TLI Transport and Logistics Training Package

Release: 6.0

CONTENTS

TLI10115 Certificate I in Transport and Logistics (Pathways)....48
TLI11215 Certificate I in Warehousing Operations....50
TLI11315 Certificate I in Logistics....52
TLI20119 Certificate II in Logistics....55
TLI20219 Certificate II in Road Transport Terminal Operations....58
TLI20319 Certificate II in Stevedoring....63
TLI20419 Certificate II in Warehousing Operations....67
TLI21216 Certificate II in Driving Operations....71
TLI21315 Certificate II in Rail Infrastructure....77
TLI21918 Certificate II in Track Protection....83
TLI22015 Certificate II in Shunting....86
TLI22115 Certificate II in Rail Track Vehicle Driving....89
TLI22215 Certificate II in Tram or Light Rail Infrastructure....93
TLI22318 Certificate II in Rail Customer Service....96
TLI22418 Certificate II in Furniture Removal....99
TLI30118 Certificate III in Mobile Crane Operations....102
TLI30119 Certificate III in International Freight Forwarding (Operator)....105
TLI30219 Certificate III in Stevedoring....107
TLI30319 Certificate III in Supply Chain Operations....112
TLI30419 Certificate III in Waste Driving Operations....118
TLI31216 Certificate III in Driving Operations....122
TLI31418 Certificate III in Rail Driving....134
TLI31815 Certificate III in Rail Track Surfacing....137
TLI31918 Certificate III in Mechanical Rail Signalling....140
TLI32115 Certificate III in Rail Structures....144
TLI32318 Certificate III in Electric Passenger Train Guard....148
TLI32515 Certificate III in Rail Infrastructure....151
TLI32615 Certificate III in Rail Signalling....157
TLI32715 Certificate III in Track Protection....160
TLI32815 Certificate III in Rail Yard Coordination....163
TLI32918 Certificate III in Tram or Light Rail Infrastructure....166
TLI33018 Certificate III in Heritage Locomotive Assistant or Steam Locomotive Fireman169
TLI33118 Certificate III in Rail Customer Service....172
TLI33215 Certificate III in Terminal Train Driving....175
TLI33316 Certificate III in Furniture Removal....179
TLI40115 Certificate IV in Rail Safety Investigation....182
TLI40118 Certificate IV in Transport Scheduling....184
TLI40119 Certificate IV in Driving Operations....189
TLI40218 Certificate IV in Mobile Crane Operations....194
TLI40219 Certificate IV in International Freight Forwarding (Senior Operator)....198
TLI40319 Certificate IV in Logistics....200
TLI40419 Certificate IV in Stevedoring Operations....205
TLI40519 Certificate IV in Traffic Control Room Operations....208
TLI40619 Certificate IV in Warehousing Operations....212
TLI41218 Certificate IV in Transport and Logistics (Road Transport - Car Driving Instruction)....215
TLI41318 Certificate IV in Transport and Logistics (Road Transport - Heavy Vehicle Driving Instruction)....217

TLI41418 Certificate IV in Transport and Logistics (Road Transport - Motorcycle Riding Instruction)....219
TLI41515 Certificate IV in Materiel Logistics....221
TLI42215 Certificate IV in Rail Network Control....225
TLI42315 Certificate IV in Rail Infrastructure....228
TLI42415 Certificate IV in Rail Safety Management....232
TLI42615 Certificate IV in Train Driving....235
TLI42715 Certificate IV in Tram/Light Rail Control....240
TLI50119 Diploma of International Freight Forwarding....243
TLI50219 Diploma of Logistics....246
TLI50319 Diploma of Deployment Logistics....251
TLI50419 Diploma of Materiel Logistics....256
TLI50618 Diploma of Rail Operations Management....260
TLI50716 Diploma of Bus and Coach Operations....264
TLI50816 Diploma of Customs Broking....267
TLI60115 Advanced Diploma of Materiel Logistics....270
TLI60119 Advanced Diploma of Deployment Logistics....274
TLIA0003 Complete and check import/export documentation....278
Assessment Requirements for TLIA0003 Complete and check import/export documentation....281
TLIA0004 Complete receival and despatch documentation....283
Assessment Requirements for TLIA0004 Complete receival and despatch documentation....286
TLIA0005 Connect and disconnect reefer units....288
Assessment Requirements for TLIA0005 Connect and disconnect reefer units....290
TLIA0006 Coordinate goods to bond premises....292
Assessment Requirements for TLIA0006 Coordinate goods to bond premises....294
TLIA0007 Coordinate stevedoring clerical functions....296
Assessment Requirements for TLIA0007 Coordinate stevedoring clerical functions....299
TLIA0008 Coordinate stocktakes....301
Assessment Requirements for TLIA0008 Coordinate stocktakes....304
TLIA0009 Coordinate terminal/wharf equipment operations....306
Assessment Requirements for TLIA0009 Coordinate terminal/wharf equipment operations....309
TLIA0010 Identify goods and store to specifications....311
Assessment Requirements for TLIA0010 Identify goods and store to specifications....314
TLIA0011 Implement and monitor stevedoring regulations....316
Assessment Requirements for TLIA0011 Implement and monitor stevedoring regulations....319
TLIA0012 Lash and unlash cargo....321
Assessment Requirements for TLIA0012 Lash and unlash cargo....324
TLIA0013 Maintain container and freight records....327
Assessment Requirements for TLIA0013 Maintain container and freight records....330
TLIA0014 Organise and monitor terminal/wharf operations....332
Assessment Requirements for TLIA0014 Organise and monitor terminal/wharf operations....335
TLIA0015 Organise receival and despatch operations....337
Assessment Requirements for TLIA0015 Organise receival and despatch operations....340
TLIA0016 Organise warehouse records operations....342
Assessment Requirements for TLIA0016 Organise warehouse records operations....345
TLIA0017 Process receipt and delivery of containers and cargo....347
Assessment Requirements for TLIA0017 Process receipt and delivery of containers and cargo....350
TLIA0018 Transfer cargo....352
Assessment Requirements for TLIA0018 Transfer cargo....355
TLIB0004 Coordinate pooled equipment....357

© Commonwealth of Australia, 2025 Industry Skills Australia
Approved Page 3 of 6127
© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Requirements for TLIB0004 Coordinate pooled equipment 360
TLIB0005 Operate pooled equipment 362
Assessment Requirements for TLIB0005 Operate pooled equipment 365
TLIB0006 Prepare and monitor automated operations 367
Assessment Requirements for TLIB0006 Prepare and monitor automated operations 370
TLIB0007 Respond and rectify rail traffic autonomous operations 372
Assessment Requirements for TLIB0007 Respond and rectify rail traffic autonomous operations 375
TLIC0005 Close down rail traffic from autonomous operations 377
Assessment Requirements for TLIC0005 Close down rail traffic from autonomous operations 380
TLIC0006 Set up rail traffic for autonomous operation 382
Assessment Requirements for TLIC0006 Set up rail traffic for autonomous operation 385
TLID0003 Control lift and movement of crane 387
Assessment Requirements for TLID0003 Control lift and movement of crane 390
TLID0004 Direct crane operations 394
Assessment Requirements for TLID0004 Direct crane operations 397
TLID0005 Monitor crane operations 399
Assessment Requirements for TLID0005 Monitor crane operations 402
TLID0006 Move materials mechanically using automated equipment 405
Assessment Requirements for TLID0006 Move materials mechanically using automated equipment 408
TLID0007 Operate specialised load shifting equipment 410
Assessment Requirements for TLID0007 Operate specialised load shifting equipment 414
TLID0008 Shift loads using bridge or gantry crane 416
Assessment Requirements for TLID0008 Shift loads using bridge or gantry crane 420
TLID0009 Shift loads using cranes 422
Assessment Requirements for TLID0009 Shift loads using cranes 426
TLID0010 Shift loads using ship mounted crane 428
Assessment Requirements for TLID0010 Shift loads using ship mounted crane 432
TLID0011 Use bulk transfer equipment (dry) 434
Assessment Requirements for TLID0011 Use bulk transfer equipment (dry) 437
TLIE0003 Consolidate manifest documentation 439
Assessment Requirements for TLIE0003 Consolidate manifest documentation 441
TLIE0004 Maintain freight records 443
Assessment Requirements for TLIE0004 Maintain freight records 445
TLIE0005 Undertake rigger/dogger and operators communications 447
Assessment Requirements for TLIE0005 Undertake rigger/dogger and operators communications 449
TLIF0009 Ensure the safety of transport activities (Chain of Responsibility) 451
Assessment Requirements for TLIF0009 Ensure the safety of transport activities (Chain of Responsibility) 454
TLIF0010 Identify factors to reduce road harm 456
Assessment Requirements for TLIF0010 Identify factors to reduce road harm 458
TLIF0011 Identify interactions with other road users 461
Assessment Requirements for TLIF0011 Identify interactions with other road users 463
TLIF0012 Implement and coordinate accident-emergency procedures 465
Assessment Requirements for TLIF0012 Implement and coordinate accident-emergency procedures 468
TLIF0013 Manage the impact of human capabilities/limitations on human performance in a rail environment 470
Assessment Requirements for TLIF0013 Manage the impact of human capabilities/limitations on human performance in a rail environment 473

© Commonwealth of Australia, 2025 Industry Skills Australia
Approved Page 4 of 6127

TLIF0014 Monitor the safety of transport activities (Chain of Responsibility)....476
Assessment Requirements for TLIF0014 Monitor the safety of transport activities (Chain of Responsibility) 480
TLIF0015 Recognise the impact of human capabilities/limitations on human performance in a rail environment 483
Assessment Requirements for TLIF0015 Recognise the impact of human capabilities/limitations on human performance in a rail environment....486
TLIF0016 Working at height in the stevedoring industry 488
Assessment Requirements for TLIF0016 Working at height in the stevedoring industry 491
TLIK0002 Managing autonomous rail traffic operations by network control 493
Assessment Requirements for TLIK0002 Managing autonomous rail traffic operations by network control....496
TLIL5055 Manage a supply chain....498
Assessment Requirements for TLIL5055 Manage a supply chain 501
TLIO0002 Apply and monitor workplace security procedures....503
Assessment Requirements for TLIO0002 Apply and monitor workplace security procedures 506
TLIO0003 Follow security procedures when working with goods and cargo 508
Assessment Requirements for TLIO0003 Follow security procedures when working with goods and cargo....511
TLIX0004X Administer inventory systems 513
Assessment Requirements for TLIX0004X Administer inventory systems....516
TLIX0005X Administer market supply systems....518
Assessment Requirements for TLIX0005X Administer market supply systems 521
TLIX0006 Apply and monitor biosecurity policies and procedures 524
Assessment Requirements for TLIX0006 Apply and monitor biosecurity policies and procedures 527
TLIX0007X Build digital supply chain capability in the workforce 529
Assessment Requirements for TLIX0007X Build digital supply chain capability in the workforce....532
TLIX0008 Comply with biosecurity border clearance 534
Assessment Requirements for TLIX0008 Comply with biosecurity border clearance....537
TLIX0009X Employ digital supply chain risk management practices 539
Assessment Requirements for TLIX0009X Employ digital supply chain risk management practices....542
TLIX0010X Enable traceability in supply chains....544
Assessment Requirements for TLIX0010X Enable traceability in supply chains....547
TLIX0011X Establish blockchain in supply chains....549
Assessment Requirements for TLIX0011X Establish blockchain in supply chains....552
TLIX0012X Lead digital supply chain implementation....554
Assessment Requirements for TLIX0012X Lead digital supply chain implementation....557
TLIX0013X Maintain stock control and receivals....559
Assessment Requirements for TLIX0013X Maintain stock control and receivals....562
TLIX0014X Manage customer focussed supply chain....565
Assessment Requirements for TLIX0014X Manage customer focussed supply chain 568
TLIX0015X Manage fundamental aspects of supply chains....570
Assessment Requirements for TLIX0015X Manage fundamental aspects of supply chains574
TLIX0016X Manage outsourced supply chain operations....577
Assessment Requirements for TLIX0016X Manage outsourced supply chain operations580
TLIX0017X Manage supply chain mass customisation....582
Assessment Requirements for TLIX0017X Manage supply chain mass customisation 585
TLIX0018X Monitor compliance in digital supply chains 587
Assessment Requirements for TLIX0018X Monitor compliance in digital supply chains590

Approved Page 5 of 6127

TLIX0019X Monitor digital supply chain services 592
Assessment Requirements for TLIX0019X Monitor digital supply chain services....595
TLIX0020X Monitor ethical supply chain practices....597
Assessment Requirements for TLIX0020X Monitor ethical supply chain practices 600
TLIX0021X Work with global supply chains....602
Assessment Requirements for TLIX0021X Work with global supply chains 606
AHCBUS409 Participate in an e-business supply chain....609
Assessment Requirements for AHCBUS409 Participate in an e-business supply chain ...612
AHCMOM213 Operate and maintain chainsaws 614
Assessment Requirements for AHCMOM213 Operate and maintain chainsaws....619
AHCPCM203 Fell small trees....622
Assessment Requirements for AHCPCM203 Fell small trees....625
AHCWHS501 Manage work health and safety processes....627
Assessment Requirements for AHCWHS501 Manage work health and safety processes 631
AMPMGT809 Analyse data for business decision making....633
Assessment Requirements for AMPMGT809 Analyse data for business decision making636
AURHTJ001 Inspect heavy commercial vehicle wheels and tyres....638
Assessment Requirements for AURHTJ001 Inspect heavy commercial vehicle wheels and tyres....641
AURLTA001 Identify automotive mechanical systems and components....643
Assessment Requirements for AURLTA001 Identify automotive mechanical systems and components....646
AURVTA005 Clean vehicles 649
Assessment Requirements for AURVTA005 Clean vehicles....653
BSBADM409 Coordinate business resources....655
Assessment Requirements for BSBADM409 Coordinate business resources 658
BSBADM502 Manage meetings....660
Assessment Requirements for BSBADM502 Manage meetings 664
BSBCMM301 Process customer complaints....666
Assessment Requirements for BSBCMM301 Process customer complaints 669
BSBCMM401 Make a presentation....671
Assessment Requirements for BSBCMM401 Make a presentation 674
BSBCOM501 Identify and interpret compliance requirements 676
Assessment Requirements for BSBCOM501 Identify and interpret compliance requirements 680
BSBCOM601 Research compliance requirements and issues 682
Assessment Requirements for BSBCOM601 Research compliance requirements and issues686
BSBCUS201 Deliver a service to customers 688
Assessment Requirements for BSBCUS201 Deliver a service to customers....691
BSBCUS301 Deliver and monitor a service to customers 693
Assessment Requirements for BSBCUS301 Deliver and monitor a service to customers.697
BSBCUS401 Coordinate implementation of customer service strategies 699
Assessment Requirements for BSBCUS401 Coordinate implementation of customer service strategies 703
BSBCUS501 Manage quality customer service....705
Assessment Requirements for BSBCUS501 Manage quality customer service 708
BSBFIA301 Maintain financial records....710
Assessment Requirements for BSBFIA301 Maintain financial records 713
BSBFIA303 Process accounts payable and receivable....715
Assessment Requirements for BSBFIA303 Process accounts payable and receivable 719
BSBFIM501 Manage budgets and financial plans....721
Assessment Requirements for BSBFIM501 Manage budgets and financial plans 724
BSBHRM405 Support the recruitment, selection and induction of staff....726

Approved Page 6 of 6127
© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Requirements for BSBHRM405 Support the recruitment, selection and induction of staff 730
BSBHRM513 Manage workforce planning 732
Assessment Requirements for BSBHRM513 Manage workforce planning....736
BSBINM301 Organise workplace information 738
Assessment Requirements for BSBINM301 Organise workplace information....741
BSBINM401 Implement workplace information system....743
Assessment Requirements for BSBINM401 Implement workplace information system ..746
BSBINM501 Manage an information or knowledge management system 748
Assessment Requirements for BSBINM501 Manage an information or knowledge management system....752
BSBINN502 Build and sustain an innovative work environment....754
Assessment Requirements for BSBINN502 Build and sustain an innovative work environment....758
BSBITU101 Operate a personal computer 760
Assessment Requirements for BSBITU101 Operate a personal computer....763
BSBITU102 Develop keyboard skills 765
Assessment Requirements for BSBITU102 Develop keyboard skills....768
BSBLDR403 Lead team effectiveness 770
Assessment Requirements for BSBLDR403 Lead team effectiveness....773
BSBLDR511 Develop and use emotional intelligence....775
Assessment Requirements for BSBLDR511 Develop and use emotional intelligence 778
BSBMGT401 Show leadership in the workplace 780
Assessment Requirements for BSBMGT401 Show leadership in the workplace....784
BSBMGT402 Implement operational plan....786
Assessment Requirements for BSBMGT402 Implement operational plan 790
BSBMGT403 Implement continuous improvement....792
Assessment Requirements for BSBMGT403 Implement continuous improvement 795
BSBMGT407 Apply digital solutions to work processes 797
Assessment Requirements for BSBMGT407 Apply digital solutions to work processes...800
BSBMGT502 Manage people performance....802
Assessment Requirements for BSBMGT502 Manage people performance 806
BSBMGT516 Facilitate continuous improvement 808
Assessment Requirements for BSBMGT516 Facilitate continuous improvement....812
BSBMGT517 Manage operational plan....814
Assessment Requirements for BSBMGT517 Manage operational plan 818
BSBMGT605 Provide leadership across the organisation 820
Assessment Requirements for BSBMGT605 Provide leadership across the organisation 824
BSBMGT616 Develop and implement strategic plans....826
Assessment Requirements for BSBMGT616 Develop and implement strategic plans 830
BSBMGT617 Develop and implement a business plan....832
Assessment Requirements for BSBMGT617 Develop and implement a business plan 836
BSBMKG513 Promote products and services to international markets 838
Assessment Requirements for BSBMKG513 Promote products and services to international markets 842
BSBPMG409 Apply project scope management techniques....844
Assessment Requirements for BSBPMG409 Apply project scope management techniques847
BSBPMG416 Apply project procurement procedures 849
Assessment Requirements for BSBPMG416 Apply project procurement procedures....852
BSBPMG512 Manage project time 854
Assessment Requirements for BSBPMG512 Manage project time....857
BSBPMG514 Manage project cost 859
Assessment Requirements for BSBPMG514 Manage project cost....862

BSBPMG515 Manage project human resources....864
Assessment Requirements for BSBPMG515 Manage project human resources....867
BSBPMG516 Manage project information and communication....869
Assessment Requirements for BSBPMG516 Manage project information and communication....872
BSBPMG518 Manage project procurement....874
Assessment Requirements for BSBPMG518 Manage project procurement....878
BSBPMG522 Undertake project work....880
Assessment Requirements for BSBPMG522 Undertake project work....884
BSBPMG604 Direct cost management of a project program....886
Assessment Requirements for BSBPMG604 Direct cost management of a project program889
BSBPMG606 Direct human resources management of a project program....891
Assessment Requirements for BSBPMG606 Direct human resources management of a project program....895
BSBPMG609 Direct procurement and contracting for a project program....897
Assessment Requirements for BSBPMG609 Direct procurement and contracting for a project program....901
BSBPRC504 Manage a supply chain....903
Assessment Requirements for BSBPRC504 Manage a supply chain....907
BSBPUR301 Purchase goods and services....909
Assessment Requirements for BSBPUR301 Purchase goods and services....912
BSBREL401 Establish networks....914
Assessment Requirements for BSBREL401 Establish networks....917
BSBREL402 Build client relationships and business networks....919
Assessment Requirements for BSBREL402 Build client relationships and business networks....923
BSBRKG302 Undertake disposal....925
Assessment Requirements for BSBRKG302 Undertake disposal....929
BSBRKG304 Maintain business records....931
Assessment Requirements for BSBRKG304 Maintain business records....934
BSBRSK401 Identify risk and apply risk management processes....936
Assessment Requirements for BSBRSK401 Identify risk and apply risk management processes....939
BSBRSK501 Manage risk....941
Assessment Requirements for BSBRSK501 Manage risk....945
BSBSUS501 Develop workplace policy and procedures for sustainability....947
Assessment Requirements for BSBSUS501 Develop workplace policy and procedures for sustainability....951
BSBWHS308 Participate in WHS hazard identification, risk assessment and risk control processes....953
Assessment Requirements for BSBWHS308 Participate in WHS hazard identification, risk assessment and risk control processes....957
BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements....959
Assessment Requirements for BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements....963
BSBWHS521 Ensure a safe workplace for a work area....965
Assessment Requirements for BSBWHS521 Ensure a safe workplace for a work area....969
BSBWOR201 Manage personal stress in the workplace....971
Assessment Requirements for BSBWOR201 Manage personal stress in the workplace....975
BSBWOR301 Organise personal work priorities and development....977
Assessment Requirements for BSBWOR301 Organise personal work priorities and development....980

BSBWOR501 Manage personal work priorities and professional development 982
Assessment Requirements for BSBWOR501 Manage personal work priorities and professional development 985
BSBWOR502 Lead and manage team effectiveness 987
Assessment Requirements for BSBWOR502 Lead and manage team effectiveness.....991
BSBWRK411 Support employee and industrial relations procedures 993
Assessment Requirements for BSBWRK411 Support employee and industrial relations procedures 996
BSBWRK520 Manage employee relations.....998
Assessment Requirements for BSBWRK520 Manage employee relations 1002
BSBWRT301 Write simple documents 1004
Assessment Requirements for BSBWRT301 Write simple documents.....1007
CHCCCS020 Respond effectively to behaviours of concern.....1009
Assessment Requirements for CHCCCS020 Respond effectively to behaviours of concern1012
CPCCCM2007B Use explosive power tools 1014
CPCCCM2008B Erect and dismantle restricted height scaffolding 1024
CPCCCM2010B Work safely at heights 1034
CPCCCM3003 Work safely around electrical sources, services and assets 1042
Assessment Requirements for CPCCCM3003 Work safely around electrical sources, services and assets 1047
CPCCCM3003A Work safely around power sources, services and assets 1050
CPCCCO3054 Operate concrete agitator trucks 1060
Assessment Requirements for CPCCCO3054 Operate concrete agitator trucks 1064
CPCCLDG3001A Licence to perform dogging 1066
CPCCLRG3001A Licence to perform rigging basic level 1076
CPCCLRG3002A Licence to perform rigging intermediate level 1089
CPCCLRG4001A Licence to perform rigging advanced level 1101
CPCCOHS1001A Work safely in the construction industry 1113
CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry 1124
CPCCSF2003 Cut and bend materials using oxy-LPG equipment 1138
Assessment Requirements for CPCCSF2003 Cut and bend materials using oxy-LPG equipment 1141
CPCCWHS1001 Prepare to work safely in the construction industry 1144
Assessment Requirements for CPCCWHS1001 Prepare to work safely in the construction industry 1148
CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry 1152
Assessment Requirements for CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry 1155
CPPFES2005A Demonstrate first attack firefighting equipment.....1157
CPPSEC5001A Establish and maintain an Occupational Health and Safety system.....1163
CPPWMT3003 Identify and respond to hazards and emergencies in waste management1173
Assessment Requirements for CPPWMT3003 Identify and respond to hazards and emergencies in waste management.....1176
CPPWMT3006 Receive, transfer and dispatch waste 1179
Assessment Requirements for CPPWMT3006 Receive, transfer and dispatch waste.....1183
CPPWMT3011A Respond to waste emergencies 1185
CPPWMT3015A Move waste using loadshifting equipment 1195
CPPWMT3044A Identify wastes and hazards 1206
DEFVEH001 Conduct recovery vehicle operations in a field environment 1213
Assessment Requirements for DEFVEH001 Conduct recovery vehicle operations in a field environment.....1217

DEFVEH002 Extract disabled equipment using winching techniques in a field environment....1220
Assessment Requirements for DEFVEH002 Extract disabled equipment using winching techniques in a field environment....1223
FBPFSY2001 Implement the food safety program and procedures....1225
Assessment Requirements for FBPFSY2001 Implement the food safety program and procedures....1228
FBPFSY3001 Monitor the implementation of quality and food safety programs....1231
Assessment Requirements for FBPFSY3001 Monitor the implementation of quality and food safety programs....1234
FWPCOT3261 Transport forestry logs using trucks....1237
Assessment Requirements for FWPCOT3261 Transport forestry logs using trucks....1241
HLTAID001 Provide cardiopulmonary resuscitation....1245
Assessment Requirements for HLTAID001 Provide cardiopulmonary resuscitation....1248
HLTAID002 Provide basic emergency life support....1251
Assessment Requirements for HLTAID002 Provide basic emergency life support....1254
HLTAID003 Provide first aid....1258
Assessment Requirements for HLTAID003 Provide first aid....1261
HLTAID006 Provide advanced first aid....1265
Assessment Requirements for HLTAID006 Provide advanced first aid....1269
HLTAID011 Provide First Aid....1274
Assessment Requirements for HLTAID011 Provide First Aid....1276
HLTAID014 Provide Advanced First Aid....1280
Assessment Requirements for HLTAID014 Provide Advanced First Aid....1283
HLTWHS006 Manage personal stressors in the work environment....1288
Assessment Requirements for HLTWHS006 Manage personal stressors in the work environment....1290
ICPPRN497 Work with digital information....1292
Assessment Requirements for ICPPRN497 Work with digital information....1295
ICTICT104 Use digital devices....1298
Assessment Requirements for ICTICT104 Use digital devices....1301
ICTICT804 Direct ICT in a supply chain....1303
Assessment Requirements for ICTICT804 Direct ICT in a supply chain....1306
MARC022 Perform mooring and unmooring activities....1308
Assessment Requirements for MARC022 Perform mooring and unmooring activities....1313

TLI10115 Certificate I in Transport and Logistics (Pathways)

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This qualification is a cross-sector certificate using units in the TLI Transport and Logistics Training Package, which provides a pathway for those who have had limited access to formal vocational and education training such as young unemployed people, early school leavers and students at risk, older unemployed people, Indigenous groups, geographically disadvantaged, and people with learning difficulties.

It is also designed to assist Year 9 and 10 students as a framework for a structured workplace learning program, and to develop employability and technical skills required by those commencing a career in the Transport and Logistics Industry.

The breadth, depth and complexity of knowledge and skills in this qualification would prepare a person to perform a defined range of activities, most of which may be routine and predictable.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **7 units of competency** comprising:

3 core units listed below plus

1 technical elective unit from the technical elective units listed below **plus**

3 general elective units may be selected from this Training Package or from any relevant nationally endorsed Training Package or accredited course.

The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIPC1001 Demonstrate care and apply safe practices at work

TLIPC1002 Adapt to work requirements in the transport and logistics industry

TLIPC1003 Apply effective work practices

Technical elective units

TLIPC1004 Complete courier delivery operations

TLIPC1005 Complete small store operations

General elective units

3 general elective units to be selected from this Training Package or any relevant nationally endorsed Training Package or accredited course.

Qualification Mapping Information

This qualification replaces and is equivalent to TLIPC110 Certificate I in Transport and Logistics (Pathways).

TLI11215 Certificate I in Warehousing Operations

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for the Warehousing and Storage Industry.

The breadth, depth and complexity of knowledge and skills in this qualification would prepare a person to perform a defined range of activities, most of which may be routine and predictable.

No licensing legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **10 units of competency** comprising:

2 core units listed below plus

8 general elective units from the general elective units list below. Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified in the unit are complied with.

Core units

TLIF1001	Follow work health and safety procedures
TLIL1001	Complete workplace orientation and induction procedures

General elective units

TLIA1001	Secure cargo

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIA2011	Package goods
TLIA2012	Pick and process orders
TLIA2022	Participate in stocktakes
TLIB1031	Clean up plant, equipment and worksite
TLIC1013	Ride courier/delivery bicycle
TLID1001	Shift materials safely using manual handling methods
TLID1002	Shift a load using manually-operated equipment
TLIE1003	Participate in basic workplace communication
TLIE1005	Carry out basic workplace calculations
TLIF1002	Conduct housekeeping activities
TLIF1009	Conduct cleaning operations in enclosed spaces
TLIG1001	Work effectively with others
TLII1002	Apply customer service skills
TLIU1013	Prepare for environmentally sustainable work practices

Qualification Mapping Information

This qualification replaces and is equivalent to TLI11210 Certificate I in Warehousing Operations.

TLI20219 Certificate II in Road Transport Terminal Operations

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This qualification is for those engaged in or entering the road transport terminal operations environment.

It involves a prescribed range of tasks including known routines and procedures, freight handling and other duties, and the use of technology.

It provides a foundation for career opportunities within the wider road transport sector.

This qualification is suitable for:

- students undertaking VET in school
- school leavers
- new workers
- transitional workers into the industry.

Job roles

Job roles and titles vary across different sectors. Possible job roles relevant to this qualification include:

- equipment operator
- receival and despatch
- pick and packer
- specialised cargo handler
- administration assistant
- intermodal terminal worker
- freight handler
- drivers' assistant
- trade assistant
- heavy vehicle cleaner.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

© Commonwealth of Australia, 2025 Industry Skills Australia

Packaging Rules

A total of **16 units of competency** comprising:

9 core units listed below, **plus**

1 **specialist elective unit** from Group A **(Fatigue risk management)**

6 general elective units from Group B listed below.

Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLID1001	Shift materials safely using manual handling methods
TLIE0002	Process workplace documentation
TLIE1003	Participate in basic workplace communication
TLIE1005	Carry out basic workplace calculations
TLIF0009	Ensure the safety of transport activities (Chain of Responsibility)
TLIF1001	Follow work health and safety procedures
TLIF1002	Conduct housekeeping activities
TLIL1001	Complete workplace orientation/induction procedures
TLIPC0001	Prepare for work in the road transport industry

Elective units

Group A - Fatigue risk management

TLIF0005	Apply a fatigue risk management system
TLIF2010	Apply fatigue management strategies

Group B - General elective units

AURHTJ001	Inspect heavy commercial vehicle wheels and tyres
AURLTA001	Identify automotive mechanical systems and components
AURVTA005	Clean vehicles

TLI20319 Certificate II in Stevedoring

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in operational roles within a stevedoring environment. It involves a range of tasks involving known routines and procedures and taking some responsibility for the quality of work outcomes.

Successful achievement of the licensing units within the qualification must align with applicable licensing and regulatory requirements.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- stevedore.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

^ From 1 July 2022 the elective unit HLTAID003 must no longer be delivered and will be replaced in the Packaging Rules by the unit HLTAID011 - for more information see: https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **14 units of competency** comprising:

6 core units listed below, **plus**

8 general elective units from the list below.

Up to 2 of the 8 general elective units may be imported from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

© Commonwealth of Australia, 2025 Industry Skills Australia

Core units

TLID1001	Shift materials safely using manual handling methods
TLIE1003	Participate in basic workplace communication
TLIF1001	Follow work health and safety procedures
TLIF2006	Apply accident-emergency procedures
TLIF2010	Apply fatigue management strategies
TLIG1001	Work effectively with others

General elective units

HLTAID003	Provide first aid
^ HLTAID011	**Provide First Aid (must be delivered from 1 July 2022)**
MARC022	Perform mooring and unmooring activities
MARE002	Communicate during mooring and unmooring activities
MARF017	Follow work health and safety, and emergency procedures during mooring and unmooring activities
TLIA0003	Complete and check import/export documentation
TLIA0005	Connect and disconnect reefer units
TLIA0012	Lash and unlash cargo
TLIA2014	Use product knowledge to complete work operations
TLIB2001	Check and assess operational capabilities of equipment
TLIC1051	Operate commercial vehicle
TLIC2002	Drive light rigid vehicle
TLIC3003	Drive medium rigid vehicle
TLIC3004	Drive heavy rigid vehicle
TLIC3005	Drive heavy combination vehicle
TLIC4006	Drive multi-combination vehicle
TLID0003	Control lift and movement of crane

© Commonwealth of Australia, 2025 Industry Skills Australia

TLID0006	Move materials mechanically using automated equipment
TLID0007	Operate specialised load shifting equipment
TLID2003	Handle dangerous goods/hazardous substances
TLID2004	Load and unload goods/cargo
TLID2010	Operate a forklift
TLID2022	Conduct weighbridge operations
TLID2045	Operate specialised light load shifting equipment
TLID2047	Prepare cargo for transfer with slings
TLID3011	Conduct specialised forklift operations
TLIE0002	Process workplace documentation
TLIE1005	Carry out basic workplace calculations
TLIE2007	Use communications systems
TLIF0009	Ensure the safety of transport activities (Chain of Responsibility)
TLIF0016	Working at height in the stevedoring industry
TLIF1002	Conduct housekeeping activities
TLIF2018	Operate firefighting equipment
TLIG2007	Work in a socially diverse environment
TLII1002	Apply customer service skills
TLIJ2001	Apply quality procedures
TLIK2010	Use infotechnology devices in the workplace
TLIL1001	Complete workplace orientation/induction procedures
TLIL2008	Complete routine administrative tasks
TLILIC0003	Licence to operate a forklift truck
TLILIC0005	Licence to operate a boom-type elevating work platform (boom length 11 metres or more)
TLIO0003	Follow security procedures when working with goods and cargo

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIU1009 Monitor plant and equipment in an environmentally sustainable manner

Qualification Mapping Information

This qualification replaces and is equivalent to TLI21416 Certificate II in Stevedoring.

TLI20419 Certificate II in Warehousing Operations

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for the warehousing and storage industry.

It involves a range of tasks involving known routines and procedures, and taking some accountability for the quality of work outcomes.

No licensing legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **16 units of competency** comprising:

3 core units listed below, **plus**

13 general elective units from the general elective units listed below.

Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIF0009	Ensure the safety of transport activities (Chain of Responsibility)
TLIF1001	Follow work health and safety procedures
TLIL1001	Complete workplace orientation/induction procedures

General elective units

BSBCUS201	Deliver a service to customers

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIA0003	Complete and check import/export documentation
TLIA0005	Connect and disconnect reefer units
TLIA0010	Identify goods and store to specifications
TLIA2011	Package goods
TLIA2012	Pick and process orders
TLIA2013	Receive goods
TLIA2014	Use product knowledge to complete work operations
TLIA2020	Replenish stock
TLIA2021	Despatch stock
TLIA2022	Participate in stocktakes
TLIA2041	Manually sort mail and parcels
TLIA2042	Despatch mail
TLIA2043	Consolidate mail
TLIA2044	Carry out delivery operations
TLIA2045	Process international parcels and letters
TLIA2046	Process parcels and letters
TLIA2047	Stream mail
TLIB0003	Use and maintain minor mechanical equipment
TLIB0005	Operate pooled equipment
TLIB1028	Maintain and use hand tools
TLIB1030	Undertake general site maintenance
TLIB2001	Check and assess operational capabilities of equipment
TLIB2009	Check conveyor operational status
TLIC1051	Operate commercial vehicle
TLID0006	Move materials mechanically using automated equipment
TLID0007	Operate specialised load shifting equipment

© Commonwealth of Australia, 2025 Industry Skills Australia

TLID0011	Use bulk transfer equipment (dry)
TLID2003	Handle dangerous goods/hazardous substances
TLID2004	Load and unload goods/cargo
TLID2010	Operate a forklift
TLID2016	Load and unload explosives/dangerous goods
TLID2022	Conduct weighbridge operations
TLID2045	Operate specialised light load shifting equipment
TLID2047	Prepare cargo for transfer with slings
TLIE0002	Process workplace documentation
TLIE2001	Present routine workplace information
TLIE2007	Use communications systems
TLIF2006	Apply accident-emergency procedures
TLIF2010	Apply fatigue management strategies
TLIF2012	Apply safe procedures when handling/transporting dangerous goods or explosives
TLIF2018	Operate firefighting equipment
TLIG2007	Work in a socially diverse environment
TLIH2001	Interpret road maps and navigate pre-determined routes
TLIH2003	Prioritise courier/delivery operations
TLIJ2001	Apply quality procedures
TLIJ2003	Apply grain protection measures
TLIJ2004	Implement grain monitoring measures
TLIK2003	Apply keyboard skills
TLIK2007	Perform electronic data interchange to transmit shipping documentation
TLIK2010	Use infotechnology devices in the workplace
TLIL2008	Complete routine administrative tasks

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIL2031	Monitor and process attendance records
TLILIC0003	Licence to operate a forklift truck
TLILIC0004	Licence to operate an order picking forklift truck
TLIO0003	Follow security procedures when working with goods and cargo
TLIP2014	Capture records into a records keeping system
TLIP2017	Maintain control of records
TLIP2018	Provide information from and about records
TLIP2024	Conduct financial transactions
TLIP2029	Prepare and process financial documents
TLIP2032	Maintain petty cash account
TLIP2033	Sell products and services
TLIU1009	Monitor plant and equipment in an environmentally sustainable manner
TLIU2012	Participate in environmentally sustainable work practices
TLIW2017	Cut and join materials
TLIW2020	Undertake pallet repairs
TLIW2021	Clean and inspect pallets
TLIW2023	Manufacture pallets using manual methods

Qualification Mapping Information

This qualification replaces and is equivalent to TLI21616 Certificate II in Warehousing Operations.

TLI21216 Certificate II in Driving Operations

Modification History

Release 4. This is the fourth release of this qualification in the TLI Transport and Logistics Training Package. The following general elective unit update has been added:

- TLIF0009 Ensure the safety of transport activities (Chain of Responsibility).

Release 3. This is the third release of this qualification in the TLI Transport and Logistics Training Package. The following units have been updated with new codes:

- TLIB0002 Carry out vehicle inspection
- TLIE0002 Process workplace documentation.

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package.

Packaging rules for the elective units have been clarified.

The following unit has been added to the general elective units:

- TLIF0005 Apply a fatigue risk management system.

Release 1. This is first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in driving operation job roles within the transport and logistics industry.

It involves a prescribed range of tasks involving known routines and procedures, and taking some accountability for the quality of work outcomes.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- courier driver
- express driver
- pickup and delivery driver
- priority driver
- taxi truck driver
- taxi driver
- tow truck driver.

Successful achievement of the licensing units within the qualification must align with licensing and regulatory requirements applicable to driving and state/territory regulatory requirements.

© Commonwealth of Australia, 2025 Industry Skills Australia

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **18 units of competency** comprising**:**

6 core units listed below, **plus**

1 licensing/industry elective unit relevant to the vehicle type applicable to the job role from the licensing/industry elective units listed below, **plus**

All units within one of the **specialist elective groups** (job roles) from Group A, Group B, Group C, Group D or Group E listed below, **plus**

4 general elective units from Group F listed below if selecting Group E, **or**

5 general elective units from Group F listed below if selecting Group A, Group C, Group D, **or**

6 general elective units from Group F listed below if selecting Group B.

Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The units must contribute to the vocational outcomes of the qualification.

Elective units can only be counted once towards the qualification packaging rules i.e. if a unit is listed in both a specialist elective group and the general elective group, it can only be counted as one of the elective units required.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLID1001	Shift materials safely using manual handling methods
TLIE1005	Carry out basic workplace calculations
TLIF1001	Follow work health and safety procedures
TLIF2010	Apply fatigue management strategies
TLIH2001	Interpret road maps and navigate pre-determined routes
TLIL1001	Complete workplace orientation/induction procedures

Licensing/industry elective units

TLIC1051	Operate commercial vehicle
TLIC2002	Drive light rigid vehicle
TLIC2009	Drive taxi

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIC2012	Ride courier/delivery motorcycle
TLIC3003	Drive medium rigid vehicle
TLIC3004	Drive heavy rigid vehicle
TLILIC2014	Licence to drive a light rigid vehicle
TLILIC2015	Licence to drive a medium rigid vehicle
TLILIC2016	Licence to drive a heavy rigid vehicle

Specialist elective units

Select one group (job role) from the following options:

Group A: Medium Freight

Group B: Tow Truck

Group C: Taxi

Group D: Community Service

Group E: General

Group A: Medium Freight

TLIB0002	Carry out vehicle inspection
TLID2004	Load and unload goods/cargo
TLIE0002	Process workplace documentation
TLIF0009	Ensure the safety of transport activities (Chain of Responsibility)
TLIF2006	Apply accident-emergency procedures
TLII1002	Apply customer service skills

Group B: Tow Truck

TLIB2079	Set up and secure a towing situation
TLIC3035	Manage the operation of a tow truck
TLID2004	Load and unload goods/cargo
TLIE0002	Process workplace documentation
TLII1002	Apply customer service skills

Group C: Taxi

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIB2090	Use communication systems in a taxi
TLIF2072	Comply with safety and security procedures
TLIH3004	Identify major roads, services and attractions
TLII2019	Provide taxi customer service
TLIL2060	Complete induction to the transport industry
TLIP2037	Carry out financial transactions and maintain records

Group D: Community Service

TLIB0002	Carry out vehicle inspection
TLIC3011	Transport passengers with disabilities
TLID2004	Load and unload goods/cargo
TLIE0002	Process workplace documentation
TLIF2019	Ensure a safe on-board passenger and working environment
TLIJ2001	Apply quality procedures

Group E: General

TLIA1001	Secure cargo
TLIB0002	Carry out vehicle inspection
TLID2004	Load and unload goods/cargo
TLIE0002	Process workplace documentation
TLIE1003	Participate in basic workplace communication
TLIF0009	Ensure the safety of transport activities (Chain of Responsibility)
TLII1002	Apply customer service skills

Group F: General elective units

TLIA1001	Secure cargo
TLIA2041	Manually sort mail and parcels
TLIA2042	Despatch mail
TLIA2043	Consolidate mail

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIA2044	Carry out delivery operations
TLIA2045	Process international parcels and letters
TLIA2046	Process parcels and letters
TLIA2047	Stream mail
TLIB0002	Carry out vehicle inspection
TLIB1080	Use, clean and maintain towing equipment
TLIB2079	Set up and secure a towing situation
TLIB2090	Use communication systems in a taxi
TLIC1013	Ride courier/delivery bicycle
TLIC1051	Operate commercial vehicle
TLIC2012	Ride courier/delivery motorcycle
TLIC2040	Provide wheelchair accessible taxi services to passengers with disabilities
TLIC2049	Operate heavy vehicle on unsealed roads
TLIC3011	Transport passengers with disabilities
TLIC3035	Manage the operation of a tow truck
TLID2004	Load and unload goods/cargo
TLID2029	Prepare articles for delivery
TLIE0002	Process workplace documentation
TLIE1003	Participate in basic workplace communication
TLIE3004	Prepare workplace documents
TLIF0005	Apply a fatigue risk management system
TLIF0009	Ensure the safety of transport activities (Chain of Responsibility)
TLIF2006	Apply accident-emergency procedures
TLIF2019	Ensure a safe on-board passenger and working environment
TLIF2072	Comply with safety and security procedures
TLIF3091	Apply awareness of dangerous goods and hazardous materials requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIH3002	Plan and navigate routes
TLIH3004	Identify major roads, services and attractions
TLII1002	Apply customer service skills
TLII2019	Provide taxi customer service
TLIJ2001	Apply quality procedures
TLIK2003	Apply keyboard skills
TLIK2010	Use infotechnology devices in the workplace
TLIL2060	Complete induction to the transport industry
TLILIC2014	Licence to drive a light rigid vehicle
TLILIC2015	Licence to drive a medium rigid vehicle
TLILIC2016	Licence to drive a heavy rigid vehicle
TLIO0003	Follow security procedures when working with goods and cargo
TLIP2030	Conduct courier/delivery cash transactions
TLIP2037	Carry out financial transactions and maintain records
TLIU1009	Monitor plant and equipment in an environmentally sustainable manner

Qualification Mapping Information

This qualification replaces but is **not** equivalent to TLI21210 Certificate II in Driving Operations.

TLI21315 Certificate II in Rail Infrastructure

Modification History

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following modifications have been made:

- TLIF0008 Apply safety critical communications in the rail environment added to general elective units
- Imported units updated.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for a person engaged in basic operations within the rail infrastructure environment undertaking a range of tasks involving known routines and procedures, and taking some responsibility for the quality of work outcomes.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

Rail Infrastructure – Track Work

- Track Worker
- Track Installer
- Track Maintainer

Rail Infrastructure – Structures

- Structures Maintainer

Rail Infrastructure – Track Surfacing

- Plant Operator
- Mobile Plant Operator
- Way Gang Driver.

Please note: RTO to insert on the testamur, the specialist elective unit group selected from the group choice below.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

© Commonwealth of Australia, 2025 Industry Skills Australia

Packaging Rules

A total of **16 units of competency** comprising:

7 core units listed below **plus**

All units within one of the **specialist elective unit groups** (job roles) from Group A, Group B or Group C listed below **plus**

3 general elective units from the general elective units listed below if selecting Group A or Group C **or**
4 general elective units from the general elective units listed below if selecting Group B.

The **general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

The following imported units have a prerequisite unit:

- CPCCCM2007B Use explosive power tools
- CPCCCM2008B Erect and dismantle restricted height scaffolding.

Core units

TLIB1028 Maintain and use hand tools

TLID1001 Shift materials safely using manual handling methods

TLIE1003 Participate in basic workplace communication

TLIF1001 Follow work health and safety procedures

TLIF2010 Apply fatigue management strategies

TLIF2080 Safely access the rail corridor

TLIU2008 Apply environmental procedures to rail infrastructure

Specialist elective units

Select all units from one of the following specialist elective groups:

Group A: Track Work

Group B: Structures

Group C: Track Surfacing.

Group A: Track Work

TLIB2085 Apply track fundamentals

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIB2092 Operate minor mechanical equipment

TLIS2030 Carry out track ballasting

TLIS2031 Install railway sleepers

TLIS2034 Install and repair rail fastening systems

TLIS2044 Carry out rail installation

Group B: Structures

RIICCM201D Carry out measurements and calculations

RIICCM203D Read and interpret plans and job specifications

TLIB2084 Carry out routine maintenance of structures

TLIB2086 Apply awareness of structures fundamentals

TLIB2092 Operate minor mechanical equipment

Group C: Track Surfacing

TLIB1093 Clean equipment and restore worksite

TLIB2001 Check and assess operational capabilities of equipment

TLIB2085 Apply track fundamentals

TLIB2091 Measure and record track geometry

TLIS2030 Carry out track ballasting

TLIC2058 Travel medium or heavy self-propelled on-track equipment

OR

TLIC2059 Propel and operate light on-track equipment

General elective units

CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry

CPCCCM2007B Use explosive power tools

© Commonwealth of Australia, 2025 Industry Skills Australia

CPCCCM2008B Erect and dismantle restricted height scaffolding

RIICCM205E Carry out manual excavation

RIICCM207D Spread and compact materials manually

RIICCM208D Carry out basic levelling

RIICCM209D Carry out concrete work

RIIHAN301D Operate elevating work platform

RIIMPO317E Conduct roller operations

RIIMPO318E Conduct civil construction skid steer loader operations

RIIMPO319D Conduct backhoe/loader operations

RIIMPO320E Conduct civil construction excavator operations

RIIMPO321E Conduct civil construction wheeled front end loader operations

RIIMPO322D Conduct civil construction tracked front end loader operations

RIIMPO326D Conduct civil construction water cart operations

RIIWHS204D Work safely at heights

RIIWHS205D Control traffic with stop-slow bat

RIIWHS302D Implement traffic management plan

TLIB1093 Clean equipment and restore worksite

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIB2034 Maintain poles and associated hardware

TLIB2091 Measure and record track geometry

TLIB2097 Install and maintain guard rails

TLIB2121 Maintain rail joints

TLIC3045 Operate road/rail vehicle

TLIF0008 Apply safety critical communications in the rail environment

TLIF2062 Apply awareness of safeworking rules and regulations

TLIG1001 Work effectively with others

TLIK2010 Use infotechnology devices in the workplace

TLIS2004 Install and maintain rail bonding systems

TLIS2020 Install overhead wiring structure

TLIS2027 Install and maintain surface track drainage

TLIS2033 Install and repair temporary track supports

TLIS2034 Install and repair rail fastening systems

TLIS2035 Install and repair fences and gates

TLIW2001 Operate under track protection rules

TLIW2028 Identify the principles of ballast cleaning operations

TLIW2029 Identify the principles of ballast regulator operations

TLIW2030 Identify the principles of dynamic track stabaliser operations

TLIW2031 Identify the principles of self-propelled rail grinder operations

TLIW2032 Identify the principles of tamping machine operations

TLIW2033 Identify the principles of mechanised track laying operations

TLIW2038 Place and remove temporary speed restriction equipment

TLIW3035 Heat and cut materials using oxy-LPG equipment for the rail industry

TLI21918 Certificate II in Track Protection

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for a person engaged in basic operations in the rail infrastructure environment undertaking track protection activities.

This includes a range of tasks involving known routines and procedures, and taking some responsibility for the quality of work outcomes.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **15 units of competency** comprising:

10 core units listed below **plus**

4 specialist elective units from the specialist elective units listed below **plus**

1 general elective unit from the **general elective units** listed below or from the remaining **specialist** elective units listed below. This **1 general elective unit** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLID1001	Shift materials safely using manual handling methods
TLIE0002	Process workplace documentation
TLIE1003	Participate in basic workplace communication
TLIE2007	Use communications systems

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIF1001	Follow work health and safety procedures
TLIF2010	Apply fatigue management strategies
TLIF2080	Safely access the rail corridor
TLIG1001	Work effectively with others
TLIU2008	Apply environmental procedures to rail infrastructure
TLIW2001	Operate under track protection rules

Specialist elective units

TLIB2085	Apply track fundamentals
TLIE1005	Carry out basic workplace calculations
TLIF2081	Perform lookout duties
TLIF2082	Perform handsignaller duties
TLIF3083	Conduct track protection assessment
TLIL3082	Implement absolute signal blocking

General elective units

RIIWHS205D	Control traffic with stop-slow bat
RIIWHS302D	Implement traffic management plan
TLIE2029	Conduct workplace information briefings
TLIF0008	Apply safety critical communications in the rail environment
TLIF2006	Apply accident-emergency procedures
TLIF2097	Use audible track warning devices
TLIK2010	Use infotechnology devices in the workplace
TLIW2037	Clip and secure points
TLIW2038	Place and remove temporary speed restriction equipment
TLIW2039	Place and remove permanent way stop boards
TLIW3026	Operate stand alone signalling/point control equipment

TLI22115 Certificate II in Rail Track Vehicle Driving

Modification History

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following modifications have been made:

- TLIF0008 Apply safety critical communications in the rail environment added to general elective units
- TLIE0002 Process workplace documentation has an updated code.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for a person driving a medium/heavy rail track vehicle from one location to another over main line track.

It involves a broad range of skilled applications in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Track Vehicle Operator/Driver
- Track Machine Driver.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **17 units of competency** comprising:

11 core units listed below **plus**

6 general elective units from the g**eneral elective units** listed below. **Up to 3 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

© Commonwealth of Australia, 2025 Industry Skills Australia

Core units

TLIC2075	Drive and monitor medium or heavy self-propelled on-track equipment
TLIC2076	Establish and operate braking system on medium/heavy self-propelled on-track equipment
TLIC2078	Identify and respond to signals and trackside signs
TLIC2080	Start up, shut down and stable medium/heavy self-propelled on-track equipment
TLIE1003	Participate in basic workplace communication
TLIF1001	Follow work health and safety procedures
TLIF2010	Apply fatigue management strategies
TLIF2080	Safely access the rail corridor
TLIF2106	Respond to emergencies and abnormal situations when driving medium/heavy on-track vehicles
TLIU2008	Apply environmental procedures to rail infrastructure
TLIW2001	Operate under track protection rules

General elective units

TLIB1028	Maintain and use hand tools
TLIB1093	Clean equipment and restore worksite
TLIB2001	Check and assess operational capabilities of equipment
TLIB2085	Apply track fundamentals
TLIB2091	Measure and record track geometry
TLIB2130	Diagnose and rectify minor faults on on-track vehicles
TLIB2133	Test medium/heavy track vehicle braking system
TLIC0083	Access rail track to travel track vehicle under a proceed authority
TLIC0084	Access rail track to travel track vehicles under manual block working conditions
TLIC2054	Access rail track to run track vehicle within defined worksite

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIC2074	Couple and uncouple track maintenance vehicles
TLID1001	Shift materials safely using manual handling methods
TLIE0002	Process workplace documentation
TLIE2031	Use communication systems for on-track vehicle operations
TLIF0008	Apply safety critical communications in the rail environment
TLIF2006	Apply accident-emergency procedures
TLIF2018	Operate firefighting equipment
TLIF3058	Apply safeworking rules and regulations to rail functions
TLIF3091	Apply awareness of dangerous goods and hazardous materials requirements
TLII4022	Identify and meet customer requirements
TLIK2010	Use infotechnology devices in the workplace
TLIS2030	Carry out track ballasting
TLIW2028	Identify the principles of ballast cleaning operations
TLIW2029	Identify the principles of ballast regulator operations
TLIW2030	Identify the principles of dynamic track stabaliser operations
TLIW2031	Identify the principles of self-propelled rail grinder operations
TLIW2032	Identify the principles of tamping machine operations
TLIW2033	Identify the principles of mechanised track laying operations
TLIW2037	Clip and secure points
TLIW3026	Operate stand alone signalling/point control equipment

Qualification Mapping Information

This qualification replaces and is equivalent to TLI22113 Certificate II in Rail Track Vehicle Driving.

TLI22215 Certificate II in Tram or Light Rail Infrastructure

Modification History

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following modifications have been made:

- TLIF0008 Apply safety critical communications in the rail environment added to general elective units
- Imported unit updated.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for a person engaged in basic operations within the tram/light rail infrastructure environment undertaking a range of tasks involving known routines and procedures, and taking some responsibility for the quality of work outcomes.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Tram Infrastructure Track Worker Level 1–3
- Light Rail Track Worker.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **16 units of competency** comprising:

10 core units listed below **plus**

6 general elective units from the general elective units listed below. Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

© Commonwealth of Australia, 2025 Industry Skills Australia

MEM12023A	Perform engineering measurements
RIIWHS205D	Control traffic with stop-slow bat
TLIB1028	Maintain and use hand tools
TLIB2092	Operate minor mechanical equipment
TLIB2125	Apply awareness of tram or light rail track fundamentals
TLID1001	Shift materials safely using manual handling methods
TLIE1003	Participate in basic workplace communication
TLIF1001	Follow work health and safety procedures
TLIF2010	Apply fatigue management strategies
TLIU2008	Apply environmental procedures to rail infrastructure

General elective units

RIICCM205E	Carry out manual excavation
RIICCM207D	Spread and compact materials manually
RIICCM209D	Carry out concrete work
RIIWHS302D	Implement traffic management plan
TLIB1093	Clean equipment and restore worksite
TLIB2001	Check and assess operational capabilities of equipment
TLIC2059	Propel and operate light on-track equipment
TLIF0008	Apply safety critical communications in the rail environment
TLIF2080	Safely access the rail corridor
TLIG1001	Work effectively with others
TLIG2007	Work in a socially diverse environment
TLIK2010	Use infotechnology devices in the workplace
TLIS2027	Install and maintain surface track drainage
TLIS2030	Carry out track ballasting
TLIS2031	Install railway sleepers

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIS2034	Install and repair rail fastening systems
TLIS2044	Carry out rail installation
TLIW2001	Operate under track protection rules
TLIW3027	Operate minor track equipment
TLIW3035	Heat and cut materials using oxy-LPG equipment for the rail industry

Qualification Mapping Information

This qualification replaces and is equivalent to TLI22213 Certificate II in Tram or Light Rail Infrastructure.

TLI22318 Certificate II in Rail Customer Service

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for a person engaged in operations within the rail customer service environment undertaking a range of tasks involving known routines and procedures, and taking some responsibility for the quality of work outcomes.

Job roles

The TLI22318 Certificate II in Rail Customer Service qualification is aligned to the following defined roles:

- Booking clerk
- Customer service attendant/assistant
- Passenger service officer
- Station assistant/officer
- Train buffet operator
- Train conductor.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **12 units** of competency comprising:

8 core units listed below **plus**

4 general elective units from the **general elective units** listed below. Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIB3118	Apply awareness of railway fundamentals
TLIE0002	Process workplace documentation
TLIE1003	Participate in basic workplace communication
TLIE2007	Use communications systems
TLIF1001	Follow work health and safety procedures
TLIG1001	Work effectively with others
TLII2020	Provide assistance to customers with specific needs
TLII3022	Provide customer service in rail operations

General elective units

BSBCUS201	Deliver a service to customers
CHCCCS020	Respond effectively to behaviours of concern
HLTAID002	Provide basic emergency life support
HLTAID003	Provide first aid
SITHFAB002	Provide responsible service of alcohol
SITXFSA001	Use hygienic practices for food safety
TLIB1024	Clean transportation units and facilities for passenger use
TLIC2078	Identify and respond to signals and trackside signs
TLID1001	Shift materials safely using manual handling methods
TLIE1005	Carry out basic workplace calculations
TLIF0008	Apply safety critical communications in the rail environment
TLIF2006	Apply accident-emergency procedures
TLIF2010	Apply fatigue management strategies
TLIF2018	Operate firefighting equipment
TLIF2062	Apply awareness of safeworking rules and regulations
TLIF2080	Safely access the rail corridor
TLIG2007	Work in a socially diverse environment

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIK2003	Apply keyboard skills
TLIK2010	Use infotechnology devices in the workplace
TLIL2048	Prepare for train departure
TLIO2011	Provide revenue protection measures
TLIP2038	Conduct, balance and secure financial transactions
TLIP2039	Ensure the confidentiality, privacy and security of customer information
TLIP3034	Advise on and construct fares for customers
TLIU2012	Participate in environmentally sustainable work practices

Qualification Mapping Information

This qualification replaces and is equivalent to TLI22315 Certificate II in Rail Customer Service.

TLI22418 Certificate II in Furniture Removal

Modification History

Release 3. This is the third release of this qualification in the TLI Transport and Logistics Training Package. The following general elective unit update has been added:

- TLIF0009 Ensure the safety of transport activities (Chain of Responsibility).

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following unit has been updated with a new code:

- TLILIC0003 Licence to operate a forklift truck

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in furniture removal job roles within the transport and logistics industry.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- furniture removalist.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

^ From 1 July 2022 the elective unit HLTAID003 must no longer be delivered and will be replaced in the Packaging Rules by the unit HLTAID011 - for more information see: https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **12 units of competency** comprising:

7 core units listed below, **plus**

5 general elective units from the general elective units listed below.

Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the

vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLID1001	Shift materials safely using manual handling methods
TLID2018	Handle furniture and effects
TLID2019	Pack and unpack cartons during a removal
TLIE0002	Process workplace documentation
TLIE2032	Assess removal load
TLIF1001	Follow work health and safety procedures
TLII1002	Apply customer service skills

General elective units

HLTAID003	Provide first aid
^ HLTAID011	**Provide First Aid (must be delivered from 1 July 2022)**
TLIB0002	Carry out vehicle inspection
TLIC1051	Operate commercial vehicle
TLIC2002	Drive light rigid vehicle
TLIC3003	Drive medium rigid vehicle
TLID2010	Operate a forklift
TLIE1003	Participate in basic workplace communication
TLIE1005	Carry out basic workplace calculations
TLIE2007	Use communications systems
TLIF0009	Ensure the safety of transport activities (Chain of Responsibility)
TLIF2010	Apply fatigue management strategies
TLIG1001	Work effectively with others
TLIG2007	Work in a socially diverse environment
TLIH2001	Interpret road maps and navigate pre-determined routes

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIK2010	Use infotechnology devices in the workplace
TLIL1001	Complete workplace orientation/induction procedures
TLILIC0003	Licence to operate a forklift truck
TLILIC2014	Licence to drive a light rigid vehicle
TLILIC2015	Licence to drive a medium rigid vehicle
TLIU1009	Monitor plant and equipment in an environmentally sustainable manner
TLIU2012	Participate in environmentally sustainable work practices

Qualification Mapping Information

This qualification replaces and is equivalent to TLI22416 Certificate II in Furniture Removal.

TLI30118 Certificate III in Mobile Crane Operations

Modification History

Release 1. This is a new release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This qualification is designed for mobile crane operation within the Transport and Logistics Industry and other industries. It involves a broad range of skilled applications applied in a wide variety of contexts.

Successful achievement of the high risk work (HRW) and heavy vehicle licensing units in the qualification must align with applicable licensing and regulatory requirements.

People seeking certification for HRW licensing units should check the requirements with Safe Work Australia.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

^ From 1 July 2022 the elective units HLTAID003, HLTAID006 must no longer be delivered and will be replaced in the Packaging Rules by the units HLTAID011, HLTAID014 - for more information see:
https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of 17 units of competency comprising:

12 core units listed below plus

5 general elective units from the general elective units listed below. Up to 3 of the general elective units may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with. Where a prerequisite unit is attached to a unit, it is identified by this symbol ∟.

Note: To comply with the National Standard for Licensing Persons Performing High Risk Work, TLILIC0008 Licence to operate a non-slewing mobile crane (greater than 3 tonnes capacity) must be achieved before commencing TLILIC0010 Licence to operate a slewing mobile crane

© Commonwealth of Australia, 2025 Industry Skills Australia

(up to 20 tonnes).

Core units

CPCCCM2010B	Work safely at heights
	∟CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry
CPCCCM3003A	Work safely around power sources, services and assets
	∟CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry
CPCCLDG3001A	Licence to perform dogging
CPCCWHS1001	Prepare to work safely in the construction industry
TLIB3013	Maintain mobile cranes
TLID1001	Shift materials safely using manual handling methods
TLIE0002	Process workplace documentation

TLI30119 Certificate III in International Freight Forwarding (Operator)

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in international freight forwarding job roles at an operational level within the international freight forwarding industry.

It involves a broad range of skilled applications, applied in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **13 units of competency** comprising:

8 core units listed below, **plus**

5 general elective units from the general elective units listed below.

Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIA0003	Complete and check import/export documentation
TLIA4033	Organise international transport of freight
TLIE1003	Participate in basic workplace communication

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIF0009	Ensure the safety of transport activities (Chain of Responsibility)
TLIF1001	Follow work health and safety procedures
TLIG1001	Work effectively with others
TLII0002	Provide freight forwarding information and customer service
TLIK2007	Perform electronic data interchange to transmit shipping documentation

General elective units

TLIA0001	Complete import procedures
TLIA0002	Prepare cargo for export
TLIA0006	Coordinate goods to bond premises
TLIA4031	Consolidate freight
TLIA4032	Organise transport of freight or goods
TLIB0005	Operate pooled equipment
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIF4065	Ensure compliance with Australian Dangerous Goods Code
TLIJ2001	Apply quality procedures
TLIJ3002	Apply quality systems
TLIO0003	Follow security procedures when working with goods and cargo

Qualification Mapping Information

This qualification replaces and is equivalent to TLI31316 Certificate III in International Freight Forwarding (Operator).

TLI30319 Certificate III in Supply Chain Operations

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in supply chain operations and includes specialisations for logistics and warehousing operations.

It involves a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in selecting equipment, services or contingency measures within known time constraints. It may also include responsibility for coordinating the work of others.

Successful achievement of the licensing units within the qualification must align with applicable licensing and regulatory requirements.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- logistics operator
- warehouse operator
- supply chain administration operator
- supply chain administration officer
- rail terminal operator.

Please note: RTO to insert on the testamur, the specialist elective unit group selected from the group choice below.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **14 units of competency** comprising:

General Qualification

8 general elective units selected from Group C general elective units listed below.

Up to **3 of the elective units** may be imported from any relevant nationally endorsed Training Package. The elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure all prerequisite units specified are complied with.

Core units

TLID1001	Shift materials safely using manual handling methods
TLIF0009	Ensure the safety of transport activities (Chain of Responsibility)

Elective units

Group A: Logistics Operations

TLIA1001	Secure cargo
TLID2004	Load and unload goods/cargo
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIH2001	Interpret road maps and navigate pre-determined routes

Group B: Warehousing Operations

TLIA0004	Complete receival and despatch documentation
TLIA0010	Identify goods and store to specifications
TLIA0015	Organise receival and despatch operations
TLIX0013X	Maintain stock control and receivals

Group C: General elective units

BSBCMM301	Process customer complaints
BSBCUS301	Deliver and monitor a service to customers
BSBFIA301	Maintain financial records

© Commonwealth of Australia, 2025 Industry Skills Australia

BSBINM301	Organise workplace information
BSBPUR301	Purchase goods and services
BSBRKG302	Undertake disposal
BSBWOR301	Organise personal work priorities and development
RIIHAN301E	Operate elevating work platform
TLIA0004	Complete receival and despatch documentation
TLIA0005	Connect and disconnect reefer units
TLIA0006	Coordinate goods to bond premises
TLIA0008	Coordinate stocktakes
TLIA0009	Coordinate terminal/wharf equipment operations
TLIA0010	Identify goods and store to specifications
TLIA0013	Maintain container and freight records
TLIA0015	Organise receival and despatch operations
TLIA0016	Organise warehouse records operations
TLIA0017	Process receipt and delivery of containers and cargo
TLIA1001	Secure cargo
TLIA3026	Monitor storage facilities
TLIB0005	Operate pooled equipment
TLIB2001	Check and assess operational capabilities of equipment
TLIB3002	Test equipment and isolate faults
TLID0001	Load and unload vehicles carrying special loads
TLID0003	Control lift and movement of crane
TLID0006	Move materials mechanically using automated equipment
TLID0008	Shift loads using bridge or gantry crane
TLID0009	Shift loads using cranes
TLID2004	Load and unload goods/cargo

© Commonwealth of Australia, 2025 Industry Skills Australia

TLID2010	Operate a forklift
TLID3011	Conduct specialised forklift operations
TLID3015	Identify and label explosives/dangerous goods
TLID3023	Use specialised liquid bulk gas transfer equipment
TLID3024	Use specialised liquid bulk transfer equipment (gravity/pressurised)
TLID3027	Prepare for transport of dangerous goods
TLID3031	Rig load
TLID3033	Operate a vehicle-mounted loading crane
TLID3035	Operate a boom type elevating work platform
TLID3036	Lift and move load using a mobile crane
TLIE0003	Consolidate manifest documentation
TLIE0004	Maintain freight records
TLIE0005	Undertake rigger/dogger and operators communications
TLIE2007	Use communications systems
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIE3016	Estimate/calculate load shifting requirements for a mobile crane
TLIF0006	Administer a fatigue risk management system
TLIF0014	Monitor the safety of transport activities (Chain of Responsibility)
TLIF2080	Safely access the rail corridor
TLIF3003	Implement and monitor work health and safety procedures
TLIF3022	Implement/monitor procedures when warehousing/storing dangerous goods/hazardous substances
TLIF3091	Apply awareness of dangerous goods and hazardous materials requirements
TLIG3002	Lead a work team or group
TLIH2001	Interpret road maps and navigate pre-determined routes

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIH3004	Identify major roads, services and attractions
TLIJ3002	Apply quality systems
TLIJ3005	Sample, inspect and test products to specifications
TLIJ3006	Implement grain protection procedures
TLIK2010	Use infotechnology devices in the workplace
TLIL1001	Complete workplace orientation/induction procedures
TLIL3002	Undertake employee payroll activities
TLIL3003	Conduct induction process
TLILIC0003	Licence to operate a forklift truck
TLILIC0004	Licence to operate an order picking forklift truck
TLILIC0011	Licence to operate a reach stacker (greater than 3 tonnes capacity)
TLIO0001	Undertake emergency response action to a security threat
TLIO0002	Apply and monitor workplace security procedures
TLIO0003	Follow security procedures when working with goods and cargo
TLIO3004	Conduct control procedures for transferring explosives/dangerous/hazardous/high risk goods
TLIU2012	Participate in environmentally sustainable work practices
TLIU3011	Implement and monitor environmentally sustainable work practices
TLIW3006	Operate computerised mail and parcels sorting equipment
TLIW3008	Carry out culler facer canceller operations
TLIX0004X	Administer inventory systems
TLIX0005X	Administer market supply systems
TLIX0013X	Maintain stock control and receivals
TLIX0015X	Manage fundamental aspects of supply chains

© Commonwealth of Australia, 2025 Industry Skills Australia

Qualification Mapping Information

This qualification replaces and is equivalent to:

TLI32416 Certificate III in Logistics, and TLI31616 Certificate III in Warehousing Operations.

TLI30419 Certificate III in Waste Driving Operations

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in waste driving job roles within the transport and logistics industry.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- waste vehicle driver.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **19 units of competency** comprising:

12 core units listed below, **plus**

1 licensing or industry elective unit relevant to the vehicle type applicable to the job role from the licensing/industry elective units listed below, **plus**

6 general elective units from the general elective units listed below.

Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIB0002	Carry out vehicle inspection
TLID1001	Shift materials safely using manual handling methods

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIE3021	Work and communicate effectively with others
TLIF0009	Ensure the safety of transport activities (Chain of Responsibility)
TLIF1001	Follow work health and safety procedures
TLIF2006	Apply accident-emergency procedures
TLIF2010	Apply fatigue management strategies
TLIF3015	Work safely as a non-electrical licensed worker near electrical assets
TLII1002	Apply customer service skills
TLIL1001	Complete workplace orientation/induction procedures
TLIU2012	Participate in environmentally sustainable work practices
TLIU3015	Identify wastes and hazards in the waste management industry

Licensing/industry elective units

TLIC1051	Operate commercial vehicle
TLIC2002	Drive light rigid vehicle
TLIC3003	Drive medium rigid vehicle
TLIC3004	Drive heavy rigid vehicle
TLIC3005	Drive heavy combination vehicle
TLIC4006	Drive multi-combination vehicle
TLILIC2014	Licence to drive a light rigid vehicle
TLILIC2015	Licence to drive a medium rigid vehicle
TLILIC2016	Licence to drive a heavy rigid vehicle
TLILIC3017	Licence to drive a heavy combination vehicle
TLILIC3018	Licence to drive a multi-combination vehicle

General elective units

CPPWMT3003	Identify and respond to hazards and emergencies in waste management
CPPWMT3006	Receive, transfer and dispatch waste
HLTWHS006	Manage personal stressors in the work environment

© Commonwealth of Australia, 2025 Industry Skills Australia

RIIWHS204D	Work safely at heights
TLIA1001	Secure cargo
TLIB2001	Check and assess operational capabilities of equipment
TLIB2073	Clean road tankers
TLIB3015	Undertake site inspection
TLIC2049	Operate heavy vehicle on unsealed roads
TLIC3063	Operate vehicle carrying special loads
TLIC3083	Operate a front lift mobile compaction/collection vehicle
TLIC3084	Operate a lift on/lift off collection vehicle
TLIC3085	Operate a liquid waste collection vehicle
TLIC3086	Operate a multi-lift collection vehicle
TLIC3087	Operate a rear loading mobile compaction/collection vehicle
TLIC3088	Operate a roll on/roll off collection vehicle
TLIC3089	Operate a side loading mobile compaction/collection vehicle
TLID1002	Shift a load using manually-operated equipment
TLID2003	Handle dangerous goods/hazardous substances
TLID2010	Operate a forklift
TLID0001	Load and unload vehicles carrying special loads
TLID3033	Operate a vehicle-mounted loading crane
TLID3051	Segregate waste according to waste types
TLIE0002	Process workplace documentation
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIE3028	Complete a work diary in the road transport industry
TLIF2018	Operate firefighting equipment
TLIF3014	Operate as an off-sider in the waste management industry
TLIG2007	Work in a socially diverse environment

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIH2001	Interpret road maps and navigate pre-determined routes
TLIH3002	Plan and navigate routes
TLIJ2001	Apply quality procedures
TLIJ3002	Apply quality systems
TLIK2010	Use infotechnology devices in the workplace
TLIL2008	Complete routine administrative tasks
TLILIC0001	Licence to transport dangerous goods by road
TLILIC0002	Licence to operate a vehicle loading crane (capacity 10 metre tonnes and above)
TLILIC0003	Licence to operate a forklift truck
TLIO0003	Follow security procedures when working with goods and cargo
TLIU3014	Operate vehicle in an environmentally sustainable manner

Qualification Mapping Information

This qualification replaces and is equivalent to TLI33418 Certificate III in Waste Driving Operations.

TLI31216 Certificate III in Driving Operations

Modification History

Release 5. This is the fifth release of this qualification in the TLI Transport and Logistics Training Package. The following unit changes have been made:

- Imported units updated
- TLIF0009 Ensure the safety of transport activities (Chain of Responsibility).

Release 4. This is the fourth release of this qualification in the TLI Transport and Logistics Training Package. The following unit has been updated:

- TLILIC0002 Licence to operate a vehicle loading crane (capacity 10 metre tonnes and above)

Release 3. This is the third release of this qualification in the TLI Transport and Logistics Training Package. The following modifications have been made:

- Unit codes updated:
  - TLIB0002 Carry out vehicle inspection
  - TLIB0003 Use and maintain minor mechanical equipment
  - TLID0001 Load and unload vehicles carrying special loads
  - TLID0002 Care for livestock in transit
  - TLIE0002 Process workplace documentation
  - TLIO0001 Undertake emergency response action to a security threat
- Imported units updated.

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package.

Packaging rules for the elective units have been clarified.

The following units have been added to the general elective units:

- TLIF0005 Apply a fatigue risk management system

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in driving operation job roles within the transport and logistics industry.

It involves a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, with some discretion and judgement in selecting equipment, services or contingency measures and within known time constraints.

Job roles

© Commonwealth of Australia, 2025 Industry Skills Australia

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- agitator driver
- bus driver
- line haul driver
- local heavy general freight driver
- pilot vehicle driver
- tip truck driver.

Successful achievement of the licensing units within the qualification must align with licensing and regulatory requirements applicable to driving and state/territory regulatory requirements.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **18 units of competency** comprising**:**

6 core units listed below, **plus**

1 licensing/industry elective unit relevant to the vehicle type applicable to the job role from the licensing/industry elective units listed below, **plus**

All units within one of the **specialist elective groups** (job roles) from Group A, Group B, Group C, Group D, Group E, Group F, Group G, Group H, Group I, Group K, Group L, or Group M listed below, **plus**

4 general elective units from Group N units listed below if selecting Group B, Group K (depending on job role), Group M, **or**

5 general elective units from Group N units listed below if selecting Group K (depending on job role), Group L, **or**

6 general elective units from Group N units listed below if selecting Group A, Group C, Group D, Group E, Group F, Group G, Group H or Group I.

Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The units must contribute to the vocational outcomes of the qualification.

Elective units can only be counted once towards the qualification packaging rules i.e. if a unit is listed in both a specialist elective group and the general elective group, it can only be counted as one of the elected units required.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

The following imported unit has a prerequisite unit:

- CPCCCO3054 Operate concrete agitator trucks

© Commonwealth of Australia, 2025 Industry Skills Australia

Core units

TLID1001	Shift materials safely using manual handling methods
TLIE1005	Carry out basic workplace calculations
TLIF1001	Follow work health and safety procedures
TLIF2010	Apply fatigue management strategies
TLIH2001	Interpret road maps and navigate pre-determined routes
TLIL1001	Complete workplace orientation/induction procedures

Licensing/industry elective units

TLIC1051	Operate commercial vehicle
TLIC2002	Drive light rigid vehicle
TLIC3003	Drive medium rigid vehicle
TLIC3004	Drive heavy rigid vehicle
TLIC3005	Drive heavy combination vehicle
TLIC4006	Drive multi-combination vehicle
TLILIC2014	Licence to drive a light rigid vehicle
TLILIC2015	Licence to drive a medium rigid vehicle
TLILIC2016	Licence to drive a heavy rigid vehicle
TLILIC3017	Licence to drive a heavy combination vehicle
TLILIC3018	Licence to drive a multi-combination vehicle

Specialist elective units

Select one group (job role) from the following options:

Group A: Heavy General Freight

Group B: Agitator

Group C: Bus

Group D: Refrigerated

Group E: Pilot Vehicle

Group F: Dry/Liquid

© Commonwealth of Australia, 2025 Industry Skills Australia

Group G: Car Carrier

Group H: Livestock

Group I: Wood Products

Group K: Dangerous Goods

Group L: Over Dimensional

Group M: Tip Truck.

Group A: Heavy General Freight

TLIA1001	Secure cargo
TLIB0002	Carry out vehicle inspection
TLID2004	Load and unload goods/cargo
TLIE0002	Process workplace documentation
TLIF0009	Ensure the safety of transport activities (Chain of Responsibility)

Group B: Agitator

MSMPMC322	Deliver concrete to site
TLIB0002	Carry out vehicle inspection
TLID2004	Load and unload goods/cargo
TLIE0002	Process workplace documentation
TLIE2007	Use communications systems
TLIF0009	Ensure the safety of transport activities (Chain of Responsibility)
TLIJ2001	Apply quality procedures

Group C: Bus

TLIB0002	Carry out vehicle inspection
TLIC3011	Transport passengers with disabilities
TLIC3042	Operate coach/bus
TLIG2007	Work in a socially diverse environment
TLII3009	Provide on-board services to customers

Group D: Refrigerated

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIA4025	Regulate temperature controlled stock
TLIB0002	Carry out vehicle inspection
TLIB3006	Carry out inspection of vehicles designed to carry special loads
TLID2004	Load and unload goods/cargo
TLIF0009	Ensure the safety of transport activities (Chain of Responsibility)

Group E: Pilot Vehicle

TLIB0002	Carry out vehicle inspection
TLIC3010	Pilot or escort oversized and/or overmassed loads
TLIE3009	Use pilot and escort communication
TLIF3013	Coordinate breakdowns and emergencies
TLIF3060	Control traffic as a pilot vehicle operator

Group F: Dry/Liquid

TLIB0002	Carry out vehicle inspection
TLID0011	Use bulk transfer equipment (dry)
TLID3024	Use specialised liquid bulk transfer equipment (gravity/pressurised)
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIF0009	Ensure the safety of transport activities (Chain of Responsibility)

Group G: Car Carrier

TLIA1001	Secure cargo
TLIB3006	Carry out inspection of vehicles designed to carry special loads
TLID0001	Load and unload vehicles carrying special loads
TLID2004	Load and unload goods/cargo
TLIF0009	Ensure the safety of transport activities (Chain of Responsibility)

Group H: Livestock

TLID0001	Load and unload vehicles carrying special loads
TLID0002	Care for livestock in transit

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIE0002 Process workplace documentation

TLIE3002 Estimate/calculate mass, area and quantify dimensions

TLIF0009 Ensure the safety of transport activities (Chain of Responsibility)

Group I: Wood Products

TLIA1001 Secure cargo

TLIB0002 Carry out vehicle inspection

TLIB3006 Carry out inspection of vehicles designed to carry special loads

TLIE3002 Estimate/calculate mass, area and quantify dimensions

TLIF0009 Ensure the safety of transport activities (Chain of Responsibility)

Group K: Dangerous Goods

TLID2003 Handle dangerous goods/hazardous substances

TLID2016 Load and unload explosives/dangerous goods

TLID3015 Identify and label explosives/dangerous goods

TLID3027 Prepare for transport of dangerous goods

TLIF0009 Ensure the safety of transport activities (Chain of Responsibility)

Select one or both of the following depending on job role:

TLILIC0001 Licence to transport dangerous goods by road

UEGNSG614 Load, unload, exchange and connect LPG cylinders

Group L: Over Dimensional

TLIA1001 Secure cargo

TLIB3006 Carry out inspection of vehicles designed to carry special loads

TLID0001 Load and unload vehicles carrying special loads

TLIE3002 Estimate/calculate mass, area and quantify dimensions

TLIE3009 Use pilot and escort communication

TLIF0009 Ensure the safety of transport activities (Chain of Responsibility)

Group M: Tip Truck

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIB0002	Carry out vehicle inspection
TLIC0004	Operate a tip truck
TLIE0002	Process workplace documentation
TLIF0009	Ensure the safety of transport activities (Chain of Responsibility)
TLIF3013	Coordinate breakdowns and emergencies
TLIG1001	Work effectively with others
TLII1002	Apply customer service skills

Group N: General elective units

CPCCCO3054	Operate concrete agitator trucks
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
CPPWMT3003	Identify and respond to hazards and emergencies in waste management
CPPWMT3006	Receive, transfer and dispatch waste
FWPCOT3261	Transport forestry logs using trucks
HLTWHS006	Manage personal stressors in the work environment
MSMPMC322	Deliver concrete to site
TLIA1001	Secure cargo
TLIA0004	Complete receival/despatch documentation
TLIA0005	Connect and disconnect reefer units
TLIA0013	Maintain container and freight records
TLIA0017	Process receipt and delivery of containers and cargo
TLIA0018	Transfer cargo
TLIA4005	Check and evaluate records and documentation
TLIA4025	Regulate temperature controlled stock
TLIB0002	Carry out vehicle inspection
TLIB0003	Use and maintain minor mechanical equipment

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIB1024	Clean transportation units and facilities for passenger use
TLIB1028	Maintain and use hand tools
TLIB1031	Clean up plant, equipment and worksite
TLIB2001	Check and assess operational capabilities of equipment
TLIB2003	Carry out vehicle servicing and maintenance
TLIB2008	Carry out inspection of trailers
TLIB2009	Check conveyor operational status
TLIB2022	Diagnose and rectify minor faults
TLIB2023	Provide sanitation and water services support to passenger transportation units
TLIB2073	Clean road tankers
TLIB2119	Carry out maintenance of trailers
TLIB3005	Carry out maintenance of vehicles designed to carry special loads
TLIB3006	Carry out inspection of vehicles designed to carry special loads
TLIB3014	Load and unload wheeled or tracked crane
TLIB3015	Undertake site inspection
TLIB3016	De-rig, pack and store tools and equipment
TLIB3017	Assemble and dismantle boom or jib
TLIC2025	Operate four wheel drive vehicle
TLIC2049	Operate heavy vehicle on unsealed roads
TLIC3010	Pilot or escort oversized and/or overmassed loads
TLIC3011	Transport passengers with disabilities
TLIC3063	Operate vehicle carrying special loads
TLIC3064	Operate car carrier vehicle
TLIC3071	Operate an agitator
TLID0001	Load and unload vehicles carrying special loads

© Commonwealth of Australia, 2025 Industry Skills Australia

TLID0002	Care for livestock in transit
TLID0006	Move materials mechanically using automated equipment
TLID0007	Operate specialised load shifting equipment
TLID0011	Use bulk transfer equipment (dry)
TLID1002	Shift a load using manually-operated equipment
TLID2003	Handle dangerous goods/hazardous substances
TLID2004	Load and unload goods/cargo
TLID2016	Load and unload explosives/dangerous goods
TLID2022	Conduct weighbridge operations
TLID2045	Operate specialised light load shifting equipment
TLID2047	Prepare cargo for transfer with slings
TLID3015	Identify and label explosives/dangerous goods
TLID3023	Use specialised liquid bulk gas transfer equipment
TLID3024	Use specialised liquid bulk transfer equipment (gravity/pressurised)
TLID3027	Prepare for transport of dangerous goods
TLID3031	Rig load
TLID3033	Operate a vehicle-mounted loading crane
TLID3035	Operate a boom type elevating work platform
TLID3036	Lift and move load using mobile crane
TLID3046	Operate container side lifter
TLID4032	Plan and conduct specialised lift
TLIE0002	Process workplace documentation
TLIE0003	Consolidate manifest documentation
TLIE1003	Participate in basic workplace communication
TLIE2007	Use communications systems
TLIE3002	Estimate/calculate mass, area and quantify dimensions

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIE3004	Prepare workplace documents
TLIE3009	Use pilot and escort communication
TLIE3016	Estimate/calculate load shifting requirements for a mobile crane
TLIE3026	Carry out advanced calculations in the transport and logistics industry
TLIE3028	Complete a work diary in the road transport industry
TLIF0005	Apply a fatigue risk management system
TLIF0009	Ensure the safety of transport activities (Chain of Responsibility)
TLIF0014	Monitor the safety of transport activities (Chain of Responsibility)
TLIF1002	Conduct housekeeping activities
TLIF1009	Conduct cleaning operations in enclosed spaces
TLIF2006	Apply accident-emergency procedures
TLIF2012	Apply safe procedures when handling/transporting dangerous goods or explosives
TLIF2018	Operate firefighting equipment
TLIF2019	Ensure a safe on-board passenger and working environment
TLIF3013	Coordinate breakdowns and emergencies
TLIF3060	Control traffic as a pilot vehicle operator
TLIF3063	Administer the implementation of fatigue management strategies
TLIF3091	Apply awareness of dangerous goods and hazardous materials requirements
TLIF4014	Develop and maintain a safe workplace
TLIF4065	Ensure compliance with Australian Dangerous Goods Code
TLIG1001	Work effectively with others
TLIG2007	Work in a socially diverse environment
TLIH3002	Plan and navigate routes
TLIH3004	Identify major roads, services and attractions
TLII1002	Apply customer service skills

© Commonwealth of Australia, 2025 Industry Skills Australia

TLII3003	Provide customer service in transport vehicles/vessels
TLII3004	Manage camping procedures for coaches and buses
TLII3009	Provide on-board services to customers
TLII3010	Provide travel information to customers
TLIJ2001	Apply quality procedures
TLIJ3002	Apply quality systems
TLIJ3005	Sample, inspect and test products to specifications
TLIK2010	Use infotechnology devices in the workplace
TLIL2008	Complete routine administrative tasks
TLIL2046	Handle customer luggage/property
TLIL2060	Complete induction to the transport industry
TLIL4005	Apply conflict/grievance resolution strategies
TLIL4009	Manage personal work priorities and professional development
TLIL4010	Assess and confirm customer transport requirements
TLIL4034	Arrange alternative passenger transport
TLILIC0002	Licence to operate a vehicle loading crane (capacity 10 metre tonnes and above)
TLILIC2014	Licence to drive a light rigid vehicle
TLILIC2015	Licence to drive a medium rigid vehicle
TLILIC2016	Licence to drive a heavy rigid vehicle
TLILIC3017	Licence to drive a heavy combination vehicle
TLILIC3018	Licence to drive a multi-combination vehicle
TLIO0001	Undertake emergency response action to a security threat
TLIO0002	Apply and monitor workplace security procedures
TLIO0003	Follow security procedures when working with goods and cargo
TLIO1002	Follow security procedures when working with passengers and personnel

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIO2003	Undertake loading and unloading in a designated secured environment
TLIO2011	Provide revenue protection measures
TLIO3004	Conduct control procedures for transferring explosives/dangerous/ hazardous/high risk goods
TLIO3012	Manage disruptive and/or unlawful behaviour
TLIP2024	Conduct financial transactions
TLIP2029	Prepare and process financial documents
TLIP2032	Maintain petty cash account
TLIP3026	Maintain financial records in a small business
TLIU1009	Monitor plant and equipment in an environmentally sustainable manner
TLIU3014	Operate vehicle in an environmentally sustainable manner
UEGNSG005	Prepare to work in the gas industry
UEGNSG141	Apply workplace health and safety regulations, codes and practices in the gas supply industry
UEGNSG622	Assess the operational capability of gas safety equipment on a delivery vehicle

Qualification Mapping Information

This qualification replaces but is not equivalent to TLI31210 Certificate III in Driving Operations.

TLI31418 Certificate III in Rail Driving

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for a person who drives a light rail train or tram, or operates a monorail within a metropolitan or suburban transport environment.

It involves a broad range of skilled applications applied in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Tram Driver
- Light Rail Driver
- Monorail Operator.

No licensing legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **16 units** of competency comprising:

8 core units listed below **plus**

All units within one of the **specialist elective unit groups** (job roles) from Group A or Group B listed below **plus**

3 general elective units from the general elective units listed below. Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

© Commonwealth of Australia, 2025 Industry Skills Australia

Core units

TLIE1003	Participate in basic workplace communication
TLIE2007	Use communications systems
TLIE0002	Process workplace documentation
TLIF1001	Follow work health and safety procedures
TLIF2006	Apply accident-emergency procedures
TLIF2010	Apply fatigue management strategies
TLIG1001	Work effectively with others
TLII1002	Apply customer service skills

Specialist elective units

Group A: Tram/Light Rail

TLIB3078	Inspect, prepare and start an electrical tram
TLIC3032	Operate and monitor a passenger electric tram
TLIC3033	Drive an electric tram to operational requirements
TLIC3034	Berth and shut down an electric tram
TLIF4061	Respond to electric tram-driving emergencies and abnormal situations

Group B: Monorail

TLIC3039	Operate and monitor a monorail train
TLID1001	Shift materials safely using manual handling methods
TLIE1005	Carry out basic workplace calculations
TLIO2011	Provide revenue protection measures
TLIO3012	Manage disruptive and/or unlawful behaviour

General elective units

TLIB2001	Check and assess operational capabilities of equipment

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIB3002	Test equipment and isolate faults
TLIC3011	Transport passengers with disabilities
TLID1001	Shift materials safely using manual handling methods
TLIE1005	Carry out basic workplace calculations
TLIF0008	Apply safety critical communications in the rail environment
TLIF3058	Apply safeworking rules and regulations to rail functions
TLIG2007	Work in a socially diverse environment
TLIO2011	Provide revenue protection measures
TLIP2033	Sell products and services

Qualification Mapping Information

This qualification replaces and is equivalent to TLI31415 Certificate III in Rail Driving.

TLI31815 Certificate III in Rail Track Surfacing

Modification History

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following modifications have been made:

- TLIE0002 Process workplace documentation has an updated code
- TLIF0008 Apply safety critical communications in the rail environment added to the general elective units.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for a person engaged in the installation and maintenance of mechanical rail track and the operation of track surfacing and other track equipment.

It involves a broad range of skilled applications in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles

Job roles and titles vary across different sectors. A possible job title relevant to this qualification includes:

- Rail track surfacer.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

The entry requirement for this qualification is TLI21315 Certificate II in Rail Infrastructure (Track Surfacing) or relevant industry experience gained by working within the rail infrastructure environment.

Packaging Rules

A total of **11 units of competency** comprising:

7 core units listed below **plus**

4 general elective units from the general elective units listed below. Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units

© Commonwealth of Australia, 2025 Industry Skills Australia

specified are complied with.

Core units

TLIB3094	Check and repair track geometry
TLIE2007	Use communications systems
TLIE2029	Conduct workplace information briefings
TLIF3003	Implement and monitor work health and safety procedures
TLIJ3002	Apply quality systems
TLIS3026	Implement track maintenance and construction
TLIS3039	Measure and mark track for resurfacing

General elective units

TLIB2092	Operate minor mechanical equipment
TLIC3045	Operate road/rail vehicle
TLIE0002	Process workplace documentation
TLIF0008	Apply safety critical communications in the rail environment
TLIF2006	Apply accident-emergency procedures
TLIF3058	Apply safeworking rules and regulations to rail functions
TLIF3089	Implement fatigue management policies and procedures for rail infrastructure
TLIG1001	Work effectively with others
TLIG3002	Lead a work team or group
TLIK2010	Use infotechnology devices in the workplace
TLIS2034	Install and repair rail fastening systems
TLIS3025	Implement ballast unloading
TLIU4001	Implement and monitor environmental protection policies and procedures
TLIW2028	Identify the principles of ballast cleaning operations
TLIW2029	Identify the principles of ballast regulator operations

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIW2030	Identify the principles of dynamic track stabaliser operations
TLIW2031	Identify the principles of self-propelled rail grinder operations
TLIW2032	Identify the principles of tamping machine operations
TLIW2033	Identify the principles of mechanised track laying operations

Qualification Mapping Information

This qualification replaces and is equivalent to TLI31811 Certificate III in Rail Track Surfacing.

TLI31918 Certificate III in Mechanical Rail Signalling

Modification History

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following units have been updated with new codes:

- RIIHAN301E Operate elevating work platform
- TLIX0013X Maintain stock control and receivals
- UETTDRRF02 Perform pole top rescue.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for a person engaged in the installation and maintenance of mechanical rail signalling equipment.

It involves a broad range of skilled applications in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles

Job roles and titles vary across different sectors. A possible job title relevant to this qualification includes:

- mechanical rail signaller.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

The entry requirement for this qualification is the **7 core units** of competency from TLI21315 Certificate II in Rail Infrastructure listed below or relevant industry experience gained by working within the rail infrastructure environment.

Entry requirement units

TLIB1028	Maintain and use hand tools
TLID1001	Shift materials safely using manual handling methods
TLIE1003	Participate in basic workplace communication
TLIF1001	Follow work health and safety procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIF2010	Apply fatigue management strategies
TLIF2080	Safely access the rail corridor
TLIU2008	Apply environmental procedures to rail infrastructure

Packaging Rules

A total of **18 units of competency** comprising:

11 core units listed below, **plus**

7 general elective units from the general elective units listed below.

Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

The following imported unit has a prerequisite unit:

- UETTDRRF02 Perform pole top rescue.

Core units

RIICCM201D	Carry out measurements and calculations
RIICCM203D	Read and interpret plans and job specifications
TLIB3046	Service and clean mechanical signalling equipment and infrastructure
TLIB3047	Repair and adjust mechanical signalling equipment and infrastructure
TLIB3048	Carry out off-site repair, overhaul and assembly of mechanical signalling equipment
TLIB3053	Maintain mechanical signalling locking and interlocking devices
TLIB3120	Test mechanical signalling equipment and isolate faults
TLIE0002	Process workplace documentation
TLIF2062	Apply awareness of safeworking rules and regulations
TLIK2010	Use infotechnology devices in the workplace
TLIS3005	Install mechanical infrastructure for signalling

General elective units

© Commonwealth of Australia, 2025 Industry Skills Australia

HLTAID001	Provide cardiopulmonary resuscitation
NWPCAD002	Control vegetation on a site
RIIHAN301E	Operate elevating work platform
RIIWHS202D	Enter and work in confined spaces
RIIWHS204D	Work safely at heights
RIIWHS205E	Control traffic with stop-slow bat
TAEASS401	Plan assessment activities and processes
TAEASS402	Assess competence
TAEDEL301	Provide work skill instruction
TLIB1093	Clean equipment and restore worksite
TLIE2007	Use communications systems
TLIE2029	Conduct workplace information briefings
TLIF0008	Apply safety critical communications in the rail environment
TLIF2006	Apply accident-emergency procedures
TLIF3013	Coordinate breakdowns and emergencies
TLIF3058	Apply safeworking rules and regulations to rail functions
TLIG1001	Work effectively with others
TLIG3002	Lead a work team or group
TLII1002	Apply customer service skills
TLIS2004	Install and maintain rail bonding systems
TLIS3023	Erect and mount structures and housings for signalling equipment
TLIW3035	Heat and cut materials using oxy-LPG equipment for the rail industry
TLIX0013X	Maintain stock control and receivals
UETTDRRF02	Perform pole top rescue

© Commonwealth of Australia, 2025 Industry Skills Australia

Qualification Mapping Information

This qualification replaces and is equivalent to TLI31915 Certificate III in Mechanical Rail Signalling.

TLI32115 Certificate III in Rail Structures

Modification History

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following modifications have been made :

- TLIE0002 Process workplace documentation has an updated code
- TLIF0008 Apply safety critical communications in the rail environment added to the general elective units.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for a person engaged in the rail infrastructure environment who performs tasks involving checking and repairing structures through a broad range of skilled applications in a wide variety of contexts. It may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to the job role groups listed below include:

Steel/Concrete/Masonry Structures Maintenance

- Senior structures maintainer

Timber Structures Maintenance

- Senior structures maintainer.

Please note: RTO to insert on the testamur, the specialist elective group selected from the group choice below.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

The entry requirement for this qualification is TLI21315 Certificate II in Rail Infrastructure (Structures) or relevant industry experience gained by working in the rail infrastructure (structures) environment.

Packaging Rules

A total of **11 units of competency** comprising:

© Commonwealth of Australia, 2025 Industry Skills Australia

6 core units listed below **plus**

All units within one of the **specialist elective unit groups** from Group A or Group B listed below **plus**

2 general elective units from the general elective units listed below if selecting Group A **or**
3 general elective units from the general elective units listed below if selecting Group B.

Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

The following imported units have a prerequisite unit:

- MEM24001B Perform basic penetrant testing
- MEM24003B Perform basic magnetic particle testing.

Core units

TLIE2007	Use communications systems
TLIE2029	Conduct workplace information briefings
TLIF3003	Implement and monitor work health and safety procedures
TLIJ3002	Apply quality systems
TLIS2013	Install minor structures
TLIS3029	Implement structures maintenance and installation of minor structures

Specialist elective units

Select all units from one of the following specialist elective groups:

- Group A: Steel/Concrete/Masonry Structures Maintenance
- Group B: Timber Structures Maintenance.

Group A: Steel/Concrete/Masonry Structures Maintenance

TLIB2082	Repair steel structures
TLIB2083	Maintain bridge bearings
TLIB2096	Repair concrete/masonry structures

Group B: Timber Structures Maintenance

TLIB2081	Repair timber structures

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIS2028	Install and replace transoms

General elective units

MEM18001C	Use hand tools
MEM24001B	Perform basic penetrant testing
MEM24003B	Perform basic magnetic particle testing
TLIB2092	Operate minor mechanical equipment
TLIB2097	Install and maintain guard rails
TLIE0002	Process workplace documentation
TLIF0008	Apply safety critical communications in the rail environment
TLIF2006	Apply accident-emergency procedures
TLIF3058	Apply safeworking rules and regulations to rail functions
TLIF3089	Implement fatigue management policies and procedures for rail infrastructure
TLIG1001	Work effectively with others
TLII1002	Apply customer service skills
TLIS2012	Install and service rail lubrication equipment
TLIS2027	Install and maintain surface track drainage
TLIS2028	Install and replace transoms
TLIS2033	Install and repair temporary track supports
TLIS2034	Install and repair rail fastening systems
TLIS2035	Install and repair fences and gates
TLIS3037	Install and repair rail earthworks
TLIU4001	Implement and monitor environmental protection policies and procedures
TLIW3034	Apply protective coating systems to structures
TLIW3035	Heat and cut materials using oxy-LPG equipment for the rail industry

© Commonwealth of Australia, 2025 Industry Skills Australia

Qualification Mapping Information

This qualification replaces and is equivalent to TLI32111 Certificate III in Rail Structures.

TLI32318 Certificate III in Electric Passenger Train Guard

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for a person engaged in the duties of an electric passenger train guard within a metropolitan train system.

It involves a broad range of skilled applications applied in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **20 units** of competency comprising:

13 core units listed below **plus**

7 general elective units from the general elective units listed below. Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIB2104	Identify, diagnose and rectify faults on electric passenger trains
TLIB2111	Assist with testing train braking system on electric passenger train
TLIB3112	Prepare electric passenger train as part of guard duties
TLIC3052	Assist with shunting, coupling and uncoupling electric passenger trains
TLIC3057	Perform guard duties as part of electric passenger train operations

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIE0002	Process workplace documentation
TLIE3021	Work and communicate effectively with others
TLIF1001	Follow work health and safety procedures
TLIF2006	Apply accident-emergency procedures
TLIF2010	Apply fatigue management strategies
TLIF3058	Apply safeworking rules and regulations to rail functions
TLII3020	Provide assistance to customers
TLIK2010	Use infotechnology devices in the workplace

General elective units

BSBWOR301	Organise personal work priorities and development
HLTAID003	Provide first aid
TLIB1028	Maintain and use hand tools
TLID1001	Shift materials safely using manual handling methods
TLIF0008	Apply safety critical communications in the rail environment
TLIF2018	Operate firefighting equipment
TLIF2019	Ensure a safe on-board passenger and working environment
TLIG2007	Work in a socially diverse environment
TLIK2003	Apply keyboard skills
TLIO3012	Manage disruptive and/or unlawful behaviour
TLIU1009	Monitor plant and equipment in an environmentally sustainable manner
TLIU2012	Participate in environmentally sustainable work practices
SITXCOM005	Manage conflict

Qualification Mapping Information

This qualification replaces and is equivalent to TLI32315 Certificate III in Electric Passenger Train Guard.

TLI32515 Certificate III in Rail Infrastructure

Modification History

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following modifications have been made:

- TLIE0002 Process workplace documentation has an updated code
- TLIF0008 Apply safety critical communications in the rail environment added to general elective units
- Imported units updated.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for a person engaged in the rail infrastructure environment who performs tasks involving a broad range of skilled applications in a wide variety of contexts. It may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

Rail Infrastructure – Track Maintenance

- Senior track maintainer
- Ganger

Rail Infrastructure – Track Construction

- Senior track installer
- Ganger

Rail Infrastructure – Turnout Construction

- Specialist track installer
- Ganger

Rail Infrastructure – Track Welding

- Track welder

Rail Infrastructure – Track Examination

- Track examiner

Rail Infrastructure – Rail Testing

- Rail tester

© Commonwealth of Australia, 2025 Industry Skills Australia

Rail Infrastructure – Timber/Composite Turnout Construction

- Turnout builder
- Points and crossings builder

Rail Infrastructure – Concrete/Steel Turnout Construction

- Turnout builder
- Points and crossings builder

Rail Infrastructure – Track Drainage Maintenance

- Track drainage maintainer.

Please note: RTO to insert on the testamur, the specialist elective unit group selected from the group choice below.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

The entry requirement for this qualification is TLI21315 Certificate II in Rail Infrastructure (Track Work) or relevant industry experience gained by working in the rail infrastructure environment.

Packaging Rules

A total of **11 units of competency** comprising:

5 core units listed below plus

All units within one of the **specialist elective unit groups** (job roles) listed below **plus**

A **minimum of 2 general elective units** and **a maximum of 4 general elective units** from the **general elective units** listed below (depending on the specialist elective group or job role selected).

Up to **2 of the general electives units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

RIICCM201D	Carry out measurements and calculations
TLIE2007	Use communications systems
TLIE2029	Conduct workplace information briefings

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIF3003 Implement and monitor work health and safety procedures

TLIJ3002 Apply quality systems

Specialist elective units

Select all units from one of the following specialist elective groups:

- Group A: Track Maintenance
- Group B: Track Construction
- Group C: Turnout Construction
- Group D: Track Welding
- Group E: Track Examination
- Group F: Rail Testing
- Group G: Timber/Composite Turnout Construction
- Group H: Concrete/Steel Turnout Construction
- Group I: Track Drainage Maintenance.

Group A: Track Maintenance

RIICCM203D Read and interpret plans and job specifications

TLIB3094 Check and repair track geometry

TLIB3095 Check and repair points and crossings

TLIS3026 Implement track maintenance and construction

Group B: Track Construction

RIICCM203D Read and interpret plans and job specifications

TLIB3094 Check and repair track geometry

TLIS3026 Implement track maintenance and construction

Group C: Turnout Construction

RIICCM203D Read and interpret plans and job specifications

TLIS3026 Implement track maintenance and construction

TLIS3045 Install turnouts

Group D: Track Welding

RIICCM203D Read and interpret plans and job specifications

TLIW2012 Grind rails

TLI32615 Certificate III in Rail Signalling

Modification History

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following unit has been added to the general elective units:

- TLIF0008 Apply safety critical communications in the rail environment.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for a person engaged in controlling rail traffic movements and operations within a defined or local area.

It involves a broad range of skilled applications applied in a wide variety of contexts, which may involve application of some discretion and judgment in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Signaller
- Area controller
- Yard controller.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **12 units** of competency comprising:

8 core units listed below **plus**

4 general elective units from the general elective units listed below. Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

© Commonwealth of Australia, 2025 Industry Skills Australia

Core units

TLIE3022	Complete workplace documents
TLIE3023	Use electronic communication systems
TLIF1001	Follow work health and safety procedures
TLIF2010	Apply fatigue management strategies
TLIF3058	Apply safeworking rules and regulations to rail functions
TLIF3085	Apply local incident response procedures
TLIL3071	Control and coordinate local rail traffic movement
TLIL3072	Operate signal panel or equipment

General elective units

BSBITU101	Operate a personal computer
BSBWOR201	Manage personal stress in the workplace
BSBWRT301	Write simple documents
TLIB3118	Apply awareness of railway fundamentals
TLIF0008	Apply safety critical communications in the rail environment
TLIF3091	Apply awareness of dangerous goods and hazardous materials requirements
TLIG1001	Work effectively with others
TLIG2007	Work in a socially diverse environment
TLIJ2001	Apply quality procedures
TLIU2012	Participate in environmentally sustainable work practices
TLIW3026	Operate stand alone signalling/point control equipment

TLI32715 Certificate III in Track Protection

Modification History

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following unit has been added to the general elective units:

- TLIF0008 Apply safety critical communications in the rail environment.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for a person engaged in the rail infrastructure environment who performs tasks involving track protection in a variety of contexts.

It may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles

Job roles and titles vary across different sectors. A possible job title relevant to this qualification includes:

- Track protection officer.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

The entry requirement for this qualification is TLI21915 Certificate II in Track Protection or relevant industry experience gained by working in the rail infrastructure environment providing track protection services.

Packaging Rules

A total of **11 units of competency** comprising:

5 core units listed below **plus**

3 specialist elective units from the specialist elective units listed below **plus**

3 general elective units from the general elective units listed below or the remaining specialist elective units listed below. Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units

© Commonwealth of Australia, 2025 Industry Skills Australia

specified are complied with.

Core units

TLIE2029	Conduct workplace information briefings
TLIF3003	Implement and monitor work health and safety procedures
TLIF3083	Conduct track protection assessment
TLIJ3002	Apply quality systems
TLIL3065	Implement a track occupancy authority

Specialist elective units

TLIC2081	Pilot rail traffic within work on track authority limits
TLIF2097	Use audible track warning devices
TLIL3082	Implement absolute signal blocking
TLIL3083	Implement a track work authority and manage rail traffic through worksites
TLIL3084	Implement a local possession authority
TLIL4069	Plan and coordinate protection for multiple worksites within limits of a work on track authority
TLIW2039	Place and remove permanent way stop boards
TLIW3026	Operate stand alone signalling/point control equipment

General elective units

RIIRIS401D	Apply site risk management system
TLIC3045	Operate road/rail vehicle
TLIF0008	Apply safety critical communications in the rail environment
TLIF2006	Apply accident-emergency procedures
TLIF2062	Apply awareness of safeworking rules and regulations
TLIF3058	Apply safeworking rules and regulations to rail functions
TLIF3089	Implement fatigue management policies and procedures for rail infrastructure
TLIG3002	Lead a work team or group

© Commonwealth of Australia, 2025 Industry Skills Australia

TLII1002	Apply customer service skills
TLIK2010	Use infotechnology devices in the workplace
TLIL4076	Coordinate resources
TLIW2037	Clip and secure points

Qualification Mapping Information

This qualification replaces and is equivalent to TLI32711 Certificate III in Track Protection.

