system
TLIF0007	Manage a fatigue risk management system
TLIF4007	Implement and coordinate accident-emergency procedures
TLIG4006	Facilitate work teams
TLIJ4008	Implement and monitor inbound quality assurance systems
TLIK2010	Use infotechnology devices in the workplace
TLIL4005	Apply conflict/grievance resolution strategies
TLIL4009	Manage personal work priorities and professional development
TLIL4036	Develop rosters
TLIL4037	Apply and amend rosters
TLIL4058	Plan a career in logistics
TLIL4059	Implement asset management systems
TLILIC2001	Licence to operate a forklift truck
TLIP4001	Develop plans to meet customer and organisation needs
TLIP4002	Facilitate and capitalise on change in the workplace
TLIP4005	Manage workplace information
TLIP4028	Administer international trading accounts
TLIU2012	Participate in environmentally sustainable work practices

© Commonwealth of Australia, 2025 Industry Skills Australia

Qualification Mapping Information

This qualification replaces but is not equivalent to TLI42010 Certificate IV in Logistics.

TLI42116 Certificate IV in Driving Operations

Modification History

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package.

The following units have been added to the general elective units:

- TLIF0005 Apply a fatigue risk management system
- TLIF0006 Administer a fatigue risk management system.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in driving operation job roles in the Transport and Logistics industry.

It involves a broad range of skilled applications including requirements to evaluate and analyse current practices, to develop new criteria and procedures for performing current practices, and to provide leadership and guidance to others in applying skills and planning skill development.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Chemical tanker driver
- Fuel tanker driver
- Heavy recovery driver
- LP gas tanker driver.

Successful achievement of the licensing unit in the qualification must align with licensing and regulatory requirements applicable to driving and state or territory regulatory requirements.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **12 units of competency** comprising**:**

© Commonwealth of Australia, 2025 Industry Skills Australia

4 core units listed below **plus**

1 licensing/industry elective unit relevant to the vehicle type applicable to the job role from the licensing/industry elective units listed below **plus**

All units within one of the **specialist elective groups (**job roles) from Group A, Group B, Group C or Group D listed below **plus**

5 general elective units from the general elective units listed below if selecting Group A, Group B or Group C **or**

6 general elective units from the general elective units listed below if selecting Group D.

Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

The following units have prerequisite units:

- CPCCSF2003A Cut and bend materials using oxy-LPG equipment
- TLIC0002 Operate fuel tanker
- TLIC0003 Operate LP gas tanker
- TLID4048 Top load a dangerous goods tanker
- TLID4049 Bottom load a dangerous goods tanker.

Core units

TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures
TLIF2010	Apply fatigue management strategies
TLIF4066	Implement and supervise transport regulations compliance systems
TLIF4095	Apply work health and safety requirements for driving operations

Licensing/Industry elective units

TLIC1051	Operate commercial vehicle
TLIC2002	Drive light rigid vehicle
TLIC3003	Drive medium rigid vehicle
TLIC3004	Drive heavy rigid vehicle
TLIC3005	Drive heavy combination vehicle

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIC4006	Drive multi-combination vehicle
TLILIC2014	Licence to drive a light rigid vehicle
TLILIC2015	Licence to drive a medium rigid vehicle
TLILIC2016	Licence to drive a heavy rigid vehicle
TLILIC3017	Licence to drive a heavy combination vehicle
TLILIC3018	Licence to drive a multi-combination vehicle

Specialist elective units

Select one group (job role) from the following options:

Group A: Fuel Tanker

Group B: LP Gas Tanker

Group C: Chemical Tanker

Group D: Heavy Recovery.

Group A: Fuel Tanker

TLIC0002	Operate fuel tanker
TLILIC0001	Licence to transport dangerous goods by road

Group B: LP Gas Tanker

TLIC0003	Operate LP gas tanker
TLILIC0001	Licence to transport dangerous goods by road

Group C: Chemical Tanker

TLIC0001	Operate chemical tanker
TLILIC0001	Licence to transport dangerous goods by road

Group D: Heavy Recovery

TLIC4069	Operate heavy recovery vehicle

General elective units

AHCARB205A	Operate and maintain chainsaws
AURVGA3002	Recover vehicles

© Commonwealth of Australia, 2025 Industry Skills Australia

CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry
CPCCSF2003A	Cut and bend materials using oxy-LPG equipment
HLTWHS006	Manage personal stressors in the work environment
PUADEFVH001A	Conduct recovery vehicle operations in a field environment
PUADEFVH002A	Extract disabled equipment using winching techniques in a field environment
RIICBS312D	Conduct bitumen tanker operations
TLIB2004	Carry out vehicle inspection
TLIC0001	Operate chemical tanker
TLIC0002	Operate fuel tanker
TLIC0003	Operate LP gas tanker
TLIC4068	Operate heavy recovery ancillary equipment
TLIC4070	Tow a disabled heavy vehicle
TLID4048	Top load a dangerous goods tanker
TLID4049	Bottom load a dangerous goods tanker
TLID4050	Discharge a dangerous goods tanker
TLIE1005	Carry out basic workplace calculations
TLIE3026	Carry out advanced calculations in the transport and logistics industry
TLIE4025	Prepare and process transport documentation for dangerous goods
TLIF0002	Administer chain of responsibility policies and procedures
TLIF0005	Apply a fatigue risk management system
TLIF0006	Administer a fatigue risk management system
TLIF2018	Operate firefighting equipment
TLIF3091	Apply awareness of dangerous goods and hazardous materials requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIF3096	Carry out emergency response to a dangerous goods incident
TLIF4007	Implement and coordinate accident-emergency procedures
TLIF4065	Ensure compliance with Australian Dangerous Goods Code
TLIH2001	Interpret road maps and navigate pre-determined routes
TLIH3002	Plan and navigate routes
TLIJ4010	Implement quality systems and procedures in a dangerous goods workplace
TLIL4010	Assess and confirm customer transport requirements
TLIL4079	Manage the recovery process
TLILIC0012	Licence to operate a vehicle loading crane (capacity 10 metre tonnes and above)
TLIU1009	Monitor plant and equipment in an environmentally sustainable manner

Qualification Mapping Information

This qualification replaces but is **not** equivalent to TLI42111 Certificate IV in Driving Operations.

TLI42215 Certificate IV in Rail Network Control

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for a person engaged in the control of rail networks.

This qualification requires a broad range of skilled applications within the rail control environment. It also requires the skills and knowledge to evaluate and analyse current practices, to develop new criteria and procedures, and to provide some leadership and guidance to others in their work.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Train controller
- Network controller
- Area controller.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **15 units of competency** comprising:

10 core units listed below **plus**

5 general elective units from the general elective units listed below. Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIE3022	Complete workplace documents
TLIE3023	Use electronic communication systems
TLIF2010	Apply fatigue management strategies
TLIF3087	Follow work health and safety, and environmental procedures in the rail industry
TLIF4086	Control and coordinate incident responses
TLIF4090	Implement safeworking rules and regulations for network control activities
TLIG1001	Work effectively with others
TLII4022	Identify and meet customer requirements
TLIL4074	Control and coordinate rail traffic movement
TLIL4075	Implement and amend daily train plan

General elective units

BSBWOR201	Manage personal stress in the workplace
BSBWOR301	Organise personal work priorities and development
BSBWRT301	Write simple documents
TLIB3118	Apply awareness of railway fundamentals
TLIF3091	Apply awareness of dangerous goods and hazardous materials requirements
TLIG2007	Work in a socially diverse environment
TLIJ2001	Apply quality procedures
TLIL2041	Monitor and record rolling stock locations
TLIL3035	Allocate motive power
TLIL3052	Plan urban passenger train consists
TLIL4034	Arrange alternative passenger transport
TLIL4037	Apply and amend rosters
TLIL4038	Organise marshalling and shunting operations

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIL4050	Allocate rolling stock
TLIL4077	Develop out-of-course rail traffic plans and schedules
TLIU2012	Participate in environmentally sustainable work practices

Qualification Mapping Information

This qualification replaces and is equivalent to TLI42211 Certificate IV in Rail Network Control.

TLI42315 Certificate IV in Rail Infrastructure

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for a person engaged in providing infrastructure construction and/or maintenance activities on rail networks.

This qualification requires a broad range of skilled applications within the rail Infrastructure environment. It also requires the skills and knowledge to evaluate and analyse current practices, to develop new criteria and procedures, and to provide some leadership and guidance to others in their work.

Job roles

This qualification is suitable for a variety of job roles in the fields of:

Rail Track Working, Rail Track Surfacing or Rail Structures

Job roles and titles vary across different sectors. Possible job titles relevant to the listed fields include:

- Ganger
- Leading hand
- Team leader
- Work group leader
- Supervisor
- Possession officer.

Track Protection

Possible job titles relevant to this field include:

- Principal protection officer (PPO).

Please note: RTO to insert on the testamur, the specialist elective unit group selected from the group choice below.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

The entry requirement for this qualification is one of the following qualifications:

- TLI31815 Certificate III in Rail Track Surfacing

© Commonwealth of Australia, 2025 Industry Skills Australia

- TLI31915 Certificate III in Mechanical Rail Signalling
- TLI32115 Certificate III in Rail Structures
- TLI32515 Certificate III in Rail Infrastructure
- TLI32715 Certificate III in Track Protection or
- relevant industry experience gained by working in the rail infrastructure environment.
-

Packaging Rules

A total of **13 units of competency** comprising**:**

8 core units listed below **plus**

3 specialist elective units from one of the specialist elective unit group**s** (job roles) from Group A or Group B listed below **plus**

2 general units from the general elective units listed below. Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified in the unit are complied with.

Core units

BSBMGT401	Show leadership in the workplace
BSBPMG409	Apply project scope-management techniques
TLIF3089	Implement fatigue management policies and procedures for rail infrastructure
TLIF4088	Implement and coordinate rail safety and WHS risk-control strategies
TLIG4006	Facilitate work teams
TLIJ4009	Implement and monitor quality assurance systems
TLIL4005	Apply conflict/grievance resolution strategies
TLIL4076	Coordinate resources

Specialist elective units

Select 3 units from one of the following specialist elective groups:

- Group A: Rail Track Working, Rail Track Surfacing or Rail Structures
- Group B: Track Protection.

Group A: Rail Track Working, Rail Track Surfacing or Rail Structures

© Commonwealth of Australia, 2025 Industry Skills Australia

BSBMGT403	Implement continuous improvement
BSBRSK401	Identify risk and apply risk management processes
TLIF2006	Apply accident-emergency procedures
TLIL4073	Apply asset management system

Group B: Track Protection

The selection must include TLIL4069 Plan and coordinate protection for multiple worksites within limits of a work on track authority.

BSBMGT403	Implement continuous improvement
BSBRSK401	Identify risk and apply risk management processes
TLIF2006	Apply accident-emergency procedures
TLIL4069	Plan and coordinate protection for multiple worksites within limits of a work on track authority

General elective units

BSBADM502	Manage meetings
BSBCMM401	Make a presentation
RIIBEF402D	Supervise on-site operations
TLIB4042	Conduct inspection of safeworking procedures and infrastructure
TLID4030	Supervise mobile crane operations
TLII4001	Coordinate quality customer service
TLIP4001	Develop plans to meet customer and organisation needs
TLIR4002	Source goods/services and evaluate contractors
TLIR4008	Implement and supervise stocktaking procedures
TLIR4009	Implement purchasing systems
TLIU3011	Implement and monitor environmentally sustainable work practices

TLI42415 Certificate IV in Rail Safety Management

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in the management of safety within the rail industry.

This qualification requires a broad range of skilled applications within the rail safety environment. It also requires the skills and knowledge to evaluate and analyse current practices, to develop new criteria and procedures, and to provide some leadership and guidance to others in their work.

Job roles

This qualification is aligned to the following defined role:

- Rail Safety Manager.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **17 units of competency** comprising:

11 core units listed below **plus**

6 general elective units from the general elective units listed below. Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

BSBRSK401	Identify risk and apply risk management processes
TLIE4030	Prepare rail safety reports

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIE4032	Use internal communication systems for rail industry regulatory compliance
TLIF4099	Develop an application for, or variation to, rail accreditation
TLIF4100	Identify and meet rail safety regulatory compliance requirements
TLIF4101	Implement and maintain a rail safety culture
TLIF4102	Implement and maintain safety management plans
TLIF4104	Manage change in the rail safety environment
TLIF4105	Manage rail safety compliance
TLIF4107	Respond to notifiable rail safety occurrences
TLIL4081	Ensure competency of rail safety workers

General elective units

BSBADM502	Manage meetings
BSBCMM401	Make a presentation
BSBMGT401	Show leadership in the workplace
BSBMGT403	Implement continuous improvement
BSBPMG518	Manage project procurement
PSPGOV306B	Implement change
TLIF4103	Implement fitness for work procedures
TLIG4006	Facilitate work teams
TLIL4005	Apply conflict/grievance resolution strategies
TLIL4073	Apply asset management system
TLIL4082	Coordinate rail interface agreements
TLIR4002	Source goods/services and evaluate contractors
TLIU4001	Implement and monitor environmental protection policies and procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

TLI42516 Certificate IV in Traffic Operations

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in traffic operations job roles within the Transport and Logistics Industry.

It involves a broad range of skilled applications including requirements to evaluate and analyse current practices, to develop new criteria and procedures for performing current practices, and to provide leadership and guidance to others in applying skills and planning skill development.

Job roles:

The TLI42516 Certificate IV in Traffic Operations qualification is aligned to the following defined roles:

- Tunnel Road Operator
- Open Road Operator.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **14 units of competency** comprising:

11 core units listed below **plus**

1 specialist elective unit from Group A or Group B listed below **plus**

2 general elective units from the **general elective units** listed below. Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

© Commonwealth of Australia, 2025 Industry Skills Australia

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

HLTWHS006	Manage personal stressors in the work environment
TLIB2001	Check and assess operational capabilities of equipment
TLIE3023	Use electronic communication systems
TLIF2010	Apply fatigue management strategies
TLIF3013	Coordinate breakdowns and emergencies
TLIF4007	Implement and coordinate accident-emergency procedures
TLIF4069	Monitor and respond to traffic flow
TLIF5020	Manage emergencies
TLIJ3002	Apply quality systems
TLIK2010	Use infotechnology devices in the workplace
TLIU1009	Monitor plant and equipment in an environmentally sustainable manner

Specialist elective units

Group A: Tunnel Operator

TLIF4070	Operate fire and life safety system within a tunnel

Group B: Open Road Operator

TLIF3085	Apply local incident response procedures

General elective units

HLTAID003	Provide first aid
TLIA4005	Check and evaluate records and documentation
TLIC2002	Drive light rigid vehicle
TLID1002	Shift a load using manually-operated equipment
TLID2013	Move materials mechanically using automated equipment

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIE1003	Participate in basic workplace communication
TLIE2007	Use communications systems
TLIE2008	Process workplace documentation
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIE3004	Prepare workplace documents
TLIE3026	Carry out advanced calculations in the transport and logistics industry
TLIF0002	Administer chain of responsibility policies and procedures
TLIF1002	Conduct housekeeping activities
TLIF2006	Apply accident-emergency procedures
TLIF2018	Operate firefighting equipment
TLIF3063	Administer the implementation of fatigue management strategies
TLIF3085	Apply local incident response procedures
TLIF4007	Implement and coordinate accident-emergency procedures
TLIF4014	Develop and maintain a safe workplace
TLIF4065	Ensure compliance with Australian Dangerous Goods Code
TLIF4070	Operate fire and life safety system within a tunnel
TLIF4108	Implement traffic management plan in the transport industry
TLIG1001	Work effectively with others
TLIG2007	Work in a socially diverse environment
TLIG4006	Facilitate work teams
TLII1002	Apply customer service skills
TLIJ2001	Apply quality procedures
TLIJ3005	Sample, inspect and test products to specifications
TLIK2003	Apply keyboard skills

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIL2008	Complete routine administrative tasks
TLIL4005	Apply conflict/grievance resolution strategies
TLIL4009	Manage personal work priorities and professional development
TLIL4032	Implement equal employment equity strategies
TLIL4036	Develop rosters
TLIL4037	Apply and amend rosters
TLIO3007	Undertake emergency response action to a security threat
TLIO3012	Manage disruptive and/or unlawful behaviour
TLIO3016	Apply and monitor workplace security procedures
TLIU2012	Participate in environmentally sustainable work practices
TLIU3014	Operate vehicle in an environmentally sustainable manner

TLI42615 Certificate IV in Train Driving

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for a person engaged in train driving activities.

It involves a broad range of specialised knowledge and skills in varied contexts to undertake skilled work within a train driving environment.

It may include skills and knowledge required for specialised tasks or functions in known or changing contexts with responsibility for own functions and outputs.

Job roles

This qualification is aligned to the following defined roles:

- Electric Passenger Train Driver
- Freight Train Driver
- Heavy Haul Train Driver
- Locomotive Driver
- Train Driver.

No licensing legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **21 units** of competency comprising:

12 core units listed below **plus**

All units within one of the **specialist elective unit groups** (job roles) from Group A, Group B, Group C, Group D or Group E listed below **plus**

4 general elective units from the **general elective units** listed below or remaining units not selected from a specialist elective unit group. Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units

© Commonwealth of Australia, 2025 Industry Skills Australia

must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIB3075	Inspect and prepare a motive power unit
TLIB3118	Apply awareness of railway fundamentals
TLIB4080	Identify, diagnose and rectify minor faults on motive power units and rolling stock
TLIC2078	Identify and respond to signals and trackside signs
TLIC4023	Operate train with due consideration of route conditions
TLIC4026	Operate and monitor a motive power unit
TLIE2007	Use communications systems
TLIF0004	Work effectively in a train-driving environment
TLIF1001	Follow work health and safety procedures
TLIF2010	Apply fatigue management strategies
TLIF3058	Apply safeworking rules and regulations to rail functions
TLIF4110	Respond to abnormal situations and emergencies when driving a train

Specialist elective units

Group A: Freight

TLIB3019	Test train braking system
TLIB3026	Prepare for train operation
TLIB4078	Carry out a train roll-by inspection
TLIC3027	Stable a motive power unit
TLIC4019	Drive a train to operational requirements

Group B: Urban Electric

TLIB3105	Prepare electric passenger train
TLIB3108	Test operation of electric passenger train braking system

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIC3046	Drive and operate electric passenger train
TLIC3047	Stable electric passenger train
TLIC3048	Shunt, couple and uncouple electric passenger trains

Group C: Country Passenger

TLIB3019	Test train braking system
TLIB3026	Prepare for train operation
TLIB4078	Carry out a train roll-by inspection
TLIC3027	Stable a motive power unit
TLIC4019	Drive a train to operational requirements

Group D: Steam Locomotive

TLIB3124	Apply awareness of steam locomotive fundamentals
TLIB4077	Inspect and prepare a heritage steam locomotive
TLIC3030	Operate and monitor a heritage steam locomotive
TLIC3031	Stable a heritage steam locomotive
TLIC4019	Drive train to operational requirements

Group E: Heritage Motive Power

TLIB3123	Apply awareness of motive power unit fundamentals
TLIB4076	Inspect and prepare a heritage motive power unit
TLIC3028	Operate and monitor a heritage motive power unit
TLIC3029	Stable a heritage motive power unit
TLIC4019	Drive train to operational requirements

General elective units

HLTAID003	Provide first aid
SITXCOM401	Manage conflict
TLIB3018	Conduct full train examination
TLIB3027	Set up and shut down on-train remote control system

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIB4079	Conduct a general train examination
TLIB4081	Provision a motive power unit
TLIB4082	Set up motive power units in multi-coupled consist
TLIC3018	Operate on-train remote control system
TLIC3082	Operate a locomotive by portable remote control
TLIC4071	Establish and operate train braking system
TLIC4072	Operate and monitor a motive power unit on a main line
TLIC4073	Set up, operate and shut down a distributed power system
TLIC4074	Shunt, couple and uncouple rail vehicles
TLID1001	Shift materials safely using manual handling methods
TLIE1003	Participate in basic workplace communication
TLIE2008	Process workplace documentation
TLIE3021	Work and communicate effectively with others
TLIF2018	Operate firefighting equipment
TLIF2080	Safely access the rail corridor
TLIF2097	Use audible track warning devices
TLIF3091	Apply awareness of dangerous goods and hazardous materials requirements
TLIG1001	Work effectively with others
TLIG2007	Work in a socially diverse environment
TLII3022	Provide customer service in rail operations
TLIL2048	Prepare for train departure
TLIL4009	Manage personal work priorities and professional development
TLIL4083	Assist with train operations
TLIU4011	Apply environmental procedures to rail operations
TLIW2037	Clip and secure points

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIW3026 Operate stand alone signalling/point control equipment

Qualification Mapping Information

This qualification replaces and is equivalent to TLI42613 Certificate IV in Train Driving.

TLI42715 Certificate IV in Tram/Light Rail Control

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for a person engaged in the control of tram/light rail networks.

This qualification requires a broad range of skilled applications within the rail control environment. It also requires the skills and knowledge to evaluate and analyse current practices, to develop new criteria and procedures, and to provide some leadership and guidance to others in their work

Job roles

- Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:
- Light Rail Controller
- Tram Controller.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **12 units of competency** comprising:

8 core units listed below **plus**

4 general elective units from the general elective units listed below. Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIE3022	Complete workplace documents

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIE4033	Use communications systems to control tram/light rail operations
TLIF2010	Apply fatigue management strategies
TLIF3087	Follow work health and safety, and environmental procedures in the rail industry
TLIF4109	Communicate effectively to coordinate incident response procedures
TLIG1001	Work effectively with others
TLIL4084	Control daily tram/light rail operations
TLIL4085	Coordinate tram/light rail traffic movement

General elective units

BSBWOR201	Manage personal stress in the workplace
BSBWOR301	Organise personal work priorities and development
BSBWRT301	Write simple documents
TLIB3118	Apply awareness of railway fundamentals
TLIF3091	Apply awareness of dangerous goods and hazardous materials requirements
TLIG2007	Work in a socially diverse environment
TLII4022	Identify and meet customer requirements
TLIJ2001	Apply quality procedures
TLIL4034	Arrange alternative passenger transport
TLIL4038	Organise marshalling and shunting operations
TLIL4050	Allocate rolling stock

Qualification Mapping Information

This qualification replaces and is equivalent to TLI42713 Certificate IV in Tram/Light Rail Control.

TLI50215 Diploma of Materiel Logistics

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those working in materiel sustainment and integrated logistics management roles.

Successful achievement of this qualification requires the self-directed application of knowledge and skills, with substantial depth in some areas where judgement is required in planning and selecting appropriate equipment, services and techniques for self and others.

Applications involve participating in developing strategic initiatives as well as personal responsibility and autonomy in performing complex technical operations or organising others. It may include participating in teams, including those concerned with planning and evaluation functions. Group or team coordination may also be involved.

This qualification has been designed for people in integrated logistics support management or sustainment management roles. These people will have a breadth of responsibility across a range of functional areas and will generally be responsible for a team.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Integrated Logistics Support Manager
- Materiel Sustainment Manager.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **16 units of competency** comprising:

4 core units listed below **plus**

5 specialist elective units from one of the specialist elective unit groups**,** either Group A or

© Commonwealth of Australia, 2025 Industry Skills Australia

Group B, listed below **plus**

4 logistics elective units from the **logistics elective units** listed below or the remaining specialist elective units from the Group chosen (either A or B) **plus**

3 general elective units from the general elective units listed below. Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units are complied with.

Core units

BSBRSK401	Identify risk and apply risk management processes
PSPGOV512A	Use complex workplace communication strategies
PSPGOV513A	Refine complex workplace documents
TLIX4028	Apply knowledge of logistics

Specialist elective units

Group A: Integrated Logistics Support

TLIX4030	Apply knowledge of materiel sustainment
TLIX4031	Apply knowledge of configuration management
TLIX4032	Apply knowledge of technical regulatory framework
TLIX5003	Develop and review integrated logistics support plans
TLIX5004	Develop integrated logistics support processes and procedures
TLIX5005	Manage integrated logistics support operations
TLIX5010	Provide specialist integrated logistics support advice

Group B: Materiel Sustainment

TLIX4029	Apply knowledge of integrated logistics support
TLIX4031	Apply knowledge of configuration management
TLIX4032	Apply knowledge of technical regulatory framework
TLIX5012	Develop and review materiel sustainment plans
TLIX5013	Develop materiel sustainment processes and procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIX5014	Manage materiel sustainment operations
TLIX5019	Provide specialist materiel sustainment advice

Logistics elective units

BSBFIM501	Manage budgets and financial plans
PSPPM504A	Carry out complex project activities
TLIL4059	Implement asset management systems
TLIL5055	Manage a supply chain
TLIP5036	Manage assets
TLIR5014	Manage suppliers
TLIX5006	Manage verification and validation
TLIX5015	Establish supply chains
TLIX5020	Develop and review configuration management plans
TLIX5021	Manage configuration management processes
TLIX5025	Provide specialist configuration management advice
TLIX5036	Manage and monitor technical data and information systems

General elective units

BSBCOM501	Identify and interpret compliance requirements
BSBCUS501	Manage quality customer service
BSBINM501	Manage an information or knowledge management system
BSBMGT502	Manage people performance
BSBMGT516	Facilitate continuous improvement
BSBWHS501	Ensure a safe workplace
BSBPMG512	Manage project time
BSBPMG514	Manage project cost
BSBPMG515	Manage project human resources
BSBPMG516	Manage project information and communication

© Commonwealth of Australia, 2025 Industry Skills Australia

BSBPMG518	Manage project procurement
PSPGOV504B	Undertake research and analysis
PSPGOV511A	Provide leadership
PSPGOV518A	Benchmark performance
PSPGOV524A	Interpret data and related statistics
PSPPROC412A	Develop and distribute requests for offers
PSPPROC413A	Select providers and develop contracts
PSPPROC414A	Manage contracts
PSPPROC503B	Manage contract performance
PSPPROC504B	Finalise contracts
PSPPROC506A	Plan to manage a contract
TLIU4001	Implement and monitor environmental protection policies and procedures

Qualification Mapping Information

This qualification replaces and is equivalent to TLI50210 Diploma of Materiel Logistics.

TLI50316 Diploma of International Freight Forwarding

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in advanced international freight forwarding job roles within the Transport and Logistics Industry.

Successful achievement of this qualification will require the self-directed application of knowledge and skills, with substantial depth in some areas where judgement is required in planning and selecting appropriate equipment, services and techniques for self and others.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **12 units of competency** comprising:

9 core units listed below **plus**

3 general elective units from the general **elective units** listed below. Up to **1 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units are complied with.

Core units

TLIA5059	Plan and organise the international forwarding of freight by sea and multimodal transport

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIA5060	Plan and organise the international forwarding of freight by air transport
TLIA5061	Plan and organise the international forwarding of freight by road and rail transport
TLIE5020	Apply knowledge of freight forwarding documentation and permits
TLIF0003	Develop and implement policies and procedures to ensure chain of responsibility compliance
TLIL5062	Apply knowledge of logistics, storage and distribution to international freight forwarding
TLIL5063	Review contracts, insurance, risk and liability in an international freight forwarding context
TLIL5064	Manage international special freight transport services including dangerous goods and special cargo
TLIO5020	Advise on and manage security and safety in international freight transport

General elective units

BSBCUS501	Manage quality customer service
BSBFIM501	Manage budgets and financial plans
BSBMGT502	Manage people performance
BSBMKG513	Promote products and services to international markets
PSPGOV518A	Benchmark performance
TLIM4004	Mentor individuals or small groups
TLIX0001	Determine tariff classification of goods
TLIX5054	Comply with biosecurity border clearance

Qualification Mapping Information

This qualification replaces but is **not** equivalent to TLI50310 Diploma of International Freight Forwarding.

TLI50415 Diploma of Logistics

Modification History

Release 3. This is the third release of this qualification in the TLI Transport and Logistics Training Package.

The following units have been added to the general elective units:

- TLIF0006 Administer a fatigue management system
- TLIF0007 Manage a fatigue risk management system.

Release 2. This is the two release of this qualification in the TLI Transport and Logistics Training Package.

ISC Upgrade - Unit added to General elective units.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for the integrated management of logistics.

Achievement of this qualification will require the self-directed application of knowledge and skills, with substantial depth in some areas where judgement is required in planning and selecting appropriate equipment, services and techniques for self and others.

Applications involve participation in the development of strategic initiatives as well as personal responsibility and autonomy in performing complex technical operations or organising others. It may include participation in teams, including those concerned with planning and evaluation functions. Group or team coordination may be involved.

Successful achievement of the licensing units within the qualification must align with applicable licensing and regulatory requirements.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Logistics Manager.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

© Commonwealth of Australia, 2025 Industry Skills Australia

Packaging Rules

A total of **15 units of competency** comprising:

2 core unit listed below **plus**

7 technical elective units from the technical elective units listed below **plus**

6 general elective units from the general elective units or remaining technical elective units listed be**low.** Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core unit

TLIF0002	Administer chain of responsibility policies and procedures
TLIL5020	Develop and maintain operational procedures for transport and logistics enterprises

Technical elective units

BSBWHS501	Ensure a safe workplace
TLIA5029	Plan and manage storage of dangerous goods and hazardous substances
TLIA5035	Manage international freight transfer
TLIA5058	Manage facility and inventory requirements
TLIF0003	Develop and implement policies and procedures to ensure chain of responsibility compliance
TLIF4064	Manage fatigue management policy and procedures
TLII5018	Manage customer service
TLIL5019	Implement and monitor transport logistics
TLIL5026	Manage export logistics
TLIL5055	Manage a supply chain
TLIL5057	Maintain, monitor and improve transport operations systems
TLIP5004	Develop a transport and logistics business plan
TLIP5006	Establish international distribution networks

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIP5008	Manage a transport and logistics business unit
TLIP5011	Develop and evaluate strategies for transport and logistics enterprises
TLIR5006	Develop, implement and review purchasing strategies
TLIR5007	Manage international purchasing
TLIR5014	Manage suppliers
TLIU4001	Implement and monitor environmental protection policies and procedures
TLIU5006	Conduct environmental audits
TLIX4028	Apply knowledge of logistics
TLIX5036	Manage and monitor technical data and information systems
TLIX5040	Manage contracted support services

General elective units

BSBCOM501	Identify and interpret compliance requirements
BSBHRM405	Support the recruitment, selection and induction of staff
BSBINN502	Build and sustain an innovative work environment
BSBMGT502	Manage people performance
BSBMGT517	Manage operational plan
BSBMGT516	Facilitate continuous improvement
BSBPMG522	Undertake project work
BSBRSK501	Manage risk
BSBWOR502	Lead and manage team effectiveness
BSBWRK510	Manage employee relations
PSPGOV506A	Support workplace coaching and mentoring
SITXEVT605	Develop event transport plans
TLIB5010	Plan and implement maintenance schedules
TLIF0006	Administer a fatigue risk management system

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIF0007	Manage a fatigue risk management system
TLIF5017	Investigate rail safety incidents
TLIF5020	Manage emergencies
TLIK5006	Evaluate software requirements and hardware enhancements
TLIJ5007	Conduct internal quality audits
TLIL4009	Manage personal work priorities and professional development
TLIM4004	Mentor individuals or small groups
TLIO5005	Plan and manage security procedures for the enterprise
TLIO5006	Plan and manage security procedures for transferring and transporting dangerous goods
TLIO5017	Manage security of storage facilities
TLIO5018	Manage compliance with customs excise
TLIP5007	Contribute to the development of a workplace learning environment
TLIP5025	Set and achieve budgets
TLIP5035	Manage budgets and financial plans
TLIP5036	Manage assets
TLIR4003	Negotiate a contract
TLIR5005	Manage a contract
TLIU0001	Develop workplace policy and procedures for environmental sustainability

Qualification Mapping Information

This qualification replaces and is **not** equivalent to TLI50410 Diploma of Logistics.

TLI50615 Diploma of Rail Operations Management

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for a person engaged in the management of rail operations. This qualification requires the self-directed application of knowledge and skills, with substantial depth in some areas where judgement is required in planning and selecting appropriate equipment, services and techniques for self and others.

Application involves participation in developing strategic initiatives as well as personal responsibility and autonomy in performing or organising others to carry out complex technical operations. It may include participation in teams, including those concerned with planning and evaluation functions. Group or team coordination may be involved.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Network Controller
- Passenger Services Manager
- Rail Freight Manager
- Rail Operations Manager
- Rail Maintenance Manager.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **14 units of competency** comprising:

8 core units listed below **plus**

All units within one of the **specialist elective unit groups** (job roles) listed below **plus**

4 general elective units from the general elective units listed below or from the remaining

© Commonwealth of Australia, 2025 Industry Skills Australia

units not already selected from a specialist elective group. Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified in the unit are complied with.

Core units

AHCOHS501A	Manage Occupational Health and Safety (OHS) processes
TLIE4032	Use internal communication systems for rail industry regulatory compliance
TLIF4104	Manage change in the rail safety environment
TLIF4107	Respond to notifiable rail safety occurrences
TLIF5021	Apply rail safeworking rules and procedures
TLIL5066	Apply rail resource management principles
TLIW5001	Apply rail communications systems
TLIW5002	Manage rail assets and interfaces

Specialist elective units

Group A: Rail Operations

TLIL5073	Manage train crewing and rostering
TLIW5004	Manage train planning

Group B: Yard Operations

TLIB2122	Apply awareness of fundamentals of rail operations in yards or sidings
TLIL5069	Manage a rail yard or terminal

Group C: Passenger Operations

TLIL5071	Manage rail passenger operations
TLIL5073	Manage train crewing and rostering

Group D: Freight/Heavy Haul Operations

TLIL5019	Implement and monitor transport logistics

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIL5070	Manage rail freight operations

Group E: Network Control

TLIF5024	Develop plans for emergency response and recovery of rail networks
TLIW5003	Manage rail network control systems

Group F: Rail Safety

TLIF4100	Identify and meet rail safety regulatory compliance requirements
TLIF4101	Implement and maintain a rail safety culture

Group G: Maintenance Operations

TLIB5010	Plan and implement maintenance schedules
TLIL5072	Manage rail yard operations

Group H: Incident management

TLIF5017	Investigate rail safety incidents
TLIF5023	Undertake a derailment investigation

General elective units

BSBCUS501	Manage quality customer service
BSBHRM513	Manage workforce planning
BSBPMG416	Apply project procurement procedures
BSBRSK401	Identify risk and apply risk management processes
CPPSEC5001A	Establish and maintain an occupational health and safety system
PSPHR504A	Implement workforce planning and succession strategies
PSPPROC505A	Manage procurement risk
PSPSEC602A	Manage security awareness
TLIF0001	Apply chain of responsibility legislation, regulations and workplace procedures
TLIF4064	Manage fatigue management policy and procedures
TLIF4086	Control and coordinate incident responses

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIF4099	Develop an application for, or variation to, rail accreditation
TLIF5022	Develop and manage fitness for work policy and procedures
TLIL4069	Plan and coordinate protection for multiple worksites within limits of a work on track authority
TLIL4081	Ensure competency of rail safety workers
TLIL5055	Manage a supply chain
TLIL5065	Roster train crews
TLIO5005	Plan and manage security procedures for the enterprise
TLIP5035	Manage budgets and financial plans
TLIP5036	Manage assets
TLIR5005	Manage a contract
TLIU4001	Implement and monitor environmental protection policies and procedures

Qualification Mapping Information

This qualification replaces and is equivalent to TLI50613 Diploma of Rail Operations Management.

TLI50716 Diploma of Bus and Coach Operations

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in bus and coach operations job roles within the transport and logistics industry.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Fleet Manager
- Operations Manager
- Passenger Service Delivery Manager
- Service Delivery Manager.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **12 units of competency** comprising:

2 core units listed below **plus**

10 general elective units from the general elective units listed below. Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

© Commonwealth of Australia, 2025 Industry Skills Australia

Core units

TLIL5057	Maintain, monitor and improve transport operations systems
TLIL5067	Develop a passenger transport plan

General elective units

BSBHRM405	Support the recruitment, selection and induction of staff
BSBMGT402	Implement operational plan
BSBMGT502	Manage people performance
BSBREL402	Build client relationships and business networks
BSBRSK501	Manage risk
BSBWHS501	Ensure a safe workplace
BSBWOR502	Lead and manage team effectiveness
BSBWRK411	Support employee and industrial relations procedures
SITXMPR404	Coordinate marketing activities
TAEDEL404A	Mentor in the workplace
TAETAS501B	Undertake organisational training needs analysis
TLIB5010	Plan and implement maintenance schedules
TLIE4013	Apply workplace statistics
TLIF0002	Administer chain of responsibility policies and procedures
TLIF4064	Manage fatigue management policy and procedures
TLIF4086	Control and coordinate incident responses
TLII5018	Manage customer service

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIL3003	Conduct induction process
TLIL4005	Apply conflict/grievance resolution strategies
TLIL4033	Promote effective workplace practice
TLIL4036	Develop rosters
TLIL5068	Implement a passenger transport plan
TLIO1002	Follow security procedures when working with passengers and personnel
TLIP5004	Develop a transport and logistics business plan
TLIP5035	Manage budgets and financial plans
TLIP5037	Develop workplace policy and procedures
TLIR5006	Develop, implement and review purchasing strategies
TLIR5014	Manage suppliers
TLIU4001	Implement and monitor environmental protection policies and procedures
TLIX5040	Manage contracted support services

Qualification Mapping Information

This qualification replaces and is equivalent to TLI50713 Diploma of Bus and Coach Operations.

TLI50816 Diploma of Customs Broking

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in customs broker job roles within the Transport and Logistics Industry.

Successful achievement of this qualification will require the self-directed application of knowledge and skills, with substantial depth in some areas where judgement is required in planning and selecting appropriate equipment, services and techniques for self and others.

Job roles

The TLI50816 Diploma of Customs Broking qualification is aligned to the following defined role:

- Customs Broker.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **18 units of competency** comprising:

15 core units listed below **plus**

3 general elective units from the general **elective units** listed below. Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

© Commonwealth of Australia, 2025 Industry Skills Australia

Core units

TLIX0001	Determine tariff classification of goods
TLIX0002	Initiating cargo border procedures
TLIX0003	Conduct advanced border clearance functions
TLIX4036	Analyse, advise on and carry out integrated border clearance transactions
TLIX5046	Carry out standard customs clearance practices
TLIX5047	Determine customs value
TLIX5048	Determine import/export prohibitions/restrictions
TLIX5049	Determine indirect taxes
TLIX5050	Determine origin of goods and apply preference schemes or free trade agreements
TLIX5052	Determine complex customs value
TLIX5053	Determine tariff classification for complex goods
TLIX5054	Comply with biosecurity border clearance
TLIX5055	Apply anti-dumping and countervailing measures
TLIX5056	Carry out additional customs clearance practices
TLIX5058	Review decisions of regulatory bodies

General elective units

BSBCUS501	Manage quality customer service
BSBFIM501	Manage budgets and financial plans
BSBMGT502	Manage people performance
BSBMGT517	Manage operational plan
TLIA5035	Manage international freight transfer
TLIF0003	Develop and implement policies and procedures to ensure chain of responsibility compliance
TLIG3002	Lead a work team or group

© Commonwealth of Australia, 2025 Industry Skills Australia

TLII0001	Market international freight forwarding services
TLIL5063	Review contracts, insurance, risk and liability in an international freight forwarding context
TLIM4004	Mentor individuals or small groups
TLIO2021	Follow security procedures when working with goods and cargo
TLIP5025	Set and achieve budgets
TLIR4001	Monitor supplier performance
TLIR4002	Source goods/services and evaluate contractors
TLIR4003	Negotiate a contract

Qualification Mapping Information

This qualification replaces and is equivalent to TLI50813 Diploma of Customs Broking.

TLI60115 Advanced Diploma of Materiel Logistics

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for a person who provides leadership and strategic direction in materiel sustainment and integrated management of logistics.

Successful achievement of this qualification requires the application of a significant range of fundamental principles and complex techniques across a wide and often unpredictable variety of contexts in relation to either varied or highly specific functions. Contribution to developing a broad plan, budget or strategy is involved and accountability and responsibility for self and others in achieving the outcomes is also involved. Significant judgement is required in planning, design, technical or leadership/guidance functions related to products, services, operations or procedures.

This qualification has been designed for systems managers or those in executive logistics management roles who manage multiple systems or fleets. These people generally have relatively broad materiel logistics coverage and manage logistics programs, program offices or directorates.

This qualification will suit people with a minimum of six years Defence Materiel Organisation (DMO)/Defence logistics experience.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Materiel Logistics Program Manager
- Materiel Logistics Senior Manager
- Materiel Logistics Executive Manager.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

© Commonwealth of Australia, 2025 Industry Skills Australia

Packaging Rules

A total of **14 units of competency** comprising:

6 core units listed below **plus**

2 logistics elective units from the logistics elective units listed below **plus**

6 general elective units from the general elective units listed below or the remaining logistics elective units. Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units are complied with.

Core units

BSBMGT605 Provide leadership across the organisation

BSBRSK501 Manage risk

PSPGOV602 B Establish and maintain strategic networks

PSPGOV605 A Persuade and influence opinion

PSPGOV606 A Prepare high-level/sensitive written materials

AHCARB202A Fell small trees

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the process of small tree felling and defines the standard required to: prepare and properly maintain equipment; determine the tree felling conditions, direction of fall, safe fall zone, exclusion zone and escape route; use safe tree felling techniques; use safe tree removal techniques.

Application of the Unit

Application of the unit	This unit applies to the process of small tree felling where hazards have been assessed as low risk.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 Industry Skills Australia

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify tree felling requirements	1.1. Instructions for tree felling operations are received and clarified with supervisor prior to work being undertaken. 1.2. Topography and site conditions are assessed and factors influencing the natural direction of fall are identified and confirmed with supervisor. 1.3. Tree is visually assessed and factors influencing the tree felling operation are identified and confirmed with supervisor. 1.4. Natural direction of fall, safe fall zone and exclusion zone are determined and confirmed with supervisor. 1.5. Occupational Health and Safety (OHS) hazards associated with felling operation are identified, risks assessed and reported to the supervisor.
2. Prepare for tree felling	2.1. Felling equipment and component options that are appropriate to the task being undertaken are selected and prepared. 2.2. Appropriate support tools are prepared, transported and placed to minimise felling delays. 2.3. Suitable safety equipment and Personal Protective Equipment (PPE) are selected, checked, used, maintained and stored. 2.4. Fall zone is cleared of obstacles and articles which may be damaged by felled tree. 2.5. Clear escape route is established appropriate to the site and according to recognised guidelines.
3. Fell tree	3.1. Location of other personnel is noted and monitored.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.2. Standard tree felling techniques are determined by ground conditions and state of canopy. 3.3. Corrective action is taken in response to changing conditions or problems encountered. 3.4. Planned escape route is used when tree starts to fall. 3.5. Fall of tree and movement on ground are monitored until felled tree is stable. 3.6. Safe working practices are employed according to OHS requirements.
4. Complete tree felling operation	4.1. Appropriate method of clearing the site of felled tree is determined. 4.2. Machinery required for removal of felled tree is selected and used according to manufacturer's specifications and OHS requirements. 4.3. Fall site is cleared of tree and all tree debris.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• interpret work procedures • demonstrate safe working practices • communicate orally and using hand signals with other personnel • participate in teams and contribute to team objectives • determine safe fall zones and exclusion zones • measure distances • monitor and maintain tree felling tools and equipment • recognise structural defects, common diseases, pests, and nutrition deficiencies • operate a chainsaw • recognise caution or hazard signs and symbols • interpret tasks or information from labels, manuals or written instructions • record information accurately or verbally report information • use literacy skills to follow sequenced written instructions and record information accurately and legibly • use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
clarification and seeking advice from supervisor • use numeracy skills to estimate, calculate and record routine workplace measures • use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.
Required knowledge
• basic operational and maintenance requirements of tree felling equipment • safe working practices for chainsaw operation • safety procedures and potential hazards for working safely in the amenity tree industry • emergency and first aid procedures • the effect of tree removal on the environment • local government regulations that apply to tree removal where appropriate • identification of services and other hazards that affect the performance of the unit • principles and methods of inspecting trees to identify structural defects.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: • prepare and properly maintain equipment • determine the tree felling conditions, direction of fall, safe fall zone, exclusion zone and escape route • use safe tree felling techniques • use safe tree removal techniques
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Recognise and apply workplace safety procedures	1.1. Occupational Health and Safety (OHS) procedures relevant to the maintenance and operation of chainsaws are recognised and applied. 1.2. OHS hazards are identified, risks assessed and risk controls are implemented. 1.3. Personal Protective Equipment (PPE) is selected and used. 1.4. Relevant licensing and legislative requirements with regard to the operation of chainsaws are recognised, accessed and applied.
2. Check and maintain chainsaw	2.1. Tools and materials required for maintenance procedures are selected, checked and confirmed against maintenance plan. 2.2. Routine checks and maintenance procedures are conducted prior to operation and according to manufacturer's specifications and maintenance plan. 2.3. Chainsaw faults or malfunctions are identified, tagged and reported for repair according to manufacturer's specifications and enterprise requirements. 2.4. Completed chainsaw maintenance procedures are detailed and recorded.
3. Operate chainsaw	3.1. Sawing materials are identified and positioned for operation according to documented low risk work procedures.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.2. Cutting methods are determined appropriate to type of material and risk controls implemented. 3.3. Chainsaw is operated according to manufacturer's specifications and operator's manual. 3.4. Effective worksite communication is maintained to ensure efficient workflow and address immediate problems. 3.5. Environmental implications associated with chainsaw operation are identified, assessed and controlled according to documented requirements.
4. Complete and check chainsaw operation	4.1. Chainsaw damage, malfunctions or irregular performance are recorded and reported according to enterprise requirements. 4.2. Chainsaw is cleaned, maintained and stored according to manufacturer's specifications and enterprise requirements. 4.3. Relevant reports are maintained to industry standards according to enterprise requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- identify hazards and implement safe operating procedures
- safely cross-cut fallen timber using compression and tension cuts with a hand held chainsaw
- maximise volume and quality of recovery
- demonstrate safe and environmentally responsible workplace practices
- obtain relevant licenses and permits
- read and interpret manufacturer's specifications, work and maintenance plans, and Material Safety Data Sheets (MSDSs).
- effectively communicate information, interpret and apply task instructions, and maintain records and reports
- estimate and measure dimensions, and calculate volumes
- recognise caution or hazard signs and symbols
- interpret tasks or information from labels, manuals or written instructions

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
• record information accurately or verbally report information • use literacy skills to follow sequenced written instructions and record information accurately and legibly • use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor • use numeracy skills to estimate, calculate and record routine workplace measures • use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.
Required knowledge
• relevant State/Territory legislation and regulations with regard to the operation of chainsaws • OHS legislative requirements and Codes of Practice • hazards and risks when using chainsaws • operating principles and operating methods • various types of chainsaws and respective functions • effects of timber defects on recovery • environment Codes of Practice with regard to chainsaw operation.

AHCOHS501A Manage Occupational Health and Safety (OHS) processes

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers managing OHS processes and defines the standard required to: develop OHS policies and procedures which demonstrate enterprise commitment to OHS; establish arrangements to ensure the involvement of all employees in the management of OHS; supervise procedures for identifying hazards; conduct risk assessments to cover all phases of the organisations operations involving all relevant staff; develop risk controls and ensure all relevant staff are aware of them; establish and maintain procedures for dealing with hazardous events and emergencies; established and maintain an OHS safety induction and training program; establish and maintain a system for OHS records; review the enterprise OHS system based on an analysis of OHS records, related policies, procedures and programs and make changes in response to review.

Application of the Unit

Application of the unit	This unit requires the ability to develop management systems and procedures, and to manage the implementation process. The process is usually conducted within policy guidelines and procedures where discretion and judgement are required.

Licensing/Regulatory Information

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Develop OHS policies and procedures	1.1. An OHS business plan and program is developed for the enterprise in consultation with designated personnel and/or management. 1.2. OHS responsibilities and duties are clearly defined, allocated and included in job descriptions and duty statements for all relevant positions. 1.3. Financial and human resources for implementation of OHS policies and procedures are identified, sought and/or provided as required. 1.4. Information on the OHS system and procedures for the area of responsibility is provided and explained in a form which is readily understood by employees.
2. Establish and maintain processes to ensure the participation of all employees in the	2.1. Consultation processes are established and maintained with employees and their representatives in accordance with relevant legislation and according to enterprise guidelines. 2.2. Issues raised though participation and consultation

ELEMENT	PERFORMANCE CRITERIA
application of OHS	are dealt with and resolved promptly and effectively in accordance with enterprise procedures for issue resolution. 2.3. Information about the outcomes of participation and consultation is provided in a manner readily accessible to employees.
3. Establish and maintain procedures for identifying hazards	3.1. Existing and potential hazards within the area of responsibility are identified and confirmed in accordance with legislation, Codes of Practice, and trends identified from the OHS records system. 3.2. A procedure for ongoing identification of hazards is developed and integrated within systems of work and procedures. 3.3. Activities are appropriately monitored to ensure that this procedure is adopted effectively throughout areas of managerial responsibility. 3.4. Hazard identification is addressed at the planning, design and evaluation stages of any change in the workplace to ensure that new hazards are not created.
4. Establish and maintain procedures for assessing risks	4.1. Risks associated with identified hazards are assessed in accordance with safe work practices, with information derived from workplace OHS records and industry wide information, and with relevant OHS legislation and Codes of Practice. 4.2. A procedure for ongoing assessment of risks is developed and integrated within systems of work and procedures. 4.3. Activities are monitored to ensure that risk assessment procedures are adopted effectively throughout the area of managerial responsibility. 4.4. Risk assessment is addressed at the planning, design and evaluation stages of any change in the workplace to ensure that the risk from hazards is not increased. 4.5. Accident and dangerous occurrences are investigated and recorded according to enterprise and OHS procedures.
5. Interim risk control measures are implemented until a better or permanent control measure is developed	5.1. Measures to control assessed risks are developed and implemented in accordance with the hierarchy of control, relevant OHS legislation, Codes of Practice, and trends identified from the OHS records system. 5.2. When measures which control a risk at its source are not immediately practicable, interim solutions are implemented until a permanent control measure is

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	developed. 5.3. A process of ongoing hazard identification and risk assessment, and review of effectiveness of control programs is developed and integrated into enterprise management arrangements. 5.4. Activities are monitored to ensure that the risk control procedure is adopted effectively throughout the area of managerial responsibility. 5.5. Risk control is addressed at the planning, design and evaluation stages of any change in the workplace to ensure that adequate risk control measures are included. 5.6. Systems are designed to reduce risk and administrative arrangements to ensure safe OHS work practices are put in place where elimination of a hazard is not possible. 5.7. Effective OHS risk management measures are set in place during any modification of the buildings and structures, machinery and work activities. 5.8. Inadequacies in existing risk control measures are identified and resources enabling implementation of new measures are sought and/or provided according to appropriate workplace procedures.
6. Plan and manage enterprise procedures for dealing with hazardous events	6.1. Potential emergencies posing risk to health and safety of workers and the public are correctly identified. 6.2. Plans and procedures which control the risks associated with hazardous events and meet any legislative requirements as a minimum, are developed in consultation with appropriate emergency services. 6.3. Appropriate information and training is provided to employees to enable implementation of correct emergency procedures. 6.4. Adequate numbers of workers are trained in First Aid to ensure that first aid is applied to preserve life and minimise injury.
7. Establish and maintain an OHS safety induction and training program	7.1. An OHS induction program is developed to meet the occupational health and safety needs of new employees. 7.2. An OHS training program is developed as part of supervisors and employee's general training.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
8. Establish and maintain a system for OHS records	8.1. A system for keeping OHS records is established and monitored to allow identification of patterns of occupational injury and disease in the enterprise. 8.2. Records are regularly updated and used to evaluate the effectiveness of the enterprise OHS program.
9. Evaluate the enterprise OHS system and related policies, procedures and programs	9.1. The effectiveness of the OHS system and related policies, procedures and programs is assessed according to enterprise aims with respect to OHS. 9.2. Improvements to the OHS system are developed and implemented to ensure more effective achievement of enterprise aims. 9.3. Compliance with OHS legislation and Codes of Practice is assessed to ensure that legal OHS standards are maintained as a minimum.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- develop OHS policies and procedures which demonstrate enterprise commitment to OHS
- establish and maintain arrangements to ensure the involvement of all employees in the management of OHS
- establish and maintain procedures for identifying hazards
- establish and maintain procedures for assessing risks
- establish and maintain procedures for controlling risks
- establish and maintain enterprise procedures for dealing with hazardous events
- establish and maintain an OHS safety induction and training program
- establish and maintain a system for OHS records
- evaluate the enterprise OHS system and related policies, procedures and programs
- analyse recorded data to determine where the OHS program can better meet enterprise and employee needs
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views • use numeracy skills to estimate, calculate and record complex workplace measures • use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.
Required knowledge
• data and documentation for industry injury statistics • significant hazards and areas of risk in the workplace • all relevant OHS legislation and Codes of Practice consistent with the hierarchy of OHS risk control and its implementation for hazards in land-based industries • risk control measures • hierarchy of risk controls • relevant management systems and procedures • public safety issues.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: • develop OHS policies and procedures which demonstrate enterprise commitment to OHS • establish arrangements to ensure the involvement of all employees in the management of OHS • supervise procedures for identifying hazards • conduct risk assessments to cover all phases of the organisations operations involving all relevant staff • develop risk controls and ensure all relevant staff are

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE	
	aware of them • establish and maintain procedures for dealing with hazardous events and emergencies • established and maintain an OHS safety induction and training program • establish and maintain a system for OHS records including records to be kept and persons responsible • review the enterprise OHS system based on an analysis of OHS records, related policies, procedures and programs and make changes in response to review.
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
The enterprise OHS program includes:	• the full range of hazards that workers are exposed to (or are likely to be exposed to) in the workplace.

AURVGA3002 Recover vehicles

Modification History

Release	Comment
Release 1	Replaces AURV328961A Recover vehicle Unit code updated to meet policy requirements Minor changes to unit title Reference to OHS legislation replaced with new WHS legislation Licensing statement added to unit descriptor

Unit Descriptor

Unit descriptor	This unit covers the competence required to recover a vehicle by transporting and towing. Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.

Application of the Unit

Application of the unit	The unit includes identification and confirmation of work requirement, preparation for work, selecting the recovery method, preparing the recovery vehicle and the vehicle to be recovered, operating the recovery vehicle, cleaning up the recovery worksite and completion of work finalisation processes, including clean-up and documentation. Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	1.1. Work instructions are used to determine the job requirements, including job sheets, recovery types, vehicles preparation and recovery procedures. 1.2. Job specifications are read and interpreted. 1.3. WHS requirements, including personal protection needs, are observed throughout the work. 1.4. Vehicle and method of recovery are identified. 1.5. Hand, power tooling and safety equipment are identified and checked for safe use. 1.6. Procedures are determined to minimise waste material/ components. 1.7. Procedures are identified for maximising energy efficiency while completing the job.
2. Ascertain type of recovery	2.1. Details are obtained by visual surveillance of recovery scene. 2.2. Information is obtained from officials at scene. 2.3. Hazards are recognised and included in requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	for recovery. 2.4. All activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.
3. Prepare vehicle to be recovered for tow/lift	3.1. Vehicle is prepared for tow/lift using recognised enterprise guidelines and legislative requirements. 3.2. Vehicle is prepared for recovery without causing damage to any component or system. 3.3. All activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.
4. Prepare recovery vehicle for tow/lift	4.1. Recovery vehicle is prepared using recognised enterprise guidelines and legislative requirements. 4.2. Recovery vehicle is prepared without causing damage to any component or system. 4.3. All activities are carried out according to industry regulations/guidelines, WHS legislation, statutory requirements and enterprise procedures/policies.
5. Operate recovery vehicle	5.1. Vehicle/equipment is operated using recognised industry guidelines and legislative requirements. 5.2. Lifting and loading procedures are followed. 5.3. Vehicle is operated without causing damage to any component or system. 5.4. Recovered vehicle is safely conveyed to agreed destination. 5.5. All activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies.
6. Clean up recovery worksite	6.1. Area of recovery and its near vicinity is cleared of debris and dangerous objects/hazardous materials. 6.2. Worksite is cleaned without causing damage to any component or system. 6.3. Clean-up procedures are completed within recognised enterprise guidelines and legislative requirements.
7. Clean up work vehicle and maintain equipment	7.1. Material that can be reused is collected and stored. 7.2. Waste and scrap is removed following workplace procedure. 7.3. Equipment and work vehicle are cleaned and inspected for serviceable condition in accordance with workplace procedures.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	7.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures. 7.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures. 7.6. Tooling is maintained in accordance with workplace procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for recovery type, preparation of vehicles, recovery procedure and worksite clean-up requirements
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to recovery of vehicles, including the use of specialist recovery equipment, measuring equipment, computerised technology and communication devices and the reporting/recording of results

Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- environmental regulations

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
• technical information • hazard identification and management procedures • pick up/loading procedures • manufacturer/component supplier recommended towing procedures and techniques • manual handling procedures • work organisation and planning processes • enterprise quality processes

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of: • observing safety procedures and requirements • communicating effectively with others involved in or affected by the work • selecting methods and techniques appropriate to the circumstances • completing preparatory activity in a systematic manner • applying pick up/loading procedures • applying vehicle protection methods • completing transporting and towing procedures • completing area rehabilitation • completing workplace/equipment documentation.
Context of, and specific resources for assessment	Application of competence is to be assessed in the workplace or simulated worksite. Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints. Assessment is to comply with regulatory requirements, including Australian Standards. The following resources should be made available:

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE	
	• workplace location or simulated workplace • materials relevant to recovery of vehicles • equipment, hand and power tooling appropriate to recovery of vehicles • activities covering mandatory task requirements • specifications and work instructions.
Method of assessment	• Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package. • Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge. • Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies. • Assessment may be applied under project related conditions and require evidence of process. • Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances. • It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements. • Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT	
Recovery	Recovery may be for damaged/broken down vehicle or transportation of vehicle
Recovery vehicle	Recovery vehicle may include tow truck, tilt tray, trailer, dolly wheels, low loader.
Recovery methods	Recovery methods are to include: • preparation for lifting, loading and towing • lifting, loading, towing, securing, cleaning up recovery area (e.g. broken glass, debris).
WHS	WHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
Personal protective equipment	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
Safe operating procedures	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
Emergency procedures	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
Environmental requirements	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
Quality requirements	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT	
	standards and enterprise operations and procedures.
Statutory/regulatory authorities	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.
Tooling and equipment	Tooling and equipment may include hand tooling, chains, slings, ropes, safety equipment, towing bar, jack, shovel, broom, remote lights, signs, torch, watch, work light, air lines and fittings, reduction blocks, and communication equipment.
Materials	Materials may include gloves, industry-specific stationery and cleaning materials.
Communications	Communications are to include, but are not limited to street directory, verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
Information/documents	Sources of information/documents may include: • verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches • safe work procedures related to recovery of vehicles • regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules • engineer's design specifications and instructions • organisation work specifications and requirements • instructions issued by authorised enterprise or external persons • Australian Standards.

BSBADM409 Coordinate business resources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to determine and analyse existing and required resources, their effective application and the accountability for their use.

It applies to individuals with a broad knowledge of business resources who contribute well developed skills and knowledge to ensure adequate resources are available to perform the work of the organisation. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Administration – General Administration

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Determine resource requirements	1.1 Determine resource requirements in accordance with business and operational plans and organisational requirements 1.2 Provide opportunities to individuals and workgroups to contribute to the identification of resource requirements 1.3 Ensure resource expenditure is realistic and makes efficient use of available budget resources 1.4 Present recommendations on resource requirements in the

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	required format, style and structure using relevant business equipment and technology
2 Acquire and allocate resources	2.1 Acquire physical resources and services in accordance with organisational requirements 2.2 Check resources to ensure quality and quantity are in line with service agreements 2.3 Allocate resources promptly to enable achievement of workgroup objectives 2.4 Ensure consultation with individuals and teams on allocation of resources is participative and is conducted using appropriate interpersonal skills
3 Monitor and report on resource allocation and usage	3.1 Measure effectiveness of resource planning and assess against actual costs, identified shortfalls and surpluses 3.2 Develop and implement methods of monitoring resource use to enable timely and accurate reporting against business and operational plans 3.3 Identify improvements in resource planning through consultation and feedback, and implement in accordance with organisational requirements 3.4 Maintain records concerning equipment and resource purchases in accordance with organisational requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.2, 3.1, 3.3, 3.4	• Identifies and interprets information from organisational plans, policies and procedures
Writing	1.4, 2.1, 3.1-3.4	• Develops a range of documents using structure and vocabulary appropriate to audience, context and purpose
Oral Communication	1.2, 2.4, 3.3	• Participates effectively in spoken interactions using active listening and questioning to confirm and clarify understanding

© Commonwealth of Australia, 2025 Industry Skills Australia

Numeracy	1.3, 2.2, 3.1, 3.2	• Interprets and comprehends a range of mathematical information that is embedded in familiar texts • Calculates and compares numeric data to track expenditure
Navigate the world of work	1.1, 2.1, 3.3, 3.4	• Recognises and responds to explicit and implicit organisational procedures and protocols and legislative/regulatory requirements
Interact with others	1.2, 1.4, 2.4, 3.3	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role • Cooperates with others as part of familiar routine activities playing an active role in facilitating group interaction
Get the work done	1.1, 1.3, 1.4, 2.1, 2.2, 2.3, 3.1, 3.2	• Applies formal processes when planning complex tasks, producing plans with logically sequenced steps, reflecting an awareness of time constraints • Recognises and takes responsibility for addressing predictable problems in familiar work contexts • Utilises a range of features within digital applications to access, store and share information • Reflects on the ways in which variables impact on decision outcomes to identify improvement opportunities

Assessment Requirements for BSBADM409 Coordinate business resources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- monitor resource usage
- maintain records of resource requirements and usage
- calculate costs and expenditures in relation to use and maintenance of business resources
- acquire and allocate physical resources and services to team members
- consult and communicate with individuals and teams about acquiring and using resources
- monitor, review and report on resource use acquisition, allocation, use and procedures
- follow organisational policies and procedures in relation to business resource acquisition and monitoring.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the functions of business equipment used in an organisation and identify common faults
- identify organisational policies, plans and procedures in relation to business resource acquisition and monitoring.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the general administration field of work and include access to:

- records relating to business resources
- policies and procedures relating to resources

© Commonwealth of Australia, 2025 Industry Skills Australia

- case studies, and where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBADM502 Manage meetings

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage a range of meetings including overseeing the meeting preparation processes, chairing meetings, organising the minutes and reporting meeting outcomes.

It applies to individuals employed in a range of work environments who are required to organise and manage meetings within their workplace, including conducting or managing administrative tasks in providing agendas and meeting material. They may work as senior administrative staff or may be individuals with responsibility for conducting and chairing meetings in the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Administration – General Administration

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Prepare for meetings	1.1 Develop agenda in line with stated meeting purpose 1.2 Ensure style and structure of meeting are appropriate to its purpose 1.3 Identify meeting participants and notify them in accordance with organisational procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 Confirm meeting arrangements in accordance with requirements of meeting 1.5 Despatch meeting papers to participants within designated timelines
2 Conduct meetings	2.1 Chair meetings in accordance with organisational requirements, agreed conventions for type of meeting and legal and ethical requirements 2.2 Conduct meetings to ensure they are focused, time efficient and achieve the required outcomes 2.3 Ensure meeting facilitation enables participation, discussion, problem-solving and resolution of issues 2.4 Brief minute-taker on method for recording meeting notes in accordance with organisational requirements and conventions for type of meeting
3 Follow up meetings	3.1 Check transcribed meeting notes to ensure they reflect a true and accurate record of the meeting and are formatted in accordance with organisational procedures and meeting conventions 3.2 Distribute and store minutes and other follow-up documentation within designated timelines, and according to organisational requirements 3.3 Report outcomes of meetings as required, within designated timelines

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 3.1, 3.2	• Identifies and interprets information from complex texts including legislation, organisational policies and procedures • Compares final output with original notes to check for accuracy
Writing	1.1-1.5, 3.2, 3.3	• Addresses the context, purpose and audience when generating a range of texts • Prepares complex texts from notes using appropriate

© Commonwealth of Australia, 2025 Industry Skills Australia

		structure, and accurate spelling, grammar and punctuation • Records notes of meeting proceedings according to organisational requirements • Edits and corrects own work to ensure accuracy
Oral Communication	2.1-2.4	• Participates in verbal exchanges using appropriate style, tone and vocabulary for audience, context and purpose • Listens for specific information during meetings • Asks questions and listens to responses to clarify understanding
Numeracy	1.4, 1.5, 3.2, 3.3	• Recognises and interprets numerical information related to timeframes and budgets
Navigate the world of work	1.3, 2.1, 2.4, 3.1, 3.2	• Recognises and responds to both explicit and implicit organisational procedures and protocols and legislative/regulatory requirements
Interact with others	1.3, 1.5, 2.3, 3.2	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role • Cooperates with others as part of familiar activities, playing an active role in facilitating group interaction
Get the work done	1.1, 1.3, 1.4, 1.5, 2.1, 2.2, 2.4, 3.1, 3.2, 3.3	• Applies formal processes when planning complex tasks, producing plans with logically sequenced steps, reflecting an awareness of time constraints • Recognises and takes responsibility for addressing predictable problems in familiar work contexts

Assessment Requirements for BSBADM502 Manage meetings

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- apply conventions and procedures for formal and informal meetings including:
  - developing and distributing agendas and papers
  - identifying and inviting meeting participants
  - organising and confirming meeting arrangements
  - running the meeting and following up
- organise, take part in and chair a meeting
- record and store meeting documentation
- follow organisational policies and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline meeting terminology, structures, arrangements
- outline responsibilities of the chairperson and explain group dynamics in relation to managing meetings
- describe options for meetings including face-to-face, teleconferencing, web-conferencing and using webcams
- identify the relevant organisational procedures and policies regarding meetings, chairing and minutes including identifying organisational formats for minutes and agendas.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the general administration field of work and include access to:

© Commonwealth of Australia, 2025 Industry Skills Australia

- reference material in regard to meeting venues and technology, catering and transport suppliers
- organisational policies and procedures for managing meetings
- office supplies and equipment
- computers and relevant software
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBCMM301 Process customer complaints

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes skills and knowledge required to handle formal and informal negative feedback and complaints from customers.

It applies to individuals who apply a broad range of competencies and may exercise discretion and judgement using appropriate knowledge of products, customer service systems and organisational policies to provide technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Communication – Interpersonal Communication

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Respond to complaints	1.1 Process customer complaints using effective communication according to organisational procedures established under organisational policies, legislation or codes of practice 1.2 Obtain, document and review reports relating to customer complaints 1.3 Make decisions about customer complaints, taking into account applicable legislation, organisational policies and codes 1.4 Negotiate resolution of the complaint and obtain agreement

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	where possible 1.5 Maintain a register of complaints/disputes 1.6 Inform customer of the outcome of the investigation
2 Refer complaints	2.1 Identify complaints that require referral to other personnel or external bodies 2.2 Make referrals to appropriate personnel for follow-up in accordance with individual level of responsibility 2.3 Forward all documents and investigation reports 2.4 Follow-up appropriate personnel to gain prompt decisions
3 Exercise judgement to resolve customer service issues	3.1 Identify implications of issues for customer and organisation 3.2 Analyse, explain and negotiate appropriate options for resolution with customer 3.3 Propose viable options in accordance with appropriate legislative requirements and enterprise policies 3.4 Ensure matters for which a solution cannot be negotiated are referred to appropriate personnel

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.1, 3.3	• Recognises, identifies and interprets textual information to determine legislative, regulatory and organisational requirements
Writing	1.2, 1.5, 1.6, 2.2, 3.3	• Documents complaints and actions taken in accordance with organisational requirements • Records spoken information clearly and accurately for future reference
Oral Communication	1.1, 1.4, 1.6, 2.2, 2.4, 3.2, 3.3, 3.4	• Presents or requests information using words and non-verbal features appropriate to the audience and context • Uses listening and questioning techniques to gather information and confirm understanding

© Commonwealth of Australia, 2025 Industry Skills Australia

Navigate the world of work	1.1, 1.3, 2.1, 3.1, 3.3	• Takes personal responsibility for following organisational policies and procedures and legislative requirements
Interact with others	1.4, 2.2, 2.4, 3.2, 3.3, 3.4	• Follows organisational communication practices and procedures when referring complaints, seeking advice or negotiating outcomes
Get the work done	1.1, 1.2, 1.3, 1.4, 1.5, 2.2-2.4, 3.1	• Takes responsibility for planning, sequencing and completing tasks to achieve required outcomes • Addresses less predictable problems applying problem solving processes in determining solutions that meet organisational requirements • Uses the main features and functions of digital tools to complete work tasks

Assessment Requirements for BSBCMM301 Process customer complaints

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- process and document customer complaints according to organisational and legislative requirements
- use effective communication techniques to discuss options and resolve complaints
- follow correct procedures when referring and following up complaints.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the key provisions of relevant legislation from all forms of government that may affect aspects of business operations
- explain the communication skills required when handling customer complaints
- outline organisational procedures and standards for processing complaints
- list external bodies to which complaints could be referred.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals using interpersonal communication skills in the workplace and include access to:

- organisational policies and procedures relevant to customer complaints
- relevant legislation or codes of practice
- office equipment and resources
- case studies and, where possible, real situations
- interaction with others.

BSBCMM401 Make a presentation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0

Application

This unit covers the skills and knowledge required to prepare, deliver and review a presentation to a target audience.

This unit applies to individuals who may be expected to make presentations for a range of purposes, such as marketing, training and promotions. They contribute well developed communication skills in presenting a range of concepts and ideas.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Communication – Interpersonal Communication

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Prepare a presentation	1.1 Plan and document presentation approach and intended outcomes 1.2 Choose presentation strategies, format and delivery methods that match the characteristics of the target audience, location, resources and personnel needed 1.3 Select presentation aids, materials and techniques that suit the format and purpose of the presentation, and will enhance audience understanding of key concepts and central ideas

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 Brief others involved in the presentation on their roles/responsibilities within the presentation 1.5 Select techniques to evaluate presentation effectiveness
2 Deliver a presentation	2.1 Explain and discuss desired outcomes of the presentation with the target audience 2.2 Use presentation aids, materials and examples to support target audience understanding of key concepts and central ideas 2.3 Monitor non-verbal and verbal communication of participants to promote attainment of presentation outcomes 2.4 Use persuasive communication techniques to secure audience interest 2.5 Provide opportunities for participants to seek clarification on central ideas and concepts, and adjust the presentation to meet participant needs and preferences 2.6 Summarise key concepts and ideas at strategic points to facilitate participant understanding
3 Review the presentation	3.1 Implement techniques to review the effectiveness of the presentation 3.2 Seek and discuss reactions to the presentation from participants or from key personnel involved in the presentation 3.3 Utilise feedback from the audience or from key personnel involved in the presentation to make changes to central ideas presented

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.2	• Reviews and analyses documents to identify information relevant to a specific presentation
Writing	1.1, 3.3	• Develops material to convey ideas and information to target audience in an engaging way
Oral	1.4, 2.1, 2.2, 2.3,	• Presents information using words and non-verbal features appropriate to the audience and context

© Commonwealth of Australia, 2025 Industry Skills Australia

Communication	2.4, 2.5, 2.6, 3.2	• Uses listening and questioning techniques to gather information required to develop or modify presentations • Interprets audience reactions and changes words or non-verbal features accordingly
Interact with others	1.4, 2.1, 2.2, 2.4, 2.5, 2.6, 3.2	• Selects and uses appropriate conventions and protocols to encourage interaction or to present information • Demonstrates sophisticated control over oral, visual and written formats, drawing on a range of communication practices to achieve goals • Recognises the need to alter personal communication style in response to the needs or expectations of others
Get the work done	1.1-1.5, 2.2, 2.5, 3.1-3.3	• Takes responsibility for planning, sequencing and prioritising tasks and own workload to achieve outcomes • Uses feedback from others, analytical and lateral thinking to review current practices and develop new ideas • Uses the main features and functions of digital tools to complete work tasks

Assessment Requirements for BSBCMM401 Make a presentation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare and deliver presentations related to occupation or area of interest which demonstrate the use of:
  - effective presentation strategies and communication principles
  - aids and materials to support the presentation
- select and implement methods to review the effectiveness of own presentation and document any changes which would improve future presentations.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify information collection methods that will support review and feedback of presentations
- identify regulatory and organisational obligations and requirements relevant to presentations
- describe the principles of effective communication
- describe the range of presentation aids and materials available to support presentations.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals using interpersonal communication skills in the workplace and include access to:

- equipment, materials and business software packages for making a presentation
- business technology
- interaction with others.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessors must satisfy NVR/AQTF assessor requirements.

BSBCOM501 Identify and interpret compliance requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify and interpret the range of internal and external compliance requirements and obligations that must be fulfilled by an organisation.

It applies to individuals who use their sound theoretical knowledge of compliance and skills in identifying compliance requirements to plan, carry out and evaluate their own work and/or the work of a team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, licensing and risk – compliance

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Clarify the scope of operations	1.1 Identify and review the relevant range of operations and the sphere of business arrangements of the organisation 1.2 Conduct an analysis of the operations and business arrangements of the organisation and identify the functions, products and services that may be subject to compliance requirements 1.3 Develop and document work activity plans for determining

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	relevant compliance requirements 1.4 Obtain approval of plans from relevant organisational personnel
2 Identify compliance requirements	2.1 Conduct a search of information on internal and external compliance requirements using appropriate search resources, including relevant Australian and international standards 2.2 Ensure the search of compliance requirements scans across all relevant jurisdictions of laws, regulations, and industry and organisational codes and standards and identify pertinent compliance requirements 2.3 Progressively review information collected in terms of its relevance to the organisation's operations, services and products 2.4 Organise and store gathered information on relevant compliance requirements in an appropriate format for further analysis
3 Interpret, analyse and prioritise identified compliance requirements	3.1 Review and interpret collected information in terms of its relevance to the organisation's functions, services and products 3.2 Discuss and clarify with relevant internal or external personnel ambiguities, uncertainties and problems experienced in interpreting identified compliance information 3.3 Identify, analyse and prioritise relevant compliance requirements in terms of critical implications for the organisation and risks and consequence of possible breaches 3.4 Group pertinent compliance requirements into those that are critical and central to the organisation's operations, those that are important in some circumstances but are not central to the organisation's operations, and those that are pertinent but are incidental to the organisation's operations
4 Document compliance requirements	4.1 Organise and document outcomes of the identification and interpretation activities 4.2 Prepare and communicate reports of relevant compliance requirements and assessment of implications to relevant personnel performing specific compliance management functions

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Industry Skills Australia

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2, 2.3, 3.1, 3.3, 3.4	• Identifies, interprets, analyses or reviews complex texts from various sources to determine legal requirements, organisational operations, specific requirements and responsibilities
Writing	1.2, 1.3, 1.4, 2.4, 3.2, 3.3, 3.4, 4.1, 4.2	• Collates and compiles results of research and analysis using appropriate technical language and organisational formats • Develops materials to convey information, requirements or recommendations using language and structure appropriate to the audience
Oral Communication	1.4, 3.2, 4.2	• Presents specialised information using structure and language to suit the audience • Uses appropriate techniques, including active listening and questioning, to seek approvals and to confirm understanding
Navigate the world of work	1.2, 2.2, 3.1, 3.3	• Takes full responsibility for following policies, procedures and legislative requirements and identifies organisational implications of new legislation or regulations
Interact with others	1.4, 3.2, 4.2	• Identifies and uses appropriate conventions and practices when communicating with internal and external personnel
Get the work done	1.1, 1.3, 2.1-2.4, 3.1, 3.3, 3.4, 4.1, 4.2	• Plans, organises and implements activities required to identify, prioritise and document compliance requirements • Systematically gathers, analyses and evaluates all relevant information in order to make informed decisions about management of compliance breaches • Uses digital tools and systems to locate, organise and share information in effective ways

Assessment Requirements for BSBCOM501 Identify and interpret compliance requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse an organisation's operations to identify areas subject to compliance requirements
- interpret and analyse information from Australian and international standards, legislation, regulations, industry and organisational codes of practice to determine their relevance to the organisation
- document and store the outcomes of identification and interpretation activities related to the organisation's compliance requirements
- report on key compliance requirements and the implications of these for the organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline elements of compliance programs and related management systems breaches
- identify relevant Australian and international standards.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the compliance field of work and include access to:

- relevant Australian and international standards, laws, regulations, industry and organisational codes and standards
- appropriate computer resources for online searching
- case studies and, where possible, real situations.

BSBCOM601 Research compliance requirements and issues

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to explore and investigate various aspects and issues associated with compliance requirements and a related compliance program/management system.

It applies to individuals in regulatory authorities or large organisations with responsibilities related to identifying and investigating impacts, issues and policy implications of various aspects of compliance. It also applies to internal or external consultants who carry out research activities for clients on various aspects of compliance as a compliance researcher or member of a compliance management team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Compliance

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Clarify the purpose and scope of the research	1.1 Confirm and clarify the purpose and scope of the required compliance related research in collaboration with the client/s and relevant internal and/or external personnel 1.2 Document the purpose and scope of the required research in accordance with organisational and/or client requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2 Develop the research plan	2.1 Develop a suitable research methodology to enable sufficiently valid and reliable outcomes for the required research 2.2 Prepare the research plan for the proposed project 2.3 Obtain approval of plan from relevant internal and/or external personnel
3 Gather required research data	3.1 Collect relevant research data using appropriate research techniques and sources in accordance with the agreed research plan 3.2 Gather and interpret from appropriate sources, information on relevant Australian and international standards pertaining to compliance requirements and related systems 3.3 Organise, interpret and review collected data in terms of its relevance to the project's purpose and objectives 3.4 Discuss ambiguities, uncertainties and problems experienced while interpreting collected data and address appropriately in conjunction with relevant internal or external personnel 3.5 Organise interpreted research data for later analysis
4 Analyse collected data	4.1 Analyse data in accordance with planned methodology 4.2 Review and discuss outcomes of the analysis with relevant internal or external personnel
5 Determine research findings and outcomes	5.1 Interpret the outcomes of the data analysis in accordance with the project objectives 5.2 Develop and discuss preliminary findings, identified issues and related recommendations with relevant internal and/or external personnel 5.3 Undertake any additional data collection and analysis required to clarify aspects of findings, issues and related action options
6 Document and disseminate research outcomes	6.1 Prepare a draft report of the research outcomes, findings and recommendations in accordance with the agreed structure and format, and distribute to relevant internal and/or external personnel for comment and feedback 6.2 Edit the report based on the feedback obtained 6.3 Proofread the report prior to publication 6.4 Ensure the outcomes, findings and recommendations in the report are signed off by authorised personnel 6.5 Produce and disseminate the report to nominated internal

Application

This unit describes the skills and knowledge required to advise, carry out and evaluate customer service strategies.

It applies to individuals who have well developed skills and a broad knowledge of customer service strategies for addressing customer needs and problems, and who may provide guidance or delegate work related tasks to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Service

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Advise on customer service needs	1.1 Clarify and accurately assess customer needs using appropriate communication techniques 1.2 Diagnose problems matching service delivery to customers and develop options for improved service within organisational requirements 1.3 Provide relevant and constructive advice to promote the improvement of customer service delivery

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 Use business technology and/or online services to structure and present information on customer service needs
2 Support implementation of customer service strategies	2.1 Ensure customer service strategies and opportunities are promoted to designated individuals and groups 2.2 Identify and allocate available budget resources to fulfil customer service objectives 2.3 Promptly action procedures to resolve customer difficulties and complaints within organisational requirements 2.4 Ensure that decisions to implement strategies are taken in consultation with designated individuals and groups
3 Evaluate and report on customer service	3.1 Review client satisfaction with service delivery using verifiable data in accordance with organisational requirements 3.2 Identify and report changes necessary to maintain service standards to designated individuals and groups 3.3 Prepare conclusions and recommendations from verifiable evidence and provide constructive advice on future directions of client service strategies 3.4 Maintain systems, records and reporting procedures to compare changes in customer satisfaction

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.4, 2.3, 3.1	• Reviews textual information and comprehends details that relate to the interests or requirements of the client and organisation
Writing	1.4, 3.3, 3.4	• Creates a range of formal texts using structure, grammar and clear and specialised language to describe customer needs, maintain information and support a particular position
Oral Communication	1.1, 1.3, 2.1, 2.4, 3.2	• Uses pace, intonation, intelligible pronunciation and listening and questioning techniques to interact effectively with others

© Commonwealth of Australia, 2025 Industry Skills Australia

Numeracy	2.2	• Recognises and interprets numerical information and performs calculations on familiar mathematical information
Navigate the world of work	1.2, 2.3, 3.1, 3.2	• Recognises and applies organisational protocols and meets expectations associated with own work
Interact with others	1.1, 1.3, 2.1, 2.4, 3.2, 3.3	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role • Uses a range of strategies to establish a sense of connection and build rapport with customers • Collaborates with others contributing knowledge and skills to achieve joint outcomes
Get the work done	1.2, 1.4, 2.3, 3.1- 3.4	• Applies formal and logical processes when planning and implementing tasks • Applies standard procedures when responding to familiar problems within own work context • Uses digital technologies to access, organise, present and store information relevant to own role

Assessment Requirements for BSBCUS401 Coordinate implementation of customer service strategies

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify the needs and priorities of the organisation in delivering services to customers
- diagnose problems in delivery of customer service
- respond to and report on customer feedback and complaints
- review client satisfaction using verifiable data
- consult and communicate effectively with relevant people
- develop and implement strategies and methods to improve customer service delivery including:
  - budgeting
  - promotion to staff
  - documentation and follow up.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the principles of customer service
- explain sources of information and techniques for identifying customer needs and reviewing customer satisfaction
- explain the organisational business structure, products and services related to customer service
- describe product and service standards and best practice models.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the customer service field of work and include access to:

- office equipment
- business technology
- organisational policies and procedures for customer service
- examples of customer complaints and feedback
- client satisfaction data
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBCUS501 Manage quality customer service

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop strategies to manage organisational systems that ensure products and services are delivered and maintained to standards agreed by the organisation.

It applies to individuals who supervise the provision of quality customer service within an organisation's procedures framework by others. At this level, individuals must exercise considerable discretion and judgement, using a range of problem solving and decision making strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Service

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Plan to meet internal and external customer requirements	1.1 Investigate, identify, assess, and include the needs of customers in planning processes 1.2 Ensure plans achieve the quality, time and cost specifications agreed with customers
2 Ensure delivery of quality products and	2.1 Deliver products and services to customer specifications within

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
services	organisation's business plan 2.2 Monitor team performance to consistently meet the organisation's quality and delivery standards 2.3 Help colleagues overcome difficulties in meeting customer service standards
3 Monitor, adjust and review customer service	3.1 Develop and use strategies to monitor progress in achieving product and/or service targets and standards 3.2 Develop and use strategies to obtain customer feedback to improve the provision of products and services 3.3 Develop, procure and use resources effectively to provide quality products and services to customers 3.4 Make decisions to overcome problems and to adapt customer services, products and service delivery in consultation with appropriate individuals and groups 3.5 Manage records, reports and recommendations within the organisation's systems and processes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 3.1, 3.2, 3.3, 3.5	• Interprets and analyses textual information from a variety of sources and applies the knowledge that has been gained to evaluate standards for organisation's products and services
Writing	1.2, 3.1, 3.2, 3.3, 3.5	• Produces a range of text types to convey information, requirements or recommendations matching style of writing to purpose and audience
Oral Communication	1.1, 1.2, 2.1, 2.3, 3.2	• Clearly articulates systems and standards in a team environment using language suitable to diverse audiences • Uses listening and questioning techniques to obtain feedback and confirm understanding
Numeracy	1.2	• Interprets and comprehends mathematical information in organisation's business and customer service plans.

© Commonwealth of Australia, 2025 Industry Skills Australia

Navigate the world of work	2.1, 2.2, 3.1, 3.5	• Recognises and applies organisational protocols and meets expectations associated with own work
Interact with others	1.1, 2.3, 3.4	• Identifies and uses appropriate conventions and protocols when communicating with colleagues and customers • Collaborates with others, taking into account their strengths and experience, to achieve desired outcomes • Provides support in field of expertise to team
Get the work done	1.1, 1.2, 2.1, 2.2, 3.1-3.5	• Develops and implements plans using logical processes and monitors and evaluates progress against stated goals • Accepts responsibility for addressing complex or non-routine difficulties, applying problem solving processes in determining a solution. • Uses digital technology to access, organise and present information in a format that meets requirements

Assessment Requirements for BSBCUS501 Manage quality customer service

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and manage organisational systems for quality customer service
- develop and review plans, policies and procedures for delivering and monitoring quality customer service
- implement policies and procedures to ensure quality customer service
- solve complex customer complaints and system problems that lead to poor customer service
- monitor and assist teams to meet customer service requirements
- develop, procure and use human and physical resources to support quality customer service delivery.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legislative and regulatory context of the organisation relevant to customer service
- describe organisational policy and procedures for customer service including handling customer complaints
- identify service standards and best practice models
- summarise public relations and product promotion
- outline techniques for dealing with customers including customers with specific needs
- explain techniques for solving complaints including the principles and techniques involved in the management and organisation of:
  - customer behaviour
  - customer needs research

© Commonwealth of Australia, 2025 Industry Skills Australia

- customer relations
- ongoing product and/or service quality
- problem identification and resolution
- quality customer service delivery
- record keeping and management methods
- strategies for monitoring, managing and introducing ways to improve customer service relationships
- strategies to obtain customer feedback.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the customer service field of work and include access to:

- legislation, regulations and codes of practice related to customer service
- business technology
- workplace documentation and resources
- complex customer complaints
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBFIA303 Process accounts payable and receivable

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes skills and knowledge required to maintain accounts payable and accounts receivable records, including processing payments to creditors and handling overdue accounts receivable.

It applies to individuals employed in a range of work environments supporting the accounting functions and aspects of an enterprise. They may provide administrative support within an enterprise, or may be members of staff who have been delegated accounting responsibilities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Finance – Financial Administration

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Maintain financial journal systems	1.1 Check source documents for accuracy and appropriate authorisation 1.2 Refer errors and discrepancies in source documents for resolution in accordance with organisational policy and procedures 1.3 Enter transactions into cash and credit journal system in accordance with organisational policy and procedures and relevant

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	legislation and compliance requirements 1.4 Total credit journals in accordance with organisational policy and procedures
2 Prepare bank reconciliations	2.1 Check cash journals against bank statements to identify differences 2.2 Update cash journals with relevant data from bank statement/s 2.3 Identify discrepancies and refer to appropriate staff member, organisation or agency 2.4 Total cash journals in accordance with organisational policy and procedures 2.5 Prepare regular reconciliation reports within designated timelines
3 Maintain accounts payable and accounts receivable systems	3.1 Enter transactions into individual accounts payable and accounts receivable in accordance with organisational policy and procedures and accounting requirements 3.2 Prepare schedules of accounts payable and accounts receivable for reconciliation purposes and in accordance with organisational requirements 3.3 Reconcile accounts payable and accounts receivable schedules with journal data or general ledger and in accordance with organisational requirements
4 Process payments for accounts payable	4.1 Reconcile accounts payable statements with accounting records and in accordance with organisational policy and procedures 4.2 Check payment documentation for accuracy of information and discrepancies and rectify errors in accordance with organisational requirements
5 Prepare statements for accounts receivable	5.1 Produce and check accounts receivable statements for accuracy in accordance with organisational policy and procedures 5.2 Rectify discrepancies and statements despatched within designated timelines
6 Follow up outstanding accounts	6.1 Maintain accounts receivable ledger system in accordance with organisational requirements and to reflect current credit situation 6.2 Conduct aged-analysis of accounts receivable to identify outstanding accounts and to determine collection procedures in accordance with organisational requirements 6.3 Report or follow up outstanding accounts in accordance with

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	organisational policy and procedures 6.4 Monitor and review credit terms in accordance with credit policy and procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 2.1-2.5, 3.1-3.3, 4.1, 4.2, 5.1, 5.2, 6.1-6.4	• Interprets textual information from a range of sources to confirm all necessary job requirements • Checks documents to identify errors or discrepancies
Writing	1.2-1.4, 2.1-2.5, 3.1-3.3, 4.1, 4.2, 5.2, 6.1-6.4	• Prepares a range of clear documentation using relevant format, grammatical structure and vocabulary suitable to audience
Oral Communication	1.2, 2.3, 6.3	• Uses questioning and listening techniques to clarify information • Explains information clearly using appropriate terminology and tone
Numeracy	1.1-1.4, 2.1-2.5, 3.1-3.3, 4.1, 4.2, 5.1, 5.2, 6.1-6.4	• Uses a limited range of mathematical calculations to reconcile amounts using whole numbers and decimals • Arranges/compares numerical information
Navigate the world of work	1.1-1.4, 2.4, 2.5, 3.1-3.3, 4.1, 4.2, 5.1, 5.2, 6.1-6.4	• Appreciates implications of legal and regulatory responsibilities related to own work
Interact with others	1.2, 2.3, 6.3	• Seeks the appropriate form, channel and mode of communication for a specific purpose relevant to own role • Plays an active role in workgroup discussions, paying some attention to the perspective of others
Get the work done	1.2-1.4, 2.1-2.5, 3.1-3.3, 4.1-4.3, 5.1, 5.2, 6.1-6.4	• Plans a range of routine and non-routine tasks recognising stated goals and aiming to achieve them within specified timeframes • Recognises predictable problems and applies formal problem-solving processes or seeks advice from

Assessment Requirements for BSBFIA303 Process accounts payable and receivable

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- accurately enter data into journal and subsidiary ledger system
- maintain journals and subsidiary ledger systems
- reconcile subsidiary ledger system with journal or general ledger data
- complete all tasks in accordance with legal and organisational responsibilities, within scope of own responsibility.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list key provisions of relevant legislation and regulations, standards and codes of practice that may affect aspects of financial operations
- briefly describe the organisational accounting systems and procedures
- explain how to check for errors or discrepancies
- list and describe tasks that are outside own scope of responsibility.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial administration field of work and include access to:

- office equipment and resources
- computer equipment and relevant software
- examples of cash journals, credit journals, accounts payable and accounts receivable subsidiary legers

© Commonwealth of Australia, 2025 Industry Skills Australia

- workplace reference materials such procedural manuals and company policy
- case studies and, where possible, real situations..

Assessors must satisfy NVR/AQTF assessor requirements.

BSBFIM501 Manage budgets and financial plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to undertake financial management within a work team in an organisation. It includes planning and implementing financial management approaches, supporting team members whose role involves aspects of financial operations, monitoring and controlling finances and reviewing and evaluating effectiveness of financial management processes.

