   - 2.2 Arrangements are made to appropriately install required equipment taking account of all potential *hazards*.
   - 2.3 Appropriate methods are used to access work area for self, *tools and equipment*, and *materials*.
   - 2.4 Tools and materials are placed to eliminate or at least minimise the risk of items being knocked down.

3. **Conduct work tasks.**
   - 3.1 Work is conducted following workplace approved procedures.
   - 3.2 Fall protection equipment is kept in place and adjusted appropriately to cater for movement during work.
   - 3.3 Scaffold components and fall barriers are kept in place during work.
   - 3.4 Egress from work area is completed following work site supervisor approved methods for self, tools, materials and *environmental requirements*. 
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- construction terminology
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- quality requirements
- types, characteristics, uses and limitation of plant, tools and equipment
- workplace and equipment safety requirements.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the
workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan, OHS regulations and state and territory legislation applicable to workplace operations
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others
- select and use appropriate height access and fall protection equipment and work methods, including inspecting fall protection equipment, scaffold and fall barriers for faults
- apply knowledge of industry products to identify:
  - manual handling risks
  - types of lifting and support structures approved for use
- modify work activities to cater for variations in work site procedures, contexts and environment and use appropriate behaviour for safe work at heights
- use safe handling requirements, based on information provided, for equipment, products and materials.

**Context of and specific resources for assessment**

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
• tools and equipment appropriate to applying safe work practices
• support materials appropriate to activity
• workplace instructions relating to safe work practices and addressing hazards and emergencies
• material safety data sheets
• research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

**Method of assessment**

Assessment methods must:

• satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
• include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
• reinforce the integration of employability skills with workplace tasks and job roles
• confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

• competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
• where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
• all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.
Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Work at heights** includes:
- assessment of conditions and hazards
- determination of work requirements
- identification of equipment defects
- inspection of work sites.

**Information** includes:
- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- material safety data sheets (MSDS)
- memos
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules, plans and specifications.

**Workplace health and safety** is to be in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan and may include:
- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling of materials
- hazard control
- hazardous materials and substances
- safe operating procedures, including the conduct of
operational risk assessment and treatments associated with:
- earth leakage boxes
- lighting
- photovoltaic (solar) panels
- power cables, including overhead service trays, cables and conduits
- restricted access barriers
- surrounding structures
- traffic control
- trip hazards
- work site visitors and the public
- working in confined spaces
- working in proximity to others
- working with dangerous materials
- organisational first aid
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- relevant OHS legislation applying in the jurisdiction where work is carried out, including:
  - AS6001 - 1999 Working platforms for domestic application
  - AS1576 - Scaffolding
  - AS/NZS4576 - 1995 Guidelines for scaffolding
- use of tools and equipment
- workplace environment and safety.

Statutory and regulatory authorities include:
- federal, state and local authorities administering applicable Acts, regulations and codes of practice.

Hazards include:
- air temperature
- construction activity involving other workers and contractors
- dust and vapours
- electrical equipment
- energy sources
- equipment and materials
- hazardous materials
- light
- manual handling
- moisture
- noise
- photovoltaic (solar) panels
- stationary and moving plant
- work at heights.

**Tools and equipment** include:
- air compressors and hoses
- hand and power tools
- nail guns
- power leads
- scaffolding.

**Materials** include:
- materials used on the construction work site.

**Environmental requirements** include:
- clean-up management
- noise and dust
- vibration
- waste management.

**Unit Sector(s)**

</thead>
</table>
| 1. Plan and prepare. | 1.1. Work instructions, including plans, specifications, quality requirements and operational details, are obtained, confirmed and applied from relevant information for planning and preparation.  
1.2. Safety (OHS) requirements are followed in accordance with safety plans and policies.  
1.3. Signage and barricade requirements are identified and implemented.  
1.4. Plant, tools and equipment are selected to carry out tasks are consistent with job requirements, checked for serviceability, and any faults are rectified or reported prior to commencement.  
1.5. Environmental requirements are identified for the project in accordance with environmental plans and statutory and regulatory authority obligations, and are applied. |
| 2. Apply safe work practices. | 2.1. Relevant authorities are contacted to identify electrical sources and type.  
2.2. Plant is positioned according to work method statement and job safety analyses (JSAs).  
2.3. Plant procedures are followed to comply with work method statement and JSAs.  
2.4. Work is conducted in or around the power source, service or asset.  
2.5. Personnel, plant and equipment are retracted from powered area following safe work method statement and JSAs. |
| 3. Clean up. | 3.1. Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification.  
3.2. Plant, tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.  
3.3. Work completion procedures are applied and relevant personnel are notified that work is finished. |

Required Skills and Knowledge
REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - identify electrical source and type from relevant authorities
  - read and interpret:
    - documentation from a variety of sources
    - drawings and specifications
      - report faults
      - use language and concepts appropriate to cultural differences
      - use and interpret non-verbal communication, such as hand signals
    - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
  - numeracy skills to apply measurements and make calculations
  - organisational skills, including the ability to plan and set out work
  - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
  - technological skills to:
    - use a range of mobile technology, such as two-way radio and mobile phones
    - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- construction terminology
- electrical safety on construction work sites
- first aid including cardiopulmonary resuscitation (CPR)
- JSA and safe work method statements
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, specifications and drawings
- quality requirements
- site specific emergency procedures
- types, characteristics, uses and limitations of plant, tools and equipment
REQUIRED SKILLS AND KNOWLEDGE

- working at heights
- working with electrical power techniques
- workplace and equipment safety requirements.
EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations
- comply with organisational policies and procedures, including quality requirements
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others
- contact relevant authorities
- apply work method statements and JSAs to oversee plant positioning and operation for one project, including erection and/or placement of barriers and safeguards.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the
EVIDENCE GUIDE

mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:
- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:
- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at
EVIDENCE GUIDE

the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge

- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:

- verbal or written and graphical instructions
- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions where specified
- memos
- MSDS
- organisation work specifications and requirements
- plans and specifications
- regulatory and legislative requirements pertaining to working safely around power
RANGE STATEMENT

- relevant Australian standards
- safe work procedures related to working safely around power
- signage
- work bulletins
- work schedules.

Planning and preparation

include:

- work site inspection
- equipment defect identification
- assessment of conditions and hazards
- determination of work requirements.

Safety (OHS) is to be in accordance with legislation, regulations, codes of practice, organisational safety policies and procedures, and project safety plan and may include:

- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling of materials
- hazard control
- hazardous materials and substances
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
  - earth leakage boxes
  - lighting
  - power cables, including overhead service trays, cables and conduits
  - restricted access barriers
  - surrounding structures
  - traffic control
  - trip hazards
  - work site visitors and the public
  - working at heights
  - working in confined spaces
  - working in proximity to others
  - working with dangerous materials
- organisational first aid
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- use of firefighting equipment
- use of tools and equipment
- workplace environment and safety.

Signage and barricade

- barricades
RANGE STATEMENT

requirements include:
• isolation
• other physical barriers
• site safety signage.

Plant includes:
• back hoes
• booms
• cranes
• EWPs
• excavators
• scaffold.

Tools and equipment include:
• those associated with the task at hand.

Environmental requirements include:
• clean-up protection
• noise and dust
• vibration
• waste management.

Statutory and regulatory authorities:
• include federal, state and local authorities administering applicable Acts, regulations and codes of practice
• must include federal, state and local electrical authorities.

Electrical sources include:
• distribution towers
• generators
• poles
• sub-stations
• temporary services
• train and tram assets
• transmission towers
• underground and overhead wires
• underground conductors
• all other services, sources and assets.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.  Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Plan and prepare. | 1.1. Work instructions and operational details are obtained using relevant information, confirmed and applied for planning and preparation purposes.  
1.2. Safety (OHS) requirements are followed in accordance with safety plans and policies.  
1.3. Signage and barricade requirements are identified and implemented.  
1.4. Tools and equipment selected to carry out tasks are consistent with the requirements of the job, checked for serviceability and any faults are rectified or reported prior to commencement.  
1.5. Materials quantity requirements are calculated in accordance with plans, specifications and quality requirements.  
1.6. Materials appropriate to the work application are identified, obtained, prepared, safely handled and located ready for use.  
1.7. Environmental requirements are identified for the project in accordance with environmental plans and regulatory obligations and applied. |
| 2. Conduct machine pre-operational checks. | 2.1. Pre-start, start up, park and shut-down procedures are carried out in accordance with manufacturer and site specific requirements.  
2.2. Vehicle controls and functions, including steering, brakes and manoeuvrability, are checked for serviceability and any faults are rectified or reported.  
2.3. Agitator controls and functions are checked for serviceability and any faults are rectified or reported. |
| 3. Operate the agitator truck. | 3.1. Site hazards associated with truck operations are identified and safe operating techniques are used to minimise risk.  
3.2. Engine power is managed to ensure efficiency of concrete agitator truck movements and to minimise damage to the engine and gears.  
3.3. Engine power is coordinated with gear selection ensuring smooth transition and operation within torque range.  
3.4. Truck is operated to work instructions in accordance with company operating procedures.  
3.5. Road and traffic conditions are constantly monitored taking into account road standards, traffic flow, |
ELEMENT | PERFORMANCE CRITERIA
---|---
distance and load, ensuring no injury to people or damage to property, equipment, loads and facilities.
3.6. Truck is brought to a halt smoothly, minimising the wear and tear on vehicle using the engine retarder, gears and brakes.

4. Load, transport and discharge concrete.

4.1. Concrete agitator truck is positioned at load and discharge points with a minimum of manoeuvres.
4.2. Concrete agitator truck is loaded to within authorised carrying capacity of concrete mixes to suit the site and task conditions.
4.3. Concrete agitator truck is moved from loading to discharge point safely and smoothly avoiding surge and sway.
4.4. Concrete is discharged in accordance with task specifications.
4.5. Discharge systems, including chutes and adaptors, are monitored and maintained throughout the operations.

5. Carry out driver maintenance.

5.1. Concrete agitator truck is safely parked, prepared for maintenance and shut down as per manufacturers' manual and organisational requirements.
5.2. Inspection and fault finding are conducted in accordance with manufacturer specifications and organisational requirements.
5.3. Defective parts are removed and replaced safely and effectively according to manufacturers' manual and organisational requirements.
5.4. Regular programmed maintenance tasks are carried out in accordance with manufacturer and organisational requirements.

6. Clean up.

6.1. Work area is cleared and materials disposed of, reused or recycled in accordance with project environmental management plan.
6.2. Vehicle, bowl, tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.

Required Skills and Knowledge
REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and interpret:
    - documentation from a variety of sources
    - drawings and specifications
      - report faults
      - use language and concepts appropriate to cultural differences
      - use and interpret non-verbal communication, such as hand signals
    - evaluating own actions and making judgments about performance and necessary improvements
    - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
  - organisational skills, including the ability to plan and set out work
  - recognising procedures, following instructions, responding to change and contributing to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems
  - teamwork skills to coordinate own work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
  - technological skills to:
    - use a range of mobile technology, such as two-way radio and mobile phones
    - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- concrete agitator truck systems, characteristics, technical capabilities and limitations
- construction activity sequences related to concreting operations
- general construction terminology
- job safety analysis (JSA) and safe work method statements
- levelling techniques
- material safety data sheets (MSDS)
REQUIRED SKILLS AND KNOWLEDGE

- materials handling methods
- operational, maintenance and basic diagnostic procedures
- processes for interpreting engineering drawings and sketches
- quality requirements
- safe operating techniques in all terrain
- site and equipment safety requirements
- site isolation and traffic control responsibilities and authorities
- state or territory regulatory requirements related to concrete agitator truck operations.
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations
- comply with organisational policies and procedures including quality requirements
- communicate and work effectively and safely with others
- conduct concrete agitator truck operations, to be performed over not less than three shifts and two different sites and are to include the tasks of:
  - positioning vehicle at the load point
  - loading and transporting concrete
  - discharging concrete at work site to specification
  - discharging directly to site
  - discharging to wheelbarrow and hopper
  - applying emergency procedures
  - conducting authorised operator maintenance.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge
EVIDENCE GUIDE

will usually be conducted in an off-site context. Assessment is to comply with relevant regulatory or Australian standards’ requirements.

Resource implications for assessment include:

- an induction procedure and requirement

• where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge.

• all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:

• diagrams or sketches
• instructions issued by authorised organisational or external personnel
• manufacturer specifications and instructions, where specified
• MSDS
• memos
RANGE STATEMENT

- regulatory and legislative requirements pertaining to operation of concrete agitator trucks on construction sites
- relevant Australian standards
- safe work procedures relating to operation of concrete agitator trucks on construction sites
- signage
- verbal, written and graphical instructions
- work bulletins
- work schedules, plans and specifications.

Planning and preparation include:

- assessment of conditions and hazards
- determination of work requirements and safety plans and policies
- equipment defect identification
- work site inspection.

Safety (OHS) is to be in accordance with state and territory legislation and regulations and project safety plan and may include:

- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling activities that may require the assistance of others or the use of manual or mechanical lifting devices where size, weight or other issues, such as a disability are a factor
- hazard control
- hazardous materials and substances
- hazards and risks including uneven/unstable terrain, trees, fires, overhead services, bridges, buildings, excavations, traffic, embankments, structures and hazardous materials
- organisational first aid
- PPE prescribed under legislation, regulations and workplace policies and practices
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
  - earth leakage boxes
  - lighting
  - power cables, including overhead service trays, cables and conduits
  - restricted access barriers
  - surrounding structures
  - traffic control
  - trip hazards
RANGE STATEMENT

- work site visitors and the public
- working at heights
- working in confined spaces
- working in proximity to others
- safe parking practices, including ensuring access ways are clear, equipment/ machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement
- use of firefighting equipment
- use of tools and equipment
- workplace environmental requirements and safety.

**Tools and equipment** include:
- hand tools and maintenance equipment associated with the particular concrete agitator truck.

**Quality requirements** include:
- internal company quality policy and standards
- manufacturer specifications, where specified
- relevant regulations, including Australian standards
- workplace operations and procedures.

**Environmental requirements** include:
- clean-up management
- dust and noise
- stormwater management
- vibration
- waste management.

**Agitator controls**:
- are related to speed, revolutions, forward and return
- may be air, mechanical or electrically actuated.

**Discharge points**:
- include:
  - directly to site
  - into a wheelbarrow and hopper
  - may include into a kibble.

**Concrete mixes**:
- may be relatively dry or increasingly wet
- in order, from wet to dry
- will include block-fill, pool mix, topping, slab, footing and kerb and guttering.

**Discharging concrete** means:
- movement of concrete from the agitator truck by mechanical/gravity feed through chutes and adaptors of varying sizes.
RANGE STATEMENT

Maintenance:
- includes:
  - authorised servicing
  - cleaning
  - monitoring, recording and reporting faults
- may include:
  - conducting authorised minor replacements
  - providing assistance to maintenance personnel during maintenance and repair activities.

</table>
| 1. Plan job. | 1.1. *Site information* is obtained and related to the task.  
1.2. *Hazard* s and potential hazards associated with the slinging and directing of loads are identified.  
1.3. *Hazard control measures* consistent with appropriate standards are identified to ensure the safety of personnel and equipment.  
1.4. The weight, dimensions and centre of gravity of the load are identified and assessed.  
1.5. Suitable lifting/slinging points on the load are identified.  
1.6. Appropriate *lifting equipment* needs are assessed.  
1.7. Appropriate *communication methods* are assessed with crane/ operators and other appropriate personnel.  
1.8. Manufacturer’s specifications/information is obtained for special loads where necessary. |
| 2. Select and inspect equipment. | 2.1. Lifting equipment appropriate to the task is selected.  
2.2. Lifting equipment is inspected for serviceability.  
2.3. Damaged or excessively worn lifting equipment is identified, labelled and rejected.  
2.4. Appropriate communication methods for the crane/operator and appropriate personnel are selected.  
2.5. Appropriate *communication equipment* is selected and its serviceability is checked.  
2.6. Appropriate *personal protective equipment* (PPE) is selected and checked. |
| 3. Prepare site and equipment. | 3.1. Hazard prevention/control measures are applied consistent with appropriate standards to ensure the safety of personnel and equipment.  
3.2. Appropriate slinging method is selected.  
3.3. Lifting equipment is prepared and assembled where appropriate.  
3.4. Load destination is prepared. |
| 4. Perform task. | 4.1. Lifting equipment is attached and secured to the lifting hook using appropriate techniques.  
4.2. Lifting hook is positioned over the load centre of gravity.  
4.3. Lifting equipment is attached and secured to the load |
ELEMENT | PERFORMANCE CRITERIA
--- | ---
in an appropriate manner.
4.4. Tag line is attached and secured where appropriate.
4.5. Test lift is conducted to ensure security of load.
4.6. Load is moved maintaining stability and control at all times.
4.7. Appropriate communication methods and communication signals are applied to safely coordinate the load movement both within sight and out-of-sight of crane operator.
4.8. The load is landed to ensure that it is stable and secure from movement.
4.9. Lifting equipment is removed or disconnected from load and prepared for next task or storage.
5. Shut down job and clean up.
5.1. Unserviceable lifting equipment inspected and rejected.
5.2. Defective equipment is isolated and tagged.
5.3. Lifting equipment is stored in accordance with procedures and appropriate standards.
5.4. Hazard prevention/control measures are removed where appropriate.
5.5. Excess materials from the work area are removed (where applicable).
5.6. Defects are reported and recorded according to procedures and appropriate action is taken.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication techniques in the workplace including whistles, hand signals and use of fixed channel two-way radios
- communication skills at a level sufficient to communicate with other site personnel
- calculate rated capacity of lifting equipment
- apply different methods for making temporary connections to loads using fibre and synthetic ropes
REQUIRED SKILLS AND KNOWLEDGE

- ability to interpret rated capacity and working load limit tags
- hazard identification and control
- slinging techniques
- selection and inspection of lifting equipment
- directing crane operators in the moving of loads in a safe manner, using a slewing crane
- inspection and care of a wide range of lifting equipment to appropriate Australian Standards and/or manufacturer's specifications.

Required knowledge

Required knowledge for this unit is:

- appropriate mathematical procedures for estimation and measurement of loads
- basic knowledge of types of cranes and their functions
- Commonwealth, state or territory OHS legislation, standards and codes of practice relevant to the full range of techniques for undertaking dogging activities
- load stability and safety factors in line with manufacturer's specifications
- types of lifting equipment and slinging techniques for use, and their limitations and performance in a wide range of conditions (including but not limited to slings, beams, accessories, clamps, work-boxes, bins and pallets)
- understanding of the hierarchy of control.
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

Successful assessment of this unit meets the competency requirement of the National Standard for licensing Persons Performing High Risk Work.

State/Territory OHS regulators have mandated the use of Assessment Instruments and Instructions for Assessment of this unit which have been endorsed by the national body responsible for OHS matters.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- comply with Commonwealth, state or territory OHS legislation, standards relevant to safe dogging and crane operations.
- communicate and work safely with others in the work area.
- apply Hazard prevention and control measures consistent with appropriate standards.
- apply to move loads in conjunction with cranes including, the reading of tags, slinging, loading, directing and landing loads with a slewing mobile crane with a telescopic boom and a winch, in and out of sight of the crane/operator, moving four loads of varying shapes, sizes and weights.
- use fibre and/or synthetic rope as tag lines, and connecting to loads using clove hitch, rolling hitch, bowline and single sheetbend.
- conduct pre and post operational checks of the lifting equipment.

#### Context of and specific resources for assessment

- Assessment of the safe and effective application of knowledge and skill to workplace tasks (performance) must be undertaken using the national OHS endorsed Assessment Instrument
- Assessment of performance must be undertaken either in the workplace or in a realistically simulated workplace setting
EVIDENCE GUIDE

- Assessors must ensure that the assessment in the workplace is organised through a workplace supervisor to ensure that all the required equipment and materials and a suitable working area is made available to suit the assessment and the workplace.
- Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with the requirements of any relevant Standards or operating procedures for dogging activities.
- Applicants must have access to:
  - personal protective equipment (PPE) for the purpose of the performance assessment.
  - four different loads as prescribed in the endorsed assessment instrument.
  - lifting and associated equipment.
  - suitable slewing crane.
  - communication equipment (e.g. fixed channel, two-way radios) as applicable.

Method of assessment

Assessment must be conducted using the national OHS endorsed Assessment Instrument. This Instrument provides instruction on the application of the assessment.

Assessment may be in conjunction with the assessment of other units of competency.

The use of 'simulators' in the assessment of this unit of competency is not acceptable.

Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.

Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.

Guidance information for assessment

Further information about endorsed Assessment Instruments may be obtained from state/territory OHS regulators.
Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Site information may include but not be limited to:

- local conditions such as access and egress
- work method statements.

Hazards may include but not limited to:

- ground stability (eg. ground condition, recently filled trenches, slopes)
- overhead hazards (e.g. power lines, service pipes, trees, buildings, etc)
- insufficient lighting
- traffic (e.g. pedestrians, vehicles, plant)
- weather (e.g. wind, lightning, storms)
- other specific hazards (e.g. trip hazards, heights, radio interference, etc).

Hazard prevention/control measures

The systematic process of eliminating or reducing the risk to personnel and property through the application of controls.

It includes the application of the hierarchy of controls, including:

1. elimination.
2. substitution.
3. isolation.
4. engineered control measures.
5. safe work practices.
6. personal protective equipment.

Appropriate standards may include:

- codes of practice
- legislation
- Australian Standards
- manufacturer’s specifications
- industry standards.

Lifting Equipment may include but not limited to:

- fibre ropes
- wire ropes
- chain
RANGE STATEMENT

- wire and synthetic slings
- shackles
- eyebolts
- beam clamps
- plate clamps
- spreader beams
- lifting beams
- pallet forks and cages
- concrete kibbles
- personnel boxes.

*Communication Methods* may include but are not limited to:

- written instructions
- signage,
- hand signals
- listening
- questioning to confirm understanding
- appropriate worksite protocol.

*Cranes* may include but not limited to:

- tower cranes (including self erecting)
- portal boom cranes
- vehicle loading cranes
- slewing mobile cranes
- non-slewing cranes
- derrick cranes.

*Appropriate personnel* may include but are not limited to:

- supervisors
- colleagues
- managers who are authorised to take responsibility for the workplace or operations.

*Communication Equipment* may include but not limited to:

- fixed channel two-way radios
- whistles
- bells.

*Personal protective equipment* (PPE) may include but not limited to:

- hard hat
- safety boots
- gloves
- high visibility clothing
- reflective vest
- relevant breathing, hearing, sight, skin and sun protection.

*Load destination* may include but not limited to:

- ground
- loading platforms
- suspended floors
- vehicles.
RANGE STATEMENT

Communication signals may include but not limited to:

- stop - hand
- stop - whistle
- hoist up - hand
- hoist up - whistle
- hoist down - hand
- hoist down - whistle
- luff boom down - hand
- luff boom down - whistle
- luff boom up - hand
- luff boom up - whistle
- telescope out - hand
- telescope out - whistle
- telescope in - hand
- telescope in - whistle
- slew left - hand
- slew left - whistle
- slew right - hand
- slew right - whistle.

Defective Equipment may include but not limited to:

- excessive wear
- damage
- stretched
- broken wires
- cut/damaged fibres.

Functional area

Functional area
CPCCLRG3002A Licence to perform rigging intermediate level

Modification History
Not Applicable

Unit Descriptor
Unit descriptor This unit specifies the outcomes required to perform rigging work at the intermediate level, which includes all the outcomes for rigging work at the basic level, and also includes rigging of cranes, rigging of conveyors, rigging of dredges and excavators, rigging associated with tilt slabs, rigging associated with demolition work, and dual lifts for licensing purposes.

Application of the Unit
Application of the unit This unit requires the applicant to be able plan the work, select and inspect equipment, set up task, erect structures and plant and dismantle structures and plant.

This unit is based upon the National Standard for Licensing Persons Performing High Risk Work.

This unit in its current form meets state and territory licensing requirements. Any alteration will result in a unit which is not acceptable to regulators for the purpose of licensing.

This unit has a pre-requisite requirement. This requirement may be met by either the successful completion of the unit CPCCLRG3001A Licence to perform rigging basic level or holding a valid licence for basic rigging.

5.7. Hazard prevention/control measures are removed |
ELEMENT PERFORMANCE CRITERIA

(Where appropriate)

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to calculate Safe Working Load (SWL) and Working Load Limit (WLL)
- ability to erect and dismantle, level, plumb and stabilise associated plant and structures
- ability to work safely at heights including the correct application of safety equipment.
- accurate interpretation of structural charts and structural plans (site information)
- correct application and use of all rigging and associated equipment
- risk assessment and hazard control strategies
- interpersonal and communication skills at a level sufficient to site/workplace requirements. This includes the relevant communication methods and equipment.
- verify problems and equipment faults and demonstrate appropriate response.

Required knowledge

Required knowledge for this unit is:

- appropriate mathematical procedures for estimation and measurement of loads
- ability to interpret manufacturer's specifications for all plant and equipment use in rigging operations
- knowledge of principles relating to all plant, equipment and structural stability
- knowledge of the types and functions of rigging, safety and associated equipment including an understanding of their limitations
- organisational and workplace standards, requirements, policies and procedures for rigging
- understanding of the hierarchy of hazard identification and control
- relevant Commonwealth, state or territory and local government OHS legislation, standards and codes of practice for undertaking rigging activities
- understanding of inspection and maintenance requirements of a wide range of appropriate plant and equipment in line with Australian Standards or manufacturer's specifications
- estimation of ground bearing pressures of the full range of soil types and associated
REQUIRED SKILLS AND KNOWLEDGE

- ground conditions for setting up plant and equipment.
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Successful assessment of this unit meets the competency requirement of the National Standard for licensing Persons Performing High Risk Work.

State/Territory OHS regulators have mandated the use of Assessment Instruments and Instructions for Assessment for this unit which have been endorsed by the national body responsible for OHS matters.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- comply with OHS licensing legislation.
- effectively communicate and work safely with others in the work area.
- effectively conduct risk assessment and management procedures.
- effectively complete the following tasks:
  - adding and removing a tower crane section, or
  - adding and removing a crane lattice boom section, or
  - erecting a non guyed tower (e.g. light tower, and
  - perform a multiple crane lift, or
  - a multiple winch lift, or
  - a combination of a crane and winch lift, and
  - lifting and installing a series of tilt-up panels, or
  - lifting and installing a series of scenery panels (i.e. entertainment industry), and
  - demolish/remove a series of tilt-up panel structures, or
  - demolish/remove a series of scenery panel structures, and
  - demolishing a concrete encased structural steel column and beam.
- **NB**: All specifications for these performance
EVIDENCE GUIDE

tasks are detailed in the endorsed assessment instrument.
- effectively conduct pre and post operational checks of intermediate rigging equipment.