TLI32815 Certificate III in Rail Yard Coordination

Modification History

Release 3. This is the third release of this qualification in the TLI Transport and Logistics Training Package. The following units have been added to the general elective units:

- TLIB0007 Respond and rectify rail traffic autonomous operations
- TLIC0006 Set up rail traffic for autonomous operation
- TLIC0005 Close down rail traffic from autonomous operations
- TLIF0015 Recognise the impact of human capabilities/limitations on human performance in a rail environment.

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following unit has been added to the general elective units:

- TLIF0008 Apply safety critical communications in the rail environment.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for a person engaged in the rail yard or terminal environment.

It involves a broad range of skilled applications, applied in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles

This qualification is aligned to the following defined roles:

- yard coordinator
- terminal coordinator.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **18 units of competency** comprising:

12 core units listed below, **plus**

© Commonwealth of Australia, 2025 Industry Skills Australia

6 general elective units from the general elective units listed below.

Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIB2122	Apply awareness of fundamentals of rail operations in yards or sidings
TLIE3021	Work and communicate effectively with others
TLIE3022	Complete workplace documents
TLIF2006	Apply accident-emergency procedures
TLIF2010	Apply fatigue management strategies
TLIF2080	Safely access the rail corridor
TLIF3058	Apply safeworking rules and regulations to rail functions
TLIF3083	Conduct track protection assessment
TLIF3085	Apply local incident response procedures
TLIF3087	Follow work health and safety, and environmental procedures in the rail industry
TLIG4006	Facilitate work teams
TLIL4038	Organise marshalling and shunting operations

General elective units

TLIB0007	Respond and rectify rail traffic autonomous operations
TLIB2131	Prepare train
TLIB3018	Conduct full train examination
TLIB3021	Conduct train roll-by inspection
TLIB3129	Conduct pre-movement checks on rolling stock
TLIC0005	Close down rail traffic from autonomous operations
TLIC0006	Set up rail traffic for autonomous operation
TLIC3017	Shunt rolling stock

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIF0008	Apply safety critical communications in the rail environment
TLIF0015	Recognise the impact of human capabilities/limitations on human performance in a rail environment
TLIF3091	Apply awareness of dangerous goods and hazardous materials requirements
TLIW2041	Clip points and apply rail safety equipment
TLIW3026	Operate stand alone signalling/point control equipment

Qualification Mapping Information

This qualification replaces and is equivalent to TLI32813 Certificate III in Rail Yard Coordination.

TLI32918 Certificate III in Tram or Light Rail Infrastructure

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for a person engaged in the tram or light rail infrastructure environment who performs tasks involving a broad range of skilled applications applied in a wide variety of contexts, which may involve application of some discretion and judgment in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles

This qualification is aligned to the following defined roles:

- Tram Infrastructure Track Worker Level 4
- Light Rail Track Worker.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

The entry requirement for this qualification is TLI22215 Certificate II in Tram or Light Rail Infrastructure or equivalent vocational experience working within the rail infrastructure environment.

Packaging Rules

A total of **11 units of competency** comprising:

6 core units listed below **plus**

5 general elective units from the general elective units listed below. Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

RIICCM203D Read and interpret plans and job specifications

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIC3003	Drive medium rigid vehicle
TLIE2007	Use communications systems
TLIE0002	Process workplace documentation
TLIW3035	Heat and cut materials using oxy-LPG equipment for the rail industry
TLIW3042	Grind rail on tram/light rail systems

General elective units

AHCMOM213	Operate and maintain chainsaws
CPCCLDG3001A	Licence to perform dogging
TAEDEL301	Provide work skill instruction
TLIB2097	Install and maintain guard rails
TLIC3045	Operate road/rail vehicle
TLID2010	Operate a forklift
TLID3033	Operate a vehicle-mounted loading crane
TLIE2029	Conduct workplace information briefings
TLIF0008	Apply safety critical communications in the rail environment
TLIF2006	Apply accident-emergency procedures
TLIF3003	Implement and monitor work health and safety procedures
TLIG1001	Work effectively with others
TLIG2007	Work in a socially diverse environment
TLIG3002	Lead a work team or group
TLII1002	Apply customer service skills
TLIW3013	Grind switches and crossings
TLIW3043	Weld rail on tram/light rail systems using electric welding process

Qualification Mapping Information

This qualification replaces and is equivalent to TLI32915 Certificate III in Tram or Light Rail

TLI33018 Certificate III in Heritage Locomotive Assistant or Steam Locomotive Fireman

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for a person who carries out the duties of a locomotive assistant on a heritage locomotive or fireman on a steam locomotive.

This job involves the performance of a broad range of skilled applications applied in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles

This qualification is aligned to the following defined roles:

- Group A: Heritage Locomotive Assistant
- Group B: Steam Locomotive Fireman.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **14 units of competency** comprising:

- **8 core units** listed below **plus**
- **2 specialist elective units** from within either Group A or Group B, listed below **plus**
- **4 general elective units** from the **general elective units** listed below. Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.
- Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIB3126	Assist in the testing of heritage train braking systems

© Commonwealth of Australia, 2025 Industry Skills Australia

TLID1001	Shift materials safely using manual handling methods
TLIE0002	Process workplace documentation
TLIF2006	Apply accident-emergency procedures
TLIF2010	Apply fatigue management strategies
TLIF3058	Apply safeworking rules and regulations to rail functions
TLIF3087	Follow work health and safety, and environmental procedures in the rail industry
TLIW3026	Operate stand alone signalling/point control equipment

Specialist elective units

Group A: Heritage Locomotive Assistant

TLIB3123	Apply awareness of motive power unit fundamentals
TLIC3072	Conduct the duties of an assistant on a heritage locomotive

Group B: Steam Locomotive Fireman

TLIB3124	Apply awareness of steam locomotive fundamentals
TLIC3073	Fire a steam locomotive

General elective units

TLIB2001	Check and assess operational capabilities of equipment
TLIB3002	Test equipment and isolate faults
TLIB3021	Conduct train roll-by inspection
TLIB3026	Prepare for train operation
TLIC3017	Shunt rolling stock
TLIE2007	Use communications systems
TLIF0008	Apply safety critical communications in the rail environment
TLIF2018	Operate firefighting equipment
TLIF2080	Safely access the rail corridor
TLIF3091	Apply awareness of dangerous goods and hazardous materials requirements

TLI33215 Certificate III in Terminal Train Driving

Modification History

Release 3. This is the third release of this qualification in the TLI Transport and Logistics Training Package. The following units have been added to the general elective units:

- TLIB0007 Respond and rectify rail traffic autonomous operations
- TLIC0005 Close down rail traffic from autonomous operations
- TLIC0006 Set up rail traffic for autonomous operation
- TLIF0015 Recognise the impact of human capabilities/limitations on human performance in a rail environment.

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following modifications have been made:

- TLIE0002 Process workplace documentation has an updated code
- TLIF0008 Apply safety critical communications in the rail environment added to the general elective units.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for a person engaged in terminal train driving.

This qualification requires the application of a broad range of knowledge and skills in varied contexts to undertake skilled work within a terminal train driving environment.

This qualification requires the skills and knowledge to:

- interpret and act on available information
- apply and communicate known solutions to a variety of predictable problems and to deal with unforeseen contingencies using known solutions
- provide technical information to a variety of specialist and non-specialist audiences
- undertake routine and some non-routine tasks in a range of skilled operations.

These skills and knowledge will be applied to known routines, methods, procedures and time constraints while taking responsibility for own outputs.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- terminal operator
- terminal train driver
- yard terminal driver.

No licensing, legislative or certification requirements apply to this qualification at the time of

© Commonwealth of Australia, 2025 Industry Skills Australia

publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **17 units of competency** comprising:

9 core units listed below, **plus**

8 general elective units from the general elective units listed below.

Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIB0132	Start up and shut down a single locomotive
TLIB2131	Prepare train
TLIB3123	Apply awareness of motive power unit fundamentals
TLIC0079	Operate a motive power unit within defined limits
TLIC3027	Stable a motive power unit
TLIE2007	Use communications systems
TLIF2010	Apply fatigue management strategies
TLIF3058	Apply safeworking rules and regulations to rail functions
TLIU2012	Participate in environmentally sustainable work practices

General elective units

HLTAID003	Provide first aid
TLIB0007	Respond and rectify rail traffic autonomous operations
TLIB2122	Apply awareness of fundamentals of rail operations in yards or sidings
TLIB3018	Conduct full train examination

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIB3019	Test train braking system
TLIB3021	Conduct train roll-by inspection
TLIB3113	Diagnose and rectify minor faults on motive power units and rolling stock
TLIB3118	Apply awareness of railway fundamentals
TLIB4078	Carry out a train roll-by inspection
TLIB4079	Conduct a general train examination
TLIB4081	Provision a motive power unit
TLIB4082	Set up motive power units in multi-coupled consist
TLIC0005	Close down rail traffic from autonomous operations
TLIC0006	Set up rail traffic for autonomous operation
TLIC3017	Shunt rolling stock
TLIC3048	Shunt, couple and uncouple electric passenger trains
TLIC3082	Operate a locomotive by portable remote control
TLIC4074	Shunt, couple and uncouple rail vehicles
TLIE0002	Process workplace documentation
TLIE1005	Carry out basic workplace calculations
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIF0008	Apply safety critical communications in the rail environment
TLIF0015	Recognise the impact of human capabilities/limitations on human performance in a rail environment
TLIF2018	Operate firefighting equipment
TLIF2080	Safely access the rail corridor
TLIF3085	Apply local incident response procedures
TLIF3091	Apply awareness of dangerous goods and hazardous materials requirements
TLIK2010	Use infotechnology devices in the workplace
TLIL2048	Prepare for train departure

TLI33316 Certificate III in Furniture Removal

Modification History

Release 4. This is the fourth release of this qualification in the TLI Transport and Logistics Training Package. The following general elective unit update has been added:

- TLIF0009 Ensure the safety of transport activities (Chain of Responsibility).

Release 3. This is the third release of this qualification in the TLI Transport and Logistics Training Package. The following change has been made:

- TLILIC0003 Licence to operate a forklift truck replaces
- TLILIC2001 Licence to operate a forklift truck.

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following units have been updated with new codes:

- TLIB0002 Carry out vehicle inspection
- TLIE0002 Process workplace documentation.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in furniture removal job roles within the transport and logistics industry.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- furniture removalist
- team leader.

No licensing legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **12 units of competency** comprising:

4 core units listed below, **plus**

© Commonwealth of Australia, 2025 Industry Skills Australia

8 general elective units from the general elective units listed below.

Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

BSBCUS201	Deliver a service to customers
TLID3050	Coordinate furniture removal
TLIE3021	Work and communicate effectively with others
TLIF1001	Follow work health and safety procedures

General elective units

BSBWOR301	Organise personal work priorities and development
HLTAID003	Provide first aid
TLIB0002	Carry out vehicle inspection
TLIC1051	Operate commercial vehicle
TLIC2002	Drive light rigid vehicle
TLIC3003	Drive medium rigid vehicle
TLIC3004	Drive heavy rigid vehicle
TLIC3005	Drive heavy combination vehicle
TLIC4006	Drive multi-combination vehicle
TLID2004	Load and unload goods/cargo
TLID2010	Operate a forklift
TLID2018	Handle furniture and effects
TLID3048	Pack and unpack furniture and effects
TLID3049	Pack and wrap furniture and effects for international removals
TLIE0002	Process workplace documentation
TLIE3010	Estimate furniture removal jobs

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIF0009	Ensure the safety of transport activities (Chain of Responsibility)
TLIF2010	Apply fatigue management strategies
TLIF3003	Implement and monitor work health and safety procedures
TLIG3002	Lead a work team or group
TLIH3002	Plan and navigate routes
TLIK2010	Use infotechnology devices in the workplace
TLIL3003	Conduct induction process
TLIL4005	Apply conflict/grievance resolution strategies
TLILIC0003	Licence to operate a forklift truck
TLILIC2014	Licence to drive a light rigid vehicle
TLILIC2015	Licence to drive a medium rigid vehicle
TLILIC2016	Licence to drive a heavy rigid vehicle
TLILIC3017	Licence to drive a heavy combination vehicle
TLILIC3018	Licence to drive a multi-combination vehicle
TLIU2012	Participate in environmentally sustainable work practices
TLIU3011	Implement and monitor environmentally sustainable work practices

TLI40115 Certificate IV in Rail Safety Investigation

Modification History

Release 3. This is the third release of this qualification in the TLI Transport and Logistics Training Package. The following general elective unit has been added:

- TLIF0013 Manage the impact of human capabilities/limitations on human performance in a rail environment.

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following modification has been made:

- TLIF0008 Apply safety critical communications in the rail environment added to general elective units.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for a person who undertakes a rail safety investigation within the rail industry in accordance with regulations, rail industry standards, rules and operational procedures.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **18 units of competency** comprising:

14 core units listed below, **plus**

4 general elective units listed below.

Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

BSBRSK401 Identify risk and apply risk management processes

© Commonwealth of Australia, 2025 Industry Skills Australia

PSPREG012	Gather information through interviews
PSPREG418A	Advise on progress of investigations
TLIB3118	Apply awareness of railway fundamentals
TLIE3022	Complete workplace documents
TLIE4030	Prepare rail safety reports
TLIF2062	Apply awareness of safeworking rules and regulations
TLIF2080	Safely access the rail corridor
TLIF3083	Conduct track protection assessment
TLIF4088	Implement and coordinate rail safety and WHS risk-control strategies
TLIF4100	Identify and meet rail safety regulatory compliance requirements
TLIF4107	Respond to notifiable rail safety occurrences
TLIF5017	Investigate rail safety incidents
TLIG4006	Facilitate work teams

General elective units

TLIB4042	Conduct inspection of safeworking procedures and infrastructure
TLIF0008	Apply safety critical communications in the rail environment
TLIF0013	Manage the impact of human capabilities/limitations on human performance in a rail environment
TLIF3085	Apply local incident response procedures
TLIF4101	Implement and maintain a rail safety culture

Qualification Mapping Information

This is a new qualification. No equivalent qualification.

TLI40118 Certificate IV in Transport Scheduling

Modification History

Release 3. This is the third release of this qualification in the TLI Transport and Logistics Training Package. The following Group B units have been updated:

- TLIF0009 Ensure the safety of transport activities (Chain of Responsibility)
- TLIF0014 Monitor the safety of transport activities (Chain of Responsibility).

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following change has been made:

- TLILIC2001 Licence to operate a forklift truck has been replaced with TLILIC0003 Licence to operate a forklift truck.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in the transport and logistics industry in a scheduling role.

It involves a broad range of applications, including requirements for:

- allocating staff and resources
- planning routes
- optimising delivery service
- contingency planning
- effective stakeholder engagement
- chain of responsibility obligations.

It ensures regulatory compliance is met for all types of freight, including but not limited to:

- break bulk
- bulk cargo/freight
- bulk liquid
- container/s
- couriers within the logistics industry
- dangerous goods
- furniture
- general
- livestock
- over dimension
- passengers
- refrigerated

© Commonwealth of Australia, 2025 Industry Skills Australia

- vehicle/mobile plant transport.

Additionally, the qualification provides skills in leading teams, just-in-time delivery, load security/integrity, optimising the use of telematic data in cost effective journey planning and delivery.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- aviation scheduler
- maritime scheduler
- rail operations scheduler
- transport allocator
- transport scheduler.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **14 units of competency** comprising:

4 core units listed below, **plus**

1 specialist elective unit from Group A **(Fatigue risk management)**, **plus**

1 specialist elective unit from Group B **(Regulatory)**, plus

8 general elective units from Group C or remaining Group A or Group B specialist units.

Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIE0001	Apply effective stakeholder engagement
TLIH0002	Implement effective contingency planning
TLII0003	Optimise delivery service
TLIL0001	Apply effective staff and resource allocation

© Commonwealth of Australia, 2025 Industry Skills Australia

Elective units

Group A - Fatigue risk management

TLIF0005	Apply a fatigue risk management system
TLIF0006	Administer a fatigue risk management system
TLIF0007	Manage a fatigue risk management system
TLIF2010	Apply fatigue management strategies

Group B - Regulatory

TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIF0009	Ensure the safety of transport activities (Chain of Responsibility)
TLIF0014	Monitor the safety of transport activities (Chain of Responsibility)
TLIF4065	Ensure compliance with Australian Dangerous Goods Code
TLIF4066	Implement and supervise transport regulations compliance systems

Group C - General elective units

BSBRSK401	Identify risk and apply risk management processes
TLIA1001	Secure cargo
TLIA4005	Check and evaluate records and documentation
TLIA4025	Regulate temperature controlled stock
TLIA4032	Organise transport of freight or goods
TLIA4033	Organise international transport of freight
TLIB3006	Carry out inspection of vehicles designed to carry special loads
TLIC3010	Pilot or escort oversized and/or overmassed loads
TLID0001	Load and unload vehicles carrying special loads
TLID0002	Care for livestock in transit
TLID3015	Identify and label explosives/dangerous goods
TLID3027	Prepare for transport of dangerous goods
TLIE0002	Process workplace documentation

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIE0003	Consolidate manifest documentation
TLIE3026	Carry out advanced calculations in the transport and logistics industry
TLIE3028	Complete a work diary in the road transport industry
TLIF3013	Coordinate breakdowns and emergencies
TLIG3002	Lead a work team or group
TLIG4005	Organise transport workload
TLIG4006	Facilitate work teams
TLIH0001	Apply efficient journey planning principles
TLIH2001	Interpret road maps and navigate pre-determined routes
TLIH2003	Prioritise courier/delivery operations
TLIH3002	Plan and navigate routes
TLII4001	Coordinate quality customer service
TLIJ3002	Apply quality systems
TLIK0001	Using telematics and technology data effectively in transport scheduling
TLIK2010	Use infotechnology devices in the workplace
TLIL1001	Complete workplace orientation/induction procedures
TLIL4005	Apply conflict/grievance resolution strategies
TLIL4009	Manage personal work priorities and professional development
TLIL4010	Assess and confirm customer transport requirements
TLIL4034	Arrange alternative passenger transport
TLIL4070	Work effectively in the transport and logistics industry
TLIL4078	Coordinate fleet control logistics
TLILIC0003	Licence to operate a forklift truck
TLIO0001	Undertake emergency response action to a security threat
TLIO0003	Follow security procedures when working with goods and cargo
TLIO1002	Follow security procedures when working with passengers and personnel

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIO3004	Conduct control procedures for transferring explosives/dangerous/ hazardous/high risk goods
TLIP4001	Develop plans to meet customer and organisation needs
TLIP4003	Implement, maintain and evaluate dangerous goods transport procedures within the workplace
TLIP4005	Manage workplace information
TLIP4013	Implement and monitor logistics planning and processes
TLIP4038	Monitor a supply chain operation
TLIP4039	Monitor transport operations
TLIP4040	Monitor warehouse operations

Qualification Mapping Information

This is a new qualification. No equivalent qualification.

TLI40119 Certificate IV in Driving Operations

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in driving operation job roles in the transport and logistics industry.

It involves a broad range of skilled applications, including requirements to evaluate and analyse current practices, to develop new criteria and procedures for performing current practices, and to provide leadership and guidance to others in applying skills and planning skill development.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- chemical tanker driver
- fuel tanker driver
- heavy recovery driver
- LP gas tanker driver.

Successful achievement of the licensing unit in the qualification must align with licensing and regulatory requirements applicable to driving and state or territory regulatory requirements.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **12 units of competency** comprising**:**

4 core units listed below, **plus**

1 licensing/industry elective unit relevant to the vehicle type applicable to the job role from the licensing/industry elective units listed below, **plus**

All units within one of the **specialist elective groups (**job roles) from Group A, Group B, Group C or Group D listed below, **plus**

5 general elective units from the Group E listed below if selecting Group A, Group B or Group

© Commonwealth of Australia, 2025 Industry Skills Australia

C, **or**

6 general elective units from the Group E listed below if selecting Group D.

Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

The following units have prerequisite units:

- CPCCSF2003 Cut and bend materials using oxy-LPG equipment
- TLIC0002 Operate fuel tanker
- TLIC0003 Operate LP gas tanker
- TLID4048 Top load a dangerous goods tanker
- TLID4049 Bottom load a dangerous goods tanker.

Core units

TLIF0009	Ensure the safety of transport activities (Chain of Responsibility)
TLIF2010	Apply fatigue management strategies
TLIF4066	Implement and supervise transport regulations compliance systems
TLIF4095	Apply work health and safety requirements for driving operations

Licensing/industry elective units

TLIC1051	Operate commercial vehicle
TLIC2002	Drive light rigid vehicle
TLIC3003	Drive medium rigid vehicle
TLIC3004	Drive heavy rigid vehicle
TLIC3005	Drive heavy combination vehicle
TLIC4006	Drive multi-combination vehicle
TLILIC2014	Licence to drive a light rigid vehicle
TLILIC2015	Licence to drive a medium rigid vehicle
TLILIC2016	Licence to drive a heavy rigid vehicle
TLILIC3017	Licence to drive a heavy combination vehicle
TLILIC3018	Licence to drive a multi-combination vehicle

© Commonwealth of Australia, 2025 Industry Skills Australia

Specialist elective units

Select one group (job role) from the following options:

Group A: Fuel Tanker

Group B: LP Gas Tanker

Group C: Chemical Tanker

Group D: Heavy Recovery.

Group A: Fuel Tanker

TLIC0002	Operate fuel tanker
TLILIC0001	Licence to transport dangerous goods by road

Group B: LP Gas Tanker

TLIC0003	Operate LP gas tanker
TLILIC0001	Licence to transport dangerous goods by road

Group C: Chemical Tanker

TLIC0001	Operate chemical tanker
TLILIC0001	Licence to transport dangerous goods by road

Group D: Heavy Recovery

TLIC4069	Operate heavy recovery vehicle

Group E: General elective units

AHCMOM213	Operate and maintain chainsaws
CPCCSF2003	Cut and bend materials using oxy-LPG equipment
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
DEFVEH001	Conduct recovery vehicle operations in a field environment
DEFVEH002	Extract disabled equipment using winching techniques in a field environment
HLTWHS006	Manage personal stressors in the work environment
RIICBS312E	Conduct bitumen tanker operations

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIB0002	Carry out vehicle inspection
TLIC0001	Operate chemical tanker
TLIC0002	Operate fuel tanker
TLIC0003	Operate LP gas tanker
TLIC4068	Operate heavy recovery ancillary equipment
TLIC4070	Tow a disabled heavy vehicle
TLID4048	Top load a dangerous goods tanker
TLID4049	Bottom load a dangerous goods tanker
TLID4050	Discharge a dangerous goods tanker
TLIE1005	Carry out basic workplace calculations
TLIE3026	Carry out advanced calculations in the transport and logistics industry
TLIE4025	Prepare and process transport documentation for dangerous goods
TLIF0005	Apply a fatigue risk management system
TLIF0006	Administer a fatigue risk management system
TLIF0012	Implement and coordinate accident-emergency procedures
TLIF0014	Monitor the safety of transport activities (Chain of Responsibility)
TLIF2018	Operate firefighting equipment
TLIF3091	Apply awareness of dangerous goods and hazardous materials requirements
TLIF3096	Carry out emergency response to a dangerous goods incident
TLIF4065	Ensure compliance with Australian Dangerous Goods Code
TLIH2001	Interpret road maps and navigate pre-determined routes
TLIH3002	Plan and navigate routes
TLIJ4010	Implement quality systems and procedures in a dangerous goods workplace
TLIL4010	Assess and confirm customer transport requirements
TLIL4079	Manage the recovery process
TLILIC0002	Licence to operate a vehicle loading crane (capacity 10 metre tonnes and

© Commonwealth of Australia, 2025 Industry Skills Australia

above)

TLIU1009 Monitor plant and equipment in an environmentally sustainable manner

Qualification Mapping Information

This qualification replaces and is equivalent to TLI42116 Certificate IV in Driving Operations.

TLI40218 Certificate IV in Mobile Crane Operations

Modification History

Release 1. This is a new release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This qualification is designed for mobile crane operation within the Transport and Logistics Industry and other industries.

It involves a broad range of skilled applications applied in a wide variety of contexts.

Successful achievement of the high risk work (HRW) and heavy vehicle licensing units in the qualification must align with licensing and regulatory requirements.

People seeking certification for HRW licensing units should check the requirements with Safe Work Australia.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of 20 units of competency comprising:

10 core units listed below plus

10 elective units, of which 1 elective unit must be taken from Group A elective units listed below and 6 elective units must be taken from Group B elective units listed below plus

The remaining 3 elective units may be selected from Group A or Group B or from any relevant nationally endorsed Training Package or accredited course.

The elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with. Where a prerequisite unit is attached to a unit, it is identified by this symbol ∟.

Note:

To comply with the National Standards for Licensing Persons Performing High Risk Work, there is a requirement to achieve TLILIC3006 Licence to operate a non-slewing mobile crane (greater than 3 tonnes capacity) before commencing the selected slewing mobile crane licence unit.

© Commonwealth of Australia, 2025 Industry Skills Australia

Applying for a high risk work licence for TLILIC0008 Licence to operate a non-slewing mobile crane (greater than 3 tonnes capacity) is not a requirement if the selected mobile slewing crane licence is being applied for, as this licence covers TLILIC0008 Licence to operate a non-slewing mobile crane.

Core units

CPCCCM2010B	Work safely at heights
	∟CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry
CPCCCM3003	Work safely around power sources, services and assets
CPCCWHS1001	Prepare to work safely in the construction industry
TLIB3013	Maintain mobile cranes
TLID1001	Shift materials safely using manual handling methods
TLIE0002	Process workplace documentation
TLIF2006	Apply accident-emergency procedures
TLIF3084	Follow mobile crane safety procedures
TLILIC0008	Licence to operate a non-slewing mobile crane (greater than 3 tonnes capacity)
TLIU1009	Monitor plant and equipment in an environmentally sustainable manner

Elective units

Group A: High Risk Licensing

CPCCLDG3001A	Licence to perform dogging
CPCCLRG3001A	Licence to perform rigging basic level
	∟CPCCLDG3001A Licence to perform dogging
CPCCLRG3002A	Licence to perform rigging intermediate level
	∟CPCCLRG3001A Licence to perform rigging basic level
TLILIC0013	Licence to operate a slewing mobile crane (up to 60 tonnes)
TLILIC0014	Licence to operate a slewing mobile crane (up to 100 tonnes)
TLILIC0015	Licence to operate a slewing mobile crane (over 100 tonnes)

Group B: General

© Commonwealth of Australia, 2025 Industry Skills Australia

CPCCOHS1001A	Work safely in the construction industry
HLTAID003	Provide first aid
HLTAID006	Provide advanced first aid
TLIA1001	Secure cargo
TLIB2001	Check and assess operational capabilities of equipment
TLIB3011	Set up and rig crane for lift
TLIB3012	Plan job and set up work areas
TLIB3015	Undertake site inspection
TLIB3016	De-rig, pack and store tools and equipment
TLIC3004	Drive heavy rigid vehicle
TLIC3005	Drive heavy combination vehicle
TLIC3010	Pilot or escort oversized and/or overmassed loads
TLIC4006	Drive multi-combination vehicle
TLID3031	Rig load
TLID4032	Plan and conduct specialised lift
TLIE3009	Use pilot and escort communication
TLIF1002	Conduct housekeeping activities
TLIF2010	Apply fatigue management strategies
TLILIC0005	Licence to operate a boom-type elevating work platform (boom length 11 metres or more)
TLIP4010	Assess lift requirements and provide quotation

Qualification Mapping Information

This qualification replaces and is equivalent to TLI41918 Certificate IV in Mobile Crane Operations.

TLI40219 Certificate IV in International Freight Forwarding (Senior Operator)

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in international freight forwarding job roles at a senior operational level within the international freight forwarding industry.

It involves a broad range of skilled applications, including evaluating and analysing current practices, developing new criteria and procedures for performing current practices, and providing some leadership and guidance to others.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **11 units of competency** comprising:

6 core units listed below, **plus**

5 general elective units from the general elective units listed below.

Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIA4031	Consolidate freight
TLIA5035	Manage international freight transfer
TLIE3002	Estimate/calculate mass, area and quantify dimensions

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIF0009 Ensure the safety of transport activities (Chain of Responsibility)

TLII0001 Market international freight forwarding services

TLIO0003 Follow security procedures when working with goods and cargo

General elective units

TLIA4032 Organise transport of freight or goods

TLIA4033 Organise international transport of freight

TLID2003 Handle dangerous goods/hazardous substances

TLII0002 Provide freight forwarding information and customer service

TLIL4010 Assess and confirm customer transport requirements

TLIL5026 Manage export logistics

TLIM4004 Mentor individuals or small groups

TLIR4001 Monitor supplier performance

TLIR4002 Source goods/services and evaluate contractors

Qualification Mapping Information

This qualification replaces and is equivalent to TLI41616 Certificate IV in International Freight Forwarding (Senior Operator).

TLI40319 Certificate IV in Logistics

Modification History

Release 1: This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in logistics operations in the transport and logistics industry in a variety of operational roles.

It involves a broad range of skilled applications including requirements to evaluate and analyse current practices, develop new criteria and procedures for performing current practices, and provide leadership and guidance to others in applying skills and planning skill development.

Successful achievement of the licensing units within the qualification must align with applicable licensing and regulatory requirements.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- logistics coordinator
- logistics supervisor.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **15 units of competency** comprising:

2 core unit listed below, **plus**

7 technical elective units from Group A, **plus**

6 general elective units from Group B or remaining technical elective units listed below.

Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Elective units can only be counted once towards the qualification packaging rules i.e. if a unit is listed in both a technical elective group and the general elective group, it can only be

© Commonwealth of Australia, 2025 Industry Skills Australia

counted as one of the elective units required.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIF0009	Ensure the safety of transport activities (Chain of Responsibility)
TLIX4028	Apply knowledge of logistics

Elective units

Group A - Technical elective units

PSPPCM004	Plan procurement
TLIA4028	Assess and monitor optimum stock levels
TLIA4032	Organise transport of freight or goods
TLIA4033	Organise international transport of freight
TLIA4062	Implement safety stock systems
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIE4013	Apply workplace statistics
TLIF0014	Monitor the safety of transport activities (Chain of Responsibility)
TLIF3063	Administer the implementation of fatigue management strategies
TLIF4014	Develop and maintain a safe workplace
TLIF4065	Ensure compliance with Australian Dangerous Goods Code
TLIF4066	Implement and supervise transport regulations compliance systems
TLIG4005	Organise transport workload
TLII4001	Coordinate quality customer service
TLIL4030	Control a furniture warehouse
TLIL4070	Work effectively in the transport and logistics industry
TLIL4078	Coordinate fleet control logistics
TLIP4003	Implement, maintain and evaluate dangerous goods transport procedures within the workplace

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIP4013	Implement and monitor logistics planning and processes
TLIP4038	Monitor a supply chain operation
TLIP4039	Monitor transport operations
TLIP4040	Monitor warehouse operations
TLIR4001	Monitor supplier performance
TLIR4002	Source goods/services and evaluate contractors
TLIR4003	Negotiate a contract
TLIR4008	Implement and supervise stocktaking procedures
TLIR4009	Implement purchasing systems
TLIR4010	Plan purchasing
TLIR4012	Conduct international purchasing
TLIU3011	Implement and monitor environmentally sustainable work practices

Group B - General elective units

BSBCUS401	Coordinate implementation of customer service strategies
BSBHRM405	Support the recruitment, selection and induction of staff
BSBMGT403	Implement continuous improvement
BSBRSK401	Identify risk and apply risk management processes
BSBWHS401	Implement and monitor WHS policies, procedures and programs to meet legislative requirements
HLTAID003	Provide first aid
HLTAID006	Provide advanced first aid
PSPGEN025	Develop and implement work unit plans
PSPGEN027	Gather and analyse information
PSPGEN034	Compose complex workplace documents
PSPPCM004	Plan procurement
SITXFIN003	Manage finances within a budget

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIA4005	Check and evaluate records and documentation
TLIB0004	Coordinate pooled equipment
TLID1001	Shift materials safely using manual handling methods
TLIE0003	Consolidate manifest documentation
TLIF0006	Administer a fatigue risk management system
TLIF0007	Manage a fatigue risk management system
TLIF0012	Implement and coordinate accident-emergency procedures
TLIF0014	Monitor the safety of transport activities (Chain of Responsibility)
TLIG4006	Facilitate work teams
TLIJ4008	Implement and monitor inbound quality assurance systems
TLIK2010	Use infotechnology devices in the workplace
TLIL4005	Apply conflict/grievance resolution strategies
TLIL4009	Manage personal work priorities and professional development
TLIL4036	Develop rosters
TLIL4037	Apply and amend rosters
TLIL4058	Plan a career in logistics
TLIL4059	Implement asset management systems
TLILIC0003	Licence to operate a forklift truck
TLIP4001	Develop plans to meet customer and organisation needs
TLIP4002	Facilitate and capitalise on change in the workplace
TLIP4005	Manage workplace information
TLIP4028	Administer international trading accounts
TLIU2012	Participate in environmentally sustainable work practices
TLIX0004X	Administer inventory systems
TLIX0005X	Administer market supply systems
TLIX0010X	Enable traceability in supply chains

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIX0013X	Maintain stock control and receivals
TLIX0015X	Manage fundamental aspects of supply chains
TLIX0016X	Manage outsourced supply chain operations
TLIX0020X	Monitor ethical supply chain practices
TLIX0021X	Work with global supply chains

Qualification Mapping Information

This qualification replaces and is equivalent to TLI42016 Certificate IV in Logistics.

TLI40419 Certificate IV in Stevedoring Operations

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This qualification is for a person engaged in operational roles within a stevedoring environment. It involves a broad range of skilled applications, including evaluating and analysing current practices, developing new criteria and procedures for performing current practices, and providing some leadership and guidance to others.

Successful achievement of the licensing units within the qualification must align with applicable licensing and regulatory requirements.

Job roles

Possible job roles relevant to this qualification include:

- stevedore team leader
- stevedore supervisor
- stevedore shift manager.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **15 units of competency** comprising:

9 core units listed below, plus

6 general elective units from the general elective units listed below.

Up to 3 of the 6 general elective units may be imported from any relevant endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where units are imported all prerequisites must be complied with.

The following imported units have a prerequisite:

- CPCCLRG3001A Licence to perform rigging basic level

© Commonwealth of Australia, 2025 Industry Skills Australia

- CPCCLRG3002A Licence to perform rigging intermediate level
- CPCCLRG4001A Licence to perform rigging advanced level

Core units

TLIA0014	Organise and monitor terminal/wharf operations
TLIE4006	Collect, analyse and present workplace data and information
TLIF0012	Implement and coordinate accident-emergency procedures
TLIF4014	Develop and maintain a safe workplace
TLIF4064	Manage fatigue management policy and procedures
TLIG4006	Facilitate work teams
TLIL4005	Apply conflict/grievance resolution strategies
TLIL4033	Promote effective workplace practice
TLIU4001	Implement and monitor environmental protection policies and procedures

General elective units

BSBRSK401	Identify risk and apply risk management processes
CPCCLDG3001A	Licence to perform dogging
CPCCLRG3001A	Licence to perform rigging basic level
CPCCLRG3002A	Licence to perform rigging intermediate level
CPCCLRG4001A	Licence to perform rigging advanced level
TLIA0007	Coordinate stevedoring clerical functions
TLIA0011	Implement and monitor stevedoring regulations
TLIA4005	Check and evaluate records and documentation
TLIB0006	Prepare and monitor automated operations
TLID0004	Direct crane operations
TLID0005	Monitor crane operations
TLIE0005	Undertake rigger/dogger and operators communications
TLIE2007	Use communications systems

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIF0014	Monitor the safety of transport activities (Chain of Responsibility)
TLIF3022	Implement/monitor procedures when warehousing/storing dangerous goods/hazardous substances
TLII4001	Coordinate quality customer service
TLIJ3002	Apply quality systems
TLIK2010	Use infotechnology devices in the workplace
TLIL2031	Monitor and process attendance records
TLIL4009	Manage personal work priorities and professional development
TLIL4010	Assess and confirm customer transport requirements
TLIL4032	Implement equal employment equity strategies
TLIL4037	Apply and amend rosters
TLIM4004	Mentor individuals or small groups
TLIO0002	Apply and monitor workplace security procedures
TLIP4001	Develop plans to meet customer and organisation needs
TLIP4002	Facilitate and capitalise on change in the workplace
TLIP4003	Implement, maintain and evaluate dangerous goods transport procedures within the workplace
TLIP4005	Manage workplace information
TLIX0006	Apply and monitor biosecurity policies and procedures

Qualification Mapping Information

This qualification replaces and is equivalent to TLI41715 Certificate IV in Stevedoring Operations.

TLI40519 Certificate IV in Traffic Control Room Operations

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in traffic control room operations job roles within the transport and logistics industry.

It involves a broad range of skilled applications including requirements to evaluate and analyse current practices, to develop new criteria and procedures for performing current practices, and to provide leadership and guidance to others in applying skills and planning skill development.

Job roles:

The Certificate IV in Traffic Control Room Operations qualification is aligned to the following defined roles:

- tunnel road operator
- open road operator.

Please note: RTO to insert on the testamur, the specialist elective unit group selected from the group choice below.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

^ From 1 July 2022 the elective unit HLTAID003 must no longer be delivered and will be replaced in the Packaging Rules by the unit HLTAID011 - for more information see: https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **14 units of competency** comprising:

10 core units listed below, **plus**

All **specialist elective units** from Group A or Group B listed below, **plus**

The **remainder of elective units** from Group C general elective units listed below.

The general elective units must contribute to the vocational outcomes of the qualification.

Core units

© Commonwealth of Australia, 2025 Industry Skills Australia

HLTWHS006	Manage personal stressors in the work environment
TLIB2001	Check and assess operational capabilities of equipment
TLIE3023	Use electronic communication systems
TLIF0012	Implement and coordinate accident-emergency procedures
TLIF2010	Apply fatigue management strategies
TLIF3013	Coordinate breakdowns and emergencies
TLIF4069	Monitor and respond to traffic flow
TLIF5020	Manage emergencies
TLIJ3002	Apply quality systems
TLIK2010	Use infotechnology devices in the workplace

Specialist elective units

Group A: Tunnel Operator

TLIF4070	Operate fire and life safety system within a tunnel
TLIU1009	Monitor plant and equipment in an environmentally sustainable manner

Group B: Open Road Operator

TLIF3085	Apply local incident response procedures

Group C: General elective units

CPPFES2005A	Demonstrate first attack firefighting equipment
HLTAID003	Provide first aid
^ HLTAID011	**Provide First Aid (must be delivered from 1 July 2022)**
RIIWHS202D	Enter and work in confined spaces
RIIWHS204D	Work safely at heights
TLIA4005	Check and evaluate records and documentation
TLIC2002	Drive light rigid vehicle
TLID0006	Move materials mechanically using automated equipment
TLID1002	Shift a load using manually-operated equipment

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIE0002	Process workplace documentation
TLIE1003	Participate in basic workplace communication
TLIE2007	Use communications systems
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIE3004	Prepare workplace documents
TLIE3026	Carry out advanced calculations in the transport and logistics industry
TLIF0006	Administer a fatigue risk management system
TLIF0012	Implement and coordinate accident-emergency procedures
TLIF0014	Monitor the safety of transport activities (Chain of Responsibility)
TLIF1001	Follow work health and safety procedures
TLIF1002	Conduct housekeeping activities
TLIF2006	Apply accident-emergency procedures
TLIF2018	Operate firefighting equipment
TLIF3063	Administer the implementation of fatigue management strategies
TLIF3085	Apply local incident response procedures
TLIF4014	Develop and maintain a safe workplace
TLIF4065	Ensure compliance with Australian Dangerous Goods Code
TLIF4070	Operate fire and life safety system within a tunnel
TLIF4108	Implement traffic management plan in the transport industry
TLIG1001	Work effectively with others
TLIG2007	Work in a socially diverse environment
TLIG4006	Facilitate work teams
TLII1002	Apply customer service skills
TLIJ2001	Apply quality procedures
TLIJ3005	Sample, inspect and test products to specifications
TLIK2003	Apply keyboard skills

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIL2008	Complete routine administrative tasks
TLIL4005	Apply conflict/grievance resolution strategies
TLIL4009	Manage personal work priorities and professional development
TLIL4037	Apply and amend rosters
TLIO0001	Undertake emergency response action to a security threat
TLIO0002	Apply and monitor workplace security procedures
TLIO3012	Manage disruptive and/or unlawful behaviour
TLIU1009	Monitor plant and equipment in an environmentally sustainable manner
TLIU2012	Participate in environmentally sustainable work practices

Qualification Mapping Information

This qualification replaces and is equivalent to TLI42516 Certificate IV in Traffic Operations.

TLI40619 Certificate IV in Warehousing Operations

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for the warehousing and storage industry.

It involves a broad range of skilled applications including requirements to evaluate and analyse current practices, develop new criteria and procedures for performing current practices, and provide leadership and guidance to others in applying skills and planning skill development.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **21 units of competency** comprising:

3 core units listed below, **plus**

18 general elective units from the general elective units listed below.

Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIF0009	Ensure the safety of transport activities (Chain of Responsibility)
TLIF1001	Follow work health and safety procedures
TLIL1001	Complete workplace orientation/induction procedures

General elective units

TLIA4025	Regulate temperature controlled stock

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIA4028	Assess and monitor optimum stock levels
TLIA4031	Consolidate freight
TLIA4032	Organise transport of freight or goods
TLIB0004	Coordinate pooled equipment
TLID2010	Operate a forklift
TLIE4006	Collect, analyse and present workplace data and information
TLIE4013	Apply workplace statistics
TLIF0012	Implement and coordinate accident-emergency procedures
TLIF0014	Monitor the safety of transport activities (Chain of Responsibility)
TLIF4014	Develop and maintain a safe workplace
TLIG3002	Lead a work team or group
TLIG4005	Organise transport workload
TLIG4006	Facilitate work teams
TLII4001	Coordinate quality customer service
TLII4005	Market services and products to clients
TLIJ3002	Apply quality systems
TLIL4005	Apply conflict/grievance resolution strategies
TLIL4009	Manage personal work priorities and professional development
TLIL4010	Assess and confirm customer transport requirements
TLIL4021	Coordinate the erection and dismantling of temporary storage facilities
TLIL4032	Implement equal employment equity strategies
TLIL4033	Promote effective workplace practice
TLIL4036	Develop rosters
TLIL4037	Apply and amend rosters
TLILIC0003	Licence to operate a forklift truck
TLILIC0004	Licence to operate an order picking forklift truck

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIM4004	Mentor individuals or small groups
TLIP4001	Develop plans to meet customer and organisation needs
TLIP4002	Facilitate and capitalise on change in the workplace
TLIP4005	Manage workplace information
TLIP4031	Maintain customer credit accounts and services
TLIR4001	Monitor supplier performance
TLIR4002	Source goods/services and evaluate contractors
TLIU0001	Develop workplace policy and procedures for environmental sustainability
TLIU3011	Implement and monitor environmentally sustainable work practices
TLIU4001	Implement and monitor environmental protection policies and procedures
TLIX0004X	Administer inventory systems
TLIX0005X	Administer market supply systems
TLIX0010X	Enable traceability in supply chains
TLIX0013X	Maintain stock control and receivals
TLIX0015X	Manage fundamental aspects of supply chains
TLIX0016X	Manage outsourced supply chain operations
TLIX0020X	Monitor ethical supply chain practices
TLIX0021X	Work with global supply chains

Qualification Mapping Information

This qualification replaces and is equivalent to TLI41816 Certificate IV in Warehousing Operations.

TLI41218 Certificate IV in Transport and Logistics (Road Transport - Car Driving Instruction)

Modification History

Release 1. This is a new release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This qualification is for those engaged in driving instructor job roles within the Transport and Logistics Industry.

It includes the performance of a broad range of skilled applications including requirements to evaluate and analyse current practices, to develop new criteria and procedures for performing current practices, and to provide some leadership and guidance to others in applying skills and planning skill development.

This qualification is currently cited as meeting part of the requirements for certification as a Motor Vehicle Driving Instructor, as defined by relevant state/territory licensing and regulatory requirements.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of 12 units of competency comprising:

12 core units listed below

Core units

BSBRKG304	Maintain business records
TAEDEL301	Provide work skill instruction
TAEDES401	Design and develop learning programs
TLIC1051	Operate a commercial vehicle
TLIC3036	Apply safe car driving behaviours
TLIF1001	Follow work health and safety procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIG2007	Work in a socially diverse environment
TLII1002	Apply customer service skills
TLIL2060	Complete induction to the transport industry
TLIL4009	Manage personal work priorities and professional development
TLIM0001	Conduct learner driver training
TLIM4001	Develop safe car driving behaviours in others

Qualification Mapping Information

This qualification replaces and is equivalent to TLI41216 Certificate IV in Transport and Logistics (Road Transport - Car Driving Instruction).

TLI41318 Certificate IV in Transport and Logistics (Road Transport - Heavy Vehicle Driving Instruction)

Modification History

Release 1. This is a new release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in heavy vehicle driving instructor job roles within the Transport and Logistics Industry.

It includes the performance of a broad range of skilled applications including requirements to evaluate and analyse current practices, to develop new criteria and procedures for performing current practices, and to provide some leadership and guidance to others in applying skills and planning skill development.

This qualification is currently cited as meeting part of the requirements for certification as a Heavy Vehicle Driving Instructor, as defined by relevant state/territory licensing and regulatory requirements.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of 14 units of competency comprising:

13 core units listed below plus

1 industry elective unit from the industry elective units listed below, relevant to the vehicle type applicable to the job role.

Core units

BSBRKG304	Maintain business records
TAEDEL301	Provide work skill instruction
TAEDES401	Design and develop learning programs
TLIC3037	Apply safe heavy vehicle driving behaviours
TLIF1001	Follow work health and safety procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIF2010	Apply fatigue management strategies
TLIF4066	Implement and supervise transport regulations compliance systems
TLIG2007	Work in a socially diverse environment
TLII1002	Apply customer service skills
TLIL2060	Complete induction to the transport industry
TLIL4009	Manage personal work priorities and professional development
TLIM0002	Conduct heavy vehicle learner driver training
TLIM4002	Develop safe heavy vehicle driving behaviours in others

Industry elective units

TLIC2002	Drive light rigid vehicle
TLIC3003	Drive medium rigid vehicle
TLIC3004	Drive heavy rigid vehicle
TLIC3005	Drive heavy combination vehicle
TLIC4006	Drive multi-combination vehicle

Qualification Mapping Information

This qualification replaces and is equivalent to TLI41316 Certificate IV in Transport and Logistics (Road Transport - Heavy Vehicle Driving Instruction).

TLI41515 Certificate IV in Materiel Logistics

Modification History

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following modification has been made:

- Imported units updated.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for a person who is engaged in the Logistics Industry in a variety of integrated logistics and materiel sustainment roles.

Successful achievement of this qualification requires a person to perform a broad range of skilled applications including requirements to evaluate and analyse current practices, develop new criteria and procedures for performing current practices, and to provide some leadership and guidance to others.

This qualification is targeted at practitioners from the logistics support discipline with at least twelve months' experience. Practitioners from the inventory management, data management, maintenance system management and integrated logistics support (acquisition and sustainment) job streams would benefit from this qualification.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **17 units of competency** comprising:

4 core units listed below **plus**

3 logistics elective units from the logistics elective units listed below **plus**

4 technical elective units from the technical elective units listed below **plus**

6 general elective units from the general elective units or remaining logistics or technical elective units listed below. Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units are

complied with.

Core units

PSPGOV404B	Develop and implement work unit plans
PSPGOV413A	Compose complex workplace documents
PSPPROC303A	Carry out basic procurement
TLIX4028	Apply knowledge of logistics

Logistics elective units

TLIX4007	Implement and monitor integrated logistics support plans
TLIX4008	Conduct integrated logistics support activities
TLIX4009	Apply integrated logistics support processes and procedures
TLIX4011	Conduct logistics support analysis activities
TLIX4016	Implement and monitor materiel sustainment plans
TLIX4017	Conduct materiel sustainment activities
TLIX4018	Apply materiel sustainment processes and procedures
TLIX4022	Implement and monitor configuration management plans
TLIX4023	Conduct configuration management activities
TLIX4024	Apply configuration management processes and procedures

Technical elective units

TLIP5036	Manage assets
TLIX4026	Apply codification and cataloguing processes and procedures
TLIX4027	Assess maintenance spares and manage repairable items
TLIX4029	Apply knowledge of integrated logistics support
TLIX4030	Apply knowledge of materiel sustainment
TLIX4031	Apply knowledge of configuration management
TLIX4032	Apply knowledge of technical regulatory framework

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIX4034	Apply technical risk management systems and techniques
TLIX4035	Maintain technical data and information

General elective units

BSBADM409	Coordinate business resources
BSBCOM501	Identify and interpret compliance requirements
BSBINM401	Implement workplace information system
BSBLDR403	Lead team effectiveness
BSBWHS401	Implement and monitor WHS policies, procedures and programs to meet legislative requirements
BSBMGT403	Implement continuous improvement
BSBREL401	Establish networks
BSBRSK401	Identify risk and apply risk management processes
PSPGEN027	Gather and analyse information
PSPGEN042	Exercise delegations
PSPPM401B	Design simple projects
PSPPM402B	Manage simple projects
PSPPM403B	Close simple projects
PSPPCM002	Dispose of assets
PSPPCM004	Plan procurement
PSPPCM005	Develop and distribute requests for offers
PSPPCM006	Select providers and develop contracts
PSPPCM007	Manage contracts
TLIR4001	Monitor supplier performance
TLIU4001	Implement and monitor environmental protection policies and procedures
TLIX4033	Apply technical regulatory framework compliance management systems

TLI42215 Certificate IV in Rail Network Control

Modification History

Release 3. This is the third release of this qualification in the TLI Transport and Logistics Training Package. The following units have been added to the general elective units:

- TLIF0015 Recognise the impact of human capabilities/limitations on human performance in a rail environment
- TLIK0002 Managing autonomous rail traffic operations by network control.

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following unit has been added to the general elective units:

- TLIF0008 Apply safety critical communications in the rail environment.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for a person engaged in the control of rail networks.

This qualification requires a broad range of skilled applications within the rail control environment. It also requires the skills and knowledge to evaluate and analyse current practices, to develop new criteria and procedures, and to provide some leadership and guidance to others in their work.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- train controller
- network controller
- area controller.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **15 units of competency** comprising:

© Commonwealth of Australia, 2025 Industry Skills Australia

10 core units listed below, **plus**

5 general elective units from the general elective units listed below.

Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIE3022	Complete workplace documents
TLIE3023	Use electronic communication systems
TLIF2010	Apply fatigue management strategies
TLIF3087	Follow work health and safety, and environmental procedures in the rail industry
TLIF4086	Control and coordinate incident responses
TLIF4090	Implement safeworking rules and regulations for network control activities
TLIG1001	Work effectively with others
TLII4022	Identify and meet customer requirements
TLIL4074	Control and coordinate rail traffic movement
TLIL4075	Implement and amend daily train plan

General elective units

BSBWOR201	Manage personal stress in the workplace
BSBWOR301	Organise personal work priorities and development
BSBWRT301	Write simple documents
TLIB3118	Apply awareness of railway fundamentals
TLIF0008	Apply safety critical communications in the rail environment
TLIF0015	Recognise the impact of human capabilities/limitations on human performance in a rail environment
TLIF3091	Apply awareness of dangerous goods and hazardous materials requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIG2007	Work in a socially diverse environment
TLIJ2001	Apply quality procedures
TLIK0002	Managing autonomous rail traffic operation by network control
TLIL2041	Monitor and record rolling stock locations
TLIL3035	Allocate motive power
TLIL3052	Plan urban passenger train consists
TLIL4034	Arrange alternative passenger transport
TLIL4037	Apply and amend rosters
TLIL4038	Organise marshalling and shunting operations
TLIL4050	Allocate rolling stock
TLIL4077	Develop out-of-course rail traffic plans and schedules
TLIU2012	Participate in environmentally sustainable work practices

Qualification Mapping Information

This qualification replaces and is equivalent to TLI42211 Certificate IV in Rail Network Control.

TLI42315 Certificate IV in Rail Infrastructure

Modification History

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following unit has been added to the general elective units:

- TLIF0008 Apply safety critical communications in the rail environment.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for a person engaged in providing infrastructure construction and/or maintenance activities on rail networks.

This qualification requires a broad range of skilled applications within the rail Infrastructure environment. It also requires the skills and knowledge to evaluate and analyse current practices, to develop new criteria and procedures, and to provide some leadership and guidance to others in their work.

Job roles

This qualification is suitable for a variety of job roles in the fields of:

Rail Track Working, Rail Track Surfacing or Rail Structures

Job roles and titles vary across different sectors. Possible job titles relevant to the listed fields include:

- Ganger
- Leading hand
- Team leader
- Work group leader
- Supervisor
- Possession officer.

Track Protection

Possible job titles relevant to this field include:

- Principal protection officer (PPO).

Please note: RTO to insert on the testamur, the specialist elective unit group selected from the group choice below.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

© Commonwealth of Australia, 2025 Industry Skills Australia

Entry Requirements

The entry requirement for this qualification is one of the following qualifications:

- TLI31815 Certificate III in Rail Track Surfacing
- TLI31915 Certificate III in Mechanical Rail Signalling
- TLI32115 Certificate III in Rail Structures
- TLI32515 Certificate III in Rail Infrastructure
- TLI32715 Certificate III in Track Protection or
- relevant industry experience gained by working in the rail infrastructure environment.

Packaging Rules

A total of **13 units of competency** comprising**:**

8 core units listed below **plus**

3 specialist elective units from one of the specialist elective unit group**s** (job roles) from Group A or Group B listed below **plus**

2 general units from the general elective units listed below. Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified in the unit are complied with.

Core units

BSBMGT401	Show leadership in the workplace
BSBPMG409	Apply project scope management techniques
TLIF3089	Implement fatigue management policies and procedures for rail infrastructure
TLIF4088	Implement and coordinate rail safety and WHS risk-control strategies
TLIG4006	Facilitate work teams
TLIJ4009	Implement and monitor quality assurance systems
TLIL4005	Apply conflict/grievance resolution strategies
TLIL4076	Coordinate resources

Specialist elective units

Select 3 units from one of the following specialist elective groups:

- Group A: Rail Track Working, Rail Track Surfacing or Rail Structures
- Group B: Track Protection.

© Commonwealth of Australia, 2025 Industry Skills Australia

Group A: Rail Track Working, Rail Track Surfacing or Rail Structures

BSBMGT403	Implement continuous improvement
BSBRSK401	Identify risk and apply risk management processes
TLIF2006	Apply accident-emergency procedures
TLIL4073	Apply asset management system

Group B: Track Protection

The selection must include TLIL4069 Plan and coordinate protection for multiple worksites within limits of a work on track authority.

BSBMGT403	Implement continuous improvement
BSBRSK401	Identify risk and apply risk management processes
TLIF2006	Apply accident-emergency procedures
TLIL4069	Plan and coordinate protection for multiple worksites within limits of a work on track authority

General elective units

BSBADM502	Manage meetings
BSBCMM401	Make a presentation
RIIBEF402D	Supervise on-site operations
TLIB4042	Conduct inspection of safeworking procedures and infrastructure
TLID4030	Supervise mobile crane operations
TLIF0008	Apply safety critical communications in the rail environment
TLII4001	Coordinate quality customer service
TLIP4001	Develop plans to meet customer and organisation needs
TLIR4002	Source goods/services and evaluate contractors
TLIR4008	Implement and supervise stocktaking procedures
TLIR4009	Implement purchasing systems
TLIU3011	Implement and monitor environmentally sustainable work practices

TLI42415 Certificate IV in Rail Safety Management

Modification History

Release 3. This is the third release of this qualification in the TLI Transport and Logistics Training Package. The following general elective unit has been added:

- TLIF0013 Manage the impact of human capabilities/limitations on human performance in a rail environment.

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following modifications have been made:

- TLIF0008 Apply safety critical communications in the rail environment added to general elective units
- Imported unit updated.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in the management of safety within the rail industry.

This qualification requires a broad range of skilled applications within the rail safety environment. It also requires the skills and knowledge to evaluate and analyse current practices, to develop new criteria and procedures, and to provide some leadership and guidance to others in their work.

Job roles

This qualification is aligned to the following defined role:

- rail safety manager.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **17 units of competency** comprising:

11 core units listed below, **plus**

6 general elective units from the general elective units listed below.

© Commonwealth of Australia, 2025 Industry Skills Australia

Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

BSBRSK401	Identify risk and apply risk management processes
TLIE4030	Prepare rail safety reports
TLIE4032	Use internal communication systems for rail industry regulatory compliance
TLIF4099	Develop an application for, or variation to, rail accreditation
TLIF4100	Identify and meet rail safety regulatory compliance requirements
TLIF4101	Implement and maintain a rail safety culture
TLIF4102	Implement and maintain safety management plans
TLIF4104	Manage change in the rail safety environment
TLIF4105	Manage rail safety compliance
TLIF4107	Respond to notifiable rail safety occurrences
TLIL4081	Ensure competency of rail safety workers

General elective units

BSBADM502	Manage meetings
BSBCMM401	Make a presentation
BSBMGT401	Show leadership in the workplace
BSBMGT403	Implement continuous improvement
BSBPMG518	Manage project procurement
PSPGEN013	Implement change
TLIF0008	Apply safety critical communications in the rail environment
TLIF0013	Manage the impact of human capabilities/limitations on human performance in a rail environment

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIF4103	Implement fitness for work procedures
TLIG4006	Facilitate work teams
TLIL4005	Apply conflict/grievance resolution strategies
TLIL4073	Apply asset management system
TLIL4082	Coordinate rail interface agreements
TLIR4002	Source goods/services and evaluate contractors
TLIU4001	Implement and monitor environmental protection policies and procedures

Qualification Mapping Information

This qualification replaces and is equivalent to TLI42413 Certificate IV in Rail Safety Management.

TLI42615 Certificate IV in Train Driving

Modification History

Release 3. This is the third release of this qualification in the TLI Transport and Logistics Training Package. The following units have been added to the general elective units:

- TLIB0007 Respond and rectify rail traffic autonomous operations
- TLIC0005 Close down rail traffic from autonomous operations
- TLIC0006 Set up rail traffic for autonomous operation
- TLIF0015 Recognise the impact of human capabilities/limitations on human performance in a rail environment.

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following modifications have been made:

- TLIE0002 Process workplace documentation has an updated code
- TLIF0008 Apply safety critical communications in the rail environment added to general electives
- Imported unit updated.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for a person engaged in train driving activities.

It involves a broad range of specialised knowledge and skills in varied contexts to undertake skilled work within a train driving environment.

It may include skills and knowledge required for specialised tasks or functions in known or changing contexts with responsibility for own functions and outputs.

Job roles

This qualification is aligned to the following defined roles:

- electric passenger train driver
- freight train driver
- heavy haul train driver
- locomotive driver
- train driver.

No licensing legislative or certification requirements apply to this qualification at the time of publication.

© Commonwealth of Australia, 2025 Industry Skills Australia

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **21 units of competency** comprising:

12 core units listed below, **plus**

All units within one of the specialist elective unit groups (job roles) from Group A, Group B, Group C, Group D or Group E listed below, **plus**

4 elective units from Group F general elective units listed below or remaining units not selected from a specialist elective unit group.

Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIB3075	Inspect and prepare a motive power unit
TLIB3118	Apply awareness of railway fundamentals
TLIB4080	Identify, diagnose and rectify minor faults on motive power units and rolling stock
TLIC2078	Identify and respond to signals and trackside signs
TLIC4023	Operate train with due consideration of route conditions
TLIC4026	Operate and monitor a motive power unit
TLIE2007	Use communications systems
TLIF0004	Work effectively in a train-driving environment
TLIF1001	Follow work health and safety procedures
TLIF2010	Apply fatigue management strategies
TLIF3058	Apply safeworking rules and regulations to rail functions
TLIF4110	Respond to abnormal situations and emergencies when driving a train

Specialist elective units

© Commonwealth of Australia, 2025 Industry Skills Australia

Group A: Freight

TLIB3019	Test train braking system
TLIB3026	Prepare for train operation
TLIB4078	Carry out a train roll-by inspection
TLIC3027	Stable a motive power unit
TLIC4019	Drive train to operational requirements

Group B: Urban Electric

TLIB3105	Prepare electric passenger train
TLIB3108	Test operation of electric passenger train braking system
TLIC3046	Drive and operate electric passenger train
TLIC3047	Stable electric passenger train
TLIC3048	Shunt, couple and uncouple electric passenger trains

Group C: Country Passenger

TLIB3019	Test train braking system
TLIB3026	Prepare for train operation
TLIB4078	Carry out a train roll-by inspection
TLIC3027	Stable a motive power unit
TLIC4019	Drive a train to operational requirements

Group D: Steam Locomotive

TLIB3124	Apply awareness of steam locomotive fundamentals
TLIB4077	Inspect and prepare a heritage steam locomotive
TLIC3030	Operate and monitor a heritage steam locomotive
TLIC3031	Stable a heritage steam locomotive
TLIC4019	Drive train to operational requirements

Group E: Heritage Motive Power

TLIB3123	Apply awareness of motive power unit fundamentals

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIB4076	Inspect and prepare a heritage motive power unit
TLIC3028	Operate and monitor a heritage motive power unit
TLIC3029	Stable a heritage motive power unit
TLIC4019	Drive train to operational requirements

Group F: General elective units

HLTAID003	Provide first aid
SITXCOM005	Manage conflict
TLIB0007	Respond and rectify rail traffic autonomous operations
TLIB3018	Conduct full train examination
TLIB3027	Set up and shut down on-train remote control system
TLIB4079	Conduct a general train examination
TLIB4081	Provision a motive power unit
TLIB4082	Set up motive power units in multi-coupled consist
TLIC0005	Close down rail traffic from autonomous operation
TLIC0006	Set up rail traffic for autonomous operation
TLIC3018	Operate on-train remote control system
TLIC3082	Operate a locomotive by portable remote control
TLIC4071	Establish and operate train braking system
TLIC4072	Operate and monitor a motive power unit on a main line
TLIC4073	Set up, operate and shut down a distributed power system
TLIC4074	Shunt, couple and uncouple rail vehicles
TLID1001	Shift materials safely using manual handling methods
TLIE0002	Process workplace documentation
TLIE1003	Participate in basic workplace communication
TLIE3021	Work and communicate effectively with others
TLIF0008	Apply safety critical communications in the rail environment

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIF0015	Recognise the impact of human capabilities/limitations on human performance in a rail environment
TLIF2018	Operate firefighting equipment
TLIF2080	Safely access the rail corridor
TLIF2097	Use audible track warning devices
TLIF3091	Apply awareness of dangerous goods and hazardous materials requirements
TLIG1001	Work effectively with others
TLIG2007	Work in a socially diverse environment
TLII3022	Provide customer service in rail operations
TLIL2048	Prepare for train departure
TLIL4009	Manage personal work priorities and professional development
TLIL4083	Assist with train operations
TLIU4011	Apply environmental procedures to rail operations
TLIW2037	Clip and secure points
TLIW3026	Operate stand alone signalling/point control equipment

Qualification Mapping Information

This qualification replaces and is equivalent to TLI42613 Certificate IV in Train Driving.

TLI42715 Certificate IV in Tram/Light Rail Control

Modification History

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following unit has been added to the general elective units:

- TLIF0008 Apply safety critical communications in the rail environment.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package

Qualification Description

This is a qualification for a person engaged in the control of tram/light rail networks.

This qualification requires a broad range of skilled applications within the rail control environment. It also requires the skills and knowledge to evaluate and analyse current practices, to develop new criteria and procedures, and to provide some leadership and guidance to others in their work

Job roles

- Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:
- Light Rail Controller
- Tram Controller.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **12 units of competency** comprising:

8 core units listed below **plus**

4 general elective units from the general elective units listed below. Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIE3022	Complete workplace documents
TLIE4033	Use communications systems to control tram/light rail operations
TLIF2010	Apply fatigue management strategies
TLIF3087	Follow work health and safety, and environmental procedures in the rail industry
TLIF4109	Communicate effectively to coordinate incident response procedures
TLIG1001	Work effectively with others
TLIL4084	Control daily tram/light rail operations
TLIL4085	Coordinate tram/light rail traffic movement

General elective units

BSBWOR201	Manage personal stress in the workplace
BSBWOR301	Organise personal work priorities and development
BSBWRT301	Write simple documents
TLIB3118	Apply awareness of railway fundamentals
TLIF0008	Apply safety critical communications in the rail environment
TLIF3091	Apply awareness of dangerous goods and hazardous materials requirements
TLIG2007	Work in a socially diverse environment
TLII4022	Identify and meet customer requirements
TLIJ2001	Apply quality procedures
TLIL4034	Arrange alternative passenger transport
TLIL4038	Organise marshalling and shunting operations
TLIL4050	Allocate rolling stock

Qualification Mapping Information

This qualification replaces and is equivalent to TLI42713 Certificate IV in Tram/Light Rail Control.

TLI50119 Diploma of International Freight Forwarding

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in advanced international freight forwarding job roles within the transport and logistics industry.

Successful achievement of this qualification will require the self-directed application of knowledge and skills, with substantial depth in some areas where judgement is required in planning and selecting appropriate equipment, services and techniques for self and others.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **12 units of competency** comprising:

10 core units listed below, **plus**

2 general elective units from the general elective units listed below.

Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units are complied with.

Core units

TLIA5059	Plan and organise the international forwarding of freight by sea and multimodal transport
TLIA5060	Plan and organise the international forwarding of freight by air transport
TLIA5061	Plan and organise the international forwarding of freight by road and rail transport

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIE5020	Apply knowledge of freight forwarding documentation and permits
TLIK2010	Use infotechnology devices in the workplace
TLIL5062	Apply knowledge of logistics, storage and distribution to international freight forwarding
TLIL5063	Review contracts, insurance, risk and liability in an international freight forwarding context
TLIL5064	Manage international special freight transport services including dangerous goods and special cargo
TLIO5020	Advise on and manage security and safety in international freight transport
TLIX0006	Apply and monitor biosecurity policies and procedures

General elective units

BSBCUS501	Manage quality customer service
BSBFIM501	Manage budgets and financial plans
BSBMGT502	Manage people performance
BSBMKG513	Promote products and services to international markets
PSPGEN059	Benchmark performance
TLIF0014	Monitor the safety of transport activities (Chain of Responsibility)
TLIM4004	Mentor individuals or small groups
TLIX0008	Comply with biosecurity border clearance
TLIX0011X	Establish blockchain in supply chains
TLIX0018X	Monitor compliance in digital supply chains

Qualification Mapping Information

This qualification replaces and is equivalent to TLI50316 Diploma of International Freight Forwarding.

TLI50219 Diploma of Logistics

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a general qualification for the integrated management of logistics.

Achievement of this qualification will require the self-directed application of knowledge and skills, with substantial depth in some areas where judgement is required in planning and selecting appropriate equipment, services and techniques for self and others.

Applications involve participation in the development of strategic initiatives as well as personal responsibility and autonomy in performing complex technical operations or organising others. It may include participation in teams, including those concerned with planning and evaluation functions. Group or team coordination may be involved.

Successful achievement of the licensing units within the qualification must align with applicable licensing and regulatory requirements.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- logistics manager.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **15 units of competency** comprising:

2 core units listed below, **plus**

7 technical elective units from Group A technical elective units listed below, **plus**

6 general elective units from Group B general elective units or remaining technical elective units listed be**low.**

Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of

© Commonwealth of Australia, 2025 Industry Skills Australia

the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIF0014	Monitor the safety of transport activities (Chain of Responsibility)
TLIL5020	Develop and maintain operational procedures for transport and logistics enterprises

Elective units

Group A: Technical elective units

BSBPRC504	Manage a supply chain
BSBWHS521	Ensure a safe workplace for a work area
TLIA5029	Plan and manage storage of dangerous goods and hazardous substances
TLIA5035	Manage international freight transfer
TLIA5058	Manage facility and inventory requirements
TLIF4064	Manage fatigue management policy and procedures
TLII5018	Manage customer service
TLIL5019	Implement and monitor transport logistics
TLIL5026	Manage export logistics
TLIL5057	Maintain, monitor and improve transport operations systems
TLIP5004	Develop a transport and logistics business plan
TLIP5006	Establish international distribution networks
TLIP5008	Manage a transport and logistics business unit
TLIP5011	Develop and evaluate strategies for transport and logistics enterprises
TLIR5006	Develop, implement and review purchasing strategies
TLIR5007	Manage international purchasing
TLIR5014	Manage suppliers
TLIU4001	Implement and monitor environmental protection policies and

© Commonwealth of Australia, 2025 Industry Skills Australia

	procedures
TLIU5006	Conduct environmental audits
TLIX4028	Apply knowledge of logistics
TLIX5036	Manage and monitor technical data and information systems
TLIX5040	Manage contracted support services

Group B: General elective units

BSBCOM501	Identify and interpret compliance requirements
BSBHRM405	Support the recruitment, selection and induction of staff
BSBINN502	Build and sustain an innovative work environment
BSBMGT502	Manage people performance
BSBMGT516	Facilitate continuous improvement
BSBMGT517	Manage operational plan
BSBPMG522	Undertake project work
BSBRSK501	Manage risk
BSBWOR502	Lead and manage team effectiveness
BSBWRK520	Manage employee relations
PSPGEN048	Support workplace coaching and mentoring
SITEEVT015	Develop event transport plans
TLIB5010	Plan and implement maintenance schedules
TLIF0006	Administer a fatigue risk management system
TLIF0007	Manage a fatigue risk management system
TLIF5017	Investigate rail safety incidents
TLIF5020	Manage emergencies
TLIJ5007	Conduct internal quality audits
TLIK5006	Evaluate software requirements and hardware enhancements
TLIL4009	Manage personal work priorities and professional development

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIM4004	Mentor individuals or small groups
TLIO5005	Plan and manage security procedures for the enterprise
TLIO5006	Plan and manage security procedures for transferring and transporting dangerous goods
TLIO5017	Manage security of storage facilities
TLIO5018	Manage compliance with customs excise
TLIP5007	Contribute to the development of a workplace learning environment
TLIP5025	Set and achieve budgets
TLIP5035	Manage budgets and financial plans
TLIP5036	Manage assets
TLIR4003	Negotiate a contract
TLIR5005	Manage a contract
TLIU0001	Develop workplace policy and procedures for environmental sustainability
TLIX0007X	Build digital supply chain capability in the workforce
TLIX0009X	Employ digital supply chain risk management practices
TLIX0011X	Establish blockchain in supply chains
TLIX0012X	Lead digital supply chain implementation
TLIX0014X	Manage customer focussed supply chain
TLIX0016X	Manage outsourced supply chain operations
TLIX0017X	Manage supply chain mass customisation
TLIX0018X	Monitor compliance in digital supply chains
TLIX0019X	Monitor digital supply chain services
TLIX0020X	Monitor ethical supply chain practices
TLIX0021X	Work with global supply chains

TLI50319 Diploma of Deployment Logistics

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for a person working in a deployment logistics management role.

Successful achievement of this qualification requires the self-directed application of knowledge and skills, with substantial depth in some areas where judgement is required in planning and selecting appropriate equipment, services and techniques for self and others.

Applications involve participating in developing strategic initiatives as well as personal responsibility and autonomy in performing complex technical operations or organising others. It may include participating in teams, including those concerned with planning and evaluation functions. Group or team coordination may be involved.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- logistics manager (deployed operations).

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **15 units of competency** comprising:

4 core units listed below, **plus**

5 specialist elective units from the **specialist elective units** listed below, **plus**

6 general elective units from the general elective units listed below or the remaining specialist elective units.

Up to **4 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units are

complied with.

Core units

BSBRSK401	Identify risk and apply risk management processes
BSBWOR502	Lead and manage team effectiveness
PSPGEN054	Use complex workplace communication strategies
TLIX4028	Apply knowledge of logistics

Specialist elective units

BSBFIM501	Manage budgets and financial plans
BSBPRC504	Manage a supply chain
PSPPM504A	Carry out complex project activities
PSPPCM001	Carry out basic procurement
PUAOPE001B	Supervise response
TLIL4059	Implement asset management systems
TLIL5020	Develop and maintain operational procedures for transport and logistics enterprises
TLIL5057	Maintain, monitor and improve transport operations systems
TLIO5005	Plan and manage security procedures for the enterprise
TLIP5036	Manage assets
TLIR5014	Manage suppliers
TLIX4032	Apply a knowledge of technical regulatory framework
TLIX5006	Manage verification and validation
TLIX5015	Establish supply chains
TLIX5020	Develop and review configuration management plans
TLIX5021	Manage configuration management processes
TLIX5025	Provide specialist configuration management advice
TLIX5036	Manage and monitor technical data and information systems

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIX5037	Plan logistics support for deployed operations
TLIX5038	Organise the deployment and delivery of logistics support
TLIX5039	Plan and conduct road convoy
TLIX5040	Manage contracted support services
TLIX5041	Organise supply support on deployment
TLIX5042	Organise road transport operations
TLIX5043	Conduct maintenance on deployed operations
TLIX5044	Organise health support operations
TLIX5045	Manage and monitor catering on deployed operations

General elective units

BSBCOM501	Identify and interpret compliance requirements
BSBCUS501	Manage quality customer service
BSBINN502	Build and sustain an innovative work environment
BSBLDR511	Develop and use emotional intelligence
BSBMGT502	Manage people performance
BSBMGT516	Facilitate continuous improvement
BSBMGT517	Manage operational plan
BSBWHS521	Ensure a safe workplace for a work area
BSBPMG522	Undertake project work
BSBSUS501	Develop workplace policy and procedures for sustainability
BSBWOR501	Manage personal work priorities and professional development
BSBWOR502	Lead and manage team effectiveness
PSPGEN045	Coordinate resource allocation and usage
PSPGEN048	Support workplace coaching and mentoring
PSPGEN053	Provide leadership
PSPGEN055	Refine complex workplace documents

© Commonwealth of Australia, 2025 Industry Skills Australia

PSPGEN057	Develop and use political nous
PSPGEN060	Manage performance
PSPGEN065	Interpret data and related statistics
PSPMGT001	Manage resources
PSPMGT013	Provide strategic direction
PSPPCY004	Support policy implementation
PSPPCM002	Dispose of assets
PSPPCM004	Plan procurement
PSPPCM005	Develop and distribute requests for offers
PSPPCM006	Select providers and develop contracts
PSPPCM007	Manage contracts
PSPPCM008	Manage contract performance
PSPPCM009	Finalise contracts
PSPPCM011	Plan to manage a contract
PUACOM007	Liaise with other organisations
SITEEVT015	Develop event transport plans
SITXFSA001	Use hygienic practices for food safety
SITXFSA002	Participate in safe food handling practices
TLIA0008	Coordinate stocktakes
TLIA4005	Check and evaluate records and documentation
TLIA4028	Assess and monitor optimum stock levels
TLIA5058	Manage facility and inventory requirements
TLIB2001	Check and assess operational capabilities of equipment
TLIE4006	Collect, analyse and present workplace data and information
TLIF3063	Administer the implementation of fatigue management strategies
TLIG4006	Facilitate work teams

© Commonwealth of Australia, 2025 Industry Skills Australia

TLII5018	Manage customer service
TLIL4005	Apply conflict/grievance resolution strategies
TLIL4033	Promote effective workplace practice
TLIU4001	Implement and monitor environmental protection policies and procedures
TLIX4029	Apply knowledge of integrated logistics support
TLIX4030	Apply knowledge of materiel sustainment
TLIX4031	Apply knowledge of configuration management

TLI50419 Diploma of Materiel Logistics

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those working in materiel sustainment and integrated logistics management roles.

Successful achievement of this qualification requires the self-directed application of knowledge and skills, with substantial depth in some areas where judgement is required in planning and selecting appropriate equipment, services and techniques for self and others.

Applications involve participating in developing strategic initiatives as well as personal responsibility and autonomy in performing complex technical operations or organising others. It may include participating in teams, including those concerned with planning and evaluation functions. Group or team coordination may also be involved.

This qualification has been designed for people in integrated logistics support management or sustainment management roles. These people will have a breadth of responsibility across a range of functional areas and will generally be responsible for a team.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- integrated logistics support manager
- materiel sustainment manager.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **16 units of competency** comprising:

4 core units listed below, **plus**

5 specialist elective units from one of the specialist elective unit groups**,** either Group A or Group B, listed below, **plus**

© Commonwealth of Australia, 2025 Industry Skills Australia

4 logistics elective units from the **logistics elective units** listed below or the remaining specialist elective units from the Group chosen (either A or B), **plus**

3 general elective units from the general elective units listed below.

Up to **3 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units are complied with.

Core units

BSBRSK401	Identify risk and apply risk management processes
PSPGEN054	Use complex workplace communication strategies
PSPGEN055	Refine complex workplace documents
TLIX4028	Apply knowledge of logistics

Specialist elective units

Group A: Integrated Logistics Support

TLIX4030	Apply knowledge of materiel sustainment
TLIX4031	Apply knowledge of configuration management
TLIX4032	Apply knowledge of technical regulatory framework
TLIX5003	Develop and review integrated logistics support plans
TLIX5004	Develop integrated logistics support processes and procedures
TLIX5005	Manage integrated logistics support operations
TLIX5010	Provide specialist integrated logistics support advice

Group B: Materiel Sustainment

TLIX4029	Apply knowledge of integrated logistics support
TLIX4031	Apply knowledge of configuration management
TLIX4032	Apply knowledge of technical regulatory framework
TLIX5012	Develop and review materiel sustainment plans
TLIX5013	Develop materiel sustainment processes and procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIX5014	Manage materiel sustainment operations
TLIX5019	Provide specialist materiel sustainment advice

Logistics elective units

BSBFIM501	Manage budgets and financial plans
BSBPRC504	Manage a supply chain
PSPPM504A	Carry out complex project activities
TLIL4059	Implement asset management systems
TLIP5036	Manage assets
TLIR5014	Manage suppliers
TLIX5006	Manage verification and validation
TLIX5015	Establish supply chains
TLIX5020	Develop and review configuration management plans
TLIX5021	Manage configuration management processes
TLIX5025	Provide specialist configuration management advice
TLIX5036	Manage and monitor technical data and information systems

General elective units

BSBCOM501	Identify and interpret compliance requirements
BSBCUS501	Manage quality customer service
BSBINM501	Manage an information or knowledge management system
BSBMGT502	Manage people performance
BSBMGT516	Facilitate continuous improvement
BSBWHS521	Ensure a safe workplace for a work area
BSBPMG512	Manage project time
BSBPMG514	Manage project cost
BSBPMG515	Manage project human resources
BSBPMG516	Manage project information and communication

© Commonwealth of Australia, 2025 Industry Skills Australia

BSBPMG518	Manage project procurement
PSPGEN046	Undertake research and analysis
PSPGEN053	Provide leadership
PSPGEN059	Benchmark performance
PSPGEN065	Interpret data and related statistics
PSPPCM005	Develop and distribute requests for offers
PSPPCM006	Select providers and develop contracts
PSPPCM007	Manage contracts
PSPPCM008	Manage contract performance
PSPPCM009	Finalise contracts
PSPPCM011	Plan to manage a contract
TLIU4001	Implement and monitor environmental protection policies and procedures

TLI50618 Diploma of Rail Operations Management

Modification History

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following general elective units have been added:

- TLIF0009 Ensure the safety of transport activities (Chain of Responsibility)
- TLIF0013 Manage the impact of human capabilities/limitations on human performance in a rail environment.

Release 1. This is a new release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for a person engaged in the management of rail operations. This qualification requires the self-directed application of knowledge and skills, with substantial depth in some areas where judgement is required in planning and selecting appropriate equipment, services and techniques for self and others.

Application involves participation in developing strategic initiatives as well as personal responsibility and autonomy in performing or organising others to carry out complex technical operations. It may include participation in teams, including those concerned with planning and evaluation functions. Group or team coordination may be involved.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- network controller
- passenger services manager
- rail freight manager
- rail maintenance manager
- rail operations manager.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **14 units of competency** comprising:

© Commonwealth of Australia, 2025 Industry Skills Australia

8 core units listed below, **plus**

all units within one of the Group A to H specialist elective unit groups (job roles) listed below, **plus**

4 general elective units from Group I general elective units listed below or from the remaining units not already selected from a specialist elective group.

Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified in the unit are complied with.

Core units

AHCWHS501	Manage work health and safety processes
TLIE4032	Use internal communication systems for rail industry regulatory compliance
TLIF4104	Manage change in the rail safety environment
TLIF4107	Respond to notifiable rail safety occurrences
TLIF5021	Apply rail safeworking rules and procedures
TLIL5066	Apply rail resource management principles
TLIW5001	Apply rail communications systems
TLIW5002	Manage rail assets and interfaces

Specialist elective units

Group A: Rail Operations

TLIL5073	Manage train crewing and rostering
TLIW5004	Manage train planning

Group B: Yard Operations

TLIB2122	Apply awareness of fundamentals of rail operations in yards or sidings
TLIL5069	Manage a rail yard or terminal

Group C: Passenger Operations

TLIL5071	Manage rail passenger operations

© Commonwealth of Australia, 2025 Industry Skills Australia

TLI50716 Diploma of Bus and Coach Operations

Modification History

Release 3. This is the third release of this qualification in the TLI Transport and Logistics Training Package. The following general elective unit has been added:

- TLIF0014 Monitor the safety of transport activities (Chain of Responsibility).

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following modification has been made:

- Imported Elective units updated.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in bus and coach operations job roles within the transport and logistics industry.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- fleet manager
- operations manager
- passenger service delivery manager
- service delivery manager.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **12 units of competency** comprising:

2 core units listed below, **plus**

10 general elective units from the general elective units listed below.

© Commonwealth of Australia, 2025 Industry Skills Australia

Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

TLIL5057	Maintain, monitor and improve transport operations systems
TLIL5067	Develop a passenger transport plan

General elective units

BSBHRM405	Support the recruitment, selection and induction of staff
BSBMGT402	Implement operational plan
BSBMGT502	Manage people performance
BSBREL402	Build client relationships and business networks
BSBRSK501	Manage risk
BSBWHS521	Ensure a safe workplace for a work area
BSBWOR502	Lead and manage team effectiveness
BSBWRK411	Support employee and industrial relations procedures
SITXMPR004	Coordinate marketing activities
TAEDEL404	Mentor in the workplace
TAETAS501	Undertake organisational training needs analysis
TLIB5010	Plan and implement maintenance schedules
TLIE4013	Apply workplace statistics
TLIF0014	Monitor the safety of transport activities (Chain of Responsibility)
TLIF4064	Manage fatigue management policy and procedures
TLIF4086	Control and coordinate incident responses
TLII5018	Manage customer service
TLIL3003	Conduct induction process

© Commonwealth of Australia, 2025 Industry Skills Australia

TLIL4005	Apply conflict/grievance resolution strategies
TLIL4033	Promote effective workplace practice
TLIL4036	Develop rosters
TLIL5068	Implement a passenger transport plan
TLIO1002	Follow security procedures when working with passengers and personnel
TLIP5004	Develop a transport and logistics business plan
TLIP5035	Manage budgets and financial plans
TLIP5037	Develop workplace policy and procedures
TLIR5006	Develop, implement and review purchasing strategies
TLIR5014	Manage suppliers
TLIU4001	Implement and monitor environmental protection policies and procedures
TLIX5040	Manage contracted support services

Qualification Mapping Information

This qualification replaces and is equivalent to TLI50713 Diploma of Bus and Coach Operations.

TLI50816 Diploma of Customs Broking

Modification History

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following general elective units have been added:

- TLIF0014 Monitor the safety of transport activities (Chain of Responsibility)
- TLIX0006 Apply and monitor biosecurity policies and procedures.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for those engaged in customs broker job roles within the transport and logistics industry.

Successful achievement of this qualification will require the self-directed application of knowledge and skills, with substantial depth in some areas where judgement is required in planning and selecting appropriate equipment, services and techniques for self and others.

Job roles

The TLI50816 Diploma of Customs Broking qualification is aligned to the following defined role:

- customs broker.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total of **18 units of competency** comprising:

15 core units listed below, **plus**

3 general elective units from the general **elective units** listed below.

Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units

© Commonwealth of Australia, 2025 Industry Skills Australia

specified are complied with.

Core units

TLIX0001	Determine tariff classification of goods
TLIX0002	Initiate cargo border procedures
TLIX0003	Conduct advanced border clearance functions
TLIX0008	Comply with biosecurity border clearance
TLIX4036	Analyse, advise on and carry out integrated border clearance transactions
TLIX5046	Carry out standard customs clearance practices
TLIX5047	Determine customs value
TLIX5048	Determine import/export prohibitions/restrictions
TLIX5049	Determine indirect taxes
TLIX5050	Determine origin of goods and apply preference schemes or free trade agreements
TLIX5052	Determine complex customs value
TLIX5053	Determine tariff classification for complex goods
TLIX5055	Apply anti-dumping and countervailing measures
TLIX5056	Carry out additional customs clearance practices
TLIX5058	Review decisions of regulatory bodies

General elective units

BSBCUS501	Manage quality customer service
BSBFIM501	Manage budgets and financial plans
BSBMGT502	Manage people performance
BSBMGT517	Manage operational plan
TLIA5035	Manage international freight transfer
TLIF0014	Monitor the safety of transport activities (Chain of Responsibility)
TLIG3002	Lead a work team or group

© Commonwealth of Australia, 2025 Industry Skills Australia

TLII0001	Market international freight forwarding services
TLIL5063	Review contracts, insurance, risk and liability in an international freight forwarding context
TLIM4004	Mentor individuals or small groups
TLIO0003	Follow security procedures when working with goods and cargo
TLIP5025	Set and achieve budgets
TLIR4001	Monitor supplier performance
TLIR4002	Source goods/services and evaluate contractors
TLIR4003	Negotiate a contract
TLIX0006	Apply and monitor biosecurity policies and procedures

Qualification Mapping Information

This qualification replaces and is equivalent to TLI50813 Diploma of Customs Broking.

TLI60115 Advanced Diploma of Materiel Logistics

Modification History

Release 2. This is the second release of this qualification in the TLI Transport and Logistics Training Package. The following modification has been made:

- Imported units updated.

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Qualification Description

This is a qualification for a person who provides leadership and strategic direction in materiel sustainment and integrated management of logistics.

Successful achievement of this qualification requires the application of a significant range of fundamental principles and complex techniques across a wide and often unpredictable variety of contexts in relation to either varied or highly specific functions. Contribution to developing a broad plan, budget or strategy is involved and accountability and responsibility for self and others in achieving the outcomes is also involved. Significant judgement is required in planning, design, technical or leadership/guidance functions related to products, services, operations or procedures.

This qualification has been designed for systems managers or those in executive logistics management roles who manage multiple systems or fleets. These people generally have relatively broad materiel logistics coverage and manage logistics programs, program offices or directorates.

This qualification will suit people with a minimum of six years Defence Materiel Organisation (DMO)/Defence logistics experience.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Materiel Logistics Program Manager
- Materiel Logistics Senior Manager
- Materiel Logistics Executive Manager.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

© Commonwealth of Australia, 2025 Industry Skills Australia

Packaging Rules

A total of **14 units of competency** comprising:

6 core units listed below **plus**

2 logistics elective units from the logistics elective units listed below **plus**

6 general elective units from the general elective units listed below or the remaining logistics elective units. Up to **2 of the general elective units** may be selected from any relevant nationally endorsed Training Package or accredited course. The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units are complied with.

Core units

BSBMGT605	Provide leadership across the organisation
BSBRSK501	Manage risk
PSPGOV602B	Establish and maintain strategic networks
PSPGOV605A	Persuade and influence opinion
PSPGOV606A	Prepare high-level/sensitive written materials
PSPPOL603A	Manage policy implementation

Logistics elective units

PSPPCM023	Manage strategic contracts
TLIX5015	Establish supply chains
TLIX6001	Formulate material logistics strategies
OR	
TLIX6002	Contribute to material logistics strategies

General elective units

BSBCOM601	Research compliance requirements and issues
BSBFIM501	Manage budgets and financial plans
BSBMGT616	Develop and implement strategic plans
BSBMGT617	Develop and implement a business plan

© Commonwealth of Australia, 2025 Industry Skills Australia

BSBPMG512	Manage project time
BSBPMG604	Direct cost management of a project program
BSBPMG606	Direct human resources management of a project program
BSBPMG609	Direct procurement and contracting for a project program
PSPHR620A	Manage organisational development
PSPMGT001	Manage resources
PSPMGT009	Manage public sector financial resources
PSPMGT011	Develop partnering arrangements
PSPMNGT615A	Influence workforce effectiveness
PSPPM504A	Carry out complex project activities
PSPPCY009	Provide policy advice
PSPPCM009	Finalise contracts
PSPPCM011	Plan to manage a contract
PSPPCM019	Divest strategic assets
PSPPCM020	Plan for strategic procurement
PSPPCM021	Coordinate strategic procurement
PSPPCM022	Negotiate strategic procurement
PSPPCM025	Influence and define strategic procurement
PSPPCM026	Establish strategic procurement context
TLIU4001	Implement and monitor environmental protection policies and procedures

Qualification Mapping Information

This qualification replaces and is equivalent to TLI60110 Advanced Diploma of Materiel Logistics.

TLIA0003 Complete and check import/export documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to complete and check import and export documentation in accordance with the requirements of Customs and related legislation and workplace procedures.

It includes identifying procedures required for documenting import/export of goods, completing documentation to meet legislative and workplace requirements, checking documentation to ensure it meets legislative requirements and lodging documentation for processing.

Work is performed under some supervision generally within a team environment. Work is undertaken in a range of environments, including small to large worksites, in the Customs broking and freight forwarding industries.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify procedures required for	**1.1** Documents required for import/export of goods are identified

	documentation for import/export of goods		
		1.2	Required documents are sourced
		1.3	Content requirements for each section of the documentation are applied
		1.4	Timelines for completion of documents are identified and noted
		1.5	Requirements for permits and other documentation (such as quarantine) are identified and implications are noted
		1.6	Procedures for obtaining clearances are identified and followed in accordance with the requirements of Customs, related legislation and workplace procedures
		1.7	Letters of credit are identified and implications of each are noted
		1.8	Assistance is sought, as required, to identify necessary documents and to commence process of assessing or completing these documents
2	**Complete documentation to meet legislative and workplace requirements**	**2.1**	Content requirements for each section of the documentation are identified and applied in accordance with the requirements of Customs, related legislation and workplace procedures
		2.2	Workplace procedures for authorisations are followed
		2.3	Data entry for documents is completed
		2.4	Problems arising in completing required documents are identified and assistance is sought to resolve these in accordance with the requirements of Customs, related legislation and workplace procedures
		2.5	Actions are taken to meet deadlines
		2.6	Assistance is sought, as required, in completing required documents
3	**Check documentation to ensure it meets legislative requirements**	**3.1**	Documents are collated and checked before forwarding to supervisor, manager or more senior personnel for checking within designated timelines in accordance with the requirements of Customs, related legislation and workplace procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

	3.2	Declarations are checked to ensure they meet the requirements of Customs, related legislation and workplace procedures
	3.3	Letters of credit are checked to ensure they meet commercial, transport and overseas requirements
	3.4	Dangerous goods (DG) documentation is checked in accordance with the requirements of Customs, related legislation and workplace procedures
	3.5	Document revisions are finalised, rechecked and forwarded to supervisor, manager or more senior personnel prior to lodgement
4 Lodge documentation for processing	**4.1**	Documents are copied then forwarded to relevant personnel in accordance with the requirements of Customs, related legislation and workplace procedures
	4.2	Copies of documents are filed, stored and retained in accordance with the requirements of Customs, related legislation and workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIA2009 Complete and check import/export documentation.

Assessment Requirements for TLIA0003 Complete and check import/export documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating and working effectively with others when completing import and export documentation
- completing and checking documentation and records to meet relevant Customs legislation, related legislation and workplace procedures
- completing and/or assessing accuracy of import and export documentation
- identifying procedures required for documentation for import and export of goods
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- providing customer/client service
- reading, interpreting and following import and export instructions, procedures and labels
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using relevant communications, computing and office equipment when completing import and export documentation.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international standards, codes, conventions and regulations relevant to importing and exporting cargo and freight
- Customs Act and related legislation
- documentation requirements for importing and exporting cargo and freight
- focus of operation of work systems, equipment, management and site operating systems for completing import and export cargo and freight documentation
- problems that may occur when completing import and export documentation and appropriate action that can be taken to resolve these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines

© Commonwealth of Australia, 2025 Industry Skills Australia

- workplace procedures and policies for completing import and export documentation.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE)
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLIA0004 Complete receival and despatch documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to complete receival and despatch documentation in accordance with relevant regulations and workplace requirements as part of work activities within the transport and logistics industry.

It includes analysing orders to identify work requirements to fill order, following workplace order documentation processes, and finalising documentation in accordance with workplace procedures and any relevant regulatory requirements.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Analyse order to identify work requirements to fill order	**1.1** Order request documentation is interpreted

© Commonwealth of Australia, 2025 Industry Skills Australia

	1.2	Ordered goods are noted and workplace locations identified
	1.3	Workplace and goods information is used to organise documentation
	1.4	Required schedules for order movement are identified and communicated with relevant personnel
	1.5	Special aspects of order are identified and information on required documentation procedures and relevant regulatory requirements are identified, accessed and interpreted
2 Follow workplace order documentation processes	**2.1**	Workplace procedures for order receival and despatch documentation are identified
	2.2	Complete receival and despatch documentation in accordance with workplace procedures and regulatory requirements
3 Finalise documentation	**3.1**	Order is checked against schedule and order form
	3.2	Workplace records are completed and labels and appropriate documentation are attached in accordance with workplace procedures and regulatory requirements
	3.3	Special transportation requirements are identified and conveyed to appropriate personnel
	3.4	Required documentation for dangerous goods and hazardous materials is completed in accordance with regulatory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Assessment Requirements for TLIA0004 Complete receival and despatch documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- applying work health and safety (WHS)/occupational health and safety (OHS) procedures
- communicating effectively with others
- completing receival and despatch documentation
- estimating size, shape and special requirements of goods and loads
- identifying containers and goods coding markings and emergency information panels
- interpreting and following operational instructions, procedures and information
- monitoring work activities in terms of planned schedule
- selecting and using relevant systems.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- documentation requirements for receiving and despatching goods
- focus of operation of work systems, equipment, management and site operating systems for receiving and despatching goods
- housekeeping standards and procedures
- national and international standards, codes and regulations relevant to completing receival and despatch documentation including:
    - bond requirements
    - dangerous goods codes
    - legislative requirements
    - quarantine requirements
- receival and despatch documentation anticipated problems and appropriate actions for resolution
- requirements of loads with special conditions including:
    - controlled substances

© Commonwealth of Australia, 2025 Industry Skills Australia

    - dangerous goods
    - hazardous materials
    - security requirements
    - temperature-controlled goods
- site layout and obstacles
- specifications and standards for checking and inspecting received and despatched goods
- WHS/OHS and environmental protection procedures and guidelines
- workplace procedures and policies for completing receival and despatch documentation.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIA0005 Connect and disconnect reefer units

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to connect and disconnect (refrigerated) reefer units in accordance with workplace requirements as part of work activities in the stevedoring, transport, distribution and allied industries.

It includes connecting and disconnecting reefer units to/from power sources and identifying and reporting any faults and damage with reefer unit operation.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Connect reefer units to power sources	**1.1** Appropriate personal protective equipment (PPE) is selected and used in accordance with workplace procedures
	1.2 Hazards, including weather conditions, are identified,

© Commonwealth of Australia, 2025 Industry Skills Australia

		risks assessed and control measures implemented
	1.3	Reefer units are located and identified
	1.4	Reefer units are visually inspected, and faults and damage are identified and reported to relevant personnel in accordance with workplace procedures
	1.5	Reefer units are connected in accordance with workplace procedures
	1.6	Reefer units are checked to be running correctly after being connected in accordance with workplace procedures
2 Disconnect reefer units from power sources	**2.1**	Reefer units to be disconnected are identified, visually inspected, and faults and damage are reported to relevant personnel in accordance with workplace procedures
	2.2	Reefer units are disconnected and cables are stowed appropriate for transport in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIA2003 Connect and disconnect reefer units.

Assessment Requirements for TLIA0005 Connect and disconnect reefer units

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying workplace procedures
- connecting and disconnecting reefer units from power sources
- interpreting and following relevant instructions and procedures
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in reefer units in accordance with workplace procedures
- reporting faults and damage in accordance with workplace procedures
- using personal protective equipment (PPE) in accordance with workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- problems that may occur when connecting and disconnecting reefer units and appropriate action that can be taken
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental workplace procedures
- site layout and location of reefer units
- workplace procedures for connecting and disconnecting reefer units.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so;

© Commonwealth of Australia, 2025 Industry Skills Australia

where this is not appropriate, assessment on connecting and disconnecting reefer units must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant materials, tools, equipment, power source, reefer unit and PPE
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLIA0006 Coordinate goods to bond premises

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to coordinate goods to bond premises in accordance with licensed warehouse/facilities, regulatory and workplace requirements, as part of work activities in the transport and logistics industry.

It includes identifying and listing goods for bonding, arranging the transfer of goods under bond to a licensed facility, and preparing and issuing bond lists.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify and list cargo requiring bonded movement	**1.1** Goods are identified for bonding when not cleared for release by customs or quarantine regulatory requirements
	1.2 Types of cargo for under bond movements are identified

© Commonwealth of Australia, 2025 Industry Skills Australia

		1.3	Appropriate licensed warehouse/facilities are identified for storage of uncleared cargo
		1.4	Facility licensing requirements are identified for storage of bonded cargo in accordance with regulatory requirements and workplace procedures
2	**Arrange transfer of goods to bond facility**	**2.1**	Arrangements for the transfer of goods to bond facility are made in accordance with regulatory requirements and workplace procedures
		2.2	Carrier and bond facility is notified of storage or yard location, marks and quantity and provided with relevant documentation in accordance with regulatory requirements and workplace procedures
3	**Prepare and issue bonded movement**	**3.1**	Bonded movements are prepared in accordance with workplace procedures, relevant national legislation and regulatory requirements
		3.2	Bonded movements, endorsed with the relevant information, is issued to carrier or bond facility in accordance with regulatory requirements and workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIA3010 Coordinate goods to bond premises.

Assessment Requirements for TLIA0006 Coordinate goods to bond premises

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- identifying facility licensing requirements for storing bonded cargo
- interpreting and following operational instructions, procedures and information
- notifying carrier or bond facility of storage or yard location, marks and quantity
- preparing bonded movements
- selecting and using relevant systems
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- national and international codes and Customs and Border Protection regulations relevant to coordinating goods to bond premises, including warehouse licence, customs and quarantine regulations
- operational work systems, equipment, management and site operating systems for coordinating goods to bond premises
- workplace procedures and policies for coordinating goods to bond premises.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the

TLIA0007 Coordinate stevedoring clerical functions

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to coordinate stevedoring clerical functions in accordance with relevant standards, regulations and workplace requirements, as part of work activities in the stevedoring, transport, distribution and/or allied industries.

It includes monitoring clerical functions, solving operational problems, arranging container/cargo inspection/survey, preparing for the next shift, and completing and handing over the shift.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Stevedore sector.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Monitor clerical functions	**1.1** Duties and the relationship of the duties to organisational procedures are outlined and explained in accordance with workplace procedures
	1.2 Clerical work is monitored to ensure it meets workplace

© Commonwealth of Australia, 2025 Industry Skills Australia

			requirements
2	**Solve operational problems**	**2.1**	Potential and actual problem/s are identified and/or anticipated
		2.2	Information and evidence surrounding the problem are collected and analysed
		2.3	Options are identified, evaluated and optimal solution is selected
		2.4	Chosen solution is implemented in accordance with workplace procedures
		2.5	Effectiveness of the solution is evaluated against workplace requirements to resolve the problem
3	**Arrange container/cargo inspection/survey**	**3.1**	Arrangements are made to allow access to identified containers/cargo by authorised personnel
		3.2	Records of allowed access are completed in accordance with workplace procedures
4	**Prepare for next shift**	**4.1**	Personnel requirements for next shift are determined to ensure safe and efficient operations
		4.2	Container/cargo movements in the yard are checked and recorded to ensure incoming shift has up-to-date information on work status and container/cargo location

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIA4063 Coordinate stevedoring clerical functions.

Assessment Requirements for TLIA0007 Coordinate stevedoring clerical functions

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others when coordinating clerical functions at a container or cargo terminal or wharf
- completing documentation related to work activities
- dealing with internal and external customers in small, medium or large workplaces
- identifying, selecting and using relevant equipment, processes and procedures
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- operating electronic communications equipment to required protocol when coordinating clerical functions at a container or cargo terminal or wharf
- reading and interpreting relevant instructions, procedures and labels
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- working collaboratively with others when coordinating clerical functions at a container or cargo terminal or wharf
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international standards, codes and regulations relevant to operating terminals or wharves, including the Australian Dangerous Goods (ADG) Code and International Maritime Dangerous Goods (IMDG) Code
- cargo marking and numbering systems
- focus of operation of work systems, equipment, management and site operating systems

© Commonwealth of Australia, 2025 Industry Skills Australia

relevant to coordinating clerical functions at a container or cargo terminal or wharf
- problems that may occur when coordinating clerical functions at a container or cargo terminal or wharf and appropriate actions that can be taken to resolve these problems
- relevant approved storage facilities, quarantine or other legislative requirements
- relevant handling and safety codes
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- site layout of container or cargo terminal or wharf
- types of cargo, including goods with specialist requirements, temperature-controlled goods and dangerous goods (DG)
- workplace procedures and policies for coordinating clerical functions at a container or cargo terminal or wharf.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions, including limited or restricted spaces, exposed conditions and controlled or open environments.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE)
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLIA0008 Coordinate stocktakes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to coordinate stocktakes in accordance with relevant regulations and workplace requirements within the transport and logistics industry.

It includes planning and coordinating stocktake activities, identifying stock discrepancies and adjusting documentation.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Plan stocktake	**1.1** Goods to be counted and appropriate inventory systems are identified
	1.2 Required resources for conducting a stocktake are identified

© Commonwealth of Australia, 2025 Industry Skills Australia

		1.3	Team members are assisted and instructions communicated
		1.4	Team members are allocated tasks and zones and directions for work requirements are communicated
		1.5	Stocktake sequence and operations are planned and scheduled in a time effective manner
2	**Coordinate stocktake**	**2.1**	Stocktaking and cyclical counts are coordinated in accordance with workplace procedures
		2.2	Inventory data is interpreted and confirmed to match stock
		2.3	Stock levels are accurately counted and documented
3	**Identify stock discrepancies**	**3.1**	Discrepancies in type, number and quality of stock are accurately recorded and documented
		3.2	Reasons for discrepancies are identified and control measures are implemented
		3.3	Inventory stored in inappropriate storage locations are relocated and stock records are adjusted in accordance with workplace procedures
4	**Adjust documentation**	**4.1**	Inventory information is reconciled to match warehouse stock in accordance with regulations, audit requirements and workplace procedures
		4.2	Workplace documentation is completed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

© Commonwealth of Australia, 2025 Industry Skills Australia

Unit Mapping Information

This unit replaces and is equivalent to TLIA3023 Coordinate stocktakes.

- communicating and working with others
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities against planned schedule
- operating and adapting to differences in stock and equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures and labels
- selecting and using relevant communication and office equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for conducting stocktakes
- principles and functions of stocktakes
- records and documentation requirements for coordinating stocktakes
- relevant codes and regulations for coordinating stocktakes
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- resources including:
  - appropriate personnel
  - equipment
  - record keeping systems
- site layout including allocated work zones
- stocktake coordination problems and appropriate solutions
- workplace procedures and policies for coordinating stocktakes
- workplace processes for records management and producing stocktake reports.

TLIA0009 Coordinate terminal/wharf equipment operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to coordinate terminal/wharf equipment operations in accordance with workplace requirements.

It includes identifying, assessing and managing potential risks; monitoring work performance and progress; monitoring the status of pending work; solving problems and making decisions; completing all shift requirements; and preparing for the next shift.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Stevedore sector.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Coordinate equipment, machinery and personnel	**1.1** Equipment, machinery and personnel are coordinated to facilitate the safe and efficient loading and unloading of ship and terminal yard in accordance with operational plan
	1.2 Liaison is maintained with supervisors to ensure

© Commonwealth of Australia, 2025 Industry Skills Australia

			availability of adequate resources
2	**Identify, assess and remove potential risks**	**2.1**	Potential risks are identified and assessed, and appropriate solutions are developed and applied in accordance with workplace procedures and in consultation with supervisors
		2.2	Potential risks to safe and efficient operations are removed from work area or other arrangements are made to ensure conditions for safe work
		2.3	Supervisors are advised of potential risks or emergency situations and liaison is maintained until risk has been removed or emergency situation has been alleviated
3	**Monitor work performance and progress**	**3.1**	Work performance and progress is monitored through an appropriate terminal management system to ensure work is performed in accordance with established guidelines and procedures, and that safe work practices are maintained
		3.2	Methods and procedures of work are monitored and refined in consultation with supervisors and operational personnel
		3.3	Work performance rates are monitored through an appropriate terminal management system and delays are minimised to ensure work program objectives are met
		3.4	Work practices are monitored to ensure compliance with national standards and safety codes
		3.5	Environmental conditions are monitored to ensure safe working conditions are maintained
		3.6	Operational delays, equipment or maintenance issues are monitored and reported to supervisor in accordance with workplace operational procedures and processes
4	**Monitor status of pending work**	**4.1**	Status of pending work is monitored, in order of priority, in accordance with needs of ship and terminal/wharf
		4.2	Issues that will impact on work performance and progress are identified, and plans are amended, or workflows are altered to ensure efficiency is maintained throughout operation

© Commonwealth of Australia, 2025 Industry Skills Australia

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIA3055 Coordinate terminal/wharf equipment operations.