It applies to managers in a wide range of organisations and sectors who have responsibility for ensuring that work team financial resources are used effectively and are managed in line with financial objectives of the team and organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Finance - Financial Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Plan financial management approaches	1.1 Access budget/financial plans for the work team 1.2 Clarify budget/financial plans with relevant personnel within the organisation to ensure that documented outcomes are achievable, accurate and comprehensible 1.3 Negotiate any changes required to be made to budget/financial

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	plans with relevant personnel within the organisation 1.4 Prepare contingency plans in the event that initial plans need to be varied
2 Implement financial management approaches	2.1 Disseminate relevant details of the agreed budget/financial plans to team members 2.2 Provide support to ensure that team members can competently perform required roles associated with the management of finances 2.3 Determine and access resources and systems to manage financial management processes within the work team
3 Monitor and control finances	3.1 Implement processes to monitor actual expenditure and to control costs across the work team 3.2 Monitor expenditure and costs on an agreed cyclical basis to identify cost variations and expenditure overruns 3.3 Implement, monitor and modify contingency plans as required to maintain financial objectives 3.4 Report on budget and expenditure in accordance with organisational protocols
4 Review and evaluate financial management processes	4.1 Collect and collate for analysis, data and information on the effectiveness of financial management processes within the work team 4.2 Analyse data and information on the effectiveness of financial management processes within the work team and identify, document and recommend any improvements to existing processes 4.3 Implement and monitor agreed improvements in line with financial objectives of the work team and the organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.3, 3.1-3.4, 4.2, 4.3	• Interprets and analyses information to determine activities required

© Commonwealth of Australia, 2025 Industry Skills Australia

Writing	1.1, 1.4, 4.1-4.3	• Records information in correct forms and prepares materials which convey detailed and factual content in accordance with internal procedures
Oral Communication	1.2, 1.3, 2.1-2.3	• Presents information about financial issues and requirements to a range of audiences using structure and language to suit the audience • Uses active listening and questioning to clarify information and to confirm understanding
Numeracy	1.1-1.3, 2.1-2.3, 3.1-3.4, 4.1-4.3	• Uses a wide range of mathematical calculations to analyse numeric information in budgets or financial plans
Navigate the world of work	2.2, 3.3, 3.4, 4.3	• Recognises, understands and adheres to organisational requirements in undertaking own work
Interact with others	1.2, 1.3, 2.1, 2.2, 3.1, 2.3, 4.2, 4.3	• Uses a range of strategies to connect, collaborate and cooperate with other work colleagues in activities requiring collective effort and diverse skills and knowledge
Get the work done	1.1, 1.4, 2.3, 3.1-3.4, 4.1-4.3	• Uses logical processes in planning, implementing and evaluating complex tasks and developing alternative strategies in achieving goals and timelines • Uses a range of digital technologies to access, filter, compile, integrate and logically present complex information from multiple sources

Assessment Requirements for BSBFIM501 Manage budgets and financial plans

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use financial skills to work with and interpret budgets, ageing summaries, cash flow, petty cash, Goods and Services Tax (GST), and profit and loss statements
- communicate with relevant people to clarify budget/financial plans, negotiate changes and disseminate information
- prepare, implement and modify financial contingency plans
- monitor expenditure and control costs
- support and monitor team members
- report on budget and expenditure
- review and make recommendations for improvements to financial processes
- meet record keeping requirements for the Australian Taxation Office (ATO) and for auditing purposes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe basic accounting principles
- identify and explain the relevant legislation and current requirements of the Australian Taxation Office, including the Goods and Services Tax (GST)
- explain the key requirements for financiall record keeping and auditing
- describe the principles and techniques involved in managing:
  - budgeting
  - cash flows
  - electronic spreadsheets

© Commonwealth of Australia, 2025 Industry Skills Australia

- GST
- ledgers and financial statements
- profit and loss statements.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial management field of work and include access to:

- resources and documentation used in the workplace
- workplace policies and procedures
- workplace budgets and financial plans
- business technology
- case studies and, where available, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBHRM405 Support the recruitment, selection and induction of staff

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare job descriptions
- use job descriptions to support sourcing, selecting and appointing suitable staff
- use different advertising channels to promote vacancies and/or establish a potential talent pool
- consult with managers to gain approvals
- develop selection criteria and interview questions in consultation with relevant personnel
- schedule interviews and advise relevant people of times, dates and venues
- participate in interviews and other selection techniques including assessing candidates against selection criteria to short list them
- obtain referees' reports
- prepare and distribute a selection report including feedback to give unsuccessful candidates
- advise unsuccessful candidates of the results
- secure preferred candidate’s agreement and provide an employment contract
- advise other staff of the successful candidate and arrange induction.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify documentation required for recruitment, selection and induction
- explain human resources life cycle and the place of recruitment and selection
- identify legislation relevant to recruitment, selection and induction of staff
- describe channels and technology to advertise vacancies

© Commonwealth of Australia, 2025 Industry Skills Australia

- explain a range of interviewing techniques and other selection processes and their application.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – human resource development field of work and include access to:

- workplace policies and procedures
- business technology
- position descriptions
- legislation, regulations, Codes and Standards relevant to staff recruitment, selection and induction
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBHRM513 Manage workforce planning

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage planning in relation to an organisation's workforce including researching requirements, developing objectives and strategies, implementing initiatives and monitoring and evaluating trends.

It applies to individuals who are human resource managers or staff members with a role in a policy or planning unit that focuses on workforce planning.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Workforce Development – Human Resource Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Research workforce requirements	1.1 Review current data on staff turnover and demographics 1.2 Assess factors that may affect workforce supply 1.3 Establish the organisation's requirements for a skilled and diverse workforce
2 Develop workforce objectives and strategies	2.1 Review organisational strategy and establish aligned objectives for modification or retention of the workforce 2.2 Consider strategies to address unacceptable staff turnover, if

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	required 2.3 Define objectives to retain required skilled labour 2.4 Define objectives for workforce diversity and cross-cultural management 2.5 Define strategies to source skilled labour 2.6 Communicate objectives and rationale to relevant stakeholders 2.7 Obtain agreement and endorsement for objectives and establish targets 2.8 Develop contingency plans to cope with extreme situations
3 Implement initiatives to support workforce planning objectives	3.1 Implement action to support agreed objectives for recruitment, training, redeployment and redundancy 3.2 Develop and implement strategies to assist workforce to deal with organisational change 3.3 Develop and implement strategies to assist in meeting the organisation's workforce diversity goals 3.4 Implement succession planning system to ensure desirable workers are developed and retained 3.5 Implement programs to ensure workplace is an employer of choice
4 Monitor and evaluate workforce trends	4.1 Review workforce plan against patterns in exiting employee and workforce changes 4.2 Monitor labour supply trends for areas of over- or under-supply in the external environment 4.3 Monitor effects of labour trends on demand for labour 4.4 Survey organisational climate to gauge worker satisfaction 4.5 Refine objectives and strategies in response to internal and external changes and make recommendations in response to global trends and incidents 4.6 Regularly review government policy on labour demand and supply 4.7 Evaluate effectiveness of change processes against agreed objectives

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.1, 4.6	• Interprets and critically analyses organisational strategy and data on staff turnover and demographics
Writing	1.3, 2.1, 2.3, 2.4, 2.5, 2.6, 2.7, 2.8, 3.2, 3.3, 4.5	• Uses broad vocabulary, grammatical structure and conventions appropriate to audience and context to develop strategies, plans or reports
Oral communication	2.6, 2.7	• Conveys information using language, format and style appropriate to a specific audience
Numeracy	4.2, 4.3, 4.4	• Extracts and evaluates the mathematical information and applies mathematical and problem-solving strategies when monitoring labour trends and surveying organisational climate
Navigate the world of work	2.1, 2.7, 3.2, 3.3	• Understands and interprets organisational goals r to develop processes, objectives or strategies relevant to own role requirements
Interact with others	2.6, 2.7	• Selects and implements appropriate communication protocols to liaise with personnel in a range of work contexts
Get the work done	1.1, 2.1, 2.8, 3.1 -3.5, 4.1- 4.7	• Sequences and schedules complex activities, monitors implementation and manages relevant communication when researching requirements and developing workforce objectives and strategies • Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into account when assessing factors affecting workforce supply • Anticipates potential problems and uses analytical or lateral thinking processes to formulate contingency plans • Uses a range of digital tools to collect data, and to extract, organise and share information

Assessment Requirements for BSBHRM513 Manage workforce planning

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- review and interpret information from a range of internal and external sources to identify:
  - current staff turnover and demographics
  - labour supply trends factors that may affect workforce supply
  - organisation's workforce requirements objectives and strategies
- manage workforce planning including developing, implementing, monitoring and reviewing strategies to meet workforce needs
- review relevant trends and supply and demand factors that will impact on an organisation's workforce
- develop a workforce plan that includes relevant research and specific strategies to ensure access to a skilled and diverse workforce.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain current information about external labour supply relevant to the specific industry or skill requirements of the organisation
- outline industrial relations relevant to the specific industry
- describe labour force analysis and forecasting techniques.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – human resource development field of work and include access to:

© Commonwealth of Australia, 2025 Industry Skills Australia

- an appropriate range of documentation and resources normally used in the workplace
- organisational strategic and operational plans
- organisational policies and procedures
- business technology.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINM401 Implement workplace information system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement and review the workplace information system. It involves the identification, acquisition, initial analysis and use of appropriate information which plays a significant part in the organisation's effectiveness.

It applies to individuals whose work will normally be carried out within routine and non-routine methods and procedures which require planning and evaluation, leadership and guidance of others, and some discretion and judgement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Information Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Identify and source information needs	1.1 Determine and locate information required by teams 1.2 Acquire and review information held by the organisation to determine suitability, accessibility, currency and reliability according to organisational policies
2 Collect, analyse and report information	2.1 Collect information, which is adequate and relevant to the needs of teams, in a timely manner

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.2 Ensure information is in a format suitable for analysis, interpretation and dissemination 2.3 Analyse information to identify and report relevant trends and developments in terms of the needs for which it was acquired
3 Implement information systems	3.1 Implement management information systems effectively to store, retrieve and regularly review data for decision making purposes 3.2 Use technology available in the work area to manage information effectively 3.3 Submit recommendations for improving the information system to designated persons and/or groups
4 Prepare for information system changes	4.1 Collect information about information system future needs in consultation with colleagues, including those who have a specialist role in resource management 4.2 Ensure estimates of information system future needs reflect the organisation's business plans, and customer and supplier requirements 4.3 Support proposals to secure resources by clearly presenting submissions that describe realistic options, benefits, costs and outcomes 4.4 Prepare team members to work with new technology and information system changes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 4.1, 4.2, 4.3, 4.4	• Critically analyses complex documentation from a variety of sources and consolidates information relating to specific criteria to determine requirements
Writing	1.2, 2.1, 2.3, 3.1, 3.3, 4.1, 4.2, 4.3, 4.4	• Develops material for a specific audience using clear and detailed language in order to convey explicit information, requirements and recommendations
Oral	1.1, 3.3, 4.1, 4.3, 4.4	• Uses active listening and questioning and reading of verbal and non-verbal signals to convey and clarify

© Commonwealth of Australia, 2025 Industry Skills Australia

Communication		information and to confirm understanding
Numeracy	4.1-4.3	• Selects from and uses a variety of developing mathematical and problem solving strategies to ensure estimates of information reflect the business plan and staff requirements
Navigate the world of work	1.2	• Takes responsibility for following policies, procedures and legislative requirements and identifies organisational implications of new legislation or regulation
Interact with others	1.1, 3.3, 4.1, 4.3, 4.4	• Selects and uses appropriate conventions and protocols when communicating with clients and co-workers in a range of work contexts • Cooperates with others and contributes to work practices where joint outcomes are expected and deadlines are to be met
Get the work done	1.1, 1.2, 2.1, 2.3, 3.1, 3.2, 4.1, 4.2	• Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes • Contributes to continuous improvement of current work practices by applying basic principles of analytical thinking • Uses familiar digital technologies and systems to access, enter, present and communicate data and information

Assessment Requirements for BSBINM401 Implement workplace information system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify, source and analyse information to determine
  - information system needs
  - whether it is fit for purpose
  - trends and developments
- implement and review the workplace information system
- review a workplace information system and prepare and present a submission recommending improvements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the information systems that are, or should be, available in the workplace
- explain the information management systems and technology typically associated with the workplace including:
  - budgets and financial management systems
  - customer information software or records
  - databases
  - personal digital assistant (PDA)
  - product and service information
  - project management software
  - record management systems
  - spreadsheets.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – information management field of work and include access to:

- business technology
- a workplace information system
- workplace policies and procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINM501 Manage an information or knowledge management system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to organise training for others for an information or knowledge management system and to manage the use of the system.

It applies to individuals who are responsible for seeing that key information and corporate knowledge are retained, accessible to others and improve business outcomes.

The unit applies to information or knowledge management systems which comprise policies, protocols, procedures and practices to manage information or knowledge within the organisation and among relevant stakeholders.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Information Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Organise learning to use information or knowledge management system	1.1 Identify learning needs of relevant personnel and stakeholders for input into and use of an information or knowledge management system 1.2 Identify and secure human, financial and physical resources

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	required for learning activities to use an information or knowledge management system 1.3 Organise and facilitate learning activities 1.4 Promote and support use of the system throughout the organisation 1.5 Monitor and document effectiveness of learning activities
2 Manage use of information or knowledge management system	2.1 Ensure implementation of policies and procedures for the information or knowledge management system are monitored for compliance, effectiveness and efficiency 2.2 Address implementation issues and problems as they arise 2.3 Monitor integration and alignment with data and information systems 2.4 Collect information on achievement of performance measures 2.5 Manage contingencies such as system failure or technical difficulties by accessing technical specialist help as required
3 Review use of information or knowledge management system	3.1 Analyse effectiveness of system and report on strengths and limitations of the system 3.2 Review business and operational plan and determine how effectively the system is contributing to intended outcomes 3.3 Make recommendations for improvement to system, policy or work practices

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.5, 2.1-2.5, 3.1-3.3	• Researches and critically analyses documentation from a variety of sources to determine requirements
Writing	1.1-1.5, 2.1-2.4, 3.2, 3.3	• Prepares and produces documentation for a specific audience using clear and detailed language to convey explicit information, requirements and recommendations

© Commonwealth of Australia, 2025 Industry Skills Australia

Oral Communication	1.1, 1.2, 1.3, 1.4, 2.2, 2.5, 3.3	• Presents information using structure and language to suit the audience • Uses active listening and questioning and reading of verbal and non-verbal signals to clarify information and to confirm understanding
Navigate the world of work	2.1, 3.3	• Takes full responsibility for following policies, procedures and legislative requirements and identifies organisational implications of new legislation or regulation • Modifies or develops organisational policies and procedures to comply with legislative requirements and organisation goals
Interact with others	1.1-1.4, 2.5, 3.3	• Implements strategies for a diverse range of colleagues and clients in order to build rapport and foster strong relationships • Collaborates with others sharing information to build strong work groups and avoid behaviours that are not conducive to a productive environment • Elicits feedback and provides feedback to others in order to improve self or workgroup behaviours
Get the work done	1.1-1.5, 2.1-2.5, 3.1, 3.2	• Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness • Monitors progress of plans and schedules and reviews and changes them to meet new demands and priorities • Applies systematic and analytical processes to address problems and make decisions in complex situations • Investigates new and innovative ideas as a means to continuously improve, work practices and processes • Uses and investigates new digital technologies and applications to manage and manipulate data and communicate effectively with others

Assessment Requirements for BSBINM501 Manage an information or knowledge management system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify learning needs and plan and implement learning activities to enable personnel to use information or knowledge management system including
  - providing human, financial and physical resources as required
  - use of coaching, mentoring, information sessions, workshops, training programs and e-learning as appropriate
- monitor performance and address issues and contingencies as they arise including
  - accessing technical specialists as required
  - correct application of policies and procedures for the information or knowledge management system
  - alignment and effectiveness of the policies and procedures
  - effectiveness of information or knowledge management system for intended outcomes
- recommend improvements to systems, policies and practices as appropriate.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline relevant legislation, codes of practice and national standards relevant to privacy, freedom of information and knowledge management
- explain organisational policies and procedures including:
  - records management
  - information management
  - customer service
  - commercial confidentiality

© Commonwealth of Australia, 2025 Industry Skills Australia

- describe the organisational operations and existing data and information systems.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – information management field of work and include access to:

- relevant legislation, regulation, standards and codes
- relevant workplace systems, documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINN502 Build and sustain an innovative work environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to create an environment that enables and supports the application of innovative practice focusing on a holistic approach to the integration of innovation across all areas of work practice.

It applies to individuals working in leadership or management roles in any industry or community context. The individual could be employed by the organisation, but may also be an external contractor, the leader of a cross organisation team or of a self-formed team of individuals. The work group could be permanent or temporary in nature.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and Innovation – Innovation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Lead innovation by example	1.1 Make innovation an integral part of leadership and management activities 1.2 Demonstrate positive reception of ideas from others and provide constructive advice 1.3 Establish and maintain relationships based on mutual respect and trust

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 Take considered risks to open up opportunities for innovation 1.5 Regularly evaluate own approaches for consistency with the wider organisational or project context
2 Establish work practices that support innovation	2.1 Consult on and establish working conditions that reflect and encourage innovative practice 2.2 Introduce and maintain workplace procedures that foster innovation and allow for rigorous evaluation of innovative ideas 2.3 Facilitate and participate in collaborative work arrangements to foster innovation 2.4 Build and lead teams to work in ways that maximise opportunities for innovation
3 Promote innovation	3.1 Acknowledge suggestions, improvements and innovations from all colleagues 3.2 Find appropriate ways of celebrating and promoting innovation 3.3 Promote and reinforce the value of innovation according to the vision and objectives of the organisation or project 3.4 Promote and support the evaluation of innovative ideas within the wider organisational or project context
4 Create a physical environment which supports innovation	4.1 Evaluate the impact of the physical environment in relation to innovation 4.2 Collaborate with colleagues about ideas for enhancing the physical work environment before taking action 4.3 Consider potential for supporting innovation when selecting physical resources and equipment 4.4 Design, fit-out and decorate workspaces to encourage creative mindsets, collaborative working and the development of positive workplace relationships
5 Provide learning opportunities	5.1 Pro-actively share relevant information, knowledge and skills with colleagues 5.2 Provide or encourage formal and informal learning opportunities to help develop the skills needed for innovation 5.3 Create opportunities in which individuals can learn from the experience of others

© Commonwealth of Australia, 2025 Industry Skills Australia

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.5, 2.2, 4.1, 5.1	• Interprets and evaluates information that may deal with complex ideas related to issues both within and outside a given workplace context
Writing	3.3, 3.4, 5.1	• Develops information for others using language to suit the context and audience
Oral Communication	1.2, 2.1, 2.3, 3.1, 3.3, 3.4, 5.1	• Presents ideas and concepts to a range of audiences using structure and language to suit the audience • Uses active listening and questioning to discuss and clarify information and to confirm understanding
Navigate the world of work	1.1, 1.5, 2.1, 2.2, 3.3, 5.1, 5.2	• Takes responsibility for implementing practices and procedures to achieve organisational objectives in innovation according to role requirements • Stays up to date with professional development options to provide relevant information to staff
Interact with others	1.2, 1.3, 2.3, 2.4, 3.1-3.4, 4.2, 5.1, 5.3	• Uses appropriate communication techniques to build rapport and foster strong relationships with co-workers in a range of work contexts • Uses inclusive and collaborative techniques to share, promote and convey complex information about new ideas and systems within the workplace
Get the work done	1.1, 1.4, 1.5, 2.1, 3.2, 3.3, 4.1, 4.3, 4.4, 5.2, 5.3	• Accepts responsibility for planning and implementing tasks and practices to achieve organisational goals, negotiating key aspects with others and taking into account current capabilities and needs • Develops new and innovative ideas through exploration, evaluation, analysis and critical thinking • Facilitates a climate where people feel comfortable suggesting and discussing improvements or new ideas • Uses problem solving processes to identify, assess and respond to challenges and risks around innovation

Assessment Requirements for BSBINN502 Build and sustain an innovative work environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to maximise opportunities for innovation by:

- establishing procedures and practices that foster innovation including:
  - collaborative work arrangements
  - building team capacity to contribute to innovation
  - providing formal and informal learning opportunities
  - evaluating ideas
  - celebration and promotion of innovation
  - consultation
  - respectful communications and sharing of ideas and feedback
- reinforcing the value of innovation to the vision and objectives of the organisation,
- model ling behaviour including being receptive to ideas, giving constructive advice, evaluating own work, establishing and maintaining relationships based on mutual respect and trust, taking considered risks that provide opportunities for innovation
- evaluating how the physical environment can be enhanced to support innovation and collaboration and collaborating on ideas to make improvements including in the selection of physical resources and equipment, and the design, fit-out and decoration of the workspaces
- making changes to a workspace that will encourage innovation in at least one of
  - design
  - fit-out
  - decoration.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

© Commonwealth of Australia, 2025 Industry Skills Australia

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the concepts and theories of innovation and how these link to innovation in practice
- explain the context for innovation in the workplace including core business values, overall objectives, broader environmental context and the need to ensure the value and benefit of innovative ideas and projects
- discuss the factors and tools that can motivate individuals to use creative thinking and apply innovative work practices
- research the legislative framework that impacts on operations in the relevant workplace context
- explain how different approaches to management and leadership can support or hinder innovation
- discuss typical challenges and barriers to innovation within teams and organisations and ways of overcoming these including rewarding and celebrating innovation, coaching and learning, modelling behaviour and managing the physical environment.
-

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBITU101 Operate a personal computer

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to start up and use a range of basic functions on a personal computer or business computer terminal.

It applies to individuals who perform a range of routine computer tasks in the various sectors of the business services industry and generally work under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Start computer, system information and features	1.1 Adjust workspace, furniture and equipment to suit user ergonomic requirements 1.2 Ensure work meets organisational and work health and safety (WHS) requirements for computer operation 1.3 Start computer or log on according to user procedures 1.4 Identify basic functions and features using system information 1.5 Customise desktop configuration, if necessary, with assistance from appropriate persons

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.6 Use help functions as required
2 Navigate and manipulate desktop environment	2.1 Open, close and access features by selecting correct desktop icons 2.2 Open, resize and close desktop windows by using correct window functions 2.3 Create shortcuts onto the desktop, if necessary, with assistance from appropriate persons
3 Organise files using basic directory and folder structures	3.1 Create folders/subfolders with suitable names 3.2 Save files with suitable names in appropriate folders 3.3 Rename and move folders/subfolders and files as required 3.4 Identify folder/subfolder and file attributes 3.5 Move folders/subfolders and files using cut and paste, and drag and drop techniques 3.6 Save folders/subfolders and files to appropriate media where necessary 3.7 Search for folders/subfolders and files using appropriate software tools 3.8 Restore deleted folder/subfolders and files as necessary
4 Print information	4.1 Print information from installed printer 4.2 View progress of print jobs and delete as required 4.3 Change default printer, if installed
5 Shut down computer	5.1 Close all open applications 5.2 Shut down computer according to user procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 1.5, 1.6, 3.1-3.8, 4.1-4.3, 5.1, 5.2	• Recognises textual information within internal procedures and technical documents to determine and complete work requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

Writing	1.3, 3.1-3.3, 3.7	• Inputs information using familiar text types and records numerical and textual information for file naming conventions
Oral Communication	1.5, 2.3	• Asks simple questions and comprehends answers that contain short and explicit information
Navigate the world of work	1.1-1.3, 5.2	• Recognises and follows organisational procedures and legislative responsibilities, with particular reference to health and safety
Interact with others	1.5, 2.3	• Uses appropriate communication practices to seek guidance from more experienced work colleagues
Get the work done	1.3-1.6, 2.1-2.3, 3.1-3.8, 4.1-4.3, 5.1, 5.2	• With guidance, is beginning to understand and use the specific functions and features of digital systems and tools

Assessment Requirements for BSBITU101 Operate a personal computer

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- adjust equipment, furniture and workspace to suit individual ergonomic requirements
- follow organisational and WHS requirements when operating a computer
- follow user procedures and system information when using the basic functions on a computer, seeking assistance when necessary
- use desktop icons and create shortcuts
- create and manipulate folders and subfolders
- check and delete print jobs and change default printer
- correctly shut down software applications and the computer.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the main work health and safety requirements for working with a computer
- list the main points to consider when setting up an ergonomic work environment
- list the main components of the computer system, and briefly explain what each one does
- briefly explain the functions of the operating system
- outline the organisation’s conventions for naming files

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

© Commonwealth of Australia, 2025 Industry Skills Australia

- organisational policies and procedures
- information about work health and safety requirements.
- computer user and system information
- suitable workspace including a personal computer or computer terminal with relevant software and printer.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBITU102 Develop keyboard skills

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop basic keyboard skills using touch typing techniques in a broad range of settings.

It applies to individuals who perform a range of mainly routine tasks and generally work under direct supervision using limited practical skills and fundamental knowledge.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Use safe work practices	1.1 Adjust workspace, furniture and equipment to suit user ergonomic requirements 1.2 Ensure work meets organisational and work health and safety (WHS) requirements for computer operation
2. Identify and develop keyboard skills	2.1 Identify and apply keyboard functions for both alpha and numeric keyboard functions 2.2 Apply touch typing technique to complete a task 2.3 Develop speed and accuracy in accordance with workplace

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	requirements for level of responsibility
3. Check accuracy	3.1 Proofread document carefully to identify errors 3.2 Amend document, correct errors and complete a final accuracy check

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.3, 3.1, 3.2	• Comprehends textual information in workplace documents to confirm work requirements • Checks own work to identify errors
Writing	2.2, 2.3, 3.2	• Enters and edits numerical and textual information according to a defined format
Navigate the world of work	1.1, 1.2, 2.3	• Complies with organisational and legislative requirements and meets expectations associated with own role
Get the work done	2.1-2.3, 3.1, 3.2	• Understands the specific functions and features of digital tools and uses these to perform work tasks

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Speed and accuracy must be:	• consistent with degree of experience of operator • relevant to level of responsibility.

Assessment Requirements for BSBITU102 Develop keyboard skills

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- follow ergonomic and organisational and work health and safety (WHS) requirements
- use keyboard functions to enter alpha and numeric data
- develop touch-typing techniques and speed and accuracy
- proofread and edit documents.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as WHS
- identify organisational benchmarks for keyboarding.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- industry software packages
- organisational policies and procedures
- relevant legislation
- relevant workplace documentation and resources.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLDR403 Lead team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit defines skills, knowledge and outcomes required to plan and supervise the performance of the team and develop team cohesion.

It applies team leaders, supervisors and new emerging managers who have an important leadership role in the development of efficient and effective work teams.

Leaders at this level also provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership - Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan to achieve team outcomes	1.1 Lead the team to identify, establish and document team purpose, roles, responsibilities, goals, plans and objectives in consultation with team members 1.2 Engage team members to incorporate innovation and

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	productivity measures in work plans 1.3 Lead and support team members in meeting expected outcomes
2. Lead team to develop cohesion	2.1 Provide opportunities for input of team members into planning, decision making and operational aspects of work team 2.2 Encourage and support team members to take responsibility for own work and to assist each other in undertaking required roles and responsibilities 2.3 Provide feedback to team members to encourage, value and reward individual and team efforts and contributions 2.4 Recognise and address issues, concerns and problems identified by team members or refer to relevant persons as required 2.5 Model expected behaviours and approaches
3. Participate in and facilitate work team	3.1 Actively encourage team members to participate in and take responsibility for team activities and communication processes 3.2 Give the team support to identify and resolve problems which impede its performance 3.3 Ensure own contribution to work team serves as a role model for others and enhances the organisation's image within the work team, the organisation and with clients/customers
4. Liaise with management	4.1 Maintain open communication with line manager/management at all times 4.2 Communicate information from line manager/management to the team 4.3 Communicate unresolved issues, concerns and problems raised by the team/team members to line manager/management and ensure follow-up action is taken 4.4 Communicate unresolved issues, concerns and problems related to the team/team members raised by line managers/management to the team and ensure follow-up to action is taken

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance	Description

© Commonwealth of Australia, 2025 Industry Skills Australia

	Criteria	
Writing	1.1, 4.2	• Prepares workplace plans that communicate intent and elicits feedback clearly and effectively
Oral communication	1.1, 1.3, 2.2, 2.3, 3.1, 3.2, 4.2-4.4	• Engages in discussions or provides information using structure and language appropriate to the audience and situation
Interact with others	1.1-1.3, 2.1-2.5, 3.1, 3.3, 4.1	• Selects and uses appropriate conventions and protocols when communicating with team members • Adapts personal communication style to model required behaviours, build trust and positive working relationships and to show respect for the opinions and values of others • Plays a lead role in situations requiring effective collaboration, demonstrating conflict resolution skills and ability to engage and motivate others
Get the work done	1.1-1.3, 3.2	• Develops, implements and monitors plans and processes to ensure team engagement and effectiveness • Uses formal analytical thinking techniques to identify issues and generate possible solutions, seeking input from others as required

Assessment Requirements for BSBLDR403 Lead team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- apply knowledge of organisational goals, objectives and plans
- develop a team work plan including documentation of how it was generated and how it will be monitored
- identify and incorporate innovation and productivity measures into a team work plan
- communicate with team members and management to identify and establish the team purpose, roles, responsibilities, goals plans and objectives and resolve problems
- use techniques to consult, encourage, support and provide feedback to team members
- model team leadership behaviours and approaches
- liaise with management to develop the teamwork plan, resolve issues and ensure follow-up action is taken.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must explain principles and techniques associated with:

- delegation and work allocation
- goal setting
- group dynamics and processes
- individual behaviour and difference
- leadership styles
- motivation
- negotiation
- problem solving
- planning

© Commonwealth of Australia, 2025 Industry Skills Australia

- workplace innovation
- workplace productivity.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- information about the organisation, including organisational structure, goals, objectives and plans
- case studies, and where possible, real situations
- workplace equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT401 Show leadership in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead teams and individuals by modelling high standards of conduct to reflect the organisation's standards and values.

It applies to individuals who are making the transition from being a team member to taking responsibility for the work and performance of others and providing the first level of leadership within the organisation. These managers have a strong influence on the work culture, values and ethics of the teams they supervise.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Model high standards of management performance and behaviour	1.1 Ensure management performance and behaviour meets the organisation’s requirements 1.2 Ensure management performance and behaviour serves as a positive role model for others 1.3 Develop and implement performance plans in accordance with organisation’s goals and objectives 1.4 Establish and use key performance indicators to meet

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	organisation's goals and objectives
2. Enhance organisation's image	2.1 Use organisation's standards and values in conducting business 2.2 Question, through established communication channels, standards and values considered to be damaging to the organisation 2.3 Ensure personal performance contributes to developing an organisation which has integrity and credibility
3. Make informed decisions	3.1 Gather and organise information relevant to the issue/s under consideration 3.2 Facilitate individual's and team's active participation in decision-making processes 3.3 Examine options and assess associated risks to determine preferred course/s of action 3.4 Ensure decisions are timely and communicate them clearly to individuals and teams 3.5 Prepare plans to implement decisions and ensure they are agreed by relevant individuals and teams 3.6 Use feedback processes effectively to monitor the implementation and impact of decisions

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.4, 2.1, 3.1, 3.3, 3.5, 3.6	• Gathers, interprets and analyses text relating to organisational goals, standards and values to aid planning and decision making
Writing	1.3, 1.4, 3.1, 3.3, 3.5, 3.6	• Records and reports key information related to the organisational goals, standards and objectives • Researches, plans and prepares documentation for relevant stakeholders
Oral Communication	1.2, 1.3, 2.2, 2.3, 3.2, 3.4, 3.5, 3.6	• Uses appropriate structure and language when developing performance plans, or when seeking and providing information about organisational goals and

© Commonwealth of Australia, 2025 Industry Skills Australia

		objectives
Numeracy	1.4	• Identifies and comprehends mathematical information in familiar texts to establish key performance indicators
Navigate the world of work	1.1, 1.2, 1.3, 1.4, 2.1, 2.3	• Understands how own role meshes with others and contributes to broader work goals • Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.2, 1.3, 2.2, 2.3, 3.2, 3.4, 3.5, 3.6	• Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective outcomes • Recognises the importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate with whom, why and how
Get the work done	1.1, 1.3, 1.4, 3.1, 3.2, 3.3, 3.4, 3.5, 3.6	• Develops plans to manage relatively complex, non-routine tasks with an awareness of how they contribute to longer term operational and strategic goals • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria • Evaluates effectiveness of decisions in terms of how well they meet stated goals

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Organisation's standards and values must be identified by considering:	• explicitly stated values • values that are implied by the way the organisation conducts its business.

Assessment Requirements for BSBMGT401 Show leadership in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify the organisation's standards and values, whether stated or implied by the way the organisation conducts its business
- evaluate own behaviour and performance against these and adjust to achieve required standards
- develop and implement performance plans and key performance indicators (KPIs) to meet organisation's goals and objectives
- use established communication channels to raise questions about standards and values that may be damaging to the organisation
- ensure own behaviour and performance contributes to the integrity and credibility of the organisation
- facilitate processes to make decisions that are based on:
  - relevant information
  - examination of options and associated risks
  - input from relevant people
- communicate about making and implementing decisions including:
  - facilitating agreement on the preferred course of action and implementation plans
  - monitoring and feedback on the implementation and impact of decisions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how to identify an organisation's standards and values when they are:
  - stated

© Commonwealth of Australia, 2025 Industry Skills Australia

  - implied
- articulate organisational values and expectations of behaviour
- explain basic theory of group behaviour
- outline the organisation's process for raising questions about standards and values
- give examples of behaviours and performance that would typically be considered damaging to an organisation
- explain concepts including:
  - organisational values
  - role modelling
  - integrity and credibility
  - leadership.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT402 Implement operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement the operational plan by monitoring and adjusting operational performance, planning and acquiring resources and providing reports on performance as required.

It applies to individuals who plan activities to achieve the measurable, stated objectives of the team and the organisation. At this level work will normally be carried out within routine and non-routine methods and procedures which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Implement operational plan	1.1 Collate, analyse and organise details of resource requirements in consultation with relevant personnel, colleagues and specialist resource managers 1.2 Implement operational plans to contribute to the achievement of organisation's performance/business plan 1.3 Identify and use key performance indicators (KPIs) to monitor

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	operational performance 1.4 Manage contingencies by adjusting the implementation of the operational plan in consultation with others 1.5 Provide assistance in the development and presentation of proposals for resource requirements in line with operational planning processes
2. Implement resource acquisition	2.1 Recruit and induct employees within organisation's policies, practices and procedures 2.2 Implement plans for acquisition of physical resources and services within organisation's policies, practices and procedures and in consultation with relevant personnel
3. Monitor operational performance	3.1 Monitor performance systems and processes to assess progress in achieving profit/productivity plans and targets 3.2 Analyse and use budget and actual financial information to monitor profit/productivity performance 3.3 Identify unsatisfactory performance and take prompt action to rectify the situation according to organisational policies 3.4 Provide mentoring, coaching and supervision to support individuals and teams to use resources effectively, economically and safely 3.5 Present recommendations for variation to operational plans to the designated persons/groups and gain approval 3.6 Implement systems, procedures and records associated with performance in accordance with organisation's requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.4	• Actively reinforces learning by applying new knowledge and skills in mentoring, coaching and supervising others
Reading	1.1-1.5, 2.1, 2.2, 3.1, 3.2, 3.6	• Identifies, interprets, analyses and reviews textual information related to the operational plan and

© Commonwealth of Australia, 2025 Industry Skills Australia

		monitoring of operational performance
Writing	1.1-1.5, 2.1, 2.2, 3.2-3.6	• Communicates relationships between ideas and information, matching style of writing to purpose and audience • Researches, plans and prepares workplace documentation for relevant stakeholders using organisational formats
Oral Communication	1.1, 1.4, 1.5, 2.1, 2.2, 3.3, 3.4, 3.5	• Participates in a variety of spoken exchanges with a range of audiences varying structure and language to suit the audience
Numeracy	1.1, 1.2, 1.3, 1.4, 1.5, 2.2, 3.1, 3.2, 3.3	• Selects and uses familiar mathematical techniques to organise timely supply of adequate resources for the operational plan and to use budgetary information to monitor performance
Navigate the world of work	1.5, 2.1, 2.2, 3.3, 3.4, 3.6	• Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.1, 1.4, 1.5, 2.1, 2.2, 3.3, 3.4, 3.5	• Selects and uses appropriate conventions and protocols when communicating with diverse individuals to build rapport, seek or present information • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group communication, influencing direction and taking a leadership role on occasion
Get the work done	1.1, 1.2, 1.3, 1.4, 1.5, 2.2, 3.1, 3.2, 3.3, 3.6	• Takes responsibility for planning, organising, implementing and monitoring tasks required to achieve required outcomes • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria • Evaluates effectiveness of decisions in terms of how well they met stated goals • Recognises and addresses an increasing range of familiar problems by implementing contingency plans

BSBMGT403 Implement continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement the organisation's continuous improvement systems and processes. It covers using systems and strategies to actively encourage the team to participate in the process, monitoring and reviewing performance, and identifying opportunities for further improvements.

It applies to managers who have an active role in implementing the continuous improvement process to achieve the organisation's objectives. Their position is closely associated with the creation and delivery of products and services which means that they have an important role in influencing the ongoing development of the organisation.

At this level, work will normally be carried out within routine and non-routine methods and procedures, which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Implement continuous improvement systems and	1.1 Implement systems to ensure that individuals and teams are actively encouraged and supported to participate in decision

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
processes	making processes, assume responsibility and exercise initiative 1.2 Communicate the organisation's continuous improvement processes to individuals and teams, and obtain feedback 1.3 Ensure effective mentoring and coaching allows individuals and teams to implement the organisation's continuous improvement processes
2. Monitor and review performance	2.1 Use the organisation's systems and technology to monitor and review progress and to identify ways in which planning and operations could be improved 2.2 Improve customer service through continuous improvement techniques and processes 2.3 Formulate and communicate recommendations for adjustments to those who have a role in their development and implementation
3. Provide opportunities for further improvement	3.1 Implement processes to ensure that team members are informed of savings and productivity/service improvements in achieving the business plan 3.2 Document work performance to aid the identification of further opportunities for improvement 3.3 Manage records, reports and recommendations for improvement within the organisation's systems and processes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 3.2, 3.3	• Evaluates and integrates facts and ideas to construct meaning from a range of text types in an effort to implement continuous improvement systems and processes
Writing	1.1, 1.2, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3	• Selects vocabulary, grammatical structures and conventions appropriate to text • Researches, plans and prepares continuous improvement documentation for relevant stakeholders
Oral	1.2, 1.3, 2.3	• Participates in a variety of spoken exchanges with a range of audiences using structure and language to suit

© Commonwealth of Australia, 2025 Industry Skills Australia

Communication		the audience
Navigate the world of work	2.1	• Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment
Interact the work of others	1.2, 1.3, 2.3, 3.1	• Selects and uses appropriate conventions and protocols when communicating with diverse individuals to seek or share information • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group communication, influencing direction and taking a leadership role on occasion
Get the work done	1.1, 1.3, 2.1, 2.2, 3.1, 3.2, 3.3	• Takes responsibility for planning and organising own workload to achieve required outcomes • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria • Evaluates effectiveness of decisions in terms of how well they meet stated goals • Uses digital applications to access and filter data, extract, organise, integrate and share relevant information • Recognises the potential of new approaches to enhance work practices and outcomes

Assessment Requirements for BSBMGT403 Implement continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- implement continuous improvement systems and provide mentoring and coaching support to enable individuals and teams to participate in decisions, take responsibility, show initiative and implement improvement processes
- implement processes to inform team members about savings and productivity/service improvements achievements
- communicate effectively to support the continuous improvement system and implementation of improvements
- apply continuous improvement to customer services including internal and external customers
- implement, monitor and adjust improvement plans, processes and procedures to improve performance
- document performance to identify further opportunities for improvement
- manage records and reports within the organisation's systems and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of continuous improvement processes
- list typical areas of need for coaching and mentoring to support continuous improvement
- explain how change management techniques can support continuous improvement and initiative
- identify the organisation's systems and data that can be used for benchmarking and monitoring performance for continuous improvement.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage the performance of staff who report to them directly. Development of key result areas and key performance indicators and standards, coupled with regular and timely coaching and feedback, provide the basis for performance management.

It applies to individuals who manage people. It covers work allocation and the methods to review performance, reward excellence and provide feedback where there is a need for improvement.

The unit makes the link between performance management and performance development, and reinforces both functions as a key requirement for effective managers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Allocate work	1.1 Consult relevant groups and individuals on work to be allocated and resources available

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.2 Develop work plans in accordance with operational plans 1.3 Allocate work in a way that is efficient, cost effective and outcome focussed 1.4 Confirm performance standards, Code of Conduct and work outputs with relevant teams and individuals 1.5 Develop and agree performance indicators with relevant staff prior to commencement of work 1.6 Conduct risk analysis in accordance with the organisational risk management plan and legal requirements
2. Assess performance	2.1 Design performance management and review processes to ensure consistency with organisational objectives and policies 2.2 Train participants in the performance management and review process 2.3 Conduct performance management in accordance with organisational protocols and time lines 2.4 Monitor and evaluate performance on a continuous basis
3. Provide feedback	3.1 Provide informal feedback to staff on a regular basis 3.2 Advise relevant people where there is poor performance and take necessary actions 3.3 Provide on-the-job coaching when necessary to improve performance and to confirm excellence in performance 3.4 Document performance in accordance with the organisational performance management system 3.5 Conduct formal structured feedback sessions as necessary and in accordance with organisational policy
4. Manage follow up	4.1 Write and agree on performance improvement and development plans in accordance with organisational policies 4.2 Seek assistance from human resources specialists, where appropriate 4.3 Reinforce excellence in performance through recognition and continuous feedback 4.4 Monitor and coach individuals with poor performance 4.5 Provide support services where necessary 4.6 Counsel individuals who continue to perform below expectations and implement the disciplinary process if necessary 4.7 Terminate staff in accordance with legal and organisational

Assessment Requirements for BSBMGT502 Manage people performance

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- consult with relevant stakeholders to identify work requirements, performance standards and agreed performance indicators
- develop work plans and allocate work to achieve outcomes efficiently and within organisational and legal requirements
- monitor, evaluate and provide feedback on performance and provide coaching or training, as needed
- reinforce excellence in performance through recognition and continuous feedback
- seek assistance from human resources specialists where appropriate
- keep records and documentation in accordance with the organisational performance management system.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline relevant legislative and regulatory requirements
- outline relevant awards and certified agreements
- explain performance measurement systems utilised within the organisation
- explain unlawful dismissal rules and due process
- describe staff development options and information.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT516 Facilitate continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead and manage continuous improvement systems and processes. Particular emphasis is on the development of systems and the analysis of information to monitor and adjust performance strategies, and to manage opportunities for further improvements.

It applies to individuals who take an active role in managing a continuous improvement process in order to achieve an organisation's objectives.

At this level, work will normally be carried out using complex and diverse methods and procedures which require the exercise of considerable discretion and judgement, using a range of problem-solving and decision-making strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Lead continuous improvement systems and processes	1.1 Develop strategies to ensure that team members are actively encouraged and supported to participate in decision-making processes, assume responsibility and exercise initiative as

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	appropriate 1.2 Establish systems to ensure that the organisation's continuous improvement processes are communicated to stakeholders 1.3 Ensure that change and improvement processes meet sustainability requirements 1.4 Develop effective mentoring and coaching processes to ensure that individuals and teams are able to implement and support the organisation's continuous improvement processes 1.5 Ensure that insights and experiences from business activities are captured and accessible through knowledge management systems
2. Monitor and adjust performance strategies	2.1 Develop strategies to ensure that systems and processes are used to monitor operational progress and to identify ways in which planning and operations could be improved 2.2 Adjust and communicate strategies to stakeholders according to organisational procedures
3. Manage opportunities for further improvement	3.1 Establish processes to ensure that team members are informed of outcomes of continuous improvement efforts 3.2 Ensure processes include recording of work team performance to assist in identifying further opportunities for improvement 3.3 Consider areas identified for further improvement when undertaking future planning

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 1.4, 1.5, 2.1, 2.2, 3.3	• Identifies and extracts relevant information from a range of complex texts • Locates, interprets and analyses workplace documentation to gather information relating to continuous improvement
Writing	1.1, 1.2, 1.4, 1.5, 2.1, 2.2, 3.1-3.3	• Develops complex texts related to continuous improvement processes according to organisational requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

		• Ensures the vocabulary, grammatical structures and conventions are appropriate for the context and target audience
Oral Communication	1.1, 1.2, 1.4, 2.2	• Presents information to a range of audiences using appropriate structure and language • Listens and comprehends information from a variety of spoken exchanges with clients, co-workers and other stakeholders • Confirms understanding through questioning and active listening
Navigate the world of work	1.1-1.3, 2.1, 2.2	• Develops strategies to enable compliance with legislative requirements and achievement of the organisation's goals • Monitors adherence to organisational policies, procedures and protocols and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.1, 1.2, 1.4, 2.2	• Identifies and uses appropriate conventions and protocols when communicating with colleagues and external stakeholders • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction and influencing direction
Get the work done	1.1, 1.2, 1.4, 1.5, 2.1, 3.1, 3.2, 3.3	• Takes responsibility for developing, implementing and monitoring systems and processes to achieve organisational outcomes • Uses analytical and lateral thinking to review current practices and develop ideas for improvement • Reflects on the ways in which digital systems and tools are used, or could be used, to achieve work goals

Assessment Requirements for BSBMGT516 Facilitate continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to establish systems and processes for continuous improvement that:

- facilitate effective contributions to and communications about continuous improvement processes and outcomes
- address sustainability requirements
- incorporate mentoring, coaching and other support to enable people to participate effectively in continuous improvement processes
- capture insights, experiences and ideas for improvements and incorporate them into the organisation's knowledge management systems and future planning.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how systems and procedures can support effective continuous improvement
- explain how continuous improvement systems and processes relate to other business systems and requirements including, knowledge management, quality, performance management and sustainability.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

BSBMGT517 Manage operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop and monitor implementation of the operational plan to provide efficient and effective workplace practices within the organisation's productivity and profitability plans.

Management at a strategic level requires systems and procedures to be developed and implemented to facilitate the organisation's operational plan.

This unit applies to individuals who manage the work of others and operate within the parameters of a broader strategic and/or business plan.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop operational plan	1.1 Research, analyse and document resource requirements and develop an operational plan in consultation with relevant personnel, colleagues and specialist resource managers 1.2 Develop and/or implement consultation processes as an

Assessment Requirements for BSBMGT517 Manage operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and implement an operational plan using a variety of information sources and consultation (including using specialist advice if required) which includes:
  - resource requirements
  - key performance indicators
  - monitoring processes
  - contingency plans
- communicate effectively with relevant stakeholders to explain the plan and supporting information, seek approvals, negotiate variations and engage work teams
- develop and implement strategies to achieve the operational plan within the organisation's policies, practices and procedures including:
  - recruiting, inducting and developing personnel
  - acquiring physical resources and services
  - protecting intellectual property
  - making variations to the plan
  - monitoring and documenting performance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe models and methods for operational plans
- explain the role of an operational plan in achieving the organisation's objectives
- explain budgeting processes

© Commonwealth of Australia, 2025 Industry Skills Australia

- list alternative approaches to developing key performance indicators to meet business objectives
- outline the legislative and regulatory context relevant to the operational plan of the organisation
- outline the organisation's policies, practices and procedures that directly relate to the operational plan.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation and regulations
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT605 Provide leadership across the organisation

Modification History

Release	Comments
Version 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to demonstrate senior leadership behaviour and personal and professional competence. Business ethics are also addressed in this unit.

It applies to individuals who have a role in inspiring and motivating others to achieve organisational goals and to model professionalism in their organisation and industry. Leadership is seen in the context of the organisational mission.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Communicate organisational mission and goals	1.1 Clarify objectives, values and standards in accordance with organisation's strategic direction 1.2 Establish linkages between organisational objectives, values and standards and the responsibilities of relevant groups and individuals 1.3 Ensure media and language used is appropriate to individuals and group circumstances

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 State clear expectations of internal groups and individuals and explain in a manner which builds commitment to the organisation 1.5 Address expectations of the organisation 1.6 Investigate incidents promptly and communicate results clearly to relevant groups and individuals
2. Influence groups and individuals	2.1 Build trust, confidence and respect of diverse groups and individuals through positive role modelling and effective communication and consultation 2.2 Embrace, resource and effectively implement improvements to organisational and workplace culture 2.3 Demonstrate understanding of the global environment and new technology in work activities 2.4 Ensure actions convey flexibility and adaptability to change and accessibility 2.5 Ensure consultation and participation in decision making occurs with relevant groups and individuals where appropriate 2.6 Ensure decision making takes into account needs and expectations of both internal and external groups 2.7 Ensure decision making occurs in accordance with risk management plans for all options, and within appropriate timeframes 2.8 Ensure that the organisation is represented positively in the media and community
3. Build and support teams	3.1 Assign accountabilities and responsibilities to teams consistent with their competencies and operational plans 3.2 Ensure teams are resourced to allow them to achieve their objectives 3.3 Empower teams and individuals through effective delegation and support for their initiatives 3.4 Create and maintain a positive work environment 3.5 Encourage teams and individuals to develop innovative approaches to the performance of work
4. Demonstrate personal and professional competence	4.1 Model ethical conduct in all areas of work and encourage others to adopt business ethics 4.2 Adapt appropriate interpersonal and leadership styles to meet particular circumstances and situations 4.3 Set and achieve personal objectives and work program

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	outcomes 4.4 Ensure self-performance and professional competence is continuously improved through engagement in a range of professional development activities 4.5 Participate regularly in industry/professional networks and groups

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	4.3, 4.4, 4.5	• Actively looks for and accepts ways to maintain and improve own skills and knowledge
Reading	1.2, 1.3, 1.6, 2.7, 4.4, 4.5	• Evaluates and integrates facts and ideas to construct meaning from a range of text types
Writing	1.1, 1.2, 1.3, 1.4, 1.6, 3.1, 4.3	• Records and reports key information related to the outcomes of the job to interact effectively and appropriately with the team • Researches, plans and prepares documentation using format and language appropriate to the audience
Oral Communication	1.1, 1.2, 1.4, 1.5, 1.6, 2.1, 2.5, 3.1, 3.3, 3.4, 3.5, 4.1, 4.2	• Participates in a variety of spoken exchanges with clients, co-workers and stakeholders using structure and language appropriate to context and audience
Navigate the world of work	1.1, 1.2, 1.5, 1.6, 2.8, 3.1, 4.1	• Works autonomously making high level decisions related to the achievement of organisational goals • Reflects on designation of roles and responsibilities and how everyone's role contributes to broader organisational goals • Appreciates the implications of ethical and other organisational responsibilities in carrying out own role
Interact with others	1.3, 1.4, 1.6, 2.1, 2.4, 3.1, 3.3, 3.4, 3.5, 4.1, 4.2	• Demonstrates sophisticated control over oral, visual and/or written formats, drawing on a range of communication practices to achieve goals • Identifies strengths and limitations of own interpersonal skills and addresses areas that would benefit from further development

© Commonwealth of Australia, 2025 Industry Skills Australia

		• Recognises the importance of building rapport in order to establish effective working relationships and inspire trust and confidence • Collaborates and cooperates with others, playing an active role in leading and facilitating effective group interaction and influencing direction • Facilitates a climate in which others feel comfortable to identify, explore and build on a variety of perspectives in order to achieve shared outcomes
Get the work done	1.1, 1.2, 1.6, 2.2-2.7, 3.1, 3.2, 3.5	• Accepts responsibility for planning and sequencing complex tasks and workload of self and others, negotiating key aspects with others taking into account capabilities, efficiencies and effectiveness • Applies problem solving processes to identify risks, evaluate options and determine solutions • Facilitates a climate in which creativity and innovation are accepted as an integral part of achieving outcomes • Actively identifies systems, devices and applications with potential to meet current and/or future needs

Assessment Requirements for BSBMGT616 Develop and implement strategic plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- consult and communicate effectively with relevant stakeholders to:
  - confirm or revise the organisation's mission, vision and values
  - validate findings of research and analysis
  - get input to and endorsement of strategic plans
  - brief relevant parties about the plan
- analyse organisation's internal and external environment to formulate strategic plans including:
  - background and research relevant to the plan
  - legislation, regulations and codes of practice, including for intellectual property
  - objectives, strategies and priorities
  - roles and responsibilities
  - performance indicators
  - timeframes
  - consideration of co-operative ventures
  - cost-benefit and risk analysis
- seek advice from appropriate experts wherever necessary
- monitor and evaluate the implementation of the plan and make refinements as appropriate
- review effectiveness of planning processes and identify opportunities for improvement.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

© Commonwealth of Australia, 2025 Industry Skills Australia

- outline the legislation, regulations and codes of practice relevant to the organisation's strategic plan.
- give examples of risks and risk management strategies relevant to strategic planning including:
  - intellectual property rights and responsibilities
  - other risks
- outline strategic planning methodologies including political, economic, social and technological (PEST) analysis and strengths, weaknesses, opportunities and threats analysis (SWOT)
- identify internal and external sources of information relevant to the organisation's market, competitors, customer base, vision, values and capabilities
- outline techniques for developing organisational values.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation, regulations, standards and codes
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT617 Develop and implement a business plan

Modification History

Release	Comments
Version 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to run a business operation and covers the steps required to develop and implement a business plan.

It applies to individuals who are running an organisation or who take a senior role in determining the effective functioning and success of the organisation. As such, they may oversee the work of a number of teams and other managers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop business plan	1.1 Review and evaluate pre-existing strategic, business and operational plan, if available 1.2 Analyse and interpret business vision, mission, values and objectives 1.3 Consult with key stakeholders 1.4 Review market requirements for the product or service, profile customer needs and research pricing options

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.5 Develop performance objectives and measures through consultation with key stakeholders 1.6 Identify financial, human and physical resource requirements for the business 1.7 Consider any permits or licences that may be required for new activity 1.8 Write business plan
2. Monitor performance	2.1 Communicate business plan to all relevant parties and ensure understanding of performance requirements and timeframes 2.2 Ensure skilled labour is available to implement plan 2.3 Test performance measurement systems and refine, if necessary 2.4 Ensure timely reports on all key aspects of the business are available, user-friendly and balanced in terms of financial and non-financial performance 2.5 Report system failures, product failures and variances to the business plan as they occur
3. Respond to performance data	3.1 Analyse performance reports against planned objectives 3.2 Review performance indicators and refine if necessary 3.3 Ensure groups and individuals contributing to under-performance are coached, and provide training where appropriate 3.4 Review system processes and work methods regularly as part of continuous improvement

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 1.7, 2.3, 3.1, 3.2, 3.4	• Gathers, interprets and analyses textual information when developing the business plan and monitoring operational performance • Utilises understanding of distinguishing structures and features of a range of text as well as recognising and

Assessment Requirements for BSBMGT617 Develop and implement a business plan

Modification History

Release	Comments
Version 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse and research business vision, mission, values, objectives, goals, competitors, financial targets, management arrangements, marketing approaches and strategic, business and operational plans
- write a business plan which includes a description of the business, products and services, financial, physical and human resource requirements, permit and licence requirements, marketing activity, financial indicators, productivity and performance targets for key result areas
- implement a business plan including ensuring skilled labour is available, and that training is provided where appropriate
- monitor and respond to business performance including evaluation of performance against key results indicators including profit and loss, community awareness or branding, environmental impact, governance, quality, sales, triple bottom line and the workforce
- consult, communicate with and report to key stakeholders including business partners, financiers, customers, staff and technical advisers
- provide an analysis of the strengths and weaknesses of a business plan.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline processes for developing business plans
- describe performance objectives and measures including key performance indicators
- identify key stakeholders.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- appropriate documentation and resources normally used in the workplace
- strategic, business and operational plans
- business information and data
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMKG513 Promote products and services to international markets

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to promote products and/or services of the business within specified international markets.

It applies to individuals with managerial responsibility including planning, coordinating, reviewing and reporting on promotional activities. Management of promotional activities may involve geographic separation from these activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan promotional activities	1.1 Access marketing plan for international business activity to inform planning of promotional activities 1.2 Access relevant information sources to support planning of promotional activities 1.3 Identify and assess promotional activities to ensure cultural appropriateness and compatibility with organisational requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 Plan and schedule promotional activities according to marketing needs of the organisation 1.5 Determine overall promotional objectives in consultation with designated individuals and groups both in international and domestic settings 1.6 Ensure timelines and costs for promotion of activities are realistic and consistent with budget resources 1.7 Develop action plans to provide details of products and/or services being promoted
2. Coordinate promotional activities	2.1 Identify and prepare personnel and resources to support promotional activities, both in international and domestic settings, to facilitate achievement of promotional goals 2.2 Identify, agree on and allocate roles and responsibilities of overseas and domestic personnel for delivery of promotional activities 2.3 Establish and conduct relationships with targeted groups in overseas settings in a manner which enhances the positive image of the organisation 2.4 Supervise and support roles and responsibilities of overseas personnel involved in promotional activities 2.5 Use international business networks to assist in implementing promotional activities
3. Review and report on promotional activities	3.1 Analyse audience feedback and data to determine impact of promotional activity on delivery of products and/or services 3.2 Assess effectiveness of planning processes to identify possible improvements for future international promotional activities 3.3 Collect and provide feedback to personnel and agencies involved in promotional activity both in international and domestic settings 3.4 Analyse costs and timelines to evaluate benefits accruing from internationally based promotional activities 3.5 Prepare conclusions and recommendations from verifiable evidence and provide constructive advice on future directions for internationally based promotional activities

© Commonwealth of Australia, 2025 Industry Skills Australia

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 1.6, 3.1, 3.4	• Identifies, analyses and evaluates complex textual information including audience feedback to determine business achievements
Writing	1.4, 1.7, 3.3, 3.5	• Produces action plans, complex reports and other documentation using clear, accurate and relevant language and appropriate grammatical structure
Oral Communication	1.5, 2.1-2.5, 3.1, 3.3, 3.5	• Articulates ideas and recommendations clearly using language and technical references suitable to audience • Uses active listening and questioning to confirm understanding
Numeracy	1.6, 3.4	• Uses mathematical formulas to interpret expenditure and business timelines
Navigate the world of work	1.1, 1.3, 1.4	• Monitors adherence to organisational policies and objectives and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	2.1, 2.3-2.5, 3.3, 3.5	• Begins to cultivate relationships with people with the knowledge, skills and influence to get things done or provide support, building formal and informal networks within and beyond immediate work context • Recognises importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate with whom, why and how
Get the work done	1.1-1.7, 2.1, 2.2, 3.1, 3.2, 3.4	• Develops plans and uses effective time management and organisational skills to complete tasks with an awareness of how they may contribute to longer-term operational and strategic goals • In more complex, non-routine situations, uses formal decision-making processes, setting or clarifying goals, gathering information and identifying and evaluating several choices against a limited set of criteria • When dealing with complex issues identifies cause of the problem, and uses analytical processes to generate possible solutions • Monitors outcomes, considering results from a range of perspectives and identifying key concepts and principles that may be adaptable to future situations

Assessment Requirements for BSBMKG513 Promote products and services to international markets

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- plan, coordinate and review promotional activities undertaken in an international context
- produce a report detailing activities and recommendations to inform and guide future promotional work.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify available overseas media
- summarise cultural characteristics of groups within target market
- list relevant international business networks
- outline marketing strategies and promotional activities suitable for international markets.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- office equipment and resources
- feedback on activity from overseas personnel/clients
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG409 Apply project scope management techniques

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to contribute to the control of a project's scope by assisting with identifying its objectives, deliverables, constraints, assumptions and outcomes; and by applying controls once the project has commenced.

It applies to individuals who are project practitioners working in a project support role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Contribute to defining project scope	1.1 Review project initiation documentation and assist in identifying project objectives and requirements 1.2 Contribute to identifying project deliverables 1.3 Contribute to identifying measurable outcomes to enable evaluation of project performance 1.4 Contribute to developing and documenting the scope management plan 1.5 Assist in obtaining agreement to scope from relevant project

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	authority
2. Apply project scope controls	2.1 Undertake work according to agreed project scope management plan and by using established change control procedures and performance measurement procedures 2.2 Communicate instances of non-compliance with overall scope to the project manager and other team members
3. Contribute to review of scope controls	3.1 Measure progress to determine potential, perceived and actual scope changes 3.2 Appropriately report scope changes 3.3 Assist in review of project outcomes to determine effectiveness of initial and subsequent scope management approaches

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1	• Interprets and analyses complex texts
Writing	1.4, 1.5, 3.2	• Develops and amends plans and associated documentation using appropriate organisational formats and vocabulary
Oral Communication	1.2-1.5, 2.2	• Interacts effectively in verbal exchanges, using clear language to convey information, and active listening and questioning to clarify understanding
Numeracy	1.3, 3.1	• Selects and applies a range of mathematical and problem-solving strategies to develop timelines and monitor progress
Interact with others	1.2-1.5, 2.2	• Uses appropriate communication practices in a range of work contexts • Collaborates and cooperates with others to achieve shared goals
Get the work done	2.1, 3.1, 3.2, 3.3	• Plans and organises tasks required to monitor and report on project implementation • Analyses outcomes to identify future

Assessment Requirements for BSBPMG409 Apply project scope management techniques

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- contribute to delineating and controlling project scope
- record project scope management plan
- interpret and follow project initiation documentation for purposes of documenting project scope.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list components of a project scope management plan
- identify and describe factors likely to impact project scope
- outline formal change-control processes
- identify and discuss methods for measuring work outcomes and progress against plans
- identify and discuss methods for segmenting and documenting a work breakdown structure
- explain procedures for reporting a change in scope
- describe types of project initiation documentation.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- project documentation which includes information about project scope
- case studies and, where possible, real situations.

BSBPMG416 Apply project procurement procedures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to assist with procurement for a project. It involves identifying procurement requirements, assisting with supplier selection, conducting procurement activities, and assisting with procurement finalisation activities for the project.

It applies to individuals who are project practitioners working in a project support role. The individual may be operating in a large or small organisation, and applying skills in the context of enterprise projects.

The project practitioner may be part of a project team under the direction of a project manager, or may work as part of a smaller scale, self-directed team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assist with procurement planning	1.1 Contribute to establishing procurement requirements to achieve project objectives 1.2 Act under delegated authority to contribute to development of

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	procurement-management plan 1.3 Contribute to developing procurement documentation
2. Contribute to supplier selection process	2.1 Gather and evaluate information on potential suppliers 2.2 Make recommendations to assist in selection of preferred suppliers 2.3 Contribute to establishing agreed terms and conditions with preferred suppliers 2.4 Identify and act in line with probity and project governance constraints 2.5 Assist in developing contractual documentation
3. Conduct procurement activities	3.1 Test and accept supplies to ensure they are fit for purpose in both quality and suitability 3.2 Undertake procurement activities and maintain information in line with reporting, confidentiality and audit requirements 3.3 Receive, reconcile and register supplies according to established procedures 3.4 Monitor and control suppliers according to contractual supply documentation
4. Assist in finalising procurement activities	4.1 Assist in finalising procurement agreements 4.2 Assist in review of project outcomes using available records to determine effectiveness of procurement activities 4.3 Contribute to identifying lessons learned and possible improvements to procurement management

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1, 2.4, 3.2, 3.3, 3.4, 4.2	• Applies appropriate strategies to construct meaning from a variety of texts
Writing	1.1, 1.3, 2.2, 2.3,	• Develops informative project documents using vocabulary and structure appropriate to audience,

Assessment Requirements for BSBPMG416 Apply project procurement procedures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- document procurement requirements for a workplace project, including clear descriptions of product and service, quality specifications, resource identification, supply and delivery requirements and supply and engagement metrics
- apply procurement-management procedures to a workplace project, including selection criteria, testing and accepting, monitoring and receiving supplies
- finalise procurement agreements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe procurement-management policy, processes and procedures
- explain the procurement documentation requirements
- describe the components of contractual documentation and the legal obligations of all parties
- explain the process used to select preferred contractors
- identify and describe project procurement-management tools and techniques.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- examples of project procurement documentation
- examples of procurement tasks and activities

© Commonwealth of Australia, 2025 Industry Skills Australia

- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG512 Manage project time

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage time during projects. It involves determining and implementing the project schedule, and assessing time management outcomes.

It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine project schedule	1.1 Develop work breakdown structure with sufficient detail to enable effective planning and control 1.2 Estimate duration and effort, sequence and dependencies of tasks, to achieve project deliverables 1.3 Use project scheduling tools and techniques to identify schedule impact on project time management, resource requirements, costs and risks 1.4 Contribute to achieving an agreed schedule baseline and

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	communication of the schedule to stakeholders
2. Implement project schedule	2.1 Implement mechanisms to measure, record and report progress of activities according to agreed schedule 2.2 Conduct ongoing analysis to identify baseline variance 2.3 Analyse and forecast impact of changes to the schedule 2.4 Review progress throughout project life cycle and implement agreed schedule changes 2.5 Develop responses to potential or actual schedule changes and implement them to maintain project objectives
3. Assess time management outcomes	3.1 Review schedule performance records to determine effectiveness of time management activities 3.2 Identify and document time management issues and recommend improvements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1-2.4, 3.1	• Identifies, interprets and analyses textual information obtained from a range of sources
Writing	1.1, 2.1, 2.4, 2.5, 3.2	• Drafts and develops documentation required for project scheduling and reporting using appropriate formats and language
Oral Communication	1.4, 2.5	• Participates in a verbal exchanges using clear and detailed language and appropriate non-verbal features to convey expectations and advise others on progress
Numeracy	1.1, 1.2, 1.3, 1.4, 2.1-2.5	• Calculates time requirements for project scheduling • Uses basic mathematical formula to determine costs and other necessary resources
Interact with others	1.4, 2.5	• Actively identifies requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience
Get the work	1.1-1.4, 2.1-2.5, 3.1,	• Plans and schedules complex activities, monitors

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop a project schedule using project management tools and techniques
- implement, analyse and monitor a project schedule
- conduct a review of project scheduling and recommend improvements for the future.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain estimation techniques to determine task duration and resource effort
- explain procedures for identifying critical path
- explain procedures for managing project baselines, establishment and variance
- summarise project life cycle phases and describe each phase
- explain best-practice time management methodologies, their capabilities, limitations, applications and outcomes
- summarise key tools for project scheduling
- explain work breakdown structures and application to project schedules.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to workplace documentation, including:

- examples of project schedules, reports and feedback from project stakeholders regarding time management
- case studies and, where possible, real situations
- interaction with others.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG514 Manage project cost

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify, analyse and refine project costs to produce a budget, and to use this budget as the principal mechanism to control project cost.

It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine project costs	1.1 Determine resource requirements for individual tasks identified in the work breakdown structure, with input from stakeholders and guidance from others 1.2 Estimate project costs to enable project budget to be prepared within agreed tolerances 1.3 Develop a project budget 1.4 Develop a cost-management plan, within delegated authority, to ensure clarity of understanding and ongoing management of

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	project finances
2. Monitor and control project costs	2.1 Implement agreed financial-management processes and procedures to monitor actual expenditure against budget 2.2 Select and use cost-analysis methods and tools to identify cost variations and evaluate alternative actions 2.3 Implement and monitor agreed actions to maintain financial objectives 2.4 Provide accurate and timely financial reports
3. Complete cost-management processes	3.1 Conduct appropriate activities to signify financial completion 3.2 Review project outcomes using available records to determine effectiveness of project cost management 3.3 Review cost-management issues and document improvements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.2, 3.2, 3.3	• Interprets and analyses textual information from a range of sources • Reviews, compares and contrasts information related to budget
Writing	1.3, 1.4, 2.4, 3.3	• Drafts and develops documents using appropriate format and language for context
Oral Communication	1.1	• Participates in verbal exchanges using clear language and appropriate tone and syntax to provide relevant information • Uses active listening and questioning to elicit views and opinions of others
Numeracy	1.1-1.4, 2.1, 2.2, 2.4, 3.1, 3.2	• Uses mathematical formulae to calculate resources against predetermined budgets, solve variances and finalise project costs
Navigate the world of work	1.4, 2.1	• Adheres to organisational policies and procedures and understands responsibilities of own role

© Commonwealth of Australia, 2025 Industry Skills Australia

Interact with others	1.1	• Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to confirm requirements, seek guidance or share information
Get the work done	1.1, 1.3, 1.4, 2.2, 2.3, 2.4, 3.2, 3.3	• Plans and schedules complex activities, monitors implementation and manages relevant communication • Monitors actions against goals, adjusting plans and resources where necessary • Uses analytical skills to review and evaluate process and decide on future improvements • Uses digital applications to access, organise, integrate and share relevant information in effective ways

Assessment Requirements for BSBPMG514 Manage project cost

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- work closely with others to determine resources against budgetary frameworks
- prepare a budget and cost-management plan for a project
- monitor costs across a project's life cycle including solving cost variations and analysing possible alternatives
- record expenditure, create accurate financial reports and review cost-management processes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain appropriate budgeting processes, tools and techniques
- describe methods and tools for costing and cost analysis
- explain strategies for managing costs and their application in different situations
- outline processes for reviewing costs against outcomes
- summarise key organisational policies and procedures applicable to this role.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- workplace documentation, including budgets and other financial documents
- case studies and, where possible, real situations.

BSBPMG515 Manage project human resources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage human resources related to projects. It involves planning for human resources, implementing personnel training and development, and managing the project team.

It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan human resources relevant to projects	1.1 Determine resource requirements for individual tasks to determine required project personnel levels and competencies 1.2 Establish project organisation and structure to align individual and group competencies with project tasks 1.3 Allocate personnel to the project to meet planned work outputs throughout project timeline 1.4 Apply human resources management (HRM) methods, techniques and tools to support engagement and performance of

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	personnel
2. Implement project personnel training and development	2.1 Negotiate, define and communicate clear project role descriptions 2.2 Identify, plan and implement ongoing development and training of project team members to support personnel and project performance 2.3 Measure individuals' performance against agreed criteria and initiate actions to overcome shortfalls in performance
3. Lead project team	3.1 Implement processes and take action to improve individual performance and overall project effectiveness 3.2 Monitor and report, for remedial action, internal and external influences on individual and project team performance and morale 3.3 Implement procedures for interpersonal communication, counselling, and conflict resolution to maintain a positive work environment 3.4 Identify and manage inter-project and intra-project resource conflict to minimise impact on achievement of project objectives
4. Finalise human resource activities related to projects	4.1 Disband project team according to organisational policies and procedures 4.2 Identify and document human resource issues and recommended improvements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.3, 3.3, 4.1	• Interprets textual information obtained from a range of sources and determines how content may be applied to requirements
Writing	1.1-1.3, 2.1-2.3, 3.1, 3.2, 4.2	• Develops plans, role descriptions and reports using clear, specific and industry-related terminology, appropriate structures and conventions • Documents personnel requirements, results of performance measurements and improvement

© Commonwealth of Australia, 2025 Industry Skills Australia

		recommendations
Oral Communication	1.3, 1.4, 2.1, 3.1, 3.3, 3.4	• Participates in verbal exchanges using clear language and appropriate non-verbal features • Uses active listening and questioning to elicit views and opinions of others and confirm understanding
Numeracy	1.1, 2.3, 3.4	• Uses mathematical formulae to calculate resources against project requirements and to measure work output against predetermined criteria
Navigate the world of work	3.3, 4.1	• Understands and adheres to organisational policies and procedures
Interact with others	1.3, 1.4, 2.1, 2.3, 3.1, 3.3, 3.4	• Collaborates with co-workers to negotiate and facilitate shared understanding of individual roles and group objectives • Manages workplace conflict by recognising contributing factors and implementing resolution strategies
Get the work done	1.1-1.4, 2.2, 2.3, 3.1, 3.2, 3.4, 4.2	• Develops plans to identify project responsibilities and needs, and allocate project personnel, with an awareness of how this contributes to overall project goals • Uses analytical skills to review performance and decide on actions needed • Reflects on how variables impact outcomes to gain insights into concepts that may be adapted in future situations

BSBPMG516 Manage project information and communication

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to link people, ideas and information at all stages in the project life cycle. Project communication management ensures timely and appropriate generation, collection, dissemination, storage and disposal of project information through formal structures and processes.

It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan information and communication processes	1.1 Identify, analyse and document information requirements, with input from stakeholders, as the basis for communication planning 1.2 Develop, within delegated authority, an agreed communication management plan to support achievement of project objectives 1.3 Establish and maintain a designated project-management information system to ensure quality, validity, timeliness and integrity of information and communication

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Implement project information and communication processes	2.1 Manage generation, gathering, storage, retrieval, analysis and dissemination of information by project staff and stakeholders 2.2 Implement, modify, monitor and control designated information-validation processes to optimise quality and accuracy of data 2.3 Implement and maintain appropriate communication networks 2.4 Identify and resolve communication and information-management system issues
3. Assess information and communication outcomes	3.1 Finalise and archive records according to agreed project information ownership and control requirements 3.2.Review project outcomes to determine effectiveness of management information and communication processes and procedures 3.3 Identify and document lessons learned and recommended improvements for application in future projects

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 3.1, 3.2	• Interprets and analyses complex texts from a range of sources
Writing	1.1-1.3, 2.1, 2.2, 3.1, 3.3	• Develops project documents using vocabulary, structure and conventions appropriate to text
Oral Communication	1.1, 1.2	• Participates in verbal exchanges using clear language and appropriate non-verbal features • Uses active listening and questioning to confirm understanding and agreement
Navigate the world of work	1.2	• Understands responsibilities and boundaries of own role
Interact with others	1.1, 1.2	• Actively identifies requirements of important communication exchanges, selecting appropriate channels, format and content to suit purpose and audience

© Commonwealth of Australia, 2025 Industry Skills Australia

Get the work done	1.1-1.3, 2.1, 2.2, 2.3, 2.4, 3.2	• Sequences and schedules complex activities, monitors implementation and manages relevant communication • Uses problem-solving techniques to analyse and resolve issues • Evaluates outcomes of decisions to identify opportunities for improvement • Uses digital tools to access, organise and analyse complex data

Assessment Requirements for BSBPMG516 Manage project information and communication

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop a communication management plan and an information system for a specific project
- implement a project information system with a systematic approach to storage, searching, retrieval and archiving of relevant information
- implement and maintain communication processes
- review project outcomes and document suggestions for improvements to managing project information and communication for future projects.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain alternative communication methods and media and their application on various projects
- identify effective project-management information systems and their various applications
- explain methods used to evaluate information systems and communication processes.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- project communication and information management documentation
- examples of how communication was managed on projects
- case studies and, where possible, real situations.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG518 Manage project procurement

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.2. Version created to correct missing elements
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to undertake procurement in projects.

It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine procurement requirements	1.1 Identify procurement requirements with input from stakeholders as basis for procurement planning 1.2 Establish and maintain, within delegated authority, agreed procurement management plan
2. Establish agreed	2.1 Obtain information from suppliers capable of fulfilling

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
procurement processes	procurement requirements 2.2 Determine or adopt established selection processes and selection criteria, and communicate to vendors to ensure transparency 2.3 Obtain relevant approvals for procurement processes to be used
3. Conduct procurement activities	3.1. Identify and act according to ***probity and project governance constraints*** 3.2. Communicate agreed proposals and/or specifications to prospective vendors to ensure clarity of understanding of project objectives 3.3. Solicit vendor responses according to proposal requirements 3.4. Evaluate responses and select preferred vendors according to current legal requirements and agreed selection criteria 3.5. Negotiate with preferred contractor or supplier, to agree on terms and conditions of supply
4. Implement and monitor procurement	4.1. Implement established procurement management plan and make ***modifications*** in line with agreed delegations 4.2. Review progress and manage agreed variations to ensure timely completion of tasks and resolution of conflict within the legal framework of the supply agreement 4.3. Identify and report procurement management issues and implement agreed remedial actions to ensure project objectives are met
5. Manage procurement finalisation procedures	5.1. Conduct finalisation activities to ensure vendor deliverables meet contracted requirements 5.2. Review project outcomes using available procurement records and information to determine effectiveness of procurement processes and procedures 5.3. Document lessons learned and recommended improvements for application to future projects

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Industry Skills Australia

Skill	Performance Criteria	Description
Reading	1.1, 2.1, 3.1, 3.4, 4.1, 5.2	• Interprets, evaluates and critiques ideas and information from a range of complex texts
Writing	1.2, 2.2, 2.3, 3.2, 3.4, 4.1, 4.2, 4.3, 5.2, 5.3	• Develops plans using vocabulary, structure and conventions appropriate to text • Creates documents for internal and external use, using vocabulary and structure suitable for audience and context • Drafts requests for approvals using organisational formats
Oral Communication	1.1, 2.1, 2.2, 2.3, 3.2, 3.5, 4.2	• Participates in verbal exchanges using clear language to seek and provide information, or request approvals • Uses active listening and questioning techniques to confirm understanding
Numeracy	1.1, 4.2	• Recognises cost parameters and interprets numerical information accordingly • Calculates changes to timelines resulting from changes to plan
Navigate the world of work	1.2, 3.1, 3.4, 4.1	• Understands responsibilities and boundaries of own role
Interact with others	1.1, 2.1, 2.2, 2.3, 3.2, 3.3, 3.5, 4.2	• Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information • Uses interpersonal skills to negotiate acceptable outcomes
Get the work done	1.1,1.2, 2.1, 3.1, 3.3, 3.4, 4.1, 4.2, 4.3, 5.1, 5.2	• Plans and organises complex activities, monitors implementation and manages relevant communication • Resolves problems and makes decisions based on analysis of options against set criteria and targets

Assessment Requirements for BSBPMG518 Manage project procurement

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.2. Version created to correct missing elements
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- work with others to determine procurement requirements and produce a procurement management plan for a project
- carry out procurement and contracting activities according to agreed processes
- monitor activities across a project's life cycle and resolve issues that could affect achievement of project objectives
- create and maintain procurement records and documentation according to requirements of project and organisation
- document a review of procurement management processes and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the general features of a procurement management plan
- summarise procurement procedures and required documentation
- identify criteria that could be used to select vendors or suppliers
- explain the general conditions and legal obligations of contracts as they relate to project procurement
- explain probity and project governance constraints that relate to project procurement in a project and industry context.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- workplace documentation relevant to procurement and contracts
- case studies or, where possible, real situations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPMG522 Undertake project work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to undertake a straightforward project or a section of a larger project. It covers developing a project plan, administering and monitoring the project, finalising the project and reviewing the project to identify lessons learned for application to future projects.

This unit applies to individuals who play a significant role in ensuring a project meets timelines, quality standards, budgetary limits and other requirements set for the project.

The unit does not apply to specialist project managers. For specialist project managers, the other units of competency in the project management field (BSBPMG) will be applicable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Define project	1.1 Access project scope and other relevant documentation 1.2 Define project stakeholders 1.3 Seek clarification from delegating authority of issues related to

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	project and project parameters 1.4 Identify limits of own responsibility and reporting requirements 1.5 Clarify relationship of project to other projects and to the organisation's objectives 1.6 Determine and access available resources to undertake project
2. Develop project plan	2.1 Develop project plan in line with the project parameters 2.2 Identify and access appropriate project management tools 2.3 Formulate risk management plan for project, including Work Health and Safety (WHS) 2.4 Develop and approve project budget 2.5 Consult team members and take their views into account in planning the project 2.6 Finalise project plan and gain necessary approvals to commence project according to documented plan
3. Administer and monitor project	3.1 Take action to ensure project team members are clear about their responsibilities and the project requirements 3.2 Provide support for project team members, especially with regard to specific needs, to ensure that the quality of the expected outcomes of the project and documented time lines are met 3.3 Establish and maintain required recordkeeping systems throughout the project 3.4 Implement and monitor plans for managing project finances, resources and quality 3.5 Complete and forward project reports as required to stakeholders 3.6 Undertake risk management as required to ensure project outcomes are met 3.7 Achieve project deliverables
4. Finalise project	4.1 Complete financial recordkeeping associated with project and check for accuracy 4.2 Ensure transition of staff involved in project to new roles or reassignment to previous roles 4.3 Complete project documentation and obtain necessary sign-offs for concluding project
5. Review project	5.1 Review project outcomes and processes against the project scope and plan

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	5.2 Involve team members in the project review 5.3 Document lessons learned from the project and report within the organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 3.4, 3.5, 4.1, 4.3, 5.1	• Organises, evaluates and critiques ideas and information from a range of complex texts
Writing	2.1, 2.3, 2.6, 3.3, 3.5, 4.1, 4.3, 5.3	• Develops plans, reports and recommendations using vocabulary, structure and conventions appropriate to text • Establishes and maintains records according to organisational requirements
Numeracy	1.6, 2.4, 3.4, 4.1	• Uses formal and some informal, oral and written mathematical language and representation to prepare and communicate budgetary and financial information
Oral communication	2.5, 5.2	• Participates in verbal discussions using clear language and appropriate features to present or seek information • Using listening and questioning skills to seek information and confirm understanding
Navigate the world of work	1.3, 1.4, 2.3, 3.1, 4.3	• Recognises and responds to organisational and legislative/regulatory requirements
Interact with others	2.5, 3.1, 3.2, 4.2, 5.2	• Selects and uses appropriate communication protocols and practices to ensure shared understanding of project roles and expectations • Uses collaborative techniques to engage stakeholders in consultations and negotiations
Get the work done	1.2, 1.5, 1.6, 2.1, 2.2, 2.3, 2.6, 3.1-3.7, 4.1, 4.2, 4.3, 5.1, 5.3	• Develops and implements plans to manage projects that involve diverse stakeholders with potentially competing demands • Systematically gathers and analyses all relevant information and evaluates options to make informed decisions • Evaluates outcomes of decisions to identify

© Commonwealth of Australia, 2025 Industry Skills Australia

		opportunities for improvement • Uses digital technologies and applications to access, organise and share information

Assessment Requirements for BSBPMG522 Undertake project work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- define the parameters of the project including:
  - project scope
  - project stakeholders, including own responsibilities
  - relationship of project to organisational objectives and other projects
  - reporting requirements
  - resource requirements
- use project management tools to develop and implement a project plan including:
  - deliverables
  - work breakdown
  - budget and allocation of resources
  - timelines
  - risk management
  - recordkeeping and reporting
- consult and communicate with relevant stakeholders to generate input and engagement in planning, implementing and reviewing the project
- provide support to team members to enable them to achieve deliverables and to transition them as appropriate at completion of the project
- finalise the project including documentation, sign-offs and reporting
- review and document the project outcomes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

© Commonwealth of Australia, 2025 Industry Skills Australia

- give examples of project management tools and how they contribute to a project
- outline types of documents and other sources of information commonly used in defining the parameters of a project
- explain processes for identifying and managing risk in a project
- outline the organisation's mission, goals, objectives and operations and how the project relates to them
- explain the organisation's procedures and processes that are relevant to managing a project including:
  - lines of authority and approvals
  - quality assurance
  - human resources
  - budgets and finance
  - recordkeeping
  - reporting
- outline the legislative and regulatory context of the organisation in relation to project work, including work health and safety (WHS) requirements.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG604 Direct cost management of a project program

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to analyse, coordinate, and refine budgets of multiple projects contributing to an overall program budget. It covers directing project budget development, managing program costs and directing financial completion of projects.

It applies to individuals who are program managers, managing a suite of projects (a program).

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Direct project budget development	1.1 Direct project managers to determine resource requirements for individual tasks, in consultation with appropriate stakeholders, to develop project budgets which contribute to the program budget 1.2 Direct project cost estimations to enable budgets and cost management processes to be developed for project life cycles 1.3 Direct and authorise cost strategies and cost management plans to ensure clarity of understanding and ongoing management of project finances and the program budget

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Manage program costs	2.1 Develop and maintain cost management systems to direct monitoring of actual expenditure and to control costs throughout multiple project life cycles and for the program 2.2 Conduct analysis, evaluate options and implement responses to project cost variations to maintain control over changing financial and program objectives 2.3 Monitor internal and external influences on program costs and, where necessary, seek approval from business management for changes to the approved program budget
3. Direct financial completion	3.1 Provide direction for project finalisation activities to achieve integrated financial and physical project completion within program expectations 3.2 Review project outcomes from available records at the finalisation of each project, and analyse information to determine effectiveness of cost management systems 3.3 File program lessons learnt as a resource for future reference and, where necessary, refer to higher project authority for application in planning strategic direction changes and business outcomes for future projects

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 2.2, 3.1, 3.2	• Organises, evaluates and critiques ideas and information from a range of complex texts
Writing	1.3, 2.1-2.3, 3.2, 3.3	• Develops a range of project related documents using appropriate format, vocabulary and structure
Oral Communication	1.1, 1.2, 1.3, 3.1	• Participates in discussions and presents information using language and features appropriate to the audience
Numeracy	1.1-1.3, 2.1-2.3, 3.1, 3.2	• Analyses and synthesises highly embedded mathematical information • Selects from, and flexibly applies, a wide range of highly developed mathematical and problem-solving strategies and techniques

© Commonwealth of Australia, 2025 Industry Skills Australia

Interact with others	1.1-1.3, 3.1	• Collaborates with others to achieve joint outcomes, playing a lead role in facilitating successful outcomes and influencing direction
Get the work done	1.1-1.3, 2.1-2.3, 3.2, 3.3	• Develops and implements plans for complex activities that contribute to overall project goals • Reviews priorities and performance during implementation, identifying and addressing issues and reallocating resources • Monitors outcomes of decisions, considering results from a range of perspectives, and identifying key concepts and principles that may be adaptable to future situations • Uses digital tools to access and organise complex data and analyse multiple sources of information for strategic purposes

Assessment Requirements for BSBPMG604 Direct cost management of a project program

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- direct project budget development, including:
  - directing project managers to develop project budgets which contribute to program budget
  - directing project cost estimation
  - directing and authorising cost strategies and cost management plans
- manage program costs, including:
  - developing and maintaining cost management systems
  - conducting analysis, evaluating options and implementing responses to project cost variations
  - monitoring internal and external influences on program costs and seeking approval for budget changes
- direct financial completion, including:
  - providing direction for project finalisation activities
  - reviewing and analysing project outcomes
  - filing and referring program lessons learnt to higher program authority for future application.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain regulatory and legislative financial reporting requirements
- explain methods for costing and estimating project resources
- explain methods for monitoring and controlling project expenditure.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- financial documentation and files
- feedback from project teams and other stakeholders as to how program costs were managed.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG606 Direct human resources management of a project program

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to direct human resource organisation and staffing across a program, direct project managers in relation to staff performance, and to provide leadership within the program.

It applies to individuals who are program managers, managing a suite of projects (a program).

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Direct human resources management planning	1.1 Direct human resource requirement analysis for projects to determine numbers and skill levels required for overall program 1.2 Direct stakeholder assessment to establish a basis for stakeholder management within projects and overall program 1.3 Direct responsibility assignment for project activities and tasks, and establish authorisation protocols
2. Manage program	2.1 Determine resource requirements for projects in consultation

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
organisation and staffing	with project managers and appropriate stakeholders, to establish program staffing levels, allocation to projects and required competencies 2.2 Direct project organisation and structure to optimise alignment of individual and group competencies within projects 2.3 Direct recruitment of staff for allocation to projects or reallocation within the organisation, within agreed delegated authority, to meet competency requirements throughout the program 2.4 Direct project managers' use of human resources management (HRM) methods, techniques and tools, and modify for program requirements 2.5 Utilise organisational HRM system and HRM processes across projects
3. Direct project staff performance management	3.1 Obtain agreement on performance measurement criteria for clarity of roles and responsibilities and ongoing assessment 3.2 Ensure systems for ongoing development and training of personnel across the program are established and implemented by project managers 3.3 Measure individuals' performance against agreed criteria and authorise actions to overcome shortfalls in performance and encourage career progression
4. Provide overall leadership to project teams	4.1 Manage a system of continuous improvement of staff to enhance program effectiveness 4.2 Analyse individual and team performance and morale levels and take action where necessary 4.3 Direct procedures for interpersonal communication, counselling and conflict resolution by project managers, and review results to maintain and promote a positive working environment 4.4 Identify and positively manage intra-organisational and intra-project conflict to maximise achievement of program objectives 4.5 Aggregate HRM lessons learnt for application in planning and, where appropriate, pass on information to others for consideration in strategic planning and direction

© Commonwealth of Australia, 2025 Industry Skills Australia

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 3.3	• Organises, evaluates and critiques ideas and information from complex texts • Draws on a broad range of strategies to build and maintain understanding throughout complex texts
Writing	1.3, 2.1, 2.2, 2.3, 3.1, 3.3, 4.5	• Develops a range of project related documents using appropriate format, vocabulary and structure
Oral Communication	1.1, 1.2, 1.3, 2.1, 2.2, 2.3, 2.4, 4.2, 4.3, 4.4	• Provides information using language and features appropriate to the audience • Use listening and questioning skills to confirm or clarify understanding
Numeracy	1.1, 2.1, 2.2, 3.1, 4.2	• Extracts, interprets and evaluates mathematical information in organisational and project documentation • Compares and contrasts performance against criteria
Interact with others	1.1, 1.2, 1.3, 2.1, 2.2, 2.3, 2.4, 4.2, 4.3, 4.4	• Actively identifies requirements of important communication exchanges, selecting appropriate channels, format and content to suit purpose and audience • Plays a lead role in situations requiring effective collaborative skills, demonstrating ability to influence and motivate others • Recognises potential for conflict and takes steps to stop an issue from escalating
Get the work done	1.1-1.3, 2.2-2.5, 3.1, 3.3, 4.1, 4.2	• Develops plans for complex activities that contribute to overall project goals and involve multiple stakeholders • Regularly reviews priorities and performance during implementation, identifying and addressing issues, and reallocating resources • Identifies issues and uses analytical techniques to generate and evaluate possible solutions

Assessment Requirements for BSBPMG606 Direct human resources management of a project program

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- direct human resources management (HRM) planning, including:
  - directing project analysis to determine program requirements
  - directing stakeholder assessment
  - directing responsibility assignment and establishing authorisation protocols
- manage program organisation and staffing, including:
  - determining project resource requirements
  - directing project organisation and structure
  - directing staff recruitment
  - directing project managers' use of HRM methods, techniques and tools
  - utilising organisational HRM system and processes across projects
- direct project staff performance management, including:
  - obtaining agreement on measurement criteria
  - ensuring systems for ongoing development and training
  - measuring individuals' performance and authorising relevant actions
- provide overall leadership to project teams, including:
  - managing a continuous improvement system
  - analysing and taking action on individual and team performance and morale levels
  - directing procedures for interpersonal communication, counselling and conflict resolution by project managers, and reviewing results
  - identifying and positively managing intra-organisational and intra-project conflict
  - aggregating and passing on HRM lessons learnt.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

© Commonwealth of Australia, 2025 Industry Skills Australia

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain human resource management methods, techniques and tools
- identify relevant legislation
- describe models of performance management and performance development.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- workplace HRM documentation
- feedback from project teams and stakeholders as to how human resource management was handled.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG609 Direct procurement and contracting for a project program

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to direct the management of contracting and procurement activities across projects and programs. It covers setting up the contracting process, directing management of contract and procurement processes, and finalising contracts for projects across the program.

It applies to individuals who are program managers, managing a suite of projects (a program).

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Direct planning for project contracting and procurement	1.1 Direct identification of product specifications and procurement requirements for procurement and contract planning, in consultation with appropriate stakeholders 1.2 Direct development of procurement strategies, methods and management plans in line with project objectives across the program
2. Direct set up of	2.1 Direct project managers to source organisations that meet

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
contract and procurement process	procurement requirements 2.2 Establish selection processes and selection criteria, in consultation with stakeholders, and arrange for communication to prospective contractors 2.3 Ensure contract and procurement actions accord with organisation and program objectives
3. Direct management of contract and procurement process	3.1 Provide direction for identification of requirements of proposals and arrange communication to prospective contractors 3.2 Ensure responses are evaluated and preferred contractors are selected in accordance with agreed selection processes 3.3 Direct negotiation of contract terms and conditions between client and preferred contractor
4. Direct management of contracts	4.1 Direct management of contract and procurement activities in accordance with program contract and procurement management guidelines 4.2 Provide direction for regular reviews from available records and information, and ensure variances are analysed and changes for implementation agreed on 4.3 Ensure project managers work within legal and organisational framework for contracts 4.4 Identify potential, perceived and actual contractual conflicts and approve remedial actions to minimise disruption
5. Direct finalisation of contracts	5.1 Direct finalisation activities for management of contract deliverables in accordance with contractual project and program requirements 5.2 Direct review and analysis of project outcomes to determine effectiveness of contract and procurement processes and procedures 5.3 Aggregate and use lessons learnt for application in planning and implementation of later projects within the program and, where appropriate, pass on to organisational management for use in strategic planning

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Industry Skills Australia

Skill	Performance Criteria	Description
Reading	2.3, 4.1, 4.3, 5.2	• Identifies, interprets and analyses information from complex sources, including legislation
Writing	1.2, 2.2, 3.1, 3.2, 4.2, 4.4, 5.2, 5.3	• Develops and documents strategies and plans using organisational format and specific terminology • Documents outcomes according to organisational requirements
Oral Communication	1.1, 1.2, 2.1, 2.2, 3.3, 4.4, 5.2	• Provides direction and contributes to discussions using language and features appropriate to the audience
Numeracy	1.2, 4.1, 4.2, 5.2	• Interprets and evaluates mathematical information in a broad range of texts • Selects from, and flexibly applies, a range of mathematical and problem-solving strategies and techniques to compare and contrast effectiveness of processes
Navigate the world of work	2.3, 4.3	• Monitors adherence to organisational, legal and regulatory requirements
Interact with others	1.1, 1.2, 2.1, 2.2, 3.3, 4.4, 5.2	• Plays a lead role in situations requiring effective collaboration, demonstrating high-level influencing skills and ability to direct others • Uses negotiation skills to set up contracts, to agree prices and terms, and to resolve disputes
Get the work done	1.1, 2.1-2.3, 3.2, 4.1, 4.2, 5.1, 5.2	• Develops flexible plans for complex, high-impact activities with strategic implications, involving a diverse range of stakeholders with potentially competing demands • Uses analytical processes to decide on a course of action, establishing criteria for deciding between options, and seeking input and advice from others before taking action, when necessary • Monitors outcomes of decisions, considering results from a range of perspectives, and identifying key concepts and principles that may be adaptable to future situations

BSBPUR301 Purchase goods and services

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to determine purchasing requirements and make and receive purchases.

