TLIE707B Use communication systems
TLIE707B Use communication systems

Modification History
Not applicable.

Unit Descriptor
This unit involves the skills and knowledge required to use communication systems including identifying system features, operating a communication system effectively, using appropriate communication protocols when using a system, maintaining equipment, and completing documentation.

Application of the Unit
Work is carried out in accordance with relevant regulations and workplace procedures. Work is performed under some supervision, generally within a team environment. It involves the application of established communication principles and practice and the use of local technical and colloquial language and vocabulary in day-to-day communications.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information
The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
Elements and Performance Criteria

Element and Performance Criteria

<table>

<td>Communication system is operated safely in accordance with manufacturers instructions, workplace procedures and (any) regulatory requirements</td>
</tr>
<tr>
<td>2.3</td>
<td>Telephone and radio security is maintained in accordance with workplace procedures</td>
</tr>
<tr>
<td>2.4</td>
<td>Where relevant, channel selection is appropriate for the location and type of communication</td>
</tr>
<tr>
<td>2.5</td>
<td>Messages are transmitted clearly and precisely with due observation of ethics and protocols required of users</td>
</tr>
<tr>
<td>2.6</td>
<td>Where applicable, PA system is used to communicate with passengers and crew as per standard operating procedures</td>
</tr>
<tr>
<td>2.7</td>
<td>Where applicable, incoming messages are received and answered promptly and courteously within operating procedures and (any) regulatory requirements</td>
</tr>
<tr>
<td>2.8</td>
<td>Appropriate protocols and procedures are followed when using communications systems during emergencies</td>
</tr>
</tbody>
</table>
2.9 Received messages are interpreted and recorded, where required, in accordance with workplace procedures

2.1 Vocal communication is clear, unambiguous and uses appropriate procedures, language and codes

3 Maintain communication equipment operational status

3.1 Equipment is checked and maintained in working order in accordance with workplace procedures

3.2 Minor faults in the communications systems are promptly identified, diagnosed, and repaired or reported in accordance with workplace procedures

4 Complete documentation

4.1 Appropriate records of communications are maintained in accordance with workplace procedures
**Required Skills and Knowledge**

**REQUIRED KNOWLEDGE AND SKILLS**

This describes the essential knowledge and skills and their level required for this unit.

**Required knowledge:**

- Relevant procedures and duty of care requirements
- Relevant OH&S responsibilities
- Protocols and procedures for communicating with others using relevant communication technology including the use of PA systems on passenger vehicles and trains
- Procedures and protocols for the use of communication systems during an emergency
- Features of various communications systems
- Basic communication techniques including barriers to effective communication and how to overcome them
- Basic principles of effective communication
- Techniques for communicating effectively with a multilingual persons or persons with a limited ability to speak or understand English
- Pre-operational checks for communications systems and equipment
- Minor routine maintenance procedures for communications equipment
- Typical problems that may occur when using communications systems and appropriate action and solutions

**Required skills:**

- Communicate effectively with others using available communications equipment
- Read and interpret instructions and procedures relevant to the use of communications equipment
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to work activities when using communications equipment
- Identify and use required communication technology
- Work collaboratively with others when using communications equipment
Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when using communications equipment in accordance with workplace procedures

Implement contingency plans for unanticipated situations that may arise when using communications equipment

Apply precautions and required action to minimise, control or eliminate hazards that may exist during the use of communications equipment

Plan own work including predicting consequences and identifying improvements

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in communication equipment in accordance with standard operating procedures

Monitor performance of communication equipment and take appropriate action if required
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

<table>
<thead>
<tr>
<th>Critical aspects for assessment and evidence required to demonstrate competency in this unit</th>
<th>The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying: the underpinning knowledge and skills relevant legislation and workplace procedures other relevant aspects of the range statement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Context of and specific resources for assessment</td>
<td>Performance is demonstrated consistently over a period of time and in a suitable range of contexts Resources for assessment include: a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or access to an appropriate range of relevant operational situations in the workplace</td>
</tr>
<tr>
<td>Method of assessment</td>
<td>Assessment of this unit must be undertaken by a registered training organisation As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests Practical assessment must occur: through appropriately simulated activities at</td>
</tr>
</tbody>
</table>

In both real and simulated environments, access is required to: relevant and appropriate materials and/or equipment, and/or applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
the registered training organisation, and/or
in an appropriate range of situations in the workplace
**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Use of communication systems will include that required in routine operations and may occur by day or night and in a variety of work contexts, including:

- in confined spaces, exposed conditions and controlled or open environments
- in a workplace, terminal, warehouse or depot
- in a vehicle
- on a vessel
- on a train
- on a worksite
- at a client's workplace

Communication systems may include:

- fixed phone systems
- mobile phone, both on person or hands-free
- radios including personal, hand-held or vehicle-mounted, CB, UHF, VHF, SSB, marine
- PA systems on passenger vehicles, trains and aircraft

Worksite communication may include:

- active listening
- two-way conversation
- questioning to obtain information and/or clarify information and understanding
- routine oral reporting

Communications may involve:

- English-speaking persons
- multilingual staff
- persons with limited ability to communicate in English

Communication problems may include:

- misunderstanding
- limited ability of others to communicate in English
- noisy environments or communications channels
- illegible writing or print
use of non-standard vocabulary
incorrect assumption that message has been received and/or correctly understood
not following correct communication protocols and procedures

Communication may be with:
base personnel
other drivers and workplace personnel
passengers (where applicable)
managers
supervisors/team leaders
suppliers and clients
private and/or public sector security personnel
police and other emergency services personnel
security consultants
other professional or technical staff
local government authorities

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
company procedures
enterprise procedures
organisational procedures
established procedures

Information/documentation may include:
workplace communication procedures, protocols, checklists and instructions
manufacturers specifications for communications equipment
goods identification numbers and codes
manifests, bar codes, goods and container identification
communication records
supplier and/or client instructions
material safety data sheets
relevant codes of practice including the national standards for manual handling and the industry safety code
legislation, regulations and related
Applicable regulations and legislation may include:

- relevant regulations, standards and codes of practice, including the national standards for manual handling and industry safety codes
- dangerous goods and freight regulations and codes
- relevant Australian and state/territory OH&S legislation
- equal employment legislation and related policies
- environmental protection regulations

documentation
award, enterprise bargaining agreement, other industrial arrangements
standards and certification requirements
quality assurance procedures
emergency procedures

Unit Sector(s)
Not applicable.