Assessment Requirements for TLIA0009 Coordinate terminal/wharf equipment operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- estimating size, shape and special requirements of loads
- identifying and correctly using relevant equipment
- identifying cargo, container and goods, coding, Australian Dangerous Goods (ADG) Code/International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels
- implementing contingency plans
- maintaining container terminal tracking operations systems efficiently and effectively
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in equipment in accordance with operating procedures
- reading, interpreting and following relevant instructions, procedures, information and signs
- receiving, acknowledging and sending messages with appropriate communications equipment
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using appropriate personal protective equipment (PPE) in accordance with workplace procedures
- working collaboratively with others.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international standards, codes and regulations relevant to operating terminals/wharves including the ADG Code and the IMDG Code

© Commonwealth of Australia, 2025 Industry Skills Australia

- cargo marking and numbering systems
- emergency response procedures and policies for terminal/wharf operations
- operational work systems, equipment, management and site operating systems for organising and monitoring terminal/wharf operations
- problems that may occur and appropriate actions that can be taken to resolve these problems
- relevant approved storage facilities, quarantine or other legislative requirements
- relevant handling and safety codes
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- site layout of container or cargo terminal or wharf
- workplace procedures and policies for organising and monitoring terminal/wharf operations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions including controlled or open environments, exposed conditions and limited or restricted spaces.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant materials, tools, equipment and personal protective equipment (PPE)
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLIA0010 Identify goods and store to specifications

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to identify goods and store to specifications in accordance with relevant regulations and workplace requirements, as part of work operations in the transport and logistics industry.

It includes identifying and categorising goods, matching goods to locations based on specified criteria and assisting individuals to solve stock identification and location problems.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify and categorise goods	**1.1** Goods are identified and categorised in accordance with specifications and workplace procedures
	1.2 Equipment is selected and used safely according to workplace procedures and regulatory requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

2	**Match goods to locations based on specified criteria**	**2.1**	Locations for goods are determined based on workplace procedures
		2.2	Labels, goods systems and other information sources are used to assist in identifying goods, and handling and storage requirements
3	**Assist individuals to solve stock identification and location problems**	**3.1**	New stock items are identified and communicated with relevant personnel
		3.2	Stock queries are predicted and team members are assisted to locate stock information relevant to these goods
		3.3	Personnel are assisted with routine and non-routine stock enquiries and actions are taken to update goods information
		3.4	Personnel are encouraged to build knowledge of items
4	**Identify appropriate transfer and handling requirements**	**4.1**	Resources used to transfer different goods through storage zones are identified and evaluated
		4.2	Work in receival and despatch areas is supported by identifying and reporting variances
		4.3	Relevant documentation is completed in accordance with workplace procedures
5	**Contribute to continuous improvement**	**5.1**	Customer requirements are used to determine work design
		5.2	Problems are identified, control measures determined and notified to appropriate personnel
		5.3	Improvements to work methods are identified and notified to appropriate personnel

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Industry Skills Australia

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIA3017 Identify products and store to specifications.

Assessment Requirements for TLIA0010 Identify goods and store to specifications

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing, reading and interpreting relevant goods information, policies and regulatory requirements
- applying relevant work health and safety (WHS)/occupational health and safety (OHS) requirements, legislation and workplace procedures
- communicating and working with relevant persons
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in goods and services in accordance with operating procedures
- reporting and rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant systems
- using inventory information to determine, plan and organise processes used for receival, storage, goods movement, despatch, stock levels and re-ordering processes
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- categories or groups of goods including:
  - key characteristics
  - hazard potential
  - special handling, stacking and storage requirements
- codes of practice and regulations relevant to workplace activities
- documentation requirements including reports and records concerning damaged or contaminated goods
- goods sources, destinations and potential problems

© Commonwealth of Australia, 2025 Industry Skills Australia

- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems
- re-ordering procedures and just-in-time planning principles
- requirements for workplace documentation, inventory systems and records
- site layout and obstacles
- sources of goods information including:
  - policies and procedures
  - product knowledge
- types of equipment and storage areas appropriate for different types of goods including:
  - dangerous goods
  - fragile
  - hazardous
  - perishable
  - sensitive items.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIA0011 Implement and monitor stevedoring regulations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to implement and monitor stevedoring regulations in accordance with relevant Australian and international stevedoring regulations, codes of practice and workplace requirements as part of work activities in the stevedoring and/or allied industries.

It includes accessing appropriate information on relevant regulations and codes, interpreting regulations and codes relevant to workplace activities, implementing and monitoring compliance with identified regulations and codes, and completing all required documentation in accordance with regulatory and workplace requirements.

Work is performed under limited supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Stevedore sector.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Access information on relevant regulations and	**1.1** Australian and international regulations and codes of practice relevant to workplace stevedoring operations

© Commonwealth of Australia, 2025 Industry Skills Australia

	codes		are identified in accordance with workplace procedures and in consultation with relevant personnel
		1.2	Information on identified regulatory and/or code requirements relevant to workplace functions and limits of responsibility are accessed in accordance with workplace procedures
2	**Interpret relevant regulations and codes**	**2.1**	Information on identified regulatory and/or code requirements relevant to workplace functions and limits of responsibility is examined and interpreted in terms of its impact and implications for workplace activities
		2.2	Compliance requirements are clarified and obligations under regulations falling within limits of responsibility and duty of care of various staff/team members are confirmed in accordance with workplace procedures
		2.3	Staff/team members/team leaders/supervisors are made aware of the identified regulatory/code requirements as they relate to workplace roles and responsibilities
3	**Implement and monitor compliance with regulations and codes**	**3.1**	Regulatory requirements relevant to workplace activities are implemented in accordance with relevant regulations/codes and workplace procedures
		3.2	Appropriate information, training and/or instruction are organised to ensure personnel are aware of compliance requirements
		3.3	Procedures for monitoring compliance with operations in terms of regulatory requirements and workplace policies and procedures are followed
		3.4	Problems that may lead to non-compliance are promptly and fully identified
		3.5	Timely remedial action is taken to ensure continuity in workplace compliance with relevant regulations
		3.6	Failure to comply with regulatory requirements and workplace policy is identified and action is taken in accordance with workplace policies and procedures
4	**Complete required documentation**	**4.1**	Advice/reports on compliance issues are provided to relevant personnel and authorities in accordance with workplace procedures and relevant regulatory requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

4.2 Documentation, records, reports and other information required within regulatory requirements are completed, proofread and processed in accordance with the regulations and workplace procedures

4.3 Documentation is kept secure in accordance with workplace procedures and policy

4.4 Workplace information systems procedures are followed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIA4040 Implement and monitor stevedoring regulations.

Assessment Requirements for TLIA0011 Implement and monitor stevedoring regulations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating and negotiating effectively with others
- coordinating compliance activities in the workplace
- dealing with internal or external customers in large, medium or small workplaces
- following processes for monitoring compliance with regulatory requirements
- modifying activities depending on operational contingencies, risk situations and environments
- reading and interpreting relevant regulatory requirements, instructions, procedures and labels
- reporting and/or rectifying identified breaches of stevedoring regulations promptly in accordance with regulatory requirements and workplace procedures
- reporting on compliance related issues
- resolving everyday conflict situations
- selecting and using appropriate personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working collaboratively with others when implementing and monitoring stevedoring regulations
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational work systems, equipment, management and site operating systems for stevedoring operations
- problems that may occur when implementing and monitoring compliance with stevedoring regulatory requirements and appropriate actions that can be taken to resolve these problems
- relevant Australian and international regulations and codes of practice
- relevant customs, approved storage facilities, quarantine and other legislative requirements, including International Maritime Dangerous Goods (IMDG) Codes and Marine Orders

© Commonwealth of Australia, 2025 Industry Skills Australia

- relevant WHS/OHS and environmental protection procedures and guidelines
- roles and responsibilities of various workplace personnel in terms of workplace activities and regulatory requirements
- site layout of container or cargo terminal or wharf
- workplace/standard operating procedures (SOPs) and policies for implementing and monitoring compliance with stevedoring regulatory requirements.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions where implementing and monitoring stevedoring regulations can be demonstrated.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant and appropriate materials, tools, equipment and PPE
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLIA0012 Lash and unlash cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to lash and unlash cargos in compliance with relevant regulations and workplace requirements in the stevedoring, transport, distribution and logistics industries.

It includes preparing to lash and unlash cargo, implementing the cargo lashing plan, and completing lashing and unlashing operations.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Stevedore sector.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare to lash and unlash cargo	**1.1** Work area and safety zones are prepared and maintained in accordance with national standards, safety codes and workplace procedures
	1.2 Work area hazards are identified and corrective action is

© Commonwealth of Australia, 2025 Industry Skills Australia

		taken prior to commencing lashing and unlashing operations
	1.3	Relevant information and documentation are identified and accessed
	1.4	Appropriate personal protective equipment (PPE), lashing equipment and fittings are selected and used
	1.5	Work cage and/or working at height (WAH) requirements are identified and appropriate WAH equipment is selected
	1.6	Cargo is identified using markings and labels
	1.7	Cargo is sorted and stacked in correct location in accordance with national standards, safety codes and workplace procedures
	1.8	Cargos is stowed in accordance with stowage plan and reefer containers are identified, connected and disconnected in accordance with ship procedures, national standards and safety codes
	1.9	Damaged cargo is identified, reported and dealt with in accordance with workplace procedures
	1.10	Potential unsafe work practices and/or equipment are reported to appropriate personnel
2 Implement cargo lashing and unlashing procedures	**2.1**	Cargo or container lashing and unlashing plan is accessed and read, and potential issues are clarified with supervisor
	2.2	Work area is constantly monitored for hazards and risk control measures are implemented
	2.3	Safety procedures and safety zones are implemented when working with mobile equipment and cranes in accordance with national standards, safety codes and workplace procedures
	2.4	Work is conducted in accordance with industry standards, statutory requirements, safety codes, workplace procedures and cargo requirements
	2.5	Working at heights is completed in accordance with codes of practice and workplace procedures
	2.6	Effective communication method is used in accordance

© Commonwealth of Australia, 2025 Industry Skills Australia

		with workplace procedures
	2.7	Cargo are lashed and unlashed in accordance with workplace procedures and cargo are lashed and unlashed in accordance with lashing and unlashing plan
	2.8	Correct manual handling techniques are used when lashing and unlashing cargo
	2.9	Identified problems, faults and malfunctions are promptly reported and/or rectified in accordance with regulatory requirements and workplace procedures
	2.10	Contingency plans are implemented as required
3 Complete cargo lashing and unlashing operations	**3.1**	Cargo are covered and uncovered safely ensuring appropriate covering and lashing, no injury to persons in work area or damage to cargo, container and equipment
	3.2	Safety equipment, radios, lashing equipment and tools are inspected and returned to designated storage areas
	3.3	Relevant documentation is completed and filed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIA2050 Lash and unlash cargo and containers.

Assessment Requirements for TLIA0012 Lash and unlash cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- being aware of own ability and limits to rectify irregularities or faults
- communicating effectively with others
- fastening tensioners securely
- identifying and correctly using relevant equipment
- identifying cargo, containers and goods, Australian Dangerous Goods (ADG) Code and International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels
- identifying lashing points
- maintaining tight stow of cargo
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in cargo lashing and unlashing equipment in accordance with workplace procedures
- reading, interpreting and following relevant instructions, procedures, information and signs
- receiving, acknowledging and sending messages with available communications equipment
- releasing fittings, and disconnecting and removing them from cargo
- securing cargo to lashing points ensuring correct spread of lashings and that lashings are secured, attached and tensioned
- selecting and using required:
  - personal protective equipment (PPE) in accordance with workplace procedures
  - work cage and/or working at height (WAH) PPE in accordance with workplace procedures
- using appropriate fittings and lashing equipment for each lashing point
- working systematically with required attention to detail and without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of

© Commonwealth of Australia, 2025 Industry Skills Australia

the requirements of the elements and performance criteria and include knowledge of:

- cargo marking and numbering systems
- cargo, including:
  - break bulk
  - containers
  - liquids
  - machinery
  - out-of-gauge cargo
  - project cargo
  - steel products
  - vehicles
- operation of work systems, equipment, management and site operating systems for lashing and unlashing cargo
- problems that may occur and appropriate actions that can be taken to resolve them
- relevant Australian and international standards, codes of practice, legislation and regulations required to perform the job requirements relating to this unit
- relevant WHS/OHS and environmental procedures and regulations
- relevant workplace policies and procedures related to:
  - ADG Code
  - Australian and international explosives Codes
  - Biosecurity Act and regulations
  - IMDG Code
  - International Air Transport Association (IATA) Dangerous Goods Regulations (DGR)
  - Marine Orders.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where lashing and unlashing cargo can be demonstrated; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant materials, tools, power source, reefer unit and PPE
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLIA0013 Maintain container and freight records

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to maintain container and freight records in accordance with relevant regulations and workplace requirements as part of work activities within the transport and logistics industry.

It includes processing container and freight documentation; maintaining records of container and freight movements; monitoring container and freight, including refrigerated units; and maintaining records.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Process container and freight documentation	**1.1** Documentation is processed in accordance with workplace procedures and statutory authority requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

	1.2	Movements of containers and freight are recorded in accordance with workplace procedures and statutory authority requirements
	1.3	Information, labels, instructions and workplace procedures are read and interpreted
	1.4	Size, shape and special requirements of loads are estimated according to freight procedures
2 Maintain records of container and freight movements	**2.1**	Records are updated each time containers or freight are moved within the yard and communicated with relevant personnel
	2.2	Containers and freight are checked using markings to ensure correct identification when updating records
3 Monitor container and freight and maintain records	**3.1**	Containers and freight are monitored daily and specified information is recorded
	3.2	Problems with controlled systems on containers or freight are reported and forwarded to maintenance personnel
	3.3	Log cards on containers and freight with controlled systems are checked on completion of monitoring, and all unit or system breakdowns and/or faults are logged in breakdown log diary in accordance with workplace procedures
	3.4	Movement of containers and freight is monitored daily and information is recorded

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

© Commonwealth of Australia, 2025 Industry Skills Australia

Unit Mapping Information

This unit replaces and is equivalent to TLIA3002 Maintain container/cargo records.

Assessment Requirements for TLIA0013 Maintain container and freight records

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating with others
- estimating size, shape and special requirements of loads
- identifying goods by codes and markings, including:
  - dangerous goods
  - emergency information panels
  - international
  - national
- interpreting and following operational instructions, procedures and information
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- container controlled systems
- focus of operation of work systems, equipment, management and site operating systems for maintaining container and freight records
- freight marking and numbering systems
- national and international standards, codes of practice and regulations relevant to maintaining container and freight records, including dangerous goods' codes
- possible risks with maintaining container and freight records and appropriate control measures
- relevant bond, quarantine or other legislative requirements
- relevant handling and safety codes of practice
- relevant statutory authority requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

- workplace procedures and policies for maintaining container and freight records
- worksite layout and location of all container units.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIA0014 Organise and monitor terminal/wharf operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to organise and monitor terminal or wharf operations in accordance with standards, regulations and workplace requirements as part of work activities in the stevedoring, transport, distribution and/or allied industries.

It includes organising equipment, machinery and personnel; managing potential risks; monitoring work performance and progress; monitoring the status of pending work; solving problems and making decisions; completing all shift requirements and preparing for the next shift.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Stevedore sector.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Organise equipment, machinery and personnel	**1.1** Equipment, machinery and personnel are organised to facilitate the safe and efficient loading and unloading of the ship

© Commonwealth of Australia, 2025 Industry Skills Australia

		1.2	Liaison is maintained with supervisors to ensure availability of adequate resources
2	**Manage potential risks**	**2.1**	Potential hazards are identified, risks are assessed and appropriate controls are implemented in accordance with workplace procedures
		2.2	Potential risks to safe and efficient operations are removed from work area and/or other arrangements are made to ensure conditions for safe work
		2.3	Supervisors are advised of potential risks and liaison is maintained until risks have been removed
3	**Monitor work performance and progress**	**3.1**	Work performance and progress are monitored to ensure work is performed in accordance with established guidelines and procedures, and that safe work practices are maintained
		3.2	Work methods and procedures are monitored and refined in consultation with supervisors and operational personnel
		3.3	Work performance rates are monitored and delays are minimised to ensure work program objectives are met
		3.4	Work practices are monitored to ensure compliance with national standards and safety codes
		3.5	Environmental conditions are monitored to ensure safe working conditions are maintained
4	**Monitor status of pending work**	**4.1**	Pending work needs of the ship and the terminal or wharf are identified
		4.2	Work priorities are determined
		4.3	Status of pending work is monitored, in order of priority, taking into account the needs of the ship and the terminal or wharf

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Industry Skills Australia

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIA4006 Organise and monitor terminal/wharf operations.

Assessment Requirements for TLIA0014 Organise and monitor terminal/wharf operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required actions to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing documentation related to organising and monitoring terminal and wharf operations
- estimating size, shape and special requirements of loads
- identifying cargo, container and goods, coding, Australian Dangerous Goods (ADG) and International Maritime Dangerous Goods (IMDG) markings and emergency information panels
- identifying, selecting and using relevant equipment, processes and procedures
- implementing contingency plans
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and labels
- receiving, acknowledging and sending messages with appropriate communications equipment
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- selecting and using appropriate personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working collaboratively with others when organising and monitoring terminal and wharf operations
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

© Commonwealth of Australia, 2025 Industry Skills Australia

- Australian and international standards, codes and regulations relevant to operating terminals or wharves, including the ADG Code and IMDG Code
- cargo marking and numbering systems
- operational work systems, equipment, management and site operating systems for organising and monitoring terminal or wharf operations
- problems that may occur when organising and monitoring terminal or wharf operations and appropriate actions that can be taken to resolve these problems
- relevant approved storage facilities, quarantine or other legislative requirements
- relevant handling and safety codes
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout of container or cargo terminal or wharf
- workplace procedures and policies for organising and monitoring terminal or wharf operations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions, including limited or restricted spaces, exposed conditions and controlled or open environments.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant materials, tools, equipment and PPE
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLIA0015 Organise receival and despatch operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to organise receival and despatch operations in accordance with regulations, codes of practice and workplace requirements in the transport and logistics industry.

It includes planning and organising receival operations, storing received stock, despatching ordered stock and completing documentation and records.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Plan and organise receival and despatch operations	**1.1** Product characteristics and workplace procedures are applied to stock analysis
	1.2 Resources are identified to match product characteristics

© Commonwealth of Australia, 2025 Industry Skills Australia

	1.3	Timeframes are scheduled to enable receival or despatch of stock according to workplace procedures
	1.4	Work processes are planned to meet specified timeframes
2 Organise the storage and despatch of stock	**2.1**	Employees, equipment and storage areas are allocated and supervised
	2.2	Individuals are informed of work requirements and deadlines
	2.3	Work processes are monitored to ensure human resources and equipment are maintained at productive levels in accordance with workplace procedures and work health and safety (WHS)/occupational health and safety (OHS) requirements
	2.4	Discrepancies in stocks are noted and reported in accordance with workplace procedures
3 Complete documentation	**3.1**	Documentation and records regarding receival and despatch operations are confirmed
	3.2	Documentation and records are completed and proofread
	3.3	Documentation and records are processed in accordance with workplace procedures and relevant regulatory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces but is not equivalent to TLIA3018 Organise despatch operations and TLIA3019 Organise receival operations.

Assessment Requirements for TLIA0015 Organise receival and despatch operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying contingency plans in accordance with workplace procedures
- applying relevant legislation and workplace procedures
- communicating and working with others
- estimating size, shape and special requirements of goods and loads
- identifying relevant stock and goods coding and labelling
- monitoring work activities in terms of specified deadlines
- operating and selecting equipment in accordance with operating procedures
- reading, interpreting and following relevant instructions, procedures, labels, information and signs
- selecting and using relevant equipment and communications technology
- selecting and using required personal protective equipment (PPE) and conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- discrepancies and appropriate actions to resolve
- documentation and record requirements for receival and despatch operations
- equipment used for organising receival and despatch operations including safety precautions and procedures
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for organising receival and despatch operations
- regulations relevant for organising receival and despatch operations, or other legislative requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout and obstacles
- workplace procedures and policies for organising receival and despatch operations.

TLIA0016 Organise warehouse records operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to organise warehouse records operations in accordance with relevant regulations and workplace requirements in the transport and logistics industry.

It includes identifying record management databases, storage types and technologies, and using record management systems to store and retrieve information.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify record management databases, storage types and technologies	**1.1** Requirements for records operations are identified and defined

© Commonwealth of Australia, 2025 Industry Skills Australia

		1.2	Record systems that might meet workplace requirements are identified and reviewed
		1.3	Advantages and disadvantages of identified systems are evaluated and noted
		1.4	Record management systems are selected in accordance with workplace requirements
		1.5	Appropriate action is taken to establish the selected record system in accordance with workplace procedures and operational requirements
2	**Store warehouse records**	**2.1**	Warehouse records are collected and consolidated in accordance with workplace procedures
		2.2	Records are stored in accordance with system developer instructions and workplace procedures
		2.3	Records are maintained in accordance with workplace procedures
3	**Use record management systems to retrieve information**	**3.1**	Responses to requests for information are processed and communicated within specified timeframes
		3.2	Required records are accessed and retrieved in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIA3024 Organise warehouse records operations.

Assessment Requirements for TLIA0016 Organise warehouse records operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- collecting and consolidating warehouse records
- communicating with others
- completing relevant documentation
- identifying and following operational instructions, procedures and information
- responding to requests for information in a timely manner
- selecting and using relevant record management systems.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- national codes and regulations relevant for organising warehouse records operations
- operational records systems, equipment, management and site operating systems for organising warehouse records
- principles of operation and functions of warehouse management systems
- records and documentation requirements for organising warehouse records operations
- requirements for accessibility, security and confidentiality of records
- site layout
- workplace procedures and policies for organising warehouse records operations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so;

© Commonwealth of Australia, 2025 Industry Skills Australia

where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIA0017 Process receipt and delivery of containers and cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to process the receipt and delivery of containers and cargo in accordance with relevant regulations and workplace requirements as part of work activities within the transport and logistics industry.

It includes checking the stacking/discharge list at commencement of a shift, assessing and planning container/cargo consolidation, allocating stack positions, identifying and checking containers/cargo, and checking and completing required documentation.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Check stacking/ discharge list at shift commencement	**1.1** Yard or terminal stacking/discharge lists are checked against container/cargo documentation and operational order of work, taking into account both ship and shore operations

© Commonwealth of Australia, 2025 Industry Skills Australia

		1.2	Stacking discharge lists are continually updated to reflect correct location of containers and cargo
2	**Assess and plan container/cargo consolidation**	**2.1**	Yard or terminal plans are assessed and consolidation of container/cargo within the yard or terminal is planned as required
		2.2	Consolidation plans are prepared to ensure efficiency of operations and efficient use of available yard/terminal space
		2.3	Final yard/terminal positions are obtained from consolidation plans and are recorded
3	**Allocate stack positions**	**3.1**	Stack positions are allocated based on nature of container/cargo concerned and requirements of yard/terminal operations
		3.2	Stacking plan is communicated to relevant personnel in accordance with workplace procedures
4	**Identify and check containers/cargo**	**4.1**	Containers/cargo are identified and checked at point of entry to yard and prior to stacking
		4.2	Agreement between numbers and marks on container/cargo and shipping documentation is confirmed
		4.3	Cargo/containers are inspected and appropriate action is taken to report identified damage or defects in accordance with workplace procedures
		4.4	Stacking plans are followed and efficient movement within the yard is facilitated
		4.5	Documentation is checked prior to performing completion procedures in accordance with workplace procedures and regulatory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work

Assessment Requirements for TLIA0017 Process receipt and delivery of containers and cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant workplace procedures
- communicating effectively with others
- estimating size, shape and special requirements of loads
- identifying cargo, container and goods, coding, Australian Dangerous Goods (ADG) Code/International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels
- identifying, selecting and using relevant equipment, processes and procedures
- interpreting relevant instructions, procedures and labels
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in equipment in accordance with workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international standards, codes and regulations relevant to processing the receipt and delivery of containers and cargo, including current ADG Code
- cargo marking and numbering systems
- operational work systems, equipment, management and site operating systems for the receipt and delivery of containers and cargo
- problems that may occur when processing the receipt and delivery of containers and cargo, and appropriate action that can be taken to resolve these problems
- relevant approved storage facilities, quarantine or other legislative requirements
- relevant handling and safety codes
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- site layout, stacking plans and available stacking space
- workplace procedures and policies for processing the receipt and delivery of containers and cargo.

TLIA0018 Transfer cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to transfer cargo in accordance with relevant regulations and workplace requirements as part of work activities in the transport and logistics industry.

It includes preparing for cargo transfer, safe transfer of cargo using appropriate equipment, completing a transfer and completing all required documentation.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for cargo transfer	**1.1** Cargo characteristics are identified to determine special handling or transfer equipment requirements
	1.2 Hazards are identified, risks are assessed and control measures are implemented in accordance with

© Commonwealth of Australia, 2025 Industry Skills Australia

		workplace procedures
	1.3	Location of cargo in yard is confirmed and transfer method is determined
	1.4	Pathway for cargo transfer is established and communicated in accordance with workplace procedures
	1.5	Working area is prepared in accordance with workplace procedures
	1.6	Communication method is confirmed and equipment tested prior to transfer
	1.7	Transfer method and equipment are selected to suit the cargo in accordance with workplace procedures
	1.8	Selected transfer equipment is inspected before it is used in accordance with manufacturer specifications and workplace procedures
	1.9	Faulty or damaged transfer equipment is isolated, tagged and reported in accordance with workplace procedures
2 Transfer cargo	**2.1**	Cargo is secured using appropriate methods in accordance with workplace procedures
	2.2	Cargo is transferred safely in accordance with workplace procedures
	2.3	Communication is maintained effectively throughout the transfer
3 Complete cargo transfer	**3.1**	Cargo transfer is completed in accordance with workplace procedures
	3.2	Transfer equipment is inspected for defects and secured in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work

Assessment Requirements for TLIA0018 Transfer cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying workplace procedures
- communicating effectively with others
- completing relevant documentation
- conducting checks on transfer equipment
- estimating size, shape and special requirements of cargo
- following relevant instructions, procedures, information and signs
- identifying, selecting and using relevant equipment, processes and procedures
- monitoring performance of transfer equipment
- operating and adapting to differences in equipment in accordance with workplace procedures
- reporting hazards and faults in accordance with workplace procedures
- using personal protective equipment (PPE) in accordance with workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international standards, codes and regulations relevant to transferring cargo/freight, including the current Australian Dangerous Goods (ADG) Code
- cargo marking and numbering systems
- licensing requirements for transfer equipment
- relevant work health and safety (WHS)/occupational health and safety (OHS) workplace procedures
- reporting of identified hazards, faults or malfunctions in accordance with workplace procedures
- types of equipment used to transfer cargo, their applications, procedures and precautions for their use
- working load limit (WLL) of cargo transfer equipment
- workplace procedures and policies for handling and transferring cargo
- workplace procedures for using transfer equipment.

TLIB0004 Coordinate pooled equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to coordinate pooled equipment.

It includes implementing pooled equipment workplace policies and procedures when coordinating receival, despatch, issue and dehire. It also includes coordinating pooled equipment stocktake and completing pooled equipment records and data entry.

Work is performed with limited supervision within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

B – Equipment Checking and Maintenance

Unit Sector

Supply chain sector.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Implement pooled equipment workplace procedures	**1.1** Pooled equipment is identified and monitored in accordance with workplace procedures
	1.2 Hazards are identified, risks assessed and control measures implemented

© Commonwealth of Australia, 2025 Industry Skills Australia

	1.3	Movement of pooled equipment is undertaken in accordance with safe work practices
	1.4	Transport activities are monitored to ensure safe work practices
2 Coordinate receive, despatch, issue and dehire of pooled equipment	**2.1**	Receival, despatch, issue and dehire pooled equipment, including exchange on and exchange off is coordinated in accordance with workplace procedures
	2.2	Pooled equipment documentation is checked for quantity, type, date, receiver and order reference accuracy and any discrepancies reported as a non-conformance in accordance with workplace procedures
	2.3	Effective communication is undertaken with relevant persons
3 Coordinate pooled equipment stocktake	**3.1**	Pooled equipment to be counted and appropriate inventory systems are identified
	3.2	Required resources, including equipment and record keeping systems are identified
	3.3	Allocated tasks, zones and work requirements are identified
	3.4	Sequencing of work activities is planned in a time effective manner
	3.5	Pooled equipment stocktake or cyclical counts are undertaken in accordance with workplace policies and procedures
	3.6	Pooled equipment inventory data is interpreted
	3.7	Pooled equipment inventory data is confirmed to match stock
	3.8	Pooled equipment stock levels are accurately counted and documented
	3.9	Stocktake is scheduled in accordance with workplace procedure and equipment requirements
4 Complete pooled equipment records and	**4.1**	Pooled equipment records are updated in accordance with workplace procedure

© Commonwealth of Australia, 2025 Industry Skills Australia

data entry

4.2 Document flow is maintained to ensure accuracy

4.3 Record management storage and retrieval systems are maintained

4.4 Optimum inventory is maintained

4.5 Non-conformance reports are actioned in accordance with workplace procedures

4.6 Unprocessed transactions are followed up, negotiated and resolved with relevant parties

4.7 Invoice reconciliation is completed accurately and within required timeframes

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This is a new unit. No equivalent unit.

Assessment Requirements for TLIB0004 Coordinate pooled equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying pooled equipment policies, procedures and terms of conditions
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying security procedures for pooled equipment
- communicating effectively in accordance with workplace procedures
- completing and checking documentation for correct quantity, type, date, receiver and order reference
- completing relevant documentation
- identifying and counting pooled equipment, including pallet docket, consignment note or manifest
- maintaining marketplace rules or trading terms for pooled equipment transfer requirements
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring unprocessed transactions and undertaking appropriate actions in accordance with workplace procedures
- moving pooled equipment in accordance with safe work practice and workplace procedures
- operating pooled equipment inventory system and control system
- planning effective movement of pooled equipment, including opportunities to add value
- reconciling pooled equipment transactions using supplied record
- reporting pooled equipment key performance indicators (KPIs), including physical count, on hire balance and variances
- transferring pooled equipment in accordance with workplace procedures, including equipment exchange, IOU, rejected stock and equipment
- undertaking contingency procedures for missing records or damaged equipment
- undertaking pooled equipment inspection
- undertaking pooled equipment stocktake in accordance with workplace procedures
- undertaking quarantine of damaged pooled equipment
- undertaking receival, despatch, issue and dehire pooled equipment, including exchange on and exchange off
- updating records, including data entry or manual records, using relevant infotechnology.

© Commonwealth of Australia, 2025 Industry Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- booking processes
- claims management
- delegation of authority workplace policies and procedures
- marketplace rules or trading terms for pooled equipment transfer requirements
- pooled equipment management system
- pooled equipment terms, including exchange, issue, dehire, IOU, transfer off, in transit days, transfer on, Pallet Transfer Authority, delay days, missing docket forms and non-conformance
- rejection processes and procedures
- required records
- workplace inventory management system
- workplace policies and procedures, including terms of conditions for pooled equipment.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIB0006 Prepare and monitor automated operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to prepare and monitor automated equipment for automated operation.

It includes following relevant workplace procedures; and selecting, testing and monitoring of automated plant and equipment.

Work is performed under limited or minimum supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

B – Equipment Checking and Maintenance

Unit Sector

Stevedore

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for automated operation	**1.1** Hazards are identified; risks assessed and appropriate control measures are implemented
	1.2 Traffic flow, weather and work area conditions are assessed and appropriate actions taken in accordance with workplace procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

		1.3	Communication method is trialled and confirmed in accordance with workplace procedures
		1.4	Job task and equipment configurations are determined in accordance with workplace procedures
2	Select, inspect and prepare automated equipment for operation	**2.1**	Load characteristics are taken into account to ensure appropriate automated equipment is selected in accordance with workplace procedures and manufacturer specifications
		2.2	Automated equipment pre-operational checks are conducted in accordance with manufacturer specifications and workplace procedures
		2.3	All relevant automated equipment functions and safety checks are conducted and any faults reported in accordance with workplace procedures
3	Monitor automated equipment operation	**3.1**	Dangerous goods (DG) and hazardous materials are identified and handled in accordance with codes of practice and workplace procedures
		3.2	Location of load is confirmed and communicated in accordance with workplace procedures and load plan
		3.3	Relevant persons are advised of commencement of automated operation
		3.4	Continuous monitoring of automated equipment operation is undertaken in accordance with workplace procedures and manufacturer specifications

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Assessment Requirements for TLIB0006 Prepare and monitor automated operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- communicating in accordance with required protocols
- conducting automated equipment, safety and procedural checks
- following workplace procedures
- monitoring of automated equipment
- operating and adapting to differences in automated equipment in accordance with workplace procedures
- using required personal protective equipment (PPE) in accordance with workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- characteristics, capabilities and limitations of automated equipment in accordance with manufacturer specifications
- reporting of identified hazards, faults or malfunctions in accordance with workplace procedures
- risks and hazards when using automated equipment
- workplace procedures for using automated equipment.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so;

© Commonwealth of Australia, 2025 Industry Skills Australia

where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant materials, tools, automated equipment and personal protective equipment (PPE)
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLIB0007 Respond and rectify rail traffic autonomous operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to respond to and rectify rail traffic autonomous equipment for operation.

This includes identifying repair requirements, conducting minor repairs, checking and reporting minor repairs.

This unit defines rail traffic as a train.

Work must be carried out in accordance with organisational procedures and regulations, and safe working codes of practice relevant to fault diagnosis and rectification.

Work involves the application of routine minor fault diagnosis and rectification procedures when maintaining the safety and operation of an autonomous rail traffic and rolling stock across a variety of operational rail transport contexts.

People achieving competence in this unit will need to fulfil the applicable state/territory legislated rail safety requirements and to comply with relevant codes of practice and/or guidelines.

Pre-requisite Unit

Not applicable.

Competency Field

B - Equipment Checking and Maintenance

Unit Sector

Rail Sector.

outcomes.	demonstrate achievement of the element.
1 Identify autonomous rail **traffic systems faults, defects and deficiencies**	**1.1** Autonomous rail traffic location and possible fault cause are determined
	1.2 Hazards are identified, risks assessed and control measures implemented
	1.3 Operational capability of autonomous rail traffic equipment is evaluated
	1.4 Autonomous rail traffic and equipment are made safe for inspection
	1.5 Faulty or damaged components or equipment are identified, visually inspected and assessed
	1.6 Impact of faults on autonomous rail traffic is identified and safe operating capabilities are evaluated
2 Rectify autonomous rail **traffic systems minor faults**	**2.1** Minor repairs and/or isolations are carried out in accordance with manufacturer specifications and workplace procedures
	2.2 Equipment, tools and required materials are operated, applied and handled in accordance with work health and safety (WHS)/occupational health and safety (OHS) requirements and manufacturer specifications to prevent injury and damage
	2.3 Factors that impact on safe rail traffic operations are continuously monitored
	2.4 Situational awareness is applied through effective visual scans, use of communication systems, use of rail traffic information and use of systems of safeworking in accordance with workplace procedures
3 Check and report autonomous rail **traffic minor repairs, rectification or isolation**	**3.1** Minor repairs and/or isolations are checked for safety compliance
	3.2 Equipment is checked to ensure it conforms to manufacturer specifications and required standards
	3.3 Action taken is reported/recorded in accordance with workplace procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

3.4 Autonomous rail traffic systems capabilities are monitored and continually evaluated

3.5 Communication is maintained with relevant personnel and clarification is sought about anything that is not clear in relation to processes and procedures

3.6 Autonomous rail traffic is returned to operations in accordance with workplace procedures

3.7 Autonomous rail traffic is visually inspected on departure in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This is a new unit. No equivalent unit.

Assessment Requirements for TLIB0007 Respond and rectify rail traffic autonomous operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing the human machine interface and obtain information
- accessing the rail danger zone safely in accordance with network safety management system
- confirming it is safe to board the rail traffic
- following instructions to attempt fault rectification
- identifying the communication status of rail traffic
- making decisions based on evaluation of faults, defects, deficiencies and operational capabilities
- reading and interpreting relevant instructions, procedures, manufacturer's information and safety signs
- receiving notification to attend location of rail traffic
- setting external switches to disengage the autonomous systems
- unlocking and accessing rail traffic.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- emergency response procedures
- isolation systems
- operational requirement of autonomous rail traffic
- relevant autonomous rail traffic workplace procedures and manufacturer specifications
- relevant network safety management system
- relevant safety, work health and safety (WHS)/occupational health and safety (OHS) procedures and regulations
- tools and equipment required for the task and the procedures and precautions for their care, use and storage
- typical minor repair problems that can occur, and appropriate remedial action that should be taken
- workplace documentation and recording requirements.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment

Assessment must occur in rail workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate rail workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, autonomous equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIC0005 Close down rail traffic from autonomous operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to end the autonomous operation of rail traffic.

It includes identifying rail traffic operating autonomously, ending autonomous rail traffic mission, and monitoring and reporting autonomous rail traffic status.

This unit defines rail traffic as a train.

People achieving competence in this unit will need to fulfil the applicable state/territory legislated rail safety requirements and to comply with relevant codes of practice and/or guidelines.

Pre-requisite Unit

Not applicable.

Competency Field

C - Vehicle Operation

Unit Sector

Rail Sector.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Verify rail traffic that requires autonomous operation to be ended	**1.1** Rail traffic mission is identified

© Commonwealth of Australia, 2025 Industry Skills Australia

	1.2	Autonomous rail traffic location is verified
	1.3	Hazards are identified, risks assessed and control measures implemented
	1.4	Rail traffic is accessed in accordance with workplace procedures
2 Ending autonomous rail traffic mission	**2.1**	Autonomous rail traffic end of mission is determined
	2.2	Functions of equipment, component parts and accessories are identified
	2.3	Applications for autonomous activities of different infotechnology equipment and systems are interpreted
	2.4	Autonomous rail traffic system is disengaged and placed into passive state
	2.5	Safety critical communication is undertaken with network control officer or relevant person to validate autonomous rail traffic data in accordance with workplace procedures
	2.6	Situational awareness is applied through effective visual scans, use of communication systems, use of rail traffic information and use of system of safeworking in accordance with workplace procedures
	2.7	Routine faults in operating systems, software applications and operator errors are identified and reported in accordance with workplace procedures
	2.8	Rail traffic is secured
3 Monitor and report autonomous rail traffic operations	**3.1**	Status of rail traffic operation is communicated in accordance with workplace protocols
	3.2	Effective communication is maintained with relevant personnel
	3.3	Records are updated in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of

Assessment Requirements for TLIC0005 Close down rail traffic from autonomous operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing the danger zone safely in accordance with network safety management system
- accessing the human machine interface and stop the autonomous mission
- confirming it is safe to board the rail traffic
- disengaging the autonomous systems
- ensuring the rail traffic is secured, including three step protection and brakes applied
- setting the rail traffic to manned operations
- unlocking and accessing rail traffic.

Knowledge Evidence

- emergency response procedures
- isolation systems
- operational requirement of autonomous rail traffic, including rail traffic mission
- relevant autonomous rail traffic workplace procedures and manufacturer specifications
- relevant network safety management system
- relevant work health and safety (WHS)/occupational health and safety (OHS) procedures and regulations
- typical minor repair problems that can occur, and appropriate remedial action that should be taken
- workplace documentation and record requirements.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the

TLIC0006 Set up rail traffic for autonomous operation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to set up autonomous systems for rail traffic operation.

It includes identifying rail traffic for autonomous operation, setting up rail traffic for autonomous mission, and monitoring and reporting autonomous rail traffic operations.

This unit defines rail traffic as a train.

People achieving competence in this unit will need to fulfil the applicable state/territory legislated rail safety requirements and to comply with relevant codes of practice and/or guidelines.

Pre-requisite Unit

Not applicable.

Competency Field

C - Vehicle Operations.

Unit Sector

Rail Sector.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Verify **rail traffic for autonomous operation**	**1.1** Rail traffic location is determined
	1.2 Hazards are identified, risks assessed and control

© Commonwealth of Australia, 2025 Industry Skills Australia

		measures implemented
	1.3	Rail traffic is accessed in accordance with workplace procedures
	1.4	Rail traffic location is verified
2 Set up rail traffic for autonomous mission	**2.1**	Functions of equipment, component parts and accessories are identified
	2.2	Applications of autonomous activities of different infotechnology equipment and systems are interpreted
	2.3	Equipment is set up for autonomous operation in accordance with workplace procedures and manufacturer specifications
	2.4	Routine faults in operating systems, software applications and operator errors are identified and rectified in accordance with workplace procedures
	2.5	Autonomous systems are identified as working and active on the rail traffic
	2.6	Situational awareness is applied through effective visual scans, use of communication systems, use of rail traffic information and use of systems of safe working in accordance with workplace procedures
	2.7	Safety critical communication is undertaken with network control officer or relevant person to validate data
	2.8	Autonomous train operational capabilities are monitored and continually evaluated, including visual indicators that rail traffic is now autonomous
	2.9	Rail traffic is set to autonomous operations and driving cab is locked and secured for operation
3 Monitor and report autonomous traffic operations	**3.1**	Rail traffic readiness for mission is communicated in accordance with workplace protocols whilst standing in a safe place
	3.2	Lights and sound devices are confirmed active on the rail traffic as it departs
	3.3	Communication is maintained with relevant personnel and clarification is sought about anything that is not clear in relation to processes and procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

3.4 Autonomous rail traffic is visually inspected on departure in accordance with workplace procedures

3.5 Records are updated in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This is a new unit. No equivalent unit.

Assessment Requirements for TLIC0006 Set up rail traffic for autonomous operation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing the human machine interface onboard and enter the correct train data
- accessing the rail traffic safely
- acknowledging the communications within the rail traffic, including confirming screen is active and that all systems on the train have received the correct data and are ready for autonomous operation
- communicating the rail traffic is ready for departure or operations
- confirming departure and lights and sound devices are active on the rail traffic as it departs
- confirming visual indicators that rail traffic is now autonomous
- engaging in safety critical communication to validate data
- identifying the autonomous systems are working and active on the rail traffic
- leaving and locking the rail traffic
- moving to a safe place
- setting final rail traffic switches to autonomous operations
- setting the rail traffic to autonomous.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- emergency response procedures
- isolation systems
- operational requirement of autonomous rail traffic, including rail traffic mission and journey
- relevant autonomous rail traffic workplace procedures and manufacturer specifications
- relevant network safety management system
- relevant work health and safety (WHS)/occupational health and safety (OHS) procedures and regulations
- typical minor repair problems that can occur, and appropriate remedial action that should be taken
- workplace documentation and record requirements.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in rail workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate rail workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, autonomous equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLID0003 Control lift and movement of crane

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to control the lift and movement of a crane when the load is out of the crane operator's view in accordance with workplace principles, procedures and regulations.

It includes providing lift instructions to the crane operator using appropriate communication methods, monitoring the lift, and placing and securing a load.

Work must be carried out in compliance with the relevant state/territory authority licence/permit requirements and regulations for operating mobile cranes up to and including 20 tonnes.

Work is performed with limited or minimum supervision, and with limited accountability and responsibility for self and others in achieving prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Provide lift instructions	**1.1** Load movement is performed in accordance with planned hazard prevention and control measures in line

© Commonwealth of Australia, 2025 Industry Skills Australia

		with manufacturer specifications and workplace procedures
	1.2	Agreed communication and signal methods are used to safely coordinate load movement
	1.3	Clear, precise and concise verbal communication and signals are used
	1.4	All relevant parameters are taken into account in instructions to ensure a safe, stable and smooth lift
2 Monitor lift	**2.1**	Load is constantly monitored to ensure it remains stable
	2.2	Load conditions that may affect continuing stability are identified and monitored
	2.3	Temporary bracing and/or load support is maintained until continuing stability is ensured
	2.4	Unplanned situations are responded to in accordance with workplace procedures in a manner that minimises risk to personnel and equipment
	2.5	Site emergency workplace procedures are followed
3 Place and secure load	**3.1**	Appropriate materials for fixing and anchoring the load are checked and selected in line with manufacturer specifications
	3.2	Appropriate fixing methods are used to secure load in line with manufacturer specifications and guidelines
	3.3	Temporary securing is installed where hazards and weather conditions may vary during the load movement

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

© Commonwealth of Australia, 2025 Industry Skills Australia

Unit Mapping Information

This unit replaces and is equivalent to TLID3040 Control lift and movement of crane.

Links

Assessment Requirements for TLID0003 Control lift and movement of crane

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- identifying and correctly using relevant equipment
- interpreting and acting on communication signals, including:
  - hoist down - hand and whistle and 2-way radio
  - hoist up - hand and whistle and 2-way radio
  - luff boom down - hand and whistle and 2-way radio
  - luff boom up - hand and whistle and 2-way radio
  - slew left - hand and whistle and 2-way radio
  - slew right - hand and whistle and 2-way radio
  - stop - hand and whistle and 2-way radio
  - telescope in - hand and whistle and 2-way radio (where manufacturer requirements allow)
  - telescope out - hand and whistle and 2-way radio (where manufacturer requirements allow)
- interpreting relevant instructions, procedures, information, technical data, manuals and signs
- monitoring work activities in terms of planned schedule and modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in equipment in accordance with operating procedures
- operating electronic communications equipment to required protocol
- planning own work, predicting consequences and identifying improvements
- prioritising and multi-tasking work
- using personal protective equipment (PPE) in accordance with workplace

© Commonwealth of Australia, 2025 Industry Skills Australia

procedures

- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Industry Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- communication systems used during a lift
- communication signals, including:
  - stop - hand
  - stop - whistle
  - hoist up - hand
  - hoist up - whistle
  - hoist down - hand
  - hoist down - whistle
  - luff boom down - hand
  - luff boom down - whistle
  - luff boom up - hand
  - luff boom up - whistle
  - telescope out - hand
  - telescope out - whistle
  - telescope in - hand
  - telescope in - whistle
  - slew left - hand
  - slew left - whistle
  - slew right - hand
  - slew right – whistle
- mobile crane applications, capacities, configurations, safety hazards and control mechanisms
- operational work systems and equipment
- problems that may occur during a lift and associated actions that can be taken to address these problems
- relevant road rules, regulations, permit and licence requirements for mobile crane operations
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- risks and hazards involved in mobile crane operations and associated actions that can be taken to eliminate or minimise risks
- workplace procedures for controlling lifting and moving a mobile crane.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant materials, tools, equipment and PPE
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLID0004 Direct crane operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to direct crane operations in accordance with workplace and regulatory requirements as part of work activities in the stevedoring, transport, distribution and allied industries.

It includes checking work area, checking cargo, receiving and interpreting directions, anticipating cargo transfer sequence, directing crane operators and transferring loads in accordance with job requirements.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Stevedore sector.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for crane operations	**1.1** Work area is inspected for compliance with relevant safety codes, national standards, legislation and workplace procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

	1.2	Hazards are identified, risks are assessed and control measures implemented
	1.3	Unsafe work areas are reported to appropriate personnel in accordance with workplace procedures
	1.4	Communication method to be used is confirmed and tested
	1.5	Cargo is identified and checked to ensure safe to handle in accordance with workplace procedures and equipment limitations
	1.6	Unsafe, damaged or hazardous cargo is identified and reported to appropriate personnel
2 Direct crane operators and transfer cargo	**2.1**	Crane operator is directed to cargo location and cargo is transferred in accordance with lift plan and workplace procedures
	2.2	Directions to crane operator are confirmed to ensure any unclear instructions are clarified
	2.3	Contingency plan is identified and implemented, as required, in accordance with workplace procedures
	2.4	Crane operators are alerted to unsafe conditions, safety incidents and emergencies in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLID4009 Direct crane operations.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Requirements for TLID0004 Direct crane operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required actions to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others when directing crane operations
- completing relevant documentation
- dealing with internal and external customers in small, medium and large worksites
- estimating the size, shape and special requirements of loads
- identifying cargo, container and goods, coding, Australian Dangerous Goods (ADG) Code and International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels
- identifying, selecting and using relevant equipment, processes and procedures
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information, labels and signs
- receiving, acknowledging, sending messages and giving signals using required communications equipment and protocols while directing crane operations
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- selecting and using appropriate personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working collaboratively with others when directing crane operations
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

© Commonwealth of Australia, 2025 Industry Skills Australia

- Australian and international codes and regulations relevant to crane operations, including the ADG Code and IMDG Code
- cargo marking and numbering systems
- focus of operation of work systems, equipment, management and site operating systems for crane operations
- problems that may occur during crane operations and appropriate actions that can be taken to resolve these problems
- relevant approved landing area, quarantine or other legislative requirements
- relevant handling and safety codes
- relevant WHS/OHS and environmental protection procedures and guidelines required
- requirements for safe working load (SWL) and working load limit (WLL) of cranes
- types of cranes used to transfer loads at transport, rail or shipping terminals or wharves, their application and the regulations, procedures and precautions for their operation
- workplace procedures and policies for directing crane operations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions, including limited or restricted spaces, exposed conditions, controlled or open environments.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant and appropriate materials, tools, equipment and PPE
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals, including lift plan.

TLID0005 Monitor crane operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to monitor crane operations in accordance with workplace procedures and regulatory requirements as part of work activities in the stevedoring, transport, distribution and allied industries.

It includes monitoring work performance and progress, monitoring personnel working in operational areas, solving problems concerning crane operations and making decisions.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Stevedore sector.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Monitor work performance and progress	**1.1** Work is performed in accordance with workplace requirements and objectives to ensure safe work practices are maintained in accordance with statutory authority regulations, national and industry safety codes and workplace procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

	1.2	Crane operations and compliance with operational procedures are monitored regularly and refined in consultation with supervisor, crane drivers and other employees
	1.3	Work performance rates are maintained and delays are minimised to ensure work program objectives are met
	1.4	Safety in the work area is continually monitored during crane operations and required action is taken to identify hazards and to control risks
2 Monitor personnel working in operational area	**2.1**	Vigilance is maintained when personnel are working in the cranes operational area in accordance with statutory requirements, national standards and safety codes
	2.2	Personnel are checked out of operational area before securing operational area/storage location/ships hold after completing shift and when task is completed ensuring all personnel are safely out of the area/hold
	2.3	Personnel working in the operational area/storage location/ships hold are warned of any danger in accordance with workplace procedures and regulatory requirements
	2.4	Personnel working in the operational area/storage location/ships hold are alerted when required and emergency responses are initiated to provide assistance to personnel in hold
3 Solve problems and make decisions	**3.1**	Problems are solved and decisions are made to ensure optimum efficiency of operations in accordance with management and client objectives
	3.2	Employees are encouraged to contribute their opinions to facilitate effective decisions and resolution of problems

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work

Assessment Requirements for TLID0005 Monitor crane operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required actions to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others when monitoring crane operations
- completing relevant documentation
- dealing with internal and external customers in small, medium and large worksites
- estimating the size, shape and special requirements of loads
- identifying cargo, container and goods, coding, Australian Dangerous Goods (ADG) Code and International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels
- identifying, selecting and using relevant equipment, processes and procedures when monitoring crane operations
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures (SOPs)
- reading and interpreting relevant instructions, procedures, information, labels and signs
- receiving, acknowledging, sending messages and giving signals using required communications equipment and protocols
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working collaboratively with others when monitoring crane operations
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Industry Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international codes and regulations relevant to crane operations, including the ADG Code and IMDG Code
- cargo marking and numbering systems
- operational work systems, equipment, management and site operating systems for crane operations
- problems that may occur during crane operations and appropriate actions that can be taken to resolve these problems
- relevant approved storage facilities, quarantine or other legislative requirements
- relevant handling and safety codes
- relevant WHS/OHS and environmental protection procedures and guidelines
- requirements for safe working load limit (WLL) of cranes
- types of cargo, including goods with specialist requirements, temperature-controlled goods and dangerous goods (DG)
- types of cranes used to transfer loads at transport, rail or shipping terminals or wharves, their application and the regulations, procedures and precautions for their operation
- workplace procedures and policies for monitoring crane operations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions, including limited or restricted spaces, exposed conditions, controlled or open environments.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant and appropriate materials, tools, equipment and PPE
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLID0006 Move materials mechanically using automated equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to move materials mechanically using automated equipment.

It includes selecting appropriate automated mechanical moving equipment, moving materials in accordance with operational requirements, checking condition of materials and completing required records.

Work must be carried out in compliance with relevant work health and safety (WHS)/occupational health and safety (OHS) regulations related to automated mechanical equipment.

Work is performed under limited or minimum supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Industry Skills Australia

1	**Identify task and select automated equipment**	**1.1**	Automated equipment is selected in accordance with workplace procedures, manufacturer specifications and loads characteristics
		1.2	Pre-operational checks are completed and safe working load is determined in accordance with workplace procedures and manufacturer specifications
		1.3	Automated equipment faults are identified and appropriate action taken in accordance with workplace procedures
		1.4	Dangerous goods (DG) and hazardous materials are identified and handled in accordance with workplace procedures
2	**Move materials with automated equipment**	**2.1**	Planned route is determined and work area deemed safe
		2.2	Hazards are identified, risks are assessed and control measures are implemented
		2.3	Materials are moved using automated equipment in accordance with manufacturer specifications and workplace procedures
		2.4	Materials are monitored in accordance with workplace procedures
3	**Complete material move and records**	**3.1**	Materials are inspected in accordance with workplace procedures
		3.2	Records are updated in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

© Commonwealth of Australia, 2025 Industry Skills Australia

Unit Mapping Information

This unit replaces and is equivalent to TLID2013 Move materials mechanically using automated equipment.

Assessment Requirements for TLID0006 Move materials mechanically using automated equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying workplace procedures when using automated equipment
- following relevant instructions, workplace procedures and signs
- monitoring performance of automated equipment and taking action in accordance with workplace procedures
- reporting automated equipment faults in accordance with workplace procedures
- undertaking operational checks of automated equipment
- using personal protective equipment (PPE) according to workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- characteristics, capabilities and limitations of automated equipment
- hazards when using automated equipment and related risk control measures
- problems that may occur and appropriate actions that can be taken to resolve these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) procedures and regulations
- workplace policies and procedures for using automated equipment.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational

© Commonwealth of Australia, 2025 Industry Skills Australia

situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant materials, tools, automated equipment and PPE
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLID0007 Operate specialised load shifting equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate specialised load shifting equipment in accordance with codes of practice, permits, workplace requirements and relevant regulatory requirements as part of work undertaken in the stevedoring, transport, warehousing and logistics industries.

It includes planning work for current working conditions; using controls and equipment operating systems to manage moving the unit and accessory operations; locating load and identifying load characteristics; moving materials and loads; monitoring and operating controls; and stopping, parking and securing equipment after operation.

Safety checks and equipment tests are performed under limited supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare work for current working conditions	**1.1** Hazards are identified, risks assessed and control measures implemented

© Commonwealth of Australia, 2025 Industry Skills Australia

	1.2	Traffic flow and work area conditions are assessed and adjusted to ensure safe operation
	1.3	Load characteristics are taken into account to ensure appropriate attachments/gear are used to move load in accordance with lift plan
	1.4	Working load limit (WLL) is calculated
	1.5	Occurrences in work area that may impact on safety and efficiency of operations are reported to relevant personnel in accordance with workplace procedures
2 Operate specialised loading equipment	**2.1**	Equipment is inspected and configured in accordance with manufacturer specifications, prepared and appropriate attachments are fitted
	2.2	Gear and operational levers are checked to ensure they are in neutral position prior to inserting ignition key and starting engine
	2.3	Engine is started in accordance with manufacturer guidelines to bring engine up to speed
	2.4	Instruments and gauges are monitored to ensure operation is within manufacturer specifications and workplace procedures
	2.5	Engine power is managed to ensure efficiency of equipment movement and economy of equipment operations
	2.6	Equipment operations are conducted in accordance with manufacturer specified torque range
	2.7	Faults or damage to equipment are immediately reported to relevant personnel in accordance with workplace procedures
3 Locate load and identify load characteristics	**3.1**	Load is located and identified in accordance with workplace procedures
	3.2	Loading and unloading plans are followed to ensure efficiency and safety of operations
	3.3	Load characteristics are taken into account to ensure appropriate loading and unloading workplace procedures are followed

© Commonwealth of Australia, 2025 Industry Skills Australia

		3.4 Hazardous goods are identified and relevant procedures are taken into account when planning and conducting work
		3.5 Load characteristics, weight and dimensions are checked to ensure lifting capacity is not exceeded
4	**Move materials and loads**	**4.1** Equipment is manoeuvred and positioned using smooth and controlled movements
		4.2 Movements are made within equipment limits and in accordance with manufacturer specifications
		4.3 Materials are moved ensuring no injury to personnel or damage to equipment or goods
5	**Monitor and operate controls**	**5.1** Equipment controls are operated and monitored in accordance with manufacturer operating instructions
		5.2 Control systems are interpreted and acted on in accordance with manufacturer guidelines and workplace procedures
		5.3 Control faults are identified and reported in accordance with workplace procedures
6	**Shut down and secure equipment**	**6.1** Equipment is brought to a controlled halt in accordance with manufacturer guidelines
		6.2 Equipment is shut down without injury to personnel or damage to equipment, loads or facilities in accordance with company procedures
		6.3 Equipment is secured on a flat, even surface, clear of doorways, aisles, access ways or blind corners in accordance with securing procedures for appropriate equipment
		6.4 Problems, faults or malfunctions are reported and/or rectified in accordance with regulatory requirements and workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Industry Skills Australia

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLID2012 Operate specialised load shifting equipment.

Assessment Requirements for TLID0007 Operate specialised load shifting equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required actions to minimise, control or eliminate identified hazards
- applying relevant workplace procedures
- checking and replenishing fluids and carrying out lubrication processes during work activities
- communicating effectively with others
- completing relevant documentation
- implementing contingency plans
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- monitoring performance of specialised load shifting equipment and taking appropriate action as required
- operating and adapting to differences in equipment in accordance with operating procedures
- operating electronic communications equipment to required protocol
- planning own working, predicting consequences and identifying improvements
- reading, interpreting and following relevant instructions, procedures, information and signs
- selecting and using relevant gear and accessories
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- conveyed material potential for toxicity, reactiveness, material grade, type and purpose, including information from relevant safety data sheets (SDS)/material safety data sheets (MSDS) and current Australian Dangerous Goods (ADG) Code documentation
- documentation, record requirements and housekeeping standards, including:
  - relevant permit and licence requirements
  - site layout and obstacles

© Commonwealth of Australia, 2025 Industry Skills Australia

- operational safety requirements and precautions for specialised load shifting equipment concerned
- operational work systems, equipment, management and site operating systems for operating specialised load shifting equipment
- problems that may occur and appropriate actions that can be taken to resolve these problems
- purpose, characteristics, capabilities, requirements and limitations of specialised load shifting equipment
- relevant regulations for operating specialised load shifting equipment, including current ADG Code and relevant approved storage facilities, quarantine or other legislative requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- workplace procedures and policies for operating specialised load shifting equipment.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant materials, tools, equipment and PPE
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLID0008 Shift loads using bridge or gantry crane

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to shift loads using bridge or gantry crane in accordance with relevant regulations and workplace requirements as part of work activities in the transport and logistics industry.

It includes planning work for the prevailing working conditions, using controls and operating systems to manage the operation of equipment, and locating and identifying load characteristics. It also includes safely moving the load; monitoring controls and stopping, shutting down and securing equipment after the completion of operations.

Work is performed under some supervision generally within a team environment.

Where the load shifting equipment operated is considered to be high risk work, the operator must hold a high-risk work licence.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare work for the prevailing working	**1.1** Traffic flow, weather and work area conditions are constantly assessed and adjusted to allow for safe

© Commonwealth of Australia, 2025 Industry Skills Australia

	conditions		operations
		1.2	Hazards are identified, risks are assessed and control measures are implemented
		1.3	Load characteristics are taken into account to ensure appropriate attachments/gear are used to move the load in accordance with lift plan
		1.4	Occurrences in the work area that may affect the safety and efficiency of operations are reported to relevant personnel in accordance with workplace procedures
		1.5	Bridge or gantry crane and equipment are inspected and configured in accordance with manufacturer specifications, prepared and appropriate attachments fitted
		1.6	Crane pre-operational checks are conducted in accordance with manufacturer specifications and workplace procedures
2	**Operate bridge or gantry crane**	**2.1**	Bridge or gantry crane is started and operated in accordance with manufacturer specifications
		2.2	Instruments and gauges are monitored to ensure operation is within manufacturer specifications and workplace procedures
		2.3	Faults or damage to bridge or gantry equipment are immediately reported to relevant personnel in accordance with workplace procedures
3	**Locate load and identify load characteristics**	**3.1**	Load is located and identified
		3.2	Working load limit (WLL) of bridge or gantry crane and equipment are identified and communicated to relevant personnel
		3.3	Load characteristics, weight and dimensions are checked to ensure gantry lifting capacity is not exceeded
		3.4	Loading and unloading plans are followed to ensure efficiency and safety of operations
		3.5	Load and environmental conditions are assessed to ensure appropriate loading and unloading procedures are followed

© Commonwealth of Australia, 2025 Industry Skills Australia

		3.6	Hazardous cargo is identified and relevant procedures are taken into account when planning and conducting work
4	**Operate bridge or gantry crane to safely move load**	**4.1**	Bridge or gantry crane is operated and positioned using smooth and controlled movements
		4.2	Movements are within equipment limits and in line with manufacturer specifications
		4.3	Load is moved in accordance with workplace procedures and to ensure safe operation
		4.4	Communication is maintained with relevant personnel
		4.5	Bridge or gantry crane is immediately stopped, and workplace procedures are followed, in the event of an incident or emergency
		4.6	Bridge or gantry crane controls are operated and monitored in accordance with manufacturer specifications
		4.7	Bridge or gantry crane control faults are identified and reported in accordance with workplace procedures
5	**Shut down and secure crane**	**5.1**	Bridge or gantry crane is shut down in accordance with manufacturer specifications and workplace procedures
		5.2	Equipment is secured in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLID3043 Shift loads using gantry equipment.

Assessment Requirements for TLID0008 Shift loads using bridge or gantry crane

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and implementing risk control measures
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- estimating size, shape and special requirements of loads
- identifying cargo, container and goods, coding, Australian Dangerous Goods (ADG) Code and International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels
- identifying, selecting and using relevant equipment, processes and procedures
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- interpreting relevant instructions, procedures and signs
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring bridge or gantry crane and equipment performance
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with workplace procedures
- receiving, acknowledging and sending messages using appropriate communications equipment
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- using personal protective equipment (PPE) in accordance with workplace procedures
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of

© Commonwealth of Australia, 2025 Industry Skills Australia

the requirements of the elements and performance criteria and include knowledge of:

- Australian and international codes, regulations and licence/permit requirements relevant for using bridge or gantry crane and equipment to shift loads
- cargo marking and numbering systems
- high-risk work licence requirements for bridge and gantry crane and associated equipment
- operational work systems, equipment, management and site operating systems for using bridge or gantry equipment to shift loads
- problems that may occur and appropriate actions that can be taken to resolve these problems
- relevant approved storage facilities, quarantine or other legislative requirements
- relevant safety codes of practice and emergency response procedures
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- requirements for working load limit (WLL) of bridge or gantry crane and equipment
- types of bridge or gantry crane and equipment used to shift loads in terminals/wharves, their applications and procedures and precautions for their use
- workplace procedures and policies for using bridge or gantry crane and equipment to shift loads.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant materials, tools, equipment and PPE
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

Assessment Requirements for TLID0009 Shift loads using cranes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- estimating size, shape and special requirements of loads
- identifying cargo, container and goods, coding, Australian Dangerous Goods (ADG) Code and International Maritime Dangerous Goods (IMDG) Code markings and, where applicable, emergency information panels
- identifying, selecting and using relevant equipment, processes and procedures
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- monitoring performance of crane and its equipment and taking appropriate action as required
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reading, interpreting and following relevant instructions, procedures, information and signs
- receiving, acknowledging and sending messages using appropriate communications equipment
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- servicing equipment in terms of maintenance schedule and operating procedures
- using personal protective equipment (PPE) in accordance with workplace procedures
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international codes and regulations relevant for using cranes to shift loads, including the ADG Code and the IMDG Code

© Commonwealth of Australia, 2025 Industry Skills Australia

- operational work systems, equipment, management and site operating systems for using boom cranes to shift loads
- problems that may occur and appropriate actions that can be taken to resolve these problems
- relevant approved storage facilities, quarantine or other legislative requirements
- relevant safety codes and emergency procedures
- requirements for working load limit (WLL) of cranes
- types of boom cranes used to shift loads in terminals/wharves, their applications and procedures and precautions for their use
- workplace procedures and policies for using cranes to shift loads.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant materials, tools, equipment and PPE
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLID0010 Shift loads using ship mounted crane

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to shift loads using ship mounted crane in accordance with workplace procedures and regulatory requirements as part of work activities in the stevedoring, transport, distribution and allied industries.

It includes planning work for working condition, operating the ship mounted crane, locating load and identifying load characteristics, safely moving load, monitoring controls, and shutting down and securing crane after operations.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Stevedore sector.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare work for current working conditions	**1.1** Traffic flow and work area conditions in proximity of load landing area are assessed and adjusted to allow for safe operation

© Commonwealth of Australia, 2025 Industry Skills Australia

	1.2 Load characteristics are taken into account to ensure appropriate attachments/gear are used to move load in accordance with lift plan
	1.3 Hazards are identified, risks are assessed and control measures are implemented
	1.4 Occurrences in work area that may impact on safety and efficiency of operations are reported to relevant personnel in accordance with workplace procedures
	1.5 Ship mounted crane is inspected and configured in accordance with manufacturer specifications and Marine Orders
	1.6 Pre-operational checks are conducted in accordance with manufacturer specifications and workplace procedures
2 Operate the ship mounted crane	**2.1** Ship mounted crane is started and operated in accordance with manufacturer specifications and workplace procedures
	2.2 Communication is confirmed with relevant personnel
	2.3 Instruments and gauges are monitored to ensure operation is within manufacturer specifications and workplace procedures
	2.4 Crane functions are tested in accordance with workplace procedures
	2.5 Faults or damage to crane are immediately reported to relevant personnel in accordance with workplace procedures
3 Identify load characteristics	**3.1** Working load limit (WLL) of gantry equipment is identified and communicated to relevant personnel
	3.2 Load weight and dimensions are confirmed to ensure they are within ship mounted crane capacity
	3.3 Loading and unloading plans are followed to ensure efficiency and safety of operations
	3.4 Load and environmental conditions are assessed to ensure appropriate loading and unloading procedures are followed
	3.5 Hazardous cargo is identified and relevant procedures are taken into account when planning and conducting

© Commonwealth of Australia, 2025 Industry Skills Australia

		work
4	**Operate ship mounted crane to safely move load**	**4.1** Crane is operated using smooth and controlled movements and allowances are made for any vessel trim or list movements during load transfer
		4.2 Unexpected ship movement is communicated to relevant personnel in accordance with workplace procedures
		4.3 Simultaneous crane operations are planned and controlled appropriately in accordance with workplace procedures
		4.4 Communication is maintained with relevant personnel
		4.5 Work area conditions are constantly assessed to ensure crane movement areas are clear of personnel and other obstructions
		4.6 Crane is immediately stopped, and workplace procedures are followed, in the event of an incident or emergency
		4.7 Crane controls are monitored and operated in accordance with manufacturer specifications
		4.8 Ship mounted crane control faults are identified and reported in accordance with workplace procedures
5	**Shut down and secure equipment**	**5.1** Ship mounted crane is shut down in accordance with manufacturer specifications and workplace procedures
		5.2 Crane is secured after operations in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

© Commonwealth of Australia, 2025 Industry Skills Australia

Unit Mapping Information

This unit replaces and is equivalent to TLID3047 Shift loads using ship mounted crane.

Assessment Requirements for TLID0010 Shift loads using ship mounted crane

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation, Marine Orders and workplace procedures
- communicating effectively with others
- following operational instructions
- identifying and correctly using relevant equipment
- interpreting and following relevant instructions, procedures, information and signs
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of crane and its equipment, and taking appropriate action as required
- operating and adapting to differences in equipment in accordance with workplace procedures
- receiving, acknowledging and sending messages using communications methods
- reporting identified problems, faults or malfunctions in accordance with workplace procedures
- using personal protective equipment (PPE) in accordance with workplace procedures
- working collaboratively with others.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international codes and regulations relevant to using ship mounted cranes to shift loads, including Marine Orders
- problems that may occur and appropriate actions that can be taken
- relevant safety codes of practice and emergency response procedures
- relevant work health and safety (WHS)/occupational health and safety (OHS) procedures
- types of ship mounted cranes used to shift loads in terminals/wharves
- working load limit (WLL) of ship mounted cranes
- workplace procedures and policies for using ship mounted cranes to shift loads
- workplace procedures for simultaneous crane and heavy lift operations.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions, including controlled or open environments, exposed conditions and limited or restricted spaces.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant materials, tools, ship mounted crane, equipment and PPE
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLID0011 Use bulk transfer equipment (dry)

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to use bulk transfer equipment for dry products in accordance with relevant state/territory regulations.

It includes planning work, transferring product, monitoring and operating controls, and completing all operations, as required.

Work is performed under general supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Plan bulk product transfer work	**1.1** Hazards are identified, risks assessed and control measures implemented
	1.2 Dangerous or hazardous products requiring handling are identified in accordance with workplace procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

	1.3	Traffic flow and work area conditions are assessed to ensure safe operation
	1.4	Product characteristics are taken into account when selecting method, equipment and specialised attachments to transfer product
	1.5	Bulk transfer of dry products is planned, taking into account load requirements, transfer method, storage facility and transport mode, load weight, dimensions and equipment capacity
	1.6	Personal protective equipment (PPE), safety equipment, signage, barriers and precautions are identified
	1.7	Procedures to deal with spills, leakages and ruptures are identified
	1.8	Customer requests for variation to agreed operations are referred to relevant personnel
2 Transfer bulk product	**2.1**	Bulk transfer equipment is inspected and prepared in accordance with manufacturer specifications
	2.2	Dry product handling procedures are implemented in accordance with product guidelines and workplace procedures
	2.3	Instruments and gauges are monitored during bulk transfer to ensure operation is consistent with safety requirements, workplace procedures and manufacturer specifications
	2.4	Operation is monitored for safety and efficiency
	2.5	Faults or damage to equipment are identified and reported in accordance with workplace procedures
	2.6	Bulk transfer equipment controls are monitored and operated in accordance with manufacturer specifications and workplace procedures
3 Complete bulk transfer operations	**3.1**	Bulk transfer equipment is shut down in accordance with manufacturer specifications and workplace procedures
	3.2	Housekeeping of work area is undertaken in accordance with workplace procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

3.3 Bulk transfer equipment is cleaned and stored in accordance with workplace procedures

3.4 Documentation is completed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLID2021 Use specialised bulk transfer equipment (dry).

Assessment Requirements for TLID0011 Use bulk transfer equipment (dry)

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying workplace procedures
- communicating and working effectively with others
- estimating mass, volume and special requirements of dry bulk products
- identifying and using equipment required to transfer dry bulk product
- identifying goods coding, Australian Dangerous Goods (ADG) Code markings and emergency information panels
- interpreting and following relevant instructions, procedures and information
- monitoring equipment performance
- monitoring work activities
- operating and adapting to differences in specialised equipment in accordance with workplace procedures
- reporting faults and damage in accordance with workplace procedures
- selecting and using required personal protective equipment (PPE).

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- current ADG Code
- housekeeping standards and procedures
- relevant work health and safety (WHS)/occupational health and safety (OHS) procedures and guidelines for using bulk transfer equipment
- risks when transferring dry bulk product and related precautions to control the risk
- workplace procedures for the use of equipment to transfer dry bulk products.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training

TLIE0003 Consolidate manifest documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to consolidate manifest documentation in accordance with relevant codes of practice and regulations for freight carriage.

It includes identifying and processing documentation required in accordance with workplace procedures.

Work is performed under general supervision, and with duty of care responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify required manifest documentation	**1.1** Relevant documentation is collated and checked to ensure all appropriate information has been entered into record system
	1.2 Discrepancies are noted and reported in accordance with

© Commonwealth of Australia, 2025 Industry Skills Australia

		workplace procedures
	1.3	Relevant data is entered into record system in accordance with workplace procedures and statutory requirements
	1.4	Relevant clearances for moving goods and freight are checked and actions to rectify deficiencies followed in accordance with workplace procedures
2 Process manifest documentation	**2.1**	Record system is amended including appending of relevant data and information
	2.2	Tracking and monitoring processes are completed and documentation forwarded in accordance with workplace procedures and statutory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIE3012 Consolidate manifest documentation.

Assessment Requirements for TLIE0003 Consolidate manifest documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- implementing contingency plans
- interpreting and following operational instructions, procedures and information
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- reporting and/or rectifying identified deficiencies that may arise in accordance with regulatory requirements and workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational procedures for document control
- relevant codes of practice and legislative requirements including:
  - chain of responsibility
  - dangerous goods
  - relevant freight regulations
- relevant data including:
  - customs
  - hazardous or dangerous goods declarations
  - identification codes
  - manifest codes
- sources of information/documentation needed when consolidating manifests
- workplace procedures to be followed when consolidating manifests.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIE0004 Maintain freight records

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to maintain freight records in accordance with regulations and workplace requirements as part of work activities in the transport and logistics industry.

It includes recording all freight receipts and despatch documentation in a relevant system.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Record freight receipt	**1.1** Freight is identified and consignment details are confirmed
	1.2 Documentation is actioned in accordance with workplace procedures and legislative requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

	1.3	Dangerous goods are identified and documentation is prepared and attached, in accordance with workplace procedures and legislative requirements
	1.4	Freight information is recorded on workplace freight tracking system
	1.5	Freight is directed for loading or storage as indicated by documentation
2 Record freight despatch	**2.1**	Documentation for freight despatch is checked, verified and forwarded to relevant personnel in accordance with workplace procedures
	2.2	Loads not cleared due to incorrect documentation are reprocessed, in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIE3018 Maintain freight records.

Assessment Requirements for TLIE0004 Maintain freight records

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

- applying relevant legislation and workplace procedures
- directing freight for loading and storage
- identifying freight including dangerous goods, and preparing and attaching appropriate documentation
- interpreting and following operational instructions, procedures and information
- operating required systems equipment to required protocol
- preparing and actioning relevant documentation
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant systems ensuring records match.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- checks for avoiding problems that may occur and appropriate action that can be taken to resolve these problems
- documentation requirements for maintaining freight records including workplace freight tracking systems
- freight transport timetables, yard/terminal facilities and site layout
- operational work systems, equipment, management and site operating systems for maintaining freight records
- relevant national and international codes and regulations relevant for maintaining freight records, including dangerous goods codes and relevant bond, quarantine or other legislative requirements
- types of goods and related handling and documentation requirements including dangerous goods and hazardous substances
- workplace procedures and policies for maintaining freight records, including relevant international codes and regulation requirements.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIE0005 Undertake rigger/dogger and operators communications

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to enable effective communications between riggers or doggers and operator when lifting and moving loads.

It includes establishing an agreed communications system, trialling and configuring communications, and communicating effectively during a lift.

Work must be carried out in compliance with the licence/permit requirements and regulations of the relevant state/territory authorities pertaining to operations of up to and including 20 tonnes.

Work is performed with limited or minimum supervision, generally within a team environment.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Establish agreed communications system	**1.1** Communication methods conforming to Australian Standards and codes of practice are confirmed
	1.2 Hazards are identified, risks are assessed and control

© Commonwealth of Australia, 2025 Industry Skills Australia

			measures are implemented
2	**Trial and configure communications**	**2.1**	Communication method and equipment is trialled, adjusted and confirmed as required to ensure a safe and effective lift in accordance with workplace procedures
		2.2	Defective communication equipment is tagged, segregated and reported to relevant personnel for corrective action in accordance with workplace procedures
		2.3	Signals/communications are given both within sight and out of sight of crane operator
3	**Communicate effectively during a lift**	**3.1**	Communication methods and systems are used in accordance with workplace procedures
		3.2	Directions to crane operator are confirmed to ensure any unclear instructions are clarified
		3.3	Problems identified with communications are reported and immediate action is initiated in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIE3015 Undertake rigger/dogger and driver communication.

Links

Assessment Requirements for TLIE0005 Undertake rigger/dogger and operators communications

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others during a lift
- identifying and correctly using equipment, processes and procedures
- interpreting and following operational instructions
- interpreting relevant instructions, procedures, regulations, information and signals
- operating and adapting to differences in communications equipment and conditions in accordance with workplace procedures
- operating electronic communications equipment to required protocol
- reporting problems related to communication equipment in accordance with workplace procedures
- using personal protective equipment (PPE) in accordance with workplace procedures
- working collaboratively with others during a lift.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- communications systems used during a lift
- methods used to signal movement of the load during a lift
- problems that may occur when communicating during a lift and associated actions that can be taken to address these problems
- risks and hazards involved in crane operations and associated actions that can be taken to eliminate or minimise the risk
- workplace procedures concerning communication between a rigger or dogger and a crane operator before and during a lift.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant and appropriate materials, tools, communication equipment and PPE
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLIF0009 Ensure the safety of transport activities (Chain of Responsibility)

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to ensure the safety of transport activities.

It includes identifying features and applying chain of responsibility obligation in the Heavy Vehicle National Law (HVNL) or applicable state/territory law and regulations. It also includes identifying and reporting chain of responsibility risks.

Transport activities as defined by the HVNL or applicable state/territory law and regulations.

Work is performed under close direction, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify chain of responsibility features in the HVNL or applicable	**1.1** Transport activities and parties in the chain of responsibility are identified

© Commonwealth of Australia, 2025 Industry Skills Australia

	state/territory law and regulations		
		1.2	Principle of shared responsibility obligations within chain of responsibility in the HVNL or applicable state/territory law and regulations are identified
		1.3	Primary duty of each party in the chain of responsibility as outlined in the HVNL or applicable state/territory law and regulations are explained
		1.4	So far as reasonably practicable or reasonable steps, compliance with chain of responsibility as outlined in the HVNL or applicable state/territory law and regulations are explained
		1.5	Breaches and penalties for failure to comply with chain of responsibility as identified in the HVNL or applicable state/territory law and regulations are explained
2	**Apply chain of responsibility obligations in the HVNL or applicable state/territory law and regulations**	**2.1**	Workplace policies, procedures and other documents relevant to transport activities as they apply to own job function are identified and explained
		2.2	Methods and requirements to facilitate and ensure management of speed and fatigue are explained in accordance with job function and workplace procedures
		2.3	Methods to assess vehicle dimension and mass limits are explained in accordance with job function
		2.4	Methods to ensure loads are secured are explained in accordance with workplace procedures
		2.5	Heavy vehicles safety standards are identified in accordance with job function and workplace procedures
		2.6	Transport activities risks are identified, assessed and risk control measures implemented in accordance with workplace procedures
		2.7	Workplace procedures and industry practices for reporting transport activities risks are identified and followed
		2.8	Workplace documents relating to chain of responsibility are completed and processed to workplace requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces but is not equivalent to TLIF0001 Apply chain of responsibility legislation, regulations and workplace procedures.

Links

Assessment Requirements for TLIF0009 Ensure the safety of transport activities (Chain of Responsibility)

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include:

- applying applicable state/territory law and regulations
- assessing the likelihood and consequences of harm relating to own job function on a minimum of three occasions
- completing safety documentation of identified transport activities of a heavy vehicle risk on a minimum of three occasions, each about a different type of risk
- identifying risks associated with transport activities of a heavy vehicle of own job function and at least two other job functions directly related to own job function
- implementing relevant risk control measures and report actions taken to relevant person in accordance with workplace procedures on a minimum of three occasions.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- action required when possible risks of the transport activities are identified
- consideration of external factors in managing speed and fatigue
- function of driver and how they relate to transport activities, including level of influence and control
- methods, industry standards and requirements to ensure management of fatigue, speed, load restraint, mass, dimension and heavy vehicle maintenance and how they relate to transport activities job functions
- parties in the chain of responsibility and the concept of level of influence and control
- potential consequences of non-compliance with the applicable heavy vehicle state/territory law and regulations
- principle of shared responsibility
- transport activities as defined by the Heavy Vehicle National Law (HVNL) or applicable state/territory law and regulations
- what constitutes an unreasonable request
- where to locate current information relating to heavy vehicle transport activities including:
  - codes of practices

© Commonwealth of Australia, 2025 Industry Skills Australia

  - heavy vehicle standards
  - securing loads, load placement and load restraint
  - vehicle dimension and mass limits
- workplace policies and procedures for own job function.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIF0010 Identify factors to reduce road harm

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to identify risk factors to reduce road harm in accordance with industry standards, safe working and regulatory requirements.

It includes identifying the significance of safety features of the road network and traffic control devices, and determining environmental factors that may contribute to road harm.

Work is performed under supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify safety features of road network and traffic control devices	**1.1** Primary/passive safety features of road network are identified
	1.2 Secondary/active safety features of road network are identified

© Commonwealth of Australia, 2025 Industry Skills Australia

2	**Identify significance of safety features of road networks and traffic control devices**	**2.1** Significance of road markings and their meaning are identified and explained
		2.2 Significance of traffic control devices and their meaning are identified and explained
		2.3 Legal penalties for not obeying road markings and traffic control devices are explained
3	**Determine environmental factors that contribute to road harm**	**3.1** Environmental factors affecting road harm are identified
		3.2 Environmental factors affecting road harm are explained
		3.3 Driver actions when environmental factors are encountered are outlined

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIF0076 Demonstrate awareness of factors to reduce road harm.

Assessment Requirements for TLIF0010 Identify factors to reduce road harm

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- identifying active and passive road network features
- identifying significance of traffic control devices and their meaning
- reading, interpreting and following instructions, procedures and information
- using basic interpersonal and communication skills including listening, questioning and receiving feedback.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- active road network safety features including:
  - audible run-off road strip
  - electronic lane advice
  - electronic speed signs
  - guide posts
  - lane markings
  - radio announcements
  - road surface
  - roundabouts
  - traffic lights
- environmental factors including:
  - rain
  - snow
  - ice
  - water on road
  - dust
  - sand
  - mud

© Commonwealth of Australia, 2025 Industry Skills Australia

    - rocks
- high-risk behaviour factors including:
    - alcohol
    - distraction
    - drugs
    - fatigue
    - hoon behaviour
    - inattention
    - speed (high speed or inappropriate for circumstances)
- road users including:
    - cyclists and skaters
    - farm vehicles
    - heavy commercial vehicles
    - mobility scooters
    - other drivers
    - passengers
    - pedestrians
    - segways
- passive road network safety features including:
    - breakaway poles
    - culvert (1 metre sealed)
    - decoy road work vehicles
    - frangible poles
    - safety rails/barriers
    - separated dual carriage lanes
    - water barriers
- potential consequences of not adhering to road networks and traffic control devices including:
    - economic impact
    - emotional reaction
    - financial effect
    - legal repercussions
    - physical injury
    - social repercussions
- risk factors and how they affect performance
- relevant Australian Road Rules and legislation
- relevant state/territory road and traffic authority.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies/and or simulations
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations, Australian Road Rules, codes of practice and operation manuals.

Driving a vehicle is not part of the assessment of this unit of competency.

Simulators are not suitable for final assessment of this unit of competency.

TLIF0011 Identify interactions with other road users

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to identify interactions with other road users in accordance with approved standards, safe working and regulatory requirements.

It includes identifying types of road users, the use and reason for road rules, and potential risk consequences of interacting with road users.

Work is performed under supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify road users	**1.1** Different road user groups are recognised
	1.2 Interactions between road user groups, both positive and negative, are acknowledged
	1.3 Strategies are suggested to assist in the positive

© Commonwealth of Australia, 2025 Industry Skills Australia

			interaction of road users
2	**Identify potential risk consequences of interaction with road users**	**2.1**	Potential risks for each road user group are recognised
		2.2	Potential consequences for each road user group are explained
		2.3	Potential risk and consequences when road user groups interact are identified
3	**Identify use and reason for road rules**	**3.1**	Road rules and their purpose are explained
		3.2	Sources of road rules and regulations are identified
		3.3	Rules and regulations for all road users are identified
		3.4	Rules and regulations governing road use are explained

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIF0075 Demonstrate awareness of interacting with other road users.

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- identifying other road users
- interpreting rules and regulations as they apply to road users
- interpreting the purpose of road rules
- reading, interpreting and following relevant instructions, procedures and information
- using basic interpersonal and communication skills including listening, questioning and receiving feedback.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- applicable road regulations and legislation
- consequences of not adhering to road rules including:
  - economic impact
  - emotional reaction
  - financial effect
  - legal repercussions
  - physical injury
  - social repercussions
- risk factors and how they affect driver performance
- road users including:
  - cyclists and skaters
  - farm vehicles
  - heavy commercial vehicles
  - mobility scooters

TLIF0012 Implement and coordinate accident-emergency procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to implement and coordinate accident and emergency procedures in accordance with relevant regulations and workplace procedures.

It includes responding to the incident, coordinating on-site activities and completing follow-up actions.

Work is performed under some supervision generally within a team environment. It involves the application of basic emergency response principles when implementing accident and emergency response procedures and includes providing assistance ranging from simple injuries to applying life support systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Respond to incident	**1.1** Details of incidents, accidents and emergencies are

© Commonwealth of Australia, 2025 Industry Skills Australia

			received, analysed and confirmed
		1.2	Hazards are identified, risks assessed and control measures implemented
		1.3	Immediate coordination requirements are identified and actioned in accordance with organisation procedures
		1.4	Travel to incident site is undertaken by the shortest, fastest, legal means and routes
2	**Coordinate on-site activities**	**2.1**	Control of site activities is assumed on arrival, and operator and other authorities present are informed of this action
		2.2	Assistance is provided to clients and operators within limitations of duty of care and organisational requirements
		2.3	Details of personnel, including names and nature of injuries, are notified to relevant personnel, in accordance with organisational policies and procedures
		2.4	Assistance is provided to relevant authorities within legal and policy limitations
3	**Complete follow-up actions**	**3.1**	Incidents resulting in a near miss, accident or emergency are investigated and a report, including recommendations, is completed in accordance with organisational policies and procedures
		3.2	Accident procedures and emergency plans are reviewed for effectiveness and recommendations for changes are prepared and submitted to appropriate persons

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

© Commonwealth of Australia, 2025 Industry Skills Australia

Unit Mapping Information

This unit replaces and is equivalent to TLIF4007 Implement and coordinate accident-emergency procedures.

Assessment Requirements for TLIF0012 Implement and coordinate accident-emergency procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others when implementing and coordinating accident and emergency response procedures
- completing relevant documentation
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- reading and interpreting relevant instructions, procedures, information and signs
- working collaboratively with others when implementing and coordinating accident and emergency procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- means to control and organise an accident scene, provide practical assistance and cooperate with others at the scene
- relevant work health safety (WHS)/occupational health and safety (OHS) and other regulatory codes, procedures and guidelines concerning response to accidents and emergencies
- risks and hazards in the workplace and related precautions to control risk
- workplace procedures and policies for responding to accidents and emergencies.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training

TLIF0013 Manage the impact of human capabilities/limitations on human performance in a rail environment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to manage the impact of human capabilities and limitations on human performance in a rail environment.

It includes describing human error and error management and identifying factors that impact on human performance. It also includes identifying methods of creating work environments that support human performances.

This unit is intended for people who manage rail safety workers, to assist them in applying human factors principles to the management of safety critical tasks and the work environment to improve safety and performance.

For this unit human factors is defined as the scientific discipline that is concerned with the application of information about human characteristics, capacities, and limitations to the design of tasks, equipment and work environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Rail Sector.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential	Performance criteria describe the performance needed to

outcomes.	demonstrate achievement of the element.
1 Describe human error and error management	**1.1** Differences between errors and violations are identified
	1.2 Factors contributing to errors are identified
	1.3 Principles for error prevention, reduction, detection, recovery and tolerance are described
	1.4 Factors contributing to violations are identified
	1.5 Fair and just culture principles are described
2 Identify factors that impact on human performance	**2.1** Individual capabilities and limitations that impact on human performance are identified
	2.2 Factors relating to the organisation and wider system that impact on human performance are identified
	2.3 Factors relating to interaction with others that impact on human performance are identified
	2.4 Factors relating to how the design and operation of plant, equipment and technology can impact on human performance are identified
	2.5 Factors relating to rules and procedures that impact on human performance are identified
	2.6 Factors relating to work environment that impact on human performance are identified
3 Identify methods for creating work environments that support human performance	**3.1** Principles of human-centred design are described
	3.2 Strategies and methods for creating work environments and systems of work that reduce the potential for errors and improve human performance are identified
	3.3 Circumstances where human factors expertise is required are identified
	3.4 Benefits of applying human factors knowledge are described

© Commonwealth of Australia, 2025 Industry Skills Australia

3.5 Human factors compliance requirements are identified in accordance with relevant safety management systems

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This is a new unit. No equivalent unit.

Assessment Requirements for TLIF0013 Manage the impact of human capabilities/limitations on human performance in a rail environment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- describing principles of human error
- identifying and explaining strategies for managing relevant factors that impact on human performance
- identifying human performance limitation that affect work performance
- identifying impact of factors relating to the organisation and wider systems in which people work on human performance
- identifying impact of individual capabilities and limitations
- identifying impact of interaction with others including:
  - communication on human performance
  - group dynamics on human performance
  - supervision on human performance
  - team coordination on human performance
  - team experience on human performance
- identifying impact of rules and procedures on human performance
- identifying impact of the design and operation of plant and equipment including technology, vehicles, tools, rollingstock and infrastructure on human performance
- identifying impact of the work environment including workspace, weather and surrounds on human performance and giving consideration to design, usability, comfort and suitability.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- fair and just culture principles
- human centred design principles/human factors principles
- impact of factors relating to the organisation and wider systems in which people work on human performance
- impact of individual capabilities and limitations including:

© Commonwealth of Australia, 2025 Industry Skills Australia

  - cognitive factors on human performance
  - demographic factors on human performance including age, gender and mobility
  - individual differences
  - physical factors on human performance
  - physiological factors on human performance
  - psychological factors on human performance
- impact of interaction with others including:
  - communication on human performance
  - group dynamics on human performance
  - supervision on human performance
  - team coordination on human performance
  - team experience on human performance
- impact of plant and equipment including technology, vehicles, tools, rollingstock and infrastructure on human performance including consideration of design, usability, reliability and suitability
- impact of rules and procedures on human performance including consideration of design, usability and suitability
- impact of work environment including workspace weather and surrounds on human performance including consideration of design, usability, comfort and suitability
- recognising how leaders can influence human performance through:
  - the design of work schedules
  - planning of work
  - fostering an appropriate authority gradient concept
  - quality of supervision and feedback including actively managing unsafe behaviours for example, short cuts/work arounds
  - leadership and culture
- safety awareness including principles of human error.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in a workplace environment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including legislation, regulations, codes of practice and workplace

© Commonwealth of Australia, 2025 Industry Skills Australia

procedures.

TLIF0014 Monitor the safety of transport activities (Chain of Responsibility)

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to monitor the safety of transport activities.

It includes determining and monitoring chain of responsibility features in the Heavy Vehicle National Law (HVNL) or applicable state/territory law and regulations. It also involves administering and monitoring chain of responsibility workplace policies and procedures, and identifying and reporting chain of responsibility risks.

Work is performed under general direction.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Determine chain of responsibility features in the HVNL or applicable state/territory law and	**1.1** Transport activities and parties in the chain of responsibility are determined

© Commonwealth of Australia, 2025 Industry Skills Australia

	regulations	
		1.2 Principle of shared responsibility obligations within chain of responsibility in the HVNL or applicable state/territory law and regulations are determined
		1.3 Primary duty of each party in the chain of responsibility as outlined in the HVNL or applicable state/territory law and regulations are explained
		1.4 So far as reasonably practicable or reasonable steps compliance with chain of responsibility as outlined in the HVNL or applicable state/territory law and regulations are explained
		1.5 Breaches and penalties for failure to comply with chain of responsibility as identified in the HVNL or applicable state/territory law and regulations are explained
2	**Monitor chain of responsibility obligations in the HVNL or applicable state/ territory law and regulations**	**2.1** Workplace policies, procedures and other safety documents relevant to transport activities as they apply to job function are identified and monitored
		2.2 Methods and requirements to facilitate and ensure management of speed and fatigue are monitored in accordance with job function and workplace procedures
		2.3 Methods to calculate and assess vehicle dimension and mass limits are monitored in accordance with job function
		2.4 Methods to ensure loads are secured are monitored in accordance with workplace procedures
		2.5 Heavy vehicles safety standards are identified and monitored in accordance with workplace procedures
		2.6 Transport activity risks are identified, assessed and risk control measures implemented and monitored in accordance with workplace procedures
		2.7 Workplace records relating to transport activities are monitored and reviewed in accordance with workplace requirements and industry practice
3	**Administer and monitor chain of responsibility workplace policies and**	**3.1** Workplace procedures and industry practices for reporting transport activities risks are identified and

© Commonwealth of Australia, 2025 Industry Skills Australia

	procedures		implemented
		3.2	Workplace policies and procedures relating to chain of responsibility and associated changes are communicated to all staff
		3.3	Application of workplace policies and procedures relating to chain of responsibility is monitored to ensure compliance with transport activity obligations
		3.4	Appropriate action is taken when non-compliances with chain of responsibility requirements are identified
4	**Undertake due diligence activities**	**4.1**	Transport activities risks and safety duties are identified in accordance with job function and workplace procedures
		4.2	Current hazards and risk information is analysed in a timely manner and appropriate mitigation actions considered in accordance with job function and workplace procedures
		4.3	Resources are allocated in accordance with job function and workplace procedures
		4.4	Risk control measures are implemented and mitigation processes verified in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit at a broad level in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces but is not equivalent to TLIF0002 Administer chain of responsibility policies and procedures.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Requirements for TLIF0014 Monitor the safety of transport activities (Chain of Responsibility)

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include:

- applying and monitoring workplace policies and procedures relating to safety of transport activities (chain of responsibility) in a supervisory function reflecting a minimum of four weeks
- applying applicable state/territory law and regulations
- applying chain of responsibility obligations relating to own job function on a minimum of three occasions
- assessing the likelihood and consequences of harm relating to own job function on a minimum of three occasions
- completing safety documentation of identified transport activities of a heavy vehicle risks on a minimum of three occasions, each about a different type of risk
- identifying heavy vehicle transport activities risks
- implementing relevant risk control measures and reporting actions taken to relevant person in accordance with workplace procedures on a minimum of three occasions.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- actions required when possible risks of the transport activity of a heavy vehicle are identified
- consideration of external factors in managing speed and fatigue
- due diligence including taking reasonable steps to:
  - acquire and keep up to date on knowledge about the safe conduct of transport activities
  - identify the nature of the legal entity’s transport activities and the hazards and risks associated with those activities
  - ensure that appropriate resources are allocated and used to eliminate or minimise those hazards and risks
  - verify the control measures implemented are effective
- function of driver and how they relate to transport activities including level of influence and control

© Commonwealth of Australia, 2025 Industry Skills Australia

- functions including:
  - duties within the individual's own function
  - duties performed by others under the individual's supervision
  - duties that influence or direct other parties in the chain of responsibility
- methods, industry standards and requirements to ensure management of fatigue, speed, load restraint, mass, dimension and heavy vehicle maintenance and how they relate to transport activity job functions
- parties in the chain of responsibility and the concept of level of influence and control
- potential consequences of non-compliance with the applicable heavy vehicle state/territory law and regulations
- principal obligations relating to chain of responsibility in the Heavy Vehicle National Law (HVNL) or applicable state/territory law and regulations including:
  - consideration of traffic conditions in managing speed and fatigue
  - fatigue, work and rest times
  - securing loads
  - vehicle dimension and load limits
- transport activities as defined by the HVNL or applicable state/territory law and regulations
- what constitutes a shared duty, a reasonable practicable, a risk and heavy vehicle transport activity as they apply to a range of job functions
- what constitutes an unreasonable request
- where to locate current information relating to heavy vehicle transport activities including:
  - codes of practices
  - heavy vehicle standards
  - securing loads, load placement and load restraint
  - vehicle dimension and mass limits
- workplace policies and procedures for own job function and the range of job functions for which own job function is responsible.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

© Commonwealth of Australia, 2025 Industry Skills Australia

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIF0015 Recognise the impact of human capabilities/limitations on human performance in a rail environment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to recognise the impact of human capabilities and limitations on human performance in a rail environment.

It includes describing human error and error management and identifying factors that impact on human performance.

This unit involves the skills and knowledge required when applying human factors principles to safety critical roles. This unit is intended for rail workers who are performing safety critical activities as part of their job role and for whom an awareness of human factors can lead to improvements in safety and performance.

For this unit human factors is defined as the scientific discipline that is concerned with the application of information about human characteristics, capacities, and limitations to the design of tasks, equipment and work environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for TLIF0015 Recognise the impact of human capabilities/limitations on human performance in a rail environment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- describing principles of human error
- identifying human performance limitations and capabilities that affect work performance
- identifying impact of factors relating to the organisation and wider systems in which people work on human performance
- identifying impact of individual capabilities and limitations
- identifying impact of interaction with others including:
  - communication on human performance
  - group dynamics on human performance
  - supervision on human performance
  - team coordination on human performance
  - team experience on human performance
- identifying impact of rules and procedures on human performance
- identifying impact of the design and operation of plant and equipment including technology, vehicles, tools, rollingstock and infrastructure on human performance
- identifying impact of the work environment including workspace, weather and surrounds on human performance and giving consideration to design, usability, comfort and suitability.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- factors that contribute to human error
- impact of factors relating to the organisation and wider systems in which people work on human performance
- impact of individual capabilities and limitations including:
  - cognitive factors on human performance
  - demographic factors on human performance including age, gender and mobility

© Commonwealth of Australia, 2025
Industry Skills Australia

  - individual differences
  - physical factors on human performance
  - physiological factors on human performance
  - psychological factors on human performance
- impact of interaction with others including:
  - communication on human performance
  - group dynamics on human performance
  - supervision on human performance
  - team coordination on human performance
  - team experience on human performance
- impact of plant and equipment including technology, vehicles, tools, rollingstock and infrastructure on human performance including consideration of design, usability, reliability and suitability
- impact of the work environment including workspace weather and surrounds on human performance including consideration of design, usability, comfort and suitability
- impact of workplace rules and procedures on human performance including consideration of design, usability and suitability
- individual strategies
- safety awareness including principles of human error.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in a workplace environment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including legislation, regulations, codes of practice and workplace procedures.

TLIF0016 Working at height in the stevedoring industry

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit covers the skills and knowledge required to work at height in the stevedoring industry under the relevant regulatory requirements.

It includes using site safe work instructions and workplace procedures for working at height.

Working at height in a stevedoring environment involves the application of workplace safe work instructions, procedures and regulatory requirements as part of work activities. It also includes an understanding of the risk management procedures for working at height.

Working at height tasks are performed by a minimum two-person team under some supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Stevedore sector.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Apply working at height regulations and procedures	**1.1** Working at height plan and emergency response plan is developed in accordance with workplace procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

	1.2	Relevant safe work instructions, workplace procedures and risk assessment policies and procedures are applied
	1.3	Hazards are identified, risks are assessed, and control measures are implemented
	1.4	Communication is undertaken effectively with relevant persons
2 Select and inspect equipment for working at height	**2.1**	Working at height equipment is identified, selected and inspected in accordance with regulatory requirements and workplace procedures
	2.2	Faults or damage are immediately reported to relevant personnel in accordance with workplace procedures
3 Use working at height equipment in the stevedoring industry	**3.1**	Correct working at height manual handling techniques are used
	3.2	Working at height equipment is used in accordance with regulatory requirements and workplace procedures
	3.3	Working at height equipment is used in a work cage in accordance with regulatory requirements and workplace procedures
	3.4	Anchorage points are identified and used in accordance with regulatory requirements and workplace procedures
	3.5	Working at height equipment is inspected and stored, and faults reported in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

© Commonwealth of Australia, 2025 Industry Skills Australia

Unit Mapping Information

This unit replaces but is not equivalent to TLIF2068 Work at height in the stevedoring industry.

Assessment Requirements for TLIF0016 Working at height in the stevedoring industry

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards prior to and whilst working at height
- communicating effectively with others
- completing relevant documentation
- following relevant instructions, workplace procedures, information and signs
- identifying, selecting and inspecting working at height equipment
- post-operational inspection and storage reporting faults in accordance with workplace procedures
- using correct manual handling techniques
- using personal protective equipment (PPE) in accordance with workplace procedures
- using relevant working at height equipment
- working from a work cage when working at height.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- codes of practice and regulations relevant to working at height
- manual handling methods for working at height
- relevant sections of Australian Maritime Safety Authority (AMSA) Marine Orders Part 32 – Cargo handling equipment
- relevant work health and safety (WHS)/occupational health and safety (OHS) guidelines and workplace procedures
- risk assessment policies and procedures
- risks and hazards involved in working at height and related risk control measures
- working at height emergency response procedures
- working at height equipment checks
- workplace procedures for using working at height equipment.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant materials, tools, working at height equipment and PPE
- applicable documentation, including workplace procedures, emergency response plan, regulations, codes of practice, manufacturer specifications and operation manuals.

TLIK0002 Managing autonomous rail traffic operations by network control

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to manage autonomous rail traffic operation by network control.

It includes validating rail vehicle for autonomous operation, setting up rail traffic system for autonomous mission, ending autonomous system journey and monitoring and reporting autonomous rail traffic operations.

People achieving competence in this unit will need to fulfil the applicable state/territory legislated rail safety requirements and to comply with relevant codes of practice and/or guidelines.

Pre-requisite Unit

Not applicable.

Competency Field

K - Technology

Unit Sector

Rail Sector.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Verify rail traffic for autonomous operation	**1.1** Autonomous rail traffic and train data is identified and registered

© Commonwealth of Australia, 2025 Industry Skills Australia

		1.2	Rail traffic position is verified
		1.3	Rail traffic mission is validated from schedule or day of operation plan
2	**Set up rail traffic system for autonomous mission**	**2.1**	Mission hazards are identified in accordance with safety management system
		2.2	Safety critical communication is undertaken with relevant person
		2.3	Applications for autonomous activities of different infotechnology equipment and systems are interpreted
		2.4	Equipment is set up for autonomous operation in accordance with workplace procedures and manufacturer specifications
		2.5	Autonomous rail traffic data is validated in accordance with workplace protocols
		2.6	Autonomous systems are identified as working and active on the rail traffic
		2.7	Factors that impact safe rail traffic systems are continuously monitored
		2.8	Routine faults in operating systems and software applications are identified and rectified in accordance with workplace procedures
3	**End autonomous rail traffic system mission**	**3.1**	Autonomous rail traffic end of mission is determined
		3.2	Safety critical communication is undertaken with relevant person
		3.3	Autonomous rail traffic system is disengaged
		3.4	Autonomous rail traffic data is validated in accordance with workplace protocols
		3.5	Routine faults in operating systems, software applications and operator errors are identified and rectified in accordance with workplace procedures
4	**Monitor and report autonomous rail traffic operations**	**4.1**	Rail traffic operation is communicated in accordance with workplace safety critical communication protocols

© Commonwealth of Australia, 2025 Industry Skills Australia

4.2 Effective communication is maintained with relevant personnel

4.3 Records are updated in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This is a new unit. No equivalent unit.

Assessment Requirements for TLIK0002 Managing autonomous rail traffic operations by network control

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- allocating rail traffic consists
- changing status of rail traffic
- confirming and validating data
- confirming rail traffic is stationary
- controlling and coordinating recovery
- ending the autonomous rail traffic operations including mission
- entering rail traffic data
- following autonomous rail traffic operation procedures
- handing over of autonomous rail traffic operations to and from another operator
- monitoring rail traffic
- reading and interpreting relevant instructions, procedures and manufacturer information
- responding to fault alarms
- setting up autonomous rail traffic operations including mission and journey.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- emergency response procedures
- isolation systems
- operational requirement of autonomous rail traffic
- relevant autonomous rail traffic workplace procedures and manufacturer specifications
- relevant network safety management system
- relevant work health and safety (WHS)/occupational health and safety (OHS) procedures and regulations
- typical minor repair problems that can occur, and appropriate remedial action that should be taken
- workplace documentation and record requirements.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, autonomous equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIL5055 Manage a supply chain

Modification History

Release 2. ISC Upgrade - Reference to the Trade Practice Act removed from knowledge evidence.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to manage a supply chain within various contexts in the transport and logistics industry. It covers the relationships between an organisation and its supply and demand partners along the chain.

It includes implementing a demand-driven supply chain management strategy, managing the supply chain, and evaluating and improving supply chain effectiveness.

The unit generally applies to those who lead individuals or teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

L – Resource Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Implement	1.1 Responsibility for supply chain management within the

	demand-driven supply chain management strategy		organisation is assigned in accordance with the strategy
		1.2	Technology and software for implementing the strategy is accessed and operationalised within the requirements of the strategy and budgetary allocation
		1.3	Policies and procedures are designed to guide business relations and operations in accordance with the strategy
		1.4	Supporting business processes are designed or re-designed to support implementation of the strategy
		1.5	Support is provided to staff, customers and supply chain to assist in implementation of the strategy
2	**Manage supply chain**	2.1	Communication and information exchange with strategic partners and suppliers is managed in accordance with the supply chain management strategy
		2.2	Collaboration with supply chain organisations is facilitated to determine demand at each level of the supply chain in accordance with the strategy
		2.3	Sales and payments are managed in accordance with supply chain and risk management strategies, and legal and ethical requirements
		2.4	Actions to build trust and foster a supply chain culture are implemented in accordance with the strategy
		2.5	Opportunities are identified to adjust policies and procedures to respond to the changing needs of customers, supply chain and the organisation
3	**Evaluate and improve supply chain effectiveness**	3.1	Demand chain management and supply chain management are monitored in accordance with the supply chain management strategy
		3.2	Effectiveness of the supply chain is reviewed with each level of the supply chain, including staff and customers, and areas are identified for improvement
		3.3	Business data and reports are used to compare outcomes, budgets, timelines and forecasts to actual performance
		3.4	Technology performance is reviewed and recommendations are made for improvements to hardware, software and/or their use, in accordance with strategy and budget
		3.5	Feedback and evaluation results are used to plan and improve

TLIO0002 Apply and monitor workplace security procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to apply and monitor security procedures in accordance with workplace and regulatory requirements within the transport and logistics industry.