It applies to individuals who work under a level of supervision and who conduct low risk, low expenditure purchasing for an organisation using established and documented purchasing strategies. Individuals may be working in a small organisation with general responsibility for conducting purchasing within an organisation, or they may be a purchasing specialist working in a large organisation. Some judgement may be required to make decisions about purchasing strategies.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Administration – Purchasing and Contracting

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Understand purchasing and own requirements	1.1 Read, understand and clarify organisation's purchasing strategies as required 1.2 Determine own role and limits of authority in consultation with relevant personnel

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Make purchases	2.1 Receive purchase specifications from relevant personnel and clarify as required 2.2 Select purchasing methods most appropriate to particular purchases within limits of own role 2.3 Obtain approvals for purchases as required 2.4 Obtain quotations from suppliers as required 2.5 Select suppliers, place orders and make purchases
3. Receive purchases	3.1 Receive goods or make arrangements to receive services 3.2 Advise relevant personnel of receipt of purchase 3.3 Ensure goods received are checked for compliance with specifications 3.4 Take action to resolve non-compliance with specifications 3.5 Facilitate registration of new assets 3.6 File and store purchase records

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1, 2.2, 3.3, 3.4	• Gathers and interprets a range of textual information to identify relevant key information
Writing	1.1, 1.2, 2.1, 2.5, 3.1, 3.2, 3.5	• Creates everyday workplace documentation l using terminology and format relevant to audience and purpose
Oral Communication	1.1, 1.2, 2.1, 2.3-2.5, 3.1, 3.2, 3.4	• Uses suitable language to liaise with suppliers and clarify information within the organisation • Uses active questioning and listening techniques to confirm requirements
Numeracy	2.1, 2.4, 2.5	• Interprets simple numerical data and makes basic calculations to determine costs of goods and services
Navigate the world of work	1.1, 2.1, 3.3, 3.4	• Adheres to organisational procedures and policies • Understands how own role connects with others and contributes to broader work goals

© Commonwealth of Australia, 2025 Industry Skills Australia

Interact with others	1.1, 1.2, 2.1, 2.3-2.5, 3.2	• Selects from a small range of communication modes, forms and channels to meet a specific purpose within the immediate work environment • Seeks to cooperate with others to achieve results in immediate work context
Get the work done	1.2, 2.2, 2.5, 3.4-3.6	• Takes responsibility for planning, sequencing and prioritising tasks for efficient and effective outcomes • Responds to predictable routine problems and implements standard or logical solutions • Uses the main features and functions of digital tools to complete work tasks

Assessment Requirements for BSBPUR301 Purchase goods and services

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- obtain quotes from prospective suppliers
- select appropriate purchasing methods
- receive, check and document purchases.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline organisation policy and procedures relating to:
  - purchasing strategies
  - recordkeeping systems related to purchasing and assets
  - standard contracting arrangements
- explain purchasing and procurement principles for:
  - accountability
  - probity and transparency
  - risk management
  - value for money.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the administration – purchasing and contracting field of work and include access to:

- organisation policies and procedures

BSBREL401 Establish networks

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop and maintain effective work relationships and networks through relationship building and negotiation skills required by workers within an organisation as well as freelance or contract workers.

It applies to individuals with a broad knowledge of networking and negotiation who contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They may have responsibility to provide guidance or to delegate aspects of tasks to others.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Relationship Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop and maintain business networks	1.1 Use appropriate network strategies to establish and maintain relationships that promote the development of business opportunities 1.2 Identify and pursue network opportunities to maximise a range of contacts 1.3 Communicate information regarding new networks to inform

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	individuals, colleagues and clients of potential benefits 1.4 Participate in professional networks and associations to obtain and maintain personal knowledge and skills
2. Establish and maintain business relationships	2.1 Develop and maintain relationships to promote benefits consistent with organisational/client requirements 2.2 Gain and maintain trust and confidence of contacts through demonstration of high standards of business practices 2.3 Use a high level of negotiation skills to encourage positive outcomes 2.4 Identify difficult situations and negotiate solutions using collaborative problem-solving techniques 2.5 Seek specialist advice in the development of contacts where appropriate
3. Promote the relationship	3.1 Develop strategies to represent and promote the interests and requirements of the relationship 3.2 Use appropriate presentation skills to communicate the goals and objectives of the relationship 3.3 Effectively communicate issues, policies and practices of the relationship to a range of audiences, in writing and verbally 3.4 Obtain feedback to identify and develop ways to improve promotional activities within available opportunities

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	1.4, 3.4	• Seeks opportunities to develop and extend expertise and identify areas for professional improvement
Reading	2.1	• Sources and analyses information to establish networks that consistently promote business opportunities
Writing	1.1-1.3, 2.1, 2.2, 2.5 3.1-3.4	• Uses appropriate vocabulary, layout and grammatical structure to convey ideas and information

© Commonwealth of Australia, 2025 Industry Skills Australia

Oral Communication	1.1-1.4, 2.1-2.5, 3.2, 3.3, 3.4	• Utilises persuasive language and appropriate non-verbal features to achieve mutually acceptable outcomes • Uses active listening and questioning techniques to confirm understanding
Navigate the world of work	2.1	• Understands and adheres to organisational policies and procedures
Interact with others	1.1-1.4, 2.1-2.5, 3.1, 3.2	• Actively identifies the requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience • Looks for ways of establishing connections and building genuine understanding with a diverse range of people • Begins to cultivate relationships with people with the knowledge, skills and influence to get things done or provide support
Get the work done	1.1, 1.2, 2.1, 2.4	• Takes responsibility for planning, sequencing and implementing tasks required to build and maintain networks • Uses analytical processes to identify problems, gather relevant information, evaluate options and determine solutions

Assessment Requirements for BSBREL401 Establish networks

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify and use networking opportunities
- maintain records of relevant contacts
- use written and verbal communication skills to establish, cultivate and promote professional business relationships
- use feedback to improve promotional activities.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list and describe strategies for establishing and maintaining business relationships
- identify relevant networks, organisations, agencies, associations or individuals
- describe the principles and techniques needed to negotiate positive outcomes
- explain client or organisational policies, plans and procedures relevant to business relationships
- outline methods for obtaining feedback on promotional activities.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the stakeholder relations – relationship management field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Initiate interpersonal communication with clients	1.1 Identify and use preferred client communication styles and methods 1.2 Establish rapport with clients using verbal and non-verbal communication processes 1.3 Investigate and act upon opportunities to offer positive feedback to clients

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 Use open questions to promote two-way communication 1.5 Identify and act upon potential barriers to effective communication with clients 1.6 Initiate communication processes which relate to client needs, preferences and expectations
2. Establish client relationship management strategies	2.1 Develop client loyalty objectives focusing on the development of long term business partnerships 2.2 Assess client profile information to determine approach 2.3 Develop client loyalty strategies to attract and retain clients in accordance with the business strategy 2.4 Identify and apply client care and client service standards
3. Maintain and improve ongoing relationships with clients	3.1 Develop strategies to obtain ongoing feedback from clients to monitor satisfaction levels 3.2 Develop strategies to elicit feedback which provide information in a form that can be used to improve relationships with clients 3.3 Obtain feedback to develop and implement strategies which maintain and improve relationships with clients
4. Build and maintain networks	4.1 Allocate time to establish and maintain business contacts 4.2 Participate in business associations and/or professional development activities to establish and maintain a network of support for the business and to enhance personal knowledge of the market 4.3 Establish communication channels to exchange information and ideas 4.4 Provide, seek and verify information to the network

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.5, 2.2, 2.3, 2.4, 3.1, 4.2- 4.4	• Interprets information from a range of sources to determine and adhere to communication and networking requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

Writing	1.1,1.5, 2.1, 2.3, 2.4, 3.1, 3.2, 4.2, 4.3	• Records notes from research and discussions for future reference • Develops materials for a specific audience according to organisational standards
Oral Communication	1.1-1.6, 2.3, 2.4, 3.3, 4.2-4.4	• Participates in spoken exchanges with a range of audiences using structure and language to suit the audience • Involves others in discussions using active listening and questioning techniques appropriately
Numeracy	2.4, 4.1	• Performs calculations to determine timeframes and measure actual performance against required standards
Navigate the world of work	2.3, 2.4	• Considers wider organisational goals when developing customer relationship strategies
Interact with others	1.1, 1.2, 1.5, 1.6, 3.3, 4.2-4.4	• Selects and uses appropriate conventions and protocols when communicating with clients or business contacts to build rapport, seek or present information • Recognises the need to alter personal communication style in response to the needs, values, beliefs and cultural expectations of others • Adapts personal communication style to build positive working relationships and show respect for the opinions, values and particular needs of others
Get the work done	1.1, 2.1-2.4, 3.1-3.3, 4.1-4.4	• Takes responsibility for planning, sequencing and implementing tasks and own workload to achieve business outcomes • Uses analytical processes to gather relevant information, identify and evaluate options and decide on appropriate systems and strategies • Actively monitors and evaluates effectiveness of decisions to identify and implement improvements

Assessment Requirements for BSBREL402 Build client relationships and business networks

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify clients' preferred communication styles and methods and potential barriers to communications and use appropriate communication styles and strategies
- apply communication techniques to establish rapport and promote two-way communication
- develop and implement client loyalty strategies and service standards based on business objectives and client information
- develop and implement strategies to elicit feedback from clients and use it to improve relationships and customer satisfaction
- maintain contacts and participate in formal and informal networks that support the business and enhance personal knowledge of the market.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of strategies that can build client loyalty including those that focus on:
  - financial incentives and special offers
  - premium services and private/dedicated facilities
  - loyalty programs, rewards and recognition
- outline issues that are commonly addressed in client care/service standards in the industry
- outline typical barriers to communicating with clients and possible strategies to address them
- give examples of strategies for feedback
- describe the principles and techniques for effective communication and networking
- outline networking opportunities relevant to the business with reference to:

© Commonwealth of Australia, 2025 Industry Skills Australia

  - government, industry and professional associations
  - trade shows, conferences, briefings and other professional development activities
  - existing groups or networks
  - businesses and individuals
- outline aspects of organisational policies, procedures and processes that are relevant to communicating with clients and participating in networks.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the stakeholder relations - relationship management field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRKG304 Maintain business records

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to maintain the records of a business or records system in good order on a day-to-day basis.

It applies to individuals who follow established guidelines and processes to assist them to carry out their work. They work under supervision or in consultation with more senior staff or system users to support effective recordkeeping and governance practices across the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Recordkeeping

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Collate business records	1.1 Identify individual records or information which should be incorporated into business or records system according to organisational criteria 1.2 Sort records in accordance with workplace requirements 1.3 Follow security and access requirements in accordance with organisational procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Update business or records system	2.1 Identify and record control information for describing new records to be incorporated into business or records system 2.2 Update control information describing movement or use of records within business or records system 2.3 Accurately record and update control information in business or records system 2.4 Identify and remove records of completed business activities from current system for disposal
3. Prepare reports from the business or records system	3.1 Interpret requests for reports and clarify the content and frequency sought, where necessary 3.2 Prepare reports from business or records system in accordance with instructions or request 3.3 Prepare reports in accordance with organisational security and access procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 2.1, 2.4, 3.1	• Gathers and interprets textual information from different sources to determine how information may be applied to job requirements
Writing	2.1, 2.2, 2.3, 3.1	• Uses clear and industry related terminology to complete and update workplace information
Oral Communication	3.1	• Uses questioning and active listening techniques to confirm job requirements
Numeracy	1.1	• Recognises and uses numerical systems associated with recordkeeping systems
Navigate the world of work	1.3, 3.3	• Takes some personal responsibility for following organisational procedures
Get the work done	1.1, 1.2, 2.1, 2.3, 2.4, 3.2	• Takes responsibility for planning and organising own workload to ensure work deadlines are met • Takes responsibility for the outcomes of routine

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Requirements for BSBRKG304 Maintain business records

Modification History

Release	Comments
Release1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- collate business records in compliance with organisational procedures and workplace requirements
- record and update control information accurately in business records system.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the organisational requirements regarding the maintenance and security of business records
- describe the general principles and processes of records management and records management systems, such as:
  - systems of control
  - records continuum theory
  - mandate and ownership of business process
  - environmental context
  - records characteristics.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – recordkeeping field of work and include access to:

- relevant workplace documentation and resources

© Commonwealth of Australia, 2025 Industry Skills Australia

- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRSK401 Identify risk and apply risk management processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify risks and to apply established risk management processes to a defined area of operations that are within the responsibilities and obligations of the role.

It applies to individuals with a broad knowledge of risk analysis or project management who contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

In this unit, risks applicable within own work responsibilities and area of operation, may include projects being undertaken individually or by a team, or operations within a section of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Risk Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify risks	1.1 Identify the context for risk management 1.2 Identify risks using tools, ensuring all reasonable steps have

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	been taken to identify all risks 1.3 Document identified risks in accordance with relevant policies, procedures, legislation and standards
2. Analyse and evaluate risks	2.1 Analyse and document risks in consultation with relevant stakeholders 2.2 Undertake risk categorisation and determine level of risk 2.3 Document analysis processes and outcomes
3. Treat risks	3.1 Determine appropriate control measures for risks and assess for strengths and weaknesses 3.2 Identify control measures for all risks 3.3 Refer risks relevant to whole of organisation or having an impact beyond own work responsibilities and area of operation to others as per established policies and procedures 3.4 Choose and implement control measures for own area of operation and/or responsibilities 3.5 Prepare and implement treatment plans
4. Monitor and review effectiveness of risk treatment/s	4.1 Regularly review implemented treatment/s against measures of success 4.2 Use review results to improve the treatment of risks 4.3 Provide assistance to auditing risk in own area of operation 4.4 Monitor and review management of risk in own area of operation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2	• Comprehends documents and texts of varying complexity to extract and analyse relevant information
Writing	1.3, 2.1, 2.3, 3.5	• Uses specific, industry related terminology and logical organisational structure in workplace documents that identify and analyse risk and report management process outcomes

© Commonwealth of Australia, 2025 Industry Skills Australia

Oral communication	2.1	• Participates effectively in interactions with stakeholders by using questioning and listening to elicit opinions and clarify understanding
Numeracy	1.2, 4.1	• Uses numerical tools to assess risk and uses numerical data to review plans
Navigate the world of work	1.1, 1.3, 3.3	• Complies with organisational and legislative requirements • Takes responsibility for identification and management of risk within own work context and refers matters to others as required
Interact with others	2.1	• Selects appropriate communication protocols and conventions when conferring with others to establish risk management requirements
Get the work done	1.1, 1.2, 2.1, 2.2, 3.1, 3.2, 3.4, 3.5, 4.1, 4.2, 4.3, 4.4	• Determines job sequence and works logically and systematically to undertake defined tasks • Uses analysis and consultative processes to inform decisions about selection and implementation of risk control measures • Evaluates effectiveness of plans and results to inform improvement decisions • Uses familiar digital technologies and systems to access information, prepare plans and communicate with others

Assessment Requirements for BSBRSK401 Identify risk and apply risk management processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to apply organisational policies, procedures and processes to:

- identify risks
- consult with relevant stakeholders to analyse and evaluate risks
- identify and evaluate control measures
- develop and implement treatment plans for own area or responsibility
- refer risks that are beyond own area of responsibility to others
- maintain risk management documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline techniques for identifying and evaluating risks
- outline organisational policies, procedures or processes for risk management
- give examples of areas where risks are commonly identified in an organisation
- outline the purpose and key elements of current risk management standards
- outline the legislative and regulatory context of the organisation in relation to risk management
- describe the organisation's auditing requirements relating to risk management.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk - risk management field of work and include access to:

© Commonwealth of Australia, 2025 Industry Skills Australia

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRSK501 Manage risk

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes skills and knowledge required to manage risks in a range of contexts across an organisation or for a specific business unit or area in any industry setting.

It applies to individuals who are working in positions of authority and are approved to implement change across the organisation, business unit, program or project area. They may or may not have responsibility for directly supervising others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Risk Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish risk context	1.1 Review organisational processes, procedures and requirements for undertaking risk management in accordance with current risk management standards 1.2 Determine scope for risk management process 1.3 Identify internal and external stakeholders and their issues 1.4 Review political, economic, social, legal, technological and policy context

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.5 Review strengths and weaknesses of existing arrangements 1.6 Document critical success factors, goals or objectives for area included in scope 1.7 Obtain support for risk management activities 1.8 Communicate with relevant parties about the risk management process and invite participation
2. Identify risks	2.1 Invite relevant parties to assist in the identification of risks 2.2 Research risks that may apply to scope 2.3 Use tools and techniques to generate a list of risks that apply to the scope, in consultation with relevant parties
3. Analyse risks	3.1 Assess likelihood of risks occurring 3.2 Assess impact or consequence if risks occur 3.3 Evaluate and prioritise risks for treatment
4. Select and implement treatments	4.1 Determine and select most appropriate options for treating risks 4.2 Develop an action plan for implementing risk treatment 4.3 Communicate risk management processes to relevant parties 4.4 Ensure all documentation is in order and appropriately stored 4.5 Implement and monitor action plan 4.6 Evaluate risk management process

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 1.5, 2.2	• Comprehends a variety of relatively complex texts • Gathers, interprets and analyses textual information from a range of sources to identify relevant information
Writing	1.6, 1.8, 2.1, 2.3, 4.3	• Develops textual material and organises content in a manner that effectively documents

© Commonwealth of Australia, 2025 Industry Skills Australia

		risk management analysis and assessment priorities and processes
Oral Communication	1.8, 2.1, 2.3, 4.3	• Participates in interactions with stakeholders using questioning and listening to elicit opinions, and to confirm and clarify understanding
Numeracy	2.2	• Uses numerical tools to assess risk and uses numerical data to review plans
Navigate the world of work	1.1, 2.1, 4.3	• Refers to organisational processes, procedures and requirements when making decisions about risk management
Interact with others	1.8, 2.1, 2.3, 4.3	• Establishes and uses appropriate conventions and protocols when communicating with stakeholders about risk management • Consults and negotiates with stakeholders about risk management processes and outcomes
Get the work done	1.2, 1.3, 1.5, 1.7, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 4.1, 4.2, 4.4, 4.5, 4.6	• Sequences and schedules a range of routine and complex activities, monitors implementation, evaluates processes and manages relevant communication • Systematically analyses information to decide on appropriate risk management treatments • Uses digital technologies and systems to access information, document plans and communicate with others

BSBSUS501 Develop workplace policy and procedures for sustainability

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop and implement a workplace sustainability policy and to modify the policy to suit changed circumstances.

It applies to individuals with managerial responsibilities who undertake work developing approaches to create, monitor and improve strategies and policies within workplaces and engage with a range of relevant stakeholders and specialists.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Sustainability

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop workplace sustainability policy	1.1 Define scope of sustainability policy 1.2 Gather information from a range of sources to plan and develop policy 1.3 Identify and consult stakeholders as a key component of the policy development process 1.4 Include appropriate strategies in policy at all stages of work for

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	minimising resource use, reducing toxic material and hazardous chemical use and employing life cycle management approaches 1.5 Make recommendations for policy options based on likely effectiveness, timeframes and cost 1.6 Develop policy that reflects the organisation's commitment to sustainability as an integral part of business planning and as a business opportunity 1.7 Agree to appropriate methods of implementation, outcomes and performance indicators
2. Communicate workplace sustainability policy	2.1 Promote workplace sustainability policy, including its expected outcome, to key stakeholders 2.2 Inform those involved in implementing the policy about expected outcomes, activities to be undertaken and assigned responsibilities
3. Implement workplace sustainability policy	3.1 Develop and communicate procedures to help implement workplace sustainability policy 3.2 Implement strategies for continuous improvement in resource efficiency 3.3 Establish and assign responsibility for recording systems to track continuous improvements in sustainability approaches
4. Review workplace sustainability policy implementation	4.1 Document outcomes and provide feedback to key personnel and stakeholders 4.2 Investigate successes or otherwise of policy 4.3 Monitor records to identify trends that may require remedial action and use to promote continuous improvement of performance 4.4 Modify policy and or procedures as required to ensure improvements are made

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Industry Skills Australia

Reading	1.1, 1.2, 4.2, 4.3	• Identifies, analyses and evaluates complex textual information to determine legislative and regulatory requirements, trends and outcomes
Writing	1.2-1.7, 2.1, 2.2, 3.1, 3.3, 4.1, 4.3, 4.4	• Researches, plans and prepares documentation using format and language appropriate to context, organisational requirements and audience
Oral Communication	1.2, 1.3, 2.1, 2.2, 3.1, 4.1	• Presents information and seeks advice using language appropriate to audience • Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding
Numeracy	1.5, 4.3	• Interprets and uses mathematical equations to calculate numerical information relating to time durations and costs
Navigate the world of work	1.1-1.6, 3.1, 4.4	• Develops, monitors and modifies organisational policies and procedures in accordance with legislative requirements and organisation goals
Interact with others	1.2, 1.3, 2.1, 2.2, 3.1, 3.3, 4.1, 4.3	• Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information • Plays a lead role in consulting and negotiating positive outcomes with a range of stakeholders
Get the work done	1.2, 1.4-1.7, 2.3, 2.4, 3.1, 3.2, 3.3, 3.5, 3.6, 4.1, 4.3, 4.4	• Plans, organises and implements work activities of self and others that ensure compliance with organisational policies and procedures, and legislative requirements • Sequences and schedules complex activities, monitors implementation, and manages relevant communication • Uses systematic, analytical processes in relatively complex, situations, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria • Evaluates outcomes of decisions to identify opportunities for improvement

Assessment Requirements for BSBSUS501 Develop workplace policy and procedures for sustainability

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- scope and develop organisational policies and procedures that comply with legislative requirements and support the organisation's sustainability goals covering at a minimum:
  - minimising resource use
  - resource efficiency
  - reducing toxic material and hazardous chemical use
  - employing life cycle management approaches
  - continuous improvement
- plan and implement sustainability policy and procedures including:
  - agreed outcomes
  - performance indicators
  - activities to be undertaken
  - assigned responsibilities
  - record keeping, review and improvement processes
- consult and communicate with relevant stakeholders to generate engagement with sustainability policy development, implementation and continuous improvement
- review and improve sustainability policies.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the environmental or sustainability legislation, regulations and codes of practice applicable to the organisation identify internal and external sources of information and explain how they can be used to plan and develop the organisation's sustainability policy

© Commonwealth of Australia, 2025 Industry Skills Australia

- explain policy development processes and practices
- outline organisational systems and procedures that relate to sustainability
- outline typical barriers to implementing policies and procedures in an organisation and possible strategies to address them.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the sustainability field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS303 Participate in WHS hazard identification, risk assessment and risk control

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to maintain a healthy and safe workplace through participation in the process of identifying work health and safety (WHS) hazards and assessing and controlling WHS risks, and the promotion and support of worker consultation.

It applies to individuals who assist with the identification of workplace hazards and the assessment and control of WHS risks as part of their WHS responsibilities, which are in addition to their main duties.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
1. Participate in workplace hazard identification	1.1 Participate in selecting hazard identification methods suitable for the workplace 1.2 Use selected methods to identify, report and record hazards according to workplace procedures and WHS Acts, regulations and codes of practice 1.3 Provide information and assistance to persons conducting hazard identification
2. Participate in WHS risk assessment	2.1 Participate in selecting suitable risk assessment methods for the workplace 2.2 Use selected methods to assess and record risks according to workplace procedures and WHS Acts, regulations and codes of practice 2.3 Provide information and assistance to persons conducting risk assessments
3. Promote and support worker consultation and participation in hazard identification and risk assessment	3.1 Advise workers of, and consult them about, hazard identification and risk assessment activities, according to workplace WHS consultation and participation policies, procedures and processes 3.2 Encourage workers to participate in these activities according to workplace WHS consultation and participation policies, procedures and processes 3.3 Advise workers of, and consult them about, the results and outcomes of these activities, according to workplace WHS consultation and participation policies, procedures and processes
4. Participate in developing, selecting and implementing WHS risk controls	4.1 Obtain workplace records of the outcomes of hazard identifications and risk assessments, and use them to participate in developing risk control options 4.2 Apply knowledge of WHS Acts, regulations, codes of practice, other information and guidelines, and workplace policies, procedures and processes to identify duty holders 4.3 Participate in selecting risk control options using appropriate criteria 4.4 Identify and report factors impeding successful implementation of selected risk controls 4.5 Participate in developing a risk control implementation and evaluation plan 4.6 Provide information about the implementation and evaluation plan to individuals and parties

Assessment Requirements for BSBWHS303 Participate in WHS hazard identification, risk assessment and risk control

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- participate in selection and use of required methods to identify, report and record hazards
- assess and record risks for identified hazards
- promote and support worker consultation and participation in hazard identification and risk assessment
- participate in developing, selecting and implementing risk control options and plans.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the relevant Commonwealth and state or territory Acts, regulations, codes of practice standards, guidance material and other relevant publications
- summarise work health and safety (WHS) legislative requirements about:
  - communication, consultation and participation
  - notification of incidents
  - recordkeeping
  - specific hazard identification and risk assessment and control methods
- list the basic principles of incident causation and injury processes
- explain the concept of hazards, risks and risk factors
- describe hazard identification and risk assessment methods
- identify internal and external sources of WHS information and data, and how to access them
- summarise organisational WHS policies, procedures, processes and systems

© Commonwealth of Australia, 2025 Industry Skills Australia

- describe the range of WHS hazards that may be present in the workplace, the harm they can cause and how this harm occurs
- describe risk control options for different hazards and work situations
- identify types of hazard and risk registers
- describe the workplace communication processes for sharing information about hazard identification, and risk assessment and control.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- organisational policies, standard operating procedures and plans
- Acts, regulations, codes of practice, licensing requirements and standards
- relevant data files
- appropriate resources to manage the identification and rectification of breaches in compliance requirements.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package release 1.0

Application

This unit describes the skills and knowledge required to implement and monitor an organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area in order to meet legislative requirements.

It applies to individuals with supervisory responsibilities for implementing and monitoring the organisation's WHS policies, procedures and programs in a work area. These individuals have a broad knowledge of WHS policies and contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They provide supervision and guidance to others and have limited responsibility for the output of others.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the	*Performance criteria describe the performance needed to*

ELEMENT	PERFORMANCE CRITERIA
essential outcomes.	*demonstrate achievement of the element.*
1. Provide information to the work team about WHS policies and procedures	1.1 Accurately explain to the work team relevant provisions of WHS Acts, regulations and codes of practice 1.2 Provide information about the organisation's WHS policies, procedures and programs, and ensure it is readily accessible to, and understandable by the work team 1.3 Regularly provide and clearly explain to the work team information about identified hazards and the outcomes of risk assessment and control
2. Implement and monitor participation arrangements for managing WHS	2.1 Communicate to workplace parties the importance of effective consultation mechanisms in managing health and safety risks in the workplace 2.2 Apply consultation procedures to facilitate participation of the work team in managing work area hazards 2.3 Promptly deal with issues raised through consultation, according to organisational consultation procedures and WHS legislative and regulatory requirements 2.4 Promptly record and communicate to the work team the outcomes of consultation over WHS issues
3. Implement and monitor organisational procedures for providing WHS training	3.1 Identify WHS training needs according to organisational requirements and WHS legislative and regulatory requirements 3.2 Make arrangements to meet WHS training needs of team members in consultation with relevant individuals 3.3 Provide workplace learning opportunities and coaching and mentoring assistance to facilitate team and individual achievement of identified WHS training needs 3.4 Identify and report to management the costs associated with providing training for work team, for inclusion in financial and management plans
4. Implement and monitor organisational procedures and legal requirements for identifying hazards and assessing and controlling risks	4.1 Identify and report on hazards in work area according to WHS policies and procedures and WHS legislative and regulatory requirements 4.2 Promptly action team member hazard reports according to organisational procedures and WHS legislative and regulatory requirements 4.3 Implement procedures to control risks using the hierarchy of control, according to organisational and WHS legislative requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	4.4 Identify and report inadequacies in existing risk controls according to hierarchy of control and WHS legislative requirements 4.5 Monitor outcomes of reports on inadequacies, where appropriate, to ensure a prompt organisational response
5. Implement and monitor organisational procedures for maintaining WHS records for the team	5.1 Accurately complete and maintain WHS records of incidents of occupational injury and disease in work area, according to WHS policies, procedures and legislative requirements 5.2 Use aggregate information and data from work area records to identify hazards and monitor risk control procedures in work area

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 5.2	• Interprets and analyses complex WHS legislative and organisational texts
Writing	1.1-1.3, 2.3, 2.4, 3.1, 3.2, 3.4, 4.1, 4.4, 5.1	• Documents WHS legislative and organisational information using structure, layout and language suitable for audience • Records WHS issues and actions taken according to reporting requirements • Prepares and maintains required records using appropriate structure and vocabulary
Oral communication	1.1-1.3, 2.1, 2.4, 3.2, 3.3, 4.1, 4.4	• Provides WHS legislative and organisational information and advice using structure and language suitable for audience
Numeracy	3.4, 5.2	• Extracts, interprets and comprehends mathematical information in relation to training costs and risk management data
Navigate the world of work	1.1,1.2, 2.3, 3.1, 4.1-4.5, 5.1	• Takes responsibility for adherence to legal and regulatory responsibilities and organisational policies and procedures in relation to WHS • Keeps up to date on changes to WHS legislation or regulations and organisational policies and procedures
Interact with	2.2, 3.2, 3.3	• Selects and uses appropriate conventions and protocols to facilitate consultation or provide feedback

© Commonwealth of Australia, 2025 Industry Skills Australia

others		• Initiates and contributes to facilitating consultative role, responding, explaining, clarifying and expanding on ideas and information as required • Collaborates with others to achieve individual and team outcomes
Get the work done	2.2, 3.2, 3.3, 4.1-4.5, 5.1	• Uses combination of formal, logical planning and intuitive understanding of context to identify relevant information and risks, and identify and evaluate alternative strategies • Uses formal decision-making processes, setting or clarifying goals, gathering information and identifying and evaluating choices against a set of criteria • Recognises and takes responsibility for reporting WHS risk control inadequacies • Uses formal and informal processes to monitor implementations of WHS solutions and reflect on outcomes

Assessment Requirements for BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- explain clearly and accurately to work team the relevant work health and safety (WHS) information including:
  - WHS legislative and organisational requirements
  - identified hazards and outcomes of risk assessment and control
- ensure that the team has access to information about WHS policies, procedures and programs in appropriate structure and language
- implement and monitor procedures according to organisational and legislative WHS requirements including:
  - consultation and communications to enable team members to participate in managing WHS risks and hazards
  - identifying WHS training needs and providing learning opportunities, coaching and mentoring as appropriate to needs
  - identifying, reporting and taking action on WHS hazards and risks
  - identifying and reporting inadequacies in existing risk controls and monitoring outcomes to ensure a prompt organisational response
  - reporting on the cost of WHS training
  - keeping WHS records
  - analysing aggregate WHS data to identify hazards and monitor risk control procedures in work area.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

© Commonwealth of Australia, 2025
Industry Skills Australia

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legal responsibilities and duties of managers, supervisors, persons conducting businesses or undertakings (PCBUs) and workers in relation to WHS risk management in the workplace
- identify key provisions of relevant WHS Acts, regulations and codes of practice that apply to the business and outline how they apply in the work area
- explain organisational policies and procedures relating to hazard identification, risk management, fire, emergency and evacuation, incident investigation and reporting
- explain the importance of effective consultation mechanisms in managing health and safety risks in the workplace
- explain how the hierarchy of control applies in the work area.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- an actual workplace or simulated environment
- workplace equipment and resources
- examples of documents relating to workplace safety, hazard identification and risk assessment
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS501 Ensure a safe workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to establish, maintain and evaluate the organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area, according to WHS legislative requirements. It takes a systems approach and addresses compliance with relevant legislative requirements.

This unit applies to managers working in a range of contexts who have, or are likely to have responsibility for WHS as part of their broader management role. It is relevant for people with obligations under WHS legislation, for example persons conducting a business or undertaking (PCBUs) or officers, as defined by relevant legislation.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
1 Establish a WHS management system in a work area	1.1 Locate, adapt, adopt and communicate WHS policies that clearly define the organisation's commitment to complying with WHS legislation 1.2 Identify duty holders and define WHS responsibilities for all workplace personnel in the work area according to WHS legislation, policies, procedures and programs 1.3 Identify and approve financial and human resources required by the WHS management system (WHSMS)
2 Establish and maintain effective and compliant participation arrangements for managing WHS in a work area	2.1 Work with workers and their representatives to set up and maintain participation arrangements according to relevant WHS legislation 2.2 Appropriately resolve issues raised through participation and consultation arrangements according to relevant WHS legislation 2.3 Promptly provide information about the outcomes of participation and consultation to workers and ensure it is easy for them to access and understand
3 Establish and maintain procedures for effectively identifying hazards, and assessing and controlling risks in a work area	3.1 Develop procedures for ongoing hazard identification, and assessment and control of associated risks 3.2 Include hazard identification at the planning, design and evaluation stages of any change in the workplace to ensure that new hazards are not created by the proposed changes and existing hazards are controlled 3.3 Develop and maintain procedures for selecting and implementing risk controls according to the hierarchy of control and WHS legislative requirements 3.4 Identify inadequacies in existing risk controls according to the hierarchy of control and WHS legislative requirements, and promptly provide resources to enable implementation of new measures 3.5 Identify requirements for expert WHS advice, and request this advice as required
4 Evaluate and maintain a work area WHS management system	4.1 Develop and provide a WHS induction and training program for all workers in a work area as part of the organisation's training program 4.2 Use a system for WHS record keeping to allow identification of patterns of occupational injury and disease in the organisation, and to maintain a record of WHS decisions made, including reasons for the decision 4.3 Measure and evaluate the WHSMS in line with the

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	organisation's quality systems framework 4.4 Develop and implement improvements to the WHSMS to achieve organisational WHS objectives 4.5 Ensure compliance with the WHS legislative framework to achieve, as a minimum, WHS legal requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 4.2, 4.3, 4.5	• Organises, evaluates and critiques ideas and information from WHS legislation, policies, procedures and programs
Writing	1.1, 2.3, 3.2, 3.5, 4.1, 4.2	• Produces WHS policies, procedures and programs • using appropriate vocabulary, grammatical structure and conventions to produce • Records WHS decisions according to organisational requirements
Oral communication	1.1, 2.1, 2.2, 2.3	• Presents and seeks information from others using structure and language suitable for the audience • Provides information on resolution of WHS issues varying level of technical vocabulary to suit audience
Numeracy	1.3	• Selects from, and applies, an expanding range of mathematical and problem solving strategies in identifying financial and human resources required
Navigate the world of work	1.1, 1.2, 2.1, 2.2, 3.3, 3.4, 4.5	• Monitors adherence to legal and regulatory rights and responsibilities for self and others in relation to WHS • Takes responsibility for developing, implementing and reviewing policies, procedures and processes in accordance with organisational and legislative requirements
Interact with others	1.1, 2.1, 2.3, 3.5	• Plays a lead role in situations requiring effective collaboration demonstrating the ability to guide discussions and negotiate agreeable outcomes • Provides feedback to others in forms they can

© Commonwealth of Australia, 2025 Industry Skills Australia

		understand and use
Get the work done	1.1, 1.3, 2.1, 2.2, 2.3, 3.2, 3.3, 3.4, 3.5, 4.1, 4.2 4.3, 4.4, 4.5	• Develops plans or processes to manage relatively complex, WHS management tasks with an awareness of how they contribute to operational and strategic goals • Uses systematic, analytical processes, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria • Considers whether, and how, others should be involved, using consultative or collaborative processes as an integral part of the decision-making process • Uses digital systems and tools to enter, store and retrieve relevant information

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

WHS legislation must include:	• applicable Commonwealth and state or territory WHS Acts, regulations and codes of practice.

Assessment Requirements for BSBWHS501 Ensure a safe workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- establish, implement, maintain and evaluate a work health and safety (WHS) management system for a work area of an organisation in accordance with WHS legislation including policies, procedures and record keeping
- ensure organisational WHS compliance
- establish, implement, maintain and evaluate effective and compliant participation arrangements for managing WHS including identifying duty holders, identifying and approving the required resources and developing and implementing a training program
- establish, implement, maintain and evaluate procedures for effectively identifying hazards, and assessing and controlling risks using the hierarchy of risk control
- provide information and complete documentation for a WHS management system
- identify requirements for and request expert WHS advice.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and detail relevant WHS Acts, regulations and codes of practice
- specify relevant WHS organisational policies, procedures, programs and practices
- explain hazard identification and risk-management processes
- describe the hierarchy of risk control and how it is applied in the workplace
- specify in-house and WHS legislative reporting requirements.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- organisational WHS policies and procedures
- WHS legislation, regulations and codes of practice
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWOR201 Manage personal stress in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to understand signs and sources of stress within the broader framework of the job role and work environment.

It applies to individuals who usually work with some guidance and supervision in an environment where they are likely to encounter difficult customers and situations from time to time. It typically applies in a contact centre environment owing to the very measured, structured, high volume and potentially repetitive nature of the work, but can apply in any work environment.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop personal awareness of stress	1.1 Recognise signs and sources of stress 1.2 Acknowledge stress and difficult situations 1.3 Analyse and understand potential areas of stress in the work environment
2. Develop stress	2.1 Develop an effective understanding of a range of stress

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
management techniques	management techniques 2.2 Use appropriate techniques to manage stressful situations effectively 2.3 Focus on areas of stress within personal control 2.4 Adopt strategies to effectively reduce, manage and deal with stress
3. Manage time	3.1 Develop and understand job role priorities 3.2 Develop techniques to support achievement of key performance indicators (KPIs) and priorities 3.3 Use appropriate time management tools and techniques 3.4 Regularly evaluate tools and techniques 3.5 Promptly identify and inform relevant personnel of any variations and difficulties affecting work requirements, through regular reviews
4. Recover from a stressful contact	4.1 Review the contact or situation 4.2 Analyse root cause/s of stressful contact or situation 4.3 Depersonalise context of contact or situation 4.4 Discuss outcomes with appropriate staff members 4.5 Prepare for next contact or situation positively 4.6 Follow up or take action where needed
5. Maintain personal stamina and resilience	5.1 Identify sources of fatigue in contact centre role 5.2 Adopt work routine and procedural strategies to minimise stress and fatigue 5.3 Monitor personal performance against performance requirements 5.4 Adapt stamina management strategies to maximise performance 5.5 Seek assistance from team members and management in managing stamina
6. Maintain work/life balance	6.1 Identify work/life priorities 6.2 Adopt strategies to support work/life priorities 6.3 Give high priority to health and wellbeing 6.4 Monitor work/life balance 6.5 Develop ability to effectively leave work behind at the end of

Assessment Requirements for BSBWOR201 Manage personal stress in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- recognise and understand potential stress in the work environment
- develop and use techniques and strategies to manage stress and stressful situations
- adopt and monitor potential sources of stress and fatigue, seeking assistance as required
- monitor own performance against performance requirements and key performance indicators (KPIs)
- use techniques to achieve work/life balance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe job role priorities and KPIs
- list internal and external sources of assistance, including escalation pathways
- outline signs and sources of existing and potential stress or difficult situations
- discuss stress management and reduction techniques
- describe time management tools and techniques.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability – workplace effectiveness field of work and include access to:

- office equipment and resources
- time management tools

© Commonwealth of Australia, 2025 Industry Skills Australia

- workplace documentation
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBWOR301 Organise personal work priorities and development

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare a work plan according to organisational requirements and work objectives
- use business technology to schedule, prioritise and monitor completion of tasks in a work plan
- assess and prioritise own work load and deal with contingencies
- monitor and assess personal performance against job role requirements by seeking feedback from colleagues and clients
- identify personal development needs and access, complete and record skill development and learning.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline key provisions of legislation that relate to own work role
- describe goals, objectives or key performance indicators of own work role
- explain ways to elicit, analyse and interpret feedback when communicating with other people in the workplace
- explain the principles and techniques of goal setting, measuring performance, time management and personal assessment of learning and development needs
- explain signs and sources of stress and strategies to deal with stress in the workplace
- identify methods to identify and prioritise personal learning needs.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- office equipment and resources
- work schedules and performance improvement plans
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWOR501 Manage personal work priorities and professional development

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to create systems and process to organise information and prioritise tasks.

It applies to individuals working in managerial positions who have excellent organisational skills. The work ethic of individuals in this role has a significant impact on the work culture and patterns of behaviour of others as managers at this level are role models in their work environment.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish personal work goals	1.1 Serve as a positive role model in the workplace through personal work planning 1.2 Ensure personal work goals, plans and activities reflect the organisation's plans, and own responsibilities and accountabilities 1.3 Measure and maintain personal performance in varying work conditions, work contexts and when contingencies occur

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Set and meet own work priorities	2.1 Take initiative to prioritise and facilitate competing demands to achieve personal, team and organisational goals and objectives 2.2 Use technology efficiently and effectively to manage work priorities and commitments 2.3 Maintain appropriate work-life balance, and ensure stress is effectively managed and health is attended to
3. Develop and maintain professional competence	3.1 Assess personal knowledge and skills against competency standards to determine development needs, priorities and plans 3.2 Seek feedback from employees, clients and colleagues and use this feedback to identify and develop ways to improve competence 3.3 Identify, evaluate, select and use development opportunities suitable to personal learning style/s to develop competence 3.4 Participate in networks to enhance personal knowledge, skills and work relationships 3.5 Identify and develop new skills to achieve and maintain a competitive edge

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.1, 3.2, 3.3, 3.4, 3.5	• Investigates and uses a range of strategies to develop personal competence
Reading	1.2, 3.1, 3.2	• Analyses and interprets textual information from organisational policies and practices or feedback to inform personal development planning
Writing	3.2	• Uses feedback to prepare reports that summarise ways to improve competence
Oral Communication	3.2	• Uses active listening and questioning to seek and receive feedback
Navigate the world of work	1.2, 2.1	• Understands how own role contributes to broader organisational goals • Considers organisational protocols when planning own career development

© Commonwealth of Australia, 2025 Industry Skills Australia

Interact with others	1.1, 3.2, 3.4	• Selects and uses appropriate conventions and protocols when communicating with diverse stakeholders • Uses interpersonal skills to establish and build positive working relationships with others
Get the work done	1.1, 1.2, 1.3, 2.1, 2.2, 2.3, 3.1	• Plans and prioritises tasks in order to meet deadlines, manage role responsibilities and to manage own personal welfare • Identifies and uses appropriate technology to improve work efficiency

BSBWOR502 Lead and manage team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead teams in the workplace and to actively engage with the management of the organisation.

It applies to individuals working at a managerial level who facilitate work teams and build a positive culture within their work teams. At this level, work will normally be carried out using complex and diverse methods and procedures requiring the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish team performance plan	1.1 Consult team members to establish a common understanding of team purpose, roles, responsibilities and accountabilities in accordance with organisational goals, plans and objectives 1.2 Develop performance plans to establish expected outcomes, outputs, key performance indicators (KPIs) and goals for work team 1.3 Support team members in meeting expected performance

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	outcomes
2. Develop and facilitate team cohesion	2.1 Develop strategies to ensure team members have input into planning, decision making and operational aspects of work team 2.2 Develop policies and procedures to ensure team members take responsibility for own work and assist others to undertake required roles and responsibilities 2.3 Provide feedback to team members to encourage, value and reward individual and team efforts and contributions 2.4 Develop processes to ensure that issues, concerns and problems identified by team members are recognised and addressed
3. Facilitate teamwork	3.1 Encourage team members and individuals to participate in and to take responsibility for team activities, including communication processes 3.2 Support the team in identifying and resolving work performance problems 3.3 Ensure own contribution to work team serves as a role model for others and enhances the organisation's image for all stakeholders
4. Liaise with stakeholders	4.1 Establish and maintain open communication processes with all stakeholders 4.2 Communicate information from line manager/management to the team 4.3 Communicate unresolved issues, concerns and problems raised by team members and follow-up with line manager/management and other relevant stakeholders 4.4 Evaluate and take necessary corrective action regarding unresolved issues, concerns and problems raised by internal or external stakeholders

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Industry Skills Australia

Reading	1.1, 4.4	• Analyses and interprets textual information from the organisation's policies, goals and objectives to establish team goals or to determine corrective action
Writing	1.2, 2.1, 2.2, 2.4, 4.2, 4.3, 4.4	• Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	1.1, 2.3, 3.1, 4.1, 4.2, 4.3	• Engages in discussions or provides information using appropriate vocabulary and non-verbal features • Uses listening and questioning techniques to confirm understanding and to engage the audience
Navigate the world of work	1.1, 2.1, 2.2, 3.3	• Understands how own role contributes to broader organisational goals • Modifies or develops policies and procedures to achieve organisational goals
Interact with others	1.1, 1.3, 2.2, 2.3, 3.1, 3.2, 4.2, 4.3	• Selects and uses appropriate conventions and protocols when communicating with diverse stakeholders • Uses interpersonal skills to gain trust and confidence of team and provides feedback to others in forms that they can understand and use • Adapts personal communication style to build positive working relationships and to show respect for the opinions, values and particular needs of others • Plays a lead role in situations requiring effective collaboration, demonstrating high level conflict resolution skills and ability to engage and motivate others
Get the work done	1.2, 2.1, 2.2, 2.4, 3.2, 4.1, 4.3, 4.4	• Develops, implements and monitors plans and processes to ensure team effectiveness • Monitors and actively supports processes and development activities to ensure the team is focused on work outcomes • Plans for unexpected outcomes and implements creative responses to overcome challenges

BSBWRK411 Support employee and industrial relations procedures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to communicate and implement industrial relations policies and procedures to effectively represent organisations/employers.

It applies to individuals who work in support positions, assisting others in dealing with industrial relations conflicts and issues.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Workforce Development – Workplace Relations

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Communicate and implement organisation's industrial relations policies and procedures	1.1 Source and disseminate relevant legislation, agreements, policies and procedures to relevant persons and groups 1.2 Implement agreements, policies and procedures according to site, enterprise and statutory requirements 1.3 Support strategies to effectively communicate with relevant persons and groups on industrial relations matters 1.4 Promote the organisation's industrial relations procedures to

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	relevant persons and groups 1.5 Represent the organisation appropriately in discussions with key stakeholders
2. Assist in minimising industrial relations conflict	2.1 Monitor the implementation of industrial relations policies and procedures 2.2 Process documentation and report to management and other relevant parties about potential industrial relations conflicts 2.3 Support managers to contain industrial relations conflicts and deal with grievances and disputes, within limits of own authority 2.4 Work with employees to resolve personal grievances and prevent escalation of industrial relations conflicts 2.5 Work under supervision to source specialist industrial relations expertise
3. Enhance industrial relations	3.1 Trial and implement strategies to monitor the implementation of the organisation's industrial relations policies and procedures 3.2 Implement strategies to facilitate feedback on the industrial climate 3.3 Implement strategies to strengthen relationships with relevant persons and groups 3.4 Provide information and feedback to management on industrial relations 3.5 Provide information and advice to relevant persons and groups

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2, 3.1	• Comprehends and analyses complex texts from a variety of sources and records to determine relevance to requirements or review implementation of strategies
Writing	1.1, 1.2, 2.1, 2.2, 3.4, 3.5	• Prepares required documents using language and structure appropriate to purpose and audience

© Commonwealth of Australia, 2025 Industry Skills Australia

Oral Communication	1.1-1.5, 2.2, 2.4, 2.5, 3.4, 3.5	• Presents information and seeks advice using language and non-verbal features appropriate to audience and context • Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding
Navigate the world of work	1.2, 1.4, 1.5, 2.1, 2.3, 3.1	• Follows policies, procedures and legislative requirements and identifies implications of new legislation or regulation for self and others • Understands responsibilities and limits of own role
Interact with others	1.1, 1.3-1.5, 2.2-2.5, 3.2-3.5	• Selects and uses appropriate conventions and protocols when communicating with co-workers in a range of work contexts • Collaborates and cooperates with others to achieve required outcomes • Uses effective strategies to moderate conflict and negotiate solutions
Get the work done	1.1, 2.1-2.3, 2.5, 3.1, 3.4, 3.5	• Plans and organises tasks required to achieve required outcomes, seeking advice from others when necessary • Makes a range of critical and non-critical decisions in relatively complex situations

BSBWRK510 Manage employee relations

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage employee and industrial relations matters in an organisation. It involves developing and implementing employee and industrial relations policies and plans and managing conflict resolution negotiations.

It applies to those who are authorised to oversee industrial relations and manage conflict and grievances in an organisation. They will have a sound theoretical knowledge base in human resources management and industrial relations as well as current knowledge of industrial relations trends and legislation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Workforce Development – Workplace Relations

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop employee and industrial relations policies and plans	1.1 Analyse strategic plans and operational plans to determine long term employee relations 1.2 Analyse existing employee relations performance in relation to workforce objectives 1.3 Evaluate options in terms of cost-benefit, risk-analysis and current legislative requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 Work with the management team to develop industrial relations policies and plans 1.5 Identify the skills and knowledge needed by management and the workforce to effectively implement these strategies and policies
2. Implement employee relations policies and plans	2.1 Develop an implementation plan and a contingency plan for the employee relations policies and strategies 2.2 Make arrangements for training and development for identified needs to support the employee relations plan 2.3 Undertake associated employee relations activities to reach agreement on changes required by the organisational policies or implementation plan 2.4 Ensure procedures for addressing grievances and conflict are properly documented 2.5 Communicate key issues about procedures for addressing grievances and conflict to stakeholders 2.6 Review employee relations policies and plans to establish whether they are meeting their intended outcomes
3. Manage negotiations to resolve conflict	3.1 Train individuals in conflict-management techniques and procedures 3.2 Identify, and where possible alleviate or eliminate, sources of conflict or grievance according to legal requirements 3.3 Check documentation and other information sources to clarify issues in dispute 3.4 Obtain expert or specialist advice and/or refer to precedents, if required 3.5 Determine desired negotiation outcomes, negotiation strategy and negotiation timeframes 3.6 Advocate the organisation’s position in negotiation to obtain agreement 3.7 Document, and if necessary certify, the agreed outcomes with the relevant jurisdiction 3.8 Implement agreements 3.9 Take remedial action where groups or individuals fail to abide by agreements

© Commonwealth of Australia, 2025 Industry Skills Australia

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 3.3	• Interprets, critically analyses and applies appropriate strategies to construct meaning from complex texts
Writing	1.4, 2.1, 2.4, 2.5, 3.7	• Displays knowledge of required structure and layout, employing broad vocabulary, grammatical structure and conventions appropriate to purpose and audience
Oral communication	1,4, 2.5, 3.1, 3.6	• Conveys information using language and non-verbal features appropriate to the audience • Employs listening and questioning techniques to clarify and confirm understanding
Numeracy	1.2, 1.3	• Extracts and evaluates the mathematical information embedded in a range of tasks and texts
Navigate the world of work	1.3, 1.4, 2.3, 2.6, 3.2, 3.7	• Modifies or develops organisational policies to achieve organisational goals and comply with legislative requirements • Keeps up to date on changes to legislation or regulations relevant to own rights and responsibilities and considers implications of these
Interact with others	1.4, 2.3, 3.1, 3.2, 3.4, 3.6, 3.9	• Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction, influencing direction and taking a leadership role on occasion • Actively builds networks that include key people with expert skills and knowledge • Uses a range of strategies to facilitate an acceptable outcome for all parties where conflicts occur
Get the work done	1.3, 1.4, 1.5, 2.1, 2.2, 2.4, 2.5, 3.2, 3.5, 3.7, 3.8	• Sequences and schedules complex activities, monitors implementation and manages relevant communication • Uses analytical techniques to identify issues and generate possible solutions, seeking input from others as required, before making decisions or implementing solutions • Draws on the diverse perspectives of others to gain insights into current practices and opportunities for change

BSBWRT301 Write simple documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan, draft and finalise a basic document.

It applies to individuals who apply a broad range of competencies in various work contexts and may exercise some discretion and judgement to produce a range of workplace documentation.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Communication – Writing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Plan document	1.1 Determine audience and purpose for the document 1.2 Determine the format and structure 1.3 Establish key points for inclusion 1.4 Identify organisational requirements 1.5 Establish method of communication 1.6 Establish means of communication

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2 Draft document	2.1 Develop draft document to communicate key points 2.2 Obtain and include any additional information that is required
3 Review document	3.1 Check draft for suitability of tone for audience, purpose, format and communication style 3.2 Check draft for readability, grammar, spelling, and sentence and paragraph construction 3.3 Check draft for sequencing and structure 3.4 Check draft to ensure it meets organisational requirements 3.5 Ensure draft is proofread, where appropriate, by supervisor or colleague
4 Write final document	4.1 Make and proofread necessary changes 4.2 Ensure document is sent to intended recipient 4.3 File copy of document in accordance with organisational policies and procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 3.1-3.4, 4.1	• Recognises and interprets a variety of text to determine and confirm task requirements • Proofreads documents checking for grammar, spelling, structure, and suitability of style and format for audience
Writing	2.1, 2.2, 3.1-3.5, 4.1	• Produces and edits basic documents, according to organisational requirements, for a given audience and purpose
Oral Communication	2.2, 3.5	• Uses listening and questioning skills to seek additional information or confirmation of task completion
Navigate the world of work	1.4, 3.4, 4.3	• Understands and complies with organisational policies and procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

Interact with others	2.2, 3.5	• Follows accepted communication practices and protocols when seeking information or feedback from others
Get the work done	1.1-1.6, 2.1, 2.2, 3.4, 3.5, 4.1-4.3	• Takes responsibility for planning, sequencing and prioritising tasks to achieve required outcomes • Uses the main features and functions of digital tools to complete work tasks

Assessment Requirements for BSBWRT301 Write simple documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0

Performance Evidence

Evidence of the ability to:

- plan, draft and finalise three different simple documents that accurately convey the required basic information in a format suitable for the intended audience and in accordance with organisational policies and procedures for document production.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the process for checking basic grammar, spelling and punctuation
- describe different communication methods
- describe how audience, purpose and method of communication influence the tone of a document.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the communication – writing field of work and include access to:

- office equipment and resources to assist in document production
- organisational policies and procedures
- examples of documents to review.

Assessors must satisfy NVR/AQTF assessor requirements.

CHCCCS020 Respond effectively to behaviours of concern

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal change to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Application

This unit describes the skills and knowledge required to respond effectively to behaviours of concern of people. Skills are associated with handling difficult incidents rather than managing ongoing behaviour difficulties.

The unit applies to workers in any context exposed to difficult and challenging behaviour.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Identify behaviour and plan response	1.1 Identify behaviours of concern in line with work role and organisation policies and procedures 1.2 Identify appropriate response to potential instances of behaviours of concern 1.3 Ensure planned responses to behaviours of concern maximise the availability of other appropriate staff and resources 1.4 Give priority to safety of self and others in responding

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element* to behaviours of concern
2. Apply response	2.1 Ensure response to instances of behaviours of concern reflect organisation policies and procedures 2.2 Seek assistance as required 2.3 Deal with behaviours of concern promptly, firmly and diplomatically in accordance with organisation policy and procedure 2.4 Use communication effectively to achieve the desired outcomes in responding to behaviours of concern 2.5 Select appropriate strategies to suit particular instances of behaviours of concern
3. Report and review incidents	3.1 Report incidents according to organisation policies and procedures 3.2 Review incidents with appropriate staff and offer suggestions appropriate to area of responsibility 3.3 Access and participate in available debriefing mechanisms and associated support and/or development activities 3.4 Seek advice and assistance from legitimate sources as and when appropriate

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Industry Skills Australia

Unit Mapping Information

No equivalent unit.

Assessment Requirements for CHCCCS020 Respond effectively to behaviours of concern

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal change to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- effectively dealt with at least 5 different behaviours of concern

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- different behaviours of concern:
  - aggression
  - confusion or other cognitive impairment
  - intoxication
  - intrusive behaviour
  - manipulation
  - noisiness
  - self-destructive behaviour
  - verbal offensiveness
  - wandering
- strategies for dealing with behaviours of concern
- issues needing to be referred to an appropriate professional

© Commonwealth of Australia, 2025 Industry Skills Australia

- legal and ethical consideration relevant to recognising and responding to behaviours of concern, including:
  - duty of care
  - human rights
  - work health and safety
- organisation reporting processes

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including organisation policies and procedures in relation to reporting behaviours of concern
- modelling of industry operating conditions and contingencies, including scenarios that reflect different behaviours of concern

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CPCCCM2007B Use explosive power tools

Modification History

Minor changes made to range statement, including addition of photovoltaic (solar) panels

Equivalent to CPCCCM2007A

Unit Descriptor

This unit of competency specifies the outcomes required to apply safe and effective operation of explosive power tools (EPT), used to fasten materials or fix fasteners to bases. It includes both direct action and indirect action explosive powered fastening tools.

Application of the Unit

This unit of competency supports achievement of skills to safely and effectively use a range of EPT used in the construction industry.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Industry Skills Australia

Elements and Performance Criteria

1	Plan and prepare.	1.1	Work instructions, including plans, specifications, quality requirements and operational details, are obtained, confirmed and applied from relevant ***information*** for ***planning and preparation***.
		1.2	***Safety (OHS)*** requirements are followed in accordance with safety plans and policies.
		1.3	Signage and barricade requirements are identified and implemented.
		1.4	Plant, ***tools and equipment*** selected to carry out tasks are consistent with job requirements, checked for serviceability, and any faults are rectified or reported prior to commencement.
		1.5	Material quantity requirements are calculated in accordance with plans and specifications.
		1.6	***Materials*** appropriate to work application are identified, obtained, prepared, safely handled and located ready for use.
		1.7	***Environmental requirements*** are identified for the project in accordance with environmental plans and ***statutory and regulatory authority*** obligations, and are applied.
2	Set out fasteners.	2.1	***Minimum distances for set out*** from edge of substrate material are adhered to in accordance with legislation, regulations and codes of practice.
		2.2	Material is located and temporarily held or fixed into designed position according to detailed drawings.
3	Use EPT.	3.1	EPT is checked for operation according to manufacturer specifications and safety (OHS) requirements for ***use of EPT***.
		3.2	Fastener is selected according to requirements of job.
		3.3	Charge is selected to assessed requirements for material,

© Commonwealth of Australia, 2025 Industry Skills Australia

			base and penetration.
		3.4	***Attachments*** and accessories are installed to EPT in accordance with manufacturer specifications and safety (OHS) requirements.
		3.5	***Fastener and charge*** in EPT are located to manufacturer specifications.
		3.6	EPT operation is carried out and fastener is fixed into place in accordance with manufacturer recommendations, legislation, regulations and codes of practice.
		3.7	Fastening penetration is checked and appropriate depth into material is applied.
		3.8	Power regulating device is adjusted for conditions.
		3.9	Misfire procedures are carried out according to manufacturer recommendations, legislation, regulations and codes of practice.
		3.10	Temporary holding and fixings are removed without damage to material.
4	Secure and store equipment and charges.	4.1	Charges are stored in designated container in accordance with legislation, regulations and codes of practice and used charges are recorded.
		4.2	Unused fasteners, the EPT and attachments are stored in a carry case in line with manufacturer recommendations.
		4.3	Logbook is checked and maintenance recorded according to manufacturer recommendations.
5	Maintain EPT and kit.	5.1	Safety features of tools are checked for serviceability in accordance with manufacturer operating manual.
		5.2	Tools are cleaned and lubricated to manufacturer recommendations.
		5.3	Periodic maintenance service is carried out to manufacturer specifications.
		5.4	Diminished stocks of charges and fasteners are

© Commonwealth of Australia, 2025 Industry Skills Australia

			replenished to designed effectiveness of EPT kit.
6	Clean up.	6.1	Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification.
		6.2	Plant, tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and interpret:
    - documentation from a variety of sources
    - drawings and specifications
  - report faults
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
  - written skills to record maintenance in logbook
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- numeracy skills to apply measurements and make calculations
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

© Commonwealth of Australia, 2025 Industry Skills Australia

Required knowledge

Required knowledge for this unit is:

- construction terminology
- EPT materials
- EPT charges and fasteners
- equipment safety manuals and instructions
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, specifications and drawings
- processes for the calculation of material requirements
- quality requirements
- relevant Acts, regulations and codes of practice
- security and storage procedures for equipment and charges
- types, characteristics, uses and limitations of plant, tools and equipment
- workplace and equipment safety requirements.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • locate, interpret and apply relevant information, standards and specifications • comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations • comply with organisational policies and

© Commonwealth of Australia, 2025 Industry Skills Australia

procedures, including quality requirements
- safely and effectively use tools and equipment
- communicate and work effectively and safely with others
- fix metal or timber to a steel, concrete or masonry base on one project of each to job specifications, including:
  - completion of stripping and assembly of the tool
  - completing log of serviceability
  - maintaining and cleaning
  - selecting charges and fasteners applicable to base material and material being fixed
  - misfire procedures
  - using attachments
  - complying with storage and security regulations and OHS requirements for the working environment
  - selecting signage
  - test fire.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities

© Commonwealth of Australia, 2025 Industry Skills Australia

must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

© Commonwealth of Australia, 2025 Industry Skills Australia

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions where specified
- memos
- MSDS
- organisation work specifications and requirements
- plans and specifications
- regulatory and legislative requirements pertaining to using EPT
- relevant Australian standards
- safe work procedures related to using EPT
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules.

Planning and preparation include:

- work site inspection
- equipment defect identification
- assessment of conditions and hazards
- determination of work requirements.

Safety (OHS) is to be in accordance with legislation, regulations, codes of practice, organisational safety policies and procedures, and project safety plan and may include:

- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling of materials
- hazard control
- hazardous materials and substances
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
  - earth leakage boxes

© Commonwealth of Australia, 2025 Industry Skills Australia

- lighting
- photovoltaic (solar) panels
- power cables, including overhead service trays, cables and conduits
- restricted access barriers
- surrounding structures
- traffic control
- trip hazards
- work site visitors and the public
- working at heights
- working in confined spaces
- working in proximity to others
- working with dangerous materials

- organisational first aid
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- use of firefighting equipment
- use of tools and equipment
- workplace environment and safety.

Tools and equipment may include:

- direct action EPT
- indirect action EPT
- clamps and levels.

Materials include:

- timber
- metals
- patented fasteners.

Environmental requirements include:

- clean-up management
- noise and dust
- vibration
- waste management.

Statutory and regulatory authorities include:

- federal, state and local authorities administering applicable Acts, regulations and codes of practice.

Minimum distance for set out of

- regulated minimum distances
- bases, including concrete, masonry or steel.

© Commonwealth of Australia, 2025 Industry Skills Australia

fasteners is to be in accordance with:

Use of EPT includes:

- stripping and assembling tools
- completing log of serviceability
- maintaining and cleaning tools
- selecting charges and fasteners applicable to the base material and material being fixed
- misfire procedures
- using attachments
- complying with storage and security regulations and OHS requirements for the working environment
- selecting signage
- test fire.

Attachments include:

- channel, rebate and other manufacturer attachments.

Fastener and charge include:

- firing a test shot with misfire procedures, complying with the regulated safety procedure for misfire.

CPCCCM2008B Erect and dismantle restricted height scaffolding

Modification History

Photovoltaic (solar) panels added to range statement

Equivalent to CPCCCM2008A

Unit Descriptor

This unit of competency specifies the outcomes required to erect and dismantle restricted height scaffolding to provide work platforms for various occupational applications. It includes placement of safety barriers and only involves modular scaffolding restricted to a height of 4 metres.

Application of the Unit

This unit of competency supports achievement of skills to handle, erect and dismantle a range of restricted height scaffolding systems, which may include working with others and as a member of a team.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

© Commonwealth of Australia, 2025 Industry Skills Australia

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Plan and prepare.	1.1	Work instructions, including plans, specifications, quality requirements and operational details, are obtained from relevant sources of ***information***, confirmed and applied for ***planning and preparation*** purposes.
		1.2	***Workplace health and safety (WHS)*** requirements are followed in accordance with safety plans and policies.
		1.3	Signage and barricade requirements are identified and implemented.
		1.4	Plant, ***tools and equipment*** are selected to carry out tasks consistent with job requirements, are checked for serviceability, and any faults are rectified or reported prior to commencement.
		1.5	***Scaffolding*** quantity requirements are calculated in accordance with plans, specifications and ***quality requirements***.
		1.6	Materials appropriate to the work application are identified, obtained, prepared, safely handled and located ready for use.
		1.7	***Environmental requirements*** are identified for the project in accordance with environmental plans and ***statutory and regulatory authority*** obligations, and are applied.
2	Erect scaffolding.	2.1	***Purpose for scaffolding*** is confirmed and associated work tasks are identified.
		2.2	Expected loading on scaffold and supporting structure is determined using load tables.
		2.3	Site access and egress routes are identified.
		2.4	Scaffolding and components are selected and inspected

© Commonwealth of Australia, 2025 Industry Skills Australia

			with damaged components labelled and rejected or repaired.
		2.5	Adequate footing is established in accordance with Australian standard for scaffolding.
		2.6	Scaffolding is erected in accordance with regulations, planned hazard prevention and control measures, acceptable safe work practices and manufacturer requirements.
3	Inspect, repair and alter scaffolding.	3.1	Critical structural and safety areas of scaffolding are inspected for damage, corrosion and wear.
		3.2	Current use of scaffolding is checked for compliance with type of scaffolding equipment.
		3.3	Inspection log and handover are completed.
		3.4	Scaffolding is reviewed to determine if changes or modifications were scheduled as per original planning.
		3.5	Alteration or repair is carried out where specified.
4	Dismantle scaffolding.	4.1	Scaffolding is dismantled using reverse procedure as for erection.
5	Clean up.	5.1	Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification.
		5.2	Plant, tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

© Commonwealth of Australia, 2025 Industry Skills Australia

Required skills for this unit are:

- communication skills to:
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and interpret:
    - documentation from a variety of sources
    - drawings and specifications
  - report faults
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
  - written skills to record maintenance in logbooks
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- numeracy skills to apply measurements and make calculations
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- general construction terminology
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, specifications and drawings
- processes for the calculation of material requirements
- quality requirements
- relevant Acts, regulations and codes of practice
- scaffolding equipment
- scaffolding techniques
- shifting devices
- types, characteristics, uses and limitations of plant, tools and equipment
- workplace and equipment safety requirements.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations
- comply with organisational policies and procedures, including quality requirements
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others
- complete planning, erection and dismantling of a modular scaffolding system, in accordance with JSA and safe work method statements and regulations, including a minimum of:
  - three bays (one with a return)
  - one lift with ladder
  - fall and edge protection.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further

learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:

- diagrams or sketches
- engineers' design specifications and manufacturer specifications and instructions, where specified
- instructions issued by authorised organisational or external personnel
- memos
- MSDS
- regulatory and legislative requirements pertaining to erecting and dismantling restricted height scaffolding
- relevant Australian standards
- safe work procedures related to erecting and dismantling restricted height scaffolding
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules, plans and specifications.

© Commonwealth of Australia, 2025 Industry Skills Australia

Planning and preparation include:

- work site inspection, equipment defect identification, assessment of conditions and hazards, and determination of work requirements
- erection of scaffolding to a maximum height of 4 metres, including placement, sequencing, squaring, levelling and the reverse for dismantling
- establishment of footings, including review of JSAs to determine bearing capacity of ground or working surfaces
- alteration and repair, which may be required due to storm damage, accidents, misuse and process changes.

Workplace health and safety is to be in accordance with legislation, regulations, codes of practice, organisational safety policies and procedures, and project safety plan and may include:

- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling of materials
- hazard control
- hazardous materials and substances
  - safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
  - earth leakage boxes
  - lighting
  - photovoltaic (solar) panels
  - power cables, including overhead service trays, cables and conduits
  - restricted access barriers
  - surrounding structures
  - traffic control
  - trip hazards
  - work site visitors and the public
  - working at heights
  - working in confined spaces
  - working in proximity to others
  - working with dangerous materials
- organisational first aid
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- use of firefighting equipment
- use of tools and equipment

	• workplace environment and safety.
Tools and equipment include:	• aluminium modular scaffolding equipment • hammers • ladders • scaffolding planks • shovels and spanners • spirit levels • steel box spanners • tape measures.
Scaffolding type and quantity requirements:	• types of restricted height scaffolding may include systems scaffolding, A frame, H frame, tube and coupler, and aluminium (and modular to a maximum height of 4 metres).
Quality requirements include relevant regulations, including:	• Australian standards • internal company quality policy and standards • manufacturer specifications, where specified • workplace operations and procedures.
Environmental requirements include:	• clean-up protection • noise and dust • waste management.
Statutory and regulatory authorities include:	• federal, state and local authorities administering applicable Acts, regulations and codes of practice.
Purpose for scaffolding includes:	• work platforms for various occupational applications.

CPCCCM2010B Work safely at heights

Modification History

Photovoltaic (solar) panels added to range statement

Equivalent to CPCCCM2010A

Unit Descriptor

This unit of competency specifies the outcomes required to work safely on construction sites where the work activity involves working above 1.5 metres from ground level and where fall protection measures are required.

Application of the Unit

Construction work is undertaken on domestic and commercial work sites within new construction, renovation or refurbishment, and maintenance.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Industry Skills Australia

Elements and Performance Criteria

1	Identify work area requirements.	1.1	Site of proposed ***work at heights*** is identified from relevant ***information***.
		1.2	Method of accessing work area is identified.
		1.3	Tasks to be completed are identified from work orders and supervisor instructions.
		1.4	Fall protection equipment is identified if required by site job ***workplace health and safety (WHS)*** analysis and ***statutory and regulatory*** requirements.
		1.5	Approved methods of moving tools and equipment to work area are identified to minimise potential of falling objects, removal of scaffold components, inappropriate carrying of materials on ladders, and excessive bending or twisting in pass-up situations.
2	Access work area.	2.1	Fall protection equipment where required is correctly fitted, adjusted and anchored.
		2.2	Arrangements are made to appropriately install required equipment taking account of all potential ***hazards***.
		2.3	Appropriate methods are used to access work area for self, ***tools and equipment***, and ***materials***.
		2.4	Tools and materials are placed to eliminate or at least minimise the risk of items being knocked down.
3	Conduct work tasks.	3.1	Work is conducted following workplace approved procedures.
		3.2	Fall protection equipment is kept in place and adjusted appropriately to cater for movement during work.
		3.3	Scaffold components and fall barriers are kept in place during work.
		3.4	Egress from work area is completed following work site supervisor approved methods for self, tools, materials

and ***environmental requirements***.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- construction terminology
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- quality requirements
- types, characteristics, uses and limitation of plant, tools and equipment
- workplace and equipment safety requirements.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

© Commonwealth of Australia, 2025 Industry Skills Australia

Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan, OHS regulations and state and territory legislation applicable to workplace operations
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others
- select and use appropriate height access and fall protection equipment and work methods, including inspecting fall protection equipment, scaffold and fall barriers for faults
- apply knowledge of industry products to identify:
  - manual handling risks
  - types of lifting and support structures approved for use
- modify work activities to cater for variations in work site procedures, contexts and environment and use appropriate behaviour for safe work at heights
- use safe handling requirements, based on information provided, for equipment, products and materials.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement

© Commonwealth of Australia, 2025 Industry Skills Australia

- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning

© Commonwealth of Australia, 2025 Industry Skills Australia

experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work at heights includes:

- assessment of conditions and hazards
- determination of work requirements
- identification of equipment defects
- inspection of work sites.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- material safety data sheets (MSDS)
- memos
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules, plans and specifications.

Workplace health and safety is to be in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan

- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling of materials
- hazard control

© Commonwealth of Australia, 2025 Industry Skills Australia

and may include:

- hazardous materials and substances
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
  - earth leakage boxes
  - lighting
  - photovoltaic (solar) panels
  - power cables, including overhead service trays, cables and conduits
  - restricted access barriers
  - surrounding structures
  - traffic control
  - trip hazards
  - work site visitors and the public
  - working in confined spaces
  - working in proximity to others
  - working with dangerous materials
- organisational first aid
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- relevant OHS legislation applying in the jurisdiction where work is carried out, including:
  - AS6001 - 1999 Working platforms for domestic application
  - AS1576 - Scaffolding
  - AS/NZS4576 - 1995 Guidelines for scaffolding
- use of tools and equipment
- workplace environment and safety.

Statutory and regulatory authorities include:

- federal, state and local authorities administering applicable Acts, regulations and codes of practice.

Hazards include:

- air temperature
- construction activity involving other workers and contractors
- dust and vapours
- electrical equipment
- energy sources
- equipment and materials
- hazardous materials

© Commonwealth of Australia, 2025 Industry Skills Australia

- light
- manual handling
- moisture
- noise
- pholtovoltaic (solar) panels
- stationary and moving plant
- work at heights.

Tools and equipment include:

- air compressors and hoses
- hand and power tools
- nail guns
- power leads
- scaffolding.

Materials include:

- materials used on the construction work site.

Environmental requirements include:

- clean-up management
- noise and dust
- vibration
- waste management.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare.	1.1. Work instructions, including plans, specifications, quality requirements and operational details, are obtained, confirmed and applied from relevant ***information*** for ***planning and preparation***. 1.2. ***Safety*** (***OHS***) requirements are followed in accordance with safety plans and policies. 1.3. Signage and barricade requirements are identified and implemented. 1.4. ***Plant***, ***tools and equipment*** are selected to carry out tasks are consistent with job requirements, checked for serviceability, and any faults are rectified or reported prior to commencement. 1.5. ***Environmental requirements*** are identified for the project in accordance with environmental plans and ***statutory and regulatory authority*** obligations, and are applied.
2. Apply safe work practices.	2.1. Relevant authorities are contacted to identify ***electrical sources*** and type. 2.2. Plant is positioned according to work method statement and job safety analyses (JSAs). 2.3. Plant procedures are followed to comply with work method statement and JSAs. 2.4. Work is conducted in or around the power source,

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	service or asset. 2.5. Personnel, plant and equipment are retracted from powered area following safe work method statement and JSAs.
3. Clean up.	3.1. Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification. 3.2. Plant, tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices. 3.3. Work completion procedures are applied and relevant personnel are notified that work is finished.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - identify electrical source and type from relevant authorities
  - read and interpret:
    - documentation from a variety of sources
    - drawings and specifications
  - report faults
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- numeracy skills to apply measurements and make calculations
- organisational skills, including the ability to plan and set out work

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- construction terminology
- electrical safety on construction work sites
- first aid including cardiopulmonary resuscitation (CPR)
- JSA and safe work method statements
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, specifications and drawings
- quality requirements
- site specific emergency procedures
- types, characteristics, uses and limitations of plant, tools and equipment
- working at heights
- working with electrical power techniques
- workplace and equipment safety requirements.

CPCCCO3054A Operate concrete agitator trucks

Modification History

This version first released with CPC08 Construction, Plumbing and Services Training Package Version 9.

- Changes to unit title, performance criteria, required skills and knowledge, range statement, and methods of assessment
- Range of other minor editorial changes

Not equivalent to CPCCCO3034A Conduct concrete agitator truck operations

Unit Descriptor

This unit of competency specifies the outcomes required to operate concrete agitator trucks in support of construction projects.

The unit covers planning and preparing for work, conducting operational checks, safely and effectively operating a concrete agitator truck and associated equipment for a range of mandatory tasks, and conducting operator maintenance and work finalisation activities. The unit may include working with others and as a member of a team.

Application of the Unit

This unit of competency supports the role of those who operate concrete agitator trucks used to supply concrete for residential, commercial or civil construction sites.

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements apply to concreting work in different states and territories. Candidates are advised to consult with the relevant regulatory authorities.

Pre-Requisites

CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry

Employability Skills Information

This unit contains employability skills.

© Commonwealth of Australia, 2025 Industry Skills Australia

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Plan and prepare.	1.1	Work instructions, ***work health and safety (WHS) requirements*** and other ***information*** relevant to the work are identified, confirmed and applied for ***planning and preparation*** purposes.
		1.2	***Tools and equipment*** consistent with job requirements are selected and checked for serviceability, and faults are rectified and reported before work begins.
		1.3	Materials appropriate to the work application are obtained, prepared, safely handled and located ready for use.
		1.4	***Environmental requirements*** are identified for the project according to environmental plans and regulatory obligations.
2	Conduct machine pre-operational checks.	2.1	Pre-start, start-up, park and shut-down procedures, including emergency shut-down procedures, are carried out according to manufacturer and site-specific requirements.
		2.2	Vehicle controls and ***functions*** are checked for serviceability and faults are rectified and reported.
		2.3	***Agitator controls*** and functions are checked for serviceability, and faults are rectified and reported.
3	Operate the	3.1	Site hazards associated with truck operations are identified and safe operating techniques are used to

© Commonwealth of Australia, 2025 Industry Skills Australia

	agitator truck.		minimise risk.
		3.2	Engine power is managed to ensure efficiency of concrete agitator truck movements and to minimise damage to the engine and gears.
		3.3	Engine power is coordinated with gear selection ensuring smooth transition and operation within torque range.
		3.4	Truck is operated to work instructions according to company operating procedures.
		3.5	Road and traffic conditions are monitored taking into account road standards, traffic flow, distance and load, and ensuring no injury to people or damage to property, equipment, loads and facilities.
		3.6	Truck is brought to a halt smoothly, using the engine retarder, gears and brakes and minimising the wear and tear on vehicle.
4	Load, transport and discharge concrete.	4.1	Concrete agitator truck is positioned at load and ***discharge points*** with a minimum of manoeuvres.
		4.2	Concrete agitator truck is loaded to within authorised carrying capacity of ***concrete mixes*** to suit the site and task conditions.
		4.3	Concrete agitator truck is moved from loading to discharge point safely and smoothly avoiding surge and sway.
		4.4	***Concrete is discharged*** according to task specifications.
		4.5	Discharge systems, including chutes and adaptors, are monitored and maintained throughout the operations.
5	Carry out driver maintenance.	5.1	Concrete agitator truck is safely parked, prepared for ***maintenance*** and shut down as per manufacturer manual and organisational requirements.
		5.2	Inspection and fault finding are conducted according to manufacturer specifications and recorded according to organisational procedures.

© Commonwealth of Australia, 2025 Industry Skills Australia

		5.3	Defective parts are removed and replaced safely and effectively according to manufacturer instructions.
		5.4	Regular programmed maintenance tasks are carried out according to manufacturer and organisational requirements.
6	Clean up.	6.1	Work area is cleared and materials disposed of, reused or recycled according to project environmental management plan.
		6.2	Vehicle, bowl, tools and equipment are cleaned, checked, maintained and stored according to manufacturer recommendations and standard work practices.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- learning skills to:
  - evaluate own actions and make judgments about performance and necessary improvements
  - respond to change, such as differences in work site, and environmental and quality requirements
- numeracy skills to calculate and confirm correct quantities of materials for work tasks
- oral communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, and share information
  - report work site hazards to appropriate personnel, including faults in tools, equipment or materials
  - use language and concepts appropriate to cultural differences
- reading skills to:
  - interpret documentation, including drawings and specifications
  - understand written instructions, procedures and signage
  - interpret manufacturer instructions for safely handling tools and equipment
- writing skills to complete pre-operational checklists and equipment fault forms

© Commonwealth of Australia, 2025 Industry Skills Australia

Required knowledge

- characteristics, technical capabilities and limitations of concrete agitator truck systems:
  - operational, maintenance and basic diagnostic procedures
  - safe operating techniques in all terrain
- construction activity sequences relating to concreting operations
- general construction terminology
- types, location and usage of relevant safety information:
  - job safety analyses (JSA) and safe work method statements (SWMS)
  - safety data sheets (SDS)
  - safety manuals and instructions for plant, tools and equipment
  - signage
  - environmental and work site safety plans
- quality requirements relating to the operation of a concrete agitator truck
- requirements for safe handling of materials
- site and equipment safety requirements, including site isolation and traffic control responsibilities and authorities
- state or territory regulatory requirements relating to concrete agitator truck operations

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed by observation in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person should demonstrate the ability to:

- conduct concrete agitator truck operations, over not less than three shifts and two different sites, including the safe and effective:
  - positioning of the vehicle at the load point
  - loading and transporting of concrete
  - discharging of concrete at work site to specification
  - discharging directly to site
  - discharging to wheelbarrow and hopper
  - applying emergency procedures
- conduct authorised operator maintenance

© Commonwealth of Australia, 2025 Industry Skills Australia

- locate, interpret and apply relevant information, standards and specifications relating to concrete agitator truck operations
- comply with site safety plans and procedures
- comply with organisational policies and procedures, relating to concrete agitator truck operations, including quality requirements
- communicate and work effectively and safely with others during each stage of the concrete agitator truck operation.

Context of and specific resources for assessment

Assessment of this unit:

- must be in the context of the work environment
- may be conducted in an off-site context, provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills
- must meet relevant compliance requirements.

Resource implications for assessment include:

- an induction procedure
- realistic tasks or simulated tasks covering the mandatory task requirements
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- safety data sheets.

Method of assessment

Assessment for this unit must verify the practical application of the required skills and knowledge, using a combination of the following methods:

- direct observation of tasks in real or simulated work conditions
- questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- review of relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Guidance information for assessment

This unit could be assessed on its own or in combination with other units relevant to the job function.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the

© Commonwealth of Australia, 2025 Industry Skills Australia

provision of appropriate assessment support.

Assessment processes and techniques should, as far as is practical, take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work health and safety requirements must comply with state and territory legislation and regulations and project safety plan, and may include:

- assistance of others or the use of manual or mechanical lifting devices with handling activities where size, weight or other issues, such as disability, are a factor
- emergency procedures, including extinguishing fires, organisational first aid requirements, and evacuation procedures
- hazard control
- hazardous materials and substances
- hazards and risks, including uneven or unstable terrain, trees, fires, overhead services, bridges, buildings, excavations, traffic, embankments, structures and hazardous materials
- personal protective equipment (PPE) prescribed under legislation, regulations and workplace policies and practices
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
  - earth leakage boxes
  - lighting
  - power cables, including overhead service trays, cables and conduits
  - signage and restricted access barriers
  - surrounding structures
  - traffic control
  - trip hazards
  - work site visitors and the public
  - working at heights
  - working in confined spaces
  - working in proximity to others

© Commonwealth of Australia, 2025 Industry Skills Australia

	• working outdoors in warm climates • safe parking practices, including ensuring access ways are clear; and that equipment and machinery are clear of overhangs and refuelling sites, a safe distance from excavations, and secured from unauthorised access or movement • use of firefighting equipment • use of tools and equipment • workplace environmental requirements and safety.
Information may include:	• instructions issued by authorised organisational and external personnel • memos • regulatory and legislative requirements relating to operation of concrete agitator trucks on construction sites • relevant Australian standards • safe work procedures relating to operation of concrete agitator trucks on construction sites • safety data sheets • signage • verbal, written and diagrammatic instructions, including manufacturer specifications and instructions where specified • work bulletins • work schedules, plans and specifications.
Planning and preparation must include:	• assessing conditions and hazards • determining work requirements and safety plans and procedures • identifying and rectifying equipment defects • inspecting work sites.
Tools and equipment must include:	• hand tools and maintenance equipment associated with the particular concrete agitator truck.
Environmental requirements may include:	• clean-up management • dust and noise control • stormwater management • vibration management • waste management.
Functions must include:	• brakes • manoeuverability • steering.
Agitator controls:	• relate to speed, revolutions, forward and return • may be air, mechanical or electrically actuated.
Discharge points:	• must include: • directly to site

© Commonwealth of Australia, 2025 Industry Skills Australia

- into a wheelbarrow and hopper
- may include into a kibble.

Concrete mixes:

- may be relatively dry or increasingly wet
- will include block-fill, pool mix, topping, slab, footing and kerb and guttering.

Maintenance:

- must include:
  - authorised servicing
  - cleaning
  - monitoring, recording and reporting faults
- may include:
  - conducting authorised minor replacements
  - providing assistance to maintenance personnel during maintenance and repair activities.

Unit Descriptor

Unit descriptor This unit specifies the outcomes required to perform slinging techniques, including the selection and inspection of lifting gear and/or the directing of the crane operator in the movement of the load when the load is out of view of the crane/ operator for licensing purposes.

Application of the Unit

Application of the unit

This unit covers the scope of work to demonstrate competency in the application of slinging techniques, selection and inspection of lifting gear and/or the directing of the crane/ operator in the movement of the load.

This unit is based upon the National Standard for Licensing Persons Performing High Risk Work.

This unit in its current form meets state and territory licensing requirements. Any alteration will result in a unit which is not acceptable to regulators for the purpose of licensing.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan job.	1.1. ***Site information*** is obtained and related to the task. 1.2. ***Hazard*** s and potential hazards associated with the slinging and directing of loads are identified. 1.3. ***Hazard control measures*** consistent with ***appropriate standards*** are identified to ensure the safety of personnel and equipment. 1.4. The weight, dimensions and centre of gravity of the load are identified and assessed. 1.5. Suitable lifting/slinging points on the load are identified. 1.6. Appropriate ***lifting equipment*** needs are assessed. 1.7. Appropriate ***communication methods*** are assessed with ***crane***/ operators and other ***appropriate personnel***. 1.8. Manufacturer's specifications/information is obtained for special loads where necessary.
2. Select and inspect equipment.	2.1. Lifting equipment appropriate to the task is selected. 2.2. Lifting equipment is inspected for serviceability. 2.3. Damaged or excessively worn lifting equipment is identified, labelled and rejected.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.4. Appropriate communication methods for the crane/operator and appropriate personnel are selected.
	2.5. Appropriate ***communication equipment*** is selected and its serviceability is checked.
	2.6. Appropriate ***personal protective equipment*** (PPE) is selected and checked.
3. Prepare site and equipment.	3.1. Hazard prevention/control measures are applied consistent with appropriate standards to ensure the safety of personnel and equipment.
	3.2. Appropriate slinging method is selected.
	3.3. Lifting equipment is prepared and assembled where appropriate.
	3.4. Load destination is prepared.
4. Perform task.	4.1. Lifting equipment is attached and secured to the lifting hook using appropriate techniques.
	4.2. Lifting hook is positioned over the load centre of gravity.
	4.3. Lifting equipment is attached and secured to the load in an appropriate manner.
	4.4. Tag line is attached and secured where appropriate.
	4.5. Test lift is conducted to ensure security of load.
	4.6. Load is moved maintaining stability and control at all times.
	4.7. Appropriate communication methods and ***communication signals*** are applied to safely coordinate the load movement both within sight and out-of-sight of crane operator.
	4.8. The load is landed to ensure that it is stable and secure from movement.
	4.9. Lifting equipment is removed or disconnected from load and prepared for next task or storage.
5. Shut down job and clean up.	5.1. Unserviceable lifting equipment inspected and rejected.
	5.2. ***Defective equipment*** is isolated and tagged.
	5.3. Lifting equipment is stored in accordance with procedures and appropriate standards.
	5.4. Hazard prevention/control measures are removed where appropriate.
	5.5. Excess materials from the work area are removed (where applicable).

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	5.6. Defects are reported and recorded according to procedures and appropriate action is taken.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication techniques in the workplace including whistles, hand signals and use of fixed channel two-way radios
- communication skills at a level sufficient to communicate with other site personnel
- calculate rated capacity of lifting equipment
- apply different methods for making temporary connections to loads using fibre and synthetic ropes
- ability to interpret rated capacity and working load limit tags
- hazard identification and control
- slinging techniques
- selection and inspection of lifting equipment
- directing crane operators in the moving of loads in a safe manner, using a slewing crane
- inspection and care of a wide range of lifting equipment to appropriate Australian Standards and/or manufacturer's specifications.

Required knowledge

Required knowledge for this unit is:

- appropriate mathematical procedures for estimation and measurement of loads
- basic knowledge of types of cranes and their functions
- Commonwealth, state or territory OHS legislation, standards and codes of practice relevant to the full range of techniques for undertaking dogging activities
- load stability and safety factors in line with manufacturer's specifications
- types of lifting equipment and slinging techniques for use, and their limitations and performance in a wide range of conditions (including but not limited to slings, beams, accessories, clamps, work-boxes, bins and pallets)
- understanding of the hierarchy of control.

© Commonwealth of Australia, 2025 Industry Skills Australia

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Successful assessment of this unit meets the competency requirement of the National Standard for licensing Persons Performing High Risk Work. State/Territory OHS regulators have mandated the use of Assessment Instruments and Instructions for Assessment of this unit which have been endorsed by the national body responsible for OHS matters.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • comply with Commonwealth, state or territory OHS legislation, standards relevant to safe dogging and crane operations. • communicate and work safely with others in the work area. • apply Hazard prevention and control measures consistent with appropriate standards. • apply to move loads in conjunction with cranes including, the reading of tags, slinging, loading, directing and landing loads with a slewing mobile crane with a telescopic boom and a winch, in and out of sight of the crane/ operator, moving four loads of varying shapes, sizes and weights. • use fibre and/or synthetic rope as tag lines, and connecting to loads using clove hitch, rolling hitch, bowline and single sheetbend. • conduct pre and post operational checks of the lifting equipment.
Context of and specific resources for assessment	• Assessment of the safe and effective application of knowledge and skill to workplace tasks (performance) must be undertaken using the national OHS endorsed Assessment Instrument • Assessment of performance must be

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE

	undertaken either in the workplace or in a realistically simulated workplace setting
	• Assessors must ensure that the assessment in the workplace is organised through a workplace supervisor to ensure that all the required equipment and materials and a suitable working area is made available to suit the assessment and the workplace
	• Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints
	• Assessment is to comply with the requirements of any relevant Standards or operating procedures for dogging activities
	• Applicants must have access to:
	  • personal protective equipment (PPE) for the purpose of the performance assessment.
	  • four different loads as prescribed in the endorsed assessment instrument
	  • lifting and associated equipment
	  • suitable slewing crane
	  • communication equipment (eg. fixed channel, two-way radios) as applicable.

Method of assessment	Assessment must be conducted using the national OHS endorsed Assessment Instrument. This Instrument provides instruction on the application of the assessment. Assessment may be in conjunction with the assessment of other units of competency. The use of **'simulators'** in the assessment of this unit of competency is **not acceptable**. Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge. Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
Guidance information for assessment	Further information about endorsed Assessment Instruments may be obtained from state/territory OHS regulators.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Site informationmay include but not be limited to	• local conditions such as access and egress • work method statements.
Hazards may include but not limited to:	• ground stability (eg. ground condition, recently filled trenches, slopes) • overhead hazards (e.g. power lines, service pipes, trees, buildings, etc) • insufficient lighting • traffic (e.g. pedestrians, vehicles, plant) • weather (e.g. wind, lightning, storms) • other specific hazards (e.g. trip hazards, heights, radio interference, etc).
Hazard prevention/control measures	The systematic process of eliminating or reducing the risk to personnel and property through the application of controls. It includes the application of the hierarchy of controls, including: 1. elimination. 2. substitution. 3. isolation. 4. engineered control measures. 5. safe work practices. 6. personal protective equipment.
Appropriate standard s may include:	• codes of practice • legislation • Australian Standards • manufacturer's specifications • industry standards.