Context of and specific resources for assessment

Assessment of the safe and effective application of knowledge and skill to workplace tasks (performance) must be undertaken using the endorsed Assessment Instrument.

Assessment of performance must be undertaken either in the workplace or in a realistically simulated workplace setting.

Assessors must ensure that the assessment in the workplace is organised to ensure that all the required equipment and materials and a suitable working area is made available to suit the assessment and the workplace.

Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints.

Assessment is to comply with relevant appropriate standard requirements.

Applicants must have access to:
- personal protective equipment (PPE) for the purpose of the Performance Assessment
- appropriate safety equipment is safe condition
- appropriate rigging equipment, associated equipment associated plant in safe condition as described in the endorsed assessment instrument
- communication equipment (e.g. radios) where applicable
- appropriate materials as required for safe erection of structures.

Method of assessment

Assessment must be conducted using the endorsed Assessment Instruments. These Instruments provide advice on their application.

The use of 'simulators' in the assessment of this unit of competency is not acceptable.

Assessment may be in conjunction with the assessment of other units of competency.
EVIDENCE GUIDE

Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.

Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.

Guidance information for assessment

Further information about endorsed Assessment Instruments may be obtained from state/territory OHS regulators.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Hazards may include but not limited to:

- ground stability (e.g. ground condition, recently filled trenches, slopes)
- overhead hazards (e.g. power lines, service pipes) (NB: Minimum clearance distance from powerlines or electrical equipment as determined by relevant state authority or electrical supply authority)
- traffic (e.g. pedestrians, vehicles, other plant)
- insufficient lighting
- environmental conditions (e.g. wind, lightning, storms)
- other specific hazards (e.g. dangerous materials).

Hazard control measures:

Refers to the systematic process of eliminating or reducing the risk to personnel and property through the application of controls.

It includes the application of the hierarchy of control, the six-step preference of control
RANGE STATEMENT

measures to manage and control risk:
- elimination
- substitution
- isolation
- engineering control measures
- using safe work practices
- personal protective equipment.

**Appropriate standards** may include but are not limited to:
- codes of practice
- legislation
- Australian Standards
- manufacturer's specifications
- industry standards (where applicable).

**Site Information** may include but is not limited to:
- local conditions such as access and egress
- work method statements
- site-specific job safety analyses and other site specific documentation as required
- task plans /schedules and structural plans.

**Forces and Loads** may include but are not limited to:
- dead loads
- live loads
- static load
- dynamic loads
- wind loads.

**Structures** may include but not limited to:
- concrete tilt-up panels
- scenery panels (used in entertainment)
- non guyed light towers.

**Associated plant** may include but is not limited to:
- all types of cranes
- conveyors
- dredges
- excavators.

**Appropriate personnel** may include but not limited to:
- supervisors
- engineers
- colleagues
- managers who are authorised to take responsibility for the workplace or operations.

**Rigging Equipment** may include but is not limited to:
- scaffolds
- elevated work platforms
- stages
- personnel box
- cantilevered crane loading platforms,
RANGE STATEMENT

- mast climbers
- safety screens and shutters
- cranes including but not limited to:
  - non-slewing cranes
  - mobile slewing cranes
  - vehicle loading cranes
  - tower cranes
  - self-erecting tower cranes
  - portal boom cranes
  - derrick cranes
  - bridge and gantry cranes.

*Associated equipment* may include but is not limited to:
- all associated equipment at the basic rigging level, and
- lifting clutches (swift lifts)
- chain motors.

*Procedures* may include but are not limited to:
- manufacturer's guidelines (instructions, specifications or checklists)
- industry operating procedures, relevant codes of practice
- workplace procedures (work instructions, operating procedures, checklists).

*Safety Equipment* may include but not limited to:
- safety harness
- energy absorber
- lanyard
- inertia reel
- safety nets
- static lines.

*Communication Methods* may include but not limited to:
- verbal and non-verbal language
- written instructions
- signage
- hand signals
- listening,
- questioning to confirm understanding, and appropriate worksite protocol.

**NB:** Mobile phones are not to be used for signalling purposes during the rigging process.

*Communication equipment* may include but is not limited to:
- fixed channel two-way radios

*Hazard prevention/control* may include but is not limited to:
- safety tags on electrical switches/isolators
**RANGE STATEMENT**

*measures* may include but is not limited to:

- powerlines are insulated
- safety observer used inside exclusion zone
- power disconnected
- traffic barricades and control
- pedestrian barricades
- trench covers
- movement of obstructions
- personal protective equipment
- adequate illumination.

*Ground suitability* may include but is not limited to:

- rough uneven ground
- backfilled ground
- soft soils
- hard compacted soil
- rock
- bitumen
- concrete
- suspended concrete floors
- building roofs
- landings
- ground bearing pressure.

*Appropriate personnel* may include but not limited to:

- other riggers
- doggers
- crane operators.

*Flexible Steel Wire Rope (FSWR)* includes:

May include termination for:

- static lines
- guys
- purchase systems
- lashing
- cranes
- hoist and winch ropes.

Unit Descriptor
Unit descriptor
This unit of competency specifies the outcomes required to undertake Occupational Health and Safety (OHS) induction training within the construction industry.

It requires the ability to demonstrate personal awareness of OHS legislative requirements, and the basic principles of risk management and prevention of injury and illness in the construction industry.

Licensing requirements will apply to this unit of competency depending on the regulatory requirements of each jurisdiction.

Application of the Unit
Application of the unit
This unit of competency supports the attainment of the basic OHS knowledge required prior to undertaking designated work tasks within any of the sectors within the construction industry. The unit relates directly to the general induction training program specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Required skills for this unit are:

- communication skills to:
  - clarify OHS legislative requirements
REQUIRED SKILLS AND KNOWLEDGE

- verbally report construction hazards and risks
- ask effective questions
- relay information to others
- discuss OHS issues and information
- comprehension skills to:
  - explain the basic OHS legislative requirements which will be applicable to own work
  - explain the meaning of safety signs and symbols
  - identify common construction hazards
  - discuss the basic principles of risk management.

Required knowledge

Required knowledge for this unit is:

- applicable Commonwealth, State or Territory OHS legislation, regulations, standards, codes of practice and industry standards/guidance notes relevant to own work, role and responsibilities
- basic principles of risk management and assessment for construction work
- common construction hazards
- common construction safety signage and its meanings
- general construction emergency response and evacuation procedures
- general construction work activities that require licenses, tickets or certificates of competency
- general first aid response requirements
- general procedures for raising OHS issues
- general procedures for reporting OHS hazards, accidents, incidents, emergencies, injuries, near misses and dangerous occurrences
- general procedures for responding to hazards, incidents and injuries
- general workers' compensation and injury management requirements
- OHS hierarchy of controls
- OHS responsibilities and rights of duty holders, including:
  - persons in control of construction work/projects
  - employers and self-employed persons
  - supervisors
  - employees
  - designers
  - inspectors
  - manufacturers and suppliers
- own responsibilities to comply with safe work practices relating to:
  - housekeeping
REQUIRED SKILLS AND KNOWLEDGE

- identification of hazards
- preventing bullying or harassment
- smoking
- use of amenities
- use of drugs and alcohol
- role of OHS committees and representatives
- types of common personal protective equipment and fire safety equipment
- types of OHS information and documentation.
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence must confirm personal awareness of the following:

- applicable OHS legislative and safety requirements for construction work including duty of care
- the range of common construction hazards and procedures for the assessment of risk and application of the hierarchy of control
- OHS communication processes, information and documentation including the role of OHS committees and representatives, the meaning of common safety signs and symbols, and procedures for reporting hazards, incidents and injuries
- general procedures for responding to incidents and emergencies including evacuation, first aid, fire safety equipment and PPE.

Context of and specific resources for assessment

- Resources must be available to support the program including participant materials and other information or equipment related to the skills and knowledge covered by the program.
- It is recommended that the assessment tool designed specifically to support this unit of competency will provide consistency in assessment outcomes.
- Where applicable, physical resources should include equipment modified for people with disabilities
- Access must be provided to appropriate assessment support when required.
- Assessment processes and techniques must be culturally appropriate, and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed
- In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge.
EVIDENCE GUIDE

Questioning will be undertaken in such a manner as is appropriate to the oracy, language and literacy levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

Method of assessment

Assessment methods may include more than one of the following:

- practical assessment
- oral questioning
- written test
- work-based activities
- simulated project based activity

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

OHS legislative requirements relate to:

- Australian standards
- construction industry OHS standards and guidelines
- duty of care
- health and safety representatives, committees and supervisors
- licences, tickets or certificates of competency
- National Code of Practice for Induction Training for Construction Work
- national safety standards
- OHS and welfare Acts and regulations
- safety codes of practice.

Duty of care requirements relate to:

- legal responsibility under duty of care to do everything reasonably practicable to protect others from harm
RANGE STATEMENT

- own responsibilities to comply with safe work practices, including activities that require licences, tickets or certificates of competency
- relevant state OHS requirements, including employers and self-employed persons, persons in control of the work site, construction supervisors, designers, manufacturers and suppliers, construction workers, subcontractors and inspectors.

Safe work practices include:
- access to site amenities, such as drinking water and toilets
- general requirements for safe use of plant and equipment
- general requirements for use of personal protective equipment and clothing
- housekeeping to ensure a clean, tidy and safer work area
- no drugs and alcohol at work
- preventing bullying and harassment
- smoking in designated areas
- storage and removal of debris.

Risk relates to:
- likelihood of a hazard causing injury or harm.

Principles of risk management include:
- assessing the risks involved
- consulting and reporting ensuring the involvement of relevant workers
- controlling the hazard
- identifying hazards
- reviewing to identify change or improvement.

Hazard relates to:
- any thing (including an intrinsic property of a thing) or situation with the potential to cause injury or harm.

Common construction hazards include:
- confined spaces
- electrical safety
- excavations, including trenches
- falling objects
- hazardous substances and dangerous goods
- HIV and other infectious diseases
- hot and cold working environments
- manual handling
- noise
- plant and equipment
RANGE STATEMENT

- traffic and mobile plant
- unplanned collapse
- ultraviolet (UV) radiation
- working at heights.

**Measures for controlling** risk to eliminate or minimise hazards in accordance with the hierarchy of control include:

- elimination
- substitution
- isolation
- engineering control
- administrative control
- personal protective equipment.

**OHS communication processes** include:

- discussions with OHS representatives
- OHS meetings
- OHS notices, newsletters, bulletins and correspondence
- OHS participative arrangements
- processes for raising OHS issues
- toolbox talks
- workplace consultation relating to OHS issues and changes.

**OHS information and documentation** includes:

- accident and incident reports
- Acts and regulations
- Australian standards
- codes of practice
- construction documentation and plans
- emergency information contact
- evacuation plans
- guidance notes
- job safety analyses
- labels
- material safety data sheets (MSDS)
- proformas for reporting hazards, incidents and injuries
- reports of near misses and dangerous occurrences
- risk assessments
- safe work method statements
- safety meeting minutes
- site safety inspection reports.

**Designated OHS personnel** includes:

- first aid officers
- OHS committee members
**RANGE STATEMENT**

- OHS representatives
- supervisors.

**Safety signs and symbols** include:
- emergency information signs (e.g. exits, equipment and first aid)
- fire signs (e.g. location of fire alarms and firefighting equipment)
- hazard signs (e.g. danger and warning)
- regulatory signs (e.g. prohibition, mandatory and limitation or restriction)
- safety tags and lockout (e.g. danger tags, out of service tags).

**Relevant authorities** include:
- emergency services (e.g. police, ambulance, fire brigade and emergency rescue)
- OHS regulatory authority
- supervisor.

**Incidents** include:
- accidents resulting in personal injury or damage to property
- near misses or dangerous occurrences which do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence, for example:
  - breathing apparatus malfunctioning to the extent that the user's health is in danger
  - collapse of the floor, wall or ceiling of a building being used as a workplace
  - collapse or failure of an excavation more than 1.5 metres deep (including any shoring)
  - collapse or partial collapse of a building or structure
  - collapse, overturning or failure of the load bearing of any scaffolding, lift, crane, hoist or mine-winding equipment
  - damage to or malfunction of any other major plant
  - electric shock.
  - electrical short circuit, malfunction or explosion
  - uncontrolled explosion, fire or escape of gas, hazardous substance or steam
  - any other unintended or uncontrolled incident or event arising from operations carried on at a
RANGE STATEMENT

**General procedures** for responding to incidents and emergencies include:

- basic emergency response (keep calm, raise alarm, obtain help)
- evacuation
- notification of designated OHS personnel and authorities
- notification of emergency services (e.g. when and how)
- referring to site emergency plans and documentation.

**Emergencies** include:

- chemical spill
- fire
- injury to personnel
- structural collapse
- toxic and/or flammable vapours emission
- vehicle/mobile plant accident.

**Personal protective equipment** includes:

- aprons
- arm guards
- eye protection
- gloves
- hard hat
- hearing protection
- high visibility retro reflective vests
- protective, well fitting clothing
- respiratory protection
- safety footwear
- UV protective clothing and sunscreen.

**Fire safety equipment** includes:

- breathing apparatus
- fire blankets
- firefighting equipment.

Unit Sector(s)

Unit sector: Construction

Co-requisite units
Co-requisite units  Nil

Functional area
Functional area
CPCCSF2003A Cut and bend materials using oxy-LPG equipment

Modification History
Not Applicable

Unit Descriptor
Unit descriptor This unit of competency specifies the outcomes required to heat, cut and bend construction materials using oxy-LPG equipment. It includes planning and preparation for the work, setting up and testing the equipment, cutting materials, heating and bending materials, shutdown of equipment and completion of clean-up activities.

Application of the Unit
Application of the unit This unit supports the attainment of skills and knowledge to use oxy-LPG-acetylene equipment to cut and bend materials for steelfixing applications, which includes working with others and as a member of a team. It does not involve specialist welding techniques.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
**Elements and Performance Criteria**

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Plan and prepare. | 1.1. Work instructions, including plans, specifications, quality requirements and operational details are obtained from relevant information, confirmed and applied to the scope of work performed.  
1.2. Safety (OHS) requirements are followed in accordance with safety plans and policies.  
1.3. Signage and barricade requirements are identified and implemented.  
1.4. Plant, tools and equipment are selected to carry out tasks are consistent with the requirements of the job, checked for serviceability and any faults are rectified or reported prior to commencement.  
1.5. Materials quantity requirements are calculated in accordance with plans, specifications and quality requirements.  
1.6. Materials appropriate to the work application are identified, obtained, prepared, safely handled and located ready for use.  
1.7. Environmental requirements are identified for the project in accordance with environmental plans and statutory and legislative authority obligations and applied. |
| 2. Set up and test equipment. | 2.1. Correct fire extinguisher is selected and located to be readily accessible prior to and during operations.  
2.2. Regulators are attached to oxy and acetylene bottles in accordance with manufacturer specifications and OHS regulations.  
2.3. Lines are purged to manufacturer recommendations prior to lighting up.  
2.4. Equipment is tested for leaks and corrective action undertaken or faults reported.  
2.5. Correct pressures and cutting tips are selected in accordance with material to be cut and manufacturer specifications. |
| 3. Cut material. | 3.1. Material is accurately marked and secured or clamped ready for cutting.  
3.2. Torch is lit correctly and safely according to manufacturer specifications.  
3.3. Setting of flame is adjusted for cutting to manufacturer recommendations.  
3.4. Correct cutting position is adopted during cutting to |

| 4. Heat and bend material.    | 4.1. Material is accurately marked and securely clamped ready for cutting.  
                                   | 4.2. Torch is lit correctly and safely according to manufacturer specifications.  
                                   | 4.3. Heat is applied to specified material and weakening effects of the heating process are minimised.  
                                   | 4.4. Material is bent to specification and correctly cooled.                                                                                                                                                        |
| 5. Shut down.                 | 5.1. Torch is switched off according to manufacturer specifications.  
                                   | 5.2. Gas supply is shut off according to manufacturer specifications.                                                                                                                                              |
| 6. Clean up.                  | 6.1. Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification.  
                                   | 6.2. Plant, tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.                                                               |

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Required skills for this unit are:

- communication skills to:
  - determine requirements
  - follow instructions
  - read and interpret:
  - documentation from a variety of sources
- drawings and specifications
  - report faults
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
REQUIRED SKILLS AND KNOWLEDGE

- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- mathematical and numeracy skills to apply measurements and calculations
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- construction and steelfixing terminology
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- oxy acetylene and LPG heating and cutting equipment set-up and operating techniques
- oxy acetylene and LPG heating and cutting equipment types, characteristics, uses and limitations
- plans, drawings and specifications
- processes for the calculation of material requirements
- quality requirements
- types and properties of steelfixing materials
- workplace and equipment safety requirements.
### Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply of relevant information, standards and specifications
- comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations
- comply with organisational policies and procedures, including quality requirements
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others
- use both oxy-acetylene and LPG systems to cut to specification a range of bars up to and including 36mm
- heat and bend a minimum of three bars to specification including at least one 36mm bar.

#### Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the
EVIDENCE GUIDE

mandatory task requirements
• relevant specifications and work instructions
• tools and equipment appropriate to applying safe work practices
• support materials appropriate to activity
• workplace instructions relating to safe work practices and addressing hazards and emergencies
• material safety data sheets
• research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:
• satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
• include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
• reinforce the integration of employability skills with workplace tasks and job roles
• confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:
• competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
• where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at
EVIDENCE GUIDE

the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge

- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions, where specified
- MSDS
- memos
- regulatory and legislative requirements pertaining to cut and bend materials using oxy/LPG equipment
- relevant Australian standards
- safe work procedures relating to cut and bend materials using oxy/LPG equipment
RANGE STATEMENT

- signage
- verbal, written and graphical instructions
- work bulletins
- work schedules, plans and specifications.
- cutting of steel includes cutting up of waste for salvage, cutting reinforcement steel and cutting holes in plate
- bending includes reinforcement steel
- all work is to conform to the requirements of relevant Australian standards.
- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling activities that may require the assistance of others or the use of manual or mechanical lifting devices where size, weight or other issues, such as a disability are a factor
- hazard control
- hazardous materials and substances, including cement and curing agents
- organisational first aid
- PPE prescribed under legislation, regulations and workplace policies and practices
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
  - cutting, grinding and welding equipment
  - lighting
  - power equipment
  - power leads and sources
  - trip hazards
  - work site visitors and the public
  - working in confined spaces
  - working in proximity to others
  - working with metals under stress
  - use of firefighting equipment
  - use of tools and equipment
  - workplace environmental requirements and safety.

Scope of work:

- cutting of steel includes cutting up of waste for salvage, cutting reinforcement steel and cutting holes in plate
- bending includes reinforcement steel
- all work is to conform to the requirements of relevant Australian standards.
- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling activities that may require the assistance of others or the use of manual or mechanical lifting devices where size, weight or other issues, such as a disability are a factor
- hazard control
- hazardous materials and substances, including cement and curing agents
- organisational first aid
- PPE prescribed under legislation, regulations and workplace policies and practices
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
  - cutting, grinding and welding equipment
  - lighting
  - power equipment
  - power leads and sources
  - trip hazards
  - work site visitors and the public
  - working in confined spaces
  - working in proximity to others
  - working with metals under stress
  - use of firefighting equipment
  - use of tools and equipment
  - workplace environmental requirements and safety.

Safety (OHS) is to be in accordance with state and territory legislation and regulations and project safety plan and may include:

- cylinders
- regulators
RANGE STATEMENT

- gas tubing
- cutting blowpipes
- flint lighters
- measuring tapes and rules
- clamps and support stands.

**Materials:**
- include:
  - cutting consumables
  - deformed bars
  - mesh sheets of deformed bars
  - mesh sheets of plain bars
  - plain rods
- may include:
  - pipe sections
  - scaffolding components
  - structural steel sections.

**Quality requirements** include relevant regulations, including:
- Australian standards
- internal company quality policy and standards
- manufacturer specifications
- workplace operations and procedures.

**Environmental requirements** include:
- clean-up management
- dust and noise
- waste management.

**Statutory and regulatory authorities** include:
- federal, state and local authorities administering the applicable Acts, regulations and codes of practice.

**Unit Sector(s)**

Unit sector: Construction

**Functional area**

Functional area
CPPWMT3011A Respond to waste emergencies

Modification History
Revised unit
Unit updated and equivalent to PRMWM11B Respond to waste emergency

Unit Descriptor
This unit of competency specifies the outcomes required to respond to a range of emergencies which may occur in the management of waste. It requires the ability to act quickly in a methodical and calm manner.

Application of the Unit
This unit of competency supports individuals with responsibilities for conducting waste management activity. It includes contributing to the implementation of developed operational procedures, as well as recognising the need for expert advice.

Licensing/Regulatory Information
No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
Elements and Performance Criteria

1 Identify nature of emergency.

1.1 Details of the nature, type and severity of the emergency are identified, including waste types involved and existing and potential hazards and risks.

1.2 Emergency is reported to supervisor or team leader according to organisational requirements and relevant legislation and codes.

2 Prepare to respond to emergency.

2.1 Potential hazards and risks are incorporated into emergency response action.

2.2 Emergency response action or procedures are followed according to organisational requirements and relevant legislation.

2.3 Full details of emergency are communicated to relevant parties.

2.4 Emergency and personal protective equipment is used safely and efficiently according to manufacturer specifications and organisational occupational health and safety (OHS) requirements.

2.5 Containment and isolation of emergency situation are conducted where possible to minimise danger to surrounding equipment, area, environment, other personnel and general public.

2.6 Risks to personnel are avoided and evacuation procedures are followed according to organisational requirements.

2.7 Necessary actions to protect organisational interests are taken according to organisational requirements.

3 Review emergency response.

3.1 Emergency response actions are monitored and evaluated continuously and modifications are made to response actions to reduce the impact of the emergency.

3.2 Emergency situation is controlled until formal relief is notified or received, according to organisational requirements, OHS standards and relevant legislation.
<table>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

**Required skills**

- emergency expertise to facilitate:
  - waste assessment
  - isolation procedures, including bunding and erecting barriers
  - selection of equipment
  - quality control inspection
- interpersonal skills to work in a team environment
- oral communication skills to:
  - ask questions
  - follow instructions
  - give clear information
  - listen effectively
- reading skills to:
  - interpret emergency requirements
  - follow emergency procedure guidelines
  - read graduated devices
  - interpret work requirements and material safety data sheets (MSDS)
- problem-solving skills to:
  - identify hazards and risks
  - identify waste types, including regulated waste and waste non-conformance
  - resolve pressure situations in a prompt, calm manner
- self-management skills to:
  - conduct work practices safely and efficiently
  - handle waste non-conformances
  - prioritise duties
  - use emergency and personal protective equipment (PPE)
- written communication skills for:
  - documentation, including emergency incident report
  - record keeping

**Required knowledge**

- emergency response procedures, including:
  - confined space procedures
  - HAZCHEM identification systems
• methods of containment and isolation of emergencies
• site management plan and identification of work areas, including location of:
  • alarms
  • emergency equipment
  • communications equipment
    • coding systems
    • reporting requirements
    • signalling techniques
    • standard emergency procedures
• identification of:
  • waste types, streams and characteristics
  • waste non-conformances
  • waste non-conformance procedures
  • waste recovery routes
• procedures for containing segregated waste types, including containment and isolation of hazardous waste
• emergency waste management processes to facilitate:
  • identification of plant and equipment
  • operation of plant and equipment
  • cleaning and maintenance of plant and equipment
  • recycling activity
• OHS requirements relating to:
  • chemical storage and decanting
  • dangerous goods and hazardous substances
  • OHS hierarchy of control
  • basic first aid appropriate to likely hazards and risks in work environment
• potential hazards and risks relating to:
  • dangerous goods
  • potential incidents
  • waste containment and segregation techniques
  • emergency response procedures
• service requirements, including:
  • client requirements
  • duty of care
  • organisational requirements
  • reporting requirements
  • waste management options
  • waste management hierarchy
  • waste containment and disposal techniques
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

|                                                             | • quality assurance documents  
|                                                             | • tender and contract documents  
|                                                             | • verbal or written instructions  
|                                                             | • work procedures.  |

| Legislation and codes may include: | • codes, including:  
|                                    | • Australian Code for the Transport of Dangerous Goods by Road and Rail  
|                                    | • industry  
|                                    | • commonwealth, state and territory legislation, including:  
|                                    | • anti-discrimination  
|                                    | • environmental protection  
|                                    | • equal employment opportunity  
|                                    | • freedom of information  
|                                    | • industrial  
|                                    | • OHS  
|                                    | • trade practices  
|                                    | • road laws.  |

| Potential hazards and | • damage to plant, vehicle or property  |
**risks** are those identified by the organisation that may lead to:
- harm to the environment
- illness or injury to employees, contractors or the public
- injuries resulting from manual handling and repetitive work.

**Potential hazards and risks** may include:
- broken glass
- broken metal
- compaction equipment
- contamination
- dust
- fire
- gases and fumes
- hazardous waste (e.g. sharps)
- narrow driveways
- other vehicles and equipment
- overhanging signs
- projectiles
- spark-producing equipment
- unguarded conveyor belts
- weather.

**Emergency response action or procedures** may include:
- cleaning up
- containing emergency
- isolating or shutting down equipment or plant
- evacuation
- first aid
- making site safe
- notifying authorities
- using PPE.

**Relevant parties** may include:
- emergency services
- other affected parties
- organisational personnel
- environmental protection agencies.

**Emergency and personal protective equipment** must include:
- communications equipment
- eye protection, such as goggles and protective glasses
- eyewash kit
- fire extinguishers
- first aid kit
- footwear
- hearing protection
- MSDS
- spill kit
- oil absorbent materials
- overalls and protective clothing.
### Emergency and personal protective equipment

**Could also include:**

- breathing apparatus
- emergency procedure guides
- face shield or mask
- gloves
- hard hats.

### Personal protective equipment

**Must be:**

- cleaned and fitted according to organisational requirements, manufacturer specifications and OHS requirements
- worn when required according to organisational requirements
- stored according to organisational requirements.

### Containment and isolation

**May include:**

- bunding area
- erecting barricades
- moving vehicle or equipment away from hazardous area
- sealing leaks
- transferring waste
- turning off electricity and gas
- using fire extinguishers
- water-hosing.