It includes checking and monitoring personnel and goods entering the worksite, carrying out surveillance of work areas, dealing with security incidents and emergencies, and completing required reports and surveillance documentation.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

O – Security

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Check and monitor personnel and goods entering the worksite	**1.1** Entry and exit of personnel and vehicles are checked to prevent improper entry or unlawful removal of goods and cargo, in accordance with workplace operational procedures and statutory authority regulations

© Commonwealth of Australia, 2025 Industry Skills Australia

		1.2	Potential breaches of security are observed and reported to appropriate personnel in accordance with workplace procedures
2	**Carry out surveillance of work areas**	**2.1**	Surveillance of work areas is undertaken in accordance with workplace procedures and regulatory requirements
		2.2	Hazards are identified, risks assessed and control measures implemented
		2.3	Breaches of security are identified, action initiated and incident reported to appropriate personnel in accordance with workplace procedures and regulatory requirements
3	**Respond to security incidents or emergencies**	**3.1**	Security incidents or emergencies are dealt with in accordance with regulations and workplace procedures
		3.2	Appropriate agency services are contacted in accordance with workplace procedures
		3.3	Agency services are supported
4	**Complete required documentation**	**4.1**	Surveillance documentation and reports are completed and despatched to relevant persons in accordance with workplace procedures and regulatory requirements
		4.2	Incident documentation in completed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for TLIO0002 Apply and monitor workplace security procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others when applying and monitoring security procedures
- completing relevant documentation
- identifying, selecting and using relevant equipment, processes and procedures for maintaining security
- implementing control measures
- interpreting and following operational instructions, procedures and information
- modifying activities depending on operational controls, risk situations and environments
- monitoring work activities in terms of planned schedule
- interpreting and following relevant instructions, procedures and information
- receiving, acknowledging and sending messages with available communications equipment
- working collaboratively with others when applying and monitoring security procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- agency services including:
    - ambulance
    - fire
    - police
    - security
- marking and numbering systems
- national and international codes of practice and regulations relevant to security arrangements
- relevant bond, quarantine or other legislative requirements
- relevant work health safety (WHS)/occupational health and safety (OHS) and environmental

© Commonwealth of Australia, 2025 Industry Skills Australia

protection procedures and guidelines
- security problems and appropriate actions to resolve or avoid these problems
- site layout and operating procedures
- types of hazardous material and special handling procedures
- work systems, equipment, management and site operating systems
- workplace security procedures and policies.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

Assessment Requirements for TLIO0003 Follow security procedures when working with goods and cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment, facilities, cargo and passengers
- applying procedures for security checks and precautions within limits of own role and responsibilities
- applying relevant workplace procedures
- communicating effectively with others when following security procedures
- completing documentation and reports related to security procedures
- following workplace emergency response plan and procedures
- identifying and reporting problems that arise when following security procedures
- identifying signs of disruption to goods and cargo
- reading and interpreting relevant instructions, workplace procedures, labels, markings, ID cards and other information
- recognising signs of pillage, theft and interference with goods, cargo and mail
- recognising signs of security threats and situations
- reporting and/or rectifying identified problems promptly in accordance with workplace procedures
- responding to a possible security threat
- selecting and using relevant communications and other equipment
- using personal protective equipment (PPE) in accordance with workplace procedures
- working collaboratively with others.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- applicable measures for securing specified locations (such as transport terminals and storage facilities) and transport vehicles
- common security problems that may occur when carrying out operations in the transport and logistics industries, and action that can be taken to address and resolve these problems
- common security threats and situations that may occur in transport and logistics industries,

© Commonwealth of Australia, 2025 Industry Skills Australia

and related roles and responsibilities of personnel when reporting and responding to these security threats and situations
- layout of worksite
- procedures for operating electronic communications equipment and required protocols
- relevant documentation and reporting requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) procedures
- relevant workplace security policies and procedures for responding to security threats, situations and emergencies
- signs of pillaging, theft and interference with goods, cargo and mail.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant and appropriate materials, tools, equipment and PPE
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLIX0004X Administer inventory systems

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit of competency describes the skills and knowledge required to administer inventory systems. It includes identifying inventory systems, tracking inventory, planning and administering inventory systems and completing inventory audits and reports.

Inventory is defined as the quantity of goods owned and stored by an organisation that is intended either for resale or is raw materials and components used in producing goods that are then sold.

Inventory systems provide visibility and integration in the supply chain and they are used to record transactions associated with receiving, reducing or writing inventory off. An inventory system can include desktop software, barcode scanners, barcode labels, mobile devices and applications.

The unit is applicable to those with responsibilities for inventory systems within a supply chain.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

1	**Identify inventory systems**	**1.1** Software, applications and devices used in the inventory system are identified
		1.2 Third party inventory control operations are verified
		1.3 Demand forecasting methods and tools are determined
		1.4 Inventory system policies, procedures and processes are confirmed
2	**Plan and administer inventory**	**2.1** Inventory characteristics are ascertained
		2.2 Stock specifications, locations, labels and reference numbers are validated using the inventory system
		2.3 Receipt and despatch stock is securely stored in designated locations and the inventory system is updated, as required
		2.4 Stock is monitored and reordered to meet optimum replenishment requirements, in accordance with organisational inventory procedures
		2.5 Stock is requisitioned and documentation is updated on the inventory system, as required
		2.6 Stock sorting, recycling and disposal is undertaken, in accordance with organisational inventory procedures
		2.7 Stock damage and losses against forecasts are assessed and investigations are completed into unacceptable cases
		2.8 Stock security is maintained, in accordance with organisational inventory procedures
3	**Track inventory**	**3.1** Inventory is monitored and tracked using the inventory system
		3.2 Buyers are kept informed of stock levels, in accordance with organisational inventory procedures
		3.3 Inventory transactions are monitored, in accordance with organisational inventory procedures
		3.4 Reorder cycles are adjusted to maintain consistent

	supply, as required
	3.5 Discrepancies, out of specification and redirection opportunities are managed and reported using the inventory system
	3.6 Inventory reports are analysed and corrective action is taken, as required
	3.7 Vendor Managed Inventory (VMI) systems are used to manage inventory, as required
4 Complete inventory audits and reports	**4.1** Inventory audits and cycle counts are performed, in accordance with organisational inventory procedures
	4.2 Report on inventory system management is produced, in accordance with organisational inventory procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is not equivalent to TLIA3016 Use inventory systems to organise stock control.

Links

Assessment Requirements for TLIX0004X Administer inventory systems

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- assessing and managing stock quality including analysing discrepancies, out of specification and redirection opportunities
- categorising and labelling stock
- checking inventory specifications
- ensuring handling, sorting, disposal and recycling of stock is performed
- following organisational inventory policies and procedures
- identifying inventory characteristics
- maintaining and managing optimum stock levels
- meeting inventory system documentation requirements
- monitoring stock security
- reading and interpreting information and data related to inventory systems
- recording and maintaining inventory information
- undertaking quality control
- using the inventory system including inventory software and applications
- utilising Vendor Managed Inventory (VMI) systems
- validating third party inventory control operations.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- features of inventory systems
- financial implications of inventory management
- inventory documentation and reporting requirements including those for discrepancies, out of specification and redirection opportunities
- inventory loss and damage control
- inventory policies and procedures
- inventory tracking and security
- layout of inventory storage areas

© Commonwealth of Australia, 2025 Industry Skills Australia

- maintenance and monitoring of stock quality and levels
- methods for categorising and labelling inventory
- principles of inventory management
- principles of quality control
- reorder cycles
- storage conditions for the maintenance of inventory including product life cycles, maximising use, rotation and replenishment requirements
- third party inventory control operations
- types of inventory systems
- valuation methods for different inventory items
- Vendor Managed Inventory (VMI) systems.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so. Where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to a range of

- exercises, case studies or other simulations
- materials, tools and equipment used in industry including:
  - inventory systems and stock control equipment and tools
- documentation including organisational policies and procedures, industry standards, regulations, codes of practice, operational manuals and equipment specifications.

TLIX0005X Administer market supply systems

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit of competency describes the skills and knowledge required to administer market supply systems. It includes identifying market supply system components, participating in a market supply system, evaluating a market supply system and reporting on a market supply system.

Supply systems are based around the sequencing of operations and/or groupings of organisations that work together to design, produce and deliver a product or service for a specific market. Participants typically include direct market players, suppliers of supporting goods and services and entities that influence the market supply system.

The unit is applicable to individuals working in domestic and/or global supply chains.

No licensing, legislative or certification requirements apply to this unit of competency at the time of publication.

Pre-requisite Unit

Not applicable

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify market supply system components	**1.1** Producers, buyers and consumers in the market supply system are identified

© Commonwealth of Australia, 2025 Industry Skills Australia

	1.2	Suppliers of supporting goods and services in the market supply system are confirmed
	1.3	Entities that influence the market supply system are identified
	1.4	Origin of products, materials and services used in the market supply system are established
	1.5	Roles and personnel in the market supply system are determined
	1.6	Marketing, sales and distribution functions and contributions in the market supply system are confirmed
	1.7	Level of authority for performance in the market supply system is verified
2 Participate in a market supply system	**2.1**	Criteria for the supply of materials and products are specified, in accordance with supply chain procedures
	2.2	Established quality indicators are used, in accordance with supply chain procedures, for verifying materials and products
	2.3	Specifications for materials and products are reviewed, in accordance with supply chain procedures
	2.4	Industry terminology is used to communicate with stakeholders in the market supply system
	2.5	Flow rates and Key Performance Indicators (KPIs) for the market supply system are tracked, in accordance with supply chain procedures
	2.6	Approved electronic digital systems and tools are used, in accordance with supply chain procedures
	2.7	Market supply system records are updated, in accordance with supply chain procedures
	2.8	Changes to legislative or regulatory requirements in the market supply system are monitored, in accordance with supply chain procedures
3 Evaluate market supply system	**3.1**	Supplier relationships and production processes and conditions are reviewed, in accordance with supply chain procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

	3.2 Strengths and weaknesses in the market supply system are identified using approved methods and tools
	3.3 Evaluation data is collated and assessed to identify trends and challenges in the market supply system
4 Report on market supply system	**4.1** Recommended improvements to the market supply system are developed, in consultation with stakeholders
	4.2 Market supply system report is prepared and disseminated to approved stakeholders

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Assessment Requirements for TLIX0005X Administer market supply systems

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying supply chain policies and procedures
- ascertaining personnel and roles in market supply systems
- collating and assessing evaluation data to identify trends and challenges
- confirming:
  - marketing, distribution and sales functions and contributions
  - suppliers of supporting goods and services
- determining market supply system customers, flows, materials and products
- developing improvements to the market supply system in consultation with stakeholders
- establishing the origin of products, materials and services
- evaluating strengths and weaknesses of the market supply system using approved methods and tools
- identifing producers, buyers, consumers and entities that influence the market supply system
- monitoring legislative and regulatory obligations
- preparing and disseminating reports to approved stakeholders
- reviewing specifications
- specifying supply criteria for materials and products
- tracking flow rates and Key Performance Indicators (KPIs)
- updating market supply system records
- using:
  - approved electronic digital systems and tools
  - established quality indicators to verify materials and products
  - industry terminology to communicate with stakeholders
- verifying level of authority for performance in the market supply system.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

TLIX0006 Apply and monitor biosecurity policies and procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to apply and monitor Australian biosecurity regulatory requirements and workplace policies and procedures.

It includes identifying and applying biosecurity requirements and workplace procedures when monitoring biosecurity compliance. It also includes reporting biosecurity concerns and incidents in accordance with regulatory requirements and workplace procedures.

Job role:

Job roles and titles vary across different sectors. Possible job titles relevant to this unit include:

- cartage operations
- customs brokers
- customs operations
- freight forwarder
- import and export coordinator.

Work is performed under minimum supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify biosecurity requirements	**1.1** Australian biosecurity regulatory requirements are identified and explained including non-compliance penalties
	1.2 Biosecurity requirements are identified from regulatory import and export conditions
	1.3 Biosecurity workplace policies and procedures are interpreted
	1.4 Import and export biosecurity threats, risks and terms are identified and explained
	1.5 Customer documentation and instructions are identified and interpreted to determine biosecurity requirements, including first points of entry and biosecurity entry points
	1.6 Advice is sought from relevant persons on biosecurity concerns
	1.7 Approved arrangements and treatment providers are identified in accordance with import and export conditions
	1.8 Persons in charge of the goods are identified and responsibilities are explained
2 Apply biosecurity procedures	**2.1** Biosecurity requirements are followed in accordance with regulatory import and export conditions
	2.2 Biosecurity safety and security of transport and storage activities are undertaken in accordance with regulatory requirements and workplace procedures
	2.3 Biosecurity threats are identified, secured and reported in accordance workplace procedures
3 Monitor biosecurity compliance	**3.1** Biosecurity safety and security of transport and storage activities are monitored
	3.2 Biosecurity directions are followed in accordance with regulatory requirements
	3.3 Biosecurity approved arrangement and treatment providers are monitored in accordance with workplace

© Commonwealth of Australia, 2025 Industry Skills Australia

		procedures
4	**Report biosecurity concerns and incidents**	**4.1** Biosecurity concerns and incidents are reported in accordance with workplace procedures and regulatory requirements
		4.2 Records are kept and checked in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Assessment Requirements for TLIX0006 Apply and monitor biosecurity policies and procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying import and export biosecurity regulatory requirements and workplace procedures
- identifying biosecurity threats, assessing risks and undertaking appropriate risk control measures in accordance with workplace procedures
- monitoring the biosecurity safety and security of transport activities
- reporting biosecurity concerns and incidents in accordance with workplace procedures and regulatory requirements.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- approved arrangements including business or entity activities
- biosecurity delegated legislation and regulations to manage:
    - biosecurity legislations and regulations
    - export control legislation and regulations
    - imported food legislation and regulations
- biosecurity import conditions system (BICON)
- biosecurity risk including biosecurity threats and measures
- first points of entry and biosecurity entry point including designated landing places or ports that ensure overseas conveyances and goods must arrive at a biosecurity entry point that has the appropriate facilities to effectively manage biosecurity risk
- imported food inspection scheme (IFIS)
- off shore biosecurity treatment measures
- on shore biosecurity treatment measures
- persons in charge of a conveyance that are subject to biosecurity control including the person in charge or command of the conveyance
- persons in charge of the goods that are subject to biosecurity control including:
    - the owner of the goods
    - the person who is in possession or control of the goods

© Commonwealth of Australia, 2025 Industry Skills Australia

- relevant biosecurity workplace documentation
- relevant workplace biosecurity policies and procedures
- reporting biosecurity incidents including requirements for persons in charge of goods that are subject to biosecurity control in accordance with biosecurity legislation
- risk of non-compliance penalties within Australian biosecurity regulatory requirements
- seasonal biosecurity threats.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including legislation, regulations, codes of practice and workplace procedures.

TLIX0007X Build digital supply chain capability in the workforce

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit of competency describes the skills and knowledge required to build digital supply chain capabilities in the workforce. It includes identifying supply chain workforce digital capabilities, developing a workforce digital capability plan, developing strategies to enhance workforce digital capabilities and reviewing and reporting on digital supply chain capabilities.

Workforce capability is defined as an organisation's ability to accomplish its objectives and goals through the knowledge, skills, abilities and competencies of its personnel. Building workforce capability in the use of, and engagement with, digital tools and equipment will require identifying knowledge and skill gaps.

The unit is applicable to those with management or team leadership responsibilities within a supply chain.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Assessment Requirements for TLIX0007X Build digital supply chain capability in the workforce

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- analysing supply chain industry requirements
- communicating with stakeholders
- conducting reviews
- developing and implementing coaching and mentoring programs
- developing and revising workforce digital capability strategic plans
- disseminating information to personnel
- identifying and mapping workforce gaps in digital knowledge and skills
- implementing organisational policies and procedures
- monitoring and reviewing workforce digital capabilities
- preparing reports
- reviewing and evaluating training and professional development programs
- undertaking evaluations
- using digital tools and equipment
- working with personnel to enhance digital knowledge and skills.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- analysis methods and tools
- communication methods and tools
- digital capability gap mapping
- digital literacy requirements
- digital software, hardware, tools and equipment
- evaluation methods for training and professional development programs
- industry requirements for digital supply chain
- information dissemination methods and tools
- organisational policies and procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

- plans for training
- programs for coaching and mentoring
- review requirements and report preparation
- strategies to enhance workforce digital supply chain capabilities
- techniques for identifying and mapping workforce gaps in digital knowledge and skills
- workforce digital capability strategic plans.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so. Where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to a range of

- exercises, case studies or other simulations
- materials and tools including digital supply chain equipment used in industry
- documentation including organisational policies and procedures, industry standards, regulations, codes of practice, operational manuals and equipment specifications.

TLIX0008 Comply with biosecurity border clearance

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to assess documentation for compliance with biosecurity border clearance in accordance with legislation, regulatory requirements and workplace requirements.

This unit applies to individuals assessing documentation for compliance with biosecurity border clearance. Work is undertaken in a range of environments, including small to large worksites, in the custom broking and international freight forwarding industries.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

X – Logistics

Unit Sector

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Comply with non-commodity documentation requirements and declarations	**1.1** Documentation for compliance with non-commodity concerns related to cargo type is assessed in accordance with the relevant Approved Arrangement requirements for non-commodity containerised cargo clearance and the non-commodity information requirements policy

© Commonwealth of Australia, 2025 Industry Skills Australia

		1.2	Treatment certificates are assessed for compliance with treatment certificate requirements for solid timber, bamboo packaging and dunnage
		1.3	Documentation to determine delivery location category is assessed in accordance with the relevant Approved Arrangement requirements for non-commodity containerised cargo clearance and the non-commodity information requirements policy
		1.4	Answers for non-commodity general declaration questions when lodging full import declaration are assessed in accordance with the relevant Approved Arrangement requirements for non-commodity containerised cargo clearance
		1.5	Non-commodity concern types and Approved Arrangement sites identifier (ID) are identified and reported when lodging full import declaration in accordance with the relevant Approved Arrangement requirements for non-commodity containerised cargo clearance
		1.6	Relevant records are maintained in accordance with regulatory requirements and workplace procedures
		1.7	Compliance monitoring and non-compliance implications are identified and actioned in accordance with the non-commodity Approved Arrangement policy
2	**Comply with commodity documentation requirements and declarations**	**2.1**	Documentation for compliance with commodity concerns is assessed in accordance with the relevant Approved Arrangement Requirements for automatic entry processing for commodities
		2.2	Correct commodity code and Approved Arrangement sites identifier (ID) are determined for automatic entry processing for commodity as appropriate in accordance with the Approved Arrangement Requirements policy
		2.3	Relevant records are maintained in accordance with regulatory requirements and workplace procedures
		2.4	Compliance monitoring and non-compliance implications are identified and actioned in accordance with the Approved Arrangement policy
3	**Comply with minimum document and import**	**3.1**	Documentation is assessed for compliance with biosecurity import conditions and in accordance with

© Commonwealth of Australia, 2025 Industry Skills Australia

declaration requirements	minimum documentary and import declaration requirements policy
3.2	Relevant information is reported in accordance with minimum documentary and import declaration requirements policy
3.3	Information is lodged into an import declaration in accordance with the minimum documentary and import declaration requirements policy
3.4	Relevant records are maintained in accordance with regulatory requirements and workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Assessment Requirements for TLIX0008 Comply with biosecurity border clearance

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- assessing documents with required attention to detail
- assessing documents, answering lodgement questions and determining appropriate concern types and automatic entry process (AEP) codes
- assessing whether documents are compliant with the requirements of the purpose for which they are to be used
- ensuring currency of relevant legislative and regulatory knowledge
- maintaining records in accordance with regulatory requirements
- reading and interpreting relevant Acts and legislation.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- general awareness of biosecurity border clearance requirements
- obligations of person engaged in a regulatory arrangement
- policies regarding compliance with requirements of a regulatory arrangement
- relevant legislation, regulations, schemes, policies and procedures.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy

TLIX0009X Employ digital supply chain risk management practices

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit of competency describes the skills and knowledge required to employ contemporary risk management practices in digital supply chain environments. It includes identifying digital supply chain risks, developing digital supply chain risk management plans, implementing digital supply chain practices and reviewing digital supply chain risk management practices.

Supply chain risk management practices typically focus on identifying, measuring and analysing risks to minimise negative impacts. Risk management and risk control in a digital supply chain, whilst built on standard risk planning strategies, will specifically aim to address cyber security in relation to third parties and the provision of rapid organisational responses to unplanned events.

The unit is applicable to those with management or team leadership responsibilities within a supply chain.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for TLIX0009X Employ digital supply chain risk management practices

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all requirements of the elements and performance criteria on at least one occasion and includes

- analysing data
- assessing risk outcomes
- communicating with stakeholders
- determining third party cyber security risks
- developing a risk management system and risk management plan for digital supply chains
- documenting continuous improvement actions
- establishing digital supply chain risk management reporting mechanisms
- identifying risks and vulnerabilities in the digital supply chain
- implementing digital supply chain risk management practices
- managing responses to unplanned events
- monitoring and assessing digital supply chain data related to risk management practices
- preparing reports
- reporting risks to the technological integrity of the digital supply chain
- undertaking risk mitigation and reviewing its effectiveness
- using digital supply chain dashboard metrics to assess risks, identify causes and inform stakeholders
- working with risk management policies and procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all requirements of the elements and performance criteria and includes knowledge of

- communication methods and techniques
- continuous improvement principles
- data analysis
- digital supply chain policies and procedures
- digital supply chain stakeholders
- digital supply chain technology

© Commonwealth of Australia, 2025 Industry Skills Australia

- principles of risk management practice
- report requirements
- responses to unplanned digital supply chain events
- risk management plans and risk mitigation
- tools, methods and techniques used for digital supply chain risk management practice
- types of digital supply chain risks including cyber threats.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so. Where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to a range of

- exercises, case studies or other simulations
- materials and tools including digital supply chain equipment used in industry
- documentation including organisational policies and procedures, industry standards, regulations, codes of practice, operational manuals and equipment specifications.

TLIX0010X Enable traceability in supply chains

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit of competency describes the skills and knowledge required to enable traceability of products and services in supply chains. It includes identifying supply chain traceability, implementing supply chain traceability, using traceability data, monitoring risks to supply chain traceability and reviewing and reporting on supply chain traceability.

Traceability is a collaborative effort that allows for the provenance of produce, products, parts and materials from suppliers as they are processed and distributed as end commodities to be confirmed. It also allows for the reliability of sustainability claims for human rights, the environment, workforce health and safety and anti-corruption practices to be verified. Traceability ensures that the collection and validation of data and the commitment to specified chain of custody standards is maintained throughout the supply chain.

The unit is applicable to those with management or team leadership responsibilities within a supply chain.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Industry Skills Australia

Identify supply chain traceability	**1.1**	Strategy for supply chain traceability, including Key Performance Indicators (KPIs), is confirmed
	1.2	Product and service movements in the supply chain are identified, including any vulnerabilities
	1.3	Legislative obligations, including chain of custody and chain of responsibility, are determined
	1.4	Supply chain stakeholder's ability to undertake product and service traceability is verified
	1.5	Responsibility and level of authority for supply chain traceability is confirmed
Implement supply chain traceability	**2.1**	Traceability strategy with KPIs is implemented, in consultation with supply chain stakeholders
	2.2	Traceability strategy, KPIs and scheduled timelines are communicated to supply chain stakeholders
	2.3	Policies, procedures and processes are implemented to support supply chain traceability strategy
	2.4	Data collection and documentation protocols are implemented to support supply chain traceability processes
	2.5	Legislative obligations, including chain of custody, are applied in the supply chain
Use supply chain traceability data	**3.1**	Product and service traceability data is used to identify supply chain performance issues and to remediate evolving situations
	3.2	Inconsistencies in product and services data is identified and remediated to ensure integrity of supply chain traceability
	3.3	Certifications and data on supply chain products and services are used to verify welfare and safety claims
Monitor risks to supply chain traceability	**4.1**	High and low risk points for product and service traceability in the supply chain are identified and monitored
	4.2	Risk mitigation for traceability data system is monitored
	4.3	Corrective actions and strategies, including product

Assessment Requirements for TLIX0010X Enable traceability in supply chains

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- analysing and reporting on traceability data
- collecting and analysing information related to supply chain traceability
- communicating with supply chain stakeholders
- determining legislative obligations including chain of custody and chain of responsibility
- developing and applying traceability data collection and documentation protocols
- developing and implementing policies, procedures and processes to support supply chain traceability
- identifying and remediating product and service data inconsistencies
- identifying high and low traceability risk points in the supply chain
- identifying product and service movements in the supply chain including vulnerabilities
- implementing and reviewing traceability strategy including Key Performance Indicators (KPIs)
- monitoring corrective actions and strategies including product and material recalls
- reviewing and reporting on supply chain traceability strategy
- undertaking risk mitigation for traceability data systems.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- circular economy principles in relation to addressing sustainable practices in supply chains
- communication methods and tools
- corrective actions and strategies including product and material recalls
- data analysis techniques
- high and low risk points in the supply chain
- information and data collection
- legislative obligations including chain of custody and chain of responsibility
- policies and procedures that support traceability

© Commonwealth of Australia, 2025 Industry Skills Australia

- product and service movements in supply chains including vulnerabilities
- recognition and remediation of product and services data inconsistencies
- remediation of supply chain issues and problems identified through traceability data
- review and report preparation
- risk mitigation
- supply chain stakeholders
- traceability standards
- traceability strategy and processes including Key Performance Indicators (KPIs).

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so. Where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

TLIX0011X Establish blockchain in supply chains

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit of competency describes the skills and knowledge required to establish blockchain in supply chains. It includes preparing for blockchain, developing a strategy for blockchain, implementing and managing blockchain, managing change associated with blockchain and reviewing and reporting on blockchain.

Blockchain is a decentralised, shared, immutable database of transactions that uses consensus mechanisms to operate. Blockchain networks can be public with anyone able to join and see any transaction that happens. A private (permissioned) blockchain, that restricts who can access the network, is required when working with supply chains. Participants in the supply chain using blockchain will determine what data is seen by whom.

The digitisation of transactions and data using blockchain enables supply chain organisations to implement and monitor their ethical practices, contract management, traceability, transparency, authenticity and compliance programs.

The unit is applicable to those with management or team leadership responsibilities within a supply chain.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Elements and Performance Criteria

ELEMENTS **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 Industry Skills Australia

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for blockchain	**1.1** Collaborations, relationships and stakeholders in the supply chain are mapped
	1.2 Applicable legislative requirements, industry standards and codes of practice for blockchain are identified
	1.3 Level of responsibility and authority for establishing blockchain is confirmed
2 Develop a strategy for blockchain	**2.1** Blockchain strategy, including Key Performance Indicators (KPIs), is developed
	2.2 Policies, procedures and processes, including data distribution and customer assistance protocols, are developed to support the blockchain strategy
	2.3 Supply chain stakeholder communication plan is determined
	2.4 Compliance protocols are developed, in accordance with legislative requirements and industry standards, to support the blockchain strategy
	2.5 Risks associated with blockchain are ascertained and risk controls are developed, in accordance with risk management procedures and industry standards
3 Implement and manage blockchain	**3.1** Blockchain is established, on completion of trialling activities, in the supply chain
	3.2 Policies, procedures and processes are applied, in accordance with the blockchain strategy
	3.3 Risk controls and compliance protocols are defined and implemented to support blockchain use
	3.4 Support processes for blockchain users are implemented and managed, in accordance with the blockchain strategy and industry standards
	3.5 Onboarding and access control mechanisms for blockchain use are managed, in accordance with the blockchain strategy and industry standards
4 Manage blockchain	**4.1** Blockchain requirements and timelines are

© Commonwealth of Australia, 2025 Industry Skills Australia

	change	communicated to supply chain stakeholders
		4.2 Training, coaching, mentoring and networking opportunities for supply chain stakeholders are managed, in accordance with the blockchain strategy
		4.3 Supply chain stakeholder concerns and complaints are documented and addressed, in accordance with blockchain procedures
5	**Review and report on blockchain**	**5.1** Blockchain strategy and KPIs are reviewed, in consultation with supply chain stakeholders
		5.2 Report on blockchain implementation is prepared and presented to approved supply chain stakeholders
		5.3 Continuous improvement actions to support blockchain use in the supply chain are documented

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for TLIX0011X Establish blockchain in supply chains

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- addressing and documenting supply chain stakeholder blockchain concerns and complaints
- communicating and working with supply chain stakeholders
- confirming the level of responsibility and authority for establishing blockchain in the supply chain
- defining and implementing blockchain compliance protocols
- developing and applying policies, procedures and processes including customer assistance and data distribution protocols
- documenting blockchain continuous improvement recommendations
- establishing blockchain strategy and Key Performance Indicators (KPIs)
- identifying applicable legislative requirements, industry standards and codes of practice
- identifying risks related to blockchain and implementing risk controls
- managing blockchain onboarding and access control mechanisms
- mapping supply chain collaborations, relationships and stakeholders
- preparing and presenting reports on blockchain
- reviewing blockchain strategy and KPIs outcomes
- undertaking change management activities including training, mentoring, coaching and networking
- working with supply chain stakeholders to establish blockchain.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- blockchain strategy development and implementation including Key Performance Indicators (KPIs)
- capabilities of blockchain
- change management principles including opportunities and methods for training, coaching, mentoring and networking
- communication methods and tools

© Commonwealth of Australia, 2025 Industry Skills Australia

- complaint resolution processes
- compliance protocols
- continuous improvement principles
- establishment requirement for blockchain
- industry and government initiatives to support blockchain
- legislative and regulatory obligations, industry standards and codes of practice
- onboarding and access control mechanisms for blockchain users
- policies, procedures and processes that support blockchain use in supply chains
- protocols for blockchain data distribution
- review and report requirements
- risk controls and risk management procedures
- stakeholder and relationship mapping
- support processes for blockchain stakeholders
- types of stakeholders in supply chains
- use of technology in supply chain operations

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so. Where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to a range of

- exercises, case studies and/or other simulations
- materials, tools and equipment used in industry
- documentation including organisational policies and procedures, industry standards, regulations, codes of practice, operational manuals and equipment specifications.

TLIX0012X Lead digital supply chain implementation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit of competency describes the skills and knowledge required to lead digital supply chain implementation. It includes identifying digital supply chain capabilities and vision, leading digital supply chain implementation, building digital supply chain capabilities and reviewing and reporting on digital supply chain implementation.

Harnessing technological hardware and software for real time operations will require supply chain organisations to revamp their processes and procedures. Leading digital supply chain implementation needs continuous engagement with customers and suppliers, as well as managing personnel through technological, cultural and organisational change.

The unit is applicable to those with management or team leadership responsibilities within a supply chain.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Assessment Requirements for TLIX0012X Lead digital supply chain implementation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all requirements of the elements and performance criteria on at least one occasion and includes

- aligning digital supply chain vision to strategic business plans
- assessing digital supply chain technical capabilities
- communicating with and supporting digital supply chain stakeholders
- confirming level of authority for leadership of digital supply chain implementation
- determining and monitoring Key Performance Indicators (KPIs)
- determining technological capacity and capabilities for digital supply chains
- documenting continuous improvement activities
- identifying policies and procedures that supports digital supply chain implementation
- leading digital supply chain implementation strategy
- prioritising and monitoring implementation requirements for operational improvements
- providing training, coaching, mentoring and networking opportunities including using digital supply chain champions
- reviewing and reporting on digital supply chain implementation
- utilising external expertise to enhance workforce capability, as required
- verifying operational improvements and solutions that can be built on existing capabilities.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all requirements of the elements and performance criteria and includes knowledge of

- capability enhancement activities
- change management principles
- communication methods and tools
- digital supply chain implementation processes
- digital supply chain policies and procedures
- engagement and support techniques for digital supply chain stakeholders including training, coaching, mentoring, networking and the use of workplace champions
- identification of external expertise to assist in building digital supply chain capabilities
- Key Performance Indicators (KPIs)

© Commonwealth of Australia, 2025 Industry Skills Australia

- operational improvements for digital supply chains
- report requirements
- review methods and techniques for assessing digital supply chain implementation
- stakeholders in digital supply chains
- strategic business plans
- technology for digital supply chains.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so. Where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to a range of

- exercises, case studies or other simulations
- materials and tools including digital supply chain equipment used in industry
- documentation including organisational policies and procedures industry standards, regulations, codes of practice, operational manuals and equipment specifications.

TLIX0013X Maintain stock control and receivals

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit of competency describes the skills and knowledge required to maintain stock control and receivals. It includes establishing supply arrangements, monitoring and maintaining stock, processing receivals and storing stock, determining stock wastage and discrepancies and performing stock audits and reporting.

Stock control involves the monitoring and managing of an organisation's stock. It applies to all stock at every stage of the production process from purchasing and delivery to using and reordering stock.

Receivals is the function of checking items delivered as new stock or supplies. It requires the inspection of goods and materials for quality, condition and quantity and the allocating of space in the storage facility or warehouse.

The unit is applicable to those with responsibilities for stock control and/or receivals within a supply chain.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Assessment Requirements for TLIX0013X Maintain stock control and receivals

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- assessing stock loss, wastage, excesses and discrepancies
- completing stock orders and receivals within established timelines
- disposing of stock safely including hazardous substances
- forecasting stock and receivals using approved methods and tools
- identifying supply sources for different types of products
- identifying third party inventory control operations
- implementing cost effective stock purchasing and control systems
- maintaining stock and receival data and records
- monitoring optimal safety stock placement and service level optimisation
- monitoring stock control systems, stock quality and cost effectiveness of supplies
- performing stock audits
- producing stock control reports
- receiving, storing, monitoring and maintaining stock levels over life cycle periods
- undertaking supplier and customer relationship management
- utilising stock handling, receivals and data collection technologies
- working with continuity plan and stock control and receival policies and procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- continuity plans
- contractual and preferred supplier arrangements
- disposal methods for stock and waste including hazardous substances
- stock control and receivals policies and procedures
- principles of stock control including:
    - approaches to calculating stock levels and replenishment requirements
    - factors that may influence purchase specifications

© Commonwealth of Australia, 2025 Industry Skills Australia

    - forecasting methods for calculating inventory consumption
- methods and tools for calculating cost effective stock quantities including
    - methods of stock control including FIFO (First In, First Out) and LIFO (Last In, First Out)
    - standard measures and formulas for yield testing
    - stock control systems including bin card system, imprest system, integrated point of sale system and ledger systems
- product life and storage requirements for specific stock
- real time information using stock data technologies
- report requirements on stock loss, wastage, excesses and discrepancies
- safe manual handling techniques
- safe stock placement and service level optimisation
- security measures for stock including storage and tracking
- stock control audits
- stock ordering and delivery processes
- stock quality control
- stock reorder cycles for standard business periods, peak seasons and special events
- supplier and customer relationship management
- supply sources for different types of products
- types of computerised stock control systems, their functions and features.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so. Where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to a range of

- exercises, case studies or other simulations
- materials, tools and equipment used in industry including:
    - access to suppliers with whom the learner can interact, commercial purchase specifications, stock control procedures and reports and costs and contractual documentation used for the purchase of stock
    - stock control software systems and applications
- documentation including organisational policies and procedures, industry standards, regulations, codes of practice, operational manuals and equipment specifications.

TLIX0014X Manage customer focussed supply chain

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit of competency describes the skills and knowledge required to manage a customer focussed supply chains. It includes identifying supply chain relationships, establishing a customer service plan, ensuring customer engagement in the supply chain and reviewing customer focussed supply chain outcomes.

A customer focused supply chain aims, with the use of digital technology, to enhance the customer's overall satisfaction with the products and/or services on offer. Collaborative relationships are established up and down the supply chain with everyone linked, through technology, to the customer.

The unit is applicable to those with management or team leadership responsibilities within a supply chain.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

	relationships		information throughout the supply chain are mapped
		1.2	Technology used to maintain a customer focussed supply chain is confirmed
		1.3	Level of responsibility and authority to manage a customer focussed supply chain is confirmed
2	**Establish customer services plan**	**2.1**	Customer needs and requirements are identified to determine products and services
		2.2	Fulfillment model, including delivery options for customer purchases, is determined
		2.3	Customer services plan, including Key Performance Indicators (KPIs), is aligned to the supply chain's business strategy
		2.4	Policies, procedures, processes and data requirements to support the customer service plan are implemented
		2.5	Customer services plan and KPIs are communicated to supply chain stakeholders
3	**Ensure customer engagement**	**3.1**	Two way real time communication is maintained with customers, using approved methods and tools
		3.2	Customer support, including digital onboarding processes and procedures, is monitored
		3.3	Data from customers and suppliers' is collated and analysed, in accordance with supply chain procedures
		3.4	Customer feedback and complaints, including returns, are tracked and resolved, in accordance with customer service policies and procedures
		3.5	Supply planning and demand forecasting is monitored using approved methods and tools
4	**Review customer focussed supply chain outcomes**	**4.1**	Customer service plan and KPIs are reviewed, in consultation with supply chain stakeholders
		4.2	Report on customer focussed supply chain outcomes is prepared and presented to approved stakeholders
		4.3	Continuous improvement actions that support a customer focussed supply chain are documented

Assessment Requirements for TLIX0014X Manage customer focussed supply chain

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- aligning customer service plan to supply chain's business strategy
- collating and analysing customer and suppliers' data
- confirming fulfilment model including customer delivery options
- determining stakeholder, customer relationships and flow of information
- documenting continuous improvement actions
- ensuring policies, procedures, processes and data requirements are aligned to the customer service plan and customer focussed supply chain outcomes
- establishing and communicating customer service plan and Key Performance Indicators (KPIs) to stakeholders
- identifying customer requirements
- maintaining customer support including digital onboarding processes and procedures
- monitoring supply planning and demand forecasting using approved methods and tools
- reviewing and reporting on customer service plan and KPI outcomes
- tracking and addressing customer feedback and complaints including returns
- using two way real time communication methods and tools
- working with digital technology in supply chains.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- circular economy principles in relation to addressing sustainable practices in customer focussed supply chains
- continuous improvement principles
- customer focussed supply chains
- customer requirements
- customer service plans and Key Performance Indicators (KPIs)
- customer support including digital onboarding processes and procedures
- data collation and analysis

© Commonwealth of Australia, 2025 Industry Skills Australia

- demand and supply forecasting methods and tools
- digital technology used in supply chains
- fulfillment models and delivery options
- methods for customer engagement
- policies, procedures and processes for a customer focussed supply chains
- resolution methods for customer feedback, complaints and returns
- review and report requirements
- stakeholder, customer relationship and flow of information mapping
- stakeholders in digital supply chains
- supply chain's business strategy
- two way communication methods and tools.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so. Where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to a range of

- exercises, case studies and/or other simulations
- materials and tools including digital supply chain equipment used in industry
- documentation including organisational policies and procedures, industry standards, regulations, codes of practice, operational manuals and equipment specifications.

TLIX0015X Manage fundamental aspects of supply chains

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit of competency describes the skills and knowledge required to work with the fundamental aspects of supply chains. It includes determining fundamental aspects, monitoring fundamental aspects, implementing continuous improvement strategies and reporting on fundamental aspects.

Fundamental aspects of a supply chain includes all activities that relate to the integration, operation, purchasing and distribution of products and goods that are critical to the success of a business. Failure to manage the fundamental aspects of a supply chain can have a significant impact on the ability of a business to survive in the market place.

The unit is applicable to individuals working in supply chain management roles. Typically, they will work independently and perform complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to this unit of competency at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Industry Skills Australia

1	**Determine fundamental aspects**	**1.1** Status of fundamental aspects of the supply chain are verified
		1.2 Key Performance Indicators (KPIs) for fundamental aspects are identified from strategic supply chain documentation
		1.3 Supply chain planning and forecasting requirements are determined
		1.4 Vulnerabilities and opportunities in the supply chain are identified
		1.5 Digital systems and applications used to support fundamental aspects of the supply chain are confirmed
		1.6 Supply chain stakeholders are identified
		1.7 Level of authority for performance in the supply chain is verified
2	**Monitor fundamental aspects**	**2.1** Communication channels and strategies to engage supply chain stakeholders are reviewed
		2.2 Supply chain operations and outcomes are evaluated and actions to reduce vulnerabilities and achieve better value for money are developed
		2.3 Supplier capacity and capability is examined, in accordance with supply chain procedures, to ensure customer requirements are being met
		2.4 Stakeholder relationships are monitored, in accordance with supply chain procedures
		2.5 Supply chain purchasing channels and distribution outcomes are monitored, in accordance with supply chain procedures
		2.6 Legal, ethical, environmental, corporate social responsibility principles and sustainability issues are addressed, in accordance with supply chain policies and procedures
		2.7 Supply chain risks are managed and alternative strategies are developed, as required
3	**Implement continuous**	**3.1** Supply chain performance is baselined and measured against recognised industry benchmarks using

© Commonwealth of Australia, 2025 Industry Skills Australia

improvement strategies		approved methods and tools
	3.2	Supply chain flows and KPIs are examined to ensure fundamental aspects of the supply chain are working cohesively
	3.3	Stakeholder feedback is analysed to measure satisfaction
	3.4	Data on supply chain discrepancies and inconsistencies is analysed and remediation actions are implemented
	3.5	Digital systems and applications in the supply chain are reviewed for effectiveness
4 Report on fundamental aspects	**4.1**	Trends and challenges in fundamental aspects of the supply chain are identified and reviewed, in accordance with supply chain procedures
	4.2	Strategies that support continuous improvement of fundamental aspects are evaluated and recommendations for improvement are developed
	4.3	Report on continuous improvement actions is prepared and disseminated to approved stakeholders

Foundation Skills

Assessment Requirements for TLIX0015X Manage fundamental aspects of supply chains

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- addressing legal, ethical, envrionemental, corporate social responsibility principles and sustainability issues in supply chains
- analysing discrepencies, inconsistencies in data and stakeholder feedback
- applying supply chain policies and procedures
- implementing remediation actions
- determining:
  - baseline measurements and industry benchmarks
  - strategic supply chain documentation
  - supply chain planning and forecasting requirements
  - supply chain vulnerabilities and opportunities
- evaluating strategies that support continuous improvement
- examining supplier capacity and capability
- developing strategies and recommendations that support continuous improvement activities
- making recommendations for improvement
- managing risks and developing alternative strategies
- monitoring supply chain:
  - commercial and customer relationships
  - distribution and purchasing channels
  - flows
  - Key Performance Indicators (KPIs)
  - operations and outcomes
- preparing reports that address trends and challenges in supply chain fundemental aspects
- reviewing digital systems, applications, communication strategies and channels
- verifying level of authority for performance.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the

TLIX0016X Manage outsourced supply chain operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit of competency describes the skills and knowledge required to manage outsourced supply chain operations. It includes planning and confirming contracted services, determining the capacity of contracted services, managing contracted services and reporting on contracted services.

Outsourced supply chain operations, Third/Fourth Party Logistics (3PL/4PL) contracted services, typically use a variety of resources, capabilities and technology to manage parts or complete supply chain operations. Contracted services can include transportation, warehousing, inventory management, container receipt and de-stuffing, order management and processing, cross docking, sourcing, procure to pay, customs brokerage and freight forwarding.

The unit is applicable to those with team leadership responsibilities within a supply chain.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

TLIX0017X Manage supply chain mass customisation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit of competency describes the skills and knowledge required to manage supply chain mass customisation. It includes determining mass customisation strategy, managing mass customisation strategy and reporting on mass customisation outcomes.

Mass customisation is the concept of producing single batch, customised products at the same cost and speed as those in traditional volume manufacturing. Typically, a basic package for a product is offered with customers being able to add or subtract a range of features. Mass customisation requires supply chain stakeholders to strategically collaborate to achieve effective and efficient flows of products, services and information.

The unit is applicable to those with management or team leadership responsibilities within a supply chain.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

TLIX0018X Monitor compliance in digital supply chains

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit of competency describes the skills and knowledge required to manage compliance in digital supply chains. It includes identifying digital supply chain compliance requirements, maintaining digital supply chain compliance information, monitoring digital supply chain compliance and reviewing and reporting on digital supply chain compliance.

Compliance refers to the adherence of established guidelines and all legal requirements including those in relation to sourcing, manufacturing and delivering products in a digital supply chain. Tracking and complying with local, national and international product and supply chain laws and industry standards is critical to the maintenance of confidence in digital supply chains.

The unit is applicable to those with management or team leadership responsibilities within a digital supply chain.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for TLIX0018X Monitor compliance in digital supply chains

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- collecting, maintaining and monitoring compliance data
- communicating compliance information and updates
- confirming digital supply chain compliance strategy and Key Performance Indicators (KPIs)
- determining compliance risks
- identifying and documenting legislation, codes of practice and industry standards
- implementing digital supply chain compliance policies, procedures and processes
- maintaining supplier certificates, disclosure statements and other supporting documentation
- monitoring digital supply chain compliance gaps
- monitoring quality system reports, cyber security and data storage risks
- recording non-compliance actions and breaches including whistle blower reports
- reviewing and reporting on digital supply chain compliance system
- undertaking remedial actions to ensure compliance
- using approved digital supply chain compliance systems and tools
- validating supplier's financial viability, contract compliance and third party affiliations
- verifying compliance responsibility and level of authority
- working with digital supply chain stakeholders.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- communication methods and tools used in digital supply chains
- compliance policies, procedures and processes for digital supply chains
- compliance strategy and Key Performance Indicators (KPIs)
- compliance systems
- cyber security and data storage risks
- data collection and maintenance methods
- identification and control of compliance risks in digital supply chains

© Commonwealth of Australia, 2025 Industry Skills Australia

- legislation, codes of practice and industry standards
- methods and tools for monitoring compliance gaps in digital supply chains
- non-compliance actions and breaches
- obligations in relation to whistle blower reports
- quality system reports including audits, inspections and feedback
- remedial action protocols and processes
- review and report requirements
- supplier certificates, disclosure statements and other supporting documentation for digital supply chain compliance
- types of stakeholders in digital supply chains.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations, where it is appropriate to do so. Where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to a range of

- exercises, case studies and/or other simulations
- materials, tools and equipment used in industry
- documentation including organisational policies and procedures, industry standards, regulations, codes of practice, operational manuals and equipment specifications.

TLIX0019X Monitor digital supply chain services

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit of competency describes the skills and knowledge required to monitor digital supply chain services. It includes identifying digital supply chain services, monitoring digital supply chain services and reviewing and reporting on digital supply chain services.

Digital supply chain services typically use data from a variety of devices, applications and cloud technologies to create visibility and collaboration. Monitoring digital supply chain services requires ongoing analysis of data, performance indicators and audit results of suppliers and their subcontractors to verify services.

The unit is applicable to those with management or team leadership responsibilities within a supply chain.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

X - Logistics

Unit Sector

Cross sector

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify digital supply chain services	**1.1** Services used in the digital supply chain are identified

© Commonwealth of Australia, 2025 Industry Skills Australia

	1.2	Digital supply chain stakeholder relationships, products and responsibilities of service providers are identified
	1.3	Key Performance Indicators (KPIs) for digital supply chain services are confirmed
	1.4	Policies, procedures and processes, including industry standards, for digital supply chain services are determined
	1.5	Quality control and compliance systems for digital supply chain services are verified
	1.6	Digital supply chain services data collection tools and methods are validated
	1.7	Level of authority and assigned responsibilities for monitoring digital supply chain services is confirmed
2 Monitor digital supply chain services	**2.1**	Performance of digital supply chain services are monitored, using approved methods and tools, to ensure KPIs are being met
	2.2	Real time levels of demand and inventory in digital supply chain services are monitored for product and stock movement
	2.3	Quality control in digital supply chain services is monitored, in accordance with quality management procedures
	2.4	Risks to digital supply chain services are identified and monitored, in accordance with risk management procedures
	2.5	Security measures in digital supply chain services are monitored to identify and track potential vulnerabilities
	2.6	Compliance and non-compliance remediation is monitored and documented, in accordance with compliance management procedures
3 Review and report on digital supply chain services	**3.1**	Performance indicators, data and audit results of digital supply chain services are collated and analysed
	3.2	Report with recommendations is prepared and

presented to approved digital supply chain stakeholders

3.3 Continuous improvement actions to support monitoring of digital supply chain services are documented

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This is a new unit. There is no equivalent unit.

Assessment Requirements for TLIX0019X Monitor digital supply chain services

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- collating and reviewing data for digital supply chain services
- confirming level of authority and assigned responsibilities
- determining industry standards, policies, procedures and processes for monitoring digital supply chain services
- documenting continuous improvement recommendations
- identifying stakeholder relationships, products and responsibilities
- identifying services used in the digital supply chain
- preparing and presenting reports
- using approved methods and tools to monitor digital chain supply services including:
  - compliance and non-compliance remediation
  - demand and inventory levels
  - Key Performance Indicators (KPIs)
  - logistics and deliveries
  - quality control
  - risks
  - security measures and vulnerabilities
- validating data collection methods and processes
- verifying quality control and compliance systems.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- continuous improvement principles
- data analysis
- data collection methods and tools
- industry standards and policies, procedures and processes for monitoring digital supply chain services

© Commonwealth of Australia, 2025 Industry Skills Australia

- Key Performance Indicators (KPIs)
- methods and tools for monitoring levels of demand, inventory, logistics, quality control, risks, vulnerabilities, compliance and security measures in digital supply chain services
- preparation and presentation of reports
- quality control and compliance systems
- remediation actions for non-compliance
- stakeholder relationships, products and responsibilities in digital supply chain services
- types of services used in digital supply chain.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so. Where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to a range of

- exercises, case studies or other simulations
- materials and tools including digital supply chain equipment used in industry
- documentation including organisational policies and procedures, industry standards, regulations, codes of practice, operational manuals and equipment specifications.

TLIX0020X Monitor ethical supply chain practices

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit of competency describes the skills and knowledge required to monitor ethical practices in supply chains. It includes determining ethical supply chain functions, monitoring ethical practices and reporting on ethical supply chain practices.

Ethical supply chains seek to ensure that sustainable labour, supply and environmental practices are fair. Participating in an ethical supply chain will involve conducting due diligence to confirm the integrity of suppliers, contractors, agents and other intermediaries. Unethical supply chains typically do not comply with legislative obligations, codes of practice or agreed industry standards.

The unit is applicable to those with management or team leadership responsibilities within a supply chain.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Assessment Requirements for TLIX0020X Monitor ethical supply chain practices

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all requirements of the elements and performance criteria on at least one occasion and includes

- collecting data on ethical practices using approved methods and tools
- confirming legislative and regulatory obligations and industry standards
- determining policies and procedures to support ethical practices in the supply chain
- documenting continuous improvement actions
- documenting non-compliance and remediation actions related to unethical practices
- evaluating ethical practices against Key Performance Indicators (KPIs)
- following up on whistle blower reports
- identifying and reporting on community expectations for ethical practices
- identifying welfare and sustainability practices in the supply chain
- monitoring compliance to supply chain codes of practice
- monitoring product provenance
- monitoring supply chain stakeholders' integrity using approved methods and tools
- reviewing data about supply chain ethical practices and preparing reports
- verifying KPIs for ethical practice
- working with stakeholders to monitor continuous improvement activities and practices.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all requirements of the elements and performance criteria and includes knowledge of

- approved methods and tools for data collection on ethical practices
- circular economy principles in relation to addressing ethical sustainability practices in supply chains
- community expectations for ethical practices
- compliance requirements for ethical practice in supply chains
- continuous improvement principles
- data collection methods and tools
- ethical environmental and sustainability practices

© Commonwealth of Australia, 2025 Industry Skills Australia

- evaluation methods for assessing ethical practices
- Key Performance Indicators (KPIs) for ethical practice
- legislation and regulatory obligations, industry standards and codes of practice including follow up actions on whistle blower reports
- methods for identifying stakeholder integrity
- policies and procedures relevant to supply chain ethical practice
- product provenance
- review and report requirements
- supply chain stakeholders
- sustainability and welfare practices and issues in supply chains
- types of unethical practices in supply chains.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

TLIX0021X Work with global supply chains

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit of competency describes the skills and knowledge required to work with global supply chains. It includes identifying global supply chain products and services, confirming relationships with suppliers and customers, monitoring global supply operations, maintaining supply chain compliance and implementing improvements to global supply chain operations.

A supply chain that operates globally will encompass a network of suppliers, manufacturers, warehouses, shipping and transport companies, wholesalers and retailers working across a variety of countries to provide an end product. Successful global supply chains ensure that the right types of goods and materials are sourced, supplied, produced and shipped in the right quantities, to the right locations, at the right time and in the right condition.

The unit is applicable to individuals who work in global supply chains.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

    - transportation, warehousing and distribution centres
- obtaining feedback from stakeholders on issues of concern and production practices
- preparing reports on production efficiency, processes and practices
- reviewing contracts, specifications and supplier performance and relationship history
- verifying level of authority to perform in the global supply chain.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- Australian and international legislative obligations
- communication channels and tools
- compliance systems and corrective non-compliance actions
- contractual requirements including:
    - amounts and types of products to be delivered
    - details and procedures for outsourcing
    - dispute resolution mechanisms
    - duties and tarrifs payable
    - methods of pricing and payment terms
    - quality of products to be supplied
    - regulatory compliance
    - specifications
    - transportation details
    - variations to costs
- digital systems and applications used in global supply chains
- global markets including product sourcing and production processes
- import and export regulations
- inventory flow in global supply chains
- negotiation methods and dispute reolution strategies
- quality control standards and processes
- report requirements
- supply chain policies and procedures
- risks that impact suppliers including:
    - changing technology
    - delivery and distribution delays
    - environmental impacts
    - expertise
    - governement policies
    - labour force activity
    - quality control

© Commonwealth of Australia, 2025 Industry Skills Australia

  - resource availability
  - trade agreements
- transportation and distribution centres in global supply chains
- types of contracts and commercial relationships
- value adds in global supply chains.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations, where it is appropriate to do so. Where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to a range of

- exercises, case studies or other simulations
- materials, tools and equipment used in industry
- documentation including organisational policies and procedures, industry standards, regulations, codes of practice, operational manuals and equipment specifications.

AHCBUS409 Participate in an e-business supply chain

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to participate in and develop e-business as part of value adding to a rural enterprise, accommodating a niche market or changed market access to a product.

This unit applies to business managers or supervisors, who use an e-business supply chain and who are required to adjust production to meet the requirements of that supply chain. Those who work in this role take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

All work must be carried out to comply with organisational requirements, work health and safety legislation and codes, sustainability practices, and in consultation with the management team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for AHCBUS409 Participate in an e-business supply chain

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has actively participated in an e-business supply chain for one business, including:

- effectively used e-business technology
- developed procedures and systems for an e-business process
- implemented an e-business process
- met timelines required by the e-business supply chain
- monitored and reviewed e-business systems.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- entire supply chain for a business, including from raw materials to producers, component suppliers, manufacturers, wholesalers, third-party service providers, retailers, customers and recyclers, plus freight, distribution and cash flow
- technology hardware and software requirements of the e-business supply chain
- protocols for electronic data access and interchange
- protocols for electronic funds transfer
- protocols for e-business legal and security issues.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:

© Commonwealth of Australia, 2025 Industry Skills Australia

- e-business technology suitable to business.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assist in preparation of work-site	1.1 Identify location of worksite and fallen timber from scope of works and confirm with supervisor 1.2 Identify site hazards, assess risks and report to supervisor

© Commonwealth of Australia, 2025 Industry Skills Australia

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Confirm first aid and emergency personnel, equipment and procedures 1.4 Document and implement site health and safety in the workplace, environmental and traffic control measures according to workplace procedures
2. Recognise and apply workplace safety procedures	2.1 Identify hazards and risks relevant to the maintenance and operation of chainsaws and implement safe working practices to manage risks 2.2 Select, fit and use personal protective equipment according to workplace safety procedures 2.3 Confirm with supervisor relevant licensing and legislative requirements with regard to the operation of chainsaws 2.4 Transport chainsaw safely according to operation and maintenance manual
3. Check and prepare chainsaw for use	3.1 Select tools and materials required for maintenance 3.2 Conduct routine checks and maintenance prior to operation, according to chainsaw operation and maintenance manual 3.3 Calculate required fuel oil ratios prior to mixing 3.4 Mix fuel and fuel chainsaw according to operation and maintenance manual 3.5 Identify, tag, record and report chainsaw faults or malfunctions to supervisor
4. Operate chainsaw	4.1 Communicate with work team during operations using voice, hand or whistle signals 4.2 Place supports to ensure a stable base for cutting 4.3 Identify materials to be cut and position them for operation 4.4 Visually assess material to be cut for defects and embedded hazards 4.5 Determine cutting methods appropriate to material type and implement risk controls 4.6 Select and use tools associated with chainsaw use 4.7 Operate chainsaw to cross-cut timber using documented low risk work methods 4.8 Identify and report work-site communication issues to supervisor

© Commonwealth of Australia, 2025 Industry Skills Australia

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.9 Identify and report environmental impacts of chainsaw operation to supervisor
5. Complete and check chainsaw operation	5.1 Record and report chainsaw damage, malfunction and irregular performance according to workplace procedures 5.2 Clean and store chainsaw according to workplace procedures and operation and maintenance manual 5.3 Dispose of debris from operation in accordance with environmental requirements 5.4 Maintain workplace documentation according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Writing	• Document site health and safety in the workplace, environmental and traffic control measures
Oral communication	• Use clear language to report hazards and risks and to confirm work site, first aid and emergency personnel, equipment and procedures • Participate in verbal exchanges to respond to questions and clarify information
Numeracy	• Calculate fuel oil ratios and fuel quantities
Navigate the world of work	• Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility
Interact with others	• Use verbal and non-verbal communications with work team during operations using voice, hand and whistle signals

© Commonwealth of Australia, 2025 Industry Skills Australia

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Personal protective equipment must include:	• safety helmet • mesh visor • gloves • hearing protection • safety glasses or goggles • safety boots.
Routine checks and maintenance must include at least two of the following:	• checking and adjusting bar • cleaning air filter • cleaning and/or replacing spark plug • sharpening chain.
Supports must include at least one of the following:	• fallen timber • saw horse trestle • v-shaped supports.
Cutting methods must include:	• pulling chains cuts (bottom of bar) • pushing chainsaw cuts (top of bar) • bore / plunge cuts (tip of bar).
Tools must include:	• bars • chains • files • plug spanner.

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated a hand-held chainsaw at least once, maintained it in working condition and demonstrated the following:

- determined site location for work and work details and clarified with supervisor
- identified site hazards, assessed risks and reported to supervisor
- confirmed work zone with work crew and monitored site
- confirmed first aid and emergency personnel, equipment and procedures
- applied hazard and risk assessment and implemented controls for chainsaw use
- performed routine checks and maintenance for chainsaw usage according to operation and maintenance manual
- identified, tagged and reported chainsaw faults and malfunctions
- recorded and implemented site health and safety in the workplace, environmental and traffic control measures
- used personal protective equipment that complies with Australian Standards
- safely cross-cut fallen timber using compression and tension cuts with a hand held chainsaw
- used appropriate tools and materials to maintain chainsaw
- applied environmentally responsible workplace practices
- applied low risk work practices including stopping, disengaging quickly and dealing with foreign matter
- cleaned and stored chainsaw
- followed workplace procedures relevant to safely operating a chainsaw.

© Commonwealth of Australia, 2025 Industry Skills Australia

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the principles and practice for operating chainsaws
- chainsaw routine checks and maintenance according to operation and maintenance manual, including:
  - checking and adjusting bar
  - cleaning air filter
  - cleaning and replacing spark plug
  - sharpening chain
- workplace safe operating procedures
- hazards and risks when operating a chainsaw
- relevant Australian Standards concerning chainsaw operation including use of personal protective equipment
- components of chainsaws and their respective functions
- common defects in woody materials
- cutting methods and techniques, patterns and sequence of cuts
- health and safety in the workplace requirements for the operation of a chainsaw including caution and hazard signs and symbols
- environmental impacts associated with operating chainsaws.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
  - personal protective equipment must be worn whilst operating chainsaw
  - individual must not be under the influence of alcohol or drugs
  - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
- resources, equipment and materials:
  - chainsaws
  - chainsaw tools
  - wood
  - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
  - chainsaw manufacturer specifications and operator manuals
- timeframes:
  - according to the job requirements.

AHCPCM203 Fell small trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to fell small trees where hazards have been assessed as low risk.

It is an introductory or base-level unit that covers felling procedures for small trees.

This unit applies to individuals who undertake defined activities with specialised tools and methods, work in a structured context, apply knowledge and skills to demonstrate autonomy and limited judgement, and provide solutions to a limited range of predictable problems. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant state or territory.

Pre-requisite Unit

AHCMOM213 Operate and maintain chainsaws

Unit Sector

Plant culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Industry Skills Australia

Element	Performance criteria
1.Assist in preparation of work site	1.1 Determine location of worksite and correct tree from the scope of works 1.2 Identify site hazards, assess risks and report to supervisor 1.3 Confirm work zone with work crew and monitor site 1.4 Identify first aid and emergency personnel, equipment and procedures 1.5 Record and implement work health, safety, site, environmental and traffic control measures
2.Identify tree felling requirements	2.1 Identify hazards associated with felling operation 2.2 Assess risks and report to supervisor 2.3 Examine topography and site conditions 2.4 Identify factors influencing the tree felling operation and confirm findings with supervisor 2.5 Identify ***trees considered outside own skill level for felling*** and seek assistance from appropriate personnel 2.6 Determine natural direction of fall, safe fall zone and exclusion zone and confirm with supervisor 2.7 Receive instructions for tree felling operations from supervisor and clarify instructions prior to undertaking work
3. Prepare for tree felling	3.1 Select and prepare felling equipment and component options appropriate to the task being undertaken 3.2 Prepare, transport and appropriately position support tools to minimise felling delays 3.3 Select, check, use, maintain and store suitable safety and personal protective equipment (PPE) 3.4 Clear fall zone of obstacles and articles which may be damaged by felled tree 3.5 Establish clear escape route appropriate to site
4. Fell tree	4.1 Note and monitor location of other personnel 4.2 Carry out tree felling operation 4.3 Communicate with work team during operations using voice, hand and whistle signals 4.4 Determine standard tree felling techniques, patterns and cut sequences by ground conditions and state of canopy 4.5 Take corrective action in response to changing conditions or problems encountered 4.6 Use planned escape route when tree starts to fall 4.7 Monitor fall of tree and movement on ground until felled tree is stable 4.8 Use low risk work practices in all activities

© Commonwealth of Australia, 2025 Industry Skills Australia

Element	Performance criteria
5. Complete tree felling operation	5.1 Determine appropriate method of clearing the site of felled tree 5.2 Select and use machinery required for removal of felled tree 5.3 Clear fall site of tree and all tree debris 5.4 Clean and store all machinery and equipment on completion of operation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCARB202A Fell small trees.

Assessment Requirements for AHCPCM203 Fell small trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare, transport and appropriately position support tools to minimise felling delays
- assess topography and site conditions, identify factors influencing tree felling operation and confirm findings with supervisor
- receive instructions for tree felling operations from supervisor and clarify prior to undertaking work
- clear fall zone of obstacles and articles which may be damaged by felled tree
- confirm first aid and emergency personnel, equipment and procedures
- identify site hazards, assess risks and report to supervisor
- record and implement work health, safety, site, environmental and traffic control measures
- select, check, use, maintain and store suitable safety and personal protective equipment
- confirm work zone with work crew and monitor location of other personnel
- determine natural direction of fall, safe fall zone and exclusion zone and confirm with supervisor
- determine standard tree felling techniques by ground conditions and state of canopy
- establish clear escape route appropriate to site
- safely operate a chainsaw to fell small trees
- monitor fall of tree and movement on ground until felled tree is stable
- take corrective action in response to changing conditions or problems encountered

Knowledge Evidence

The candidate must demonstrate knowledge of:

- corrective action
- emergency and first aid procedures
- felling equipment and components

© Commonwealth of Australia, 2025 Industry Skills Australia

- first aid and emergency personnel, equipment and procedures
- ground conditions
- how to determine natural direction of fall
- how to establish a clear escape route
- industry standard terminology
- low risk work practices
- obstacles and articles which may be damaged by felled trees
- positioning support tools
- safe operating procedures for felling small trees
- safe fall and exclusion zones
- selection, preparation and appropriate equipment for task
- standard tree felling techniques, patterns and cut sequences
- topography, site conditions and other factors influencing tree felling operations

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWHS501 Manage work health and safety processes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop work health and safety policies and procedures that demonstrate enterprise commitment to work health and safety.

This unit is applicable to the development of management systems and procedures. It is also applicable to the management of the implementation process, which is usually conducted within policy guidelines and procedures that require the use of discretion and judgement.

All work must be conducted in accordance with relevant legislative requirements, Codes of Practice, workplace procedures and safe work practices.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They analyse information and exercise judgement to complete a range of advanced, skilled activities.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) and occupational safety and health (OSH) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State and Territory OHS legislative requirements.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Unit Sector

Work Health and Safety (WHS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop work health and safety policies and procedures	1.1 Develop a work health and safety business plan and program for the enterprise in consultation with designated personnel and management 1.2 Clearly define and allocate work health and safety responsibilities and duties and include them in job descriptions and duty statements for all relevant positions 1.3 Identify, seek and provide financial and human resources for implementing work health and safety policies and procedures as required 1.4 Provide and explain information on the work health and safety system and procedures, for the area of responsibility, in a form which is readily understood by employees
2. Establish and maintain processes to ensure the participation of all employees in the application of work health and safety	2.1 Establish and maintain consultation processes with employees and their representatives 2.2 Deal with issues raised though participation and consultation and resolve them promptly and effectively 2.3 Provide information about the outcomes of participation and consultation in a manner readily accessible to employees
3. Establish and maintain procedures for identifying hazards	3.1 Identify and confirm existing and potential hazards within the area of responsibility in accordance with trends identified using the work health and safety records system 3.2 Develop and integrate a procedure for the ongoing identification of hazards within systems of work and procedures 3.3 Appropriately monitor activities to ensure that the procedure is effectively adopted throughout areas of managerial responsibility 3.4 Address hazard identification at the planning, design and evaluation stages of any change in the workplace to ensure that new hazards are not created
4. Establish and maintain procedures for assessing risks	4.1 Assess risks associated with identified hazards using information derived from workplace records and industry-wide information 4.2 Develop a procedure for ongoing assessment of risks and integrate it within systems of work and procedures 4.3 Monitor activities to ensure the effective adoption of risk

© Commonwealth of Australia, 2025 Industry Skills Australia

Element	Performance criteria
	assessment procedures throughout the area of managerial responsibility 4.4 Address risk assessment at the planning, design and evaluation stages of any change in the workplace to ensure that the risk from hazards is not increased 4.5 Investigate and record accident and dangerous occurrences in accordance with work health and safety procedures
5. Implement interim risk control measures until a better or permanent control measure is developed	5.1 Develop and implement measures to control assessed risks in accordance with the hierarchy of control and trends identified from the work health and safety records system 5.2 Implement interim solutions, when measures which control a risk at its source are not immediately practicable, until a permanent control measure is developed 5.3 Develop a process of ongoing hazard identification and risk assessment, and a review of effectiveness of control programs, and integrate them into enterprise management arrangements 5.4 Monitor activities to ensure effective adoption of the risk control procedure throughout the area of managerial responsibility 5.5 Address risk control at the planning, design and evaluation stages of any change in the workplace to ensure the inclusion of adequate risk control measures 5.6 Design systems to reduce risk and design administrative arrangements to ensure the implementation of safe work health and safety practices where unable to eliminate hazard 5.7 Implement effective work health and safety risk management measures during any modification to buildings and structures or machinery and work activities 5.8 Identify inadequacies in existing risk control measures and seek or provide resources enabling the implementation of new measures
6. Plan and manage enterprise procedures for dealing with hazardous events	6.1 Identify, with accuracy, potential emergencies posing risks to the health and safety of workers and the public 6.2 Develop plans and procedures, which control the risks associated with hazardous events, in consultation with appropriate emergency services 6.3 Provide appropriate information and training to employees to enable the implementation of correct emergency procedures 6.4 Train adequate numbers of workers in First Aid to ensure that first aid is applied to preserve life and minimise injury
7. Establish and maintain a work health and safety induction and	7.1 Develop a work health and safety induction program to meet the work health and safety needs of new employees 7.2 Develop a work health and safety training program as part of

© Commonwealth of Australia, 2025 Industry Skills Australia

Element	Performance criteria
training program	supervisors' and employees' general training
8. Establish and maintain a system for work health and safety records	8.1 Establish and monitor a system for keeping work health and safety records to allow identification of patterns of occupational injury and disease in the enterprise 8.2 Regularly update records and use them to evaluate the effectiveness of the enterprise work health and safety program
9. Evaluate the enterprise work health and safety system and related policies, procedures and programs	9.1 Assess the effectiveness of the work health and safety system and related policies, procedures and programs according to enterprise aims with respect to work health and safety 9.2 Develop and implement improvements to the work health and safety system to ensure more effective achievement of enterprise aims 9.3 Assess compliance with work health and safety legislation and Codes of Practice to ensure, as a minimum, the maintenance of legal work health and safety standards

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCWHS501 Manage work health and safety processes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop work health and safety policies and procedures that demonstrate enterprise commitment to work health and safety
- establish and maintain arrangements to ensure the involvement of all employees in the management of work health and safety
- establish and maintain procedures for identifying hazards
- establish and maintain procedures for assessing risks
- establish and maintain procedures for controlling risks
- establish and maintain enterprise procedures for dealing with hazardous events
- establish and maintain a work health and safety induction and training program
- establish and maintain a system for work health and safety records
- analyse recorded data to determine where the work health and safety program can better meet enterprise and employee needs
- evaluate the enterprise work health and safety system and related policies, procedures and programs

Knowledge Evidence

The candidate must demonstrate knowledge of:

- data and documentation for industry injury statistics
- legislated employer and employee work health and safety responsibilities
- significant hazards and areas of risk in the workplace
- all relevant work health and safety legislation and Codes of Practice consistent with the hierarchy of work health and safety risk control and its implementation for hazards in land-based industries

© Commonwealth of Australia, 2025 Industry Skills Australia

- risk control measures
- the hierarchy of risk controls
- relevant management systems and procedures
- public safety issues

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AMPMGT809 Analyse data for business decision making

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the statistical skills and knowledge required to support decision making for a business or business unit.

This unit applies to leaders or managers who use data analysis and decision-making skills and techniques in the management of their day-to-day work. They must assemble or obtain raw data, process that data and analyse and interpret it in a way that enables sound decision-making.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify and access data sources available to the business	1.1 Scope and define data collection requirements of the business question or issue 1.2 Identify and assess data sources 1.3 Research and/or collate data in accordance with legislation, policies and guidelines 1.4 Evaluate accuracy and appropriateness of data

© Commonwealth of Australia, 2025 Industry Skills Australia

Element	Performance criteria
	1.5 Record data in the desired format in accordance with professional, business and task requirements
2. Apply data analysis and decision making techniques to analyse business data	2.1 Collect, store and retrieve data using software in accordance with legislation, policy and guidelines 2.2 Use spreadsheet tools to retrieve data and present it in suitable formats 2.3 Display graphical data in accordance with presentation principles 2.4 Perform quantitative and/or qualitative analysis to obtain required outcome 2.5 Use analysis and descriptive tools and techniques appropriately given the nature of the information and the required outcomes 2.6 Identify and describe methodological limitations 2.7 Calculate summary statistics from the given data set in accordance with the business requirement
3. Produce information for business decision making	3.1 Interpret data summaries and trends in accordance with accepted standards 3.2 Interpret and explain statistical tests 3.3 Interpret data to enable informed business decision-making 3.4 Present data, charts and maps clearly for ease of understanding 3.5 Include glossaries, technical notes and referencing, where required 3.6 Prepare and present reports that include statistical concepts, tables, charts and maps in accordance with enterprise policies and procedures 3.7 Present findings appropriately for the audience 3.8 Use charts appropriately in presentations, taking into account the variables being charted and accepted standards 3.9 Communicate assumptions informing interpretation in accordance with audience needs

Assessment Requirements for AMPMGT809 Analyse data for business decision making

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Candidates must complete workplace-relevant activities which involve assembling or obtaining raw data, processing it, and analysing and interpreting it in a way that enables sound decision-making. Evidence must demonstrate the candidate's consistency of performance over time.

Candidates must demonstrate ability to:

- analyse and interpret data
- identify sources of data, collect data, follow analysis procedures and explain results
- apply decision making skills
- negotiate effectively
- collect data and produce reports
- use problem-solving, initiative and enterprise skills to produce information relevant to business decision making
- use research skills to identify and collect data
- manage risk
- differentiate between different types of data
- differentiate between inferential and descriptive statistics
- apply linear regression and correlation analysis techniques
- provide advice for business decision making based on the results of statistical analysis

Knowledge Evidence

Candidates must demonstrate specialised and integrated technical and theoretical knowledge of:

- relevant legislation, codes of practice and standards
- use of statistical data for business decision making
- methods of data presentation
- methods of describing data

© Commonwealth of Australia, 2025 Industry Skills Australia

- risk and uncertainty
- interval estimation
- hypothesis testing
- comparing group differences
- simple linear regression and correlation
- multiple regression
- time-series analysis
- the strengths and limitations of results produced by each statistical technique (error correction and hypothesis testing)

Assessment Conditions

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and under typical operating and production conditions for the enterprise.

Assessment must ensure:

- competence is consistently demonstrated over time, and over a range and variety of complex tasks/projects and situations
- access to resources normally used in the workplace including organisational policies and procedures, relevant legislation

Assessors must satisfy current standards for RTOs.

AURHTJ001 Inspect heavy commercial vehicle wheels and tyres

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to inspect heavy commercial vehicle wheels and tyres according to manufacturer specifications. It involves preparing for the task, inspecting the wheels and tyres, and completing workplace processes and documentation.

It applies to those undertaking a Vocational Education and Training in Schools (VETiS) or pre-vocational qualification as preparation to entering the automotive service and repair or automotive manufacturing industry.

The unit is designed for use in a highly supervised context and is not suitable for use in a vocational qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Mechanical - Heavy Vehicle

Unit Sector

Technical - Wheels and Tyres

© Commonwealth of Australia, 2025 Industry Skills Australia

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to inspect heavy commercial vehicle wheels and tyres	1.1 Task instruction is interpreted and wheels and tyres to be worked on are identified 1.2 Inspection information is sourced and interpreted 1.3 Potential hazards and risks associated with task are identified and reported to workplace supervisor 1.4 Tools, equipment and materials are selected and checked for serviceability
2. Inspect wheel and tyre assemblies	2.1 Inspection is carried out according to manufacturer specifications, workplace procedures and ***safety requirements*** 2.2 Inspection results are compared with manufacturer specifications 2.3 Inspection findings are reported according to workplace procedures
3. Complete work processes	3.1 Final inspection is made to ensure work meets task instruction and workplace standards, and vehicle or wheels and tyres are presented ready for use 3.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected 3.3 Tools and equipment are checked and stored according to workplace procedures 3.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	**Description**
Learning skills to:	• locate appropriate information.
Reading skills to:	• interpret key information from manufacturer and workshop literature when seeking inspection procedures and specifications relating to wheels and tyres.

© Commonwealth of Australia, 2025 Industry Skills Australia

Skills	Description
Writing skills to:	• legibly and accurately fill out workplace documentation using correct industry terminology and conventions.
Oral communication skills to:	• participate effectively in verbal exchanges using questioning and active listening to request, clarify and clearly convey information.
Numeracy skills to:	• measure tread depth for comparison to manufacturer specifications • measure tyre inflation pressures.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

Safety requirements must include:	• work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for working with:
	  • high air pressure
	  • tyres and split and multi-piece wheel rims.

Unit Mapping Information

Equivalent to AURHTJ1001 Inspect heavy commercial vehicle wheels and tyres

Assessment Requirements for AURHTJ001 Inspect heavy commercial vehicle wheels and tyres

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- inspect two front and two rear wheels and tyres of a heavy commercial vehicle, including:
  - wheels
  - wheel attachments
  - tyre condition
  - inflation fittings.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) occupational health and safety (OHS) procedures, equipment, material and personal safety requirements relating to inspecting heavy commercial vehicle wheels and tyres, including procedures for working with:
  - high air pressure
  - tyres and split and multi-piece wheel rims
- identification and function of wheels, rims and tyres, including:
  - types of rims and wheels
  - tyre construction
  - tyre coding
  - tyre inflation
  - wheel and rim attachments
- inspection procedures for heavy commercial vehicle wheels and tyres, including:
  - tyre inflation

© Commonwealth of Australia, 2025 Industry Skills Australia

- tyre tread depth
- flat spots
- cuts and damage
- sidewall condition
- abnormal tyre wear patterns
- wheel and rim condition
- wheel and rim attachments.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the heavy commercial vehicle wheels and tyres that they have inspected e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- task instructions
- manufacturer wheel and tyre specifications
- heavy commercial vehicle wheels and tyres as specified in the performance evidence n
- tools, equipment and materials appropriate for inspecting heavy commercial vehicle wheels and tyres.

Assessment Requirements for AURLTA001 Identify automotive mechanical systems and components

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- identify, locate and demonstrate knowledge of the operation of the following vehicle mechanical systems while carrying out workplace activities that involve all of the following systems:
  - engine systems
  - transmission and drivetrain
  - steering system
  - suspension system
  - fuel system
  - cooling system
  - braking system
  - exhaust system.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to identifying vehicle mechanical systems and components, including procedures for:
  - selecting and using personal protective equipment (PPE)
  - using tools and equipment
  - working safely
- basic theory and principles of automotive mechanical systems, including:
  - mechanical advantage

© Commonwealth of Australia, 2025 Industry Skills Australia

  - gear ratio
  - hydraulics
  - pneumatics
- identification, function and basic operation of vehicle mechanical systems and components, including:
  - engine systems
  - transmission and drivetrain
  - steering system
  - suspension system
  - fuel system
  - cooling system
  - braking system
  - exhaust system
- automotive terminology relating to mechanical systems.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles or machinery that they have worked on, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- workshop or task instructions
- information regarding basic mechanical principles and fundamentals
- information regarding vehicle mechanical systems and components
- workplace safety equipment, including PPE
- vehicle or a range of automotive mechanical systems and components
- automotive tools and equipment.

AURVTA005 Clean vehicles

Modification History

Release	Comment
Release 1	New unit of competency

Application

This unit describes the performance outcomes required to clean a vehicle. It requires the learner to plan and prepare the task; clean the vehicle interior, exterior and engine bay; and maintain the work area, tools and equipment.

It applies to those undertaking a Vocational Education and Training in Schools (VETiS) or pre-vocational qualification as preparation to entering the automotive service and repair or automotive manufacturing industry.

The unit is designed for use in a highly supervised context and is not suitable for use in a vocational qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section
1. Prepare to clean vehicle	1.1 ***Safety and environmental requirements*** are sourced and interpreted 1.2 ***Vehicle*** to be worked on is identified and manufacturer

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENTS	PERFORMANCE CRITERIA
	specifications and workplace procedures for vehicle cleaning are sourced and interpreted 1.3 Potential hazards and risks associated with task are identified and reported to workplace supervisor 1.4 ***Tools and equipment*** required for vehicle cleaning are identified according to manufacturer specifications
2. Clean vehicle interior and fittings	2.1 Tools, equipment and materials are selected and checked according to manufacturer specifications and workplace procedures 2.2 Vehicle is prepared prior to cleaning interior and fittings according to safety and environmental requirements 2.3 ***Interior surfaces*** are cleaned and vacuumed using correct cleaning materials and equipment, without causing damage to components, tools or equipment
3. Clean vehicle exterior and fittings	3.1 Tools, equipment and materials are selected and checked according to manufacturer specifications 3.2 Vehicle is prepared prior to cleaning exterior and fittings according to safety and environmental requirements 3.3 Vehicle exterior and fittings are cleaned using correct techniques and without causing damage to components, tools or equipment
4. Clean engine bay	4.1 Tools, equipment and materials are selected and checked according to manufacturer specifications and workplace procedures 4.2 Vehicle is prepared prior to cleaning engine bay according to safety and environmental requirements 4.3 Electronic components and electrical connections are protected from water ingress 4.4 Engine bay is cleaned without causing damage to components, tools or equipment
5. Complete work processes	5.1 Final inspection is made to ensure work is to workplace standards and vehicle is presented ready for use or storage according to workplace procedures 5.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored according to environmental requirements and workplace procedures 5.3 Tools and equipment are checked and stored according to workplace procedures, or tagged and reported where necessary 5.4 Problems with cleaning equipment or tools are reported according to workplace procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENTS	PERFORMANCE CRITERIA
	5.5 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Reading skills to:	• select and interpret key information from manufacturer specifications, safety requirements and workplace procedures for cleaning a vehicle • select and interpret key information from environmental requirements and workplace procedures to ensure a clean and safe work site.
Writing skills to:	• legibly and accurately fill out workplace documentation using correct industry terminology and conventions.
Oral communication skills to:	• participate effectively in verbal exchanges using questioning and active listening to request, clarify and clearly convey information.
Numeracy skills to:	• use basic mathematical operations, including addition, subtraction, multiplication and division, to calculate ratios and amounts of cleaning products.
Planning and organising skills to:	• plan own work requirements and prioritise actions to complete the vehicle cleaning task.
Self-management skills to:	• recognise own limitations when selecting and using tools and equipment and seek timely advice.
Problem-solving skills to:	• identify potential or actual hazards and take action to minimise risk • refer problems that cannot be readily resolved and seek assistance from workplace supervisor.
Technology skills to:	• set up and operate equipment and tools required to clean a vehicle.

© Commonwealth of Australia, 2025 Industry Skills Australia

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

Safety and environmental requirements must include:	• information about key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including:
	  • use of personal protective equipment, including safety glasses, ear protection, gloves and safety footwear
	  • applying procedures for preventing waste water from entering storm water systems.

Vehicle must include one or more of the following:	• passenger motor vehicle • light commercial • heavy vehicle • motor cycle • constructed vehicle.
Tools and equipment must include:	• hoses and washing equipment • chemicals and cleaning solutions • polishing equipment.
Interior surfaces must include:	• cloth • glass • leather.

Unit Mapping Information

No equivalent unit.

Modification History

Release	Comment
Release 1	New unit of competency

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria and foundation skills:

- safely and correctly clean a minimum of two different vehicles.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- key aspects of work health and safety (WHS), occupational health and safety (OHS) and environmental requirements, including:
  - personal protective equipment, including safety glasses, gloves, ear protection and safety footwear
  - operation of equipment and tools, including pressurised hoses
  - safety data sheets (SDS) and types, use and location of cleaning products
  - procedures for preventing waste water from entering storm water system
  - disposal of chemicals, oil and rubbish
- identification and location of vehicle components, including:
  - engine bay
  - engine electrical components
  - interior and exterior fittings
- types of vehicle body finishes
- vehicle cleaning procedures, including:
  - types, application and use of vehicle cleaning areas and vehicle bays
  - types, application and use of cleaning equipment and materials
  - component protection procedures, including:
    - protection of engine bay air intake and electrical and electronic components
    - protection of body electrical components
  - vehicle interior, exterior, fitting and engine bay cleaning procedures
  - cloth and leather interior surfaces cleaning procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

  - chrome and polished alloy wheels cleaning procedures
- clean-up and maintenance requirements for vehicle cleaning area.

Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles that they have cleaned, e.g. job card.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- personal protective equipment appropriate to the workplace
- a minimum of two different vehicles with cloth, glass and leather interior components, requiring cleaning
- vehicle cleaning tools, equipment and materials, including:
  - hoses and washing equipment
  - chemicals and cleaning solutions
  - polishing equipment
- vehicle cleaning area.

BSBADM409 Coordinate business resources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to determine and analyse existing and required resources, their effective application and the accountability for their use.

It applies to individuals with a broad knowledge of business resources who contribute well developed skills and knowledge to ensure adequate resources are available to perform the work of the organisation. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Administration – General Administration

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Determine resource requirements	1.1 Determine resource requirements in accordance with business and operational plans and organisational requirements 1.2 Provide opportunities to individuals and workgroups to contribute to the identification of resource requirements 1.3 Ensure resource expenditure is realistic and makes efficient use of available budget resources 1.4 Present recommendations on resource requirements in the

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	required format, style and structure using relevant business equipment and technology
2 Acquire and allocate resources	2.1 Acquire physical resources and services in accordance with organisational requirements 2.2 Check resources to ensure quality and quantity are in line with service agreements 2.3 Allocate resources promptly to enable achievement of workgroup objectives 2.4 Ensure consultation with individuals and teams on allocation of resources is participative and is conducted using appropriate interpersonal skills
3 Monitor and report on resource allocation and usage	3.1 Measure effectiveness of resource planning and assess against actual costs, identified shortfalls and surpluses 3.2 Develop and implement methods of monitoring resource use to enable timely and accurate reporting against business and operational plans 3.3 Identify improvements in resource planning through consultation and feedback, and implement in accordance with organisational requirements 3.4 Maintain records concerning equipment and resource purchases in accordance with organisational requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.2, 3.1, 3.3, 3.4	• Identifies and interprets information from organisational plans, policies and procedures
Writing	1.4, 2.1, 3.1-3.4	• Develops a range of documents using structure and vocabulary appropriate to audience, context and purpose
Oral Communication	1.2, 2.4, 3.3	• Participates effectively in spoken interactions using active listening and questioning to confirm and clarify understanding

© Commonwealth of Australia, 2025 Industry Skills Australia

Numeracy	1.3, 2.2, 3.1, 3.2	• Interprets and comprehends a range of mathematical information that is embedded in familiar texts • Calculates and compares numeric data to track expenditure
Navigate the world of work	1.1, 2.1, 3.3, 3.4	• Recognises and responds to explicit and implicit organisational procedures and protocols and legislative/regulatory requirements
Interact with others	1.2, 1.4, 2.4, 3.3	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role • Cooperates with others as part of familiar routine activities playing an active role in facilitating group interaction
Get the work done	1.1, 1.3, 1.4, 2.1, 2.2, 2.3, 3.1, 3.2	• Applies formal processes when planning complex tasks, producing plans with logically sequenced steps, reflecting an awareness of time constraints • Recognises and takes responsibility for addressing predictable problems in familiar work contexts • Utilises a range of features within digital applications to access, store and share information • Reflects on the ways in which variables impact on decision outcomes to identify improvement opportunities

Assessment Requirements for BSBADM409 Coordinate business resources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- monitor resource usage
- maintain records of resource requirements and usage
- calculate costs and expenditures in relation to use and maintenance of business resources
- acquire and allocate physical resources and services to team members
- consult and communicate with individuals and teams about acquiring and using resources
- monitor, review and report on resource use acquisition, allocation, use and procedures
- follow organisational policies and procedures in relation to business resource acquisition and monitoring.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the functions of business equipment used in an organisation and identify common faults
- identify organisational policies, plans and procedures in relation to business resource acquisition and monitoring.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the general administration field of work and include access to:

- records relating to business resources
- policies and procedures relating to resources

© Commonwealth of Australia, 2025 Industry Skills Australia

- case studies, and where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBADM502 Manage meetings

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage a range of meetings including overseeing the meeting preparation processes, chairing meetings, organising the minutes and reporting meeting outcomes.

It applies to individuals employed in a range of work environments who are required to organise and manage meetings within their workplace, including conducting or managing administrative tasks in providing agendas and meeting material. They may work as senior administrative staff or may be individuals with responsibility for conducting and chairing meetings in the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Administration – General Administration

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Prepare for meetings	1.1 Develop agenda in line with stated meeting purpose 1.2 Ensure style and structure of meeting are appropriate to its purpose 1.3 Identify meeting participants and notify them in accordance with organisational procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 Confirm meeting arrangements in accordance with requirements of meeting 1.5 Despatch meeting papers to participants within designated timelines
2 Conduct meetings	2.1 Chair meetings in accordance with organisational requirements, agreed conventions for type of meeting and legal and ethical requirements 2.2 Conduct meetings to ensure they are focused, time efficient and achieve the required outcomes 2.3 Ensure meeting facilitation enables participation, discussion, problem-solving and resolution of issues 2.4 Brief minute-taker on method for recording meeting notes in accordance with organisational requirements and conventions for type of meeting
3 Follow up meetings	3.1 Check transcribed meeting notes to ensure they reflect a true and accurate record of the meeting and are formatted in accordance with organisational procedures and meeting conventions 3.2 Distribute and store minutes and other follow-up documentation within designated timelines, and according to organisational requirements 3.3 Report outcomes of meetings as required, within designated timelines

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 3.1, 3.2	• Identifies and interprets information from complex texts including legislation, organisational policies and procedures • Compares final output with original notes to check for accuracy
Writing	1.1-1.5, 3.2, 3.3	• Addresses the context, purpose and audience when generating a range of texts • Prepares complex texts from notes using appropriate

© Commonwealth of Australia, 2025 Industry Skills Australia

		structure, and accurate spelling, grammar and punctuation • Records notes of meeting proceedings according to organisational requirements • Edits and corrects own work to ensure accuracy
Oral Communication	2.1-2.4	• Participates in verbal exchanges using appropriate style, tone and vocabulary for audience, context and purpose • Listens for specific information during meetings • Asks questions and listens to responses to clarify understanding
Numeracy	1.4, 1.5, 3.2, 3.3	• Recognises and interprets numerical information related to timeframes and budgets
Navigate the world of work	1.3, 2.1, 2.4, 3.1, 3.2	• Recognises and responds to both explicit and implicit organisational procedures and protocols and legislative/regulatory requirements
Interact with others	1.3, 1.5, 2.3, 3.2	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role • Cooperates with others as part of familiar activities, playing an active role in facilitating group interaction
Get the work done	1.1, 1.3, 1.4, 1.5, 2.1, 2.2, 2.4, 3.1, 3.2, 3.3	• Applies formal processes when planning complex tasks, producing plans with logically sequenced steps, reflecting an awareness of time constraints • Recognises and takes responsibility for addressing predictable problems in familiar work contexts

Assessment Requirements for BSBADM502 Manage meetings

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- apply conventions and procedures for formal and informal meetings including:
  - developing and distributing agendas and papers
  - identifying and inviting meeting participants
  - organising and confirming meeting arrangements
  - running the meeting and following up
- organise, take part in and chair a meeting
- record and store meeting documentation
- follow organisational policies and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline meeting terminology, structures, arrangements
- outline responsibilities of the chairperson and explain group dynamics in relation to managing meetings
- describe options for meetings including face-to-face, teleconferencing, web-conferencing and using webcams
- identify the relevant organisational procedures and policies regarding meetings, chairing and minutes including identifying organisational formats for minutes and agendas.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the general administration field of work and include access to:

© Commonwealth of Australia, 2025 Industry Skills Australia

- reference material in regard to meeting venues and technology, catering and transport suppliers
- organisational policies and procedures for managing meetings
- office supplies and equipment
- computers and relevant software
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBCMM301 Process customer complaints

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes skills and knowledge required to handle formal and informal negative feedback and complaints from customers.

It applies to individuals who apply a broad range of competencies and may exercise discretion and judgement using appropriate knowledge of products, customer service systems and organisational policies to provide technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Communication – Interpersonal Communication

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Respond to complaints	1.1 Process customer complaints using effective communication according to organisational procedures established under organisational policies, legislation or codes of practice 1.2 Obtain, document and review reports relating to customer complaints 1.3 Make decisions about customer complaints, taking into account applicable legislation, organisational policies and codes 1.4 Negotiate resolution of the complaint and obtain agreement

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	where possible 1.5 Maintain a register of complaints/disputes 1.6 Inform customer of the outcome of the investigation
2 Refer complaints	2.1 Identify complaints that require referral to other personnel or external bodies 2.2 Make referrals to appropriate personnel for follow-up in accordance with individual level of responsibility 2.3 Forward all documents and investigation reports 2.4 Follow-up appropriate personnel to gain prompt decisions
3 Exercise judgement to resolve customer service issues	3.1 Identify implications of issues for customer and organisation 3.2 Analyse, explain and negotiate appropriate options for resolution with customer 3.3 Propose viable options in accordance with appropriate legislative requirements and enterprise policies 3.4 Ensure matters for which a solution cannot be negotiated are referred to appropriate personnel

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.1, 3.3	• Recognises, identifies and interprets textual information to determine legislative, regulatory and organisational requirements
Writing	1.2, 1.5, 1.6, 2.2, 3.3	• Documents complaints and actions taken in accordance with organisational requirements • Records spoken information clearly and accurately for future reference
Oral Communication	1.1, 1.4, 1.6, 2.2, 2.4, 3.2, 3.3, 3.4	• Presents or requests information using words and non-verbal features appropriate to the audience and context • Uses listening and questioning techniques to gather information and confirm understanding

© Commonwealth of Australia, 2025 Industry Skills Australia

Navigate the world of work	1.1, 1.3, 2.1, 3.1, 3.3	• Takes personal responsibility for following organisational policies and procedures and legislative requirements
Interact with others	1.4, 2.2, 2.4, 3.2, 3.3, 3.4	• Follows organisational communication practices and procedures when referring complaints, seeking advice or negotiating outcomes
Get the work done	1.1, 1.2, 1.3, 1.4, 1.5, 2.2-2.4, 3.1	• Takes responsibility for planning, sequencing and completing tasks to achieve required outcomes • Addresses less predictable problems applying problem solving processes in determining solutions that meet organisational requirements • Uses the main features and functions of digital tools to complete work tasks

BSBCMM401 Make a presentation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0

Application

This unit covers the skills and knowledge required to prepare, deliver and review a presentation to a target audience.

This unit applies to individuals who may be expected to make presentations for a range of purposes, such as marketing, training and promotions. They contribute well developed communication skills in presenting a range of concepts and ideas.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Communication – Interpersonal Communication

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Prepare a presentation	1.1 Plan and document presentation approach and intended outcomes 1.2 Choose presentation strategies, format and delivery methods that match the characteristics of the target audience, location, resources and personnel needed 1.3 Select presentation aids, materials and techniques that suit the format and purpose of the presentation, and will enhance audience understanding of key concepts and central ideas

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 Brief others involved in the presentation on their roles/responsibilities within the presentation 1.5 Select techniques to evaluate presentation effectiveness
2 Deliver a presentation	2.1 Explain and discuss desired outcomes of the presentation with the target audience 2.2 Use presentation aids, materials and examples to support target audience understanding of key concepts and central ideas 2.3 Monitor non-verbal and verbal communication of participants to promote attainment of presentation outcomes 2.4 Use persuasive communication techniques to secure audience interest 2.5 Provide opportunities for participants to seek clarification on central ideas and concepts, and adjust the presentation to meet participant needs and preferences 2.6 Summarise key concepts and ideas at strategic points to facilitate participant understanding
3 Review the presentation	3.1 Implement techniques to review the effectiveness of the presentation 3.2 Seek and discuss reactions to the presentation from participants or from key personnel involved in the presentation 3.3 Utilise feedback from the audience or from key personnel involved in the presentation to make changes to central ideas presented

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.2	• Reviews and analyses documents to identify information relevant to a specific presentation
Writing	1.1, 3.3	• Develops material to convey ideas and information to target audience in an engaging way
Oral	1.4, 2.1, 2.2, 2.3,	• Presents information using words and non-verbal features appropriate to the audience and context

© Commonwealth of Australia, 2025 Industry Skills Australia

Communication	2.4, 2.5, 2.6, 3.2	• Uses listening and questioning techniques to gather information required to develop or modify presentations • Interprets audience reactions and changes words or non-verbal features accordingly
Interact with others	1.4, 2.1, 2.2, 2.4, 2.5, 2.6, 3.2	• Selects and uses appropriate conventions and protocols to encourage interaction or to present information • Demonstrates sophisticated control over oral, visual and written formats, drawing on a range of communication practices to achieve goals • Recognises the need to alter personal communication style in response to the needs or expectations of others
Get the work done	1.1-1.5, 2.2, 2.5, 3.1-3.3	• Takes responsibility for planning, sequencing and prioritising tasks and own workload to achieve outcomes • Uses feedback from others, analytical and lateral thinking to review current practices and develop new ideas • Uses the main features and functions of digital tools to complete work tasks

Assessment Requirements for BSBCMM401 Make a presentation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare and deliver presentations related to occupation or area of interest which demonstrate the use of:
  - effective presentation strategies and communication principles
  - aids and materials to support the presentation
- select and implement methods to review the effectiveness of own presentation and document any changes which would improve future presentations.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify information collection methods that will support review and feedback of presentations
- identify regulatory and organisational obligations and requirements relevant to presentations
- describe the principles of effective communication
- describe the range of presentation aids and materials available to support presentations.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals using interpersonal communication skills in the workplace and include access to:

- equipment, materials and business software packages for making a presentation
- business technology
- interaction with others.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessors must satisfy NVR/AQTF assessor requirements.

BSBCOM501 Identify and interpret compliance requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify and interpret the range of internal and external compliance requirements and obligations that must be fulfilled by an organisation.

It applies to individuals who use their sound theoretical knowledge of compliance and skills in identifying compliance requirements to plan, carry out and evaluate their own work and/or the work of a team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, licensing and risk – compliance

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Clarify the scope of operations	1.1 Identify and review the relevant range of operations and the sphere of business arrangements of the organisation 1.2 Conduct an analysis of the operations and business arrangements of the organisation and identify the functions, products and services that may be subject to compliance requirements 1.3 Develop and document work activity plans for determining

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	relevant compliance requirements 1.4 Obtain approval of plans from relevant organisational personnel
2 Identify compliance requirements	2.1 Conduct a search of information on internal and external compliance requirements using appropriate search resources, including relevant Australian and international standards 2.2 Ensure the search of compliance requirements scans across all relevant jurisdictions of laws, regulations, and industry and organisational codes and standards and identify pertinent compliance requirements 2.3 Progressively review information collected in terms of its relevance to the organisation's operations, services and products 2.4 Organise and store gathered information on relevant compliance requirements in an appropriate format for further analysis
3 Interpret, analyse and prioritise identified compliance requirements	3.1 Review and interpret collected information in terms of its relevance to the organisation's functions, services and products 3.2 Discuss and clarify with relevant internal or external personnel ambiguities, uncertainties and problems experienced in interpreting identified compliance information 3.3 Identify, analyse and prioritise relevant compliance requirements in terms of critical implications for the organisation and risks and consequence of possible breaches 3.4 Group pertinent compliance requirements into those that are critical and central to the organisation's operations, those that are important in some circumstances but are not central to the organisation's operations, and those that are pertinent but are incidental to the organisation's operations
4 Document compliance requirements	4.1 Organise and document outcomes of the identification and interpretation activities 4.2 Prepare and communicate reports of relevant compliance requirements and assessment of implications to relevant personnel performing specific compliance management functions

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Industry Skills Australia

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2, 2.3, 3.1, 3.3, 3.4	• Identifies, interprets, analyses or reviews complex texts from various sources to determine legal requirements, organisational operations, specific requirements and responsibilities
Writing	1.2, 1.3, 1.4, 2.4, 3.2, 3.3, 3.4, 4.1, 4.2	• Collates and compiles results of research and analysis using appropriate technical language and organisational formats • Develops materials to convey information, requirements or recommendations using language and structure appropriate to the audience
Oral Communication	1.4, 3.2, 4.2	• Presents specialised information using structure and language to suit the audience • Uses appropriate techniques, including active listening and questioning, to seek approvals and to confirm understanding
Navigate the world of work	1.2, 2.2, 3.1, 3.3	• Takes full responsibility for following policies, procedures and legislative requirements and identifies organisational implications of new legislation or regulations
Interact with others	1.4, 3.2, 4.2	• Identifies and uses appropriate conventions and practices when communicating with internal and external personnel
Get the work done	1.1, 1.3, 2.1-2.4, 3.1, 3.3, 3.4, 4.1, 4.2	• Plans, organises and implements activities required to identify, prioritise and document compliance requirements • Systematically gathers, analyses and evaluates all relevant information in order to make informed decisions about management of compliance breaches • Uses digital tools and systems to locate, organise and share information in effective ways

Assessment Requirements for BSBCOM501 Identify and interpret compliance requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse an organisation's operations to identify areas subject to compliance requirements
- interpret and analyse information from Australian and international standards, legislation, regulations, industry and organisational codes of practice to determine their relevance to the organisation
- document and store the outcomes of identification and interpretation activities related to the organisation's compliance requirements
- report on key compliance requirements and the implications of these for the organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline elements of compliance programs and related management systems breaches
- identify relevant Australian and international standards.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the compliance field of work and include access to:

- relevant Australian and international standards, laws, regulations, industry and organisational codes and standards
- appropriate computer resources for online searching
- case studies and, where possible, real situations.

BSBCOM601 Research compliance requirements and issues

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to explore and investigate various aspects and issues associated with compliance requirements and a related compliance program/management system.

It applies to individuals in regulatory authorities or large organisations with responsibilities related to identifying and investigating impacts, issues and policy implications of various aspects of compliance. It also applies to internal or external consultants who carry out research activities for clients on various aspects of compliance as a compliance researcher or member of a compliance management team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Compliance

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Clarify the purpose and scope of the research	1.1 Confirm and clarify the purpose and scope of the required compliance related research in collaboration with the client/s and relevant internal and/or external personnel 1.2 Document the purpose and scope of the required research in accordance with organisational and/or client requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2 Develop the research plan	2.1 Develop a suitable research methodology to enable sufficiently valid and reliable outcomes for the required research 2.2 Prepare the research plan for the proposed project 2.3 Obtain approval of plan from relevant internal and/or external personnel
3 Gather required research data	3.1 Collect relevant research data using appropriate research techniques and sources in accordance with the agreed research plan 3.2 Gather and interpret from appropriate sources, information on relevant Australian and international standards pertaining to compliance requirements and related systems 3.3 Organise, interpret and review collected data in terms of its relevance to the project's purpose and objectives 3.4 Discuss ambiguities, uncertainties and problems experienced while interpreting collected data and address appropriately in conjunction with relevant internal or external personnel 3.5 Organise interpreted research data for later analysis
4 Analyse collected data	4.1 Analyse data in accordance with planned methodology 4.2 Review and discuss outcomes of the analysis with relevant internal or external personnel
5 Determine research findings and outcomes	5.1 Interpret the outcomes of the data analysis in accordance with the project objectives 5.2 Develop and discuss preliminary findings, identified issues and related recommendations with relevant internal and/or external personnel 5.3 Undertake any additional data collection and analysis required to clarify aspects of findings, issues and related action options
6 Document and disseminate research outcomes	6.1 Prepare a draft report of the research outcomes, findings and recommendations in accordance with the agreed structure and format, and distribute to relevant internal and/or external personnel for comment and feedback 6.2 Edit the report based on the feedback obtained 6.3 Proofread the report prior to publication 6.4 Ensure the outcomes, findings and recommendations in the report are signed off by authorised personnel 6.5 Produce and disseminate the report to nominated internal

Assessment Requirements for BSBCOM601 Research compliance requirements and issues

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- access and interpret information on relevant Australian and international standards
- collaborate with others to identify and document the purpose and scope of the compliance research
- plan the research requirements including:
  - selecting an appropriate research methodology
  - preparing a research plan
  - getting approval for the plan from appropriate people
- carry out the research according to the approved plan including:
  - collecting, organising, analysing and interpreting data
  - reviewing and discussing analysis and preliminary outcomes with relevant l personnel
- prepare and distribute report of the research outcomes according to organisational requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain compliance requirements relevant to the organisational research methods
- explain elements of relevant compliance program/management systems
- describe quantitative and qualitative data analysis techniques relevant to compliance related research
- list relevant Australian and international standards
- identify relevant organisational policies and procedures
- identify sources of information relevant to compliance related research.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the compliance field of work and include access to:

- organisational information and Australian and international standards related to compliance requirements
- relevant personnel
- computer resources and business equipment
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

- respond to and report on customer feedback and complaints
- review client satisfaction using verifiable data
- consult and communicate effectively with relevant people
- develop and implement strategies and methods to improve customer service delivery including:
  - budgeting
  - promotion to staff
  - documentation and follow up.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the principles of customer service
- explain sources of information and techniques for identifying customer needs and reviewing customer satisfaction
- explain the organisational business structure, products and services related to customer service
- describe product and service standards and best practice models.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- office equipment
- business technology
- organisational policies and procedures for customer service
- examples of customer complaints and feedback
- client satisfaction data
- case studies and, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify assessment conditions
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop strategies to manage organisational systems that ensure products and services are delivered and maintained to standards agreed by the organisation.