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

Lifting Equipment may include but not limited to:	• fibre ropes • wire ropes • chain • wire and synthetic slings • shackles • eyebolts • beam clamps • plate clamps • spreader beams • lifting beams • pallet forks and cages • concrete kibbles • personnel boxes.
Communication Methods may include but are not limited to:	• written instructions • signage, • hand signals • listening • questioning to confirm understanding • appropriate worksite protocol.
Cranes may include but not limited to:	• tower cranes (including self erecting) • portal boom cranes • vehicle loading cranes • slewing mobile cranes • non-slewing cranes • derrick cranes.
Appropriate personnel may include but are not limited to:	• supervisors • colleagues • managers who are authorised to take responsibility for the workplace or operations.
Communication Equipment may include but not limited to:	• fixed channel two-way radios • whistles • bells.
Personal protective equipment (PPE) may include but not limited to:	• hard hat • safety boots • gloves • high visibility clothing • reflective vest • relevant breathing, hearing, sight, skin and sun protection.
Load destination may include but	• ground

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

not limited to:	• loading platforms • suspended floors • vehicles.
Communication signals may include but not limited to:	• stop - hand • stop - whistle • hoist up - hand • hoist up - whistle • hoist down - hand • hoist down - whistle • luff boom down - hand • luff boom down - whistle • luff boom up - hand • luff boom up - whistle • telescope out - hand • telescope out - whistle • telescope in - hand • telescope in - whistle • slew left - hand • slew left - whistle • slew right - hand • slew right - whistle.
Defective Equipment may include but not limited to:	• excessive wear • damage • stretched • broken wires • cut/damaged fibres.

CPCCLRG3001A Licence to perform rigging basic level

Modification History

Not Applicable

Unit Descriptor

Unit descriptor This unit specifies the outcomes required to perform basic rigging work associated with movement of plant and equipment, steel erections, hoists (including mast climbing hoists), placement of pre-cast concrete, safety nets and static lines, perimeter safety screens and shutters; and cantilever crane loading platforms for licensing purposes.

Application of the Unit

Application of the unit

This unit requires the applicant to be able plan the work, select and inspect equipment, set up task, erect structures and plant and dismantle structures and plant.

This unit is based upon the National Standard for Licensing Persons Performing High Risk Work.

This unit in its current form meets state and territory licensing requirements. Any alteration will result in a unit which is not acceptable to regulators for the purpose of licensing.

This unit has a pre-requisite requirement. This requirement may be met by either the successful completion of the unit *CPCCLDG3001A Licence to perform dogging* or holding a valid licence for dogging.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan job.	1.1. Task to be undertaken is assessed. 1.2. Potential workplace ***hazards*** are identified. 1.3. ***Hazard control measures*** are identified consistent with ***appropriate standards*** to ensure the safety of personnel and equipment. 1.4. Site information is obtained. 1.5. All ***forces and loads*** associated with erecting and dismantling ***structures*** and ***associated plant*** are considered in consultation with ***appropriate personnel***. 1.6. ***Rigging equipment*** and ***associated equipment*** are identified in consultation with appropriate personnel according to ***procedures*** and site information.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.7. *Safety equipment* is identified.
	1.8. Appropriate ***communication methods*** are identified with appropriate personnel.
2. Select and inspect equipment.	2.1. Rigging equipment and associated equipment are selected and inspected according to procedures and the appropriate standard.
	2.2. Safety equipment is selected and inspected according to procedures.
	2.3. All defective rigging equipment, associated equipment and safety equipment is isolated, reported and recorded according to procedures.
	2.4. ***Communication equipment*** is selected and inspected for serviceability (where applicable.
3. Set up task.	3.1. Appropriate ***hazard prevention***/***control measures*** are applied to the work area according to procedures.
	3.2. ***Ground suitability*** is inspected and checked (where appropriate).
	3.3. Site information is reviewed, interpreted and communicated to appropriate personnel and ***appropriate personnel***.
	3.4. All forces and loads associated with erecting and dismantling structures and associated plant are determined in consultation with appropriate personnel.
	3.5. Safety equipment is fitted and worn correctly (where appropriate).
	3.6. Rigging equipment and associated plant are positioned for work application and stability according to procedures.
	3.7. Methods of applying ***temporary connections*** using fibre rope are applied according to procedures and the appropriate standard.
4. Erect structures and plant.	4.1. Structures and associated plant are erected according to procedures and site information.
	4.2. Stability of structures and associated plant is maintained during erection according to procedures.
	4.3. Work is conducted safely at heights including safe and effective use of safety equipment.
	4.4. Appropriate communication methods and communication equipment, are used to co-ordinate the tasks.
	4.5. Associated plant and rigging equipment is used

ELEMENT	PERFORMANCE CRITERIA
	according to procedures and the appropriate standard. 4.6. Temporary guys, ties, propping and shoring, including ***flexible steel wire rope***, and tubing, are connected where required. 4.7. Associated equipment is used in a safe and appropriate manner. 4.8. The completed task is inspected according to the appropriate standard. 4.9. Excess materials are removed from the work area (where applicable).
5. Dismantle structures and plant.	5.1. Structures and associated plant are dismantled according to procedures and the appropriate standard. 5.2. Work is conducted safely at heights including safe and effective use of safety equipment. 5.3. Stability of structures and associated plant is maintained during dismantling according to procedures. 5.4. Rigging equipment, associated equipment, safety equipment and associated plant are inspected for damage and defects. 5.5. All defective rigging equipment, associated equipment, associated plant and safety equipment are isolated reported and recorded according to procedures. 5.6. Rigging equipment and associated equipment are stored. according to procedures and the appropriate standard. 5.7. Hazard prevention/control measures are removed (where appropriate).

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

Required skills for this unit are:

- ability to calculate Safe Working Load (SWL) and Working Load Limit (WLL)
- ability to erect and dismantle, level, plumb and stabilise associated plant and structures
- ability to work safely at heights including the correct application of safety equipment.
- accurate interpretation of basic structural charts and structural plans (site information)
- applying methods for making temporary connections of ropes using fibre and synthetic types
- apply methods of splicing and whipping fibre and synthetic ropes
- correct application and use of all rigging and associated equipment
- risk assessment and hazard control strategies
- interpersonal and communication skills at a level sufficient to site/workplace requirements. This includes the relevant communication methods and equipment.
- verify problems and equipment faults and demonstrate appropriate response.

Required knowledge

Required knowledge for this unit is:

- appropriate mathematical procedures for estimation and measurement of loads
- ability to interpret manufacturer's specifications for all plant and equipment use in rigging operations
- knowledge of principles relating to all plant, equipment and structural stability
- knowledge of the types and functions of rigging, safety and associated equipment including an understanding of their limitations.
- organisational and workplace standards, requirements, policies and procedures for rigging
- understanding of the hierarchy of hazard identification and control
- relevant Commonwealth, state or territory and local government OHS legislation, standards and codes of practice for undertaking rigging activities
- understanding of inspection and maintenance requirements of a wide range of appropriate plant and equipment in line with Australian Standards or manufacturer's specifications
- estimation of ground bearing pressures of the full range of soil types and associated ground conditions for setting up plant and equipment.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Successful assessment of this unit meets the competency requirement of the National Standard for licensing Persons Performing High Risk Work.

State/Territory OHS regulators have mandated the use of Assessment Instruments and Instructions for Assessment endorsed by the national body responsible for OHS matters for the assessment of this unit.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- comply with OHS licensing legislation.
- effectively communicate and work safely with others in the work area.
- effectively conduct risk assessment and management procedures.
- effectively complete the following tasks:-
  - inspection of all plant and equipment, and
  - installation of a fall arrest system (Static line), and
  - use of a safety harness / fall arrest system, and
  - installation of crane loading platforms and
  - installation of a safety net, and
  - installation of a shutter and safety screen, and
  - demonstrated ability to work safely at heights, and
  - erection of structural steel, and
  - erection of precast panel, and
  - set up and operation of a winch for load movement, and
  - installation of a materials hoist, or
  - installation of a mast climber.
- effectively demonstrate the following knots,

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE

	bends and hitches:- • Sheet bend, • Becket hitch, • Running bowline, • Double bowline. • effectively demonstrate the following splices and whippings:- • Eye splice, • Back splice, • Short splice, • Sail makers whipping, • Common whipping, • West countryman's
Context of and specific resources for assessment	Assessment of the safe and effective application of knowledge and skill to workplace tasks (performance) must be undertaken using the National OHS endorsed Assessment Instrument. Assessment of performance must be undertaken either in the workplace or in a realistically simulated workplace setting. Assessors must ensure that the assessment in the workplace is organised to ensure that all the required equipment and materials and a suitable working area is made available to suit the assessment and the workplace. Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints. Assessment is to comply with the requirements of any relevant Standards or operating procedures for basic rigging. Applicants must have access to: • personal protective equipment (PPE) for the purpose of the Performance Assessment. • appropriate safety equipment in safe condition • appropriate rigging equipment, associated equipment associated plant in safe condition as described in the endorsed assessment instrument • communication equipment (e.g. two-way

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE

	radios) where applicable • appropriate materials as required for safe erection of structures • appropriate materials for conducting fibre rope slicing, whipping, knots, bends and hitches.
Method of assessment	Assessment must be conducted using the national OHS endorsed Assessment Instruments. These Instruments provide advice on their application. The use of **'simulators'** in the assessment of this unit of competency is **not acceptable**. Assessment may be in conjunction with the assessment of other units of competency. Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge. Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
Guidance information for assessment	Further information about endorsed Assessment Instruments may be obtained from state/territory OHS regulators.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Hazards may include but are not limited to:	• ground stability (e.g. ground condition, recently filled trenches, slopes) • overhead hazards (e.g. power lines, service pipes) (**NB**: minimum clearance distance from powerlines or electrical equipment as determined by relevant state authority or

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	electrical supply authority.) • traffic (e.g. pedestrians, vehicles, other plant) • insufficient lighting • environmental conditions (e.g. wind, lightning, storms) • other specific hazards (e.g. dangerous materials).
Hazard control measures:	Refers to the systematic process of eliminating or reducing the risk to personnel and property through the application of controls. It includes the application of the hierarchy of control, the six-step preference of control measures to manage and control risk: • elimination • substitution • isolation • engineering control measures • using safe work practices • personal protective equipment.
Appropriate standards may include:	• codes of practice • legislation • Australian Standards • manufacturer's specifications • industry standards (where applicable).
Site Information may include, but not limited to:	• local conditions such as access and egress, • work method statements, • site specific job safety analyses and other site specific documentation as required. • task plans / Schedules and structural plans.
Forces and Loads may include, but not limited to:	• dead loads • live loads • static load • dynamic loads • wind loads.
Structures may include but are not limited to:	• structural steel • precast panels.
Associated plant may include but not limited to:	• static lines • safety nets • hoists

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	• mast climbers • loading platforms.
Appropriate personnel may include:	• engineers • supervisors • colleagues • managers who are authorised to take responsibility for the workplace or operations.

Rigging Equipment may include but is not limited to:	• scaffolds
	• elevated work platforms
	• personnel box
	• cantilevered crane loading platforms
	• mast climbers.
	• safety screens and shutters
	• cranes including but not limited to:
	  • non-slewing cranes
	  • mobile slewing cranes
	  • vehicle loading cranes
	  • tower cranes
	  • self-erecting tower cranes
	  • portal boom cranes
	  • derrick cranes
	  • bridge and gantry cranes.

Associated equipment may include but is not limited to:	• all types of power and manually operated lifting gear • fibre ropes • flexible steel wire rope (FSWR) • chains • wire and synthetic slings • shackles • terminations • wedge sockets • eye bolts • beam clamps • plate clamps • rope grips • turnbuckles • rigging screws • chain blocks • lever blocks • lever-action winches

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	• sheaves • spreader bars • lifting beams • jacks • levers • skates • wedges • rollers • girder trolley
Procedures may include but is not limited to:	• manufacturer's guidelines (instructions, specifications or checklists) • industry operating procedures, relevant codes of practice • workplace procedures (work instructions, operating procedures, checklists).
Safety Equipment may include but not limited to:	• safety harness • energy absorber • lanyard • inertia reel • static safety lines • safety nets.
Communication Methods may include but is not limited to:	• verbal and non-verbal language • written instructions • signage • hand signals • listening, • questioning to confirm understanding, and appropriate worksite protocol. **NB**: Mobile phones are not to be used for signalling purposes during the rigging process.
Communication equipment may include but is not limited to:	• fixed channel two-way radios
Hazard prevention/control measures may include but is not limited to:	• safety tags on electrical switches/isolators • powerlines are insulated • safety observer used inside exclusion zone • power disconnected • traffic barricades and control • pedestrian barricades • trench covers

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	• movement of obstructions • personal protective equipment • adequate illumination • safety shutters and screens.
Ground suitability may include but is not limited to:	• rough uneven ground • backfilled ground • soft soils • hard compacted soil • rock • bitumen • concrete • suspended concrete floors • building roofs • landings • ground bearing pressure.
Appropriate personnel may include but not limited to	• other riggers • doggers • crane operators.
Temporary connections may include but not limited to:	• knots • bends • hitches • spicing • whipping.
Flexible Steel Wire Rope (***FSWR***) includes:	• identification, uses and connections. May include termination for: • static lines, • guys, • purchase systems, • lashing, • cranes, • hoist and winch ropes.

	4.6. Associated plant and rigging equipment is used according to procedures and the appropriate standard. 4.7. Associated equipment is used in a safe and appropriate manner. 4.8. The completed task is inspected according to the appropriate standard. 4.9. Excess materials are removed from the work area (where applicable)
5. Dismantle structures and plant.	5.1. Structures and associated plant are dismantled according to procedures and the appropriate standard. 5.2. Work is conducted safely at heights including safe and effective use of safety equipment. 5.3. Stability of structures and associated plant is maintained during dismantling according to procedures. 5.4. Rigging equipment, associated equipment, safety equipment and associated plant are inspected for damage and defects 5.5. All defective rigging equipment, associated equipment, associated plant and safety equipment are isolated reported and recorded according to procedures. 5.6. Rigging equipment and associated equipment are stored according to procedures and the appropriate standard. 5.7. Hazard prevention/control measures are removed (where appropriate)

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to calculate Safe Working Load (SWL) and Working Load Limit (WLL)

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- ability to erect and dismantle, level, plumb and stabilise associated plant and structures
- ability to work safely at heights including the correct application of safety equipment.
- accurate interpretation of structural charts and structural plans (site information)
- correct application and use of all rigging and associated equipment
- risk assessment and hazard control strategies
- interpersonal and communication skills at a level sufficient to site/workplace requirements. This includes the relevant communication methods and equipment.
- verify problems and equipment faults and demonstrate appropriate response.

Required knowledge

Required knowledge for this unit is:

- appropriate mathematical procedures for estimation and measurement of loads
- ability to interpret manufacturer's specifications for all plant and equipment use in rigging operations
- knowledge of principles relating to all plant, equipment and structural stability
- knowledge of the types and functions of rigging, safety and associated equipment including an understanding of their limitations
- organisational and workplace standards, requirements, policies and procedures for rigging
- understanding of the hierarchy of hazard identification and control
- relevant Commonwealth, state or territory and local government OHS legislation, standards and codes of practice for undertaking rigging activities
- understanding of inspection and maintenance requirements of a wide range of appropriate plant and equipment in line with Australian Standards or manufacturer's specifications
- estimation of ground bearing pressures of the full range of soil types and associated ground conditions for setting up plant and equipment.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Successful assessment of this unit meets the competency requirement of the National Standard

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE

	for licensing Persons Performing High Risk Work. State/Territory OHS regulators have mandated the use of Assessment Instruments and Instructions for Assessment for this unit which have been endorsed by the national body responsible for OHS matters.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to:
	• comply with OHS licensing legislation.
	• effectively communicate and work safely with others in the work area.
	• effectively conduct risk assessment and management procedures.
	• effectively complete the following tasks:
	  • adding and removing a tower crane section, or
	  • adding and removing a crane lattice boom section, or
	  • erecting a non guyed tower (e.g. light tower, and
	  • perform a multiple crane lift, or
	  • a multiple winch lift, or
	  • a combination of a crane and winch lift, and
	  • lifting and installing a series of tilt-up panels, or
	  • lifting and installing a series of scenery panels (i.e. entertainment industry), and
	  • demolish/remove a series of tilt-up panel structures, or
	  • demolish/remove a series of scenery panel structures, and
	  • demolishing a concrete encased structural steel column and beam.
	• **NB**: All specifications for these performance tasks are detailed in the endorsed assessment instrument.
	• effectively conduct pre and post operational checks of intermediate rigging equipment.

Context of and specific resources for assessment	Assessment of the safe and effective application of knowledge and skill to workplace tasks (performance) must be undertaken using the

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE

	endorsed Assessment Instrument. Assessment of performance must be undertaken either in the workplace or in a realistically simulated workplace setting. Assessors must ensure that the assessment in the workplace is organised to ensure that all the required equipment and materials and a suitable working area is made available to suit the assessment and the workplace. Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints. Assessment is to comply with relevant appropriate standard requirements. Applicants must have access to: • personal protective equipment (PPE) for the purpose of the Performance Assessment • appropriate safety equipment is safe condition • appropriate rigging equipment, associated equipment associated plant in safe condition as described in the endorsed assessment instrument • communication equipment (e.g. radios) where applicable • appropriate materials as required for safe erection of structures.
Method of assessment	Assessment must be conducted using the endorsed Assessment Instruments. These Instruments provide advice on their application. The use of **'simulators'** in the assessment of this unit of competency is **not acceptable**. Assessment may be in conjunction with the assessment of other units of competency. Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge. Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE

Guidance information for assessment	Further information about endorsed Assessment Instruments may be obtained from state/territory OHS regulators.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Hazards may include but not limited to:	• ground stability (e.g. ground condition, recently filled trenches, slopes) • overhead hazards (e.g. power lines, service pipes) (**NB**: Minimum clearance distance from powerlines or electrical equipment as determined by relevant state authority or electrical supply authority) • traffic (e.g. pedestrians, vehicles, other plant) • insufficient lighting • environmental conditions (e.g. wind, lightning, storms) • other specific hazards (e.g. dangerous materials).
Hazard control measures:	Refers to the systematic process of eliminating or reducing the risk to personnel and property through the application of controls. It includes the application of the hierarchy of control, the six-step preference of control measures to manage and control risk: • elimination • substitution • isolation • engineering control measures • using safe work practices • personal protective equipment.

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

Appropriate standards may include but are not limited to:	• codes of practice • legislation • Australian Standards • manufacturer's specifications • industry standards (where applicable).
Site Information may include but is not limited to:	• local conditions such as access and egress • work method statements • site-specific job safety analyses and other site specific documentation as required • task plans /schedules and structural plans.
Forces and Loads may include but are not limited to:	• dead loads • live loads • static load • dynamic loads • wind loads.
Structures may include but not limited to:	• concrete tilt-up panels • scenery panels (used in entertainment) • non guyed light towers.
Associated plant may include but is not limited to:	• all types of cranes • conveyors • dredges • excavators.
Appropriate personnel may include but not limited to:	• supervisors • engineers • colleagues • managers who are authorised to take responsibility for the workplace or operations.

Rigging Equipment may include but is not limited to:	• scaffolds
	• elevated work platforms
	• stages
	• personnel box
	• cantilevered crane loading platforms,
	• mast climbers
	• safety screens and shutters
	• cranes including but not limited to:
	  • non-slewing cranes
	  • mobile slewing cranes
	  • vehicle loading cranes
	  • tower cranes

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	• self-erecting tower cranes • portal boom cranes • derrick cranes • bridge and gantry cranes.
Associated equipment may include but is not limited to:	• all associated equipment at the basic rigging level, and • lifting clutches (swift lifts) • chain motors.
Procedures may include but are not limited to:	• manufacturer's guidelines (instructions, specifications or checklists) • industry operating procedures, relevant codes of practice • workplace procedures (work instructions, operating procedures, checklists).
Safety Equipment may include but not limited to:	• safety harness • energy absorber • lanyard • inertia reel • safety nets • static lines.
Communication Methods may include but not limited to:	• verbal and non-verbal language • written instructions • signage • hand signals • listening, • questioning to confirm understanding, and appropriate worksite protocol. **NB**: Mobile phones are not to be used for signalling purposes during the rigging process.
Communication equipment may include but is not limited to:	• fixed channel two-way radios
Hazard prevention/control measures may include but is not limited to:	• safety tags on electrical switches/isolators • powerlines are insulated • safety observer used inside exclusion zone • power disconnected • traffic barricades and control • pedestrian barricades • trench covers • movement of obstructions

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	• personal protective equipment • adequate illumination.
Ground suitability may include but is not limited to:	• rough uneven ground • backfilled ground • soft soils • hard compacted soil • rock • bitumen • concrete • suspended concrete floors • building roofs • landings • ground bearing pressure.
Appropriate personnel may include but not limited to:	• other riggers • doggers • crane operators.
Flexible Steel Wire Rope (***FSWR***) includes:	• identification, uses and connections. May include termination for: • static lines • guys • purchase systems • lashing • cranes • hoist and winch ropes.

Unit Descriptor

Unit descriptor

This unit of competency specifies the outcomes required to undertake Occupational Health and Safety (OHS) induction training within the construction industry.

It requires the ability to demonstrate personal awareness of OHS legislative requirements, and the basic principles of risk management and prevention of injury and illness in the construction industry.

Licensing requirements will apply to this unit of competency depending on the regulatory requirements of each jurisdiction.

Application of the Unit

Application of the unit

This unit of competency supports the attainment of the basic OHS knowledge required prior to undertaking designated work tasks within any of the sectors within the construction industry. The unit relates directly to the general induction training program specified by the *National Code of Practice for Induction for Construction Work* (ASCC 2007).

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify OHS legislative requirements.	1.1. Applicable ***OHS legislative requirements*** relevant to own work, role and responsibilities are identified and explained. 1.2. Duty of care requirements are identified. 1.3. Own responsibilities to comply with ***safe work practices*** are identified and explained.
2. Identify construction hazards and control measures.	2.1. Basic principles of risk management are identified. 2.2. ***Common construction hazards*** are identified and discussed. 2.3. ***Measures for controlling*** hazards and risks are identified.
3. Identify OHS communication and reporting processes.	3.1. OHS communication processes, information and documentation are identified and discussed. 3.2. Role of ***designated OHS personnel*** is identified and explained.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.3. ***Safety signs and symbols*** are identified and explained. 3.4. Procedures and ***relevant authorities*** for reporting hazards, ***incidents*** and injuries are identified.
4. Identify OHS incident response procedures.	4.1. ***General procedures*** for responding to incidents and ***emergencies*** are identified and explained. 4.2. Procedures for accessing first aid are identified. 4.3. Requirements for the selection and use of relevant ***personal protective equipment*** are identified and demonstrated. 4.4. ***Fire safety equipment*** is identified and discussed.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - clarify OHS legislative requirements
  - verbally report construction hazards and risks
  - ask effective questions
  - relay information to others
  - discuss OHS issues and information
- comprehension skills to:
  - explain the basic OHS legislative requirements which will be applicable to own work
  - explain the meaning of safety signs and symbols
  - identify common construction hazards
  - discuss the basic principles of risk management.

Required knowledge

Required knowledge for this unit is:

- applicable Commonwealth, State or Territory OHS legislation, regulations, standards, codes of practice and industry standards/guidance notes relevant to own

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

work, role and responsibilities

- basic principles of risk management and assessment for construction work
- common construction hazards
- common construction safety signage and its meanings
- general construction emergency response and evacuation procedures
- general construction work activities that require licenses, tickets or certificates of competency
- general first aid response requirements
- general procedures for raising OHS issues
- general procedures for reporting OHS hazards, accidents, incidents, emergencies, injuries, near misses and dangerous occurrences
- general procedures for responding to hazards, incidents and injuries
- general workers' compensation and injury management requirements
- OHS hierarchy of controls
- OHS responsibilities and rights of duty holders, including:
  - persons in control of construction work/projects
  - employers and self-employed persons
  - supervisors
  - employees
  - designers
  - inspectors
  - manufacturers and suppliers
- own responsibilities to comply with safe work practices relating to:
  - housekeeping
  - identification of hazards
  - preventing bullying or harassment
  - smoking
  - use of amenities
  - use of drugs and alcohol
- role of OHS committees and representatives
- types of common personal protective equipment and fire safety equipment
- types of OHS information and documentation.

Evidence Guide

EVIDENCE GUIDE

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence must confirm personal awareness of the following:

- applicable OHS legislative and safety requirements for construction work including duty of care
- the range of common construction hazards and procedures for the assessment of risk and application of the hierarchy of control
- OHS communication processes, information and documentation including the role of OHS committees and representatives, the meaning of common safety signs and symbols, and procedures for reporting hazards, incidents and injuries
- general procedures for responding to incidents and emergencies including evacuation, first aid, fire safety equipment and PPE.

Context of and specific resources for assessment

- Resources must be available to support the program including participant materials and other information or equipment related to the skills and knowledge covered by the program.
- It is recommended that the assessment tool designed specifically to support this unit of competency will provide consistency in assessment outcomes.
- Where applicable, physical resources should include equipment modified for people with disabilities
- Access must be provided to appropriate assessment support when required.
- Assessment processes and techniques must be culturally appropriate, and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed
- In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in such a

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE

	manner as is appropriate to the oracy, language and literacy levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.
Method of assessment	Assessment methods may include more than one of the following: • practical assessment • oral questioning • written test • work-based activities • simulated project based activity

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

OHS legislative requirements relate to:	• Australian standards • construction industry OHS standards and guidelines • duty of care • health and safety representatives, committees and supervisors • licences, tickets or certificates of competency • National Code of Practice for Induction Training for Construction Work • national safety standards • OHS and welfare Acts and regulations • safety codes of practice.
Duty of care requirements relate to:	• legal responsibility under duty of care to do everything reasonably practicable to protect others from harm

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	• own responsibilities to comply with safe work practices, including activities that require licences, tickets or certificates of competency • relevant state OHS requirements, including employers and self-employed persons, persons in control of the work site, construction supervisors, designers, manufacturers and suppliers, construction workers, subcontractors and inspectors.
Safe work practices include:	• access to site amenities, such as drinking water and toilets • general requirements for safe use of plant and equipment • general requirements for use of personal protective equipment and clothing • housekeeping to ensure a clean, tidy and safer work area • no drugs and alcohol at work • preventing bullying and harassment • smoking in designated areas • storage and removal of debris.
Risk relates to:	• likelihood of a hazard causing injury or harm.
Principles of risk management include:	• assessing the risks involved • consulting and reporting ensuring the involvement of relevant workers • controlling the hazard • identifying hazards • reviewing to identify change or improvement.
Hazard relates to:	• any thing (including an intrinsic property of a thing) or situation with the potential to cause injury or harm.
Common construction hazards include:	• confined spaces • electrical safety • excavations, including trenches • falling objects • hazardous substances and dangerous goods • HIV and other infectious diseases • hot and cold working environments • manual handling • noise • plant and equipment

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	• traffic and mobile plant • unplanned collapse • ultraviolet (UV) radiation • working at heights.
Measures for controlling risk to eliminate or minimise hazards in accordance with the hierarchy of control include:	• elimination • substitution • isolation • engineering control • administrative control • personal protective equipment.
OHS communication processes include:	• discussions with OHS representatives • OHS meetings • OHS notices, newsletters, bulletins and correspondence • OHS participative arrangements • processes for raising OHS issues • toolbox talks • workplace consultation relating to OHS issues and changes.
OHS information and documentation includes:	• accident and incident reports • Acts and regulations • Australian standards • codes of practice • construction documentation and plans • emergency information contact • evacuation plans • guidance notes • job safety analyses • labels • material safety data sheets (MSDS) • proformas for reporting hazards, incidents and injuries • reports of near misses and dangerous occurrences • risk assessments • safe work method statements • safety meeting minutes • site safety inspection reports.
Designated OHS personnel includes:	• first aid officers • OHS committee members

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	• OHS representatives • supervisors.
Safety signs and symbols include:	• emergency information signs (e.g. exits, equipment and first aid) • fire signs (e.g. location of fire alarms and firefighting equipment) • hazard signs (e.g. danger and warning) • regulatory signs (e.g. prohibition, mandatory and limitation or restriction) • safety tags and lockout (e.g. danger tags, out of service tags).
Relevant authorities include:	• emergency services (e.g. police, ambulance, fire brigade and emergency rescue) • OHS regulatory authority • supervisor.
Incidents include:	• accidents resulting in personal injury or damage to property • near misses or dangerous occurrences which do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence, for example: • breathing apparatus malfunctioning to the extent that the user's health is in danger • collapse of the floor, wall or ceiling of a building being used as a workplace • collapse or failure of an excavation more than 1.5 metres deep (including any shoring) • collapse or partial collapse of a building or structure • collapse, overturning or failure of the load bearing of any scaffolding, lift, crane, hoist or mine-winding equipment • damage to or malfunction of any other major plant • electric shock. • electrical short circuit, malfunction or explosion • uncontrolled explosion, fire or escape of gas, hazardous substance or steam • any other unintended or uncontrolled incident or event arising from operations carried on at a

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	workplace.
General procedures for responding to incidents and emergencies include:	• basic emergency response (keep calm, raise alarm, obtain help) • evacuation • notification of designated OHS personnel and authorities • notification of emergency services (e.g. when and how) • referring to site emergency plans and documentation.
Emergencies include:	• chemical spill • fire • injury to personnel • structural collapse • toxic and/or flammable vapours emission • vehicle/mobile plant accident.
Personal protective equipment includes:	• aprons • arm guards • eye protection • gloves • hard hat • hearing protection • high visibility retro reflective vests • protective, well fitting clothing • respiratory protection • safety footwear • UV protective clothing and sunscreen.
Fire safety equipment includes:	• breathing apparatus • fire blankets • firefighting equipment.

Unit Descriptor

Unit descriptor This unit of competency specifies the outcomes required to carry out OHS requirements through safe work practices at any on or off-site construction workplace. It requires the performance of work in a safe manner through awareness of risks and work requirements, and the planning and performance of safe work practices with concern for personal safety and the safety of others.

Application of the Unit

Application of the unit This unit of competency covers fundamental OHS necessary to undertake work tasks within any sector in the construction industry. It includes the identification of hazardous materials, including asbestos, and compliance with legislated work safety practices. It does not cover removal of asbestos, which is a licensed activity.

The unit relates directly to the general induction training program specified by the *National Code of Practice for Induction for Construction Work* (ASCC 2007) required to enter a construction work site. Completion of unit CPCCOHS1001A covers this requirement.

Licensing/Regulatory Information

ELEMENT	PERFORMANCE CRITERIA
hazards on work sites.	according to company and legislated procedures. 2.2. ***Measures for controlling risks*** and construction hazards are applied effectively and immediately. 2.3. Hazardous materials that have safety implications for self and other workers are secured immediately they are identified, using appropriate ***signs and symbols***. 2.4. Asbestos-containing materials are identified on a work site and reported to designated personnel.
3. Plan and prepare for safe work practices.	3.1. Correct ***personal protective equipment*** and clothing for each area of construction work are identified, worn, correctly fitted, used and stored according to enterprise procedures. 3.2. Selection of ***tools***, ***equipment*** and ***materials***, and organisation of tasks are performed in conjunction with other personnel on site and in accordance with enterprise procedures. 3.3. Required barricades and signage are determined and erected at the appropriate site location. 3.4. Material safety data sheets (MSDS), and job safety analysis (JSA) and safe work method statements relevant to the work to be carried out are identified and applied.
4. Apply safe work practices.	4.1. Tasks are performed in a manner that is safe for operators, other personnel and the general community in accordance with legislative requirements, and enterprise policies and procedures. 4.2. Plant and equipment guards are used in accordance with manufacturer specifications, work site regulations and Australian standards where applicable. 4.3. Procedures and relevant authorities for reporting hazards, incidents and injuries are used. 4.4. ***Prohibited tools and equipment*** in areas with identified asbestos are recognised and not used. 4.5. Work site safety signs and symbols are identified and followed. 4.6. Work site area is cleared and maintained to prevent and protect self and others from incidents and accidents and to meet ***environmental requirements***.
5. Follow emergency procedures.	5.1. Designated personnel are identified in the event of an emergency for communication purposes. 5.2. Safe workplace procedures for dealing with accidents,

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	various ***types of fire*** and other emergencies are followed, including identification or use, if appropriate, of ***fire equipment*** within scope of responsibilities. 5.3. ***Emergency response and evacuation procedures*** are known, practised and carried out effectively when required. 5.4. Emergency first aid treatment of minor injuries is carried out correctly and details of any treatment administered are reported accurately to designated personnel as soon as possible.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to accurately recognise OHS hazards, including asbestos and take all opportunities to alleviate safety problems in a variety of construction work sites and environments
- capacity to deal calmly and effectively with any potential safety problems and work closely with other team members and supervisors to ensure safe working conditions are maintained
- communication skills to:
  - determine and report hazards and risks
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and interpret:
    - MSDS, JSA and safe work method statements
    - other relevant documentation
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
  - written skills to contribute to reports
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- asbestos management code prevention of exposure
- basic first aid procedures
- common construction industry terminology
- common workplace safety hazards and risks and procedures for reporting these to designated personnel
- construction industry communications equipment and use
- construction industry health and safety signage
- emergency response and evacuation procedures
- JSA and safe work method statements
- MSDS
- OHS hierarchy of control and role of OHS committees and representatives
- relevant legislation, regulations and workplace requirements relating to OHS, including hazard reduction and personal safety, including duty of care responsibilities, workers' compensation and injury management requirements
- safe manual handling techniques
- safe work practices in normal working environment
- safety equipment, policies and requirements for working in confined spaces and at height, including on rooves
- tools and equipment prohibited for use near identified asbestos-containing materials (ACM)
- types of fires and basic firefighting equipment
- types, possible location and risks of ACM, including serpentine and amphibole groups, and their use in common building materials
- types, purpose and use of construction industry personal protective equipment and clothing
- workplace and equipment safety requirements.

© Commonwealth of Australia, 2025 Industry Skills Australia

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- correctly locate, interpret and apply relevant information, standards and specifications
- comply with a site safety plan, organisational policies, OHS regulations and state and territory legislation applicable to workplace operations, including quality requirements
- correctly identify ACM and policies and procedures for reporting this to designated personnel
- effectively communicate and work safely with others
- apply general procedures for responding to incidents and reporting hazards and injuries
- select and use firefighting equipment to extinguish a simulated mechanical fire
- evacuate a site through simulated response to an emergency, complying with workplace procedures.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE

- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct,

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE

	indirect and supplementary evidence. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Hazards include:

- chemical spills
- electrical safety work in confined spaces
- excavations, including trenches
- falling objects
- fires
- gases
- hazardous materials
- high or very low temperatures
- HIV and other infectious diseases
- liquids under pressure
- manual handling
- moving machinery and equipment
- noise, dust and vapours
- overhanging beams
- protrusions
- sharp equipment
- traffic
- ultraviolet (UV) radiation
- unplanned collapse

RANGE STATEMENT

	• working at heights.
Designated personnel to be contacted in case of an emergency, accident, fire or to report a risk such as identification of ACM are:	• designated safety officers, determined by the enterprise, who have undertaken specific safety response training • managers or other senior personnel • personnel competent and/or licensed in the safe handling of asbestos • supervisors.

Safe work practices:	• include:
	  • day to day observation of OHS policies and procedures
	  • emergency procedures
	  • risk assessment
	  • use of basic firefighting equipment
	• relate to:
	  • access to site amenities, such as drinking water and toilets
	  • general requirements for safe use of plant and equipment
	  • general requirements for use of personal protective equipment and clothing
	  • housekeeping to ensure a clean, tidy and safer work area
	  • no drugs and alcohol at work
	  • preventing bullying and harassment
	  • smoking in designated areas
	  • storage and removal of debris.

Duty of care requirements:	• relate to:
	  • legal responsibility under duty of care to do everything reasonably practicable to protect others from harm
	  • relevant state and territory OHS requirements and include employers and self-employed persons, persons in control of the work site, construction supervisors, designers, manufacturers and suppliers, construction workers, subcontractors and inspectors
	• may relate to:
	  • own responsibilities to comply with safe work practices, including activities that

RANGE STATEMENT

	require licences, tickets or certificates of competency.

Incidents include:	• accidents resulting in personal injury or damage to property
	• near misses or dangerous occurrences that do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence, for example:
	  • breathing apparatus malfunctioning to the extent that the user's health is in danger
	  • collapse of the floor, wall or ceiling of a building being used as a workplace
	  • collapse or failure of an excavation more than 1.5 metres deep (including any shoring)
	  • collapse or partial collapse of a building or structure
	  • collapse, overturning or failure of the load bearing of any scaffolding, lift, crane, hoist or mine-winding equipment
	  • damage to or malfunction of any other major plant
	  • electric shock
	  • electrical short circuit, malfunction or explosion
	  • uncontrolled explosion, fire or escape of gas, hazardous substance or steam
	  • any other unintended or uncontrolled incident or event arising from operations carried on at a workplace.

Australian government and state or territory OHS legislative requirements include:	• Australian standards • construction industry OHS standards and guidelines • duty of care • health and safety representatives, committees and supervisors • JSA and safe work method statements • licences, tickets or certificates of competency • National Code of Practice for Induction Training for Construction Work • national safety standards

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	• OHS and welfare Acts and regulations • safety codes of practice.
Information includes:	• diagrams or sketches • emergency situation contacts • evacuation plans • instructions issued by authorised organisational or external personnel • labels • manufacturer specifications and instructions • memos • MSDS • organisation work specifications and requirements • plans and specifications • regulatory and legislative requirements, such as Acts, regulations and codes of practice • relevant Australian standards • reports of near misses or accidents • safe work procedures or equivalent documentation • safety meeting minutes • signage • verbal or written and graphical instructions • work bulletins • work schedules.
Hazardous materials include:	• ACM • cleaning chemicals, including those in pressurised containers • glues • insulation materials • solvents • treated timber products.
Measures for controlling risk or minimising hazards in accordance with the hierarchy of control include:	• elimination • substitution • isolation • engineering control • administrative control • personal protective equipment.
Signs and symbols include:	• emergency information signs (exits, equipment, first aid) • fire signs (location of fire alarms and

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	firefighting equipment) • hazard identification, facility or location signs • regulatory signs (e.g. prohibition, mandatory and limitation or restriction), such as hazard signs (danger and warning) • safety tags and lockout (danger tags, out of service tags) • site safety, directional, traffic and warning signs and symbols.
Asbestos-containing materials are identified:	• includes recognising common types of ACM that may be found in construction materials and buildings • covers asbestos rope/fabrics, asbestos cement sheeting, asbestos cement piping and lagging on pipes, bituminous waterproof membrane, fire doors, electrical switchboards, millboard, and sheeting under ceramic or vinyl floor tiles in wet areas.
Asbestos-containing materials are ***reported*** to:	• person in control of the workplace as set out in the relevant Asbestos Management Code.
Personal protective equipment is to include:	• aprons • arm guards • caps • dust mask/respirators • ear muffs/plugs • gloves • hard hats • high visibility retro reflective vests • jackets • overalls • safety glasses/goggles • steel capped boots • UV protective clothing and sunscreen.
Tools and equipment include:	• firefighting equipment • first aid kit • ladders and work platforms • personal protective equipment.
Materials include:	• first aid materials suitable for emergency first aid treatment of minor injuries.
Prohibited tools and equipment that cannot be used near identified	• high-speed abrasive power and pneumatic tolls, high pressure water cleaners, compressed

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

ACM include:	air or abrasive blasting • any vacuum cleaning equipment not specifically designed for safe work with asbestos.
Environmental requirements are to cover workplace quality management and include:	• clean-up protection • stormwater protection • waste management.
Types of fire includes:	• electrical, chemical, gas, mechanical, paper, wood or natural fire.
Fire equipment includes:	• breathing apparatus • fire extinguishers • fire hydrant and hoses • fire reel • fire truck • manual firefighting instruments, such as fire blankets.
Emergency response and evacuation procedures include:	• emergencies, such as fire, toxic and/or flammable vapours emission, vehicle/mobile plant accident, structural collapse, chemical spill and injury to personnel • extinguishing fires, organisational first aid requirements and evacuation.

CPCCSF2003A Cut and bend materials using oxy-LPG equipment

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit of competency specifies the outcomes required to heat, cut and bend construction materials using oxy-LPG equipment.

It includes planning and preparation for the work, setting up and testing the equipment, cutting materials, heating and bending materials, shutdown of equipment and completion of clean-up activities.

Application of the Unit

Application of the unit

This unit supports the attainment of skills and knowledge to use oxy-LPG-acetylene equipment to cut and bend materials for steelfixing applications, which includes working with others and as a member of a team. It does not involve specialist welding techniques.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare.	1.1. Work instructions, including plans, specifications, quality requirements and operational details are obtained from relevant ***information***, confirmed and applied to the ***scope of work*** performed. 1.2. ***Safety*** (***OHS***) requirements are followed in accordance with safety plans and policies. 1.3. Signage and barricade requirements are identified and implemented. 1.4. Plant, tools and ***equipment*** are selected to carry out tasks are consistent with the requirements of the job, checked for serviceability and any faults are rectified or reported prior to commencement. 1.5. ***Materials*** quantity requirements are calculated in accordance with plans, specifications and ***quality requirements***. 1.6. Materials appropriate to the work application are identified, obtained, prepared, safely handled and located ready for use. 1.7. ***Environmental requirements*** are identified for the project in accordance with environmental plans and ***statutory and legislative authority*** obligations and

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	applied.
2. Set up and test equipment.	2.1. Correct fire extinguisher is selected and located to be readily accessible prior to and during operations. 2.2. Regulators are attached to oxy and acetylene bottles in accordance with manufacturer specifications and OHS regulations. 2.3. Lines are purged to manufacturer recommendations prior to lighting up. 2.4. Equipment is tested for leaks and corrective action undertaken or faults reported. 2.5. Correct pressures and cutting tips are selected in accordance with material to be cut and manufacturer specifications.
3. Cut material.	3.1. Material is accurately marked and secured or clamped ready for cutting. 3.2. Torch is lit correctly and safely according to manufacturer specifications. 3.3. Setting of flame is adjusted for cutting to manufacturer recommendations. 3.4. Correct cutting position is adopted during cutting to set-out mark.
4. Heat and bend material.	4.1. Material is accurately marked and securely clamped ready for cutting. 4.2. Torch is lit correctly and safely according to manufacturer specifications. 4.3. Heat is applied to specified material and weakening effects of the heating process are minimised. 4.4. Material is bent to specification and correctly cooled.
5. Shut down.	5.1. Torch is switched off according to manufacturer specifications. 5.2. Gas supply is shut off according to manufacturer specifications.
6. Clean up.	6.1. Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification. 6.2. Plant, tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - determine requirements
  - follow instructions
  - read and interpret:
    - documentation from a variety of sources
    - drawings and specifications
  - report faults
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- mathematical and numeracy skills to apply measurements and calculations
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- construction and steelfixing terminology
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- oxy acetylene and LPG heating and cutting equipment set-up and operating techniques
- oxy acetylene and LPG heating and cutting equipment types, characteristics, uses and limitations
- plans, drawings and specifications
- processes for the calculation of material requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- quality requirements
- types and properties of steelfixing materials
- workplace and equipment safety requirements.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • locate, interpret and apply of relevant information, standards and specifications • comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations • comply with organisational policies and procedures, including quality requirements • safely and effectively use tools, plant and equipment • communicate and work effectively and safely with others • use both oxy-acetylene and LPG systems to cut to specification a range of bars up to and including 36mm • heat and bend a minimum of three bars to specification including at least one 36mm bar.
Context of and specific resources	This competency is to be assessed using standard and authorised work practices, safety requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE

for assessment

and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions,

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	where specified • MSDS • memos • regulatory and legislative requirements pertaining to cut and bend materials using oxy/LPG equipment • relevant Australian standards • safe work procedures relating to cut and bend materials using oxy/LPG equipment • signage • verbal, written and graphical instructions • work bulletins • work schedules, plans and specifications.
Scope of work:	• cutting of steel includes cutting up of waste for salvage, cutting reinforcement steel and cutting holes in plate • bending includes reinforcement steel • all work is to conform to the requirements of relevant Australian standards.

Safety (***OHS***) is to be in accordance with state and territory legislation and regulations and project safety plan and may include:	• emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
	• handling activities that may require the assistance of others or the use of manual or mechanical lifting devices where size, weight or other issues, such as a disability are a factor
	• hazard control
	• hazardous materials and substances, including cement and curing agents
	• organisational first aid
	• PPE prescribed under legislation, regulations and workplace policies and practices
	• safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
	  • cutting, grinding and welding equipment
	  • lighting
	  • power equipment
	  • power leads and sources
	  • trip hazards
	  • work site visitors and the public

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	• working in confined spaces • working in proximity to others • working with metals under stress • use of firefighting equipment • use of tools and equipment • workplace environmental requirements and safety.
Equipment includes:	• cylinders • regulators • gas tubing • cutting blowpipes • flint lighters • measuring tapes and rules • clamps and support stands.

Materials:	• include:
	  • cutting consumables
	  • deformed bars
	  • mesh sheets of deformed bars
	  • mesh sheets of plain bars
	  • plain rods
	• may include:
	  • pipe sections
	  • scaffolding components
	  • structural steel sections.

Quality requirements include relevant regulations, including:	• Australian standards • internal company quality policy and standards • manufacturer specifications • workplace operations and procedures.
Environmental requirements include:	• clean-up management • dust and noise • waste management.
Statutory and regulatory authorities include:	• federal, state and local authorities administering the applicable Acts, regulations and codes of practice.

CPPSEC5001A Establish and maintain an Occupational Health and Safety system

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit of competency specifies the outcomes required to manage an Occupational Health and Safety (OHS) system to ensure compliance with legislative requirements relating to security operations. It requires the ability to establish policies and procedures for the implementation of OHS in the workplace ensuring ongoing consultative processes. It also requires an ability to evaluate the effectiveness of the OHS system to identify procedural improvements.

This unit may form part of the licensing requirements for persons engaged in security operations in those states and territories where these are regulated activities.

Application of the Unit

Application of the unit

This unit of competency has wide application in a range of managerial roles in the security industry. Work is performed under minimal supervision and competency requires a high level of judgement and decision-making. The knowledge and skills described in this unit are to be applied within relevant legislative and organisational guidelines.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Establish an OHS system.	1.1 ***OHS system*** is developed which clearly states commitment to OHS and compliance with ***legislative requirements***.
	1.2 ***OHS roles and responsibilities*** for all employees are defined.
	1.3 Financial and human resources for the effective operation of the OHS system are established and implemented.
	1.4 OHS induction and ***training program*** is developed and made available to all employees.
	1.5 System for ***OHS record keeping*** is established and maintained to allow identification of ***hazard***, ***risk*** and injury patterns.
	1.6 ***OHS information and procedures*** are communicated and explained to all employees in an accessible format in accordance with legislative requirements.
2 Establish participative arrangements for OHS.	2.1 ***Consultative processes*** are established and maintained to ensure maximum OHS vigilance and compliance of all employees.
	2.2 OHS issues raised through participation and consultation are acknowledged and resolved promptly.
	2.3 Feedback from OHS consultation and any changes to procedures are ***recorded*** and communicated promptly to all employees.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
3 Establish procedures for managing hazards and risks.	3.1 Procedures for ***identifying hazards*** and ***managing risks*** are developed in accordance with legislative requirements. 3.2 Hazard identification is addressed at the planning, design and evaluation stages of any change in workplace to ensure new hazards are not created. 3.3 Procedures for selection and implementation of risk control measures in accordance with the hierarchy of control are developed and maintained. 3.4 Inadequacies in procedures for hazard identification and risk control are identified and new measures promptly established.
4 Evaluate system effectiveness.	4.1 Evaluation of the OHS system is undertaken using ***verifiable evidence***. 4.2 Improvements to the OHS system are developed and implemented to achieve organisational OHS objectives. 4.3 Compliance with the OHS legislative framework is continually assessed to ensure that legal obligations are met. 4.4 All OHS documentation is maintained in accordance with legislative requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge and their level required for this unit.

Required skills

- access and use workplace information
- active listening
- adapt personal communication style to a variety of situations
- analyse and evaluate information and data
- coaching and mentoring to provide support to colleagues
- communicate in a clear and concise manner
- consultation
- effectively work with teams and individuals
- negotiation
- numeracy skill to calculate resources and costings
- planning

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- reading to interpret complex information
- relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- research, analyse and interpret information from a variety of people and reporting
- solve problems to deal with complex and non routine difficulties
- use a range of communications equipment
- use technology to research, analyse and report information
- writing to develop complex reports.

Required knowledge

- applicable OHS licensing and legislative compliance requirements
- application of the hierarchy of control
- approved communication terminology and call signs
- available support agencies and the types of services offered
- difference between negative and positive language
- differences between written and spoken English
- how to read and use body language to gain confidence of others
- how to record information which may be used for legal purposes
- how to safeguard confidential information
- how to use business equipment to present information
- intervention points for expert OHS advice
- negotiation techniques
- non conformance reporting requirements
- OHS implications relating to use of guard dogs, apprehension or arrest of persons, use of firearms, use of restraints, handcuffs, batons and spray
- organisational standards for the presentation and maintenance of written information
- power plays and how they are used in conflict situations
- principles and practices of effective OHS management
- principles and techniques associated with modelling safe work practices, hazard identification and risk management
- principles of AS/NZS 4360: 2004 Risk management
- tactical response measures
- use of force guidelines.

Evidence Guide

EVIDENCE GUIDE

© Commonwealth of Australia, 2025 Industry Skills Australia

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of:

- managing organisational compliance with applicable OHS legislation and licensing, and implementing consultative arrangements to ensure individual and team OHS awareness and compliance
- developing a comprehensive OHS system which maximises implementation of OHS policies and procedures
- conducting an evaluation of the OHS system and using the findings together with consultation processes as the basis for implementing improvements
- establishing systems for ensuring OHS records and information meet legal compliance requirements.

Context of and specific resources for assessment

Context of assessment includes:

- a setting in the workplace or environment that simulates the conditions of performance described in the elements, performance criteria and range statement.

Resource implications for assessment include:

- access to a registered provider of assessment services
- access to a suitable venue and equipment
- access to plain English version of relevant statutes and procedures
- assessment instruments including personal planner and assessment record book
- work schedules, organisational policies and duty statements.

Reasonable adjustments must be made to assessment processes where required for people with disabilities. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

This unit of competency should be assessed using questioning of underpinning knowledge and skills.

Guidance information for assessment

Assessment processes and techniques must be culturally appropriate and suitable to the language, literacy and numeracy capacity of the candidate and the competency being assessed. In all cases where practical assessment is used, it should be combined with targeted questioning to assess the underpinning knowledge.

Oral questioning or written assessment may be used to assess underpinning knowledge. In assessment situations where the

© Commonwealth of Australia, 2025 Industry Skills Australia

candidate is offered a choice between oral questioning and written assessment, questions are to be identical.

Supplementary evidence may be obtained from relevant authenticated correspondence from existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

OHS system may include:

- counter terrorism
- designated OHS personnel and committees
- designing safe operations and systems of work
- duty of care requirements
- emergency and evacuation policies and procedures
- incorporation of expert OHS advice as required
- injury management and workers compensation
- issue resolution and conflict negotiation processes
- mechanisms for obtaining updated information (eg health effects of hazards, technical developments in risk control, changes to legislation, security alerts and industry trends)
- mechanisms for updating OHS policies and procedures
- planning and implementing changes to security operations and tactical response strategies
- procedures for maintenance and storage of equipment and weapons
- procedures for purchasing of materials and equipment
- procedures, timeframes and accountabilities for reporting OHS issues
- provision of counselling and stress management processes
- provision of OHS information and training
- provisions for first aid equipment and response
- restraint and apprehension of persons
- security licensing requirements
- system for communicating OHS information to

© Commonwealth of Australia, 2025 Industry Skills Australia

	individuals and teams • use of firearms, handcuffs, batons and spray • use of force guidelines.
Legislative requirements may relate to:	• anti-discrimination and diversity • Australian standards, codes of practice and regulations • award and enterprise agreements • duty of care • evidence collection • licensing arrangements and certification requirements • OHS issue resolution • relevant commonwealth, state and territory OHS legislation, codes of practice and regulations • roles and responsibilities of OHS representatives and committees • trade practices • use of force.
***OHS roles and responsibilities* may include**:	• fire wardens • first aid officers • general duty of care • OHS chain of command • OHS committee representatives • OHS officers • safe workplace practices.
***Training program* may include**:	• allocation of resources for training including acquisition, purchase of training services, development of staff training skills • group discussions to enhance safety awareness • handouts or information sheets • OHS induction training • ongoing assessment of individual and team training needs • specific courses.
***OHS record keeping* may relate to**:	• audit and inspection reports • consultation processes (eg OHS Committee meeting papers) • equipment maintenance and testing reports • first aid or medical post records • hazardous substances register • identifying records required under OHS legislation (eg, major accident and injury notifications, certificates, licenses, dangerous goods storage register) • manufacturer and supplier information relating to security equipment • records of induction, instruction and training

© Commonwealth of Australia, 2025 Industry Skills Australia

- workers compensation and rehabilitation records
- workplace environmental monitoring records.

Hazard relates to:

- any thing (including an intrinsic property of a thing) or situation with the potential to cause injury or harm.

***Risk* relates to**:

- the chance of something happening that will have an impact on objectives.

***Security risks* may include**:

- biological hazards
- chemical spills
- electrical faults
- explosives
- injury to personnel
- noise, light, heat, smoke
- persons carrying weapons
- persons causing a public nuisance
- persons demonstrating suspicious behaviour
- persons suffering from emotional or physical distress
- persons under the influence of intoxicating substances
- persons with criminal intent
- persons, vehicles and equipment in unsuitable locations
- suspicious packages or substances
- terrorism
- violence or physical threats.

***OHS information and procedures* may relate to**:

- application of organisational OHS policies and procedures
- back-up
- compliance with applicable legislation, standards and regulations related to OHS
- current security industry risks and alerts
- identified hazards
- outcomes of risk assessment and control processes
- procedures for evacuation, application of first aid and emergency response
- processes for raising OHS issues
- tactical response
- up-to-date OHS issues and industry safety trends
- use of force
- use of restraints, handcuffs, batons, spray and firearms.

Consultative processes may include:

- establishment and use of OHS committees and other committees
- establishment and use of OHS representatives and first aid officers
- involvement of individuals and teams in OHS management activities (eg OHS inspections, audits, environmental monitoring, risk assessment and control,

© Commonwealth of Australia, 2025 Industry Skills Australia

	emergency simulations) • mechanisms for employees to raise OHS issues • provision of regular OHS bulletins, notices and information.
***OHS records* may relate to**:	• first aid and medical post records • hazardous substances registers • health surveillance and monitoring of work environment • identified hazards and risks • industry warnings and security alerts • maintenance and testing reports • manufacturer and supplier information, including materials safety data sheets and dangerous goods storage lists • OHS audits and inspections • OHS instruction and training • OHS issues which have been raised and reported • reports of accidents and injury • workers compensation and rehabilitation records.
Procedures for identifying hazards may include:	• consultation • continuous monitoring of work environment • debrief and review of security incidents • regular informal and informal discussions with colleagues • regular inspections of equipment and work area • review of OHS records.
***Managing risks* may involve**:	• application of the hierarchy of control • complying with safe operating procedures for equipment • correct selection, use, storage and maintenance of Personal Protective Equipment (PPE) • evacuation • maintaining vigilance, awareness and observation in the work environment • OHS communication and reporting • requests for back-up support or instructions • safe lifting and manual handling • security of documents, cash, equipment and persons • use of fire safety equipment • use of reasonable force.
***Verifiable evidence* may include**:	• auditable documentation and reports • employee and client questionnaires • number of hazards, accidents, injuries or near misses • quality assurance data • records of complaints and actions taken for resolution.

CPPWMT3011A Respond to waste emergencies

Modification History

Revised unit

Unit updated and equivalent to PRMWM11B Respond to waste emergency

Unit Descriptor

This unit of competency specifies the outcomes required to respond to a range of emergencies which may occur in the management of waste. It requires the ability to act quickly in a methodical and calm manner.

Application of the Unit

This unit of competency supports individuals with responsibilities for conducting waste management activity. It includes contributing to the implementation of developed operational procedures, as well as recognising the need for expert advice.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Industry Skills Australia

Elements and Performance Criteria

1	Identify nature of emergency.	1.1	Details of the nature, type and severity of the ***emergency*** are identified, including ***waste types*** involved and existing and potential hazards and risks.
		1.2	Emergency is reported to supervisor or team leader according to ***organisational requirements*** and ***relevant legislation and codes***.
2	Prepare to respond to emergency.	2.1	***Potential hazards and risks*** are incorporated into emergency response action.
		2.2	***Emergency response action or procedures*** are followed according to organisational requirements and relevant legislation.
		2.3	Full details of emergency are communicated to ***relevant parties***.
		2.4	***Emergency and personal protective equipment*** is used safely and efficiently according to manufacturer specifications and organisational occupational health and safety (OHS) requirements.
		2.5	***Containment and isolation*** of emergency situation are conducted where possible to minimise danger to surrounding equipment, area, environment, other personnel and general public.
		2.6	Risks to personnel are avoided and ***evacuation procedures*** are followed according to organisational requirements.
		2.7	Necessary actions to ***protect organisational interests*** are taken according to organisational requirements.
3	Review emergency response.	3.1	Emergency response actions are monitored and evaluated continuously and modifications are made to response actions to reduce the impact of the emergency.
		3.2	Emergency situation is controlled until formal relief is notified or received, according to organisational requirements, OHS standards and relevant legislation.

© Commonwealth of Australia, 2025 Industry Skills Australia

4	Assist with clean-up	4.1	***Clean-up*** to remove waste, ***contamination***, equipment and hazards from the emergency site is conducted according to organisational, legislative and OHS requirements.
		4.2	***Regulated waste identification signage*** is updated as required.
5	Record and report emergency	5.1	Full details of emergency situation and response actions are ***recorded*** according to organisational requirements and relevant legislation.
		5.2	Emergency situation and response actions are reported to appropriate personnel according to organisational requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- emergency expertise to facilitate:
  - waste assessment
  - isolation procedures, including bunding and erecting barriers
  - selection of equipment
  - quality control inspection
- interpersonal skills to work in a team environment
- oral communication skills to:
  - ask questions
  - follow instructions
  - give clear information
  - listen effectively
- reading skills to:
  - interpret emergency requirements
  - follow emergency procedure guidelines
  - read graduated devices
  - interpret work requirements and material safety data sheets (MSDS)

© Commonwealth of Australia, 2025 Industry Skills Australia

- problem-solving skills to:
  - identify hazards and risks
  - identify waste types, including regulated waste and waste non-conformance
  - resolve pressure situations in a prompt, calm manner
- self-management skills to:
  - conduct work practices safely and efficiently
  - handle waste non-conformances
  - prioritise duties
  - use emergency and personal protective equipment (PPE)
- written communication skills for:
  - documentation, including emergency incident report
  - record keeping

Required knowledge

- emergency response procedures, including:
  - confined space procedures
  - HAZCHEM identification systems
  - methods of containment and isolation of emergencies
  - site management plan and identification of work areas, including location of:
    - alarms
    - emergency equipment
    - communications equipment
  - coding systems
  - reporting requirements
  - signalling techniques
  - standard emergency procedures
- identification of:
  - waste types, streams and characteristics
  - waste non-conformances
  - waste non-conformance procedures
  - waste recovery routes
- procedures for containing segregated waste types, including containment and isolation of hazardous waste
- emergency waste management processes to facilitate:
  - identification of plant and equipment
  - operation of plant and equipment
  - cleaning and maintenance of plant and equipment
  - recycling activity
- OHS requirements relating to:
  - chemical storage and decanting

© Commonwealth of Australia, 2025 Industry Skills Australia

  - dangerous goods and hazardous substances
  - OHS hierarchy of control
  - basic first aid appropriate to likely hazards and risks in work environment
- potential hazards and risks relating to:
  - dangerous goods
  - potential incidents
  - waste containment and segregation techniques
  - emergency response procedures
- service requirements, including:
  - client requirements
  - duty of care
  - organisational requirements
  - reporting requirements
  - waste management options
  - waste management hierarchy
  - waste containment and disposal techniques

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observation of practical demonstration in the workplace or in a simulated environment.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • identify emergencies • follow OHS and emergency procedures • act quickly and implement required processes to overcome emergencies • document actions.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include:

© Commonwealth of Australia, 2025 Industry Skills Australia

	• work plans and approved specifications • forms and procedures manuals.
Method of assessment	The process of responding to a waste emergency must comply with industry expectations in the particular client environment. If the environment is narrowly defined or is not representative of industry needs, it may be necessary to refer to portfolio case studies to assess competency in responding to a waste emergency. Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function, for example: • CPPCMN3001B Participate in environmentally sustainable work practices • CPPCMN3003A Contribute to workplace safety arrangements.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Emergency may include:	• chemical reaction • contamination

© Commonwealth of Australia, 2025 Industry Skills Australia

	• fire • gas leak • hazardous waste spill • fallen powerlines.
Waste types may include:	• solid (non-hazardous), e.g. construction and demolition • liquid (non-hazardous), e.g. chemical and aqueous • hazardous – regulated, prescribed, quarantined, medical and clinical • recoverable resources, e.g. recyclable and green waste.
Organisational requirements may include information found in:	• briefing papers • job sheets • letters • memos • operations manuals • quality assurance documents • tender and contract documents • verbal or written instructions • work procedures.

Legislation and codes may include:	• codes, including:
	  • Australian Code for the Transport of Dangerous Goods by Road and Rail
	  • industry
	• commonwealth, state and territory legislation, including:
	  • anti-discrimination
	  • environmental protection
	  • equal employment opportunity
	  • freedom of information
	  • industrial
	  • OHS
	  • trade practices
	• road laws.

Potential hazards and risks are those identified by the organisation that may lead to:	• damage to plant, vehicle or property • harm to the environment • illness or injury to employees, contractors or the public • injuries resulting from manual handling and repetitive work.
Potential hazards and risks may include:	• broken glass • broken metal • compaction equipment • contamination • dust • fire

© Commonwealth of Australia, 2025 Industry Skills Australia

	• gases and fumes • hazardous waste (e.g. sharps) • narrow driveways • other vehicles and equipment • overhanging signs • projectiles • spark-producing equipment • unguarded conveyor belts • weather.
Emergency response action or procedures may include:	• cleaning up • containing emergency • isolating or shutting down equipment or plant • evacuation • first aid • making site safe • notifying authorities • using PPE.
Relevant parties may include:	• emergency services • other affected parties • organisational personnel • environmental protection agencies.
Emergency and personal protective equipment must include:	• communications equipment • eye protection, such as goggles and protective glasses • eyewash kit • fire extinguishers • first aid kit • footwear • hearing protection • MSDS • spill kit • oil absorbent materials • overalls and protective clothing.
Emergency and personal protective equipment could also include:	• breathing apparatus • emergency procedure guides • face shield or mask • gloves • hard hats.
Personal protective equipment must be:	• cleaned and fitted according to organisational requirements, manufacturer specifications and OHS requirements • worn when required according to organisational requirements • stored according to organisational requirements.

© Commonwealth of Australia, 2025 Industry Skills Australia

Containment and isolation may include:	• bunding area • erecting barricades • moving vehicle or equipment away from hazardous area • sealing leaks • transferring waste • turning off electricity and gas • using fire extinguishers • water-hosing.
Evacuation procedures may be found in:	• emergency procedures manuals • OHS requirements • organisational requirements • legislation and codes.
Protecting organisational interests may include:	• collecting details from witnesses • not commenting or admitting liability • not talking to media.
Clean-up may include:	• removing equipment, plant and vehicle from site • removing and disposing of contaminated soil and liquid • shovelling • sweeping out • using cleaning products • using high pressure water or air-hosing • vacuuming.
Contamination may include:	• exposure to sunlight • infestation • mixing with other waste types • rot or mould • waterlogging.
Regulated waste identification signage may include**:**	• classification of dangerous goods • communications equipment • first aid • hazardous class • HAZCHEM codes • packaging group number.

Recorded includes:	• authorities notified
	• cause or suspected cause of emergency
	• damage incurred to:
	  • general public
	  • equipment
	  • personnel
	  • vehicle
	• emergency and personal protective equipment used

© Commonwealth of Australia, 2025 Industry Skills Australia

	• emergency response procedures undertaken • nature of clean-up • nature, type, source and severity of emergency • recommendations for preventing future emergencies • regulatory authority requirements.

CPPWMT3015A Move waste using loadshifting equipment

Modification History

Revised unit

Unit updated and equivalent to PRMWM15B Move waste using load shifting equipment

Unit Descriptor

This unit of competency specifies the outcomes required to operate a mobile plant for loading and unloading waste. It requires the ability to organise the activity and apply safe work practices.

Application of the Unit

This unit of competency supports individuals with responsibilities for managing waste during loadshifting. It includes contributing to the implementation of developed operational procedures, as well as recognising the need for expert advice.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Industry Skills Australia

Elements and Performance Criteria

1	Prepare for loadshifting.	1.1	***Job sheet and schedule*** are reviewed to identify job requirements.
		1.2	***Loadshifting equipment***, associated attachments and ***emergency and personal protective equipment*** (PPE) are selected according to job requirements to maximise efficiency and effectiveness of transportation.
		1.3	Operator's licence is inspected to ensure it complies with ***organisational requirements*** and ***relevant legislation and codes***.
		1.4	***Potential hazards and risks*** to work are identified and handled according to organisational ***emergency response action or procedures***, and occupational health and safety (OHS) regulations and other relevant legislation and codes.
2	Perform routine checks on loadshifting equipment.	2.1	Visual check of equipment is conducted to pinpoint damage, leaks, obstructions, component wear or potential hazards.
		2.2	Equipment systems are tested to ensure that they comply with manufacturer specifications and organisational requirements.
		2.3	Service checks are conducted in compliance with manufacturer specifications to ensure water, oil, fuel, air pressure and greasing are maintained at designated levels.
		2.4	Emergency and personal protective equipment is checked to ensure it is functioning adequately.
		2.5	Associated equipment is checked to ensure that it is operational and complies with manufacturer specifications.
3	Operate loadshifting	3.1	Equipment is operated and driven in a safe and efficient manner, according to organisational requirements, road

© Commonwealth of Australia, 2025 Industry Skills Australia

	equipment.		and traffic regulations, and other legislation and codes.
		3.2	Surrounding environment is continuously observed to identify and avoid or minimise potential hazards.
		3.3	Clear communication with ***relevant personnel*** is maintained.
4	Organise for loading.	4.1	Waste to be loaded and checked is identified to ensure ***integrity of containment***.
		4.2	***Loading method*** is determined according to waste containment type and organisational requirements.
		4.3	Equipment is parked or set up in a loading position that ensures efficiency and safety of loading.
		4.4	Barriers and warning signs are erected at loading and unloading sites to ensure safety of surrounding personnel according to organisational requirements and relevant legislation.
5	Load and move waste.	5.1	Waste is loaded safely and efficiently according to ***waste type*** in designated area using an approved loading method to maintain integrity.
		5.2	Liquid flow where waste is vacuumed is regulated to ensure maintenance of constant hose pressure.
		5.3	Waste is moved safely and securely according to organisational requirements, manufacturer specifications and relevant legislation and codes.
		5.4	Visual checks are maintained to identify and remedy potential hazards.
		5.5	Load is checked to ensure it conforms to equipment capacity requirements, manufacturer specifications and relevant legislation and codes.
6	Unload waste.	6.1	Waste is unloaded safely and efficiently according to waste type, in designated area using an approved unloading method to maintain integrity.

© Commonwealth of Australia, 2025 Industry Skills Australia

		6.2	Liquid flow where waste is vacuumed is regulated to ensure maintenance of constant hose pressure.
		6.3	Visual checks are maintained to identify and remedy potential hazards during unloading.
		6.4	Load is stacked or housed at destination according to organisational requirements, manufacturer specifications and relevant legislation and codes.
7	Shut down and secure loadshifting equipment.	7.1	Equipment is parked or stored in a safe location to avoid damage to equipment or obstruction of surrounding site activity.
		7.2	Shut-down procedures are completed according to manufacturer specifications and organisational requirements.
		7.3	Equipment is secured and stored to avoid unauthorised access or use
8	Carry out basic housekeeping and maintenance.	8.1	Equipment is cleaned to remove debris and contamination and to ensure safe operating procedures.
		8.2	Service checks are conducted according to manufacturer specifications to ensure water, oil, fuel, air pressure and greasing are maintained at designated levels.
		8.3	Equipment faults or defects are reported to relevant personnel
		8.4	Record of moving activities is completed promptly and according to organisational requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

© Commonwealth of Australia, 2025 Industry Skills Australia

Required skills

- driving ability to facilitate safe and efficient driving
- interpersonal skills to work in a team environment
- numeracy skills to:
  - measure weights and volumes
  - measure waste
- literacy skills to:
  - report waste movements and loading activity
  - read and interpret:
    - graduated devices
    - procedure guidelines
    - specifications
    - work requirements and material safety data sheets (MSDS)
- oral communication skills to:
  - direct traffic
  - ask questions
  - follow instructions
  - provide clear information
  - listen actively
- problem-solving skills to:
  - identify hazards and risks
  - identify waste types, including regulated waste and waste non-conformances
  - segregate waste types, including potentially hazardous wastes
- self-management skills to:
  - apply signalling techniques
  - conduct work practices safely and efficiently
  - handle waste non-conformances
  - identify routes
  - organise work methodically
  - safely load and unload waste
  - use emergency and PPE
  - work in confined spaces
- waste identification, including:
  - containment of hazardous waste
  - isolation
  - recording waste sorted
  - identifying and sampling waste types

Required knowledge

© Commonwealth of Australia, 2025 Industry Skills Australia

- driving:
  - licence requirements
  - road laws
  - map reading
- equipment operation to facilitate:
  - basic cleaning and maintenance of equipment
  - selection of plant and equipment
- identification of:
  - waste contaminants
  - waste non-conformances
  - waste types, streams and characteristics
  - loading and unloading methods
  - equipment load weight requirements
  - types of loading equipment
  - waste loading and unloading and moving hazards
  - requirements for handling and transporting waste
  - waste processing equipment
- potential hazards and risks relating to:
  - waste loading and unloading techniques
  - emergency response procedures
- OHS requirements relating to:
  - dangerous goods and hazardous substances
  - OHS hierarchy of control

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observation of practical demonstration in the workplace or in a simulated work environment using loadshifting equipment.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • interpret job sheets • organise equipment operation

© Commonwealth of Australia, 2025 Industry Skills Australia

	• load safely and efficiently • observe OHS requirements.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include: • work plans and approved specifications • forms and procedures manuals.
Method of assessment	Moving waste using loadshifting equipment must comply with industry expectations in the particular client environment. If the environment is narrowly defined or is not representative of industry needs, it may be necessary to refer to portfolio case studies to assess competency in the moving of waste. Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function, for example: • CPPWMT3019A Prepare waste for re-use • CPPWMT3044A Identify wastes and hazards.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the

© Commonwealth of Australia, 2025 Industry Skills Australia

performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Job sheet and schedule typically include:	• emergency and PPE requirements • job route and sequence • site contact • site requirements • vehicle and associated equipment requirements • waste type, classification, characteristics and transport requirements.

Loadshifting equipment may include:	• dozers
	• earthmoving equipment
	• forklifts
	• loaders:
	  • front-end
	  • rear-end
	  • tailgate
	• trucks:
	  • articulated
	  • open-bodied:
	  • hook lift
	  • pump
	  • vacuum
	  • rigid
	• windrow turners.

Emergency and personal protective equipment must include:	• communications equipment • eye protection, such as goggles and protective glasses • eyewash kit • fire extinguishers • first aid kit • footwear • gloves • overalls and protective clothing.
Emergency and personal protective equipment could also include:	• breathing apparatus • emergency procedure guides • face shields or masks • hard hats • hearing protection • MSDS • spill kit.

© Commonwealth of Australia, 2025 Industry Skills Australia

Personal protective equipment must be:	• cleaned and fitted according to organisational requirements, manufacturer specifications and OHS requirements • worn when required according to organisational requirements • stored according to organisational requirements.
Organisational requirements may include information found in:	• briefing papers • job sheets • letters • memos • operations manuals • quality assurance documents • verbal or written instructions • work procedures.

Relevant legislation and codes may include:	• codes, including:
	  • Australian Code for the Transport of Dangerous Goods by Road and Rail
	  • industry
	• commonwealth, state and territory legislation, including:
	  • anti-discrimination
	  • environmental protection
	  • equal employment opportunity
	  • freedom of information
	  • industrial
	  • OHS
	  • trade practices
	• road laws.

Potential hazards and risks are those identified by the organisation that may lead to:	• damage to plant, vehicle or property • harm to the environment • illness or injury to employees, contractors or the public • injuries resulting from manual handling and repetitive work.
Potential hazards and risks may include:	• broken glass • broken metal • compaction equipment • contamination • dust • fire • gases and fumes • hazardous waste (e.g. sharps) • narrow driveways • other vehicles and equipment • overhanging signs • projectiles

© Commonwealth of Australia, 2025 Industry Skills Australia

	• spark-producing equipment • unguarded conveyor belts • weather.
Emergency response action or procedures may include:	• cleaning up • containing emergency • isolating or shutting down equipment or plant • evacuation • first aid • making site safe • notifying authorities • using PPE.
Relevant personnel may include**:**	• client • team leader • team member • management • supervisor.
Integrity of containment may include checks for:	• contamination • drum expansion • gases • leaching • leaks • seals • spillage • unstable form.
Loading method may include:	• cart lifter • forklift • front-end loader • high pressure vacuum loading • loading by hand • shovelling.
Waste type may include:	• solid (non-hazardous), e.g. construction and demolition • liquid (non-hazardous), e.g. chemical and aqueous • hazardous – regulated, prescribed, quarantined, medical and clinical • recoverable resources, e.g. recyclable and green waste.
Cleaning of equipment may include:	• cleaning products and fluids • high pressure water or air-hosing • shovelling • sweeping out • using decontamination products • vacuuming.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Industry Skills Australia

Elements and Performance Criteria

1	Identify waste.	1.1	***Waste characteristics*** are identified.
		1.2	Types of wastes are differentiated by ***waste stream*** or ***waste categories***.
		1.3	***Hazardous and dangerous waste*** and ***non-conforming waste*** are detailed.
		1.4	***Contaminants*** present in waste are noted.
		1.5	Further information on waste is obtained by questioning appropriate personnel to ensure correct identification.
2	Identify hazards and risks.	2.1	***Other potential hazards and risks*** present in work environment are listed.
		2.2	Supervisor and team members are informed of job requirements, hazards and risks.
		2.3	Safe work practices that prevent risk behaviour are outlined to supervisor.
		2.4	Emergency response procedures are practised with team members.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to:
  - identify hazards and risks
  - identify waste types and waste non-conformances
  - segregate valuable resources in composite materials
  - segregate waste types, including potentially hazardous waste
- interpersonal skills to work in a team environment
- literacy skills to:
  - list potential hazards and risks
  - document and keep records

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Implement the food safety program	1.1. Food handling requirements are identified 1.2. Food handling is carried out according to the food safety program 1.3. Food safety hazards are controlled as required by the food safety program 1.4. Where food safety control requirements are not met, the incident is promptly reported and corrective action is taken 1.5. Food safety information is recorded to meet requirements of the food safety program 1.6. The workplace is maintained in a clean and tidy order to meet workplace standards 1.7. Work is conducted in accordance with workplace environmental guidelines
2. Participate in maintaining and improving food safety	2.1. Work area, materials, equipment and product are routinely monitored to ensure compliance with food safety requirements 2.2. Processes, practices or conditions which could result in a food safety breach are identified and reported according to workplace reporting requirements 2.3. Corrective action is taken in accordance with the food safety program 2.4. Food safety issues are raised with designated

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	personnel
3. Comply with personal hygiene standards	3.1. Personal hygiene meets the requirements of the food safety program 3.2. Health conditions and/or illness are reported as required by the food safety program 3.3. Clothing and footwear worn is appropriate for the food handling task and meets the requirements of the food safety program 3.4. Movement around the workplace complies with the food safety program

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- locate and follow workplace information relating to food safety responsibilities
- follow workplace procedures to maintain food safety as required by the food safety program relating to own work
- monitor food safety hazards as required by the food safety program, including methods such as visual inspection, sampling and testing
- record results of monitoring, and maintain records as required by the food safety program
- identify and report situations that do not meet the requirements of the food safety program and/or could result in unsafe food
- take corrective action as required by food safety program within level of responsibility
- handle, clean and store equipment, utensils, packaging materials and similar items according to the requirements of the food safety program as required by work role
- maintain personal hygiene consistent with the food safety program
- take necessary precautions when moving around the workplace and/or from one task to another to maintain food safety
- wear and maintain appropriate clothing/footwear as required by work tasks and consistent with the requirements of the food safety program
- report health conditions and illness as appropriate according to the food safety program
- handle and dispose of out-of-specification or contaminated food, waste and

© Commonwealth of Australia, 2025 Industry Skills Australia

recyclable material according to food safety program as this requirement relates to own work responsibility
- maintain the work area in a clean and tidy state
- identify and report signs of pest infestation
- record food safety information in appropriate format
- clean and sanitise equipment according to enterprise procedures
- collect samples and conduct tests according to the food safety program according to enterprise procedures
- participate in investigating food safety breaches according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- sources of information and expertise on procedures and responsibilities for food safety relating to own work
- basic concepts of HACCP-based food safety, including identification of hazards that are likely to occur, establishing appropriate methods of control and confirming that controls are met
- food safety management arrangements in the workplace, including awareness of food safety legislation, workplace policies and procedures to implement responsibilities, understanding the relationship between the quality system and food safety program, personnel responsible for developing and implementing the food safety program, the role of internal and external auditors as appropriate, procedures followed to investigate contamination events, and performance improvement processes
- awareness of common microbiological, physical and chemical hazards related to the foods handled in the work area, including the types of hazards likely to occur, the conditions under which they occur, possible consequences and control methods to prevent occurrence
- basic understanding of the properties, handling and storage requirements of ingredients, materials and products handled and used
- suitable standard for materials, measuring devices, equipment and utensils used in the work area
- food safety requirements related to work responsibilities, including personal hygiene, requirements and procedures to report illness and safe food handling practices for own work
- methods used to monitor that food safety is under control, including the purpose of sampling and taking measurements, such as temperature and pH, and conducting inspections and tests
- action required in the event of non-compliance (corrective action is typically described in the food safety program and/or related workplace information)
- purpose of keeping records and the recording requirements of the food safety

© Commonwealth of Australia, 2025 Industry Skills Australia

program • methods used in the workplace to isolate or quarantine food which may be unsafe • product and ingredient traceability procedures, such as product recall where required by work responsibilities • clothing and footwear requirements for working in and/or moving between food handling areas • personal clothing maintenance, laundering and storage requirements • appropriate bandages and dressings to be used when undertaking food handling • housekeeping requirements and responsibilities relating to own work, and use and storage of housekeeping/cleaning equipment where relevant • procedures to follow in the event of pest sighting or discovery of infestation • purpose and importance of cleaning and sanitation procedures • waste collection, recycling and handling procedures relevant to own work responsibilities • cleaning and sanitation procedures where relevant • impact of rework handling/addition on food safety where relevant • sampling and test methods where relevant

•

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • identify own responsibilities with regard to food safety • identify food safety risks in the workplace and the control measures used to manage them • apply control measures in own work • monitor compliance with food safety standards • identify and act on non-compliances and participate in improving safety • maintain required standards of personal hygiene • complete workplace records as required

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE	
	• apply safe work practices and identify OHS hazards and controls • apply food safety procedures.

Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to:
	• food safety information relating to the workplace, including a food safety program outlining food safety hazards and control methods. It may also include company policies, procedures and codes of practice, such as:
	  • Good Manufacturing Practice (GMP)
	  • related work instructions and procedures
	  • work tasks and responsibilities
	  • appropriate clothing and related apparatus
	  • reporting and monitoring systems
	  • cleaning and sanitation policies and procedures as required
	  • sampling and test procedures and related equipment as required.

Method of assessment	This unit should be assessed together with other units of competence relevant to the function or work role. Examples could be: • FDFOP2004A Clean and sanitise equipment • FDFOP2013A Apply sampling procedures • FDFOP2063A Apply quality systems and procedures • MSL973001A Perform basic tests.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT	
wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
A food safety program	A food safety program is a written document that specifies how a business will control all food safety hazards that may be reasonably expected to occur in all food handling operations of the food business. The food safety program and related procedures must comply with legal requirements of the food safety standards and must be communicated to all food handlers. Where no food safety program is in place, food safety requirements may be specified in general operating procedures
Workplace information	Workplace information may be provided in: • food safety program • standard operating procedures (SOPs) • specifications • log sheets • written or verbal instruction
Food handling	Food handling refers to: • food receipt and storage • food preparation • cooking, holding, cooling, chilling and reheating • packaging, disposal
Products/materials handled and stored	Products/materials handled and stored can include: • raw materials • ingredients • consumables • part-processed product • finished product • cleaning materials
Examples of a breach of food safety procedures	Examples of a breach of food safety procedures could include: • failure to check delivery temperatures of potentially hazardous chilled food

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT	
	• failure to place temperature-sensitive food in temperature controlled storage conditions promptly • failure to wash hands when required • use of cloths for unsuitable purposes
Responsibility for monitoring food safety	Responsibility for monitoring food safety, identifying breaches in food safety procedures and taking corrective action relates to own tasks and responsibilities and occurs in the context of the food safety program in the workplace
Monitoring	Monitoring describes the methods used to confirm that a food safety hazard is in control, such as: • taking temperatures • collecting samples • conducting visual inspections • conducting other tests as required
Food safety hazard	A food safety hazard is a biological, chemical or physical agent in, or condition of, food that has the potential to cause an adverse health effect
Hygiene requirements	Minimum personal hygiene requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in the Food Safety Standard 3.2.2, Division 4:14 and/or state or territory legislation/regulations
Reporting of health conditions and illnesses requirements	Reporting of health conditions and illnesses requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in Food Safety Standard 3.2.2, Division 4:13 and/or state or territory legislation/regulations
Appropriate clothing and footwear	Appropriate clothing and footwear depends on work requirements. It should be designed to ensure that the body and clothing itself does not contaminate food or surfaces likely to come into contact with food. Examples of clothing designed to prevent contamination by the body include: • purpose designed overalls or uniforms • hair-nets

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

FDFFS3001A Monitor the implementation of quality and food safety programs

Modification History

November 2011: minor typographical error corrected.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to provide a leadership role in supporting day-to-day implementation of the food safety/quality programs in a work area. It also involves supporting others to implement the requirements of the food safety/quality procedures.

Application of the Unit

Application of the unit	This unit applies to those with formal responsibility for others, and to those required to model workplace policies and procedures but who have no formal management role. This unit is based on and equivalent to the guideline food safety unit GFSOFSA Oversee the day-to-day implementation of food safety in the workplace. Note that this unit does not apply to the pharmaceutical industry. Refer to FDFPH3001A Monitor and maintain Good Manufacturing Practice procedures.

Licensing/Regulatory Information

	FDFFS2001A	Implement the food safety program and procedures

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Ensure others in the work area are able to meet quality and food safety requirements	1.1. Hazard control and clothing and equipment appropriate to work requirements are available, functional and correctly fitted 1.2. Information on food safety/quality responsibilities and procedures is current, accessible and communicated to others in the work area 1.3. Information about identified hazards and the outcomes of risk assessment and risk control procedures is accessible and communicated to others in the work area 1.4. Food safety/quality hazards and control measures used in the work area can be identified by those in the work area 1.5. Mentoring and coaching support is available to support individuals/groups to implement quality and

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	safe food handling procedures 1.6. Training needs are identified and addressed within level of responsibility
2. Monitor observance of quality standards and food safety programs in the work area	2.1. Work procedures in the work area are clearly defined, documented and followed 2.2. Deviation from identified procedures is identified, reported and addressed within level of responsibility 2.3. Personal behaviour is consistent with workplace policies and procedures that support food safety and quality 2.4. Food safety and/or quality hazards are identified and reported according to workplace procedures 2.5. Food safety and quality information is recorded to meet workplace reporting requirements 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted in accordance with workplace environmental guidelines
3. Take corrective action in response to quality and food safety non-compliance	3.1. Workplace procedures for responding to quality and food safety non-compliance are promptly implemented 3.2. Hazardous events are investigated to identify cause 3.3. Control measures to prevent recurrence and minimise risks of hazardous events are implemented
4. Maintain and improve quality and food safety in the work area	4.1. Processes or conditions which could result in a breach of food safety procedures or quality specifications are identified, assessed, removed or and/reported within level of responsibility and according to workplace procedure 4.2. Risk assessments are conducted and appropriate control measures are identified and implemented in the work area 4.3. Recommendations arising from risk assessments are implemented within level of responsibility 4.4. Inadequacies in control measures are identified and reported according to company reporting requirements 4.5. Matters raised relating to quality/food safety are promptly resolved and/or referred to appropriate personnel 4.6. The work group is consulted and advised of

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	quality/food safety matters relevant to work role 4.7. Opportunities for improving food safety and quality are identified and raised with relevant personnel 4.8. Procedures are developed or revised to support effective control of quality and food safety hazards 4.9. Quality/food safety records are reviewed to ensure they are complete and meet the quality system, food safety program and legal requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access, interpret and communicate information about the food safety program, quality requirements and related procedures to others in the work area
- demonstrate two-way communication, including active listening and responding constructively to feedback
- provide access to and maintain current food safety/quality documentation
- model safe food handling and quality practices and procedures to achieve required outcomes, including demonstrating:
  - work procedures that meet the requirements of quality and food safety
  - cleaning and sanitising equipment
  - sampling and testing as appropriate according to quality and food safety requirements
  - maintaining personal hygiene
  - wearing appropriate clothing and footwear as required by the work task
  - following procedures when moving within and between work areas
  - reporting health conditions and illnesses according to workplace procedures
  - handling, cleaning and storing equipment, utensils and packaging materials as appropriate
- identify control points in the work area and demonstrate monitoring techniques used (control points include critical, quality and regulatory control points)
- support others to meet quality standards and follow food safety procedures by ensuring that all personnel in the work area receive the information required and have the necessary skills and equipment to carry out their responsibilities

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- identify, report and/or address food safety/quality non-compliance in an appropriate and timely manner within level of responsibility
- determine when and how to make adjustments to maintain output within level of responsibility
- identify, report and/or address food safety/quality training and development needs of others in the work area
- ensure that appropriate and timely action is taken in response to non-compliance
- handle and dispose of out-of-specification or contaminated food, waste and recyclable material according to food safety program as this requirement relates to own work responsibility
- participate in investigations of non-compliance and risk assessment processes
- participate in consultation processes to improve quality and food safety outcomes in the workplace
- review practice and procedures to implement recommendations arising from risk assessments and/or improvement proposals within level of responsibility, such as collecting and analysing food safety/quality records, reviewing operating procedures and communicating changes to others in the work area
- ensure that housekeeping standards are maintained and that equipment is in operational order, such as participating in the management of equipment calibration
- monitor the recording of quality and food safety information to confirm that records accurately reflect performance and meet the requirements of the food safety and quality programs
- participate in food recall procedures as required, within level of responsibility
- facilitate consultation processes according to enterprise procedures
- lead investigations of quality and food safety incidents according to enterprise procedures
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- sources of information and expertise on procedures and responsibilities for food safety relevant to the workplace
- principles of a HACCP-based approach to managing food safety, including identifying hazards that are likely to occur, establishing appropriate methods of control and confirming that controls are met
- basic concepts of quality assurance including hazards, risk assessment and control methods
- company programs and systems in place to manage and support quality and food safety in the workplace, which may involve separate or integrated programs, including systems for maintaining and updating documents, such as operating procedures and specifications
- clothing and footwear requirements for working in and/or moving between food

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
handling areas, including personal clothing maintenance, laundering and storage requirements • appropriate bandages and dressings to be used when undertaking food handling • housekeeping requirements and responsibilities relating to own work, where relevant this includes use and storage of housekeeping/cleaning equipment • procedures to follow in the event of pest sighting or discovery of infestation • purpose and importance of cleaning and sanitation procedures • legal obligations for food safety and quality, including an awareness of government legislation and customer requirements • food safety and quality responsibilities and requirements relating to the work area • awareness of common micro biological, physical and chemical hazards related to the foods handled in the work area, including the types of hazards likely to occur, the conditions under which they occur, possible consequences and control methods to prevent occurrence • suitable standard for materials, measuring devices, equipment and utensils used in the work area • properties of food and ingredients used that affect food safety, including an understanding of related storage, processing and handling requirements • current technical and process knowledge required to participate in investigations of food safety/quality hazards, risks and incidents within level of responsibility, including an understanding of common micro biological, physical and chemical hazards, related control methods and the way changes in equipment and/or processing methods can affect food safety and quality outcomes • procedures for identifying unsafe and/or non-conforming product, including control points and evidence of out-of-specification product or materials • sampling procedures, test methods and inspections • options for responding to non-compliance, including legal responsibility, risk management and cost/implications of different responses and level of responsibility for decision making • methods used in the workplace to isolate or quarantine food which may be unsafe • waste collection, recycling, handling and disposal, including handling/disposal requirements for different types of waste, such as hazardous waste where relevant • traceability and recall procedures within level of responsibility • documentation system and procedures, including record keeping to meet both company and legal requirements, procedures for developing and/or reviewing workplace procedures, and document control systems used in the workplace • auditing arrangements, roles and responsibilities as they relate to own work responsibilities, such as internal and external audit processes • appropriate communication skills and techniques to convey information on quality and food safety requirements to others in the workplace • cleaning and sanitation procedures where relevant • impact of rework handling/addition on food safety where relevant • sampling and test methods where relevant

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
• facilitation and consultation techniqueswhere relevant

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • describe quality and food safety program, risks and control measures of the work area • confirm that control measures are in place and that personnel in the work area are equipped and informed to implement programs • identify, address and follow up on non-compliances • identify causes of non compliances • conduct risk assessments and recommend responsive action • provide support to others to implement the programs • complete and maintain documentation.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: • food safety program for the work area which identifies critical control points, control measures and corrective action • quality policy, system and procedures • work area or system in which quality and food safety practices and procedures are to be monitored • personal protective clothing and equipment as required • review/audit arrangements • reporting and monitoring systems.

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE	
Method of assessment	This unit should be assessed together with other units of competence relevant to the function or work role. Examples could be: • FDFPPL3001A Participate in improvement processes • FDFPPL3004A Lead work teams and groups • BSBRES401A Analyse and present research information.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Work responsibilities	Work responsibilities may include formal or informal responsibility for modelling appropriate quality/food safety policies and procedures and providing a support role to others in the work area
Food safety program	A food safety program is a written document that specifies how a business will control all food safety hazards that may be reasonably expected to occur in all food handling operations of the food business. The food safety program and related procedures must comply with legal requirements of the food safety standards and must be communicated to all food handlers. Where no food safety program is in place, food safety requirements may be specified in general operating procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT	
Quality systems	Quality systems may be externally accredited, such as an ISO system, or internally designed and managed
Workplace information	Workplace information may be provided in: • food safety and quality policies and programs • standard operating procedures (SOPs) • specifications • log sheets • written or verbal instruction incorporating food safety and quality requirements
Incidents	A food safety incident is: • a situation where the safe limits or parameters identified by the food safety program are not met A quality incident is: • a situation where the quality limits or parameters identified in specifications or processing instructions are not met
Monitoring	Monitoring describes the methods used to confirm that a food safety or quality hazard is in control, such as: • taking temperatures • collecting samples • conducting visual inspections • additional testing as required
Responsibility for identifying breaches of food safety procedures	Responsibility for identifying breaches of food safety procedures and taking corrective action occurs in the context of the food safety program and within scope of responsibility
Responsibility for identifying non-compliance against quality standards	Responsibility for identifying non-compliance against quality standards occurs within the context of defined standards or specifications and relates to work area
Personal hygiene requirements	Minimum personal hygiene requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in the Food Safety Standard 3.2.2, Division 4:14 and/or state or territory

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT	
	legislation/regulations
Reporting of health conditions and illnesses	Reporting of health conditions and illnesses requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in Food Safety Standard 3.2.2, Division 4:13 and/or state or territory legislation/regulations
Operator responsibilities	The operator at this level may not have direct responsibility for overseeing the training/development of team members. At a minimum they must be able to identify development needs of others in the work area and refer this information to the relevant personnel. The operator at this level may not have responsibility for independently assessing risks and determining the effectiveness of control measures. However, they would be expected to observe day-to-day effectiveness and participate in assessment and review processes. Responsibilities at this level may include facilitating consultation processes within level of responsibility
Record keeping	Record keeping complies with customer, legal and food safety program requirements

FPICOT3261 Transport forestry logs using trucks

Modification History

Replaces FPICOT3226B, Not Equivalent

Unit Descriptor

Unit descriptor

This unit describes the outcomes required to drive log trucks to or from a forestry harvesting site, facilitate log loading and unloading, and deliver logs to their intended destination according to organisational procedures and regulations.