### Evacuation procedures

**May be found in:**

- emergency procedures manuals
- OHS requirements
- organisational requirements
- legislation and codes.

### Protecting organisational interests

**May include:**

- collecting details from witnesses
- not commenting or admitting liability
- not talking to media.

### Clean-up

**May include:**

- removing equipment, plant and vehicle from site
- removing and disposing of contaminated soil and liquid
- shovelling
- sweeping out
- using cleaning products
- using high pressure water or air-hosing
- vacuuming.

### Contamination

**May include:**

- exposure to sunlight
- infestation
- mixing with other waste types
- rot or mould
- waterlogging.

### Regulated waste identification signage

**May include:**

- classification of dangerous goods
- communications equipment
- first aid
- hazardous class
- HAZCHEM codes.
- packaging group number.

**Recorded** includes:
- authorities notified
- cause or suspected cause of emergency
- damage incurred to:
  - general public
  - equipment
  - personnel
  - vehicle
- emergency and personal protective equipment used
- emergency response procedures undertaken
- nature of clean-up
- nature, type, source and severity of emergency
- recommendations for preventing future emergencies
- regulatory authority requirements.

**Unit Sector(s)**
Waste management

CPPWMT3015A Move waste using loadshifting equipment

Modification History
Revised unit
Unit updated and equivalent to PRMWM15B Move waste using load shifting equipment

Unit Descriptor
This unit of competency specifies the outcomes required to operate a mobile plant for loading and unloading waste. It requires the ability to organise the activity and apply safe work practices.

Application of the Unit
This unit of competency supports individuals with responsibilities for managing waste during loadshifting. It includes contributing to the implementation of developed operational procedures, as well as recognising the need for expert advice.

Licensing/Regulatory Information
No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
## Elements and Performance Criteria

|   |   | **1** Prepare for loadshifting. | **1.1** **Job sheet and schedule** are reviewed to identify job requirements. |
|   |   |   | **1.2** **Loadshifting equipment**, associated attachments and **emergency and personal protective equipment** (PPE) are selected according to job requirements to maximise efficiency and effectiveness of transportation. |
|   |   |   | **1.3** Operator’s licence is inspected to ensure it complies with **organisational requirements** and **relevant legislation and codes**. |
|   |   |   | **1.4** **Potential hazards and risks** to work are identified and handled according to organisational **emergency response action or procedures**, and occupational health and safety (OHS) regulations and other relevant legislation and codes. |
|   |   | **2** Perform routine checks on loadshifting equipment. | **2.1** Visual check of equipment is conducted to pinpoint damage, leaks, obstructions, component wear or potential hazards. |
|   |   |   | **2.2** Equipment systems are tested to ensure that they comply with manufacturer specifications and organisational requirements. |
|   |   |   | **2.3** Service checks are conducted in compliance with manufacturer specifications to ensure water, oil, fuel, air pressure and greasing are maintained at designated levels. |
|   |   |   | **2.4** Emergency and personal protective equipment is checked to ensure it is functioning adequately. |
|   |   |   | **2.5** Associated equipment is checked to ensure that it is operational and complies with manufacturer specifications. |
|   |   | **3** Operate loadshifting equipment. | **3.1** Equipment is operated and driven in a safe and efficient manner, according to organisational requirements, road and traffic regulations, and other legislation and codes. |
|   |   |   | **3.2** Surrounding environment is continuously observed to identify and avoid or minimise potential hazards. |
3.3 Clear communication with relevant personnel is maintained.

4 Organise for loading.

4.1 Waste to be loaded and checked is identified to ensure integrity of containment.

4.2 Loading method is determined according to waste containment type and organisational requirements.

4.3 Equipment is parked or set up in a loading position that ensures efficiency and safety of loading.

4.4 Barriers and warning signs are erected at loading and unloading sites to ensure safety of surrounding personnel according to organisational requirements and relevant legislation.

5 Load and move waste.

5.1 Waste is loaded safely and efficiently according to waste type in designated area using an approved loading method to maintain integrity.

5.2 Liquid flow where waste is vacuumed is regulated to ensure maintenance of constant hose pressure.

5.3 Waste is moved safely and securely according to organisational requirements, manufacturer specifications and relevant legislation and codes.

5.4 Visual checks are maintained to identify and remedy potential hazards.

5.5 Load is checked to ensure it conforms to equipment capacity requirements, manufacturer specifications and relevant legislation and codes.

6 Unload waste.

6.1 Waste is unloaded safely and efficiently according to waste type, in designated area using an approved unloading method to maintain integrity.

6.2 Liquid flow where waste is vacuumed is regulated to ensure maintenance of constant hose pressure.

6.3 Visual checks are maintained to identify and remedy potential hazards during unloading.
6.4 Load is stacked or housed at destination according to organisational requirements, manufacturer specifications and relevant legislation and codes.

7 Shut down and secure loadshifting equipment.

7.1 Equipment is parked or stored in a safe location to avoid damage to equipment or obstruction of surrounding site activity.

7.2 Shut-down procedures are completed according to manufacturer specifications and organisational requirements.

7.3 Equipment is secured and stored to avoid unauthorised access or use.

8 Carry out basic housekeeping and maintenance.

8.1 Equipment is cleaned to remove debris and contamination and to ensure safe operating procedures.

8.2 Service checks are conducted according to manufacturer specifications to ensure water, oil, fuel, air pressure and greasing are maintained at designated levels.

8.3 Equipment faults or defects are reported to relevant personnel

8.4 Record of moving activities is completed promptly and according to organisational requirements.
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

**Required skills**

- driving ability to facilitate safe and efficient driving
- interpersonal skills to work in a team environment
- numeracy skills to:
  - measure weights and volumes
  - measure waste
- literacy skills to:
  - report waste movements and loading activity
  - read and interpret:
    - graduated devices
    - procedure guidelines
    - specifications
    - work requirements and material safety data sheets (MSDS)
- oral communication skills to:
  - direct traffic
  - ask questions
  - follow instructions
  - provide clear information
  - listen actively
- problem-solving skills to:
  - identify hazards and risks
  - identify waste types, including regulated waste and waste non-conformances
  - segregate waste types, including potentially hazardous wastes
- self-management skills to:
  - apply signalling techniques
  - conduct work practices safely and efficiently
  - handle waste non-conformances
  - identify routes
  - organise work methodically
  - safely load and unload waste
  - use emergency and PPE
  - work in confined spaces
- waste identification, including:
  - containment of hazardous waste
  - isolation
  - recording waste sorted
identifying and sampling waste types

**Required knowledge**

- driving:
  - licence requirements
  - road laws
  - map reading
- equipment operation to facilitate:
  - basic cleaning and maintenance of equipment
  - selection of plant and equipment
- identification of:
  - waste contaminants
  - waste non-conformances
  - waste types, streams and characteristics
  - loading and unloading methods
  - equipment load weight requirements
  - types of loading equipment
  - waste loading and unloading and moving hazards
  - requirements for handling and transporting waste
  - waste processing equipment
- potential hazards and risks relating to:
  - waste loading and unloading techniques
  - emergency response procedures
- OHS requirements relating to:
  - dangerous goods and hazardous substances
  - OHS hierarchy of control
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>This unit of competency could be assessed by observation of practical demonstration in the workplace or in a simulated work environment using loadshifting equipment.</th>
</tr>
</thead>
</table>
| Critical aspects for assessment and evidence required to demonstrate competency in this unit | A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to:  
  - interpret job sheets  
  - organise equipment operation  
  - load safely and efficiently  
  - observe OHS requirements. |
| Context of and specific resources for assessment | Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards’ requirements. Resource implications for assessment include:  
  - work plans and approved specifications  
  - forms and procedures manuals. |
| Method of assessment | Moving waste using loadshifting equipment must comply with industry expectations in the particular client environment. If the environment is narrowly defined or is not representative of industry needs, it may be necessary to refer to portfolio case studies to assess competency in the moving of waste. Assessment methods must:  
  - satisfy the endorsed Assessment Guidelines of the Property Services Training Package  
  - include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application  
  - reinforce the integration of employability skills with workplace tasks and job roles  
  - confirm that competency is verified and able to be transferred to other circumstances and environments. |
| Guidance information for assessment | Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision |
of appropriate assessment support.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

This unit could be assessed on its own or in combination with other units relevant to the job function, for example:

- CPPWMT3019A Prepare waste for re-use
- CPPWMT3044A Identify wastes and hazards.
## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

### Job sheet and schedule

| Typically include: | • emergency and PPE requirements  
|                   | • job route and sequence  
|                   | • site contact  
|                   | • site requirements  
|                   | • vehicle and associated equipment requirements  
|                   | • waste type, classification, characteristics and transport requirements. |

### Loadshifting equipment

| May include: | • dozers  
|             | • earthmoving equipment  
|             | • forklifts  
|             | • loaders:  
|             |   • front-end  
|             |   • rear-end  
|             |   • tailgate  
|             | • trucks:  
|             |   • articulated  
|             |   • open-bodied:  
|             |   • hook lift  
|             |   • pump  
|             |   • vacuum  
|             |   • rigid  
|             | • windrow turners. |

### Emergency and personal protective equipment

| Must include: | • communications equipment  
|              | • eye protection, such as goggles and protective glasses  
|              | • eyewash kit  
|              | • fire extinguishers  
|              | • first aid kit  
|              | • footwear  
|              | • gloves  
|              | • overalls and protective clothing. |

| Could also include: | • breathing apparatus  
|                     | • emergency procedure guides  
|                     | • face shields or masks  
|                     | • hard hats |
### Personal protective equipment

- hearing protection
- MSDS
- spill kit.

### Organisational requirements

- cleaned and fitted according to organisational requirements, manufacturer specifications and OHS requirements
- worn when required according to organisational requirements
- stored according to organisational requirements.

### Relevant legislation and codes

- codes, including:
  - Australian Code for the Transport of Dangerous Goods by Road and Rail
  - industry
- commonwealth, state and territory legislation, including:
  - anti-discrimination
  - environmental protection
  - equal employment opportunity
  - freedom of information
  - industrial
  - OHS
  - trade practices
  - road laws.

### Potential hazards and risks

- damage to plant, vehicle or property
- harm to the environment
- illness or injury to employees, contractors or the public
- injuries resulting from manual handling and repetitive work.

### Potential hazards and risks

- broken glass
- broken metal
- compaction equipment
- contamination
- dust
- fire
- gases and fumes
- hazardous waste (e.g. sharps)
- narrow driveways
- other vehicles and equipment
- overhanging signs
- projectiles
- spark-producing equipment
- unguarded conveyor belts
- weather.

**Emergency response action or procedures** may include:

- cleaning up
- containing emergency
- isolating or shutting down equipment or plant
- evacuation
- first aid
- making site safe
- notifying authorities
- using PPE.

**Relevant personnel** may include:

- client
- team leader
- team member
- management
- supervisor.

**Integrity of containment** may include checks for:

- contamination
- drum expansion
- gases
- leaching
- leaks
- seals
- spillage
- unstable form.

**Loading method** may include:

- cart lifter
- forklift
- front-end loader
- high pressure vacuum loading
- loading by hand
- shovelling.

**Waste type** may include:

- solid (non-hazardous), e.g. construction and demolition
- liquid (non-hazardous), e.g. chemical and aqueous
- hazardous – regulated, prescribed, quarantined, medical and clinical
- recoverable resources, e.g. recyclable and green waste.

**Cleaning of equipment** may include:

- cleaning products and fluids
- high pressure water or air-hosing
- shovelling
- sweeping out
- using decontamination products
- vacuuming.

Unit Sector(s)

Waste management

Custom Content Section

Not applicable.
CPPWMT3044A Identify wastes and hazards

Modification History
Revised unit
Unit updated and equivalent to PRMWM44B Identify wastes and hazards

Unit Descriptor
This unit of competency specifies the outcomes required to identify a range of wastes and potential hazards and risks that may be present in the work environment.

Application of the Unit
This unit of competency supports individuals with responsibilities for identifying wastes and potential hazards and risks in a team environment. It includes following direction, systems and plans, as well as recognising the need for expert advice.

Licensing/Regulatory Information
No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
## Elements and Performance Criteria

1. **Identify waste.**
   1.1 *Waste characteristics* are identified.
   1.2 Types of wastes are differentiated by *waste stream* or *waste categories*.
   1.3 *Hazardous and dangerous waste* and *non-conforming waste* are detailed.
   1.4 *Contaminants* present in waste are noted.
   1.5 Further information on waste is obtained by questioning appropriate personnel to ensure correct identification.

2. **Identify hazards and risks.**
   2.1 *Other potential hazards and risks* present in work environment are listed.
   2.2 Supervisor and team members are informed of job requirements, hazards and risks.
   2.3 Safe work practices that prevent risk behaviour are outlined to supervisor.
   2.4 Emergency response procedures are practised with team members.
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to:
  - identify hazards and risks
  - identify waste types and waste non-conformances
  - segregate valuable resources in composite materials
  - segregate waste types, including potentially hazardous waste
- interpersonal skills to work in a team environment
- literacy skills to:
  - list potential hazards and risks
  - document and keep records
  - read and interpret:
    - emergency requirements
    - hazard advice
    - job sheets
    - work requirements and material safety data sheets (MSDS)
- oral communication skills to:
  - follow instructions
  - provide information
  - ask questions
- self-management skills to:
  - apply signalling techniques
  - conduct work practices safely and efficiently
  - plan and undertake routine tasks
  - prioritise duties
  - use emergency and personal protective equipment (PPE)

Required knowledge

- identification of:
  - waste contaminants
  - waste monitoring procedures
  - waste non-conformances
  - waste non-conformance handling procedures
  - waste types
  - waste management options
- waste storage requirements
- waste disposal and recovery routes
- procedures for containing segregated waste types, including containment and isolation of hazardous waste
- emergency response procedures relating to:
  - confined space procedures
  - duty of care
  - identification of work areas, including location of:
    - alarms
    - emergency equipment
- communications equipment
  - coding systems
  - environmental agencies
  - environmental regulations
  - reporting requirements
  - signalling techniques
  - waste management hierarchy
  - waste containment methods and isolation of emergencies
- occupational health and safety (OHS) requirements relating to:
  - chemical storage and decanting
  - dangerous goods and hazardous substances
  - OHS hierarchy of control
  - basic first aid appropriate to likely hazards and risks in work environment
- potential hazards and risks relating to:
  - dangerous goods
  - potential incidents
**Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

This unit could be assessed on its own or in combination with other units of competency relevant to the job function, for example:

- CPPWMT3005A Identify and segregate waste
- CPPWMT3014A Manually sort waste.
## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Waste characteristics may include: | • density  
• level of contamination  
• quality  
• shape  
• size  
• volume  
• weight. |
| --- | --- |
| Waste stream may include: | • construction and demolition  
• dangerous goods  
• green waste  
• hazardous substances  
• municipal waste. |
| Waste categories may include: | • solid (non-hazardous), e.g. construction and demolition  
• liquid (non-hazardous), e.g. chemical and aqueous  
• hazardous – regulated, prescribed, quarantined, medical and clinical  
• recoverable resources, e.g. recyclable and green waste. |
| Hazardous and dangerous waste may include: | • all waste depending on the condition, environment and personal exposure  
• biological products  
• blood products  
• chemicals  
• electrical wiring  
• glass  
• hospital waste  
• leaking containers  
• medical waste  
• needles and syringes  
• oil and petrol. |
| Non-conforming waste may include: | • contamination  
• hazardous or dangerous waste  
• inferior quality and unacceptable waste streams. |
| Contaminants may include: | • sunlight  
• infestation  
• mixing waste types |
Other potential hazards and risks are those that may lead to:

- damage to plant, vehicle or property
- harm to the environment
- illness or injury to employees, contractors or the public
- injuries resulting from manual handling and repetitive work.

Hazards and risks may include:

- broken glass
- compaction equipment
- contamination
- dust
- fire
- hazardous waste (e.g. sharps)
- narrow driveways
- other vehicles and equipment
- overhanging signs
- projectiles
- spark-producing equipment
- unguarded conveyor belts
- weather.

FDFFS3001A Monitor the implementation of quality and food safety programs

Modification History
November 2011: minor typographical error corrected.

Unit Descriptor

| Unit descriptor | This unit of competency covers the skills and knowledge required to provide a leadership role in supporting day-to-day implementation of the food safety/quality programs in a work area. It also involves supporting others to implement the requirements of the food safety/quality procedures. |

Application of the Unit

| Application of the unit | This unit applies to those with formal responsibility for others, and to those required to model workplace policies and procedures but who have no formal management role. This unit is based on and equivalent to the guideline food safety unit GFSOFSA Oversee the day-to-day implementation of food safety in the workplace. Note that this unit does not apply to the pharmaceutical industry. Refer to FDFPH3001A Monitor and maintain Good Manufacturing Practice procedures. |

# Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Ensure others in the work area are able to meet quality and food safety requirements | 1.1. Hazard control and clothing and equipment appropriate to work requirements are available, functional and correctly fitted  
1.2. Information on food safety/quality responsibilities and procedures is current, accessible and communicated to others in the work area  
1.3. Information about identified hazards and the outcomes of risk assessment and risk control procedures is accessible and communicated to others in the work area  
1.4. Food safety/quality hazards and control measures used in the work area can be identified by those in the work area  
1.5. Mentoring and coaching support is available to support individuals/groups to implement quality and safe food handling procedures  
1.6. Training needs are identified and addressed within level of responsibility |
| 2. Monitor observance of quality standards and food safety programs in the work area | 2.1. Work procedures in the work area are clearly defined, documented and followed  
2.2. Deviation from identified procedures is identified, reported and addressed within level of responsibility  
2.3. Personal behaviour is consistent with workplace policies and procedures that support food safety and quality  
2.4. Food safety and/or quality hazards are identified and reported according to workplace procedures  
2.5. Food safety and quality information is recorded to meet workplace reporting requirements  
2.6. The work area is maintained according to housekeeping standards  
2.7. Work is conducted in accordance with workplace environmental guidelines |
| 3. Take corrective action in response to quality and food safety non-compliance | 3.1. Workplace procedures for responding to quality and food safety non-compliance are promptly implemented

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

*Ability to:*

- access, interpret and communicate information about the food safety program, quality requirements and related procedures to others in the work area
- demonstrate two-way communication, including active listening and responding constructively to feedback
- provide access to and maintain current food safety/quality documentation
- model safe food handling and quality practices and procedures to achieve required outcomes, including demonstrating:
  - work procedures that meet the requirements of quality and food safety
  - cleaning and sanitising equipment
  - sampling and testing as appropriate according to quality and food safety requirements
  - maintaining personal hygiene
  - wearing appropriate clothing and footwear as required by the work task
  - following procedures when moving within and between work areas
  - reporting health conditions and illnesses according to workplace procedures
  - handling, cleaning and storing equipment, utensils and packaging materials as appropriate
  - identify control points in the work area and demonstrate monitoring techniques used (control points include critical, quality and regulatory control points)
  - support others to meet quality standards and follow food safety procedures by ensuring that all personnel in the work area receive the information required and have the necessary skills and equipment to carry out their responsibilities
  - identify, report and/or address food safety/quality non-compliance in an appropriate and timely manner within level of responsibility
  - determine when and how to make adjustments to maintain output within level of responsibility
  - identify, report and/or address food safety/quality training and development needs of others in the work area
  - ensure that appropriate and timely action is taken in response to non-compliance
  - handle and dispose of out-of-specification or contaminated food, waste and recyclable material according to food safety program as this requirement relates to own work responsibility
  - participate in investigations of non-compliance and risk assessment processes
  - participate in consultation processes to improve quality and food safety outcomes in the workplace
**REQUIRED SKILLS AND KNOWLEDGE**

- review practice and procedures to implement recommendations arising from risk assessments and/or improvement proposals within level of responsibility, such as collecting and analysing food safety/quality records, reviewing operating procedures and communicating changes to others in the work area
- ensure that housekeeping standards are maintained and that equipment is in operational order, such as participating in the management of equipment calibration
- monitor the recording of quality and food safety information to confirm that records accurately reflect performance and meet the requirements of the food safety and quality programs
- participate in food recall procedures as required, within level of responsibility
- facilitate consultation processes according to enterprise procedures
- lead investigations of quality and food safety incidents according to enterprise procedures
- work cooperatively within a culturally diverse workforce

**Required knowledge**

*Knowledge of:*

- sources of information and expertise on procedures and responsibilities for food safety relevant to the workplace
- principles of a HACCP-based approach to managing food safety, including identifying hazards that are likely to occur, establishing appropriate methods of control and confirming that controls are met
- basic concepts of quality assurance including hazards, risk assessment and control methods
- company programs and systems in place to manage and support quality and food safety in the workplace, which may involve separate or integrated programs, including systems for maintaining and updating documents, such as operating procedures and specifications
- clothing and footwear requirements for working in and/or moving between food handling areas, including personal clothing maintenance, laundering and storage requirements
- appropriate bandages and dressings to be used when undertaking food handling
- housekeeping requirements and responsibilities relating to own work, where relevant this includes use and storage of housekeeping/cleaning equipment
- procedures to follow in the event of pest sighting or discovery of infestation
- purpose and importance of cleaning and sanitation procedures
- legal obligations for food safety and quality, including an awareness of government legislation and customer requirements
- food safety and quality responsibilities and requirements relating to the work area
- awareness of common micro biological, physical and chemical hazards related to the foods handled in the work area, including the types of hazards likely to occur, the conditions under which they occur, possible consequences and control methods
### REQUIRED SKILLS AND KNOWLEDGE

- suitable standard for materials, measuring devices, equipment and utensils used in the work area
- properties of food and ingredients used that affect food safety, including an understanding of related storage, processing and handling requirements
- current technical and process knowledge required to participate in investigations of food safety/quality hazards, risks and incidents within level of responsibility, including an understanding of common micro biological, physical and chemical hazards, related control methods and the way changes in equipment and/or processing methods can affect food safety and quality outcomes
- procedures for identifying unsafe and/or non-conforming product, including control points and evidence of out-of-specification product or materials
- sampling procedures, test methods and inspections
- options for responding to non-compliance, including legal responsibility, risk management and cost/implications of different responses and level of responsibility for decision making
- methods used in the workplace to isolate or quarantine food which may be unsafe
- waste collection, recycling, handling and disposal, including handling/disposal requirements for different types of waste, such as hazardous waste where relevant
- traceability and recall procedures within level of responsibility
- documentation system and procedures, including record keeping to meet both company and legal requirements, procedures for developing and/or reviewing workplace procedures, and document control systems used in the workplace
- auditing arrangements, roles and responsibilities as they relate to own work responsibilities, such as internal and external audit processes
- appropriate communication skills and techniques to convey information on quality and food safety requirements to others in the workplace
- cleaning and sanitation procedures where relevant
- impact of rework handling/addition on food safety where relevant
- sampling and test methods where relevant
- facilitation and consultation techniques where relevant
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment
Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit
Evidence of ability to:
- describe quality and food safety program, risks and control measures of the work area
- confirm that control measures are in place and that personnel in the work area are equipped and informed to implement programs
- identify, address and follow up on non-compliances
- identify causes of non compliances
- conduct risk assessments and recommend responsive action
- provide support to others to implement the programs
- complete and maintain documentation.

### Context of and specific resources for assessment
Assessment must occur in a real or simulated workplace where the assessee has access to:
- food safety program for the work area which identifies critical control points, control measures and corrective action
- quality policy, system and procedures
- work area or system in which quality and food safety practices and procedures are to be monitored
- personal protective clothing and equipment as required
- review/audit arrangements
- reporting and monitoring systems.

### Method of assessment
This unit should be assessed together with other units of competence relevant to the function or work role. Examples could be:
- FDFPPL3001A Participate in improvement processes
- FDFPPL3004A Lead work teams and groups
- BSBRES401A Analyse and present research

  - standard operating procedures (SOPs)  
  - specifications  
  - log sheets  
  - written or verbal instruction incorporating food safety and quality requirements |
| Incidents             | A food safety incident is:  
  - a situation where the safe limits or parameters identified by the food safety program are not met  
A quality incident is:  
  - a situation where the quality limits or parameters identified in specifications or
## RANGE STATEMENT

<table>
<thead>
<tr>
<th>Activity</th>
<th>Description</th>
</tr>
</thead>
</table>
| **Monitoring** | Monitoring describes the methods used to confirm that a food safety or quality hazard is in control, such as:  
- taking temperatures  
- collecting samples  
- conducting visual inspections  
- additional testing as required |
| **Responsibility for identifying breaches of food safety procedures** | Responsibility for identifying breaches of food safety procedures and taking corrective action occurs in the context of the food safety program and within scope of responsibility |
| **Responsibility for identifying non-compliance against quality standards** | Responsibility for identifying non-compliance against quality standards occurs within the context of defined standards or specifications and relates to work area |
| **Personal hygiene requirements** | Minimum personal hygiene requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in the Food Safety Standard 3.2.2, Division 4:14 and/or state or territory legislation/regulations |
| **Reporting of health conditions and illnesses** | Reporting of health conditions and illnesses requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in Food Safety Standard 3.2.2, Division 4:13 and/or state or territory legislation/regulations |
| **Operator responsibilities** | The operator at this level may not have direct responsibility for overseeing the training/development of team members. At a minimum they must be able to identify development needs of others in the work area and refer this information to the relevant personnel. The operator at this level may not have responsibility for independently assessing risks and determining the effectiveness of control measures. However, they would be expected to observe day-to-day effectiveness and participate in assessment and review processes. Responsibilities |
### RANGE STATEMENT

| Record keeping | at this level may include facilitating consultation processes within level of responsibility | Record keeping complies with customer, legal and food safety program requirements |

FPICOT3226A Shift forestry logs using trucks

Modification History
Not applicable.

Unit Descriptor
This unit specifies the outcomes required to drive log trucks to a forestry harvesting site, load logs on site, deliver logs to their intended destination and unload the logs in accordance with organisational procedures and regulations. Compliance with licensing, legislative, regulatory or certification requirements may be required in various jurisdictions.
This unit replaces FPIH3032A Shift forestry logs using truck.
This unit specifies the outcomes required to drive log trucks to a forestry harvesting site, load logs on site, deliver logs to their intended destination and unload the logs in accordance with organisational procedures and regulations. Compliance with licensing, legislative, regulatory or certification requirements may be required in various jurisdictions.
This unit replaces FPIH3032A Shift forestry logs using truck.