It applies to individuals who supervise the provision of quality customer service within an organisation's procedures framework by others. At this level, individuals must exercise considerable discretion and judgement, using a range of problem solving and decision making strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Service

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Plan to meet internal and external customer	1.1 Investigate, identify, assess, and include the needs of customers in planning processes

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
requirements	1.2 Ensure plans achieve the quality, time and cost specifications agreed with customers
2 Ensure delivery of quality products and services	2.1 Deliver products and services to customer specifications within organisation's business plan 2.2 Monitor team performance to consistently meet the organisation's quality and delivery standards 2.3 Help colleagues overcome difficulties in meeting customer service standards
3 Monitor, adjust and review customer service	3.1 Develop and use strategies to monitor progress in achieving product and/or service targets and standards 3.2 Develop and use strategies to obtain customer feedback to improve the provision of products and services 3.3 Develop, procure and use resources effectively to provide quality products and services to customers 3.4 Make decisions to overcome problems and to adapt customer services, products and service delivery in consultation with appropriate individuals and groups 3.5 Manage records, reports and recommendations within the organisation's systems and processes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 3.1, 3.2, 3.3, 3.5	• Interprets and analyses textual information from a variety of sources and applies the knowledge that has been gained to evaluate standards for organisation's products and services
Writing	1.2, 3.1, 3.2, 3.3, 3.5	• Produces a range of text types to convey information, requirements or recommendations matching style of writing to purpose and audience
Oral Communication	1.1, 1.2, 2.1, 2.3, 3.2	• Clearly articulates systems and standards in a team environment using language suitable to diverse audiences • Uses listening and questioning techniques to obtain

© Commonwealth of Australia, 2025 Industry Skills Australia

		feedback and confirm understanding
Numeracy	1.2	• Interprets and comprehends mathematical information in organisation's business and customer service plans.
Navigate the world of work	2.1, 2.2, 3.1, 3.5	• Recognises and applies organisational protocols and meets expectations associated with own work
Interact with others	1.1, 2.3, 3.4	• Identifies and uses appropriate conventions and protocols when communicating with colleagues and customers • Collaborates with others, taking into account their strengths and experience, to achieve desired outcomes • Provides support in field of expertise to team
Get the work done	1.1, 1.2, 2.1, 2.2, 3.1-3.5	• Develops and implements plans using logical processes and monitors and evaluates progress against stated goals • Accepts responsibility for addressing complex or non-routine difficulties, applying problem solving processes in determining a solution. • Uses digital technology to access, organise and present information in a format that meets requirements

Assessment Requirements for BSBCUS501 Manage quality customer service

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0 Version created to clarify assessment conditions
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and manage organisational systems for quality customer service
- develop and review plans, policies and procedures for delivering and monitoring quality customer service
- implement policies and procedures to ensure quality customer service
- solve complex customer complaints and system problems that lead to poor customer service
- monitor and assist teams to meet customer service requirements
- develop, procure and use human and physical resources to support quality customer service delivery.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legislative and regulatory context of the organisation relevant to customer service
- describe organisational policy and procedures for customer service including handling customer complaints
- identify service standards and best practice models
- summarise public relations and product promotion
- outline techniques for dealing with customers including customers with specific needs

© Commonwealth of Australia, 2025 Industry Skills Australia

- explain techniques for solving complaints including the principles and techniques involved in the management and organisation of:
  - customer behaviour
  - customer needs research
  - customer relations
  - ongoing product and/or service quality
  - problem identification and resolution
  - quality customer service delivery
  - record keeping and management methods
  - strategies for monitoring, managing and introducing ways to improve customer service relationships
  - strategies to obtain customer feedback.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- legislation, regulations and codes of practice related to customer service
- business technology
- workplace documentation and resources
- complex customer complaints
- case studies and, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBFIA301 Maintain financial records

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to maintain daily financial records such as reconciling debtors' and creditors' systems, preparing and maintaining a general ledger and trial balance and includes activities associated with monitoring cash control for accounting purposes.

It applies to individuals who are skilled operators and apply a broad range of competencies in various work contexts and may exercise discretion and judgement using appropriate theoretical knowledge of financial records.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Finance – Financial Administration

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Maintain daily financial records	1.1 Correctly maintain daily financial records in accordance with organisational and legislative requirements for accounting purposes 1.2 Identify and rectify or refer discrepancies or errors in documentation or transactions to designated persons in accordance with organisational and legislative requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.3 Accurately credit and debit transactions and promptly enter into journals in accordance with organisational and legislative requirements
2 Maintain general ledger	2.1 Maintain general ledger in accordance with organisational and legislative requirements 2.2 Post transactions into general ledger in accordance with organisational and legislative reporting requirements 2.3 Reconcile systems for accounts payable and receivable with general ledger 2.4 Accurately prepare trial balance from general ledger in accordance with organisational and legislative requirements
3 Monitor cash control	3.1 Ensure cash flow is accurately accounted for in accordance with organisational and legislative requirements 3.2 Make and receive payments in accordance with organisational and legislative requirements 3.3 Collect or follow up outstanding accounts within designated timelines 3.4 Check payment documentation for accuracy of information and despatch to creditors within designated timeline

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.4, 3.1-3.4	• Recognises and interprets numerical and textual information to determine and complete required activities
Writing	1.3, 2.1-2.4, 3.1-3.4	• Integrates data from different sources and records numerical information in a format appropriate to context and purpose of material • Prepares clear and detailed information and instructions using format, structure and tone suitable to audience
Oral	1.2, 3.2, 3.3	• Explains financial issues and requirements clearly, using facts and examples, and uses listening and

© Commonwealth of Australia, 2025 Industry Skills Australia

Communication		questioning techniques to obtain sequenced instructions
Numeracy	1.1-1.3, 2.1-2.4, 3.1-3.4	• Uses a limited range of mathematical calculations to reconcile amounts using whole numbers and decimals and arrange/compare numerical information
Navigate the world of work	1.1-1.3, 2.1-2.4, 3.1-3.3	• Recognises, understands and monitors adherence to legislative and organisational requirements in undertaking own work
Interact with others	3.3, 3.4	• Understands the importance of using appropriate practices and protocols when handling confidential information
Get the work done	1.1-1.3, 2.1-2.4, 3.1-3.4	• Takes responsibility for own workload and monitors adherence to specified goals and timelines • Uses digital technologies to access, record, store, organise and compile data as required

Assessment Requirements for BSBFIM501 Manage budgets and financial plans

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use financial skills to work with and interpret budgets, ageing summaries, cash flow, petty cash, Goods and Services Tax (GST), and profit and loss statements
- communicate with relevant people to clarify budget/financial plans, negotiate changes and disseminate information
- prepare, implement and modify financial contingency plans
- monitor expenditure and control costs
- support and monitor team members
- report on budget and expenditure
- review and make recommendations for improvements to financial processes
- meet record keeping requirements for the Australian Taxation Office (ATO) and for auditing purposes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe basic accounting principles
- identify and explain the relevant legislation and current requirements of the Australian Taxation Office, including the Goods and Services Tax (GST)
- explain the key requirements for financiall record keeping and auditing
- describe the principles and techniques involved in managing:
  - budgeting
  - cash flows
  - electronic spreadsheets

© Commonwealth of Australia, 2025 Industry Skills Australia

- GST
- ledgers and financial statements
- profit and loss statements.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial management field of work and include access to:

- resources and documentation used in the workplace
- workplace policies and procedures
- workplace budgets and financial plans
- business technology
- case studies and, where available, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

- prepare job descriptions
- use job descriptions to support sourcing, selecting and appointing suitable staff
- use different advertising channels to promote vacancies and/or establish a potential talent pool
- consult with managers to gain approvals
- develop selection criteria and interview questions in consultation with relevant personnel
- schedule interviews and advise relevant people of times, dates and venues
- participate in interviews and other selection techniques including assessing candidates against selection criteria to short list them
- obtain referees' reports
- prepare and distribute a selection report including feedback to give unsuccessful candidates
- advise unsuccessful candidates of the results
- secure preferred candidate’s agreement and provide an employment contract
- advise other staff of the successful candidate and arrange induction.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify documentation required for recruitment, selection and induction
- explain human resources life cycle and the place of recruitment and selection
- identify legislation relevant to recruitment, selection and induction of staff
- describe channels and technology to advertise vacancies

© Commonwealth of Australia, 2025 Industry Skills Australia

- explain a range of interviewing techniques and other selection processes and their application.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – human resource development field of work and include access to:

- workplace policies and procedures
- business technology
- position descriptions
- legislation, regulations, Codes and Standards relevant to staff recruitment, selection and induction
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBHRM513 Manage workforce planning

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage planning in relation to an organisation's workforce including researching requirements, developing objectives and strategies, implementing initiatives and monitoring and evaluating trends.

It applies to individuals who are human resource managers or staff members with a role in a policy or planning unit that focuses on workforce planning.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Workforce Development – Human Resource Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Research workforce requirements	1.1 Review current data on staff turnover and demographics 1.2 Assess factors that may affect workforce supply 1.3 Establish the organisation's requirements for a skilled and diverse workforce
2 Develop workforce objectives and strategies	2.1 Review organisational strategy and establish aligned objectives for modification or retention of the workforce 2.2 Consider strategies to address unacceptable staff turnover, if

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	required 2.3 Define objectives to retain required skilled labour 2.4 Define objectives for workforce diversity and cross-cultural management 2.5 Define strategies to source skilled labour 2.6 Communicate objectives and rationale to relevant stakeholders 2.7 Obtain agreement and endorsement for objectives and establish targets 2.8 Develop contingency plans to cope with extreme situations
3 Implement initiatives to support workforce planning objectives	3.1 Implement action to support agreed objectives for recruitment, training, redeployment and redundancy 3.2 Develop and implement strategies to assist workforce to deal with organisational change 3.3 Develop and implement strategies to assist in meeting the organisation's workforce diversity goals 3.4 Implement succession planning system to ensure desirable workers are developed and retained 3.5 Implement programs to ensure workplace is an employer of choice
4 Monitor and evaluate workforce trends	4.1 Review workforce plan against patterns in exiting employee and workforce changes 4.2 Monitor labour supply trends for areas of over- or under-supply in the external environment 4.3 Monitor effects of labour trends on demand for labour 4.4 Survey organisational climate to gauge worker satisfaction 4.5 Refine objectives and strategies in response to internal and external changes and make recommendations in response to global trends and incidents 4.6 Regularly review government policy on labour demand and supply 4.7 Evaluate effectiveness of change processes against agreed objectives

Assessment Requirements for BSBHRM513 Manage workforce planning

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- review and interpret information from a range of internal and external sources to identify:
  - current staff turnover and demographics
  - labour supply trends factors that may affect workforce supply
  - organisation's workforce requirements objectives and strategies
- manage workforce planning including developing, implementing, monitoring and reviewing strategies to meet workforce needs
- review relevant trends and supply and demand factors that will impact on an organisation's workforce
- develop a workforce plan that includes relevant research and specific strategies to ensure access to a skilled and diverse workforce.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain current information about external labour supply relevant to the specific industry or skill requirements of the organisation
- outline industrial relations relevant to the specific industry
- describe labour force analysis and forecasting techniques.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – human resource development field of work and include access to:

© Commonwealth of Australia, 2025 Industry Skills Australia

- an appropriate range of documentation and resources normally used in the workplace
- organisational strategic and operational plans
- organisational policies and procedures
- business technology.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINM301 Organise workplace information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to gather, organise and apply workplace information in the context of an organisation's work processes and knowledge management systems.

It applies to individuals who perform a defined range of skilled operations in various work contexts. They may exercise discretion and judgement using appropriate knowledge of information management to provide technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Information Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Collect and assess information	1.1 Access product and service information in accordance with organisational requirements 1.2 Ensure methods of collecting information are reliable and make efficient use of available time and resources 1.3 Assess information for clarity, accuracy, currency and relevance to intended tasks 1.4 Use interpersonal skills to access relevant information from

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	teams and individuals
2 Organise information	2.1 Organise information in a format suitable for analysis, interpretation and dissemination in accordance with organisational requirements 2.2 Use appropriate technology/systems to maintain information in accordance with organisational requirements 2.3 Collate information and materials and communicate to relevant designated persons 2.4 Identify difficulties organising and accessing information and solve collaboratively with individuals and team members 2.5 Update and store information in accordance with organisational requirements and systems
3 Review information needs	3.1 Actively seek feedback on clarity, accuracy and sufficiency of information to ensure relevance of information and system 3.2 Review the contribution of information to decision making and implement appropriate modifications to collection processes 3.3 Identify future information needs and incorporate modifications to collection processes 3.4 Document future information needs and incorporate in modifications to reporting processes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.3, 2.5, 3.2	• Recognises and assesses textual information to complete tasks according to requirements
Writing	2.1, 2.2, 2.3, 2.5, 3.1, 3.4	• Completes workplace records, forms and documentation accurately using correct format, accurate spelling and grammar and terminology specific to requirements
Oral Communication	1.4, 2.3, 2.4, 3.1	• Elicits the view and opinions of others and obtains information by listening and questioning

© Commonwealth of Australia, 2025 Industry Skills Australia

		• Participates in a verbal exchange of ideas/solutions using clear language to contribute information and convey issues
Navigate the world of work	1.1, 2.1, 2.5	• Understands rights and responsibilities and complies with explicit policies and procedures and legal and regulatory requirements
Interact with others	1.4, 2.3, 2.4, 3.1	• Identifies and follows accepted communication practices and protocols • Complies with work instructions and contributes to work group discussions using accepted conventions
Get the work done	1.1, 1.2, 2.1, 2.2, 2.4, 3.2, 3.3	• Plans and implements routine tasks and workload making decisions about sequencing and timing • Makes low impact decisions within familiar situations, based on a range of predefined or routine solutions, and evaluates the effectiveness of the outcome • Uses digital technology to access and record information and to communicate with others

Assessment Requirements for BSBINM301 Organise workplace information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- efficiently and effectively gather, assess, organise and use workplace information as part of own job role
- provide accurate information for defined purposes
- maintain and handle data and documents systematically
- use business technology to manage information
- communicate with colleagues and clients using effective interpersonal skills to obtain and check workplace information
- apply relevant legislation and regulations to workplace information
- monitor, review and modify information processes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how legislation and regulations may affect the gathering organising and distribution of workplace information
- describe methods for checking validity of information and its sources
- describe organisational recordkeeping and filing systems, security procedures and safe recording practices
- identify workplace policies and procedures relating to workplace information.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – information management field of work and include access to:

- business technology
- workplace policies and procedures
- relevant legislation and codes of practice
- office equipment and resources
- examples of information documents found in the workplace
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINM401 Implement workplace information system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement and review the workplace information system. It involves the identification, acquisition, initial analysis and use of appropriate information which plays a significant part in the organisation's effectiveness.

It applies to individuals whose work will normally be carried out within routine and non-routine methods and procedures which require planning and evaluation, leadership and guidance of others, and some discretion and judgement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Information Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Identify and source information needs	1.1 Determine and locate information required by teams 1.2 Acquire and review information held by the organisation to determine suitability, accessibility, currency and reliability according to organisational policies
2 Collect, analyse and report information	2.1 Collect information, which is adequate and relevant to the needs of teams, in a timely manner

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.2 Ensure information is in a format suitable for analysis, interpretation and dissemination 2.3 Analyse information to identify and report relevant trends and developments in terms of the needs for which it was acquired
3 Implement information systems	3.1 Implement management information systems effectively to store, retrieve and regularly review data for decision making purposes 3.2 Use technology available in the work area to manage information effectively 3.3 Submit recommendations for improving the information system to designated persons and/or groups
4 Prepare for information system changes	4.1 Collect information about information system future needs in consultation with colleagues, including those who have a specialist role in resource management 4.2 Ensure estimates of information system future needs reflect the organisation's business plans, and customer and supplier requirements 4.3 Support proposals to secure resources by clearly presenting submissions that describe realistic options, benefits, costs and outcomes 4.4 Prepare team members to work with new technology and information system changes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 4.1, 4.2, 4.3, 4.4	• Critically analyses complex documentation from a variety of sources and consolidates information relating to specific criteria to determine requirements
Writing	1.2, 2.1, 2.3, 3.1, 3.3, 4.1, 4.2, 4.3, 4.4	• Develops material for a specific audience using clear and detailed language in order to convey explicit information, requirements and recommendations
Oral	1.1, 3.3, 4.1, 4.3, 4.4	• Uses active listening and questioning and reading of verbal and non-verbal signals to convey and clarify

© Commonwealth of Australia, 2025 Industry Skills Australia

Communication		information and to confirm understanding
Numeracy	4.1-4.3	• Selects from and uses a variety of developing mathematical and problem solving strategies to ensure estimates of information reflect the business plan and staff requirements
Navigate the world of work	1.2	• Takes responsibility for following policies, procedures and legislative requirements and identifies organisational implications of new legislation or regulation
Interact with others	1.1, 3.3, 4.1, 4.3, 4.4	• Selects and uses appropriate conventions and protocols when communicating with clients and co-workers in a range of work contexts • Cooperates with others and contributes to work practices where joint outcomes are expected and deadlines are to be met
Get the work done	1.1, 1.2, 2.1, 2.3, 3.1, 3.2, 4.1, 4.2	• Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes • Contributes to continuous improvement of current work practices by applying basic principles of analytical thinking • Uses familiar digital technologies and systems to access, enter, present and communicate data and information

BSBINM501 Manage an information or knowledge management system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to organise training for others for an information or knowledge management system and to manage the use of the system.

It applies to individuals who are responsible for seeing that key information and corporate knowledge are retained, accessible to others and improve business outcomes.

The unit applies to information or knowledge management systems which comprise policies, protocols, procedures and practices to manage information or knowledge within the organisation and among relevant stakeholders.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Information Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Organise learning to use information or knowledge management system	1.1 Identify learning needs of relevant personnel and stakeholders for input into and use of an information or knowledge management system 1.2 Identify and secure human, financial and physical resources

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	required for learning activities to use an information or knowledge management system 1.3 Organise and facilitate learning activities 1.4 Promote and support use of the system throughout the organisation 1.5 Monitor and document effectiveness of learning activities
2 Manage use of information or knowledge management system	2.1 Ensure implementation of policies and procedures for the information or knowledge management system are monitored for compliance, effectiveness and efficiency 2.2 Address implementation issues and problems as they arise 2.3 Monitor integration and alignment with data and information systems 2.4 Collect information on achievement of performance measures 2.5 Manage contingencies such as system failure or technical difficulties by accessing technical specialist help as required
3 Review use of information or knowledge management system	3.1 Analyse effectiveness of system and report on strengths and limitations of the system 3.2 Review business and operational plan and determine how effectively the system is contributing to intended outcomes 3.3 Make recommendations for improvement to system, policy or work practices

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.5, 2.1-2.5, 3.1-3.3	• Researches and critically analyses documentation from a variety of sources to determine requirements
Writing	1.1-1.5, 2.1-2.4, 3.2, 3.3	• Prepares and produces documentation for a specific audience using clear and detailed language to convey explicit information, requirements and recommendations

© Commonwealth of Australia, 2025 Industry Skills Australia

Oral Communication	1.1, 1.2, 1.3, 1.4, 2.2, 2.5, 3.3	• Presents information using structure and language to suit the audience • Uses active listening and questioning and reading of verbal and non-verbal signals to clarify information and to confirm understanding
Navigate the world of work	2.1, 3.3	• Takes full responsibility for following policies, procedures and legislative requirements and identifies organisational implications of new legislation or regulation • Modifies or develops organisational policies and procedures to comply with legislative requirements and organisation goals
Interact with others	1.1-1.4, 2.5, 3.3	• Implements strategies for a diverse range of colleagues and clients in order to build rapport and foster strong relationships • Collaborates with others sharing information to build strong work groups and avoid behaviours that are not conducive to a productive environment • Elicits feedback and provides feedback to others in order to improve self or workgroup behaviours
Get the work done	1.1-1.5, 2.1-2.5, 3.1, 3.2	• Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness • Monitors progress of plans and schedules and reviews and changes them to meet new demands and priorities • Applies systematic and analytical processes to address problems and make decisions in complex situations • Investigates new and innovative ideas as a means to continuously improve, work practices and processes • Uses and investigates new digital technologies and applications to manage and manipulate data and communicate effectively with others

Assessment Requirements for BSBINM501 Manage an information or knowledge management system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify learning needs and plan and implement learning activities to enable personnel to use information or knowledge management system including
  - providing human, financial and physical resources as required
  - use of coaching, mentoring, information sessions, workshops, training programs and e-learning as appropriate
- monitor performance and address issues and contingencies as they arise including
  - accessing technical specialists as required
  - correct application of policies and procedures for the information or knowledge management system
  - alignment and effectiveness of the policies and procedures
  - effectiveness of information or knowledge management system for intended outcomes
- recommend improvements to systems, policies and practices as appropriate.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline relevant legislation, codes of practice and national standards relevant to privacy, freedom of information and knowledge management
- explain organisational policies and procedures including:
  - records management
  - information management
  - customer service
  - commercial confidentiality

© Commonwealth of Australia, 2025 Industry Skills Australia

- describe the organisational operations and existing data and information systems.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – information management field of work and include access to:

- relevant legislation, regulation, standards and codes
- relevant workplace systems, documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINN502 Build and sustain an innovative work environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to create an environment that enables and supports the application of innovative practice focusing on a holistic approach to the integration of innovation across all areas of work practice.

It applies to individuals working in leadership or management roles in any industry or community context. The individual could be employed by the organisation, but may also be an external contractor, the leader of a cross organisation team or of a self-formed team of individuals. The work group could be permanent or temporary in nature.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and Innovation – Innovation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Lead innovation by example	1.1 Make innovation an integral part of leadership and management activities 1.2 Demonstrate positive reception of ideas from others and provide constructive advice 1.3 Establish and maintain relationships based on mutual respect and trust

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 Take considered risks to open up opportunities for innovation 1.5 Regularly evaluate own approaches for consistency with the wider organisational or project context
2 Establish work practices that support innovation	2.1 Consult on and establish working conditions that reflect and encourage innovative practice 2.2 Introduce and maintain workplace procedures that foster innovation and allow for rigorous evaluation of innovative ideas 2.3 Facilitate and participate in collaborative work arrangements to foster innovation 2.4 Build and lead teams to work in ways that maximise opportunities for innovation
3 Promote innovation	3.1 Acknowledge suggestions, improvements and innovations from all colleagues 3.2 Find appropriate ways of celebrating and promoting innovation 3.3 Promote and reinforce the value of innovation according to the vision and objectives of the organisation or project 3.4 Promote and support the evaluation of innovative ideas within the wider organisational or project context
4 Create a physical environment which supports innovation	4.1 Evaluate the impact of the physical environment in relation to innovation 4.2 Collaborate with colleagues about ideas for enhancing the physical work environment before taking action 4.3 Consider potential for supporting innovation when selecting physical resources and equipment 4.4 Design, fit-out and decorate workspaces to encourage creative mindsets, collaborative working and the development of positive workplace relationships
5 Provide learning opportunities	5.1 Pro-actively share relevant information, knowledge and skills with colleagues 5.2 Provide or encourage formal and informal learning opportunities to help develop the skills needed for innovation 5.3 Create opportunities in which individuals can learn from the experience of others

© Commonwealth of Australia, 2025 Industry Skills Australia

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.5, 2.2, 4.1, 5.1	• Interprets and evaluates information that may deal with complex ideas related to issues both within and outside a given workplace context
Writing	3.3, 3.4, 5.1	• Develops information for others using language to suit the context and audience
Oral Communication	1.2, 2.1, 2.3, 3.1, 3.3, 3.4, 5.1	• Presents ideas and concepts to a range of audiences using structure and language to suit the audience • Uses active listening and questioning to discuss and clarify information and to confirm understanding
Navigate the world of work	1.1, 1.5, 2.1, 2.2, 3.3, 5.1, 5.2	• Takes responsibility for implementing practices and procedures to achieve organisational objectives in innovation according to role requirements • Stays up to date with professional development options to provide relevant information to staff
Interact with others	1.2, 1.3, 2.3, 2.4, 3.1-3.4, 4.2, 5.1, 5.3	• Uses appropriate communication techniques to build rapport and foster strong relationships with co-workers in a range of work contexts • Uses inclusive and collaborative techniques to share, promote and convey complex information about new ideas and systems within the workplace
Get the work done	1.1, 1.4, 1.5, 2.1, 3.2, 3.3, 4.1, 4.3, 4.4, 5.2, 5.3	• Accepts responsibility for planning and implementing tasks and practices to achieve organisational goals, negotiating key aspects with others and taking into account current capabilities and needs • Develops new and innovative ideas through exploration, evaluation, analysis and critical thinking • Facilitates a climate where people feel comfortable suggesting and discussing improvements or new ideas • Uses problem solving processes to identify, assess and respond to challenges and risks around innovation

Performance Evidence

Evidence of the ability to maximise opportunities for innovation by:

- establishing procedures and practices that foster innovation including:
  - collaborative work arrangements
  - building team capacity to contribute to innovation
  - providing formal and informal learning opportunities
  - evaluating ideas
  - celebration and promotion of innovation
  - consultation
  - respectful communications and sharing of ideas and feedback
- reinforcing the value of innovation to the vision and objectives of the organisation,
- model ling behaviour including being receptive to ideas, giving constructive advice, evaluating own work, establishing and maintaining relationships based on mutual respect and trust, taking considered risks that provide opportunities for innovation
- evaluating how the physical environment can be enhanced to support innovation and collaboration and collaborating on ideas to make improvements including in the selection of physical resources and equipment, and the design, fit-out and decoration of the workspaces
- making changes to a workspace that will encourage innovation in at least one of
  - design
  - fit-out
  - decoration.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

© Commonwealth of Australia, 2025 Industry Skills Australia

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the concepts and theories of innovation and how these link to innovation in practice
- explain the context for innovation in the workplace including core business values, overall objectives, broader environmental context and the need to ensure the value and benefit of innovative ideas and projects
- discuss the factors and tools that can motivate individuals to use creative thinking and apply innovative work practices
- research the legislative framework that impacts on operations in the relevant workplace context
- explain how different approaches to management and leadership can support or hinder innovation
- discuss typical challenges and barriers to innovation within teams and organisations and ways of overcoming these including rewarding and celebrating innovation, coaching and learning, modelling behaviour and managing the physical environment.
-

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBITU101 Operate a personal computer

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to start up and use a range of basic functions on a personal computer or business computer terminal.

It applies to individuals who perform a range of routine computer tasks in the various sectors of the business services industry and generally work under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Start computer, system information and features	1.1 Adjust workspace, furniture and equipment to suit user ergonomic requirements 1.2 Ensure work meets organisational and work health and safety (WHS) requirements for computer operation 1.3 Start computer or log on according to user procedures 1.4 Identify basic functions and features using system information 1.5 Customise desktop configuration, if necessary, with assistance from appropriate persons

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.6 Use help functions as required
2 Navigate and manipulate desktop environment	2.1 Open, close and access features by selecting correct desktop icons 2.2 Open, resize and close desktop windows by using correct window functions 2.3 Create shortcuts onto the desktop, if necessary, with assistance from appropriate persons
3 Organise files using basic directory and folder structures	3.1 Create folders/subfolders with suitable names 3.2 Save files with suitable names in appropriate folders 3.3 Rename and move folders/subfolders and files as required 3.4 Identify folder/subfolder and file attributes 3.5 Move folders/subfolders and files using cut and paste, and drag and drop techniques 3.6 Save folders/subfolders and files to appropriate media where necessary 3.7 Search for folders/subfolders and files using appropriate software tools 3.8 Restore deleted folder/subfolders and files as necessary
4 Print information	4.1 Print information from installed printer 4.2 View progress of print jobs and delete as required 4.3 Change default printer, if installed
5 Shut down computer	5.1 Close all open applications 5.2 Shut down computer according to user procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 1.5, 1.6, 3.1-3.8, 4.1-4.3, 5.1, 5.2	• Recognises textual information within internal procedures and technical documents to determine and complete work requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

Writing	1.3, 3.1-3.3, 3.7	• Inputs information using familiar text types and records numerical and textual information for file naming conventions
Oral Communication	1.5, 2.3	• Asks simple questions and comprehends answers that contain short and explicit information
Navigate the world of work	1.1-1.3, 5.2	• Recognises and follows organisational procedures and legislative responsibilities, with particular reference to health and safety
Interact with others	1.5, 2.3	• Uses appropriate communication practices to seek guidance from more experienced work colleagues
Get the work done	1.3-1.6, 2.1-2.3, 3.1-3.8, 4.1-4.3, 5.1, 5.2	• With guidance, is beginning to understand and use the specific functions and features of digital systems and tools

Assessment Requirements for BSBITU101 Operate a personal computer

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- adjust equipment, furniture and workspace to suit individual ergonomic requirements
- follow organisational and WHS requirements when operating a computer
- follow user procedures and system information when using the basic functions on a computer, seeking assistance when necessary
- use desktop icons and create shortcuts
- create and manipulate folders and subfolders
- check and delete print jobs and change default printer
- correctly shut down software applications and the computer.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the main work health and safety requirements for working with a computer
- list the main points to consider when setting up an ergonomic work environment
- list the main components of the computer system, and briefly explain what each one does
- briefly explain the functions of the operating system
- outline the organisation’s conventions for naming files

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

© Commonwealth of Australia, 2025 Industry Skills Australia

- organisational policies and procedures
- information about work health and safety requirements.
- computer user and system information
- suitable workspace including a personal computer or computer terminal with relevant software and printer.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBITU102 Develop keyboard skills

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop basic keyboard skills using touch typing techniques in a broad range of settings.

It applies to individuals who perform a range of mainly routine tasks and generally work under direct supervision using limited practical skills and fundamental knowledge.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Use safe work practices	1.1 Adjust workspace, furniture and equipment to suit user ergonomic requirements 1.2 Ensure work meets organisational and work health and safety (WHS) requirements for computer operation
2. Identify and develop keyboard skills	2.1 Identify and apply keyboard functions for both alpha and numeric keyboard functions 2.2 Apply touch typing technique to complete a task 2.3 Develop speed and accuracy in accordance with workplace

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	requirements for level of responsibility
3. Check accuracy	3.1 Proofread document carefully to identify errors 3.2 Amend document, correct errors and complete a final accuracy check

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.3, 3.1, 3.2	• Comprehends textual information in workplace documents to confirm work requirements • Checks own work to identify errors
Writing	2.2, 2.3, 3.2	• Enters and edits numerical and textual information according to a defined format
Navigate the world of work	1.1, 1.2, 2.3	• Complies with organisational and legislative requirements and meets expectations associated with own role
Get the work done	2.1-2.3, 3.1, 3.2	• Understands the specific functions and features of digital tools and uses these to perform work tasks

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Speed and accuracy must be:	• consistent with degree of experience of operator • relevant to level of responsibility.

Assessment Requirements for BSBITU102 Develop keyboard skills

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- follow ergonomic and organisational and work health and safety (WHS) requirements
- use keyboard functions to enter alpha and numeric data
- develop touch-typing techniques and speed and accuracy
- proofread and edit documents.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as WHS
- identify organisational benchmarks for keyboarding.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- industry software packages
- organisational policies and procedures
- relevant legislation
- relevant workplace documentation and resources.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLDR403 Lead team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit defines skills, knowledge and outcomes required to plan and supervise the performance of the team and develop team cohesion.

It applies team leaders, supervisors and new emerging managers who have an important leadership role in the development of efficient and effective work teams.

Leaders at this level also provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership - Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan to achieve team outcomes	1.1 Lead the team to identify, establish and document team purpose, roles, responsibilities, goals, plans and objectives in consultation with team members 1.2 Engage team members to incorporate innovation and

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	productivity measures in work plans 1.3 Lead and support team members in meeting expected outcomes
2. Lead team to develop cohesion	2.1 Provide opportunities for input of team members into planning, decision making and operational aspects of work team 2.2 Encourage and support team members to take responsibility for own work and to assist each other in undertaking required roles and responsibilities 2.3 Provide feedback to team members to encourage, value and reward individual and team efforts and contributions 2.4 Recognise and address issues, concerns and problems identified by team members or refer to relevant persons as required 2.5 Model expected behaviours and approaches
3. Participate in and facilitate work team	3.1 Actively encourage team members to participate in and take responsibility for team activities and communication processes 3.2 Give the team support to identify and resolve problems which impede its performance 3.3 Ensure own contribution to work team serves as a role model for others and enhances the organisation's image within the work team, the organisation and with clients/customers
4. Liaise with management	4.1 Maintain open communication with line manager/management at all times 4.2 Communicate information from line manager/management to the team 4.3 Communicate unresolved issues, concerns and problems raised by the team/team members to line manager/management and ensure follow-up action is taken 4.4 Communicate unresolved issues, concerns and problems related to the team/team members raised by line managers/management to the team and ensure follow-up to action is taken

Foundation Skills

BSBLDR511 Develop and use emotional intelligence

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit covers the development and use of emotional intelligence to increase self-awareness, self-management, social awareness and relationship management in the context of the workplace.

It includes identifying the impact of own emotions on others in the workplace, recognising and appreciating the emotional strengths and weaknesses of others, promoting the development of emotional intelligence in others and utilising emotional intelligence to maximise team outcomes.

It applies to managers who are required to identify, analyse, synthesise and act on information from a range of sources and who deal with unpredictable problems as part of their job role. They use initiative and judgement to organise the work of self and others and plan, evaluate and co-ordinate the work of teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership - Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify the impact of	1.1 Identify and use evaluation criteria to determine own emotional

Assessment Requirements for BSBLDR511 Develop and use emotional intelligence

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Performance Evidence

Performance Evidence

Evidence of the ability to:

- conduct an analysis to identify own emotional strengths, weaknesses, stressors, emotional states and triggers, incorporating feedback from others
- identify workplace situations and environments that may trigger an emotional response
- model behaviours that demonstrate management of emotions
- recognise the impact that cultural behaviours and beliefs may have on workplace interactions
- recognise and respond to the emotional states of others
- use emotional intelligence of self and others to enhance team performance
- promote the development of emotional intelligence in others.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role:

- Key features of emotional intelligence principles and strategies
- Key elements of the relationship between emotionally effective people and the attainment of business objectives
- Key strategies for communicating with a diverse workforce which has varying cultural expressions of emotion
- Key features of emotional intelligence in the context of building workplace relationships.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies or, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBMGT401 Show leadership in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead teams and individuals by modelling high standards of conduct to reflect the organisation's standards and values.

It applies to individuals who are making the transition from being a team member to taking responsibility for the work and performance of others and providing the first level of leadership within the organisation. These managers have a strong influence on the work culture, values and ethics of the teams they supervise.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Model high standards of management performance and behaviour	1.1 Ensure management performance and behaviour meets the organisation’s requirements 1.2 Ensure management performance and behaviour serves as a positive role model for others 1.3 Develop and implement performance plans in accordance with organisation’s goals and objectives 1.4 Establish and use key performance indicators to meet

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	organisation's goals and objectives
2. Enhance organisation's image	2.1 Use organisation's standards and values in conducting business 2.2 Question, through established communication channels, standards and values considered to be damaging to the organisation 2.3 Ensure personal performance contributes to developing an organisation which has integrity and credibility
3. Make informed decisions	3.1 Gather and organise information relevant to the issue/s under consideration 3.2 Facilitate individual's and team's active participation in decision-making processes 3.3 Examine options and assess associated risks to determine preferred course/s of action 3.4 Ensure decisions are timely and communicate them clearly to individuals and teams 3.5 Prepare plans to implement decisions and ensure they are agreed by relevant individuals and teams 3.6 Use feedback processes effectively to monitor the implementation and impact of decisions

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.4, 2.1, 3.1, 3.3, 3.5, 3.6	• Gathers, interprets and analyses text relating to organisational goals, standards and values to aid planning and decision making
Writing	1.3, 1.4, 3.1, 3.3, 3.5, 3.6	• Records and reports key information related to the organisational goals, standards and objectives • Researches, plans and prepares documentation for relevant stakeholders
Oral Communication	1.2, 1.3, 2.2, 2.3, 3.2, 3.4, 3.5, 3.6	• Uses appropriate structure and language when developing performance plans, or when seeking and providing information about organisational goals and

© Commonwealth of Australia, 2025 Industry Skills Australia

		objectives
Numeracy	1.4	• Identifies and comprehends mathematical information in familiar texts to establish key performance indicators
Navigate the world of work	1.1, 1.2, 1.3, 1.4, 2.1, 2.3	• Understands how own role meshes with others and contributes to broader work goals • Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.2, 1.3, 2.2, 2.3, 3.2, 3.4, 3.5, 3.6	• Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective outcomes • Recognises the importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate with whom, why and how
Get the work done	1.1, 1.3, 1.4, 3.1, 3.2, 3.3, 3.4, 3.5, 3.6	• Develops plans to manage relatively complex, non-routine tasks with an awareness of how they contribute to longer term operational and strategic goals • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria • Evaluates effectiveness of decisions in terms of how well they meet stated goals

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Organisation's standards and values must be identified by considering:	• explicitly stated values • values that are implied by the way the organisation conducts its business.

Assessment Requirements for BSBMGT401 Show leadership in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify the organisation's standards and values, whether stated or implied by the way the organisation conducts its business
- evaluate own behaviour and performance against these and adjust to achieve required standards
- develop and implement performance plans and key performance indicators (KPIs) to meet organisation's goals and objectives
- use established communication channels to raise questions about standards and values that may be damaging to the organisation
- ensure own behaviour and performance contributes to the integrity and credibility of the organisation
- facilitate processes to make decisions that are based on:
  - relevant information
  - examination of options and associated risks
  - input from relevant people
- communicate about making and implementing decisions including:
  - facilitating agreement on the preferred course of action and implementation plans
  - monitoring and feedback on the implementation and impact of decisions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how to identify an organisation's standards and values when they are:
  - stated

© Commonwealth of Australia, 2025 Industry Skills Australia

  - implied
- articulate organisational values and expectations of behaviour
- explain basic theory of group behaviour
- outline the organisation's process for raising questions about standards and values
- give examples of behaviours and performance that would typically be considered damaging to an organisation
- explain concepts including:
  - organisational values
  - role modelling
  - integrity and credibility
  - leadership.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT402 Implement operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement the operational plan by monitoring and adjusting operational performance, planning and acquiring resources and providing reports on performance as required.

It applies to individuals who plan activities to achieve the measurable, stated objectives of the team and the organisation. At this level work will normally be carried out within routine and non-routine methods and procedures which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Implement operational plan	1.1 Collate, analyse and organise details of resource requirements in consultation with relevant personnel, colleagues and specialist resource managers 1.2 Implement operational plans to contribute to the achievement of organisation's performance/business plan 1.3 Identify and use key performance indicators (KPIs) to monitor

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	operational performance 1.4 Manage contingencies by adjusting the implementation of the operational plan in consultation with others 1.5 Provide assistance in the development and presentation of proposals for resource requirements in line with operational planning processes
2. Implement resource acquisition	2.1 Recruit and induct employees within organisation's policies, practices and procedures 2.2 Implement plans for acquisition of physical resources and services within organisation's policies, practices and procedures and in consultation with relevant personnel
3. Monitor operational performance	3.1 Monitor performance systems and processes to assess progress in achieving profit/productivity plans and targets 3.2 Analyse and use budget and actual financial information to monitor profit/productivity performance 3.3 Identify unsatisfactory performance and take prompt action to rectify the situation according to organisational policies 3.4 Provide mentoring, coaching and supervision to support individuals and teams to use resources effectively, economically and safely 3.5 Present recommendations for variation to operational plans to the designated persons/groups and gain approval 3.6 Implement systems, procedures and records associated with performance in accordance with organisation's requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.4	• Actively reinforces learning by applying new knowledge and skills in mentoring, coaching and supervising others
Reading	1.1-1.5, 2.1, 2.2, 3.1, 3.2, 3.6	• Identifies, interprets, analyses and reviews textual information related to the operational plan and

© Commonwealth of Australia, 2025 Industry Skills Australia

		monitoring of operational performance
Writing	1.1-1.5, 2.1, 2.2, 3.2-3.6	• Communicates relationships between ideas and information, matching style of writing to purpose and audience • Researches, plans and prepares workplace documentation for relevant stakeholders using organisational formats
Oral Communication	1.1, 1.4, 1.5, 2.1, 2.2, 3.3, 3.4, 3.5	• Participates in a variety of spoken exchanges with a range of audiences varying structure and language to suit the audience
Numeracy	1.1, 1.2, 1.3, 1.4, 1.5, 2.2, 3.1, 3.2, 3.3	• Selects and uses familiar mathematical techniques to organise timely supply of adequate resources for the operational plan and to use budgetary information to monitor performance
Navigate the world of work	1.5, 2.1, 2.2, 3.3, 3.4, 3.6	• Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.1, 1.4, 1.5, 2.1, 2.2, 3.3, 3.4, 3.5	• Selects and uses appropriate conventions and protocols when communicating with diverse individuals to build rapport, seek or present information • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group communication, influencing direction and taking a leadership role on occasion
Get the work done	1.1, 1.2, 1.3, 1.4, 1.5, 2.2, 3.1, 3.2, 3.3, 3.6	• Takes responsibility for planning, organising, implementing and monitoring tasks required to achieve required outcomes • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria • Evaluates effectiveness of decisions in terms of how well they met stated goals • Recognises and addresses an increasing range of familiar problems by implementing contingency plans

Assessment Requirements for BSBMGT402 Implement operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- interact with a range of people/groups to identify resource requirements, performance objectives, systems, procedures and records relating to the operational plan
- vary the operational plan and gain approval to deal with contingencies
- monitor operational performance against the performance objectives and budgets and take action to rectify unsatisfactory performance
- plan and acquire physical and human resources using organisation's systems and procedures
- manage and support personnel to achieve performance objectives. including inducting new employees and providing mentoring and coaching
- present information and recommendations to support implementation and variation of the operational plan
- document and provide reports on performance as required by the organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe performance monitoring systems and processes
- describe methods for problem solving
- explain how organisational policies and procedures relate to the operational plan.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- organisational operational plans, policies and procedures
- workplace documentation and resources including budgets, physical and human resource procurement documentation, employee induction and performance monitoring procedures
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT403 Implement continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement the organisation's continuous improvement systems and processes. It covers using systems and strategies to actively encourage the team to participate in the process, monitoring and reviewing performance, and identifying opportunities for further improvements.

It applies to managers who have an active role in implementing the continuous improvement process to achieve the organisation's objectives. Their position is closely associated with the creation and delivery of products and services which means that they have an important role in influencing the ongoing development of the organisation.

At this level, work will normally be carried out within routine and non-routine methods and procedures, which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Implement continuous improvement systems and	1.1 Implement systems to ensure that individuals and teams are actively encouraged and supported to participate in decision

Assessment Requirements for BSBMGT403 Implement continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- implement continuous improvement systems and provide mentoring and coaching support to enable individuals and teams to participate in decisions, take responsibility, show initiative and implement improvement processes
- implement processes to inform team members about savings and productivity/service improvements achievements
- communicate effectively to support the continuous improvement system and implementation of improvements
- apply continuous improvement to customer services including internal and external customers
- implement, monitor and adjust improvement plans, processes and procedures to improve performance
- document performance to identify further opportunities for improvement
- manage records and reports within the organisation's systems and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of continuous improvement processes
- list typical areas of need for coaching and mentoring to support continuous improvement
- explain how change management techniques can support continuous improvement and initiative
- identify the organisation's systems and data that can be used for benchmarking and monitoring performance for continuous improvement.

BSBMGT407 Apply digital solutions to work processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit defines the skills, knowledge and outcomes to integrate digital technologies into common management practice.

It applies to supervisors, team, new and emerging leaders who need to apply digital vision and solutions within structured work environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership - Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Utilise digital workplace information	1.1 Identify available workplace digital applications for communications, technologies and networks 1.2 Locate and use digital information as an integral part of workplace operations 1.3 Review digital information sources for validity and reliability 1.4 Create, store and retrieve information in digital format 1.5 Continuously review trends and innovations in relevant digital technology suitable for workplace innovation

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Lead work processes in a digital environment	2.1 Select, integrate and use digital services in workplace operations 2.2 Review and select digital solutions that are fit for purpose 2.3 Integrate new digital innovations into workplace operations 2.4 Identify and adopt digital media protocols and conventions 2.5 Train, encourage and support team members in the application of digital solutions
3. Recognise and apply intellectual property requirements	3.1 Identify legislation, regulations and the organisation's policy relevant to intellectual property 3.2 Review digital process and applications for compliance with intellectual property requirements 3.3 Document, register and report matters related to intellectual property

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3	• Sources, analyses and interprets textual information, including technical data, in the context of organisational strategy and compliance requirements
Writing	3.3	• Develops texts dealing with complex concepts using specialised and detailed language to convey explicit information, requirements and recommendations in accordance with legal and organisational requirements
Oral communication	2.5	• Presents information using language and features appropriate to the audience
Navigate the world of work	2.4, 3.1-3.3	• Monitors adherence to organisational policies and legal requirements
Interact with others	2.5	• Uses a collaborative instructional approach to encourage, support and develop understanding and skills in others
Get the work	1.2, 1.4, 1.5, 2.1- 2.4	• Uses and investigates new digital technologies and

Assessment Requirements for BSBMGT407 Apply digital solutions to work processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify digital applications, services and information and evaluate them for use in the workplace including:
  - the validity and reliability of digital information
  - monitoring trends and innovations in digital technology
  - selecting digital services and solutions suitable for the workplace
  - compliance to relevant legislation, regulations and organisational policies
- identify and implement protocols and procedures to integrate digital services and solutions including:
  - intellectual property requirements
  - digital media protocols and conventions
  - storage and retrieval of digital information
  - training and/or mentoring or other support for team members.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how legislation, regulations and the organisation's policies and procedures relate to working with digital technology and information
- explain key elements to consider when evaluating whether digital technology and information options are fit for purpose
- outline the intellectual property risks to the organisation in relation to digital technology.

BSBMGT502 Manage people performance

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage the performance of staff who report to them directly. Development of key result areas and key performance indicators and standards, coupled with regular and timely coaching and feedback, provide the basis for performance management.

It applies to individuals who manage people. It covers work allocation and the methods to review performance, reward excellence and provide feedback where there is a need for improvement.

The unit makes the link between performance management and performance development, and reinforces both functions as a key requirement for effective managers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Allocate work	1.1 Consult relevant groups and individuals on work to be allocated and resources available

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.2 Develop work plans in accordance with operational plans 1.3 Allocate work in a way that is efficient, cost effective and outcome focussed 1.4 Confirm performance standards, Code of Conduct and work outputs with relevant teams and individuals 1.5 Develop and agree performance indicators with relevant staff prior to commencement of work 1.6 Conduct risk analysis in accordance with the organisational risk management plan and legal requirements
2. Assess performance	2.1 Design performance management and review processes to ensure consistency with organisational objectives and policies 2.2 Train participants in the performance management and review process 2.3 Conduct performance management in accordance with organisational protocols and time lines 2.4 Monitor and evaluate performance on a continuous basis
3. Provide feedback	3.1 Provide informal feedback to staff on a regular basis 3.2 Advise relevant people where there is poor performance and take necessary actions 3.3 Provide on-the-job coaching when necessary to improve performance and to confirm excellence in performance 3.4 Document performance in accordance with the organisational performance management system 3.5 Conduct formal structured feedback sessions as necessary and in accordance with organisational policy
4. Manage follow up	4.1 Write and agree on performance improvement and development plans in accordance with organisational policies 4.2 Seek assistance from human resources specialists, where appropriate 4.3 Reinforce excellence in performance through recognition and continuous feedback 4.4 Monitor and coach individuals with poor performance 4.5 Provide support services where necessary 4.6 Counsel individuals who continue to perform below expectations and implement the disciplinary process if necessary 4.7 Terminate staff in accordance with legal and organisational

BSBMGT516 Facilitate continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead and manage continuous improvement systems and processes. Particular emphasis is on the development of systems and the analysis of information to monitor and adjust performance strategies, and to manage opportunities for further improvements.

It applies to individuals who take an active role in managing a continuous improvement process in order to achieve an organisation's objectives.

At this level, work will normally be carried out using complex and diverse methods and procedures which require the exercise of considerable discretion and judgement, using a range of problem-solving and decision-making strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Lead continuous improvement systems and processes	1.1 Develop strategies to ensure that team members are actively encouraged and supported to participate in decision-making processes, assume responsibility and exercise initiative as

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	appropriate 1.2 Establish systems to ensure that the organisation's continuous improvement processes are communicated to stakeholders 1.3 Ensure that change and improvement processes meet sustainability requirements 1.4 Develop effective mentoring and coaching processes to ensure that individuals and teams are able to implement and support the organisation's continuous improvement processes 1.5 Ensure that insights and experiences from business activities are captured and accessible through knowledge management systems
2. Monitor and adjust performance strategies	2.1 Develop strategies to ensure that systems and processes are used to monitor operational progress and to identify ways in which planning and operations could be improved 2.2 Adjust and communicate strategies to stakeholders according to organisational procedures
3. Manage opportunities for further improvement	3.1 Establish processes to ensure that team members are informed of outcomes of continuous improvement efforts 3.2 Ensure processes include recording of work team performance to assist in identifying further opportunities for improvement 3.3 Consider areas identified for further improvement when undertaking future planning

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 1.4, 1.5, 2.1, 2.2, 3.3	• Identifies and extracts relevant information from a range of complex texts • Locates, interprets and analyses workplace documentation to gather information relating to continuous improvement
Writing	1.1, 1.2, 1.4, 1.5, 2.1, 2.2, 3.1-3.3	• Develops complex texts related to continuous improvement processes according to organisational requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

		• Ensures the vocabulary, grammatical structures and conventions are appropriate for the context and target audience
Oral Communication	1.1, 1.2, 1.4, 2.2	• Presents information to a range of audiences using appropriate structure and language • Listens and comprehends information from a variety of spoken exchanges with clients, co-workers and other stakeholders • Confirms understanding through questioning and active listening
Navigate the world of work	1.1-1.3, 2.1, 2.2	• Develops strategies to enable compliance with legislative requirements and achievement of the organisation's goals • Monitors adherence to organisational policies, procedures and protocols and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.1, 1.2, 1.4, 2.2	• Identifies and uses appropriate conventions and protocols when communicating with colleagues and external stakeholders • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction and influencing direction
Get the work done	1.1, 1.2, 1.4, 1.5, 2.1, 3.1, 3.2, 3.3	• Takes responsibility for developing, implementing and monitoring systems and processes to achieve organisational outcomes • Uses analytical and lateral thinking to review current practices and develop ideas for improvement • Reflects on the ways in which digital systems and tools are used, or could be used, to achieve work goals

Assessment Requirements for BSBMGT516 Facilitate continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to establish systems and processes for continuous improvement that:

- facilitate effective contributions to and communications about continuous improvement processes and outcomes
- address sustainability requirements
- incorporate mentoring, coaching and other support to enable people to participate effectively in continuous improvement processes
- capture insights, experiences and ideas for improvements and incorporate them into the organisation's knowledge management systems and future planning.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how systems and procedures can support effective continuous improvement
- explain how continuous improvement systems and processes relate to other business systems and requirements including, knowledge management, quality, performance management and sustainability.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessment Requirements for BSBMGT517 Manage operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and implement an operational plan using a variety of information sources and consultation (including using specialist advice if required) which includes:
  - resource requirements
  - key performance indicators
  - monitoring processes
  - contingency plans
- communicate effectively with relevant stakeholders to explain the plan and supporting information, seek approvals, negotiate variations and engage work teams
- develop and implement strategies to achieve the operational plan within the organisation's policies, practices and procedures including:
  - recruiting, inducting and developing personnel
  - acquiring physical resources and services
  - protecting intellectual property
  - making variations to the plan
  - monitoring and documenting performance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe models and methods for operational plans
- explain the role of an operational plan in achieving the organisation's objectives
- explain budgeting processes

© Commonwealth of Australia, 2025 Industry Skills Australia

- list alternative approaches to developing key performance indicators to meet business objectives
- outline the legislative and regulatory context relevant to the operational plan of the organisation
- outline the organisation's policies, practices and procedures that directly relate to the operational plan.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation and regulations
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT605 Provide leadership across the organisation

Modification History

Release	Comments
Version 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to demonstrate senior leadership behaviour and personal and professional competence. Business ethics are also addressed in this unit.

It applies to individuals who have a role in inspiring and motivating others to achieve organisational goals and to model professionalism in their organisation and industry. Leadership is seen in the context of the organisational mission.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Communicate organisational mission and goals	1.1 Clarify objectives, values and standards in accordance with organisation's strategic direction 1.2 Establish linkages between organisational objectives, values and standards and the responsibilities of relevant groups and individuals 1.3 Ensure media and language used is appropriate to individuals and group circumstances

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 State clear expectations of internal groups and individuals and explain in a manner which builds commitment to the organisation 1.5 Address expectations of the organisation 1.6 Investigate incidents promptly and communicate results clearly to relevant groups and individuals
2. Influence groups and individuals	2.1 Build trust, confidence and respect of diverse groups and individuals through positive role modelling and effective communication and consultation 2.2 Embrace, resource and effectively implement improvements to organisational and workplace culture 2.3 Demonstrate understanding of the global environment and new technology in work activities 2.4 Ensure actions convey flexibility and adaptability to change and accessibility 2.5 Ensure consultation and participation in decision making occurs with relevant groups and individuals where appropriate 2.6 Ensure decision making takes into account needs and expectations of both internal and external groups 2.7 Ensure decision making occurs in accordance with risk management plans for all options, and within appropriate timeframes 2.8 Ensure that the organisation is represented positively in the media and community
3. Build and support teams	3.1 Assign accountabilities and responsibilities to teams consistent with their competencies and operational plans 3.2 Ensure teams are resourced to allow them to achieve their objectives 3.3 Empower teams and individuals through effective delegation and support for their initiatives 3.4 Create and maintain a positive work environment 3.5 Encourage teams and individuals to develop innovative approaches to the performance of work
4. Demonstrate personal and professional competence	4.1 Model ethical conduct in all areas of work and encourage others to adopt business ethics 4.2 Adapt appropriate interpersonal and leadership styles to meet particular circumstances and situations 4.3 Set and achieve personal objectives and work program

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	outcomes 4.4 Ensure self-performance and professional competence is continuously improved through engagement in a range of professional development activities 4.5 Participate regularly in industry/professional networks and groups

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	4.3, 4.4, 4.5	• Actively looks for and accepts ways to maintain and improve own skills and knowledge
Reading	1.2, 1.3, 1.6, 2.7, 4.4, 4.5	• Evaluates and integrates facts and ideas to construct meaning from a range of text types
Writing	1.1, 1.2, 1.3, 1.4, 1.6, 3.1, 4.3	• Records and reports key information related to the outcomes of the job to interact effectively and appropriately with the team • Researches, plans and prepares documentation using format and language appropriate to the audience
Oral Communication	1.1, 1.2, 1.4, 1.5, 1.6, 2.1, 2.5, 3.1, 3.3, 3.4, 3.5, 4.1, 4.2	• Participates in a variety of spoken exchanges with clients, co-workers and stakeholders using structure and language appropriate to context and audience
Navigate the world of work	1.1, 1.2, 1.5, 1.6, 2.8, 3.1, 4.1	• Works autonomously making high level decisions related to the achievement of organisational goals • Reflects on designation of roles and responsibilities and how everyone's role contributes to broader organisational goals • Appreciates the implications of ethical and other organisational responsibilities in carrying out own role
Interact with others	1.3, 1.4, 1.6, 2.1, 2.4, 3.1, 3.3, 3.4, 3.5, 4.1, 4.2	• Demonstrates sophisticated control over oral, visual and/or written formats, drawing on a range of communication practices to achieve goals • Identifies strengths and limitations of own interpersonal skills and addresses areas that would benefit from further development

© Commonwealth of Australia, 2025 Industry Skills Australia

		• Recognises the importance of building rapport in order to establish effective working relationships and inspire trust and confidence • Collaborates and cooperates with others, playing an active role in leading and facilitating effective group interaction and influencing direction • Facilitates a climate in which others feel comfortable to identify, explore and build on a variety of perspectives in order to achieve shared outcomes
Get the work done	1.1, 1.2, 1.6, 2.2-2.7, 3.1, 3.2, 3.5	• Accepts responsibility for planning and sequencing complex tasks and workload of self and others, negotiating key aspects with others taking into account capabilities, efficiencies and effectiveness • Applies problem solving processes to identify risks, evaluate options and determine solutions • Facilitates a climate in which creativity and innovation are accepted as an integral part of achieving outcomes • Actively identifies systems, devices and applications with potential to meet current and/or future needs

BSBMGT616 Develop and implement strategic plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to establish the strategic direction of the organisation, sustain competitive advantage and enhance competitiveness. It covers analysis and interpretation of relevant markets, capability assessment of the organisation and analysis of the organisation's existing and potential competitors and allies. It also covers implementation of the strategic plan and developing specific actions and initiatives that will be undertaken by people working in various roles.

It applies to individuals working in senior roles in the organisation who have responsibility for ensuring that the organisation is positioned to ensure its long-term viability and success.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Confirm organisational vision and mission	1.1 Check with stakeholders that organisational vision and mission are still held to be current and are supported 1.2 Make any changes or refinements to vision or mission statement as required 1.3 Review or develop organisational values to support the vision

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	and mission statement 1.4 Gain support for strategic planning process from all relevant stakeholders
2. Analyse the internal and external environment	2.1 Determine information requirements and undertake or commission research to deliver relevant information 2.2 Analyse political, economic, social, and technological developments in a global context 2.3 Seek advice from appropriate experts wherever necessary 2.4 Identify and consider strengths and weaknesses of existing and potential competitors and allies 2.5 Analyse organisation's strengths, weaknesses, opportunities and threats 2.6 Consider cooperative ventures that are supported by risk and cost benefit analyses, are consistent with the organisational vision, mission and values and provide for due diligence 2.7 Check that analysis of internal and external environment is consistent with the perspectives of other informed people
3. Write strategic plan	3.1 Document relevant research and background for inclusion in the strategic plan 3.2 Formulate strategic objectives and strategies needed for the future 3.3 Detail each strategy with an assigned priority, a timeframe, responsible parties and measurable performance indicators 3.4 Circulate strategic plan for comment, support and endorsement
4. Implement strategic plan	4.1 Communicate strategic plan to all relevant parties 4.2 Brief people with a specific role in relation to strategies 4.3 Use performance indicators to monitor progress in implementing plan 4.4 Make necessary refinements to plan 4.5 Evaluate achievement of objectives at agreed milestones 4.6 Review effectiveness of plan and consider methods for improving strategic planning processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- consult and communicate effectively with relevant stakeholders to:
  - confirm or revise the organisation's mission, vision and values
  - validate findings of research and analysis
  - get input to and endorsement of strategic plans
  - brief relevant parties about the plan
- analyse organisation's internal and external environment to formulate strategic plans including:
  - background and research relevant to the plan
  - legislation, regulations and codes of practice, including for intellectual property
  - objectives, strategies and priorities
  - roles and responsibilities
  - performance indicators
  - timeframes
  - consideration of co-operative ventures
  - cost-benefit and risk analysis
- seek advice from appropriate experts wherever necessary
- monitor and evaluate the implementation of the plan and make refinements as appropriate
- review effectiveness of planning processes and identify opportunities for improvement.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

© Commonwealth of Australia, 2025 Industry Skills Australia

- outline the legislation, regulations and codes of practice relevant to the organisation's strategic plan.
- give examples of risks and risk management strategies relevant to strategic planning including:
  - intellectual property rights and responsibilities
  - other risks
- outline strategic planning methodologies including political, economic, social and technological (PEST) analysis and strengths, weaknesses, opportunities and threats analysis (SWOT)
- identify internal and external sources of information relevant to the organisation's market, competitors, customer base, vision, values and capabilities
- outline techniques for developing organisational values.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation, regulations, standards and codes
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT617 Develop and implement a business plan

Modification History

Release	Comments
Version 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to run a business operation and covers the steps required to develop and implement a business plan.

It applies to individuals who are running an organisation or who take a senior role in determining the effective functioning and success of the organisation. As such, they may oversee the work of a number of teams and other managers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop business plan	1.1 Review and evaluate pre-existing strategic, business and operational plan, if available 1.2 Analyse and interpret business vision, mission, values and objectives 1.3 Consult with key stakeholders 1.4 Review market requirements for the product or service, profile customer needs and research pricing options

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.5 Develop performance objectives and measures through consultation with key stakeholders 1.6 Identify financial, human and physical resource requirements for the business 1.7 Consider any permits or licences that may be required for new activity 1.8 Write business plan
2. Monitor performance	2.1 Communicate business plan to all relevant parties and ensure understanding of performance requirements and timeframes 2.2 Ensure skilled labour is available to implement plan 2.3 Test performance measurement systems and refine, if necessary 2.4 Ensure timely reports on all key aspects of the business are available, user-friendly and balanced in terms of financial and non-financial performance 2.5 Report system failures, product failures and variances to the business plan as they occur
3. Respond to performance data	3.1 Analyse performance reports against planned objectives 3.2 Review performance indicators and refine if necessary 3.3 Ensure groups and individuals contributing to under-performance are coached, and provide training where appropriate 3.4 Review system processes and work methods regularly as part of continuous improvement

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 1.7, 2.3, 3.1, 3.2, 3.4	• Gathers, interprets and analyses textual information when developing the business plan and monitoring operational performance • Utilises understanding of distinguishing structures and features of a range of text as well as recognising and

Assessment Requirements for BSBMGT617 Develop and implement a business plan

Modification History

Release	Comments
Version 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse and research business vision, mission, values, objectives, goals, competitors, financial targets, management arrangements, marketing approaches and strategic, business and operational plans
- write a business plan which includes a description of the business, products and services, financial, physical and human resource requirements, permit and licence requirements, marketing activity, financial indicators, productivity and performance targets for key result areas
- implement a business plan including ensuring skilled labour is available, and that training is provided where appropriate
- monitor and respond to business performance including evaluation of performance against key results indicators including profit and loss, community awareness or branding, environmental impact, governance, quality, sales, triple bottom line and the workforce
- consult, communicate with and report to key stakeholders including business partners, financiers, customers, staff and technical advisers
- provide an analysis of the strengths and weaknesses of a business plan.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline processes for developing business plans
- describe performance objectives and measures including key performance indicators
- identify key stakeholders.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- appropriate documentation and resources normally used in the workplace
- strategic, business and operational plans
- business information and data
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMKG513 Promote products and services to international markets

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to promote products and/or services of the business within specified international markets.

It applies to individuals with managerial responsibility including planning, coordinating, reviewing and reporting on promotional activities. Management of promotional activities may involve geographic separation from these activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan promotional activities	1.1 Access marketing plan for international business activity to inform planning of promotional activities 1.2 Access relevant information sources to support planning of promotional activities 1.3 Identify and assess promotional activities to ensure cultural appropriateness and compatibility with organisational requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 Plan and schedule promotional activities according to marketing needs of the organisation 1.5 Determine overall promotional objectives in consultation with designated individuals and groups both in international and domestic settings 1.6 Ensure timelines and costs for promotion of activities are realistic and consistent with budget resources 1.7 Develop action plans to provide details of products and/or services being promoted
2. Coordinate promotional activities	2.1 Identify and prepare personnel and resources to support promotional activities, both in international and domestic settings, to facilitate achievement of promotional goals 2.2 Identify, agree on and allocate roles and responsibilities of overseas and domestic personnel for delivery of promotional activities 2.3 Establish and conduct relationships with targeted groups in overseas settings in a manner which enhances the positive image of the organisation 2.4 Supervise and support roles and responsibilities of overseas personnel involved in promotional activities 2.5 Use international business networks to assist in implementing promotional activities
3. Review and report on promotional activities	3.1 Analyse audience feedback and data to determine impact of promotional activity on delivery of products and/or services 3.2 Assess effectiveness of planning processes to identify possible improvements for future international promotional activities 3.3 Collect and provide feedback to personnel and agencies involved in promotional activity both in international and domestic settings 3.4 Analyse costs and timelines to evaluate benefits accruing from internationally based promotional activities 3.5 Prepare conclusions and recommendations from verifiable evidence and provide constructive advice on future directions for internationally based promotional activities

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 1.6, 3.1, 3.4	• Identifies, analyses and evaluates complex textual information including audience feedback to determine business achievements
Writing	1.4, 1.7, 3.3, 3.5	• Produces action plans, complex reports and other documentation using clear, accurate and relevant language and appropriate grammatical structure
Oral Communication	1.5, 2.1-2.5, 3.1, 3.3, 3.5	• Articulates ideas and recommendations clearly using language and technical references suitable to audience • Uses active listening and questioning to confirm understanding
Numeracy	1.6, 3.4	• Uses mathematical formulas to interpret expenditure and business timelines
Navigate the world of work	1.1, 1.3, 1.4	• Monitors adherence to organisational policies and objectives and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	2.1, 2.3-2.5, 3.3, 3.5	• Begins to cultivate relationships with people with the knowledge, skills and influence to get things done or provide support, building formal and informal networks within and beyond immediate work context • Recognises importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate with whom, why and how
Get the work done	1.1-1.7, 2.1, 2.2, 3.1, 3.2, 3.4	• Develops plans and uses effective time management and organisational skills to complete tasks with an awareness of how they may contribute to longer-term operational and strategic goals • In more complex, non-routine situations, uses formal decision-making processes, setting or clarifying goals, gathering information and identifying and evaluating several choices against a limited set of criteria • When dealing with complex issues identifies cause of the problem, and uses analytical processes to generate possible solutions • Monitors outcomes, considering results from a range of perspectives and identifying key concepts and principles that may be adaptable to future situations

Assessment Requirements for BSBMKG513 Promote products and services to international markets

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- plan, coordinate and review promotional activities undertaken in an international context
- produce a report detailing activities and recommendations to inform and guide future promotional work.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify available overseas media
- summarise cultural characteristics of groups within target market
- list relevant international business networks
- outline marketing strategies and promotional activities suitable for international markets.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- office equipment and resources
- feedback on activity from overseas personnel/clients
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG409 Apply project scope management techniques

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to contribute to the control of a project's scope by assisting with identifying its objectives, deliverables, constraints, assumptions and outcomes; and by applying controls once the project has commenced.

It applies to individuals who are project practitioners working in a project support role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Contribute to defining project scope	1.1 Review project initiation documentation and assist in identifying project objectives and requirements 1.2 Contribute to identifying project deliverables 1.3 Contribute to identifying measurable outcomes to enable evaluation of project performance 1.4 Contribute to developing and documenting the scope management plan 1.5 Assist in obtaining agreement to scope from relevant project

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	authority
2. Apply project scope controls	2.1 Undertake work according to agreed project scope management plan and by using established change control procedures and performance measurement procedures 2.2 Communicate instances of non-compliance with overall scope to the project manager and other team members
3. Contribute to review of scope controls	3.1 Measure progress to determine potential, perceived and actual scope changes 3.2 Appropriately report scope changes 3.3 Assist in review of project outcomes to determine effectiveness of initial and subsequent scope management approaches

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1	• Interprets and analyses complex texts
Writing	1.4, 1.5, 3.2	• Develops and amends plans and associated documentation using appropriate organisational formats and vocabulary
Oral Communication	1.2-1.5, 2.2	• Interacts effectively in verbal exchanges, using clear language to convey information, and active listening and questioning to clarify understanding
Numeracy	1.3, 3.1	• Selects and applies a range of mathematical and problem-solving strategies to develop timelines and monitor progress
Interact with others	1.2-1.5, 2.2	• Uses appropriate communication practices in a range of work contexts • Collaborates and cooperates with others to achieve shared goals
Get the work done	2.1, 3.1, 3.2, 3.3	• Plans and organises tasks required to monitor and report on project implementation • Analyses outcomes to identify future

Assessment Requirements for BSBPMG409 Apply project scope management techniques

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- contribute to delineating and controlling project scope
- record project scope management plan
- interpret and follow project initiation documentation for purposes of documenting project scope.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list components of a project scope management plan
- identify and describe factors likely to impact project scope
- outline formal change-control processes
- identify and discuss methods for measuring work outcomes and progress against plans
- identify and discuss methods for segmenting and documenting a work breakdown structure
- explain procedures for reporting a change in scope
- describe types of project initiation documentation.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- project documentation which includes information about project scope
- case studies and, where possible, real situations.

BSBPMG416 Apply project procurement procedures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to assist with procurement for a project. It involves identifying procurement requirements, assisting with supplier selection, conducting procurement activities, and assisting with procurement finalisation activities for the project.

It applies to individuals who are project practitioners working in a project support role. The individual may be operating in a large or small organisation, and applying skills in the context of enterprise projects.

The project practitioner may be part of a project team under the direction of a project manager, or may work as part of a smaller scale, self-directed team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assist with procurement planning	1.1 Contribute to establishing procurement requirements to achieve project objectives 1.2 Act under delegated authority to contribute to development of

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	procurement-management plan 1.3 Contribute to developing procurement documentation
2. Contribute to supplier selection process	2.1 Gather and evaluate information on potential suppliers 2.2 Make recommendations to assist in selection of preferred suppliers 2.3 Contribute to establishing agreed terms and conditions with preferred suppliers 2.4 Identify and act in line with probity and project governance constraints 2.5 Assist in developing contractual documentation
3. Conduct procurement activities	3.1 Test and accept supplies to ensure they are fit for purpose in both quality and suitability 3.2 Undertake procurement activities and maintain information in line with reporting, confidentiality and audit requirements 3.3 Receive, reconcile and register supplies according to established procedures 3.4 Monitor and control suppliers according to contractual supply documentation
4. Assist in finalising procurement activities	4.1 Assist in finalising procurement agreements 4.2 Assist in review of project outcomes using available records to determine effectiveness of procurement activities 4.3 Contribute to identifying lessons learned and possible improvements to procurement management

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1, 2.4, 3.2, 3.3, 3.4, 4.2	• Applies appropriate strategies to construct meaning from a variety of texts
Writing	1.1, 1.3, 2.2, 2.3,	• Develops informative project documents using vocabulary and structure appropriate to audience,

Assessment Requirements for BSBPMG416 Apply project procurement procedures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- document procurement requirements for a workplace project, including clear descriptions of product and service, quality specifications, resource identification, supply and delivery requirements and supply and engagement metrics
- apply procurement-management procedures to a workplace project, including selection criteria, testing and accepting, monitoring and receiving supplies
- finalise procurement agreements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe procurement-management policy, processes and procedures
- explain the procurement documentation requirements
- describe the components of contractual documentation and the legal obligations of all parties
- explain the process used to select preferred contractors
- identify and describe project procurement-management tools and techniques.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- examples of project procurement documentation
- examples of procurement tasks and activities

© Commonwealth of Australia, 2025 Industry Skills Australia

- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG512 Manage project time

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage time during projects. It involves determining and implementing the project schedule, and assessing time management outcomes.

It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine project schedule	1.1 Develop work breakdown structure with sufficient detail to enable effective planning and control 1.2 Estimate duration and effort, sequence and dependencies of tasks, to achieve project deliverables 1.3 Use project scheduling tools and techniques to identify schedule impact on project time management, resource requirements, costs and risks 1.4 Contribute to achieving an agreed schedule baseline and

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	communication of the schedule to stakeholders
2. Implement project schedule	2.1 Implement mechanisms to measure, record and report progress of activities according to agreed schedule 2.2 Conduct ongoing analysis to identify baseline variance 2.3 Analyse and forecast impact of changes to the schedule 2.4 Review progress throughout project life cycle and implement agreed schedule changes 2.5 Develop responses to potential or actual schedule changes and implement them to maintain project objectives
3. Assess time management outcomes	3.1 Review schedule performance records to determine effectiveness of time management activities 3.2 Identify and document time management issues and recommend improvements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1-2.4, 3.1	• Identifies, interprets and analyses textual information obtained from a range of sources
Writing	1.1, 2.1, 2.4, 2.5, 3.2	• Drafts and develops documentation required for project scheduling and reporting using appropriate formats and language
Oral Communication	1.4, 2.5	• Participates in a verbal exchanges using clear and detailed language and appropriate non-verbal features to convey expectations and advise others on progress
Numeracy	1.1, 1.2, 1.3, 1.4, 2.1-2.5	• Calculates time requirements for project scheduling • Uses basic mathematical formula to determine costs and other necessary resources
Interact with others	1.4, 2.5	• Actively identifies requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience
Get the work	1.1-1.4, 2.1-2.5, 3.1,	• Plans and schedules complex activities, monitors

© Commonwealth of Australia, 2025 Industry Skills Australia

done	3.2	implementation and manages relevant communication • Monitors actions against goals, adjusting plans and resources where necessary • Uses analytical skills to review and evaluate process and decide on future improvements • Uses digital applications to access, organise, integrate and share relevant information in effective ways

Assessment Requirements for BSBPMG512 Manage project time

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop a project schedule using project management tools and techniques
- implement, analyse and monitor a project schedule
- conduct a review of project scheduling and recommend improvements for the future.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain estimation techniques to determine task duration and resource effort
- explain procedures for identifying critical path
- explain procedures for managing project baselines, establishment and variance
- summarise project life cycle phases and describe each phase
- explain best-practice time management methodologies, their capabilities, limitations, applications and outcomes
- summarise key tools for project scheduling
- explain work breakdown structures and application to project schedules.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to workplace documentation, including:

- examples of project schedules, reports and feedback from project stakeholders regarding time management
- case studies and, where possible, real situations
- interaction with others.

BSBPMG514 Manage project cost

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify, analyse and refine project costs to produce a budget, and to use this budget as the principal mechanism to control project cost.

It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine project costs	1.1 Determine resource requirements for individual tasks identified in the work breakdown structure, with input from stakeholders and guidance from others 1.2 Estimate project costs to enable project budget to be prepared within agreed tolerances 1.3 Develop a project budget 1.4 Develop a cost-management plan, within delegated authority, to ensure clarity of understanding and ongoing management of

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	project finances
2. Monitor and control project costs	2.1 Implement agreed financial-management processes and procedures to monitor actual expenditure against budget 2.2 Select and use cost-analysis methods and tools to identify cost variations and evaluate alternative actions 2.3 Implement and monitor agreed actions to maintain financial objectives 2.4 Provide accurate and timely financial reports
3. Complete cost-management processes	3.1 Conduct appropriate activities to signify financial completion 3.2 Review project outcomes using available records to determine effectiveness of project cost management 3.3 Review cost-management issues and document improvements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.2, 3.2, 3.3	• Interprets and analyses textual information from a range of sources • Reviews, compares and contrasts information related to budget
Writing	1.3, 1.4, 2.4, 3.3	• Drafts and develops documents using appropriate format and language for context
Oral Communication	1.1	• Participates in verbal exchanges using clear language and appropriate tone and syntax to provide relevant information • Uses active listening and questioning to elicit views and opinions of others
Numeracy	1.1-1.4, 2.1, 2.2, 2.4, 3.1, 3.2	• Uses mathematical formulae to calculate resources against predetermined budgets, solve variances and finalise project costs
Navigate the world of work	1.4, 2.1	• Adheres to organisational policies and procedures and understands responsibilities of own role

© Commonwealth of Australia, 2025 Industry Skills Australia

Interact with others	1.1	• Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to confirm requirements, seek guidance or share information
Get the work done	1.1, 1.3, 1.4, 2.2, 2.3, 2.4, 3.2, 3.3	• Plans and schedules complex activities, monitors implementation and manages relevant communication • Monitors actions against goals, adjusting plans and resources where necessary • Uses analytical skills to review and evaluate process and decide on future improvements • Uses digital applications to access, organise, integrate and share relevant information in effective ways

Assessment Requirements for BSBPMG514 Manage project cost

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- work closely with others to determine resources against budgetary frameworks
- prepare a budget and cost-management plan for a project
- monitor costs across a project's life cycle including solving cost variations and analysing possible alternatives
- record expenditure, create accurate financial reports and review cost-management processes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain appropriate budgeting processes, tools and techniques
- describe methods and tools for costing and cost analysis
- explain strategies for managing costs and their application in different situations
- outline processes for reviewing costs against outcomes
- summarise key organisational policies and procedures applicable to this role.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- workplace documentation, including budgets and other financial documents
- case studies and, where possible, real situations.

BSBPMG515 Manage project human resources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage human resources related to projects. It involves planning for human resources, implementing personnel training and development, and managing the project team.

It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan human resources relevant to projects	1.1 Determine resource requirements for individual tasks to determine required project personnel levels and competencies 1.2 Establish project organisation and structure to align individual and group competencies with project tasks 1.3 Allocate personnel to the project to meet planned work outputs throughout project timeline 1.4 Apply human resources management (HRM) methods, techniques and tools to support engagement and performance of

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	personnel
2. Implement project personnel training and development	2.1 Negotiate, define and communicate clear project role descriptions 2.2 Identify, plan and implement ongoing development and training of project team members to support personnel and project performance 2.3 Measure individuals' performance against agreed criteria and initiate actions to overcome shortfalls in performance
3. Lead project team	3.1 Implement processes and take action to improve individual performance and overall project effectiveness 3.2 Monitor and report, for remedial action, internal and external influences on individual and project team performance and morale 3.3 Implement procedures for interpersonal communication, counselling, and conflict resolution to maintain a positive work environment 3.4 Identify and manage inter-project and intra-project resource conflict to minimise impact on achievement of project objectives
4. Finalise human resource activities related to projects	4.1 Disband project team according to organisational policies and procedures 4.2 Identify and document human resource issues and recommended improvements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.3, 3.3, 4.1	• Interprets textual information obtained from a range of sources and determines how content may be applied to requirements
Writing	1.1-1.3, 2.1-2.3, 3.1, 3.2, 4.2	• Develops plans, role descriptions and reports using clear, specific and industry-related terminology, appropriate structures and conventions • Documents personnel requirements, results of performance measurements and improvement

© Commonwealth of Australia, 2025 Industry Skills Australia

		recommendations
Oral Communication	1.3, 1.4, 2.1, 3.1, 3.3, 3.4	• Participates in verbal exchanges using clear language and appropriate non-verbal features • Uses active listening and questioning to elicit views and opinions of others and confirm understanding
Numeracy	1.1, 2.3, 3.4	• Uses mathematical formulae to calculate resources against project requirements and to measure work output against predetermined criteria
Navigate the world of work	3.3, 4.1	• Understands and adheres to organisational policies and procedures
Interact with others	1.3, 1.4, 2.1, 2.3, 3.1, 3.3, 3.4	• Collaborates with co-workers to negotiate and facilitate shared understanding of individual roles and group objectives • Manages workplace conflict by recognising contributing factors and implementing resolution strategies
Get the work done	1.1-1.4, 2.2, 2.3, 3.1, 3.2, 3.4, 4.2	• Develops plans to identify project responsibilities and needs, and allocate project personnel, with an awareness of how this contributes to overall project goals • Uses analytical skills to review performance and decide on actions needed • Reflects on how variables impact outcomes to gain insights into concepts that may be adapted in future situations

BSBPMG516 Manage project information and communication

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to link people, ideas and information at all stages in the project life cycle. Project communication management ensures timely and appropriate generation, collection, dissemination, storage and disposal of project information through formal structures and processes.

It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan information and communication processes	1.1 Identify, analyse and document information requirements, with input from stakeholders, as the basis for communication planning 1.2 Develop, within delegated authority, an agreed communication management plan to support achievement of project objectives 1.3 Establish and maintain a designated project-management information system to ensure quality, validity, timeliness and integrity of information and communication

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Implement project information and communication processes	2.1 Manage generation, gathering, storage, retrieval, analysis and dissemination of information by project staff and stakeholders 2.2 Implement, modify, monitor and control designated information-validation processes to optimise quality and accuracy of data 2.3 Implement and maintain appropriate communication networks 2.4 Identify and resolve communication and information-management system issues
3. Assess information and communication outcomes	3.1 Finalise and archive records according to agreed project information ownership and control requirements 3.2.Review project outcomes to determine effectiveness of management information and communication processes and procedures 3.3 Identify and document lessons learned and recommended improvements for application in future projects

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 3.1, 3.2	• Interprets and analyses complex texts from a range of sources
Writing	1.1-1.3, 2.1, 2.2, 3.1, 3.3	• Develops project documents using vocabulary, structure and conventions appropriate to text
Oral Communication	1.1, 1.2	• Participates in verbal exchanges using clear language and appropriate non-verbal features • Uses active listening and questioning to confirm understanding and agreement
Navigate the world of work	1.2	• Understands responsibilities and boundaries of own role
Interact with others	1.1, 1.2	• Actively identifies requirements of important communication exchanges, selecting appropriate channels, format and content to suit purpose and audience

© Commonwealth of Australia, 2025 Industry Skills Australia

Get the work done	1.1-1.3, 2.1, 2.2, 2.3, 2.4, 3.2	• Sequences and schedules complex activities, monitors implementation and manages relevant communication • Uses problem-solving techniques to analyse and resolve issues • Evaluates outcomes of decisions to identify opportunities for improvement • Uses digital tools to access, organise and analyse complex data

Assessment Requirements for BSBPMG516 Manage project information and communication

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop a communication management plan and an information system for a specific project
- implement a project information system with a systematic approach to storage, searching, retrieval and archiving of relevant information
- implement and maintain communication processes
- review project outcomes and document suggestions for improvements to managing project information and communication for future projects.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain alternative communication methods and media and their application on various projects
- identify effective project-management information systems and their various applications
- explain methods used to evaluate information systems and communication processes.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- project communication and information management documentation
- examples of how communication was managed on projects
- case studies and, where possible, real situations.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG518 Manage project procurement

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.2. Version created to correct missing elements
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to undertake procurement in projects.

It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine procurement requirements	1.1 Identify procurement requirements with input from stakeholders as basis for procurement planning 1.2 Establish and maintain, within delegated authority, agreed procurement management plan
2. Establish agreed	2.1 Obtain information from suppliers capable of fulfilling

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
procurement processes	procurement requirements 2.2 Determine or adopt established selection processes and selection criteria, and communicate to vendors to ensure transparency 2.3 Obtain relevant approvals for procurement processes to be used
3. Conduct procurement activities	3.1. Identify and act according to ***probity and project governance constraints*** 3.2. Communicate agreed proposals and/or specifications to prospective vendors to ensure clarity of understanding of project objectives 3.3. Solicit vendor responses according to proposal requirements 3.4. Evaluate responses and select preferred vendors according to current legal requirements and agreed selection criteria 3.5. Negotiate with preferred contractor or supplier, to agree on terms and conditions of supply
4. Implement and monitor procurement	4.1. Implement established procurement management plan and make ***modifications*** in line with agreed delegations 4.2. Review progress and manage agreed variations to ensure timely completion of tasks and resolution of conflict within the legal framework of the supply agreement 4.3. Identify and report procurement management issues and implement agreed remedial actions to ensure project objectives are met
5. Manage procurement finalisation procedures	5.1. Conduct finalisation activities to ensure vendor deliverables meet contracted requirements 5.2. Review project outcomes using available procurement records and information to determine effectiveness of procurement processes and procedures 5.3. Document lessons learned and recommended improvements for application to future projects

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Industry Skills Australia

Skill	Performance Criteria	Description
Reading	1.1, 2.1, 3.1, 3.4, 4.1, 5.2	• Interprets, evaluates and critiques ideas and information from a range of complex texts
Writing	1.2, 2.2, 2.3, 3.2, 3.4, 4.1, 4.2, 4.3, 5.2, 5.3	• Develops plans using vocabulary, structure and conventions appropriate to text • Creates documents for internal and external use, using vocabulary and structure suitable for audience and context • Drafts requests for approvals using organisational formats
Oral Communication	1.1, 2.1, 2.2, 2.3, 3.2, 3.5, 4.2	• Participates in verbal exchanges using clear language to seek and provide information, or request approvals • Uses active listening and questioning techniques to confirm understanding
Numeracy	1.1, 4.2	• Recognises cost parameters and interprets numerical information accordingly • Calculates changes to timelines resulting from changes to plan
Navigate the world of work	1.2, 3.1, 3.4, 4.1	• Understands responsibilities and boundaries of own role
Interact with others	1.1, 2.1, 2.2, 2.3, 3.2, 3.3, 3.5, 4.2	• Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information • Uses interpersonal skills to negotiate acceptable outcomes
Get the work done	1.1,1.2, 2.1, 3.1, 3.3, 3.4, 4.1, 4.2, 4.3, 5.1, 5.2	• Plans and organises complex activities, monitors implementation and manages relevant communication • Resolves problems and makes decisions based on analysis of options against set criteria and targets

Assessment Requirements for BSBPMG518 Manage project procurement

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.2. Version created to correct missing elements
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- work with others to determine procurement requirements and produce a procurement management plan for a project
- carry out procurement and contracting activities according to agreed processes
- monitor activities across a project's life cycle and resolve issues that could affect achievement of project objectives
- create and maintain procurement records and documentation according to requirements of project and organisation
- document a review of procurement management processes and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the general features of a procurement management plan
- summarise procurement procedures and required documentation
- identify criteria that could be used to select vendors or suppliers
- explain the general conditions and legal obligations of contracts as they relate to project procurement
- explain probity and project governance constraints that relate to project procurement in a project and industry context.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- workplace documentation relevant to procurement and contracts
- case studies or, where possible, real situations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPMG522 Undertake project work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to undertake a straightforward project or a section of a larger project. It covers developing a project plan, administering and monitoring the project, finalising the project and reviewing the project to identify lessons learned for application to future projects.

This unit applies to individuals who play a significant role in ensuring a project meets timelines, quality standards, budgetary limits and other requirements set for the project.

The unit does not apply to specialist project managers. For specialist project managers, the other units of competency in the project management field (BSBPMG) will be applicable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Define project	1.1 Access project scope and other relevant documentation 1.2 Define project stakeholders 1.3 Seek clarification from delegating authority of issues related to

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	project and project parameters 1.4 Identify limits of own responsibility and reporting requirements 1.5 Clarify relationship of project to other projects and to the organisation's objectives 1.6 Determine and access available resources to undertake project
2. Develop project plan	2.1 Develop project plan in line with the project parameters 2.2 Identify and access appropriate project management tools 2.3 Formulate risk management plan for project, including Work Health and Safety (WHS) 2.4 Develop and approve project budget 2.5 Consult team members and take their views into account in planning the project 2.6 Finalise project plan and gain necessary approvals to commence project according to documented plan
3. Administer and monitor project	3.1 Take action to ensure project team members are clear about their responsibilities and the project requirements 3.2 Provide support for project team members, especially with regard to specific needs, to ensure that the quality of the expected outcomes of the project and documented time lines are met 3.3 Establish and maintain required recordkeeping systems throughout the project 3.4 Implement and monitor plans for managing project finances, resources and quality 3.5 Complete and forward project reports as required to stakeholders 3.6 Undertake risk management as required to ensure project outcomes are met 3.7 Achieve project deliverables
4. Finalise project	4.1 Complete financial recordkeeping associated with project and check for accuracy 4.2 Ensure transition of staff involved in project to new roles or reassignment to previous roles 4.3 Complete project documentation and obtain necessary sign-offs for concluding project
5. Review project	5.1 Review project outcomes and processes against the project scope and plan

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	5.2 Involve team members in the project review 5.3 Document lessons learned from the project and report within the organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 3.4, 3.5, 4.1, 4.3, 5.1	• Organises, evaluates and critiques ideas and information from a range of complex texts
Writing	2.1, 2.3, 2.6, 3.3, 3.5, 4.1, 4.3, 5.3	• Develops plans, reports and recommendations using vocabulary, structure and conventions appropriate to text • Establishes and maintains records according to organisational requirements
Numeracy	1.6, 2.4, 3.4, 4.1	• Uses formal and some informal, oral and written mathematical language and representation to prepare and communicate budgetary and financial information
Oral communication	2.5, 5.2	• Participates in verbal discussions using clear language and appropriate features to present or seek information • Using listening and questioning skills to seek information and confirm understanding
Navigate the world of work	1.3, 1.4, 2.3, 3.1, 4.3	• Recognises and responds to organisational and legislative/regulatory requirements
Interact with others	2.5, 3.1, 3.2, 4.2, 5.2	• Selects and uses appropriate communication protocols and practices to ensure shared understanding of project roles and expectations • Uses collaborative techniques to engage stakeholders in consultations and negotiations
Get the work done	1.2, 1.5, 1.6, 2.1, 2.2, 2.3, 2.6, 3.1-3.7, 4.1, 4.2, 4.3, 5.1, 5.3	• Develops and implements plans to manage projects that involve diverse stakeholders with potentially competing demands • Systematically gathers and analyses all relevant information and evaluates options to make informed decisions • Evaluates outcomes of decisions to identify

© Commonwealth of Australia, 2025 Industry Skills Australia

		opportunities for improvement • Uses digital technologies and applications to access, organise and share information

Assessment Requirements for BSBPMG522 Undertake project work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- define the parameters of the project including:
  - project scope
  - project stakeholders, including own responsibilities
  - relationship of project to organisational objectives and other projects
  - reporting requirements
  - resource requirements
- use project management tools to develop and implement a project plan including:
  - deliverables
  - work breakdown
  - budget and allocation of resources
  - timelines
  - risk management
  - recordkeeping and reporting
- consult and communicate with relevant stakeholders to generate input and engagement in planning, implementing and reviewing the project
- provide support to team members to enable them to achieve deliverables and to transition them as appropriate at completion of the project
- finalise the project including documentation, sign-offs and reporting
- review and document the project outcomes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

© Commonwealth of Australia, 2025 Industry Skills Australia

- give examples of project management tools and how they contribute to a project
- outline types of documents and other sources of information commonly used in defining the parameters of a project
- explain processes for identifying and managing risk in a project
- outline the organisation's mission, goals, objectives and operations and how the project relates to them
- explain the organisation's procedures and processes that are relevant to managing a project including:
  - lines of authority and approvals
  - quality assurance
  - human resources
  - budgets and finance
  - recordkeeping
  - reporting
- outline the legislative and regulatory context of the organisation in relation to project work, including work health and safety (WHS) requirements.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG604 Direct cost management of a project program

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to analyse, coordinate, and refine budgets of multiple projects contributing to an overall program budget. It covers directing project budget development, managing program costs and directing financial completion of projects.

It applies to individuals who are program managers, managing a suite of projects (a program).

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Direct project budget development	1.1 Direct project managers to determine resource requirements for individual tasks, in consultation with appropriate stakeholders, to develop project budgets which contribute to the program budget 1.2 Direct project cost estimations to enable budgets and cost management processes to be developed for project life cycles 1.3 Direct and authorise cost strategies and cost management plans to ensure clarity of understanding and ongoing management of project finances and the program budget

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Manage program costs	2.1 Develop and maintain cost management systems to direct monitoring of actual expenditure and to control costs throughout multiple project life cycles and for the program 2.2 Conduct analysis, evaluate options and implement responses to project cost variations to maintain control over changing financial and program objectives 2.3 Monitor internal and external influences on program costs and, where necessary, seek approval from business management for changes to the approved program budget
3. Direct financial completion	3.1 Provide direction for project finalisation activities to achieve integrated financial and physical project completion within program expectations 3.2 Review project outcomes from available records at the finalisation of each project, and analyse information to determine effectiveness of cost management systems 3.3 File program lessons learnt as a resource for future reference and, where necessary, refer to higher project authority for application in planning strategic direction changes and business outcomes for future projects

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 2.2, 3.1, 3.2	• Organises, evaluates and critiques ideas and information from a range of complex texts
Writing	1.3, 2.1-2.3, 3.2, 3.3	• Develops a range of project related documents using appropriate format, vocabulary and structure
Oral Communication	1.1, 1.2, 1.3, 3.1	• Participates in discussions and presents information using language and features appropriate to the audience
Numeracy	1.1-1.3, 2.1-2.3, 3.1, 3.2	• Analyses and synthesises highly embedded mathematical information • Selects from, and flexibly applies, a wide range of highly developed mathematical and problem-solving strategies and techniques

© Commonwealth of Australia, 2025 Industry Skills Australia

Interact with others	1.1-1.3, 3.1	• Collaborates with others to achieve joint outcomes, playing a lead role in facilitating successful outcomes and influencing direction
Get the work done	1.1-1.3, 2.1-2.3, 3.2, 3.3	• Develops and implements plans for complex activities that contribute to overall project goals • Reviews priorities and performance during implementation, identifying and addressing issues and reallocating resources • Monitors outcomes of decisions, considering results from a range of perspectives, and identifying key concepts and principles that may be adaptable to future situations • Uses digital tools to access and organise complex data and analyse multiple sources of information for strategic purposes

Assessment Requirements for BSBPMG604 Direct cost management of a project program

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- direct project budget development, including:
  - directing project managers to develop project budgets which contribute to program budget
  - directing project cost estimation
  - directing and authorising cost strategies and cost management plans
- manage program costs, including:
  - developing and maintaining cost management systems
  - conducting analysis, evaluating options and implementing responses to project cost variations
  - monitoring internal and external influences on program costs and seeking approval for budget changes
- direct financial completion, including:
  - providing direction for project finalisation activities
  - reviewing and analysing project outcomes
  - filing and referring program lessons learnt to higher program authority for future application.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain regulatory and legislative financial reporting requirements
- explain methods for costing and estimating project resources
- explain methods for monitoring and controlling project expenditure.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- financial documentation and files
- feedback from project teams and other stakeholders as to how program costs were managed.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG606 Direct human resources management of a project program

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to direct human resource organisation and staffing across a program, direct project managers in relation to staff performance, and to provide leadership within the program.

It applies to individuals who are program managers, managing a suite of projects (a program).

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Direct human resources management planning	1.1 Direct human resource requirement analysis for projects to determine numbers and skill levels required for overall program 1.2 Direct stakeholder assessment to establish a basis for stakeholder management within projects and overall program 1.3 Direct responsibility assignment for project activities and tasks, and establish authorisation protocols
2. Manage program	2.1 Determine resource requirements for projects in consultation

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
organisation and staffing	with project managers and appropriate stakeholders, to establish program staffing levels, allocation to projects and required competencies 2.2 Direct project organisation and structure to optimise alignment of individual and group competencies within projects 2.3 Direct recruitment of staff for allocation to projects or reallocation within the organisation, within agreed delegated authority, to meet competency requirements throughout the program 2.4 Direct project managers' use of human resources management (HRM) methods, techniques and tools, and modify for program requirements 2.5 Utilise organisational HRM system and HRM processes across projects
3. Direct project staff performance management	3.1 Obtain agreement on performance measurement criteria for clarity of roles and responsibilities and ongoing assessment 3.2 Ensure systems for ongoing development and training of personnel across the program are established and implemented by project managers 3.3 Measure individuals' performance against agreed criteria and authorise actions to overcome shortfalls in performance and encourage career progression
4. Provide overall leadership to project teams	4.1 Manage a system of continuous improvement of staff to enhance program effectiveness 4.2 Analyse individual and team performance and morale levels and take action where necessary 4.3 Direct procedures for interpersonal communication, counselling and conflict resolution by project managers, and review results to maintain and promote a positive working environment 4.4 Identify and positively manage intra-organisational and intra-project conflict to maximise achievement of program objectives 4.5 Aggregate HRM lessons learnt for application in planning and, where appropriate, pass on information to others for consideration in strategic planning and direction

© Commonwealth of Australia, 2025 Industry Skills Australia

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 3.3	• Organises, evaluates and critiques ideas and information from complex texts • Draws on a broad range of strategies to build and maintain understanding throughout complex texts
Writing	1.3, 2.1, 2.2, 2.3, 3.1, 3.3, 4.5	• Develops a range of project related documents using appropriate format, vocabulary and structure
Oral Communication	1.1, 1.2, 1.3, 2.1, 2.2, 2.3, 2.4, 4.2, 4.3, 4.4	• Provides information using language and features appropriate to the audience • Use listening and questioning skills to confirm or clarify understanding
Numeracy	1.1, 2.1, 2.2, 3.1, 4.2	• Extracts, interprets and evaluates mathematical information in organisational and project documentation • Compares and contrasts performance against criteria
Interact with others	1.1, 1.2, 1.3, 2.1, 2.2, 2.3, 2.4, 4.2, 4.3, 4.4	• Actively identifies requirements of important communication exchanges, selecting appropriate channels, format and content to suit purpose and audience • Plays a lead role in situations requiring effective collaborative skills, demonstrating ability to influence and motivate others • Recognises potential for conflict and takes steps to stop an issue from escalating
Get the work done	1.1-1.3, 2.2-2.5, 3.1, 3.3, 4.1, 4.2	• Develops plans for complex activities that contribute to overall project goals and involve multiple stakeholders • Regularly reviews priorities and performance during implementation, identifying and addressing issues, and reallocating resources • Identifies issues and uses analytical techniques to generate and evaluate possible solutions

Assessment Requirements for BSBPMG606 Direct human resources management of a project program

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- direct human resources management (HRM) planning, including:
  - directing project analysis to determine program requirements
  - directing stakeholder assessment
  - directing responsibility assignment and establishing authorisation protocols
- manage program organisation and staffing, including:
  - determining project resource requirements
  - directing project organisation and structure
  - directing staff recruitment
  - directing project managers' use of HRM methods, techniques and tools
  - utilising organisational HRM system and processes across projects
- direct project staff performance management, including:
  - obtaining agreement on measurement criteria
  - ensuring systems for ongoing development and training
  - measuring individuals' performance and authorising relevant actions
- provide overall leadership to project teams, including:
  - managing a continuous improvement system
  - analysing and taking action on individual and team performance and morale levels
  - directing procedures for interpersonal communication, counselling and conflict resolution by project managers, and reviewing results
  - identifying and positively managing intra-organisational and intra-project conflict
  - aggregating and passing on HRM lessons learnt.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

© Commonwealth of Australia, 2025 Industry Skills Australia

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain human resource management methods, techniques and tools
- identify relevant legislation
- describe models of performance management and performance development.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- workplace HRM documentation
- feedback from project teams and stakeholders as to how human resource management was handled.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG609 Direct procurement and contracting for a project program

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to direct the management of contracting and procurement activities across projects and programs. It covers setting up the contracting process, directing management of contract and procurement processes, and finalising contracts for projects across the program.

It applies to individuals who are program managers, managing a suite of projects (a program).

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Direct planning for project contracting and procurement	1.1 Direct identification of product specifications and procurement requirements for procurement and contract planning, in consultation with appropriate stakeholders 1.2 Direct development of procurement strategies, methods and management plans in line with project objectives across the program
2. Direct set up of	2.1 Direct project managers to source organisations that meet

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
contract and procurement process	procurement requirements 2.2 Establish selection processes and selection criteria, in consultation with stakeholders, and arrange for communication to prospective contractors 2.3 Ensure contract and procurement actions accord with organisation and program objectives
3. Direct management of contract and procurement process	3.1 Provide direction for identification of requirements of proposals and arrange communication to prospective contractors 3.2 Ensure responses are evaluated and preferred contractors are selected in accordance with agreed selection processes 3.3 Direct negotiation of contract terms and conditions between client and preferred contractor
4. Direct management of contracts	4.1 Direct management of contract and procurement activities in accordance with program contract and procurement management guidelines 4.2 Provide direction for regular reviews from available records and information, and ensure variances are analysed and changes for implementation agreed on 4.3 Ensure project managers work within legal and organisational framework for contracts 4.4 Identify potential, perceived and actual contractual conflicts and approve remedial actions to minimise disruption
5. Direct finalisation of contracts	5.1 Direct finalisation activities for management of contract deliverables in accordance with contractual project and program requirements 5.2 Direct review and analysis of project outcomes to determine effectiveness of contract and procurement processes and procedures 5.3 Aggregate and use lessons learnt for application in planning and implementation of later projects within the program and, where appropriate, pass on to organisational management for use in strategic planning

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Industry Skills Australia

Skill	Performance Criteria	Description
Reading	2.3, 4.1, 4.3, 5.2	• Identifies, interprets and analyses information from complex sources, including legislation
Writing	1.2, 2.2, 3.1, 3.2, 4.2, 4.4, 5.2, 5.3	• Develops and documents strategies and plans using organisational format and specific terminology • Documents outcomes according to organisational requirements
Oral Communication	1.1, 1.2, 2.1, 2.2, 3.3, 4.4, 5.2	• Provides direction and contributes to discussions using language and features appropriate to the audience
Numeracy	1.2, 4.1, 4.2, 5.2	• Interprets and evaluates mathematical information in a broad range of texts • Selects from, and flexibly applies, a range of mathematical and problem-solving strategies and techniques to compare and contrast effectiveness of processes
Navigate the world of work	2.3, 4.3	• Monitors adherence to organisational, legal and regulatory requirements
Interact with others	1.1, 1.2, 2.1, 2.2, 3.3, 4.4, 5.2	• Plays a lead role in situations requiring effective collaboration, demonstrating high-level influencing skills and ability to direct others • Uses negotiation skills to set up contracts, to agree prices and terms, and to resolve disputes
Get the work done	1.1, 2.1-2.3, 3.2, 4.1, 4.2, 5.1, 5.2	• Develops flexible plans for complex, high-impact activities with strategic implications, involving a diverse range of stakeholders with potentially competing demands • Uses analytical processes to decide on a course of action, establishing criteria for deciding between options, and seeking input and advice from others before taking action, when necessary • Monitors outcomes of decisions, considering results from a range of perspectives, and identifying key concepts and principles that may be adaptable to future situations

Assessment Requirements for BSBPMG609 Direct procurement and contracting for a project program

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- direct planning for project contracting and procurement, including:
  - directing identification of product specifications and procurement requirements
  - directing development of procurement strategies, methods and management plans
- direct set up of contract and procurement process, including:
  - directing project managers to source suitable organisations
  - establishing selection processes and selection criteria
  - ensuring contract and procurement actions accord with objectives
- direct management of contract and procurement process, including:
  - providing direction for identifying and arranging communication of proposal requirements
  - ensuring responses are evaluated and preferred contractors selected
  - directing negotiation of contract terms and conditions
- direct management of contracts, including:
  - directing management of contract and procurement
  - providing direction for regular reviews
  - ensuring project managers work within legal and organisational framework
  - identifying and approving remedial actions for potential, perceived and actual contractual conflicts
- direct finalisation of contracts, including:
  - directing finalisation activities for management of contract deliverables
  - directing review and analysis of project outcomes
  - aggregating and using lessons learnt.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

© Commonwealth of Australia, 2025 Industry Skills Australia

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain contract management and legal obligations of both parties
- describe procurement processes and options.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Project Management field of work and include access to:

- workplace contractual and procurement documentation
- feedback from project team and stakeholders as to how procurement and contractual processes were handled.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPRC504 Manage a supply chain

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to manage a supply chain, including the commercial and technical capabilities to ensure outcomes achieve organisational objectives.

It applies to individuals who are responsible for managing a supply chain in an organisation.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Administration – Procurement and Contracting

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop and implement a supply chain strategy	1.1 Identify the organisation's objectives and the strategies for achieving them 1.2 Review current supply chain management strategy and how it delivers against organisational strategies 1.3 Assess supply chain opportunities that will add value to the organisation within the requirements of the strategy and budgetary allowance 1.4 Design and implement a supply chain strategy that increases effectiveness and achieves organisational objectives

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.5 Gain commitment of stakeholders to implement supply chain strategy 1.6 Assign responsibility to monitor supply chain strategy to relevant personnel
2. Manage the flow of supplies through the supply chain	2.1 Obtain information on the specifications of supplies in the supply chain 2.2 Clarify the aims, objectives and plans of supplies against organisational policies and procedures 2.3 Allocate supply chain tasks to self and other personnel 2.4 Support personnel to achieve supply chain tasks and milestones 2.5 Monitor and control the achievement of supply chain objectives against cost and timescales 2.6 Present reports on the results of supply chain outcomes to stakeholders
3. Manage supply chain relationships and activities	3.1 Apply portfolio analysis techniques to assess relationships in supply chains in accordance with the supply chain management strategy 3.2 Evaluate financial, technical and performance data of suppliers in accordance with supply chain strategies 3.3 Identify opportunities to adjust supply chain strategies to respond to the changing needs of customers, supply chain and organisational objectives 3.4 Design and implement a framework to promote collaboration with suppliers to achieve a competitive advantage 3.5 Consult with organisation management to confirm progress of supply chain activities in accordance to organisational objectives
4. Evaluate and improve supply chain effectiveness	4.1 Review the effectiveness of current relationships within the supply chain in accordance with the supply chain management strategy 4.2 Compare supply chain management models to determine most appropriate infrastructure to support organisational objectives 4.3 Assess techniques to support the development of innovation in the supply chain 4.4 Analyse cost reduction activities for a supply chain to achieve organisational objectives 4.5 Consolidate analysis and evaluation results to improve future supply chain management strategies and seek feedback from

ELEMENT	PERFORMANCE CRITERIA
	organisation management

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Gathers and analyses textual information from a range of sources and identifies relevant and key information to assist in the supply chain management process
Writing	• Designs, develops and revises strategic documents appropriate to audience and context
Oral Communication	• Uses clear language and appropriate features to provide information to a variety of individuals • Uses active listening and questioning techniques to convey and clarify information
Numeracy	• Analyses and compares financial information to assist in managing, evaluating and improving the supply chain
Navigate the world of work	• Contributes to organisation's strategic directions by developing and revising organisational policies and procedures • Complies with all legal requirements relevant to own responsibilities and considers the implications of these when negotiating, planning and undertaking work
Interact with others	• Actively identifies the requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction
Get the work done	• Develops plans to manage complex supply chain activities, with an awareness of how they contribute to strategic goals • Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of factors into account • Monitors outcomes of decisions, considering results from a range of perspectives, and identifying key concepts and principles that may be adaptable to future situations • Actively identifies digital systems, devices and applications with potential to meet current or future needs

Assessment Requirements for BSBPRC504 Manage a supply chain

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Performance Evidence

Evidence of the ability to:

- critically evaluate organisational supply chain management
- successfully manage a supply chain in accordance with organisational policies and procedures, including:
  - implement a supply chain strategy
  - monitor supply chain activities
  - co-ordinate staff and engage relevant stakeholders
  - liaise with suppliers to drive efficiencies
- evaluate and formulate recommendations to improve supply chain management strategy.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role:

- key features of organisational objectives and their relationship to the supply chain strategy
- key requirements relating to the management of a supply chain, including:
  - organisational policies and procedures for procurement, tendering and contracting
  - contracting and tendering
  - ethical behaviour
  - purchasing and procurement
  - supply chain management
- techniques to establish collaborative relationships

© Commonwealth of Australia, 2025 Industry Skills Australia

- relevant legislation, regulations, standards and organisation policies.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the administration – procurement and contracting field of work and include access to:

- organisation policies and procedures
- supply chain strategies and relevant supply chain management records
- office equipment and supplies
- case studies and, where possible, real situations in the workplace.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBPUR301 Purchase goods and services

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to determine purchasing requirements and make and receive purchases.