General workplace legislative and regulatory requirements apply to this unit. Specific licences and certification may be required, subject to enterprise requirements.

Application of the Unit

Application of the unit

The unit involves transporting forestry logs using trucks in a variety of work settings, including forest environments, landings, log dumps, saw mills, wood chip mills, veneer mills, board/plywood mills and other settings, such as farms and agriculture.

The skills and knowledge required for competent workplace performance are to be used within the scope of the person's job and authority.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills

Elements and Performance Criteria Pre-Content

Not applicable.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Prepare to transport logs	1.1. Appropriate ***work/occupational health and safety*** **(WHS/OHS)**, ***environmental*** and ***organisational policies and procedures*** relevant to transporting forestry logs using trucks are identified and followed 1.2 Logging sites and logs to be transported are identified from schedules, ***work orders*** or harvesting site personnel 1.3. Coupe map is located and examined for truck access areas 1.4. Work order and/or schedules are reviewed and clarified with ***appropriate personnel,*** as required 1.5***. Truck, ancillary equipment, accessories*** and/or ***configuration*** requirements relevant to work order and ***load build*** are located and availability is confirmed 1.6. ***Transportation documentation*** required to comply with legislation related to driving hours, load limits and dimensions is received and checked
2. Establish route for log truck	2.1. Route is selected and its suitability to enter and exit coupe is confirmed with appropriate personnel to ensure minimal environmental impact and site protection 2.2. Transport routes are ***communicated*** and confirmed with appropriate personnel to ensure the most efficient, safe, secure and legal movement of forestry logs 2.3. Information on height, width and load limits of ***road infrastructure, environmental constraints*** and ***other restrictions*** are adhered to, where necessary 2.4. Time required to transport logs is estimated and confirmed with relevant personnel accounting for fatigue management legislation and guidelines
3. Facilitate log truck loading	3.1. Access is identified and manoeuvring approach established with worksite personnel for loading areas 3.2. Truck and/or configuration are positioned to avoid site and equipment hazards and to maximise load safety and security

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	while loading
	3.3. ***Log positioning equipment*** is placed and checked for planned loading, and is reset if necessary
	3.4. Safe loading procedures are agreed to with relevant worksite personnel and monitored to ensure load meets transport regulatory requirements
	3.5. Communication between driver and machine operators is established and maintained to determine safe location when loading logs
	3.6. Load is checked and feedback provided to loader operator, as required, to ensure safe transport
4. Secure logs prior to transport	4.1. Load is secured with sufficient number and type of ***securing devices*** as per loading guidelines and transport regulatory requirements
	4.2. Logs are re-tensioned as required
	4.3. ***Overhang warning devices*** and signage are fitted to load to comply with transport regulatory requirements
5. Transport logs	5.1. Logs are transported following planned or modified route with consideration for road surfaces, conditions and fatigue management legislation and guidelines
	5.2. Condition of roads and tracks is monitored, and unexpected ground, water, vegetation or other ***environmental conditions*** are reported to appropriate personnel
	5.3. Truck is operated and driven to manufacturer specifications and legislative requirements using ***primary and subsidiary controls*** as appropriate to conditions
	5.4. Truck ***gauges and warning devices*** are monitored through observation of performance to detect operating faults
	5.5. Operating faults are identified, ***recorded and reported***, and responded to as necessary according to organisational requirements to ensure equipment is safely operated within manufacturer specifications and safety regulations
	5.6. Periodic load safety checks are conducted and load is ***re-tensioned*** according to statutory requirements and road conditions
	5.7. ***Communication methods*** with other drivers and road users are established and operated during log transport to inform location of truck and possible hazards
	5.8. Communication channels are kept open in line with organisational arrangements to ensure location is known at all times so that timely emergency assistance can be provided if required

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
6. Complete log transport operations for unloading	6.1. Site procedures for unloading are established with appropriate personnel and site inductions are completed 6.2. Truck is directed to and manoeuvred into planned position for unloading 6.3. Truck is parked in designated area as instructed by appropriate personnel to avoid site and equipment hazards 6.4. Truck and trailer are shut down and truck is secured according to manufacturer specifications and site requirements 6.5. Load is inspected for log movement and provision is made to support logs that cannot be controlled when released 6.6. Safe location and safe unloading zones are identified and adhered to when removing logs according to site unloading procedures 6.7. Securing devices for load restraint are released in correct sequence for truck, trailer and/or load configuration 6.8. Log shifting process and truck operations, including faults, are recorded and reported to appropriate personnel 6.9. Workplace records and documentation are completed and maintained according to workplace procedures 6.10. Truck and trailer are made safe for return journey to coupe

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Required skills

- Technical skills to:
- use and maintain relevant tools, machinery and equipment
- efficiently and safely transport forestry logs using trucks
- Communication skills to:
- use appropriate communication and interpersonal techniques with colleagues and others
- use skills, including questioning, active listening, asking for clarification, and seeking advice when required
- Literacy skills to:
- record and report workplace information, including log books, incident reports, and transport routes
- maintain documentation
- Numeracy skills to:
- calculate load sizes

© Commonwealth of Australia, 2025 Industry Skills Australia

- record and estimate weights
- calculate work and rest times
- calculate load restraint requirements
- Problem-solving skills to:
- identify problems and equipment faults
- demonstrate appropriate response procedures
- determine appropriate haulage routes
- Map reading skills to interpret coupe and road transport maps

Required knowledge

- WHS/OHS, environmental, and organisational policies, procedures and established safe practices relevant to the full range of processes for the transport of forestry logs using trucks
- Environmental protection requirements, including noise levels, emissions, damage to habitat, safe disposal of waste material, and minimisation of carbon emissions
- Environmental risks and hazards associated with the transport of forestry logs using trucks
- Energy efficient practices, including minimising fuel consumption
- Scheduling and routing procedures
- Transport regulatory requirements relating to the transport of forestry logs
- Truck capabilities and capacities
- Statutory road regulations
- Load restraint standards and techniques
- Safe log loading and unloading methods and techniques, including load restraint
- Established communication channels and protocols
- Fatigue management legislation and guidelines
- Problem identification and resolution strategies and common fault finding techniques
- Types of tools and equipment used for the transport of forestry logs, and procedures for their safe use, operation and maintenance
- Safe manual handling techniques and/or equipment
- Applicable fall from heights regulations and compliance requirements
- Appropriate mathematical procedures for calculating load sizes, estimating and recording weights, load restraint requirements, and work and rest times
- Procedures for recording and reporting workplace information

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	A person who demonstrates competency in this unit must be able to provide evidence that they can safely transport forestry logs using trucks according to organisational requirements.

© Commonwealth of Australia, 2025 Industry Skills Australia

Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to, and satisfy, all of the requirements of the elements of this unit and include demonstration of: • following appropriate WHS/OHS, environmental and organisational policies and procedures relevant to transporting forestry logs using trucks • planning forestry log movement in line with organisational requirements • observing and facilitating loading and unloading log truck to organisational requirements • securing forestry logs prior to transport according to legislative and organisational requirements • following legal requirements as well as organisational policies and procedures relevant to transporting forestry logs • completing documentation required by workplace personnel to complete the movement of forestry logs.
Context of and specific resources for assessment	• Competency is to be assessed in the workplace • Assessment is to occur under standard and authorised work practices, safety and environmental constraints • Assessment of required knowledge, other than confirmatory questions, will usually be conducted in an off-site context • Assessment is to comply with relevant regulatory or Australian Standards requirements • The following resources should be made available: • workplace location • materials and equipment relevant to undertaking work applicable to this unit • specifications and work instructions
Method of assessment	• Assessment must satisfy the endorsed Assessment Guidelines of the FPI11 Training Package • Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with application of required knowledge • Assessment must be by direct observation of tasks, with questioning on required knowledge and at least one other type of evidence i.e. third party report and it must also reinforce the integration of employability skills • Assessment methods must confirm the ability to access and correctly interpret and apply the required

© Commonwealth of Australia, 2025 Industry Skills Australia

knowledge
- Assessment may be applied under project-related conditions (real or simulated) and require evidence of process
- Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances
- Assessment may be in conjunction with assessment of other units of competency relevant to the industry sector, workplace and job role
- The assessment environment should not disadvantage the candidate
- Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender or language backgrounds other than English
- Where the participant has a disability, reasonable adjustment may be applied during assessment
- Language and literacy demands of the assessment task should not be higher than those of the work role

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

RANGE STATEMENT

Work/occupational health and safety (WHS/OHS) requirements: are to be in accordance with applicable commonwealth, state or territory legislation and regulations, and organisational safety policies and procedures, and may include:

- personal protective equipment and clothing
- safety equipment
- first-aid equipment
- fire-fighting equipment
- fatigue management
- hazard and risk control

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	• elimination of hazardous materials and substances • safe forest practices, including required actions relating to forest fire • manual handling, including shifting, lifting and carrying • chain of responsibility
Environmental requirements may include:	• legislation • organisational policies and procedures • energy efficiency • workplace practices
Organisational requirements may include:	• legal • organisational and site guidelines • policies and procedures relating to own role and responsibility • quality assurance • procedural manuals • quality and continuous improvement processes and standards • WHS/OHS, emergency and evacuation procedures • ethical standards • recording and reporting requirements • equipment use, maintenance and storage requirements • environmental management requirements (waste disposal, recycling and reuse guidelines)
Work orders may include:	• instructions for equipment allocation and usage, location and intended activity to designated personnel • supervisors • suppliers • clients • colleagues • managers • schedulers
Truck may include:	• rigid or articulated log trucks the following: • semi-trailers • jinkers • quad-dogs • B doubles

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

Ancillary equipment may include:	• two-bay skeletal trucks • safety fittings • load restraint devices • head boards • cab guards
Accessories may include:	• tools • records • first aid kits • fire extinguishers • binders • chains • personal protective equipment
Configuration is to include:	• a truck and trailer combination
Load build:	is to include positioning of logs on truck so as to avoid: • uneven weight distribution • instability or uncontrolled collapse of the load during loading or unloading must also take into account: • requirements for trailer rigidity • turning clearance • overhang • projection above stanchions • crowning • weight distribution on truck and trailer axles • contact with bolsters, stanchions and other logs
Transportation documentation may include:	• transport permits • gazette notices • information booklets • maps
Communication may include:	• verbal and non-verbal language • active listening • questioning to clarify and confirm understanding • use of positive, confident and cooperative language • use of language and concepts appropriate to individual social and cultural differences • control of tone of voice • body language
Road infrastructure may include:	• sealed or unsealed roads

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

Environmental constraints may include:	• established tracks • soil type • access • slope • weather conditions
Other restrictions may include:	• load height • weight • overhang
Log positioning equipment may include:	• bolsters • slippers • stanchions • chocks
Securing devices may include:	• dogs and chains • binders/straps • webbing • lashings and winches • auto-tensioning devices
Overhang warning devices may include:	• flags • lights • reflectors • signs
Environmental conditions may include:	• soil and water protection • ground hazards and obstacles • wind and dust • fog and rain
Primary controls may include:	• power • brakes • steering • speed • position • load reaction • gear selection
Subsidiary controls may include:	• differential lock • centre tyre inflation (CTI) power dividers
Gauges and warning devices may include:	• alarms • lights • buzzers
Records and reports:	may include: • scheduling and coordination outcomes

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	• log movement • despatch outcomes • storage locations • quality outcomes • hazards • incidents • equipment malfunctions may be: • manual • work diary • computer-based system • other appropriate organisational communication system
Re-tensioning is to include:	• re-tightening of the chains, binders and other load restraint devices
Communication methods may include:	• two-way radio • hands-free mobile phones

HLTAID001 Provide cardiopulmonary resuscitation

Modification History

Release	Notes
Release 5	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 4	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 3	Updated mapping information. Equivalent outcome.
Release 2	Updated mapping information. Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. Revised evidence requirements, including volume and frequency of assessment.

Application

This unit describes the skills and knowledge required to perform cardiopulmonary resuscitation (CPR) in line with the Australian Resuscitation Council (ARC) Guidelines.

This unit applies to all workers who may be required to provide CPR, in a range of situations, including community and workplace settings.

Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

© Commonwealth of Australia, 2025 Industry Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Respond to an emergency situation	1.1 Recognise an emergency situation 1.2 Identify, assess and minimise immediate hazards to health and safety of self and others 1.3 Assess the casualty and recognise the need for CPR 1.4 Seek assistance from emergency response services
2. Perform CPR procedures	2.1 Perform cardiopulmonary resuscitation in accordance with ARC guidelines 2.2 Display respectful behaviour towards casualty 2.3 Operate automated external defibrillator (AED) according to manufacturer's instructions
3. Communicate details of the incident	3.1 Accurately convey incident details to emergency response services 3.2 Report details of incident to workplace supervisor as appropriate 3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAID001 Provide cardiopulmonary resuscitation

Modification History

Release	Notes
Release 5	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 4	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 3	Updated mapping information. Equivalent outcome.
Release 2	Updated mapping information. Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. Revised evidence requirements, including volume and frequency of assessment.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:
  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor

© Commonwealth of Australia, 2025 Industry Skills Australia

  - performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
  - responded appropriately in the event of regurgitation or vomiting
  - managed the unconscious breathing casualty
  - followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
  - followed the prompts of an automated external defibrillator (AED)
- Responded to at least one simulated first aid scenario contextualised to the candidate's workplace/community setting, including:
  - demonstrated safe manual handling techniques
  - provided an accurate verbal or written report of the incident

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC Guidelines relevant to the provision of CPR
  - safe work practices to minimise risks and potential hazards
  - infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- Legal, workplace and community considerations, including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - duty of care requirements
  - respectful behaviour towards a casualty
  - own skills and limitations
  - consent
  - privacy and confidentiality requirements
  - importance of debriefing
- Considerations when providing CPR, including:
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - chain of survival
  - standard precautions
- Basic anatomy and physiology relating to:
  - how to recognise a person is not breathing normally
  - chest

© Commonwealth of Australia, 2025 Industry Skills Australia

- response/consciousness
- upper airway and effect of positional change

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- AED training device
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor Requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition hold current first aid certificate HLTAID003 or higher.

Modification History

Release	Comments
Release 4	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 3	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 2	Minor corrections to formatting to improve readability. Equivalent competency outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. Changes to evidence requirements relative to revised scope of unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:
  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor

© Commonwealth of Australia, 2025 Industry Skills Australia

    - performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
    - responded appropriately in the event of regurgitation or vomiting
    - managed the unconscious breathing casualty
    - followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
    - followed the prompts of an Automated External Defibrillator (AED)
- Responded to at least one simulated first aid scenario contextualised to the candidate's workplace/community setting, including:
    - demonstrated safe manual handling techniques
    - provided an accurate verbal or written report of the incident
- Applied first aid procedures for the following:
    - allergic reaction
    - anaphylaxis
    - bleeding control
    - choking and airway obstruction
    - respiratory distress, including asthma
    - shock

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
    - ARC Guidelines relevant to provision of CPR and first aid
    - safe work practices to minimise risks and potential hazards
    - Infection control principles and procedures, including use of standard precautions
    - requirements for currency of skill and knowledge
- legal, workplace and community considerations, including:
    - awareness of potential need for stress-management techniques and available support following an emergency situation
    - duty of care requirements
    - respectful behaviour towards a casualty
    - own skills and limitations
    - consent
    - privacy and confidentiality requirements
    - importance of debriefing
- considerations when providing basic emergency life support, including:
    - airway obstruction due to body position

© Commonwealth of Australia, 2025 Industry Skills Australia

  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - chain of survival
  - standard precautions
- principles and procedures for first aid management of the following scenarios:
  - allergic reaction
  - anaphylaxis
  - bleeding control
  - cardiac conditions, including chest pain
  - chocking and airway obstruction
  - respiratory distress, including asthma
  - shock
  - stroke
- basic anatomy and physiology relating to:
  - considerations in provision of first aid for specified conditions
  - chest
  - how to recognise a person is not breathing normally
  - response/consciousness
  - upper airway and effect of positional change

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device
- placebo bronchodilator and spacer device
- roller bandages
- triangular bandage
- workplace First Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form
- wound dressing

© Commonwealth of Australia, 2025 Industry Skills Australia

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition hold current first aid certificate HLTAID003 or higher.

Performance Evidence

e candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:

© Commonwealth of Australia, 2025 Industry Skills Australia

  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
  - performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
  - responded appropriately in the event of regurgitation or vomiting
  - managed the unconscious breathing casualty
  - followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
  - followed the prompts of an Automated External Defibrillator (AED)
- Responded to at least two simulated first aid scenarios contextualised to the candidate's workplace/community setting, including:
  - conducted a visual and verbal assessment of the casualty
  - demonstrated safe manual handling techniques
  - post-incident debrief and evaluation
  - provided an accurate verbal or written report of the incident
- Applied first aid procedures for the following:
  - allergic reaction
  - anaphylaxis
  - bleeding control
  - choking and airway obstruction
  - envenomation, using pressure immobilisation
  - fractures, sprains and strains, using arm slings, roller bandages or other appropriate immobilisation techniques
  - respiratory distress, including asthma
  - shock

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC Guidelines relevant to provision of CPR and first aid
  - safe work practices to minimise risks and potential hazards
  - infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - duty of care requirements

  - respectful behaviour towards a casualty
  - own skills and limitations
  - consent
  - privacy and confidentiality requirements
  - importance of debriefing
- considerations when providing first aid including:
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - chain of survival
  - standard precautions
  - how to conduct a visual and verbal assessment of the casualty
- principles and procedures for first aid management of the following scenarios:
  - abdominal injuries
  - allergic reaction
  - anaphylaxis
  - basic care of a wound
  - bleeding control
  - burns
  - cardiac conditions, including chest pain
  - choking and airway obstruction
  - crush injuries
  - diabetes
  - dislocations
  - drowning
  - envenomation
  - environmental impact, including hypothermia, hyperthermia, dehydration and heat stroke
  - eye and ear injuries
  - fractures
  - febrile convulsions
  - head, neck and spinal injuries
  - minor skin injuries
  - needle stick injuries
  - poisoning and toxic substances
  - respiratory distress, including asthma
  - seizures, including epilepsy
  - shock
  - soft tissue injuries, including strains and, sprains
  - stroke

© Commonwealth of Australia, 2025 Industry Skills Australia

  - unconsciousness
- basic anatomy and physiology relating to:
  - how to recognise a person is not breathing normally
  - chest
  - response/consciousness
  - upper airway and effect of positional change
  - considerations in provision of first aid for specified conditions

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device
- placebo bronchodilator and spacer device
- roller bandages
- triangular bandages
- workplace First Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form for written reports
- wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAID006 Provide advanced first aid

Modification History

Release	Comments
Release 5	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 4	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 3	Updated mapping information. Equivalent outcome.
Release 2	Minor changes to formatting to improve readability.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. Removal of embedded content from HLTFA412A Apply First Aid. New evidence requirements for assessment. Removal of pre-requisite unit.

Application

This unit describes the skills and knowledge required to provide an advanced first aid response, including management of the incident and other first aiders, until the arrival of medical or other assistance.

The unit applies to workers who may be required to provide, coordinate and manage a first aid response across a range of complex situations, including community and workplace settings.

© Commonwealth of Australia, 2025 Industry Skills Australia

Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Respond to an emergency situation	1.1 Recognise an emergency situation 1.2 Identify, assess and manage immediate hazards to health and safety of self and others 1.3 Assess the casualty and recognise the need for first aid response 1.4 Assess the situation and seek assistance from emergency response services 1.5 Deploy resources to appropriate locations as required in line with workplace procedures
2. Apply appropriate first aid procedures	2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with Australian Resuscitation Council (ARC) guidelines 2.2 Provide first aid in accordance with established first aid principles 2.3 Display respectful behaviour towards casualty 2.4 Obtain consent from casualty where possible 2.5 Use available resources and equipment to make the casualty as comfortable as possible 2.6 Operate first aid equipment according to manufacturer’s instructions 2.7 Monitor the casualty’s condition and respond in accordance with first aid principles

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
3. Coordinate first aid activities until arrival of medical assistance	3.1 Identify available resources required and establish communication links with appropriate personnel, emergency management services and medical assistance as appropriate 3.2 Deploy correct amount of required resources to appropriate locations in an effective manner to ensure timely arrival 3.3 Document the provision of resources and recommend modifications as required 3.4 Monitor the condition of casualties in accordance with first aid principles and workplace procedures 3.5 Coordinate evacuation of casualties according to relevant evacuation procedures 3.6 Arrange support services for personnel involved in the incident in accordance with relevant principles and procedures
4. Communicate details of the incident	4.1 Accurately convey incident details to emergency response services 4.2 Report details of incident in line with organisational policies 4.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies
5. Evaluate the incident and own performance	5.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents 5.2 Participate in debriefing to address individual needs 5.3 Evaluate management of the incident and develop an action plan in consultation with relevant parties 5.4 Review contingency planning to identify and select alternative management principles and procedures as required

Release 4	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 3	Updated mapping information. Equivalent outcome.
Release 2	Minor changes to formatting to improve readability.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. Removal of embedded content from HLTFA412A Apply First Aid. New evidence requirements for assessment. Removal of pre-requisite unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- followed DRSABCD in line with ARC guidelines, including:

© Commonwealth of Australia, 2025 Industry Skills Australia

  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
  - performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
  - performed at least 2 minutes of Bag-valve-mask ventilation and at least 2 minutes of compression during a two rescuer procedure on an adult resuscitation manikin placed on the floor
  - responded appropriately in the event of regurgitation or vomiting
  - managed the unconscious breathing casualty
  - followed the prompts of a Automated External Defibrillator (AED)
  - followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- responded to at least three simulated first aid scenarios contextualised to the candidate's workplace/community setting, including:
  - demonstrated safe manual handling techniques
  - conducted a visual and verbal secondary survey assessment of the casualty
  - assessed vital signs (respirations, pulse and temperature)
  - communicated effectively with a first aid team providing direction and coordination of other first aiders
  - post-incident debrief and evaluation
  - provided an accurate verbal and written report of the incident
- applied first aid procedures for the following:
  - allergic reaction
  - anaphylaxis
  - bleeding control
  - choking and airway obstruction
  - conducted a basic triage for multiple casualty incident
  - envenomation (using pressure immobilisation)
  - fractures, sprains and strains (using arm slings, roller bandages or other appropriate immobilisation principles)
  - head, neck and spinal injuries (using immobilisation principles)
  - respiratory distress - including asthma
  - seizures - including epilepsy
  - shock
- located and interpreted workplace policies and procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC guidelines relevant to provision of CPR and first aid
  - guidelines of Australian national peak clinical bodies
  - safe work practices to deal with risks and potential hazards including manual handling, hazardous substances, dangerous goods and chemicals
  - infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - capabilities of emergency management services
  - consent
  - duty of care requirements
  - importance of debriefing
  - own skills and limitations
  - legal requirements of administration of medication and the rights and responsibilities of the First Aider in the workplace regarding medication
  - privacy and confidentiality requirements
  - respectful behaviour towards a casualty
- considerations when providing first aid including:
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - assessment and interpretation of vital signs, including respirations, temperature and pulse
  - chain of survival
  - how to conduct a visual and verbal secondary survey assessment of casualty
  - priorities of management in first aid when dealing with life-threatening conditions
  - procedures for dealing with casualties who are aged or infirmed
  - procedures for dealing with major and minor accidents in the workplace
  - procedures when providing first aid to children
  - standard precautions
- principles and procedures for first aid management of the following scenarios, including complications:
  - abdominal injuries
  - allergic reaction

© Commonwealth of Australia, 2025 Industry Skills Australia

  - anaphylaxis
  - basic care of a wound
  - bleeding control
  - burns, including thermal, chemical, friction and electrical
  - cardiac conditions, including chest pain
  - choking and airway obstruction
  - crush injuries
  - diabetes
  - drowning
  - emergency childbirth
  - envenomation
  - environmental impact including hypothermia, hyperthermia, dehydration and heat stroke
  - eye and ear injuries
  - febrile convulsions
  - head, neck and spinal injuries
  - levels of consciousness
  - needle stick injuries
  - poisoning and toxic substances
  - respiratory distress, including asthma
  - seizures, including epilepsy
  - shock
  - skin injuries
  - soft tissue musculoskeletal, including injuries including sprains, strains, dislocations and fractures
  - stroke
  - substance misuse, including common drugs and alcohol, including illicit drugs
- basic anatomy and physiology relating to:
  - how to recognise a person is not breathing normally
  - chest, skeleton, joints and muscles
  - response/level of consciousness
  - upper airway and effect of positional change
  - considerations in provision of first aid for specified conditions

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

© Commonwealth of Australia, 2025 Industry Skills Australia

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device.
- bag-valve-mask
- eye patch
- placebo bronchodilator and spacer device
- roller bandages
- thermometer
- triangular bandages
- workplace first Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form
- wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTWHS006 Manage personal stressors in the work environment

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.

Application

This unit describes the skills and knowledge required to maintain health and wellbeing by preventing and managing personal stress.

This unit applies to work in a range of health and community services settings, in particular work roles that operate in high stress situations and circumstances.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Develop strategies to manage personal stress	1.1 Recognise sources of stress in own job role 1.2 Recognise triggers and own response to stress 1.3 Identify strategies to effectively prevent, reduce and manage stress 1.4 Identify internal and external options and resources for

© Commonwealth of Australia, 2025 Industry Skills Australia

	additional support
	1.5 Develop a personal stress management plan that responds to identified stressors and triggers
2. Implement stress management strategies	2.1 Use strategies from personal stress management plan that address personal triggers and stressors
	2.2 Organise own workload to minimise stress and inform relevant personnel of any variations and difficulties affecting work requirements
	2.3 Identify and adopt strategies to balance work/life priorities
3. Evaluate stress reducing strategies	3.1 Monitor and review effectiveness of stress management strategies
	3.2 Adjust strategies not meeting the desired outcome and recognise when additional resources and/or support is needed
	3.3 Access internal or external options and resources for additional support to meet desired outcomes of the stress management plan

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to *performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTWHS006 Manage personal stressors in the work environment

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- developed, implemented and reviewed 1 personal stress management plan that includes identified sources, triggers and responses to stress
- used strategies from personal stress management plan to manage 2 stressful situations in the workplace involving colleagues and/or clients

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- sources of stress and how they manifest in health and/or community services work environment including:
  - complex client behaviour (emotional, aggressive, cognitive deficit, non-compliance)
  - grief and loss experienced by workers
  - exposure to stressful working conditions and stressful incidents
- work planning and prioritisation techniques e.g. time management strategies
- legal rights relating to the Fair Work Act
- services available for referral, both within the organisation and in the community e.g. informal/formal debriefing sessions and/or workplace counselling

© Commonwealth of Australia, 2025 Industry Skills Australia

- self-care techniques including:
  - impact of exercise, diet and nutrition on physical health
  - work/life balance strategies
  - complementary and alternative health options

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

MARC022 Perform mooring and unmooring activities

Modification History

Release 1. New unit of competency.

Application

This unit involves the skills and knowledge required to carry out mooring and unmooring activities according to relevant requirements and regulations.

This unit applies to people working in the maritime industry as a Linesperson.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

C – Equipment Operations

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare a berth	1.1 Relevant documentation and records are identified and accessed as required
	1.2 Positioning information is obtained, checked and confirmed

© Commonwealth of Australia, 2025 Industry Skills Australia

			as accurate
		1.3	Bridge marker is set
		1.4	Briefing is obtained and interpreted on issues related to mooring or unmooring operation
		1.5	Communications equipment is prepared and set to correct channels
		1.6	Berth conditions are checked, and made clear and ready for mooring and unmooring
		1.7	Portainer cranes and gantries/loaders are correctly positioned for berthing of vessel
		1.8	Safety concerns are communicated to pilot of vessel with due care not to interfere with tug and vessel communications
2	**Receive heaving line from mooring launch**	2.1	First lines are received from mooring launch according to operational procedures and pilot directions
		2.2	Assistance is provided in pulling mooring line ashore and making it fast to applicable bollard/hooks
		2.3	Required precautions and safety procedures are followed during receival operations
		2.4	Correct method for crossing mooring lines over and between another vessel's mooring lines is followed
		2.5	When another vessel occupies the bollard, mooring line is dipped as required
3	**Receive heaving lines from vessel**	3.1	First lines are received and are made fast to appropriate bollards/ hooks
		3.2	Two headlines and two sternlines are made available each to two different bollards/hooks
		3.3	Spring lines from forward and aft are received from vessel and are attached to applicable bollards/hooks
		3.4	Additional lines are received from vessel and are attached to applicable bollards/hooks
		3.5	Correct method for crossing mooring lines over and between another vessel's mooring lines is followed
		3.6	When another vessel occupies the bollard, mooring line is

© Commonwealth of Australia, 2025 Industry Skills Australia

			dipped as required
		3.7	Safe distance from snapback zones and demarcated area is maintained during line tensioning
4	**Return heaving line to vessel**	4.1	Vessel crew is made aware of planned heaving line return operations
		4.2	Lines are returned according to operational procedures
		4.3	Required precautions and safety procedures are followed during heaving line return operations
5	**Land a gangway**	5.1	Precautions are taken to ensure all personnel are well clear of vicinity of gangway
		5.2	Vehicle is used to locate gangway in correct position in a safe and efficient manner
6	**Let go of vessel**	6.1	Vessel crew is made aware of intentions to let go
		6.2	Singling up processes are carried out according to operational procedures and required safety precautions
		6.3	Due care is taken during singling up processes to ensure all mooring lines are kept clear of propeller
		6.4	Due care is taken when waiting for order for remaining lines to be released, to stand clear of remaining lines because of tension to which lines may be subjected
		6.5	Once order is given, remaining lines are released according to operational procedures and required safety precautions
		6.6	Stand clear procedures are immediately implemented when vessel crew inadvertently heaves on a line being handled by the shore-side team
		6.7	Required precautions and safety procedures are followed during unmooring operations

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Industry Skills Australia

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Relevant documentation and records include one or more of the following:	• mooring and unmooring plans, procedures, checklists and instructions • relevant maritime authority instructions • relevant sections of maritime regulations concerning mooring and unmooring operations • reports and records of mooring and unmooring operations or safety incidents • rope and equipment manufacturer instructions and procedures • safety instructions and procedures
Issues related to mooring or unmooring operations include one or more of the following:	• bollard/hook and capstan numbers • special circumstances
Made clear and ready for mooring includes one of the following:	• removing obstructions • stopping any work that creates excessive dust or noise

Safety precautions include:	• checking:
	  • own personal fitness and medical wellbeing
	  • whereabouts of edge of wharf
	  • whereabouts of other members of mooring and unmooring team
	• confirming availability of a personal flotation device on arrival at mooring and unmooring operation
	• keeping clear of snapback zone and demarcated areas
	• keeping work area hazard-free
	• obtaining and using required PPE (such as safety footwear, safety helmet, suitable gloves, safety vest and reflective clothing, personal life vest, safety glasses)
	• removing rings from fingers to avoid them being caught on steel wire ropes
	• wearing suitable clothing

Mooring or unmooring operations include	• landing a gangway • positioning lines launch • positioning mooring lines • preparing a berth • receiving mooring lines under a vessel • receiving heaving line from: • a launch

© Commonwealth of Australia, 2025 Industry Skills Australia

    - a vessel
  - returning heaving line to a vessel
  - towing mooring lines using vehicles
  - unmooring and letting go a vessel
  - working:
    - by day or night
    - in normal and emergency situations
    - under any permissible conditions of weather
    - at various shore-side terminals and wharves

Unit Mapping Information

This unit replaces and is equivalent to MARC1001A Carry out shore-based mooring and unmooring operations.

MARC1001A replaces and is equivalent to TDMMR5607A Carry out shore-based mooring and unmooring operations.

Assessment Requirements for MARC022 Perform mooring and unmooring activities

Modification History

Release 1. New unit of competency.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- applying relevant work health and safety (WHS)/occupational health and safety (OHS) requirements and work practices
- being aware of own ability and limits to rectify irregularities and faults
- communicating effectively with other personnel when mooring and unmooring a vessel using standard nautical terms
- complying with relevant maritime regulations and International Maritime Organization (IMO) Conventions and Codes, including the relevant sections of the Australian Maritime Safety Authority (AMSA) Marine Orders as they apply to mooring and unmooring operations on ocean-going vessels
- ensuring behaviour reflects relevant current legislative and regulatory requirements
- following all orders carefully and systematically
- following work instructions
- handling mooring lines on deck of lines launch, flaking and positioning of mooring lines
- handling rope appropriately and correctly:
  - storing and caring for ropes and lines
  - tying knots such as bowline, reef knot, overhand knot, figure of eight knot, sheet bends and clove hitch and splicing and whipping, round turn two half hitches
  - applying a chain stopper to a wire rope
  - heaving on a line in collaboration with other members of a mooring team
  - applying a stopper to a synthetic fibre rope
  - applying a chain stopper to a natural cordage rope
  - attaching a line to a bollard or bitt with all lines in correct order such as up through the eye
  - flaking down a rope
- handling wire mooring lines in lines launch
- identifying and correctly using:
  - various types of ropes, steel wires and mooring equipment
  - personal protective equipment (PPE)

© Commonwealth of Australia, 2025 Industry Skills Australia

- implementing port and vessel security procedures
- initiating timely action in response to defects or damage
- interpreting and following procedures for mooring and unmooring operations, including safety instructions and precautions
- recognising dangers and hazards before and during mooring and unmooring operations, and taking appropriate action to report and/or rectify them
- recognising problems that may occur during mooring and unmooring operations and taking appropriate action to report and/or resolve them
- taking proper care of ropes and mooring equipment
- using various vehicles for towing mooring lines, as required
- working effectively as a member of a mooring and /or unmooring team.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- awareness of line launches propeller when towing mooring lines
- communications techniques and equipment required during mooring and unmooring operations
- correct method of crossing ship's mooring lines over and or between other vessel's mooring lines already berthed
- dangers associated with mooring systems:
  - being hit by a heaving line being thrown down from a vessel
  - stepping inside the bight of a line
  - being struck by a parting line
  - mixing rings and wire rope
  - falling off the edge of the wharf into the water
  - back strain from carrying a line, heaving on a line or heaving on a line
  - 'snap back' when a line breaks
  - trip hazards such as crane lines
- factors that affect mooring and unmooring operations, including the effects of wind, weather, tides, sea conditions, currents, draft changes and surges from passing vessels on mooring and unmooring operations
- hazards and problems, and appropriate preventative and remedial action and solutions
- maritime regulations applicable to mooring and unmooring vessels
- methods for mooring and unmooring a vessel, including all required rope handling techniques and precautions
- operational characteristics of different types of lines, equipment and facilities used in mooring and unmooring operations

© Commonwealth of Australia, 2025 Industry Skills Australia

- operational procedures and layouts of various types of shore-side loading and discharging terminals and wharves
- PPE required for use during mooring and unmooring operations
- procedures for assessing stresses on lines and gear used in mooring and unmooring operations
- reason for and correct method of dipping mooring line
- relevant manufacturer guidelines relating to use of machinery, including instructions on equipment capability and limitations
- relevant sections of the Standards of Training, Certification & Watchkeeping (STCW) 95 and AMSA Marine Orders
- relevant work WHS/OHS codes of practice, policies and procedures
- safety drills and equipment used for lines launch
- snapback zone and demarcated areas
- standard nautical terms in relation to mooring activities and related equipment
- technique for releasing fowled mooring lines under wharfs and around ship anchors.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations or where this is not available, in simulated workplace operational situations or an industry-approved marine operations site that replicate workplace conditions where mooring and unmooring activities can be demonstrated.

Resources for assessment include access to:

- a range of relevant exercises, case studies and/or other simulated practical and knowledge assessments
- relevant documentation including workplace procedures, regulations, codes of practice and operation manuals
- tools, equipment, materials and PPE currently used in industry
- bridge marker:
  - at night vehicle with flashing hazard light
  - flag
- vehicles used for towing mooring lines.

MARE002 Communicate during mooring and unmooring activities

Modification History

Release 1. New unit of competency.

Application

This unit involves the skills and knowledge required to communicate effectively with others involved in mooring and unmooring activities.

This unit applies to people working in the maritime industry as a Linesperson.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare to communicate with	1.1 Work health and safety (WHS)/occupational health and safety (OHS) procedures are followed

© Commonwealth of Australia, 2025 Industry Skills Australia

	others	1.2	Prior to mooring or unmooring activities, all radios and other communications equipment is checked to confirm they are functioning correctly
		1.3	Batteries are checked to confirm they are operational and fully charged
		1.4	Relevant documentation and records are identified and accessed as required
		1.5	Radios are set to operate on channels required for mooring and unmooring
		1.6	Faulty communications equipment is reported, rectified or replaced
2	**Communicate with others**	2.1	Correct communication is maintained with others involved in mooring and unmooring activities, throughout mooring and unmooring activities
		2.2	Clear and concise verbal and non-verbal communication is used and appropriate action is taken to confirm others have correctly heard and interpreted the communication
		2.3	VHF radio communication is conducted using required procedures and protocols
		2.4	Appropriate methods are used to communicate with foreign crews on vessels
		2.5	Safety concerns are promptly and clearly communicated to pilot prior to and during, mooring and unmooring activities
		2.6	Due care is taken when using radio communication equipment, so as not to interfere with operational communication between tug crews and pilot of vessel

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Industry Skills Australia

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Safety procedures include:	• checking:
	  • own personal fitness and medical wellbeing
	  • whereabouts of edge of wharf
	  • whereabouts of other members of mooring/unmooring team
	• confirming availability of a personal flotation device on arrival at mooring operation
	• keeping clear of snapback zone and demarcated areas
	• keeping work area hazard-free
	• obtaining and using required personal protective equipment (such as safety footwear, safety helmet, suitable gloves, safety vest and reflective clothing, personal life vest, safety glasses)
	• removing rings from fingers to avoid them being caught on steel wire ropes

Relevant documentation and records include one or more of the following:	• maritime authority instructions • mooring and unmooring plans, procedures, checklists and instructions • relevant sections of maritime regulations concerning mooring and unmooring operations • reports and records of mooring operations or safety incidents • rope and equipment manufacturer instructions and procedures • safety instructions and procedures

Communication includes one or more of the following:	• oral communication with mooring supervisor or Master and other members of mooring or unmooring team
	• radio between mooring supervisor (shore-side) and:
	  • pilot on vessel
	  • wharf mooring personnel (bow) forward
	  • wharf mooring personnel (stern) aft
	• VHF radio between:
	  • tug crew and pilot on vessel
	  • tug crew and mooring launch crew
	  • mooring launch crew and pilot on vessel
	• visual contact and hand signals

Others involved in mooring and unmooring activities include one or more of the following:	• lines launch driver • mooring launch crew • mooring master or supervisor • mooring team • pilot and crew on vessel being moored or unmoored and tug • shorelines crew on wharf

© Commonwealth of Australia, 2025 Industry Skills Australia

- tug crew
- vessel crew

Unit Mapping Information

This unit replaces and is equivalent to MARE1001A Communicate during shore-based mooring and unmooring operations.

MARE1001A replaces and is equivalent to TDMME907A Communicate during shore-based mooring and unmooring operations.

Assessment Requirements for MARE002 Communicate during mooring and unmooring activities

Modification History

Release 1. New unit of competency.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- applying relevant work health and safety (WHS)/occupational health and safety (OHS) requirements and work practices
- being aware of own ability and limits to rectify irregularities and faults
- checking functioning of radios and communications equipment
- communicating effectively with others when mooring and unmooring a vessel
- complying with relevant maritime regulations and International Maritime Organization (IMO) Conventions and Codes, including relevant sections of Australian Maritime Safety Authority (AMSA) Marine Orders as they apply to mooring and unmooring operations on ocean-going vessels
- ensuring behaviour reflects relevant current legislative and regulatory requirements
- following all orders carefully and systematically
- following work instructions
- identifying and correctly using various types of radios and other relevant communications equipment
- implementing port and vessel security procedures
- initiating timely action in response to defects or damage
- interpreting and following procedures for communicating with others during mooring and unmooring operations
- recognising and responding appropriately to cultural differences in the workplace
- recognising problems that may occur when communicating with others during mooring and unmooring operations and taking appropriate action to report and resolve these problems
- taking proper care of radios and communications equipment
- testing and recharging batteries used in radios and other communications equipment
- using hand held VHF radios correctly when communicating with ship’s crew, pilot and wharf supervisor.

© Commonwealth of Australia, 2025 Industry Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- basic principles and procedures for marine VHF radio communication:
  - by day or night
  - in normal and emergency situations
  - under any permissible conditions of weather
  - at a range of shore-side terminals and wharves
- communications techniques and equipment required during mooring and unmooring operations, including protocols for radio use
- correct use of handheld VHF radio
- factors that affect communication during mooring and unmooring operations, such as effects of noise, faulty equipment, discharged batteries, wind, weather
- maritime regulations applicable to communication during mooring and unmooring of vessels
- methods of visual contact and hand signals
- operational characteristics of different types of radios and other forms of communications equipment used in mooring and unmooring operations
- practices and procedures for communicating with others during mooring and unmooring operations
- purpose of silence periods when operating radio equipment
- radio calling and replying procedures
- relevant manufacturer instructions relating to use of radios and other communications equipment
- relevant maritime and radio communications regulations
- relevant port and vessel security procedures, including operating radio communications channel instructions
- relevant WHS/OHS codes of practice, policies and procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment must occur in workplace operational situations or where this is not available, in simulated workplace operational situations or an industry-approved marine operations site that replicate workplace conditions.

Resources for assessment include access to:

- a range of relevant exercises, case studies and/or other simulated practical and knowledge assessments
- relevant documentation including workplace procedures, regulations, codes of practice and operation manuals
- tools, equipment, materials and personal protective equipment currently used in industry.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Industry Skills Australia

1	**Follow safety and hazard control procedures**	1.1	Tests and inspections of ropes and equipment are conducted according to regulations and company procedures
		1.2	Hazards are identified and action is taken to eliminate or minimise risk to personnel, port facilities, vessel and the environment
		1.3	Safety precautions and hazard minimisation procedures and regulations are followed at all times during mooring or unmooring operations
		1.4	Safe distance from snapback zones and demarcated area is maintained during tensioning and slackening of lines
		1.5	Action is taken to secure vessel and to maintain safety of vessel and persons involved, in a mooring or unmooring incident
2	**Use personal protective equipment**	2.1	Personal protective equipment (PPE) is obtained and checked prior to commencement of operations according to company WHS/OHS policy and procedures
		2.2	PPE is correctly used as required
		2.3	PPE is correctly stored after use according to company procedures
3	**Follow safety and emergency procedures**	3.1	Wharf, port and vessel emergency procedures are accessed and implemented
		3.2	Safety drills are conducted according to company procedures
		3.3	Escape routes, and internal and external communications and alarm systems are correctly used according to regulatory requirements and established port procedures
		3.4	Emergency communications, and alarm signals and systems are used according to port emergency procedures and regulatory requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

4	**Report safety incidents and emergencies**	4.1 Safety incidents or emergencies that occur during mooring or unmooring operations are correctly and accurately recorded according to regulations and company procedures
		4.2 Required reports on safety incidents or emergencies that occur during mooring or unmooring operations are prepared and referred to designated personnel according to regulations and company procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Hazards include one or more of the following:	• crane movement • faulty communications equipment • inadequate lighting • ship mooring lines and wires in poor condition • wharf traffic

Personnel include one or more of the following:	• mooring:
	  • launch and crew
	  • mooring supervisor
	  • wharf mooring personnel (bow) forward
	  • wharf mooring personnel (stern) aft
	• pilot
	• tug crew/s
	• vessel crew

Safety precautions include:	• checking:
	  • own personal fitness and medical wellbeing
	  • whereabouts of edge of wharf
	  • whereabouts of other members of mooring/unmooring team
	• confirming availability of a personal flotation device on arrival at mooring operation
	• keeping work area hazard-free

© Commonwealth of Australia, 2025 Industry Skills Australia

	• obtaining and using required personal protective equipment (such as safety footwear, safety helmet, suitable gloves were appropriate, safety vest and reflective clothing, personal life vest, safety glasses) • removing rings from fingers to avoid them being caught on steel wire ropes • wearing suitable clothing
Hazard minimisation procedures include:	• ensuring ropes and equipment have been tested and are in good condition • placing warning signage in appropriate places • testing equipment prior to operation

Mooring or unmooring operations include one or more of the following:	• landing a gangway
	• preparing a berth
	• receiving heaving line from:
	  • a launch
	  • a vessel
	• returning heaving line to a vessel
	• unmooring and letting go a vessel
	• working:
	  • by day or night
	  • in normal and emergency situations
	  • under any permissible conditions of weather
	  • at various shore-side terminals and wharves

Unit Mapping Information

This unit replaces and is equivalent to MARF1004A Follow work health and safety, and emergency procedures during shore-based mooring operations.

MARF1004A replaces and is equivalent to TDMMF6007A Follow OH&S and emergency procedures during shore-based mooring operations.

Assessment Requirements for MARF017 Follow work health and safety, and emergency procedures during mooring and unmooring activities

Modification History

Release 1. New unit of competency.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- communicating effectively with other personnel when mooring and unmooring a vessel
- handling rope appropriately and correctly:
  - storing and caring for ropes and lines
  - tying knots such as bowline, reef knot, overhand knot, figure of eight knot, sheet bends, clove hitch, splicing and whipping, round turn two half hitches
  - applying a chain stopper to a wire rope
  - heaving on a line in collaboration with other members of a mooring team
  - applying a stopper to a synthetic fibre rope
  - applying a chain stopper to a natural cordage rope
  - attaching a line to a bollard or bitt with all lines in correct order such as up through the eye (dipping)
  - flaking down a rope
  - forming a bight
- identifying and correctly using:
  - personal protective equipment (PPE)
  - various types of ropes, steel wires and mooring equipment
- interpreting and following work health and safety (WHS)/occupational health and safety (OHS), and safety management procedures for mooring and unmooring operations, including safety instructions and precautions
- recognising dangers and hazards before and during mooring and unmooring operations, and taking appropriate action to report and rectify them
- recognising safety-related problems that may occur during mooring and unmooring operations, and taking appropriate action to report and resolve these problems
- recording and reporting safety incidents and emergencies
- reporting and/or rectifying hazards, safety incidents or emergencies promptly
- responding to individual differences and applying acceptable behaviour when working with others

© Commonwealth of Australia, 2025
Industry Skills Australia

- working safely as a member of a mooring and unmooring team
- working systematically with required attention to detail and safety requirements.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- dangers associated with mooring and unmooring duties:
  - being hit by a line being thrown down from a vessel
  - stepping inside the bight of a line
  - being struck by a parting line
  - mixing rings and wire rope
  - falling off the edge of the wharf into the water
  - back strain from carrying a line, heaving on a line
  - ‘snap back’ in the event of a line breaking
  - trip hazards such as crane lines
- hazards and safety-related problems that may occur during mooring and unmooring operations, and appropriate preventative and remedial action and solutions
- individual differences and acceptable behaviour when working with others
- legal rights and responsibilities of management, crew and others
- methods for safely mooring and unmooring ocean-going vessels
- procedures for calculating stresses on lifting gear used in cargo handling operations
- relevant documentation and records:
  - mooring and unmooring plans, procedures, checklists and instructions
  - relevant sections of maritime regulations concerning mooring and unmooring operations
  - rope and equipment manufacturer instructions and procedures
  - safety instructions and procedures
  - instructions of relevant maritime authorities
  - reports and records of safety incidents or emergencies
- relevant port and vessel safety and security requirements and regulations
- relevant WHS/OHS legislation, codes of practice, policies and procedures
- reporting requirements for safety incidents or emergencies that occur during mooring or unmooring operations
- safety drills and equipment used for lines launches
- safety instructions for using ropes and other equipment during mooring and unmooring operations
- safety management procedures for mooring and unmooring ocean-going vessels
- use, type and application of PPE required when undertaking mooring and unmooring

© Commonwealth of Australia, 2025
Industry Skills Australia

activities.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations or where this is not available, in simulated workplace operational situations or an industry-approved marine operations site that replicates workplace conditions.

Resources for assessment include access to:

- a range of relevant exercises, case studies and/or other simulated practical and knowledge assessments
- relevant documentation including workplace procedures, regulations, codes of practice and operation manuals
- tools, equipment currently used in industry including:
  - VHF radios
  - ropes and heaving lines provided by shore
  - shackles
  - wires
- PPE including:
  - personal life vest
  - reflective clothing
  - safety footwear
  - helmet
  - vest
  - suitable gloves
  - protective safety glasses.

Practical assessment should be combined with targeted questioning to assess required knowledge. Performance should be demonstrated consistently over time and in a suitable range of contexts.

MEM12023A Perform engineering measurements

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers performing measurement skills requiring straightforward use of mechanical measuring devices and associated calculations.

Application of the Unit

Application of the unit	This unit covers straightforward measurement using devices which incorporate visual indications representing units of measurement. It applies to the use of measuring devices in a range of manufacturing, engineering and related environments. It includes, where required, adjustment of measuring devices through simple means and typically includes zeroing or scale adjustment. Measurements may be expressed in metric or imperial units. All measurements are undertaken to standard operating procedures. Electrical/electronic devices used are those not requiring the connection or disconnection of circuitry. Work is undertaken autonomously or part of team environment, in the field, work station or workshops. For straightforward use of comparison or pre-set measuring devices, Unit MEM12001B (Use comparison and basic measuring devices) should be accessed. **Band**: **A** **Unit Weight**: **5**

© Commonwealth of Australia, 2025 Industry Skills Australia

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Select appropriate device or equipment	1.1. Measurement requirements are determined from specifications. 1.2. Appropriate device or equipment is selected according to standard operating procedures, to achieve required outcome.
2. Obtain measurements using a range of measuring devices	2.1. Correct and appropriate measuring technique is used. 2.2. Measurements are accurately obtained .

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.3. Dimensions are determined or verified using basic calculations, where required.
3. Maintain measuring devices	3.1. Routine care and storage of devices is undertaken to manufacturers' specifications or standard operating procedures. 3.2. Routine adjustments to devices are made and checked.
4. Communicate measurements as required	4.1. Measurements are accurately recorded, where required. 4.2. Freehand sketch which depicts required information is prepared, as required.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- selecting the appropriate measuring device for given measuring tasks
- using appropriate measuring technique
- reading all measurements taken accurately to the finest graduation of the selected measuring device
- handling and storing measuring devices in accordance with manufacturers' specifications or standard operating procedures
- verifying all measuring devices before use
- making, where appropriate, routine adjustments to measuring devices
- reading, interpreting and following information on written job instructions, specifications, standard operating procedures, charts, lists, drawings and other applicable reference documents
- planning and sequencing operations
- checking and clarifying task related information
- checking for conformance to specifications
- undertaking numerical operations involving addition, subtraction, multiplication, division, fractions and decimals within the scope of this unit
- preparing drawings as required

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
Required knowledge
Look for evidence that confirms knowledge of: • correct application of a range of measuring devices • correct and appropriate measuring technique for a range of measuring devices • addition, subtraction, multiplication, division, fractions, decimals to the scope required by this unit • procedures for handling and storing a range of measuring devices • procedures for adjusting and zeroing a range of measuring devices • methods of communicating measurements by drawings, as required • safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competency in this unit must be able to perform engineering measurements.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate. This unit could be assessed in conjunction with any other units addressing the safety, quality, communication,

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE	
	materials handling, recording and reporting associated with performing engineering measurements or other units requiring the exercise of the skills and knowledge covered by this unit.
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Specifications	Drawings, sketches, job instructions, schematics, diagrams, technical manuals
Range of measuring devices	Protractors, combination squares, set squares, dial indicators, thermometers, tapes, rules, micrometers, vernier-scaled measuring equipment
Basic calculations	Calculations needed to assist in determining measurements where a reading of the graduated device is not sufficient, for example subtracting one measurement from another to give a third

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT	
	measurement. Examples of calculations needed are addition, subtraction, multiplication, division, fractions and decimals. Calculations may be made using a calculator
Routine adjustments	Validating the device using simple zeroing or scale adjustment
Measurements	Measuring length, squareness, flatness, angle, roundness, clearances or any other measurements that can be read off analog, digital or other measuring device
Information	Dimensions, instructions, base line or datum points

MEM18001C Use hand tools

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers using a range of hand tools for a variety of general engineering applications.

Application of the Unit

Application of the unit	Applications may include hand tools used for adjusting, dismantling, assembling and finishing of items or components, and the finishing, cutting, scraping of metallic and non-metallic material to size and shape. This includes simple tapping and threading and routine maintenance of hand tools. This unit should not be selected if the hand tool is dedicated to a single operation or machine and if only a machine specific/customised tool is used. When using hand held power tools or power tools used for hand held operations, refer to Unit MEM18002B (Use power tools/hand held operations). **Band**: **A** **Unit Weight**: **2**

Prerequisite units	

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Use hand tools	1.1. Hand tools are selected appropriate to the task requirements. 1.2. Hand tools are used to produce desired outcomes to job specifications which may include finish, tension, size or shape. 1.3. All safety requirements are adhered to before, during and after use. 1.4. Unsafe or faulty tools are identified and marked for repair according to designated procedures before, during and after use. 1.5. Routine maintenance of tools, including hand sharpening is undertaken according to standard

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	operational procedures, principles and techniques. 1.6. Hand tools are stored safely in appropriate location according to standard operational procedures and manufacturers' recommendations.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Look for evidence that confirms skills in: • reading and following information on standard operating procedures • following verbal instructions • selecting hand tools appropriate to the task • using hand tools safely • identifying hand tool defects and marking for repair • maintaining/sharpening hand tools using appropriate techniques • storing hand tools in accordance with manufacturers'/standard operating procedures
Required knowledge
Look for evidence that confirms knowledge of: • applications of different hand tools in a general engineering context • common faults and/or defects in hand tools • procedures for marking unsafe or faulty tools for repair • routine maintenance requirements for a range of hand tools • storage location and procedures for a range of hand tools • hazards and control measures associated with using hand tools • use and application of personal protective equipment • safe work practices and procedures

MEM24001B Perform basic penetrant testing

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers performing basic penetrant testing procedures in a range of industrial applications.

Application of the Unit

Application of the unit	This unit applies to basic penetrant testing techniques on fabrications, structures and components across a wide range of industries and restricted to basic visible dye and/or process penetrant line methods. The work can relate to scheduled and unscheduled maintenance activities, using general tools, specific penetrant testing equipment as specified in maintenance documentation, testing procedures or operator instructions. Actual and potential defects are to be considered, together with ongoing abnormalities in fabrications, components and structures. Penetrant testing is performed on critical component or structural zones. All testing must be completed with particular attention to personal safety and OH&S regulations. Certification against Australian standards may be achieved where assessment in this unit of competency is carried out in conjunction with an examining authority as described in ISO 9712. Materials and chemicals which are subject to codes and regulations - for example, chemicals, explosives, solvents, dangerous materials, acids, or noxious waste products - must be subject to safe work habits and must be stored and used in accordance with safe work practices. This unit should not be selected when Unit MEM24002B

© Commonwealth of Australia, 2025 Industry Skills Australia

	(Perform penetrant testing) has already been selected. Where power tools are required, Unit MEM18002B (Use power tools/hand held operations) should also be selected. **Band**: **A** **Unit Weight**: **2**

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare inspection areas for basic penetrant testing	1.1. Inspection areas are cleaned and prepared for testing using appropriate procedures and materials. 1.2. Preparation processes are carried out in accordance with the relevant procedures and OH&S requirements. 1.3. Inspection areas are visually assessed and obvious discontinuities are identified.
2. Perform basic penetrant testing	2.1. Nominated test is identified from standard operating procedures. 2.2. Test equipment is prepared in accordance with standard operating procedures. 2.3. Test media is selected and applied in accordance with workplace practices and specifications. 2.4. Penetrant test is carried out in accordance with relevant work instructions and OH&S requirements. 2.5. Penetrant testing equipment is maintained and stored in accordance with standard operating procedures and OH&S requirements.
3. Report the results of penetrant test(s)	3.1. Basic indications are checked and defects are identified in accordance with enterprise standards and/or procedures. 3.2. Basic indications are confirmed in accordance with enterprise standards and/or procedures. 3.3. Test results are reported in accordance with enterprise standards and/or procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Look for evidence that confirms skills in: • preparing inspection areas • identifying discontinuities • applying procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
• applying test media • applying principles of penetrant testing techniques • identifying defects • reading and interpreting routine information on written job instructions, specifications and standard operating procedures. • following oral instructions • entering routine and familiar information onto proformas and standard workplace forms
Required knowledge
Look for evidence that confirms knowledge of: • cleaning and preparation processes • precleaning methods and their areas of use - solvents, vapour degrease, etching, detergents, paint removers, mechanical methods • consequences of incorrect preparation • procedures and OH&S requirements in relation to the preparation process • basic concepts and principles of NDT; general terms, purpose of NDT and areas of application of NDT • scope and basic description of test • general properties of penetrants - penetrability, removability, visibility • emulsifier types • developer types • use of standard test panels • established inspection procedures and techniques • types of discontinuities and their consequences • procedure for carrying out penetrant testing • penetrant application • dwell times • penetrant removal • developer application • dry powder • development time • factors affecting indications • non-relevant indications • post-cleaning methods and their areas of use • basic maintenance and storage procedures for testing equipment • OH&S requirements including storage requirements • definition of a defect and common basic defects • methods/procedures for reporting test results

MEM24003B Perform basic magnetic particle testing

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers performing basic magnetic particle testing procedures in a range of industrial applications. It covers the principles of magnetism and the associated application of basic magnetic particle testing techniques in the field of non-destructive testing. Knowledge of metallurgy associated with the level of application in this unit is required.

Application of the Unit

Application of the unit	This unit applies to portable and fixed ('yoke' or 'bench') basic magnetic particle testing techniques on fabrications, structures and components across a wide range of industries. The work can relate to scheduled and unscheduled maintenance activities using general tools and specific magnetic testing equipment as specified in maintenance documentation, testing procedures or operator instructions. Actual and potential defects are considered, together with ongoing abnormalities in fabrications, components and structures. Magnetic particle testing is performed on critical component or structural zones. All testing must be completed with particular attention to personal safety and OH&S regulations. Certification against Australian standards may be achieved where assessment in this unit of competency is carried out in conjunction with an examining authority as described in ISO 9712. Materials and chemicals which are subject to codes and regulations - for example, chemicals, explosives, solvents, dangerous materials, acids, or noxious waste products - must be subject to safe work habits and must be stored and used in accordance with safe work practices.

- interpreting and following procedures
- identifying inspection areas
- identifying discontinuities and defects
- selecting appropriate testing techniques and procedures
- assessing risks
- entering routine and familiar information onto proformas and standard workplace forms
- locating, reading and interpreting information on written job instructions, specifications, charts, lists and other reference documentation
- planning, sequencing operations

Required knowledge

Look for evidence that confirms knowledge of:

- surface preparation
- procedures and OH&S requirements in relation to the preparation process
- established assessment procedures and techniques
- types of discontinuities and their consequences
- scope and basic principles of magnetic particle testing
- procedure for carrying out magnetic particle test using either the 'yoke' or 'bench'
- advantages and limitations of magnetic particle testing
- hazards and safety precautions associated with magnetic particle testing
- basic maintenance and storage procedures for testing equipment
- common basic defects
- methods/procedures for reporting test results
- advantages, limitations of various equipment
- magnetic particle application - methods for wet, dry particles
- recording and reporting results of simple tests
- safety precautions in testing
- use of toxic, flammable materials, electrical hazards
- use and application of personal protective equipment
- safe work practices and procedures
- relevant hazards and control measures related to the competency

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competency in this unit must be able to perform basic magnetic particle testing. Competency in this unit cannot be claimed until all prerequisites have been satisfied.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate. This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with performing basic magnetic particle testing procedures in a range of industrial applications or other units requiring the exercise of the skills and knowledge covered by this unit.
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

EVIDENCE GUIDE	
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Preparation processes	Surface cleaning and drying

MEM24012C Apply metallurgy principles

Modification History

Single band identifier removed to clarify dual status

Unit Descriptor

Unit descriptor	This unit covers applying basic metallurgy principles related to selecting appropriate non-destructive testing techniques (NDT) and interpreting the results of NDT tests for metallurgical processes.

Application of the Unit

Application of the unit	This unit applies to knowledge of metallurgy principles, and the relationship between the various non-destructive testing methods and their capabilities and limitations when applied to the detection of specific discontinuities in metals and alloys. The unit applies to employees other than NDT technicians such as metallurgists, welding supervisors etc. who select and order NDT tests and who interpret results provided by tests for metal manufacturing, casting, shaping, and joining processes. The unit does not apply to the conduct of NDT tests. Such variables as the type of discontinuity, manufacturing process and limitations will assist in determining the sequence of testing and the ultimate selection of one non-destructive test method in preference to another. Any testing that may be carried out must be completed with particular attention to personal and OH&S regulations. Where materials and chemicals which are subject to codes and regulations are stored and used - for example, chemicals, explosives, solvents, dangerous materials, acids, or noxious waste products - safe work habits must be considered. **Band:** This unit has dual status and is to be regarded as both a Specialisation band A unit and Specialisation band B unit

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
1. Interpret and apply the principles of solidification and crystal structures in metals and alloys	1.1. Principles of solidification and crystal structures in metals and alloys are interpreted and applied in relation to NDT techniques.
2. Interpret equilibrium diagrams for metals and alloys	2.1. Equilibrium diagram for metal or alloy is correctly sourced 2.2. Equilibrium diagrams are correctly interpreted.
3. Interpret and apply the principles of fusion welding of metals and alloys	3.1. Principles and methods for fusion welding of metals and alloys are applied to NDT test selection. 3.2. Defects in weldments are identified and classified from NDT test results.
4. Interpret and apply the principles of the formation of castings	4.1. Principles and methods used to produce metal castings are applied to NDT test selection. 4.2. Defects in metal and alloy castings are identified and classified from NDT test results.
5. Interpret and apply the principles of steel forging	5.1. Principles and methods used to produce steel forgings are applied to NDT test selection. 5.2. Defects in steel forgings are identified and classified from NDT test results.
6. Interpret and apply the principles of mechanical testing	6.1. Principles of mechanical testing are applied to NDT test selection. 6.2. Defects in metal product are identified and classified from NDT test results

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Look for evidence that confirms skills in: • research • understanding and applying metallurgy principles • selecting NDT test appropriate to metal or alloy and manufacturing process

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

Required knowledge

Look for evidence that confirms knowledge of:

- principles of solidification and crystal structures in metal:
  - classification of materials
  - structure of atoms
  - process of solidification
  - crystal structures
  - defects formed during solidification
  - modification of crystal structure
  - heat treatment processes
  - defects formed during heat treatment
- meaning of equilibrium diagrams representative of a range of metals including aluminium, iron, steel and common non-ferrous alloys:
  - alloy systems
  - solid and liquid solubility
  - basic equilibrium diagrams
  - equilibrium diagrams for common alloys
- principles of fusion welding in relation to NDT testing
- defects in fusion welding:
  - processing defects
  - grinding cracks
  - pickling cracks
  - heat treatment cracks
  - service defects
  - fatigue cracks
  - corrosion and stress corrosion cracks
- principles of the formation of castings
- defects in castings
- principles of steel forging
- defects in steel forging
- principles of mechanical testing:
  - mechanical testing
  - tensile testing
  - impact testing
  - hardness testing
  - fatigue testing
- other tests

MSS402080A Undertake root cause analysis

Modification History

New unit, superseding MSACMT280A Undertake root cause analysis - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to undertake root cause analysis (RCA) by any person. This will often be undertaken by people working in a team. This unit also covers the competencies needed by operators to contribute to an advanced maintenance strategy using RCA coupled with diagrams and charts.

Application of the Unit

This unit applies to individuals working in an organisation which is applying competitive systems and practices strategies. The unit applies to the formal problem solving to root cause that the individual must undertake in their own work area or where the individual contributes to problem solving to root cause as part of a team.

This unit requires an ability to seek and apply information from a variety of sources in order to inform RCAs. Initiative and enterprise is also required to identify quick fix and permanent solutions to problems.

Where training in a wider range of problem solving techniques and tools is required the unit MSAPMSUP390A Use structured problem solving tools should be selected.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the Performance criteria describe the performance needed to

essential outcomes of a unit of competency.	demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Recognise problems	1.1	Identify features or occurrences indicative of a problem
		1.2	Use appropriate tools, techniques and charts to define the problem
2	Implement quick fix	2.1	Recommend a quick fix within the scope of competency and authority
		2.2	Use technology or processes relevant to the problem to implement quick fix
3	Determine root cause	3.1	Identify a range of possible causes
		3.2	Gather data and other information to eliminate or confirm possible causes
		3.3	Use available data and information to link causes and effects
		3.4	Seek assistance, as required
		3.5	Identify root cause
4	Develop permanent solution	4.1	Identify a range of methods to eliminate the root cause or break the cause tree
		4.2	Select the most appropriate solution
		4.3	Liaise with relevant people
		4.4	Recommend or implement solution within the limits of competency and authority

© Commonwealth of Australia, 2025 Industry Skills Australia

4.5 Monitor impact of solution and make further recommendations, as required

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- cooperating and working with others on problem solving
- assessing and recording information from a variety of sources
- defining potential problems factually, including:
  - location and extent of problem or incident
  - sequence of events where relevant
  - extent of deviation from normal operation or performance
- analysing potential problems across a range of varied activities and knowledge applications
- reading and constructing simple charts, such as cause and effect diagrams

Required knowledge

Required knowledge includes:

- RCA methodology, including difference between quick fixes and root cause elimination or breaking of causal tree
- principles and normal operation of equipment, plant and processes in own work area sufficient to undertake a RCA and propose solutions
- common variances to normal performance that are indicators of a problem
- use of relevant analysis tools (e.g. cause/effect diagrams, Pareto charts and 5 Whys)
- operations in own work area

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and	A person who demonstrates competency in this unit must

© Commonwealth of Australia, 2025 Industry Skills Australia

evidence required to demonstrate competency in this unit	be able to provide evidence of the ability to: • undertake problem identification • use appropriate processes to achieve root cause identification • prioritise solutions • recommend solutions and implementation procedures to problems within own area and range of technical skills and knowledge • evaluate implementation of solutions.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess response to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and

© Commonwealth of Australia, 2025 Industry Skills Australia

	disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree

© Commonwealth of Australia, 2025 Industry Skills Australia

	Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Features or occurrences indicative of a problem	Examples of features or occurrences indicating problems include: • variation to normal plant or equipment operation • unplanned or non-conforming process or operations outcomes • out of specification products • excess scrap • accidents and emergencies • regulatory breaches • customer returns and complaints • reduction or loss of sales
Root cause	There are many possible causes of any problem. The root cause contrasts with other possible causes of a problem which when eliminated have no impact or only ameliorate the problem. Elimination of the root cause permanently eliminates the problem. There should only be one root cause for any problem and so the analysis should continue until this one cause is found.
Cause tree	The series of causes is referred to as the cause tree. Not all root causes are accessible and able to be eliminated. Breaking the cause tree is such a way that the problem cannot recur is an acceptable alternative. Not all situations can wait for the RCA and eventual elimination of the root cause as there may be serious current impacts. The quick fix will control these immediate impacts, but does not eliminate the root cause.
Quick fix	A quick fix is not a short cut or side step for a permanent solution to the root cause. It is a necessary step designed to control the immediate impacts of a problem, for example, to prevent ongoing errors or to ameliorate damage.
Appropriate techniques/charts	Appropriate techniques/charts may include: • control charts • Pareto charts

© Commonwealth of Australia, 2025 Industry Skills Australia

	• run charts • flow charts • cause and effect diagrams • tree diagrams • 5 Whys analysis

NWP227B Control vegetation on a site

Modification History

NWP227B Release 2: Layout adjusted. No changes to content.

NWP227B Release 1: Primary release.

Unit Descriptor

This unit of competency describes the outcomes required to control vegetation on a site by inspecting, identifying and treating weeds, plants and shrubs. The ability to plan and undertake work safely, including the safe handling of chemicals and equipment, is essential to performance.

Application of the Unit

This unit supports the attainment of skills and knowledge required for field and operational staff involved in plant control but it does not reflect the requirements for undertaking plant control on the properties of third parties where further training and licensing requirements may apply.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Industry Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Plan and prepare work.	1.1 Plan work according to work specifications, ***relevant legislation and organisational procedures***.
	1.2 Perform site check according to organisational requirements to prevent damage to other utilities and environment.
	1.3 Select and check ***equipment and personal protective equipment*** and material safety data sheets to meet safety requirements of task and site.
	1.4 Identify noxious weeds, plants and shrubs.
2 Treat vegetation.	2.1 Conduct monitoring programs to determine spread, growth rate and extent of problem caused by weeds.
	2.2 Store, handle, transport and mix chemicals and other control mechanisms according to relevant legislation and organisational procedures.
	2.3 Use ***processes*** to treat vegetation in a manner safe to all stakeholders and according to appropriate standards and organisational operational procedures.
	2.4 Implement controls according to organisational requirements to minimise environmental damage and deal with emergencies and spillage.
3 Check work and restore work site.	3.1 Clean equipment after use and prepare for safe storage or re-use.
	3.2 Identify potential hazards and dispose of waste according to organisational requirements.
4 Complete records and reports.	4.1 Record use of chemicals and control mechanisms according to legislative and organisational requirements.
	4.2 Complete work reports and documentation as required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- identify and report operational problems
- produce reports and logs
- use personal protective equipment
- use tools and machinery

© Commonwealth of Australia, 2025 Industry Skills Australia

- use chemicals and other treatments
- follow plans, charts and instructions
- perform work-related calculations
- interpret material safety data sheets (MSDS)
- apply procedures and standards
- communicate with employees and customers
- work effectively as part of a team
- use communication equipment
- use literacy skills in regard to verbal and written communication in the workplace
- give and receive instructions

Required knowledge:

- environmental aspects of controlling vegetation
- relevant utilities and service bodies
- communication systems
- use, storage, handling and transport of hazardous substances
- landscape and ground structure of work area
- risk factors and potential hazards of vegetation control processes
- equipment operation, capacity and limitations
- effects of weather and conditions on use of chemical treatment, site or plant
- control systems
- materials handling
- landscape and ground structure of work area

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to control vegetation on a site by inspecting, identifying and treating weeds, plants and shrubs including:

- interpreting work requirements from given documentation
- identifying noxious weeds and appropriate control methods
- planning and preparing equipment and materials required for work
- treating vegetation according to legislative and organisational procedures
- identifying risks and implement controls
- restoring work site according to environmental and

© Commonwealth of Australia, 2025 Industry Skills Australia

organisational requirements
- completing relevant documentation.

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations.

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence only taken at the point when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit.

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

© Commonwealth of Australia, 2025 Industry Skills Australia

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Relevant legislation and organisational procedures include:	• relevant federal and state or territory legislation and regulations • codes of practice, associated standards and guidance material • documented organisational policies, manuals and induction programs • relevant community planning and development agreements, such as land care agreements
Equipment and personal protective equipment may include:	• hand and power tools • on- and off-road vehicles • lifting and winching equipment • mechanical excavation equipment • chemicals and mixers • chemical spraying apparatus • mixing equipment and storage areas • communication equipment • gas detection equipment • rescue equipment • breathing apparatus • other appropriate personal protective equipment, including goggles and gloves
Processes used to treat and control vegetation include:	• application of chemicals • manual extraction • use of genetic plant modification • companion planting • other environmental controls, including use of insects

PMC552061C Deliver concrete to site

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the efficient delivery of quality concrete to site using an agitator or similar.

Application of the Unit

Application of the unit	This competency covers the efficient delivery of quality concrete to site using an agitator or similar. It includes the operation of all ancillary equipment and the operation of plant using PLCs where appropriate. This competency is NOT intended to be used for the delivery of concrete within a site using mobile equipment or overhead cranes. *PMC562070B Move materials* should be used in these circumstances. In a typical scenario the agitator will be truck mounted. This unit does not cover the driving of the truck. Local regulations should be consulted and complied with. Typically an operator would: • deliver premix concrete to a customer. • determine the product/delivery requirements from the production schedule, specifications. delivery docket and/or other specifications. • resolve and prevent routine problems; and • ensure the delivered product is to specification. The operator generally works independently with frequent contact with the base plant.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Load agitator.	1.1. Check job requirements 1.2. Position agitator for loading 1.3. Load agitator with correct concrete batch 1.4. Check any special requirements and take action required. 1.5. Check that slump is to specification and take any action required
2. Deliver concrete.	2.1. Deliver concrete without delay 2.2. Position vehicle/agitator as required by safety needs

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	and if practical customer requirements 2.3. Report breakdowns or lengthy delays en route to relevant person 2.4. Maintain product quality as per requirements and procedures.
3. Conform to site protocols	3.1. Check access to site with customer 3.2. Assess site conditions and enter in a manner suited to the conditions, load and site requirements 3.3. Mix concrete on site as per quality requirements 3.4. Discharge concrete as required by customer 3.5. Wash down chutes and agitator in the area designated by the customer 3.6. Complete all records
4. Rectify routine problems	4.1. Identify the range of faults that can occur during the operation 4.2. Determine and rectify fault causes in accordance with procedures/work instructions 4.3. Identify and rectify equipment failure causes in accordance with procedures 4.4. Make sure appropriate records and log books of equipment operations are maintained to meet procedures 4.5. Identify non-routine problems and take appropriate action. 4.6. Ensure required checklists are completed
5. Control hazards	5.1. Identify hazards from the job to be done 5.2. Identify other hazards in the work area 5.3. Assess the risks arising from those hazards 5.4. Implement measures to control those risks in line with procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
Skills required for this unit include the ability to: • communicate with customers • determine, and meet customer requirements while maintaining HSE standards • deliver product to site on time and within specification • operate the equipment safely Reading and numeracy is required to the level of interpreting workplace documents and technical information.
Required knowledge

• Knowledge and understanding of the equipment sufficient to recognise problems and the appropriate action to be taken.
• Knowledge of the organisation's procedures and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and in a manner relevant to the operation of the equipment.
• Knowledge of:
  • the relationship between mixing time/water cement ratio and product quality
  • importance of slump
  • quality procedures
  • handling techniques to maintain quality
• Knowledge of underlying causes of faults such as precipitated by:
  • irregular mixing action
  • mechanical failure
  • electrical equipment malfunction
as is relevant to the practical operation of the equipment.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency.
Critical aspects for assessment and evidence required to demonstrate	Competence must be demonstrated in the ability to recognise situations requiring action and then in

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE	
competency in this unit	implementing appropriate corrective action. Consistent performance should be demonstrated. In particular look to see that: • concrete is delivered in full, on time and in specification • there are good relations with the customers • there is good liaison with the batching plant. These aspects may be best assessed using a range of scenarios/case studies/what ifs as the stimulus, with a walk-through forming part of the response. The assessment activities should include responding to a range of problems.
Context of and specific resources for assessment	Assessment for this unit of competency will be on an operating work site. Assessment will occur over a range of situations which will include disruptions to normal, smooth operation. Simulation or case studies/scenarios may be required to allow for timely assessment of parts of this competency unit (e.g., those parts of element 3 referring to dealing with customers). Simulation should be based on the actual plant and will include 'walk-throughs' of the relevant competency components. Simulations may also include the use of case studies/scenarios and role plays. Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.
Method of assessment	It may be appropriate to assess this unit together with: • TLIC407D Drive heavy rigid vehicle • TLIC307C Drive medium rigid vehicle • TLIC507D Drive heavy combination vehicle or such other unit as may be appropriate. This unit may be assessed in conjunction with: • MSAPMSUP280A Manage conflict at work • PMC562081B Deliver customer service. Individual enterprises may choose to add prerequisites

EVIDENCE GUIDE	
	and co-requisites relevant to their processes.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the language and literacy capacity of the candidate and the work being performed.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Procedures	All operations are performed in accordance with standard procedures and work instructions.
Special requirements	Special requirements may be noted on the docket or instructed by the batcher or otherwise communicated. Special requirements may include the addition of water.
Relevant person	Relevant person for reporting delays/breakdowns may include batcher, dispatcher or other person as specified in the procedures.
Records	Completion of records must include: • the addition of water • other items identified in the procedures and where possible the customer signature. Records may be completed on the docket or other means as specified in the procedures.
Checklists	Required checklists ma include: • maintenance checklists • pre start checklists • other checklists

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT	
Context	This unit includes: • determining and adding the correct amount of water taking into account required specification and moisture/water already in the mix • measurement of slump or similar tests • customer service and product knowledge • knowledge of relevant road rules and waste disposal requirements. • It does NOT include the driving of the truck (which is a prerequisite). However the driver's road skills should be observed to ensure that they meet the business's standards. It does NOT include the driving of the truck. However, the driver's road skills should be observed to ensure that they meet the business's standards.
Typical problems	Typical problems may include: • sites with poor access/unstable soil • transportation/site delays • site conflicts • disposal of agitator washings

Unit Descriptor

This unit covers participation in the change process within a workgroup. It includes suggesting options for change and contributing to the implementation of change.

In practice, participating in workplace change may overlap with other generalist or specialist public sector work activities such as working effectively in the public sector, communicating with others, using resources, handling information, using technology, etc.

This is one of 6 units of competency in the *Working in Government* and *Management* Competency Fields that deal with change. Related units are:

- PSPGOV306B Implement change
- PSPGOV405B Provide input to change processes
- PSPGOV514A Facilitate change
- PSPMNGT604B Manage change
- PSPMNGT703A Lead and influence change
-

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Suggest options for change	1.1 Possible changes to aspects of operational work which could improve efficiency and effectiveness are identified and suggested. 1.2 Advantages, disadvantages and consequences of proposed suggestions are considered and discussed with the workgroup. 1.3 Other workgroup members' input is accepted and considered in suggesting options for change.
2. Contribute to the implementation of change	2.1 Specific changes in own routine operations and procedures are implemented as required in accordance with ***legislation, policy and procedures***. 2.2 ***Changes*** are made in response to directions to achieve service standards and identified outcomes. 2.3 Available resources and supports are accessed to assist in changing own work practices. 2.4 Personal responses to change are discussed with the workgroup. 2.5 Effects upon others of own actions/reactions to change are considered. 2.6 Support mechanisms to assist with the implementation of change are identified and accessed as required.

© Commonwealth of Australia, 2025 Industry Skills Australia

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- working in a team in a way that demonstrates consideration of the effect of change on others and the effect of one's own reaction to change on others
- communicating with team members on issues and personal reactions to change
- implementing change as required
- accessing assistance for coping with change
- responding to diversity, including gender and disability
- applying public sector legislation such as occupational health and safety, and environment in the context of change

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- personal response to change
- impact of change as it affects individuals and groups
- public sector legislation, policy and guidelines
- environmental and sustainability guidelines
- workgroup practices and service standards
- equal employment opportunity, equity and diversity principles
- occupational health and safety and environmental impact of change including stress, and stress management

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPGOV201B Work in a public sector environment

© Commonwealth of Australia, 2025 Industry Skills Australia

- PSPGOV202B Use routine workplace communication techniques
- PSPGOV203B Deliver a service to clients
- PSPGOV204B Access and use resources
- PSPGOV206B Handle workplace information
- PSPGOV207B Use technology in the workplace
- PSPGOV208A Write routine workplace materials

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- participation in workplace change in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to change in the public sector
- case studies and workplace scenarios to capture the range of situations likely to be encountered when participating in workplace change

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when participating in workplace change, including coping with difficulties, irregularities and breakdowns in routine
- participation in workplace change in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

© Commonwealth of Australia, 2025 Industry Skills Australia

	• case studies • portfolios • questioning • scenarios • authenticated evidence from the workplace and/or training courses
For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.	
Legislation, ***policy and procedures*** may include:	• Commonwealth, State/Territory and Local Government legislation • government policy • public sector code of ethics • national standards specific to service delivery area • the organisation's policies and practices • environment and sustainability policies • organisational code of conduct • specific work unit/business area policy and procedures
Change in the workplace may include:	• organisational change • implementation of new/revised work practices • sustainability practices • technology change in the workplace • work location • structural and functional change • client base • staffing changes • job role changes • work priorities • shared services environment • machinery of government changes • legislative change

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Prepare for change**	1.1 The need for ***change*** in work practices is accepted within the work unit and suggestions are made or options devised. 1.2 Advantages, disadvantages and consequences of proposed suggestions are identified. 1.3 Suggested workplace changes are discussed with supervisor and colleagues and acted upon as required. 1.4 Contributions are made to planning for change in the workgroup in accordance with organisational requirements. 1.5 Effects upon others of own emotions/reactions to change are considered and adjustments are made to support required change.
2. **Implement and monitor change**	2.1 Own work practices are changed according to agreed arrangements. 2.2 Advice and support are given to assist others to adjust to changes in work practice. 2.3 The benefits of change are promoted in the workplace as opportunity arises. 2.4 Opportunities for continuous improvement in the workplace are identified, referred for approval and acted on. 2.5 Change is monitored with others to determine the effectiveness

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	of revised procedures, and findings are advised to senior staff.
3. Work with ambiguity in the workplace	3.1 Ambiguity/uncertainty relating to changed roles, functions and procedures is identified and ***problem-focused strategies*** are used for coping. 3.2 A ***flexible approach*** is applied when carrying out instructions for changes to work practices. 3.3 Issues relating to change that cannot be resolved immediately are accommodated whilst implementing change in accordance with ***legislation, policy and procedures***.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying public sector legislation, policies and guidelines in an environment of change
- communicating including consultation and negotiation with a diverse workforce, including peers and supervisors
- responding to diversity, including gender and disability
- observing and evaluating
- giving and receiving feedback
- coping with ambiguity, emotions and stressors related to implementing change
- applying occupational health and safety and environmental requirements in the context of change

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, policies and guidelines relating to public sector environments
- principles of adapting to change
- group dynamics
- emotional intelligence
- workgroup practices
- at least one change management model
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of change management

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Participate in planning activities**	1.1 Contributions are made to planning that reflect a knowledge of corporate goals and their relationship to work unit and individual plans. 1.2 Consideration of ***workplace requirements*** is reflected in contributions to ***work unit plans***. 1.3 Planning activities are completed as requested within the defined timeframe and meet the organisation's requirements. 1.4 Feedback is sought and acted on in relation to effectiveness of input to planning activities.
2. **Prepare individual work plans**	2.1 Work plan objectives are linked to and consistent with organisational and work unit aims. 2.2 Objectives are stated as measurable targets with clear performance indicators. 2.3 Innovative and cost-effective options for achieving objectives are explored and aligned to organisational aims. 2.4 Individual work plans are used to promote the achievement of work unit objectives and to reflect personal and organisational accountability to all clients. 2.5 Collaborative planning with other workgroup members is used to integrate individual plans and build working relationships.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
3. Implement and evaluate work plans	3.1 Work methods and practices to implement plans are identified in consultation with others. 3.2 Workload and work flows are monitored and balanced. 3.3 Work is completed in accordance with work plans and meets time and workplace requirements, ***legislation, policies and procedures***. 3.4 Problems in implementing work plans are monitored and solutions are proposed within area of responsibility. 3.5 Work plans are revised according to changes in work priorities and organisational needs.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- planning own work to achieve goals
- engaging in collaborative planning with other workgroup members
- applying problem solving
- monitoring and evaluation of progress towards work unit goals
- negotiating goals and outcomes
- responding to diversity, including gender and disability
- applying public sector legislation such as occupational health and safety and environment in the context of work planning

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to work planning in the public sector
- effective planning processes
- policies and procedures on sustainable practice
- corporate goals or aims
- organisational procedures
- importance of aligning work unit plans with organisational goals
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of work planning

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Identify and collect information**	1.1 Nature, extent and purpose of required ***information*** is identified. 1.2 Internal and external ***sources*** are identified and accessed to produce required information in accordance with ***legislation, policy and procedures***. 1.3 Information is collected, organised, recorded and reported in accordance with organisational procedures and defined guidelines. 1.4 Information collected is organised in a way which enables easy access and retrieval by other staff.
2. **Analyse and interpret information**	2.1 Information and its sources are critically evaluated for relevance and validity to business/client requirements. 2.2 Basic ***analysis of information*** is undertaken as required to identify key issues. 2.3 More detailed analysis of information is carried out as required using relevant techniques including mathematical calculations and methods for numerical/graphical information.
3. **Develop and apply workable solutions**	3.1 Workable solutions to business/client requirements are developed on consideration of analysed information. 3.2 Proposed solutions are communicated or implemented as

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	required.
4. **Present information**	4.1 Information is reported in the required format, style, structure and timeframe.
	4.2 ***Information is presented*** in required medium in accordance with organisational requirements using relevant technology.
5. **Maintain information**	5.1 A range of standard and complex ***information systems*** and operations is used in accordance with organisational policy and procedures.
	5.2 Information and records are maintained in accordance with organisational procedures to ensure data and system integrity.
	5.3 Routine data and records are reconciled as required.
	5.4 Inadequacies in system/s relating to information retrieval are identified and corrected or reported to relevant staff as required.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying public sector legislation such as occupational health and safety and environment in the context of information management
- accessing and using information ethically and legally
- using manual and computerised techniques for information management
- applying computer technology to data storage, security, retrieval and presentation
- using basic statistical and numerical manipulation
- using critical analysis techniques
- communicating with colleagues and supervisors
- presenting information in a range of ways such as report format, numerically, in tables, with graphs, spatially
- responding to diversity, including gender and disability
- using problem solving and referring problems as required
- applying equal employment opportunity, equity and diversity principles

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, policies, procedures and guidelines relating to information handling in the public sector, such as confidentiality, privacy, security, freedom of information

© Commonwealth of Australia, 2025 Industry Skills Australia

- data collection and management procedures
- organisational information handling and storage procedures
- cultural aspects of information and meaning
- sources of public sector work-related information
- economic, legal, security and social issues surrounding the use of information
- public sector standards
- electronic and manual filing systems
- databases and data storage systems
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of information management

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPCRT407A Undertake court listings
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPFIN401A Use public sector financial processes
  - PSPFRAU401B Monitor data for indicators of fraud

- PSPREG412A Gather and manage evidence
- PSPSEC405A Handle security classified information

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- information gathered and analysed in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to information research, presentation and management
- access to electronic information/records management systems
- Case studies and workplace scenarios to capture the range of situations likely to be encountered when gathering and analysing information

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when gathering and analysing information, including coping with difficulties, irregularities and breakdowns in routine
- information gathered and analysed in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios

© Commonwealth of Australia, 2025 Industry Skills Australia

	• simulation or role plays • authenticated evidence from the workplace and/or training courses
For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Information may include:	• legislation, guidelines and awards • organisation, legal and policy materials • client information • market trends • media reports • registries and file records • library materials • financial records • basic statistical information • human resources/personnel records • asset records • meta-data

Sources of information may include:	• those internal to the organisation such as:
	  • intranet
	  • databases/files
	  • library collections
	  • internal publications
	  • annual reports
	  • newsletters
	  • other staff
	• those external to the organisation such as:
	  • Internet
	  • local, state, national and international libraries and archives
	  • other organisations' publications

© Commonwealth of Australia, 2025 Industry Skills Australia

	• staff in external organisations
Legislation**, **policy and procedures may include:	• Commonwealth and State/Territory legislation, standards and guidelines especially relating to privacy, confidentiality, freedom of information, security, fraud control, copyright, intellectual property • government policy • public sector code of ethics • national standards • Australian standards such as records management, knowledge management, risk management • the organisation's policies/practices/code of conduct
Analysis of information may include:	• qualitative analysis • quantitative analysis • critical analysis • problem solving • matching • statistical analysis • mathematical calculations • forecasting
Presentation of information may include:	• routine reports and submissions • briefing notes, Ministerials • proposals, project plans • articles and promotional material • tabular or graphical presentation • overhead transparencies • slideshow data presentation • face-to-face • telephone
Information systems may include:	• file/records management systems • personnel/human resources systems • specific purpose databases • library systems • data warehouse systems • web sites • financial information systems • workplace communication systems

PSPGOV413A Compose complex workplace documents

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers written communication involving the evaluation and composition of complex workplace documents. It includes interpreting and evaluating workplace information, composing complex written materials and editing.

In practice, composing complex workplace documents may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government processes, gathering and analysing information, using resources, etc.