Application of the Unit
This unit supports the attainment of skills and knowledge required for competent workplace performance in forest and forest products operations of all sizes. The unit applies to a forest environment and involves application of skills and knowledge at a tradesperson level. These skills and knowledge are to be used within the scope of the persons job and authority.

<table>
<thead>
<tr>
<th>Element</th>
<th>Performance Criteria</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Plan log movement</td>
</tr>
<tr>
<td>2</td>
<td>Load and unload truck</td>
</tr>
</tbody>
</table>

1. Plan log movement

1.1 Applicable Occupational Health and Safety (OHS), legislative and organisational requirements relevant to shifting forestry logs using trucks are identified and complied with

1.2 Work order is reviewed and clarified with appropriate personnel

1.3 Type of truck, ancillary equipment, accessories and configuration to be operated are checked for serviceability in accordance with manufacturer's specifications and statutory regulations

1.4 Logging sites and logs to be transported are identified from schedules, work orders and harvesting site personnel

1.5 Truck loads, transport routes, timing with harvesting personnel are planned and permits obtained to comply with statutory road regulations and road conditions

1.6 Communication with others is established and maintained in accordance with OHS requirements

2. Load and unload truck

2.1 Access is identified and manoeuvring approach planned for loading and unloading sites

2.2 Condition of roads and tracks are monitored and unexpected ground, water, vegetation or other
environmental conditions reported to appropriate personnel

2.3 Truck and trailer are positioned to maintain load safety and security while loading occurs

2.4 Logs are assessed for weight, diameter, length and grade

2.5 Log positioning equipment is placed and checked or reset for planned loading

2.6 Log loading is undertaken to ensure load build meets specifications, follows sequence and locations to minimise handling, stabilises the load and meets transport requirements

2.7 Logs are secured with sufficient securing devices to satisfy safety, job and regulatory requirements

2.8 Load is inspected after transport for log movement and logs only supported by binders or chains

2.9 Safe unloading sequence is assessed and provisions made to support logs which cannot be controlled when released

2.10 Binders and chains are released in correct sequence for truck, trailer and load configuration

3 Transport logs

3.1 Load is checked and trimmed to ensure safe transport with overhang warning devices fitted to comply with road regulations

3.2 Engine is started with instruments and gauges monitored to ensure equipment operation is safe according to manufacturer's specifications and safety rules

3.3 Truck is operated and driven to manufacturer's specifications and legislative requirements using primary and subsidiary controls as appropriate to conditions

3.4 Logs are transported following planned or modified route with consideration for road surfaces and conditions

3.5 Periodic load safety checks are conducted and load re-tensioned in accordance with statutory
requirements and road conditions

3.6 Truck is monitored using gauges, warning devices and observation of performance to detect operating faults

3.7 Log shifting process and truck operations including faults are **recorded and reported**

3.8 Truck is parked to avoid site and equipment hazards, engine shutdown and truck secured in accordance with manufacturer's specifications
Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required skills include:

- comply with legislation, regulations, standards, codes of practice and established safe practices and procedures for shifting forestry logs using trucks
- use and maintain relevant tools, machinery and equipment
- efficiently and safely shift forestry logs using trucks
- identify problems and equipment faults and demonstrate appropriate response procedures
- use appropriate communication and interpersonal techniques with colleagues and others
- accurately record and report workplace information, and maintain documentation

Required knowledge and understanding includes:

- applicable Commonwealth, State or Territory legislative, regulatory or certification requirements and codes of practice relevant to shifting forestry logs using trucks
- organisational and site standards, requirements, policies and procedures for shifting forestry logs using trucks
- principles of cultural diversity and access and equity
- environmental protection requirements, including the safe disposal of waste material
- established communication channels and protocols
- problem identification and resolution
- types of tools and equipment and procedures for their use, operation and maintenance
- applicable fall from heights regulations and compliance requirements
- log shifting equipment and techniques
- scheduling and routing procedures
- truck and equipment capabilities and
capacities
statutory road regulations
log loading and unloading methods
procedures for recording, reporting and maintaining workplace records and information
appropriate mathematical procedures for estimation and measurement including calculating time to complete tasks

KEYCOMPETENCIES
The seven key competencies represent generic skills considered necessary for effective participation by an individual in the workplace Performance Level 1 - at this level, the candidate is required to undertake tasks effectively Performance Level 2 - at this level, the candidate is required to manage tasks Performance Level 3 - at this level, the candidate is required to use concepts for evaluating and reshaping task

<table>

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to provide evidence that they can safely and efficiently shift forestry logs using trucks according to organisational requirements.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Comply with applicable Commonwealth, State or Territory legislative and regulatory requirements and codes of practice, including OHS, environmental and organisational policies and procedures, relevant to shifting forestry logs using trucks.

Communicate effectively and work safely with others in the work area.

Efficiently shift forestry logs using trucks to enterprise requirements.

Efficiently and accurately shift forestry logs using trucks for production and output activities.

Effectively coordinate personnel to follow procedures for shifting forestry logs using trucks.

Context of and specific resources for assessment

Competency is to be assessed in the workplace or realistically simulated workplace.

Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge, other than confirmatory questions, will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian Standards requirements.

The following resources should be made available:

- …
available:
workplace location or simulated workplace
materials and equipment relevant to shifting
forestry logs using trucks
specifications and work instructions

**Method of assessment**

Assessment must satisfy the endorsed
Assessment Guidelines of the FPI05
Training Package

Assessment methods must confirm
consistency and accuracy of performance
(over time and in a range of workplace
relevant contexts) together with application
of underpinning knowledge

Assessment must be by direct observation of
tasks, with questioning on underpinning
knowledge and it must also reinforce the
integration of key competencies

Assessment methods must confirm the
ability to access and correctly interpret and
apply the essential underpinning knowledge

Assessment may be applied under
project-related conditions (real or simulated)
and require evidence of process

Assessment must confirm a reasonable
inference that competency is able not only to
be satisfied under the particular
circumstance, but is able to be transferred to
other circumstances

Assessment may be in conjunction with
assessment of other units of competency

The assessment environment should not
disadvantage the candidate

Assessment practices should take into
account any relevant language or cultural
issues related to Aboriginality, gender or
language backgrounds other than English

Where the participant has a disability,
reasonable adjustment may be applied during
assessment

Language and literacy demands of the
assessment task should not be higher than
those of the work role
## Range Statement

### RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below.

**OHS requirements are to be in accordance with Commonwealth, State or Territory legislation and regulations, and organisational safety policies and procedures. Requirements may include:**

- the use of personal protective equipment and clothing
- safety equipment
- first aid equipment
- fire fighting equipment
- hazard and risk control
- elimination of hazardous materials and substances
- safe forest practices
- manual handling including shifting, lifting and carrying
- fall from heights regulations

**Legislative requirements are to be in accordance with applicable legislation from all levels of government that affect organisational operation. Requirements may include:**

- award and enterprise agreements
- industrial relations
- Australian Standards
- confidentiality and privacy
- OHS
- the environment
- equal opportunity
- anti-discrimination
- relevant industry codes of practice
- duty of care
- heritage and traditional land owner issues

**Organisational requirements**

- may include legal, organisational and site guidelines, policies and procedures relating to own role and responsibility, quality assurance, procedural manuals, quality and continuous improvement processes and standards, OHS, emergency and evacuation, ethical standards, recording and reporting, access and equity principles and practices,
equipment use, maintenance and storage, environmental management (waste disposal, recycling and re-use guidelines)

**Work order**

is to include instructions for equipment allocation and usage, location and intended activity to designated personnel

**Appropriate personnel**

may include supervisors, suppliers, clients, colleagues and managers

**Truck**

may include rigid or articulated log trucks, including semi-trailers, jinkers, quad-dogs, B doubles and two-bay skeletal trucks

**Ancillary equipment**

may include safety fittings, headache boards and cab guards

**Accessories**

may include tools, records, first aid kits, fire extinguishers, binders, chains and personal protective equipment

**Configuration**

is to include a truck and trailer combination

**Logs**

are to include assessment of diameter range, curvature, faults and length

**Communication**

may include schedules, verbal and non-verbal language, constructive feedback, active listening, questioning to clarify and confirm understanding, use of positive, confident and cooperative language, use of language and concepts appropriate to individual social and cultural differences, control of tone of voice and body language

**Environmental conditions**

may include ground growth, canopy, general forest lean, fallen trees, ground slope, soil and water protection, ground hazards and obstacles

**Log positioning equipment**

may include bolsters, slippers, stanchions and chocks

**Load build**

is to include positioning of logs on truck so as to avoid uneven weight distribution, instability or uncontrolled collapse of the load during loading or unloading, requirements for trailer rigidity, turning clearance, overhang, projection above
stanchions, crowning, weight distribution on truck and trailer axles, contact with bolsters, stanchions and other logs

**Securing devices** are to include chains, binders and other tensioning devices

**Trimming** is to include preparing the truck and load for safe transport

**Primary and subsidiary controls**

- Primary controls may include power, brakes, steering, speed, position, load reaction and gear selection
- Subsidiary controls may include differential lock, centre tyre inflation (CTI) and power dividers

**Re-tensioning** is to include re-tightening of the chains, binders and other tensioning devices

**Records and reports** may include scheduling and coordination outcomes, log movement, despatch outcomes, storage locations, quality outcomes, hazards, incidents or equipment malfunctions

- May be manual, using a computer-based system or another appropriate organisational communication system

**Unit Sector(s)**

Not applicable.

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Develop personal stress management plan | 1.1 Recognise potential causes of stress so that immediate action can be taken to reduce or eliminate the stress  
1.2 Recognise own response to stress in the workplace  
1.3 Organise work to minimise stress where possible  
1.4 Develop a personal stress management plan in consultation with supervisor  
1.5 Constantly monitor personal stress levels and evaluate the effectiveness of the stress management plan on an ongoing basis  
1.6 Take further action to manage stress when necessary |
<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 2. Offer *support* to colleagues | 2.1 Observe team members and colleagues for signs of stress after incidents and over time  
2.2 Informally debrief stressful incidents as soon as possible so prompt action can be taken to minimise stress reactions  
2.3 Offer constructive support to encourage effective management of personnel stress  
2.4 Identify need for further stress counselling and encourage prompt action |
| 3. Receive *support* from colleagues | 3.1 Recognise own level of stress on an ongoing basis and identify factors affecting stress level so prompt action can be taken to reduce or eliminate the effects of stress  
3.2 Seek support from colleagues when needed and accept where appropriate  
3.3 Recognise need for further stress counselling and promptly seek appropriate counselling |
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

**Essential knowledge:**
The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:

- Factors and circumstances likely to cause personal stress in the work environment
- Methods of controlling stress
- Organisation support programs and other available resources

**Essential skills:**
It is critical that the candidate demonstrate the ability to:

- Identify own personal stress and stressors
- Take steps to control or reduce stressors and stress
- Identify stress in others in the workplace
- Take steps, including the offer of support, to reduce, control or otherwise deal with stress

In addition, the candidate must be able to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes the ability to:

- Discuss issues relating to stress with colleagues and supervisor
- Promote, implement and manage work attitudes and practices that reflect awareness of the importance of a range of aspects of sustainability
- Use problem solving skills including:
  - using available resources
  - analysing information
  - making decisions to effectively manage personal stress within the working environment
REQUIRED SKILLS AND KNOWLEDGE

- Use oral communication skills required to fulfil job roles as specified by the organisation, including:
  - using interviewing techniques
  - asking questions
  - active listening
  - acknowledging and responding to a range of views

*continued ...*

**Essential skills (cont'd):**

- Use interpersonal skills, including:
  - working with others
  - showing empathy with colleagues
  - relating to persons from differing cultural, social and religious backgrounds

- Use written communication skills (literacy competence) required to fulfil job roles as specified by organisation, including:
  - reading and understanding incident reports and case management materials
  - personal stress management plan

Evidence Guide

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

*Critical aspects for assessment and evidence required to demonstrate this competency unit:*

- The individual being assessed must provide evidence of specified essential knowledge as well as skills
- Observation in the work environment is preferable. However, where workplace observation is insufficient to demonstrate competence, simulations and/or case studies may be used as supporting evidence.
- Evidence of workplace performance over time must be obtained to inform a judgement of competence.
EVIDENCE GUIDE

Access and equity considerations:

• All workers in the health industry should be aware of access and equity issues in relation to their own area of work
• All workers should develop their ability to work in a culturally diverse environment
• In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people
• Assessor and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Potential causes of stress may include but are not limited to:

• Acute stress from exposure to incidents involving trauma, violence, injury and/or death
• Chronic work-related stress, including burn out and serious fatigue

Responses to stress may include but are not limited to:

• Physical reaction
• Psychological (mental/emotional) reaction
• Changes in health
RANGE STATEMENT

Support may include, but is not limited to:

- Informal debriefing with colleagues
- Local peer support programs
- Other organisation resources

Support and de-brief may be provided:

- immediately
- when timely

Unit Descriptor

Descriptor
This unit of competency describes the skills and knowledge required to recognise and respond to life threatening emergencies using basic life support measures only

Application of the Unit

The skills and knowledge described here enable a first aider to provide an initial response to an emergency in line with practised actions, Australian Resuscitation Council (ARC) Guidelines, guidelines of Australian national peak clinical bodies and State/Territory legislation and regulations. Application should be contextualised as required to reflect workplace and community requirements relating to specific risks and hazards and associated injuries. Training Package users should ensure that implementation is consistent with State/Territory requirements for currency.

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency. The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Respond in an emergency situation | 1.1 Recognise emergency situation and identify hazards to health and safety of self and others  
1.2 Minimise immediate risk to self and casualty health and safety by controlling any hazard in accordance with work health and safety requirements  
1.3 Assess casualty and identify injuries, illnesses and conditions  
1.4 Assess the need for assistance |
ELEMENT

2. Apply identified first aid procedures

PERFORMANCE CRITERIA

2.1 Reassure casualty in a caring and calm manner and make comfortable using available resources

2.2 Determine and explain relevant first aid procedures to provide comfort

2.3 Seek consent from casualty prior to applying first aid management

2.4 Respond to the casualty in a culturally aware, sensitive and respectful manner

2.5 Use identified first aid procedures as required in accordance with established first aid principles, ARC Guidelines, guidelines of Australian national peak clinical bodies and State/Territory legislation and regulations

2.6 Use safe manual handling techniques as required

3. Communicate details of the incident

3.1 Request ambulance support and/or appropriate medical assistance according to circumstances

3.2 Accurately convey observation of casualty’s condition and management activities to ambulance services/relieving personnel

3.3 Adopt a communication style to match the casualty’s level of consciousness

3.4 Accurately assess and report details of casualty’s physical condition, changes in condition, management and responses to management in line with established procedures

3.5 Maintain confidentiality of records and information in line with privacy principles and statutory and/or organisation policies

4. Evaluate own performance

4.1 Seek feedback from appropriate clinical expert

4.2 Recognise the possible psychological impacts on rescuers of involvement in critical incidents

4.3 Participate in debriefing/evaluation to improve future response and address individual needs
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:
The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes knowledge of:
- ARC guidelines, guidelines of Australian national peak clinical bodies and State/Territory legislation and regulations, including requirements for currency
- Awareness of stress management techniques and available support
- Basic anatomy and physiology relating to:
  - absence of:
  - normal breathing
  - response/consciousness
    - choking/airway obstruction
    - severe bleeding
    - shock
  - Chain of survival
  - Duty of care requirements
  - First aid procedures for:
    - airway management
    - bleeding control
    - care of unconscious
    - casualty that is unresponsive/unconscious and not breathing normally
    - chest pain
    - infection control as it relates to standard precautions
    - respiratory distress, including asthma
    - severe allergic reaction
    - shock
  - How to access emergency response support services/personnel
  - Need to be culturally aware, sensitive and respectful
  - Own skills and limitations
  - Privacy and confidentiality requirements
  - Relevant workplace hazards
REQUIRED SKILLS AND KNOWLEDGE

- Understanding of the use of an Automated External Defibrillator (AED), including when to use and when not to

Essential skills:

It is critical that the candidate demonstrate the ability to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes the ability to:

- Assess vital signs and response of casualty
- Call an ambulance and/or medical assistance, according to circumstances and report casualty's condition
- Demonstrate first aid casualty management principles:
  - assess and minimise danger
  - check for response
  - maintain casualty's airway, breathing and circulation
- Demonstrate:
  - consideration of the welfare of the casualty
  - control of external bleeding
  - correct procedures for CPR on a resuscitation manikin (i.e. as per units HLTCPR211A Perform CPR)
  - implementation of standard precautions
  - safe manual handling of casualty
- Identify and minimise hazards to health and safety of self and others in the immediate workplace or community environment
- Plan an appropriate first aid response in line with established first aid principles, ARC Guidelines and guidelines of Australian national peak clinical bodies and State/Territory legislation and regulations and respond to contingencies in line with own skills
- Report details of emergency incident and first aid provided

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.
EVIDENCE GUIDE

Critical aspects of assessment:
- The individual being assessed must provide evidence of specified essential knowledge and essential skills.
- Competence should be demonstrated working individually and as part of a first aid team.
- Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting.
- Currency of knowledge and skills is to be demonstrated in line with ARC Guidelines, guidelines of Australian national peak clinical bodies and State/Territory legislation and regulations.

Context and resources required for assessment:
- For assessment purposes, demonstration of skills in CPR procedures requires using a model of the human body (resuscitation manikin) in line with ARC Guidelines.
- Demonstration of first aid procedures for severe bleeding must be demonstrated using standard precautions and first aid equipment including trauma dressings.

Access and equity considerations:
- All workers in the health industry should be aware of access and equity issues in relation to their own area of work.
- All workers should develop their ability to work in a culturally diverse environment.
- In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people.
- Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities.

Related unit:
- This unit stands alone and incorporates the content of unit HLTCPR211A Perform CPR.
Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Condition of the casualty must include, but is not limited to:

- Severe bleeding
- Absence of:
  - Response/conciousness
  - Normal breathing
  - Choking/airway obstruction
  - Severe allergic reaction

Identified first aid procedures must include:

- Airway management
- Cardiopulmonary Resuscitation (CPR)
- Control severe bleeding
- Provide assistance with self-administered medications, such as auto-injector, bronchodilator and space device in line with State/Territory legislation and regulations and any available medical/pharmaceutical instructions
- Care of the unconscious person

Resources and equipment are used appropriate to the risk to be met and may include:

- AED (if available)
- Auto-injector
- Bronchodilator and space device
- First aid kit
- Resuscitation mask or barrier

A hazard is:

A source or situation with the potential for harm in terms of human injury or ill-health, damage to property, the environment, or a combination of these
RANGE STATEMENT

Appropriate clinical expert may include:

- Ambulance officer/paramedic
- Appropriately qualified health care professional

Unit Descriptor

Descriptor

This unit of competency describes the skills and knowledge required to provide first aid response, life support, management of casualty(s), the incident and other first aiders, until the arrival of medical or other assistance.

Application of the Unit

Application

These skills and knowledge may be applied in a range of situations, including community and workplace settings.

Training Package users should ensure implementation is consistent with any specific workplace and/or relevant legislative requirements in relation to first aid, including State/Territory requirements for currency.

Application of these skills and knowledge should be contextualised as required to address specific industry, enterprise or workplace requirements and to address specific risks and hazards and associated injuries.

A current Senior First Aid, Workplace Level 2 or Level 2 qualification may provide evidence of skills and knowledge required by this competency unit. However, as with all evidence of competence, evidence must be assessed against the requirements specified in the unit of competency.

Elements and Performance Criteria Pre-Content
Elements define the essential outcomes of a unit of competency. The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.
# Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Assess the situation | 1.1 Identify assess and minimise *hazards* in the situation that may pose a risk of injury or illness to self and others  
1.2 Minimise immediate *risk* to self and casualty's health and safety by controlling any hazard in accordance with work health and safety requirements  
1.3 Assess casualty and identify injuries, illnesses and conditions |
| 2. Apply first aid procedures | 2.1 Adopt a communication style to match the casualty’s level of consciousness  
2.2 Use available *resources and equipment* to make the casualty as comfortable as possible  
2.3 Respond to the casualty in a culturally aware, sensitive and respectful manner  
2.4 Determine and explain relevant first aid procedures to provide comfort  
2.5 Seek consent from casualty prior to applying first aid management  
2.6 Provide *first aid management* in accordance with *established first aid principles and procedures*  
2.7 Seek first aid assistance from others in a timely manner and as appropriate  
2.8 Correctly operate first aid equipment for first aid management according to manufacturer/supplier’s instructions and procedures  
2.9 Use safe manual handling techniques  
2.10 Monitor *casualty's condition* and respond in accordance with established first aid principles and procedures  
2.11 Finalise casualty management according to casualty’s needs and first aid principles |
| 3. Communicate details of the incident | 3.1 Request ambulance support and/or appropriate medical assistance according to relevant circumstance  
3.2 Accurately convey observation of casualty’s condition and management activities to ambulance services / relieving personnel |
ELEMENT

PERFORMANCE CRITERIA

3.3 Accurately assess and report details of casualty’s physical condition, changes in conditions, management and response to management in line with established procedures

3.4 Maintain confidentiality of records and information in line with privacy principles and statutory and/or organisation policies

4. Evaluate own performance

4.1 Seek feedback from appropriate clinical expert

4.2 Recognise the possible psychological impacts on rescuers involved in critical incidents

4.3 Participate in debriefing/evaluation to improve future response and address individual needs

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes a demonstrated understanding of:

- Awareness of stress management techniques and available support
- First aid management, based on a risk assessment relevant to the workplace or community setting of:
  - abdominal injuries
  - allergic reactions
  - altered and loss of consciousness
  - asthma
  - anaphylaxis
  - bleeding
  - burns – thermal, chemical, friction, electrical
  - cardiac arrest
  - chest pain
  - choking/airway obstruction
  - drowning
- envenomation – snake, spider, insect and marine bites and stings
- environmental impact such as hypothermia, hyperthermia, dehydration, heat stroke
- injuries - cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations, fractures
- medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions
- poisoning and toxic substances (including chemical contamination)
- respiratory distress
- seizures
- shock
- stroke
- substance misuse – common drugs and alcohol, including illicit drugs
- unconsciousness, not breathing or not breathing normally
- Guidelines for provision of first aid as outlined in Australian Resuscitation Council (ARC) Guidelines and guidelines of Australian national peak clinical bodies and State / Territory legislation and regulations
- Social / legal issues including:
  - duty of care
  - confidentiality
  - importance of debriefing
  - need to be culturally aware, sensitive and respectful
  - own skills and limitations
- Understanding of:
  - basic work health and safety requirements in the provision of first aid
  - basic principles and concepts underlying the practice of first aid
  - chain of survival
  - infection control principles and procedures, including use of standard precautions
  - priorities of management in first aid when dealing with life threatening conditions
  - procedures for dealing with major and minor injury and illness
- Understanding of the use of an Automated External Defibrillator (AED), including when to use and when not to
- Understanding the causes of asphyxia due to body position

**Essential skills:**

It is critical that the candidate demonstrate the ability to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes the ability to:

- Apply first aid principles
- Call an ambulance and/or medical assistance according to relevant circumstances and report casualty(s) condition
Communicate effectively and assertively in an incident
Conduct an initial casualty assessment
Management of:
  - Anaphylaxis using adrenalin auto-injector
  - Avoiding asphyxia due to body position
  - Bronchospasm using bronchodilator and spacer device
  - Cardiac arrest using single rescuer procedure, including the demonstration of a seamless changeover between operators
  - External haemorrhage
  - Fractures, sprains and strains using arm slings, roller bandages and other appropriate immobilisation techniques
  - Unconscious casualty including using a recovery position
Demonstrate:
  - ability to call an ambulance
  - consideration of the welfare of the casualty
  - safe manual handling
  - site management to prevent further injury
  - understanding of causes contributing to asphyxia due to body position
Demonstrate correct procedures for performing CPR using a manikin, including standard precautions (i.e. as per unit HLTCPR211A Perform CPR)
Demonstrate infection control, including use of standard precautions
Evaluate own response and identify appropriate improvements where required
Follow State and Territory work health and safety legislative requirements
Make prompt and appropriate decisions relating to managing an incident in the workplace
Plan an appropriate first aid response in line with established first aid principles, ARC Guidelines and guidelines of Australian national peak clinical bodies, industry standards and State / Territory legislation and regulations and respond to contingencies in line with own skills
Prepare a written incident report or provide information to enable preparation of an incident report
Provide assistance with self-medication as per subject’s own medication regime and/or administer medication in line with State/Territory legislation and regulations, organisation policies and any available medical/pharmaceutical instructions
Unpack, activate and follow prompts of an AED

Evidence Guide
The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package. The evidence guide supplements assessment requirements that apply to all units in this Training Package. Users of this evidence guide should first read the package’s assessment guidelines.

**Critical aspects of assessment:**
- The individual being assessed must provide evidence of essential knowledge and essential skills
- Competence should be demonstrated working individually and as part of a first aid team
- Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting
- Currency of first aid knowledge and skills is to be demonstrated in line with ARC Guidelines and guidelines of Australian national peak clinical bodies and State / Territory legislation and regulations

**Context and resources required for assessment:**
- Skills in performing first aid procedures are to be assessed through demonstration, with questioning to confirm essential knowledge
- Demonstration of first aid procedures over the required range of situations relevant to the workplace setting must be demonstrated using standard precautions and first aid equipment including roller bandages, triangular bandages, other trauma dressings, bronchodilator and spacer device, adrenalin auto-injectors and AED
- For assessment purposes, demonstration of skills in CPR procedures requires using a model of the human body (resuscitation manikin) in line with ARC Guidelines

**Access and equity considerations:**
- All workers in the health industry should be aware of access and equity issues in relation to their own area of work
- All workers should develop their ability to work in a culturally diverse environment
- In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people
- Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities
The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package. The evidence guide supplements assessment requirements that apply to all units in this Training Package. Users of this evidence guide should first read the package’s assessment guidelines.