It applies to individuals who work under a level of supervision and who conduct low risk, low expenditure purchasing for an organisation using established and documented purchasing strategies. Individuals may be working in a small organisation with general responsibility for conducting purchasing within an organisation, or they may be a purchasing specialist working in a large organisation. Some judgement may be required to make decisions about purchasing strategies.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Administration – Purchasing and Contracting

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Understand purchasing and own requirements	1.1 Read, understand and clarify organisation's purchasing strategies as required 1.2 Determine own role and limits of authority in consultation with relevant personnel

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Make purchases	2.1 Receive purchase specifications from relevant personnel and clarify as required 2.2 Select purchasing methods most appropriate to particular purchases within limits of own role 2.3 Obtain approvals for purchases as required 2.4 Obtain quotations from suppliers as required 2.5 Select suppliers, place orders and make purchases
3. Receive purchases	3.1 Receive goods or make arrangements to receive services 3.2 Advise relevant personnel of receipt of purchase 3.3 Ensure goods received are checked for compliance with specifications 3.4 Take action to resolve non-compliance with specifications 3.5 Facilitate registration of new assets 3.6 File and store purchase records

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1, 2.2, 3.3, 3.4	• Gathers and interprets a range of textual information to identify relevant key information
Writing	1.1, 1.2, 2.1, 2.5, 3.1, 3.2, 3.5	• Creates everyday workplace documentation l using terminology and format relevant to audience and purpose
Oral Communication	1.1, 1.2, 2.1, 2.3-2.5, 3.1, 3.2, 3.4	• Uses suitable language to liaise with suppliers and clarify information within the organisation • Uses active questioning and listening techniques to confirm requirements
Numeracy	2.1, 2.4, 2.5	• Interprets simple numerical data and makes basic calculations to determine costs of goods and services
Navigate the world of work	1.1, 2.1, 3.3, 3.4	• Adheres to organisational procedures and policies • Understands how own role connects with others and contributes to broader work goals

© Commonwealth of Australia, 2025 Industry Skills Australia

Interact with others	1.1, 1.2, 2.1, 2.3-2.5, 3.2	• Selects from a small range of communication modes, forms and channels to meet a specific purpose within the immediate work environment • Seeks to cooperate with others to achieve results in immediate work context
Get the work done	1.2, 2.2, 2.5, 3.4-3.6	• Takes responsibility for planning, sequencing and prioritising tasks for efficient and effective outcomes • Responds to predictable routine problems and implements standard or logical solutions • Uses the main features and functions of digital tools to complete work tasks

ELEMENT	PERFORMANCE CRITERIA
	predetermined methodology and user requirements 1.4 Assess records to determine disposal status 1.5 Present findings of survey to inform users of proposed disposal processes and requirements 1.6 Undertake quality control measures in accordance with organisational procedures, to ensure consistency in determining disposal status and retention periods
2. Undertake disposal actions	2.1 Seek approval from appropriate individual/body for disposal actions 2.2 Destroy records which are no longer required for any purpose, in accordance with approval and organisational procedures 2.3 Store records which need to be kept for a further period, in accordance with legal obligations and organisational records storage requirements 2.4 Store original vital records, and copies of vital records where applicable, in accordance with organisational procedures and vital records strategy 2.5 Record and authorise all disposal actions in accordance with legal obligations, organisational procedures and business or records system rules
3. Maintain control of records	3.1 Prepare disposal documentation by recording the unique identifiers of the records to be disposed of in a form compliant with organisational rules and procedures for the transfer of custody, ownership and/or responsibility, or destruction of records 3.2 Prepare records for transfer in accordance with storage medium requirements 3.3 Retain identifying documentation for transfer as part of organisational records and forward a copy to the recipient 3.4 Document transit locations for records to be moved in the location control system, where applicable 3.5 Maintain identifying documentation for destroyed records as part of organisation records where appropriate
4. Transfer records	4.1 Determine method, timeframe and personnel to undertake the movement in accordance with the organisational procedures and record requirements 4.2 Document relocation of records in the location control system and other systems, in accordance with organisational procedures 4.3 Complete and document the movement of records in

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	accordance with the organisational procedures 4.4 Obtain proof of receipt and forward to appropriate authority where it is required
5. Destroy records	5.1 Determine method, timeframe and personnel to undertake the destruction, in accordance with organisational procedures and record requirements 5.2 Document destruction of records in the location control system and other systems, in accordance with organisational procedures 5.3 Complete and document destruction of records in accordance with legal requirements and organisational procedures 5.4 Destroy records under secure conditions

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 1.4, 1.6, 2.2-2.5, 3.1, 3.2, 4.1, 4.2, 4.3, 5.1-5.3	• Identifies and extracts information from record storage system to identify, classify and assess status of records • Identifies and interprets textual information from different sources to determine how information may be applied to job requirements
Writing	1.2, 1.5, 2.1, 2.5, 3.1, 3.2, 3.4, 3.5, 4.2, 4.3, 5.2, 5.3	• Completes or updates organisational documentation using industry related terminology and required format • Provides information to others using words and format appropriate to audience and context
Oral Communication	1.2, 1.4, 1.5, 2.1	• Participates effectively in interactions with others using words and non-verbal features appropriate to audience and context • Uses questioning and active listening techniques to confirm requirements
Numeracy	3.1, 3.5, 4.1	• Recognises and uses numerical systems associated with recordkeeping systems • Makes basic time calculations to schedule activities in the workplace
Navigate the	1.6, 2.2-2.5, 3.1, 4.1,	• Takes personal responsibility for following

Assessment Requirements for BSBRKG302 Undertake disposal

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- assess records to identify disposal status
- record and control processes as part of a disposal program
- dispose of identified records safely and securely in compliance with relevant legislation, regulations and standards.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the key provisions of relevant legislation from all forms of government, regulations, standards and documentation that may affect record disposal
- identify the general principles and explain the processes of records management and records management systems
- describe the organisational business functions, structure and culture
- explain the key details of organisational policies, strategies and procedures that relate to description, disposal and storage of records.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – recordkeeping field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRKG304 Maintain business records

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to maintain the records of a business or records system in good order on a day-to-day basis.

It applies to individuals who follow established guidelines and processes to assist them to carry out their work. They work under supervision or in consultation with more senior staff or system users to support effective recordkeeping and governance practices across the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Recordkeeping

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Collate business records	1.1 Identify individual records or information which should be incorporated into business or records system according to organisational criteria 1.2 Sort records in accordance with workplace requirements 1.3 Follow security and access requirements in accordance with organisational procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Update business or records system	2.1 Identify and record control information for describing new records to be incorporated into business or records system 2.2 Update control information describing movement or use of records within business or records system 2.3 Accurately record and update control information in business or records system 2.4 Identify and remove records of completed business activities from current system for disposal
3. Prepare reports from the business or records system	3.1 Interpret requests for reports and clarify the content and frequency sought, where necessary 3.2 Prepare reports from business or records system in accordance with instructions or request 3.3 Prepare reports in accordance with organisational security and access procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 2.1, 2.4, 3.1	• Gathers and interprets textual information from different sources to determine how information may be applied to job requirements
Writing	2.1, 2.2, 2.3, 3.1	• Uses clear and industry related terminology to complete and update workplace information
Oral Communication	3.1	• Uses questioning and active listening techniques to confirm job requirements
Numeracy	1.1	• Recognises and uses numerical systems associated with recordkeeping systems
Navigate the world of work	1.3, 3.3	• Takes some personal responsibility for following organisational procedures
Get the work done	1.1, 1.2, 2.1, 2.3, 2.4, 3.2	• Takes responsibility for planning and organising own workload to ensure work deadlines are met • Takes responsibility for the outcomes of routine

BSBRSK401 Identify risk and apply risk management processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify risks and to apply established risk management processes to a defined area of operations that are within the responsibilities and obligations of the role.

It applies to individuals with a broad knowledge of risk analysis or project management who contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

In this unit, risks applicable within own work responsibilities and area of operation, may include projects being undertaken individually or by a team, or operations within a section of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Risk Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify risks	1.1 Identify the context for risk management 1.2 Identify risks using tools, ensuring all reasonable steps have

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	been taken to identify all risks 1.3 Document identified risks in accordance with relevant policies, procedures, legislation and standards
2. Analyse and evaluate risks	2.1 Analyse and document risks in consultation with relevant stakeholders 2.2 Undertake risk categorisation and determine level of risk 2.3 Document analysis processes and outcomes
3. Treat risks	3.1 Determine appropriate control measures for risks and assess for strengths and weaknesses 3.2 Identify control measures for all risks 3.3 Refer risks relevant to whole of organisation or having an impact beyond own work responsibilities and area of operation to others as per established policies and procedures 3.4 Choose and implement control measures for own area of operation and/or responsibilities 3.5 Prepare and implement treatment plans
4. Monitor and review effectiveness of risk treatment/s	4.1 Regularly review implemented treatment/s against measures of success 4.2 Use review results to improve the treatment of risks 4.3 Provide assistance to auditing risk in own area of operation 4.4 Monitor and review management of risk in own area of operation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2	• Comprehends documents and texts of varying complexity to extract and analyse relevant information
Writing	1.3, 2.1, 2.3, 3.5	• Uses specific, industry related terminology and logical organisational structure in workplace documents that identify and analyse risk and report management process outcomes

© Commonwealth of Australia, 2025 Industry Skills Australia

Oral communication	2.1	• Participates effectively in interactions with stakeholders by using questioning and listening to elicit opinions and clarify understanding
Numeracy	1.2, 4.1	• Uses numerical tools to assess risk and uses numerical data to review plans
Navigate the world of work	1.1, 1.3, 3.3	• Complies with organisational and legislative requirements • Takes responsibility for identification and management of risk within own work context and refers matters to others as required
Interact with others	2.1	• Selects appropriate communication protocols and conventions when conferring with others to establish risk management requirements
Get the work done	1.1, 1.2, 2.1, 2.2, 3.1, 3.2, 3.4, 3.5, 4.1, 4.2, 4.3, 4.4	• Determines job sequence and works logically and systematically to undertake defined tasks • Uses analysis and consultative processes to inform decisions about selection and implementation of risk control measures • Evaluates effectiveness of plans and results to inform improvement decisions • Uses familiar digital technologies and systems to access information, prepare plans and communicate with others

Assessment Requirements for BSBRSK401 Identify risk and apply risk management processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to apply organisational policies, procedures and processes to:

- identify risks
- consult with relevant stakeholders to analyse and evaluate risks
- identify and evaluate control measures
- develop and implement treatment plans for own area or responsibility
- refer risks that are beyond own area of responsibility to others
- maintain risk management documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline techniques for identifying and evaluating risks
- outline organisational policies, procedures or processes for risk management
- give examples of areas where risks are commonly identified in an organisation
- outline the purpose and key elements of current risk management standards
- outline the legislative and regulatory context of the organisation in relation to risk management
- describe the organisation's auditing requirements relating to risk management.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk - risk management field of work and include access to:

© Commonwealth of Australia, 2025 Industry Skills Australia

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRSK501 Manage risk

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes skills and knowledge required to manage risks in a range of contexts across an organisation or for a specific business unit or area in any industry setting.

It applies to individuals who are working in positions of authority and are approved to implement change across the organisation, business unit, program or project area. They may or may not have responsibility for directly supervising others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Risk Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish risk context	1.1 Review organisational processes, procedures and requirements for undertaking risk management in accordance with current risk management standards 1.2 Determine scope for risk management process 1.3 Identify internal and external stakeholders and their issues 1.4 Review political, economic, social, legal, technological and policy context

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.5 Review strengths and weaknesses of existing arrangements 1.6 Document critical success factors, goals or objectives for area included in scope 1.7 Obtain support for risk management activities 1.8 Communicate with relevant parties about the risk management process and invite participation
2. Identify risks	2.1 Invite relevant parties to assist in the identification of risks 2.2 Research risks that may apply to scope 2.3 Use tools and techniques to generate a list of risks that apply to the scope, in consultation with relevant parties
3. Analyse risks	3.1 Assess likelihood of risks occurring 3.2 Assess impact or consequence if risks occur 3.3 Evaluate and prioritise risks for treatment
4. Select and implement treatments	4.1 Determine and select most appropriate options for treating risks 4.2 Develop an action plan for implementing risk treatment 4.3 Communicate risk management processes to relevant parties 4.4 Ensure all documentation is in order and appropriately stored 4.5 Implement and monitor action plan 4.6 Evaluate risk management process

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 1.5, 2.2	• Comprehends a variety of relatively complex texts • Gathers, interprets and analyses textual information from a range of sources to identify relevant information
Writing	1.6, 1.8, 2.1, 2.3, 4.3	• Develops textual material and organises content in a manner that effectively documents

© Commonwealth of Australia, 2025 Industry Skills Australia

		risk management analysis and assessment priorities and processes
Oral Communication	1.8, 2.1, 2.3, 4.3	• Participates in interactions with stakeholders using questioning and listening to elicit opinions, and to confirm and clarify understanding
Numeracy	2.2	• Uses numerical tools to assess risk and uses numerical data to review plans
Navigate the world of work	1.1, 2.1, 4.3	• Refers to organisational processes, procedures and requirements when making decisions about risk management
Interact with others	1.8, 2.1, 2.3, 4.3	• Establishes and uses appropriate conventions and protocols when communicating with stakeholders about risk management • Consults and negotiates with stakeholders about risk management processes and outcomes
Get the work done	1.2, 1.3, 1.5, 1.7, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 4.1, 4.2, 4.4, 4.5, 4.6	• Sequences and schedules a range of routine and complex activities, monitors implementation, evaluates processes and manages relevant communication • Systematically analyses information to decide on appropriate risk management treatments • Uses digital technologies and systems to access information, document plans and communicate with others

BSBSUS501 Develop workplace policy and procedures for sustainability

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop and implement a workplace sustainability policy and to modify the policy to suit changed circumstances.

It applies to individuals with managerial responsibilities who undertake work developing approaches to create, monitor and improve strategies and policies within workplaces and engage with a range of relevant stakeholders and specialists.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Sustainability

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop workplace sustainability policy	1.1 Define scope of sustainability policy 1.2 Gather information from a range of sources to plan and develop policy 1.3 Identify and consult stakeholders as a key component of the policy development process 1.4 Include appropriate strategies in policy at all stages of work for

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	minimising resource use, reducing toxic material and hazardous chemical use and employing life cycle management approaches 1.5 Make recommendations for policy options based on likely effectiveness, timeframes and cost 1.6 Develop policy that reflects the organisation's commitment to sustainability as an integral part of business planning and as a business opportunity 1.7 Agree to appropriate methods of implementation, outcomes and performance indicators
2. Communicate workplace sustainability policy	2.1 Promote workplace sustainability policy, including its expected outcome, to key stakeholders 2.2 Inform those involved in implementing the policy about expected outcomes, activities to be undertaken and assigned responsibilities
3. Implement workplace sustainability policy	3.1 Develop and communicate procedures to help implement workplace sustainability policy 3.2 Implement strategies for continuous improvement in resource efficiency 3.3 Establish and assign responsibility for recording systems to track continuous improvements in sustainability approaches
4. Review workplace sustainability policy implementation	4.1 Document outcomes and provide feedback to key personnel and stakeholders 4.2 Investigate successes or otherwise of policy 4.3 Monitor records to identify trends that may require remedial action and use to promote continuous improvement of performance 4.4 Modify policy and or procedures as required to ensure improvements are made

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Industry Skills Australia

Reading	1.1, 1.2, 4.2, 4.3	• Identifies, analyses and evaluates complex textual information to determine legislative and regulatory requirements, trends and outcomes
Writing	1.2-1.7, 2.1, 2.2, 3.1, 3.3, 4.1, 4.3, 4.4	• Researches, plans and prepares documentation using format and language appropriate to context, organisational requirements and audience
Oral Communication	1.2, 1.3, 2.1, 2.2, 3.1, 4.1	• Presents information and seeks advice using language appropriate to audience • Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding
Numeracy	1.5, 4.3	• Interprets and uses mathematical equations to calculate numerical information relating to time durations and costs
Navigate the world of work	1.1-1.6, 3.1, 4.4	• Develops, monitors and modifies organisational policies and procedures in accordance with legislative requirements and organisation goals
Interact with others	1.2, 1.3, 2.1, 2.2, 3.1, 3.3, 4.1, 4.3	• Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information • Plays a lead role in consulting and negotiating positive outcomes with a range of stakeholders
Get the work done	1.2, 1.4-1.7, 2.3, 2.4, 3.1, 3.2, 3.3, 3.5, 3.6, 4.1, 4.3, 4.4	• Plans, organises and implements work activities of self and others that ensure compliance with organisational policies and procedures, and legislative requirements • Sequences and schedules complex activities, monitors implementation, and manages relevant communication • Uses systematic, analytical processes in relatively complex, situations, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria • Evaluates outcomes of decisions to identify opportunities for improvement

Assessment Requirements for BSBSUS501 Develop workplace policy and procedures for sustainability

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- scope and develop organisational policies and procedures that comply with legislative requirements and support the organisation's sustainability goals covering at a minimum:
  - minimising resource use
  - resource efficiency
  - reducing toxic material and hazardous chemical use
  - employing life cycle management approaches
  - continuous improvement
- plan and implement sustainability policy and procedures including:
  - agreed outcomes
  - performance indicators
  - activities to be undertaken
  - assigned responsibilities
  - record keeping, review and improvement processes
- consult and communicate with relevant stakeholders to generate engagement with sustainability policy development, implementation and continuous improvement
- review and improve sustainability policies.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the environmental or sustainability legislation, regulations and codes of practice applicable to the organisation identify internal and external sources of information and explain how they can be used to plan and develop the organisation's sustainability policy

© Commonwealth of Australia, 2025 Industry Skills Australia

- explain policy development processes and practices
- outline organisational systems and procedures that relate to sustainability
- outline typical barriers to implementing policies and procedures in an organisation and possible strategies to address them.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the sustainability field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS308 Participate in WHS hazard identification, risk assessment and risk control processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to participate in the processes of work health and safety (WHS) hazard identification, risk assessment and risk control. It includes participating in worker consultation and support to contribute to a healthy and safe workplace.

The unit applies to those who assist with identifying workplace hazards and assessing and controlling WHS risks as part of their WHS responsibilities, which are in addition to their main duties.

NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Participate in WHS hazard identification in the workplace	1.1 Participate in selecting hazard identification methods for the workplace according to organisational policies and procedures 1.2 Use selected methods to identify, report and record hazards according to organisational policies and procedures, standards and WHS laws 1.3 Provide information and assistance to required personnel during hazard identification process
2. Participate in WHS risk assessment	2.1 Participate in selecting suitable risk assessment methods for the workplace according to organisational policies and procedures 2.2 Assess and record risks using selected methods according to organisational procedures, standards and WHS laws 2.3 Provide information and assistance to required personnel during risk assessment process
3. Contribute to developing and implementing WHS control measures	3.1 Obtain organisation records of the outcomes of hazard identifications and risk assessments, and use them to participate in developing risk control options 3.2 Identify duty holders according to WHS laws and organisational WHS policies, procedures, processes and systems 3.3 Participate in selecting risk control options using criteria agreed to by work team, and according to organisational policies, procedures, processes and systems 3.4 Identify and report factors impeding successful implementation of selected risk control options to determine potential control measures to be implemented 3.5 Review and document potential control measures for compliance with relevant WHS laws 3.6 Contribute to developing a risk control implementation plan according to the hierarchy of control measures 3.7 Provide written information to individuals and duty holders to facilitate implementation of reviewed control measures
4. Contribute to consultative arrangements for hazard	4.1 Assist engaging work team in hazard identification and risk assessment according to organisational WHS

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENTS	PERFORMANCE CRITERIA
identification and risk assessment activities	consultation and participation policies, procedures and processes 4.2 Respond to issues raised according to organisational procedures and processes 4.3 Develop plan to encourage others to participate in hazard identification and risk assessment activities, according to organisational policies and procedures
5. Contribute to consultative arrangements for implementing control measures	5.1 Assist with implementing consultative processes that engage work team in developing and implementing control measures, according to organisational WHS consultation and participation policies, procedures and processes 5.2 Respond to issues raised according to organisational policies and procedures for issue resolution 5.3 Promote worker participation in arrangements for implementing control measures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Interprets and identifies information from WHS laws, workplace policies, procedures and records
Writing	• Uses structure and language appropriate to audience and context in plans, reports and general advice
Oral communication	• Presents information and assistance using appropriate industry-specific vocabulary • Uses listening and questioning to clarify and confirm understanding
Navigate the world of work	• Follows regulatory responsibilities, and organisational policies and procedures in relation to WHS responsibilities • Keeps up to date with changes to WHS laws, and organisational policies and procedures relevant to own role
Interact with others	• Identifies what to communicate and to whom in a range of contexts • Cooperates with others as part of WHS activities and contributes to specific activities requiring joint responsibility and accountability • Shares information and resources, offers assistance voluntarily and provides feedback when requested

© Commonwealth of Australia, 2025 Industry Skills Australia

Skill	Description
	• Plays an active role in group discussions, paying attention to perspectives of others and encouraging participation
Get the work done	• Plans and implements tasks to achieve required outcomes • Uses decision-making processes, setting or clarifying goals, gathering information and identifying and evaluating choices against a set of criteria in the WHS risk-management process

Unit Mapping Information

Supersedes and is equivalent to BSBWHS303 Participate in WHS hazard identification, risk assessment and risk control.

Assessment Requirements for BSBWHS308 Participate in WHS hazard identification, risk assessment and risk control processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit and, on at least two occasions, to:

- participate in selecting and using required methods to identify, report and record hazards
- assess and record risks for identified hazards
- promote and support worker consultation and participation in hazard identification and risk assessment
- participate in developing, selecting and implementing risk control options and plans for identified hazards.
-

Knowledge Evidence

The candidate must demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- work health and safety (WHS) legislative requirements, regulations, codes of practice and standards relating to:
  - WHS hazard identification, risk assessment and risk control
  - WHS hazard communication, consultation and participation
  - identifying duty holders
  - recordkeeping
  - specific hazard identification, risk assessment and control methods
- internal and external sources of WHS information and data, and procedures for accessing them
- concept of hazards, risks and risk factors
- basic principles of incident causation and injury processes
- WHS organisational policies and procedures relating to identifying hazards, and assessing and controlling risks:

© Commonwealth of Australia, 2025 Industry Skills Australia

- WHS hazards that may be present in the workplace, the harm they can cause and how this harm occurs
- types of hazard and risk registers
- responding to WHS issues, including risk control options for different hazards and work situations, and suitable risk assessment methods
- workplace communication processes for reporting and recording, and plans for sharing information about hazard identification, risk assessment and risk control.
-

Assessment Conditions

Assessment must comply with WHS laws, and WHS legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- organisational policies, standard operating procedures and plans required for the performance evidence
- WHS laws relevant to hazard identification, risk assessment and risk control
- relevant WHS data files
- opportunities for interaction with others
- workplace equipment and resources required to demonstrate the performance evidence.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package release 1.0

Application

This unit describes the skills and knowledge required to implement and monitor an organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area in order to meet legislative requirements.

It applies to individuals with supervisory responsibilities for implementing and monitoring the organisation's WHS policies, procedures and programs in a work area. These individuals have a broad knowledge of WHS policies and contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They provide supervision and guidance to others and have limited responsibility for the output of others.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

ELEMENT	PERFORMANCE CRITERIA
essential outcomes.	*demonstrate achievement of the element.*
1. Provide information to the work team about WHS policies and procedures	1.1 Accurately explain to the work team relevant provisions of WHS Acts, regulations and codes of practice 1.2 Provide information about the organisation's WHS policies, procedures and programs, and ensure it is readily accessible to, and understandable by the work team 1.3 Regularly provide and clearly explain to the work team information about identified hazards and the outcomes of risk assessment and control
2. Implement and monitor participation arrangements for managing WHS	2.1 Communicate to workplace parties the importance of effective consultation mechanisms in managing health and safety risks in the workplace 2.2 Apply consultation procedures to facilitate participation of the work team in managing work area hazards 2.3 Promptly deal with issues raised through consultation, according to organisational consultation procedures and WHS legislative and regulatory requirements 2.4 Promptly record and communicate to the work team the outcomes of consultation over WHS issues
3. Implement and monitor organisational procedures for providing WHS training	3.1 Identify WHS training needs according to organisational requirements and WHS legislative and regulatory requirements 3.2 Make arrangements to meet WHS training needs of team members in consultation with relevant individuals 3.3 Provide workplace learning opportunities and coaching and mentoring assistance to facilitate team and individual achievement of identified WHS training needs 3.4 Identify and report to management the costs associated with providing training for work team, for inclusion in financial and management plans
4. Implement and monitor organisational procedures and legal requirements for identifying hazards and assessing and controlling risks	4.1 Identify and report on hazards in work area according to WHS policies and procedures and WHS legislative and regulatory requirements 4.2 Promptly action team member hazard reports according to organisational procedures and WHS legislative and regulatory requirements 4.3 Implement procedures to control risks using the hierarchy of control, according to organisational and WHS legislative requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	4.4 Identify and report inadequacies in existing risk controls according to hierarchy of control and WHS legislative requirements 4.5 Monitor outcomes of reports on inadequacies, where appropriate, to ensure a prompt organisational response
5. Implement and monitor organisational procedures for maintaining WHS records for the team	5.1 Accurately complete and maintain WHS records of incidents of occupational injury and disease in work area, according to WHS policies, procedures and legislative requirements 5.2 Use aggregate information and data from work area records to identify hazards and monitor risk control procedures in work area

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 5.2	• Interprets and analyses complex WHS legislative and organisational texts
Writing	1.1-1.3, 2.3, 2.4, 3.1, 3.2, 3.4, 4.1, 4.4, 5.1	• Documents WHS legislative and organisational information using structure, layout and language suitable for audience • Records WHS issues and actions taken according to reporting requirements • Prepares and maintains required records using appropriate structure and vocabulary
Oral communication	1.1-1.3, 2.1, 2.4, 3.2, 3.3, 4.1, 4.4	• Provides WHS legislative and organisational information and advice using structure and language suitable for audience
Numeracy	3.4, 5.2	• Extracts, interprets and comprehends mathematical information in relation to training costs and risk management data
Navigate the world of work	1.1,1.2, 2.3, 3.1, 4.1-4.5, 5.1	• Takes responsibility for adherence to legal and regulatory responsibilities and organisational policies and procedures in relation to WHS • Keeps up to date on changes to WHS legislation or regulations and organisational policies and procedures
Interact with	2.2, 3.2, 3.3	• Selects and uses appropriate conventions and protocols to facilitate consultation or provide feedback

© Commonwealth of Australia, 2025 Industry Skills Australia

others		• Initiates and contributes to facilitating consultative role, responding, explaining, clarifying and expanding on ideas and information as required • Collaborates with others to achieve individual and team outcomes
Get the work done	2.2, 3.2, 3.3, 4.1-4.5, 5.1	• Uses combination of formal, logical planning and intuitive understanding of context to identify relevant information and risks, and identify and evaluate alternative strategies • Uses formal decision-making processes, setting or clarifying goals, gathering information and identifying and evaluating choices against a set of criteria • Recognises and takes responsibility for reporting WHS risk control inadequacies • Uses formal and informal processes to monitor implementations of WHS solutions and reflect on outcomes

Assessment Requirements for BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- explain clearly and accurately to work team the relevant work health and safety (WHS) information including:
  - WHS legislative and organisational requirements
  - identified hazards and outcomes of risk assessment and control
- ensure that the team has access to information about WHS policies, procedures and programs in appropriate structure and language
- implement and monitor procedures according to organisational and legislative WHS requirements including:
  - consultation and communications to enable team members to participate in managing WHS risks and hazards
  - identifying WHS training needs and providing learning opportunities, coaching and mentoring as appropriate to needs
  - identifying, reporting and taking action on WHS hazards and risks
  - identifying and reporting inadequacies in existing risk controls and monitoring outcomes to ensure a prompt organisational response
  - reporting on the cost of WHS training
  - keeping WHS records
  - analysing aggregate WHS data to identify hazards and monitor risk control procedures in work area.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

© Commonwealth of Australia, 2025
Industry Skills Australia

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legal responsibilities and duties of managers, supervisors, persons conducting businesses or undertakings (PCBUs) and workers in relation to WHS risk management in the workplace
- identify key provisions of relevant WHS Acts, regulations and codes of practice that apply to the business and outline how they apply in the work area
- explain organisational policies and procedures relating to hazard identification, risk management, fire, emergency and evacuation, incident investigation and reporting
- explain the importance of effective consultation mechanisms in managing health and safety risks in the workplace
- explain how the hierarchy of control applies in the work area.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- an actual workplace or simulated environment
- workplace equipment and resources
- examples of documents relating to workplace safety, hazard identification and risk assessment
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS521 Ensure a safe workplace for a work area

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to establish, maintain and evaluate an organisation's work health and safety (WHS) policies, procedures and programs in a work area to ensure a safe workplace, according to WHS legislative requirements. It takes a systems approach and addresses compliance with relevant legislative requirements.

The unit applies to those working in a range of contexts who have, or are likely to have, responsibility for WHS as part of their broader management role. It is relevant for people with obligations under WHS laws, for example persons conducting a business or undertaking (PCBUs) or officers, as defined by WHS laws.

NOTES

1. The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENTS	**PERFORMANCE CRITERIA**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish a WHS management system in a work area	1.1 Locate, adapt, adopt and communicate WHS policies that define the organisation's commitment to complying with WHS laws 1.2 Identify duty holders and define WHS responsibilities for all workplace personnel in the work area according to WHS laws, policies, procedures and programs 1.3 Identify and approve financial and human resources required by the WHS management system (WHSMS) according to organisational procedures
2. Establish and maintain effective and compliant consultative arrangements for managing WHS in a work area	2.1 Work with required personnel to set up and maintain consultative arrangements according to required WHS laws 2.2 Resolve issues raised through participation and consultation arrangements according to required WHS laws and organisational protocols 2.3 Provide information about consultation and participation outcomes to required personnel according to organisational policies and procedures
3. Establish and maintain procedures for effectively identifying hazards, and assessing and controlling risks in work area	3.1 Develop procedures for ongoing hazard identification, and assessment and control of associated risks 3.2 Include hazard identification at the planning, design and evaluation stages of any workplace change to ensure that new hazards are not created by proposed changes and existing hazards are controlled 3.3 Develop and maintain procedures for selecting and implementing risk controls according to the hierarchy of control measures and WHS legislative requirements 3.4 Identify inadequacies in existing risk controls according to the hierarchy of control measures and WHS legislative requirements, and promptly provide resources to enable implementation of new measures 3.5 Identify requirements for expert WHS advice, and request this advice as required, according to organisational procedures
4. Evaluate and maintain a work area WHS management system	4.1 Develop and provide a WHS induction and training program for required personnel in a work area as part of

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENTS	PERFORMANCE CRITERIA
(WHSMS)	organisation's training program 4.2 Use a system for WHS recordkeeping to allow identification of patterns of occupational injury and disease in the organisation, and to maintain a record of WHS decisions made, including reasons for decisions 4.3 Measure and evaluate the WHSMS according to organisation's quality systems framework 4.4 Develop and implement improvements to WHSMS to achieve organisational WHS objectives according to organisational procedures 4.5 Ensure compliance with WHS legislative framework to achieve, as a minimum, WHS legal requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Organises, evaluates and critiques ideas and information from WHS laws, policies, procedures and programs
Writing	• Produces WHS policies, procedures and programs using appropriate vocabulary, grammatical structure and conventions • Records WHS decisions according to organisational requirements
Oral communication	• Presents and seeks information from others using structure and language suitable for the audience • Provides information about WHS policies and procedures and on resolution of WHS issues, varying the level of technical vocabulary to suit the audience
Numeracy	• Selects from, and applies, an expanding range of mathematical and problem-solving strategies in identifying financial and human resources required to support WHS requirements
Navigate the world of work	• Monitors adherence to legal and regulatory rights and responsibilities for self and others in relation to WHS • Develops, implements and reviews WHS-related policies, procedures and processes according to legislative and organisational requirements
Interact with others	• Plays a lead role in situations requiring effective collaboration, demonstrating the ability to guide discussions and negotiate

© Commonwealth of Australia, 2025 Industry Skills Australia

Skill	Description
	agreeable outcomes • Provides feedback to others in forms they can understand and use
Get the work done	• Develops plans or processes to manage relatively complex WHS management tasks, with an awareness of how they contribute to operational and strategic goals • Uses systematic and analytical processes, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria • Considers whether, and how, others should be involved, using consultative or collaborative processes as an integral part of the decision-making process • Uses digital systems and tools to enter, store and retrieve relevant information

Unit Mapping Information

Supersedes and is equivalent to BSBWHS501 Ensure a safe workplace.

Assessment Requirements for BSBWHS521 Ensure a safe workplace for a work area

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- establish, implement, maintain and evaluate one work health and safety management system (WHSMS) for a work area of an organisation that complies with WHS laws, and organisational policies and procedures.

During the above, the candidate must:

- establish, implement, maintain and evaluate effective and compliant consultative arrangements for managing WHS, including:
  - identifying duty holders
  - identifying and approving required resources
  - developing and implementing a training program
- establish, implement, maintain and evaluate procedures for effectively identifying hazards, and assessing and controlling risks using the hierarchy of control measures.
-

Knowledge Evidence

The candidate must demonstrate the knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- details of relevant WHS laws relating to ensuring a safe workplace
- WHS organisational policies, procedures, programs and practices required for the performance evidence
- hazard identification and risk-management processes
- key principles, uses and components of the hierarchy of control measures and procedures for applying it in the workplace
- organisational and WHS legislative reporting requirements.
-

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessment must comply with WHS laws, legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- organisational WHS policies and procedures required to demonstrate the performance evidence
- WHS laws required to demonstrate the performance evidence
- case studies and, where possible, real situations
- opportunities for interaction with others.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBWOR201 Manage personal stress in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to understand signs and sources of stress within the broader framework of the job role and work environment.

It applies to individuals who usually work with some guidance and supervision in an environment where they are likely to encounter difficult customers and situations from time to time. It typically applies in a contact centre environment owing to the very measured, structured, high volume and potentially repetitive nature of the work, but can apply in any work environment.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop personal awareness of stress	1.1 Recognise signs and sources of stress 1.2 Acknowledge stress and difficult situations 1.3 Analyse and understand potential areas of stress in the work environment
2. Develop stress	2.1 Develop an effective understanding of a range of stress

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
management techniques	management techniques 2.2 Use appropriate techniques to manage stressful situations effectively 2.3 Focus on areas of stress within personal control 2.4 Adopt strategies to effectively reduce, manage and deal with stress
3. Manage time	3.1 Develop and understand job role priorities 3.2 Develop techniques to support achievement of key performance indicators (KPIs) and priorities 3.3 Use appropriate time management tools and techniques 3.4 Regularly evaluate tools and techniques 3.5 Promptly identify and inform relevant personnel of any variations and difficulties affecting work requirements, through regular reviews
4. Recover from a stressful contact	4.1 Review the contact or situation 4.2 Analyse root cause/s of stressful contact or situation 4.3 Depersonalise context of contact or situation 4.4 Discuss outcomes with appropriate staff members 4.5 Prepare for next contact or situation positively 4.6 Follow up or take action where needed
5. Maintain personal stamina and resilience	5.1 Identify sources of fatigue in contact centre role 5.2 Adopt work routine and procedural strategies to minimise stress and fatigue 5.3 Monitor personal performance against performance requirements 5.4 Adapt stamina management strategies to maximise performance 5.5 Seek assistance from team members and management in managing stamina
6. Maintain work/life balance	6.1 Identify work/life priorities 6.2 Adopt strategies to support work/life priorities 6.3 Give high priority to health and wellbeing 6.4 Monitor work/life balance 6.5 Develop ability to effectively leave work behind at the end of

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	the day

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	3.1-3.5	• Recognises and interprets textual information to determine job role and requirements
Writing	3.3, 3.4, 3.5	• Completes time management documentation using organisational formats
Oral Communication	3.5, 4.4, 5.5	• Participates in discussions using clear language and features appropriate to audience • Uses listening and questioning techniques to request assistance and confirm understanding
Navigate the world of work	3.1, 3.2, 5.3	• Understands role requirements and identifies own responsibilities
Interact with others	3.5, 4.4, 5.5	• Establishes rapport and builds relationships with team members and others • Maintains awareness of own strengths and weaknesses to support an overall sense of wellbeing
Get the work done	1.3, 2.1, 2.4, 3.1-3.4, 4.1-4.3, 4.5, 4.6, 5.1-5.4, 6.1, 6.2, 6.4, 6.5	• Plans and organises tasks to achieve outcome within timeframes • Uses analytical skills to decide on effective techniques to manage stress and personal well-being • Uses problem-solving skills to address a range of issues, seeking advice of others, where necessary • Monitors implementation of solutions and reflects on outcomes

Assessment Requirements for BSBWOR201 Manage personal stress in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- recognise and understand potential stress in the work environment
- develop and use techniques and strategies to manage stress and stressful situations
- adopt and monitor potential sources of stress and fatigue, seeking assistance as required
- monitor own performance against performance requirements and key performance indicators (KPIs)
- use techniques to achieve work/life balance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe job role priorities and KPIs
- list internal and external sources of assistance, including escalation pathways
- outline signs and sources of existing and potential stress or difficult situations
- discuss stress management and reduction techniques
- describe time management tools and techniques.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability – workplace effectiveness field of work and include access to:

- office equipment and resources
- time management tools

© Commonwealth of Australia, 2025 Industry Skills Australia

- workplace documentation
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWOR301 Organise personal work priorities and development

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to organise own work schedules, to monitor and obtain feedback on work performance and to maintain required levels of competence.

This unit applies to individuals who exercise discretion and judgement and apply a broad range of competencies in various work contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Organise and complete own work schedule	1.1 Ensure that work goals, objectives or Key Performance Indicators (KPIs) are understood, negotiated and agreed in accordance with organisational requirements 1.2 Assess and prioritise workload to ensure tasks are completed within identified timeframes 1.3 Identify factors affecting the achievement of work objectives and incorporate contingencies into work plans 1.4 Use business technology efficiently and effectively to manage

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	and monitor scheduling and completion of tasks
2. Monitor own work performance	2.1 Accurately monitor and adjust personal work performance through self assessment to ensure achievement of tasks and compliance with legislation and work processes or KPIs 2.2 Ensure that feedback on performance is actively sought and evaluated from colleagues and clients in the context of individual and group requirements 2.3 Routinely identify and report on variations in the quality of and products and services according to organisational requirements 2.4 Identify signs of stress and effects on personal wellbeing 2.5 Identify sources of stress and access appropriate supports and resolution strategies
3. Co-ordinate personal skill development and learning	3.1 Identify personal learning and professional development needs and skill gaps using self assessment and advice from colleagues and clients in relation to role and organisational requirements 3.2 Identify, prioritise and plan opportunities for undertaking personal skill development activities in liaison with work groups and relevant personnel 3.3 Access, complete and record professional development opportunities to facilitate continuous learning and career development 3.4 Incorporate formal and informal feedback into review of further learning needs

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.1-3.4	• Employs a range of approaches and investigative techniques to source the knowledge necessary to arrange personal learning experiences
Reading	1.1, 1.2, 2.1	• Interprets textual information to determine organisation's procedures, own work performance and objectives

© Commonwealth of Australia, 2025 Industry Skills Australia

Writing	1.3, 1.4, 2.3, 3.1, 3.2, 3.3	• Prepares written reports and workplace documents that communicate information clearly and effectively
Oral Communication	2.2, 2.3, 3.1, 3.2	• Clearly gives and receives feedback using specific and relevant language • Uses listening and questioning techniques to confirm understanding
Numeracy	1.1, 1.3	• Understands responsibilities and scope of role and complies with organisational policies, procedures and protocols
Interact with others	1.1, 2.2, 2.3, 3.1, 3.2	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role • Fosters and nurtures a culture of constructive and respectful feedback • Proactively collaborates with others to achieve specific goals
Get the work done	1.2, 1.3, 1.4, 2.4, 2.5, 3.2	• Plans and organises work commitments to ensure deadlines and objectives are met • Uses formal analytical thinking techniques to recognise and respond to routine problems • Uses digital systems and tools to enter, store and monitor information

Assessment Requirements for BSBWOR301 Organise personal work priorities and development

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare a work plan according to organisational requirements and work objectives
- use business technology to schedule, prioritise and monitor completion of tasks in a work plan
- assess and prioritise own work load and deal with contingencies
- monitor and assess personal performance against job role requirements by seeking feedback from colleagues and clients
- identify personal development needs and access, complete and record skill development and learning.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline key provisions of legislation that relate to own work role
- describe goals, objectives or key performance indicators of own work role
- explain ways to elicit, analyse and interpret feedback when communicating with other people in the workplace
- explain the principles and techniques of goal setting, measuring performance, time management and personal assessment of learning and development needs
- explain signs and sources of stress and strategies to deal with stress in the workplace
- identify methods to identify and prioritise personal learning needs.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- office equipment and resources
- work schedules and performance improvement plans
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWOR501 Manage personal work priorities and professional development

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to create systems and process to organise information and prioritise tasks.

It applies to individuals working in managerial positions who have excellent organisational skills. The work ethic of individuals in this role has a significant impact on the work culture and patterns of behaviour of others as managers at this level are role models in their work environment.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish personal work goals	1.1 Serve as a positive role model in the workplace through personal work planning 1.2 Ensure personal work goals, plans and activities reflect the organisation's plans, and own responsibilities and accountabilities 1.3 Measure and maintain personal performance in varying work conditions, work contexts and when contingencies occur

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Set and meet own work priorities	2.1 Take initiative to prioritise and facilitate competing demands to achieve personal, team and organisational goals and objectives 2.2 Use technology efficiently and effectively to manage work priorities and commitments 2.3 Maintain appropriate work-life balance, and ensure stress is effectively managed and health is attended to
3. Develop and maintain professional competence	3.1 Assess personal knowledge and skills against competency standards to determine development needs, priorities and plans 3.2 Seek feedback from employees, clients and colleagues and use this feedback to identify and develop ways to improve competence 3.3 Identify, evaluate, select and use development opportunities suitable to personal learning style/s to develop competence 3.4 Participate in networks to enhance personal knowledge, skills and work relationships 3.5 Identify and develop new skills to achieve and maintain a competitive edge

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.1, 3.2, 3.3, 3.4, 3.5	• Investigates and uses a range of strategies to develop personal competence
Reading	1.2, 3.1, 3.2	• Analyses and interprets textual information from organisational policies and practices or feedback to inform personal development planning
Writing	3.2	• Uses feedback to prepare reports that summarise ways to improve competence
Oral Communication	3.2	• Uses active listening and questioning to seek and receive feedback
Navigate the world of work	1.2, 2.1	• Understands how own role contributes to broader organisational goals • Considers organisational protocols when planning own career development

© Commonwealth of Australia, 2025 Industry Skills Australia

Interact with others	1.1, 3.2, 3.4	• Selects and uses appropriate conventions and protocols when communicating with diverse stakeholders • Uses interpersonal skills to establish and build positive working relationships with others
Get the work done	1.1, 1.2, 1.3, 2.1, 2.2, 2.3, 3.1	• Plans and prioritises tasks in order to meet deadlines, manage role responsibilities and to manage own personal welfare • Identifies and uses appropriate technology to improve work efficiency

BSBWOR502 Lead and manage team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead teams in the workplace and to actively engage with the management of the organisation.

It applies to individuals working at a managerial level who facilitate work teams and build a positive culture within their work teams. At this level, work will normally be carried out using complex and diverse methods and procedures requiring the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish team performance plan	1.1 Consult team members to establish a common understanding of team purpose, roles, responsibilities and accountabilities in accordance with organisational goals, plans and objectives 1.2 Develop performance plans to establish expected outcomes, outputs, key performance indicators (KPIs) and goals for work team 1.3 Support team members in meeting expected performance

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	outcomes
2. Develop and facilitate team cohesion	2.1 Develop strategies to ensure team members have input into planning, decision making and operational aspects of work team 2.2 Develop policies and procedures to ensure team members take responsibility for own work and assist others to undertake required roles and responsibilities 2.3 Provide feedback to team members to encourage, value and reward individual and team efforts and contributions 2.4 Develop processes to ensure that issues, concerns and problems identified by team members are recognised and addressed
3. Facilitate teamwork	3.1 Encourage team members and individuals to participate in and to take responsibility for team activities, including communication processes 3.2 Support the team in identifying and resolving work performance problems 3.3 Ensure own contribution to work team serves as a role model for others and enhances the organisation's image for all stakeholders
4. Liaise with stakeholders	4.1 Establish and maintain open communication processes with all stakeholders 4.2 Communicate information from line manager/management to the team 4.3 Communicate unresolved issues, concerns and problems raised by team members and follow-up with line manager/management and other relevant stakeholders 4.4 Evaluate and take necessary corrective action regarding unresolved issues, concerns and problems raised by internal or external stakeholders

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Industry Skills Australia

Reading	1.1, 4.4	• Analyses and interprets textual information from the organisation's policies, goals and objectives to establish team goals or to determine corrective action
Writing	1.2, 2.1, 2.2, 2.4, 4.2, 4.3, 4.4	• Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	1.1, 2.3, 3.1, 4.1, 4.2, 4.3	• Engages in discussions or provides information using appropriate vocabulary and non-verbal features • Uses listening and questioning techniques to confirm understanding and to engage the audience
Navigate the world of work	1.1, 2.1, 2.2, 3.3	• Understands how own role contributes to broader organisational goals • Modifies or develops policies and procedures to achieve organisational goals
Interact with others	1.1, 1.3, 2.2, 2.3, 3.1, 3.2, 4.2, 4.3	• Selects and uses appropriate conventions and protocols when communicating with diverse stakeholders • Uses interpersonal skills to gain trust and confidence of team and provides feedback to others in forms that they can understand and use • Adapts personal communication style to build positive working relationships and to show respect for the opinions, values and particular needs of others • Plays a lead role in situations requiring effective collaboration, demonstrating high level conflict resolution skills and ability to engage and motivate others
Get the work done	1.2, 2.1, 2.2, 2.4, 3.2, 4.1, 4.3, 4.4	• Develops, implements and monitors plans and processes to ensure team effectiveness • Monitors and actively supports processes and development activities to ensure the team is focused on work outcomes • Plans for unexpected outcomes and implements creative responses to overcome challenges

Assessment Requirements for BSBWOR502 Lead and manage team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use leadership techniques and strategies to facilitate team cohesion and work outcomes including:
  - encouraging and fostering shared understanding of purpose, roles and responsibilities
  - identifying and resolving problems
  - providing feedback to encourage, value and reward others
  - modelling desired behaviour and practices
- develop policies and procedures to ensure team members take responsibility for own work and assist others to undertake required roles and responsibilities
- establish processes to address issues and resolve performance issues
- support team to meet expected performance outcomes including providing formal and informal learning opportunities as needed
- develop performance plans with key performance indicators (KPIs), outputs and goals for individuals or the team which incorporate input from stakeholders
- communicate effectively with a range of stakeholders about team performance plans and team performance
- facilitate two-way flow of information between team and management relevant to team performance
- evaluate and take necessary corrective action regarding unresolved issues, concerns and problems raised by internal or external stakeholders.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how group dynamics can support or hinder team performance

© Commonwealth of Australia, 2025 Industry Skills Australia

- outline strategies that can support team cohesion, participation and performance
- explain strategies for gaining consensus
- explain issue resolution strategies.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWRK411 Support employee and industrial relations procedures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to communicate and implement industrial relations policies and procedures to effectively represent organisations/employers.

It applies to individuals who work in support positions, assisting others in dealing with industrial relations conflicts and issues.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Workforce Development – Workplace Relations

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Communicate and implement organisation's industrial relations policies and procedures	1.1 Source and disseminate relevant legislation, agreements, policies and procedures to relevant persons and groups 1.2 Implement agreements, policies and procedures according to site, enterprise and statutory requirements 1.3 Support strategies to effectively communicate with relevant persons and groups on industrial relations matters 1.4 Promote the organisation's industrial relations procedures to

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	relevant persons and groups 1.5 Represent the organisation appropriately in discussions with key stakeholders
2. Assist in minimising industrial relations conflict	2.1 Monitor the implementation of industrial relations policies and procedures 2.2 Process documentation and report to management and other relevant parties about potential industrial relations conflicts 2.3 Support managers to contain industrial relations conflicts and deal with grievances and disputes, within limits of own authority 2.4 Work with employees to resolve personal grievances and prevent escalation of industrial relations conflicts 2.5 Work under supervision to source specialist industrial relations expertise
3. Enhance industrial relations	3.1 Trial and implement strategies to monitor the implementation of the organisation's industrial relations policies and procedures 3.2 Implement strategies to facilitate feedback on the industrial climate 3.3 Implement strategies to strengthen relationships with relevant persons and groups 3.4 Provide information and feedback to management on industrial relations 3.5 Provide information and advice to relevant persons and groups

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2, 3.1	• Comprehends and analyses complex texts from a variety of sources and records to determine relevance to requirements or review implementation of strategies
Writing	1.1, 1.2, 2.1, 2.2, 3.4, 3.5	• Prepares required documents using language and structure appropriate to purpose and audience

© Commonwealth of Australia, 2025 Industry Skills Australia

Oral Communication	1.1-1.5, 2.2, 2.4, 2.5, 3.4, 3.5	• Presents information and seeks advice using language and non-verbal features appropriate to audience and context • Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding
Navigate the world of work	1.2, 1.4, 1.5, 2.1, 2.3, 3.1	• Follows policies, procedures and legislative requirements and identifies implications of new legislation or regulation for self and others • Understands responsibilities and limits of own role
Interact with others	1.1, 1.3-1.5, 2.2-2.5, 3.2-3.5	• Selects and uses appropriate conventions and protocols when communicating with co-workers in a range of work contexts • Collaborates and cooperates with others to achieve required outcomes • Uses effective strategies to moderate conflict and negotiate solutions
Get the work done	1.1, 2.1-2.3, 2.5, 3.1, 3.4, 3.5	• Plans and organises tasks required to achieve required outcomes, seeking advice from others when necessary • Makes a range of critical and non-critical decisions in relatively complex situations

Assessment Requirements for BSBWRK411 Support employee and industrial relations procedures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- locate information required to identify relevant legislation, agreements, policies and procedures in relation to industrial matters
- use effective communication techniques to support the resolution of workplace grievances and conflicts
- provide accurate written and oral advice about industrial matters
- use strategies to monitor and gather feedback on the implementation of industrial relations policies and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline relevant industrial relations policies and procedures
- summarise grievance resolution policy and procedures
- describe relevant legislation, codes of practice and national standards
- describe the relevant state/territory and federal industrial relations systems
- identify sources of expert advice.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – workplace relations field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace policies and procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWRK520 Manage employee relations

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to manage employee and industrial relations matters in an organisation. It involves developing and implementing employee and industrial relations policies and plans and managing conflict resolution negotiations.

It applies to those who are authorised to oversee industrial relations and manage conflict and grievances in an organisation. They will have a sound theoretical knowledge base in human resources management and industrial relations as well as current knowledge of industrial relations trends and legislation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Workforce Development – Workplace Relations

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop employee and industrial relations policies and plans	1.1 Analyse strategic plans and operational plans to determine long term employee relations in accordance with organisational objectives 1.2 Analyse existing employee relations performance in relation to workforce objectives 1.3 Evaluate options in terms of cost-benefit, risk-analysis and

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	current legislative requirements 1.4 Work with relevant internal stakeholders to develop industrial relations policies and plans 1.5 Identify the skills and knowledge needed by management and the workforce to effectively implement these strategies and policies
2. Implement employee relations policies and plans	2.1 Develop an implementation plan and a contingency plan for the employee relations policies and strategies 2.2 Make arrangements for training and development for identified needs to support the employee relations plan 2.3 Undertake associated employee relations activities to reach agreement on changes required by the organisational policies or implementation plan 2.4 Document procedures for addressing grievances and conflict 2.5 Identify and communicate key procedures for addressing grievances and conflict to stakeholders 2.6 Review employee relations policies and plans to establish whether they are meeting their intended outcomes
3. Manage negotiations to resolve conflict	3.1 Develop and deliver training to individuals in conflict-management techniques and procedures 3.2 Identify, and where possible alleviate or eliminate, sources of conflict or grievance according to legal requirements 3.3 Evaluate documentation and other information sources to clarify issues in dispute and ensure completeness, balance and relevance 3.4 Obtain expert or specialist advice and/or refer to precedents, if required 3.5 Determine desired negotiation outcomes, negotiation strategy and negotiation timeframes 3.6 Advocate the organisation’s position in negotiation with the view to reaching a resolution that aligns to organisational objectives 3.7 Document, and if necessary certify, the agreed outcomes with the relevant jurisdiction 3.8 Take remedial action where groups or individuals fail to abide by agreements

© Commonwealth of Australia, 2025 Industry Skills Australia

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Interprets, critically analyses and applies appropriate strategies to construct meaning from complex texts
Writing	• Displays knowledge of required structure and layout, employing broad vocabulary, grammatical structure and conventions appropriate to purpose and audience
Oral communication	• Conveys information using language and non-verbal features appropriate to the audience • Employs listening and questioning techniques to clarify and confirm understanding
Numeracy	• Extracts and evaluates the mathematical information embedded in a range of tasks and texts
Navigate the world of work	• Modifies or develops organisational policies to achieve organisational goals and comply with legislative requirements • Keeps up to date on changes to legislation or regulations relevant to own rights and responsibilities and considers implications of these
Interact with others	• Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction, influencing direction and taking a leadership role on occasion • Actively builds networks that include key people with expert skills and knowledge • Uses a range of strategies to facilitate an acceptable outcome for all parties where conflicts occur
Get the work done	• Sequences and schedules complex activities, monitors implementation and manages relevant communication • Uses analytical techniques to identify issues and generate possible solutions, seeking input from others as required, before making decisions or implementing solutions • Draws on the diverse perspectives of others to gain insights into current practices and opportunities for change

Assessment Requirements for BSBWRK520 Manage employee relations

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Performance Evidence

Evidence of the ability to:

- analyse organisational documentation to determine long-term employee relations objectives and current employee relations performance
- collaborate with others to develop and review industrial relations policies and plans
- develop implementation and contingency plans for industrial relations policies
- identify the skills and knowledge needed to implement the plan and organise training and development for self and staff
- document and communicate strategies and procedures for eliminating and dealing with grievances and disputes
- train others in conflict-resolution techniques
- manage industrial relations conflicts, including advocating the organisation's position during negotiations and documenting, implementing and following up agreements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role:

- Key features of relevant industrial relations legislation or regulations
- Key features of enterprise and workplace bargaining processes
- Key features of relevant entities in the current Australian industrial relations system, including courts and tribunals, trade unions and employer bodies
- Key sources of expert industrial relations advice
- Key features of relevant organisational policies and procedures
- Key features of organisational objectives.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – workplace relations field of work and include access to:

- awards and enterprise bargaining agreements
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBWRT301 Write simple documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan, draft and finalise a basic document.

It applies to individuals who apply a broad range of competencies in various work contexts and may exercise some discretion and judgement to produce a range of workplace documentation.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Communication – Writing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Plan document	1.1 Determine audience and purpose for the document 1.2 Determine the format and structure 1.3 Establish key points for inclusion 1.4 Identify organisational requirements 1.5 Establish method of communication 1.6 Establish means of communication

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2 Draft document	2.1 Develop draft document to communicate key points 2.2 Obtain and include any additional information that is required
3 Review document	3.1 Check draft for suitability of tone for audience, purpose, format and communication style 3.2 Check draft for readability, grammar, spelling, and sentence and paragraph construction 3.3 Check draft for sequencing and structure 3.4 Check draft to ensure it meets organisational requirements 3.5 Ensure draft is proofread, where appropriate, by supervisor or colleague
4 Write final document	4.1 Make and proofread necessary changes 4.2 Ensure document is sent to intended recipient 4.3 File copy of document in accordance with organisational policies and procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 3.1-3.4, 4.1	• Recognises and interprets a variety of text to determine and confirm task requirements • Proofreads documents checking for grammar, spelling, structure, and suitability of style and format for audience
Writing	2.1, 2.2, 3.1-3.5, 4.1	• Produces and edits basic documents, according to organisational requirements, for a given audience and purpose
Oral Communication	2.2, 3.5	• Uses listening and questioning skills to seek additional information or confirmation of task completion
Navigate the world of work	1.4, 3.4, 4.3	• Understands and complies with organisational policies and procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

Interact with others	2.2, 3.5	• Follows accepted communication practices and protocols when seeking information or feedback from others
Get the work done	1.1-1.6, 2.1, 2.2, 3.4, 3.5, 4.1-4.3	• Takes responsibility for planning, sequencing and prioritising tasks to achieve required outcomes • Uses the main features and functions of digital tools to complete work tasks

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0

Performance Evidence

Evidence of the ability to:

- plan, draft and finalise three different simple documents that accurately convey the required basic information in a format suitable for the intended audience and in accordance with organisational policies and procedures for document production.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the process for checking basic grammar, spelling and punctuation
- describe different communication methods
- describe how audience, purpose and method of communication influence the tone of a document.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the communication – writing field of work and include access to:

- office equipment and resources to assist in document production
- organisational policies and procedures
- examples of documents to review.

Assessors must satisfy NVR/AQTF assessor requirements.

CHCCCS020 Respond effectively to behaviours of concern

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal change to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Application

This unit describes the skills and knowledge required to respond effectively to behaviours of concern of people. Skills are associated with handling difficult incidents rather than managing ongoing behaviour difficulties.

The unit applies to workers in any context exposed to difficult and challenging behaviour.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Identify behaviour and plan response	1.1 Identify behaviours of concern in line with work role and organisation policies and procedures 1.2 Identify appropriate response to potential instances of behaviours of concern 1.3 Ensure planned responses to behaviours of concern maximise the availability of other appropriate staff and resources 1.4 Give priority to safety of self and others in responding

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element* to behaviours of concern
2. Apply response	2.1 Ensure response to instances of behaviours of concern reflect organisation policies and procedures 2.2 Seek assistance as required 2.3 Deal with behaviours of concern promptly, firmly and diplomatically in accordance with organisation policy and procedure 2.4 Use communication effectively to achieve the desired outcomes in responding to behaviours of concern 2.5 Select appropriate strategies to suit particular instances of behaviours of concern
3. Report and review incidents	3.1 Report incidents according to organisation policies and procedures 3.2 Review incidents with appropriate staff and offer suggestions appropriate to area of responsibility 3.3 Access and participate in available debriefing mechanisms and associated support and/or development activities 3.4 Seek advice and assistance from legitimate sources as and when appropriate

Foundation Skills

The Foundation Skills describe those required skills (such as language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Industry Skills Australia

Unit Mapping Information

No equivalent unit.

Assessment Requirements for CHCCCS020 Respond effectively to behaviours of concern

Modification History

Release	Comments
Release 1	This version was released in *CHC Community Services Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Minimal change to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- effectively dealt with at least 5 different behaviours of concern

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- different behaviours of concern:
  - aggression
  - confusion or other cognitive impairment
  - intoxication
  - intrusive behaviour
  - manipulation
  - noisiness
  - self-destructive behaviour
  - verbal offensiveness
  - wandering
- strategies for dealing with behaviours of concern
- issues needing to be referred to an appropriate professional

© Commonwealth of Australia, 2025 Industry Skills Australia

- legal and ethical consideration relevant to recognising and responding to behaviours of concern, including:
  - duty of care
  - human rights
  - work health and safety
- organisation reporting processes

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources including organisation policies and procedures in relation to reporting behaviours of concern
- modelling of industry operating conditions and contingencies, including scenarios that reflect different behaviours of concern

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CPCCCM2007B Use explosive power tools

Modification History

Minor changes made to range statement, including addition of photovoltaic (solar) panels

Equivalent to CPCCCM2007A

Unit Descriptor

This unit of competency specifies the outcomes required to apply safe and effective operation of explosive power tools (EPT), used to fasten materials or fix fasteners to bases. It includes both direct action and indirect action explosive powered fastening tools.

Application of the Unit

This unit of competency supports achievement of skills to safely and effectively use a range of EPT used in the construction industry.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Industry Skills Australia

Elements and Performance Criteria

1	Plan and prepare.	1.1	Work instructions, including plans, specifications, quality requirements and operational details, are obtained, confirmed and applied from relevant ***information*** for ***planning and preparation***.
		1.2	***Safety (OHS)*** requirements are followed in accordance with safety plans and policies.
		1.3	Signage and barricade requirements are identified and implemented.
		1.4	Plant, ***tools and equipment*** selected to carry out tasks are consistent with job requirements, checked for serviceability, and any faults are rectified or reported prior to commencement.
		1.5	Material quantity requirements are calculated in accordance with plans and specifications.
		1.6	***Materials*** appropriate to work application are identified, obtained, prepared, safely handled and located ready for use.
		1.7	***Environmental requirements*** are identified for the project in accordance with environmental plans and ***statutory and regulatory authority*** obligations, and are applied.
2	Set out fasteners.	2.1	***Minimum distances for set out*** from edge of substrate material are adhered to in accordance with legislation, regulations and codes of practice.
		2.2	Material is located and temporarily held or fixed into designed position according to detailed drawings.
3	Use EPT.	3.1	EPT is checked for operation according to manufacturer specifications and safety (OHS) requirements for ***use of EPT***.
		3.2	Fastener is selected according to requirements of job.
		3.3	Charge is selected to assessed requirements for material,

© Commonwealth of Australia, 2025 Industry Skills Australia

			base and penetration.
		3.4	***Attachments*** and accessories are installed to EPT in accordance with manufacturer specifications and safety (OHS) requirements.
		3.5	***Fastener and charge*** in EPT are located to manufacturer specifications.
		3.6	EPT operation is carried out and fastener is fixed into place in accordance with manufacturer recommendations, legislation, regulations and codes of practice.
		3.7	Fastening penetration is checked and appropriate depth into material is applied.
		3.8	Power regulating device is adjusted for conditions.
		3.9	Misfire procedures are carried out according to manufacturer recommendations, legislation, regulations and codes of practice.
		3.10	Temporary holding and fixings are removed without damage to material.
4	Secure and store equipment and charges.	4.1	Charges are stored in designated container in accordance with legislation, regulations and codes of practice and used charges are recorded.
		4.2	Unused fasteners, the EPT and attachments are stored in a carry case in line with manufacturer recommendations.
		4.3	Logbook is checked and maintenance recorded according to manufacturer recommendations.
5	Maintain EPT and kit.	5.1	Safety features of tools are checked for serviceability in accordance with manufacturer operating manual.
		5.2	Tools are cleaned and lubricated to manufacturer recommendations.
		5.3	Periodic maintenance service is carried out to manufacturer specifications.
		5.4	Diminished stocks of charges and fasteners are

© Commonwealth of Australia, 2025 Industry Skills Australia

			replenished to designed effectiveness of EPT kit.
6	Clean up.	6.1	Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification.
		6.2	Plant, tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and interpret:
    - documentation from a variety of sources
    - drawings and specifications
  - report faults
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
  - written skills to record maintenance in logbook
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- numeracy skills to apply measurements and make calculations
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

© Commonwealth of Australia, 2025 Industry Skills Australia

Required knowledge

Required knowledge for this unit is:

- construction terminology
- EPT materials
- EPT charges and fasteners
- equipment safety manuals and instructions
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, specifications and drawings
- processes for the calculation of material requirements
- quality requirements
- relevant Acts, regulations and codes of practice
- security and storage procedures for equipment and charges
- types, characteristics, uses and limitations of plant, tools and equipment
- workplace and equipment safety requirements.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • locate, interpret and apply relevant information, standards and specifications • comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations • comply with organisational policies and

© Commonwealth of Australia, 2025 Industry Skills Australia

procedures, including quality requirements
- safely and effectively use tools and equipment
- communicate and work effectively and safely with others
- fix metal or timber to a steel, concrete or masonry base on one project of each to job specifications, including:
  - completion of stripping and assembly of the tool
  - completing log of serviceability
  - maintaining and cleaning
  - selecting charges and fasteners applicable to base material and material being fixed
  - misfire procedures
  - using attachments
  - complying with storage and security regulations and OHS requirements for the working environment
  - selecting signage
  - test fire.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities

© Commonwealth of Australia, 2025 Industry Skills Australia

must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

© Commonwealth of Australia, 2025 Industry Skills Australia

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions where specified
- memos
- MSDS
- organisation work specifications and requirements
- plans and specifications
- regulatory and legislative requirements pertaining to using EPT
- relevant Australian standards
- safe work procedures related to using EPT
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules.

Planning and preparation include:

- work site inspection
- equipment defect identification
- assessment of conditions and hazards
- determination of work requirements.

Safety (OHS) is to be in accordance with legislation, regulations, codes of practice, organisational safety policies and procedures, and project safety plan and may include:

- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling of materials
- hazard control
- hazardous materials and substances
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
  - earth leakage boxes

© Commonwealth of Australia, 2025 Industry Skills Australia

- lighting
- photovoltaic (solar) panels
- power cables, including overhead service trays, cables and conduits
- restricted access barriers
- surrounding structures
- traffic control
- trip hazards
- work site visitors and the public
- working at heights
- working in confined spaces
- working in proximity to others
- working with dangerous materials

- organisational first aid
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- use of firefighting equipment
- use of tools and equipment
- workplace environment and safety.

Tools and equipment may include:

- direct action EPT
- indirect action EPT
- clamps and levels.

Materials include:

- timber
- metals
- patented fasteners.

Environmental requirements include:

- clean-up management
- noise and dust
- vibration
- waste management.

Statutory and regulatory authorities include:

- federal, state and local authorities administering applicable Acts, regulations and codes of practice.

Minimum distance for set out of

- regulated minimum distances
- bases, including concrete, masonry or steel.

© Commonwealth of Australia, 2025 Industry Skills Australia

fasteners is to be in accordance with:

Use of EPT includes:

- stripping and assembling tools
- completing log of serviceability
- maintaining and cleaning tools
- selecting charges and fasteners applicable to the base material and material being fixed
- misfire procedures
- using attachments
- complying with storage and security regulations and OHS requirements for the working environment
- selecting signage
- test fire.

Attachments include:

- channel, rebate and other manufacturer attachments.

Fastener and charge include:

- firing a test shot with misfire procedures, complying with the regulated safety procedure for misfire.

CPCCCM2008B Erect and dismantle restricted height scaffolding

Modification History

Photovoltaic (solar) panels added to range statement

Equivalent to CPCCCM2008A

Unit Descriptor

This unit of competency specifies the outcomes required to erect and dismantle restricted height scaffolding to provide work platforms for various occupational applications. It includes placement of safety barriers and only involves modular scaffolding restricted to a height of 4 metres.

Application of the Unit

This unit of competency supports achievement of skills to handle, erect and dismantle a range of restricted height scaffolding systems, which may include working with others and as a member of a team.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

© Commonwealth of Australia, 2025 Industry Skills Australia

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Plan and prepare.	1.1	Work instructions, including plans, specifications, quality requirements and operational details, are obtained from relevant sources of ***information***, confirmed and applied for ***planning and preparation*** purposes.
		1.2	***Workplace health and safety (WHS)*** requirements are followed in accordance with safety plans and policies.
		1.3	Signage and barricade requirements are identified and implemented.
		1.4	Plant, ***tools and equipment*** are selected to carry out tasks consistent with job requirements, are checked for serviceability, and any faults are rectified or reported prior to commencement.
		1.5	***Scaffolding*** quantity requirements are calculated in accordance with plans, specifications and ***quality requirements***.
		1.6	Materials appropriate to the work application are identified, obtained, prepared, safely handled and located ready for use.
		1.7	***Environmental requirements*** are identified for the project in accordance with environmental plans and ***statutory and regulatory authority*** obligations, and are applied.
2	Erect scaffolding.	2.1	***Purpose for scaffolding*** is confirmed and associated work tasks are identified.
		2.2	Expected loading on scaffold and supporting structure is determined using load tables.
		2.3	Site access and egress routes are identified.
		2.4	Scaffolding and components are selected and inspected

© Commonwealth of Australia, 2025 Industry Skills Australia

			with damaged components labelled and rejected or repaired.
		2.5	Adequate footing is established in accordance with Australian standard for scaffolding.
		2.6	Scaffolding is erected in accordance with regulations, planned hazard prevention and control measures, acceptable safe work practices and manufacturer requirements.
3	Inspect, repair and alter scaffolding.	3.1	Critical structural and safety areas of scaffolding are inspected for damage, corrosion and wear.
		3.2	Current use of scaffolding is checked for compliance with type of scaffolding equipment.
		3.3	Inspection log and handover are completed.
		3.4	Scaffolding is reviewed to determine if changes or modifications were scheduled as per original planning.
		3.5	Alteration or repair is carried out where specified.
4	Dismantle scaffolding.	4.1	Scaffolding is dismantled using reverse procedure as for erection.
5	Clean up.	5.1	Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification.
		5.2	Plant, tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

© Commonwealth of Australia, 2025 Industry Skills Australia

Required skills for this unit are:

- communication skills to:
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and interpret:
    - documentation from a variety of sources
    - drawings and specifications
  - report faults
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
  - written skills to record maintenance in logbooks
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- numeracy skills to apply measurements and make calculations
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- general construction terminology
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, specifications and drawings
- processes for the calculation of material requirements
- quality requirements
- relevant Acts, regulations and codes of practice
- scaffolding equipment
- scaffolding techniques
- shifting devices
- types, characteristics, uses and limitations of plant, tools and equipment
- workplace and equipment safety requirements.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations
- comply with organisational policies and procedures, including quality requirements
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others
- complete planning, erection and dismantling of a modular scaffolding system, in accordance with JSA and safe work method statements and regulations, including a minimum of:
  - three bays (one with a return)
  - one lift with ladder
  - fall and edge protection.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further

learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:

- diagrams or sketches
- engineers' design specifications and manufacturer specifications and instructions, where specified
- instructions issued by authorised organisational or external personnel
- memos
- MSDS
- regulatory and legislative requirements pertaining to erecting and dismantling restricted height scaffolding
- relevant Australian standards
- safe work procedures related to erecting and dismantling restricted height scaffolding
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules, plans and specifications.

© Commonwealth of Australia, 2025 Industry Skills Australia

Planning and preparation include:

- work site inspection, equipment defect identification, assessment of conditions and hazards, and determination of work requirements
- erection of scaffolding to a maximum height of 4 metres, including placement, sequencing, squaring, levelling and the reverse for dismantling
- establishment of footings, including review of JSAs to determine bearing capacity of ground or working surfaces
- alteration and repair, which may be required due to storm damage, accidents, misuse and process changes.

Workplace health and safety is to be in accordance with legislation, regulations, codes of practice, organisational safety policies and procedures, and project safety plan and may include:

- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling of materials
- hazard control
- hazardous materials and substances
  - safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
  - earth leakage boxes
  - lighting
  - photovoltaic (solar) panels
  - power cables, including overhead service trays, cables and conduits
  - restricted access barriers
  - surrounding structures
  - traffic control
  - trip hazards
  - work site visitors and the public
  - working at heights
  - working in confined spaces
  - working in proximity to others
  - working with dangerous materials
- organisational first aid
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- use of firefighting equipment
- use of tools and equipment

CPCCCM2010B Work safely at heights

Modification History

Photovoltaic (solar) panels added to range statement

Equivalent to CPCCCM2010A

Unit Descriptor

This unit of competency specifies the outcomes required to work safely on construction sites where the work activity involves working above 1.5 metres from ground level and where fall protection measures are required.

Application of the Unit

Construction work is undertaken on domestic and commercial work sites within new construction, renovation or refurbishment, and maintenance.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Industry Skills Australia

Elements and Performance Criteria

1	Identify work area requirements.	1.1	Site of proposed ***work at heights*** is identified from relevant ***information***.
		1.2	Method of accessing work area is identified.
		1.3	Tasks to be completed are identified from work orders and supervisor instructions.
		1.4	Fall protection equipment is identified if required by site job ***workplace health and safety (WHS)*** analysis and ***statutory and regulatory*** requirements.
		1.5	Approved methods of moving tools and equipment to work area are identified to minimise potential of falling objects, removal of scaffold components, inappropriate carrying of materials on ladders, and excessive bending or twisting in pass-up situations.
2	Access work area.	2.1	Fall protection equipment where required is correctly fitted, adjusted and anchored.
		2.2	Arrangements are made to appropriately install required equipment taking account of all potential ***hazards***.
		2.3	Appropriate methods are used to access work area for self, ***tools and equipment***, and ***materials***.
		2.4	Tools and materials are placed to eliminate or at least minimise the risk of items being knocked down.
3	Conduct work tasks.	3.1	Work is conducted following workplace approved procedures.
		3.2	Fall protection equipment is kept in place and adjusted appropriately to cater for movement during work.
		3.3	Scaffold components and fall barriers are kept in place during work.
		3.4	Egress from work area is completed following work site supervisor approved methods for self, tools, materials

and ***environmental requirements***.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- construction terminology
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- quality requirements
- types, characteristics, uses and limitation of plant, tools and equipment
- workplace and equipment safety requirements.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

© Commonwealth of Australia, 2025 Industry Skills Australia

Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan, OHS regulations and state and territory legislation applicable to workplace operations
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others
- select and use appropriate height access and fall protection equipment and work methods, including inspecting fall protection equipment, scaffold and fall barriers for faults
- apply knowledge of industry products to identify:
  - manual handling risks
  - types of lifting and support structures approved for use
- modify work activities to cater for variations in work site procedures, contexts and environment and use appropriate behaviour for safe work at heights
- use safe handling requirements, based on information provided, for equipment, products and materials.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement

© Commonwealth of Australia, 2025 Industry Skills Australia

- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning

© Commonwealth of Australia, 2025 Industry Skills Australia

experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work at heights includes:

- assessment of conditions and hazards
- determination of work requirements
- identification of equipment defects
- inspection of work sites.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- material safety data sheets (MSDS)
- memos
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules, plans and specifications.

Workplace health and safety is to be in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan

- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling of materials
- hazard control

© Commonwealth of Australia, 2025 Industry Skills Australia

and may include:

- hazardous materials and substances
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
  - earth leakage boxes
  - lighting
  - photovoltaic (solar) panels
  - power cables, including overhead service trays, cables and conduits
  - restricted access barriers
  - surrounding structures
  - traffic control
  - trip hazards
  - work site visitors and the public
  - working in confined spaces
  - working in proximity to others
  - working with dangerous materials
- organisational first aid
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- relevant OHS legislation applying in the jurisdiction where work is carried out, including:
  - AS6001 - 1999 Working platforms for domestic application
  - AS1576 - Scaffolding
  - AS/NZS4576 - 1995 Guidelines for scaffolding
- use of tools and equipment
- workplace environment and safety.

Statutory and regulatory authorities include:

- federal, state and local authorities administering applicable Acts, regulations and codes of practice.

Hazards include:

- air temperature
- construction activity involving other workers and contractors
- dust and vapours
- electrical equipment
- energy sources
- equipment and materials
- hazardous materials

© Commonwealth of Australia, 2025 Industry Skills Australia

- light
- manual handling
- moisture
- noise
- pholtovoltaic (solar) panels
- stationary and moving plant
- work at heights.

Tools and equipment include:

- air compressors and hoses
- hand and power tools
- nail guns
- power leads
- scaffolding.

Materials include:

- materials used on the construction work site.

Environmental requirements include:

- clean-up management
- noise and dust
- vibration
- waste management.

CPCCCM3003 Work safely around electrical sources, services and assets

Modification History

Release 1.

This version first released with CPC Construction, Plumbing and Services Training Package Version 2.

Revised unit of competency. Replaces superseded equivalent CPCCCM3003A Work safely around power sources, services and assets.

Application

This unit of competency specifies the outcomes required to ensure the safety of personnel and equipment when working with or operating plant while in close proximity to electrical sources, underground and overhead services, and assets.

The unit supports construction workers working on powered construction sites who must check and confirm the location of electrical sources, underground and overhead services, and assets before commencing work. It applies to residential and commercial work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1.	Plan and prepare.	1.1. Work instructions, including plans, specifications, environmental and quality requirements, and operational details, are obtained, confirmed with relevant personnel, and applied to planning.
		1.2. ***Health and safety requirements*** are identified and applied to planning.
		1.3. Plant, tools and equipment are selected to carry out tasks according to job requirements, checked for serviceability, and any faults are rectified or reported prior to starting work.
2.	Apply safe work practices.	2.1 Relevant authorities are contacted to identify type and location of ***electrical sources, underground or overhead services, and assets***.
		2.2 Plant is positioned according to safe work method statement (SWMS).
		2.3 Plant operation procedures are followed to comply with SWMS.
		2.4. Work is conducted in or around the electrical source, service or asset according to SWMS.
		2.5. On completion of work, personnel, plant and equipment are retracted from powered area following SWMS.
3.	Clean up.	3.1. Work area is cleared and materials disposed of, reused or recycled according to legislation, regulations, codes of practice and job specifications.
		3.2. Plant, tools and equipment are cleaned, checked, maintained and stored according to manufacturer recommendations and standard work practices.
		3.3. Work completion procedures are followed and relevant

© Commonwealth of Australia, 2025 Industry Skills Australia

personnel are notified that work is finished.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Learning skills to:	• evaluate the relevance of information relating to the location of electrical sources, underground or overhead services, and assets to the work to be undertaken.
Oral communication skills to:	• share information with team members and other personnel on site • participate in straightforward conversations with colleagues and external authorities, and ask questions to identify and confirm requirements.
Reading skills to:	• interpret a range of documentation, including SWMS, site plans and job specifications.
Writing skills to:	• report faults in plant or equipment to relevant personnel.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

Health and safety requirements must include:	• emergency procedures, including:
	  • first aid
	  • evacuation
	  • location and use of firefighting equipment
	• hazard identification and risk control procedures, including for handling hazardous materials and substances
	• safe operating procedures, including the conduct of operational

© Commonwealth of Australia, 2025 Industry Skills Australia

risk assessment and treatments associated with:

- earth leakage boxes
- job specifications
- lighting
- manual handling techniques
- electric lines, including overhead service trays, cables and conduits
- restricted access barriers
- safety data sheets (SDS)
- surrounding structures
- traffic control
- trip hazards
- use of signage and barricades
- requirements for:
  - work site visitors and the public
  - working at heights
  - working in confined spaces
  - working in proximity to others

- selection, correct fitting, and use of personal protective equipment (PPE) prescribed under legislation, regulations and workplace policies and practices
- selection and use of tools and equipment
- workplace environmental requirements.

Electrical sources, underground or overhead services, and assets must include:

- distribution towers
- generators
- poles
- substations
- temporary services
- train and tram assets
- transmission towers
- underground and overhead lines
- underground conductors.

Assessment Requirements for CPCCCM3003 Work safely around electrical sources, services and assets

Modification History

Release 1.

This version first released with CPC Construction, Plumbing and Services Training Package Version 2.

Revised unit of competency. Replaces superseded equivalent CPCCCM3003A Work safely around power sources, services and assets.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. On two different sites the person must also:

- locate electrical sources, underground and overhead services, and assets
- undertake work according to the safe work method statement (SWMS)
- retract from powered area on completion of work.

The above work must involve:

- locating, interpreting and applying information, standards and specifications relating to working safely around electrical sources, services and assets
- complying with site safety plan and work health and safety (WHS) legislation, regulations and codes of practice applicable to workplace operations
- locating on-site electrical sources, underground and overhead services, and assets and identifying associated required safe work practices
- installing safety signage and barricades before commencing work
- safely positioning plant and equipment on site, giving consideration to location of electrical sources, underground and overhead services, and assets.

Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- environmental requirements relevant to the work site and job task, including:
  - clean-up protection
  - noise and dust management
  - vibration management
  - waste management

© Commonwealth of Australia, 2025 Industry Skills Australia

- equipment safety requirements, including procedures for accessing and interpreting:
  - SWMS
  - safety data sheets (SDS)
- procedures for materials storage and environmentally friendly waste management
- techniques to read and interpret plans, specifications and drawings
- safe work practices required on construction sites, including:
  - required signage and barricades
  - required personal protective equipment (PPE)
  - site-specific emergency procedures, including:
    - evacuation
    - first aid, including cardiopulmonary resuscitation (CPR)
    - location and use of firefighting equipment
  - techniques for working with electrical sources, services and assets
  - procedures for working safely at heights
- types, characteristics, uses and limitations of plant, tools and equipment used in the work specified in performance evidence.

Assessment Conditions

Suitable assessment of performance requires:

- equipment:
  - PPE, as appropriate to the task
- materials:
  - signage and barricades appropriate to the task and work site
- specifications:
  - verbal or written instructions and task-specific information issued by authorised personnel
  - plans and specifications appropriate to the task
  - SDS appropriate to the tools and equipment used to perform tasks
  - SWMS
- relationships with team members and supervisor:
  - work may be conducted alone or as part of a team
- timeframe:
  - according to job requirements.

Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare.	1.1. Work instructions, including plans, specifications, quality requirements and operational details, are obtained, confirmed and applied from relevant ***information*** for ***planning and preparation***. 1.2. ***Safety*** (***OHS***) requirements are followed in accordance with safety plans and policies. 1.3. Signage and barricade requirements are identified and implemented. 1.4. ***Plant***, ***tools and equipment*** are selected to carry out tasks are consistent with job requirements, checked for serviceability, and any faults are rectified or reported prior to commencement. 1.5. ***Environmental requirements*** are identified for the project in accordance with environmental plans and ***statutory and regulatory authority*** obligations, and are applied.
2. Apply safe work practices.	2.1. Relevant authorities are contacted to identify ***electrical sources*** and type. 2.2. Plant is positioned according to work method statement and job safety analyses (JSAs). 2.3. Plant procedures are followed to comply with work method statement and JSAs. 2.4. Work is conducted in or around the power source,

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	service or asset. 2.5. Personnel, plant and equipment are retracted from powered area following safe work method statement and JSAs.
3. Clean up.	3.1. Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification. 3.2. Plant, tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices. 3.3. Work completion procedures are applied and relevant personnel are notified that work is finished.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - identify electrical source and type from relevant authorities
  - read and interpret:
    - documentation from a variety of sources
    - drawings and specifications
  - report faults
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- numeracy skills to apply measurements and make calculations
- organisational skills, including the ability to plan and set out work

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- construction terminology
- electrical safety on construction work sites
- first aid including cardiopulmonary resuscitation (CPR)
- JSA and safe work method statements
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, specifications and drawings
- quality requirements
- site specific emergency procedures
- types, characteristics, uses and limitations of plant, tools and equipment
- working at heights
- working with electrical power techniques
- workplace and equipment safety requirements.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.
Critical aspects for assessment	A person who demonstrates competency in this

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE

and evidence required to demonstrate competency in this unit	unit must be able to provide evidence of the ability to: • locate, interpret and apply relevant information, standards and specifications • comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations • comply with organisational policies and procedures, including quality requirements • safely and effectively use tools, plant and equipment • communicate and work effectively and safely with others • contact relevant authorities • apply work method statements and JSAs to oversee plant positioning and operation for one project, including erection and/or placement of barriers and safeguards.
Context of and specific resources for assessment	This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints. Assessment of essential underpinning knowledge will usually be conducted in an off-site context. Assessment is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include: • an induction procedure and requirement • realistic tasks or simulated tasks covering the mandatory task requirements • relevant specifications and work instructions • tools and equipment appropriate to applying safe work practices • support materials appropriate to activity • workplace instructions relating to safe work practices and addressing hazards and emergencies • material safety data sheets • research resources, including industry related systems information. Reasonable adjustments for people with disabilities must be made to assessment processes

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:	• verbal or written and graphical instructions • diagrams or sketches • instructions issued by authorised organisational or external personnel • manufacturer specifications and instructions where specified • memos • MSDS • organisation work specifications and requirements • plans and specifications • regulatory and legislative requirements pertaining to working safely around power • relevant Australian standards • safe work procedures related to working safely around power • signage • work bulletins • work schedules.
Planning and preparation include:	• work site inspection • equipment defect identification • assessment of conditions and hazards • determination of work requirements.
Safety (***OHS***) is to be in accordance with legislation,	• emergency procedures, including extinguishing fires, organisational first aid

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

regulations, codes of practice, organisational safety policies and procedures, and project safety plan and may include:	requirements and evacuation
	• handling of materials
	• hazard control
	• hazardous materials and substances
	• safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
	  • earth leakage boxes
	  • lighting
	  • power cables, including overhead service trays, cables and conduits
	  • restricted access barriers
	  • surrounding structures
	  • traffic control
	  • trip hazards
	  • work site visitors and the public
	  • working at heights
	  • working in confined spaces
	  • working in proximity to others
	  • working with dangerous materials
	• organisational first aid
	• personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
	• use of firefighting equipment
	• use of tools and equipment
	• workplace environment and safety.

Signage and barricade requirements include:	• barricades • isolation • other physical barriers • site safety signage.
Plant includes:	• back hoes • booms • cranes • EWPs • excavators • scaffold.
Tools and equipment include:	• those associated with the task at hand.
Environmental requirements	• clean-up protection

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

include:	• noise and dust • vibration • waste management.
Statutory and regulatory authorities:	• include federal, state and local authorities administering applicable Acts, regulations and codes of practice • must include federal, state and local electrical authorities.
Electrical sources include:	• distribution towers • generators • poles • sub-stations • temporary services • train and tram assets • transmission towers • underground and overhead wires • underground conductors • all other services, sources and assets.

CPCCCO3054 Operate concrete agitator trucks

Modification History

Release 1.

Supersedes and equivalent to CPCCCO3054A Operate concrete agitator trucks.

The unit of competency was updated to the Standards for Training Packages 2012.

This version first released with CPC Construction, Plumbing and Services Training Package Version 4.0.

Application

This unit of competency specifies the skills and knowledge required to operate concrete agitator trucks in support of construction projects.

It includes:

- planning and preparing for work
- conducting operational checks
- safely and effectively operating a concrete agitator truck and associated equipment
- positioning the vehicle at the load point
- loading and transporting concrete
- discharging concrete at work site
- applying emergency procedures
- conducting operator maintenance
- work finalisation activities.

The unit also includes supplying a range of concrete mixes, from relatively dry to increasingly wet mixes, including block-fill, pool mix, topping, slab, footing, kerb and guttering mixes for residential, commercial and civil construction sites.

It applies to concreters working as members of a team with at least a moderate degree of autonomy. They would be expected to complete routine activities without close supervision.

Licensing, legislative, regulatory or certification requirements apply to this unit of competency in all states and territories except Tasmania. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

© Commonwealth of Australia, 2025 Industry Skills Australia

Unit Sector

Construction

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Plan and prepare to operate concrete agitator truck.	1.1 Review and clarify task to operate concrete agitator truck. 1.2 Review task specifications and check to make sure they are in accordance with legislation, regulations and codes of practice. 1.3 Review work health and safety (WHS) requirements for the task in accordance with safety plans and policies. 1.4 Analyse site hazards associated with concrete agitator truck operations and use safe operating techniques to minimise risk. 1.5 Review environmental requirements for the task in accordance with environmental plans and legislative requirements. 1.6 Select hand tools and maintenance equipment associated with the particular concreter agitator truck, check for serviceability and rectify or report any faults.
2. Conduct concrete agitator truck pre-operational checks.	2.1 Fit personal protective equipment (PPE). 2.2 Carry out pre-start, start-up, park and shut-down procedures, including emergency shut-down procedures, in accordance with manufacturer and site-specific requirements. 2.3 Check vehicle controls and functions for serviceability, and rectify or report faults. 2.4 Check agitator controls and functions for serviceability and rectify or report faults.
3. Operate concrete agitator truck.	3.1 Manage engine power to ensure efficiency of concrete agitator truck movements and to minimise damage to engine and gears. 3.2 Coordinate engine power with gear selection ensuring smooth transition and operation within torque range. 3.3 Operate concrete agitator truck in accordance with work instructions and company operating procedures. 3.4 Monitor road and traffic conditions and adjust concrete agitator truck operation as required to ensure safety. 3.5 Bring truck to a halt smoothly, using engine retarder, gears

© Commonwealth of Australia, 2025 Industry Skills Australia

	and brakes, and minimising wear and tear on vehicle.
4. Load, transport and discharge concrete.	4.1 Position concrete agitator truck at load and discharge points with a minimum of manoeuvres. 4.2 Load concrete agitator truck with concrete mixes specified for the job, and with volume or weight of load limited to within authorised carrying capacity of agitator. 4.3 Move concrete agitator truck from loading to discharge point safely and smoothly avoiding surge and sway. 4.4 Discharge concrete in accordance with task specifications. 4.5 Monitor and maintain discharge systems, including chutes and adaptors, throughout the operations.
5. Carry out driver maintenance.	5.1 Park concrete agitator truck safely, prepare it for maintenance, and shut down in accordance with manufacturer's manual and organisational requirements. 5.2 Carry out inspection and fault-finding in accordance with manufacturers' specifications, and record in accordance with workplace procedures. 5.3 Remove defective parts and replace them safely and effectively in accordance with manufacturers' instructions. 5.4 Carry out regular programmed maintenance tasks in accordance with manufacturers' and workplace requirements.
6. Clean up after operating concrete agitator truck.	6.1 Clear work area and dispose of, re-use or recycle materials in accordance with legislation, regulations, codes of practice and task requirements. 6.2 Clean, check, maintain and store vehicle, bowl, tools and equipment in accordance with manufacturers' specifications and workplace requirements.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

- oral communication skills to:
  - use questioning to identify and confirm requirements
  - discuss cause of problems
  - report work site hazards, including faults in tools, equipment and materials
  - provide feedback.

Assessment Requirements for CPCCCO3054 Operate concrete agitator trucks

Modification History

Release 1.

Supersedes and equivalent to CPCCCO3054A Operate concrete agitator trucks.

The unit of competency was updated to the Standards for Training Packages 2012.

This version first released with CPC Construction, Plumbing and Services Training Package Version 4.0.

Performance Evidence

To demonstrate competency in this unit, a person must operate a concrete agitator truck over at least three shifts and at two different sites.

In doing this, the person must meet the performance criteria for this unit.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- jurisdictional work health and safety (WHS) and environmental legislation and regulations relating to operating concrete agitator trucks, including:
  - job safety analyses (JSAs)
  - safe work method statements (SWMSs)
  - safety data sheets (SDSs)
  - personal protective equipment (PPE)
- requirements of Australian Standards and the National Construction Code (NCC) relating to operating concrete agitator trucks
- workplace requirements for all aspects of operating concrete agitator trucks, including interpreting work orders and reporting problems
- types, characteristics, uses and limitations of tools and equipment required for operating concrete agitator trucks, including:
  - safe operating procedures
  - operational, maintenance and basic diagnostic procedures
  - workplace and equipment safety requirements
  - cleaning, maintenance and storage
- techniques for operating concrete agitator trucks
- characteristics of concrete carried in concrete agitator trucks
- quality requirements relevant to operating concrete agitator trucks
- requirements for cleaning up work area and environmentally friendly waste management.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- concrete agitator truck and associated tools and equipment
- work sites and specifications for tasks to operate a concrete agitator truck
- appropriate documents, materials, tools, equipment and PPE currently used in industry
- requirements of appropriate sections of legislation and regulations
- relevant workplace policies and procedures.

CPCCLDG3001A Licence to perform dogging

Modification History

Not Applicable

Unit Descriptor

Unit descriptor This unit specifies the outcomes required to perform slinging techniques, including the selection and inspection of lifting gear and/or the directing of the crane operator in the movement of the load when the load is out of view of the crane/ operator for licensing purposes.

Application of the Unit

Application of the unit

This unit covers the scope of work to demonstrate competency in the application of slinging techniques, selection and inspection of lifting gear and/or the directing of the crane/ operator in the movement of the load.

This unit is based upon the National Standard for Licensing Persons Performing High Risk Work.

This unit in its current form meets state and territory licensing requirements. Any alteration will result in a unit which is not acceptable to regulators for the purpose of licensing.

Licensing/Regulatory Information

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan job.	1.1. ***Site information*** is obtained and related to the task. 1.2. ***Hazard*** s and potential hazards associated with the slinging and directing of loads are identified. 1.3. ***Hazard control measures*** consistent with ***appropriate standards*** are identified to ensure the safety of personnel and equipment. 1.4. The weight, dimensions and centre of gravity of the load are identified and assessed. 1.5. Suitable lifting/slinging points on the load are identified. 1.6. Appropriate ***lifting equipment*** needs are assessed. 1.7. Appropriate ***communication methods*** are assessed with ***crane***/ operators and other ***appropriate personnel***. 1.8. Manufacturer's specifications/information is obtained for special loads where necessary.
2. Select and inspect equipment.	2.1. Lifting equipment appropriate to the task is selected. 2.2. Lifting equipment is inspected for serviceability. 2.3. Damaged or excessively worn lifting equipment is identified, labelled and rejected.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.4. Appropriate communication methods for the crane/operator and appropriate personnel are selected.
	2.5. Appropriate ***communication equipment*** is selected and its serviceability is checked.
	2.6. Appropriate ***personal protective equipment*** (PPE) is selected and checked.
3. Prepare site and equipment.	3.1. Hazard prevention/control measures are applied consistent with appropriate standards to ensure the safety of personnel and equipment.
	3.2. Appropriate slinging method is selected.
	3.3. Lifting equipment is prepared and assembled where appropriate.
	3.4. Load destination is prepared.
4. Perform task.	4.1. Lifting equipment is attached and secured to the lifting hook using appropriate techniques.
	4.2. Lifting hook is positioned over the load centre of gravity.
	4.3. Lifting equipment is attached and secured to the load in an appropriate manner.
	4.4. Tag line is attached and secured where appropriate.
	4.5. Test lift is conducted to ensure security of load.
	4.6. Load is moved maintaining stability and control at all times.
	4.7. Appropriate communication methods and ***communication signals*** are applied to safely coordinate the load movement both within sight and out-of-sight of crane operator.
	4.8. The load is landed to ensure that it is stable and secure from movement.
	4.9. Lifting equipment is removed or disconnected from load and prepared for next task or storage.
5. Shut down job and clean up.	5.1. Unserviceable lifting equipment inspected and rejected.
	5.2. ***Defective equipment*** is isolated and tagged.
	5.3. Lifting equipment is stored in accordance with procedures and appropriate standards.
	5.4. Hazard prevention/control measures are removed where appropriate.
	5.5. Excess materials from the work area are removed (where applicable).

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	5.6. Defects are reported and recorded according to procedures and appropriate action is taken.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication techniques in the workplace including whistles, hand signals and use of fixed channel two-way radios
- communication skills at a level sufficient to communicate with other site personnel
- calculate rated capacity of lifting equipment
- apply different methods for making temporary connections to loads using fibre and synthetic ropes
- ability to interpret rated capacity and working load limit tags
- hazard identification and control
- slinging techniques
- selection and inspection of lifting equipment
- directing crane operators in the moving of loads in a safe manner, using a slewing crane
- inspection and care of a wide range of lifting equipment to appropriate Australian Standards and/or manufacturer's specifications.

Required knowledge

Required knowledge for this unit is:

- appropriate mathematical procedures for estimation and measurement of loads
- basic knowledge of types of cranes and their functions
- Commonwealth, state or territory OHS legislation, standards and codes of practice relevant to the full range of techniques for undertaking dogging activities
- load stability and safety factors in line with manufacturer's specifications
- types of lifting equipment and slinging techniques for use, and their limitations and performance in a wide range of conditions (including but not limited to slings, beams, accessories, clamps, work-boxes, bins and pallets)
- understanding of the hierarchy of control.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Successful assessment of this unit meets the competency requirement of the National Standard for licensing Persons Performing High Risk Work. State/Territory OHS regulators have mandated the use of Assessment Instruments and Instructions for Assessment of this unit which have been endorsed by the national body responsible for OHS matters.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • comply with Commonwealth, state or territory OHS legislation, standards relevant to safe dogging and crane operations. • communicate and work safely with others in the work area. • apply Hazard prevention and control measures consistent with appropriate standards. • apply to move loads in conjunction with cranes including, the reading of tags, slinging, loading, directing and landing loads with a slewing mobile crane with a telescopic boom and a winch, in and out of sight of the crane/ operator, moving four loads of varying shapes, sizes and weights. • use fibre and/or synthetic rope as tag lines, and connecting to loads using clove hitch, rolling hitch, bowline and single sheetbend. • conduct pre and post operational checks of the lifting equipment.
Context of and specific resources for assessment	• Assessment of the safe and effective application of knowledge and skill to workplace tasks (performance) must be undertaken using the national OHS endorsed Assessment Instrument • Assessment of performance must be

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE

	undertaken either in the workplace or in a realistically simulated workplace setting
	• Assessors must ensure that the assessment in the workplace is organised through a workplace supervisor to ensure that all the required equipment and materials and a suitable working area is made available to suit the assessment and the workplace
	• Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints
	• Assessment is to comply with the requirements of any relevant Standards or operating procedures for dogging activities
	• Applicants must have access to:
	  • personal protective equipment (PPE) for the purpose of the performance assessment.
	  • four different loads as prescribed in the endorsed assessment instrument
	  • lifting and associated equipment
	  • suitable slewing crane
	  • communication equipment (eg. fixed channel, two-way radios) as applicable.

Method of assessment	Assessment must be conducted using the national OHS endorsed Assessment Instrument. This Instrument provides instruction on the application of the assessment. Assessment may be in conjunction with the assessment of other units of competency. The use of **'simulators'** in the assessment of this unit of competency is **not acceptable**. Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge. Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
Guidance information for assessment	Further information about endorsed Assessment Instruments may be obtained from state/territory OHS regulators.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Site informationmay include but not be limited to	• local conditions such as access and egress • work method statements.
Hazards may include but not limited to:	• ground stability (eg. ground condition, recently filled trenches, slopes) • overhead hazards (e.g. power lines, service pipes, trees, buildings, etc) • insufficient lighting • traffic (e.g. pedestrians, vehicles, plant) • weather (e.g. wind, lightning, storms) • other specific hazards (e.g. trip hazards, heights, radio interference, etc).
Hazard prevention/control measures	The systematic process of eliminating or reducing the risk to personnel and property through the application of controls. It includes the application of the hierarchy of controls, including: 1. elimination. 2. substitution. 3. isolation. 4. engineered control measures. 5. safe work practices. 6. personal protective equipment.
Appropriate standard s may include:	• codes of practice • legislation • Australian Standards • manufacturer's specifications • industry standards.

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

Lifting Equipment may include but not limited to:	• fibre ropes • wire ropes • chain • wire and synthetic slings • shackles • eyebolts • beam clamps • plate clamps • spreader beams • lifting beams • pallet forks and cages • concrete kibbles • personnel boxes.
Communication Methods may include but are not limited to:	• written instructions • signage, • hand signals • listening • questioning to confirm understanding • appropriate worksite protocol.
Cranes may include but not limited to:	• tower cranes (including self erecting) • portal boom cranes • vehicle loading cranes • slewing mobile cranes • non-slewing cranes • derrick cranes.
Appropriate personnel may include but are not limited to:	• supervisors • colleagues • managers who are authorised to take responsibility for the workplace or operations.
Communication Equipment may include but not limited to:	• fixed channel two-way radios • whistles • bells.
Personal protective equipment (PPE) may include but not limited to:	• hard hat • safety boots • gloves • high visibility clothing • reflective vest • relevant breathing, hearing, sight, skin and sun protection.
Load destination may include but	• ground

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

not limited to:	• loading platforms • suspended floors • vehicles.
Communication signals may include but not limited to:	• stop - hand • stop - whistle • hoist up - hand • hoist up - whistle • hoist down - hand • hoist down - whistle • luff boom down - hand • luff boom down - whistle • luff boom up - hand • luff boom up - whistle • telescope out - hand • telescope out - whistle • telescope in - hand • telescope in - whistle • slew left - hand • slew left - whistle • slew right - hand • slew right - whistle.
Defective Equipment may include but not limited to:	• excessive wear • damage • stretched • broken wires • cut/damaged fibres.

CPCCLRG3001A Licence to perform rigging basic level

Modification History

Not Applicable

Unit Descriptor

Unit descriptor This unit specifies the outcomes required to perform basic rigging work associated with movement of plant and equipment, steel erections, hoists (including mast climbing hoists), placement of pre-cast concrete, safety nets and static lines, perimeter safety screens and shutters; and cantilever crane loading platforms for licensing purposes.

Application of the Unit

Application of the unit

This unit requires the applicant to be able plan the work, select and inspect equipment, set up task, erect structures and plant and dismantle structures and plant.

This unit is based upon the National Standard for Licensing Persons Performing High Risk Work.

This unit in its current form meets state and territory licensing requirements. Any alteration will result in a unit which is not acceptable to regulators for the purpose of licensing.

This unit has a pre-requisite requirement. This requirement may be met by either the successful completion of the unit *CPCCLDG3001A Licence to perform dogging* or holding a valid licence for dogging.

Licensing/Regulatory Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan job.	1.1. Task to be undertaken is assessed. 1.2. Potential workplace ***hazards*** are identified. 1.3. ***Hazard control measures*** are identified consistent with ***appropriate standards*** to ensure the safety of personnel and equipment. 1.4. Site information is obtained. 1.5. All ***forces and loads*** associated with erecting and dismantling ***structures*** and ***associated plant*** are considered in consultation with ***appropriate personnel***. 1.6. ***Rigging equipment*** and ***associated equipment*** are identified in consultation with appropriate personnel according to ***procedures*** and site information.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.7. *Safety equipment* is identified.
	1.8. Appropriate ***communication methods*** are identified with appropriate personnel.
2. Select and inspect equipment.	2.1. Rigging equipment and associated equipment are selected and inspected according to procedures and the appropriate standard.
	2.2. Safety equipment is selected and inspected according to procedures.
	2.3. All defective rigging equipment, associated equipment and safety equipment is isolated, reported and recorded according to procedures.
	2.4. ***Communication equipment*** is selected and inspected for serviceability (where applicable.
3. Set up task.	3.1. Appropriate ***hazard prevention***/***control measures*** are applied to the work area according to procedures.
	3.2. ***Ground suitability*** is inspected and checked (where appropriate).
	3.3. Site information is reviewed, interpreted and communicated to appropriate personnel and ***appropriate personnel***.
	3.4. All forces and loads associated with erecting and dismantling structures and associated plant are determined in consultation with appropriate personnel.
	3.5. Safety equipment is fitted and worn correctly (where appropriate).
	3.6. Rigging equipment and associated plant are positioned for work application and stability according to procedures.
	3.7. Methods of applying ***temporary connections*** using fibre rope are applied according to procedures and the appropriate standard.
4. Erect structures and plant.	4.1. Structures and associated plant are erected according to procedures and site information.
	4.2. Stability of structures and associated plant is maintained during erection according to procedures.
	4.3. Work is conducted safely at heights including safe and effective use of safety equipment.
	4.4. Appropriate communication methods and communication equipment, are used to co-ordinate the tasks.
	4.5. Associated plant and rigging equipment is used

ELEMENT	PERFORMANCE CRITERIA
	according to procedures and the appropriate standard. 4.6. Temporary guys, ties, propping and shoring, including ***flexible steel wire rope***, and tubing, are connected where required. 4.7. Associated equipment is used in a safe and appropriate manner. 4.8. The completed task is inspected according to the appropriate standard. 4.9. Excess materials are removed from the work area (where applicable).
5. Dismantle structures and plant.	5.1. Structures and associated plant are dismantled according to procedures and the appropriate standard. 5.2. Work is conducted safely at heights including safe and effective use of safety equipment. 5.3. Stability of structures and associated plant is maintained during dismantling according to procedures. 5.4. Rigging equipment, associated equipment, safety equipment and associated plant are inspected for damage and defects. 5.5. All defective rigging equipment, associated equipment, associated plant and safety equipment are isolated reported and recorded according to procedures. 5.6. Rigging equipment and associated equipment are stored. according to procedures and the appropriate standard. 5.7. Hazard prevention/control measures are removed (where appropriate).

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

Required skills for this unit are:

- ability to calculate Safe Working Load (SWL) and Working Load Limit (WLL)
- ability to erect and dismantle, level, plumb and stabilise associated plant and structures
- ability to work safely at heights including the correct application of safety equipment.
- accurate interpretation of basic structural charts and structural plans (site information)
- applying methods for making temporary connections of ropes using fibre and synthetic types
- apply methods of splicing and whipping fibre and synthetic ropes
- correct application and use of all rigging and associated equipment
- risk assessment and hazard control strategies
- interpersonal and communication skills at a level sufficient to site/workplace requirements. This includes the relevant communication methods and equipment.
- verify problems and equipment faults and demonstrate appropriate response.

Required knowledge

Required knowledge for this unit is:

- appropriate mathematical procedures for estimation and measurement of loads
- ability to interpret manufacturer's specifications for all plant and equipment use in rigging operations
- knowledge of principles relating to all plant, equipment and structural stability
- knowledge of the types and functions of rigging, safety and associated equipment including an understanding of their limitations.
- organisational and workplace standards, requirements, policies and procedures for rigging
- understanding of the hierarchy of hazard identification and control
- relevant Commonwealth, state or territory and local government OHS legislation, standards and codes of practice for undertaking rigging activities
- understanding of inspection and maintenance requirements of a wide range of appropriate plant and equipment in line with Australian Standards or manufacturer's specifications
- estimation of ground bearing pressures of the full range of soil types and associated ground conditions for setting up plant and equipment.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Successful assessment of this unit meets the competency requirement of the National Standard for licensing Persons Performing High Risk Work.