This is one of 5 units of competency in the *Working in Government* Competency Field that deal with written communication. Related units are:

- PSPGOV208A Write routine workplace materials
- PSPGOV313A Compose workplace documents
- PSPGOV513A Refine complex workplace documents
- PSPGOV606A Prepare high-level/sensitive written materials
-
- No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret and evaluate workplace information	1.1 ***Information*** is sourced from inside and outside the organisation in accordance with organisational requirements and sources analysed for reliability. 1.2 Cultural context of the information is distinguished and used to aid in interpretation. 1.3 Information is analysed for relevance to own work and assistance is sought with interpretation of complex materials in accordance with organisational procedures. 1.4 Assumed prior knowledge underpinning workplace information is identified and additional information is gathered if necessary to allow interpretation. 1.5 Implications of information are passed on to relevant personnel in accordance with legislation, policy and procedures.
2. Compose complex written materials	2.1 The ***purpose***, objectives and format for the ***materials*** are determined in accordance with organisational requirements. 2.2 Information to inform the document is sourced, collated in a logical manner and assessed for relevance and inclusion. 2.3 ***Content, structure and sequencing*** of materials are determined in line with the purpose and intended audience. 2.4 Options/recommendations are considered for inclusion. 2.5 Possible impact on the target audience is assessed and potential criticism countered where necessary. 2.6 Written materials are composed, reviewed to confirm objectives, ***organisational and legislative requirements*** are

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	met, and materials are submitted within required timeframes.
3. Edit written material	3.1 Intent of the communication is confirmed.
	3.2 Content is checked and proofread for grammar, spelling and punctuation.
	3.3 Communication is assessed in light of the needs of the intended audience.
	3.4 Recommendations for improvement are made if necessary and explained/recorded in a manner that provides a learning opportunity for the future.
	3.5 Information is amended if required, and submitted for approval in accordance with organisational policy and procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements:

Look for evidence that confirms skills in:

- reading and writing at a complex level to cope with a range of workplace materials
- integrating information from a diverse number of sources in order to generate meaning
- writing and sequencing abstract concepts according to the required purpose of written material
- linking complex ideas in written material through selection and use of words, grammatical structures, headings and punctuation appropriate to the purpose
- spelling, punctuation and grammar for workplace documents at an experienced level
- responding to diversity, including gender and disability
- implementing ergonomic requirements for office work
- complying with environmental policies such as those relating to paper use/wastage/recycling

Knowledge requirements:

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to written communication in the public sector such as privacy, freedom of information, information security, confidentiality, copyright
- principles of effective written communication at a high level of complexity
- differences in register/style between workplace communication for different

© Commonwealth of Australia, 2025 Industry Skills Australia

purposes
- government style manual
- organisation protocols for a range of complex written communication
- channels of communication and processes for obtaining advice, approvals etc
- organisational policy for recordkeeping - paper-based and electronic
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of preparing written materials

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite units* that must be achieved prior to this unit: *Nil*
- *Co-requisite units* that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPGOV402B Deliver and monitor service to clients
  - PSPGOV405B Provide input to change processes
  - PSPGOV406B Gather and analyse information
  - PSPGOV408A Value diversity
  - PSPGOV411A Deal with conflict
  - PSPLEGN401A Encourage compliance with legislation in the public sector
  - PSPOHS401B Implement workplace safety procedures and programs

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- advanced communication strategies used in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to

© Commonwealth of Australia, 2025 Industry Skills Australia

communication in the public sector, including freedom of information, privacy, equal employment opportunity, anti-discrimination, occupational health and safety
- case studies and workplace scenarios to capture the range of advanced communication situations likely to be encountered and required in the public sector

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when using advanced communication strategies, including coping with difficulties, irregularities and breakdowns in routine
- advanced communication strategies used in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Confirm delegation**	1.1 Current information relating to ***enabling legislation, standards, instructions*** and delegated authority is accessed and used to maintain up-to-date knowledge of requirements. 1.2 ***Delegation*** provided under legislation and the boundaries of that authority are confirmed. 1.3 Rights, responsibilities and accountabilities under the delegation are identified and confirmed. 1.4 All levels of authority under the delegation are confirmed with management and staff to ensure referrals as limits of authority are reached.
2. **Apply other legislation**, **policies and instructions**	2.1 ***Other legislation, policies or instructions*** that impact on authority under a delegation are identified and these requirements confirmed. 2.2 Apparently conflicting legislative directions are resolved or referred in accordance with organisational policy and procedures.
3. **Exercise delegations**	3.1 Exercise of delegations is consistent with organisational processes and the boundaries and authority contained in legislation, policies and instructions. 3.2 Decisions are documented and records kept in accordance with organisational policy and procedures to provide audit information of delegated authority exercised. 3.3 Circumstances requiring the exercise of delegations that are outside own limits are identified and approvals are obtained in accordance with organisational policy and procedures. 3.4 Risks associated with the exercise of delegations are identified and strategies to manage risks are identified in accordance with the organisation's risk management strategy.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to delegations
- using information technology to access relevant legislation and procedures
- reading complex written materials such as legislation, instructions, and standards and applying them to work practices
- scanning techniques to locate main ideas in legislation, policy documents and instructions
- using questioning strategies to clarify understanding
- using communication strategies involving exchanges of often complex oral information
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of exercising delegations

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to delegations
- the range of delegations applicable in the public sector
- instructions and standards relating to delegations
- organisational structure and levels of authority/delegations
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of delegations

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify and undertake research	1.1 Information needs are defined based on work objectives and client and organisation requirements. 1.2 Potential ***sources of information*** and the ***format*** in which they are presented are evaluated and selected in line with the purpose and audience for the research. 1.3 ***Strategies*** are developed to acquire required information in accordance with ***legislation, policy and procedures***. 1.4 Information is researched in a timely and thorough way and within resource allocation. 1.5 Quantity, quality and relevance of initial search results are assessed and gaps filled using the same or adjusted research strategies. 1.6 The methods and outcomes of research, and the criteria used to make information decisions and choices are clearly communicated.
2. Analyse information and apply the results of analysis	2.1 Information from various sources is examined, compared and ***evaluated for content***, structure and logic. 2.2 Analytical techniques and processes are selected in line with defined objectives. 2.3 Information is collated, consolidated and ***analysed*** and

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	outcomes are advised to senior staff in accordance with organisational policy and procedures.
	2.4 Facts, issues, patterns, interrelationships and trends are identified through analysis in accordance with research aims.
	2.5 Agreed project timelines are met, and the defined standards of the organisation are met for all work.
3. Maintain information systems	3.1 ***Information systems*** are maintained, validated and reconciled so that data and system integrity are assured.
	3.2 A range of standard and complex information systems and applications is maintained in accordance with organisation standards.
	3.3 Information systems are reviewed and updated as necessary.
4. Compile reports from information systems	4.1 The findings from analysing information are used to meet ***client/organisational needs*** and organisation standards.
	4.2 Content of reports is determined and organised in a manner that supports the purposes and format of the organisation and audience.
	4.3 Reporting of results is sequenced logically, is concise and clear, and includes predictions, assumptions and constraints where relevant.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying public sector legislation such as occupational health and safety and environment in the context of information management
- accessing and using information ethically and legally
- using manual and computerised techniques for information management
- applying computer technology to data storage, security, retrieval and presentation
- undertaking statistical analysis
- using critical analysis techniques
- communicating with colleagues and supervisors
- presenting information in a range of ways such as report format, numerically, in tables, with graphs, spatially
- responding to diversity, including gender and disability

© Commonwealth of Australia, 2025 Industry Skills Australia

- applying problem solving and referring problems as required

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, policies, procedures and guidelines relating to information handling in the public sector, such as confidentiality, privacy, security, freedom of information
- data collection and management procedures
- organisational information handling and storage procedures
- cultural aspects of information and meaning
- sources of public sector work-related information
- economic, legal and social issues surrounding the use of information
- public sector standards
- standard reporting procedures
- electronic and manual filing systems
- databases and data storage systems
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of information management

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV507A Undertake negotiations
  - PSPGOV512A Use complex workplace communication strategies
  - PSPGOV513A Refine complex workplace documents
  - PSPGOV520A Scope statistical data collection
  - PSPGOV521A Collect statistical data
  - PSPGOV522A Process statistical data
  - PSPGOV523A Interrogate and analyse statistical data
  - PSPGOV524A Interpret data and related statistics

© Commonwealth of Australia, 2025 Industry Skills Australia

- PSPSCI503A Develop and undertake scientific/technological research
- PSPFRAU502B Anticipate and detect possible fraud activity
- PSPLAND506A Identify and manage contaminated sites
- PSPSEC501A Assess security risks
- PSPCRT505A Undertake senior court listing activities

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- research and analysis undertaken in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to research and analysis
- access to electronic and other information sources relevant to the workplace
- case studies and workplace scenarios to capture the range of situations likely to be encountered when undertaking research and analysis.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when undertaking research and analysis, including coping with difficulties, irregularities and breakdowns in routine
- research and analysis undertaken in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination

© Commonwealth of Australia, 2025 Industry Skills Australia

	of 2 or more of: • case studies • portfolios • projects • questioning • scenarios • simulation or role plays • authenticated evidence from the workplace and/or training courses
For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Sources of information may include:	• organisation materials • client information • market trends • registries and file records • library materials • financial records • statistical information • personnel/human resource records • asset records • legislation • policies
Information ***format*** may include:	• multimedia • database • web site • dataset • audio/visual • word processed documents • books • gazettes and other publications

© Commonwealth of Australia, 2025 Industry Skills Australia

	• reports • pivot tables
Strategies may include:	• research plan • search strategy tailored to the information retrieval system selected: • using key concepts and terms • using classification schemes • using search engines • using analysis systems • using data warehouse systems • using internal organisers such as indexes in books
Legislation, ***policy and procedures*** may include:	• Commonwealth and State/Territory legislation, standards and guidelines especially relating to privacy, confidentiality, freedom of information, security, fraud control, copyright, intellectual property • government policy • public sector code of ethics • national standards • Australian standards such as records management, knowledge management, risk management • the organisation's policies and practices • organisational code of conduct • Internet etiquette (netiquette)
Evaluation of content may include:	• reliability • validity • accuracy • authority • currency • point of view • bias • prejudice • deception • manipulation • supporting arguments • contradictions • different viewpoints • the cultural, physical or other context in which the information was created • the impact of context on interpretation of the information • comparison of new knowledge with prior knowledge • whether information contradicts or verifies information from other sources

© Commonwealth of Australia, 2025 Industry Skills Australia

Analysis may include:	• application of statistical methods • mathematical calculations • critical analysis • problem solving • forecasting
Information systems may contain:	• computers and networks • communication channels • records management guidelines • data • procedures • protocols • legislation, guidelines and awards • organisation, legal and policy materials • client information • market trends • registries and file records • library systems • financial records • basic statistical information • personnel records
Client/organisational needs may include:	• provision of advice • input into policy development • solutions/options for action • forecasting • determining future outcomes • identifying strategies derived from analysis of information

Unit Descriptor

This unit covers promotion and support for coaching and mentoring in the organisation. It includes developing a coaching/mentoring strategy, establishing a coaching/mentoring framework, implementing and supporting coaching/mentoring, monitoring coaching and mentoring arrangements and consolidating opportunities for further coaching/mentoring.

In practice, supporting workplace coaching and mentoring in the organisation may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, providing client service, leading a group, developing policy, etc.

This unit is one of 4 units of competency in the *Working in Government* Competency Field that deal with coaching/mentoring. Related units are:

- PSPGOV311A Work with a coach or mentor
- PSPGOV414A Provide workplace mentoring
- PSPGOV415A Provide workplace coaching
-
- No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Develop coaching/ mentoring strategy**	1.1 The potential for ***coaching*** and ***mentoring*** within the work group/organisation is researched. 1.2 A strategy is developed to implement and promote a coaching and mentoring framework, linked to ***other human resource strategies*** in the organisation. 1.3 ***Benefits*** to all parties involved in coaching and mentoring are clearly outlined, consistent with the organisation's philosophy and goals. 1.4 ***Ground rules*** established for coaching and mentoring in the organisation are contained within the strategy. 1.5 Timelines for the implementation of the strategy are developed with key ***stakeholders***. 1.6 Organisational support and resources are obtained for the strategy in accordance with organisational procedures.
2. **Establish a coaching/ mentoring framework**	2.1 A range of coaching/mentoring models is identified to suit the organisation's needs. 2.2 Training is arranged for those interested in being coaches, coached, mentors and/or mentored. 2.3 The requirements of coaching and mentoring contracts/agreements are developed and monitored in accordance with the coaching and mentoring strategy. 2.4 The range of stages in coaching and mentoring relationships is identified and flexibility is built in to the framework to manage the stages where necessary.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.5 Protocols for ***matching participants*** and dealing with difficulties, disputes and grievances are formalised in accordance with the organisation's existing procedures.
3. Implement and support coaching and mentoring	3.1 The value of coaching and mentoring is promoted at all levels of the organisation in accordance with organisational policy and procedures. 3.2 ***Opportunities for mentoring*** and coaching are identified and communicated to interested parties in accordance with the strategy. 3.3 Internal and external ***networks*** are used to support coaching and mentoring in accordance with ***legislation, policy and procedures***. 3.4 ***Techniques and practices*** are suggested for resolving differences/problems without damaging relationships, or assistance/referral is provided in accordance with organisational policy and procedures.
4. Monitor coaching and mentoring arrangements	4.1 People involved in coaching and mentoring are encouraged to reflect on organisational processes, organisational support and their activities to identify opportunities for improvement and innovation. 4.2 Recommendations made for improvements in the coaching/mentoring strategy are evaluated and implemented as necessary in accordance with organisational policy and procedures.
5. Consolidate opportunities for further coaching and mentoring	5.1 The positive contributions of individuals to coaching and mentoring arrangements are recognised and acknowledged. 5.2 Positive changes created through coaching and mentoring arrangements are celebrated and rewarded in accordance with organisational policy and procedures. 5.3 Ongoing opportunities for coaching and mentoring are identified and promoted in accordance with individual and organisational requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

© Commonwealth of Australia, 2025 Industry Skills Australia

- applying legislation, regulations and policies relating to workplace coaching and mentoring
- undertaking research and analysis
- planning
- networking
- using effective communication with a diverse workforce including active listening, giving and receiving feedback
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and the environment in the context of workplace coaching and mentoring

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to workplace coaching and mentoring including privacy and freedom of information
- equal employment opportunity, equity and diversity principles
- codes of ethics
- code of conduct
- policy and procedures for specific environment
- human resource strategies that link to a coaching/mentoring strategy
- strategic goals and direction/plan
- principles and practices of coaching and mentoring that need to be addressed in the organisational strategy
- coaching/mentoring methodologies and strategies
- public sector legislation such as occupational health and safety and the environment in the context of workplace coaching and mentoring

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV502B Develop client services

© Commonwealth of Australia, 2025 Industry Skills Australia

- PSPGOV503B Coordinate resource allocation and usage
- PSPGOV504B Undertake research and analysis
- PSPGOV505A Promote diversity
- PSPGOV511A Provide leadership
- PSPGOV512A Use complex workplace communication strategies
- PSPGOV516A Develop and use emotional intelligence
- PSPHR503A Facilitate performance management processes
- PSPHR504A Implement workforce planning and succession strategies
- PSPHR508A Coordinate career development
- PSPLEGN501B Promote compliance with legislation in the public sector
- PSPOHS501A Monitor and maintain workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- coaching and mentoring supported in the organisation in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to workplace coaching and mentoring
- current theory and practice for workplace coaching and mentoring
- case studies and workplace scenarios to capture the range of situations likely to be encountered when supporting coaching and mentoring in the organisation

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when supporting coaching and mentoring in the organisation, including coping with difficulties, irregularities and breakdowns in routine
- coaching and mentoring supported in the organisation in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds

© Commonwealth of Australia, 2025 Industry Skills Australia

- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Coaching:

- has a focus on the acquisition of job skills and knowledge and is generally short-term
- is a defined relationship to enhance performance
- is results oriented
- is performance or goal directed
- emphasises action or improved performance in a specific area
- requires good interpersonal relations
- is identified on personal learning and development plans
- is provided by a coach who:
  - provides learning opportunities
  - monitors performance
  - provides constructive feedback

© Commonwealth of Australia, 2025 Industry Skills Australia

- maintains confidentiality
- may have undertaken training/development to undertake the role

- is not necessarily hierarchical

Mentoring:

- generally has a longer-term focus on personal growth and learning
- includes a wide range of learning oriented to:
  - exchange of wisdom
  - support
  - guidance in personal or professional growth.
  - is a relationship, not just a procedure or activity
  - is one person professionally assisting the professional development of another
  - is a developmental effort to build skills and knowledge for advancement based on merit, rather than alliances/politically-based partnerships to advance careers based on politics rather than aptitude
- is provided by a mentor who:
  - facilitates the growth of the person being mentored and professional development
  - provides information, guidance and constructive comments
  - evaluates the plans of the person being mentored, decisions, goals and objectives
  - supports, encourages and, where necessary, highlights shortfalls in agreed performance
  - maintains confidentiality in the relationship
  - does NOT take over problems and try to solve them
  - does NOT give advice, criticisms or solutions, but supports the person being mentored to make their own decisions
  - is not the direct manager of the person being mentored

Other human resource strategies may include:

- performance management
- learning and development
- succession planning
- career management

Benefits may include:

- for the organisation:
  - increased productivity
  - new competencies available
  - more committed, involved and responsible personnel at all levels

© Commonwealth of Australia, 2025 Industry Skills Australia

- personal and trusting developmental relationships
- knowledge sharing
- safeguarding investment in high potential people
- culture change

- for the person being coached or mentored:
  - empowerment
  - opportunity to acquire competencies and professional experience
  - insights into the organisational culture, attitudes, protocols and expected behaviours
  - increased potential for career mobility and promotion
  - a supportive environment in which successes and failures can be evaluated
  - internal and external networking opportunities
  - development of professional abilities and self-confidence
  - recognition and job satisfaction
  - mutual respect
- for the coach/mentor:
  - renewed enthusiasm for the role (if an experienced employee)
  - challenging discussions with people who may have fresh perspectives
  - satisfaction from contributing to another's development
  - opportunities to reflect upon and articulate the role of coach/mentor
  - improved ability to share experiences and knowledge
  - opportunities to test new ideas
  - being of service to others
  - increased self-esteem

Ground rules may include:

- relationship is voluntary, although the requirement to participate in coaching may not be
- mentoring partners should not be in the same chain of command
- supervisors of both partners must approve, if in-house rather than out-sourced arrangement
- guidance and counsel from a coach/mentor does not supersede that of the supervisor in work-related matters
- training for coaching and mentoring partners
- a formal agreement
- active involvement of both partners in the process
- commitment from the organisation and both parties to the

© Commonwealth of Australia, 2025 Industry Skills Australia

	arrangement • effectiveness measures • requirements to monitor/evaluate and report on outcomes • provision for either party can end the relationship any time for any reason, or no reason

Stakeholders may include:	• all those individuals and groups both inside and outside the organisation that have some direct interest in the organisation's behaviour, actions, products and services such as:
	  • employees at all levels of the organisation
	  • other public sector organisations
	  • private sector organisations/businesses
	  • non-government organisations
	  • union and association representatives
	  • boards of management
	  • government
	  • Ministers

Matching participants may include consideration of:	• age • cultural background • educational level • ethnicity • expertise • family responsibilities • gender • goals • interests • interpersonal approach • language • learning/thinking styles • life experience • marital status • personality • physical ability • religious belief • sexual orientation • socio-economic background • work experience • working style • coach/mentor with particular attributes depending on the purpose and objectives of the arrangement

© Commonwealth of Australia, 2025 Industry Skills Australia

Mentoring opportunities may include:	• secondments • relieving opportunities • work shadowing • project assignments • intra- and inter-departmental release • networks • outsourced (paid) - business coach/mentor when none is available internally
Networks may include:	• professional organisations • informal common interest groups • public sector management consultants
Legislation, ***policy and procedures*** may include:	• State/Territory and Commonwealth legislation and regulations such as: • public sector management acts • privacy legislation • equal employment opportunity, anti-discrimination and harassment legislation • occupational health and safety legislation • ethics and accountability standards • public sector standards • organisational policy, procedures and protocols
Techniques and practices for resolving differences may include:	• finding a mutually beneficial solution • inviting discussion • providing explanations • not taking it personally when information is rejected • not laying blame • using 'I' messages • self-disclosure

Unit Descriptor

This unit covers achievement of operational results and effective working relationships through leadership, feedback and support of individuals in a workgroup that may exist in the workplace, be formed for a special purpose or project, or consist of community members, volunteers, inter-agency members, etc. It includes facilitating commitment to objectives and required standards; contributing to the development of a cooperative, high performance workgroup; giving and receiving feedback on performance; supporting and participating in development activities; and providing leadership, direction and guidance in the workgroup.

In practice, leading a workgroup may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, providing client service, developing policy, building community relationships, improving workplace legislative performance, providing technical expertise, etc.

This is one of 6 units in the *Working in Government* and *Management* Competency Fields that deal with working with others. Related units are:

- PSPGOV302B Contribute to workgroup activities
- PSPGOV404B Develop and implement work unit plans
- PSPGOV516A Develop and use emotional intelligence
- PSPGOV604A Foster leadership and innovation
- PSPMNGT701B Provide strategic direction

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Facilitate commitment to objectives and required standards	1.1 The organisation's vision, strategic objectives and required standards of performance are discussed and clarified with others in accordance with the needs, communication and learning styles of workgroup members. 1.2 Establishment of the purpose, objectives, roles and responsibilities in the ***workgroup*** is facilitated in accordance with organisational requirements and objectives. 1.3 Commitment to objectives and standards is modelled to provide leadership and develop workgroup commitment. 1.4 Equal employment opportunity, occupational health and safety, diversity management and participative work practices are modelled and promoted within the workgroup in accordance with ***legislation, policy and procedures***.
2. Contribute to the development of a co-operative, high	2.1 Work contributions or suggestions are encouraged, acknowledged and considered constructively. 2.2 Workgroup members are supported to use, share and develop

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
performance workgroup	their skills according to work requirements. 2.3 ***Work allocation*** is facilitated within the group on the basis of current skills and development needs. 2.4 Implementation of new work practices is undertaken in consultation with workgroup members. 2.5 Conflict and other ***issues which affect the performance of the workgroup*** are resolved within the workgroup wherever possible, or referred in accordance with organisational policy and procedures.
3. Give and receive feedback on performance	3.1 Feedback is obtained from others outside the workgroup on personal and workgroup performance, and open and constructive responses to feedback are given. 3.2 Regular constructive feedback on all aspects of work performance is gathered from and provided to the workgroup. 3.3 Performance is assessed and addressed in a fair and timely manner and where possible notable performance is recognised/rewarded in accordance with organisational policy and procedures. 3.4 Under-performance of self and others is addressed in accordance with relevant legislation, guidelines and procedures. 3.5 Feedback is used to continuously improve performance and outcomes.
4. Support and participate in development activities	4.1 An action plan to meet ***individual*** and group learning and development needs is developed, agreed and implemented. 4.2 Individuals are supported to identify their specific learning/development needs. 4.3 Workgroup members are encouraged and supported to take advantage of development opportunities in accordance with their needs and organisational requirements. 4.4 ***Learning and development opportunities*** are accessed to continuously improve own leadership skills and other identified development needs. 4.5 On-the-job learning opportunities are provided for in accordance with individual needs and to the required standard. 4.6 Workgroup members are encouraged and supported in applying new skills and knowledge in the workplace.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
5. **Provide leadership, direction and guidance in the workgroup**	5.1 Participative decision making is used routinely in developing, implementing and reviewing the work of the group and the distribution of responsibilities, where appropriate. 5.2 Opportunities and encouragement are given to workgroup members to develop new and innovative work practices and strategies. 5.3 Workgroup members are provided with the support, leadership, advice and policy direction necessary to perform work safely and effectively. 5.4 Tasks are allocated in accordance with the competencies of workgroup members, and autonomy and authority are delegated as appropriate. 5.5 Leadership and guidance strategies are varied to meet changing priorities and situations, and take into account the differing needs and skills of individuals and the requirements of the tasks and workplace.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations, policies, procedures and guidelines
- providing leadership, supervision and performance feedback
- undertaking problem solving in a team environment
- using transparent decision making
- communicating with a diverse workplace including listening, facilitating, negotiating, mentoring
- responding to diversity, including gender and disability

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to the public sector
- principles of effective team operation
- principles of facilitation and empowerment
- group processes
- group dynamics

© Commonwealth of Australia, 2025 Industry Skills Australia

- range of leadership styles and the application of these to suit different groups and tasks
- learning and development in the workplace
- equal employment opportunity, equity and diversity principles
- occupational health and safety and environment legislation in the context of leading a workgroup

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV503B Coordinate resource allocation and usage
  - PSPGOV504B Undertake research and analysis
  - PSPGOV505A Promote diversity
  - PSPGOV506A Support workplace coaching and mentoring
  - PSPGOV507A Undertake negotiations
  - PSPGOV508A Manage conflict

  - PSPGOV514A Facilitate change
  - PSPGOV517A Coordinate risk management
  - PSPLEGN501B Promote compliance with legislation in the public sector
  - PSPOHS501A Monitor and maintain workplace safety
  - PSPWPI502B Facilitate improvement in workplace legislative performance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit

© Commonwealth of Australia, 2025 Industry Skills Australia

- provision of leadership in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to the public sector
- case studies and workplace scenarios to capture the range of situations likely to be encountered when providing leadership to a workgroup

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when providing leadership to a workgroup, including coping with difficulties, irregularities and breakdowns in routine
- provision of leadership in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

PSPGOV512A Use complex workplace communication strategies

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers complex workplace communication for working at middle management level with internal and external clients, colleagues and other staff. It includes preparing for complex communication, analysing and responding to opinions, presenting a convincing argument, and developing a range of communication strategies.

In practice, using complex workplace communication strategies may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government systems, managing change, managing diversity, etc.

This is one of 5 units of competency in the *Working in Government* Competency Field that deal with communication. Related units are:

- PSPGOV202B Use routine workplace communication techniques
- PSPGOV312A Use workplace communication strategies
- PSPGOV412A Use advanced workplace communication strategies
- PSPGOV605A Persuade and influence opinion
-
- No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Prepare for complex communication**	1.1 ***Communication objectives*** are clarified, those to be ***present*** are confirmed and ***communication mode*** is identified. 1.2 Analysis is undertaken to anticipate the likely positions to be taken by those present on the matters under discussion. 1.3 Subject matter is researched/***organised***, key points to be conveyed are identified and recorded, and information to counter other positions is summarised. 1.4 Requirements of ***legislation, policy and guidelines*** relevant to the discussion are identified and incorporated.
2. **Analyse and respond to opinions**	2.1 Discussion is evaluated to identify impartiality, bias or unsupported argument. 2.2 Points of view of other speakers are noted and information to counter opposing views is presented objectively in accordance with required position. 2.3 ***Reaction to speakers*** and their point of view is analysed to identify and manage emotional reactions and maintain objectivity. 2.4 Opposing/challenging views are examined for their value in achieving the same ends. 2.5 Active listening and questioning are used to clarify own

ELEMENT	PERFORMANCE CRITERIA
	understanding, challenge or justify other points of view.
3. **Present a convincing argument**	3.1 ***Communication approach*** is chosen and used to suit the given audience.
	3.2 Prepared position is asserted with conviction and purpose.
	3.3 ***Verbal and non-verbal behaviour*** are adjusted to maintain listener interest if the audience is unresponsive.
	3.4 Questions are used to elicit feedback and check audience understanding.
	3.5 Audience questions and argument are responded to objectively, and answers are backed by reasoned explanation.
	3.6 Agreement is negotiated where possible, concluding with a summary of agreed items.
4. **Develop a range of communication strategies**	4.1 Feedback from others is obtained and the outcomes of communication are assessed.
	4.2 Lessons learnt are recorded and used to underpin future interactions.
	4.3 ***Language structures and features*** that influence audiences to a preferred point of view are developed and practised.
	4.4 Communication strategies are explored and practised for a range of workplace applications in accordance with organisational requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to communication in the public sector
- analysing and using language structures and features that influence the interpretation of spoken communication
- interacting confidently with groups on familiar topics in formal and informal workplace situations
- speaking with confidence and listening critically
- clarifying meaning, exploring issues and problem solving
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in

© Commonwealth of Australia, 2025 Industry Skills Australia

the context of high-level communication

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to communication in the public sector
- the power and effect of spoken language
- knowledge of organisation processes and hierarchy
- techniques to deal with opposing views and positions
- emotional intelligence techniques
- organisational protocols and etiquette for communication in meetings
- communication strategies to suit different audiences, such as workgroup, organisational, inter-agency
- ways to influence the interpretation of spoken communication
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of high-level communication

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV504B Undertake research and analysis
  - PSPGOV505A Promote diversity
  - PSPGOV507A Undertake negotiations
  - PSPGOV508A Manage conflict
  - PSPGOV511A Provide leadership
  - PSPGOV514A Facilitate change
  - PSPGOV515A Develop and use political nous
  - PSPGOV516A Develop and use emotional intelligence
  - PSPLEGN501B Promote compliance with legislation in the public sector

© Commonwealth of Australia, 2025 Industry Skills Australia

- PSPOHS501A Monitor and maintain workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- use of complex communication strategies in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to public sector communication
- current theory and practice on influencing skills for the public sector
- case studies and workplace scenarios to capture the range of situations likely to be encountered when using complex communication strategies

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when using complex communication strategies, including coping with difficulties, irregularities and breakdowns in routine
- complex communications strategies used in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- questioning

© Commonwealth of Australia, 2025 Industry Skills Australia

	• scenarios • simulation or role plays • authenticated evidence from the workplace and/or training courses
For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.	
Communication objectives may be to:	• share information • reach consensus • contribute to policy • represent the business unit's position/interests in internal negotiations • resolve differences • negotiate a joint position/compromise • build reputation (of self and organisation/business unit) • market services
Those to be present may include:	• peers • colleagues • those senior or junior to the position • staff from other agencies
Mode of communication may include:	• telephone • teleconference • video conference • Internet (online forums) • face-to-face • one-on-one, or in a group • forum, seminar or conference
Organisation of subject matter may include:	• identifying features, advantages and benefits and aligning evidence/examples • anticipating likely disagreements and structuring material to address these

© Commonwealth of Australia, 2025 Industry Skills Australia

Legislation**, **policy and guidelines may include:	• State/Territory and Commonwealth legislation, regulations, policies, guidelines and standards relating to exchange of information in the public sector, such as:
	  • ethics and accountability guidelines/codes of practice
	  • information security standards
	  • principles of equal employment opportunity, equity and diversity
	  • freedom of information and privacy.
	• intellectual property
	• fraud standards
	• professional liability

Reaction to speakers may include:	• own reaction • others present
Communication approach may include:	• catering to political sensitivities • working within government processes and operational frameworks • balancing debate and action • consideration of wider organisational/public sector issues • speaking with confidence • cultural, ethnic, diversity or equity considerations • consultative • collaborative • assertive • reasonable • humorous
Verbal and non-verbal behaviour may include:	• inclusive language, ideas and information • congruent speech and body language • speaking with confidence • impartiality • responsiveness • drawing on different sources of information
Language structures and features may include:	• use of metaphors and similes • use of analogy, imagery and other comparisons • use of passive voice • using personal names repeatedly to convey intimacy or sincerity • tone, style and point of view

Unit Descriptor

This unit covers written workplace communication at a level where preliminary research or documents may have been prepared by others as input, and final documents are being prepared. It includes critical analysis of workplace information, composition, revision and refinement to meet workplace requirements.

In practice, refinement of complex workplace documents may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, providing client service, leading a group, developing policy, undertaking research and analysis, etc.

This is one of 5 units of competency in the *Working in Government* Competency Field that deal with written communication. Related units are:

- PSPGOV208A Write routine workplace materials
- PSPGOV313A Compose workplace documents
- PSPGOV413A Compose complex workplace documents
- PSPGOV606A Prepare high-level/sensitive written materials

Application of the Unit

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Critically analyse information	1.1 ***Information*** is tested for relevance, reliability, consistency and usefulness to the task/organisation. 1.2 Fact is separated from opinion and underlying values and beliefs are identified. 1.3 Cultural context of the information is taken into account in the analysis. 1.4 Stereotypes, bias, prejudice and motive are recognised. 1.5 Conclusions are drawn and a critical analysis with supporting evidence is prepared and submitted in accordance with organisational requirements.
2. Compose/refine complex documents	2.1 The ***purpose***, audience and objectives of ***complex documents*** are confirmed in accordance with organisational requirements. 2.2 ***Structure and content*** of document is approved in line with the purpose and intended audience. 2.3 Risk assessment is undertaken and risk management is implemented in relation to document preparation and content, in accordance with the nature and classification of the material. 2.4 Information/documents provided by others are analysed for bias, gaps, the influence of values, attitudes and context, conflicting advice/evidence and political implications. 2.5 Information is synthesised and complex documents are prepared and ***submitted*** in accordance with ***organisational requirements, legislation, policy and procedures***. 2.6 Feedback is provided to contributors of information/documents

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	to improve future input in a manner that provides learning opportunities for the researchers/authors.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- reading and writing at a level to cope with a range of complex and sensitive workplace materials
- critically analysing and synthesising information to compose complex written documents
- refining content, structure and sequence according to the required purpose of written material
- using spelling, punctuation and grammar for workplace documents at an experienced level
- providing feedback on other people's work in ways suited to the diversity of the workplace, including creation of learning opportunities to improve research/document input
- responding to diversity, including gender and disability
- implementing ergonomic requirements for office work
- complying with environmental policies such as those relating to paper use/wastage/recycling

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to written communication in the public sector such as privacy, freedom of information, information security, confidentiality, copyright, intellectual property
- critical analysis of complex information
- politically and culturally sensitive documents
- organisational requirements for complex written documents
- government style manual requirements
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of preparing written materials

© Commonwealth of Australia, 2025 Industry Skills Australia

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV504B Undertake research and analysis
  - PSPGOV505A Promote diversity
  - PSPGOV515A Develop and use political nous
  - PSPLEGN501B Promote compliance with legislation in the public sector
  - PSPOHS501A Monitor and maintain workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- complex workplace documents composed/refined in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to written communication in the public sector
- examples of complex workplace documents
- government style guide
- case studies and workplace scenarios to capture the range of situations likely to be encountered when composing/refining complex workplace documents

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when refining complex workplace documents, including coping with difficulties, irregularities and breakdowns in routine
- complex workplace documents composed/refined in a range of (3 or more) contexts (or occasions, over time).

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Information for critical analysis may include:	• applications • briefing papers • discussion papers • expert opinion • literature • plans • policy advice • project briefs • reports • research

© Commonwealth of Australia, 2025 Industry Skills Australia

	• speeches • submissions • web site information
Purpose may include:	• influencing opinion • reporting on achievement • recommending options and corresponding actions • meeting regulatory requirements • meeting public sector reporting requirements • documenting policy • developing policy • obtaining funding • providing briefing material • contributing to strategic planning • responding to enquiries/complaints
Complex documents may include:	• funding submissions • briefing papers • speeches • media briefs • position papers • discussion papers • business cases • reports • project briefs • strategic and operational plans • functional area strategy • justification for policy development • policy guidance • counter argument to submission
Structure and content may include:	• executive summary • division into sections or chapters • tables of contents and indexes • conclusions • glossaries • footnotes/endnotes • references • critical analysis • facts and observations • submissions • creative ideas • recommendations and supporting arguments • opinion

© Commonwealth of Australia, 2025 Industry Skills Australia

	• anticipated arguments and rebuttals • case studies
Submission of document may include:	• approvals • sign-off procedures

Organisational requirements may include:	• use of plain English
	• style formats
	• acknowledgements
	• particular terminology to be used/not used:
	  • acronyms
	  • technical terms
	  • bureaucratic language
	  • abbreviations
	• requirements for minimising jargon in written materials
	• requirements for written material to take account of cultural, ethnic, religious or language differences, disabilities, etiquette
	• guidelines for illustrative items
	• standards for references, acknowledgements, citations, footnotes, endnotes
	• using particular communication channels

Legislation, ***policy and procedures*** may include:	• State/Territory or Commonwealth legislation, regulations, policies, procedures and guidelines relating to the preparation and security of written information in the public sector, including freedom of information, copyright, privacy, confidentiality, equal employment opportunity, diversity, occupational health and safety • risk assessment • information security requirements • public sector standards • fraud control standards • codes of practice • codes of ethics • private or confidential materials • embargoed material • politically sensitive materials • security standards for government information

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Identify the political terrain**	1.1 ***Stakeholder positions are identified*** and taken account of. 1.2 Corporate politics are analysed to identify agendas and players. 1.3 Awareness of and sensitivity to political agendas, both open and hidden, are developed and utilised. 1.4 The current agenda is located in the wider context to appreciate the big picture and provide more than one perspective. 1.5 The impact of the agenda on the work area is identified and confirmed in accordance with organisational protocols.
2. **Evaluate the political environment**	2.1 Information is sourced from inside and outside the organisation, and its authenticity and reliability are confirmed. 2.2 An analysis of the political, social and economic environment is undertaken that takes into account emerging trends and current and possible future goals of the organisation.
3. **Form alliances**	3.1 Power structure and sources of ***power*** are identified in the organisation and the wider public sector. 3.2 People prepared to trade mutual support are identified and the benefits assessed. 3.3 Risks and benefits of possible alliances are weighed. 3.4 Interested groups/individuals are lobbied to gain support and acceptance of ideas/courses of action. 3.5 Influence is built with key policy makers, ***decision makers*** and key influencers, in accordance with public sector standards and legislation.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
4. Bargain and negotiate to achieve outcomes	4.1 Sound positions are developed with supporting arguments. 4.2 Responses to possible contradictory positions are formulated. 4.3 Positions are negotiated and refined with feedback from the negotiation process. 4.4 Consensus with others is achieved for one's position. 4.5 Outcomes are implemented in accordance with organisational policy and procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to the public sector
- undertaking research and analysis
- using a range of communication activities such as negotiating, consulting, influencing, bargaining, resolving conflict, networking, etc
- responding to diversity, including gender and disability
- applying risk management strategies
- applying procedures relating to occupational health and safety and environment in the context of the political environment.

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to the public sector environment
- organisational policies and procedures
- organisational and public sector power structures and sources of power
- macro view of agendas, positions, and power
- government directions and agendas
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment and sustainability

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Identify the impact of own emotions on others in the workplace**	1.1 Own emotional strengths and weaknesses are identified. 1.2 Personal stressors and own emotional states related to the workplace are identified. 1.3 Awareness of own emotional triggers is developed and used to enable control to be exercised over emotional responses. 1.4 Workplace behaviours that demonstrate management of ***emotions*** are modelled. 1.5 Self-reflection is utilised and feedback from others is obtained to improve development of ***emotional intelligence***.
2. **Recognise and appreciate the emotional strengths and weaknesses of others**	2.1 The emotional states of co-workers are assessed and emotional cues responded to. 2.2 The varying cultural expressions of emotions are identified and utilised to respond to emotional cues in a diverse workforce. 2.3 Flexibility and adaptability are demonstrated in dealing with others. 2.4 The emotions of others are taken into account when making decisions.
3. **Promote the development of emotional**	3.1 Opportunities are provided for others to express their thoughts and feelings.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
intelligence in others	3.2 Others are assisted to understand the effect of their behaviour and emotions on others in the workplace. 3.3 Self-management of emotions is encouraged in others. 3.4 Others are encouraged to ***develop their own emotional intelligence*** to build productive relationships and maximise workplace outcomes.
4. Utilise emotional intelligence to maximise team outcomes	4.1 A positive emotional climate is encouraged in the workplace. 4.2 The strengths of workgroup members are used to achieve workplace outcomes.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to the public sector
- keeping check of emotions when challenges arise and maintaining composure
- perceiving the emotional motivators that drive individuals and groups in the workplace and engaging those motivators, where appropriate, to optimise organisational performance
- using a variety of words and language structures to explain complex ideas to different audiences
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to the public sector
- emotional intelligence principles and strategies
- the relationship between effective people and the attainment of business unit objectives
- communication with a diverse workforce
- varying cultural expressions of emotion
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of using emotional intelligence

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPCOM502A Develop and implement community engagement strategies
  - PSPCOM503A Build and maintain community relationships
  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV507A Undertake negotiations
  - PSPGOV508A Manage conflict
  - PSPGOV511A Provide leadership
  - PSPGOV512A Use complex workplace communication strategies
  - PSPGOV514A Facilitate change
  - PSPLEGN501B Promote compliance with legislation in the public sector
  - PSPPOL501A Develop organisation policy

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- development and use of emotional intelligence in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to the public sector
- emotional intelligence background material and workplace strategies
- case studies and workplace scenarios to capture the range of situations likely to be encountered where the use of emotional intelligence is relevant

Where and how to

Valid assessment of this unit requires:

© Commonwealth of Australia, 2025 Industry Skills Australia

assess evidence	• a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when developing and using emotional intelligence, including coping with difficulties, irregularities and breakdowns in routine • development and use of emotional intelligence in a range of (3 or more) contexts (or occasions, over time). Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as: • people with disabilities • people from culturally and linguistically diverse backgrounds • Aboriginal and Torres Strait Islander people • women • young people • older people • people in rural and remote locations. Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of: • case studies • demonstration • observation • projects • questioning • scenarios • simulation or role plays • authenticated evidence from the workplace and/or training courses
For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

© Commonwealth of Australia, 2025 Industry Skills Australia

Emotions may include:	• anger • anxiety • apathy • apprehension • caring • confidence • depression • elation • enthusiasm • excitement • fear • happiness • inadequacy • joy • nervousness • over-confidence • pride • stress • under-confidence • unhappiness

Emotional intelligence is:	• widely recognised as the ability of an individual to monitor their own and others' emotions in a social or work environment, to discriminate among the emotions and to use the information to guide their thinking and actions
	• characterised by:
	  • self-awareness (personal)
	  • self-management (personal)
	  • social awareness (social)
	  • relationship management (social)

Development of emotional intelligence may include:	• mentoring • shadowing • coaching • training • simulation

PSPGOV518A Benchmark performance

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers benchmarking performance of a functional area or business unit of an organisation. It includes designing a benchmarking approach, establishing benchmarks, establishing and managing a benchmarking exercise, gathering and analysing information and reporting on/acting on benchmarking outcomes.

In practice, benchmarking performance may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, providing client service, leading a group, developing policy, etc.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

© Commonwealth of Australia, 2025 Industry Skills Australia

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Design benchmarking approach	1.1 The organisation's core business, functions, and purpose are confirmed to provide a context for the ***benchmarking*** exercise. 1.2 The organisation's strategic and organisational context is analysed to identify factors with current or future impact on the organisation. 1.3 The ***scope*** of the benchmarking exercise is established and objectives, desired outcomes, timeframes and ***resources*** are determined. 1.4 A ***benchmarking approach*** is designed in accordance with the scope, desired objectives/outcomes and available resources. 1.5 A project plan is prepared and approved in accordance with organisational policy and procedures.
2. Establish benchmarks	2.1 ***Key result areas*** are identified for benchmarking in accordance with determined scope and objectives. 2.2 ***Research*** is conducted to establish the ***benchmarks*** to be used for the measurement of organisational performance. 2.3 Consultation to consider and confirm the validity and usefulness of the benchmarks is conducted with key ***stakeholders***. 2.4 Benchmarks are confirmed and obtained, or arrangements made to develop/use them in accordance with ***legislation, standards, policies and guidelines***.
3. Establish and manage benchmarking exercise	3.1 ***Staffing arrangements*** are established and resourced in accordance with project plan. 3.2 Consultation, communication with stakeholders and ongoing progress reports are included as a feature of the management of the exercise to ensure the engagement and cooperation of those people in the areas being benchmarked. 3.3 Benchmarking exercise is managed in accordance with

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	timeframes and budgetary constraints.
4. Gather and analyse information	4.1 Networking and consultation are undertaken with staff in the areas to be benchmarked, to gather ***tacit knowledge***.
	4.2 Encouragement of open and honest input is provided to ensure outcomes are valid, reliable and useful for improving performance.
	4.3 Organisational data is gathered, collated with information from consultation and analysed against benchmarks in accordance with the project plan.
	4.4 Benchmarking findings are discussed with staff and management, and feedback is incorporated into final results.
5. Report on/act on benchmarking outcomes	5.1 Benchmarking report is written to meet audience needs and is presented in accordance with organisational requirements.
	5.2 Areas of excellence/strengths and recommendations for improvement are identified in the report in accordance with pre-determined objectives and outcomes.
	5.3 When required, a strategy is developed for phased implementation of recommendations that meet organisational requirements.
	5.4 Research information is preserved and stored in accordance with organisational and security requirements to provide historical data for subsequent benchmarking exercises.
	5.5 Benchmarking outcomes are acted upon/recommendations implemented in accordance with organisational requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to benchmarking
- planning and managing projects
- collecting, recording and collating information
- undertaking research and analysis
- using records management systems
- interpreting organisational information
- communicating/consulting with a range of diverse stakeholders
- responding to diversity, including gender and disability

© Commonwealth of Australia, 2025 Industry Skills Australia

- writing recommendations and reports requiring formality of expression
- using numeracy skills for data analysis
- applying procedures relating to occupational health and safety and environment in the context of benchmarking

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to benchmarking
- principles of benchmarking performance
- organisational structure and functions, systems and processes
- public sector standards including ethics and security relating to organisational information
- project management
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of benchmarking

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC501B Promote the values and ethos of public service
  - PSPIM503A Maintain and monitor service standards
  - PSPGOV503B Coordinate resource allocation and usage
  - PSPGOV504B Undertake research and analysis
  - PSPGOV505A Promote diversity
  - PSPGOV507A Undertake negotiations
  - PSPGOV508A Manage conflict
  - PSPGOV511A Provide leadership
  - PSPGOV512A Use complex workplace communication strategies
  - PSPGOV517A Coordinate risk management

© Commonwealth of Australia, 2025 Industry Skills Australia

- PSPLEGN501B Promote compliance with legislation in the public sector
- PSPPM502B Manage complex projects
- PSPSEC502A Develop security risk management plans

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- performance benchmarked in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to benchmarking
- industry best practice standards for benchmarks
- access to similar organisations/areas/functions for comparison
- case studies and workplace scenarios to capture the range of situations likely to be encountered when benchmarking performance

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when benchmarking performance, including coping with difficulties, irregularities and breakdowns in routine
- performance benchmarked in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios

© Commonwealth of Australia, 2025 Industry Skills Australia

	• projects • questioning • scenarios • authenticated evidence from the workplace and/or training courses
For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Benchmarking is:	• an activity undertaken by an organisation to gauge its performance against a set of internal or industry-specific best practice standards • applied organisation-wide, to departments or business units or to areas such as finance, human resources, customer service/satisfaction, etc
Scope may include:	• organisation-wide • functional area • business unit • skill area, such as management behaviours and practices • procedures, policies, guidelines, work instructions • resource deployment and usage • business practices • performance outcomes • organisational processes
Resources may include:	• personnel • funding • downtime when benchmarking is underway • equipment and supplies • research materials • technology
Benchmarking approach may include:	• a project team approach • comparison with similar organisation/function

© Commonwealth of Australia, 2025 Industry Skills Australia

	• visit to and critique of a similar organisation • collaboration in 'critical friends' program • comparison with pre-determined standard • identifying and setting targets for improved performance • change management • resourcing commensurate with the size and perceived importance of the exercise • training/education about benchmarking • benchmarking networks
Key result areas may include:	• service delivery • finance • people management • client service • administration • safety • security • fraud control • process improvement, especially key business processes
Research may include:	• key stakeholders • current literature • industry research • internal, local, national or international search for benchmarks • ensuring benchmarks are valid (comparing apples with apples) and reliable • identifying confounding variables
Benchmarks may include:	• internal standards/performance indicators • historical data - past performance • external standards • industry standards • best/leading practice standards • national standards • international standards
Stakeholders may include:	• all those individuals and groups both inside and outside the organisation that have some direct interest in the organisation's behaviour, actions, products and services, including: • boards of management • clients • community organisations • contractors • employees at all levels of the organisation • government • Ministers

© Commonwealth of Australia, 2025 Industry Skills Australia

	• other public sector organisations • service providers • suppliers • the public • union and association representatives • volunteers
Legislation, ***standards***, ***policies and guidelines*** may include:	• public sector management acts • financial management acts • audit acts • public sector standards • fraud control standards • government security standards • risk management guidelines • Australian standards, such as accounting standards, audit standards, risk management standards, knowledge management standards, quality standards • ethics and accountability standards • codes of conduct • confidentiality agreements
Staffing arrangements may be:	• internal • external • contracted expertise
Tacit knowledge is:	• knowledge that is not written down/recorded that resides in the mind and may include aspects of culture or 'ways of doing things'

PSPGOV519A Manage performance

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers supervision and performance management in accordance with the organisation's performance management system. It includes linking individual/workgroup activities to organisational goals, setting performance expectations, measuring performance achievements, and renegotiate performance and development plans.

In practice, performance management may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, leading a group, managing projects, supervising inspections, benchmarking performance, etc.

This is one of 4 units in the *Working in Government* and *Management* Competency Fields that deal with performance. Related units are:

- PSPGOV315A Give and receive workplace feedback
- PSPGOV416A Monitor performance and provide feedback
- PSPMNGT603B Facilitate people management
-
- No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Link individual/workgroup activities to organisational goals	1.1 The organisation's mission, vision and goals are identified, linked and explained in accordance with each individual's needs. 1.2 Individual and ***workgroup*** activities are aligned with organisational goals in consultation with workgroup members. 1.3 Individual and workgroup activities are prioritised in accordance with ***organisational directions***.
2. Set performance standards expectations	2.1 ***Performance standards*** are identified and clarified in accordance with organisational policy and procedures. 2.2 Performance standards are consulted upon, negotiated and agreed. 2.3 Performance and learning/development plans are developed and agreed, to document team and individual performance targets, standards and professional development objectives. 2.4 Performance targets and key performance indicators are developed that are specific, realistic and measurable. 2.5 Performance plans are implemented in accordance with organisational requirements.
3. Measure performance achievements	3.1 Individual performance is monitored, ***appraised*** and measured against performance goals and required business outcomes. 3.2 Performance is assessed and addressed in a fair and timely manner in accordance with ***legislation, policy and procedures***. 3.3 Disagreement or conflict is managed and documented in accordance with organisational policy and procedures.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.4 Where possible, outstanding performance is recognised/rewarded in accordance with organisational policy and procedures.
	3.5 Under-performance is addressed promptly in accordance with organisational guidelines, procedures and the principles of natural justice.
	3.6 Areas/strategies for improvement are identified and implemented to continuously improve performance and outcomes.
4. Renegotiate performance and learning/ development plans	4.1 The results of performance management are documented in accordance with legislative and organisational requirements and used to identify strengths and performance gaps.
	4.2 Learning is captured to inform knowledge management strategies and transfer skills to other staff.
	4.3 Performance standards are renegotiated and agreed in accordance with organisational procedures.
	4.4 ***Learning and development*** objectives are identified and agreed to enhance performance and meet developing organisational and workgroup goals.
	4.5 Agreed performance standards and related professional development are documented in accordance with organisational policy and procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to performance management
- giving feedback on performance
- maintaining confidentiality
- communicating with a diverse workforce including listening, questioning, clarifying, negotiating and managing conflict
- responding to diversity, including gender and disability
- identifying future learning and development requirements
- applying time management
- recordkeeping

© Commonwealth of Australia, 2025 Industry Skills Australia

- applying procedures relating to occupational health and safety and environment in the context of performance management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to performance management such as:
  - equal employment opportunity
  - grievance procedures
  - disciplinary procedures
  - code of conduct
  - privacy legislation
  - freedom of information
- organisation's performance management system
- organisation's learning and development system
- impact of learning and development opportunities on performance
- remuneration systems
- equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of performance management

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV505A Promote diversity
  - PSPGOV507A Undertake negotiations
  - PSPGOV508A Manage conflict
  - PSPGOV511A Provide leadership
  - PSPGOV512A Use complex workplace communication strategies

© Commonwealth of Australia, 2025 Industry Skills Australia

- PSPGOV516A Develop and use emotional intelligence
- PSPGOV518A Benchmark performance
- PSPLEGN501B Promote compliance with legislation in the public sector
- PSPOHS501A Monitor and maintain workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- performance management in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to performance management
- performance management processes
- access to previous performance assessments
- case studies and workplace scenarios to capture the range of situations likely to be encountered when managing performance

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing performance, including coping with difficulties, irregularities and breakdowns in routine
- performance management in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include a combination of 2 or more of:

- demonstration
- observation
- portfolios

© Commonwealth of Australia, 2025 Industry Skills Australia

	• questioning • scenarios • simulation or role plays • authenticated evidence from the workplace and/or training courses
For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Workgroup may include:	• an existing team • group formed for a special purpose or project • business unit
Organisational directions may relate to:	• strategic plan • business plan • operational plan • sector-wide requirements • organisational capability framework • succession planning
Performance standards may include:	• selection criteria • best practice standards • quality standards • organisational practice standards • competencies • service level standards • standards in codes of ethics/conduct/confidentiality • standards in legislation/regulations/policy/guidelines • agreed goals and outcomes at workgroup (business) and organisation (strategic) level
Appraisal processes may include:	• 360° feedback • performance data • supervisor/employee feedback • peers

© Commonwealth of Australia, 2025 Industry Skills Australia

	• client/customer feedback • assessor feedback • evaluation of job position statement against current job role • validation feedback • feedback from subject matter experts • results of training needs analyses for workgroup/individual • previous performance and development plans with agreed goals

Legislation**, **policy and procedures may include:	• State/Territory and Commonwealth legislation and regulations such as:
	  • public sector management acts
	  • privacy legislation
	  • freedom of information
	  • equal employment opportunity, anti-discrimination and harassment legislation
	  • employment legislation
	  • occupational health and safety legislation.
	• ethics and accountability standards
	• public sector standards
	• organisational policy, procedures and protocols
	• international legislation/codes of behaviour
	• enterprise bargaining agreements
	• award conditions/requirements
	• strategic and business plans

Learning and development opportunities may include:	• formal course participation • on-the-job training • work experience • staff exchanges • mentoring • coaching • external study • conference and seminar attendance • induction • job rotation • higher duties • work shadowing opportunities

PSPGOV524A Interpret data and related statistics

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the interpretation of data and related statistics. It includes interpreting graphs or tables, interpreting data and its summarised highlights, interpreting a range of official statistics in a policy environment, presenting statistical results and guiding others in the interpretation of data.

In practice, interpreting data and related statistics may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, working safely, conducting research and analysis, etc.

This is one of 5 units of competency in the *Working in Government* Competency Field that deal with statistics. Related units are:

- PSPGOV520A Scope statistical data collection
- PSPGOV521A Collect statistical data
- PSPGOV522A Process statistical data
- PSPGOV523A Interrogate and analyse statistical data

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

© Commonwealth of Australia, 2025 Industry Skills Australia

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret a graph or table	1.1 Reports based on the data are written which identify relevant relationships within the data. 1.2 Row and column percentages are calculated from a table. 1.3 A table/graph is interpreted in accordance with data reflected.
2. Interpret data and its summarised highlights	2.1 Data summaries and trends are defined and explained in a manner suited to the audience. 2.2 Survey data is interpreted according to ***accepted standards***. 2.3 Data is interpreted and its highlights are summarised. 2.4 Interpretation is verified with a suitably qualified person.
3. Interpret a range of official statistics in a policy environment	3.1 Data summaries and trends are identified and explained. 3.2 ***Statistical tests*** are interpreted and this interpretation explained. 3.3 The sampling method/survey design is critiqued. 3.4 Interpretation of the data is undertaken in such a way as to inform decision making. 3.5 Interpretation is verified with a suitably qualified person. 3.6 The shortcomings of statistical applications in the policy environment are identified.
4. Present statistical results	4.1 Data is ***presented*** in tables, charts and maps so that the reader does not misconstrue it. 4.2 Glossaries, technical notes and referencing are included where required.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	4.3 Reports that include ***statistical concepts***, tables, charts and maps are prepared and presented in accordance with organisational policy and procedures.
	4.4 ***Findings are presented*** in a way that is most appropriate for the audience.
	4.5 Charts are used appropriately in presentations for the variables being charted and conform to ***accepted standards***.
5. Guide others in the interpretation of data	5.1 Data summaries and trends are clearly defined and communicated to staff involved in the project.
	5.2 Report findings are presented in a way that is most appropriate for the audience.
	5.3 The assumptions on which the interpretation is based are communicated in accordance with audience needs.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to statistical work
- explaining the results of an analysis in writing
- constructing graphs, tables and maps using software
- using presentation software
- communicating with diverse audiences including explaining, interpreting, presenting results
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of statistical interpretation

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to statistical work
- summary statistics
- statistical tests and related assumptions
- different methodologies and related assumptions
- the quality of a statistic
- sources of error including standard error

© Commonwealth of Australia, 2025 Industry Skills Australia

- data collection methodologies
- sources of expertise within the organisation
- 'how numbers relate' or the associations between statistics
- the ethical issues associated with presenting statistical results
- intellectual property issues and how they might relate to the data
- confidentiality issues relating to the data
- relevant style manuals
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of statistical work

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV503B Coordinate resource allocation and usage
  - PSPGOV504B Undertake research and analysis
  - PSPGOV520A Scope statistical data collection
  - PSPGOV521A Collect statistical data
  - PSPGOV522A Process statistical data
  - PSPGOV523A Interrogate and analyse statistical data
  - PSPLEGN501B Promote compliance with legislation in the public sector

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- interpretation of data and related statistics in a range of (3 or more) contexts (or occasions, over time)

© Commonwealth of Australia, 2025 Industry Skills Australia

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to interpretation of statistics
- tools/equipment for interpreting and explaining statistics
- case studies and workplace scenarios to capture the range of situations likely to be encountered when undertaking statistical interpretation

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when interpreting data and related statistics, including coping with difficulties, irregularities and breakdowns in routine
- interpretation of data and related statistics in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and/or apply the competency in different situations or environments

© Commonwealth of Australia, 2025 Industry Skills Australia

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.	
Accepted standards for survey data may include:	• showing awareness of data accuracy and reliability • identifying other related issues, such as sample size
Statistical tests include:	• equivalence of means and proportions • tests of association and prediction
Data ***presentation*** may include:	• the use of footnotes, caveats and references
Statistical concepts include:	• the results of statistical tests • trends over time • statistical associations • variability • sampling error
Presentation of findings may include:	• a mix of text, tables, charts, maps etc
Accepted standards for charts may include:	• appropriately labelled • appropriate scale selection • clear formatting

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Identify features of required strategic networks**	1.1 The strategic value and likely outcomes of participating in ***networks*** are identified at an individual and organisational level. 1.2 The benefits of existing networks are researched and assessed. 1.3 ***Key stakeholders*** and their needs, expectations and roles are identified.
2. **Identify or establish network links with key stakeholders**	2.1 Existing network links between key stakeholders are identified, and strategies to maintain or expand them are identified and initiated. 2.2 New network links between self and key internal and external stakeholders are established and used effectively. 2.3 Strong working relationships are developed and maintained among network members.
3. **Build strategic relationships**	3.1 Effective communication channels are established to exchange strategic information for the mutual benefit of network members. 3.2 Interaction and consultation with key stakeholders are used to anticipate developments that may impact on the organisation and require a strategic approach to dealing with them. 3.3 Misunderstandings and conflict situations are identified and constructively addressed in accordance with principles of conflict resolution. 3.4 Opportunities are sought and acted upon to improve communication processes and achieve mutually beneficial outcomes.

© Commonwealth of Australia, 2025 Industry Skills Australia

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to public sector environment
- using a range of communication methods with diverse strategic networks including consultation, liaison, negotiation, building influence and reputation, transparency
- using formal and informal industry communication channels
- responding to diversity, including gender and disability
- resolving conflict in a strategic networking context
- applying procedures relating to occupational health and safety and environment in the context of strategic networking

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to work in a public sector environment
- local/national/international public sector structures/protocols
- industry/professional communication channels and networks
- principles of interpersonal, group and inter-agency communication
- principles of conflict resolution in a strategic context
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of strategic networking

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

© Commonwealth of Australia, 2025 Industry Skills Australia

- PSPETHC601B Maintain and enhance confidence in public service
- PSPGOV601B Apply government systems
- PSPGOV605A Persuade and influence opinion
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPMNGT604B Manage change
- PSPMNGT605B Manage diversity
- PSPMNGT609B Formulate business strategies
- PSPMNGT613A Develop partnering arrangements

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- strategic networks established/maintained in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to the public sector environment
- organisational charts
- case studies and workplace scenarios to capture the range of situations likely to be encountered when establishing and maintaining strategic networks

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when establishing and maintaining strategic networks, including coping with difficulties, irregularities and breakdowns in routine
- strategic networks established/maintained in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

© Commonwealth of Australia, 2025 Industry Skills Australia

	Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of: • case studies • portfolios • projects • questioning • scenarios • authenticated evidence from the workplace and/or training courses
For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Networks may include:	• formal or informal networks • circulation lists • e-networks • bulletin boards • virtual communities • mailing lists
Key stakeholders may include:	• officers from other government organisations • Ministerial advisers • community members • council members • industry representatives • professional associations • international public sector staff • international associations

Unit Descriptor

This unit covers high-level workplace communication for working at a senior level with internal and external clients, colleagues and other staff. It includes preparing for high-level communication, critically analysing and responding to opinions, persuading and influencing others, and reflecting on and honing communication strategies.

In practice, persuading and influencing others may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government systems, managing change, managing diversity, etc.

This is one of 5 units of competency in the *Working in Government* Competency Field that deal with communication. Related units are:

- PSPGOV202B Use routine workplace communication techniques
- PSPGOV312A Use workplace communication strategies
- PSPGOV412A Use advanced workplace communication strategies
- PSPGOV512A Use complex workplace communication skills
-

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for high-level communication	1.1 ***Communication objectives*** are clarified, ***those to be present*** are confirmed and communication ***mode*** is identified. 1.2 Analysis is undertaken to anticipate the likely attitudes of and positions to be taken by those present on the matters under discussion. 1.3 ***Communication styles*** of those to be present are considered and their effect on the tone and likely direction/progress of the discussion is assessed. 1.4 Critical self-evaluation of communication strengths and vulnerabilities is undertaken and compared with other participant/s knowledge, styles and likely approaches in planned encounters. 1.5 Subject matter is researched/***organised***, key messages to be conveyed are distilled and tactics planned to utilise personal strengths and maximise outcomes for the organisation in accordance with ***legislation, policy and guidelines***.
2. Critically analyse and respond to opinions	2.1 Others are listened to critically and responsively to evaluate complex levels of meaning in spoken communication and to identify impartiality, bias or unsupported argument. 2.2 Tone, style, non-verbal elements and points of view of speakers are noted and their use in influencing and affecting particular

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	outcomes is considered.
	2.3 ***Reaction to speakers*** and their point of view is analysed to identify and manage emotional triggers and maintain objectivity.
	2.4 Opposing/challenging views are welcomed and examined for their value in achieving the same ends.
	2.5 Communication is examined for subtext, significant inclusions and exclusions, socio-cultural values, attitudes and assumptions.
	2.6 Complex concepts and ideas are explored to clarify understanding, and to challenge and justify interpretations based on underlying assumptions, beliefs and values.
3. Persuade and influence others	3.1 ***Communication approach*** is chosen and used to maximise effect with the given audience.
	3.2 Sustained points of view are asserted with determination and conviction.
	3.3 Content and approach are modified when speaking to an unresponsive audience, and diversions and unexpected questions handled confidently.
	3.4 A variety of ***verbal and non-verbal behaviour*** is used to explain abstract ideas and expand on complex issues to maintain listener interest.
	3.5 Complex questions and arguments are responded to quickly and saliently, backed by reasoned explanation.
	3.6 Disagreements or conflicting personalities are handled objectively and agreements are negotiated where possible, concluding with positive summaries of achievement.
4. Reflect on and hone communication strategies	4.1 Feedback from others is obtained, outcomes are assessed and underlying interactions and motivations analysed.
	4.2 Own vulnerability to emotional and other seductive appeals is analysed dispassionately.
	4.3 Lessons learnt are articulated and used to underpin future interactions.
	4.4 ***Sophisticated language structures and features*** that influence audiences to a preferred point of view are developed and practised.
	4.5 Creative and innovative communication strategies are explored and practised for a range of workplace applications in accordance with organisational requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to communication in the public sector
- analysing and using language structures and features that influence the interpretation of spoken communication
- interacting responsively, critically and confidently with both familiar and unfamiliar groups on specialised topics in formal and informal workplace situations
- speaking with confidence and listening evaluatively and critically
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of high-level communication

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to communication in the public sector
- the power and effect of spoken language
- stylistic devices and their ethical use for calculated effect
- the ways in which socio-cultural factors, language features and structures, and non-verbal elements combine to influence the interpretation of spoken communication
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of high-level communication

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*

- PSPMNGT604B Manage change
- PSPMNGT605B Manage diversity
- PSPMNGT606B Manage quality client service
- PSPMNGT613A Develop partnering arrangements
- PSPMNGT614A Facilitate knowledge management
- PSPOHS602A Manage workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- opinion influenced in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to public sector communication
- current theory and practice on influencing skills for the public sector
- case studies and workplace scenarios to capture the range of situations likely to be encountered when persuading and influencing opinion

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when persuading and influencing opinion, including coping with difficulties, irregularities and breakdowns in routine
- opinion influenced in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people

	• women • young people • older people • people in rural and remote locations. Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of: • case studies • demonstration • observation • portfolios • questioning • scenarios • simulation or role plays • authenticated evidence from the workplace and/or training courses
For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.	
Communication objectives may include:	• share information • brief Minister • reach consensus • shape opinion • influence policy • represent the organisation's position • represent the business unit's interests in internal negotiations • resolve differences • negotiate a joint position/compromise • build reputation (of self and organisation) • market services
Those to be present may	• peers

© Commonwealth of Australia, 2025 Industry Skills Australia

include:	• colleagues • those senior or junior to the position • staff from other agencies • senior executives/chief executive • ministerial liaison personnel • Minister • Minister's chief of staff
Mode of communication may include:	• telephone • teleconference • video conference • Internet (online forums) • face-to-face • one-on-one, or in a group • forum, seminar or conference
Communication styles may include:	• inter-cultural, equity or diversity considerations • consultative • collaborative • competitive • confrontational • soft • passive • assertive • aggressive • reasonable • bombastic • humorous
Organisation of subject matter may include:	• identifying features, advantages and benefits and aligning evidence/examples • anticipating likely disagreements and structuring material to address these

Legislation, ***policy and guidelines*** may include:	• State/Territory and Commonwealth legislation, regulations, policies, guidelines and standards relating to exchange of information in the public sector, such as:
	  • ethics and accountability guidelines/codes of practice
	  • information security standards
	  • principles of equal employment opportunity, equity and diversity
	  • freedom of information and privacy acts
	  • intellectual property guidelines and policy
	  • fraud standards
	  • professional liability requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

Reaction to speakers may include:	• own reaction • others present
Communication approach may include:	• catering to political sensitivities • working within government processes and operational frameworks • balancing intellectual debate and action • considering wider organisational/public sector issues • using language calculated to appeal emotionally to a particular audience, such as humorous, serious, cajoling, authoritarian • speaking with confidence and authority • covering cultural, ethnic, diversity or equity considerations • selecting a communication style appropriate to the occasion/audience such as consultative, collaborative, assertive, reasonable etc
Verbal and non-verbal behaviour may include:	• inclusive language, ideas and information • congruent speech and body language • speaking with confidence • impartiality • responsiveness • drawing on different sources of information
Sophisticated language structures and features may include:	• use of metaphors and similes • use of analogy, imagery and other comparisons • stylistic devices such as using pronounced downward inflection to convey 'the final word', or upward inflection to invite opinion/agreement • use of passive voice • using personal names repeatedly to convey intimacy or sincerity • using 'we' rather than 'I' to infer corporate rather than personal position • tone, style and point of view • rhetorical devices • irony

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for high-level written communication	1.1 ***Communication objectives*** are clarified, stakeholders are identified and political or other sensitivities are determined. 1.2 Research is undertaken to anticipate the likely attitudes of and positions of ***stakeholders*** on the matter/s under consideration. 1.3 Subject matter is researched/***organised***, key messages to be conveyed are distilled and tactics are planned to utilise written materials to maximise outcomes for the organisation in accordance with ***legislation, policy and guidelines***.
2. Critically analyse other positions	2.1 Other positions are considered critically to evaluate complex levels of meaning in written communication and to identify impartiality, bias or unsupported argument. 2.2 Written materials are examined for subtext, significant inclusions and exclusions, socio-cultural values, attitudes and assumptions. 2.3 Complex concepts and ideas are explored to clarify understanding, and justify, or challenge interpretations based on underlying assumptions, beliefs and values. 2.4 Evidence is compared and contrasted and sources referred to are evaluated for reliability and authenticity. 2.5 Evidence is used to test other positions and draw conclusions about their validity and strengths.
3. Prepare persuasive written communication	3.1 ***Communication approach*** is chosen and used to positively influence and remove barriers to understanding for the given audience.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.2 Risk assessment is undertaken and risk management is implemented in relation to document preparation and content.
	3.3 Input information/documents provided by others are analysed for fit with the chosen approach and to ensure consistency of values, attitudes and opinions.
	3.4 Information is synthesised and ***complex documents*** are prepared in accordance with ***organisational requirements***, legislation, policy and procedures.
	3.5 Feedback from others is obtained on the documents' effectiveness for the purpose intended, outcomes are assessed and lessons learnt are articulated and used to underpin future writing.
	3.6 Feedback is provided to contributors of information/documents to improve future input in a manner that provides learning opportunities for the contributors.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- reading and writing at a level to cope with a range of complex and sensitive workplace materials
- critically analysing and synthesising information to compose complex written documents
- researching other pertinent information, such as supporting/opposing position papers
- refining content, structure and sequence according to the required purpose of written material
- analysing and using language structures and features that influence the interpretation of written communication
- using spelling, punctuation and grammar for workplace documents at an experienced level
- providing feedback on other people's work in ways suited to the diversity of the workplace, including creation of learning opportunities to improve research/document input
- cross-cultural communication requirements
- implementing ergonomic requirements for office work
- complying with environmental policies such as those relating to paper use/wastage/recycling

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

© Commonwealth of Australia, 2025 Industry Skills Australia

- legislation, regulations, policies, procedures and guidelines relating to written communication in the public sector such as privacy, freedom of information, information security, confidentiality, copyright, intellectual property
- critical analysis of complex information in a government context
- politically and culturally sensitive documents
- organisational requirements for complex written documents
- government style manual requirements
- persuasive written language devices and their ethical use for calculated effect
- the ways in which socio-cultural factors, language features and structures combine to influence the interpretation of written information
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of preparing complex/sensitive written materials

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Conduct workforce analysis	1.1 In-depth analysis is conducted of current workforce practices, numbers, deployment, ***diversity*** and competencies to provide a baseline for workforce planning and management.
	1.2 ***Workforce data*** is analysed and when required benchmarked against comparable ***data***, trends are identified and interventions are suggested to address developments that do not support the organisation's strategic or business directions.
	1.3 Labour market and industry analysis is undertaken to identify factors and trends that may impact on the organisation and the implications of these for workforce planning and management.
	1.4 ***Scenario planning*** or other forecasting tools are used to predict and assess likely futures for the organisation with their associated implications and risks.
	1.5 The ***results*** of workforce analysis are presented in objective and unbiased terms and reported in a form and language to suit the intended audience of the presentation.
	1.6 The results of workforce analysis are contributed to corporate decision making about projected future workforce requirements.
2. Contribute to workforce planning	2.1 Information and advice is provided to ***managers*** on all ***aspects of workforce planning*** according to their requirements for business planning/outcomes.
	2.2 Workforce planning tools are developed/provided to managers, and assistance is given in their use and the analysis of outcomes.
	2.3 Solutions are developed and suggested for current and future workforce planning and management ***issues*** in accordance with organisational requirements.
	2.4 Consultancy services are provided to develop the human resource aspects of organisational and business unit plans to

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	ensure the right numbers of appropriately diverse and skilled staff are available for future needs.
	2.5 Managers are assisted to question current work practices and structures and to prepare workforce plans to translate future business requirements into actionable human resource strategies.
3. Assist with succession management	3.1 The critical role of ***succession planning*** in managing the organisation's intellectual capital is communicated to managers and staff in ways suited to their level of understanding or experience.
	3.2 A succession management ***strategy*** is developed and candidate pools are ***identified*** for imminent and longer term future vacancies in accordance with ***legislation, policy and procedures*** and business unit needs.
	3.3 ***Succession processes*** are developed and agreed and the succession management strategy is implemented to meet organisational requirements.
	3.4 The results of workforce analysis and planning are used to assist managers to undertake succession planning to identify requirements and manage transition when staff leave the organisation or business unit.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- analysing information and trends
- consulting, negotiating and advising on workforce planning and succession management
- leading and influencing in relation to workforce analysis and planning
- applying problem solving
- using a variety of words and language structures to explain ideas to different audiences
- interpreting and explaining data and assisting others to apply the outcomes in the workplace
- preparing written advice and reports requiring reasoning and precision of expression

© Commonwealth of Australia, 2025 Industry Skills Australia

- responding to diversity, including gender and disability
- applying occupational health and safety procedures and sustainability practices in the context of implementing workforce planning and succession strategies

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- data analysis
- forecasting and planning
- scenario planning
- strategic thinking and analysis
- organisational business planning cycle and processes
- organisational goals, policies and procedures related to workforce planning and analysis
- equal employment opportunity, equity and diversity principles
- standard and content requirements of workforce analysis and planning reports
- jurisdictional legislation applying to human resources, including freedom of information, privacy, confidentiality, occupational health and safety and environment and sustainability practices

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV502B Develop client services
  - PSPGOV505A Promote diversity
  - PSPGOV507A Undertake negotiations
  - PSPGOV511A Provide leadership
  - PSPGOV512A Use complex workplace communication strategies
  - PSPLEGN501B Promote compliance with legislation in

© Commonwealth of Australia, 2025 Industry Skills Australia

the public sector
- PSPPM501B Design complex projects
- PSPPM502B Manage complex projects

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- workforce planning and succession strategies implemented in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policies and procedures
- workplace scenarios and case studies
- forecasting models
- workforce data for analysis
- workforce planning guidelines and other relevant workplace materials

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when implementing workforce planning and succession strategies, including coping with difficulties, irregularities and breakdowns in routine
- workforce planning and succession strategies implemented in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

© Commonwealth of Australia, 2025 Industry Skills Australia

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Workforce diversity data may include:

- age
- gender
- diversity profile
- competency profile
- qualifications

Workforce data may include:

- absenteeism
- age profile of staff
- complaints
- conference leave
- costs associated with under-staffing
- current functions, services and workplace practices
- grievances
- hard to fill jobs
- learning and development
- leave - annual, sick, recreation, personal
- leave without pay
- number, gender and diversity of staff at each classification level and across business units
- permanent versus temporary versus contract workforce
- recruitment and retention

© Commonwealth of Australia, 2025 Industry Skills Australia

	• staff nearing retirement • staff retention rates • staff satisfaction/dissatisfaction • staff turnover • study leave • sustainability practices • use of employee assistance program • vacancies
Scenario planning is:	• a process for outlining the possible future as far as the organisation is concerned and developing a plan for dealing with that future. The uncertainty of both the forecasting process and the future itself may make it desirable to draw up a number of different scenarios. It is often advantageous to assign a degree of probability to a range of competing scenarios, for example, optimistic (best case scenario) or pessimistic (worst case scenario)
Results may include:	• matrix of required skills
Managers may include:	• line managers • business unit managers • senior executives
Aspects of workforce planning may include:	• downsizing • human resource forecasts • job redesign • labour market projections • organisational design • recruitment • retention strategies • skill set availability • succession planning • supply and demand forecasting • sustainability/environmental practice requirements • workforce capability requirements
Future workforce planning and management issues may include:	• future workforce requirements (size and skill set) • projected labour shortages • projected skill shortages • interventions to address projected shortages • over-supply • hard to recruit jobs • retention of skilled staff

© Commonwealth of Australia, 2025 Industry Skills Australia

	• diverse workforce composition • environmental and sustainability practices
Succession planning is:	• '... more than fingering a slate of replacements for certain positions. It is a deliberate and systematic effort to project leadership requirements, identify a pool of high potential candidates, develop leadership competencies in those candidates through intentional learning experiences, and then select leaders from among the pool of potential leaders' National Academy of Public Administration, Washington (1997)
Succession planning strategy may include:	• inclusion of future development opportunities in position descriptions to encourage future progression
Candidate pools may be identified through:	• leadership assessment activities
Legislation, policy and procedures may include:	• Commonwealth and State/Territory legislation including equal employment opportunity, anti-discrimination and privacy law • national and international codes of practice and standards • the organisation's policies and practices • government policy • environmental/sustainability policies • codes of ethics/conduct
Succession processes may include:	• expressions of interest • formal interview process • acceptance into a candidate pool • learning and development • shadowing • coaching • mentoring

Unit Descriptor

This unit covers management of organisational development in order to facilitate optimal performance by the business unit(s) or the organisation as a whole. It includes determining organisational development needs and opportunities, and planning and implementing intervention strategies.

In practice, managing organisational development overlaps with other generalist and specialist workplace activities such as managing change, managing diversity, managing policy implementation, facilitating workforce effectiveness.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine organisational development needs and opportunities	1.1 An ***environmental scan*** is undertaken to determine internal and external factors which will impact on organisational performance. 1.2 A consultation process is agreed with ***stakeholders*** in line with ***organisational policy and legislation***. 1.3 Ethical principles are applied in consulting with key stakeholders. 1.4 Information gathered through consultative processes is analysed and presented to a diverse stakeholder base and options are determined. 1.5 Recommendations are made to management on a proposed ***organisational development strategy***, resourcing implications, risk assessment and timeframes.
2. Plan intervention strategies	2.1 ***Intervention strategies*** that support the organisation's strategic goals and stakeholder responses are agreed. 2.2 The organisation's culture and legislative and policy framework are considered in developing the strategies. 2.3 Feedback is obtained from stakeholders and is used to redevelop/redefine the strategies prior to implementation. 2.4 Strategies are developed to embody the principles of natural justice, equity and fairness. 2.5 Information and advice are provided to facilitate effective implementation, monitoring and evaluation of intervention strategies.
3. Implement an intervention strategy	3.1 Resources are obtained and deployed to implement the strategy, and reports on progress are provided on a regular basis. 3.2 Facilitation and advice are provided to ***champion required changes*** using a range of ***communication*** strategies to suit a

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	diverse workforce and support implementation of the strategy.
	3.3 Systems are developed and used to monitor the effectiveness of the strategy and to determine necessary adjustments.
	3.4 Procedures are developed to allow the ***business unit*** self-sufficiency in continuing implementation.
	3.5 Legislative and policy requirements are complied with in implementing the strategy.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- engaging in effective consultation with stakeholders using a variety of words and language structures to explain complex ideas to different audiences
- undertaking project management and evaluation
- undertaking counselling and negotiation
- using effective leadership involving systems and people
- analysing and explaining complex, formal documents and assisting others to apply them in the workplace
- preparing written advice and reports requiring reasoning and precision of expression
- undertaking training, coaching, mentoring and facilitation
- applying public relations strategies
- responding to diversity, including gender and disability
- applying occupational health and safety, environmental and sustainability procedures relevant to organisational development and change management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- a range of evaluation methodologies related to organisational development
- change management strategies
- employee involvement strategies
- employment relations in the context of organisational development
- organisational learning
- equal employment opportunity, equity and diversity principles

© Commonwealth of Australia, 2025 Industry Skills Australia

- human resource policies and practices
- human resource strategy and planning
- industry trends
- jurisdictional legislation applying to organisational development including occupational health and safety and environmental and sustainability requirements
- needs analysis techniques in the context of organisational development
- organisational policies and procedures
- organisational development theory and practices including national and/or international good practice models and conceptions of organisation development
- organisational culture and dynamics
- organisational planning - vision, mission, values, goals
- the concept of diversity and its integration within and across all human resource functions and areas
- the relationships between human resource functions

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC601B Maintain and enhance confidence in public service
  - PSPGOV601B Apply government systems
  - PSPGOV604A Foster leadership and innovation
  - PSPGOV605A Persuade and influence opinion
  - PSPHR603B Provide advisory and mediation services
  - PSPHR615A Manage human resource development strategies
  - PSPLEGN601B Manage compliance with legislation in the public sector
  - PSPMNGT604B Manage change

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- organisational development managed in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, organisational policies and procedures
- workplace scenarios and case studies to capture the range of situations likely to be encountered when managing organisational development
- reference materials for organisational development

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing organisational development, including coping with difficulties, irregularities and breakdowns in routine
- organisational development managed in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies

- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Sources of information for environmental scan may include:

- statistical analyses
- interviews with stakeholders
- surveys
- focus groups interviews
- research on existing programs
- solicited and unsolicited feedback
- organisational reviews
- workforce management data
- work level standards

Stakeholders may include:

- all those individuals and groups both inside and outside the organisation that have some direct interest in the organisation's behaviour, actions, products and services including:
  - users of the human resource service
  - employees at all levels of the organisation
  - strategic planners
  - executive
  - decision makers
  - other public sector organisations
  - inter-agency forums
  - union and association representatives

Unit Descriptor

This unit covers management of resources in accordance with planned business strategies. It includes analysing resource requirements, developing resource plans, allocating resources, and reviewing and reporting on resource usage.

In practice, the management of resources occurs in the context of other generalist or specialist public sector work activities such as managing people, managing diversity, managing risk, developing a business case, formulating business strategies etc.

This unit is one of 6 units of competency in the *Working in Government* and *Management* Competency fields that deal with resources. Related units are:

- PSPGOV204B Access and use resources
- PSPGOV305B Access and use resources and financial systems
- PSPGOV403B Use resources to achieve work unit goals
- PSPGOV503B Coordinate resource allocation and usage

This unit replaces and is equivalent to *PSPMNGT602A Manage resources*.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Analyse resource requirements**	1.1 Resource bids are developed in line with outputs identified in business plans. 1.2 Key ***stakeholders*** are consulted in determining the nature and level of ***resources*** required. 1.3 Analysis of resource requirements is used to identify proposed costs and benefits. 1.4 Opportunities to share resources across ***business units*** within the organisation are identified.
2. **Develop resource plans to support achievement of business unit objectives**	2.1 Resource plans are developed that detail the acquisition and allocation of resources, and the relationship to ***business strategies***, contingencies, plans, programs and processes. 2.2 Internal resourcing capabilities and external resourcing requirements are identified. 2.3 Procedures for the evaluation of resource allocation are identified in resource plans. 2.4 Processes for managing changing government priorities are included in resource plans. 2.5 Approval for resource plans is obtained from senior management.
3. **Allocate resources to**	3.1 Resources are allocated in accordance with relevant ***legislation,***

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
achieve stated business objectives	***organisational policy and practices***. 3.2 Resource allocation is managed to enable achievement of business unit objectives. 3.3 Resources are negotiated and obtained within required timeframe to enable achievement of business unit objectives. 3.4 Systems are developed and implemented to enable timely and accurate monitoring and review of resource usage. 3.5 Efficient use of ***technology*** is incorporated into work practices.
4. Review and report on resource usage	4.1 Procedures to review resource allocation against business unit objectives are developed and implemented. 4.2 Compliance with program and project budgets is monitored and corrective action is recommended and actioned where necessary. 4.3 Reports are prepared that clearly indicate the level of performance achieved and any action taken to adjust or rectify procedures in meeting service and product delivery standards.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations, policies, procedures and guidelines relating to resource management in the public sector
- using effective consultation and negotiation with stakeholders
- writing reports requiring reasoning and precision of expression
- communicating using complex exchange of oral information
- responding to diversity, including gender and disability
- applying budgeting and financial management
- applying occupational health and safety and environmental strategies to resource management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- resource plans
- financial management and budgetary processes in the organisation
- business strategies

© Commonwealth of Australia, 2025 Industry Skills Australia

- risk management concepts
- organisational goals, policies and procedures
- equal employment opportunity, equity and diversity principles
- jurisdictional legislation and guidelines applicable to resource management, including occupational health and safety and environment

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC601B Maintain and enhance confidence in public service
  - PSPGOV601B Apply government systems
  - PSPGOV602B Establish and maintain strategic networks
  - PSPLEGN601B Manage compliance with legislation in the public sector
  - PSPMNGT610A Manage public sector financial resources
  - PSPPOL603A Manage policy implementation

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- management of resources in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- procedures and protocols
- jurisdictional legislation and guidelines applicable to

© Commonwealth of Australia, 2025 Industry Skills Australia

resource management
- workplace information such as resource allocations, resource plans
- workplace scenarios and case studies to capture the range of situations likely to be encountered when managing resources

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing resources, including coping with difficulties, irregularities and breakdowns in routine
- management of resources in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

PSPMNGT608B Manage risk

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers maximising results and minimising consequences for a business unit activity by managing risk. It includes establishing the risk management context, planning for risk management, managing risk and evaluating the risk management plan.

In practice, managing risk may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government systems, managing resources, managing change, managing diversity, formulating business strategies, etc.

The unit is one of 4 in the *Working in Government* and *Management* Competency fields dealing with risk. Related units are:

- PSPGOV417A Identify and treat risks
- PSPGOV517A Coordinate risk management
- PSPMNGT704A Undertake enterprise risk management

This unit replaces and is equivalent to *PSPMNGT608A Manage risk*.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Establish the risk management context**	1.1 The nature and extent of ***business unit*** activity, its objectives and outcomes are established within the ***organisational*** context. 1.2 The ***strategic and risk management*** context are identified in accordance with organisational requirements. 1.3 ***Stakeholders*** are identified and consulted to ensure their views, concerns and needs are taken into account in the ***risk management*** process. 1.4 ***Criteria*** for risk assessment are determined in accordance with ***legislation, policy and procedures***. 1.5 Risk management criteria are determined to provide guidance on balancing risk, costs, benefits and opportunities. 1.6 Risk management criteria are monitored, reviewed and adjusted to ensure opportunities and current and emerging trends are reflected.
2. **Plan for risk management**	2.1 ***Sources of risk*** are investigated and potential, perceived and actual ***risks*** are identified and consulted upon to ensure full coverage. 2.2 Risks are ***analysed*** and ***documented*** in consultation with stakeholders, and ***levels of risk*** are determined as the basis for risk management planning in a specific activity.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.3 Risk management ***methods/techniques/tools*** are selected and modified as necessary to evaluate risks to determine those that are ***acceptable*** and those that are ***unacceptable***.
	2.4 ***Risk treatment options*** are identified for unacceptable risks and preferred risk treatment approaches are determined.
	2.5 A ***risk management plan*** is developed and communicated to key stakeholders to ensure clarity and achievement of objectives throughout the activity's life cycle.
3. **Manage risk**	3.1 Activity is managed in accordance with agreed risk management plan.
	3.2 Performance is reviewed, variance is analysed and risk responses are initiated to achieve objectives with minimal disruption and conflict.
	3.3 Internal and external risks to outcomes are monitored and remedial actions are initiated to achieve business unit objectives.
4. **Evaluate the risk management plan**	4.1 A valid and reliable ***evaluation methodology*** is developed and implemented.
	4.2 Outcomes are reviewed and analysed to assess the effectiveness of current risk management strategies.
	4.3 Evaluation is used to monitor existing risks, identify new risks and identify any trouble spots.
	4.4 A variety of information, including the perspectives of key stakeholders, is obtained and utilised.
	4.5 Recommendations on enhancements to the plan are formulated and acted upon to inform subsequent risk management processes.
	4.6 The outcomes of evaluation are communicated to relevant personnel.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to risk management
- researching and analysing the wider context affecting the organisation
- assessing and evaluating risks

© Commonwealth of Australia, 2025 Industry Skills Australia

- monitoring and reviewing risks and risk treatments
- using communication and consultation with a diverse range of stakeholders
- applying problem solving using conceptual and reasoning skills
- using formal language and style for written plans
- engaging in discussion using exchange of complex oral information
- using a variety of words and language structures to explain complex, formal documents and assisting others to apply them in the workplace
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of risk management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to risk management
- Australian and New Zealand standards - Risk management AS/NZS 4360:1999 or as revised
- international standards such as SIRCA 8001:2003
- Guidelines for managing risk in the Australian and New Zealand public sector - HB 143:1999 or as revised
- risk management cycle
- the relationship of risk to context - how the context may define the risks
- the importance of consultation and communication at every stage of the risk management cycle
- legal requirements related to the activity
- whole-of-life considerations
- approval processes
- range of evaluation methodologies
- the diversity of risks in the public sector
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of risk management

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing risk, including coping with difficulties, irregularities and breakdowns in routine
- management of risk in a range of (2 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular target groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is

© Commonwealth of Australia, 2025 Industry Skills Australia

explained here.

Business unit may refer to:	• a program • sub-program • cost centre • area • division • branch • production unit or section located within the organisation
Organisational context may include:	• the organisation, how it is organised, and its capabilities • any official resources, including physical areas and assets, that are vital to the operation of the organisation • key operational elements and services of the organisation • any major projects
Strategic and risk management context may include:	• the relationship between the organisation and the environment in which it operates • the organisation's functions: • political • operational • financial • social • legal • commercial • the various stakeholders and clients
Stakeholders may include:	• employees • managers • volunteers • unions • financial managers • self-insurers • clients • suppliers • contractors • service providers • community organisations • the public
Risk management:	• is a logical and systematic process of identifying, analysing, evaluating, treating, and monitoring risks related to any strategy plan, process, program or procedure that will enable the organisation to minimise losses and maximise

© Commonwealth of Australia, 2025 Industry Skills Australia

opportunities
- may be considered in relation to an organisation's:
  - people
  - assets and physical environment
  - reputation and image
  - legal issues
  - business continuity
  - finances
- may include written procedures to ensure staff know:
  - what
  - how
  - when, and
  - by whom, action is to be taken to treat risks in the organisation

Risk evaluation criteria are:
- used to rank risks and decide whether they are acceptable or not
- affected by:
  - legal requirements
  - perceptions of internal/external stakeholders
- cost-benefit analysis, for example, cost of risk management being less than financial cost if the risk occurred

Legislation, policy and procedures may include:
- Commonwealth and State/Territory legislation relating to risk management
- national and international codes of practice and standards, such as SIRCA 8001:2003
- the organisation's risk management policies and practices
- codes of conduct/codes of ethics
- Australian and New Zealand standards - Risk management AS/NZS 4360:1999 or as revised
- Guidelines for managing risk in the Australian and New Zealand public sector - HB 143:1999 or as revised
- professional standards for risk management, for example CPRM - certified practising risk manager
- jurisdictional policies, guidelines and web sites, for example www.riskmanagement.qld.gov.au

Sources of risk may include:
- human behaviour
- technology/technical issues
- occupational health and safety
- legal
- political
- property/equipment

© Commonwealth of Australia, 2025 Industry Skills Australia

- environmental
- financial/market
- natural events

Risks may be:

- internal
- external
- random
- real
- perceived

Risks may include:

- physical injury or death
- failure of machinery or equipment
- breaches of security
- fraud
- litigation
- client dissatisfaction
- unfavourable publicity

Analysis of risks includes:

- likelihood of risks:
  - almost certain
  - likely
  - possible
  - unlikely
  - rare
- consequences of risks:
  - insignificant
  - minor
  - moderate
  - major
  - catastrophic
- current control measures

Documentation of analysis may include:

- table showing all risks, any existing controls, likelihood of occurring, consequences and subsequent level of risk

Level of risk may be:

- low, treated with routine procedures
- moderate, with specific responsibility allocated for the risk, and monitoring and response procedures implemented
- high, requiring action, as it has potential to be damaging to the organisation
- extreme, requiring immediate action, as the potential could be devastating to the organisation

Methods/techniques/ tools may include:

- computer modelling
- sensitivity analysis

© Commonwealth of Australia, 2025 Industry Skills Australia

- structured interviews
- statistical data
- questionnaires
- fault trees
- analysis of consequences - loss of money, time, labour, intangibles

Acceptable risks are:

- those which an organisation has determined have the least potential for harm
- not necessarily insignificant

Risks may be acceptable because:

- the risk level is so low that it does not warrant spending time and money to treat it
- the risk is low and the benefits outweigh the cost of treating it
- the opportunities presented are much greater than the threat

Unacceptable risks are:

- those which an organisation has determined have the most potential for harm

Options for treating risks may include:

- avoiding the risk, for example, by terminating the activity or conducting it in another way (these actions may have different risks attached)
- controlling the risk, by reducing the likelihood of the risk occurring, the consequences of the risk, or both
- transferring the risk, for example, by arranging insurance, contracting some or all of the activity to another organisation or person, etc
- retaining the risk, and making contingency plans/funds allocation for covering any loss or other negative effect from the risk

Risk management plan may include:

- sources of risk and risk events
- analysis of risks - likelihood, consequences and risk levels
- prioritised list of unacceptable risks
- treatment options selected
- person/s responsible for implementing treatment options
- resources required
- performance measures
- timeframe for implementation
- timetable for review of plan

Evaluation methodology may include:

- observations
- physical inspections
- incident reports
- questionnaires
- interviews with stakeholders

© Commonwealth of Australia, 2025 Industry Skills Australia

- regular reviews of risk treatment procedures
- repeat of the risk management process

PSPMNGT610A Manage public sector financial resources

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers input into public sector budgeting, financial forecasting and reporting requirements, and the allocation and management of resources to achieve the required outputs of the business unit. It includes contributing to financial bids and estimates, allocating funds, managing budgets and reporting on financial activity.

In practice, the management of public sector financial resources may occur in the context of other generalist or specialist public sector workplace activities such as managing compliance with legislation, maintaining and enhancing ethical practice, managing people, policy etc.

This unit is one of 6 units of competency in the *Working in Government* and *Management* Competency fields that deal with resources.