**Related units:**
This unit incorporates the content of units:
- HLT CPR211A Perform CPR
- HLTFA211A Provide basic emergency life support

**Range Statement**

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

**Contextualisation to address specific requirements may include:**
- First aid provision under specific constraints or circumstances (e.g. in confined spaces, in maritime work environment or in work environment involving identified risks/hazards)
- Focus on first aid management of specific types of injury

**Established first aid principles and procedures include:**
- Australian Resuscitation Council Guidelines
- Guidelines of Australian national peak clinical bodies
- Primary First Aid Principles to:
  - Preserve life
  - Prevent illness, injury and condition(s) becoming worse
  - Promote recovery
  - Protect the unconscious casualty
- State/Territory legislation and regulations

**Hazards may include:**
- A source or situation with the potential for harm in terms of human injury or ill-health, damage to property, the environment, or a combination of these
- Relevant hazards may be classified under the headings:
  - Biological hazards
  - Chemical hazards
  - Hazards associated with manual handling
  - Physical hazards
Risks may include:

- Environmental risks
- Exposure to blood and other body substances
- Risks associated with the proximity of other workers and bystanders
- Risks from body position
- Risks from equipment, machinery and substances
- Risks from vehicles
- Risks from first aid equipment
- Risk of further injury to the casualty

Casualty’s condition is managed for:

- Abdominal injuries
- Airway obstruction
- Allergic reactions
- Altered and loss of consciousness
- Bleeding
- Body position
- Burns – thermal, chemical, friction, electrical
- Cardiac arrest
- Chest pain
- Choking/airway obstruction
- Drowning
- Envenomation – snake, spider, insect and marine bites and stings
- Environmental impact such as hypothermia, hyperthermia, dehydration, heat stroke
- Injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations, fractures
- Medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions
- Poisoning and toxic substances (including chemical contamination)
- Respiratory distress
- Seizures
- Shock
- Stroke
- Substance misuse – common drugs and alcohol, including illicit drugs
- Unconsciousness, not breathing or not breathing normally

First aid management must take into account:

- Infection control
- Legal and social responsibilities of first aider
The setting in which first aid is provided, including:
- industry/site specific regulations, codes etc.
- location and nature of the incident
- location of emergency services personnel
- situational risks associated with, for example, electrical and biological hazards, weather, motor vehicle accidents
- State and Territory work health and safety legislative requirements
- workplace policies and procedures
- WHS requirements
- The use and availability of first aid equipment and resources

Resources and equipment are used appropriate to the risk to be met and may include:
- AED
- Auto-injector
- Bronchodilator and spacer device
- First aid kit
- Puffer/inhaler
- Resuscitation mask or barrier

Appropriate clinical expert may include:
- Ambulance officer/paramedic
- Appropriately qualified health care professional

Report details should include:
- Time
- Description of injury/illness
- First aid management
- Incident details
- Location
- Vital signs

Report details may include:
- Administration of medication including:
  - date
  - dose
  - person administering
  - time
- Fluid intake/output, including fluid loss via:
  - blood
  - faeces
  - urine
  - vomit
- Injury report forms
- Workplace documents as per organisation requirements

Unit Descriptor

Descriptor

This unit deals with the provision of advanced first aid response, life support, management of casualty(s), the incident and other first aiders, until the arrival of medical or other assistance, and provision of support to other providers

This unit builds on HLTFA311A: Apply first aid to include additional skills and use of a range of equipment

Application of the Unit

Application

These skills and knowledge may be applied in a range of situations, including community and workplace settings

Training Package users should ensure implementation is consistent with any specific workplace and/or relevant legislative requirements in relation to first aid, including State/Territory requirements for currency

Application of these skills and knowledge should be contextualised as required to address specific industry, enterprise or workplace requirements and to address specific risks and hazards and associated injuries

Competency outcomes in advanced resuscitation must be equivalent to unit:
• HLTFA404C Apply advanced resuscitation techniques

Licensing/Regulatory Information
Not Applicable

Pre-Requisites
Pre-requisite units
This unit must be assessed after successful achievement of pre-requisite:
• HLTFA311A Apply first aid

Elements and Performance Criteria Pre-Content
Elements define the essential outcomes of a unit of competency.
The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1.  Assess the situation | 1.1 Identify, assess and minimise hazards that may pose a risk of injury or illness to self and others  
1.2 Assess risks to first aider and others and determine appropriate response to ensure prompt control of situation  
1.3 Ascertain and prioritise need(s) for emergency services/medical assistance and undertake triage where required  
1.4 Deploy resources to appropriate locations as required in line with workplace procedures |
| 2.  Manage the casualty(s) | 2.1 Determine and explain the nature of casualty's injury/condition and relevant first aid procedures to provide comfort  
2.2 Respond to the casualty in a culturally aware, sensitive and respectful manner  
2.3 Seek consent for management of the casualty's injury/illness from person(s) where relevant  
2.4 Determine and implement welfare procedure according to casualty(s) needs  
2.5 Control effects of injury and determine and apply appropriate first aid management to meet the needs of the casualty and situation  
2.6 Assist with self-medication in accordance with State/Territory regulations, legislation and policies and manufacturer's/supplier's instructions subject to casualty's regime  
2.7 Monitor casualty's condition and respond in a timely manner in accordance with established first aid principles and procedures  
2.8 Correctly operate basic life support equipment according to relevant legislation and manufacturer's/supplier's instructions  
2.9 Apply safety procedures for operation of pressurised gases  
2.10 Use safe manual handling techniques  
2.11 Finalise casualty management according to casualty's needs and first aid principles |
ELEMENT

3. Coordinate first aid activities until arrival of medical assistance

3.1 Identify available resources required and establish communication links with appropriate personnel, emergency management services and medical assistance as appropriate

3.2 Deploy correct amount of resources to appropriate locations in an effective manner to ensure timely arrival of required resources

3.3 Document the provision of resources and recommend modifications as required

3.4 Monitor the condition of casualties in accordance with first aid principles and workplace procedures

3.5 Coordinate evacuation of casualties according to relevant evacuation procedures

3.6 Arrange support services for personnel involved in the incident in accordance with relevant principles and procedures

4. Communicate essential incident details

4.1 Maintain communication with relevant personnel using appropriate media and equipment

4.2 Communicate first aid information with other providers/carers to meet their needs and in accordance with workplace procedures

4.3 Calmly provide information to reassure casualty, adopting a communication style to match the casualty’s level of consciousness

4.4 Prepare an incident report in line with organisation requirements

4.5 Maintain confidentiality of records and information in line with privacy principles and statutory and/or organisation policies
ELEMENT 5. Evaluate the incident

PERFORMANCE CRITERIA

5.1 Evaluate management of the incident and where required develop an action plan in consultation with relevant parties

5.2 Participate in debriefing/evaluation in order to improve future operations and address individual's needs

5.3 Formulate and review contingency planning to identify and select alternative management principles and procedures as required

Required Skills and Knowledge

Essential knowledge:
The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role.

This includes a demonstrated understanding of:

- Awareness of stress management techniques and available support
- Complications and associated methods of management for conditions, based on a risk assessment relevant to the workplace or community setting of:
  - abdominal injuries
  - allergic reactions
  - altered and loss of consciousness
  - asthma
  - anaphylaxis
  - bleeding
  - burns – thermal, chemical, friction, electrical
  - cardiac arrest
  - chest pain
  - choking/airway obstruction
  - drowning
  - envenomation – snake, spider, insect and marine bites and stings
  - environmental impact such as hypothermia, hyperthermia, dehydration, heat stroke
  - injuries- cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations, fractures
  - medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions
  - pain relief
  - poisoning and toxic substances (including chemical contamination)
  - respiratory distress
  - seizures
- shock
- stroke
- substance misuse – common drugs and alcohol, including illicit drugs
- unconsciousness, not breathing or not breathing normally

- First aid management procedures in accordance with ARC Guidelines, guidelines of Australian national peak clinical bodies, State/Territory regulations, legislation and policies and organisation requirements including:
  - management of anaphylactic shock reaction
  - management of acute exacerbations of asthma
  - spinal care
  - use of AED, oxygen, bronchodilator
  - use of analgesic gases

- First aid management procedures may also relate to emergency childbirth

- Incident management procedures including:
  - awareness of confined spaces and dangerous places
  - basic triage for a multiple casualty incident
  - coordinate activities of other first aiders
  - manual handling, hazardous substances, dangerous goods or chemicals
  - removal of casualty to safe area, if appropriate
  - safe access to the casualty

- Safety procedures for the operation of pressurised gases

- Social issues, especially in particular workplace or community context(s) in which first aid is to be applied, including:
  - confidentiality
  - importance of debriefing
  - need to be culturally aware, sensitive and respectful
  - own skills and limitations

- State and regulatory requirements relating to currency of skill and knowledge

- Working knowledge of:
  - advanced resuscitation techniques as per HLTFA404C Apply advanced resuscitation techniques
  - ARC Guidelines, guidelines of Australian national peak clinical bodies and/or State/Territory regulations, legislation and policies relating to provision of first aid
  - basic anatomy (skeleton, muscles, joints, bones), physiology and toxicology
  - capabilities of emergency management services
  - company/organisation standard operating procedures (SOPs)
  - first aiders’ skills and limitations
  - how to gain access to and interpret Safety Data Sheets (SDS)
  - infection control principles and procedures, including using standard precautions
  - legal responsibilities and duty of care, including confidentiality
  - priorities of management in first aid
  - procedures for dealing with major and minor accidents in the workplace
  - safe storage and handling procedures for pressurised gases
  - work health and safety requirements in the provision of first aid.

Essential skills:
It is critical that the candidate demonstrate the ability to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role. This includes the ability to:

- Administer medication in line with State/Territory regulations, legislation and policies and any available medical/pharmaceutical instructions
- Apply advanced resuscitation techniques as per HLTFA404C Apply advanced resuscitation techniques
- Call an ambulance and/or medical assistance according to relevant circumstances and report casualty’s condition
- Communicate effectively and assertively and show leadership in an incident
- Comply with WHS legislation
- Conduct an initial casualty assessment
- Demonstrate:
  - adequate infection control procedures
  - consideration of the welfare of the casualty
  - safe manual handling
  - safe storage and handling procedures for pressurised gases
- Demonstrate procedure for control of external bleeding
- Demonstrate procedure for management of airway in the unconscious casualty including the safe and effective use of any airway adjuncts
- Demonstrate proficiency in the safe and effective use of any fracture immobilisation equipment taught
- Demonstrate the application of first aid principles
- Demonstrate the correct posturing of a casualty
- Interpret and use listed documents
- Make prompt and appropriate decisions relating to managing an incident in the workplace
- Manage specific injuries/illnesses and conditions as identified in the Essential Knowledge for this competency unit
- Plan an appropriate first aid response in line with established first aid principles, policies and procedures, ARC Guidelines, guidelines of Australian national peak clinical bodies, State/Territory legislation and regulations and industry requirements and respond appropriately to contingencies in line with own skills
- Prepare a written incident report or provide information to enable preparation of an incident report
- Provide assistance with self-medication as per subject’s own medication regime and in line with State/Territory legislation, regulations and policies and any available medical/pharmaceutical instructions
- Use a range of first aid equipment as outlined in the Range Statement
- Use literacy and numeracy skills as required to read, interpret and apply guidelines

**Evidence Guide**

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the
EVIDENCE GUIDE
Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects of assessment:
- The individual being assessed must provide evidence of specified essential knowledge as well as skills
- Competence should be demonstrated working individually and, where appropriate, as part of a first aid team
- Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting
- Currency of first aid knowledge and skills is to be demonstrated in line with state/territory regulations, legislation and policies, ARC and industry guidelines

Method of assessment may include:
- Skills in performing first aid procedures are to be assessed through demonstration, with questioning to confirm essential knowledge
- Skills may be assessed through simulations, using anatomical models, manikins or in a high fidelity simulation centre
- For assessment purposes, demonstration of skills in CPR procedures requires using a model of the human body (resuscitation manikin) in line with ARC Guidelines
EVIDENCE GUIDE

Access and equity considerations:

- All workers in the health industry should be aware of access and equity issues in relation to their own area of work
- All workers should develop their ability to work in a culturally diverse environment
- In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people
- Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

Unit Sector(s)

Not Applicable
MEM12023A Perform engineering measurements

Modification History
Not Applicable
Unit Descriptor

| Unit descriptor | This unit covers performing measurement skills requiring straightforward use of mechanical measuring devices and associated calculations. |

Application of the Unit

| Application of the unit | This unit covers straightforward measurement using devices which incorporate visual indications representing units of measurement. It applies to the use of measuring devices in a range of manufacturing, engineering and related environments. It includes, where required, adjustment of measuring devices through simple means and typically includes zeroing or scale adjustment. Measurements may be expressed in metric or imperial units. All measurements are undertaken to standard operating procedures. Electrical/electronic devices used are those not requiring the connection or disconnection of circuitry. Work is undertaken autonomously or part of team environment, in the field, work station or workshops. For straightforward use of comparison or pre-set measuring devices, Unit MEM12001B (Use comparison and basic measuring devices) should be accessed. |

| 1. Select appropriate device or equipment | 1.1. Measurement requirements are determined from specifications.  
1.2. Appropriate device or equipment is selected according to standard operating procedures, to achieve required outcome. |
| 2. Obtain measurements using a range of measuring devices | 2.1. Correct and appropriate measuring technique is used.  
2.2. Measurements are accurately obtained.  
2.3. Dimensions are determined or verified using basic calculations, where required. |
| 3. Maintain measuring devices | 3.1. Routine care and storage of devices is undertaken to manufacturers' specifications or standard operating procedures.  
3.2. Routine adjustments to devices are made and checked. |
| 4. Communicate measurements as required | 4.1. Measurements are accurately recorded, where required.  
4.2. Freehand sketch which depicts required information is prepared, as required. |

Required Skills and Knowledge

REQUICKI SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:
- selecting the appropriate measuring device for given measuring tasks
- using appropriate measuring technique
- reading all measurements taken accurately to the finest graduation of the selected measuring device
- handling and storing measuring devices in accordance with manufacturers' specifications or standard operating procedures
- verifying all measuring devices before use
- making, where appropriate, routine adjustments to measuring devices
- reading, interpreting and following information on written job instructions,
**REQUIRED SKILLS AND KNOWLEDGE**

- specifications, standard operating procedures, charts, lists, drawings and other applicable reference documents
- planning and sequencing operations
- checking and clarifying task related information
- checking for conformance to specifications
- undertaking numerical operations involving addition, subtraction, multiplication, division, fractions and decimals within the scope of this unit
- preparing drawings as required

**Required knowledge**

Look for evidence that confirms knowledge of:

- correct application of a range of measuring devices
- correct and appropriate measuring technique for a range of measuring devices
- addition, subtraction, multiplication, division, fractions, decimals to the scope required by this unit
- procedures for handling and storing a range of measuring devices
- procedures for adjusting and zeroing a range of measuring devices
- methods of communicating measurements by drawings, as required
- safe work practices and procedures
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>A person who demonstrates competency in this unit must be able to perform engineering measurements.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Critical aspects for assessment and evidence required to demonstrate competency in this unit</td>
<td>Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.</td>
</tr>
<tr>
<td>Context of and specific resources for assessment</td>
<td>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate. This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with performing engineering measurements or other units requiring the exercise of the skills and knowledge covered by this unit.</td>
</tr>
<tr>
<td>Method of assessment</td>
<td>Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.</td>

MEM18001C Use hand tools

Modification History
Not Applicable

Unit Descriptor

| Unit descriptor | This unit covers using a range of hand tools for a variety of general engineering applications. |

Application of the Unit

| Application of the unit | Applications may include hand tools used for adjusting, dismantling, assembling and finishing of items or components, and the finishing, cutting, scraping of metallic and non-metallic material to size and shape. This includes simple tapping and threading and routine maintenance of hand tools. This unit should not be selected if the hand tool is dedicated to a single operation or machine and if only a machine specific/customised tool is used. When using hand held power tools or power tools used for hand held operations, refer to Unit MEM18002B (Use power tools/hand held operations). |

1.3. All safety requirements are adhered to before, during and after use.  
1.4. Unsafe or faulty tools are identified and marked for repair according to designated procedures before, during and after use.  
1.5. Routine maintenance of tools, including hand sharpening is undertaken according to standard operational procedures, principles and techniques.  
1.6. Hand tools are stored safely in appropriate location according to standard operational procedures and manufacturers' recommendations. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:
- reading and following information on standard operating procedures  
- following verbal instructions  
- selecting hand tools appropriate to the task  
- using hand tools safely  
- identifying hand tool defects and marking for repair  
- maintaining/sharpening hand tools using appropriate techniques  
- storing hand tools in accordance with manufacturers'/standard operating procedures

Required knowledge

Look for evidence that confirms knowledge of:
- applications of different hand tools in a general engineering context  
- common faults and/or defects in hand tools
### REQUIRED SKILLS AND KNOWLEDGE

- procedures for marking unsafe or faulty tools for repair
- routine maintenance requirements for a range of hand tools
- storage location and procedures for a range of hand tools
- hazards and control measures associated with using hand tools
- use and application of personal protective equipment
- safe work practices and procedures

MEM24001B Perform basic penetrant testing

Modification History
Not Applicable
Unit Descriptor

| Unit descriptor | This unit covers performing basic penetrant testing procedures in a range of industrial applications. |

Application of the Unit

| Application of the unit | This unit applies to basic penetrant testing techniques on fabrications, structures and components across a wide range of industries and restricted to basic visible dye and/or process penetrant line methods. The work can relate to scheduled and unscheduled maintenance activities, using general tools, specific penetrant testing equipment as specified in maintenance documentation, testing procedures or operator instructions. Actual and potential defects are to be considered, together with ongoing abnormalities in fabrications, components and structures. Penetrant testing is performed on critical component or structural zones. All testing must be completed with particular attention to personal safety and OH&S regulations. Certification against Australian standards may be achieved where assessment in this unit of competency is carried out in conjunction with an examining authority as described in ISO 9712. Materials and chemicals which are subject to codes and regulations - for example, chemicals, explosives, solvents, dangerous materials, acids, or noxious waste products - must be subject to safe work habits and must be stored and used in accordance with safe work practices. This unit should not be selected when Unit MEM24002B (Perform penetrant testing) has already been selected. Where power tools are required, Unit MEM18002B (Use power tools/hand held operations) should also be selected. |

- definition of a defect and common basic defects
- methods/procedures for reporting test results
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

A person who demonstrates competency in this unit must be able to perform basic penetrant testing. Competency in this unit cannot be claimed until all prerequisites have been satisfied.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

### Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with performing basic penetrant testing or other units requiring the exercise of the skills and knowledge covered by this unit.

### Method of assessment

Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor’s reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

MEM24003B Perform basic magnetic particle testing

Modification History
Not Applicable
Unit Descriptor

Unit descriptor
This unit covers performing basic magnetic particle testing procedures in a range of industrial applications. It covers the principles of magnetism and the associated application of basic magnetic particle testing techniques in the field of non-destructive testing. Knowledge of metallurgy associated with the level of application in this unit is required.

Application of the Unit

Application of the unit
This unit applies to portable and fixed ('yoke' or 'bench') basic magnetic particle testing techniques on fabrications, structures and components across a wide range of industries.

The work can relate to scheduled and unscheduled maintenance activities using general tools and specific magnetic testing equipment as specified in maintenance documentation, testing procedures or operator instructions.

Actual and potential defects are considered, together with ongoing abnormalities in fabrications, components and structures. Magnetic particle testing is performed on critical component or structural zones. All testing must be completed with particular attention to personal safety and OH&S regulations. Certification against Australian standards may be achieved where assessment in this unit of competency is carried out in conjunction with an examining authority as described in ISO 9712.

Materials and chemicals which are subject to codes and regulations - for example, chemicals, explosives, solvents, dangerous materials, acids, or noxious waste products - must be subject to safe work habits and must be stored and used in accordance with safe work practices.

This unit should not be selected when Unit MEM24004B (Perform magnetic particle testing) has already been selected.

Where power tools are required, Unit MEM18002B (Use power tools/hand held operations) should also be selected.

Where tests require the interpretation of drawings, Unit MEM09002B (Interpret technical drawings) should also
be selected.

| Unit descriptor | This unit covers applying basic metallurgy principles related to selecting appropriate non-destructive testing techniques (NDT) and interpreting the results of NDT tests for metallurgical processes. |

**Application of the Unit**

| Application of the unit | This unit applies to knowledge of metallurgy principles, and the relationship between the various non-destructive testing methods and their capabilities and limitations when applied to the detection of specific discontinuities in metals and alloys.  

The unit applies to employees other than NDT technicians such as metallurgists, welding supervisors etc. who select and order NDT tests and who interpret results provided by tests for metal manufacturing, casting, shaping, and joining processes. The unit does not apply to the conduct of NDT tests.  

Such variables as the type of discontinuity, manufacturing process and limitations will assist in determining the sequence of testing and the ultimate selection of one non-destructive test method in preference to another. Any testing that may be carried out must be completed with particular attention to personal and OH&S regulations.  

Where materials and chemicals which are subject to codes and regulations are stored and used - for example, chemicals, explosives, solvents, dangerous materials, acids, or noxious waste products - safe work habits must be considered. 

**Band:**  
This unit has dual status and is to be regarded as both a Specialisation band A unit and Specialisation band B unit for progression to C5 (AQF level V). |

**Unit Weight:** 4

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Look for evidence that confirms skills in:

- research
- understanding and applying metallurgy principles
- selecting NDT test appropriate to metal or alloy and manufacturing process
### REQUIRED SKILLS AND KNOWLEDGE

**Required knowledge**

Look for evidence that confirms knowledge of:

- principles of solidification and crystal structures in metal:
  - classification of materials
  - structure of atoms
  - process of solidification
  - crystal structures
  - defects formed during solidification
  - modification of crystal structure
  - heat treatment processes
  - defects formed during heat treatment

- meaning of equilibrium diagrams representative of a range of metals including aluminium, iron, steel and common non-ferrous alloys:
  - alloy systems
  - solid and liquid solubility
  - basic equilibrium diagrams
  - equilibrium diagrams for common alloys

- principles of fusion welding in relation to NDT testing
  - defects in fusion welding:
    - processing defects
    - grinding cracks
    - pickling cracks
    - heat treatment cracks
    - service defects
    - fatigue cracks
    - corrosion and stress corrosion cracks

- principles of the formation of castings
  - defects in castings
  - principles of steel forging
  - defects in steel forging

- principles of mechanical testing:
  - mechanical testing
  - tensile testing
  - impact testing
  - hardness testing
  - fatigue testing
  - other tests
# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

A person who demonstrates competency in this unit must be able to apply metallurgy principles to NDT test selection and interpretation. Competency in this unit cannot be claimed until all prerequisites have been satisfied.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

### Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with applying basic metallurgy principles as related to non-destructive testing techniques, or other units requiring the exercise of the skills and knowledge covered by this unit.

### Method of assessment

Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes,
Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Principles and methods for fusion welding of metals and alloys

- MMAW
- SAW
- GMAW
- GTAW
- FCAW

Defects in weldments

Cracks, lack of fusion, cavities, imperfect shape, solid inclusions, miscellaneous

Defects in metal and alloy castings

Shrinkage cavities, hot tears, cold cracks, gas holes

Principles and methods used to produce steel forgings

Deformations, strengthening mechanisms, annealing

Principles of mechanical testing

Impact, tensile, hardness testing

MSS402080A Undertake root cause analysis

Modification History
New unit, superseding MSACMT280A Undertake root cause analysis - Equivalent

Unit Descriptor
This unit of competency covers the skills and knowledge required to undertake root cause analysis (RCA) by any person. This will often be undertaken by people working in a team. This unit also covers the competencies needed by operators to contribute to an advanced maintenance strategy using RCA coupled with diagrams and charts.

Application of the Unit
This unit applies to individuals working in an organisation which is applying competitive systems and practices strategies. The unit applies to the formal problem solving to root cause that the individual must undertake in their own work area or where the individual contributes to problem solving to root cause as part of a team. This unit requires an ability to seek and apply information from a variety of sources in order to inform RCAs. Initiative and enterprise is also required to identify quick fix and permanent solutions to problems. Where training in a wider range of problem solving techniques and tools is required the unit MSAPMSUP390A Use structured problem solving tools should be selected.

Licensing/Regulatory Information

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1  Recognise problems
   1.1  Identify features or occurrences indicative of a problem
   1.2  Use appropriate tools, techniques and charts to define the problem

2  Implement quick fix
   2.1  Recommend a quick fix within the scope of competency and authority
   2.2  Use technology or processes relevant to the problem to implement quick fix

3  Determine root cause
   3.1  Identify a range of possible causes
   3.2  Gather data and other information to eliminate or confirm possible causes
   3.3  Use available data and information to link causes and effects
   3.4  Seek assistance, as required
   3.5  Identify root cause

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:
- cooperating and working with others on problem solving
- assessing and recording information from a variety of sources
- defining potential problems factually, including:
  - location and extent of problem or incident
  - sequence of events where relevant
  - extent of deviation from normal operation or performance
- analysing potential problems across a range of varied activities and knowledge applications
- reading and constructing simple charts, such as cause and effect diagrams

Required knowledge

Required knowledge includes:
- RCA methodology, including difference between quick fixes and root cause elimination or breaking of causal tree
- principles and normal operation of equipment, plant and processes in own work area sufficient to undertake a RCA and propose solutions
- common variances to normal performance that are indicators of a problem
- use of relevant analysis tools (e.g. cause/effect diagrams, Pareto charts and 5 Whys)
- operations in own work area

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>

</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• undertake problem identification</td>
</tr>
<tr>
<td></td>
<td>• use appropriate processes to achieve root cause</td>
</tr>
</tbody>
</table>
| Identification | • prioritise solutions  
• recommend solutions and implementation procedures to problems within own area and range of technical skills and knowledge  
• evaluate implementation of solutions. |

**Context of and specific resources for assessment**

Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to:

- workplace procedures and plans relevant to work area
- specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessees
- documentation and information in relation to production, waste, overheads and hazard control/management
- reports from supervisors/managers
- case studies and scenarios to assess response to contingencies.

**Method of assessment**

A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence:

- demonstration in the workplace
- workplace projects
- suitable simulation
- case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on)
- targeted questioning
- reports from supervisors, peers and colleagues (third-party reports)
- portfolio of evidence.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.

Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.

**Guidance information for**

Assessment processes and techniques must be culturally
assessment | appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

**Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| **Competitive systems and practices** | Competitive systems and practices may include, but are not limited to:
| - lean operations
| - agile operations
| - preventative and predictive maintenance approaches
| - monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems
| - statistical process control systems, including six sigma and three sigma
| - Just in Time (JIT), kanban and other pull-related operations control systems
| - supply, value, and demand chain monitoring and analysis
| - 5S
| - continuous improvement (kaizen)
| - breakthrough improvement (kaizen blitz)
| - cause/effect diagrams
| - overall equipment effectiveness (OEE)
| - takt time
| - process mapping
| - problem solving
| - run charts
| - standard procedures
| - current reality tree

Competitive systems and practices should be interpreted so as to take into account:
Features or occurrences indicative of a problem

Examples of features or occurrences indicating problems include:
- variation to normal plant or equipment operation
- unplanned or non-conforming process or operations outcomes
- out of specification products
- excess scrap
- accidents and emergencies
- regulatory breaches
- customer returns and complaints
- reduction or loss of sales

Root cause

There are many possible causes of any problem. The root cause contrasts with other possible causes of a problem which when eliminated have no impact or only ameliorate the problem. Elimination of the root cause permanently eliminates the problem. There should only be one root cause for any problem and so the analysis should continue until this one cause is found.