State/Territory OHS regulators have mandated the use of Assessment Instruments and Instructions for Assessment endorsed by the national body responsible for OHS matters for the assessment of this unit.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- comply with OHS licensing legislation.
- effectively communicate and work safely with others in the work area.
- effectively conduct risk assessment and management procedures.
- effectively complete the following tasks:-
  - inspection of all plant and equipment, and
  - installation of a fall arrest system (Static line), and
  - use of a safety harness / fall arrest system, and
  - installation of crane loading platforms and
  - installation of a safety net, and
  - installation of a shutter and safety screen, and
  - demonstrated ability to work safely at heights, and
  - erection of structural steel, and
  - erection of precast panel, and
  - set up and operation of a winch for load movement, and
  - installation of a materials hoist, or
  - installation of a mast climber.
- effectively demonstrate the following knots,

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE

	bends and hitches:- • Sheet bend, • Becket hitch, • Running bowline, • Double bowline. • effectively demonstrate the following splices and whippings:- • Eye splice, • Back splice, • Short splice, • Sail makers whipping, • Common whipping, • West countryman's
Context of and specific resources for assessment	Assessment of the safe and effective application of knowledge and skill to workplace tasks (performance) must be undertaken using the National OHS endorsed Assessment Instrument. Assessment of performance must be undertaken either in the workplace or in a realistically simulated workplace setting. Assessors must ensure that the assessment in the workplace is organised to ensure that all the required equipment and materials and a suitable working area is made available to suit the assessment and the workplace. Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints. Assessment is to comply with the requirements of any relevant Standards or operating procedures for basic rigging. Applicants must have access to: • personal protective equipment (PPE) for the purpose of the Performance Assessment. • appropriate safety equipment in safe condition • appropriate rigging equipment, associated equipment associated plant in safe condition as described in the endorsed assessment instrument • communication equipment (e.g. two-way

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE

	radios) where applicable • appropriate materials as required for safe erection of structures • appropriate materials for conducting fibre rope slicing, whipping, knots, bends and hitches.
Method of assessment	Assessment must be conducted using the national OHS endorsed Assessment Instruments. These Instruments provide advice on their application. The use of **'simulators'** in the assessment of this unit of competency is **not acceptable**. Assessment may be in conjunction with the assessment of other units of competency. Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge. Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
Guidance information for assessment	Further information about endorsed Assessment Instruments may be obtained from state/territory OHS regulators.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Hazards may include but are not limited to:	• ground stability (e.g. ground condition, recently filled trenches, slopes) • overhead hazards (e.g. power lines, service pipes) (**NB**: minimum clearance distance from powerlines or electrical equipment as determined by relevant state authority or

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	electrical supply authority.) • traffic (e.g. pedestrians, vehicles, other plant) • insufficient lighting • environmental conditions (e.g. wind, lightning, storms) • other specific hazards (e.g. dangerous materials).
Hazard control measures:	Refers to the systematic process of eliminating or reducing the risk to personnel and property through the application of controls. It includes the application of the hierarchy of control, the six-step preference of control measures to manage and control risk: • elimination • substitution • isolation • engineering control measures • using safe work practices • personal protective equipment.
Appropriate standards may include:	• codes of practice • legislation • Australian Standards • manufacturer's specifications • industry standards (where applicable).
Site Information may include, but not limited to:	• local conditions such as access and egress, • work method statements, • site specific job safety analyses and other site specific documentation as required. • task plans / Schedules and structural plans.
Forces and Loads may include, but not limited to:	• dead loads • live loads • static load • dynamic loads • wind loads.
Structures may include but are not limited to:	• structural steel • precast panels.
Associated plant may include but not limited to:	• static lines • safety nets • hoists

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	• mast climbers • loading platforms.
Appropriate personnel may include:	• engineers • supervisors • colleagues • managers who are authorised to take responsibility for the workplace or operations.

Rigging Equipment may include but is not limited to:	• scaffolds
	• elevated work platforms
	• personnel box
	• cantilevered crane loading platforms
	• mast climbers.
	• safety screens and shutters
	• cranes including but not limited to:
	  • non-slewing cranes
	  • mobile slewing cranes
	  • vehicle loading cranes
	  • tower cranes
	  • self-erecting tower cranes
	  • portal boom cranes
	  • derrick cranes
	  • bridge and gantry cranes.

Associated equipment may include but is not limited to:	• all types of power and manually operated lifting gear • fibre ropes • flexible steel wire rope (FSWR) • chains • wire and synthetic slings • shackles • terminations • wedge sockets • eye bolts • beam clamps • plate clamps • rope grips • turnbuckles • rigging screws • chain blocks • lever blocks • lever-action winches

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	• sheaves • spreader bars • lifting beams • jacks • levers • skates • wedges • rollers • girder trolley
Procedures may include but is not limited to:	• manufacturer's guidelines (instructions, specifications or checklists) • industry operating procedures, relevant codes of practice • workplace procedures (work instructions, operating procedures, checklists).
Safety Equipment may include but not limited to:	• safety harness • energy absorber • lanyard • inertia reel • static safety lines • safety nets.
Communication Methods may include but is not limited to:	• verbal and non-verbal language • written instructions • signage • hand signals • listening, • questioning to confirm understanding, and appropriate worksite protocol. **NB**: Mobile phones are not to be used for signalling purposes during the rigging process.
Communication equipment may include but is not limited to:	• fixed channel two-way radios
Hazard prevention/control measures may include but is not limited to:	• safety tags on electrical switches/isolators • powerlines are insulated • safety observer used inside exclusion zone • power disconnected • traffic barricades and control • pedestrian barricades • trench covers

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	• movement of obstructions • personal protective equipment • adequate illumination • safety shutters and screens.
Ground suitability may include but is not limited to:	• rough uneven ground • backfilled ground • soft soils • hard compacted soil • rock • bitumen • concrete • suspended concrete floors • building roofs • landings • ground bearing pressure.
Appropriate personnel may include but not limited to	• other riggers • doggers • crane operators.
Temporary connections may include but not limited to:	• knots • bends • hitches • spicing • whipping.
Flexible Steel Wire Rope (***FSWR***) includes:	• identification, uses and connections. May include termination for: • static lines, • guys, • purchase systems, • lashing, • cranes, • hoist and winch ropes.

ELEMENT	PERFORMANCE CRITERIA
	4.6. Associated plant and rigging equipment is used according to procedures and the appropriate standard. 4.7. Associated equipment is used in a safe and appropriate manner. 4.8. The completed task is inspected according to the appropriate standard. 4.9. Excess materials are removed from the work area (where applicable)
5. Dismantle structures and plant.	5.1. Structures and associated plant are dismantled according to procedures and the appropriate standard. 5.2. Work is conducted safely at heights including safe and effective use of safety equipment. 5.3. Stability of structures and associated plant is maintained during dismantling according to procedures. 5.4. Rigging equipment, associated equipment, safety equipment and associated plant are inspected for damage and defects 5.5. All defective rigging equipment, associated equipment, associated plant and safety equipment are isolated reported and recorded according to procedures. 5.6. Rigging equipment and associated equipment are stored according to procedures and the appropriate standard. 5.7. Hazard prevention/control measures are removed (where appropriate)

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to calculate Safe Working Load (SWL) and Working Load Limit (WLL)

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- ability to erect and dismantle, level, plumb and stabilise associated plant and structures
- ability to work safely at heights including the correct application of safety equipment.
- accurate interpretation of structural charts and structural plans (site information)
- correct application and use of all rigging and associated equipment
- risk assessment and hazard control strategies
- interpersonal and communication skills at a level sufficient to site/workplace requirements. This includes the relevant communication methods and equipment.
- verify problems and equipment faults and demonstrate appropriate response.

Required knowledge

Required knowledge for this unit is:

- appropriate mathematical procedures for estimation and measurement of loads
- ability to interpret manufacturer's specifications for all plant and equipment use in rigging operations
- knowledge of principles relating to all plant, equipment and structural stability
- knowledge of the types and functions of rigging, safety and associated equipment including an understanding of their limitations
- organisational and workplace standards, requirements, policies and procedures for rigging
- understanding of the hierarchy of hazard identification and control
- relevant Commonwealth, state or territory and local government OHS legislation, standards and codes of practice for undertaking rigging activities
- understanding of inspection and maintenance requirements of a wide range of appropriate plant and equipment in line with Australian Standards or manufacturer's specifications
- estimation of ground bearing pressures of the full range of soil types and associated ground conditions for setting up plant and equipment.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Successful assessment of this unit meets the competency requirement of the National Standard

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE

	for licensing Persons Performing High Risk Work. State/Territory OHS regulators have mandated the use of Assessment Instruments and Instructions for Assessment for this unit which have been endorsed by the national body responsible for OHS matters.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to:
	• comply with OHS licensing legislation.
	• effectively communicate and work safely with others in the work area.
	• effectively conduct risk assessment and management procedures.
	• effectively complete the following tasks:
	  • adding and removing a tower crane section, or
	  • adding and removing a crane lattice boom section, or
	  • erecting a non guyed tower (e.g. light tower, and
	  • perform a multiple crane lift, or
	  • a multiple winch lift, or
	  • a combination of a crane and winch lift, and
	  • lifting and installing a series of tilt-up panels, or
	  • lifting and installing a series of scenery panels (i.e. entertainment industry), and
	  • demolish/remove a series of tilt-up panel structures, or
	  • demolish/remove a series of scenery panel structures, and
	  • demolishing a concrete encased structural steel column and beam.
	• **NB**: All specifications for these performance tasks are detailed in the endorsed assessment instrument.
	• effectively conduct pre and post operational checks of intermediate rigging equipment.

Context of and specific resources for assessment	Assessment of the safe and effective application of knowledge and skill to workplace tasks (performance) must be undertaken using the

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE

	endorsed Assessment Instrument. Assessment of performance must be undertaken either in the workplace or in a realistically simulated workplace setting. Assessors must ensure that the assessment in the workplace is organised to ensure that all the required equipment and materials and a suitable working area is made available to suit the assessment and the workplace. Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints. Assessment is to comply with relevant appropriate standard requirements. Applicants must have access to: • personal protective equipment (PPE) for the purpose of the Performance Assessment • appropriate safety equipment is safe condition • appropriate rigging equipment, associated equipment associated plant in safe condition as described in the endorsed assessment instrument • communication equipment (e.g. radios) where applicable • appropriate materials as required for safe erection of structures.
Method of assessment	Assessment must be conducted using the endorsed Assessment Instruments. These Instruments provide advice on their application. The use of **'simulators'** in the assessment of this unit of competency is **not acceptable**. Assessment may be in conjunction with the assessment of other units of competency. Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge. Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE

Guidance information for assessment	Further information about endorsed Assessment Instruments may be obtained from state/territory OHS regulators.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Hazards may include but not limited to:	• ground stability (e.g. ground condition, recently filled trenches, slopes) • overhead hazards (e.g. power lines, service pipes) (**NB**: Minimum clearance distance from powerlines or electrical equipment as determined by relevant state authority or electrical supply authority) • traffic (e.g. pedestrians, vehicles, other plant) • insufficient lighting • environmental conditions (e.g. wind, lightning, storms) • other specific hazards (e.g. dangerous materials).
Hazard control measures:	Refers to the systematic process of eliminating or reducing the risk to personnel and property through the application of controls. It includes the application of the hierarchy of control, the six-step preference of control measures to manage and control risk: • elimination • substitution • isolation • engineering control measures • using safe work practices • personal protective equipment.

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

Appropriate standards may include but are not limited to:	• codes of practice • legislation • Australian Standards • manufacturer's specifications • industry standards (where applicable).
Site Information may include but is not limited to:	• local conditions such as access and egress • work method statements • site-specific job safety analyses and other site specific documentation as required • task plans /schedules and structural plans.
Forces and Loads may include but are not limited to:	• dead loads • live loads • static load • dynamic loads • wind loads.
Structures may include but not limited to:	• concrete tilt-up panels • scenery panels (used in entertainment) • non guyed light towers.
Associated plant may include but is not limited to:	• all types of cranes • conveyors • dredges • excavators.
Appropriate personnel may include but not limited to:	• supervisors • engineers • colleagues • managers who are authorised to take responsibility for the workplace or operations.

Rigging Equipment may include but is not limited to:	• scaffolds
	• elevated work platforms
	• stages
	• personnel box
	• cantilevered crane loading platforms,
	• mast climbers
	• safety screens and shutters
	• cranes including but not limited to:
	  • non-slewing cranes
	  • mobile slewing cranes
	  • vehicle loading cranes
	  • tower cranes

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	• self-erecting tower cranes • portal boom cranes • derrick cranes • bridge and gantry cranes.
Associated equipment may include but is not limited to:	• all associated equipment at the basic rigging level, and • lifting clutches (swift lifts) • chain motors.
Procedures may include but are not limited to:	• manufacturer's guidelines (instructions, specifications or checklists) • industry operating procedures, relevant codes of practice • workplace procedures (work instructions, operating procedures, checklists).
Safety Equipment may include but not limited to:	• safety harness • energy absorber • lanyard • inertia reel • safety nets • static lines.
Communication Methods may include but not limited to:	• verbal and non-verbal language • written instructions • signage • hand signals • listening, • questioning to confirm understanding, and appropriate worksite protocol. **NB**: Mobile phones are not to be used for signalling purposes during the rigging process.
Communication equipment may include but is not limited to:	• fixed channel two-way radios
Hazard prevention/control measures may include but is not limited to:	• safety tags on electrical switches/isolators • powerlines are insulated • safety observer used inside exclusion zone • power disconnected • traffic barricades and control • pedestrian barricades • trench covers • movement of obstructions

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	• personal protective equipment • adequate illumination.
Ground suitability may include but is not limited to:	• rough uneven ground • backfilled ground • soft soils • hard compacted soil • rock • bitumen • concrete • suspended concrete floors • building roofs • landings • ground bearing pressure.
Appropriate personnel may include but not limited to:	• other riggers • doggers • crane operators.
Flexible Steel Wire Rope (***FSWR***) includes:	• identification, uses and connections. May include termination for: • static lines • guys • purchase systems • lashing • cranes • hoist and winch ropes.

CPCCLRG4001A Licence to perform rigging advanced level

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit specifies the outcomes required to perform rigging work at the advanced level, which includes all the outcomes for rigging work at the basic and intermediate levels, and also includes rigging of gin poles and shear legs, flying foxes and cable ways, guyed derricks and structures, and suspended scaffolds and fabricated hung scaffolds for licensing purposes.

Application of the Unit

Application of the unit

This unit requires the applicant to be able plan the work, select and inspect equipment, set up task, erect structures and plant and dismantle structures and plant.

This unit is based upon the National Standard for Licensing Persons Performing High Risk Work.

This unit in its current form meets state and territory licensing requirements. Any alteration will result in a unit which is not acceptable to regulators for the purpose of licensing.

This unit has a pre-requisite requirement. This requirement may be met by either the successful completion of the unit *CPCCLRG3002A Licence to perform rigging intermediate level* or holding a valid licence for intermediate rigging.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan job.	1.1. Task to be undertaken is assessed. 1.2. Potential workplace ***hazards*** are identified. 1.3. ***Hazard control measures*** are identified consistent with ***appropriate standards*** to ensure the safety of personnel and equipment. 1.4. Site information is obtained. 1.5. All ***forces and loads*** associated with erecting and dismantling ***associated plant*** are considered in consultation with ***appropriate personnel***. 1.6. ***Rigging equipment*** and ***associated equipment*** are identified in consultation with appropriate personnel according to ***procedures*** and site information.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.7. ***Safety equipment*** is identified. 1.8. Appropriate communication methods are identified with appropriate personnel.
2. Select and inspect equipment.	2.1. Rigging equipment and associated equipment are selected and inspected according to procedures and the appropriate standard. 2.2. Safety equipment is selected and inspected according to procedures. 2.3. All defective rigging equipment, associated equipment and safety equipment is isolated, reported and recorded according to procedures. 2.4. ***Communication equipment*** is selected and inspected for serviceability (where applicable)
3. Prepare site and equipment.	3.1. Appropriate ***hazard prevention***/***control measures*** are applied to the work area according to procedures. 3.2. ***Ground suitability*** is inspected and checked (where appropriate). 3.3. Site information is reviewed interpreted and communicated to appropriate personnel and appropriate personnel. 3.4. All forces and loads associated with erecting and dismantling associated plant are determined in consultation with appropriate personnel. 3.5. Safety equipment is fitted and worn correctly (where appropriate). 3.6. Rigging equipment and associated plant are positioned for work application and stability according to procedures. 3.7. Methods of applying ***temporary connections*** using fibre rope are applied according to procedures and the appropriate standard.
4. Erect structures and plant.	4.1. Associated plant is erected according to procedures and site information. 4.2. Stability of associated plant is maintained during erection according to procedures. 4.3. Work is conducted safely at heights including safe and effective use of safety equipment. 4.4. Appropriate communication methods and communication equipment, are used to co-ordinate the tasks. 4.5. Temporary guys, ties, propping and shoring, including ***flexible steel wire rope***, and tubing, are

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	connected where required. 4.6. Associated plant and rigging equipment is used according to procedures and the appropriate standard. 4.7. Associated equipment is used in a safe and appropriate manner. 4.8. The completed task is inspected according to the appropriate standard. 4.9. Excess materials are removed from the work area (where applicable)
5. Dismantle structures and plant.	5.1. Associated plant is dismantled according to procedures and the appropriate standard. 5.2. Work is conducted safely at heights including safe and effective use of safety equipment. 5.3. Stability of associated plant is maintained during dismantling according to procedures. 5.4. Rigging equipment, associated equipment, safety equipment and associated plant are inspected for damage and defects 5.5. All defective rigging equipment, associated equipment, associated plant and safety equipment are isolated reported and recorded according to procedures. 5.6. Rigging equipment and associated equipment are stored according to procedures and the appropriate standard. 5.7. Hazard prevention/control measures are removed (where appropriate)

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to calculate Safe Working Load (SWL) and Working Load Limit (WLL)
- ability to erect and dismantle, level, plumb and stabilise associated plant

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- ability to work safely at heights including the correct application of safety equipment.
- accurate interpretation of structural charts and structural plans (Site information)
- applying methods for making temporary connections of ropes using fibre and synthetic types
- correct application and use of all rigging and associated equipment
- risk assessment and hazard control strategies
- interpersonal and communication skills at a level sufficient to site/workplace requirements. This includes the relevant communication methods and equipment.
- verify problems and equipment faults and demonstrate appropriate response.

Required knowledge

Required knowledge for this unit is:

- appropriate mathematical procedures for estimation and measurement of loads
- ability to interpret manufacturer's specifications for all plant and equipment use in rigging operations
- knowledge of principles relating to all plant, equipment and structural stability
- knowledge of the types and functions of rigging, safety and associated equipment including an understanding of their limitations
- organisational and workplace standards, requirements, policies and procedures for rigging
- understanding of the hierarchy of hazard identification and control
- relevant Commonwealth, state or territory and local government OHS legislation, standards and codes of practice for undertaking rigging activities
- understanding of inspection and maintenance requirements of a wide range of appropriate plant and equipment in line with Australian Standards or manufacturer's specifications
- estimation of ground bearing pressures of the full range of soil types and associated ground conditions for setting up plant and equipment.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Successful assessment of this unit meets the competency requirement of the National Standard

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE

	for licensing Persons Performing High Risk Work. State/Territory OHS regulators have mandated the use of Assessment Instruments and Instructions for Assessment for this unit which have been endorsed by the national body responsible for OHS matters

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to:
	• comply with OHS licensing legislation.
	• effectively communicate and work safely with others in the work area.
	• effectively conduct risk assessment and management procedures.
	• effectively complete the following tasks:
	  • rig a span rope, or
	  • rig a flying fox, and
	  • install a swinging stage, or
	  • install a bosuns chair, and
	  • set up a gin pole and conduct a lift with a powered winch, and
	  • erect and dismantle a hung or suspended scaffold
	
	NB: All specifications for these performance tasks are detailed in the endorsed assessment instrument.
	• effectively demonstrate the following knots, bends and hitches:
	  • Alpine hitch
	  • Bosun chair hitch
	  • Prusik hitch
	  • Figure eight
	• effectively conduct pre and post operational checks of advanced rigging equipment.

Context of and specific resources for assessment	Assessment of the safe and effective application of knowledge and skill to workplace tasks (performance) must be undertaken using the endorsed Assessment Instrument. Assessment of performance must be undertaken either in the workplace or in a realistically

CPCCOHS1001A Work safely in the construction industry

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit of competency specifies the outcomes required to undertake Occupational Health and Safety (OHS) induction training within the construction industry.

It requires the ability to demonstrate personal awareness of OHS legislative requirements, and the basic principles of risk management and prevention of injury and illness in the construction industry.

Licensing requirements will apply to this unit of competency depending on the regulatory requirements of each jurisdiction.

Application of the Unit

Application of the unit

This unit of competency supports the attainment of the basic OHS knowledge required prior to undertaking designated work tasks within any of the sectors within the construction industry. The unit relates directly to the general induction training program specified by the *National Code of Practice for Induction for Construction Work* (ASCC 2007).

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify OHS legislative requirements.	1.1. Applicable ***OHS legislative requirements*** relevant to own work, role and responsibilities are identified and explained. 1.2. Duty of care requirements are identified. 1.3. Own responsibilities to comply with ***safe work practices*** are identified and explained.
2. Identify construction hazards and control measures.	2.1. Basic principles of risk management are identified. 2.2. ***Common construction hazards*** are identified and discussed. 2.3. ***Measures for controlling*** hazards and risks are identified.
3. Identify OHS communication and reporting processes.	3.1. OHS communication processes, information and documentation are identified and discussed. 3.2. Role of ***designated OHS personnel*** is identified and explained.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.3. ***Safety signs and symbols*** are identified and explained. 3.4. Procedures and ***relevant authorities*** for reporting hazards, ***incidents*** and injuries are identified.
4. Identify OHS incident response procedures.	4.1. ***General procedures*** for responding to incidents and ***emergencies*** are identified and explained. 4.2. Procedures for accessing first aid are identified. 4.3. Requirements for the selection and use of relevant ***personal protective equipment*** are identified and demonstrated. 4.4. ***Fire safety equipment*** is identified and discussed.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - clarify OHS legislative requirements
  - verbally report construction hazards and risks
  - ask effective questions
  - relay information to others
  - discuss OHS issues and information
- comprehension skills to:
  - explain the basic OHS legislative requirements which will be applicable to own work
  - explain the meaning of safety signs and symbols
  - identify common construction hazards
  - discuss the basic principles of risk management.

Required knowledge

Required knowledge for this unit is:

- applicable Commonwealth, State or Territory OHS legislation, regulations, standards, codes of practice and industry standards/guidance notes relevant to own

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

work, role and responsibilities

- basic principles of risk management and assessment for construction work
- common construction hazards
- common construction safety signage and its meanings
- general construction emergency response and evacuation procedures
- general construction work activities that require licenses, tickets or certificates of competency
- general first aid response requirements
- general procedures for raising OHS issues
- general procedures for reporting OHS hazards, accidents, incidents, emergencies, injuries, near misses and dangerous occurrences
- general procedures for responding to hazards, incidents and injuries
- general workers' compensation and injury management requirements
- OHS hierarchy of controls
- OHS responsibilities and rights of duty holders, including:
  - persons in control of construction work/projects
  - employers and self-employed persons
  - supervisors
  - employees
  - designers
  - inspectors
  - manufacturers and suppliers
- own responsibilities to comply with safe work practices relating to:
  - housekeeping
  - identification of hazards
  - preventing bullying or harassment
  - smoking
  - use of amenities
  - use of drugs and alcohol
- role of OHS committees and representatives
- types of common personal protective equipment and fire safety equipment
- types of OHS information and documentation.

Evidence Guide

EVIDENCE GUIDE

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence must confirm personal awareness of the following: • applicable OHS legislative and safety requirements for construction work including duty of care • the range of common construction hazards and procedures for the assessment of risk and application of the hierarchy of control • OHS communication processes, information and documentation including the role of OHS committees and representatives, the meaning of common safety signs and symbols, and procedures for reporting hazards, incidents and injuries • general procedures for responding to incidents and emergencies including evacuation, first aid, fire safety equipment and PPE.
Context of and specific resources for assessment	• Resources must be available to support the program including participant materials and other information or equipment related to the skills and knowledge covered by the program. • It is recommended that the assessment tool designed specifically to support this unit of competency will provide consistency in assessment outcomes. • Where applicable, physical resources should include equipment modified for people with disabilities • Access must be provided to appropriate assessment support when required. • Assessment processes and techniques must be culturally appropriate, and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed • In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in such a

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE

	manner as is appropriate to the oracy, language and literacy levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.
Method of assessment	Assessment methods may include more than one of the following: • practical assessment • oral questioning • written test • work-based activities • simulated project based activity

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

OHS legislative requirements relate to:	• Australian standards • construction industry OHS standards and guidelines • duty of care • health and safety representatives, committees and supervisors • licences, tickets or certificates of competency • National Code of Practice for Induction Training for Construction Work • national safety standards • OHS and welfare Acts and regulations • safety codes of practice.
Duty of care requirements relate to:	• legal responsibility under duty of care to do everything reasonably practicable to protect others from harm

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	• own responsibilities to comply with safe work practices, including activities that require licences, tickets or certificates of competency • relevant state OHS requirements, including employers and self-employed persons, persons in control of the work site, construction supervisors, designers, manufacturers and suppliers, construction workers, subcontractors and inspectors.
Safe work practices include:	• access to site amenities, such as drinking water and toilets • general requirements for safe use of plant and equipment • general requirements for use of personal protective equipment and clothing • housekeeping to ensure a clean, tidy and safer work area • no drugs and alcohol at work • preventing bullying and harassment • smoking in designated areas • storage and removal of debris.
Risk relates to:	• likelihood of a hazard causing injury or harm.
Principles of risk management include:	• assessing the risks involved • consulting and reporting ensuring the involvement of relevant workers • controlling the hazard • identifying hazards • reviewing to identify change or improvement.
Hazard relates to:	• any thing (including an intrinsic property of a thing) or situation with the potential to cause injury or harm.
Common construction hazards include:	• confined spaces • electrical safety • excavations, including trenches • falling objects • hazardous substances and dangerous goods • HIV and other infectious diseases • hot and cold working environments • manual handling • noise • plant and equipment

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	• traffic and mobile plant • unplanned collapse • ultraviolet (UV) radiation • working at heights.
Measures for controlling risk to eliminate or minimise hazards in accordance with the hierarchy of control include:	• elimination • substitution • isolation • engineering control • administrative control • personal protective equipment.
OHS communication processes include:	• discussions with OHS representatives • OHS meetings • OHS notices, newsletters, bulletins and correspondence • OHS participative arrangements • processes for raising OHS issues • toolbox talks • workplace consultation relating to OHS issues and changes.
OHS information and documentation includes:	• accident and incident reports • Acts and regulations • Australian standards • codes of practice • construction documentation and plans • emergency information contact • evacuation plans • guidance notes • job safety analyses • labels • material safety data sheets (MSDS) • proformas for reporting hazards, incidents and injuries • reports of near misses and dangerous occurrences • risk assessments • safe work method statements • safety meeting minutes • site safety inspection reports.
Designated OHS personnel includes:	• first aid officers • OHS committee members

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	• OHS representatives • supervisors.
Safety signs and symbols include:	• emergency information signs (e.g. exits, equipment and first aid) • fire signs (e.g. location of fire alarms and firefighting equipment) • hazard signs (e.g. danger and warning) • regulatory signs (e.g. prohibition, mandatory and limitation or restriction) • safety tags and lockout (e.g. danger tags, out of service tags).
Relevant authorities include:	• emergency services (e.g. police, ambulance, fire brigade and emergency rescue) • OHS regulatory authority • supervisor.
Incidents include:	• accidents resulting in personal injury or damage to property • near misses or dangerous occurrences which do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence, for example: • breathing apparatus malfunctioning to the extent that the user's health is in danger • collapse of the floor, wall or ceiling of a building being used as a workplace • collapse or failure of an excavation more than 1.5 metres deep (including any shoring) • collapse or partial collapse of a building or structure • collapse, overturning or failure of the load bearing of any scaffolding, lift, crane, hoist or mine-winding equipment • damage to or malfunction of any other major plant • electric shock. • electrical short circuit, malfunction or explosion • uncontrolled explosion, fire or escape of gas, hazardous substance or steam • any other unintended or uncontrolled incident or event arising from operations carried on at a

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	workplace.
General procedures for responding to incidents and emergencies include:	• basic emergency response (keep calm, raise alarm, obtain help) • evacuation • notification of designated OHS personnel and authorities • notification of emergency services (e.g. when and how) • referring to site emergency plans and documentation.
Emergencies include:	• chemical spill • fire • injury to personnel • structural collapse • toxic and/or flammable vapours emission • vehicle/mobile plant accident.
Personal protective equipment includes:	• aprons • arm guards • eye protection • gloves • hard hat • hearing protection • high visibility retro reflective vests • protective, well fitting clothing • respiratory protection • safety footwear • UV protective clothing and sunscreen.
Fire safety equipment includes:	• breathing apparatus • fire blankets • firefighting equipment.

CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry

Modification History

Not Applicable

Unit Descriptor

Unit descriptor This unit of competency specifies the outcomes required to carry out OHS requirements through safe work practices at any on or off-site construction workplace. It requires the performance of work in a safe manner through awareness of risks and work requirements, and the planning and performance of safe work practices with concern for personal safety and the safety of others.

Application of the Unit

Application of the unit This unit of competency covers fundamental OHS necessary to undertake work tasks within any sector in the construction industry. It includes the identification of hazardous materials, including asbestos, and compliance with legislated work safety practices. It does not cover removal of asbestos, which is a licensed activity.

The unit relates directly to the general induction training program specified by the *National Code of Practice for Induction for Construction Work* (ASCC 2007) required to enter a construction work site. Completion of unit CPCCOHS1001A covers this requirement.

Licensing/Regulatory Information

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify and assess risks.	1.1. ***Hazards*** in the work area are identified, assessed and reported to ***designated personnel***. 1.2. Safety risks in the work area are identified, assessed and reported to designated personnel. 1.3. ***Safe work practices***, ***duty of care*** requirements and safe work instructions are followed for controlling risks. 1.4. OHS, hazard, accident or ***incident*** reports are contributed to according to workplace procedures and ***Australian government and state or territory OHS legislation*** and relevant ***information***.
2. Identify hazardous materials and other	2.1. ***Hazardous materials*** on a work site are correctly identified and, if appropriate, handled and used

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
hazards on work sites.	according to company and legislated procedures. 2.2. ***Measures for controlling risks*** and construction hazards are applied effectively and immediately. 2.3. Hazardous materials that have safety implications for self and other workers are secured immediately they are identified, using appropriate ***signs and symbols***. 2.4. Asbestos-containing materials are identified on a work site and reported to designated personnel.
3. Plan and prepare for safe work practices.	3.1. Correct ***personal protective equipment*** and clothing for each area of construction work are identified, worn, correctly fitted, used and stored according to enterprise procedures. 3.2. Selection of ***tools***, ***equipment*** and ***materials***, and organisation of tasks are performed in conjunction with other personnel on site and in accordance with enterprise procedures. 3.3. Required barricades and signage are determined and erected at the appropriate site location. 3.4. Material safety data sheets (MSDS), and job safety analysis (JSA) and safe work method statements relevant to the work to be carried out are identified and applied.
4. Apply safe work practices.	4.1. Tasks are performed in a manner that is safe for operators, other personnel and the general community in accordance with legislative requirements, and enterprise policies and procedures. 4.2. Plant and equipment guards are used in accordance with manufacturer specifications, work site regulations and Australian standards where applicable. 4.3. Procedures and relevant authorities for reporting hazards, incidents and injuries are used. 4.4. ***Prohibited tools and equipment*** in areas with identified asbestos are recognised and not used. 4.5. Work site safety signs and symbols are identified and followed. 4.6. Work site area is cleared and maintained to prevent and protect self and others from incidents and accidents and to meet ***environmental requirements***.
5. Follow emergency procedures.	5.1. Designated personnel are identified in the event of an emergency for communication purposes. 5.2. Safe workplace procedures for dealing with accidents,

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	various ***types of fire*** and other emergencies are followed, including identification or use, if appropriate, of ***fire equipment*** within scope of responsibilities. 5.3. ***Emergency response and evacuation procedures*** are known, practised and carried out effectively when required. 5.4. Emergency first aid treatment of minor injuries is carried out correctly and details of any treatment administered are reported accurately to designated personnel as soon as possible.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to accurately recognise OHS hazards, including asbestos and take all opportunities to alleviate safety problems in a variety of construction work sites and environments
- capacity to deal calmly and effectively with any potential safety problems and work closely with other team members and supervisors to ensure safe working conditions are maintained
- communication skills to:
  - determine and report hazards and risks
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and interpret:
    - MSDS, JSA and safe work method statements
    - other relevant documentation
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
  - written skills to contribute to reports
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- asbestos management code prevention of exposure
- basic first aid procedures
- common construction industry terminology
- common workplace safety hazards and risks and procedures for reporting these to designated personnel
- construction industry communications equipment and use
- construction industry health and safety signage
- emergency response and evacuation procedures
- JSA and safe work method statements
- MSDS
- OHS hierarchy of control and role of OHS committees and representatives
- relevant legislation, regulations and workplace requirements relating to OHS, including hazard reduction and personal safety, including duty of care responsibilities, workers' compensation and injury management requirements
- safe manual handling techniques
- safe work practices in normal working environment
- safety equipment, policies and requirements for working in confined spaces and at height, including on rooves
- tools and equipment prohibited for use near identified asbestos-containing materials (ACM)
- types of fires and basic firefighting equipment
- types, possible location and risks of ACM, including serpentine and amphibole groups, and their use in common building materials
- types, purpose and use of construction industry personal protective equipment and clothing
- workplace and equipment safety requirements.

© Commonwealth of Australia, 2025 Industry Skills Australia

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- correctly locate, interpret and apply relevant information, standards and specifications
- comply with a site safety plan, organisational policies, OHS regulations and state and territory legislation applicable to workplace operations, including quality requirements
- correctly identify ACM and policies and procedures for reporting this to designated personnel
- effectively communicate and work safely with others
- apply general procedures for responding to incidents and reporting hazards and injuries
- select and use firefighting equipment to extinguish a simulated mechanical fire
- evacuate a site through simulated response to an emergency, complying with workplace procedures.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE

- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct,

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE

	indirect and supplementary evidence. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Hazards include:

- chemical spills
- electrical safety work in confined spaces
- excavations, including trenches
- falling objects
- fires
- gases
- hazardous materials
- high or very low temperatures
- HIV and other infectious diseases
- liquids under pressure
- manual handling
- moving machinery and equipment
- noise, dust and vapours
- overhanging beams
- protrusions
- sharp equipment
- traffic
- ultraviolet (UV) radiation
- unplanned collapse

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	• working at heights.
Designated personnel to be contacted in case of an emergency, accident, fire or to report a risk such as identification of ACM are:	• designated safety officers, determined by the enterprise, who have undertaken specific safety response training • managers or other senior personnel • personnel competent and/or licensed in the safe handling of asbestos • supervisors.

Safe work practices:	• include:
	  • day to day observation of OHS policies and procedures
	  • emergency procedures
	  • risk assessment
	  • use of basic firefighting equipment
	• relate to:
	  • access to site amenities, such as drinking water and toilets
	  • general requirements for safe use of plant and equipment
	  • general requirements for use of personal protective equipment and clothing
	  • housekeeping to ensure a clean, tidy and safer work area
	  • no drugs and alcohol at work
	  • preventing bullying and harassment
	  • smoking in designated areas
	  • storage and removal of debris.

Duty of care requirements:	• relate to:
	  • legal responsibility under duty of care to do everything reasonably practicable to protect others from harm
	  • relevant state and territory OHS requirements and include employers and self-employed persons, persons in control of the work site, construction supervisors, designers, manufacturers and suppliers, construction workers, subcontractors and inspectors
	• may relate to:
	  • own responsibilities to comply with safe work practices, including activities that

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	require licences, tickets or certificates of competency.

Incidents include:	• accidents resulting in personal injury or damage to property
	• near misses or dangerous occurrences that do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence, for example:
	  • breathing apparatus malfunctioning to the extent that the user's health is in danger
	  • collapse of the floor, wall or ceiling of a building being used as a workplace
	  • collapse or failure of an excavation more than 1.5 metres deep (including any shoring)
	  • collapse or partial collapse of a building or structure
	  • collapse, overturning or failure of the load bearing of any scaffolding, lift, crane, hoist or mine-winding equipment
	  • damage to or malfunction of any other major plant
	  • electric shock
	  • electrical short circuit, malfunction or explosion
	  • uncontrolled explosion, fire or escape of gas, hazardous substance or steam
	  • any other unintended or uncontrolled incident or event arising from operations carried on at a workplace.

Australian government and state or territory OHS legislative requirements include:	• Australian standards • construction industry OHS standards and guidelines • duty of care • health and safety representatives, committees and supervisors • JSA and safe work method statements • licences, tickets or certificates of competency • National Code of Practice for Induction Training for Construction Work • national safety standards

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	• OHS and welfare Acts and regulations • safety codes of practice.
Information includes:	• diagrams or sketches • emergency situation contacts • evacuation plans • instructions issued by authorised organisational or external personnel • labels • manufacturer specifications and instructions • memos • MSDS • organisation work specifications and requirements • plans and specifications • regulatory and legislative requirements, such as Acts, regulations and codes of practice • relevant Australian standards • reports of near misses or accidents • safe work procedures or equivalent documentation • safety meeting minutes • signage • verbal or written and graphical instructions • work bulletins • work schedules.
Hazardous materials include:	• ACM • cleaning chemicals, including those in pressurised containers • glues • insulation materials • solvents • treated timber products.
Measures for controlling risk or minimising hazards in accordance with the hierarchy of control include:	• elimination • substitution • isolation • engineering control • administrative control • personal protective equipment.
Signs and symbols include:	• emergency information signs (exits, equipment, first aid) • fire signs (location of fire alarms and

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

	firefighting equipment) • hazard identification, facility or location signs • regulatory signs (e.g. prohibition, mandatory and limitation or restriction), such as hazard signs (danger and warning) • safety tags and lockout (danger tags, out of service tags) • site safety, directional, traffic and warning signs and symbols.
Asbestos-containing materials are identified:	• includes recognising common types of ACM that may be found in construction materials and buildings • covers asbestos rope/fabrics, asbestos cement sheeting, asbestos cement piping and lagging on pipes, bituminous waterproof membrane, fire doors, electrical switchboards, millboard, and sheeting under ceramic or vinyl floor tiles in wet areas.
Asbestos-containing materials are ***reported*** to:	• person in control of the workplace as set out in the relevant Asbestos Management Code.
Personal protective equipment is to include:	• aprons • arm guards • caps • dust mask/respirators • ear muffs/plugs • gloves • hard hats • high visibility retro reflective vests • jackets • overalls • safety glasses/goggles • steel capped boots • UV protective clothing and sunscreen.
Tools and equipment include:	• firefighting equipment • first aid kit • ladders and work platforms • personal protective equipment.
Materials include:	• first aid materials suitable for emergency first aid treatment of minor injuries.
Prohibited tools and equipment that cannot be used near identified	• high-speed abrasive power and pneumatic tolls, high pressure water cleaners, compressed

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT

ACM include:	air or abrasive blasting • any vacuum cleaning equipment not specifically designed for safe work with asbestos.
Environmental requirements are to cover workplace quality management and include:	• clean-up protection • stormwater protection • waste management.
Types of fire includes:	• electrical, chemical, gas, mechanical, paper, wood or natural fire.
Fire equipment includes:	• breathing apparatus • fire extinguishers • fire hydrant and hoses • fire reel • fire truck • manual firefighting instruments, such as fire blankets.
Emergency response and evacuation procedures include:	• emergencies, such as fire, toxic and/or flammable vapours emission, vehicle/mobile plant accident, structural collapse, chemical spill and injury to personnel • extinguishing fires, organisational first aid requirements and evacuation.

CPCCSF2003 Cut and bend materials using oxy-LPG equipment

Modification History

Release 1.

Supersedes and equivalent to CPCCSF2003A Cut and bend materials using oxy-LPG equipment.

The unit of competency was updated to the Standards for Training Packages 2012.

This version first released with CPC Construction, Plumbing and Services Training Package Version 4.0.

Application

This unit of competency specifies the skills and knowledge required to heat, cut and bend construction materials using oxy-LPG equipment.

It includes:

- planning and preparing for the work
- setting up and testing equipment
- cutting material
- heating and bending material
- shutting down equipment
- completing clean-up activities.

It also includes the use of oxy-LPG-acetylene equipment to cut and bend materials for steelfixing applications. It does not involve specialist welding techniques.

It applies to workers working alone or as a member of a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Unit Sector

Concreting

Elements and Performance Criteria

© Commonwealth of Australia, 2025 Industry Skills Australia

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Plan and prepare to cut and bend materials using oxy-LPG equipment.	1.1 Review and clarify task to cut and bend materials using oxy-LPG equipment. 1.2 Review task specifications and check to make sure they are in accordance with legislation, regulations and codes of practice. 1.3 Review work health and safety (WHS) requirements for the task in accordance with safety plans and policies. 1.4 Identify safety signage and barricade requirements. 1.5 Review environmental requirements for the task in accordance with environmental plans and legislative requirements. 1.6 Select plant, tools and equipment, check for serviceability and rectify or report any faults. 1.7 Calculate material quantity requirements. 1.8 Acquire materials for the task and locate them safely ready for use.
2. Set up and test oxy-LPG equipment.	2.1 Erect identified safety signage and barricades, and fit personal protective equipment (PPE). 2.2 Select appropriate fire extinguisher and locate it to be readily accessible prior to and during operations. 2.3 Attach regulators to oxy and acetylene bottles in accordance with manufacturers' specifications and WHS regulations. 2.4 Purge lines to manufacturers' specifications prior to lighting up. 2.5 Test equipment for leaks and either undertake corrective action or report faults. 2.6 Select appropriate pressures and cutting tips in accordance with material to be cut and manufacturers' specifications.
3. Cut material with oxy-LPG equipment.	3.1 Mark material accurately and secure or clamp ready for cutting. 3.2 Light torch in accordance with manufacturer's specifications. 3.3 Adjust setting of flame for cutting to manufacturers' specifications. 3.4 Adopt correct cutting position to set-out mark during cutting.
4. Heat and bend material using oxy-LPG equipment.	4.1 Mark material accurately and secure or clamp ready for bending. 4.2 Light torch in accordance with manufacturer's specifications.

© Commonwealth of Australia, 2025 Industry Skills Australia

	4.3 Apply heat to specified material and minimise weakening effects of the heating process. 4.4 Bend material to specification and cool appropriately.
5. Shut-down oxy-LPG equipment.	5.1 Switch off torch in accordance with manufacturers' specifications. 5.2 Shut off gas supply in accordance with manufacturers' specifications.
6. Clean up after cutting, heating and bending materials using oxy-LPG equipment.	6.1 Clear work area and dispose of, re-use or recycle materials in accordance with legislation, regulations, codes of practice and task requirements. 6.2 Clean, check, maintain and store plant, tools and equipment in accordance with manufacturers' specifications and workplace requirements.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

- oral communication skills to:
  - use questioning to identify and confirm requirements
  - discuss cause of problems
  - report work site hazards, including faults in tools, equipment and materials
  - provide feedback.

Unit Mapping Information

Supersedes and is equivalent to CPCCSF2003A Cut and bend materials using oxy-LPG equipment.

Assessment Requirements for CPCCSF2003 Cut and bend materials using oxy-LPG equipment

Modification History

Release 1.

Supersedes and equivalent to CPCCSF2003A Cut and bend materials using oxy-LPG equipment.

The unit of competency was updated to the Standards for Training Packages 2012.

This version first released with CPC Construction, Plumbing and Services Training Package Version 4.0.

Performance Evidence

To demonstrate competency in this unit, a person must use both oxy-acetylene and LPG systems to:

- cut to specification five bars with different sizes up to and including 36 mm
- heat and bend a minimum of three bars to specification including at least one 36 mm bar.

In doing this, the person must meet the performance criteria for this unit.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- jurisdictional work health and safety (WHS) and environmental legislation and regulations relating to cutting, heating and bending material using oxy-LPG equipment, including:
  - job safety analyses (JSAs)
  - safe work method statements (SWMSs)
  - safety data sheets (SDSs)
  - safety manuals and instructions for plant, tools and equipment
  - signage and barricades
  - personal protective equipment (PPE)
  - environmental and work site safety plans
- requirements of Australian Standards and the National Construction Code (NCC) relating to cutting, heating and bending material using oxy-LPG equipment
- workplace requirements for all aspects of cutting, heating and bending material using oxy-LPG equipment, including interpreting work orders and reporting problems
- interpretation of plans, drawings and specifications
- processes for the calculation of material requirements from specifications
- scope of work for cutting, heating and bending material using oxy-LPG equipment, including:

© Commonwealth of Australia, 2025 Industry Skills Australia

    - cutting up of waste for salvage
    - cutting reinforcement steel
    - cutting holes in plate
    - bending reinforcement steel
- types and properties of materials, including:
    - cutting consumables
    - deformed bars
    - mesh sheets of deformed bars
    - mesh sheets of plain bars
    - plain rods
- oxy acetylene and LPG heating and cutting equipment types, characteristics, uses and limitations and set-up and operating techniques, including for:
    - cylinders
    - regulators
    - gas tubing
    - cutting blowpipes
    - flint lighters
    - measuring tapes and rules
    - clamps and support stands
- types, characteristics, uses and limitations of tools, equipment and materials required for cutting, heating and bending material using oxy-LPG equipment, including:
    - safe operating procedures
    - operational, maintenance and basic diagnostic procedures
    - workplace and equipment safety requirements
- techniques for cutting, heating and bending material using oxy-LPG equipment
- quality requirements relevant to cutting, heating and bending material using oxy-LPG equipment
- processes, materials and equipment for cutting, heating and bending material using oxy-LPG equipment
- requirements for cleaning up work area and tools, materials storage and environmentally friendly waste management.

Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

© Commonwealth of Australia, 2025 Industry Skills Australia

- work sites and specifications for cutting, heating and bending tasks
- appropriate documents, materials, tools, equipment and PPE currently used in industry
- requirements of appropriate sections of legislation and regulations
- relevant workplace policies and procedures.

CPCCWHS1001 Prepare to work safely in the construction industry

Modification History

Release	Comment
Version 1	Replaces superseded equivalent CPCCOHS1001A Work safely in the construction industry.

Application

This unit of competency specifies the mandatory work health and safety training required prior to undertaking construction work. The unit requires the person to demonstrate personal awareness and knowledge of health and safety legislative requirements in order to work safely and prevent injury or harm to self and others. It covers identifying and orally reporting common construction hazards, understanding basic risk control measures, and identifying procedures for responding to potential incidents and emergencies. It also covers correctly selecting and fitting common personal protective equipment (PPE) used for construction work.

This unit meets the general construction induction training requirements of:

- Part 1.1 Definitions and Part 6.5 of the Model Work Health and Safety Regulations;
- Division 11 of Part 3 of the Occupational Safety and Health Regulations 1996 for Western Australia; and
- Division 3 of Part 5.1 of the Occupational Health and Safety Regulations 2007 for Victoria.

It is expected that site-specific induction training will be conducted prior to conducting construction work.

Licensing, legislative, regulatory or certification requirements apply to this unit. Relevant work health and safety state and territory regulatory authorities should be consulted to confirm jurisdictional requirements.

Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1.	Identify health and safety legislative requirements of construction work.	1.1. Basic roles, responsibilities and rights of duty holders are identified and explained according to ***jurisdictional health and safety legislative requirements***.
		1.2. Duty of care requirements are identified.
		1.3. Construction safe work practices are identified and explained.
2.	Identify construction hazards and risk control measures.	2.1. Basic principles of risk management are identified.
		2.2. Construction hazards are identified and discussed.
		2.3. Purpose and use of PPE are identified and demonstrated.
		2.4. Measures for controlling hazards are identified.
3.	Identify health and safety communication and reporting processes.	3.1. Health and safety documents are identified and discussed.
		3.2. Roles of designated health and safety personnel are identified and explained.
		3.3. Safety signs and symbols are identified and explained.
		3.4. Procedures for reporting hazards, incidents and injuries are identified.
4.	Identify incident and emergency response	4.1. Procedures for responding to incidents and emergencies are identified and explained.
		4.2. Procedures for accessing first aid are identified.

© Commonwealth of Australia, 2025 Industry Skills Australia

procedures.	4.3.	Types and purpose of fire safety equipment are identified and discussed.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Numeracy skills to:	• locate and recognise numbers commonly used in safety signs.
Oral communication skills to:	• ask questions to clarify instructions • listen to instructions to identify key safety information • tell another person about a construction problem or hazard.
Reading skills to:	• follow simple pictorial safety instructions • follow simple safety instructions that are written in English.
Problem-solving skills to:	• select risk control measures.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

Jurisdictional health and safety legislative requirements must include at least one of the following state and territory Acts or their equivalent:	• Australian Capital Territory: Work Health and Safety Act 2011 • New South Wales: Work Health and Safety Act 2011 • Northern Territory: Work Health and Safety (National Uniform Legislation) Act 2011 • Queensland: Work Health and Safety Act 2011 • South Australia: Work Health and Safety Act 2012 • Tasmania: Work Health and Safety Act 2012 • Victoria: Occupational Health and Safety Act 2004 • Western Australia: Occupational Safety and Health Act 1984.

Assessment Requirements for CPCCWHS1001 Prepare to work safely in the construction industry

Modification History

Release	Comment
Version 1	Replaces superseded equivalent CPCCOHS1001A Work safely in the construction industry.

Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills, and range of conditions of this unit, in addition to the specific performance and knowledge evidence described below.

The person must:

- identify and orally report two construction hazards
- orally explain how risk could be reduced or removed in relation to those two hazards
- select appropriate personal protective equipment (PPE) to control the risk
- orally explain basic procedures for responding to incidents and emergencies, including types and purpose of the following fire safety equipment:
  - fire blankets
  - fire extinguishers, including water, carbon dioxide, powder and foam
  - hose reels and mains
- identify and orally explain the meaning of required safety signs and symbols
- orally explain the purpose of job safety analyses (JSAs), safe work method statements (SWMS) and safety data sheets (SDS)
- orally explain the roles of the following designated health and safety personnel:
  - first aid officers
  - work health and safety representatives
  - work health and safety committee members
  - supervisors.

The person must also demonstrate correctly fitting to themselves the PPE listed below:

- eye protection
- hearing protection
- hard hat

© Commonwealth of Australia, 2025 Industry Skills Australia

- high visibility retro reflective vest.

Knowledge Evidence

A person must demonstrate knowledge of:

- basic duty of care, and the roles, rights and responsibilities of business owners and workers in relation to working safely while undertaking construction work
- basic meaning of the terms ‘hazard’ and ‘risk’
- basic principles of risk management, including the following five steps in order:
  - identify hazard
  - assess risk
  - consult and report
  - control hazard
  - review
- basic procedures for accessing first aid
- construction hazards, including those relating to:
  - asbestos
  - confined spaces
  - electrical: power lines, cords and equipment
  - excavations and trenches, including underground services
  - dust
  - falling objects
  - hazardous substances and dangerous goods
  - hot and cold work environments
  - manual handling
  - noise
  - plant and equipment operation
  - traffic and mobile plant
  - unplanned collapse
  - ultraviolet radiation
  - working at heights, including scaffolding
- construction work that requires a high risk work licence
- types, purpose and use of PPE used in construction, as specified in the performance evidence, and including safety footwear, harnesses and respiratory protection, and ultraviolet (UV) protective clothing and sunscreen
- construction emergencies, including:
  - chemical spill
  - fire
  - injury to personnel
  - structural collapse
  - toxic or flammable vapour emission

© Commonwealth of Australia, 2025 Industry Skills Australia

    - vehicle or mobile plant accident
- construction incidents, including:
    - incidents resulting in personal injury or damage to property
    - near misses or dangerous occurrences that do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence
- safe work practices that should be followed in construction work, including:
    - accessing and using site amenities for drinking water, hand washing and toilets
    - following safety procedures when performing work tasks and using equipment
    - identifying and reporting hazards, incidents and injuries in the workplace
    - keeping the work area clean, tidy and free from debris
    - not using or being affected by drugs and/or alcohol while at work
    - preventing bullying and harassment in the workplace
    - selecting and using required PPE
    - smoking only in designated areas
    - storing and removing waste and debris in designated areas
- meanings and symbols associated with construction safety signs, symbols and tags, including:
    - emergency information signs: exits, emergency equipment and first aid
    - fire signs: location of fire alarms and firefighting equipment
    - hazard signs and symbols: danger and warning
    - regulatory signs and symbols: prohibition, mandatory and limitation or restriction
    - safety and lockout tags: danger and out-of-service tags.

Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
    - all of the PPE listed in the performance evidence
- specifications:
    - state or territory Act relevant to the location of the learner, as specified in the range of conditions.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically and/or by an assessor observing the learner via audio and visual media in real time.

Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessors must hold the unit *CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry*, or its successor.

Links

Companion Volume implementation guides are found in VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Modification History

Release 1.

Supersedes and equivalent to CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry.

The unit of competency was updated to the Standards for Training Packages 2012.

This version first released with CPC Construction, Plumbing and Services Training Package Version 4.0.

Application

This unit specifies the outcomes required to carry out work health and safety (WHS) requirements through safe work practices in all on- or off-site construction workplaces.

It requires the performance of work in a safe manner through awareness of risks and work requirements, and the planning and performance of safe work practices with concern for personal safety and the safety of others.

The unit covers fundamental WHS requirements necessary to undertake work tasks within any sector in the construction industry. It includes the identification of hazardous materials, including asbestos, and compliance with legislated work safety practices. It does not cover removal of asbestos, which is a licensed activity.

It applies to workers in the construction industry.

This unit also relates directly to the general construction induction training requirements of the Model Work Health and Safety Regulations 2011 and relevant occupational health and safety regulations for Victoria and for Western Australia. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* covers these induction training requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Unit Sector

Elements and Performance Criteria

© Commonwealth of Australia, 2025 Industry Skills Australia

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Identify and assess risks.	1.1 Identify, assess and report hazards in the work area to designated personnel. 1.2 Report safety risks in the work area based on identified hazards, to designated personnel. 1.3 Follow safe work practices, duty of care requirements and safe work instructions for controlling risks. 1.4 Contribute to WHS, hazard, accident or incident reports in accordance with workplace procedures, Australian government and state or territory WHS legislation, and relevant information.
2. Identify hazardous materials and other hazards on work sites.	2.1 Correctly identify and, if appropriate, handle and use hazardous materials on a work site in accordance with legislative requirements, and workplace policies and procedures. 2.2 Apply measures for controlling risks and construction hazards effectively and immediately. 2.3 Use appropriate signs and symbols to secure hazardous materials that have safety implications for self and other workers, immediately they are identified. 2.4 Identify asbestos-containing materials on a work site and report to designated personnel.
3. Plan and prepare for safe work practices.	3.1 Identify, wear, correctly fit, use and store correct personal protective equipment and clothing for each area of construction work in accordance with workplace procedures 3.2 Select tools, equipment and materials, and organise tasks in conjunction with other personnel on site and in accordance with workplace procedures. 3.3 Determine required barricades and signage, and erect at the appropriate site location. 3.4 Apply material safety data sheets (MSDSs), job safety analyses (JSAs) and safe work method statements (SWMSs) relevant to the work to be performed.
4. Apply safe work practices.	4.1 Carry out tasks in a manner that is safe for operators, other personnel and the general community, in accordance with legislative requirements, and workplace policies and procedures. 4.2 Use plant and equipment guards in accordance with manufacturers' specifications, work site regulations and Australian Standards. 4.3 Follow procedures and report hazards, incidents and injuries

© Commonwealth of Australia, 2025 Industry Skills Australia

	to relevant authorities. 4.4 Recognise and do not use prohibited tools and equipment in areas containing identified asbestos. 4.5 Identify and follow requirements of work site safety signs and symbols. 4.6 Clear and maintain work site area to prevent and protect self and others from incidents and accidents, and to meet environmental requirements.
5. Follow emergency procedures.	5.1 Identify designated personnel in the event of an emergency for communication purposes. 5.2 Follow safe workplace procedures for dealing with accidents, fire and other emergencies, including identification and use, if appropriate, of fire equipment within scope of own responsibilities. 5.3 Describe, practice and effectively carry out emergency response and evacuation procedures when required. 5.4 Carry out emergency first aid treatment of minor injuries and, as soon as possible, accurately report treatment details to designated personnel.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry.

Assessment Requirements for CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Modification History

Release 1.

Supersedes and equivalent to CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry.

The unit of competency was updated to the Standards for Training Packages 2012.

This version first released with CPC Construction, Plumbing and Services Training Package Version 4.0.

Performance Evidence

To demonstrate competency in this unit, a person must apply WHS requirements, policies and procedures on three separate and different occasions in the construction industry.

In doing this, the person must meet the performance criteria for this unit.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- jurisdictional work health and safety (WHS) and environmental legislation and regulations
- workplace requirements for undertaking all aspects of applying WHS requirements, policies and procedures in the construction industry including interpreting work orders and reporting problems
- procedures and policies for identifying and reporting hazards, safety risks and hazardous materials, including asbestos, in the workplace
- procedures for following safe practices when dealing with hazards and hazardous materials, and controlling risks associated with them
- use of appropriate protective equipment and clothing, choice of tools, use of barricades and signage, and the necessity of following relevant safety procedures as indicated
- methods of safely performing tasks in accordance with legislative requirements and workplace policies and procedures
- procedures for reporting hazards, incidents and injuries
- necessity for keeping work site clear of risks to prevent accidents and to meet environmental requirements
- policies and procedures to be followed in an accident, fire or other type of emergency.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- appropriate documents, materials, tools, equipment and personal protective equipment currently used in industry
- requirements of appropriate sections of legislation and regulations
- relevant workplace policies and procedures.

CPPFES2005A Demonstrate first attack firefighting equipment

Modification History

Revised unit

Unit updated and equivalent to PRMPFES05B Use portable fire fighting equipment

Unit Descriptor

This unit of competency specifies the outcomes required to demonstrate the use of portable fire extinguishers, fire hose reels and fire blankets.

Application of the Unit

This unit of competency supports fire protection equipment service technicians responsible for demonstrating to customers how to interpret and follow manufacturers' instructions on various first attack firefighting equipment in emergency situations.

Licensing/Regulatory Information

Work in this area must be completed according to relevant legislative, industry, customer and organisational requirements, including occupational health and safety (OHS) policies and procedures.

Different states and territories may have regulatory mechanisms that apply to this unit. Candidates are advised to check for regulatory limitations.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

© Commonwealth of Australia, 2025 Industry Skills Australia

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Demonstrate correct use of portable fire extinguishers to extinguish simulated fires.	1.1	***Fire type*** and ***classification*** are determined.
		1.2	***Fire extinguishers*** are selected to attack different fires.
		1.3	Safe use of fire extinguishers is demonstrated according to manufacturers' instructions and relevant ***OHS and workplace policies and procedures***.
2	Demonstrate correct use of fire hose reels.	2.1	Safe use of ***hose reels*** is demonstrated according to manufacturers' instructions and relevant OHS and workplace policies and procedures.
		2.2	Water is turned off in the approved sequence and hose reel is checked for leaks.
		2.3	Hose reel is rewound correctly after use.
3	Demonstrate correct use of fire blanket.	3.1	Safe use of fire blankets is demonstrated according to manufacturers' instructions and relevant OHS and workplace policies and procedures.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- decision-making skills to select correct first attack firefighting equipment for different types of fires
- effective customer service
- language, literacy and numeracy skills to:
  - communicate with others in a clear and concise manner
  - read and comply with work instructions and specifications

© Commonwealth of Australia, 2025 Industry Skills Australia

- interpersonal skills to relate to people from a range of social and cultural backgrounds
- skills to work safely when:
  - applying recommended manufacturers' techniques for operating equipment and fire fighting
  - using firefighting equipment

Required knowledge

- basic methods of locating a fire
- correct use of fire extinguishers and hose reels on different classes of fire and implications of incorrect use
- how fire can be spread by conduction, convection, radiation and direct burning
- how water pressure influences the discharge distance for hose reels
- key actions in a fire emergency, commonly known by the acronym RACE:
  - rescue
  - activate alarm
  - confine fire
  - evacuate or extinguish
- meaning of secondary damage
- reasons for cooking oil and fat fires requiring special attention
- theory of fire, including the triangle of combustion
- types and operation of fire protection equipment classified as first attack equipment

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by practical demonstration, using simulated fire situations. Due to safety and cost factors, methods of extinguishing class D, E and F fires are confined to oral explanations and role play or simulations only. All practical demonstrations involving the use of simulated fires must adhere to the safety and environmental regulations relevant to each state or territory.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • select correct portable firefighting equipment for a particular type of fire

© Commonwealth of Australia, 2025 Industry Skills Australia

	• demonstrate the use of portable firefighting equipment • use portable firefighting equipment safely and correctly.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include: • actual or simulated work environment • portable firefighting equipment.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function, for example: • CPPFES2004A Identify types of installed fire safety equipment and systems • CPPFES2006A Prepare for installation and servicing operations.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

© Commonwealth of Australia, 2025 Industry Skills Australia

Fire types may include:	• combustible metals • cooking oils and fats • energised electrical equipment • flammable and combustible liquids • flammable gases • ordinary combustibles.
Classifications of fires include:	• classes A, B, C, D, E and F.
Fire extinguishers may include:	• carbon dioxide • foam • powder • vaporising liquid • water • wet chemical.

OHS and workplace policies and procedures may be located in quality assurance and/or procedures manuals relating to:	• appropriate techniques to use in relation to emergency management of fires
	• assessing work site for hazards and risks prior to preparing the work site for the work procedure
	• displaying signs and using barriers in the work area
	• OHS policies, procedures and programs, including:
	  • risk and hazard recognition
	  • emergency procedures
	  • awareness of electrical hazards
	  • following confined spaces procedures
	  • first aid
	• personnel practices and guidelines outlining work roles, responsibilities and delegations
	• safety procedures, including those for working safely:
	  • around electrical wiring, cables and overhead powerlines
	  • around tools and equipment
	  • on ladders and raised platforms
	• using personal protective equipment, including:
	  • safety glasses or goggles
	  • safety boots or shoes
	  • hard hats
	  • earmuffs or plugs.

Hose reel types may be:	• swing-hinged • vehicle-mounted • wall-mounted.

CPPSEC5001A Establish and maintain an Occupational Health and Safety system

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit of competency specifies the outcomes required to manage an Occupational Health and Safety (OHS) system to ensure compliance with legislative requirements relating to security operations. It requires the ability to establish policies and procedures for the implementation of OHS in the workplace ensuring ongoing consultative processes. It also requires an ability to evaluate the effectiveness of the OHS system to identify procedural improvements.

This unit may form part of the licensing requirements for persons engaged in security operations in those states and territories where these are regulated activities.

Application of the Unit

Application of the unit

This unit of competency has wide application in a range of managerial roles in the security industry. Work is performed under minimal supervision and competency requires a high level of judgement and decision-making. The knowledge and skills described in this unit are to be applied within relevant legislative and organisational guidelines.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Establish an OHS system.	1.1 ***OHS system*** is developed which clearly states commitment to OHS and compliance with ***legislative requirements***.
	1.2 ***OHS roles and responsibilities*** for all employees are defined.
	1.3 Financial and human resources for the effective operation of the OHS system are established and implemented.
	1.4 OHS induction and ***training program*** is developed and made available to all employees.
	1.5 System for ***OHS record keeping*** is established and maintained to allow identification of ***hazard***, ***risk*** and injury patterns.
	1.6 ***OHS information and procedures*** are communicated and explained to all employees in an accessible format in accordance with legislative requirements.
2 Establish participative arrangements for OHS.	2.1 ***Consultative processes*** are established and maintained to ensure maximum OHS vigilance and compliance of all employees.
	2.2 OHS issues raised through participation and consultation are acknowledged and resolved promptly.
	2.3 Feedback from OHS consultation and any changes to procedures are ***recorded*** and communicated promptly to all employees.

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
3 Establish procedures for managing hazards and risks.	3.1 Procedures for ***identifying hazards*** and ***managing risks*** are developed in accordance with legislative requirements. 3.2 Hazard identification is addressed at the planning, design and evaluation stages of any change in workplace to ensure new hazards are not created. 3.3 Procedures for selection and implementation of risk control measures in accordance with the hierarchy of control are developed and maintained. 3.4 Inadequacies in procedures for hazard identification and risk control are identified and new measures promptly established.
4 Evaluate system effectiveness.	4.1 Evaluation of the OHS system is undertaken using ***verifiable evidence***. 4.2 Improvements to the OHS system are developed and implemented to achieve organisational OHS objectives. 4.3 Compliance with the OHS legislative framework is continually assessed to ensure that legal obligations are met. 4.4 All OHS documentation is maintained in accordance with legislative requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge and their level required for this unit.

Required skills

- access and use workplace information
- active listening
- adapt personal communication style to a variety of situations
- analyse and evaluate information and data
- coaching and mentoring to provide support to colleagues
- communicate in a clear and concise manner
- consultation
- effectively work with teams and individuals
- negotiation
- numeracy skill to calculate resources and costings
- planning

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- reading to interpret complex information
- relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- research, analyse and interpret information from a variety of people and reporting
- solve problems to deal with complex and non routine difficulties
- use a range of communications equipment
- use technology to research, analyse and report information
- writing to develop complex reports.

Required knowledge

- applicable OHS licensing and legislative compliance requirements
- application of the hierarchy of control
- approved communication terminology and call signs
- available support agencies and the types of services offered
- difference between negative and positive language
- differences between written and spoken English
- how to read and use body language to gain confidence of others
- how to record information which may be used for legal purposes
- how to safeguard confidential information
- how to use business equipment to present information
- intervention points for expert OHS advice
- negotiation techniques
- non conformance reporting requirements
- OHS implications relating to use of guard dogs, apprehension or arrest of persons, use of firearms, use of restraints, handcuffs, batons and spray
- organisational standards for the presentation and maintenance of written information
- power plays and how they are used in conflict situations
- principles and practices of effective OHS management
- principles and techniques associated with modelling safe work practices, hazard identification and risk management
- principles of AS/NZS 4360: 2004 Risk management
- tactical response measures
- use of force guidelines.

Evidence Guide

EVIDENCE GUIDE

© Commonwealth of Australia, 2025 Industry Skills Australia

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of:

- managing organisational compliance with applicable OHS legislation and licensing, and implementing consultative arrangements to ensure individual and team OHS awareness and compliance
- developing a comprehensive OHS system which maximises implementation of OHS policies and procedures
- conducting an evaluation of the OHS system and using the findings together with consultation processes as the basis for implementing improvements
- establishing systems for ensuring OHS records and information meet legal compliance requirements.

Context of and specific resources for assessment

Context of assessment includes:

- a setting in the workplace or environment that simulates the conditions of performance described in the elements, performance criteria and range statement.

Resource implications for assessment include:

- access to a registered provider of assessment services
- access to a suitable venue and equipment
- access to plain English version of relevant statutes and procedures
- assessment instruments including personal planner and assessment record book
- work schedules, organisational policies and duty statements.

Reasonable adjustments must be made to assessment processes where required for people with disabilities. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

This unit of competency should be assessed using questioning of underpinning knowledge and skills.

Guidance information for assessment

Assessment processes and techniques must be culturally appropriate and suitable to the language, literacy and numeracy capacity of the candidate and the competency being assessed. In all cases where practical assessment is used, it should be combined with targeted questioning to assess the underpinning knowledge.

Oral questioning or written assessment may be used to assess underpinning knowledge. In assessment situations where the

© Commonwealth of Australia, 2025 Industry Skills Australia

candidate is offered a choice between oral questioning and written assessment, questions are to be identical.

Supplementary evidence may be obtained from relevant authenticated correspondence from existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

OHS system may include:

- counter terrorism
- designated OHS personnel and committees
- designing safe operations and systems of work
- duty of care requirements
- emergency and evacuation policies and procedures
- incorporation of expert OHS advice as required
- injury management and workers compensation
- issue resolution and conflict negotiation processes
- mechanisms for obtaining updated information (eg health effects of hazards, technical developments in risk control, changes to legislation, security alerts and industry trends)
- mechanisms for updating OHS policies and procedures
- planning and implementing changes to security operations and tactical response strategies
- procedures for maintenance and storage of equipment and weapons
- procedures for purchasing of materials and equipment
- procedures, timeframes and accountabilities for reporting OHS issues
- provision of counselling and stress management processes
- provision of OHS information and training
- provisions for first aid equipment and response
- restraint and apprehension of persons
- security licensing requirements
- system for communicating OHS information to

© Commonwealth of Australia, 2025 Industry Skills Australia

	individuals and teams • use of firearms, handcuffs, batons and spray • use of force guidelines.
Legislative requirements may relate to:	• anti-discrimination and diversity • Australian standards, codes of practice and regulations • award and enterprise agreements • duty of care • evidence collection • licensing arrangements and certification requirements • OHS issue resolution • relevant commonwealth, state and territory OHS legislation, codes of practice and regulations • roles and responsibilities of OHS representatives and committees • trade practices • use of force.
***OHS roles and responsibilities* may include**:	• fire wardens • first aid officers • general duty of care • OHS chain of command • OHS committee representatives • OHS officers • safe workplace practices.
***Training program* may include**:	• allocation of resources for training including acquisition, purchase of training services, development of staff training skills • group discussions to enhance safety awareness • handouts or information sheets • OHS induction training • ongoing assessment of individual and team training needs • specific courses.
***OHS record keeping* may relate to**:	• audit and inspection reports • consultation processes (eg OHS Committee meeting papers) • equipment maintenance and testing reports • first aid or medical post records • hazardous substances register • identifying records required under OHS legislation (eg, major accident and injury notifications, certificates, licenses, dangerous goods storage register) • manufacturer and supplier information relating to security equipment • records of induction, instruction and training

© Commonwealth of Australia, 2025 Industry Skills Australia

- workers compensation and rehabilitation records
- workplace environmental monitoring records.

Hazard relates to:

- any thing (including an intrinsic property of a thing) or situation with the potential to cause injury or harm.

***Risk* relates to**:

- the chance of something happening that will have an impact on objectives.

***Security risks* may include**:

- biological hazards
- chemical spills
- electrical faults
- explosives
- injury to personnel
- noise, light, heat, smoke
- persons carrying weapons
- persons causing a public nuisance
- persons demonstrating suspicious behaviour
- persons suffering from emotional or physical distress
- persons under the influence of intoxicating substances
- persons with criminal intent
- persons, vehicles and equipment in unsuitable locations
- suspicious packages or substances
- terrorism
- violence or physical threats.

***OHS information and procedures* may relate to**:

- application of organisational OHS policies and procedures
- back-up
- compliance with applicable legislation, standards and regulations related to OHS
- current security industry risks and alerts
- identified hazards
- outcomes of risk assessment and control processes
- procedures for evacuation, application of first aid and emergency response
- processes for raising OHS issues
- tactical response
- up-to-date OHS issues and industry safety trends
- use of force
- use of restraints, handcuffs, batons, spray and firearms.

Consultative processes may include:

- establishment and use of OHS committees and other committees
- establishment and use of OHS representatives and first aid officers
- involvement of individuals and teams in OHS management activities (eg OHS inspections, audits, environmental monitoring, risk assessment and control,

© Commonwealth of Australia, 2025 Industry Skills Australia

	emergency simulations) • mechanisms for employees to raise OHS issues • provision of regular OHS bulletins, notices and information.
***OHS records* may relate to**:	• first aid and medical post records • hazardous substances registers • health surveillance and monitoring of work environment • identified hazards and risks • industry warnings and security alerts • maintenance and testing reports • manufacturer and supplier information, including materials safety data sheets and dangerous goods storage lists • OHS audits and inspections • OHS instruction and training • OHS issues which have been raised and reported • reports of accidents and injury • workers compensation and rehabilitation records.
Procedures for identifying hazards may include:	• consultation • continuous monitoring of work environment • debrief and review of security incidents • regular informal and informal discussions with colleagues • regular inspections of equipment and work area • review of OHS records.
***Managing risks* may involve**:	• application of the hierarchy of control • complying with safe operating procedures for equipment • correct selection, use, storage and maintenance of Personal Protective Equipment (PPE) • evacuation • maintaining vigilance, awareness and observation in the work environment • OHS communication and reporting • requests for back-up support or instructions • safe lifting and manual handling • security of documents, cash, equipment and persons • use of fire safety equipment • use of reasonable force.
***Verifiable evidence* may include**:	• auditable documentation and reports • employee and client questionnaires • number of hazards, accidents, injuries or near misses • quality assurance data • records of complaints and actions taken for resolution.

CPPWMT3003 Identify and respond to hazards and emergencies in waste management

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 10.0.

Supersedes but is not equivalent to:

- CPPWMT3011A Respond to waste emergencies.
- CPPWMT3044A Identify wastes and hazards.

Application

This unit specifies the skills and knowledge required to identify, control and report hazards and risks, and recognise and respond to emergencies at a waste management site ensuring compliance with legal responsibilities. It includes implementing and monitoring emergency response procedures involving evacuation, isolation and containment, and communicating with others to convey emergency information, and to receive and follow instructions to assist the response. It also includes assisting site clean-up and documenting emergency and response details.

This unit does not cover emergencies involving vehicle contact with overhead wires.

A person who achieves this unit of competency is expected to take responsibility for completing these tasks with a high degree of self-direction.

No licensing, legislative or certification requirements apply to this unit of competency at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Waste management

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1 Prepare to work safely	1.1 Review workplace policies and procedures to understand

© Commonwealth of Australia, 2025 Industry Skills Australia

	in waste management.		and comply with work health and safety (WHS) requirements.
		1.2	Review emergency procedures and site management plan to locate alarms, and emergency and communications equipment.
2	Identify and control hazards and risks.	2.1	Select, check and use required personal protective equipment.
		2.2	Identify, record and report hazards and risks present in the workplace according to WHS requirements.
		2.3	Implement controls to mitigate identified hazards and risks following workplace policies and procedures and safety data sheets.
		2.4	Consult with relevant persons to discuss identified hazards and risks and safe work practices to mitigate risks.
3	Recognise and respond to emergency.	3.1	Recognise emergency in waste management operations.
		3.2	Assess nature and severity of emergency and waste types involved and promptly report to relevant persons.
		3.3	Implement emergency response procedures to contain and isolate emergency and minimise danger to people, property and the environment according to WHS requirements.
		3.4	Monitor and continuously assess risk from emergency and modify controls to respond to changing circumstances.
		3.5	Communicate with relevant persons to convey emergency information and receive and follow instructions to assist emergency response.
		3.6	Comply with workplace policies and procedures to protect organisational interests associated with emergency.
4	Finalise emergency	4.1	Support emergency site clean-up to remove waste,

© Commonwealth of Australia, 2025 Industry Skills Australia

response.		contamination, equipment and hazards according to WHS requirements.
	4.2	Clean, check and store PPE and report damaged or faulty equipment.
	4.3	Document full details of emergency and response according to workplace requirements.
	4.4	Participate in review of emergency according to workplace requirements.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes but is not equivalent to:

- CPPWMT3011A Respond to waste emergencies.
- CPPWMT3044A Identify wastes and hazards.

Assessment Requirements for CPPWMT3003 Identify and respond to hazards and emergencies in waste management

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 10.0.

Supersedes but is not equivalent to:

- CPPWMT3011A Respond to waste emergencies.
- CPPWMT3044A Identify wastes and hazards.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- identifying and controlling six different hazards at a waste management site
- identifying and responding to two different types of emergencies associated with waste management operations, selected from the following:
  - chemical reaction
  - contamination
  - fire
  - gas leak
  - medical waste
  - spillage of solvents and liquid waste.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- identification signage used for regulated or prescribed waste including hazardous class, HAZCHEM codes and dangerous goods
- legislative and procedural requirements applicable to identifying hazards and responding to emergencies in waste management:
  - commonwealth, state or territory legislation, regulations, codes of practice and standards including work health and safety (WHS)
  - classifications of dangerous goods and hazardous substances
  - duty of care
  - incident notification
  - licensing
  - recordkeeping

© Commonwealth of Australia, 2025 Industry Skills Australia

- procedures for communicating with emergency services personnel during emergency response
- types of emergencies in waste management and associated response procedures:
  - chemical reaction
  - contamination
  - fire
  - gas leak
  - medical waste
  - spillage of solvents and liquid waste
- typical hazards in a waste management workplace and the harm they may cause to people, property and the environment
- waste types, including dangerous goods and hazardous materials
- workplace policies and procedures for WHS and emergency response:
  - communication, consultation and participation
  - documentation and reporting including hazard and incident notification
  - emergency containment and isolation
  - evacuation
  - hazard identification and control using the hierarchy of control
  - injury, dangerous occurrence and incident response and reporting
  - plant and equipment shutdown and isolation
  - personal protective equipment
  - risk assessment and management:
    - principles and purpose of risk management
    - processes for conducting risk assessment
    - hazard identification by job, analysis and work site inspections
    - recording hazards and risk assessments
  - signalling techniques.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to workplace policies and procedures, WHS information and documentation, waste, equipment and hazard and emergency scenarios required to achieve the performance evidence.

CPPWMT3006 Receive, transfer and dispatch waste

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 10.0.

Supersedes but is not equivalent to:

- CPPWMT3013A Receive waste.
- CPPWMT3015A Move waste using loadshifting equipment.
- CPPWMT3018A Dispatch processed waste.

Application

This unit specifies the skills and knowledge required to receive waste, operate load-shifting equipment to load, move and unload waste, and dispatch waste for transport to another site. It includes monitoring waste receipt, organising equipment, loading and unloading methods suitable for waste types and site conditions and performing operational checks, start-up, park and shut-down procedures. It also includes scheduling waste dispatch activities and monitoring waste movement and containment to ensure safety and regulatory compliance.

A person who achieves this unit of competency is expected to take responsibility for completing these tasks with a high degree of self-direction.

This unit forms part of the licensing requirements for operating vehicles, plant and equipment used in waste management. For further information, check with the relevant regulatory authority.

Pre-requisite Unit

Nil.

Unit Sector

Waste management

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1 Prepare to receive, transfer and dispatch	1.1 Review job schedule to confirm work activities for receiving, transferring and dispatching waste and clarify

© Commonwealth of Australia, 2025 Industry Skills Australia

waste.		issues with relevant persons.
	1.2	Review workplace policies and procedures and work health and safety (WHS) requirements for waste transfer and dispatch and apply to work tasks.
	1.3	Schedule waste receipt, transfer and dispatch according to workplace requirements.
	1.4	Organise load-shifting equipment and attachments and personnel required to safely and efficiently transfer and dispatch waste according to workplace requirements.
	1.5	Select, check and use personal protective equipment appropriate for work activities.
	1.6	Identify hazards and risks associated with work activities and implement required controls according to workplace WHS requirements.
2 Receive and unload waste.	2.1	Screen waste types being delivered to confirm match to documentation.
	2.2	Measure and record received waste according to workplace and regulatory requirements.
	2.3	Use signalling and instructions to direct waste provider to designated unloading site.
	2.4	Monitor unloading location to ensure adequate storage capacity and that waste is contained within designated area.
	2.5	Take load sample according to workplace and regulatory requirements.
3 Check and operate load-shifting equipment.	3.1	Conduct pre-start, start-up, park and shutdown procedures following manufacturer instructions.
	3.2	Safely operate and drive load-shifting equipment and modify operating techniques to respond to changing conditions in the work area.
	3.3	Continuously monitor work area and maintain communication with others while operating load-shifting equipment to ensure safety of people and property.

© Commonwealth of Australia, 2025 Industry Skills Australia

4 Load, move and unload waste.	4.1	Check waste type and weight to select required loading and unloading methods and ensure load is within safe operational capacity of load-shifting equipment.
	4.2	Fit required load-shifting attachments according to manufacturer instructions and workplace requirements.
	4.3	Safely load waste using required methods and regulate liquid flow where waste is vacuumed to maintain constant hose pressure.
	4.4	Move load to designated unloading location while maintaining constant visual monitoring to ensure waste containment and identify potential hazards.
	4.5	Safely unload waste in designated unloading area using required methods and regulate liquid flow where waste is vacuumed to maintain constant hose pressure.
	4.6	Store waste at destination according to workplace requirements.
	4.7	Park, shut-down and secure load-shifting equipment and attachments in a safe location to avoid damage to equipment and obstruction of surrounding site activity.
5 Dispatch waste.	5.1	Use signalling and oral instructions to assist safe and efficient waste loading onto dispatch vehicle.
	5.2	Monitor loading site to ensure compliance with loading instructions, waste containment and adequate space for loading.
	5.3	Measure and record regulated or prescribed waste and display required waste identification signage according to regulatory requirements.
	5.4	Check to ensure waste is contained and secure and that load weight is within safe operational capacity of dispatch vehicle according to regulatory requirements.
6 Finalise work tasks and complete	6.1	Clean load-shifting equipment, attachments and work area to remove debris and contamination.

© Commonwealth of Australia, 2025 Industry Skills Australia

documentation.

6.2 Conduct service checks of load-shifting equipment following manufacturer and workplace requirements and resolve or report problems.

6.3 Complete workplace documentation detailing waste movement and dispatch according to workplace and regulatory requirements.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- numeracy skills to calculate load volumes [cubic metre (m^3)] and weights [kilogram (kg), tonne (t)].

Unit Mapping Information

Supersedes but is not equivalent to:

- CPPWMT3013A Receive waste.
- CPPWMT3015A Move waste using loadshifting equipment.
- CPPWMT3018A Dispatch processed waste.

Links

Assessment Requirements for CPPWMT3006 Receive, transfer and dispatch waste

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 10.0.

Supersedes but is not equivalent to:

- CPPWMT3013A Receive waste.
- CPPWMT3015A Move waste using loadshifting equipment.
- CPPWMT3018A Dispatch processed waste.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by receiving, transferring and dispatching waste on two separate occasions.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- legislative and procedural requirements applicable to receiving, transferring and dispatching waste and relevant to the workplace:
  - commonwealth, state and territory legislation and regulations in the state or territory of operation, including work health and safety (WHS)
  - chain of responsibility requirements
  - duty of care
  - environmental protection
  - load restraint requirements
  - licence requirements
- methods for checking the integrity of waste containment
- methods for sampling waste loads
- pre-operational checks, start-up and shutdown procedures for plant and equipment used to receive, transfer and dispatch waste
- signage and transport requirements for regulated or prescribed waste
- types of load-shifting and attachments and methods used to load, move and unload different types of waste
- typical hazards encountered when using load-shifting equipment to load, move and unload waste, including hazardous substances and dangerous goods
- waste types

© Commonwealth of Australia, 2025 Industry Skills Australia

- workplace policies and procedures for receiving, transferring and dispatching waste:
  - documentation and reporting
  - load-shifting equipment operation and maintenance
  - waste receipt schedules
  - WHS:
    - hazard identification, risk assessment and control using the hierarchy of control
    - injury, dangerous occurrence and incident reporting
    - personal protective equipment
  - signalling techniques and communication processes required to maintain safety while operating load-shifting equipment.
  -

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to workplace policies and procedures, job and waste receipt schedules, documentation, manufacturer instructions, load-shifting equipment and attachments, dispatch vehicle and waste required to achieve the performance evidence.

CPPWMT3011A Respond to waste emergencies

Modification History

Revised unit

Unit updated and equivalent to PRMWM11B Respond to waste emergency

Unit Descriptor

This unit of competency specifies the outcomes required to respond to a range of emergencies which may occur in the management of waste. It requires the ability to act quickly in a methodical and calm manner.

Application of the Unit

This unit of competency supports individuals with responsibilities for conducting waste management activity. It includes contributing to the implementation of developed operational procedures, as well as recognising the need for expert advice.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Industry Skills Australia

Elements and Performance Criteria

1	Identify nature of emergency.	1.1	Details of the nature, type and severity of the ***emergency*** are identified, including ***waste types*** involved and existing and potential hazards and risks.
		1.2	Emergency is reported to supervisor or team leader according to ***organisational requirements*** and ***relevant legislation and codes***.
2	Prepare to respond to emergency.	2.1	***Potential hazards and risks*** are incorporated into emergency response action.
		2.2	***Emergency response action or procedures*** are followed according to organisational requirements and relevant legislation.
		2.3	Full details of emergency are communicated to ***relevant parties***.
		2.4	***Emergency and personal protective equipment*** is used safely and efficiently according to manufacturer specifications and organisational occupational health and safety (OHS) requirements.
		2.5	***Containment and isolation*** of emergency situation are conducted where possible to minimise danger to surrounding equipment, area, environment, other personnel and general public.
		2.6	Risks to personnel are avoided and ***evacuation procedures*** are followed according to organisational requirements.
		2.7	Necessary actions to ***protect organisational interests*** are taken according to organisational requirements.
3	Review emergency response.	3.1	Emergency response actions are monitored and evaluated continuously and modifications are made to response actions to reduce the impact of the emergency.
		3.2	Emergency situation is controlled until formal relief is notified or received, according to organisational requirements, OHS standards and relevant legislation.

© Commonwealth of Australia, 2025 Industry Skills Australia

4	Assist with clean-up	4.1	***Clean-up*** to remove waste, ***contamination***, equipment and hazards from the emergency site is conducted according to organisational, legislative and OHS requirements.
		4.2	***Regulated waste identification signage*** is updated as required.
5	Record and report emergency	5.1	Full details of emergency situation and response actions are ***recorded*** according to organisational requirements and relevant legislation.
		5.2	Emergency situation and response actions are reported to appropriate personnel according to organisational requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- emergency expertise to facilitate:
  - waste assessment
  - isolation procedures, including bunding and erecting barriers
  - selection of equipment
  - quality control inspection
- interpersonal skills to work in a team environment
- oral communication skills to:
  - ask questions
  - follow instructions
  - give clear information
  - listen effectively
- reading skills to:
  - interpret emergency requirements
  - follow emergency procedure guidelines
  - read graduated devices
  - interpret work requirements and material safety data sheets (MSDS)

© Commonwealth of Australia, 2025 Industry Skills Australia

- problem-solving skills to:
  - identify hazards and risks
  - identify waste types, including regulated waste and waste non-conformance
  - resolve pressure situations in a prompt, calm manner
- self-management skills to:
  - conduct work practices safely and efficiently
  - handle waste non-conformances
  - prioritise duties
  - use emergency and personal protective equipment (PPE)
- written communication skills for:
  - documentation, including emergency incident report
  - record keeping

Required knowledge

- emergency response procedures, including:
  - confined space procedures
  - HAZCHEM identification systems
  - methods of containment and isolation of emergencies
  - site management plan and identification of work areas, including location of:
    - alarms
    - emergency equipment
    - communications equipment
  - coding systems
  - reporting requirements
  - signalling techniques
  - standard emergency procedures
- identification of:
  - waste types, streams and characteristics
  - waste non-conformances
  - waste non-conformance procedures
  - waste recovery routes
- procedures for containing segregated waste types, including containment and isolation of hazardous waste
- emergency waste management processes to facilitate:
  - identification of plant and equipment
  - operation of plant and equipment
  - cleaning and maintenance of plant and equipment
  - recycling activity
- OHS requirements relating to:
  - chemical storage and decanting

© Commonwealth of Australia, 2025 Industry Skills Australia

  - dangerous goods and hazardous substances
  - OHS hierarchy of control
  - basic first aid appropriate to likely hazards and risks in work environment
- potential hazards and risks relating to:
  - dangerous goods
  - potential incidents
  - waste containment and segregation techniques
  - emergency response procedures
- service requirements, including:
  - client requirements
  - duty of care
  - organisational requirements
  - reporting requirements
  - waste management options
  - waste management hierarchy
  - waste containment and disposal techniques

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observation of practical demonstration in the workplace or in a simulated environment.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • identify emergencies • follow OHS and emergency procedures • act quickly and implement required processes to overcome emergencies • document actions.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include:

© Commonwealth of Australia, 2025 Industry Skills Australia

	• work plans and approved specifications • forms and procedures manuals.
Method of assessment	The process of responding to a waste emergency must comply with industry expectations in the particular client environment. If the environment is narrowly defined or is not representative of industry needs, it may be necessary to refer to portfolio case studies to assess competency in responding to a waste emergency. Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function, for example: • CPPCMN3001B Participate in environmentally sustainable work practices • CPPCMN3003A Contribute to workplace safety arrangements.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Emergency may include:	• chemical reaction • contamination

© Commonwealth of Australia, 2025 Industry Skills Australia

	• fire • gas leak • hazardous waste spill • fallen powerlines.
Waste types may include:	• solid (non-hazardous), e.g. construction and demolition • liquid (non-hazardous), e.g. chemical and aqueous • hazardous – regulated, prescribed, quarantined, medical and clinical • recoverable resources, e.g. recyclable and green waste.
Organisational requirements may include information found in:	• briefing papers • job sheets • letters • memos • operations manuals • quality assurance documents • tender and contract documents • verbal or written instructions • work procedures.

Legislation and codes may include:	• codes, including:
	  • Australian Code for the Transport of Dangerous Goods by Road and Rail
	  • industry
	• commonwealth, state and territory legislation, including:
	  • anti-discrimination
	  • environmental protection
	  • equal employment opportunity
	  • freedom of information
	  • industrial
	  • OHS
	  • trade practices
	• road laws.

Potential hazards and risks are those identified by the organisation that may lead to:	• damage to plant, vehicle or property • harm to the environment • illness or injury to employees, contractors or the public • injuries resulting from manual handling and repetitive work.
Potential hazards and risks may include:	• broken glass • broken metal • compaction equipment • contamination • dust • fire

© Commonwealth of Australia, 2025 Industry Skills Australia

	• gases and fumes • hazardous waste (e.g. sharps) • narrow driveways • other vehicles and equipment • overhanging signs • projectiles • spark-producing equipment • unguarded conveyor belts • weather.
Emergency response action or procedures may include:	• cleaning up • containing emergency • isolating or shutting down equipment or plant • evacuation • first aid • making site safe • notifying authorities • using PPE.
Relevant parties may include:	• emergency services • other affected parties • organisational personnel • environmental protection agencies.
Emergency and personal protective equipment must include:	• communications equipment • eye protection, such as goggles and protective glasses • eyewash kit • fire extinguishers • first aid kit • footwear • hearing protection • MSDS • spill kit • oil absorbent materials • overalls and protective clothing.
Emergency and personal protective equipment could also include:	• breathing apparatus • emergency procedure guides • face shield or mask • gloves • hard hats.
Personal protective equipment must be:	• cleaned and fitted according to organisational requirements, manufacturer specifications and OHS requirements • worn when required according to organisational requirements • stored according to organisational requirements.

© Commonwealth of Australia, 2025 Industry Skills Australia

Containment and isolation may include:	• bunding area • erecting barricades • moving vehicle or equipment away from hazardous area • sealing leaks • transferring waste • turning off electricity and gas • using fire extinguishers • water-hosing.
Evacuation procedures may be found in:	• emergency procedures manuals • OHS requirements • organisational requirements • legislation and codes.
Protecting organisational interests may include:	• collecting details from witnesses • not commenting or admitting liability • not talking to media.
Clean-up may include:	• removing equipment, plant and vehicle from site • removing and disposing of contaminated soil and liquid • shovelling • sweeping out • using cleaning products • using high pressure water or air-hosing • vacuuming.
Contamination may include:	• exposure to sunlight • infestation • mixing with other waste types • rot or mould • waterlogging.
Regulated waste identification signage may include**:**	• classification of dangerous goods • communications equipment • first aid • hazardous class • HAZCHEM codes • packaging group number.

Recorded includes:	• authorities notified
	• cause or suspected cause of emergency
	• damage incurred to:
	  • general public
	  • equipment
	  • personnel
	  • vehicle
	• emergency and personal protective equipment used

© Commonwealth of Australia, 2025 Industry Skills Australia

	• emergency response procedures undertaken • nature of clean-up • nature, type, source and severity of emergency • recommendations for preventing future emergencies • regulatory authority requirements.

CPPWMT3015A Move waste using loadshifting equipment

Modification History

Revised unit

Unit updated and equivalent to PRMWM15B Move waste using load shifting equipment

Unit Descriptor

This unit of competency specifies the outcomes required to operate a mobile plant for loading and unloading waste. It requires the ability to organise the activity and apply safe work practices.

Application of the Unit

This unit of competency supports individuals with responsibilities for managing waste during loadshifting. It includes contributing to the implementation of developed operational procedures, as well as recognising the need for expert advice.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Industry Skills Australia

Elements and Performance Criteria

1	Prepare for loadshifting.	1.1	***Job sheet and schedule*** are reviewed to identify job requirements.
		1.2	***Loadshifting equipment***, associated attachments and ***emergency and personal protective equipment*** (PPE) are selected according to job requirements to maximise efficiency and effectiveness of transportation.
		1.3	Operator's licence is inspected to ensure it complies with ***organisational requirements*** and ***relevant legislation and codes***.
		1.4	***Potential hazards and risks*** to work are identified and handled according to organisational ***emergency response action or procedures***, and occupational health and safety (OHS) regulations and other relevant legislation and codes.
2	Perform routine checks on loadshifting equipment.	2.1	Visual check of equipment is conducted to pinpoint damage, leaks, obstructions, component wear or potential hazards.
		2.2	Equipment systems are tested to ensure that they comply with manufacturer specifications and organisational requirements.
		2.3	Service checks are conducted in compliance with manufacturer specifications to ensure water, oil, fuel, air pressure and greasing are maintained at designated levels.
		2.4	Emergency and personal protective equipment is checked to ensure it is functioning adequately.
		2.5	Associated equipment is checked to ensure that it is operational and complies with manufacturer specifications.
3	Operate loadshifting	3.1	Equipment is operated and driven in a safe and efficient manner, according to organisational requirements, road

© Commonwealth of Australia, 2025 Industry Skills Australia

	equipment.		and traffic regulations, and other legislation and codes.
		3.2	Surrounding environment is continuously observed to identify and avoid or minimise potential hazards.
		3.3	Clear communication with ***relevant personnel*** is maintained.
4	Organise for loading.	4.1	Waste to be loaded and checked is identified to ensure ***integrity of containment***.
		4.2	***Loading method*** is determined according to waste containment type and organisational requirements.
		4.3	Equipment is parked or set up in a loading position that ensures efficiency and safety of loading.
		4.4	Barriers and warning signs are erected at loading and unloading sites to ensure safety of surrounding personnel according to organisational requirements and relevant legislation.
5	Load and move waste.	5.1	Waste is loaded safely and efficiently according to ***waste type*** in designated area using an approved loading method to maintain integrity.
		5.2	Liquid flow where waste is vacuumed is regulated to ensure maintenance of constant hose pressure.
		5.3	Waste is moved safely and securely according to organisational requirements, manufacturer specifications and relevant legislation and codes.
		5.4	Visual checks are maintained to identify and remedy potential hazards.
		5.5	Load is checked to ensure it conforms to equipment capacity requirements, manufacturer specifications and relevant legislation and codes.
6	Unload waste.	6.1	Waste is unloaded safely and efficiently according to waste type, in designated area using an approved unloading method to maintain integrity.

© Commonwealth of Australia, 2025 Industry Skills Australia

		6.2	Liquid flow where waste is vacuumed is regulated to ensure maintenance of constant hose pressure.
		6.3	Visual checks are maintained to identify and remedy potential hazards during unloading.
		6.4	Load is stacked or housed at destination according to organisational requirements, manufacturer specifications and relevant legislation and codes.
7	Shut down and secure loadshifting equipment.	7.1	Equipment is parked or stored in a safe location to avoid damage to equipment or obstruction of surrounding site activity.
		7.2	Shut-down procedures are completed according to manufacturer specifications and organisational requirements.
		7.3	Equipment is secured and stored to avoid unauthorised access or use
8	Carry out basic housekeeping and maintenance.	8.1	Equipment is cleaned to remove debris and contamination and to ensure safe operating procedures.
		8.2	Service checks are conducted according to manufacturer specifications to ensure water, oil, fuel, air pressure and greasing are maintained at designated levels.
		8.3	Equipment faults or defects are reported to relevant personnel
		8.4	Record of moving activities is completed promptly and according to organisational requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

© Commonwealth of Australia, 2025 Industry Skills Australia

Required skills

- driving ability to facilitate safe and efficient driving
- interpersonal skills to work in a team environment
- numeracy skills to:
  - measure weights and volumes
  - measure waste
- literacy skills to:
  - report waste movements and loading activity
  - read and interpret:
    - graduated devices
    - procedure guidelines
    - specifications
    - work requirements and material safety data sheets (MSDS)
- oral communication skills to:
  - direct traffic
  - ask questions
  - follow instructions
  - provide clear information
  - listen actively
- problem-solving skills to:
  - identify hazards and risks
  - identify waste types, including regulated waste and waste non-conformances
  - segregate waste types, including potentially hazardous wastes
- self-management skills to:
  - apply signalling techniques
  - conduct work practices safely and efficiently
  - handle waste non-conformances
  - identify routes
  - organise work methodically
  - safely load and unload waste
  - use emergency and PPE
  - work in confined spaces
- waste identification, including:
  - containment of hazardous waste
  - isolation
  - recording waste sorted
  - identifying and sampling waste types

Required knowledge

© Commonwealth of Australia, 2025 Industry Skills Australia

- driving:
  - licence requirements
  - road laws
  - map reading
- equipment operation to facilitate:
  - basic cleaning and maintenance of equipment
  - selection of plant and equipment
- identification of:
  - waste contaminants
  - waste non-conformances
  - waste types, streams and characteristics
  - loading and unloading methods
  - equipment load weight requirements
  - types of loading equipment
  - waste loading and unloading and moving hazards
  - requirements for handling and transporting waste
  - waste processing equipment
- potential hazards and risks relating to:
  - waste loading and unloading techniques
  - emergency response procedures
- OHS requirements relating to:
  - dangerous goods and hazardous substances
  - OHS hierarchy of control

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observation of practical demonstration in the workplace or in a simulated work environment using loadshifting equipment.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • interpret job sheets • organise equipment operation

© Commonwealth of Australia, 2025 Industry Skills Australia

	• load safely and efficiently • observe OHS requirements.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include: • work plans and approved specifications • forms and procedures manuals.
Method of assessment	Moving waste using loadshifting equipment must comply with industry expectations in the particular client environment. If the environment is narrowly defined or is not representative of industry needs, it may be necessary to refer to portfolio case studies to assess competency in the moving of waste. Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function, for example: • CPPWMT3019A Prepare waste for re-use • CPPWMT3044A Identify wastes and hazards.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the

© Commonwealth of Australia, 2025 Industry Skills Australia

performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Job sheet and schedule typically include:	• emergency and PPE requirements • job route and sequence • site contact • site requirements • vehicle and associated equipment requirements • waste type, classification, characteristics and transport requirements.

Loadshifting equipment may include:	• dozers
	• earthmoving equipment
	• forklifts
	• loaders:
	  • front-end
	  • rear-end
	  • tailgate
	• trucks:
	  • articulated
	  • open-bodied:
	  • hook lift
	  • pump
	  • vacuum
	  • rigid
	• windrow turners.

Emergency and personal protective equipment must include:	• communications equipment • eye protection, such as goggles and protective glasses • eyewash kit • fire extinguishers • first aid kit • footwear • gloves • overalls and protective clothing.
Emergency and personal protective equipment could also include:	• breathing apparatus • emergency procedure guides • face shields or masks • hard hats • hearing protection • MSDS • spill kit.

© Commonwealth of Australia, 2025 Industry Skills Australia

Personal protective equipment must be:	• cleaned and fitted according to organisational requirements, manufacturer specifications and OHS requirements • worn when required according to organisational requirements • stored according to organisational requirements.
Organisational requirements may include information found in:	• briefing papers • job sheets • letters • memos • operations manuals • quality assurance documents • verbal or written instructions • work procedures.

Relevant legislation and codes may include:	• codes, including:
	  • Australian Code for the Transport of Dangerous Goods by Road and Rail
	  • industry
	• commonwealth, state and territory legislation, including:
	  • anti-discrimination
	  • environmental protection
	  • equal employment opportunity
	  • freedom of information
	  • industrial
	  • OHS
	  • trade practices
	• road laws.

Potential hazards and risks are those identified by the organisation that may lead to:	• damage to plant, vehicle or property • harm to the environment • illness or injury to employees, contractors or the public • injuries resulting from manual handling and repetitive work.
Potential hazards and risks may include:	• broken glass • broken metal • compaction equipment • contamination • dust • fire • gases and fumes • hazardous waste (e.g. sharps) • narrow driveways • other vehicles and equipment • overhanging signs • projectiles

© Commonwealth of Australia, 2025 Industry Skills Australia

	• spark-producing equipment • unguarded conveyor belts • weather.
Emergency response action or procedures may include:	• cleaning up • containing emergency • isolating or shutting down equipment or plant • evacuation • first aid • making site safe • notifying authorities • using PPE.
Relevant personnel may include**:**	• client • team leader • team member • management • supervisor.
Integrity of containment may include checks for:	• contamination • drum expansion • gases • leaching • leaks • seals • spillage • unstable form.
Loading method may include:	• cart lifter • forklift • front-end loader • high pressure vacuum loading • loading by hand • shovelling.
Waste type may include:	• solid (non-hazardous), e.g. construction and demolition • liquid (non-hazardous), e.g. chemical and aqueous • hazardous – regulated, prescribed, quarantined, medical and clinical • recoverable resources, e.g. recyclable and green waste.
Cleaning of equipment may include:	• cleaning products and fluids • high pressure water or air-hosing • shovelling • sweeping out • using decontamination products • vacuuming.

CPPWMT3044A Identify wastes and hazards

Modification History

Revised unit

Unit updated and equivalent to PRMWM44B Identify wastes and hazards

Unit Descriptor

This unit of competency specifies the outcomes required to identify a range of wastes and potential hazards and risks that may be present in the work environment.

Application of the Unit

This unit of competency supports individuals with responsibilities for identifying wastes and potential hazards and risks in a team environment. It includes following direction, systems and plans, as well as recognising the need for expert advice.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Industry Skills Australia

Elements and Performance Criteria

1	Identify waste.	1.1	***Waste characteristics*** are identified.
		1.2	Types of wastes are differentiated by ***waste stream*** or ***waste categories***.
		1.3	***Hazardous and dangerous waste*** and ***non-conforming waste*** are detailed.
		1.4	***Contaminants*** present in waste are noted.
		1.5	Further information on waste is obtained by questioning appropriate personnel to ensure correct identification.
2	Identify hazards and risks.	2.1	***Other potential hazards and risks*** present in work environment are listed.
		2.2	Supervisor and team members are informed of job requirements, hazards and risks.
		2.3	Safe work practices that prevent risk behaviour are outlined to supervisor.
		2.4	Emergency response procedures are practised with team members.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to:
  - identify hazards and risks
  - identify waste types and waste non-conformances
  - segregate valuable resources in composite materials
  - segregate waste types, including potentially hazardous waste
- interpersonal skills to work in a team environment
- literacy skills to:
  - list potential hazards and risks
  - document and keep records

© Commonwealth of Australia, 2025 Industry Skills Australia

    - read and interpret:
        - emergency requirements
        - hazard advice
        - job sheets
        - work requirements and material safety data sheets (MSDS)
- oral communication skills to:
    - follow instructions
    - provide information
    - ask questions
- self-management skills to:
    - apply signalling techniques
    - conduct work practices safely and efficiently
    - plan and undertake routine tasks
    - prioritise duties
    - use emergency and personal protective equipment (PPE)

Required knowledge

- identification of:
    - waste contaminants
    - waste monitoring procedures
    - waste non-conformances
    - waste non-conformance handling procedures
    - waste types
    - waste management options
    - waste storage requirements
    - waste disposal and recovery routes
- procedures for containing segregated waste types, including containment and isolation of hazardous waste
- emergency response procedures relating to:
    - confined space procedures
    - duty of care
    - identification of work areas, including location of:
        - alarms
        - emergency equipment
        - communications equipment
    - coding systems
    - environmental agencies
    - environmental regulations
    - reporting requirements
    - signalling techniques

© Commonwealth of Australia, 2025 Industry Skills Australia

  - waste management hierarchy
  - waste containment methods and isolation of emergencies
- occupational health and safety (OHS) requirements relating to:
  - chemical storage and decanting
  - dangerous goods and hazardous substances
  - OHS hierarchy of control
  - basic first aid appropriate to likely hazards and risks in work environment
- potential hazards and risks relating to:
  - dangerous goods
  - potential incidents

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observation of practical demonstration in the workplace or in a simulated environment.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • identify a range of waste streams, hazardous wastes and waste contaminants • identify a range of potential hazards and risks present in the workplace • observe OHS requirements.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include: • work plans and approved specifications • forms and procedures manuals.
Method of assessment	The process of identifying waste and hazards must meet industry expectations. If the environment is narrowly defined or is not representative of industry needs, it may be necessary to refer to portfolio case studies to assess competency in the identification of

© Commonwealth of Australia, 2025 Industry Skills Australia

	waste and hazards. Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units of competency relevant to the job function, for example: • CPPWMT3005A Identify and segregate waste • CPPWMT3014A Manually sort waste.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Waste characteristics may include:	• density • level of contamination • quality • shape • size • volume • weight.
Waste stream may include:	• construction and demolition • dangerous goods

© Commonwealth of Australia, 2025 Industry Skills Australia

	• green waste • hazardous substances • municipal waste.
Waste categories may include:	• solid (non-hazardous), e.g. construction and demolition • liquid (non-hazardous), e.g. chemical and aqueous • hazardous – regulated, prescribed, quarantined, medical and clinical • recoverable resources, e.g. recyclable and green waste.
Hazardous and dangerous waste may include:	• all waste depending on the condition, environment and personal exposure • biological products • blood products • chemicals • electrical wiring • glass • hospital waste • leaking containers • medical waste • needles and syringes • oil and petrol.
Non-conforming waste may include:	• contamination • hazardous or dangerous waste • inferior quality and unacceptable waste streams.
Contaminants may include:	• sunlight • infestation • mixing waste types • rot or mould • waterlogging.
Other potential hazards and risks are those that may lead to**:**	• damage to plant, vehicle or property • harm to the environment • illness or injury to employees, contractors or the public • injuries resulting from manual handling and repetitive work.
Hazards and risks may include:	• broken glass • compaction equipment • contamination • dust • fire • hazardous waste (e.g. sharps) • narrow driveways • other vehicles and equipment • overhanging signs

DEFVEH001 Conduct recovery vehicle operations in a field environment

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to undertake recovery of broken down vehicles and equipment, requiring the operation of specialist recovery vehicles and equipment.

It includes preparing for recovery vehicle tasks, dispatching the recovery vehicle to an incident site, retrieving disabled equipment and moving it to a place of repair. It also includes transporting disabled equipment and finalising recovery tasks.