Related units are:

- PSPGOV204B Access and use resources
- PSPGOV305B Access and use resources and financial systems
- PSPGOV403B Use resources to achieve work unit goals
- PSPGOV503B Coordinate resource allocation and usage

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Contribute to financial bids and estimates	1.1 Organisational initiatives requiring the preparation of ***bids*** and ***estimates*** are identified in accordance with resource constraint s and organisational needs. 1.2 ***Information*** for bids/estimates is substantiated, contains logical assumptions and takes account of strategic plans, government policies and priorities. 1.3 Information for bids/estimates is prepared in accordance with government ***budgetary requirements*** including a timeframe to meet critical submission dates. 1.4 ***Documentation*** to support bids/estimates is prepared in accordance with budget guidelines.
2. Allocate funds	2.1 ***Budgets*** are approved and financial resources are allocated according to organisational priorities/business plan. 2.2 Allocations are made in accordance with organisational policy and procedures and take account of any statutory requirements or constraints. 2.3 Audit trails are maintained to ensure accurate tracking and to identify variances between agreed and actual allocations. 2.4 Financial allocation is monitored against organisational objectives and priorities and ***corrective action*** is taken as

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	required in accordance with organisational policy and procedures.
3. **Manage budgets**	3.1 Budget management is undertaken that meets the financial accountability requirements of the organisation.
	3.2 Expenses are monitored against budget and authorised in accordance with financial ***delegation*** and organisational ***financial controls***.
	3.3 ***Financial reports*** are obtained and provided in accordance with organisational requirements.
	3.4 Expenses are monitored through analysis of financial information/reports and problems are resolved or referred in accordance with organisational procedures and financial delegation.
	3.5 Expenditure is aligned with service delivery milestones/expectations.
	3.6 Changes to the budget are negotiated to account for potential under-spending, delays in service/program delivery, overruns and unneeded line items in accordance with organisational policy and procedures.
4. **Report on financial activities**	4.1 Requirements for financial management and reporting are identified in accordance with the public sector ***financial management framework.***
	4.2 Financial management and reporting are undertaken in accordance with organisational requirements and ***public sector financial management policy and procedures***.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- preparing information and reports requiring precision of expression
- meeting formatting and process requirements for bids and estimates and linkages to strategic plans
- monitoring financial information
- interpreting and signing off on financial reports
- interpreting organisational information in financial terms
- adjusting communication to suit different audiences

© Commonwealth of Australia, 2025 Industry Skills Australia

- using cross-cultural communication relating to financial management - across professional cultures such as accounting, IT, arts, policy areas
- responding to diversity, including gender and disability
- accessing information and legislation electronically or in hard copy
- applying environmental, sustainability and occupational health and safety procedures relating to working in the public sector

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- financial management principles
- legislation, policies and processes relating to public sector financial management, such as conflicts of interest, procurement, value for money
- the organisation's financial accountability mechanisms
- corporate governance requirements
- internal controls and why they are used
- delegations and why the public sector uses them
- public sector financial management framework (detailed knowledge) and the relationship between the elements of the framework
- documents that make up the financial management framework
- legislation related to working in the public sector such as equal employment opportunity, environmental, sustainability and occupational health and safety requirements

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC601B Maintain and enhance confidence in public service
  - PSPLEGN601B Manage compliance with legislation in the public sector
  - PSPMNGT603B Facilitate people management
  - PSPMNGT602B Manage resources

© Commonwealth of Australia, 2025 Industry Skills Australia

- PSPMNGT608B Manage risk
- PSPMNGT609B Formulate business strategies
- PSPPOL603A Manage policy implementation

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- management of public sector financial resources in a range of (2 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- public sector and organisational financial procedures and protocols
- workplace scenarios and case studies to capture the range of situations likely to be encountered when managing public sector financial resources
- financial legislation and guidelines such as central agency guidelines
- budget process and guidelines

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing public sector financial resources, including coping with difficulties, irregularities and breakdowns in routine
- management of public sector financial resources in a range of (2 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of

© Commonwealth of Australia, 2025 Industry Skills Australia

	this competency may include, but are not limited to, a combination of 2 or more of: • case studies • portfolios • projects • questioning • scenarios • authenticated evidence from the workplace and/or training courses
For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Bids may include:	• program discretionary bids • program, sub-program, section, business unit bids • portfolio managed bids
Estimates may include:	• budget estimates • additional estimates • forward estimates • long-term estimates • forecasts
Information may include:	• historical information • cost-benefit analysis • staff requirements • contractual information • efficiency/sustainability requirements
Budgetary requirements may include:	• zero-based budgeting • accrual budgeting • activity-based costing/management • output-based budgeting

© Commonwealth of Australia, 2025 Industry Skills Australia

	• top-down/bottom-up approach • base plus increment
Supporting documentation may include:	• phasing for liability and expenditure/cash flow implications • impact statements • reasons for major variations to financial guidance • staffing resources
Budgets may include:	• capital expenses • recurrent expenses • staffing costs • cash flow • forward estimates
Corrective action may include:	• re-prioritising activities • funds transfer • re-phasing liability/expenditure
Delegations are:	• functions or powers (under an act) assigned to others • limited to specified powers or amounts • made to persons in specified positions
Financial controls should:	• identify, record and measure revenue, expenses, assets, liabilities and equity • ensure assets are safeguarded and used to avoid waste, extravagance, loss and misuse • ensure liabilities are not incurred without proper authority • ensure correct valuation, cut-off, presentation and disclosure of financial balances and transactions • be linked to the organisation's risk management strategy
Financial reports may include:	• program, sub-program, section, business unit financial reports • accrual reports • monthly/quarterly financial reports including cost/unit, costs incurred compared with share of program delivered • annual reports
Elements of the public sector financial management framework may include:	• internal controls • segregation of duties • delegations • corporate governance requirements • service level agreements • internal and external reporting • risk management
Public sector financial	• financial management acts and regulations

PSPMNGT613A Develop partnering arrangements

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the exploration of opportunities for government organisations to develop partnering arrangements with the private sector and to proceed to formal agreement based on evaluation to ensure the public interest is fully protected. It includes exploring partnering opportunities, assessing feasibility, establishing partnering arrangements and fostering productive partnering relationships

In practice, development of partnering arrangements may overlap with other generalist or specialist public sector workplace activities such as applying government systems, establishing and maintaining strategic networks, planning procurement, managing risk etc.

This is one of two units dealing with partnering arrangements. The second unit is an imported unit, *CHCCD19A Establish and maintain community, government and business partnerships* from the Community Services Training Package which may be used in Diploma or Advanced Diploma qualifications.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Explore partnering opportunities**	1.1 Rigorous assessment is undertaken to establish the potential for private sector involvement in the delivery of public sector services or infrastructure.
	1.2 Need, affordability and priority for private sector ***partnering*** are determined to ensure the public interest is fully protected.
	1.3 The service/infrastructure requirement to be provided through a partnering arrangement is identified, benefits to the community are confirmed and ***potential partners*** are identified.
2. **Assess feasibility**	2.1 A full feasibility study is conducted that includes environmental analysis, social impact and cost-benefit analysis to confirm the merits of partnering options for financing, delivery and ***value for money.***
	2.2 A full assessment of risk is conducted, including the risks and costs the government would be prepared to retain.
	2.3 A detailed assessment of costs and potential revenue streams is undertaken and a comparison is undertaken with the costs associated with public sector provision.
	2.4 Community ***stakeholders*** are consulted to provide input in the feasibility and planning stages of any partnering arrangement.
3. **Establish partnering arrangements**	3.1 Detailed ***requirements*** are determined for the partnering arrangement in accordance with government policy and priorities.
	3.2 Procurement options are investigated, including a full public tender process, in accordance with legislative and organisational

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	requirements.
	3.3 Contracts are arranged that specify partnering duration, outputs, benefits and performance incentives, if any, in accordance with government policy and procedures.
	3.4 ***Risk*** is allocated to whichever party is best able to manage it and an accountability structure and approval process is developed.
	3.5 Government approvals are obtained and contractual arrangements are entered into in accordance with organisational policy and procedures.
4. Foster productive partnering relationships	4.1 Reasons/benefits for the partnering arrangement, roles, limitations and expectations are affirmed throughout the life of the relationship.
	4.2 Ongoing communication is used to confirm vision, agreed goals, outcomes, measures of performance, agreed accountabilities and the limits of the arrangement for both parties.
	4.3 Ethical standards and public sector accountabilities are maintained and, when necessary, explained to partners in a manner suited to their requirements.
	4.4 Strategies for solving problems and dealing with conflict are agreed and used in accordance with organisational policy and procedures to build trust/mutual respect for the benefit of both parties.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- establishing and fostering trusting, ongoing relationships with individuals and businesses
- using a range of communication styles to suit different audiences and purposes
- explaining complex and formal policies and concepts to a variety of audiences
- responding to diversity, including gender and disability
- applying workplace safety procedures to partnering activities
- accessing/preparing information electronically or in hard copy

© Commonwealth of Australia, 2025 Industry Skills Australia

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- probity
- public sector ethics and accountability
- public sector values and codes of conduct
- government/agency policies and procedures relating to public private partnering
- relationship contracting with the private sector
- relationship management in the context of partnering
- management of expectations in the context of partnering
- principles of cultural awareness and cross-cultural communication
- equal employment opportunity, equity and diversity principles
- workplace safety issues relating to public private partnering

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPGOV601B Apply government systems
  - PSPGOV602B Establish and maintain strategic networks
  - PSPPROC604A Plan for strategic procurement outcomes
  - PSPMNGT608B Manage risk

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- development of 1 significant long-term partnering arrangement or a number of (2 or more) smaller

arrangements

Resources required to carry out assessment

These resources include:

- workplace scenarios or case studies
- government partnering policy, principles and practices
- legislation related to public private partnering arrangements
- public sector values and codes of conduct
- relationship contracts
- government requirements for value for money, public benefit testing
- public sector comparator

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when developing partnering arrangements, including coping with difficulties, irregularities and breakdowns in routine
- development of 1 significant long-term partnering arrangement or a number of (2 or more) smaller arrangements

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of

assessment	ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Partnering with the private sector may include:	• harnessing private sector management skills, innovation and efficiencies • significant private sector involvement in provision of infrastructure or service need • qualitative risk transfer to the private sector • long-term output based contract arrangements • relationship contract • community input into specifications
Potential partners will consist of:	• an identifiable market of private sector bidders prepared to compete for the partnering opportunity
Value for money may be achieved where:	• the project size justifies the transaction and management costs • there is a defined measurable service delivery function or output mechanism • there is scope within the project delivery for the optimisation and the allocation of manageable risk to the private sector, delivering a cost-effective outcome • there is scope for sector private sector innovation, value adding and/or cost reductions in the delivery and operation of the service • there is real value in transferring responsibility for the operational and maintenance phase of the project to the private sector • there is an identifiable market of private sector bidders prepared to compete for the opportunity to deliver the project
Stakeholders may include:	• all those individuals and groups both inside and outside the organisation that have some direct interest in the organisation's behaviour, actions, products and services such as:

© Commonwealth of Australia, 2025 Industry Skills Australia

- employees at all levels of the organisation
- community
- clients
- other public sector organisations
- private sector
- non-government organisations
- union and association representatives
- boards of management
- government
- Ministers

Requirements for the partnering arrangement may include:

- statement of benefits
- specified outputs
- contract term
- risk assessment and management plan
- accountability structure
- performance incentives
- operational or management efficiencies
- optimally developed relationship contract
- best value for money
- responsible use of public and private resources
- probity
- transparency
- fair appeals process
- market sounding
- financing options

Risk management may include:

- acceptance of risks
- avoidance of risks
- minimisation of risks

PSPMNGT615A Influence workforce effectiveness

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the competency to ensure the effectiveness of the workforce, whether staff or contractors, in promoting the attainment of strategic objectives. It includes providing leadership to individuals and work teams, creating a cooperative work environment, capitalising on workplace emotions, motivating the workforce to achieve quality results, and delegating work to achieve strategic objectives, and managing up.

In practice influencing workforce effectiveness occurs in the context of other generalist or specialist work functions such as managing performance, managing diversity, managing change, managing client service.

This unit is one of a series of 4 units of competency relating to working with others, located in the Competency fields of *Working in Government* and *Management*. Related units are:

- PSPGOV302B Contribute to workgroup activities
- PSPGOV404B Develop and implement work unit plans
- PSPGOV511A Provide leadership

This unit replaces *PSPMNGT601A Facilitate workforce effectiveness*. The units are not equivalent as elements dealing with emotional intelligence and managing up have been added.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Provide leadership to individuals and work teams**	1.1 The vision and strategic goals of the organisation that impact on the work area are identified and promoted. 1.2 ***Workforce members*** are regularly consulted on business objectives, plans and operational issues to minimise role ambiguity and uncertainty. 1.3 Roles, functions, responsibilities and work goals are defined in accordance with organisational requirements, and are communicated and agreed. 1.4 Opportunities are provided for workforce members to clarify aspects of particular tasks, resolve issues and seek feedback or further direction. 1.5 Encouragement is provided to develop new and innovative practices, procedures, processes, technologies and strategies in line with corporate values, vision and goals. 1.6 ***Leadership*** is provided appropriate to changing priorities and situations and takes account of the specific needs of a diverse workforce.
2. **Create a cooperative work environment**	2.1 Cooperation in the work environment is actively facilitated through balanced and fair work allocation and recognition of all contributions.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.2 Teams and individuals are encouraged to find styles of working which are consistent both with team and individual competencies, preferences and ***business unit*** objectives.
	2.3 Conflict management strategies are used to facilitate a cooperative work environment.
	2.4 Cooperative and productive relationships with individuals and teams are established.
	2.5 Leadership style and guidance that take into account the differing needs and background of a diverse workforce are used.
3. **Monitor and respond to workplace emotions**	3.1 Emotional ***strengths*** and triggers are ***identified*** for self and ***others in the workplace***, and communication, client service or work allocations are tailored to take account of these.
	3.2 Self-reflection and feedback is used to identify the effect on others of own emotions, and emotional control is exerted to model positive workplace behaviour.
	3.3 Opportunities are provided for others to express their thoughts and feelings, and ***emotions*** are taken into account in decision making to maintain a positive emotional climate in the workplace.
	3.4 Assistance is provided to others to identify the effect of emotions in the workplace and to ***develop*** and use their own ***emotional intelligence*** to build productive relationships and maximise workplace outcomes.
4. **Motivate the workforce to achieve quality results**	4.1 Ways to motivate a diverse workforce are explored and matched to individual needs.
	4.2 Opportunities are identified for individuals to develop competencies required to meet work objectives.
	4.3 Individuals' career development requirements are recognised and balanced with team objectives.
	4.4 Feedback that is prompt, consistent and constructive and ongoing is provided on performance.
	4.5 Achievements are promoted and rewarded in a way which openly acknowledges the contribution of individuals and teams.
	4.6 ***Team building strategies*** are applied to strengthen individual and team commitment to organisational vision and work unit goals.
5. **Delegate work to achieve business unit strategic objectives**	5.1 Work is delegated in accordance with individual competencies or as development opportunities arise, and sufficient information is communicated, resources allocated and support provided to enable tasks to be completed successfully.
	5.2 Responsibilities are delegated while still accepting accountability for their success/failure.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	5.3 Mechanisms for monitoring progress in achieving work goals are established and implemented in accordance with organisational policy and practices.
	5.4 Areas for improvement are determined collaboratively and improved processes/strategies are implemented.
	5.5 Tasks are delegated effectively to facilitate the attainment of business unit objectives and the continuous improvement of business processes.
	5.6 Up-to-date and accessible record of delegations is maintained in accordance with organisational policy and procedures.
6. **Manage up**	6.1 People and influences outside the immediate work environment with the potential to affect work priorities, outcomes and resources are identified.
	6.2 Role relationships and responsibilities for managing up are analysed.
	6.3 Strategies are developed and implemented to ensure executives consider the operational consequences of policy changes.
	6.4 Strategies are used to engage support for public sector activities and ensure sufficient resources are provided to implement initiatives.
	6.5 Self-evaluation and feedback from ***others*** on own performance is used to continuously improve performance and outcomes.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- delegating work to others
- counselling and resolving conflict in teams
- using team building strategies
- using facilitation, negotiation and consultation requiring exchanges of complex oral information
- using consensual decision making skills
- keeping check of emotions when challenges arise, maintaining composure, perceiving the emotional motivators that drive individuals and groups in the workplace and engaging those motivators, where appropriate, to optimize organisational performance

© Commonwealth of Australia, 2025 Industry Skills Australia

- using a variety of words and language structures to explain complex ideas to different audiences
- interpreting and explaining complex, formal documents and assisting others to apply them in the workplace
- responding to diversity, including gender and disability
- applying occupational health and safety strategies relevant to managing and working with others in a public sector workplace

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- organisational goals, policies and procedures
- equal employment opportunity, equity and diversity principles
- the relationship between effective human resource functions and the attainment of business unit objectives
- human resource policies and practices
- emotional intelligence principles and strategies
- group processes and facilitation techniques
- team building strategies
- the organisation's career and human resource development strategies, programs and plans
- conflict resolution strategies
- jurisdictional legislation applicable to management and human resource management functions
- occupational health and safety issues relevant to managing and working with others in a public sector workplace
- environmental and sustainability issues relevant to managing and working in a public sector environment

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC601B Maintain and enhance confidence in

© Commonwealth of Australia, 2025 Industry Skills Australia

public service
- PSPGOV601B Apply government systems
- PSPGOV602B Establish and maintain strategic networks
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPPOL603A Manage policy implementation

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- workforce effectiveness influenced in a range of (3 or more) contexts (or occasions, over time) such as working with staff, clients and contractors

Resources required to carry out assessment

These resources include:

- procedures and protocols
- public sector policies and legislation such as those dealing with:
- human resource management and development
- workforce capability
- case studies and workplace scenarios to capture the range of situations likely to be encountered when influencing workforce effectiveness

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when facilitating workforce effectiveness, including coping with difficulties, irregularities and breakdowns in routine
- workforce effectiveness influenced in a range of (3 or more) contexts (or occasions, over time) such as working with staff, clients and contractors

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women

© Commonwealth of Australia, 2025 Industry Skills Australia

- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Workforce members may include:	• employees • consultants • external contractors • job rotation staff • trainees
Leadership refers to:	• the process of influencing others to engage in work behaviours that facilitate the attainment of the business unit's strategic objectives
Business unit may refer to:	• a program • sub-program • cost centre • area • division

© Commonwealth of Australia, 2025 Industry Skills Australia

- branch
- production unit or section located within the organisation

Emotional strengths may include ability to:

- monitor and control negative emotions
- recognise and respond to others' emotional states
- see beyond an immediate emotional reaction to the real cause, rather than responding to the emotions on face value

Identification of emotions may need to take account of:

- the varying cultural expressions of emotion

Others in the workplace may include:

- management
- staff
- clients
- contractors

Emotions may include:

- anger
- anxiety
- apprehension
- caring
- confidence
- depression
- elation
- enthusiasm
- excitement
- fear
- happiness
- inadequacy
- joy
- nervousness
- over-confidence
- pride
- stress
- under-confidence
- unhappiness

Development of emotional intelligence may occur through:

- mentoring
- shadowing
- coaching
- training
- simulation

© Commonwealth of Australia, 2025 Industry Skills Australia

Emotional intelligence is:	• widely recognised as the ability of an individual to monitor their own and others' emotions in a social or work environment, to discriminate among the emotions and to use the information to guide their thinking and actions • characterised by self-awareness (personal), self-management (personal), social awareness (social) and relationship management (social)
Team building strategies may include:	• defining and clarifying objectives/work area plans • strengthening communication processes • clarifying ground rules and behavioural expectations • fostering creativity • offering constructive feedback • providing facilitated meetings • recognising achievements
Others may include:	• superiors • reportees

PSPMNGT701B Provide strategic direction

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the provision of strategic direction within the organisation. It includes analysing factors in the operating environment, developing and coordinating a strategy for determining strategic priorities, and formulating and communicating strategic priorities.

In practice, providing strategic direction overlaps with other generalist or specialist public sector work activities such as providing ethical leadership, influencing strategic policy, managing diversity, leading human resources etc.

This unit replaces and is equivalent to *PSPMNGT701A Provide strategic direction*.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

© Commonwealth of Australia, 2025 Industry Skills Australia

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse factors in the operating environment	1.1 The organisation's purpose and direction within the overall government strategy, and its integration with other government service providers, are analysed with a view to determining key factors and issues for consideration and response. 1.2 The organisation's culture, values and strategic priorities are analysed with a view to determining key factors and issues for consideration and response. 1.3 Internal and external factors likely to impact upon the organisation are continually monitored and analysed. 1.4 ***Best practice models*** related to the nature of the organisation's core business are explored. 1.5 Client needs and preferences are identified and analysed. 1.6 ***Legislation and organisational policies and practices*** that may impact upon organisation's operations are identified and analysed.
2. Develop and coordinate a strategy for determining strategic priorities	2.1 Consultation with key ***stakeholders*** is conducted in a manner that maximises their commitment and contribution. 2.2 Constructive solutions are found where stakeholders are in conflict. 2.3 Analysis and evaluation of information gained from a variety of sources, including key stakeholders, is used to identify strategic options for prioritisation. 2.4 Benchmarking is undertaken with other organisations or best practice standards to inform development of ***strategic priorities***. 2.5 Priorities of other government service providers are considered to ensure duplication will be avoided and services integrated for the benefit of clients.
3. Formulate and	3.1 Strategic priorities are developed that support overall

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
communicate strategic priorities	government strategy. 3.2 Strategic priorities are developed that embody the organisation's values, beliefs and philosophy. 3.3 Strategic priorities are used to draw together and reflect the suggestions and interests of stakeholders. 3.4 Strategic priorities are developed that embody a shared vision for the future and set out challenging but realistic objectives that encourage staff to be creative and innovative in their approach to attaining objectives. 3.5 Strategic priorities are communicated to stakeholders using a variety of strategies and in such a way as to attract their support. 3.6 Implementation is monitored to ensure strategic priorities are addressed through related business unit and individual objectives.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- delegating work to others
- counselling and resolving conflict in teams
- using team building strategies
- using facilitation, negotiation and consultation requiring exchanges of complex oral information
- using consensual decision making skills
- keeping check of emotions when challenges arise, maintaining composure, perceiving the emotional motivators that drive individuals and groups in the workplace and engaging those motivators, where appropriate, to optimise organisational performance
- using a variety of words and language structures to explain complex ideas to different audiences
- interpreting and explaining complex, formal documents and assisting others to apply them in the workplace
- responding to diversity, including gender and disability
- applying occupational health and safety, environmental and sustainability strategies relevant to managing and working with others in a public sector workplace

© Commonwealth of Australia, 2025 Industry Skills Australia

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- organisational goals, policies and procedures
- equal employment opportunity, equity and diversity principles
- the relationship between effective human resource functions and the attainment of business unit objectives
- human resource policies and practices
- environmental and sustainability practices
- emotional intelligence principles and strategies
- group processes and facilitation techniques
- team building strategies
- the organisation's career and human resource development strategies, programs and plans
- conflict resolution strategies
- jurisdictional legislation applicable to management and human resource management functions
- occupational health and safety issues relevant to managing and working with others in a public sector workplace

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC701A Lead and influence ethical practice in the public sector
  - PSPHR703A Provide leadership in strategic human resource management
  - PSPMNGT702A Influence and shape diversity management
  - PSPMNGT703A Lead and influence change
  - PSPMNGT704A Undertake enterprise risk management

© Commonwealth of Australia, 2025 Industry Skills Australia

- PSPPOL701A Influence strategic policy

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- provision of strategic direction in a range of (2 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- strategic planning guidelines
- relevant legislation, procedures and protocols
- workplace information such as mission, vision, goals etc
- case studies and scenarios to capture the range of situations likely to be encountered when providing strategic direction

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when providing strategic direction, including coping with difficulties, irregularities and breakdowns in routine
- provision of strategic direction in a range of (2 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects

© Commonwealth of Australia, 2025 Industry Skills Australia

- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Best practice models may include:	• state, national and international models
Legislation, organisational policies and practices may include:	• Commonwealth and State/Territory legislation including equal employment opportunity and anti-discrimination law • national and international codes of practice and standards • environmental/sustainability standards • the organisation's policies and practices • government policy • codes of conduct
Stakeholders may include:	• all those individuals and groups both inside and outside the organisation that have some direct interest in the organisation's behaviour, actions, products and services, such as: • employees at all levels of the organisation • other public sector organisations • union and association representatives • boards of management • government • Ministers
Strategic priorities may be:	• objectives in key result areas identified through the organisation's strategic planning process that have the highest priority rating demanding immediate action

PSPPM401B Design simple projects

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the planning and development of simple, generally low risk projects that may be small scale and managed by one person or by a person with a small team. It includes identifying project requirements, preparing a business case, preparing the project plan and establishing project infrastructure. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

In practice, project planning and development overlaps with other generalist and specialist work activities such as applying government processes, using resources, developing work plans, gathering information.

This unit, and unit *PSPPM405A Administer simple projects*, are mutually exclusive. One or the other, but not both, may contribute to a qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Identify project requirements**	1.1 A rationale for the project is outlined that identifies the purpose, outcomes and likely benefits for the user/s. 1.2 ***Stakeholders*** are identified and their input is obtained at the planning stage to ensure the project proposal and its objectives are required and achievable. 1.3 The project environment is assessed and environmental issues are addressed in the project proposal. 1.4 ***Project parameters*** are determined and a project proposal is completed to organisational standards and within guidelines. 1.5 The project proposal is structured so it is compatible with organisational objectives and other organisational projects, and is designed in accordance with the organisation's ***policies and procedures*** and in consultation with ***specialists*** to meet user/client requirements.
2. **Prepare business case**	2.1 Research and analysis is undertaken to identify impacts and risks, ***constraining factors*** and alternate options. 2.2 Options and solutions are identified, advice is obtained and recommendations are made in accordance with the strategic direction of the organisation/work unit. 2.3 A ***report*** is prepared that demonstrates a business case for the project in accordance with organisational requirements. 2.4 ***Approvals*** for the project proposal are obtained in accordance with organisational policy and procedures.
3. **Prepare project plan**	3.1 ***Project scope*** is determined in terms of objectives, outcomes

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	and project deliverables.
	3.2 Specialists are consulted where necessary, to advise on potential risks, and ***options to manage risks*** are investigated and recorded in the ***project plan.***
	3.3 Each of the ***parameters*** identified in the proposal are addressed in the project plan in consultation with relevant parties and appropriate approvals are sought and recorded.
	3.4 ***Project management tools*** are utilised for planning in accordance with project requirements.
	3.5 Project outputs are determined that are measurable and achievable and indicators to monitor the performance of the project are developed, under guidance, and agreed by relevant parties in accordance with organisational policy and procedures.
4. Establish project infrastructure	4.1 An implementation strategy is developed in accordance with the project plan and organisational guidelines, and presented to stakeholders to gain project support.
	4.2 Terms of reference and ***project infrastructure*** requirements for set-up and implementation of the project are clarified in the implementation strategy in accordance with the project plan.
	4.3 Resources are obtained to set up the project office, and roles and responsibilities are assigned to team members and stakeholders as agreed in the project plan.
	4.4 Processes identified for monitoring, evaluating and reporting performance against project objectives are established in accordance with the project plan.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- detailing requirements, writing recommendations and preparing plans requiring precision of expression
- negotiating timelines, roles and responsibilities with stakeholders or team members
- communicating with stakeholders or team members using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability

© Commonwealth of Australia, 2025 Industry Skills Australia

- using project management tools
- applying workplace safety procedures in line with project planning requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on the project and management of the project, for example:
- public sector codes of ethics/conduct
- occupational health and safety and environment requirements
- quality standards
- risk management
- financial management
- procurement
- human resources
- equal employment opportunity, equity and diversity principles
- organisational project approval processes
- scheduling
- change management
- project planning methods for small scale or low risk projects
- project management tools to suit the projects planned
- principles relating to the planning phase of project management for small scale or low risk projects

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPGOV402B Deliver and monitor service to clients

© Commonwealth of Australia, 2025 Industry Skills Australia

- PSPGOV403B Use resources to achieve work unit goals
- PSPGOV405B Provide input to change processes
- PSPGOV408A Value diversity
- PSPGOV411A Deal with conflict
- PSPGOV412A Use advanced workplace communication strategies
- PSPGOV416A Monitor performance and provide feedback
- PSPGOV422A Apply government processes
- PSPLEGN401A Encourage compliance with legislation in the public sector
- PSPOHS401B Implement workplace safety procedures and programs
- PSPPROC409A Receive and select offers
- PSPPROC410A Administer contracts
- PSPPM402B Manage simple projects
- PSPPM403B Close simple projects

- *Excluded units* that may not contribute to the same qualification as this unit:
  - PSPPM405A Administer simple projects

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- design of simple projects in a range of (2 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project management
- workplace project documentation
- scenarios and case studies
- documented information and/or examples of the assessee's personal work
- project management tools

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions

© Commonwealth of Australia, 2025 Industry Skills Australia

likely to be encountered when planning projects, including coping with difficulties, irregularities and breakdowns in routine
- design of simple projects in a range of (2 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Stakeholders may

- project sponsor/funding bodies

© Commonwealth of Australia, 2025 Industry Skills Australia

include:

- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee
- end user
- supplier/service provider

Project parameters include:

- project scope - outcomes, objectives, project deliverables
- feasibility
- skills required for project team
- people required for project including specialist expertise
- communications including reporting requirements
- risks associated with project including people, environment, resources, technology change during the life of the project, if applicable
- steering committee arrangements
- timeframe and milestones
- cost
- resources for project
- acquisition/procurement
- organisational structure for project
- project quality control and operational flexibility
- project governance structure
- monitoring through staged rollout
- project delivery requirements
- pilot outcomes
- intellectual property
- integration of project within organisation
- transition arrangements
- change management
- project evaluation

Policies and procedures may include:

- government legislation (Federal, State and Local) affecting organisation's administration such as:
  - public sector management acts

© Commonwealth of Australia, 2025 Industry Skills Australia

- financial management and accounting legislation and regulations
- privacy legislation

- government and organisational guidelines and procedures relating to:
  - project governance
  - resourcing
  - security
  - strategic plans
  - recruitment
  - risk management
  - procurement guidelines
  - designation approvals
  - industrial agreements

Specialists may include:

- legal
- technical
- financial
- other functional areas
- other relevant agencies
- logistics

Constraining factors may include:

- political
- industrial
- legislative
- technical
- financial
- resourcing
- social and cultural considerations
- cultural change management (internal)
- security/privacy
- environmental
- logistic support

Analysis report will contain:

- cost-benefit analysis

Approval may be required from:

- project sponsor/funding body
- business owner of the project
- program manager
- line manager
- project governance office/personnel in the organisation
- chief executive officer, manager or management

© Commonwealth of Australia, 2025 Industry Skills Australia

	representative • customer or client
Project scope is defined by:	• objectives - aims/goals for doing the project • outcomes - measurable benefit achieved from the utilisation of the outputs delivered by the project • outputs/project deliverables - the services/products delivered by the project
Options to manage risks may include:	• acceptance • avoidance • minimisation • transfer • strategies • flexibility • empathy • emotional intelligence
Project plan will include some or all of:	• acquisition strategies • budget and financial management strategy • contract management • cost estimates • evaluation criteria • expected outcomes/measurable benefits of the project • facilities • inclusions and exclusions from project • information/communication strategy • intellectual property strategies • milestones • objectives • outputs/project deliverables and their acceptance criteria • people plan including human resource management and human resource development • performance criteria/indicators • project control mechanisms • project implementation strategy • project governance strategy • purpose • quality assurance • quality control • quality standards for project • rationale

- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)

Project parameters include:

- risk management
- schedule management
- financial management
- communication, including reporting
- resources management
- logistics management
- scope management
- change management
- quality management
- people management
- occupational health and safety management

Project management tools may include:

- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
  - Gantt and bar charts
  - Program Evaluation and Review Technique (PERT) charts
  - Critical Path Method
- cost schedule control system
- logistics support analysis
- life cycle cost analysis
- spreadsheets
- recording systems - electronic and manual

Project infrastructure may include:

- staffing levels/need for recruitment action and training
- equipment and technical support
- resource requirements including travel, finance etc
- project office accommodation
- management infrastructure

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Implement start-up activities**	1.1 The ***project plan*** is updated with confirmed information for key dates and activities, resources and project governance details in accordance with the project implementation strategy. 1.2 Project ***stakeholders'*** understanding of and agreement to fulfil the project requirements and their roles and responsibilities are confirmed. 1.3 ***Required systems*** are established and maintained throughout the project in accordance with the project plan. 1.4 A working knowledge of ***project management tools*** is used to facilitate integration of project activities and achievement of project outcomes.
2. **Coordinate project implementation**	2.1 ***Integration*** and ***management*** of project activities are handled in accordance with the project plan. 2.2 Stakeholder input and expectations are managed and their commitment is maintained throughout the life of the project in accordance with organisational policy and procedures and the project plan. 2.3 Disagreements and disputes are resolved or referred to a higher authority in accordance with organisational policy and procedures. 2.4 Project ***change proposals*** are received and changes are recommended/made in accordance with the project plan, and documented in accordance with ***policy and procedures***.
3. **Monitor project**	3.1 All aspects of the project are continually monitored and

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	corrective action is taken as necessary to maintain progress in accordance with the project plan.
	3.2 Consultation and reporting mechanisms are applied in accordance with the communication plan when dealing with management, staff and/or contractors, steering committee members or other stakeholders.
	3.3 Project governance plans and any related contracts are monitored, reviewed and amended as appropriate, and results are reported in accordance with the communication plan.
	3.4 Project progress is monitored against agreed milestones in accordance with the project plan to provide a measure of performance throughout the life of the contract.
	3.5 Programmed review of objectives and achievement is implemented in accordance with the project plan.
4. Arrange project follow-up activities	4.1 Project deliverables are analysed against ***specifications***, performance standards and project objectives, under broad guidance, and the results are reported to stakeholders.
	4.2 An initial support package or product manual is produced, if required, to provide guidance for stakeholders who will be required to apply the project results.
	4.3 The support package includes options for stakeholders to take account of environmental and cultural factors in applying project results.
	4.4 Operational and support authorities are consulted to research any testing/trialling/building requirements resulting from the project, and evaluation of any recommendations are included in the project report.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- leading and mentoring people to achieve project deliverables
- maintaining agreement of stakeholders and team members to timelines, roles and responsibilities
- communicating with stakeholders and team members using a range of communication styles to suit different audiences and purposes

© Commonwealth of Australia, 2025 Industry Skills Australia

- responding to diversity, including gender and disability
- using project management tools applicable to small scale or low risk projects
- applying ethical decision making and problem solving related to project management of small scale or low risk projects
- writing recommendations and preparing implementation support packages requiring precision of expression
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on project management, for example:
  - public sector codes of ethics/conduct
  - occupational health and safety and environment requirements
  - project governance requirements
  - quality standards
- risk management
- procurement guidelines
- human resources
- equal employment opportunity, equity and diversity principles
- project management tools to suit a range of small scale or low risk projects
- project management principles
- organisational and political context

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPGOV402B Deliver and monitor service to clients

© Commonwealth of Australia, 2025 Industry Skills Australia

- PSPGOV403B Use resources to achieve work unit goals
- PSPGOV411A Deal with conflict
- PSPGOV412A Use advanced workplace communication strategies
- PSPGOV422A Apply government processes
- PSPLEGN401A Encourage compliance with legislation in the public sector
- PSPPROC410A Administer contracts
- PSPPM401B Design simple projects
- PSPPM403B Close simple projects

- *Excluded units* that may not contribute to the same qualification as this unit:
  - PSPPM405A Administer simple projects

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- simple projects managed in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project management
- workplace project documentation
- scenarios and case studies
- examples of project management tools

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when implementing projects, including coping with difficulties, irregularities and breakdowns in routine
- simple projects managed in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse

© Commonwealth of Australia, 2025 Industry Skills Australia

backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Project plan will include some or all of:

- acquisition strategies
- budget and financial management strategy
- contract management
- cost estimates
- evaluation criteria
- expected outcomes/measurable benefits of the project
- facilities
- inclusions and exclusions from project
- information/communication strategy
- intellectual property strategies
- milestones

© Commonwealth of Australia, 2025 Industry Skills Australia

- objectives
- outputs/project deliverables and their acceptance criteria
- people plan including human resource management and human resource development
- performance criteria/indicators
- project control mechanisms
- project implementation strategy
- project governance strategy
- purpose
- quality assurance
- quality control
- quality standards for project
- rationale
- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)

Stakeholders may include:

- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee members
- end user
- supplier/service provider

Required systems for project management may include:

- planning and monitoring system
- financial management including:
  - budget allocation/funding
  - income generated
  - expenditure
- recordkeeping for documented information such as:

© Commonwealth of Australia, 2025 Industry Skills Australia

- correspondence
- quality data including survey, needs, test results
- contracts
- time allocated and spent on each aspect of the project
- progress reports
- performance reports against milestones
- project outcomes
- samples, prototypes, models

Project management tools may include:

- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
  - Gantt and bar charts
  - Program Evaluation and Review Technique (PERT) charts
  - Critical Path Method
  - cost schedule control system
  - logistics support analysis
  - life cycle cost analysis
  - spreadsheets
  - recording systems - electronic and manual

Integration of project activities may include:

- scope
- time
- cost
- quality
- human resources
- communications
- risk
- procurement

Management may include:

- scope management
- communication and reporting
- schedule management
- financial management
- quality management
- resources management
- people management
- logistics management
- risk management

PSPPM403B Close simple projects

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers project evaluation and reporting for generally low risk projects that may be small scale and managed by one person or a person with a small team. It includes implementing project review activities and finalising projects. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

In practice, closing simple projects may overlap with other generalist and specialist work activities such as applying government processes, using resources, gathering information, providing input to change, managing contracts etc.

This unit, and unit *PSPPM405A Administer simple projects*, are mutually exclusive. One or the other, but not both, may contribute to a qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Implement project review activities	1.1 Evaluation of project process and achievement against objectives is undertaken in consultation with ***stakeholders*** and results are reported in accordance with the ***project plan*** and organisational ***policy and procedures***.
	1.2 Action to rectify problems in meeting client needs is recommended and documented.
	1.3 Implications of project results for policies and operating procedures are identified and recommendations are made for their amendment.
	1.4 Information obtained from the evaluation of the project is structured so it may be used to improve relevant policy and practice in accordance with organisational requirements.
2. Finalise project	2.1 Contracts are finalised and financial records are checked for accuracy and completed in accordance with organisational procedures.
	2.2 Project wind-down is ***managed, documentation*** is completed, records are archived and ***approvals*** are obtained in accordance with the project plan and organisational policy and procedures.
	2.3 Project stakeholders are debriefed, and recommendations are made for redeployment of infrastructure/resources in accordance with organisational policy and procedures.
	2.4 Project hand-over to user/s is completed in accordance with organisational procedures and lessons learnt are documented and reported to stakeholders to assist in continuous improvement.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.5 Stakeholders are advised of procedures and authorities for initial support to implement project deliverables where relevant, and strategies are devised to manage long-term project momentum in accordance with organisational requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- analysing results and evaluating results against objectives
- writing recommendations and preparing reports requiring precision of expression
- communicating with stakeholders and team members using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- debriefing project team members
- reporting on resource expenditure including time and costs
- using project management tools suited to small scale or low risk projects
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on project finalisation, for example:
  - public sector codes of ethics/conduct
  - occupational health and safety and environment requirements
  - project governance requirements
  - quality standards
- risk management
- procurement guidelines
- human resource management and development
- equal employment opportunity, equity and diversity principles
- project management tools to suit a range of small scale or low risk projects
- project management principles

PSPPM504A Carry out complex project activities

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the work activities required to carry out complex project activities or multiple projects simultaneously. Typically this work is undertaken by project officers who are required to work on projects for multiple clients, or all aspects of larger projects. They are sometimes responsible for all the project deliverables, and at other times they work in teams on aspects of a number of projects. Contract management requirements are not included, as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

The unit includes reviewing and confirming requirements of each project/activity, organising and undertaking project activities, managing the progress of multiple projects/activities and finalising projects/activities.

In practice, conducting complex project activities overlaps with other generalist and specialist work activities such as acting ethically, coordinating resource allocation and usage, developing client services, undertaking research and analysis.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Review and confirm project requirements	1.1 Limits of own responsibility and reporting requirements are confirmed for each of the projects/project activities assigned. 1.2 Information and supporting materials for each project/project activity are obtained in accordance with project requirements, organisational ***policy and procedures***. 1.3 ***Project plans*** are analysed and requirements, timeframes, roles, responsibilities and ***stakeholder*** involvement are confirmed for each. 1.4 Project management procedures and controls are confirmed in accordance with each project plan, and any required changes are negotiated according to the project plan change management strategy. 1.5 Project plans are updated with confirmed information for milestones, resources, team members and steering committee details.
2. Organise and undertake project activities	2.1 Personal work plans are prepared to assign activities, timeframes and milestones for all projects/project activities to a single planning management framework to meet the progress requirements for each project/project activity. 2.2 Where project requirements cannot be accommodated and clashes occur, negotiations are conducted with project managers and/or supervisory staff to find a compromise satisfactory to all stakeholders. 2.3 Project tasks are accomplished in accordance with project plans

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	and any changes are managed in accordance with the approved project change strategy.
	2.4 ***Project data*** is captured and recorded in accordance with project requirements.
	2.5 Specialist advice and support are provided to project managers, steering committees and stakeholders as required to achieve project objectives.
3. **Manage progress of multiple projects/activities**	3.1 ***Project management tools*** are used for integration and timing of project activities and achievement of project outcomes.
	3.2 Risks to progress and achievement of project objectives are anticipated and reported to project management for action in accordance with ***risk management*** plans.
	3.3 Completion of project activities and progress against targets and milestones are monitored and corrective action is taken if needed, in accordance with project plans and in ***consultation with project manager***s.
	3.4 Problem solving to find innovative ***solutions*** to project problems or unplanned-for contingencies is undertaken in consultation with project management.
	3.5 Progress reports are provided as required by project communication plans.
4. **Finalise project activities**	4.1 Project deliverables for each project/activity are completed to the required standard in the required timeframes.
	4.2 Recordkeeping associated with each project is completed as required by project plans.
	4.3 Project processes are evaluated, issues identified and recommendations made for continuous improvement of projects/activities.
	4.4 Project reports are prepared containing required information completed to the required standard using agreed style, voice and formats.
	4.5 Project hand-overs of deliverables and return of borrowed/unused materials are completed in accordance with project plans and organisational procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

© Commonwealth of Australia, 2025 Industry Skills Australia

Skill requirements

Look for evidence that confirms skills in:

- managing the logistics of dealing with multiple projects/activities, masters and milestones
- managing self, time and costs
- using project management tools
- negotiating changes to timelines, roles and responsibilities
- communicating with project managers and other stakeholders using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- recording information, writing recommendations and preparing reports requiring complex language structures and precision of expression
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on projects and management of the projects, for example:
  - public sector codes of ethics/conduct
  - occupational health and safety and environmental and sustainaibilty standards
- project governance requirements
- quality standards
- risk management
- procurement
- financial management
- human resources
- equal employment opportunity, equity and diversity principles
- principles of project management
- project management tools to suit the combination of projects/activities carried out
- risk management strategies for carrying out multiple projects

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training

- logistics support analysis
- life cycle cost analysis
- spreadsheets
- recording systems - electronic and manual

Risk management may include:

- removing the risk
- transferring the risk
- minimising the risk
- accepting the risk
- preparing a contingency plan
- keeping reserves

Consultation with project managers may also include:

- steering committees
- project sponsors
- business owners of the projects
- program managers
- specialist project management office
- chief executive officer, manager or management representative
- funding body representatives
- customers or clients

Solutions to problems may include:

- reducing costs
- researching and applying more efficient methods of completing project tasks
- seeking further resources to meet deadline
- negotiating an extension of deadline or redefining completion or quantities or quality of outcomes
- sharing of ideas to gain improvements to work undertaken within the project
- outsourcing aspects of the project
- changing roles and responsibilities within project team

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Identify relevant policy**	1.1 ***Work situations*** that are shaped by government or organisation policy are identified in accordance with public sector guidelines. 1.2 ***Policy*** relating to particular work situations is identified and located.
2. **Implement policy**	2.1 Policy to be implemented is interpreted under direction to identify and plan for change in work practices. 2.2 The implications of policy for individual work practices are identified, and practices are confirmed/adjusted to reflect policy requirements in accordance with organisational procedures. 2.3 Others affected by policy requirements are supported to accommodate those requirements. 2.4 Policy is implemented to support achievement of outcomes intended in specific work areas.
3. **Monitor and report on policy implementation**	3.1 Information that will assist with the evaluation of the effectiveness of policy implementation is gathered, recorded and reported under direction in accordance with organisational procedures. 3.2 ***Information*** that will assist with the evaluation of the impact of policy implementation on organisational outcomes is gathered, recorded and reported under direction in accordance with organisational procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for

© Commonwealth of Australia, 2025 Industry Skills Australia

this unit.

Skill requirements

Look for evidence that confirms skills in:

- reading complex and formal documents such as policy and legislation and providing information on their application
- researching and providing information
- preparing written reports requiring accuracy of expression and language and structures suited to the intended audience
- working with legislation drafters and legal advisers
- writing guidelines in plain English
- working as a member of a team to consult on and prepare policy guidelines
- adjusting communication to suit different audiences
- responding to diversity, including gender and disability
- gathering and analysing policy feedback
- accessing policies and legislation electronically or in hard copy
- identifying and addressing the environmental and occupational health and safety implications of policy/s being implemented

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- practices and procedures for developing policy guidelines
- policy feedback mechanisms
- current organisation policies
- whole of government policies and international policy obligations that impact on organisation policy
- organisation and government procedures and protocols
- public sector code/s of ethics and code/s of conduct
- equal employment opportunity, equity and diversity principles
- environmental and occupational health and safety implications of policy/s being implemented

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*

© Commonwealth of Australia, 2025 Industry Skills Australia

together

- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to, public sector generalist and specialist units in the Certificate IV in Government.

Choice from the following is recommended:

- PSPGOV402B Deliver and monitor service to clients
- PSPGOV403B Use resources to achieve work unit goals
- PSPGOV408A Value diversity
- PSPGOV422A Apply government processes
- PSPREG407B Produce formal record of interview
- PSPREG410B Give evidence
- PSPPROC409A Receive and select offers

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- policy implementation supported in a range of (2 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- relevant policy and legislation
- public sector standards, procedures and protocols
- policy guidelines

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when supporting policy implementation, including coping with difficulties, irregularities and breakdowns in routine
- policy implementation supported in a range of (2 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds

© Commonwealth of Australia, 2025 Industry Skills Australia

- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Work situations may include:	• processes • outcomes • priorities • client services • core business • service delivery mode/s • organisational structure
Policy may include:	• government policy • organisation policy
Information for evaluation may include:	• statistical data • qualitative data

© Commonwealth of Australia, 2025 Industry Skills Australia

- anecdotal feedback
- survey data
- stakeholder opinions

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Interpret and advise on public policy**	1.1 ***Policy*** is analysed and interpretations on its intent and implications are ***provided*** in accordance with organisational procedures. 1.2 Interpretive advice is provided on the relevant acts, regulations, procedures, codes of practice, standards and guidelines related to policy, in accordance with organisational procedures. 1.3 Written interpretations are provided, supported by defensible evidence and reflect consideration of their intended use and consequences in accordance with legislative requirements. 1.4 Policy advice is communicated in a manner that addresses the requirements of users. 1.5 Policy questions referred by policy staff are resolved or ***consultative mechanisms*** are used to gain additional clarification or opinions.
2. **Provide input to policy evaluation and review**	2.1 Policy feedback data is captured and analysed to identify strengths, weaknesses, and any implementation issues in accordance with organisational requirements. 2.2 Both planned and unintentional outcomes of policy implementation are analysed and feedback is provided against the evaluation criteria in the policy implementation plan. 2.3 A comparison of the intended versus actual outcomes of policy implementation is prepared and provided in accordance with organisational procedures. 2.4 The internal and external environments are monitored for policy implications, and strategies are prepared to respond to potential or impending ***policy changes*** in accordance with organisational requirements. 2.5 Recommendations for continuous improvement, termination or succession of policies are prepared in accordance with

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	organisational requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- reading and evaluating complex and formal documents such as policy and legislation
- researching, analysing and presenting information
- preparing written reports requiring precision of expression and language and structures suited to the intended audience
- working as a member of an inter-agency team to consult on and validate policy
- adjusting communication to suit different audiences
- responding to diversity, including gender and disability
- dealing with different points of view and dissenting stakeholders
- accessing policies and legislation electronically or in hard copy
- identifying and addressing the environmental and occupational health and safety implications of policy/s being developed

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- policy development processes and practices in the public sector
- current policies underpinning the work area
- government procedures and protocols
- public sector code/s of ethics and code/s of conduct
- principles of community engagement in policy development
- equal employment opportunity, equity and diversity principles
- environmental and occupational health and safety implications of policy/s being developed

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance

Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPMNGT604B Manage change
  - PSPMNGT605B Manage diversity
  - PSPMNGT606B Manage quality client service
  - PSPMNGT608B Manage risk
  - PSPOHS602A Manage workplace safety
  - PSPPROC602B Direct the management of contracts

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- provision of policy advice in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- public sector policy and legislation
- public sector standards, procedures and protocols
- precedents for policy interpretation
- policy evaluation guidelines

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when advising on policy, including coping with difficulties, irregularities and breakdowns in routine
- provision of policy advice in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities

backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Policy may include:

- public policy
- public sector policy
- central agency policy
- organisation policy relevant to any aspect of an organisation's business, such as policies relating to:
  - core business
  - client services
  - business structure
  - human resources
  - administration
  - financial management

© Commonwealth of Australia, 2025 Industry Skills Australia

- work practices
- training
- information technology
- technical/professional requirements
- legal requirements

Policy advice may be provided to:

- government
- Ministers
- other public sector organisations
- community groups
- the public
- policy developers
- internal policy staff
- other staff

Consultative mechanisms may include:

- discussion with other policy managers
- seeking clarification from the policy developer
- seeking legal opinion
- workplace consultative committees

Policy changes may be caused by:

- machinery of government changes
- a shift to designing policy around a set of government priorities not organisational structures/individual agencies
- a focus on whole of government policies
- changes to legal risks
- emphasis on policy research focused on the mid to long term, as well as that developed to meet immediate needs of government
- national or international events such as:
  - change in government
  - changes in government policy
  - changes in strategic direction
  - changes in legislation
  - changes in the policies of other governments
  - changing social trends
  - economic/technological change

PSPPROC303A Carry out basic procurement

Modification History

Release	TP Version	Comments
3	PSP12V1	Layout adjusted. No changes to content.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the expenditure of public monies for simple purchasing that requires simple and routine purchasing tasks to be undertaken under supervision. Goods and services are of low value or low risk, and purchasing is in accordance with government policy, public accountability requirements and organisational procedures. The unit includes planning for and undertaking procurement, and receiving goods and services.

In practice, undertaking basic procurement may overlap with other generalist or specialist work activities, such as working effectively in the organisation, upholding the values of public service or local government, complying with legislation, and using resources and financial systems.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit applies to those who undertake purchasing as part of their role, whether as an initiator of a purchase or as an approver. This unit may not be appropriate for those who have a significant role in procurement.

Licensing/Regulatory Information

Not applicable.

© Commonwealth of Australia, 2025 Industry Skills Australia

Pre-Requisites

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan for basic procurement of goods or services	1.1. ***Delegation/limit of authority*** for basic procurement of goods or services is confirmed. 1.2. Procurement requirements are researched, confirmed and clarified as necessary with ***relevant personnel***. 1.3. Most suitable ***option for acquiring goods or services*** is determined in accordance with legislation, policy and procedures, and value for money considerations. 1.4. Approval processes for procurement options are identified. 1.5. ***Risk planning*** is conducted for the procurement activity in accordance with procedures, delegation and guidelines.
2. Undertake procurement	2.1. Approvals are obtained as necessary for procurement of goods or services in accordance with organisational policy and procedures. 2.2. Quotations are obtained if necessary in accordance with legislation, policy and procedures, and any conflict of interest is declared and resolved in accordance with organisational policy and procedures. 2.3. Suppliers or service providers are assessed and selected on the basis of ***best value for money***. 2.4. Procurement is initiated or orders are placed in

© Commonwealth of Australia, 2025 Industry Skills Australia

	accordance with selected procurement option. 2.5. Procurement is conducted in accordance with the organisation's probity and governance requirements. 2.6. Procurement is conducted in line with the organisation's ***financial management system***.
3. Receive goods or services	3.1. Goods are received or provision of services is accepted in accordance with procurement requirements. 3.2. Quality assurance processes are implemented to ensure goods or services meet procurement specifications and outcomes required. 3.3. Action is taken to resolve non-compliance with specifications within limits of own authority, or is referred according to organisational policy and procedures. 3.4. Receipt of goods or services is ***confirmed*** and accounts are processed for payment according to organisational procedures. 3.5. ***Records*** are maintained and reporting obligations are met according to organisational and legal requirements to provide an audit trail and for other organisational purposes.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - write and communicate procurement requirements in unambiguous terms
  - consult and negotiate with providers
  - provide feedback
- teamwork skills to:
  - work independently or under direction as appropriate to the situation
  - respond to diversity
  - refer issues to the correct person
- problem-solving skills to:
  - assess procurement options and select the most suitable option
  - assess goods and services against specifications
- initiative and enterprise skills to apply OHS and environmental requirements to basic procurement requirements
- planning and organising skills to apply risk-management processes

© Commonwealth of Australia, 2025 Industry Skills Australia

- self-management skills to apply codes of conduct, codes of practice and standards of individual behaviour
- learning skills to keep up-to-date with relevant procurement legislation, policies and procedures
- technology skills to:
  - operate organisational IT systems
  - use electronic procurement templates

Required knowledge

- commonwealth, state or territory, and local government procurement guidelines, including environmental purchasing guidelines
- organisation's code of conduct, codes of practice and standards of individual behaviour relating to procurement of goods and services, in particular identifying and managing conflict of interest, gifts and inappropriate relationships with providers
- procurement options and methods
- probity and ethical issues
- procedures for receipt and payment of goods or services, including credit card procedures
- procurement approval procedures
- financial and government accountability requirements
- equal employment opportunity, equity and diversity principles
- public sector legislation and guidelines, including OHS and environment

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Competency must be demonstrated by undertaking basic procurement of goods or services consistently in accordance with legislative and organisational requirements.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • produce a procurement plan appropriate to the scale, complexity and risk of the procurement • implement the procurement plan in a way that reflects organisational policies and approaches • use relevant template documents • accept delivered goods and services into use • operate within own delegations and seek advice when

© Commonwealth of Australia, 2025 Industry Skills Australia

appropriate
- keep records of procurement activities.

Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least three separate occasions.

Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to basic procurement of goods and services
- codes of conduct and codes of practice
- workplace scenarios and case studies relating to a range of basic procurement activities
- case studies that incorporate dilemmas, and probity requirements relating to basic procurement of goods and services.

Method of assessment

The following assessment methods are suggested:

- questions to assess understanding of relevant legislation and procedures
- review of strategies selected for basic procurement
- review of basic procurement plans, requests for quotation, quotation evaluation plans, selection reports, credit card purchase documents, approvals obtained, simple budgets, invoices paid, other financial documents and other documentation prepared by the candidate in a range of contexts
- feedback from peers or supervisors on actions taken to monitor and review contract performance

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.

Guidance information for assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC301B Uphold the values and principles of

© Commonwealth of Australia, 2025 Industry Skills Australia

public service
- PSPGOV301B Work effectively in the organisation
- PSPGOV305B Access and use resources and financial systems
- PSPGOV309A Address client needs
- PSPGOV312A Use workplace communication strategies
- PSPLEGN301B Comply with legislation in the public sector

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Delegation/limit of authority may include:	• low value or low risk procurement • one-off purchases • expenditure approval limits • approval processes • procurement decision making
Relevant personnel may include:	• internal user of procured goods or services • supervisor • specialist procurement personnel • supplier
Options for acquiring goods or services may include:	• purchasing off an existing contract, standing offer or multi-use list • government credit card transactions • direct purchase from retail or wholesale outlets • petty cash • standard electronic commerce or online transactions
Risk planning may include:	• stakeholder consultation • confirmation that a procurement process is necessary • confirmation that funds are available • confirmation that required approvals have been obtained
Best value for money	• availability

© Commonwealth of Australia, 2025 Industry Skills Australia

includes:	• ease of disposal • price • through life support • warranty • quality and suitability of product
Financial management system may include:	• procurement and contracts' register • delegations and authorities • reporting requirements • record keeping • receiving and accepting deliverables • payment approval process • credit card process
Confirmation may include:	• verbal and written • internal and external • to users • to management.
Records may include:	• purchase requests and orders • invoices and payment requests • statements and petty cash vouchers • records of authorised decisions • corporate credit card transaction statements • records of supplier performance • financial statements • asset registers • actions taken to manage identified conflict of interest • records of conversation • procurement reporting

PSPPROC405C Dispose of assets

Modification History

Release	TP Version	Comments
3	PSP12V1	Layout adjusted. No changes to content.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the disposal of assets effectively, and focuses on gaining a return from sales. It includes identifying assets for disposal, developing and implementing an asset disposal strategy, and evaluating asset disposal.

In practice, disposing of assets overlaps with other generalist and specialist public sector work activities, such as upholding and supporting the values and principles of public service or local government, identifying and treating risks, exercising delegations, applying government processes, encouraging compliance with legislation in the public sector or local government, planning procurement, developing and distributing requests for offers, selecting providers and managing contracts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit applies to people who may have to organise or carry out the disposal of assets as part of their role.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify assets for disposal.	1.1. Assets are identified for disposal in accordance with ***legislation***, ***policy*** and organisational needs.
2. Develop a strategy for the disposal of assets.	2.1. Potential market value of assets is determined in accordance with policy, practice and public sector standards. 2.2. Case for expending resources to add value to assets prior to sale is evaluated and decisions are made according to organisational policy and procedures. 2.3. ***Options for disposal*** are investigated and the method providing maximum return is determined in the context of policy, probity requirements and desired outcomes. 2.4. Disposal requirements for ***special categories of assets*** are taken into account, including environmental and corporate social responsibility issues. 2.5. ***Stakeholders*** are consulted about disposal strategy and their feedback is incorporated.
3. Implement a disposal strategy.	3.1. Goods are written off and disposed of according to approved disposal plan, policy, probity requirements and organisational/industry practice. 3.2. Records of disposal activity are maintained for audit and evaluation purposes according to policy and practice.

© Commonwealth of Australia, 2025 Industry Skills Australia

4. Evaluate asset disposal.	4.1. Disposal of assets is evaluated against expected outcomes, including forecast market value of assets, and is documented according to policy and guidelines.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - prepare documentation and audit trail for disposed assets
  - communicate and network with a range of audiences, such as clients, suppliers, stakeholders and end users
  - provide feedback
- teamwork skills to:
  - work independently or under direction as appropriate to the situation
  - model team leadership approaches if appropriate
  - respond to diversity
  - refer issues to the correct person
- problem-solving skills to:
  - read complex, formal documents, such as legislation and guidelines and apply them to asset disposal
  - make judgements to provide maximum return from asset disposal
- planning and organising skills to:
  - manage projects relating to asset disposal
  - manage financial and other resources in the context of asset disposal
  - research information about asset disposal
- self-management skills to:
  - apply workplace safety and environmental and sustainability procedures in the context of asset disposal
  - apply probity requirements in relation to the disposal of assets
- learning skills to keep up-to-date with relevant procurement legislation, policies and procedures
- technology skills to:
  - operate organisational IT systems
  - use electronic procurement templates

Required knowledge

- commonwealth, state or territory, and local government procurement guidelines

© Commonwealth of Australia, 2025 Industry Skills Australia

- requirements of financial rules and regulations relating to asset disposal
- legal aspects of disposals
- disposal approval processes
- implications of particular contracting agreements for asset disposal
- implications of asset disposal for whole-of-life considerations
- options for government disposal
- risk management procedures for disposal of assets
- disposal requirements for special categories of assets
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to disposal of assets
- legislation, policy and procedures relating to asset disposal, including occupational OHS, environmental, sustainability and corporate social responsibility considerations

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Competency must be demonstrated in the ability to dispose of assets consistently and in accordance with legislative and organisational requirements.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- use different methods to identify assets for disposal
- develop a strategy for the disposal of assets that considers all relevant disposal options
- develop a disposal strategy, which may be from a template
- implement a disposal strategy
- review the disposal activity and make recommendations about improvements that could be implemented in future disposals
- act within own delegations and refer issues to higher authority when necessary.

Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least

© Commonwealth of Australia, 2025 Industry Skills Australia

two separate occasions.

Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to disposing of assets
- codes of conduct and codes of practice
- workplace scenarios and case studies relating to a range of procurement activities associated with disposal of assets
- case studies that incorporate dilemmas, and probity requirements relating to disposal of assets.

Method of assessment

The following assessment methods are suggested:

- questions to assess understanding of relevant legislation and procedures
- review of strategies and approaches adopted for disposal of assets
- review of disposal plans, plans for disposing of specific classes of assets, budgets, contracts, risk assessments and other documentation prepared by the candidate in a range of contexts
- review of stakeholder engagement approaches adopted by the candidate.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.

Guidance information for assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC401A Uphold and support the values and principles of public service
- PSPGOV417A Identify and treat risks
- PSPGOV421A Exercise delegations
- PSPLEGN401A Encourage compliance with legislation in the public sector

© Commonwealth of Australia, 2025 Industry Skills Australia

- PSPPROC411A Plan procurement
- PSPPROC412A Develop and distribute requests for offers
- PSPPROC413A Select providers and develop contracts
- PSPPROC414A Manage contracts.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Legislation and policies may include:

- Commonwealth or state and territory legislation, including legislation that may apply specifically to disposal activities, such as environmental, hazardous materials, cultural and heritage
- council rules and by-laws
- organisational policies and practices
- probity guidelines

Options for disposal may include:

- controlled reclamation
- public sale
- auction
- tenders
- private treaty
- trade-in
- pre-priced sales
- transfer to another government organisation
- agents and brokers
- conversion to training aids
- destruction
- transfer to museums
- donation

Special categories of assets may include:

- reusable and recyclable items
- information technology equipment
- vehicles
- heritage and cultural interest items
- arms and controlled defence and related goods

© Commonwealth of Australia, 2025 Industry Skills Australia

- security classified material
- intellectual property
- staff housing
- stores located overseas
- buildings for removal
- goods and services forfeited to the government
- dangerous goods and hazardous materials

Stakeholders may include:

- end users, customers or clients, and sponsors
- current or potential providers or suppliers
- technical or functional experts or advisers
- commonwealth, state or territory, and local government departments
- own organisation
- other public sector organisations
- employees, unions and staff associations
- industry bodies
- local communities
- lobby groups
- special user groups

Unit Descriptor

This unit covers the ability to plan, justify and approve of procurement requirements to achieve the required outcome. It includes defining and justifying the need, researching potential impact and risks, and securing organisational support to proceed with procurement activity.

In practice, planning procurement overlaps with other generalist and specialist public sector and local government work activities, such as upholding and supporting the values and principles of public service, identifying and treating risks, exercising delegations, applying government processes, encouraging compliance with legislation in the public sector or local government, developing and distributing requests for offers, selecting providers and managing contracts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

The unit applies to those who plan for procurement, including those who specialise in procurement.

Licensing/Regulatory Information

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret procurement requirements	1.1. Consultation is undertaken with ***stakeholders*** to determine whether viable alternatives to procurement exist that address identified business need, to define and clarify requirements, and to justify the procurement decision. 1.2. Scoping of procurement requirements is conducted identifying outcomes, objectives and logistics/supply chain factors. 1.3. ***Market analysis*** is conducted to identify factors that may impact on procurement decisions. 1.4. ***Procurement approvals and appropriations*** are confirmed for whole-of-life of the activity. 1.5. ***Information on sources of supply*** is accessed to determine possible providers and any conflict of interest is identified and resolved. 1.6. Planned provider contract arrangements are specified in accordance with ***legislation***, ***policy and probity requirements***. 1.7. ***Issues and opportunities*** are investigated for integration into procurement activity.
2. Plan procurement activities	2.1. Procurement requirement that meets legislative, policy and probity requirements is outlined from transition to close-out.

© Commonwealth of Australia, 2025 Industry Skills Australia

	2.2. Opportunities to obtain stakeholder input at all stages of the procurement process are actively planned. 2.3. ***Resource requirements*** are confirmed and committed in a timely manner and responsible authorities are nominated. 2.4. Strategies for briefing potential bidders are included when required, are practical and meet probity requirements of fairness and impartiality, public sector standards and organisational protocols. 2.5. Consideration is given to environmental and sustainability practices along with corporate social responsibility practices at all stages of the procurement process.
3. Develop procurement plans	3.1. ***Procurement approval documentation*** and ***procurement plan*** are developed and approved which contain relevant detail about the procurement process and desired business outcomes, according to organisational policy and public sector standards. 3.2. ***Stakeholder input is sought at all stages during the development of the procurement plan***. 3.3. ***Probity risks*** in the procurement process are expressly considered during the development of the procurement plan. 3.4. Approved procurement plan or strategy is communicated to stakeholders.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult with stakeholders, involving complex oral and written exchanges of information
  - write a procurement requirement, which may require complex style and language expressed in unambiguous terms
  - provide feedback
- teamwork skills to:
  - work independently or under direction as appropriate to the situation
  - model team leadership approaches if appropriate
  - respond to diversity

© Commonwealth of Australia, 2025 Industry Skills Australia

    - refer issues to the correct person
- problem-solving skills to:
    - undertake analysis of issues relating to procurement need
    - make comparisons, justify a point of view and provide supporting evidence
- initiative and enterprise skills to apply OHS, environmental, sustainability and corporate social responsibility practices in the context of developing requests for offers
- planning and organising skills to:
    - research issues relating to procurement need
    - plan issues relating to procurement need
- learning skills to keep up-to-date with relevant procurement legislation, policies and procedures
- technology skills to:
    - operate organisational IT systems
    - use electronic procurement templates

Required knowledge

- commonwealth, state or territory, and local government legislation, policies, practices and guidelines:
    - relating to contract management, including environmental purchasing and corporate social responsibility guidance
    - such as OHS and equity and diversity
- organisational procurement policies, practices and approval processes
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to procurement
- life cycle costs
- whole-of-life considerations
- technical knowledge or subject matter expertise in the goods or services being procured
- aspects of law of contract, laws of tort, trade practices law, commercial law and other legislation relating to receipt and evaluation of offers, negotiation and award of contracts

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment Competency must be demonstrated in the ability to plan

© Commonwealth of Australia, 2025 Industry Skills Australia

procurement consistently in accordance with legislative and organisational requirements.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- consult with a wide range of stakeholders in order to identify, confirm and clarify procurement requirements
- undertake market research
- develop business case, using templates if available
- develop a procurement plan, using templates if available
- act within own delegations and refer issues to higher authority when necessary.

Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.

Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to procuring goods and services
- codes of conduct and codes of practice
- workplace scenarios and case studies relating to a range of procurement activities
- case studies that incorporate dilemmas, and probity requirements relating to planning procurement of goods and services.

Method of assessment

The following assessment methods are suggested:

- questions to assess understanding of relevant legislation and procedures
- review of strategies selected for procurement planning
- review of business cases, budgets, procurement plans, risk assessments, procurement approvals and other documentation prepared or obtained by the candidate in a range of contexts
- review of stakeholder engagement approaches adopted by the candidate.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the

candidate.

Guidance information for assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC401A Uphold and support the values and principles of public service
- PSPGOV417A Identify and treat risks
- PSPGOV421A Exercise delegations
- PSPLEGN401A Encourage compliance with legislation in the public sector
- PSPPROC412A Develop and distribute requests for offers
- PSPPROC413A Select providers and develop contracts.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Stakeholders may include:

- end users, customers or clients, and sponsors
- current or potential providers or suppliers
- technical or functional experts or advisers
- commonwealth, state or territory, and local government
- the organisation
- other public sector organisations
- employees, unions and staff associations
- industry bodies
- local communities
- lobby groups and special user groups
- experts, including financial, legal, technical, commercial and probity.

Market analysis may include:

- structure of market
- 'players' in the market
- market capability

© Commonwealth of Australia, 2025 Industry Skills Australia

- market maturity
- market strength
- factors or conditions that may affect supply
- supplier positioning and referencing
- supplier viability analysis
- potential impact of intended contracting activity.

Procurement approvals and appropriations may require:

- ministerial authorisation
- compliance with instructions or finance circulars
- CEO or board authorisation
- confirmation by chief financial officer
- delegate approval
- budget approval
- business case approval
- special consideration if they concern:
  - long-term travel deals
  - long-term computer deals
  - long-term lease deals
  - issuing indemnities.

Information on sources of supply may include:

- Yellow Pages
- buyers guides, supplier brochures and advertisements
- purchasing contract awareness service
- suppliers' previous histories and files
- peer, supplier and customer networks
- computer-aided purchase of computers
- newspapers, journals, bulletins or directories
- government gazettal notices
- internet.

Legislation, ***policy and probity requirements*** may include:

- commonwealth or state and territory legislation
- equal employment opportunity and anti-discrimination law
- commonwealth, and state or territory government procurement guidelines
- organisational policies and practices
- probity guidelines
- codes of conduct, codes of practice and standards of individual behaviour relating to procurement
- security and confidentiality
- risk management
- environmental, sustainability and corporate social responsibility principles.

© Commonwealth of Australia, 2025 Industry Skills Australia

Issues and opportunities may include:	• risk sharing • cost sharing • cost escalation • intellectual property rights • knowledge management • corporate knowledge • libraries and archives • capital equipment and asset ownership • value engineering • value management • innovation • continuous improvement • future organisational requirements • quality • whole-of-life considerations • organisational integration and cooperation.
Resource requirements may include:	• facilities • information technology • personnel • budget support equipment • use of contractor staff • professional service providers • risk assessment.
Procurement approval documentation may include:	• business case • justifications • delegate submissions.
Procurement plan may include:	• formal documented procurement plan, either using an organisational template or not using a template • procurement strategy • acquisition strategy • leasing strategy.
Probity risks may include:	• corruption • fraud • conflict of interest (actual, perceived or potential) • unfair treatment of providers or potential providers • misuse of resources • misuse of information • manipulation of the marketplace.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Specify procurement requirement.	1.1. Scoping of requirement is undertaken to identify outcomes, objectives and ***practical requirements***. 1.2. Statement of requirement is prepared that meets organisational requirements for format and content and is acceptable to ***stakeholders***. 1.3. Needs of clients, end users and other stakeholders are considered and incorporated into statement of requirement. 1.4. Procurement outcome is fair to, and achievable by, potential providers. 1.5. Planned provider contract arrangements are specified according to policy and guidelines. 1.6. ***Standards of performance*** and ***codes of practice***, incentives, disincentives and performance measures are specified.
2. Develop request for offers.	2.1. ***Request for offers*** and contractual conditions suitable for procurement activity are developed and clarified with clients, providers and/or experts as necessary. 2.2. Contractual conditions suitable for procurement activity are developed and clarified with clients, providers and/or experts as necessary. 2.3. When possible and appropriate, ***input*** on content of

© Commonwealth of Australia, 2025 Industry Skills Australia

	request for offer documents and proposed contractual conditions is obtained from market according to probity requirement of impartiality. 2.4. Approvals to approach marketplace are obtained according to organisational policy and procedures. 2.5. Records relating to documenting request, and seeking, processing and closing ***offers***, are maintained according to organisational procedures and legal requirements.
3. Develop offer evaluation plan.	3.1. ***Offer evaluation plan***, including ***criteria for evaluation***, is developed, documented and approved prior to releasing formal request documentation to the market. 3.2. Where used, ***specialist expertise*** is arranged to evaluate offers and the structure and membership of evaluation panel. 3.3. Offer evaluation plan complies with ***probity requirements***, in particular impartiality and management of conflict of interest.
4. Manage distribution and receipt of offers.	4.1. Request for offers is disseminated according to organisational procedures and guidelines, and public sector standards. 4.2. Briefings and clarification of information in the request for offer are undertaken as required according to procurement plan, organisational procedures and guidelines, public sector standards and probity requirements of fairness and impartiality. 4.3. ***Offers are received*** according to organisational procedures and guidelines, and public sector standards. 4.4. Requests for offers and closing offers are disseminated in line with ***probity issues***. 4.5. Late offers and non-conforming bids are dealt with according to procurement plan and request for offer documentation.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult with stakeholders, specialists and providers involving complex oral

© Commonwealth of Australia, 2025 Industry Skills Australia

and written exchanges of information
    - read complex documents, such as contracts, legislation and guidelines
    - write requests for offers, which may include complex style and language expressed in unambiguous terms
    - provide feedback
- teamwork skills to:
    - work independently or under direction as appropriate to the situation
    - model team leadership approaches if appropriate
    - respond to diversity
    - refer issues to the correct person
- problem-solving skills to:
    - apply probity requirements in specifying and developing requests for offers, providing briefings and information, and receiving offers
    - apply OHS requirements (where safety or security may be an issue) when developing requests for offers
- initiative and enterprise skills to:
    - apply the content of complex documents, such as contracts, legislation and guidelines
    - apply OHS, environmental, sustainability and corporate social responsibility practices in the context of developing requests for offers
- planning and organising skills to manage the release of documents to stakeholders
- learning skills to keep up-to-date with relevant procurement legislation, policies and procedures
- technology skills to:
    - operate organisational IT systems
    - use electronic procurement templates

Required knowledge

- commonwealth, state or territory, and local government legislation, policies, practices and guidelines:
    - relating to requests for offers, including environmental purchasing and corporate social responsibility guidance
    - such as OHS and equity and diversity
- organisational procurement policies, practices and approval processes
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to developing and receiving requests for offers
- issues to be considered when developing requests for offers, including things like buying locally, and open or restricted opportunities to tender
- aspects of law of contract, laws of tort, trade practices law, commercial law and other legislation relating to requests for offers

© Commonwealth of Australia, 2025 Industry Skills Australia

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Competency must be demonstrated in the development and distribution of requests for offers; performed consistently and in accordance with legislative and organisational requirements.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- consult with stakeholders to develop a specification suited to the particular procurement being completed
- develop request for offer documentation, using templates where available
- develop offer evaluation plans with suitable evaluation criteria and evaluation process, using templates where available
- manage the release of requests for offers to industry
- manage the receipt of responses from industry
- apply probity principles relevant to this stage of the procurement process

Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.

Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to procurement of goods and services
- codes of conduct and codes of practice
- workplace scenarios and case studies relating to a range of procurement activities associated with developing and distributing requests for offers
- case studies that incorporate dilemmas, and probity requirements relating to developing and distributing requests for offers

Method of assessment

The following assessment methods are suggested:

© Commonwealth of Australia, 2025 Industry Skills Australia

- questions to assess understanding of relevant legislation and procedures
- review of strategies and approaches adopted for developing and distributing requests for offers
- review of requests for offers (including specifications), offer evaluation plans, industry briefs, risk assessments and other documentation prepared by the candidate in a range of contexts
- review of stakeholder engagement strategies used by the candidate.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.

Guidance information for assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC401A Uphold and support the values and principles of public service
- PSPGOV417A Identify and treat risks
- PSPGOV421A Exercise delegations
- PSPLEGN401A Encourage compliance with legislation in the public sector
- PSPPROC411A Plan procurement
- PSPPROC413A Select providers and develop contracts
- PSPPROC414A Manage contracts.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Practical requirements may include:

- phases or stages of the procurement activity
- timeframes

© Commonwealth of Australia, 2025 Industry Skills Australia

	• expertise needed • facilities needed • software and other tools needed
Stakeholders may include:	• end users, customers or clients, and sponsors • current or potential providers or suppliers • technical or functional experts or advisers • commonwealth, state or territory, and local government • the organisation • other public sector organisations • employees, unions and staff associations • industry bodies • local communities • lobby groups and special user groups
Standards of performance and ***codes of practice*** may include:	• value for money • quality measures • benchmarks • milestones and timeframes • performance indicators • codes of practice and standards of behaviour
Requests for offers may include invitations to submit:	• tenders • proposals • quotations • expressions of interest
Input may be obtained through:	• exposure of draft request for offer • request for information • industry comment process
Offers may include:	• tenders • written quotations • proposals • expressions of interest

Offer evaluation plan should:	• be consistent with public sector and organisational legislation, policy and guidelines, such as:
	  • commonwealth or state and territory legislation, including:
	  • equal employment opportunity and anti-discrimination
	  • risk management
	  • security and confidentiality

© Commonwealth of Australia, 2025 Industry Skills Australia

- council rules and by-laws
- commonwealth, and state or territory government procurement guidelines, including environmental purchasing, access and equity, social justice guidelines
- organisational policies and practices
- environmental, sustainability and corporate social responsibility principles

- include practical and measurable criteria for selecting the provider and explanation of process that will be used to make selection

Criteria for evaluation may include:

- value for money
- demonstrated capacity to deliver outcomes
- available expertise
- project management expertise to deliver the outcomes on time and within budget
- meeting specific policy requirements, such as buying locally and environmental sustainability
- innovation

Specialist expertise may include:

- financial
- legal
- technical and user representatives
- commercial
- probity
- logistics

Probity requirements:

- may include:
  - accountability
  - transparency
  - confidentiality
  - managing conflict of interest
  - impartiality
- are maintained to:
  - ensure conformity to processes
  - facilitate accountability
  - ensure proponents are treated in a fair and equitable manner
  - encourage commercial completion
  - preserve public and private sector confidence in government processes

Offers are received:

- using a variety of forms, including:
  - traditional paper-based tender responses

© Commonwealth of Australia, 2025 Industry Skills Australia

- computer disk
- electronic, such as internet, email, facsimile, and electronic tendering system

- by a variety of delivery methods, including:
  - post
  - courier
  - by hand
  - electronic lodgement

Probity issues may include:

- equity of access to tender documents
- fairness in provision of information
- decisions about when to accept or reject late tenders
- inappropriate assistance to prepare a tender
- conflict of interest.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select preferred providers	1.1. Evaluation panel is formed and coordinated. 1.2. ***Offers*** are ***evaluated*** according to evaluation plan and organisational ***probity requirements*** which relate to managing conflicts of interest and adherence to public sector standards. 1.3. Specialist expertise is obtained where necessary to assist with evaluation of offers. 1.4. Clarification and negotiation of matters contained in offers are undertaken with bidders according to organisational guidelines and public sector standards. 1.5. Preferred providers are selected and recommendations for ***allocation of business*** are developed, justified and documented against selection criteria according to policy, procedures and governance requirements. 1.6. Approvals are obtained for the recommended offers. 1.7. Successful providers are notified in line with organisational protocols.
2. Develop and formalise contractual arrangements	2.1. Approvals are obtained to enter negotiations, when required, and negotiation of the final wording of ***contract*** is conducted according to organisational policy and procedures and defined probity frameworks as set out in the evaluation plan.

© Commonwealth of Australia, 2025 Industry Skills Australia

	2.2. Approvals to enter into contracts are obtained according to policy and procedures. 2.3. Commitments are not made and contractors do not commence until contracts are signed. 2.4. Contracts are structured to capture and address identified risks, protect both parties, provide the basis for due performance, and outline expected standards of behaviour. 2.5. Contracts are entered into that are valid and legally binding to the parties.
3. Debrief market and other stakeholders	3.1. Advice on the contractual arrangements is provided to internal stakeholders according to organisational policy and procedures. 3.2. Unsuccessful bidders are informed and debriefed upon request with constructive feedback on their proposals. 3.3. Details of successful providers are made public according to probity requirements, organisational protocols and public sector standards.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult and negotiate with contractors and stakeholders, involving complex oral and written exchanges of information
  - network within probity boundaries with diverse stakeholders and contractors
  - read complex documents, such as contracts, legislation and guidelines
  - provide feedback
- teamwork skills to:
  - work independently or under direction as appropriate to the situation
  - model team leadership approaches if appropriate
  - respond to diversity
  - refer issues to the correct person
- problem-solving skills to apply probity requirements in evaluating offers, formalising contracts and debriefing stakeholders
- initiative and enterprise skills to:
  - apply the content of complex documents, such as contracts, legislation and guidelines

© Commonwealth of Australia, 2025 Industry Skills Australia

    - apply OHS, environmental, sustainability and corporate social responsibility practices in the context of selecting providers and developing contracts
- planning and organising skills to analyse and compare written information to ensure key elements from the specification and the procurement plan are captured in the written contract
- learning skills to keep up-to-date with relevant procurement legislation, policies and procedures
- technology skills to:
    - operate organisational IT systems
    - use electronic procurement templates

Required knowledge

- commonwealth, state or territory, and local government legislation, policies, practices and guidelines:
    - relating to award of contracts, including environmental purchasing and corporate social responsibility guidance
    - such as OHS and equity and diversity
- organisational procurement policies, practices and approval processes
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to receipt and selection of offers
- aspects of law of contract, laws of tort, trade practices law, commercial law and other legislation relating to receipt and evaluation of offers, negotiation and award of contracts
- equal employment opportunity

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Competency must be demonstrated in the ability to select providers and develop contracts consistently in accordance with legislative and organisational requirements.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • apply recognised offer evaluation methodologies to select a preferred provider • make provider selections in accordance with the offer evaluation plan, procurement plan and relevant policy and legislation

© Commonwealth of Australia, 2025 Industry Skills Australia

- work with subject matter experts, such as legal, financial, commercial and technical
- adhere to probity requirements
- make written recommendations about suppliers to delegates and higher management
- act within the scope of own delegations
- keep appropriate records
- debrief relevant stakeholders about their performance.

Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions

Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to selecting providers and developing contracts
- codes of conduct and codes of practice
- workplace scenarios and case studies relating to a range of procurement activities associated with selecting providers and developing contracts
- case studies that incorporate dilemmas, and probity requirements relating to selecting providers and developing contracts

Method of assessment

The following assessment methods are suggested:

- questions to assess understanding of relevant legislation and procedures
- review of strategies and approaches adopted for selecting providers and developing contracts
- review of selection reports, approvals and sign-offs, negotiation plans, draft contracts, final contracts, risk assessments and other documentation prepared by the candidate in a range of contexts
- review of stakeholder engagement approaches adopted by the candidate

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.

Guidance information for

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in

assessment	different situations or environments. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • PSPETHC401A Uphold and support the values and principles of public service • PSPGOV417A Identify and treat risks • PSPGOV421A Exercise delegations • PSPLEGN401A Encourage compliance with legislation in the public sector • PSPPROC411A Plan procurement • PSPPROC412A Develop and distribute requests for offers • PSPPROC414A Manage contracts.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Offers may include:	• delivery of goods for use or into store • provision of services • maintenance agreements • leasing agreements • consultancies • research and development • infrastructure assets

Evaluation:	• must include:
	  • processing offers
	  • determining value for money
	  • checking and investigating
	  • collating information
	  • comparative statements
	  • accountability
	• may include staged procurement

Probity requirements:	• may include:
	  • accountability
	  • transparency

- confidentiality
- managing conflict of interest
- impartiality

- are maintained to:
  - encourage conformity to processes
  - facilitate accountability
  - ensure proponents are treated in a fair and equitable manner
  - encourage commercial completion
  - preserve public and private sector confidence in government processes

Allocation of business may include:

- single successful contractor
- multiple successful contractors
- standing offer (panel)
- multiple contracts as a result of a single request for offer

Contracts may include:

- memoranda of understanding and memoranda of agreement
- in-house option directives
- common use arrangements and standing offers
- inter and intra-government agreements
- service level agreements
- deeds of agreement

Unit Descriptor

This unit covers the ability to manage contracts. It includes undertaking preparations, establishing and maintaining contract management arrangements, monitoring and maintaining contract performance, and completing and reviewing contracts.

In practice, managing contracts overlaps with other generalist and specialist public sector work activities, such as upholding and supporting the values and principles of public service and local government, identifying and treating risks, exercising delegations, applying government processes, encouraging compliance with legislation in the public sector or local government, planning procurement, developing and distributing requests for offers and selecting providers.

Those who specialise in procurement are catered for by the units PSPPROC503B, PSPPROC504B, PSPPROC505A and PSPPROC506A, which address in depth the aspects of contract management performed by those who specialise in procurement.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit applies to those who are not specialist contract managers, but manage contracts as part of their role rather than as their primary role.

Licensing/Regulatory Information

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to manage a contract	1.1. ***Contract*** requirements, approvals and funding arrangements are confirmed and clarified where necessary, and obligations and limits of authority as contract manager are identified in line with contractual and organisational requirements. 1.2. Operational elements of the contract are confirmed and contact is made with ***specialists*** and ***stakeholders*** to clarify and assist with contract administration issues. 1.3. ***Key contract clauses*** are identified and their content is clarified as necessary to ensure contract requirements are understood. 1.4. Process, timings, and key performance indicators are identified from the contract and confirmed with stakeholders. 1.5. ***Risks*** are confirmed and a risk management plan is developed or reviewed in line with contract requirements and organisational policy and procedures. 1.6. ***Contract management strategy*** is developed or ***obtained*** and key details are entered from the contract. 1.7. Contract management team is formed and roles and responsibilities are allocated.
2. Implement a	2.1. Start-up or transition arrangements are confirmed

© Commonwealth of Australia, 2025 Industry Skills Australia

contract management strategy	and implemented according to contract requirements and organisational procedures. 2.2. Information and ***communication strategies*** are established to meet contractor, stakeholder and organisational needs. 2.3. Risk management plan is monitored for effectiveness and adapted as necessary during the life of the contract. 2.4. Relationship with contractors and stakeholders is established and managed according to organisational policy and procedures and probity requirements. 2.5. Specialist expertise is obtained as necessary for progress meetings and for advice on or resolution of contract issues. 2.6. Consideration is given to OHS, environmental and sustainability principles and corporate social responsibility principles as they apply to the contract. 2.7. Contract information/documentation is maintained for organisational purposes according to organisational policy and procedures.
3. Monitor and maintain performance of a contract	3.1. Obligations to contractor and stakeholders are met according to contractual arrangements and organisational financial management requirements. 3.2. ***Monitoring and control measures*** and performance indicators are used to manage performance of contract and ensure that all obligations under the agreement are being met. 3.3. ***Contract variations*** are managed in accordance with the contract, organisational policy and procedures, and probity requirements. 3.4. ***Disputes*** and complaints are investigated and ***resolved*** or referred according to contract requirements. 3.5. ***Negotiation*** of issues relating to the contract is managed and approvals are obtained according to stipulations in the contract proper. 3.6. Communication is maintained with all stakeholders on the performance of the contract according to organisational protocols and public sector standards.
4. Complete and review contract.	4.1. Client satisfaction with contract deliverables is confirmed. 4.2. Contracts are finalised, amended, cancelled or terminated according to contractual arrangements. 4.3. Strategies are applied to manage close-out, and ensure renewal of contract or transition to a new contract

© Commonwealth of Australia, 2025 Industry Skills Australia

meet organisational guidelines, probity requirements and public sector standards.

4.4. ***Review*** is undertaken of contract management, contractor performance relevant to measures at each stage of the contract, user satisfaction and audit results, when necessary.

4.5. Where measures or outcomes are not met in full, variances are documented and explained.

4.6. Information from the review and audit is used to report on contractor performance, to review contract management practice and make recommendations for improvement.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult and negotiate with contractors and stakeholders, involving complex oral and written exchanges of information
  - network, within probity boundaries, with diverse stakeholders and contractors
  - read complex documents, such as contracts, legislation and guidelines
  - provide feedback
- teamwork skills to:
  - work independently or under direction as appropriate to the situation
  - model team leadership approaches if appropriate
  - respond to diversity
  - refer issues to the correct person
- problem-solving skills to apply simple supply chain management and supplier issues management to the process of contract management
- initiative and enterprise skills to:
  - apply the content of complex documents, such as contracts, legislation and guidelines
  - apply OHS, environmental, sustainability and corporate social responsibility practices in the context of contract management
- planning and organising skills to manage contract documentation
- learning skills to keep up-to-date with relevant procurement legislation, policies and procedures
- technology skills to:

© Commonwealth of Australia, 2025 Industry Skills Australia

- operate organisational IT systems
- use electronic procurement templates

Required knowledge

- commonwealth, state or territory, and local government legislation, policies, practices and guidelines:
  - relating to contract management, including environmental purchasing and corporate social responsibility guidance
  - such as OHS and equity and diversity
- organisational procurement policies, practices and approval processes
- contract performance management
- privacy and confidentiality issues
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to managing contracts and relationships with contractors
- whole-of-life considerations relating to the ownership, operation and disposal/completion of the goods or services
- equal employment opportunity
- financial and accounting issues relevant to the contract

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Competency must be demonstrated in the ability to manage contracts consistently in accordance with legislative and organisational requirements.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • develop a contract management strategy in consultation with key stakeholders • develop a suitable contract management plan, using templates if available • implement the contract management plan • manage the performance of contractors • provide contractors with performance feedback • manage contract disputes to achieve prompt resolution and refer to higher authority when necessary • review contracts throughout to identify opportunities for

© Commonwealth of Australia, 2025 Industry Skills Australia

continuous improvement
- act within own delegations and refer issues to higher authority when necessary
- uphold probity standards in all dealings with contractors.

Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.

Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to procuring goods and services and managing contracts
- codes of conduct and codes of practice
- workplace scenarios and case studies relating to a range of procurement activities associated with managing contracts
- case studies that incorporate dilemmas, and probity requirements relating to managing contracts.

Method of assessment

The following assessment methods are suggested:

- questions to assess understanding of relevant legislation and procedures
- review of strategies and approaches adopted for managing contracts
- review of contract management plans, contracts, contract variations, contractor performance reports, contract closure documents and other documentation prepared by the candidate in a range of contexts
- review of stakeholder engagement approaches adopted by the candidate.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.

Guidance information for assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC401A Uphold and support the values and

© Commonwealth of Australia, 2025 Industry Skills Australia

principles of public service
- PSPGOV417A Identify and treat risks
- PSPGOV421A Exercise delegations
- PSPLEGN401A Encourage compliance with legislation in the public sector
- PSPPROC411A Plan procurement
- PSPPROC412A Develop and distribute requests for offers
- PSPPROC413A Select providers and develop contracts.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Contracts may include:
- memoranda of understanding and memoranda of agreement
- in-house option directives
- common use arrangements/standing offers
- inter and intra-government agreements
- letters of intent
- licensing agreements

Specialists may include:
- procurement and contracting
- corporate finance
- outsourced procurement or contracting advisers
- legal advisers
- functional/business
- technical
- business owner of the contract
- OHS
- environmental
- audit and probity
- appropriate cross-government department experts

Stakeholders may include:
- end users, customers or clients, and sponsors
- current or potential providers or suppliers
- technical or functional experts or advisers
- commonwealth, state or territory, and local

- legal advisers
- outsourced providers of contracting services

Communication strategies may include:

- setting regular times to talk, meet or check on progress
- protocols for dealing with other stakeholders
- emergency contact arrangements
- diary system to monitor milestones, timeframes, receipt of deliverables, etc.
- strategies for ensuring information flow at critical stages of the contract

Monitoring and control measures may include:

- inspections
- tests
- audits
- reviews
- meetings
- progress reports
- verifications
- identification of non-conformances
- corrective actions

Contract variations may include:

- change of scope
- change in prices
- change in quantity
- change to specifications
- negotiation of new terms and conditions
- dissolution of contracts
- in writing
- verbal variations, confirmed in writing
- variations by action/inaction

Disputes may include:

- disputes over:
  - requirements
  - delivery schedules
  - price changes
  - additional tasking
  - payment schedules
- complaints from third parties

Techniques available to ***resolve*** disputes include:

- conference
- negotiation
- mediation
- expert determination

© Commonwealth of Australia, 2025 Industry Skills Australia

	• arbitration • resort to contractual conditions • legal considerations
Negotiation of issues may include:	• contract variations • continuous improvement • innovations • non-compliance • consequences
Review may include:	• planning process • evaluation considerations at each stage of the contract • sources and methods of gathering data • role of audit trails, where applicable • measuring outputs • meeting client needs • considering new and different ways of delivering the service or product in the future • strategies for continuous improvement

Unit Descriptor

This unit covers the competency required by people whose primary role is contract management to implement strategies that ensure effective contract performance. It includes managing the business relationship, performance of the contract, and contract issues; and implementing a communication strategy.

In practice, managing contract performance may overlap with other public sector and local government generalist and specialist work activities, such as promoting the values and ethos of public service or local government, undertaking negotiations, promoting compliance with legislation in the public sector, finalising contracts, managing procurement risk, planning to manage a contract, planning for procurement outcomes and making procurement decisions.