Cause tree

The series of causes is referred to as the cause tree. Not all root causes are accessible and able to be eliminated. Breaking the cause tree is such a way that the problem cannot recur is an acceptable alternative.

Not all situations can wait for the RCA and eventual elimination of the root cause as there may be serious current impacts. The quick fix will control these immediate impacts, but does not eliminate the root cause.

Quick fix

A quick fix is not a short cut or side step for a permanent solution to the root cause. It is a necessary step designed to control the immediate impacts of a problem, for example, to prevent ongoing errors or to ameliorate damage.

Appropriate techniques/charts

Appropriate techniques/charts may include:
- control charts
- Pareto charts
- run charts
- flow charts
MSS402080A Undertake root cause analysis

- cause and effect diagrams
- tree diagrams
- 5 Whys analysis

NWP227B Control vegetation on a site

Modification History
NWP227B Release 2: Layout adjusted. No changes to content.
NWP227B Release 1: Primary release.

Unit Descriptor
This unit of competency describes the outcomes required to control vegetation on a site by inspecting, identifying and treating weeds, plants and shrubs. The ability to plan and undertake work safely, including the safe handling of chemicals and equipment, is essential to performance.

Application of the Unit
This unit supports the attainment of skills and knowledge required for field and operational staff involved in plant control but it does not reflect the requirements for undertaking plant control on the properties of third parties where further training and licensing requirements may apply.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.
Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1 Plan and prepare work. | 1.1 Plan work according to work specifications, *relevant legislation and organisational procedures*.  
1.2 Perform site check according to organisational requirements to prevent damage to other utilities and environment.  
1.3 Select and check *equipment and personal protective equipment* and material safety data sheets to meet safety requirements of task and site.  
1.4 Identify noxious weeds, plants and shrubs. |
| 2 Treat vegetation. | 2.1 Conduct monitoring programs to determine spread, growth rate and extent of problem caused by weeds.  
2.2 Store, handle, transport and mix chemicals and other control mechanisms according to relevant legislation and organisational procedures.  
2.3 Use *processes* to treat vegetation in a manner safe to all stakeholders and according to appropriate standards and organisational operational procedures.  
2.4 Implement controls according to organisational requirements to minimise environmental damage and deal with emergencies and spillage. |
| 3 Check work and restore work site. | 3.1 Clean equipment after use and prepare for safe storage or re-use.  
3.2 Identify potential hazards and dispose of waste according to organisational requirements. |
| 4 Complete records and reports. | 4.1 Record use of chemicals and control mechanisms according to legislative and organisational requirements.  
4.2 Complete work reports and documentation as required. |
Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- identify and report operational problems
- produce reports and logs
- use personal protective equipment
- use tools and machinery
- use chemicals and other treatments
- follow plans, charts and instructions
- perform work-related calculations
- interpret material safety data sheets (MSDS)
- apply procedures and standards
- communicate with employees and customers
- work effectively as part of a team
- use communication equipment
- use literacy skills in regard to verbal and written communication in the workplace
- give and receive instructions

Required knowledge:

- environmental aspects of controlling vegetation
- relevant utilities and service bodies
- communication systems
- use, storage, handling and transport of hazardous substances
- landscape and ground structure of work area
- risk factors and potential hazards of vegetation control processes
- equipment operation, capacity and limitations
- effects of weather and conditions on use of chemical treatment, site or plant
- control systems
- materials handling
- landscape and ground structure of work area
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to control vegetation on a site by inspecting, identifying and treating weeds, plants and shrubs including:

- interpreting work requirements from given documentation
- identifying noxious weeds and appropriate control methods
- planning and preparing equipment and materials required for work
- treating vegetation according to legislative and organisational procedures
- identifying risks and implement controls
- restoring work site according to environmental and organisational requirements
- completing relevant documentation.

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations.

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence only taken at the point when the assessor has complete confidence in the person’s competence over time and in various contexts
- all assessment that is part of a structured learning...
experience must include a combination of direct, indirect and supplementary evidence

- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time

- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit.

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

**Relevant legislation and organisational procedures** include:

- relevant federal and state or territory legislation and regulations
- codes of practice, associated standards and guidance material
- documented organisational policies, manuals and induction programs
- relevant community planning and development agreements, such as land care agreements

**Equipment and personal protective equipment** may include:

- hand and power tools
- on- and off-road vehicles
- lifting and winching equipment
- mechanical excavation equipment
- chemicals and mixers
- chemical spraying apparatus
- mixing equipment and storage areas
- communication equipment
- gas detection equipment
- rescue equipment
- breathing apparatus
- other appropriate personal protective equipment, including goggles and gloves

**Processes** used to treat and control vegetation include:

- application of chemicals
- manual extraction
- use of genetic plant modification
- companion planting
- other environmental controls, including use of insects

ELEMENT | PERFORMANCE CRITERIA
---|---
| with procedures

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Skills required for this unit include the ability to:

- communicate with customers
- determine, and meet customer requirements while maintaining HSE standards
- deliver product to site on time and within specification
- operate the equipment safely

Reading and numeracy is required to the level of interpreting workplace documents and technical information.

**Required knowledge**

- Knowledge and understanding of the equipment sufficient to recognise problems and the appropriate action to be taken.
- Knowledge of the organisation’s procedures and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and in a manner relevant to the operation of the equipment.
- Knowledge of:
  - the relationship between mixing time/water cement ratio and product quality
  - importance of slump
  - quality procedures
  - handling techniques to maintain quality
- Knowledge of underlying causes of faults such as precipitated by:
  - irregular mixing action
  - mechanical failure
  - electrical equipment malfunction

as is relevant to the practical operation of the equipment.
Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency.</th>
</tr>
</thead>
</table>
| Critical aspects for assessment and evidence required to demonstrate competency in this unit | Competence must be demonstrated in the ability to recognise situations requiring action and then in implementing appropriate corrective action. Consistent performance should be demonstrated. In particular look to see that:  
  - concrete is delivered in full, on time and in specification  
  - there are good relations with the customers  
  - there is good liaison with the batching plant.  
These aspects may be best assessed using a range of scenarios/case studies/what ifs as the stimulus, with a walk-through forming part of the response. The assessment activities should include responding to a range of problems. |
| Context of and specific resources for assessment | Assessment for this unit of competency will be on an operating work site.  
Assessment will occur over a range of situations which will include disruptions to normal, smooth operation.  
Simulation or case studies/scenarios may be required to allow for timely assessment of parts of this competency unit (e.g., those parts of element 3 referring to dealing with customers). Simulation should be based on the actual plant and will include 'walk-throughs' of the relevant competency components. Simulations may also include the use of case studies/scenarios and role plays.  
Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions. |

<tr>
<td>Relevant person</td>
<td>Relevant person for reporting delays/breakdowns may include batcher, dispatcher or other person as specified in the procedures.</td>
</tr>
</tbody>
</table>
| Records | Completion of records must include:  
- the addition of water  
- other items identified in the procedures and where possible the customer signature.  
Records may be completed on the docket or other means as specified in the procedures. |
| Checklists | Required checklists ma include:  
- maintenance checklists  
- pre start checklists  
- other checklists |
| Context | This unit includes:  
- determining and adding the correct amount of water taking into account required specification and moisture/water already in the mix  
- measurement of slump or similar tests  
- customer service and product knowledge  
- knowledge of relevant road rules and waste disposal requirements. |
## RANGE STATEMENT

- It does NOT include the driving of the truck (which is a prerequisite). However the driver's road skills should be observed to ensure that they meet the business's standards.

It does NOT include the driving of the truck. However, the driver's road skills should be observed to ensure that they meet the business's standards.

### Typical problems

Typical problems may include:
- sites with poor access/unstable soil
- transportation/site delays
- site conflicts
- disposal of agitator washings

Unit Descriptor

This unit covers implementation of change and participation in refinement of work procedures. It includes preparing for, implementing and monitoring change and working with ambiguity in the face of change.

In practice, implementing change may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, working effectively, contributing to the workgroup, organising information, using resources, etc.

This is one of 6 units of competency in the Working in Government and Management Competency Fields that deal with change. Related units are:

- PSPGOV205B Participate in workplace change
- PSPGOV405B Provide input to change processes
- PSPGOV514A Facilitate change
- PSPMNGT604B Manage change
- PSPMNGT703A Lead and influence change

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.
Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in \textit{bold italics} is explained in the Range Statement following.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Prepare for change                        | 1.1 The need for *change* in work practices is accepted within the work unit and suggestions are made or options devised.  
1.2 Advantages, disadvantages and consequences of proposed suggestions are identified.  
1.3 Suggested workplace changes are discussed with supervisor and colleagues and acted upon as required.  
1.4 Contributions are made to planning for change in the workgroup in accordance with organisational requirements.  
1.5 Effects upon others of own emotions/reactions to change are considered and adjustments are made to support required change.                                                                                                                                                                                                 |
| 2. Implement and monitor change              | 2.1 Own work practices are changed according to agreed arrangements.  
2.2 Advice and support are given to assist others to adjust to changes in work practice.  
2.3 The benefits of change are promoted in the workplace as opportunity arises.  
2.4 Opportunities for continuous improvement in the workplace are identified, referred for approval and acted on.  
2.5 Change is monitored with others to determine the effectiveness of revised procedures, and findings are advised to senior staff.                                                                                                                                                                                                 |
| 3. Work with ambiguity in the workplace      | 3.1 Ambiguity/uncertainty relating to changed roles, functions and procedures is identified and *problem-focused strategies* are used for coping.  
3.2 A *flexible approach* is applied when carrying out instructions for changes to work practices.  
3.3 Issues relating to change that cannot be resolved immediately are accommodated whilst implementing change in accordance with *legislation, policy and procedures*.                                                                                                                                 |

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying public sector legislation, policies and guidelines in an environment of change
- communicating including consultation and negotiation with a diverse workforce, including peers and supervisors
- responding to diversity, including gender and disability
- observing and evaluating
- giving and receiving feedback
- coping with ambiguity, emotions and stressors related to implementing change
- applying occupational health and safety and environmental requirements in the context of change

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, policies and guidelines relating to public sector environments
- principles of adapting to change
- group dynamics
- emotional intelligence
- workgroup practices
- at least one change management model
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of change management
Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- **Pre-requisite units that must be achieved prior to this unit**: Nil
- **Co-requisite units that must be assessed with this unit**: Nil
- **Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to**:
  - PSPETHC301B Uphold the values and principles of public service
  - PSPGOV301B Work effectively in the organisation
  - PSPGOV302B Contribute to workgroup activities
  - PSPGOV303B Build and maintain internal networks
  - PSPGOV307B Organise workplace information
  - PSPGOV308B Work effectively with diversity
  - PSPGOV312A Use workplace communication strategies
  - PSPGOV314A Contribute to conflict management
  - PSPGOV315A Give and receive workplace feedback
  - PSPLEGN301B Comply with legislation in the public sector

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- changes implemented in a range of (3 or more) contexts (or occasions, over time).

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to change management
- case studies and workplace scenarios to capture the range of situations likely to be encountered when implementing change

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when implementing change, including coping with difficulties, irregularities and breakdowns in routine
- changes implemented in a range of (3 or more) contexts (or occasions, over time).
Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.
Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in **bold italics** in the Performance Criteria is explained here.

**Change** may be:
- imposed or self-initiated
- at individual, team, organisational or regional level

**Change** may include:
- technology
- work practices and procedures
- staffing
- resources
- work priorities and objectives
- budget
- organisational structure/restructure
- machinery of government changes
- amalgamation of agencies
- work location
- shared services environment
- workplace re-organisation

**Problem-focused strategies** may include:
- clearly identifying problem
- seeking advice and direction for clarifying/dealing with problem
- developing a plan of action
- seeking feedback on planned action
- implementing planned action and reflecting on/evaluating outcomes in order to modify/use same strategy

**Flexible approach** may include:
- positive attitude to change even though there may be some ambiguity about what is required
- being prepared to perform work differently one day to the next
- accepting an iterative approach to changes in work practices

**Legislation, policy and procedures** may include:
- Commonwealth, State/Territory and Local Government legislation
- government policy
- environmental and sustainability policies
- public sector code of ethics
- national standards related to service delivery area
- the organisation’s policies and practices
- organisational code of conduct
Unit Sector(s)

Elements and Performance Criteria Pre-Content
Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *italics* is explained in the Range Statement following.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Participate in planning activities | 1.1 Contributions are made to planning that reflect a knowledge of corporate goals and their relationship to work unit and individual plans  
1.2 Consideration of *workplace requirements* is reflected in contributions to *work unit plans*  
1.3 Planning activities are completed as requested within the defined timeframe and meet the organisation's requirements  
1.4 Feedback is sought and acted on in relation to effectiveness of input to planning activities |
ELEMENT
2. Prepare individual work plans

PERFORMANCE CRITERIA
2.1 Work plan objectives are linked to and consistent with organisational and work unit aims
2.2 Objectives are stated as measurable targets with clear performance indicators
2.3 Innovative and cost-effective options for achieving objectives are explored and aligned to organisational aims
2.4 Individual work plans are used to promote the achievement of work unit objectives and to reflect personal and organisational accountability to all clients
2.5 Collaborative planning with other workgroup members is used to integrate individual plans and build working relationships

3. Implement and evaluate work plans

3.1 Work methods and practices to implement plans are identified in consultation with others
3.2 Workload and work flows are monitored and balanced
3.3 Work is completed in accordance with work plans and meets time and workplace requirements, legislation, policies and procedures
3.4 Problems in implementing work plans are monitored and solutions are proposed within area of responsibility
3.5 Work plans are revised according to changes in work priorities and organisational needs
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements
Look for evidence that confirms skills in:

- planning own work to achieve goals
- engaging in collaborative planning with other workgroup members
- applying problem solving
- monitoring and evaluation of progress towards work unit goals
- negotiating goals and outcomes
- responding to diversity, including gender and disability
- applying public sector legislation such as occupational health and safety and environment in the context of work planning

Knowledge requirements
Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to work planning in the public sector
- effective planning processes
- policies and procedures on sustainable practice
- corporate goals or aims
- organisational procedures
- importance of aligning work unit plans with organisational goals
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of work planning

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses
EVIDENCE GUIDE

For consistency of assessment  Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

**Workplace requirements may relate to**
- staffing procedures
- resourcing allocations and requirements
- identified timeframes
- relevant legislation affecting organisational administration
- organisation, corporate and strategic plans and activity calendars
- relevant industrial awards
- financial circulars (or equivalent)
- organisation financial and personnel management guidelines
- technology and data associated with work
- environmental and sustainability practices

**Work unit plans may include**
- daily/weekly/monthly work unit plans
- project plans
- specific purpose plans including equal employment opportunity, industrial democracy and occupational health and safety
- resource plans
RANGE STATEMENT

Legislation, policy and procedures may include:

- State/Territory and Commonwealth legislation and regulations such as:
  - public sector management acts
  - financial management acts
  - privacy legislation
  - equal employment opportunity, anti-discrimination and harassment legislation
  - occupational health and safety legislation
  - consumer legislation
  - environmental and sustainability legislation
  - risk management guidelines.
  - ethics and accountability standards
  - public sector standards
  - fraud control standards
  - government security standards
  - organisational policy, procedures and protocols

4.2 Information is presented in required medium in accordance with organisational requirements using relevant technology |
| 5. Maintain information | 5.1 A range of standard and complex information systems and operations is used in accordance with organisational policy and procedures  
5.2 Information and records are maintained in accordance with organisational procedures to ensure data and system integrity  
5.3 Routine data and records are reconciled as required  
5.4 Inadequacies in system/s relating to information retrieval are identified and corrected or reported to relevant staff as required |
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying public sector legislation such as occupational health and safety and environment in the context of information management
- accessing and using information ethically and legally
- using manual and computerised techniques for information management
- applying computer technology to data storage, security, retrieval and presentation
- using basic statistical and numerical manipulation
- using critical analysis techniques
- communicating with colleagues and supervisors
- presenting information in a range of ways such as report format, numerically, in tables, with graphs, spatially
- responding to diversity, including gender and disability
- using problem solving and referring problems as required
- applying equal employment opportunity, equity and diversity principles

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, policies, procedures and guidelines relating to information handling in the public sector, such as confidentiality, privacy, security, freedom of information
- data collection and management procedures
- organisational information handling and storage procedures
- cultural aspects of information and meaning
- sources of public sector work-related information
- economic, legal, security and social issues surrounding the use of information
- public sector standards
- electronic and manual filing systems
- databases and data storage systems
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of information management
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite units* that must be achieved prior to this unit: Nil
- *Co-requisite units* that must be assessed with this unit: Nil
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

  - PSPCRT407A Undertake court listings
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPFIN401A Use public sector financial processes
  - PSPFRAU401B Monitor data for indicators of fraud
  - PSPGOV402B Deliver and monitor service to clients

  - PSPGOV407B Provide a quotation
  - PSPGOV417A Identify and treat risks
  - PSPGOV422A Apply government processes
  - PSPIM401A Conduct initial claim assessments
  - SPLEGN401A Encourage compliance with legislation in the public sector
  - PSPPM404A Carry out simple project activities
  - PSPREG411A Gather information through interviews
  - PSPREG412A Gather and manage evidence
  - PSPSEC405A Handle security classified information
### EVIDENCE GUIDE

#### Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- information gathered and analysed in a range of (3 or more) contexts (or occasions, over time)

#### Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to information research, presentation and management
- access to electronic information/records management systems
- Case studies and workplace scenarios to capture the range of situations likely to be encountered when gathering and analysing information
EVIDENCE GUIDE

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when gathering and analysing information, including coping with difficulties, irregularities and breakdowns in routine.
- information gathered and analysed in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.
Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

**Information may include**

- legislation, guidelines and awards
- organisation, legal and policy materials
- client information
- market trends
- media reports
- registries and file records
- library materials
- financial records
- basic statistical information
- human resources/personnel records
- asset records
- meta-data

**Sources of information may include**

- those internal to the organisation such as:
  - intranet
  - databases/files
  - library collections
  - internal publications
  - annual reports
  - newsletters
  - other staff.
- those external to the organisation such as:
  - Internet
  - local, state, national and international libraries and archives
  - other organisations' publications
  - staff in external organisations
RANGE STATEMENT

Legislation, policy and procedures may include

- Commonwealth and State/Territory legislation, standards and guidelines especially relating to privacy, confidentiality, freedom of information, security, fraud control, copyright, intellectual property
- government policy
- public sector code of ethics
- national standards
- Australian standards such as records management, knowledge management, risk management
- the organisation's policies/practices/code of conduct

Analysis of information may include

- qualitative analysis
- quantitative analysis
- critical analysis
- problem solving
- matching
- statistical analysis
- mathematical calculations
- forecasting

Presentation of information may include

- routine reports and submissions
- briefing notes, Ministerials
- proposals, project plans
- articles and promotional material
- tabular or graphical presentation
- overhead transparencies
- slideshow data presentation
- face-to-face
- telephone

Information systems may include

- file/records management systems
- personnel/human resources systems
- specific purpose databases
- library systems
- data warehouse systems
- web sites
- financial information systems
- workplace communication systems

Elements and Performance Criteria Pre-Content
Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in italics is explained in the Range Statement following.

Elements and Performance Criteria
ELEMENT  PERFORMANCE CRITERIA
ELEMENT

1. Interpret and evaluate workplace information
   1.1 Information is sourced from inside and outside the organisation in accordance with organisational requirements and sources analysed for reliability
   1.2 Cultural context of the information is distinguished and used to aid in interpretation
   1.3 Information is analysed for relevance to own work and assistance is sought with interpretation of complex materials in accordance with organisational procedures
   1.4 Assumed prior knowledge underpinning workplace information is identified and additional information is gathered if necessary to allow interpretation
   1.5 Implications of information are passed on to relevant personnel in accordance with legislation, policy and procedures

2. Compose complex written materials
   2.1 The purpose, objectives and format for the materials are determined in accordance with organisational requirements
   2.2 Information to inform the document is sourced, collated in a logical manner and assessed for relevance and inclusion
   2.3 Content, structure and sequencing of materials are determined in line with the purpose and intended audience
   2.4 Options/recommendations are considered for inclusion
   2.5 Possible impact on the target audience is assessed and potential criticism countered where necessary
   2.6 Written materials are composed, reviewed to confirm objectives, organisational and legislative requirements are met, and materials are submitted within required timeframes

3. Edit written material
   3.1 Intent of the communication is confirmed.
   3.2 Content is checked and proofread for grammar, spelling and punctuation
   3.3 Communication is assessed in light of the needs of the intended audience
   3.4 Recommendations for improvement are made if necessary and explained/recorded in a manner that provides a learning opportunity for the future
   3.5 Information is amended if required, and submitted for approval in accordance with organisational policy and procedures
**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the essential skills and knowledge and their level, required for this unit.

**Skill requirements**

Look for evidence that confirms skills in:

- reading and writing at a complex level to cope with a range of workplace materials
- integrating information from a diverse number of sources in order to generate meaning
- writing and sequencing abstract concepts according to the required purpose of written material
- linking complex ideas in written material through selection and use of words, grammatical structures, headings and punctuation appropriate to the purpose
- spelling, punctuation and grammar for workplace documents at an experienced level
- responding to diversity, including gender and disability
- implementing ergonomic requirements for office work
- complying with environmental policies such as those relating to paper use/wastage/recycling

**Knowledge requirements**

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to written communication in the public sector such as privacy, freedom of information, information security, confidentiality, copyright
- principles of effective written communication at a high level of complexity
- differences in register/style between workplace communication for different purposes
- government style manual
- organisation protocols for a range of complex written communication
- channels of communication and processes for obtaining advice, approvals etc
- organisational policy for recordkeeping - paper-based and electronic
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of preparing written materials
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- Pre-requisite units that must be achieved prior to this unit: Nil
- Co-requisite units that must be assessed with this unit: Nil
- Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPGOV402B Deliver and monitor service to clients
  - PSPGOV405B Provide input to change processes
  - PSPGOV406B Gather and analyse information
  - PSPGOV408A Value diversity
  - PSPGOV411A Deal with conflict
  - PSPLEGN401A Encourage compliance with legislation in the public sector
  - PSPOHS401B Implement workplace safety procedures and programs

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- advanced communication strategies used in a range of (3 or more) contexts (or occasions, over time)
EVIDENCE GUIDE

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to communication in the public sector, including freedom of information, privacy, equal employment opportunity, anti-discrimination, occupational health and safety
- case studies and workplace scenarios to capture the range of advanced communication situations likely to be encountered and required in the public sector

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when using advanced communication strategies, including coping with difficulties, irregularities and breakdowns in routine
- advanced communication strategies used in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses
EVIDENCE GUIDE

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

*Information for evaluation may include*

- applications
- briefing papers
- discussion papers
- expert opinion
- literature
- minutes
- project briefs
- reports
- research
- speeches
- strategic and operational plans
- submissions
- web site information
RANGE STATEMENT

Purpose may include
- to influence opinion
- to report on achievement
- to recommend options and corresponding actions
- to meet regulatory requirements
- to meet public sector reporting requirements
- to develop policy
- to document policy
- to obtain funding
- to provide briefing material
- to provide or contribute to strategic planning
- to respond to enquiries/complaints

Materials to be composed may include
- position papers
- discussion papers
- briefing materials
- funding submissions
- business cases
- project briefs
- reports
- operational and other plans

Content, structure and sequencing may include
- facts and observations
- case studies
- critical analysis
- opinion
- creative ideas
- recommendations and supporting arguments
- anticipated arguments and rebuttals
- conclusions
- division into chapters or sections
- tables of contents and indexes
- glossaries
- executive summary
- précis
- chronological structure
- alphabetic structure
- operating sequence
RANGE STATEMENT

Organisational and legislative requirements may include

- use of plain English
- style formats
- acknowledgements
- particular terminology to be used/not used:
  - acronyms
  - technical terms
  - bureaucratic language
  - abbreviations
- requirements for minimising jargon in written materials
- requirements for written material to take account of cultural, ethnic, religious or language differences, disabilities, etiquette
- guidelines for illustrative items
- standards for references, acknowledgements, citations, footnotes, endnotes, bibliographies
- particular communication channels
- State/Territory or Commonwealth legislation, regulations, policies, procedures and guidelines relating to the preparation and security of written information in the public sector, including freedom of information, copyright, privacy, confidentiality, equal employment opportunity, diversity, occupational health and safety
- risk assessment
- information security requirements
- public sector standards
- fraud control standards
- codes of practice
- codes of ethics
- private or confidential materials
- embargoed materials
- security requirements
- politically sensitive materials
- security standards for government information

Competency field  Working in Government
PSPGOV421A Exercise delegations

Modification History
Not applicable.

Unit Descriptor
Unit descriptor
This unit covers the exercise of delegations in the public sector. It includes confirming the delegation, applying other interacting legislation, policy and guidelines, and exercising delegations.

In practice, exercising delegations may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government processes, gathering and analysing information, using resources, etc.

This is a new unit of competency, added to the Working in Government Competency Field of the Training Package in 2004

Application of the Unit
Not applicable.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information
Employability skills
This unit contains employability skills.
**Elements and Performance Criteria Pre-Content**

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *italics* is explained in the Range Statement following.