This unit does not cover the extraction of disabled equipment by winching techniques, which is covered by DEFVEH002 Extract disabled equipment using winching techniques in a field environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit lead a small team to recover vehicles and equipment. Specialist recovery vehicles and equipment includes towing, lifting and winching equipment.

Persons must be capable of assessing recovery situations in remote environments and tasking personnel to complete operations in isolation from supervision or support.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for recovery tasks	**1.1** Obtain and confirm orders and instructions
	1.2 Check and prepare recovery vehicle and equipment for deployment in accordance with organisational procedures
	1.3 Confirm and organise resources required for operational tasks
	1.4 Brief recovery crew about task in accordance with organisational procedures
	1.5 Report identified problems/shortfalls to appropriate personnel in accordance with organisational procedures so corrective action can occur prior to deployment
	1.6 Apply work health and safety (WHS)/occupational health and safety (OHS) requirements and recognised safety precautions throughout the operation in accordance with organisational procedures
	1.7 Identify, assess and implement environmentally sustainable work practices, as required
2 Deploy recovery equipment	**2.1** Deploy recovery vehicle to recovery site in accordance with organisational procedures
	2.2 Communicate effectively with relevant vehicle recovery activity stakeholders to ensure everyone is aware of recovery procedures
3 Recover disabled equipment	**3.1** Diagnose equipment casualty faults, where possible, to ensure efficient and cost effective recovery actions
	3.2 Assess recovery situation in accordance with organisational procedures to determine appropriate recovery method
	3.3 Assess safety risks associated with recovery task and implement control measures to ensure a safe working environment in accordance with organisational

© Commonwealth of Australia, 2025 Industry Skills Australia

		procedures
	3.4	Brief on-site personnel, allocate tasks and supervise personnel in accordance with organisational procedures
	3.5	Complete recovery tasks in accordance with organisational procedures
	3.6	Respond to minor unplanned situations in accordance with organisational procedures, in a manner that minimises risk to personnel and equipment
	3.7	Report major incidents outside scope of vehicle recovery team capability to appropriate personnel
4 Transport disabled equipment	**4.1**	Secure disabled equipment to recovery vehicle in accordance with manufacturer instructions and organisational procedures
	4.2	Assess the stability and braking capability of recovery vehicle to ensure it is safe to transport disabled equipment
	4.3	Drive recovery vehicle to maintenance facility
	4.4	Manage unplanned incidents as they occur in accordance with organisational procedures
5 Finalise recovery tasks	**5.1**	Hand over equipment casualty to owner or recover further, as required
	5.2	Complete documentation, including reports and returns, in accordance with organisational procedures
	5.3	Supervise and conduct maintenance in accordance with organisational procedures
	5.4	Report faulty equipment and take corrective actions, as required
	5.5	Debrief recovery crew as required, in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Industry Skills Australia

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to DEFVH001A Conduct recovery vehicle operations in a field environment.

Assessment Requirements for DEFVEH001 Conduct recovery vehicle operations in a field environment

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- allocating appropriate materials and personnel to tasks
- applying relevant legislation and organisational policies and procedures
- applying safety, legislative and statutory requirements relevant to the recovery vehicle operations risk assessment
- assessing recovery situations in remote environments and tasking personnel to complete operations isolated from supervision or support
- communicating effectively in the workplace
- conducting vehicle operations taking into account the characteristics of the equipment casualty and recovery equipment when determining suitable recovery methods
- deploying recovery equipment appropriate for tasks and field environment
- directing, briefing, coordinating and monitoring personnel
- finalising recovery tasks
- identifying, interpreting and analysing risk assessment requirements relevant to recovery vehicle operations in a field environment
- interpreting instructions and directions
- operating specialist recovery vehicles and equipment
- performing a lift/tow recovery of a light and a medium/heavy rigid vehicle
- performing a trailer recovery involving a medium/heavy rigid vehicle (or equivalent)
- preparing for recovery tasks
- recovering and transporting disabled equipment
- solving task specific problems and unplanned events/incidence in accordance with organisational procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- basic engineering principles including:
  - characteristics and capabilities of recovery vehicles and equipment

© Commonwealth of Australia, 2025 Industry Skills Australia

    - material capabilities
    - theory of levers and pulleys
- basic vehicle mechanical principles
- common equipment casualty faults including:
    - damaged driveline
    - electrical system faults
    - engine/transmission faults
    - fuel system faults
- functions and responsibilities of team members
- maintenance requirements and procedures
- relevant minor problems, major incidents and unplanned situations risk mitigation organisational procedures
- recovery methods and procedures
- recovery vehicle and equipment specifications and capabilities
- relevant organisational policies and procedures including:
    - work health and safety (WHS)/occupational health and safety (OHS) procedures relevant to field recovery operations
- reporting requirements and procedures
- safety risk and precautions associated with recovery tasks.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in field environment operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated field environment operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- recovery vehicle, associated equipment and crew
- actual or simulated vehicle/equipment casualties
- applicable documentation including relevant organisational workplace procedures, publications, regulations, codes of practice and operation manuals.

DEFVEH002 Extract disabled equipment using winching techniques in a field environment

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to assess equipment and vehicles requiring recovery and to employ suitable winching techniques and procedures to extricate casualties utilising specialist recovery vehicles equipped with motorised winching equipment.

It includes operating winching equipment capable of extracting a range of vehicles and equipment that have become bogged or broken down due to terrain or environmental factors, and cannot be extracted by other means.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Typically, winching operations are conducted by persons acting independently or in charge of a small team, isolated from assistance or supervision. They exercise judgement and work within agreed safety procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 Industry Skills Australia

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Respond to call for assistance	**1.1** Obtain winching tasks and confirm details in accordance with operational requirements
	1.2 Assess tasks to determine equipment requirements
	1.3 Check and prepare recovery vehicle for task in accordance with organisational procedures
	1.4 Deploy recovery vehicle to casualty site in preparation to conduct task
2 Assess winching task	**2.1** Liaise with on-site personnel
	2.2 Assess equipment casualty to determine suitability for winching
	2.3 Inspect site, identify hazards and obstacles associated with winching, assess risks and implement control measures in accordance with organisational procedure
	2.4 Determine winching equipment requirements to extricate casualty and ensure suitable recovery vehicle and equipment for task
	2.5 Develop winching plan taking into account terrain conditions, requirements of casualty, site, recovery equipment and vehicle capabilities
	2.6 Determine and apply work health and safety (WHS)/occupational health and safety (OHS) requirements during winching operations in accordance with organisational procedures
3 Prepare for winching task	**3.1** Prepare equipment casualty for winching in accordance with winching plan
	3.2 Prepare winching equipment in accordance with winching plan
	3.3 Brief on-site personnel, allocate tasks and supervise personnel in accordance with organisational procedures
4 Extricate equipment casualty using winch	**4.1** Conduct winching process in accordance with winching plan
	4.2 Respond to minor unplanned situations in accordance with organisational procedures, in a manner that

© Commonwealth of Australia, 2025 Industry Skills Australia

		minimises risk to personnel and equipment
	4.3	Seek assistance from appropriate personnel when major problems outside scope of vehicle winching team capability occur
5 Finalise winching operations	**5.1**	Hand over equipment casualty to owner or recover further as required to complete task
	5.2	Recover and inspect winching equipment for damage in accordance with organisational procedures
	5.3	Report unserviceable equipment and take appropriate actions in accordance with organisational procedures
	5.4	Maintain equipment in accordance with manufacturer instructions
	5.5	Compile documentation and make reports, as required
	5.6	Refurbish worksite in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Assessment Requirements for DEFVEH002 Extract disabled equipment using winching techniques in a field environment

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- allocating appropriate materials and personnel to winching task
- applying relevant organisational policies and procedures
- applying safety, legislative and statutory requirements relevant to winching risk assessment
- assessing site and winching risks and applying control measures
- assessing winching task
- briefing and supervising personnel
- communicating effectively in the workplace
- conducting a winching operation to extricate a light and a medium/heavy rigid vehicle
- conducting winching operations on ground that is soft enough to simulate the conditions encountered when winching bogged vehicles
- extricating equipment casualty using a winch
- finalising winching operations
- identifying, interpreting and analysing risk assessment requirements relevant to winching work being performed
- preparing for winching task
- providing reports and appropriate documentation
- responding to call for winching assistance
- solving problems relevant to winching task
- using motorised winches, winch ropes and associated fittings.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- basic engineering principles relevant to winching including:
  - characteristics and capabilities of recovery vehicles and equipment
  - material capabilities
  - theory of levers and pulleys
- basic vehicle mechanical principles

© Commonwealth of Australia, 2025 Industry Skills Australia

- hazards associated with winching
- maintenance requirements and organisational procedures
- recovery methods and winching procedures
- relevant legislation and organisational policies and procedures
- reporting requirements and procedures
- organisational work health and safety (WHS)/occupational health and safety (OHS) requirements and procedures relevant to winching operations including:
  - personal protective equipment
  - safety distances
  - safety equipment
  - warning devices
- winching equipment manufacturer specifications.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- recovery vehicles and winching equipment
- actual or simulated equipment vehicle casualties
- applicable documentation including relevant organisational workplace procedures, publications, regulations, codes of practice and operation manuals.

FBPFSY2001 Implement the food safety program and procedures

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to maintain personal hygiene and conduct work tasks where work involves operation of production and packaging equipment and processes.

This unit applies to individuals who participate and comply with safety programs in the food processing sector. It does not apply to the pharmaceutical industry.

Legislative and regulatory requirements apply to food safety and are enforced through state/territory jurisdictions. Users must check with the relevant regulatory authority before delivery.

Pre-requisite Unit

Food safety (FSY)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Implement the food safety program	1.1 Identify food handling requirements 1.2 Carry out food handling and control food safety hazards according to the food safety program 1.3 Report any incident where food safety control requirements are not met and take corrective action as directed

© Commonwealth of Australia, 2025 Industry Skills Australia

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Record food safety information to meet requirements of the food safety program 1.5 Maintain the workplace in a clean and tidy order to meet workplace standards 1.6 Conduct work to comply with workplace environmental guidelines
2. Participate in maintaining and improving food safety	2.1 Monitor work area, materials, equipment and product to ensure compliance with food safety requirements 2.2 Identify and report processes, practices or conditions that could result in a food safety breach, and take corrective action as directed 2.3 Raise food safety issues with supervisor
3. Comply with personal hygiene standards	3.1 Ensure personal hygiene meets the requirements of the food safety program 3.2 Report health conditions and illness as required by the food safety program 3.3 Wear appropriate clothing and footwear for the food handling task 3.4 Move around the workplace in compliance with the food safety program

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret information relating to food safety and environmental guidelines
Numeracy	• Monitor and interpret food safety information and data
Navigate the world of work	• Understand main tasks, responsibilities and boundaries of own role, including use of personal protective clothing and equipment

Assessment Requirements for FBPFSY2001 Implement the food safety program and procedures

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has effectively implemented the food safety program and procedures on two separate occasions in a food processing or food packaging environment, including:

- identifying own responsibilities with regard to food safety
- identifying food safety risks in the workplace and the control measures used to manage them
- applying control measures in own work
- monitoring compliance with food safety standards
- identifying and acting on non-compliances, and participating in improving safety
- maintaining required standards of personal hygiene.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- sources of information and expertise on procedures and responsibilities for food safety relating to own work
- basic concepts of critical control point (CCP)-based food safety, including identification of hazards that are likely to occur, establishing appropriate methods of control and confirming that controls are met
- food safety management arrangements in the workplace, including awareness of food safety legislation, workplace policies and procedures to implement responsibilities, understanding the relationship between the quality system and the food safety program, personnel responsible for developing and implementing the food safety program, the role of internal and external auditors as appropriate, procedures followed to investigate contamination events, and performance improvement processes

© Commonwealth of Australia, 2025 Industry Skills Australia

- Food Standards Code and why it exists
- common microbiological, physical and chemical hazards related to the foods handled in the work area, including the types of hazards likely to occur, the conditions under which they occur, possible consequences, and control methods to prevent occurrence
- basic understanding of the properties, handling and storage requirements of ingredients, materials and products handled and used
- methods used to monitor that food safety is under control, including the purpose of sampling
- action required in the event of non-compliance (corrective action is typically described in the food safety program and/or related workplace information)
- purpose of keeping records, and the recording requirements of the food safety program
- methods used in the workplace to isolate or quarantine food that may be unsafe
- product and ingredient traceability procedures, such as product recall where required by work responsibilities
- clothing and footwear requirements for working in and/or moving between food handling areas
- personal clothing maintenance, laundering and storage requirements
- appropriate bandages and dressings to be used when undertaking food handling
- housekeeping requirements and responsibilities relating to own work, and use and storage of housekeeping/cleaning equipment where relevant
- procedures to follow in the event of pest sighting or discovery of infestation
- purpose and importance of cleaning and sanitation procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real food processing workplace
- resources, equipment and materials:
  - food safety information relating to the workplace, including a food safety program outlining food safety hazards and control methods
  - sampling and test procedures and related equipment
  - appropriate clothing and related apparatus
  - reporting and monitoring systems
- specifications:
  - work instructions and procedures relevant to work task
  - cleaning and sanitation policies and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPFSY3001 Monitor the implementation of quality and food safety programs

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to provide a leadership role in supporting day-to-day implementation of the quality and food safety programs and procedures in a work area.

The unit applies to individuals who monitor, maintain and oversee quality standards and food safety programs and take corrective action in response to non-compliance. It does not apply to the pharmaceutical industry.

Legislative and regulatory requirements apply to food safety and are enforced through state/territory jurisdictions. Users must check with the relevant regulatory authority before delivery.

Pre-requisite Unit

Nil

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	communicated to others in the work area 1.3 Confirm that information about identified hazards and the outcomes of risk assessment and risk control procedures is accessible and communicated to others in the work area 1.4 Confirm that mentoring and coaching support is available to support individuals and groups to implement quality and safe food handling procedures
2. Monitor observance of quality standards and food safety programs in the work area	2.1 Confirm that work procedures in the work area are clearly defined, documented and followed 2.2 Identify deviation from procedures, and report and address within level of responsibility 2.3 Ensure that staff behaviour is consistent with workplace policies and procedures that support food safety and quality 2.4 Identify and report food safety and quality hazards 2.5 Record food safety and quality information 2.6 Maintain the work area to comply with housekeeping standards 2.7 Conduct work to comply with workplace environmental guidelines
3. Take corrective action in response to quality and food safety non-compliance	3.1 Implement workplace procedures for responding to quality and food safety non-compliance 3.2 Investigate hazardous events to identify cause 3.3 Implement control measures to prevent recurrence and minimise risks of hazardous events
4. Improve quality and food safety in the work area	4.1 Identify opportunities for improving food safety and quality, and raise with relevant personnel 4.2 Contribute to revising procedures to support effective control of quality and food safety hazards 4.3 Communicate improvements to team members

© Commonwealth of Australia, 2025 Industry Skills Australia

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret food safety program • Interpret workplace food safety practices and procedures
Navigate the world of work	• Apply knowledge of regulations and policies relevant to workplace food safety program
Get the work done	• Use problem-solving skills to investigate non-conformance, and revise procedures where necessary

Assessment Requirements for FBPFSY3001 Monitor the implementation of quality and food safety programs

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has effectively monitored the implementation of quality and food safety programs on two different occasions, including:

- confirming quality and food safety program requirements, risks and control measures of the work area
- confirming that control measures are in place and that personnel in the work area are equipped and informed to implement programs
- identifying, addressing and following up on non-compliances
- identifying causes of non-compliance
- conducting risk assessments and recommending responsive actions
- providing support to others to implement the programs
- completing and maintaining documentation.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- procedures and responsibilities for food safety relevant to the workplace
- principles of a critical control point (CCP) analyses approach to managing food safety, including identifying hazards that are likely to occur, establishing appropriate methods of control, and confirming that controls are met
- Food Standards Code
- basic concepts of quality assurance, including hazards, risk assessment and control methods

© Commonwealth of Australia, 2025 Industry Skills Australia

- methods to manage and support quality and food safety in the workplace, including systems for maintaining and updating documents, including operating procedures and specifications
- clothing and footwear requirements for working in and/or moving between food handling areas, including personal clothing maintenance, laundering and storage requirements
- appropriate bandages and dressings to be used when undertaking food handling
- housekeeping requirements and responsibilities relating to own work, including use and storage of housekeeping/cleaning equipment
- procedures to follow in the event of pest sighting or discovery of infestation
- purpose and importance of cleaning and sanitation procedures
- legislative requirements for food safety and quality
- awareness of common microbiological, physical and chemical hazards related to the foods handled in the work area, including the types of hazards likely to occur, the conditions under which they occur, possible consequences, and control methods to prevent occurrence
- suitable standard for materials, measuring devices, equipment and utensils used in the work area
- properties of food and ingredients used that affect food safety, including an understanding of related storage, processing and handling requirements
- reasons that food safety/quality hazards occur, including an understanding of common microbiological, physical and chemical hazards, related control methods and the way changes in equipment and/or processing methods can affect food safety and quality outcomes
- procedures for identifying unsafe and/or non-conforming product, including control points and evidence of out-of-specification product or materials
- sampling procedures, test methods and inspections
- options for responding to non-compliance, including legal responsibility, risk management and cost/implications of different responses, and level of responsibility for decision-making
- methods used in the workplace to isolate or quarantine food that may be unsafe
- waste collection, recycling, handling and disposal, including handling/disposal requirements for different types of waste, including hazardous waste
- traceability and recall procedures within level of responsibility
- documentation system and procedures, including recordkeeping to meet both company and legal requirements, procedures for developing and/or reviewing workplace procedures, and document control systems used in the workplace
- internal and external auditing arrangements, roles and responsibilities as they relate to own work responsibilities
- appropriate communication skills and techniques to convey information on quality and food safety requirements to others in the workplace.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:

© Commonwealth of Australia, 2025 Industry Skills Australia

    - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
    - personal protective clothing and equipment as required
    - reporting and monitoring systems
- specifications:
    - food safety program for the work area that identifies critical control points, control measures and corrective actions
    - quality policy, system and procedures
- relationships:
    - interactions with work team and supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3261 Transport forestry logs using trucks

Modification History

Release	Comment
1	Replaces equivalent FPICOT3261 Transport forestry logs using trucks, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to drive log trucks to and from forestry harvesting sites, facilitate log loading and unloading, and deliver logs to their destination. Work is completed in in a variety of work settings, including forest environments, landings, log dumps, saw mills, wood chip mills, veneer mills, board/plywood mills.

The unit applies to those who transport forestry logs by driving heavy logging vehicles.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction.

Pre-requisite Unit

Nil

Elements and Performance Criteria

ELEMENTS *Elements describe the essential outcomes.*	**PERFORMANCE CRITERIA** *Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.*
1. Prepare to transport logs	1.1 Review work order and schedules and where required check with appropriate personnel. 1.2 Obtain coupe map to determine identify logging sites, truck entry, access and exit tracks and loading areas. 1.3 Determine required truck configuration to meet work order and load build requirements and confirm availability of truck and ancillary equipment. 1.4 Check transportation documentation for compliance with

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENTS	PERFORMANCE CRITERIA
	regulatory requirements for driving hours, load limits and dimensions.
2. Plan route	2.1 Select route and coupe entry and exits points to ensure efficient, safe and legal log movement and minimal environmental damage. 2.2 Ensure selected route complies with height, width, overhang and load limits of road infrastructure and environmental constraints. 2.3 Estimate time required to transport logs and account for fatigue management guidelines. 2.4 Confirm route, timings and coupe entry and exit points with appropriate personnel.
3. Facilitate log loading	3.1 Access site and determine safe manoeuvring approach for loading area with worksite personnel. 3.2 Position truck to avoid site and equipment hazards and to maximise load safety and security while loading. 3.3 Place and check log positioning equipment for loading, and reset as required. 3.4 Communicate with worksite personnel and machine operators to ensure safe loading location and processes and that load meets transport regulatory requirements. 3.5 Monitor loading, complete final check to ensure safe transport.
4. Secure logs prior to transport	4.1 Secure load with sufficient number and type of securing devices in line with loading guidelines and transport regulatory requirements. 4.2 Re-tension logs as required. 4.3 Fit overhang warning devices and signage to load to comply with transport regulatory requirements
5. Transport logs	5.1 Transport logs on planned or modified route considering conditions, road surfaces and fatigue management practices. 5.2 Monitor condition of tracks and roads and report unexpected ground, water, vegetation and other environmental conditions to appropriate personnel 5.3 Drive truck legally and safely using primary and subsidiary controls appropriate to conditions. 5.4 Monitor truck gauges and warning devices to detect and respond to operating faults and ensure operational safety. 5.5 Communicate with other drivers and road users to inform location and potential hazards. 5.6 Conduct periodic load safety checks and re-tension load in line

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENTS	PERFORMANCE CRITERIA
	with road conditions and regulatory requirements. 5.7 Keep communication channels open to ensure location is known at all times to allow for emergency assistance.
6. Facilitate log unloading	6.1 Complete site inductions and establish safe manoeuvring approach for unloading area with worksite personnel. 6.2 Follow site personnel directions to manoeuvre and park truck to avoid site and equipment hazards. 6.3 Shut down and secure truck in identified safe unloading zone. 6.4 Inspect load for log movement and make provisions to support logs requiring difficult control during release. 6.5 Release load securing devices in correct sequence for truck, trailer and load configuration and in line with site safe unloading procedures. 6.6 Make truck, trailer and ancillary equipment safe for return journey to coupe. 6.7 Record and report log shifting process and truck operating faults to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	

Numeracy skills to:	• complete calculations, against regulatory specifications, of:
	  • heights, widths and weights of loads
	  • transportation distances, times and rest periods
	• read and interpret truck gauges and warning devices
	• record numerical data involving distances, times, weights and dimensions.

Oral communication skills to:	• ask questions and actively listen to clarify:
	  • contents of work orders and transport schedules
	  • locations of site loading and unloading areas
	  • unfamiliar site safety and operating procedures
	• provide clear unambiguous information to site personnel about loads and any problems expected with releasing unstable logs

Reading skills to:	• interpret: • workplace health and safety and other organisational procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

	• work orders and transport schedules • load manifests • transport regulations or plain English equivalent documents.
Writing skills to:	• complete accurate basic records for log shifting processes and truck operating faults.
Teamwork skills to:	• work cooperatively with site personnel and follow directions to complete safe and efficient loading and loading of logs.

Range of Conditions

Not Applicable

Assessment Requirements for FWPCOT3261 Transport forestry logs using trucks

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3261 Transport forestry logs using trucks, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- plan the routes for and complete log movements using a truck or truck/trailer combination, in line with an individual work orders and transport schedule prescribing different load quantities, coupe locations and destinations for each job
- assess the load during loading operations to avoid:
  - uneven weight distribution
  - instability or uncontrolled collapse of the load
- assess the load during loading operations to account for:
  - requirements for trailer rigidity
  - turning clearance
  - overhang
  - projection above stanchions
  - crowning
  - weight distribution on truck and trailer axles
  - contact with bolsters, stanchions and other logs
- after each of the above transportation movements, complete accurate basic records for log shifting processes and truck operating faults.

© Commonwealth of Australia, 2025 Industry Skills Australia

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- purpose and content of applicable commonwealth, state or territory transport regulations for driving heavy logging vehicles with particular emphasis on load limits, allowable dimensions, driving hours, fatigue management and required rest breaks
- applicable fall from heights regulations and compliance requirements
- environmental protection practices relevant to driving heavy logging trucks to minimise:
  - fuel consumption
  - emissions
  - noise
  - damage to soil, water and other aspects of habitat
- key features of these varying environmental conditions and effects on driving heavy logging trucks:
  - sealed and unsealed roads and tracks
  - ground slope
  - ground hazards and obstacles
  - wind and dust
  - fog and rain
- typical safety hazards present at loading and unloading facilities and methods used to minimise associated risks
- methods used to:
  - plan time efficient routes and schedules to comply with regulations and environmental considerations
  - safely load, restrain and unload logs
- features, capabilities and capacities of logging trucks and trailers
- purpose, features and safe operation of equipment used to load, unload and transport logs:
  - log positioning equipment
  - load securing devices
  - overhang warning devices
  - communication equipment
- organisational procedures specific to transporting, loading and unloading logs:
  - workplace health and safety with particular emphasis on rest breaks and use of personal protective equipment
  - communication reporting lines
  - recording and reporting log shifting processes and truck operating faults.

Assessment Conditions

The following resources must be made available:

- logging trucks and trailers including one or more of the following:
  - rigid or articulated log trucks

© Commonwealth of Australia, 2025 Industry Skills Australia

  - semi-trailers
  - jinkers
  - quad-dogs
  - B doubles
  - two-bay skeletal trucks
- safety fittings
- head boards
- cab guards
- log positioning equipment including one or more of the following:
  - bolsters
  - slippers
  - stanchions
  - chocks
- load securing devices including one or more of the following:
  - dogs and chains
  - binders/straps
  - webbing
  - lashings and winches
  - auto-tensioning devices
- overhang warning devices including one or more of the following:
  - flags
  - lights
  - reflectors
  - signs
- communication equipment including one or more of the following:
  - two-way radio
  - hands-free mobile phones
- personal protective equipment suitable for loading and unloading trucks
- maps for coupe location
- work order and transport schedules with instructions for equipment allocation, transport requirements and location of coupe and destination for logs
- template documents for recording log shifting processes and truck operating faults
- organisational procedures for transporting, loading and unloading logs.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and

© Commonwealth of Australia, 2025 Industry Skills Australia

- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

Links

HLTAID001 Provide cardiopulmonary resuscitation

Modification History

Release	Notes
Release 5	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 4	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 3	Updated mapping information. Equivalent outcome.
Release 2	Updated mapping information. Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. Revised evidence requirements, including volume and frequency of assessment.

Application

This unit describes the skills and knowledge required to perform cardiopulmonary resuscitation (CPR) in line with the Australian Resuscitation Council (ARC) Guidelines.

This unit applies to all workers who may be required to provide CPR, in a range of situations, including community and workplace settings.

Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

© Commonwealth of Australia, 2025 Industry Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Respond to an emergency situation	1.1 Recognise an emergency situation 1.2 Identify, assess and minimise immediate hazards to health and safety of self and others 1.3 Assess the casualty and recognise the need for CPR 1.4 Seek assistance from emergency response services
2. Perform CPR procedures	2.1 Perform cardiopulmonary resuscitation in accordance with ARC guidelines 2.2 Display respectful behaviour towards casualty 2.3 Operate automated external defibrillator (AED) according to manufacturer's instructions
3. Communicate details of the incident	3.1 Accurately convey incident details to emergency response services 3.2 Report details of incident to workplace supervisor as appropriate 3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Industry Skills Australia

Unit Mapping Information

No equivalent unit.

Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. Revised evidence requirements, including volume and frequency of assessment.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:
  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor

© Commonwealth of Australia, 2025 Industry Skills Australia

  - performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
  - responded appropriately in the event of regurgitation or vomiting
  - managed the unconscious breathing casualty
  - followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
  - followed the prompts of an automated external defibrillator (AED)
- Responded to at least one simulated first aid scenario contextualised to the candidate's workplace/community setting, including:
  - demonstrated safe manual handling techniques
  - provided an accurate verbal or written report of the incident

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC Guidelines relevant to the provision of CPR
  - safe work practices to minimise risks and potential hazards
  - infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- Legal, workplace and community considerations, including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - duty of care requirements
  - respectful behaviour towards a casualty
  - own skills and limitations
  - consent
  - privacy and confidentiality requirements
  - importance of debriefing
- Considerations when providing CPR, including:
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - chain of survival
  - standard precautions
- Basic anatomy and physiology relating to:
  - how to recognise a person is not breathing normally
  - chest

© Commonwealth of Australia, 2025 Industry Skills Australia

- response/consciousness
- upper airway and effect of positional change

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- AED training device
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor Requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition hold current first aid certificate HLTAID003 or higher.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Respond to an emergency situation	1.1 Recognise an emergency situation 1.2 Identify, assess and minimise immediate hazards to health and safety of self and others 1.3 Assess the casualty and recognise the need for first aid response 1.4 Assess the situation and seek assistance from emergency response services
2. Apply appropriate first aid procedures	2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with ARC guidelines 2.2 Provide first aid in accordance with established first aid principles 2.3 Display respectful behaviour towards casualty 2.4 Obtain consent from casualty where possible 2.5 Use available resources and equipment to make the casualty as comfortable as possible 2.6 Operate first aid equipment according to manufacturer's instructions 2.7 Monitor the casualty's condition and respond in accordance with first aid principles
3. Communicate details of the incident	3.1 Accurately convey incident details to emergency response services 3.2 Report details of incident to workplace supervisor as appropriate 3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

Assessment Requirements for HLTAID002 Provide basic emergency life support

Modification History

Release	Comments
Release 4	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 3	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 2	Minor corrections to formatting to improve readability. Equivalent competency outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. Changes to evidence requirements relative to revised scope of unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:
  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor

© Commonwealth of Australia, 2025 Industry Skills Australia

  - performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
  - responded appropriately in the event of regurgitation or vomiting
  - managed the unconscious breathing casualty
  - followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
  - followed the prompts of an Automated External Defibrillator (AED)
- Responded to at least one simulated first aid scenario contextualised to the candidate's workplace/community setting, including:
  - demonstrated safe manual handling techniques
  - provided an accurate verbal or written report of the incident
- Applied first aid procedures for the following:
  - allergic reaction
  - anaphylaxis
  - bleeding control
  - choking and airway obstruction
  - respiratory distress, including asthma
  - shock

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC Guidelines relevant to provision of CPR and first aid
  - safe work practices to minimise risks and potential hazards
  - Infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- legal, workplace and community considerations, including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - duty of care requirements
  - respectful behaviour towards a casualty
  - own skills and limitations
  - consent
  - privacy and confidentiality requirements
  - importance of debriefing
- considerations when providing basic emergency life support, including:
  - airway obstruction due to body position

© Commonwealth of Australia, 2025 Industry Skills Australia

  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - chain of survival
  - standard precautions
- principles and procedures for first aid management of the following scenarios:
  - allergic reaction
  - anaphylaxis
  - bleeding control
  - cardiac conditions, including chest pain
  - chocking and airway obstruction
  - respiratory distress, including asthma
  - shock
  - stroke
- basic anatomy and physiology relating to:
  - considerations in provision of first aid for specified conditions
  - chest
  - how to recognise a person is not breathing normally
  - response/consciousness
  - upper airway and effect of positional change

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device
- placebo bronchodilator and spacer device
- roller bandages
- triangular bandage
- workplace First Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form
- wound dressing

© Commonwealth of Australia, 2025 Industry Skills Australia

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition hold current first aid certificate HLTAID003 or higher.

  - responded appropriately in the event of regurgitation or vomiting
  - managed the unconscious breathing casualty
  - followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
  - followed the prompts of an Automated External Defibrillator (AED)
- Responded to at least two simulated first aid scenarios contextualised to the candidate's workplace/community setting, including:
  - conducted a visual and verbal assessment of the casualty
  - demonstrated safe manual handling techniques
  - post-incident debrief and evaluation
  - provided an accurate verbal or written report of the incident
- Applied first aid procedures for the following:
  - allergic reaction
  - anaphylaxis
  - bleeding control
  - choking and airway obstruction
  - envenomation, using pressure immobilisation
  - fractures, sprains and strains, using arm slings, roller bandages or other appropriate immobilisation techniques
  - respiratory distress, including asthma
  - shock

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC Guidelines relevant to provision of CPR and first aid
  - safe work practices to minimise risks and potential hazards
  - infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - duty of care requirements

  - respectful behaviour towards a casualty
  - own skills and limitations
  - consent
  - privacy and confidentiality requirements
  - importance of debriefing
- considerations when providing first aid including:
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - chain of survival
  - standard precautions
  - how to conduct a visual and verbal assessment of the casualty
- principles and procedures for first aid management of the following scenarios:
  - abdominal injuries
  - allergic reaction
  - anaphylaxis
  - basic care of a wound
  - bleeding control
  - burns
  - cardiac conditions, including chest pain
  - choking and airway obstruction
  - crush injuries
  - diabetes
  - dislocations
  - drowning
  - envenomation
  - environmental impact, including hypothermia, hyperthermia, dehydration and heat stroke
  - eye and ear injuries
  - fractures
  - febrile convulsions
  - head, neck and spinal injuries
  - minor skin injuries
  - needle stick injuries
  - poisoning and toxic substances
  - respiratory distress, including asthma
  - seizures, including epilepsy
  - shock
  - soft tissue injuries, including strains and, sprains
  - stroke

© Commonwealth of Australia, 2025 Industry Skills Australia

  - unconsciousness
- basic anatomy and physiology relating to:
  - how to recognise a person is not breathing normally
  - chest
  - response/consciousness
  - upper airway and effect of positional change
  - considerations in provision of first aid for specified conditions

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device
- placebo bronchodilator and spacer device
- roller bandages
- triangular bandages
- workplace First Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form for written reports
- wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAID006 Provide advanced first aid

Modification History

Release	Comments
Release 5	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 4	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 3	Updated mapping information. Equivalent outcome.
Release 2	Minor changes to formatting to improve readability.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. Removal of embedded content from HLTFA412A Apply First Aid. New evidence requirements for assessment. Removal of pre-requisite unit.

Application

This unit describes the skills and knowledge required to provide an advanced first aid response, including management of the incident and other first aiders, until the arrival of medical or other assistance.

The unit applies to workers who may be required to provide, coordinate and manage a first aid response across a range of complex situations, including community and workplace settings.

© Commonwealth of Australia, 2025 Industry Skills Australia

Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Respond to an emergency situation	1.1 Recognise an emergency situation 1.2 Identify, assess and manage immediate hazards to health and safety of self and others 1.3 Assess the casualty and recognise the need for first aid response 1.4 Assess the situation and seek assistance from emergency response services 1.5 Deploy resources to appropriate locations as required in line with workplace procedures
2. Apply appropriate first aid procedures	2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with Australian Resuscitation Council (ARC) guidelines 2.2 Provide first aid in accordance with established first aid principles 2.3 Display respectful behaviour towards casualty 2.4 Obtain consent from casualty where possible 2.5 Use available resources and equipment to make the casualty as comfortable as possible 2.6 Operate first aid equipment according to manufacturer’s instructions 2.7 Monitor the casualty’s condition and respond in accordance with first aid principles

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
3. Coordinate first aid activities until arrival of medical assistance	3.1 Identify available resources required and establish communication links with appropriate personnel, emergency management services and medical assistance as appropriate 3.2 Deploy correct amount of required resources to appropriate locations in an effective manner to ensure timely arrival 3.3 Document the provision of resources and recommend modifications as required 3.4 Monitor the condition of casualties in accordance with first aid principles and workplace procedures 3.5 Coordinate evacuation of casualties according to relevant evacuation procedures 3.6 Arrange support services for personnel involved in the incident in accordance with relevant principles and procedures
4. Communicate details of the incident	4.1 Accurately convey incident details to emergency response services 4.2 Report details of incident in line with organisational policies 4.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies
5. Evaluate the incident and own performance	5.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents 5.2 Participate in debriefing to address individual needs 5.3 Evaluate management of the incident and develop an action plan in consultation with relevant parties 5.4 Review contingency planning to identify and select alternative management principles and procedures as required

Assessment Requirements for HLTAID006 Provide advanced first aid

Modification History

Release	Comments
Release 5	Updated: • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 4	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 3	Updated mapping information. Equivalent outcome.
Release 2	Minor changes to formatting to improve readability.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. Removal of embedded content from HLTFA412A Apply First Aid. New evidence requirements for assessment. Removal of pre-requisite unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- followed DRSABCD in line with ARC guidelines, including:

© Commonwealth of Australia, 2025 Industry Skills Australia

  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
  - performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
  - performed at least 2 minutes of Bag-valve-mask ventilation and at least 2 minutes of compression during a two rescuer procedure on an adult resuscitation manikin placed on the floor
  - responded appropriately in the event of regurgitation or vomiting
  - managed the unconscious breathing casualty
  - followed the prompts of a Automated External Defibrillator (AED)
  - followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- responded to at least three simulated first aid scenarios contextualised to the candidate's workplace/community setting, including:
  - demonstrated safe manual handling techniques
  - conducted a visual and verbal secondary survey assessment of the casualty
  - assessed vital signs (respirations, pulse and temperature)
  - communicated effectively with a first aid team providing direction and coordination of other first aiders
  - post-incident debrief and evaluation
  - provided an accurate verbal and written report of the incident
- applied first aid procedures for the following:
  - allergic reaction
  - anaphylaxis
  - bleeding control
  - choking and airway obstruction
  - conducted a basic triage for multiple casualty incident
  - envenomation (using pressure immobilisation)
  - fractures, sprains and strains (using arm slings, roller bandages or other appropriate immobilisation principles)
  - head, neck and spinal injuries (using immobilisation principles)
  - respiratory distress - including asthma
  - seizures - including epilepsy
  - shock
- located and interpreted workplace policies and procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC guidelines relevant to provision of CPR and first aid
  - guidelines of Australian national peak clinical bodies
  - safe work practices to deal with risks and potential hazards including manual handling, hazardous substances, dangerous goods and chemicals
  - infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - capabilities of emergency management services
  - consent
  - duty of care requirements
  - importance of debriefing
  - own skills and limitations
  - legal requirements of administration of medication and the rights and responsibilities of the First Aider in the workplace regarding medication
  - privacy and confidentiality requirements
  - respectful behaviour towards a casualty
- considerations when providing first aid including:
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - assessment and interpretation of vital signs, including respirations, temperature and pulse
  - chain of survival
  - how to conduct a visual and verbal secondary survey assessment of casualty
  - priorities of management in first aid when dealing with life-threatening conditions
  - procedures for dealing with casualties who are aged or infirmed
  - procedures for dealing with major and minor accidents in the workplace
  - procedures when providing first aid to children
  - standard precautions
- principles and procedures for first aid management of the following scenarios, including complications:
  - abdominal injuries
  - allergic reaction

© Commonwealth of Australia, 2025 Industry Skills Australia

  - anaphylaxis
  - basic care of a wound
  - bleeding control
  - burns, including thermal, chemical, friction and electrical
  - cardiac conditions, including chest pain
  - choking and airway obstruction
  - crush injuries
  - diabetes
  - drowning
  - emergency childbirth
  - envenomation
  - environmental impact including hypothermia, hyperthermia, dehydration and heat stroke
  - eye and ear injuries
  - febrile convulsions
  - head, neck and spinal injuries
  - levels of consciousness
  - needle stick injuries
  - poisoning and toxic substances
  - respiratory distress, including asthma
  - seizures, including epilepsy
  - shock
  - skin injuries
  - soft tissue musculoskeletal, including injuries including sprains, strains, dislocations and fractures
  - stroke
  - substance misuse, including common drugs and alcohol, including illicit drugs
- basic anatomy and physiology relating to:
  - how to recognise a person is not breathing normally
  - chest, skeleton, joints and muscles
  - response/level of consciousness
  - upper airway and effect of positional change
  - considerations in provision of first aid for specified conditions

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

© Commonwealth of Australia, 2025 Industry Skills Australia

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device.
- bag-valve-mask
- eye patch
- placebo bronchodilator and spacer device
- roller bandages
- thermometer
- triangular bandages
- workplace first Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form
- wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAID011 Provide First Aid

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty in line with first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies.

The unit applies to all persons who may be required to provide a first aid response in a range of situations, including community and workplace settings.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Respond to an emergency situation.	1.1. Recognise and assess an emergency situation. 1.2. Ensure safety for self, bystanders and casualty. 1.3. Assess the casualty and recognise the need for first aid response. 1.4. Seek assistance from emergency services.
2. Apply appropriate first aid procedures.	2.1. Perform cardiopulmonary resuscitation (CPR) in accordance ARC guidelines. 2.2. Provide first aid in accordance with established first aid principles. 2.3. Display respectful behaviour towards casualty. 2.4. Obtain consent from casualty where possible. 2.5. Use available resources and equipment to make the casualty as comfortable as possible. 2.6. Operate first aid equipment according to manufacturers' instructions. 2.7. Monitor the casualty's condition and respond in accordance with first aid principles.

© Commonwealth of Australia, 2025 Industry Skills Australia

3. Communicate details of the incident.	3.1. Accurately convey incident details to emergency services. 3.2. Report details of incident in line with appropriate workplace or site procedures. 3.3. Complete applicable workplace or site documentation, including incident report form. 3.4. Maintain privacy and confidentiality of information in line with statutory or organisational policies.
4. Review the incident.	4.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required. 4.2. Contribute to a review of the first aid response as required.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and not equivalent to HLTAID003 Provide first aid

Assessment Requirements for HLTAID011 Provide First Aid

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult, including:
  - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
  - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
  - demonstrating a rotation of single rescuer operators with minimal interruptions to compressions
  - responding appropriately in the event of regurgitation or vomiting
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
  - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- managed casualties, with the following:
  - anaphylaxis
  - asthma
  - non-life-threatening bleeding
  - choking
  - envenomation, using pressure immobilisation
  - fractures, dislocations, sprains and strains, using appropriate immobilisation techniques
  - minor wound cleaning and dressing
  - nosebleed
  - shock

© Commonwealth of Australia, 2025 Industry Skills Australia

- responded to at least one simulated first aid incident contextualised to the candidate's workplace or community setting, where the candidate has no knowledge of the casualty's condition prior to starting treatment, including:
  - identifying the casualty's illness or injury through history, signs and symptoms
  - using personal protective equipment (PPE) as required
  - providing appropriate first aid treatment
  - conveying incident details to emergency services or advising casualty on any required post incident action
  - providing an accurate verbal and written report of the incident
  - reviewing the incident.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
  - ARC guidelines relevant to the provision of first aid
  - first aid guidelines from Australian national peak clinical bodies
  - potential incident hazards and risk minimisation processes when providing first aid
  - infection control procedures, including use of standard precautions and resuscitation barrier devices
  - requirements for currency of skill and knowledge
  - first aid codes of practice
  - appropriate workplace or site procedures relevant to the provision of first aid
  - contents of first aid kits
- legal, workplace and community considerations including:
  - duty of care requirements
  - own skills and limitations
  - consent and how it relates to the conscious and unconscious casualty
  - privacy and confidentiality requirements
  - awareness of potential need for stress management techniques and available support for rescuers
- considerations when providing CPR, including:
  - upper airway and effect of positional change
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - safety and maintenance procedures for an AED
  - chain of survival
  - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
  - how to recognise that a casualty is unconscious and not breathing normally

© Commonwealth of Australia, 2025 Industry Skills Australia

  - rate, ratio and depth of compressions and ventilations
  - correct hand positioning for compressions
  - basic anatomy, physiology and the differences between adults, children and infants relating to CPR
- signs, symptoms and management of the following conditions and injuries:
  - allergic reaction
  - anaphylaxis
  - asthma
  - non-life-threatening and life-threatening bleeding
  - burns
  - cardiac conditions, including chest pain
  - choking
  - diabetes
  - drowning
  - envenomation - all current treatments
  - eye injuries
  - fractures, dislocations, strains and sprains
  - head, neck and spinal injuries
  - hypothermia
  - hyperthermia
  - minor wounds
  - nose-bleed
  - poisoning
  - seizures
  - shock
  - sharps injuries
  - stroke.

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device

© Commonwealth of Australia, 2025 Industry Skills Australia

- AED training devices
- workplace first aid kit
- placebo bronchodilator and spacer device
- different types of wound dressings and bandages
- blankets and items to treat for shock
- personal protective equipment (PPE)
- workplace injury, trauma or illness record, or other applicable workplace or site incident report form.

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

HLTAID014 Provide Advanced First Aid

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to provide an advanced first aid response to a casualty in line with first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies.

The unit applies to all persons who may be required to provide an advanced first aid response in a range of situations, including community and workplace settings.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1.Respond to an emergency situation.	1.1. Recognise and assess an emergency situation. 1.2. Ensure safety for self, bystanders and casualty. 1.3. Assess the casualty and recognise the need for first aid response. 1.4. Deploy resources to appropriate locations as required in line with appropriate workplace or site procedures. 1.5. Seek assistance from emergency services.
2. Apply appropriate first aid procedures.	2.1. Perform single-rescuer or two-rescuer cardiopulmonary resuscitation (CPR) in accordance with the ARC guidelines and availability of rescuers. 2.2. Provide first aid in accordance with established first aid principles. 2.3. Display respectful behaviour towards casualty. 2.4. Obtain consent from casualty where possible. 2.5. Use available resources and equipment to make the casualty as comfortable as possible. 2.6. Operate first aid and ancillary equipment according to manufacturers' instructions.

© Commonwealth of Australia, 2025 Industry Skills Australia

	2.7. Monitor the casualty's condition and respond in accordance with first aid principles.
3. Coordinate first aid activities until arrival of medical assistance.	3.1. Identify available resources required and establish communication links with appropriate personnel, emergency services or medical assistance as appropriate. 3.2. Deploy required resources to appropriate locations in an efficient and effective manner to ensure timely treatment of casualties. 3.3. Monitor the condition of casualties in accordance with first aid principles and workplace or site procedures. 3.4. Coordinate evacuation of casualties according to relevant evacuation procedures.
4. Communicate details of the incident.	4.1. Accurately convey incident details to emergency services. 4.2. Report details of incident in line with appropriate workplace or site procedures. 4.3. Complete applicable workplace or site documentation, including incident report form. 4.4. Maintain privacy and confidentiality of information in line with statutory or organisational policies.
5. Review the incident.	5.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required. 5.2. Arrange support services for personnel involved in the incident in accordance with relevant procedures. 5.3. Contribute to a review of the first aid response as required.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and not equivalent to HLTAID006 Provide advanced first aid.

Assessment Requirements for HLTAID014 Provide Advanced First Aid

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed in line with ARC guidelines, the unconscious, non-breathing adult including:
  - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
  - performing at least 2 minutes of ventilation and at least 2 minutes of compression during a two-rescuer procedure on an adult resuscitation manikin placed on the floor
  - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
  - responding appropriately in the event of regurgitation or vomiting
  - demonstrating a rotation of operators with minimal interruptions to compressions
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
  - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- managed casualties, with the following:
  - anaphylaxis
  - asthma
  - non-life-threatening bleeding
  - choking
  - envenomation, using pressure immobilisation
  - fractures, dislocations, sprains and strains, using appropriate immobilisation techniques
  - minor wound cleaning and dressing
  - nosebleed

© Commonwealth of Australia, 2025 Industry Skills Australia

  - shock
  - life threatening bleeding requiring use of tourniquets and haemostatic dressings
- responded to at least two simulated first aid incidents, one medical and one trauma contextualised to the candidate's workplace or community setting, where the candidate has no knowledge of the casualty's condition prior to starting treatment, including:
  - identifying the casualty's illness or injury through history, signs and symptoms
  - using personal protective equipment (PPE) as required
  - conducting a secondary survey assessment
  - assessing vital signs respirations, pulse, temperature
  - level of consciousness
  - providing appropriate first aid treatment
  - conveying incident details to emergency services or advising casualty on any required post-incident action
  - providing an accurate verbal and written report of the incident
  - reviewing the incident
- coordinated a team of people to respond to a multiple casualty incident, including:
  - conducting a basic triage
  - demonstrating effective use of resources
  - demonstrating effective planning techniques
  - moving casualties using suitable extraction method and device and safe manual handling techniques.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
  - ARC guidelines relevant to the provision of first aid
  - first aid guidelines from Australian national peak clinical bodies
  - potential incident hazards and risk minimisation processes when providing first aid
  - infection control procedures, including use of standard precautions and resuscitation barrier devices
  - requirements for currency of skill and knowledge
  - first aid codes of practice
  - appropriate workplace or site procedures relevant to the provision of first aid
  - contents of first aid kits
- legal, workplace and community considerations including:
  - duty of care requirements
  - own skills and limitations
  - consent and how it relates to the conscious and unconscious casualty
  - privacy and confidentiality requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

    - awareness of potential need for stress management techniques and available support for rescuers
- in relation to the administration of medication
    - legal requirements
    - the five rights
    - the responsibilities of the first aider
- considerations when providing CPR, including:
    - upper airway and effect of positional change
    - appropriate duration and cessation of CPR
    - appropriate use of an AED
    - safety and maintenance procedures for an AED
    - chain of survival
    - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
    - how to recognise that a casualty is unconscious and not breathing normally
    - rate, ratio and depth of compressions and ventilations
    - correct hand positioning for compressions
    - basic anatomy, physiology and the differences between adults, children and infants relating to CPR
- considerations when providing first aid, including:
    - assessment, interpretation and documentation of vital signs, including normal clinical values for respirations, temperature, pulse and level of consciousness
    - how to conduct a secondary assessment of a casualty
    - basic triage processes
    - procedures for dealing with casualties who are aged or infirm
    - procedures for first aid management when dealing with major and minor accidents in the workplace or site
    - procedures when providing first aid to children
    - use of ancillary first aid equipment
    - co-ordination of resources
    - contents of first aid kits
- signs, symptoms and management of the following conditions or injuries:
    - abdominal injuries
    - allergic reaction
    - anaphylaxis
    - asthma
    - non-life-threatening bleeding
    - life-threatening bleeding including use of tourniquets and haemostatic dressings
    - burns
    - cardiac conditions, including chest pain

© Commonwealth of Australia, 2025 Industry Skills Australia

  - childbirth
  - choking
  - crush injuries
  - diabetes
  - drowning
  - ear injuries and bleeding from the ear
  - envenomation - all current treatments
  - eye injuries
  - fractures, dislocations, strains and sprains
  - head, neck and spinal injuries
  - hypothermia
  - hyperthermia
  - minor wounds
  - nose-bleed
  - poisoning
  - seizures
  - shock
  - sharps injuries
  - stroke
- substance misuse, including prescription and illicit drugs and alcohol
- psychological impacts of first aid incidents on rescuers and how to seek help.

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training devices
- haemostatic dressings
- haemostatic wound packing trainer
- placebo bronchodilator and spacer device
- thermometers
- tourniquet trainer
- tourniquets

© Commonwealth of Australia, 2025 Industry Skills Australia

- different types of wound dressings and bandages
- blankets and items to treat for shock
- personal protective equipment (PPE)
- workplace injury, trauma or illness record, or other applicable workplace or site incident report form, which includes space for recording vital signs of casualties
- workplace first aid kits
- immobilisation and extrication devices.

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

HLTWHS006 Manage personal stressors in the work environment

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.

Application

This unit describes the skills and knowledge required to maintain health and wellbeing by preventing and managing personal stress.

This unit applies to work in a range of health and community services settings, in particular work roles that operate in high stress situations and circumstances.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements define the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element*
1. Develop strategies to manage personal stress	1.1 Recognise sources of stress in own job role 1.2 Recognise triggers and own response to stress 1.3 Identify strategies to effectively prevent, reduce and manage stress 1.4 Identify internal and external options and resources for

© Commonwealth of Australia, 2025 Industry Skills Australia

	additional support
	1.5 Develop a personal stress management plan that responds to identified stressors and triggers
2. Implement stress management strategies	2.1 Use strategies from personal stress management plan that address personal triggers and stressors
	2.2 Organise own workload to minimise stress and inform relevant personnel of any variations and difficulties affecting work requirements
	2.3 Identify and adopt strategies to balance work/life priorities
3. Evaluate stress reducing strategies	3.1 Monitor and review effectiveness of stress management strategies
	3.2 Adjust strategies not meeting the desired outcome and recognise when additional resources and/or support is needed
	3.3 Access internal or external options and resources for additional support to meet desired outcomes of the stress management plan

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to *performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTWHS006 Manage personal stressors in the work environment

Modification History

Release	Comments
Release 1	This version was released in *HLT Health Training Package release 2.0* and meets the requirements of the 2012 Standards for Training Packages. Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- developed, implemented and reviewed 1 personal stress management plan that includes identified sources, triggers and responses to stress
- used strategies from personal stress management plan to manage 2 stressful situations in the workplace involving colleagues and/or clients

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- sources of stress and how they manifest in health and/or community services work environment including:
  - complex client behaviour (emotional, aggressive, cognitive deficit, non-compliance)
  - grief and loss experienced by workers
  - exposure to stressful working conditions and stressful incidents
- work planning and prioritisation techniques e.g. time management strategies
- legal rights relating to the Fair Work Act
- services available for referral, both within the organisation and in the community e.g. informal/formal debriefing sessions and/or workplace counselling

© Commonwealth of Australia, 2025 Industry Skills Australia

- self-care techniques including:
  - impact of exercise, diet and nutrition on physical health
  - work/life balance strategies
  - complementary and alternative health options

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

ICPPRN497 Work with digital information

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to determine the scope and level of engagement with digital information needed in the job role, work with digital information effectively, solve problems with digital information, and maintain currency of own digital knowledge.

It applies to any individual working with digital information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Printing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine requirement to work with digital information	1.1 Scope and level of requirement to work with digital information within own work role is correctly identified 1.2 Specific aspects of work tasks that require digital literacy are recognised

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Engage with digital information	2.1 Digital information is used and shared responsibly according to established standards and protocols 2.2 Correct work processes are selected based on knowledge of digital work processes and general features of digital devices 2.3 Different digital formats and their associated requirements are correctly recognised and acted on
3. Solve problems with digital information	3.1 Problems with digital information are promptly identified, and possible reasons are explored 3.2 Nature of problem is identified based on knowledge of digital formats 3.3 Questions that need to be asked, and steps needed to solve the problem are correctly identified 3.4 Sources of information and assistance that could assist in resolving the problem are correctly identified 3.5 Information is accessed, correctly interpreted and used to resolve the problem
4. Maintain currency of digital knowledge	4.1 Opportunities to update knowledge about working digital information are correctly identified 4.2 Opportunities are accessed and used to improve quality of own work 4.3 Updated information is shared with others

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	3.4, 3.5	• Recognises and interprets text to establish job requirements from information
Oral Communication	1.1-2.5, 3.1, 4.2	• Speaks clearly using appropriate vocabulary, tone and pace to report faults and discrepancies
Navigate the world of work	1.1, 1.2, 2.1,	• Recognises and follows explicit and implicit protocols and meets expectations associated with own role

© Commonwealth of Australia, 2025 Industry Skills Australia

Interact with others	4.3	• Understands what to communicate, with whom and how, in routine work situations
Get the work done	2.1-2.3, 3.1-3.5	• Takes responsibility for identifying own work requirements • Recognises and takes responsibility for addressing predictable, and some less predictable, problems in familiar work contexts • Utilises information technology and software to work with digital information

Unit Mapping Information

Assessment Requirements for ICPPRN497 Work with digital information

Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- correctly identify scope and level of engagement with digital information required by the job role
- complete at least THREE different work projects involving the appropriate and correct use and manipulation of digital information as required by the job role
- follow a structured process to solve at least THREE different types of problems with digital information.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain fundamentals of digital information:
  - what it is
  - how it is created
  - the language of digital information
  - how it is shared (including basic networking principles and the cloud)
  - security considerations
  - archiving and storage requirements
- explain different levels of engaging with digital information, the scope of each level and requirements of different job roles:
  - accessing
  - using
  - understanding
  - creating

© Commonwealth of Australia, 2025 Industry Skills Australia

- explain general purpose and current use of different types of digital devices
- outline nature and key features of different types of digital media, including components, and opportunities and constraints of each:
  - text
  - images
  - video
  - sound
  - databases
  - multimedia
  - interactive media
  - social media
- outline different types of digital file formats, what they are used for, and how they might need to be adapted for different purposes
- outline national and international standards and protocols governing creation and use of digital information
- outline key features of being an effective digital citizen in and outside the workplace:
  - rights and responsibilities
  - ethical considerations
  - copyright
  - privacy
  - safety and risk management
- outline trends in creation and use of digital information and digital processes in context of own work role and industry sector
- describe steps in a logical and deliberate problem-solving process that can be used when working with digital information
- list sources of information and assistance when working with digital information
- discuss ways to maintain currency of knowledge around use and management of digital information.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the printing field of work and include access to:

- special purpose tools, equipment and materials
- industry software packages.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT104 Use digital devices

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to use a range of digital devices, such as a digital camera, video camera, or personal digital assistant (PDA) device.

It applies to individuals who require entry level information and communications technology (ICT) knowledge and literacy skills to support their work in a home office or small office environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to use the digital device	1.1 Review the instruction manual and ensure identified components are available 1.2 Identify the physical components of the digital device 1.3 Turn on and follow access procedures to activate the digital device 1.4 Alter the digital device settings to best suit intended use 1.5 Configure power management settings where appropriate to

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	minimise power consumption, as an environmentally sustainable measure
2. Set up and use the digital device	2.1 Identify and set the basic operating, security and menu settings 2.2 Navigate and manipulate the screen environment 2.3 Customise screen icons and access to applications where applicable 2.4 Use the digital device, and save and edit output where applicable 2.5 Identify more advanced features available and use as required
3. Access and use basic connectivity devices	3.1 Connect to external digital devices, such as computer devices or storage devices, to retrieve, copy, move and save information 3.2 Check physical connectivity of computer devices or storage devices to ensure operation and performance 3.3 Connect to a printer either through a computer device or directly, and use printer settings and print data 3.4 Access audio-visual devices to view and play a multimedia file
4. Shut down digital device	4.1 Save current work and back up important data 4.2 Close open programs on the digital device and any computer device or storage device 4.3 Shut down digital devices, according to manufacturer instructions

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.5, 2.1-2.5, 3.1, 3.4, 4.3	• Reviews on-line and hard-copy text, and interprets and comprehends symbols, text, numbers and letters to determine and adhere to requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

Get the work done	1.1-1.5, 2.1-2.5, 3.1-3.4, 4.1-4.3	• Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks • Plans a range of routine tasks with familiar goals and outcomes

Assessment Requirements for ICTICT104 Use digital devices

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- turn on a digital device
- use the menu features and navigate a graphical user interface
- use device features to perform tasks
- save the results of work.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must :

- outline the capabilities and connectivity requirements of relevant:
  - audio-visual devices
  - peripheral devices
  - storage devices
- list basic security functions
- explain basic software operation and associated applications
- explain digital device functions
- explain digital device settings.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry and include access to:

- digital devices

© Commonwealth of Australia, 2025 Industry Skills Australia

- computer
- storage devices
- printer
- device-specific application currently used in industry.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT804 Direct ICT in a supply chain

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to direct the effective use of information and communications technology (ICT), in support of critical supply chain processes.

It applies to individuals who work in high-level management positions and lead the analysis, implementation and management of emerging, and converging, ICTs as they are integrated into the business process to support the organisational strategic goals of medium to large organisations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify the current or proposed supply chain infrastructure	1.1 Critically evaluate the key principles of supply chain management 1.2 Identify the supply chain processes in the organisation, from operational and business perspectives 1.3 Identify and review, management and operational links to external organisations 1.4 Identify current supply chains, network processes, service

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	and performance objectives
2. Direct ICT strategy to support supply chain processes	2.1 Develop a strategy to align ICT technical resources with the identified supply chain processes 2.2 Build a communication model to improve the integration, and sharing of, critical business information between decision-makers and the operations and technical divisions 2.3 Identify the key performance indicators that will track progress against the strategic company objectives
3. Lead the risk management of supply chain ICT support services	3.1 Lead the development of a strategy for the risk assessment of internal, and external, supply chain processes 3.2 Assess the risk assessment strategy, to ensure that it complies with organisational policy 3.3 Mitigate identified risks
4. Direct the quality assurance processes for supply chain ICT support services	4.1 Implement strategies to monitor the performance levels of supply chain ICT support services 4.2 Ensure the continuous improvement of supply chain ICT support services

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 1.4, 2.3, 3.2	• Identifies, analyses and evaluates complex textual information relevant to the job role
Writing	2.1, 2.2, 2.3, 3.1, 4.1, 4.2	• Selects the document structure, language, grammar and terminology to suit the specific subject matter, and audience, when developing strategic plans, a supply chain model, and a communication model
Oral Communication	1.2, 1.3, 1.4, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 4.1, 4.2	• Obtains information by using effective listening and probing, and open questioning technique • Uses grammatical structures, specialised language, and the appropriate tone, pitch and body language to achieve precise meaning, when articulating requirements and providing feedback

© Commonwealth of Australia, 2025 Industry Skills Australia

Numeracy	2.1, 2.3, 3.1, 3.2, 4.1, 4.2	• Uses a range of statistical, mathematical and financial calculations, formulae and functions, together with appropriate software tools, to interpret numerical data relating to performance objectives, key performance indicators, risk assessment and continuous improvement
Navigate the world of work	3.2	• Recognises and responds to organisational policies and protocols within the workplace
Get the work done	1.1, 1.2, 1.3, 1.4, 2.1, 2.2, 2.3, 3.3, 4.2	• Considers the strategic and operational potential of digital technology to achieve work goals, enhance work processes, create opportunities, and reduce risks • Draws on a broad understanding of the context, and uses a combination of analysis and intuition to decide whether an idea is worth developing, and implementing • Uses a nuanced understanding of context to recognise anomalies and subtle deviations to normal expectations, focusing attention on critical issues and variables, and filtering out any peripheral issues • Develops plans for complex high-impact activities with strategic implications

Assessment Requirements for ICTICT804 Direct ICT in a supply chain

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop strategic directions for supply chain management in alignment with the organisational goals
- develop a strategy and key performance indicators for supply chain processes
- lead the development of a risk analysis strategy for a supply chain
- ensure that procedures identifying where risk occurs, and the measures needed to mitigate such risk, are developed and implemented
- ensure that a continuous improvement plan, for the information and communications technology (ICT) support of supply chain processes, is developed and implemented.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the typical supply chain models, and describe their management and business process integration
- discuss business continuity issues for the organisation
- describe the impact on the supply chain of the organisation’s industry and current functionality, including the existing data and information systems
- summarise the organisation's internal and external dependencies, and interdependencies
- review and outline the organisational policies and procedures, including the risk-management strategy
- describe past and current, internal, external and industry disruptions that may impact on the supply chain
- outline the relevant legislation and regulations that impact on business continuity including:

© Commonwealth of Australia, 2025 Industry Skills Australia

- workplace health and safety (WHS)
- environment
- duty of care
- contracts
- business and company law
- freedom of information
- industrial relations
- privacy and confidentiality
- due diligence
- records management.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general ICT industry, and include access to:

- relevant strategic-level enterprise, including:
  - planning
  - financial
  - ICT infrastructure
- codes of practice, legislation and regulations
- organisational policies and procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

MARC022 Perform mooring and unmooring activities

Modification History

Release 1. New unit of competency.

Application

This unit involves the skills and knowledge required to carry out mooring and unmooring activities according to relevant requirements and regulations.

This unit applies to people working in the maritime industry as a Linesperson.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

C – Equipment Operations

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare a berth	1.1 Relevant documentation and records are identified and accessed as required
	1.2 Positioning information is obtained, checked and confirmed

© Commonwealth of Australia, 2025 Industry Skills Australia

			as accurate
		1.3	Bridge marker is set
		1.4	Briefing is obtained and interpreted on issues related to mooring or unmooring operation
		1.5	Communications equipment is prepared and set to correct channels
		1.6	Berth conditions are checked, and made clear and ready for mooring and unmooring
		1.7	Portainer cranes and gantries/loaders are correctly positioned for berthing of vessel
		1.8	Safety concerns are communicated to pilot of vessel with due care not to interfere with tug and vessel communications
2	**Receive heaving line from mooring launch**	2.1	First lines are received from mooring launch according to operational procedures and pilot directions
		2.2	Assistance is provided in pulling mooring line ashore and making it fast to applicable bollard/hooks
		2.3	Required precautions and safety procedures are followed during receival operations
		2.4	Correct method for crossing mooring lines over and between another vessel's mooring lines is followed
		2.5	When another vessel occupies the bollard, mooring line is dipped as required
3	**Receive heaving lines from vessel**	3.1	First lines are received and are made fast to appropriate bollards/ hooks
		3.2	Two headlines and two sternlines are made available each to two different bollards/hooks
		3.3	Spring lines from forward and aft are received from vessel and are attached to applicable bollards/hooks
		3.4	Additional lines are received from vessel and are attached to applicable bollards/hooks
		3.5	Correct method for crossing mooring lines over and between another vessel's mooring lines is followed
		3.6	When another vessel occupies the bollard, mooring line is

© Commonwealth of Australia, 2025 Industry Skills Australia

			dipped as required
		3.7	Safe distance from snapback zones and demarcated area is maintained during line tensioning
4	**Return heaving line to vessel**	4.1	Vessel crew is made aware of planned heaving line return operations
		4.2	Lines are returned according to operational procedures
		4.3	Required precautions and safety procedures are followed during heaving line return operations
5	**Land a gangway**	5.1	Precautions are taken to ensure all personnel are well clear of vicinity of gangway
		5.2	Vehicle is used to locate gangway in correct position in a safe and efficient manner
6	**Let go of vessel**	6.1	Vessel crew is made aware of intentions to let go
		6.2	Singling up processes are carried out according to operational procedures and required safety precautions
		6.3	Due care is taken during singling up processes to ensure all mooring lines are kept clear of propeller
		6.4	Due care is taken when waiting for order for remaining lines to be released, to stand clear of remaining lines because of tension to which lines may be subjected
		6.5	Once order is given, remaining lines are released according to operational procedures and required safety precautions
		6.6	Stand clear procedures are immediately implemented when vessel crew inadvertently heaves on a line being handled by the shore-side team
		6.7	Required precautions and safety procedures are followed during unmooring operations

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Industry Skills Australia

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Relevant documentation and records include one or more of the following:	• mooring and unmooring plans, procedures, checklists and instructions • relevant maritime authority instructions • relevant sections of maritime regulations concerning mooring and unmooring operations • reports and records of mooring and unmooring operations or safety incidents • rope and equipment manufacturer instructions and procedures • safety instructions and procedures
Issues related to mooring or unmooring operations include one or more of the following:	• bollard/hook and capstan numbers • special circumstances
Made clear and ready for mooring includes one of the following:	• removing obstructions • stopping any work that creates excessive dust or noise

Safety precautions include:	• checking:
	  • own personal fitness and medical wellbeing
	  • whereabouts of edge of wharf
	  • whereabouts of other members of mooring and unmooring team
	• confirming availability of a personal flotation device on arrival at mooring and unmooring operation
	• keeping clear of snapback zone and demarcated areas
	• keeping work area hazard-free
	• obtaining and using required PPE (such as safety footwear, safety helmet, suitable gloves, safety vest and reflective clothing, personal life vest, safety glasses)
	• removing rings from fingers to avoid them being caught on steel wire ropes
	• wearing suitable clothing

Mooring or unmooring operations include	• landing a gangway • positioning lines launch • positioning mooring lines • preparing a berth • receiving mooring lines under a vessel • receiving heaving line from: • a launch

© Commonwealth of Australia, 2025 Industry Skills Australia

- a vessel
- returning heaving line to a vessel
- towing mooring lines using vehicles
- unmooring and letting go a vessel
- working:
  - by day or night
  - in normal and emergency situations
  - under any permissible conditions of weather
  - at various shore-side terminals and wharves

Unit Mapping Information

This unit replaces and is equivalent to MARC1001A Carry out shore-based mooring and unmooring operations.

MARC1001A replaces and is equivalent to TDMMR5607A Carry out shore-based mooring and unmooring operations.

Assessment Requirements for MARC022 Perform mooring and unmooring activities

Modification History

Release 1. New unit of competency.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- applying relevant work health and safety (WHS)/occupational health and safety (OHS) requirements and work practices
- being aware of own ability and limits to rectify irregularities and faults
- communicating effectively with other personnel when mooring and unmooring a vessel using standard nautical terms
- complying with relevant maritime regulations and International Maritime Organization (IMO) Conventions and Codes, including the relevant sections of the Australian Maritime Safety Authority (AMSA) Marine Orders as they apply to mooring and unmooring operations on ocean-going vessels
- ensuring behaviour reflects relevant current legislative and regulatory requirements
- following all orders carefully and systematically
- following work instructions
- handling mooring lines on deck of lines launch, flaking and positioning of mooring lines
- handling rope appropriately and correctly:
  - storing and caring for ropes and lines
  - tying knots such as bowline, reef knot, overhand knot, figure of eight knot, sheet bends and clove hitch and splicing and whipping, round turn two half hitches
  - applying a chain stopper to a wire rope
  - heaving on a line in collaboration with other members of a mooring team
  - applying a stopper to a synthetic fibre rope
  - applying a chain stopper to a natural cordage rope
  - attaching a line to a bollard or bitt with all lines in correct order such as up through the eye
  - flaking down a rope
- handling wire mooring lines in lines launch
- identifying and correctly using:
  - various types of ropes, steel wires and mooring equipment
  - personal protective equipment (PPE)

© Commonwealth of Australia, 2025 Industry Skills Australia

- implementing port and vessel security procedures
- initiating timely action in response to defects or damage
- interpreting and following procedures for mooring and unmooring operations, including safety instructions and precautions
- recognising dangers and hazards before and during mooring and unmooring operations, and taking appropriate action to report and/or rectify them
- recognising problems that may occur during mooring and unmooring operations and taking appropriate action to report and/or resolve them
- taking proper care of ropes and mooring equipment
- using various vehicles for towing mooring lines, as required
- working effectively as a member of a mooring and /or unmooring team.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- awareness of line launches propeller when towing mooring lines
- communications techniques and equipment required during mooring and unmooring operations
- correct method of crossing ship's mooring lines over and or between other vessel's mooring lines already berthed
- dangers associated with mooring systems:
  - being hit by a heaving line being thrown down from a vessel
  - stepping inside the bight of a line
  - being struck by a parting line
  - mixing rings and wire rope
  - falling off the edge of the wharf into the water
  - back strain from carrying a line, heaving on a line or heaving on a line
  - 'snap back' when a line breaks
  - trip hazards such as crane lines
- factors that affect mooring and unmooring operations, including the effects of wind, weather, tides, sea conditions, currents, draft changes and surges from passing vessels on mooring and unmooring operations
- hazards and problems, and appropriate preventative and remedial action and solutions
- maritime regulations applicable to mooring and unmooring vessels
- methods for mooring and unmooring a vessel, including all required rope handling techniques and precautions
- operational characteristics of different types of lines, equipment and facilities used in mooring and unmooring operations

© Commonwealth of Australia, 2025 Industry Skills Australia

- operational procedures and layouts of various types of shore-side loading and discharging terminals and wharves
- PPE required for use during mooring and unmooring operations
- procedures for assessing stresses on lines and gear used in mooring and unmooring operations
- reason for and correct method of dipping mooring line
- relevant manufacturer guidelines relating to use of machinery, including instructions on equipment capability and limitations
- relevant sections of the Standards of Training, Certification & Watchkeeping (STCW) 95 and AMSA Marine Orders
- relevant work WHS/OHS codes of practice, policies and procedures
- safety drills and equipment used for lines launch
- snapback zone and demarcated areas
- standard nautical terms in relation to mooring activities and related equipment
- technique for releasing fowled mooring lines under wharfs and around ship anchors.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations or where this is not available, in simulated workplace operational situations or an industry-approved marine operations site that replicate workplace conditions where mooring and unmooring activities can be demonstrated.

Resources for assessment include access to:

- a range of relevant exercises, case studies and/or other simulated practical and knowledge assessments
- relevant documentation including workplace procedures, regulations, codes of practice and operation manuals
- tools, equipment, materials and PPE currently used in industry
- bridge marker:
  - at night vehicle with flashing hazard light
  - flag
- vehicles used for towing mooring lines.

MARE002 Communicate during mooring and unmooring activities

Modification History

Release 1. New unit of competency.

Application

This unit involves the skills and knowledge required to communicate effectively with others involved in mooring and unmooring activities.

This unit applies to people working in the maritime industry as a Linesperson.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare to communicate with	1.1 Work health and safety (WHS)/occupational health and safety (OHS) procedures are followed

© Commonwealth of Australia, 2025 Industry Skills Australia

	others	1.2	Prior to mooring or unmooring activities, all radios and other communications equipment is checked to confirm they are functioning correctly
		1.3	Batteries are checked to confirm they are operational and fully charged
		1.4	Relevant documentation and records are identified and accessed as required
		1.5	Radios are set to operate on channels required for mooring and unmooring
		1.6	Faulty communications equipment is reported, rectified or replaced
2	**Communicate with others**	2.1	Correct communication is maintained with others involved in mooring and unmooring activities, throughout mooring and unmooring activities
		2.2	Clear and concise verbal and non-verbal communication is used and appropriate action is taken to confirm others have correctly heard and interpreted the communication
		2.3	VHF radio communication is conducted using required procedures and protocols
		2.4	Appropriate methods are used to communicate with foreign crews on vessels
		2.5	Safety concerns are promptly and clearly communicated to pilot prior to and during, mooring and unmooring activities
		2.6	Due care is taken when using radio communication equipment, so as not to interfere with operational communication between tug crews and pilot of vessel

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Industry Skills Australia

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Safety procedures include:	• checking:
	  • own personal fitness and medical wellbeing
	  • whereabouts of edge of wharf
	  • whereabouts of other members of mooring/unmooring team
	• confirming availability of a personal flotation device on arrival at mooring operation
	• keeping clear of snapback zone and demarcated areas
	• keeping work area hazard-free
	• obtaining and using required personal protective equipment (such as safety footwear, safety helmet, suitable gloves, safety vest and reflective clothing, personal life vest, safety glasses)
	• removing rings from fingers to avoid them being caught on steel wire ropes

Relevant documentation and records include one or more of the following:	• maritime authority instructions • mooring and unmooring plans, procedures, checklists and instructions • relevant sections of maritime regulations concerning mooring and unmooring operations • reports and records of mooring operations or safety incidents • rope and equipment manufacturer instructions and procedures • safety instructions and procedures

Communication includes one or more of the following:	• oral communication with mooring supervisor or Master and other members of mooring or unmooring team
	• radio between mooring supervisor (shore-side) and:
	  • pilot on vessel
	  • wharf mooring personnel (bow) forward
	  • wharf mooring personnel (stern) aft
	• VHF radio between:
	  • tug crew and pilot on vessel
	  • tug crew and mooring launch crew
	  • mooring launch crew and pilot on vessel
	• visual contact and hand signals

Others involved in mooring and unmooring activities include one or more of the following:	• lines launch driver • mooring launch crew • mooring master or supervisor • mooring team • pilot and crew on vessel being moored or unmoored and tug • shorelines crew on wharf

© Commonwealth of Australia, 2025 Industry Skills Australia

- tug crew
- vessel crew

Unit Mapping Information

This unit replaces and is equivalent to MARE1001A Communicate during shore-based mooring and unmooring operations.

MARE1001A replaces and is equivalent to TDMME907A Communicate during shore-based mooring and unmooring operations.

Assessment Requirements for MARE002 Communicate during mooring and unmooring activities

Modification History

Release 1. New unit of competency.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- applying relevant work health and safety (WHS)/occupational health and safety (OHS) requirements and work practices
- being aware of own ability and limits to rectify irregularities and faults
- checking functioning of radios and communications equipment
- communicating effectively with others when mooring and unmooring a vessel
- complying with relevant maritime regulations and International Maritime Organization (IMO) Conventions and Codes, including relevant sections of Australian Maritime Safety Authority (AMSA) Marine Orders as they apply to mooring and unmooring operations on ocean-going vessels
- ensuring behaviour reflects relevant current legislative and regulatory requirements
- following all orders carefully and systematically
- following work instructions
- identifying and correctly using various types of radios and other relevant communications equipment
- implementing port and vessel security procedures
- initiating timely action in response to defects or damage
- interpreting and following procedures for communicating with others during mooring and unmooring operations
- recognising and responding appropriately to cultural differences in the workplace
- recognising problems that may occur when communicating with others during mooring and unmooring operations and taking appropriate action to report and resolve these problems
- taking proper care of radios and communications equipment
- testing and recharging batteries used in radios and other communications equipment
- using hand held VHF radios correctly when communicating with ship’s crew, pilot and wharf supervisor.

© Commonwealth of Australia, 2025 Industry Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- basic principles and procedures for marine VHF radio communication:
  - by day or night
  - in normal and emergency situations
  - under any permissible conditions of weather
  - at a range of shore-side terminals and wharves
- communications techniques and equipment required during mooring and unmooring operations, including protocols for radio use
- correct use of handheld VHF radio
- factors that affect communication during mooring and unmooring operations, such as effects of noise, faulty equipment, discharged batteries, wind, weather
- maritime regulations applicable to communication during mooring and unmooring of vessels
- methods of visual contact and hand signals
- operational characteristics of different types of radios and other forms of communications equipment used in mooring and unmooring operations
- practices and procedures for communicating with others during mooring and unmooring operations
- purpose of silence periods when operating radio equipment
- radio calling and replying procedures
- relevant manufacturer instructions relating to use of radios and other communications equipment
- relevant maritime and radio communications regulations
- relevant port and vessel security procedures, including operating radio communications channel instructions
- relevant WHS/OHS codes of practice, policies and procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

© Commonwealth of Australia, 2025 Industry Skills Australia

Assessment must occur in workplace operational situations or where this is not available, in simulated workplace operational situations or an industry-approved marine operations site that replicate workplace conditions.

Resources for assessment include access to:

- a range of relevant exercises, case studies and/or other simulated practical and knowledge assessments
- relevant documentation including workplace procedures, regulations, codes of practice and operation manuals
- tools, equipment, materials and personal protective equipment currently used in industry.

MARF017 Follow work health and safety, and emergency procedures during mooring and unmooring activities

Modification History

Release 1. New unit of competency.

Application

This unit involves the skills and knowledge required to interpret and follow work health and safety (WHS)/occupational health and safety (OHS) policy and procedures, and emergency procedures during mooring and unmooring activities.

This unit applies to people working in the maritime industry as a Linesperson as part of a mooring and unmooring team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Operational Quality and Safety

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Industry Skills Australia

1	**Follow safety and hazard control procedures**	1.1	Tests and inspections of ropes and equipment are conducted according to regulations and company procedures
		1.2	Hazards are identified and action is taken to eliminate or minimise risk to personnel, port facilities, vessel and the environment
		1.3	Safety precautions and hazard minimisation procedures and regulations are followed at all times during mooring or unmooring operations
		1.4	Safe distance from snapback zones and demarcated area is maintained during tensioning and slackening of lines
		1.5	Action is taken to secure vessel and to maintain safety of vessel and persons involved, in a mooring or unmooring incident
2	**Use personal protective equipment**	2.1	Personal protective equipment (PPE) is obtained and checked prior to commencement of operations according to company WHS/OHS policy and procedures
		2.2	PPE is correctly used as required
		2.3	PPE is correctly stored after use according to company procedures
3	**Follow safety and emergency procedures**	3.1	Wharf, port and vessel emergency procedures are accessed and implemented
		3.2	Safety drills are conducted according to company procedures
		3.3	Escape routes, and internal and external communications and alarm systems are correctly used according to regulatory requirements and established port procedures
		3.4	Emergency communications, and alarm signals and systems are used according to port emergency procedures and regulatory requirements

© Commonwealth of Australia, 2025 Industry Skills Australia

4	**Report safety incidents and emergencies**	4.1 Safety incidents or emergencies that occur during mooring or unmooring operations are correctly and accurately recorded according to regulations and company procedures
		4.2 Required reports on safety incidents or emergencies that occur during mooring or unmooring operations are prepared and referred to designated personnel according to regulations and company procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Hazards include one or more of the following:	• crane movement • faulty communications equipment • inadequate lighting • ship mooring lines and wires in poor condition • wharf traffic

Personnel include one or more of the following:	• mooring:
	  • launch and crew
	  • mooring supervisor
	  • wharf mooring personnel (bow) forward
	  • wharf mooring personnel (stern) aft
	• pilot
	• tug crew/s
	• vessel crew

Safety precautions include:	• checking:
	  • own personal fitness and medical wellbeing
	  • whereabouts of edge of wharf
	  • whereabouts of other members of mooring/unmooring team
	• confirming availability of a personal flotation device on arrival at mooring operation
	• keeping work area hazard-free

© Commonwealth of Australia, 2025 Industry Skills Australia

	• obtaining and using required personal protective equipment (such as safety footwear, safety helmet, suitable gloves were appropriate, safety vest and reflective clothing, personal life vest, safety glasses) • removing rings from fingers to avoid them being caught on steel wire ropes • wearing suitable clothing
Hazard minimisation procedures include:	• ensuring ropes and equipment have been tested and are in good condition • placing warning signage in appropriate places • testing equipment prior to operation

Mooring or unmooring operations include one or more of the following:	• landing a gangway
	• preparing a berth
	• receiving heaving line from:
	  • a launch
	  • a vessel
	• returning heaving line to a vessel
	• unmooring and letting go a vessel
	• working:
	  • by day or night
	  • in normal and emergency situations
	  • under any permissible conditions of weather
	  • at various shore-side terminals and wharves

Unit Mapping Information

This unit replaces and is equivalent to MARF1004A Follow work health and safety, and emergency procedures during shore-based mooring operations.

MARF1004A replaces and is equivalent to TDMMF6007A Follow OH&S and emergency procedures during shore-based mooring operations.

Assessment Requirements for MARF017 Follow work health and safety, and emergency procedures during mooring and unmooring activities

Modification History

Release 1. New unit of competency.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- communicating effectively with other personnel when mooring and unmooring a vessel
- handling rope appropriately and correctly:
  - storing and caring for ropes and lines
  - tying knots such as bowline, reef knot, overhand knot, figure of eight knot, sheet bends, clove hitch, splicing and whipping, round turn two half hitches
  - applying a chain stopper to a wire rope
  - heaving on a line in collaboration with other members of a mooring team
  - applying a stopper to a synthetic fibre rope
  - applying a chain stopper to a natural cordage rope
  - attaching a line to a bollard or bitt with all lines in correct order such as up through the eye (dipping)
  - flaking down a rope
  - forming a bight
- identifying and correctly using:
  - personal protective equipment (PPE)
  - various types of ropes, steel wires and mooring equipment
- interpreting and following work health and safety (WHS)/occupational health and safety (OHS), and safety management procedures for mooring and unmooring operations, including safety instructions and precautions
- recognising dangers and hazards before and during mooring and unmooring operations, and taking appropriate action to report and rectify them
- recognising safety-related problems that may occur during mooring and unmooring operations, and taking appropriate action to report and resolve these problems
- recording and reporting safety incidents and emergencies
- reporting and/or rectifying hazards, safety incidents or emergencies promptly
- responding to individual differences and applying acceptable behaviour when working with others

© Commonwealth of Australia, 2025
Industry Skills Australia

- working safely as a member of a mooring and unmooring team
- working systematically with required attention to detail and safety requirements.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- dangers associated with mooring and unmooring duties:
  - being hit by a line being thrown down from a vessel
  - stepping inside the bight of a line
  - being struck by a parting line
  - mixing rings and wire rope
  - falling off the edge of the wharf into the water
  - back strain from carrying a line, heaving on a line
  - ‘snap back’ in the event of a line breaking
  - trip hazards such as crane lines
- hazards and safety-related problems that may occur during mooring and unmooring operations, and appropriate preventative and remedial action and solutions
- individual differences and acceptable behaviour when working with others
- legal rights and responsibilities of management, crew and others
- methods for safely mooring and unmooring ocean-going vessels
- procedures for calculating stresses on lifting gear used in cargo handling operations
- relevant documentation and records:
  - mooring and unmooring plans, procedures, checklists and instructions
  - relevant sections of maritime regulations concerning mooring and unmooring operations
  - rope and equipment manufacturer instructions and procedures
  - safety instructions and procedures
  - instructions of relevant maritime authorities
  - reports and records of safety incidents or emergencies
- relevant port and vessel safety and security requirements and regulations
- relevant WHS/OHS legislation, codes of practice, policies and procedures
- reporting requirements for safety incidents or emergencies that occur during mooring or unmooring operations
- safety drills and equipment used for lines launches
- safety instructions for using ropes and other equipment during mooring and unmooring operations
- safety management procedures for mooring and unmooring ocean-going vessels
- use, type and application of PPE required when undertaking mooring and unmooring

activities.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations or where this is not available, in simulated workplace operational situations or an industry-approved marine operations site that replicates workplace conditions.

Resources for assessment include access to:

- a range of relevant exercises, case studies and/or other simulated practical and knowledge assessments
- relevant documentation including workplace procedures, regulations, codes of practice and operation manuals
- tools, equipment currently used in industry including:
  - VHF radios
  - ropes and heaving lines provided by shore
  - shackles
  - wires
- PPE including:
  - personal life vest
  - reflective clothing
  - safety footwear
  - helmet
  - vest
  - suitable gloves
  - protective safety glasses.

Practical assessment should be combined with targeted questioning to assess required knowledge. Performance should be demonstrated consistently over time and in a suitable range of contexts.

MEM12023A Perform engineering measurements

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers performing measurement skills requiring straightforward use of mechanical measuring devices and associated calculations.

Application of the Unit

Application of the unit	This unit covers straightforward measurement using devices which incorporate visual indications representing units of measurement. It applies to the use of measuring devices in a range of manufacturing, engineering and related environments. It includes, where required, adjustment of measuring devices through simple means and typically includes zeroing or scale adjustment. Measurements may be expressed in metric or imperial units. All measurements are undertaken to standard operating procedures. Electrical/electronic devices used are those not requiring the connection or disconnection of circuitry. Work is undertaken autonomously or part of team environment, in the field, work station or workshops. For straightforward use of comparison or pre-set measuring devices, Unit MEM12001B (Use comparison and basic measuring devices) should be accessed. **Band**: **A** **Unit Weight**: **5**

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Select appropriate device or equipment	1.1. Measurement requirements are determined from specifications. 1.2. Appropriate device or equipment is selected according to standard operating procedures, to achieve required outcome.
2. Obtain measurements using a range of measuring devices	2.1. Correct and appropriate measuring technique is used. 2.2. Measurements are accurately obtained .

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.3. Dimensions are determined or verified using basic calculations, where required.
3. Maintain measuring devices	3.1. Routine care and storage of devices is undertaken to manufacturers' specifications or standard operating procedures. 3.2. Routine adjustments to devices are made and checked.
4. Communicate measurements as required	4.1. Measurements are accurately recorded, where required. 4.2. Freehand sketch which depicts required information is prepared, as required.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- selecting the appropriate measuring device for given measuring tasks
- using appropriate measuring technique
- reading all measurements taken accurately to the finest graduation of the selected measuring device
- handling and storing measuring devices in accordance with manufacturers' specifications or standard operating procedures
- verifying all measuring devices before use
- making, where appropriate, routine adjustments to measuring devices
- reading, interpreting and following information on written job instructions, specifications, standard operating procedures, charts, lists, drawings and other applicable reference documents
- planning and sequencing operations
- checking and clarifying task related information
- checking for conformance to specifications
- undertaking numerical operations involving addition, subtraction, multiplication, division, fractions and decimals within the scope of this unit
- preparing drawings as required

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
Required knowledge
Look for evidence that confirms knowledge of: • correct application of a range of measuring devices • correct and appropriate measuring technique for a range of measuring devices • addition, subtraction, multiplication, division, fractions, decimals to the scope required by this unit • procedures for handling and storing a range of measuring devices • procedures for adjusting and zeroing a range of measuring devices • methods of communicating measurements by drawings, as required • safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competency in this unit must be able to perform engineering measurements.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate. This unit could be assessed in conjunction with any other units addressing the safety, quality, communication,

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE	
	materials handling, recording and reporting associated with performing engineering measurements or other units requiring the exercise of the skills and knowledge covered by this unit.
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Specifications	Drawings, sketches, job instructions, schematics, diagrams, technical manuals
Range of measuring devices	Protractors, combination squares, set squares, dial indicators, thermometers, tapes, rules, micrometers, vernier-scaled measuring equipment
Basic calculations	Calculations needed to assist in determining measurements where a reading of the graduated device is not sufficient, for example subtracting one measurement from another to give a third

© Commonwealth of Australia, 2025 Industry Skills Australia

RANGE STATEMENT	
	measurement. Examples of calculations needed are addition, subtraction, multiplication, division, fractions and decimals. Calculations may be made using a calculator
Routine adjustments	Validating the device using simple zeroing or scale adjustment
Measurements	Measuring length, squareness, flatness, angle, roundness, clearances or any other measurements that can be read off analog, digital or other measuring device
Information	Dimensions, instructions, base line or datum points

MEM18001C Use hand tools

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers using a range of hand tools for a variety of general engineering applications.

Application of the Unit

Application of the unit	Applications may include hand tools used for adjusting, dismantling, assembling and finishing of items or components, and the finishing, cutting, scraping of metallic and non-metallic material to size and shape. This includes simple tapping and threading and routine maintenance of hand tools. This unit should not be selected if the hand tool is dedicated to a single operation or machine and if only a machine specific/customised tool is used. When using hand held power tools or power tools used for hand held operations, refer to Unit MEM18002B (Use power tools/hand held operations). **Band**: **A** **Unit Weight**: **2**

Pre-Requisites

Prerequisite units	

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Use hand tools	1.1. Hand tools are selected appropriate to the task requirements. 1.2. Hand tools are used to produce desired outcomes to job specifications which may include finish, tension, size or shape. 1.3. All safety requirements are adhered to before, during and after use. 1.4. Unsafe or faulty tools are identified and marked for repair according to designated procedures before, during and after use. 1.5. Routine maintenance of tools, including hand sharpening is undertaken according to standard

© Commonwealth of Australia, 2025 Industry Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	operational procedures, principles and techniques. 1.6. Hand tools are stored safely in appropriate location according to standard operational procedures and manufacturers' recommendations.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- reading and following information on standard operating procedures
- following verbal instructions
- selecting hand tools appropriate to the task
- using hand tools safely
- identifying hand tool defects and marking for repair
- maintaining/sharpening hand tools using appropriate techniques
- storing hand tools in accordance with manufacturers'/standard operating procedures

Required knowledge

Look for evidence that confirms knowledge of:

- applications of different hand tools in a general engineering context
- common faults and/or defects in hand tools
- procedures for marking unsafe or faulty tools for repair
- routine maintenance requirements for a range of hand tools
- storage location and procedures for a range of hand tools
- hazards and control measures associated with using hand tools
- use and application of personal protective equipment
- safe work practices and procedures

MEM24001B Perform basic penetrant testing

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers performing basic penetrant testing procedures in a range of industrial applications.

Application of the Unit

Application of the unit	This unit applies to basic penetrant testing techniques on fabrications, structures and components across a wide range of industries and restricted to basic visible dye and/or process penetrant line methods. The work can relate to scheduled and unscheduled maintenance activities, using general tools, specific penetrant testing equipment as specified in maintenance documentation, testing procedures or operator instructions. Actual and potential defects are to be considered, together with ongoing abnormalities in fabrications, components and structures. Penetrant testing is performed on critical component or structural zones. All testing must be completed with particular attention to personal safety and OH&S regulations. Certification against Australian standards may be achieved where assessment in this unit of competency is carried out in conjunction with an examining authority as described in ISO 9712. Materials and chemicals which are subject to codes and regulations - for example, chemicals, explosives, solvents, dangerous materials, acids, or noxious waste products - must be subject to safe work habits and must be stored and used in accordance with safe work practices. This unit should not be selected when Unit MEM24002B

© Commonwealth of Australia, 2025 Industry Skills Australia

	(Perform penetrant testing) has already been selected. Where power tools are required, Unit MEM18002B (Use power tools/hand held operations) should also be selected. **Band**: **A** **Unit Weight**: **2**

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare inspection areas for basic penetrant testing	1.1. Inspection areas are cleaned and prepared for testing using appropriate procedures and materials. 1.2. Preparation processes are carried out in accordance with the relevant procedures and OH&S requirements. 1.3. Inspection areas are visually assessed and obvious discontinuities are identified.
2. Perform basic penetrant testing	2.1. Nominated test is identified from standard operating procedures. 2.2. Test equipment is prepared in accordance with standard operating procedures. 2.3. Test media is selected and applied in accordance with workplace practices and specifications. 2.4. Penetrant test is carried out in accordance with relevant work instructions and OH&S requirements. 2.5. Penetrant testing equipment is maintained and stored in accordance with standard operating procedures and OH&S requirements.
3. Report the results of penetrant test(s)	3.1. Basic indications are checked and defects are identified in accordance with enterprise standards and/or procedures. 3.2. Basic indications are confirmed in accordance with enterprise standards and/or procedures. 3.3. Test results are reported in accordance with enterprise standards and/or procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Look for evidence that confirms skills in: • preparing inspection areas • identifying discontinuities • applying procedures

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
• applying test media • applying principles of penetrant testing techniques • identifying defects • reading and interpreting routine information on written job instructions, specifications and standard operating procedures. • following oral instructions • entering routine and familiar information onto proformas and standard workplace forms
Required knowledge
Look for evidence that confirms knowledge of: • cleaning and preparation processes • precleaning methods and their areas of use - solvents, vapour degrease, etching, detergents, paint removers, mechanical methods • consequences of incorrect preparation • procedures and OH&S requirements in relation to the preparation process • basic concepts and principles of NDT; general terms, purpose of NDT and areas of application of NDT • scope and basic description of test • general properties of penetrants - penetrability, removability, visibility • emulsifier types • developer types • use of standard test panels • established inspection procedures and techniques • types of discontinuities and their consequences • procedure for carrying out penetrant testing • penetrant application • dwell times • penetrant removal • developer application • dry powder • development time • factors affecting indications • non-relevant indications • post-cleaning methods and their areas of use • basic maintenance and storage procedures for testing equipment • OH&S requirements including storage requirements • definition of a defect and common basic defects • methods/procedures for reporting test results

REQUIRED SKILLS AND KNOWLEDGE

Required skills

Look for evidence that confirms skills in:

- interpreting and following procedures
- identifying inspection areas
- identifying discontinuities and defects
- selecting appropriate testing techniques and procedures
- assessing risks
- entering routine and familiar information onto proformas and standard workplace forms
- locating, reading and interpreting information on written job instructions, specifications, charts, lists and other reference documentation
- planning, sequencing operations

Required knowledge

Look for evidence that confirms knowledge of:

- surface preparation
- procedures and OH&S requirements in relation to the preparation process
- established assessment procedures and techniques
- types of discontinuities and their consequences
- scope and basic principles of magnetic particle testing
- procedure for carrying out magnetic particle test using either the 'yoke' or 'bench'
- advantages and limitations of magnetic particle testing
- hazards and safety precautions associated with magnetic particle testing
- basic maintenance and storage procedures for testing equipment
- common basic defects
- methods/procedures for reporting test results
- advantages, limitations of various equipment
- magnetic particle application - methods for wet, dry particles
- recording and reporting results of simple tests
- safety precautions in testing
- use of toxic, flammable materials, electrical hazards
- use and application of personal protective equipment
- safe work practices and procedures
- relevant hazards and control measures related to the competency

MEM24012C Apply metallurgy principles

Modification History

Single band identifier removed to clarify dual status

Unit Descriptor

Unit descriptor	This unit covers applying basic metallurgy principles related to selecting appropriate non-destructive testing techniques (NDT) and interpreting the results of NDT tests for metallurgical processes.

Application of the Unit

Application of the unit	This unit applies to knowledge of metallurgy principles, and the relationship between the various non-destructive testing methods and their capabilities and limitations when applied to the detection of specific discontinuities in metals and alloys. The unit applies to employees other than NDT technicians such as metallurgists, welding supervisors etc. who select and order NDT tests and who interpret results provided by tests for metal manufacturing, casting, shaping, and joining processes. The unit does not apply to the conduct of NDT tests. Such variables as the type of discontinuity, manufacturing process and limitations will assist in determining the sequence of testing and the ultimate selection of one non-destructive test method in preference to another. Any testing that may be carried out must be completed with particular attention to personal and OH&S regulations. Where materials and chemicals which are subject to codes and regulations are stored and used - for example, chemicals, explosives, solvents, dangerous materials, acids, or noxious waste products - safe work habits must be considered. **Band:** This unit has dual status and is to be regarded as both a Specialisation band A unit and Specialisation band B unit

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Look for evidence that confirms skills in: • research • understanding and applying metallurgy principles • selecting NDT test appropriate to metal or alloy and manufacturing process

© Commonwealth of Australia, 2025 Industry Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

Required knowledge

Look for evidence that confirms knowledge of:

- principles of solidification and crystal structures in metal:
  - classification of materials
  - structure of atoms
  - process of solidification
  - crystal structures
  - defects formed during solidification
  - modification of crystal structure
  - heat treatment processes
  - defects formed during heat treatment
- meaning of equilibrium diagrams representative of a range of metals including aluminium, iron, steel and common non-ferrous alloys:
  - alloy systems
  - solid and liquid solubility
  - basic equilibrium diagrams
  - equilibrium diagrams for common alloys
- principles of fusion welding in relation to NDT testing
- defects in fusion welding:
  - processing defects
  - grinding cracks
  - pickling cracks
  - heat treatment cracks
  - service defects
  - fatigue cracks
  - corrosion and stress corrosion cracks
- principles of the formation of castings
- defects in castings
- principles of steel forging
- defects in steel forging
- principles of mechanical testing:
  - mechanical testing
  - tensile testing
  - impact testing
  - hardness testing
  - fatigue testing
- other tests

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competency in this unit must be able to apply metallurgy principles to NDT test selection and interpretation. Competency in this unit cannot be claimed until all prerequisites have been satisfied.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate. This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with applying basic metallurgy principles as related to non-destructive testing techniques, or other units requiring the exercise of the skills and knowledge covered by this unit.
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate

© Commonwealth of Australia, 2025 Industry Skills Australia

EVIDENCE GUIDE	
	must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Principles and methods for fusion welding of metals and alloys	• MMAW • SAW • GMAW • GTAW • FCAW
Defects in weldments	Cracks, lack of fusion, cavities, imperfect shape, solid inclusions, miscellaneous
Defects in metal and alloy castings	Shrinkage cavities, hot tears, cold cracks, gas holes
Principles and methods used to produce steel forgings	Deformations, strengthening mechanisms, annealing
Principles of mechanical testing	Impact, tensile, hardness testing

MSMPMC322 Deliver concrete to site

Modification History

Release 1. New unit. Supersedes and is equivalent to PMC552061 Deliver concrete to site

Application

This unit describes the skills and knowledge required to deliver concrete to site using an agitator or similar.

This unit applies to operators who are required to take responsibility for own outputs and follow established procedures to safely drive and position the agitator truck; load agitator; mix and discharge concrete on site and communicate with customers. Operators are also required to work autonomously and apply their own judgement to interpret information; monitor processes; identify and address routine and non-routine problems and control hazards.

This unit applies to an individual working independently and with frequent contact with the base plant personnel.

The operator is required to hold a current driver's licence appropriate to the agitator truck as required by local regulations. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

Operations

Elements and Performance Criteria

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 Industry Skills Australia

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Load agitator	1.1 Check job requirements 1.2 Position agitator for loading 1.3 Load agitator with correct concrete batch 1.4 Check and action any special requirements 1.5 Check that slump is to specification and make necessary adjustments
2. Deliver concrete	2.1 Deliver concrete without delay 2.2 Position vehicle or agitator as required by safety needs and if practical customer requirements 2.3 Report breakdowns or lengthy delays en route to relevant person 2.4 Maintain product quality as per requirements and procedures
3. Conform to site protocols	3.1 Check access to site with customer 3.2 Assess site conditions and enter in a manner suited to the conditions, load and site requirements 3.3 Mix concrete on site according to quality requirements 3.4 Discharge concrete as required by customer 3.5 Wash down chutes and agitator in the area designated by the customer 3.6 Complete all records
4. Rectify routine problems	4.1 Identify and rectify faults and equipment failure 4.2 Maintain records and log books of equipment operations 4.3 Identify non-routine problems and report to designated person
5. Control hazards	5.1 Identify concrete delivery hazards 5.2 Assess the risks arising from those hazards 5.3 Implement measures to control those risks

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

© Commonwealth of Australia, 2025 Industry Skills Australia

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MSMPMC322 Deliver concrete to site

Modification History

Release 1. New unit. Supersedes and is equivalent to PMC552061 Deliver concrete to site

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- delivered concrete to site using an agitator or similar on at least 1 occasion, including:
- monitoring the following key variables to ensure product integrity and conformance to specification:
  - slump
  - amount of added water
  - delays and breakdowns
  - quantity and mix of materials
  - site conditions and access
  - equipment maintenance and repair needs
- recognising possible causes of the following routine problems:
  - incorrect quantity of materials
  - contaminated materials and additives
  - wrong raw materials and additives
  - incorrect mixing time and technique
  - equipment faults, damage, failure.
  -

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- AS1379: Specification and supply of concrete or equivalent
- principles of mixing concrete for on-site delivery
- equipment, including:
  - start-up, operation and shutdown procedures
  - limitations and impact on blending and mixing efficiency and effectiveness
  - the potential effects of equipment operation in relation to quality of product
- slump measurement
- customer service
- relevant road rules

© Commonwealth of Australia, 2025 Industry Skills Australia

- safety protocols for on-site delivery
- waste disposal requirements
- relationship between mixing time, water-cement ratio and product quality
- the potential effects of variations in raw materials and processes in relation to quality of product
- routine problems and factors which may affect product quality or production output, their probable causes and relevant corrective actions
- delivery hazards and:
  - their possible causes
  - potential consequences
  - risk control procedures.
  -

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - agitator and truck and ancillary equipment
  - concrete to be delivered
  - specifications, procedures and job sheets
- modelling of industry operating conditions, including:
  - routine and non-routine problems.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS405008 Analyse and map a value stream

Modification History

Release 1. Unit code changed. Application changed. Performance criteria changed. Range of conditions removed. Assessment requirements changed. Supersedes and is equivalent to MSS405002 Analyse and map a value stream.

Application

This unit describes the skills and knowledge required to analyse and map a value stream, including the clear identification of the place of an organisation in the value stream and its contribution to the value stream. The unit includes the relationships and the activities undertaken by value stream organisations. The identification skills include identification at the virtual or information level, the technical or process level, and at the physical or logistic level.

The unit includes the analysis of value-adding and non-value adding activities and the information needs for successful value stream mapping, including information technology (IT) needs.

This unit covers the analysis of the supply chain, the demand chain as well as the overall value stream.

This unit applies to an individual in a senior role in an organisation, such as an operations manager, purchasing manager, senior technical officer performing planning or scheduling or similar who needs to analyse and map a value stream, a supply chain, or a demand chain in order to understand the interactions between all members and determine the value added/potential value added by each member. The value stream is represented visually according to organisation format requirements.

The value stream may be being mapped for the first time, or it may be an analysis and mapping of a previously mapped value stream. The analysis and mapping may be for an entire value stream, or a defined part of one.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Nil.

Competency Field

Competitive systems and practices

Unit Sector

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Map the value stream	1.1	Select a product or product group for analysis
	1.2	Identify ultimate customer
	1.3	Identify ultimate supplier
	1.4	Identify all organisations between ultimate supplier and ultimate customer
	1.5	Identify all steps in own organisation
	1.6	Collate all information and map value stream
2. Define customer need	2.1	Determine the features and benefits obtained by customers from product
	2.2	Determine methods of measuring the contribution to each feature and benefit
	2.3	Identify possible data sources for required measures
	2.4	Implement measurement of contribution to features and benefits
3. Assess the value added at each step	3.1	Identify value contributed by each external organisation
	3.2	Determine value added by each internal step
	3.3	Determine method of measuring value added
4. Reduce muda (waste)	4.1	Compare value added to customer feature and benefit
	4.2	Identify activities on value stream map which do not add to customer features and benefits
	4.3	Liaise with external value stream members to determine methods to reduce overall waste
	4.4	Take required actions to reduce waste

Assessment Requirements for MSS405008 Analyse and map a value stream

Modification History

Release 1. Unit code changed. Application changed. Performance criteria changed. Range of conditions removed. Assessment requirements changed. Supersedes and is equivalent to MSS405002 Analyse and map a value stream.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- mapped and analysed at least 1 value stream for an organisation.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- value stream mapping and analysis techniques
- muda (waste) identification and causes
- details of the process being mapped in sufficient depth to allow analysis of the map
- meaningful interactions between value streams
- concepts of value added, non-value added and methods of determining and quantifying this.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPCAD002 Control vegetation on a site

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to control vegetation on a site.

It includes inspecting, identifying and treating weeds, plants and shrubs. It also includes safe handling of chemicals and equipment and the ability to plan and work safely.

This unit applies to those working as field and operational staff involved in plant control but does not reflect the requirements for undertaking plant control on properties of third parties where further training and licensing requirements may apply. Those undertaking this unit would work under appropriate supervision, while performing routine tasks, in familiar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Catchment and Dams

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for work	**1.1** Determine work requirements from job specifications and plans
	1.2 Identify noxious weeds, plants and shrubs

© Commonwealth of Australia, 2025 Industry Skills Australia

	1.3	Inspect site to prevent damage to utilities, environment and adjoining land
	1.4	Identify potential hazards according to workplace procedures
	1.5	Select and check equipment and tools to meet task and safety requirements
	1.6	Select, fit and use personal protective equipment
2 Treat vegetation	**2.1**	Store, handle and transport chemicals according to safety procedures
	2.2	Use processes to treat vegetation according to workplace procedures
	2.3	Implement controls to minimise environmental damage and deal with emergencies
	2.4	Calculate dosing rates and mix chemicals according to workplace procedures
	2.5	Conduct monitoring programs to determine spread, growth rate and extent of problem caused by weeds
	2.6	Clean equipment after use and prepare for safe storage according to manufacturer instructions and workplace procedures
	2.7	Dispose of waste according to workplace procedures
3 Complete records and reports	**3.1**	Record use of chemicals and control mechanisms according to workplace procedures
	3.2	Complete and process work reports according to workplace procedures
	3.3	Identify and report observations outside defined parameters to relevant personnel for further action

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Industry Skills Australia

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to NWPSOU002 Control vegetation on a site.

Assessment Requirements for NWPCAD002 Control vegetation on a site

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- applying workplace procedures
- controlling vegetation by treating weeds, plants and shrubs either mechanically or chemically
- dealing with chemical spillages
- following plans and job specifications
- identifying and reporting operational problems
- identifying noxious weeds and appropriate control methods
- identifying risks and implementing controls
- interpreting safety data sheets
- interpreting work requirements from given documentation
- performing work-related calculations
- planning and preparing equipment and materials required for work