PSPPROC414A Manage contracts is the appropriate unit for people undertaking contract management as a minor part of their work role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit applies to those who may or may not have had involvement in the procurement process preceding execution of the contract.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Manage the business relationship	1.1. ***Probity*** is managed in accordance with organisational requirements, ***legislation***, ***policy and public sector standards***. 1.2. Obligations to the contractor are met according to contractual arrangements. 1.3. Consideration of conflicts of interest and their resolution are recorded according to public sector standards and organisational requirements. 1.4. Business relationship with contractor is managed in the public interest through ***formal and informal mechanisms*** according to public sector standards and organisational policy and procedures.
2. Manage performance of the contract	2.1. Start-up or transition arrangements are implemented according to contract requirements and organisational procedures. 2.2. ***Contract management plan*** is monitored for effectiveness on a regular basis and adapted as necessary during the life of the contract. 2.3. Performance of ***contract*** is monitored against key performance indicators and tracking milestones to ensure obligations under the agreement are being met. 2.4. E-procurement, financial and other resources are managed as necessary according to contract

© Commonwealth of Australia, 2025 Industry Skills Australia

	requirements and organisational procedures. 2.5. Emerging and potential ***risks*** are identified and managed according to organisational risk management procedures.
3. Manage contract issues	3.1. Contract ***variations*** are managed according to contract management plan, organisational policy and procedures, and probity requirements. 3.2. ***Early signs of under-performance*** are identified, and ***action is taken to improve performance*** to the agreed level and documented according to contract's communication and information policy. 3.3. ***Disputes*** and complaints are investigated and ***resolved*** or referred according to contract's management plan and contractual arrangements. 3.4. ***Negotiation of issues*** relating to the contract is conducted and approvals are obtained according to stipulations in the contract. 3.5. Conflict is addressed and resolved where possible or other ***actions*** are taken according to contractual arrangements. 3.6. Non-compliance with codes of conduct, codes of practice and standards of behaviour is dealt with in a timely manner.
4. Implement communication and information strategy	4.1. ***Communication*** on the performance of the contract is maintained with all stakeholders according to organisational protocols and public sector standards. 4.2. Management reporting is carried out according to tracking milestones and organisational requirements. 4.3. ***Contract information*** is maintained for ***organisational purposes*** according to organisational policy and procedures.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult and negotiate with contractors and stakeholders, involving complex oral and written exchanges of information
  - network, within probity boundaries, with contractors and stakeholders
  - read complex documents, such as contracts, legislation and guidelines

© Commonwealth of Australia, 2025 Industry Skills Australia

    - write management reports and keep records of meetings, liaison, notes and follow-up actions
    - provide feedback
- teamwork skills to:
    - build effective working relationships with contractors and stakeholders, within probity boundaries
    - model effective team management approaches
    - respond to diversity
    - refer issues to the correct person
- problem-solving skills to:
    - resolve disputes, conflict and complaints
    - make judgements about when to refer disputes, conflict and complaints to others
    - apply understanding of supplier issues/supply chain management in the context of contract management
- initiative and enterprise skills to:
    - apply the content of complex documents, such as contracts, legislation and guidelines
    - apply OHS, environmental, sustainability and corporate social responsibility practices in the context of contract management
- planning and organising skills to:
    - manage contract documentation
    - plan and organise contract meetings, reports and reviews
- learning skills to keep up-to-date with:
    - best practice examples in procurement practice
    - relevant procurement legislation, policies and procedures
- technology skills to:
    - operate organisational IT systems
    - use electronic procurement templates

Required knowledge

- commonwealth, state or territory, and local government legislation, policies, practices and guidelines:
    - relating to contract management, including environmental purchasing and corporate social responsibility guidance
    - such as OHS and equity and diversity
- organisational procurement policies, practices and approval processes
- contract management for a range of contractual situations
- privacy and confidentiality issues
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour

- environmental, sustainability and corporate social responsibility principles relevant to the management of contracts

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Competency must be demonstrated in managing contract performance consistently in accordance with legislative and organisational requirements.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- develop and implement an appropriate contract management plan, using templates where available
- develop and implement an appropriate transition plan, using templates where available
- develop and maintain a sound business relationship with contractors within probity guidelines, upholding probity standards in all dealings with them
- manage contractor performance so that goods and services are delivered according to the contract
- provide the contractor with performance feedback
- deal promptly and proactively with contract issues and disputes and refer to higher authority when this is not possible
- communicate effectively with internal and external stakeholders about the operation of the contract.

Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate

- PSPPROC507A Plan for procurement outcomes
- PSPPROC508A Make procurement decisions.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Probity principles:

- may include:
  - accountability
  - transparency
  - confidentiality
  - managing conflict of interest
  - impartiality
- are maintained to:
  - ensure conformity to processes
  - facilitate accountability
  - ensure proponents are treated in a fair and equitable manner
  - encourage commercial completion
  - preserve public and private sector confidence in government processes.

Legislation, ***policy and public sector standards*** may include:

- financial management legislation
- government procurement, purchasing and contracting legislation, policy and guidelines
- council rules and by-laws
- public sector standards
- codes of conduct, codes of practice and standards of individual behaviour
- cross-cultural and social justice issues
- environmental and sustainability policies
- corporate social responsibility policies.

Formal and informal mechanisms may include:

- non-confrontational interaction
- hospitality
- formal contract variations
- formal negotiations

© Commonwealth of Australia, 2025 Industry Skills Australia

	• formal and informal meetings • regular and *ad hoc* reporting • review processes.
Contract management plan may include:	• risk management plan • contingency plan • communication and public relations plan • human resource management plan • disposal plan • contract review plan • setting up routines • quality assurance systems • arrangements for transfer of legal responsibility • insurances • strategies to avoid implied acceptance of varied conditions through non-enforcement of contractual obligations • environmental/green procurement, sustainability and corporate social responsibility principles.
Contracts may include:	• formal written contracts • standing offers (panels) • multi-use lists and similar arrangements • inter and intra-government agreements • letters of intent • memoranda of understanding and memoranda of agreement • licensing agreements • in-house option directives.
Risks may include:	• supplier inability to meet obligations • end user or buyer inability to meet obligations • scope creep • client requirements not fully understood • becoming too dependent on a single supplier • disruption to continuity and consistency of service if too many suppliers are selected • other environmental influences • corruption risks • probity risks.
Variation to agreements may arise from:	• change of scope • negotiation of new terms and conditions • dissolution of contracts

© Commonwealth of Australia, 2025 Industry Skills Australia

	• inability to deliver.
Early signs of under-performance may be detected through:	• tracking milestones • regular meetings • meeting records and follow-up • file management and audit trail • stakeholder surveys on performance • ongoing review of deliverables.
Actions taken to improve performance may include:	• discussion with contractor • regular interaction • ongoing performance feedback • provision of support • expert advice.

Disputes may include:	• disputes over:
	  • requirements
	  • delivery schedules
	  • price changes
	  • additional tasking
	  • payment schedules
	• complaints from third parties
	• formal and informal.

Techniques available to ***resolve*** disputes include:	• conference • negotiation • mediation • arbitration • resort to contractual conditions • litigation.
Negotiation of issues may include:	• contract variations • continuous improvement • innovations • non-compliance • consequences.
Actions as a result of unresolved conflict may include:	• mediation • court action • termination of contract.
Communication strategies may include:	• clear communication • understanding the needs of the service provider and the client • setting regular times to talk, meet or check on progress

© Commonwealth of Australia, 2025 Industry Skills Australia

- protocols for dealing with other stakeholders
- emergency contact arrangements
- diary system to monitor milestones, timeframes, receipt of deliverables, etc.
- strategies for ensuring information flow at critical stages of the contract.

Contract information may include:

- contract and variations
- contract management plan
- financial records, including funding submissions, budgets, delegations, invoices and payments
- contractor performance information
- contract reports
- information about disputes and other issues
- complaints and compliments.

Organisational purposes may include:

- probity and accountability
- budget reporting
- feeding into future procurement processes
- performance management of suppliers
- internal and external reviews and audits
- governance requirements
- legal compliance.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Complete contracts	1.1. ***Contracts*** due to expire are reviewed to determine future requirements, and options for meeting those requirements are canvassed in sufficient time for decision making and transition to occur. 1.2. Strategies are implemented to manage closure, renewal of contracts, or transition to a new contract according to organisational guidelines, probity requirements and public sector standards. 1.3. Contracts are finalised, amended, cancelled or terminated according to contractual arrangements. 1.4. Consultation is undertaken with contractor, and a contract completion report is issued addressing the performance of contractor and contract manager according to organisational requirements and public sector standards.
2. Implement contract review strategy	2.1. ***Timing of contract review*** is determined to ensure a smooth transition to post-contract arrangements. 2.2. ***Contract review*** is undertaken covering contract management, contractor performance relevant to measures at each stage of the contract, user satisfaction and audit results. 2.3. Where measures or outcomes are not met in full, ***variances*** are documented and explained.

© Commonwealth of Australia, 2025 Industry Skills Australia

2.4. Review report is prepared documenting outcomes against plans, final costs, user satisfaction, lessons learnt and any shortcomings in contract planning, management policies and procedures.

2.5. Recommendations for improvement are made and supported with evidence, as a result of lessons learnt.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult and negotiate with contractors and stakeholders, involving complex oral and written exchanges of information
  - write review and closure reports
  - make recommendations about improvements to the contract management process
  - provide feedback
- teamwork skills to:
  - model effective team management approaches
  - respond to diversity
  - refer issues to the correct person
- problem-solving skills to finalise outstanding issues so the contract can be closed
- initiative and enterprise skills to identify improvements to the contract management process of contract management
- planning and organising skills to:
  - manage contract closure documentation
  - plan and organise contract closure meetings, reports and reviews
- learning skills to keep up-to-date with:
  - best practice examples in procurement practice
  - relevant procurement legislation, policies and procedures
- technology skills to:
  - operate organisational IT systems
  - use electronic procurement templates

Required knowledge

- commonwealth, state or territory, and local government legislation, policies, practices and guidelines:
  - relating to contract finalisation and review, including environmental purchasing

© Commonwealth of Australia, 2025 Industry Skills Australia

and corporate social responsibility guidance
    - such as OHS and equity and diversity
- organisational procurement policies, practices and approval processes
- contract finalisation and review for a range of contractual situations
- privacy and confidentiality issues, including the requirement to appropriately classify information to ensure transparency as well as to treat bids as commercial-in-confidence
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to finalising contracts
- information, knowledge management and record keeping for official or historical records
- equal employment opportunity
- financial and accounting issues relevant to the contract
- aspects of contract law, trade practices law and commercial law relevant to the finalisation of contracts relating to complex procurement

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Competency must be demonstrated in the ability to finalise contracts consistently in accordance with legislative and organisational requirements.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • develop and implement an appropriate review strategy for contracts that are ending • complete relevant contract closure processes • ensure appropriate records have been kept • apply contract review techniques • make written recommendations for improvements to the procurement process based on review results • uphold probity standards in all dealings with contractors. **Consistency in performance** Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.
Context of and specific resources for	The unit of competency is to be assessed in the workplace or a

© Commonwealth of Australia, 2025 Industry Skills Australia

assessment	simulated workplace environment. Access may be required to: • legislation, policy, procedures and protocols relating to procuring goods and services, and managing and finalising contracts • codes of conduct and codes of practice • workplace scenarios and case studies relating to a range of procurement activities associated with finalising contracts • case studies that incorporate dilemmas, and probity requirements relating to finalising contracts.
Method of assessment	The following assessment methods are suggested: • questions to assess understanding of relevant legislation and procedures • review of strategies and approaches adopted for finalising contracts • review of contract management plans, contracts, contract variations, contractor performance reports, contract closure plans, transition plans, risk assessments and other contract finalisation documentation prepared by the candidate in a range of contexts • review of stakeholder engagement approaches adopted by the candidate. In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.
Guidance information for assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • PSPETHC501B Promote the values and ethos of public service • PSPGOV507A Undertake negotiations • PSPLEGN501B Promote compliance with legislation in the public sector • PSPPROC503B Manage contract performance • PSPPROC505A Manage procurement risk • PSPPROC506A Plan to manage a contract • PSPPROC507A Plan for procurement outcomes • PSPPROC508A Make procurement decisions.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Contracts may include:

- formal written contracts
- standing offers (panels)
- multi-use lists and similar arrangements
- inter and intra-government agreements
- letters of intent
- memoranda of understanding and memoranda of agreement
- licensing agreements
- in-house option directives.

Timing of contract review may include:

- periodically throughout the contract
- when performance issues arise
- prior to contract completion
- concurrently with contract renewal process
- after the contract is completed.

Contract review may include:

- planning process
- evaluation considerations at each stage of contract
- sources and methods of gathering data
- role of audit trails
- measuring outputs
- key performance indicators and their review
- meeting client needs
- innovation
- strategies for continuous improvement.

Variances may include:

- change of scope
- negotiation of new terms and conditions
- strategies for dealing with contractor performance
- dissolution of contract.

PSPPROC505A Manage procurement risk

Modification History

PSPPROC505A Release 2: Layout adjusted. No changes to content.

PSPPROC505A Release 1: Primary release.

Unit Descriptor

This unit covers the ability to manage risks associated with all stages of procurement. It includes assessing risk, and preparing, implementing and reviewing a risk management plan.

In practice, managing procurement risk may overlap with other public sector and local government generalist and specialist work activities, such as promoting the values and ethos of public service or local government, undertaking negotiations, promoting compliance with legislation in the public sector, managing contract performance, finalising contracts, planning to manage a contract, planning for procurement outcomes and making procurement decisions.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

The unit applies to those in specialist procurement who plan for procurement risks across all stages of the procurement cycle.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a	Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold***

unit of competency. ***italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess risk	1.1. ***Legislation***, ***policies***, business processes and resources impacting on the contract are identified. 1.2. Procurement outcomes and internal inputs necessary for effective performance are identified. 1.3. Critical success factors necessary for the achievement of procurement outcomes are identified and confirmed. 1.4. Non-trivial ***procurement risks*** relating to the procurement activity are identified. 1.5. Potential ***probity risks*** are identified. 1.6. Causes of risk are analysed and their potential impact is determined. 1.7. Likelihood and consequences of risks are determined and ***risk assessments*** are developed.
2. Prepare risk management plan	2.1. Preliminary ***risk management*** plan is developed that addresses risks identified in planning phase of procurement activity. 2.2. Risks that will be accepted and those requiring ***treatment*** are identified. 2.3. Treatments that reduce risks to an acceptable level are designed according to organisational requirements. 2.4. Plan for implementing new treatments, additional ***risk controls*** or modifications to existing controls is developed. 2.5. Risk level is re-checked at key points during procurement process, and risk management plan is reviewed and adjusted to cover procurement activity risks not already identified.
3. Implement and review risk management plan	3.1. Risk controls and treatments are implemented according to the treatment plan. 3.2. Risk management plan is implemented, and regularly reviewed and revised to include potential or emerging risks during the life of the procurement activity.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.3. Review results are used to improve risk treatments and controls.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - write risk management plans using templates or a recognised risk management methodology
  - interpret complex, formal documents
  - make verbal and written recommendations about the management of procurement and contracting risks
  - provide feedback
- teamwork skills to:
  - model effective team management approaches
  - respond to diversity
  - refer issues to the correct person
- problem-solving skills to analyse risks associated with procurement and contract using a recognised risk management methodology
- initiative and enterprise skills to identify procurement risks and opportunities using a recognised risk management methodology
- planning and organising skills to manage and update the risk management plan
- learning skills to keep up-to-date with:
  - best practice examples in procurement practice
  - relevant procurement legislation, policies and procedures
- technology skills to:
  - operate organisational IT systems
  - use electronic procurement templates

Required knowledge

- commonwealth, state or territory, and local government legislation, policies, practices and guidelines:
  - relating to contract risk management
  - such as OHS and equity and diversity
- organisational procurement policies, practices and approval processes
- risk management procedures
- probity principles and issues, particularly as they relate to probity risks

© Commonwealth of Australia, 2025 Industry Skills Australia

- codes of conduct, codes of practice and standards of individual behaviour relating to the procurement process
- risks associated with financial and accounting issues relevant to procurement and contract management
- supplier issues and supply chain management in the context of procurement risk management
- aspects of law of contracts, trade practices law and commercial law relevant to risk management relating to complex procurement
- OHS requirements relevant to procurement and contract management
- equal employment opportunity relevant to procurement and contract management
- environmental, sustainability and corporate social responsibility principles relevant to procurement and contract management

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Competency must be demonstrated in the ability to manage procurement risk consistently in accordance with legislative and organisational requirements.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- use recognised risk management methodologies to identify and assess risks for all stages of a procurement activity
- prepare a risk management plan for a procurement activity, using templates where available
- implement risk management plans
- review and revise risk management plans to reflect the changing procurement context and environment during the procurement activity
- liaise and consult with stakeholders to ensure that risks are appropriately identified and managed
- make recommendations to higher management about options for the management of procurement risks.

Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.

Context of and specific

The unit of competency is to be assessed in the workplace or a

© Commonwealth of Australia, 2025 Industry Skills Australia

resources for assessment

simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to procuring goods and services and managing procurement risk
- codes of conduct and codes of practice
- workplace scenarios and case studies relating to a range of procurement activities associated with managing procurement risk
- case studies that incorporate dilemmas and probity requirements relating to managing procurement risk.

Method of assessment

The following assessment methods are suggested:

- questions to assess understanding of relevant legislation and procedures
- review of strategies and approaches adopted for managing procurement risk
- review of risk assessments, risk management plans, contract management plans, contracts, probity plans, budgets, transition plans and other documentation prepared by the candidate in a range of contexts
- review of stakeholder engagement approaches adopted by the candidate.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.

Guidance information for assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC501B Promote the values and ethos of public service
- PSPGOV507A Undertake negotiations
- PSPLEGN501B Promote compliance with legislation in the public sector
- PSPPROC503B Manage contract performance
- PSPPROC504B Finalise contracts
- PSPPROC506A Plan to manage a contract
- PSPPROC507A Plan for procurement outcomes
- PSPPROC508A Make procurement decisions.

© Commonwealth of Australia, 2025 Industry Skills Australia

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Legislation and policies may include:	• commonwealth or state and territory legislation, including equal employment opportunity and anti-discrimination law • council rules and by-laws • national and international codes of practice and risk management standards • organisational policies and practices • government policy • codes of conduct and codes of practice • national competition policy.
Procurement risks may include:	• contextual and environmental factors • too many or too few potential suppliers • unsophisticated marketplace • timeframes for procurement too short • inappropriate method of procurement used • inadequate budget and other resources • inappropriate form of contract selected • supplier inability to meet obligations • end user or buyer inability to meet obligations • unclear contract terms and conditions • contractual disputes • factors outside the control of either party, such as global health pandemic, failure of third-party businesses or natural disasters • implications if dependence on one supplier, versus risks in lack of continuity and consistency of services provided • changes to government policy.
Probity risks may include:	• corruption • fraud • conflict of interest (actual, perceived or potential) • unfair treatment of providers or potential providers • misuse of resources • misuse of information

© Commonwealth of Australia, 2025 Industry Skills Australia

	• manipulation of the marketplace.
Risk assessments differentiate between risks that have:	• high impact/consequence/likelihood • low impact/consequence/likelihood.
Risk management is often considered in relation to an organisation's:	• people • assets and physical environment • reputation and image • legal issues • business continuity • finances • stated outcomes.
Risk ***treatments*** may include those that:	• avoid risk • transfer risk • reduce likelihood • reduce consequence • partially reduce assessed risk level so that risk can be accepted.
Risk controls may include:	• legislation • government policies and guidance • organisational policies, processes and procedures • standardised documentation and templates • hierarchy of controls, such as fraud control plans and security plans • staff skills and knowledge.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Confirm contract requirements	1.1. ***Legislation***, ***public sector standards and organisational requirements*** relating to ***probity***, financial management, approvals and ***other considerations*** are identified for inclusion in the ***contract*** management plan. 1.2. ***Contract requirements*** are re-confirmed with all parties. 1.3. Obligations to the contractor, limits of authority and ***delegations*** relating to contract are determined according to contractual arrangements and organisational policy and procedures. 1.4. Start-up or transition arrangements are confirmed.
2. Prepare contract management plan	2.1. ***Contract risks*** are identified and risk management plan is developed in line with contract requirements and organisational policy and procedures. 2.2. Procedures to identify, receive and address contract ***variations*** are determined according to contract requirements and organisational policy and procedures. 2.3. ***Procedures*** to investigate, resolve or refer ***disputes*** or complaints are determined according to contract requirements and organisational policy and procedures. 2.4. Key performance indicators are developed and negotiated, and ***administrative processes*** are identified and approved for the life of the contract according to organisational policy procedures. 2.5. ***Contract management plan*** that addresses key elements is documented, approved and maintained according to organisational requirements. 2.6. Expected standards of behaviour, probity and privacy principles are applied to all elements of contract management plan. 2.7. Environmental, sustainability and corporate social

© Commonwealth of Australia, 2025 Industry Skills Australia

	responsibility principles are applied to all elements of contract management plan.
3. Develop stakeholder relationships	3.1. ***Stakeholder*** networks and relationships are identified. 3.2. Networking strategies are used, within probity boundaries, to establish, develop and maintain working relationships to promote benefits to the contract requirements. 3.3. Confidence of stakeholders is developed and maintained through high standards of behaviour and ethical conduct. 3.4. Negotiation strategies are used to achieve positive outcomes when difficult situations arise. 3.5. Communication requirements are identified and confirmed in line with contractual obligations and stakeholder needs.
4. Implement contract strategies	4.1. Requirements of confidentiality and freedom of information are identified for the contract. 4.2. ***Communication/information strategy*** is developed that matches needs of the organisation, the contract and the contractor's business environment. 4.3. Contract review requirements are established with stakeholders. 4.4. ***Contract review strategy*** is developed to review management of the contract, contractor performance and user satisfaction.
5. Implement contractual arrangements	5.1. Business relationship with contractor is established and managed according to organisational policy and procedures and probity requirements. 5.2. Start-up or transition arrangements are implemented. 5.3. Financial, administrative and information management processes are established. 5.4. Contractual arrangements are implemented according to contract management plan. 5.5. Appropriate ***contract records*** are maintained for the life of the contract.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

© Commonwealth of Australia, 2025 Industry Skills Australia

- communication skills to:
  - consult and negotiate with contractors and stakeholders
  - network, within probity boundaries, with contractors and stakeholders
  - develop a written contract management plan and sub-plans
  - read complex documents, such as contracts, legislation and guidelines
  - provide feedback
- teamwork skills to:
  - model effective team management approaches
  - respond to diversity
  - refer issues to the correct person
- problem-solving skills to:
  - apply OHS requirements in the context of contract management
  - apply understanding of supplier issues and supply chain management in the context of procurement risk management
- initiative and enterprise skills to:
  - apply the content of complex documents, such as contracts, legislation and guidelines
  - apply OHS, environmental, sustainability and corporate social responsibility practices in the context of planning for contract management
- planning and organising skills to manage and update the contract management plan and sub-plans
- learning skills to keep up-to-date with:
  - best practice examples in procurement practice
  - relevant procurement legislation, policies and procedures
- technology skills to:
  - operate organisational IT systems
  - use electronic procurement templates

Required knowledge

- commonwealth, state or territory, and local government legislation, policies, practices and guidelines:
  - relating to contract management, including environmental purchasing, sustainability and corporate social responsibility guidance relevant to the contract
  - such as OHS and equity and diversity
- organisational procurement policies, practices and approval processes
- contract management planning for a range of contractual situations
- privacy and confidentiality issues
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to management of contracts and relationships with contractors
- whole-of-life considerations

© Commonwealth of Australia, 2025 Industry Skills Australia

- financial and accounting issues relevant to the contract
- equal employment opportunity relevant to the contract
- OHS requirements relevant to the contract

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Competency must be demonstrated in the ability to plan to manage a contract consistently in accordance with legislative and organisational requirements.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- develop a contract management strategy in consultation with key stakeholders
- develop a contract management plan suited to more complex contracts, using templates if available, which may include sub-plans such as risk, transition and probity
- implement the contract management strategy and the contract management plan
- develop and maintain a sound business relationship with internal and external stakeholders
- manage the performance of contractors to ensure the effective delivery of value for money outcomes under the contract
- manage more complex contract disputes to achieve prompt resolution and refer to higher authority when necessary
- review contract throughout to identify opportunities for continuous improvement
- act within own delegations and refer issues to higher authority when necessary.

Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.

Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to procuring goods and services and managing contracts

© Commonwealth of Australia, 2025 Industry Skills Australia

- codes of conduct and codes of practice
- workplace scenarios and case studies relating to a range of procurement activities associated with planning to manage a contract
- case studies that incorporate dilemmas, and probity requirements relating to planning to manage a contract.

Method of assessment

The following assessment methods are suggested:

- questions to assess understanding of relevant legislation and procedures
- review of strategies and approaches adopted for planning to manage a contract
- review of contract management plans, contracts, probity plans, budgets, transition plans, approvals and sign-offs, and other documentation prepared by the candidate in a range of contexts
- review of stakeholder engagement approaches adopted by the candidate.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.

Guidance information for assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC501B Promote the values and ethos of public service
- PSPGOV507A Undertake negotiations
- PSPLEGN501B Promote compliance with legislation in the public sector
- PSPPROC503B Manage contract performance
- PSPPROC504B Finalise contracts
- PSPPROC505A Manage procurement risk
- PSPPROC507A Plan for procurement outcomes
- PSPPROC508A Make procurement decisions.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work

© Commonwealth of Australia, 2025 Industry Skills Australia

situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Legislation**, **public sector standards and organisational requirements may include:	• financial management legislation • government procurement, purchasing and contracting legislation, policy and guidelines • ethics standards • codes of conduct and codes of practice • environmental purchasing

Probity principles:	• may include:
	  • accountability
	  • transparency
	  • confidentiality
	  • managing conflict of interest
	  • impartiality
	• are maintained to:
	  • ensure conformity to processes
	  • facilitate accountability
	  • ensure proponents are treated in a fair and equitable manner
	  • encourage commercial completion
	  • preserve public and private sector confidence in government processes

Other considerations may include:	• corporate governance • intellectual property • privacy • freedom of information requirements • public liability insurance considerations
Contracts may include:	• formal written contracts • standing offers (panels) • multi-use lists and similar arrangements • inter and intra-government agreements • letters of intent • memoranda of understanding and memoranda of agreement • licensing agreements • in-house option directives
Contract requirements may include:	• terms and conditions • specifications • risk • managing hospitality • clauses dealing with:

© Commonwealth of Australia, 2025 Industry Skills Australia

- variations
- insurances
- notices
- disputes
- intellectual property
- privacy
- confidentiality
- milestones
- payments
- breaches

Delegations may include:

- financial delegations
- procurement delegations
- compliance with instructions or finance circulars
- special consideration if they concern travel, computers or software, leasing arrangements or issuing indemnities, or other special categories of goods and services
- other delegations, such as disposals and human resources
- confirmation by chief financial officer
- ministerial authorisation

Contract risks may include:

- contextual/environmental factors
- supplier inability to meet obligations
- end user or buyer inability to meet obligations
- unclear contract terms and conditions
- contractual disputes
- factors outside the control of either party, such as global health pandemic, failure of third-party businesses, and natural disasters
- implications if dependence on one supplier, versus risks in lack of continuity and consistency of services provided

Variation to agreements may arise from:

- change of scope
- negotiation of new terms and conditions
- dissolution of contracts

Procedures to resolve disputes may include:

- conference
- negotiation
- mediation
- arbitration
- resort to contractual conditions
- litigation

Disputes may include:

- disputes over:
  - requirements
  - delivery schedules

© Commonwealth of Australia, 2025 Industry Skills Australia

- price changes
- additional tasking
- payment schedules
- complaints from third parties

Administrative processes may include:

- file and records management
- audit trail
- methodology for recording meetings
- notes and follow-ups of meetings and actions agreed
- management reporting

Contract management plan may include:

- risk management plan
- contingency plan
- communication and public relations plan
- human resource management plan
- disposal plan
- contract review plan
- setting up routines
- quality assurance systems
- arrangements for transfer of legal responsibility
- insurances
- strategies to avoid implied acceptance of varied conditions through non-enforcement of contractual obligations
- environmental/green procurement, sustainability and corporate social responsibility principles

Stakeholders may include:

- contractor
- buying organisation
- board of management
- steering committee
- advisory panel
- staff
- union
- industry
- client
- end user
- parliamentarian
- the public

Communication/ information strategies may include:

- setting regular times to talk, meet or check on progress
- protocols for dealing with other stakeholders
- appeals mechanisms for resolving conflict between clients and service providers
- clear communication
- reliability

© Commonwealth of Australia, 2025 Industry Skills Australia

	• emergency contact arrangements • diary system to monitor milestones, timeframes, receipt of deliverables, etc. • strategies for ensuring information flow at critical stages of the contract
Contract review strategy may include:	• planning process • evaluation considerations at each stage of the contract • sources and methods of gathering data • role of audit trails • measuring outputs • meeting client needs • innovation • strategies for continuous improvement
Contract records may include:	• contract and variations • contract management plan • financial records, such as funding submissions, budgets, delegations, invoices and payments • contractor performance information • contract reports • information about disputes and other issues • complaints and compliments

PSPPROC603C Divest strategic assets

Modification History

PSPPROC603C Release 2: Layout adjusted. No changes to content.

PSPPROC603C Release 1: Primary release.

Unit Descriptor

This unit covers the competencies required to dispose of high risk and high value government assets, such as government businesses, property, strategic infrastructure, intellectual property and other high value items. It includes identifying strategic assets for disposal, developing a disposal plan for divesting strategic assets, divesting the assets and evaluating the divestment activity.

In practice, divesting strategic assets may occur in the context of other generalist and specialist work activities, such as maintaining and enhancing confidence in public service or local government, establishing and maintaining strategic networks, managing compliance with legislation in the public service or local government, managing risk, developing a business case, planning for strategic procurement, coordinating strategic procurement, negotiating strategic procurement and managing strategic contracts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit applies to people who may have to organise or carry out the divestment of strategic assets as part of their role.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify strategic assets for divestment	1.1. ***Strategic assets*** are identified and delineated for divestment in accordance with ***legislation***, ***government objectives***, ***policies***, ***practice*** and probity requirements. 1.2. Disposal plans developed at the time of purchase are identified and examined. 1.3. Potential market value of assets is determined and substantiated.
2. Develop a disposal plan for divesting strategic assets	2.1. Business case to commence the divestment strategy is developed which includes examination of ***options*** for disposal and explanation of the recommended strategy. 2.2. Continuing government or organisational obligations post-divestment are identified and strategies are developed to address them. 2.3. ***Disposal plan*** is developed. 2.4. Disposal plan is evaluated and modified prior to approval, if required. 2.5. ***Required approvals*** are obtained according to organisational policy and procedures.
3. Implement disposal plan	3.1. Approved disposal plan is actioned. 3.2. Business case is developed, based on prices offered and according to disposal plan. 3.3. Negotiations are conducted and finalised according to the plan.
4. Evaluate divestment activity	4.1. Disposal plan, immediate outcome of divestment, and long-term outcomes for service provision and government are evaluated. 4.2. Recommendations are made for future divestment.

© Commonwealth of Australia, 2025 Industry Skills Australia

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult and negotiate with stakeholders
  - network, within probity boundaries, with stakeholders
  - build and manage effective working relationships
  - write business cases, disposal plans, reports, submissions and other complex documents
  - read complex documents, such as contracts, legislation and guidelines
  - provide feedback
- teamwork skills to:
  - manage strategic relationships
  - model effective management and leadership approaches
  - respond to diversity
  - refer issues to the correct person
- problem-solving skills to apply decision-making processes or methodologies
- initiative and enterprise skills to:
  - identify and assess divestment options for strategic assets
  - apply OHS, environmental, sustainability and corporate social responsibility practices in the context of divesting strategic assets
- planning and organising skills to manage financial and other resources
- learning skills to keep up-to-date with:
  - best practice examples in strategic procurement
  - relevant procurement legislation, policies and procedures
- technology skills to:
  - operate organisational IT systems
  - use electronic procurement templates

Required knowledge

- commonwealth, state or territory, and local government legislation, policies, practices and guidelines:
  - relating to divesting strategic assets
  - such as OHS and equity and diversity, and environment
- commonwealth, state or territory, and local government disposal guidelines, policies and practices
- financial rules and regulations relating to divestment of strategic assets
- legal requirements of government strategic asset disposal
- implications of divestment of service provision

© Commonwealth of Australia, 2025 Industry Skills Australia

- whole-of-life considerations
- disposal approval processes
- probity principles and issues
- codes of practice, codes of conduct and standards of individual behaviour relating to asset divestment
- law of contract relating to strategic asset disposal
- trade practices law relating to strategic asset disposal
- commercial law relating to divesting strategic assets
- environmental, sustainability and corporate social responsibility principles relevant to the disposal of strategic assets

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Competency must be demonstrated in divesting strategic assets consistently and in accordance with legislative and organisational requirements.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- use different methods to identify strategic assets for disposal
- develop a strategy for the divestment of strategic assets that considers all relevant disposal options
- develop a disposal plan
- implement a disposal plan
- review the disposal activity and make recommendations about improvements that could be implemented in future disposals of strategic assets
- act within own delegations and refer issues to higher authority when necessary.

Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.

Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to

© Commonwealth of Australia, 2025 Industry Skills Australia

divesting assets at the strategic level
- codes of conduct and codes of practice
- long-term government policy papers, such as White Papers
- workplace scenarios and case studies relating to a range of strategic procurement and disposal activities.

Method of assessment

The following assessment methods are suggested:

- questions to assess understanding of relevant legislation and procedures
- review of strategies and approaches adopted for divesting strategic assets
- review of strategic procurement plans, business cases, strategic disposal plans, disposal budgets, disposal tender documentation, formal sign-offs and approvals, and other documentation prepared or reviewed by the candidate in a range of contexts
- review of stakeholder engagement approaches adopted by the candidate.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Candidates for this qualification must demonstrate a high level of understanding and practical workplace application of underpinning knowledge. Questioning techniques should suit the language and literacy levels of the candidate.

Guidance information for assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC601B Maintain and enhance confidence in public service
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPMNGT607B Develop a business case
- PSPMNGT608B Manage risk
- PSPMNGT609B Formulate business strategies
- PSPPM601B Direct complex project activities
- PSPPROC606B Negotiate strategic procurement
- PSPPROC607A Manage strategic contracts.

© Commonwealth of Australia, 2025 Industry Skills Australia

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Strategic assets may include:	• property, including housing:
	  • listed properties
	  • highly polluted properties
	• high-end military equipment
	• strategic infrastructure
	• intellectual property
	• high value items, e.g. computer mainframes
	• government businesses.

Legislation, ***government objectives***, ***policies and practice*** may include:	• commonwealth, state and territory, and local government legislation and regulations
	• council rules and by-laws
	• national competition policy
	• sectoral or organisational policies on:
	  • procurement
	  • disposal
	  • human resource management
	  • severance, transfer and redeployment
	• environmental legislation and policy
	• broad government policies, including Minister's public announcements and party platforms.

Options for divestment may include:	• sale of business or business assets • sale of business with strategic assets leased • employee buy-out • tender • auction.
Disposal plan takes account of:	• human resources • industrial relations issues • service continuity • government policies • environmental, sustainability and corporate social responsibility principles.
Required approvals may include:	• Minister • Cabinet • regulatory agencies.

PSPPROC604B Plan for strategic procurement

Modification History

PSPPROC604B Release 2: Layout adjusted. No changes to content.

PSPPROC604B Release 1: Primary release.

Unit Descriptor

Unit descriptor	This unit covers the ability to plan for highly complex, innovative, sophisticated and often long-term strategic procurement within established guidelines, policies and procedures. This may involve high-level capability development for government. Strategic procurement is high risk, often involving political elements. The unit includes conducting a procurement business analysis, defining procurement requirements, and justifying procurement expenditure. In practice, planning for strategic procurement may occur in the context of other generalist and specialist work activities, such as maintaining and enhancing confidence in public service or local government, establishing and maintaining strategic networks, managing compliance with legislation in the public service or local government, managing risk, developing a business case, coordinating strategic procurement, negotiating strategic procurement and managing strategic contracts. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit applies to those in specialist procurement and contracting.

Licensing/Regulatory Information

Not applicable.

© Commonwealth of Australia, 2025 Industry Skills Australia

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Conduct procurement business analysis	1.1. Organisation's corporate procurement plan, procurement-related expenditure, associated levels of risk and supply markets are analysed. 1.2. ***Procurement*** profile is prepared that identifies past and projected ***procurement expenditure*** and associated levels of ***risk***. 1.3. ***Supply positioning*** is undertaken, categorising goods and services by their relative expenditure and difficulty of securing supply, to assist in the development of procurement objectives. 1.4. ***Supplier preferencing*** is used to identify how ***suppliers*** view the organisation as a client. 1.5. ***Other factors likely to affect strategic procurement*** are identified and documented according to organisational requirements. 1.6. Due diligence is undertaken to investigate existing relationships with suppliers, notably coordinated procurement contracts (CPCs) or coordinated procurement opportunities.
2. Define procurement requirements	2.1. Procurement requirements are determined through consultation and negotiation with ***stakeholders*** and experts and defined to reflect ***organisational needs***. 2.2. Accountability measures are identified and

© Commonwealth of Australia, 2025 Industry Skills Australia

	incorporated into procurement plans according to organisational policy and guidelines.
	2.3. ***Appropriations*** to fund strategic procurement are obtained in accordance with legislative and organisational policy and procedures.
	2.4. Approvals to address procurement requirements are obtained according to organisational policy and procedures.
3. Justify procurement expenditure	3.1. Business case is developed with stakeholders to determine viability of proposed procurement expenditure.
	3.2. Reasons for procurement requirement, timeframes and expected whole-of-life costs and benefits are established in the business case.
	3.3. Output specification is developed with stakeholders to assist in achieving procurement outcomes.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult and negotiate with stakeholders
  - network, within probity boundaries, with stakeholders
  - build and manage effective working relationships
  - write business cases, plans, reports, submissions and other complex documents
  - read complex documents, such as contracts, legislation and guidelines
  - provide feedback
- teamwork skills to:
  - manage strategic relationships
  - model effective management and leadership approaches
  - respond to diversity
  - refer issues to the correct person
- problem-solving skills to:
  - apply decision-making processes or methodologies
  - apply understanding of supplier issues and supply chain management in the context of strategic procurement
- initiative and enterprise skills to:
  - identify and assess strategic procurement options and alternatives

© Commonwealth of Australia, 2025 Industry Skills Australia

    - apply OHS, environmental, sustainability and corporate social responsibility practices in the context of strategic procurement
- planning and organising skills to:
    - undertake research and business analysis
    - manage financial and other resources
- learning skills to keep up-to-date with:
    - best practice examples in strategic procurement
    - relevant procurement legislation, policies and procedures
- technology skills to:
    - operate organisational IT systems
    - use electronic procurement templates

Required knowledge

- commonwealth, state or territory, and local government legislation, policies, practices and guidelines:
    - relating to strategic procurement
    - such as OHS and equity and diversity
- organisational procurement policies, practices and approval processes
- aspects of law of contract, trade practices law, and commercial law relating to strategic procurement
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to procurement decisions
- government procurement environment
- legal requirements of government procurement
- implications of particular procurement arrangements
- whole-of-life considerations
- cultural issues relating to strategic procurement and industry development in certain industry sectors
- relationship management at all personnel levels
- environmental, sustainability and corporate social responsibility principles relevant to strategic procurement

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Competency must be demonstrated in the ability to plan for strategic procurement consistently in accordance with

© Commonwealth of Australia, 2025 Industry Skills Australia

	legislative and organisational requirements.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • prepare procurement profiles and supplier profiles • conduct procurement analysis of own organisation's buying requirements • consult with procurement stakeholders to inform the development of procurement requirements • use results of procurement analysis to develop procurement requirements • define strategic procurement requirements • prepare complex business cases or other documents to justify procurement decisions and expenditure. **Consistency in performance** Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.
Context of and specific resources for assessment	The unit of competency is to be assessed in the workplace or a simulated workplace environment. Access may be required to: • legislation, policy, procedures and protocols relating to planning for strategic procurement • codes of conduct and codes of practice • long-term government policy papers, such as White Papers • strategic procurement plans and direction statements • workplace scenarios and case studies relating to a range of strategic procurement and disposal activities.
Method of assessment	The following assessment methods are suggested: • questions to assess understanding of relevant legislation and procedures • review of strategies and approaches adopted for planning for strategic procurement • review of strategic procurement plans, business cases, procurement justifications, budgets, supplier analysis, market analysis, risk assessment, tender documentation, formal sign-offs and approvals, and other documentation prepared or reviewed by the candidate in a range of contexts • review of stakeholder engagement approaches adopted by the candidate.

© Commonwealth of Australia, 2025 Industry Skills Australia

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Candidates for this qualification must demonstrate a high level of understanding and practical workplace application of underpinning knowledge. Questioning techniques should suit the language and literacy levels of the candidate.

Guidance information for assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC601B Maintain and enhance confidence in public service
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPMNGT607B Develop a business case
- PSPMNGT608B Manage risk
- PSPMNGT609B Formulate business strategies
- PSPPM601B Direct complex project activities
- PSPPROC605B Coordinate strategic procurement
- PSPPROC606B Negotiate strategic procurement
- PSPPROC607A Manage strategic contracts.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Procurement may include:

- public private partnerships (PPP)
- leasing or buying
- short-term or long-term arrangements
- sole or multiple suppliers
- maintenance and support arrangements
- incentive contracting
- firm or variable pricing regimes
- franchising
- research and development

© Commonwealth of Australia, 2025 Industry Skills Australia

	• pre-qualification of suppliers • standing orders • standard form agreements • common use contracts • facilities management • prime contractor and subcontractor • gain sharing/open book • alliancing • coordinated procurement • whole of government procurement • cooperative procurement
Procurement expenditure may include:	• products purchased • quantities • suppliers • locations • types, values and volumes of transactions
Risk may include:	• goods and services critical to the organisation • product-related risk • organisation-related risk • supplier-related risk • market-related risk • national security risk • political risk • corruption risk • probity risk
Supply positioning results in four categories:	• easy to secure supply and low relative expenditure • easy to secure supply and high relative expenditure • difficult to secure supply and low relative expenditure • difficult to secure supply and high relative expenditure
Supplier preferencing may categorise clients as:	• nuisance account • development potential • exploitable • core business
Suppliers may include:	• commercial companies • international companies • other public sector organisations • other governments, including commonwealth, state or territory, local and international • non-profit organisations • in-house
Other factors likely to	• value of business involved

© Commonwealth of Australia, 2025 Industry Skills Australia

affect strategic procurement may include:	• complexity of marketplace • capacity of market • strategic and tactical issues • political influence • political imperatives and strategies • budgetary constraints • collaborative arrangements • Australian industry involvement requirements • environmental issues • extent of competition • protection of both parties • value for money considerations • degree of dependency of organisation programs on the procurement • where and why the need arises and for which unit or location • level of risk, complexity and sensitivity of the procurement • whether the need is for the replacement or enhancement of existing resources, or to meet an entirely new capability • joint ventures with the private sector to fund portions of the project in exchange for financial returns or intellectual property rights • alternatives, such as change in policy/process, equipment or equipment life extensions • use of in-house resources • leasing instead of up-front capital investment • consideration of supply chain issues • environmental, sustainability and corporate social responsibility principles
Stakeholders may include:	• end users, customers or clients, and sponsors • current or potential providers or suppliers • technical or functional experts or advisers • commonwealth, state or territory, and local government • international governments • the organisation • other public sector organisations • employees, unions and staff associations • industry bodies • local communities • lobby groups and special user groups
Organisational needs	• political directives

© Commonwealth of Australia, 2025 Industry Skills Australia

may include:	• commonwealth, and state or territory, and local government needs • responses to government White Papers, for example on long-term capability of the public sector to deliver government policy objectives

Appropriations may require:	• delegates
	• ministerial authorisation
	• compliance with instructions or finance circulars
	• confirmation by chief financial officer
	• special consideration if they concern:
	  • long-term travel deals
	  • long-term computer deals
	  • long-term lease deals
	  • issuing indemnities

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Undertake market analysis	1.1. Organisation's strategic ***procurement*** requirements and ***commercial and policy factors*** impacting procurement are identified. 1.2. Extent to which a competitive ***market*** exists to meet the organisation's needs is researched. 1.3. Number of ***suppliers***, their market share and the degree and type of competition between suppliers are identified. 1.4. Nature, quality and maturity of the supply chain are analysed. 1.5. Environmental, sustainability and corporate social responsibility factors affecting the supply market are identified and analysed. 1.6. Expert assistance is engaged as necessary to assist with market analysis.
2. Influence and develop markets	2.1. Supply markets and strategic industries are identified and analysed to identify emerging and predicted trends. 2.2. Analysis of supply markets and strategic industries is undertaken, including ***capabilities***, limitations, financial standing and past performance of existing and potential suppliers. 2.3. Range of strategies, within probity boundaries, is used to influence markets. 2.4. ***Market development strategies*** are used to develop and influence market capability within probity boundaries. 2.5. Implications of procurement threats and opportunities imposed by supply markets are identified and communicated to ***stakeholders*** according to organisational guidelines and public sector standards.

© Commonwealth of Australia, 2025 Industry Skills Australia

3. Implement strategic procurement activities	3.1. Procurement methodologies are determined according to organisation's strategic procurement plan. 3.2. Requirements are designed to deliver business outcomes and provide value for money, including ***whole-of-life considerations***. 3.3. Methodologies are guided by constraints, complexity and importance of procurement requirement and the marketplace. 3.4. Procurement activities are determined and ***teams*** are formed and coordinated to manage strategic procurement activities. 3.5. ***Performance measures*** are determined to suit the ***range of procurement activities***. 3.6. Performance is analysed against measures, and a cycle of continuous improvement is implemented to improve procurement performance.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult and negotiate with stakeholders
  - network, within probity boundaries, with stakeholders
  - build and manage effective working relationships
  - write business cases, plans, reports, submissions and other complex documents
  - read complex documents, such as contracts, legislation and guidelines
  - provide feedback
- teamwork skills to:
  - manage teams of experts in functions such as finance, legal, technical and engineering
  - manage strategic relationships
  - model effective management and leadership approaches
  - respond to diversity
  - refer issues to the correct person
- problem-solving skills to:
  - apply decision-making processes or methodologies
  - identify and resolve strategic procurement issues
- initiative and enterprise skills to:

© Commonwealth of Australia, 2025 Industry Skills Australia

    - identify and assess opportunities for development of strategic markets/industries
    - apply OHS, environmental, sustainability and corporate social responsibility practices in the context of strategic procurement
- planning and organising skills to:
    - undertake research and business analysis
    - manage financial and other resources
    - manage procurement projects
- learning skills to keep up-to-date with:
    - best practice examples in strategic procurement

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Competency must be demonstrated in the ability to coordinate strategic procurement consistently in accordance with legislative and organisational requirements.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- use recognised methodologies to conduct market research and analysis
- undertake activities to influence supply markets, within probity and other guidelines
- undertake industry development activities consistent with government policy
- consider and select procurement methodologies that reflect the complexity and risks of the strategic procurement being undertaken
- develop performance measures for application during the procurement process
- review procurement performance using performance measures
- implement continuous improvement to procurement processes.

Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.

Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to coordinating strategic procurement
- codes of conduct and codes of practice
- long-term government policy papers, such as White Papers
- strategic procurement plans and direction statements
- workplace scenarios and case studies relating to a range of strategic procurement and disposal activities.

Method of assessment

The following assessment methods are suggested:

- questions to assess understanding of relevant legislation and

© Commonwealth of Australia, 2025 Industry Skills Australia

procedures
- review of strategies and approaches adopted for coordinating strategic procurement
- review of strategic procurement plans, supplier analysis, market analysis, market development plans or activities, risk assessments, procurement methodologies or procurement approaches, formal sign-offs and approvals, and other documentation prepared or reviewed by the candidate in a range of contexts
- review of stakeholder engagement approaches adopted by the candidate.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Candidates for this qualification must demonstrate a high level of understanding and practical workplace application of underpinning knowledge. Questioning techniques should suit the language and literacy levels of the candidate.

Guidance information for assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC601B Maintain and enhance confidence in public service
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPMNGT607B Develop a business case
- PSPMNGT608B Manage risk
- PSPPM601B Direct complex project activities
- PSPPROC604B Plan for strategic procurement
- PSPPROC606B Negotiate strategic procurement
- PSPPROC607A Manage strategic contracts.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

© Commonwealth of Australia, 2025 Industry Skills Australia

Procurement may include:	• public private partnerships (PPP) • leasing or buying • short-term or long-term arrangements • sole or multiple suppliers • maintenance and support arrangements • incentive contracting • firm or variable pricing regimes • franchising • research and development • pre-qualification of suppliers • standing orders and deeds of standing orders • standard form agreements • common use contracts • facilities management • prime contractor and subcontractor • gain sharing/open book • coordinated procurement • whole of government procurement • cooperative procurement.
Commercial and policy factors may include:	• value or market share of business involved • complexity of marketplace • degree of dependency of organisation programs on the procurement • extent of competition • capture and assessment of identified risks • protection of both parties • value for money • basis of due performance • broader governmental policies that may affect the market or industry sector • competitive neutrality • environmental, sustainability and corporate social responsibility principles.
Markets may include:	• local • national • international • regional.
Suppliers may include:	• commercial companies • other public sector organisations • other governments, including commonwealth, state or territory, local and international • non-profit organisations

© Commonwealth of Australia, 2025 Industry Skills Australia

	• in-house.
Criteria for assessment of supplier ***capability*** may include:	• financial viability/capacity, including insurances • past performance and infrastructure • skills and experience of key personnel • quality accreditations • earned value performance management • adequacy of proposed methodology and approach • technical merit of the proposed goods or service • industrial relations record • willingness to work towards common goals • observance and promotion of OHS requirements • technical and contractual compliance • compliance with commonwealth, state and territory policies regarding discrimination, workplace relations, environmental, sustainability and corporate social responsibility • compliance with codes of conduct, codes of practice and expected standards of behaviour.
Market development strategies may include:	• market management, including development of key supply markets where these markets are not meeting the organisation's needs • supplier development, including identification of new local suppliers, development of the capabilities of existing suppliers and development of new products • reverse marketing • tactics to increase skill levels of suppliers, particularly in dealing with government • creating the supplier environment • communicating changes • procurement strategies, including splitting contracts, short-term development contracts, inviting companies to work together where each has skills.
Stakeholders may include:	• end users, customers or clients, and sponsors • current or potential providers or suppliers • technical or functional experts or advisers • commonwealth, state or territory, and local government • the organisation • other public sector organisations • employees, unions and staff associations • industry bodies • local communities • lobby groups and special user groups.

© Commonwealth of Australia, 2025 Industry Skills Australia

Whole-of-life considerations may include:	• benchmarks of expected financial performance • calculations of discounted cash flows • net present value • return on investment • transition costs in establishing initial contract • transition costs in renewing or extending contract • net return or cost on disposal of assets.
Teams may include:	• financial • legal • technical • functional • engineering • scientific and research • human resource • commercial or business • consultants.
Performance measures may include:	• purchase price reduction • cost reduction • value of additional negotiated benefits • improvement in payment terms • improved warranties • cost-saving measures • new sources of supply • substitute goods and services • improved supplier performance • reduction of demand • improved access to market information for early identification of supply problems • improved supply chain efficiencies • reduction if risk exposure • improved supplier attitude • eliminating supply monopolies • improved participation of local suppliers.
Range of procurement activities may include:	• easy to secure supply and high relative expenditure • easy to secure supply and low relative expenditure • difficult to secure supply and low relative expenditure • difficult to secure supply and high relative expenditure.

PSPPROC606B Negotiate strategic procurement

Modification History

PSPPROC606B Release 2: Layout adjusted. No changes to content.

PSPPROC606B Release 1: Primary release.

Unit Descriptor

This unit covers the ability to negotiate strategic procurement agreements within established guidelines, policies and procedures. It includes planning and preparing for negotiation, and undertaking and finalising the negotiation process for strategic procurement.

In practice, negotiating strategic procurement may occur in the context of other generalist and specialist work activities, such as maintaining and enhancing confidence in public service or local government, establishing and maintaining strategic networks, managing compliance with legislation in the public service or local government, managing risk, developing a business case, planning for strategic procurement, coordinating strategic procurement, and managing strategic contracts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit applies to those in specialist procurement and contracting.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the Performance criteria describe the performance needed to

© Commonwealth of Australia, 2025 Industry Skills Australia

essential outcomes of a unit of competency.	demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare for strategic procurement negotiations	1.1. Input and advice are obtained from key ***stakeholders*** and the ***procurement and negotiating context*** is identified. 1.2. Information is gathered on suppliers and a best alternative to negotiating an agreement is developed. 1.3. Objectives, targets and bottom line position are determined for negotiations. 1.4. Composition of ***negotiating team*** and limits on negotiators' authority are determined according to organisational policy and procedures. 1.5. Negotiation process, timeframes and strategies are determined to suit complexity of procurement and supplier characteristics. 1.6. Negotiation plan/directive is developed that identifies negotiation roles of team members, lead negotiator, ***negotiating styles***, tactics and boundaries/limits of authority to suit the procurement activity. 1.7. Negotiation plan is authorised and signed off according to organisational policy and procedures.
2. Undertake strategic procurement negotiations	2.1. Negotiations are opened, supplier tactics identified, and issues and options explored to identify mutually compatible interests. 2.2. Minor and major issues are dealt with and concessions to ***terms and conditions*** are negotiated to improve overall value for money of the procurement. 2.3. Concessions are made such that agreements remain consistent with original intentions and with procurement, organisational objectives and probity requirements. 2.4. If negotiations stall, tactics are used to break deadlocks and continue negotiations according to negotiation plan and organisational policy and procedures.

© Commonwealth of Australia, 2025 Industry Skills Australia

	2.5. Negotiations are conducted and an offer is made in accordance with legislative requirements, organisational policy and procurement guidelines.
3. Finalise strategic procurement negotiations	3.1. Negotiations are closed and agreements are finalised according to procurement guidelines. 3.2. Where agreement is not possible immediately, communication channels are kept open while additional support, arguments and supporting evidence are obtained. 3.3. Where agreement is not possible and the best alternative is to be pursued instead, negotiations are terminated in a way that preserves the relationship with the supplier for possible future business and deters the possibility of legal liability. 3.4. Where agreements may have wider implications for procurement and the organisation, those implications are considered and necessary consultation is carried out. 3.5. Details and outcomes of negotiations are documented according to organisational policy and procedures.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult and negotiate with stakeholders
  - achieve negotiation outcomes desired by the organisation
  - network, within probity boundaries, with stakeholders
  - build and manage effective working relationships
  - write business cases, plans, reports, submissions and other complex documents
  - read complex documents, such as contracts, legislation and guidelines
  - provide feedback
- teamwork skills to:
  - manage teams of expert negotiators in functions such as finance, legal, technical and engineering
  - manage strategic relationships
  - model effective management and leadership approaches
  - respond to diversity
  - refer issues to the correct person

© Commonwealth of Australia, 2025 Industry Skills Australia

- problem-solving skills to:
  - identify and apply strategies and tactics for breaking deadlocks during a negotiation
  - apply decision-making processes or methodologies
  - identify and resolve strategic procurement issues
  - apply understanding of supplier issues and supply chain management in the context of strategic procurement
- initiative and enterprise skills to:
  - identify and assess negotiation approaches to yield results
  - apply OHS, environmental, sustainability and corporate social responsibility practices in the context of strategic procurement
- planning and organising skills to:
  - undertake research and business analysis
  - manage financial and other resources
  - manage procurement projects
- learning skills to keep up-to-date with:
  - best practice examples in strategic procurement
  - relevant procurement legislation, policies and procedures
- technology skills to:
  - operate organisational IT systems
  - use electronic procurement templates

Required knowledge

- commonwealth, state or territory, and local government legislation, policies, practices and guidelines:
  - relating to strategic procurement, including environmental purchasing guidance
  - such as OHS and equity and diversity
- organisational procurement policies, practices and approval processes
- aspects of law of contract, trade practices law, and commercial law relating to negotiation of strategic procurement arrangements
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to negotiation
- government procurement environment
- legal requirements of government contracting
- financial rules and regulations
- implications of particular contracting arrangements
- whole-of-life considerations
- cultural issues relating to strategic procurement and industry development
- relationship management at all personnel levels
- environmental, sustainability and corporate social responsibility principles relevant to strategic procurement

© Commonwealth of Australia, 2025 Industry Skills Australia

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Competency must be demonstrated in the ability to negotiate for strategic procurement consistently in accordance with legislative and organisational requirements.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- prepare negotiation plans (or similar) for strategic procurements
- implement negotiation plans
- respond flexibly, but within the boundaries of the plan, to issues, deadlocks and other situations that arise during negotiations
- finalise strategic procurement negotiations with an agreement that captures the negotiated positions of all parties
- act within own delegations and promptly escalate issues to higher authority when required
- uphold high standards of public sector ethics and behaviour when negotiating with potential suppliers.

Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.

Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to negotiating strategic procurement
- codes of conduct and codes of practice
- long-term government policy papers, such as White Papers
- strategic procurement plans and direction statements
- workplace scenarios and case studies relating to a range of strategic procurement and disposal activities.

Method of assessment

The following assessment methods are suggested:

- questions to assess understanding of relevant legislation and

© Commonwealth of Australia, 2025 Industry Skills Australia

procedures
- review of strategies and approaches adopted for planning for strategic procurement
- review of negotiation process used, negotiation plans, negotiation directives, contracts or other agreements reached, notes from negotiations, risk assessments, formal sign-offs and approvals, and other documentation prepared or reviewed by the candidate in a range of contexts
- review of stakeholder engagement approaches adopted by the candidate.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Candidates for this qualification must demonstrate a high level of understanding and practical workplace application of underpinning knowledge. Questioning techniques should suit the language and literacy levels of the candidate.

Guidance information for assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC601B Maintain and enhance confidence in public service
- PSPGOV601B Apply government systems
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPMNGT607B Develop a business case
- PSPMNGT608B Manage risk
- PSPPM601B Direct complex project activities
- PSPPROC604B Plan for strategic procurement
- PSPPROC605B Coordinate strategic procurement
- PSPPROC607A Manage strategic contracts.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

© Commonwealth of Australia, 2025 Industry Skills Australia

Stakeholders may include:

- end users, customers or clients, and sponsors
- current or potential providers or suppliers
- technical or functional experts or advisers
- commonwealth, state or territory, and local government
- the organisation
- other public sector organisations
- employees, unions and staff associations
- industry bodies
- local communities
- lobby groups and special user groups

Procurement may include:

- public private partnerships (PPP)
- leasing or buying
- short-term or long-term arrangements
- sole or multiple suppliers
- maintenance and support arrangements
- incentive contracting
- firm or variable pricing regimes
- franchising
- research and development
- pre-qualification of suppliers
- standing orders
- standard form agreements
- common use contracts
- facilities management
- prime contractor and subcontractor
- gain sharing/open book
- coordinated procurement
- whole of government procurement
- cooperative procurement

Procurement and negotiating context may include:

- nature of procurement in terms of:
  - risk
  - expenditure
  - complexity
- nature of supply market, such as:
  - fully competitive
  - dominated by a few large suppliers
  - sole supplier
  - unsophisticated suppliers
- rural and remote issues
- one-off negotiation versus need to maintain long-term relationship

© Commonwealth of Australia, 2025 Industry Skills Australia

- existing relationship with supplier. including:
  - previous negotiations
  - supplier's business approach to government as client
  - state of current relationship
- political or community sensitivities
- skill and experience of negotiating team
- balance of power in the negotiations

Negotiating team members may include:

- financial
- legal
- technical
- functional
- engineering
- scientific and research
- human resource
- commercial or business

Negotiating styles may include:

- competitive
- accommodating
- avoidance
- compromising
- collaborative

Terms and conditions may include:

- technical support aspects, such as:
  - warranties
  - life-cycle support
  - maintenance agreements
- financial aspects, such as:
  - deposits
  - payment terms
  - discounts
  - payment schedules
  - travel costs
  - cancellation penalties
- risk management aspects
- management information
- government support
- timeframes
- performance incentives and penalties
- general matters, such as subcontracting
- contract price

PSPPROC607A Manage strategic contracts

Modification History

PSPPROC607A Release 2: Layout adjusted. No changes to content.

PSPPROC607A Release 1: Primary release.

Unit Descriptor

This unit covers the competencies required to manage contracts for strategic purchases, to effectively minimise risks and achieve value for money to meet an organisation's core objectives. It includes managing the establishment, performance and evaluation of strategic contracts.

In practice, managing strategic contracts may occur in the context of other generalist and specialist work activities, such as maintaining and enhancing confidence in public service or local government, establishing and maintaining strategic networks, managing compliance with legislation in the public service or local government, managing risk, developing a business case, planning for strategic procurement, coordinating strategic procurement and negotiating strategic procurement.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit applies to those in specialist procurement and contracting.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Manage contract establishment	1.1. Requirements of ***contracts and strategic initiatives*** are discussed, clarified and agreed by all parties. 1.2. Responsibilities for establishing and carrying out procedures are assigned to achieve contract outcomes. 1.3. Effective communication strategies and processes are established and implemented to assist ongoing communication between internal and external ***stakeholders*** and contractors. 1.4. Relationship management is undertaken of all levels of personnel involved in procurement and contract management, within probity boundaries. 1.5. Strategic relationships are established and managed within probity boundaries to improve procurement capability and performance. 1.6. Risk management plans are updated according to organisational policy and procedures.
2. Manage contract performance	2.1. Progress of contracts is ***monitored*** against set targets and performance measures to ensure success of procurement activities. 2.2. Should monitoring find that set targets, performance measures and probity requirements are not being met, action is taken to rectify performance in a timely manner. 2.3. Advice and support are provided to solve problems, make improvements and maintain progress. 2.4. Disputes are managed promptly according to contractual conditions to achieve resolution and maintain contract performance and progress. 2.5. Opportunities to continuously improve procurement outcomes are sought and negotiated with contractors. 2.6. Approvals are provided or gained for ***contract***

© Commonwealth of Australia, 2025 Industry Skills Australia

	variations that are negotiated and agreed between the parties. 2.7. Opportunities are provided for stakeholders and contractors to have input into and receive feedback on progress during the performance of the contract. 2.8. Internal and external stakeholders are engaged as necessary throughout the life of the contract to maintain progress.
3. Manage contract evaluation	3.1. Evaluation of contract performance is undertaken relative to planned performance measures and in consultation with stakeholders and contractors. 3.2. Where stakeholders and contractors do not agree, dispute resolution is undertaken according to organisational policy and procedures. 3.3. Conclusions are detailed against agreed criteria to provide a complete picture of ***performance of contractors***, organisation's ***procurement processes*** and ***value for money***. 3.4. Performance of strategic initiatives is measured relative to planned outcomes in consultation with industry and other stakeholders. 3.5. Lessons learnt from evaluations of contracts and strategic initiatives are documented according to organisational requirements and used to continuously improve future procurement activities. 3.6. Contractors and stakeholders are advised of evaluation outcomes in a timely manner according to organisational guidelines.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult and negotiate with stakeholders
  - network, within probity boundaries, with stakeholders
  - build and manage effective working relationships
  - write business cases, plans, reports, submissions and other complex documents
  - read complex documents, such as contracts, legislation and guidelines
  - provide feedback
- teamwork skills to:

- whole-of-life considerations
- procurement management processes
- cultural issues relating to contract management and industry development
- relationship management at all personnel levels
- environmental, sustainability and corporate social responsibility principles relevant to managing strategic contracts

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Competency must be demonstrated in managing strategic contracts consistently and in accordance with legislative and organisational requirements.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- develop contract management plans and sub-plans suited to the nature of the contracts
- establish contract management relationships with stakeholders using strategic techniques such as start up workshops, service level agreements, etc.
- implement contract management plans
- manage contractors to ensure the delivery of contract outcomes, using flexibility and initiative to deal with issues as they arise
- implement contract performance measures
- provide contractors with performance feedback
- deal promptly and proactively with contract disputes and refer to higher authority when this is not possible
- communicate effectively with internal and external stakeholders about the operation of contracts
- uphold probity standards in all dealings with contractors.

Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.

Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

© Commonwealth of Australia, 2025 Industry Skills Australia

Access may be required to:

- legislation, policy, procedures and protocols relating to managing strategic contracts
- codes of conduct and codes of practice
- long-term government policy papers, such as White Papers
- strategic procurement plans and direction statements
- workplace scenarios and case studies relating to a range of strategic procurement and disposal activities.

Method of assessment

The following assessment methods are suggested:

- questions to assess understanding of relevant legislation and procedures
- review of strategies and approaches adopted for managing strategic contracts
- review of contract management plans and related sub-plans, such as transition plans, probity plans, contract variations, contract performance reports and reviews, budgets, negotiation notes from meetings with contractors, risk assessments, formal sign-offs and approvals, contract closure reports, and other documentation prepared or reviewed by the candidate in a range of contexts
- review of stakeholder engagement approaches adopted by the candidate.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Candidates for this qualification must demonstrate a high level of understanding and practical workplace application of underpinning knowledge. Questioning techniques should suit the language and literacy levels of the candidate.

Guidance information for assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC601B Maintain and enhance confidence in public service
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPMNGT607B Develop a business case
- PSPMNGT608B Manage risk
- PSPPM601B Direct complex project activities
- PSPPROC604B Plan for strategic procurement
- PSPPROC605B Coordinate strategic procurement

- PSPPROC606B Negotiate strategic procurement.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Contracts and strategic initiatives may include:

- non-traditional procurement and finance activities
- strategic procurement activities, such as industry development
- in-house option directives
- inter and intra-government agreements
- memoranda of understanding and memoranda of agreement
- public private partnerships (PPP)
- purchases from suppliers
- coordinated procurement arrangements
- whole of government procurement arrangements
- cooperative procurement arrangements.

Stakeholders may include:

- end users
- customers or clients
- sponsors
- current or potential providers or suppliers
- technical or functional experts or advisers
- commonwealth, state or territory, and local government
- the organisation
- other public sector organisations
- employees, unions and staff associations
- industry bodies
- local communities
- lobby groups and special user groups.

Monitoring may involve:

- progress meetings and regular progress reports from contractor
- visits to contractor's premises
- provision of samples
- tests and verification
- independent audit
- end-user feedback.

© Commonwealth of Australia, 2025 Industry Skills Australia

Contract variation may include modification of:	• targets • performance measures • procurement plans • resourcing • monitoring and evaluation processes.
Evaluation of ***contractor performance*** may include:	• strengths and weaknesses • client acceptance of service delivery (client satisfaction) • meeting delivery and completion dates • compliance with other contractual requirements • performance in relation to relevant policy objectives, such as industry development, care for the environment, OHS and affirmative action • achievements of the contractor in developing Australian and New Zealand supply networks • general relationships, including effectiveness of communication at all levels • performance of key technical personnel • acceptability and cost of whole-of-life technical support, including lead times and availability of spares and maintenance services • achievements in innovation and quality improvement programs • acceptability and suitability for future agreements, including potential status as an approved contractor • adherence to codes of practice and codes of conduct.
Evaluation of organisation's ***procurement processes*** may focus on:	• effectiveness of project management, including project plan and responsibilities and accountabilities set out in it • quality of the business case, as indicated by achievement of planned outcome and contribution to program objectives • effectiveness of contractor qualification processes • value obtained in bid clarification and post-tender negotiation • effectiveness of project management systems, focusing particularly on management information • effectiveness of risk management, including corruption risks and probity risks • methods for controlling variations in cost, time, quality and performance from initial planning to completion • adequacy of safeguards against fraud, error and impropriety • incidence of material losses due to waste or

© Commonwealth of Australia, 2025 Industry Skills Australia

	inefficiency • overall performance in terms of cost, time, service and quality • compliance with procurement policy.
Value for money must reflect:	• whole-of-life program benefits • residual values • disposal costs or disposal return • costs of parts • servicing and maintenance • industry benchmarks.

unit of competency.	range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Formulate strategic procurement goals	1.1. ***Procurement direction is determined*** through open and ethical consultation with organisation's governing body and ***stakeholders***. 1.2. Strategic procurement goals are formulated that are consistent with organisation's business plan, strategic direction, mission and values, and take into account the requirements, expectations and interests of organisation's governing body and stakeholders. 1.3. Strategic procurement goals are developed that support the ethos of the organisation and accurately reflect its role in its environment. 1.4. Strategic procurement ***goals are developed*** that support and align with the policy expectations of government for the organisation. 1.5. Strategic procurement goals are reviewed to ensure that opportunities and current and emerging trends are reflected. 1.6. Strategic procurement goals are used to guide procurement processes that deliver best ***value for money***.
2. Gain support for strategic procurement direction	2.1. Strategic procurement goals are presented to stakeholders in such a way as to gain their support. 2.2. Where stakeholder interests are in conflict, realistic and rational compromises are found that balance interests and acknowledge concerns. 2.3. Where less than full support is obtained, consequences for the organisation are identified and steps are taken to minimise potential problems. 2.4. Ongoing consultation with stakeholders is maintained to ensure support for and ownership of the organisation's strategic procurement goals. 2.5. Outcomes of the consultation process are recorded and considered before procurement decisions are reached.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult and negotiate with stakeholders at the highest levels of organisations and the community
  - engage in strategic networking, within probity boundaries, with key stakeholders
  - build and manage effective working relationships
  - convey complex ideas to a wide range of audiences
  - persuade and influence, within probity boundaries, stakeholders and decision makers
  - read, write and approve business cases, plans, reports, submissions and other high level complex documents
- teamwork skills to:
  - provide leadership within the organisation
  - manage strategic relationships
  - manage teams of expert negotiators in functions such as finance, legal, technical and engineering
  - respond to diversity
  - refer issues to the correct person
- problem-solving skills to:
  - apply decision-making processes or methodologies
  - identify and resolve strategic procurement issues
  - apply understanding of supplier issues and supply chain management in the context of strategic procurement
- initiative and enterprise skills to:
  - identify, assess and implement opportunities for performance improvement
  - apply OHS, environmental, sustainability and corporate social responsibility practices in the context of strategic procurement
- planning and organising skills to:
  - undertake research and business analysis relating to strategic procurement and high level business issues
  - manage financial and other resources
  - manage strategic procurement systems, processes and policies
- learning skills to keep up-to-date with:
  - best practice examples in strategic procurement
  - relevant procurement legislation, policies and procedures
- technology skills to:

© Commonwealth of Australia, 2025 Industry Skills Australia

- operate organisational IT systems
- use electronic procurement templates

Required knowledge

- commonwealth, state or territory, and local government legislation, policies, practices and guidelines:
  - relating to strategic procurement, including environmental purchasing guidance
  - such as OHS and equity and diversity
- organisational procurement policies, practices and approval processes
- government procurement environment
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to strategic procurement
- financial rules and regulations relating to strategic procurement
- legal requirements of government procurement and contracting
- competition theory as it relates to strategic procurement
- supply chain principles
- strategic industry development
- strategic procurement planning processes
- procurement best practice standards
- equal employment opportunity
- environmental, sustainability and corporate social responsibility principles relevant to strategic procurement

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Competency must be demonstrated in the ability to influence and define strategic procurement consistently in accordance with legislative and organisational requirements.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • formulate strategic procurement goals in line with organisation's business direction and government policy imperatives • reflect the organisation's ethos in its strategic procurement goals • encourage wide input into the development of strategic procurement goals and direction

© Commonwealth of Australia, 2025 Industry Skills Australia

- encourage consideration of innovation and new opportunities in procurement direction for the organisation
- publicise organisation's strategic procurement goals and direction
- work effectively with disagreement between stakeholders
- use recognised approaches to gain support for the strategic procurement direction established for the organisation
- demonstrate effective implementation of goals even when full support is not gained.

Candidates for this qualification must demonstrate a high level of understanding of underpinning knowledge and the ability to apply this to practical workplace situations.

Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to procuring goods and services and managing contracts at the strategic level
- codes of conduct and codes of practice
- long-term government policy papers, such as White Papers
- strategic procurement plans and direction statements
- published performance audits or similar relating to strategic procurement issues
- workplace scenarios and case studies relating to a range of strategic procurement activities.

Method of assessment

The following assessment methods are suggested:

- questions to assess understanding of relevant legislation and procedures
- review of strategies and approaches adopted for influencing strategic procurement direction
- preparation of formal written papers covering strategic procurement issues
- review of strategic plans, strategic procurement plans, long-term budgets, forward procurement plans, industry engagement plans, responses to performance audits covering strategic procurement issues and other documentation prepared or reviewed by the candidate in a range of contexts
- review of stakeholder engagement approaches adopted by the candidate.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the

© Commonwealth of Australia, 2025 Industry Skills Australia

candidate.

Guidance information for assessment

Sufficient evidence must be gathered to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- BSBFIM701A Manage financial resources
- BSBINN801A Lead innovative thinking and practice
- BSBREL701A Develop and cultivate collaborative partnerships and relationships
- PSPETHC701A Lead and influence ethical practice in the public sector
- PSPMNGT703A Lead and influence change
- PSPMNGT704A Undertake enterprise risk management
- PSPPROC705A Establish strategic procurement context
- PSPPROC706A Evaluate and improve strategic procurement performance.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Determining procurement direction may be influenced by:

- stakeholder needs and intentions
- end user requirements
- government policies
- Australian industry involvement requirements
- potential provider/supplier base
- industry development requirements
- disposal of assets
- probity requirements
- environmental, sustainability and corporate social responsibility issues

Stakeholders may include:

- end users
- customers or clients
- sponsors
- potential providers or suppliers
- current providers or suppliers

© Commonwealth of Australia, 2025 Industry Skills Australia

- technical or functional experts or advisers
- commonwealth, state or territory, and local government
- the organisation
- other public sector organisations
- employees, unions and staff associations
- industry bodies
- local communities
- lobby groups and special user groups

Developed goals:

- are challenging, realistic, achievable and measurable
- encourage members of the organisation to be creative and innovative within procurement guidelines

Value for money may include:

- fitness for purpose
- whole-of-life costs
- fair and reasonable market prices
- timely delivery
- post-delivery support
- effective warranties
- price basis
- disposal options
- whole of government perspective
- effects of government buying on market structure and sustainability
- market competitiveness and sophistication

essential outcomes of a unit of competency.	demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse the procurement environment	1.1. Knowledge of the legal, political and financial environment is applied to establish ***strategic context***. 1.2. Relationship between the organisation and its procurement environment is examined and defined. 1.3. Existing and potential ***stakeholders*** and their strengths and weaknesses are identified. 1.4. Strengths, weaknesses, opportunities and threats are identified using information that is up-to-date, reflects emerging and predicted trends, and takes account of the possible future procurement interests and activities of the organisation and government directions. 1.5. Organisation's procurement strategies and plans are adjusted in light of information gathered, and comparative targets are identified. 1.6. Any case for possible ***collaboration*** with other organisations is supported by evidence, analysed for risks, and is consistent with organisational plans and future directions.
2. Analyse procurement capability	2.1. Organisation's strengths, weaknesses, opportunities and threats are considered in light of internal and/or external ***factors*** and organisation's strategic procurement goals. 2.2. Analyses of organisational capability take into account possible future procurement interests and activities of the organisation, its strategic industries, collaborators, requirements of government and other organisations. 2.3. Suggestions for improvements to existing organisational structures and procurement systems are made that are realistic and achievable and will aid achievement of the procurement mission statement and strategies drawn from both internal and external stakeholders. 2.4. Consultation on proposed improvements is undertaken with those affected, in time for their views to

© Commonwealth of Australia, 2025 Industry Skills Australia

	be taken into account. 2.5. Proposed improvements are justified on the basis of known internal and external factors, and take into account stakeholder needs and expectations.
3. Develop and monitor procurement capability	3.1. Improvements to develop ***procurement capability*** are implemented in time to meet new circumstances. 3.2. Practical requirements for implementing improvements are comprehensively defined and communicated to those affected. 3.3. Difficulties associated with implementing improvements are identified as early as possible in order to minimise their effect. 3.4. Implemented improvements to organisational structures and procurement systems are monitored, reviewed and modified as required to assist achievement of procurement outcomes.
4. Influence and develop strategic industries	4.1. Strategic industries are monitored and opportunities are taken to influence key opinion formers and decision makers to change, encourage and nurture ***industry capability***. 4.2. Problems, limitations and new opportunities in strategic industries are identified in response to internal and external factors and are based on quantitative and qualitative data. 4.3. Ethical methods are used to influence strategic industries, consistent with the organisation's values and procurement policies, and sensitive to the values and practices of key opinion formers and decision makers.
5. Establish and manage risk exposure	5.1. Total ***organisational risk*** is defined, analysed and monitored to minimise loss and maximise opportunity. 5.2. Risk management system is established, implemented and maintained that is consistent with the organisation's strategic context, goals, risk management policies and nature of its business. 5.3. Performance of risk management system is monitored, reviewed and modified to reflect procurement opportunities and current and emerging trends.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

© Commonwealth of Australia, 2025 Industry Skills Australia

Required skills

- communication skills to:
  - consult and negotiate with stakeholders at the highest levels of organisations and the community
  - engage in strategic networking, within probity boundaries, with key stakeholders
  - build and manage effective working relationships
  - convey complex ideas to a wide range of audiences
  - persuade and influence, within probity boundaries, stakeholders and decision makers
  - read, write and approve business cases, plans, reports, submissions and other high level complex documents
- teamwork skills to:
  - provide leadership within the organisation
  - manage strategic relationships
  - manage teams of expert negotiators in functions such as finance, legal, technical and engineering
  - respond to diversity
  - refer issues to the correct person
- problem-solving skills to:
  - apply decision-making processes or methodologies
  - identify and resolve strategic procurement issues
  - apply understanding of supplier issues and supply chain management in the context of strategic procurement
- initiative and enterprise skills to:
  - manage procurement performance and identify, assess and implement opportunities for performance improvement
  - apply OHS, environmental, sustainability and corporate social responsibility practices in the context of strategic procurement
- planning and organising skills to:
  - undertake research and business analysis relating to strategic procurement and high level business issues
  - manage financial and other resources
  - manage strategic procurement systems, processes and policies
- learning skills to keep up-to-date with:
  - best practice examples in strategic procurement
  - relevant procurement legislation, policies and procedures
- technology skills to:
  - operate organisational IT systems
  - use electronic procurement templates

© Commonwealth of Australia, 2025 Industry Skills Australia

Required knowledge

- commonwealth, state or territory, and local government legislation, policies, practices and guidelines:
  - relating to strategic procurement, including environmental purchasing guidance
  - such as OHS and equity and diversity
- organisational procurement policies, practices and approval processes
- government procurement environment
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to strategic procurement
- risk management systems
- financial rules and regulations relating to strategic procurement
- legal requirements of government procurement and contracting
- competition theory as it relates to strategic procurement
- strategic industry development
- strategic procurement planning processes
- delegation authorities
- organisational structure
- organisational procurement performance
- procurement best practice standards
- equal employment opportunity
- OHS requirements relevant to strategic procurement
- environmental, sustainability and corporate social responsibility principles relevant to strategic procurement

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Competency must be demonstrated in establishing a strategic procurement context consistently and in accordance with legislative and organisational requirements.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • use recognised techniques to analyse the procurement environment, including state of the supply market, stakeholder issues, and organisational and government context for the procurement • use recognised techniques to analyse the buying organisation's

© Commonwealth of Australia, 2025 Industry Skills Australia

procurement capability
- make recommendations to improve and develop procurement capability
- implement improvements to procurement capability
- use ethical methods to influence and develop strategic industries to improve value for money opportunities
- apply sophisticated risk management techniques.

Candidates for this qualification must demonstrate a high level of understanding of underpinning knowledge and the ability to apply this to practical workplace situations.

Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to procuring goods and services and managing contracts at the strategic level
- codes of conduct and codes of practice
- long-term government policy papers, such as White Papers
- strategic procurement plans and direction statements
- published performance audits or similar relating to strategic procurement issues
- workplace scenarios and case studies relating to a range of strategic procurement activities.

Method of assessment

The following assessment methods are suggested:

- questions to assess understanding of relevant legislation and procedures
- review of strategies and approaches adopted for establishing strategic procurement context
- preparation of formal written papers covering strategic procurement issues
- review of strategic plans, strategic procurement plans, long-term budgets, risk assessments, industry assessments, supplier capability assessments, market research, industry engagement plans, responses to performance audits covering strategic procurement issues and other documentation prepared or reviewed by the candidate in a range of contexts
- review of stakeholder engagement approaches adopted by the candidate.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Candidates for this qualification must demonstrate a high level of understanding and practical workplace application of underpinning knowledge.

© Commonwealth of Australia, 2025 Industry Skills Australia

Questioning techniques should suit the language and literacy levels of the candidate.

Guidance information for assessment

Sufficient evidence must be gathered to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- BSBFIM701A Manage financial resources
- BSBINN801A Lead innovative thinking and practice
- BSBREL701A Develop and cultivate collaborative partnerships and relationships
- PSPETHC701A Lead and influence ethical practice in the public sector
- PSPMNGT703A Lead and influence change
- PSPMNGT704A Undertake enterprise risk management
- PSPPROC704A Influence and define strategic procurement direction
- PSPPROC706A Evaluate and improve strategic procurement performance.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Strategic context may include:

- financial
- operational
- competitive
- political
- public perception or image
- social
- cultural
- client
- legal aspects of organisation's functions
- nature of supplier market
- environmental and sustainability issues
- corporate social responsibility.

© Commonwealth of Australia, 2025 Industry Skills Australia

Stakeholders may include:	• end users • customers or clients • sponsors • potential providers or suppliers • current providers or suppliers • technical or functional experts or advisers • commonwealth, state or territory, and local government • the organisation • other public sector organisations • employees, unions and staff associations • industry bodies • local communities • lobby groups and special user groups.
Collaboration may include:	• public private partnerships (PPP) • strategic financing arrangements • build, own, operate and transfer type arrangements • cooperative procurement opportunities with other public sector organisations • lead agency arrangements.
Factors may include:	• value of business • complexity of marketplace • capacity of market • supply chain • political influence • political imperatives • budgetary constraints • collaborative arrangements • Australian industry involvement requirements • environmental issues • extent of competition • value for money considerations • degree of dependency of organisation on procurement • where and why the need arises and for which unit or location • level of risk, complexity and sensitivity of the procurement • new capability or replacement/enhancement of existing resources • intellectual property ownership • policy requirements or changes, e.g. ethical and social.
Procurement capability may include:	• procurement systems, structures and processes used in organisation

© Commonwealth of Australia, 2025 Industry Skills Australia

- procurement guidance documents developed by organisation
- procurement or other relevant capability frameworks
- staff profile in terms of experience, skills and knowledge
- procurement training programs.

Industry capability may include:

- structure of marketplace
- impact of globalisation
- location of suppliers
- maturity and sophistication of suppliers
- capacity of industry to absorb work in the volume that is required
- willingness of industry to move into new areas of business to provide required goods or services
- staffing profiles of industry and skills shortages or surpluses
- industry training programs.

Organisational risks may include:

- supplier failure to meet agreements
- government failure to meet agreements
- political and public sensitivities
- community lobbying
- asset security and threat management
- information security and threat management
- physical security and threat management
- health management issues
- industrial relations issues
- terrorism and world events
- impact of globalisation
- contingency management and business continuity
- change management
- environmental and sustainability issues
- corporate social responsibility issues
- corruption risks
- probity risks.

PSPREG411A Gather information through interviews

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers gathering information through interviews that do not result in a formal record of interview in the legal sense. Interviews may be conducted in a range of locations for a range of reasons. They may be overt or covert. The unit includes preparing for the interview, conducting the interview, and reviewing and correlating interview information.

Verbal questioning and other interactions undertaken outside a formal interview structure are not addressed in this unit as these are covered in other communication units in the Training Package, such as *PSPGOV412A Use advanced workplace communication strategies*.

In practice, gathering information through interviews may overlap with other generalist or specialist public sector work activities such as acting ethically, exercising regulatory powers, applying government processes, gathering and analysing information, assessing compliance, receiving and validating information.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for interview	1.1 The need for an interview is determined, and the ***context*** and ***requirements*** are established in accordance with ***organisational and legislative requirements***.
	1.2 Interview ***planning*** is undertaken to ensure desired outcomes are achieved.
	1.3 Interview arrangements are made in accordance with legislative and organisational requirements.
	1.4 ***Materials*** to be used during the interview are prepared as required.
	1.5 Advice is obtained as required on legislative or administrative issues relating to the conduct of the interview.
2. Conduct interview	2.1 Commencement of the interview is undertaken following organisational ***protocols*** and complies with legislative requirements.
	2.2 Interview is conducted in a planned manner, with the sequence evident to others who may use the outcomes.
	2.3 ***Questions*** are selected and used that are relevant, comprehensive, appropriate to the situation and the interviewee and adhere to the rules of evidence.
	2.4 Problem solving skills are used to test, compare and contrast information as it is provided to influence the direction of further questions.
	2.5 Information is ***recorded*** in accordance with organisational policy and procedures.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.6 Personal conduct is maintained in accordance with legal and organisational requirements and takes account of cultural and ethical issues.
3. Review and correlate information	3.1 Information is reviewed and clarified to ensure its relevance and sufficiency prior to concluding the interview.
	3.2 Information is transcribed if necessary and sensitive information is ***dealt with*** in accordance with organisational policy and procedures.
	3.3 Detailed analysis is conducted, and incomplete and irregular information is identified and noted or followed up in accordance with the nature of the interview and organisational requirements.
	3.4 Behavioural characteristics of significance to the purpose of the interview are confirmed.
	3.5 ***Post-interview activities*** are undertaken as required in accordance with organisational policy and procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- using interviewing techniques to suit a range of situations and interviewees
- engaging in exchanges of sometimes complex oral information
- varying style and language structure to suit a range of interviewees
- using techniques to deal with difficult interview situations
- using a range of communication techniques that include establishing rapport, listening, probing, reflecting, negotiation, conflict resolution
- responding to diversity, including gender and disability
- using critical analysis, evaluation and deductive reasoning
- using problem solving and decision making related to interviewing
- using judgment, to test the veracity of information and vary questions and interviewing techniques to suit
- preparing interview documentation requiring accuracy of expression and formality in structure and format
- operating technical and electronic equipment, where necessary
- applying public sector standards and legislation such as occupational health and

© Commonwealth of Australia, 2025 Industry Skills Australia

safety and environment in the context of interviewing

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- application of legislation to interviewing including privacy, ethics, confidentiality and freedom of information
- organisational policies and guidelines relating to interviews
- questioning techniques
- legal and ethical considerations for conducting interviews
- cultural awareness in the context of interviewing
- procedures for using interpreters
- legal and organisational requirements for documentation
- legal requirements relating to recording of information
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment, relating to interviews

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPGOV406B Gather and analyse information
  - PSPGOV408A Value diversity
  - PSPGOV422A Apply government processes
  - PSPLEGN401A Encourage compliance with legislation in the public sector
  - PSPREG401C Exercise regulatory powers
  - PSPREG403B Assess compliance
  - PSPREG415A Receive and validate information

Overview of evidence

In addition to integrated demonstration of the elements and their

© Commonwealth of Australia, 2025 Industry Skills Australia

requirements	related performance criteria, look for evidence that confirms: • the knowledge requirements of this unit • the skill requirements of this unit • application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework) • information gathered via interviews in a range of (3 or more) contexts (or occasions, over time)
Resources required to carry out assessment	These resources include: • legislation, policy, procedures and protocols relating to gathering information through interviews • case studies and workplace scenarios to capture the range of situations likely to be encountered when gathering information through interviews
Where and how to assess evidence	Valid assessment of this unit requires: • a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when gathering information through interviews, including coping with difficulties, irregularities and breakdowns in routine • information gathered via interviews in a range of (3 or more) contexts (or occasions, over time) Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as: • people with disabilities • people from culturally and linguistically diverse backgrounds • Aboriginal and Torres Strait Islander people • women • young people • older people • people in rural and remote locations Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of: • case studies • demonstration • observation • portfolios • questioning

© Commonwealth of Australia, 2025 Industry Skills Australia

- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Contexts may include:

- informal interviews
- interviews against set criteria
- interviews to assess applications
- initial investigation of complaints
- audits
- intelligence gathering
- threat assessment
- security vetting
- overt interviews
- covert interviews, under specific legislative powers

Requirements may include:

- interview location/environment:
  - office
  - designated interview room
  - in the field (including overseas)
  - private home
  - at a client/contractor location
  - in other agencies
- timing
- personnel present:
  - senior staff
  - colleagues
  - interpreter
  - support persons

© Commonwealth of Australia, 2025 Industry Skills Australia

- method of recording:
  - tape recording
  - videotaping
  - hand written
  - typewritten/word processed
  - file notes
- equipment:
  - electronic equipment
  - recording equipment
  - computer equipment
- availability of interviewee

Organisational and legislative requirements may include:

- organisational policy, procedures and guidelines
- international treaties and protocols
- cross-jurisdictional protocols
- organisation's strategic objectives
- national strategic objectives
- security constraints
- public sector codes of conduct/ethics
- confidentiality requirements
- Commonwealth, State/Territory or Local Government legislation such as:
  - Freedom of Information Act 1982
  - Privacy Act 1988
  - Archives Act
  - Crimes Act 1914 and Criminal Code 1995
  - Evidence Act
  - the organisation's enabling legislation

Interview planning may: include

- purpose
- structure
- context
- expectations
- intended/desired outcomes
- criteria for assessment
- risk management considerations
- key questions in sequential order, highlighting main points
- assessing sources of information
- interview strategies appropriate to the situation and purpose of the interview, such as:
  - direct questioning

© Commonwealth of Australia, 2025 Industry Skills Australia

- empathetic questioning
- investigative interviewing
- exclusion of leading questions
- avoidance of cross-examination

- safety requirements for interviewer, interviewee and others present

Materials may include:

- paper-based and electronic documents, including:
  - maps
  - photographs
  - videotapes
  - physical objects and materials
  - audiotapes

Commencement protocols may include:

- introductions
- producing identification/authority
- explaining the purpose, process and recording requirements
- confirming confidentiality of information, if appropriate to the interview purpose

Questioning techniques may include:

- summarising
- re-phrasing
- paraphrasing
- open and closed questions
- cognitive interviewing
- using silence
- active listening
- using and recognising body language
- identifying and overcoming barriers to communication
- investigative interviewing techniques

Recording may include:

- hand written record of interview
- typewritten record of interview
- audiotapes
- videotapes

Dealing with sensitive information may include:

- information security procedures

Post-interview activities may include:

- interview report
- interview assessment report
- informal judgment
- recommendations with supporting reasons/evidence
- suggesting solutions to problems encountered during the interview

© Commonwealth of Australia, 2025 Industry Skills Australia

- informing stakeholders of outcome of interview
- providing briefings on outcomes

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Summarise and report on progress of investigation**	1.1 Ongoing monitoring of the investigation, changes in direction and resource implications are recorded and reported. 1.2 ***Progress***, problems and resource usage are reviewed in accordance with the investigation plan. 1.3 Progress reports/***briefings*** are prepared and disseminated in accordance with organisational requirements. 1.4 Records and systems are ***secured*** and updated regularly in accordance with organisational policy and procedures.
2. **Identify and analyse problems**	2.1 Problems are recorded and suggestions made for resolving or referring them. 2.2 ***Modifications*** to the process of investigation are suggested and solutions are implemented where practicable. 2.3 Referral of the investigation to another agency is recommended where jurisdiction/resources make this the preferred option under organisational policy and procedures. 2.4 If no further action is to be taken on an investigation, reasons and supporting documentation are recorded in accordance with organisational policy and procedures. 2.5 If an investigation is terminated, recommendations for referral to another organisation are made if appropriate and are documented for the organisation's information in future similar cases.
3. **Recommend further action**	3.1 Any ***areas of potential risk*** identified by/affecting the investigation are notified in accordance with organisational policy and procedures, together with suggestions for early intervention measures. 3.2 Suggestions are made regarding further avenues of enquiry. 3.3 ***Follow-up tasks*** are identified and actioned in accordance with

ELEMENT	PERFORMANCE CRITERIA
	organisational policy and procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- undertaking analysis and problem-solving
- engaging in exchanges of sometimes complex oral information
- varying style and language during briefings to suit a range of audiences
- responding to diversity, including gender and disability
- writing summaries, briefing papers and reports requiring clarity, accuracy and formality of structure and language
- applying public sector standards and legislation such as occupational health and safety and environment in the context of investigations

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation relating to the offences under investigation
- procedures for investigation
- administrative legislation relating to the organisation
- organisational guidelines for reporting and information management
- legal and organisational requirements for documentation
- ethical standards
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment relating to the conduct of investigations

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed

- *Pre-requisite* units that must be achieved prior to this

backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Progress in an investigation requires:

- effective administrative processes for all aspects of the investigation
- appropriate resource allocation
- correct evidence collection and management
- availability of witnesses and evidence
- authorisations (e.g. from an authorised justice)

Briefings may include:

- written
- oral

© Commonwealth of Australia, 2025 Industry Skills Australia

	• formal • informal
Securing records and systems may include:	• standard security procedures • security classification of records • restricting access to records • restricting electronic access to systems • restricting physical access to systems and records
Modifications may include:	• re-evaluating the resources of the investigation • referring the matter to another organisation

Areas of potential risk may include:	• those affecting the investigation:
	  • public interest in investigation
	  • hostile witness/es
	  • ill-health of witness
	  • flight risk of those being investigated
	• those identified by the investigation:
	  • potential for fraud/corruption elsewhere in an organisation or other organisations
	  • inadequate security arrangements uncovered
	  • likelihood of other potential perpetrators

Follow-up tasks may include:	• referrals to prosecution organisations • completion of documentation • referral for recovery action, which may be accompanied by liquidity analysis • reporting results to superiors • updating files

PSPSEC602A Manage security awareness

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers activities required in promoting and disseminating the organisation's approach to security management internally and to external clients and the broader community. It includes disseminating the security strategy, championing security awareness and marketing security management both inside and outside the organisation.

In practice, managing security awareness may overlap with other generalist or specialist public sector workplace activities such as managing compliance with legislation and ethics requirements, managing risk, networking, implementing policy, managing change.