---

**Elements and Performance Criteria**

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Confirm delegation | 1.1 Current information relating to enabling *legislation, standards, instructions* and delegated authority is accessed and used to maintain up-to-date knowledge of requirements  
1.2 *Delegation* provided under legislation and the boundaries of that authority are confirmed  
1.3 Rights, responsibilities and accountabilities under the delegation are identified and confirmed  
1.4 All levels of authority under the delegation are confirmed with management and staff to ensure referrals as limits of authority are reached |
| 2. Apply other legislation, policies and instructions | 2.1 *Other legislation, policies or instructions* that impact on authority under a delegation are identified and these requirements confirmed  
2.2 Apparently conflicting legislative directions are resolved or referred in accordance with organisational policy and procedures |
<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>3. <strong>Exercise delegations</strong></td>
<td>3.1 Exercise of delegations is consistent with organisational processes and the boundaries and authority contained in legislation, policies and instructions</td>
</tr>
<tr>
<td></td>
<td>3.2 Decisions are documented and records kept in accordance with organisational policy and procedures to provide audit information of delegated authority exercised</td>
</tr>
<tr>
<td></td>
<td>3.3 Circumstances requiring the exercise of delegations that are outside own limits are identified and approvals are obtained in accordance with organisational policy and procedures</td>
</tr>
<tr>
<td></td>
<td>3.4 <em>Risks</em> associated with the exercise of delegations are identified and strategies to manage risks are identified in accordance with the organisation's risk management strategy</td>
</tr>
</tbody>
</table>
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to delegations
- using information technology to access relevant legislation and procedures
- reading complex written materials such as legislation, instructions, and standards and applying them to work practices
- scanning techniques to locate main ideas in legislation, policy documents and instructions
- using questioning strategies to clarify understanding
- using communication strategies involving exchanges of often complex oral information
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of exercising delegations

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to delegations
- the range of delegations applicable in the public sector
- instructions and standards relating to delegations
- organisational structure and levels of authority/delegations
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of delegations

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.
EVIDENCE GUIDE

Units to be assessed together

- **Pre-requisite unit** that must be achieved **prior** to this unit: Nil
- **Co-requisite unit** that must be assessed **with** this unit: Nil
- **Co-assessed units** that **may** be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

  PSPETHC401A Uphold and support the values and principles of public service
  PSPFIN401A Use public sector financial processes
  PSPGOV403B Use resources to achieve work unit goals
  PSPGOV406B Gather and analyse information
  PSPGOV422A Apply government processes
  PSPHR402A Administer human resource processes
  PSPLEGN401A Encourage compliance with legislation in the public sector
  PSPPROC405B Dispose of assets
  PSPPROC406A Procure goods and services

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- exercising delegations in a range of (3 or more) contexts (or occasions, over time).

Resources required to carry out assessment

These resources include:

- legislation, policy, standards, instructions and procedures relating to delegations
- case studies and workplace scenarios to capture the range of situations likely to be encountered when exercising delegations
EVIDENCE GUIDE

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when exercising delegations, including coping with difficulties, irregularities and breakdowns in routine
- exercising delegations in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.
Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

**Enabling legislation may include**
- State/Territory and Commonwealth legislation related to:
  - public sector management, financial management, auditor general
  - customs and excise, quarantine, fisheries, agriculture, land management, conservation, coastal management, environmental protection, workers’ compensation, workplace relations, legal administration, planning, construction, transport, energy, mining, communications, education and children’s services, employment, vocational education and training.
  - audit, equal employment opportunity and anti-discrimination, occupational health and safety, environment

**Standards may include**
- public sector standards, such as human resource management standards
- government security standards
- fraud control standards

**Instructions may include**
- public service Commissioner’s instructions
- chief executive officer’s instructions

**Delegations are**
- functions or powers (under an act) assigned (by the Minister) to others
- made to specified limits
- made to persons in specified positions (i.e. made to the position rather than the individual)
RANGE STATEMENT

Delegations may include

- financial
- human resources
- purchasing
- contracting
- industrial relations
- licensing
- regulatory powers
- legislation

Other legislation, policies and instructions may include

- aspects of common law
- contract law
- administrative law
- industrial relations law
- financial management acts
- public service acts

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in italics is explained in the Range Statement following.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Allocate available resources to achieve results</td>
<td>1.1 Required resources are identified, obtained and allocated to enable achievement of work unit objectives</td>
</tr>
<tr>
<td></td>
<td>1.2 Resource allocation is undertaken in accordance with legislation, policies and guidelines</td>
</tr>
<tr>
<td>2. Monitor and evaluate resource usage</td>
<td>2.1 Systems are implemented to enable timely and accurate monitoring and evaluation of resource usage against targets and organisational standards</td>
</tr>
<tr>
<td></td>
<td>2.2 Records of resource allocation and usage are maintained in accordance with relevant legislation and guidelines</td>
</tr>
<tr>
<td></td>
<td>2.3 Resource usage issues are identified, analysed and addressed within limits of individual delegation or referred in accordance with organisational procedures</td>
</tr>
<tr>
<td></td>
<td>2.4 Replacements or additional resources are allocated as required</td>
</tr>
</tbody>
</table>
ELEMENT

3. Report on resource usage

PERFORMANCE CRITERIA

3.1 Resource usage is reported in required format and on a regular basis in accordance with organisational requirements

3.2 Reports are completed to indicate the level of performance achieved and any follow-up action

3.3 Technology is applied to resource management systems in accordance with organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- accessing and using legislation and guidelines relating to resource allocation and usage
- meeting organisational reporting requirements
- recordkeeping in relation to resource allocation and usage
- accessing and using information systems in the context of resource allocation and usage
- responding to diversity, including gender and disability
- applying public sector legislation including occupational health, safety and environment and sustainability in the context of resource allocation and usage

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, policy and guidelines relating to resource allocation and usage
- operational procedures for accessing, storing, maintaining and using resources
- stock handling procedures
- financial management principles and procedures
- budget processes
- fraud control guidelines
- government security procedures relating to resources
- equal employment opportunity, equity and diversity principles
- public sector legislation including occupational health, safety and environment and sustainability in the context of resource allocation and usage
Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

**Elements and Performance Criteria**

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>

ELEMENT

1. Identify and undertake research

1.1 Information needs are defined based on work objectives and client and organisation requirements

1.2 Potential sources of information and the format in which they are presented are evaluated and selected in line with the purpose and audience for the research

1.3 Strategies are developed to acquire required information in accordance with legislation, policy and procedures

1.4 Information is researched in a timely and thorough way and within resource allocation

1.5 Quantity, quality and relevance of initial search results are assessed and gaps filled using the same or adjusted research strategies

1.6 The methods and outcomes of research, and the criteria used to make information decisions and choices are clearly communicated

2. Analyse information and apply the results of analysis

2.1 Information from various sources is examined, compared and evaluated for content, structure and logic

2.2 Analytical techniques and processes are selected in line with defined objectives

2.3 Information is collated, consolidated and analysed and outcomes are advised to senior staff in accordance with organisational policy and procedures

2.4 Facts, issues, patterns, interrelationships and trends are identified through analysis in accordance with research aims

2.5 Agreed project timelines are met, and the defined standards of the organisation are met for all work

3. Maintain information systems

3.1 Information systems are maintained, validated and reconciled so that data and system integrity are assured

3.2 A range of standard and complex information systems and applications is maintained in accordance with organisation standards

3.3 Information systems are reviewed and updated as necessary
ELEMENT

4. Compile reports from information systems

PERFORMANCE CRITERIA

4.1 The findings from analysing information are used to meet client/organisational needs and organisation standards

4.2 Content of reports is determined and organised in a manner that supports the purposes and format of the organisation and audience

4.3 Reporting of results is sequenced logically, is concise and clear, and includes predictions, assumptions and constraints where relevant
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying public sector legislation such as occupational health and safety and environment in the context of information management
- accessing and using information ethically and legally
- using manual and computerised techniques for information management
- applying computer technology to data storage, security, retrieval and presentation
- undertaking statistical analysis
- using critical analysis techniques
- communicating with colleagues and supervisors
- presenting information in a range of ways such as report format, numerically, in tables, with graphs, spatially
- responding to diversity, including gender and disability
- applying problem solving and referring problems as required

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, policies, procedures and guidelines relating to information handling in the public sector, such as confidentiality, privacy, security, freedom of information
- data collection and management procedures
- organisational information handling and storage procedures
- cultural aspects of information and meaning
- sources of public sector work-related information
- economic, legal and social issues surrounding the use of information
- public sector standards
- standard reporting procedures
- electronic and manual filing systems
- databases and data storage systems
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of information management
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- **Pre-requisite** unit that must be achieved prior to this unit: Nil
- **Co-requisite** unit that must be assessed with this unit: Nil
- **Co-assessed units** that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV507A Undertake negotiations
  - PSPGOV512A Use complex workplace communication strategies
  - PSPGOV513A Refine complex workplace documents
  - PSPGOV520A Scope statistical data collection
  - PSPGOV521A Collect statistical data
  - PSPGOV522A Process statistical data
  - PSPGOV523A Interrogate and analyse statistical data
  - PSPGOV524A Interpret data and related statistics
  - PSPSCI503A Develop and undertake scientific/technological research
  - PSPFRAU502B Anticipate and detect possible fraud activity
  - PSPLAND506A Identify and manage contaminated sites
  - PSPSEC501A Assess security risks
  - PSPCRT505A Undertake senior court listing activities
EVIDENCE GUIDE

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- research and analysis undertaken in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to research and analysis
- access to electronic and other information sources relevant to the workplace
- case studies and workplace scenarios to capture the range of situations likely to be encountered when undertaking research and analysis.
EVIDENCE GUIDE

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when undertaking research and analysis, including coping with difficulties, irregularities and breakdowns in routine
- research and analysis undertaken in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.
Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in italics in the Performance Criteria is explained here.

Sources of information may include

- organisation materials
- client information
- market trends
- registries and file records
- library materials
- financial records
- statistical information
- personnel/human resource records
- asset records
- legislation
- policies

Information format may include

- multimedia
- database
- web site
- dataset
- audio/visual
- word processed documents
- books
- gazettes and other publications
- reports
- pivot tables
RANGE STATEMENT

**Strategies may include**
- research plan
- search strategy tailored to the information retrieval system selected:
  - using key concepts and terms
  - using classification schemes
  - using search engines
  - using analysis systems
  - using data warehouse systems
  - using internal organisers such as indexes in books

**Legislation, policy and procedures may include**
- Commonwealth and State/Territory legislation, standards and guidelines especially relating to privacy, confidentiality, freedom of information, security, fraud control, copyright, intellectual property
- government policy
- public sector code of ethics
- national standards
- Australian standards such as records management, knowledge management, risk management
- the organisation's policies and practices
- organisational code of conduct
- Internet etiquette (netiquette)
RANGE STATEMENT

Evaluation of content may include

- reliability
- validity
- accuracy
- authority
- currency
- point of view
- bias
- prejudice
- deception
- manipulation
- supporting arguments
- contradictions
- different viewpoints
- the cultural, physical or other context in which the information was created
- the impact of context on interpretation of the information
- comparison of new knowledge with prior knowledge
- whether information contradicts or verifies information from other sources

Analysis may include

- application of statistical methods
- mathematical calculations
- critical analysis
- problem solving
- forecasting
RANGE STATEMENT

Information systems may contain

- computers and networks
- communication channels
- records management guidelines
- data
- procedures
- protocols
- legislation, guidelines and awards
- organisation, legal and policy materials
- client information
- market trends
- registries and file records
- library systems
- financial records
- basic statistical information
- personnel records

Client/organisational needs may include

- provision of advice
- input into policy development
- solutions/options for action
- forecasting
- determining future outcomes
- identifying strategies derived from analysis of information

PSPGOV506A Support workplace coaching and mentoring

Modification History
Not applicable.

Unit Descriptor

Unit descriptor
This unit covers promotion and support for coaching and mentoring in the organisation. It includes developing a coaching/mentoring strategy, establishing a coaching/mentoring framework, implementing and supporting coaching/mentoring, monitoring coaching and mentoring arrangements and consolidating opportunities for further coaching/mentoring.

In practice, supporting workplace coaching and mentoring in the organisation may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, providing client service, leading a group, developing policy, etc.

This unit is one of 4 units of competency in the Working in Government Competency Field that deal with coaching/mentoring.

Related units are:
- PSPGOV311A Work with a coach or mentor
- PSPGOV414A Provide workplace mentoring
- PSPGOV415A Provide workplace coaching

This is a new unit of competency, added to the Working in Government Competency Field of the Training Package in 2004

Application of the Unit
Not applicable.

Licensing/Regulatory Information
Not applicable.
Pre-Requisites
Not applicable.

Employability Skills Information
Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *italics* is explained in the Range Statement following.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Develop coaching/mentoring strategy | 1.1 The potential for *coaching* and *mentoring* within the work group/organisation is researched  
1.2 A strategy is developed to implement and promote a coaching and mentoring framework, linked to other *human resource strategies* in the organisation  
1.3 *Benefits* to all parties involved in coaching and mentoring are clearly outlined, consistent with the organisation's philosophy and goals  
1.4 *Ground rules* established for coaching and mentoring in the organisation are contained within the strategy  
1.5 Timelines for the implementation of the strategy are developed with key *stakeholders*  
1.6 Organisational support and resources are obtained for the strategy in accordance with organisational procedures |
ELEMENT | PERFORMANCE CRITERIA
--- | ---
2. Establish a coaching/mentoring framework | 2.1 A range of coaching/mentoring models is identified to suit the organisation's needs
 | 2.2 Training is arranged for those interested in being coaches, coached, mentors and/or mentored
 | 2.3 The requirements of coaching and mentoring contracts/agreements are developed and monitored in accordance with the coaching and mentoring strategy
 | 2.4 The range of stages in coaching and mentoring relationships is identified and flexibility is built in to the framework to manage the stages where necessary
 | 2.5 Protocols for matching participants and dealing with difficulties, disputes and grievances are formalised in accordance with the organisation's existing procedures

3. Implement and support coaching and mentoring | 3.1 The value of coaching and mentoring is promoted at all levels of the organisation in accordance with organisational policy and procedures
 | 3.2 Opportunities for mentoring and coaching are identified and communicated to interested parties in accordance with the strategy
 | 3.3 Internal and external networks are used to support coaching and mentoring in accordance with legislation, policy and procedures
 | 3.4 Techniques and practices are suggested for resolving differences/problems without damaging relationships, or assistance/referral is provided in accordance with organisational policy and procedures

4. Monitor coaching and mentoring arrangements | 4.1 People involved in coaching and mentoring are encouraged to reflect on organisational processes, organisational support and their activities to identify opportunities for improvement and innovation
 | 4.2 Recommendations made for improvements in the coaching/mentoring strategy are evaluated and implemented as necessary in accordance with organisational policy and procedures
ELEMENT

5. Consolidate opportunities for further coaching and mentoring

PERFORMANCE CRITERIA

5.1 The positive contributions of individuals to coaching and mentoring arrangements are recognised and acknowledged

5.2 Positive changes created through coaching and mentoring arrangements are celebrated and rewarded in accordance with organisational policy and procedures

5.3 Ongoing opportunities for coaching and mentoring are identified and promoted in accordance with individual and organisational requirements
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to workplace coaching and mentoring
- undertaking research and analysis
- planning
- networking
- using effective communication with a diverse workforce including active listening, giving and receiving feedback
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and the environment in the context of workplace coaching and mentoring

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to workplace coaching and mentoring including privacy and freedom of information
- equal employment opportunity, equity and diversity principles
- codes of ethics
- code of conduct
- policy and procedures for specific environment
- human resource strategies that link to a coaching/mentoring strategy
- strategic goals and direction/plan
- principles and practices of coaching and mentoring that need to be addressed in the organisational strategy
- coaching/mentoring methodologies and strategies
- public sector legislation such as occupational health and safety and the environment in the context of workplace coaching and mentoring
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- **Pre-requisite unit** that must be achieved *prior* to this unit: *Nil*
- **Co-requisite unit** that must be assessed *with* this unit: *Nil*
- **Co-assessed units** that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  
  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV502B Develop client services
  - PSPGOV503B Coordinate resource allocation and usage
  - PSPGOV504B Undertake research and analysis
  - PSPGOV505A Promote diversity
  - PSPGOV511A Provide leadership
  - PSPGOV512A Use complex workplace communication strategies
  - PSPGOV516A Develop and use emotional intelligence
  - PSPHR503A Facilitate performance management processes
  - PSPHR504A Implement workforce planning and succession strategies
  - PSPHR508A Coordinate career development
  - PSPLEGN501B Promote compliance with legislation in the public sector
  - PSPOHS501A Monitor and maintain workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- coaching and mentoring supported in the organisation in a range of (3 or more) contexts (or occasions, over time)
EVIDENCE GUIDE

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to workplace coaching and mentoring
- current theory and practice for workplace coaching and mentoring
- case studies and workplace scenarios to capture the range of situations likely to be encountered when supporting coaching and mentoring in the organisation

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when supporting coaching and mentoring in the organisation, including coping with difficulties, irregularities and breakdowns in routine
- coaching and mentoring supported in the organisation in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses
EVIDENCE GUIDE

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in italics in the Performance Criteria is explained here.

Coaching

- has a focus on the acquisition of job skills and knowledge and is generally short-term
- is a defined relationship to enhance performance
- is results oriented
- is performance or goal directed
- emphasises action or improved performance in a specific area
- requires good interpersonal relations
- is identified on personal learning and development plans
- is provided by a coach who:
  - provides learning opportunities
  - monitors performance
  - provides constructive feedback
  - maintains confidentiality
  - may have undertaken training/development to undertake the role
  - is not necessarily hierarchical
RANGE STATEMENT

Mentoring

- generally has a longer-term focus on personal growth and learning
- includes a wide range of learning oriented to:
  - exchange of wisdom
  - support
  - guidance in personal or professional growth.
- is a relationship, not just a procedure or activity
- is one person professionally assisting the professional development of another
- is a developmental effort to build skills and knowledge for advancement based on merit, rather than alliances/politically-based partnerships to advance careers based on politics rather than aptitude
- is provided by a mentor who:
  - facilitates the growth of the person being mentored and professional development
  - provides information, guidance and constructive comments
  - evaluates the plans of the person being mentored, decisions, goals and objectives
  - supports, encourages and, where necessary, highlights shortfalls in agreed performance
  - maintains confidentiality in the relationship
  - does NOT take over problems and try to solve them
  - does NOT give advice, criticisms or solutions, but supports the person being mentored to make their own decisions
  - is not the direct manager of the person being mentored

Other human resource strategies may include

- performance management
- learning and development
- succession planning
- career management
RANGE STATEMENT

Benefits may include

- for the organisation:
  - increased productivity
  - new competencies available
  - more committed, involved and responsible personnel at all levels
  - personal and trusting developmental relationships
  - knowledge sharing
  - safeguarding investment in high potential people
  - culture change.
- for the person being coached or mentored:
  - empowerment
  - opportunity to acquire competencies and professional experience
  - insights into the organisational culture, attitudes, protocols and expected behaviours
  - increased potential for career mobility and promotion
  - a supportive environment in which successes and failures can be evaluated
  - internal and external networking opportunities
  - development of professional abilities and self-confidence
  - recognition and job satisfaction
  - mutual respect.
- for the coach/mentor:
  - renewed enthusiasm for the role (if an experienced employee)
  - challenging discussions with people who may have fresh perspectives
  - satisfaction from contributing to another's development
  - opportunities to reflect upon and articulate the role of coach/mentor
  - improved ability to share experiences and knowledge
  - opportunities to test new ideas
  - being of service to others
  - increased self-esteem
RANGE STATEMENT

Ground rules may include

- relationship is voluntary, although the requirement to participate in coaching may not be
- mentoring partners should not be in the same chain of command
- supervisors of both partners must approve, if in-house rather than out-sourced arrangement
- guidance and counsel from a coach/mentor does not supersede that of the supervisor in work-related matters
- training for coaching and mentoring partners
- a formal agreement
- active involvement of both partners in the process
- commitment from the organisation and both parties to the arrangement
- effectiveness measures
- requirements to monitor/evaluate and report on outcomes
- provision for either party can end the relationship any time for any reason, or no reason

Stakeholders may include

- all those individuals and groups both inside and outside the organisation that have some direct interest in the organisation’s behaviour, actions, products and services such as:
  - employees at all levels of the organisation
  - other public sector organisations
  - private sector organisations/businesses
  - non-government organisations
  - union and association representatives
  - boards of management
  - government
  - Ministers
RANGE STATEMENT

Matching participants may include consideration of

- age
- cultural background
- educational level
- ethnicity
- expertise
- family responsibilities
- gender
- goals
- interests
- interpersonal approach
- language
- learning/thinking styles
- life experience
- marital status
- personality
- physical ability
- religious belief
- sexual orientation
- socio-economic background
- work experience
- working style
- coach/mentor with particular attributes depending on the purpose and objectives of the arrangement

Mentoring opportunities may include

- secondments
- relieving opportunities
- work shadowing
- project assignments
- intra- and inter-departmental release
- networks
- outsourced (paid) - business coach/mentor when none is available internally

Networks may include

- professional organisations
- informal common interest groups
- public sector management consultants
RANGE STATEMENT

Legislation, policy and procedures may include
- State/Territory and Commonwealth legislation and regulations such as:
  - public sector management acts
  - privacy legislation
  - equal employment opportunity, anti-discrimination and harassment legislation
  - occupational health and safety legislation
  - ethics and accountability standards
  - public sector standards
  - organisational policy, procedures and protocols

Techniques and practices for resolving differences may include
- finding a mutually beneficial solution
- inviting discussion
- providing explanations
- not taking it personally when information is rejected
- not laying blame
- using ‘I’ messages
- self-disclosure

Unit Descriptor

Unit descriptor
This unit covers achievement of operational results and effective working relationships through leadership, feedback and support of individuals in a workgroup that may exist in the workplace, be formed for a special purpose or project, or consist of community members, volunteers, interagency members, etc. It includes facilitating commitment to objectives and required standards; contributing to the development of a cooperative, high performance workgroup; giving and receiving feedback on performance; supporting and participating in development activities; and providing leadership, direction and guidance in the workgroup.

In practice, leading a workgroup may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, providing client service, developing policy, building community relationships, improving workplace legislative performance, providing technical expertise, etc.

This is one of 6 units in the Working in Government and Management Competency Fields that deal with working with others. Related units are:

- PSPGOV302B Contribute to workgroup activities
- PSPGOV404B Develop and implement work unit plans
- PSPGOV516A Develop and use emotional intelligence
- PSPGOV604A Foster leadership and innovation
- PSPMNGT701B

This unit replaces, and for qualification purposes is equivalent to PSPGOV501A Coordinate a workgroup

Application of the Unit

Employability Skills Information
Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *italics* is explained in the Range Statement following.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Facilitate commitment to objectives and required standards | 1.1 The organisation's vision, strategic objectives and required standards of performance are discussed and clarified with others in accordance with the needs, communication and learning styles of workgroup members  
1.2 Establishment of the purpose, objectives, roles and responsibilities in the *workgroup* is facilitated in accordance with organisational requirements and objectives  
1.3 Commitment to objectives and standards is modelled to provide leadership and develop workgroup commitment  
1.4 Equal employment opportunity, occupational health and safety, diversity management and participative work practices are modelled and promoted within the workgroup in accordance with *legislation, policy and procedures* |
ELEMENT

2. Contribute to the development of a co-operative, high performance workgroup

2.1 Work contributions or suggestions are encouraged, acknowledged and considered constructively

2.2 Workgroup members are supported to use, share and develop their skills according to work requirements

2.3 *Work allocation* is facilitated within the group on the basis of current skills and development needs

2.4 Implementation of new work practices is undertaken in consultation with workgroup members

2.5 Conflict and other issues which affect the performance of the workgroup are resolved within the workgroup wherever possible, or referred in accordance with organisational policy and procedures

3. Give and receive feedback on performance

3.1 Feedback is obtained from others outside the workgroup on personal and workgroup performance, and open and constructive responses to feedback are given

3.2 Regular constructive feedback on all aspects of work performance is gathered from and provided to the workgroup

3.3 Performance is assessed and addressed in a fair and timely manner and where possible notable performance is recognised/rewarded in accordance with organisational policy and procedures

3.4 Under-performance of self and others is addressed in accordance with relevant legislation, guidelines and procedures

3.5 Feedback is used to continuously improve performance and outcomes
ELEMENT

4. Support and participate in development activities

PERFORMANCE CRITERIA

4.1 An action plan to meet individual and group learning and development needs is developed, agreed and implemented

4.2 Individuals are supported to identify their specific learning/development needs

4.3 Workgroup members are encouraged and supported to take advantage of development opportunities in accordance with their needs and organisational requirements

4.4 Learning and development opportunities are accessed to continuously improve own leadership skills and other identified development needs

4.5 On-the-job learning opportunities are provided for in accordance with individual needs and to the required standard

4.6 Workgroup members are encouraged and supported in applying new skills and knowledge in the workplace

5. Provide leadership, direction and guidance in the workgroup

5.1 Participative decision making is used routinely in developing, implementing and reviewing the work of the group and the distribution of responsibilities, where appropriate

5.2 Opportunities and encouragement are given to workgroup members to develop new and innovative work practices and strategies

5.3 Workgroup members are provided with the support, leadership, advice and policy direction necessary to perform work safely and effectively

5.4 Tasks are allocated in accordance with the competencies of workgroup members, and autonomy and authority are delegated as appropriate

5.5 Leadership and guidance strategies are varied to meet changing priorities and situations, and take into account the differing needs and skills of individuals and the requirements of the tasks and workplace
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations, policies, procedures and guidelines
- providing leadership, supervision and performance feedback
- undertaking problem solving in a team environment
- using transparent decision making
- communicating with a diverse workplace including listening, facilitating, negotiating, mentoring
- responding to diversity, including gender and disability

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to the public sector
- principles of effective team operation
- principles of facilitation and empowerment
- group processes
- group dynamics
- range of leadership styles and the application of these to suit different groups and tasks
- learning and development in the workplace
- equal employment opportunity, equity and diversity principles
- occupational health and safety and environment legislation in the context of leading a workgroup

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.
EVIDENCE GUIDE

Units to be assessed together

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses
EVIDENCE GUIDE

For consistency of assessment
Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

**Workgroup may include**
- an existing team
- business unit
- group formed for a special purpose or project
- group of community members
- volunteers
- interagency members
- client group, such as employees on a safety committee
- group of employers
- members of the public in a special interest group etc

**Information affecting the workgroup/organisation may include**
- legislation
- plans
- industrial awards and agreements
- organisation policies, plans, procedures and protocols
- performance management systems
- quality standards
- efficiency indicators
RANGE STATEMENT

Legislation, policy and procedures may include

- State/Territory and Commonwealth legislation and regulations such as:
  - public sector management acts
  - financial management acts
  - privacy legislation
  - equal employment opportunity, anti-discrimination and harassment legislation
  - occupational health and safety legislation
  - consumer legislation
  - environment legislation.
  - risk management guidelines
  - ethics and accountability standards
  - public sector standards
  - fraud control standards
  - government security standards
  - organisational policy, procedures and protocols

Work allocation may include

- procedures and systems for team functioning
- procedures to identify development requirements

Individual learning needs includes

- needs of self and others
- self-awareness

Learning and development opportunities may include

- formal course participation
- on-the-job training
- work experience
- staff exchanges
- mentoring
- coaching
- external study
- conference and seminar attendance
- induction
- job rotation
- projects
- secondment
- opportunities to act in higher positions

Unit Descriptor

Unit descriptor
This unit covers complex workplace communication for working at middle management level with internal and external clients, colleagues and other staff. It includes preparing for complex communication, analysing and responding to opinions, presenting a convincing argument, and developing a range of communication strategies.

In practice, using complex workplace communication strategies may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government systems, managing change, managing diversity, etc.

This is one of 5 units of competency in the Working in Government Competency Field that deal with communication. Related units are:
PSPGOV202B Use routine workplace communication techniques
PSPGOV312A Use workplace communication strategies
PSPGOV412A Use advanced workplace communication strategies
PSPGOV605A Persuade and influence opinion

This is a new unit of competency, added to the Working in Government Competency Field of the Training Package in 2004

Elements and Performance Criteria Pre-Content
Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *italics* is explained in the Range Statement following.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Prepare for complex communication</td>
<td>1.1 <em>Communication objectives</em> are clarified, those to be present are confirmed and communication mode is identified</td>
</tr>
<tr>
<td></td>
<td>1.2 Analysis is undertaken to anticipate the likely positions to be taken by those present on the matters under discussion</td>
</tr>
<tr>
<td></td>
<td>1.3 Subject matter is researched/organised, key points to be conveyed are identified and recorded, and information to counter other positions is summarised</td>
</tr>
<tr>
<td></td>
<td>1.4 Requirements of <em>legislation, policy and guidelines</em> relevant to the discussion are identified and incorporated</td>
</tr>
</tbody>
</table>
## ELEMENT

### 2. Analyse and respond to opinions

<table>
<thead>
<tr>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1 Discussion is evaluated to identify impartiality, bias or unsupported argument</td>
</tr>
<tr>
<td>2.2 Points of view of other speakers are noted and information to counter opposing views is presented objectively in accordance with required position</td>
</tr>
<tr>
<td>2.3 Reaction to speakers and their point of view is analysed to identify and manage emotional reactions and maintain objectivity</td>
</tr>
<tr>
<td>2.4 Opposing/challenging views are examined for their value in achieving the same ends</td>
</tr>
<tr>
<td>2.5 Active listening and questioning are used to clarify own understanding, challenge or justify other points of view</td>
</tr>
</tbody>
</table>

### 3. Present a convincing argument

<table>
<thead>
<tr>
<th>PERFORMANCE CRITERIA</th>
</tr>

<tr>
<td>3.3 Verbal and non-verbal behaviour are adjusted to maintain listener interest if the audience is unresponsive</td>
</tr>
<tr>
<td>3.4 Questions are used to elicit feedback and check audience understanding</td>
</tr>
<tr>
<td>3.5 Audience questions and argument are responded to objectively, and answers are backed by reasoned explanation</td>
</tr>
<tr>
<td>3.6 Agreement is negotiated where possible, concluding with a summary of agreed items</td>
</tr>
</tbody>
</table>

### 4. Develop a range of communication strategies

<table>
<thead>
<tr>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.1 Feedback from others is obtained and the outcomes of communication are assessed</td>
</tr>
<tr>
<td>4.2 Lessons learnt are recorded and used to underpin future interactions</td>
</tr>
<tr>
<td>4.3 Language structures and features that influence audiences to a preferred point of view are developed and practised</td>
</tr>
<tr>
<td>4.4 Communication strategies are explored and practised for a range of workplace applications in accordance with organisational requirements</td>
</tr>
</tbody>
</table>
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to communication in the public sector
- analysing and using language structures and features that influence the interpretation of spoken communication
- interacting confidently with groups on familiar topics in formal and informal workplace situations
- speaking with confidence and listening critically
- clarifying meaning, exploring issues and problem solving
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of high-level communication

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to communication in the public sector
- the power and effect of spoken language
- knowledge of organisation processes and hierarchy
- techniques to deal with opposing views and positions
- emotional intelligence techniques
- organisational protocols and etiquette for communication in meetings
- communication strategies to suit different audiences, such as workgroup, organisational, inter-agency
- ways to influence the interpretation of spoken communication
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of high-level communication
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- **Pre-requisite** unit that must be achieved prior to this unit: Nil

  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV504B Undertake research and analysis
  - PSPGOV505A Promote diversity
  - PSPGOV507A Undertake negotiations
  - PSPGOV508A Manage conflict
  - PSPGOV511A Provide leadership
  - PSPGOV514A Facilitate change
  - PSPGOV515A Develop and use political nous
  - PSPGOV516A Develop and use emotional intelligence
  - PSPLEGN501B Promote compliance with legislation in the public sector
  - PSPOHS501A Monitor and maintain workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- use of complex communication strategies in a range of (3 or more) contexts (or occasions, over time)
EVIDENCE GUIDE

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to public sector communication
- current theory and practice on influencing skills for the public sector
- case studies and workplace scenarios to capture the range of situations likely to be encountered when using complex communication strategies

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when using complex communication strategies, including coping with difficulties, irregularities and breakdowns in routine
- complex communications strategies used in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses
EVIDENCE GUIDE

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

*Communication objectives may be to*

- share information
- reach consensus
- contribute to policy
- represent the business unit's position/interests in internal negotiations
- resolve differences
- negotiate a joint position/compromise
- build reputation (of self and organisation/business unit)
- market services

*Those to be present may include*

- peers
- colleagues
- those senior or junior to the position
- staff from other agencies
RANGE STATEMENT

**Mode of communication may include**
- telephone
- teleconference
- video conference
- Internet (online forums)
- face-to-face
- one-on-one, or in a group
- forum, seminar or conference

**Organisation of subject matter may include**
- identifying features, advantages and benefits and aligning evidence/examples
- anticipating likely disagreements and structuring material to address these

**Legislation, policy and guidelines may include**
- State/Territory and Commonwealth legislation, regulations, policies, guidelines and standards relating to exchange of information in the public sector, such as:
  - ethics and accountability guidelines/codes of practice
  - information security standards
  - principles of equal employment opportunity, equity and diversity
  - freedom of information and privacy.
  - intellectual property
  - fraud standards
  - professional liability

**Reaction to speakers may include**
- own reaction
- others present
RANGE STATEMENT

**Communication approach may include**
- catering to political sensitivities
- working within government processes and operational frameworks
- balancing debate and action
- consideration of wider organisational/public sector issues
- speaking with confidence
- cultural, ethnic, diversity or equity considerations
- consultative
- collaborative
- assertive
- reasonable
- humorous

**Verbal and non-verbal behaviour may include**
- inclusive language, ideas and information
- congruent speech and body language
- speaking with confidence
- impartiality
- responsiveness
- drawing on different sources of information

**Language structures and features may include**
- use of metaphors and similes
- use of analogy, imagery and other comparisons
- use of passive voice
- using personal names repeatedly to convey intimacy or sincerity
- tone, style and point of view

**Unit Sector(s)**
Not applicable.

**Competency field**

PSPGOV513A Refine complex workplace documents

Modification History
Not applicable.

Unit Descriptor
Unit descriptor
This unit covers written workplace communication at a level where preliminary research or documents may have been prepared by others as input, and final documents are being prepared. It includes critical analysis of workplace information, composition, revision and refinement to meet workplace requirements.

In practice, refinement of complex workplace documents may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, providing client service, leading a group, developing policy, undertaking research and analysis, etc.

This is one of 5 units of competency in the Working in Government Competency Field that deal with written communication. Related units are:

PSPGOV208A Write routine workplace materials PSPGOV313A Compose workplace documents PSPGOV413A Compose complex workplace documents PSPGOV606A Prepare high-level/sensitive written materials

This is a new unit of competency, added to the Working in Government Competency Field of the Training Package in 2004

Application of the Unit
Not applicable.

Licensing/Regulatory Information
Not applicable.
Pre-Requisites
Not applicable.

Employability Skills Information

Employability skills  This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *italics* is explained in the Range Statement following.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Critically analyse information | 1.1 *Information* is tested for relevance, reliability, consistency and usefulness to the task/organisation  
1.2 Fact is separated from opinion and underlying values and beliefs are identified  
1.3 Cultural context of the information is taken into account in the analysis  
1.4 Stereotypes, bias, prejudice and motive are recognised  
1.5 Conclusions are drawn and a critical analysis with supporting evidence is prepared and submitted in accordance with organisational requirements |
ELEMENT
2. Compose/refine complex documents

PERFORMANCE CRITERIA
2.1 The purpose, audience and objectives of complex documents are confirmed in accordance with organisational requirements

2.2 Structure and content of document is approved in line with the purpose and intended audience

2.3 Risk assessment is undertaken and risk management is implemented in relation to document preparation and content, in accordance with the nature and classification of the material

2.4 Information/documents provided by others are analysed for bias, gaps, the influence of values, attitudes and context, conflicting advice/evidence and political implications

2.5 Information is synthesised and complex documents are prepared and submitted in accordance with organisational requirements, legislation, policy and procedures

2.6 Feedback is provided to contributors of information/documents to improve future input in a manner that provides learning opportunities for the researchers/authors
Required Skills and Knowledge

REQUARED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- reading and writing at a level to cope with a range of complex and sensitive workplace materials
- critically analysing and synthesising information to compose complex written documents
- refining content, structure and sequence according to the required purpose of written material
- using spelling, punctuation and grammar for workplace documents at an experienced level
- providing feedback on other people's work in ways suited to the diversity of the workplace, including creation of learning opportunities to improve research/document input
- responding to diversity, including gender and disability
- implementing ergonomic requirements for office work
- complying with environmental policies such as those relating to paper use/wastage/recycling

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to written communication in the public sector such as privacy, freedom of information, information security, confidentiality, copyright, intellectual property
- critical analysis of complex information
- politically and culturally sensitive documents
- organisational requirements for complex written documents
- government style manual requirements
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of preparing written materials
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- Pre-requisite units that must be achieved prior to this unit: Nil
- Co-requisite units that must be assessed with this unit: Nil
- Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV504B Undertake research and analysis
  - PSPGOV505A Promote diversity
  - PSPGOV515A Develop and use political nous
  - PSPLEGN501B Promote compliance with legislation in the public sector
  - PSPOHS501A Monitor and maintain workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- complex workplace documents composed/refined in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to written communication in the public sector
- examples of complex workplace documents
- government style guide
- case studies and workplace scenarios to capture the range of situations likely to be encountered when composing/refining complex workplace documents
EVIDENCE GUIDE

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when refining complex workplace documents, including coping with difficulties, irregularities and breakdowns in routine
- complex workplace documents composed/refined in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments
Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in italics in the Performance Criteria is explained here.

Information for critical analysis may include

- applications
- briefing papers
- discussion papers
- expert opinion
- literature
- plans
- policy advice
- project briefs
- reports
- research
- speeches
- submissions
- web site information

Purpose may include

- influencing opinion
- reporting on achievement
- recommending options and corresponding actions
- meeting regulatory requirements
- meeting public sector reporting requirements
- documenting policy
- developing policy
- obtaining funding
- providing briefing material
- contributing to strategic planning
- responding to enquiries/complaints
RANGE STATEMENT

Complex documents may include

- funding submissions
- briefing papers
- speeches
- media briefs
- position papers
- discussion papers
- business cases
- reports
- project briefs
- strategic and operational plans
- functional area strategy
- justification for policy development
- policy guidance
- counter argument to submission

Structure and content may include

- executive summary
- division into sections or chapters
- tables of contents and indexes
- conclusions
- glossaries
- footnotes/endnotes
- references
- critical analysis
- facts and observations
- submissions
- creative ideas
- recommendations and supporting arguments
- opinion
- anticipated arguments and rebuttals
- case studies

Submission of document may include

- approvals
- sign-off procedures
RANGE STATEMENT

Organisational requirements may include

- use of plain English
- style formats
- acknowledgements
- particular terminology to be used/not used:
  - acronyms
  - technical terms
  - bureaucratic language
  - abbreviations.
- requirements for minimising jargon in written materials
- requirements for written material to take account of cultural, ethnic, religious or language differences, disabilities, etiquette
- guidelines for illustrative items
- standards for references, acknowledgements, citations, footnotes, endnotes
- using particular communication channels

Legislation, policy and procedures may include

- State/Territory or Commonwealth legislation, regulations, policies, procedures and guidelines relating to the preparation and security of written information in the public sector, including freedom of information, copyright, privacy, confidentiality, equal employment opportunity, diversity, occupational health and safety
- risk assessment
- information security requirements
- public sector standards
- fraud control standards
- codes of practice
- codes of ethics
- private or confidential materials
- embargoed material
- politically sensitive materials
- security standards for government information

</table>
| 3. Form alliances       | 3.1 Power structure and sources of *power* are identified in the organisation and the wider public sector  
                         | 3.2 People prepared to trade mutual support are identified and the benefits assessed  
                         | 3.3 Risks and benefits of possible alliances are weighed  
                         | 3.4 Interested groups/individuals are lobbied to gain support and acceptance of ideas/courses of action  
                         | 3.5 Influence is built with key policy makers, *decision makers* and key influencers, in accordance with public sector standards and legislation |
| 4. Bargain and negotiate to achieve outcomes | 4.1 Sound positions are developed with supporting arguments  
                         | 4.2 Responses to possible contradictory positions are formulated  
                         | 4.3 Positions are negotiated and refined with feedback from the negotiation process  
                         | 4.4 Consensus with others is achieved for one's position  
                         | 4.5 Outcomes are implemented in accordance with organisational policy and procedures |
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to the public sector
- undertaking research and analysis
- using a range of communication activities such as negotiating, consulting, influencing, bargaining, resolving conflict, networking, etc
- responding to diversity, including gender and disability
- applying risk management strategies
- applying procedures relating to occupational health and safety and environment in the context of the political environment.

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to the public sector environment
- organisational policies and procedures
- organisational and public sector power structures and sources of power
- macro view of agendas, positions, and power
- government directions and agendas
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment and sustainability

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

</table>
| 2. Recognise and appreciate the emotional strengths and weaknesses of others | 2.1 The emotional states of co-workers are assessed and emotional cues responded to  
2.2 The varying cultural expressions of emotions are identified and utilised to respond to emotional cues in a diverse workforce  
2.3 Flexibility and adaptability are demonstrated in dealing with others  
2.4 The emotions of others are taken into account when making decisions |
| 3. Promote the development of emotional intelligence in others           | 3.1 Opportunities are provided for others to express their thoughts and feelings  
3.2 Others are assisted to understand the effect of their behaviour and emotions on others in the workplace  
3.3 Self-management of emotions is encouraged in others  
3.4 Others are encouraged to develop their own emotional intelligence to build productive relationships and maximise workplace outcomes |
| 4. Utilise emotional intelligence to maximise team outcomes              | 4.1 A positive emotional climate is encouraged in the workplace  
4.2 The strengths of workgroup members are used to achieve workplace outcomes |
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to the public sector
- keeping check of emotions when challenges arise and maintaining composure
- perceiving the emotional motivators that drive individuals and groups in the workplace and engaging those motivators, where appropriate, to optimise organisational performance
- using a variety of words and language structures to explain complex ideas to different audiences
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to the public sector
- emotional intelligence principles and strategies
- the relationship between effective people and the attainment of business unit objectives
- communication with a diverse workforce
- varying cultural expressions of emotion
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of using emotional intelligence

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.
EVIDENCE GUIDE

Units to be assessed together

- **Pre-requisite units** that **must** be achieved **prior** to this unit: *Nil*
- **Co-requisite units** that **must** be assessed **with** this unit: *Nil*
- **Co-assessed units** that **may** be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPCOM502A Develop and implement community engagement strategies
  - PSPCOM503A Build and maintain community relationships
  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV507A Undertake negotiations
  - PSPGOV508A Manage conflict
  - PSPGOV511A Provide leadership
  - PSPGOV512A Use complex workplace communication strategies
  - PSPGOV514A Facilitate change
  - PSPLEGN501B Promote compliance with legislation in the public sector
  - PSPPOL501A Develop organisation policy

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- development and use of emotional intelligence in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to the public sector
- emotional intelligence background material and workplace strategies
- case studies and workplace scenarios to capture the range of situations likely to be encountered where the use of emotional intelligence is relevant
EVIDENCE GUIDE

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when developing and using emotional intelligence, including coping with difficulties, irregularities and breakdowns in routine
- development and use of emotional intelligence in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments
Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Emotions may include

- anger
- anxiety
- apathy
- apprehension
- caring
- confidence
- depression
- elation
- enthusiasm
- excitement
- fear
- happiness
- inadequacy
- joy
- nervousness
- over-confidence
- pride
- stress
- under-confidence
- unhappiness

Emotional intelligence is

- widely recognised as the ability of an individual to monitor their own and others’ emotions in a social or work environment, to discriminate among the emotions and to use the information to guide their thinking and actions
- characterised by:
  - self-awareness (personal)
  - self-management (personal)
  - social awareness (social)
  - relationship management (social)
RANGE STATEMENT

Development of emotional intelligence may include

- mentoring
- shadowing
- coaching
- training
- simulation

This unit contains employability skills.
Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in italics is explained in the Range Statement following.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| **1. Design benchmarking approach** | 1.1 The organisation's core business, functions, and purpose are confirmed to provide a context for the *benchmarking* exercise  
1.2 The organisation's strategic and organisational context is analysed to identify factors with current or future impact on the organisation  
1.3 The *scope* of the benchmarking exercise is established and objectives, desired outcomes, timeframes and *resources* are determined  
1.4 A *benchmarking approach* is designed in accordance with the scope, desired objectives/outcomes and available resources  
1.5 A project plan is prepared and approved in accordance with organisational policy and procedures |
| **2. Establish benchmarks** | 2.1 *Key result areas* are identified for benchmarking in accordance with determined scope and objectives  
2.2 *Research* is conducted to establish the *benchmarks* to be used for the measurement of organisational performance  
2.3 Consultation to consider and confirm the validity and usefulness of the benchmarks is conducted with key *stakeholders*  
2.4 Benchmarks are confirmed and obtained, or arrangements made to develop/use them in accordance with *legislation, standards, policies and guidelines* |
<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 3. Establish and manage benchmarking exercise | 3.1 *Staffing arrangements* are established and resourced in accordance with project plan  
3.2 Consultation, communication with stakeholders and ongoing progress reports are included as a feature of the management of the exercise to ensure the engagement and cooperation of those people in the areas being benchmarked  
3.3 Benchmarking exercise is managed in accordance with timeframes and budgetary constraints |
| 4. Gather and analyse information | 4.1 Networking and consultation are undertaken with staff in the areas to be benchmarked, to gather *tacit knowledge*  
4.2 Encouragement of open and honest input is provided to ensure outcomes are valid, reliable and useful for improving performance  
4.3 Organisational data is gathered, collated with information from consultation and analysed against benchmarks in accordance with the project plan  
4.4 Benchmarking findings are discussed with staff and management, and feedback is incorporated into final results |
| 5. Report on/act on benchmarking outcomes | 5.1 Benchmarking report is written to meet audience needs and is presented in accordance with organisational requirements  
5.2 Areas of excellence/strengths and recommendations for improvement are identified in the report in accordance with pre-determined objectives and outcomes  
5.3 When required, a strategy is developed for phased implementation of recommendations that meet organisational requirements  
5.4 Research information is preserved and stored in accordance with organisational and security requirements to provide historical data for subsequent benchmarking exercises  
5.5 Benchmarking outcomes are acted upon/recommendations implemented in accordance with organisational requirements |
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to benchmarking
- planning and managing projects
- collecting, recording and collating information
- undertaking research and analysis
- using records management systems
- interpreting organisational information
- communicating/consulting with a range of diverse stakeholders
- responding to diversity, including gender and disability
- writing recommendations and reports requiring formality of expression
- using numeracy skills for data analysis
- applying procedures relating to occupational health and safety and environment in the context of benchmarking

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to benchmarking
- principles of benchmarking performance
- organisational structure and functions, systems and processes
- public sector standards including ethics and security relating to organisational information
- project management
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of benchmarking
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* unitsthat *must* be achieved *prior* to this unit: *Nil*
- *Co-requisite* unitsthat *must* be assessed *with* this unit: *Nil*
- *Co-assessed units* that *may* be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  
  - PSPETHC501B Promote the values and ethos of public service
  - PSPIM503A Maintain and monitor service standards
  - PSPGOV503B Coordinate resource allocation and usage
  - PSPGOV504B Undertake research and analysis
  - PSPGOV505A Promote diversity
  - PSPGOV507A Undertake negotiations
  - PSPGOV508A Manage conflict
  - PSPGOV511A Provide leadership
  - PSPGOV512A Use complex workplace communication strategies
  - PSPGOV517A Coordinate risk management
  - PSPLEGN501B Promote compliance with legislation in the public sector
  - PSPPM502B Manage complex projects
  - PSPSEC502A Develop security risk management plans

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- performance benchmarked in a range of (3 or more) contexts (or occasions, over time)
EVIDENCE GUIDE

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to benchmarking
- industry best practice standards for benchmarks
- access to similar organisations/areas/functions for comparison
- case studies and workplace scenarios to capture the range of situations likely to be encountered when benchmarking performance

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when benchmarking performance, including coping with difficulties, irregularities and breakdowns in routine
- performance benchmarked in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses
EVIDENCE GUIDE

For consistency of assessment  Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in italics in the Performance Criteria is explained here.

Benchmarking is

- an activity undertaken by an organisation to gauge its performance against a set of internal or industry-specific best practice standards
- applied organisation-wide, to departments or business units or to areas such as finance, human resources, customer service/satisfaction, etc

Scope may include

- organisation-wide
- functional area
- business unit
- skill area, such as management behaviours and practices
- procedures, policies, guidelines, work instructions
- resource deployment and usage
- business practices
- performance outcomes
- organisational processes
RANGE STATEMENT

Resources may include

- personnel
- funding
- downtime when benchmarking is underway
- equipment and supplies
- research materials
- technology

Benchmarking approach may include

- a project team approach
- comparison with similar organisation/function
- visit to and critique of a similar organisation
- collaboration in 'critical friends' program
- comparison with pre-determined standard
- identifying and setting targets for improved performance
- change management
- resourcing commensurate with the size and perceived importance of the exercise
- training/education about benchmarking
- benchmarking networks

Key result areas may include

- service delivery
- finance
- people management
- client service
- administration
- safety
- security
- fraud control
- process improvement, especially key business processes

Research may include

- key stakeholders
- current literature
- industry research
- internal, local, national or international search for benchmarks
- ensuring benchmarks are valid (comparing apples with apples) and reliable
- identifying confounding variables
RANGE STATEMENT

**Benchmarks may include**
- internal standards/performance indicators
- historical data - past performance
- external standards
- industry standards
- best/leading practice standards
- national standards
- international standards

**Stakeholders may include**
- all those individuals and groups both inside and outside the organisation that have some direct interest in the organisation's behaviour, actions, products and services, including:
  - boards of management
  - clients
  - community organisations
  - contractors
  - employees at all levels of the organisation
  - government
  - Ministers
  - other public sector organisations
  - service providers
  - suppliers
  - the public
  - union and association representatives
  - volunteers

**Legislation, standards, policies and guidelines may include**
- public sector management acts
- financial management acts
- audit acts
- public sector standards
- fraud control standards
- government security standards
- risk management guidelines
- Australian standards, such as accounting standards, audit standards, risk management standards, knowledge management standards, quality standards
- ethics and accountability standards
- codes of conduct
- confidentiality agreements
RANGE STATEMENT

Staffing arrangements may be

- internal
- external
- contracted expertise

Tacit knowledge is

- knowledge that is not written down/recorded that resides in the mind and may include aspects of culture or 'ways of doing things'

Unit Descriptor

Unit descriptor
This unit covers supervision and performance management in accordance with the organisation's performance management system. It includes linking individual/workgroup activities to organisational goals, setting performance expectations, measuring performance achievements, and renegotiate performance and development plans.

In practice, performance management may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, leading a group, managing projects, supervising inspections, benchmarking performance, etc.

This is one of 4 units in the Working in Government and Management Competency Fields that deal with performance. Related units are:

PSPGOV315A Give and receive workplace feedback
PSPGOV416A Monitor performance and provide feedback
PSPMNGT603B Facilitate people management

This is a new unit of competency, added to the Working in Government Competency Field of the Training Package in 2004

Application of the Unit
Not applicable.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.
## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *italics* is explained in the Range Statement following.

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| **1. Link individual/workgroup activities to organisational goals** | **1.1** The organisation's mission, vision and goals are identified, linked and explained in accordance with each individual's needs  
 **1.2** Individual and *workgroup* activities are aligned with organisational goals in consultation with workgroup members  
 **1.3** Individual and workgroup activities are prioritised in accordance with *organisational directions* |
| **2. Set performance standards expectations** | **2.1** *Performance standards* are identified and clarified in accordance with organisational policy and procedures  
 **2.2** Performance standards are consulted upon, negotiated and agreed  
 **2.3** Performance and learning/development plans are developed and agreed, to document team and individual performance targets, standards and professional development objectives  
 **2.4** Performance targets and key performance indicators are developed that are specific, realistic and measurable  
 **2.5** Performance plans are implemented in accordance with organisational requirements |
ELEMENT | PERFORMANCE CRITERIA
--- | ---
3. Measure performance achievements | 3.1 Individual performance is monitored, *appraised* and measured against performance goals and required business outcomes
3.2 Performance is assessed and addressed in a fair and timely manner in accordance with *legislation, policy and procedures*
3.3 Disagreement or conflict is managed and documented in accordance with organisational policy and procedures
3.4 Where possible, outstanding performance is recognised/rewarded in accordance with organisational policy and procedures
3.5 Under-performance is addressed promptly in accordance with organisational guidelines, procedures and the principles of natural justice
3.6 Areas/strategies for improvement are identified and implemented to continuously improve performance and outcomes

4. Renegotiate performance and learning/development plans | 4.1 The results of performance management are documented in accordance with legislative and organisational requirements and used to identify strengths and performance gaps
4.2 Learning is captured to inform knowledge management strategies and transfer skills to other staff
4.3 Performance standards are renegotiated and agreed in accordance with organisational procedures
4.4 *Learning and development* objectives are identified and agreed to enhance performance and meet developing organisational and workgroup goals
4.5 Agreed performance standards and related professional development are documented in accordance with organisational policy and procedures
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to performance management
- giving feedback on performance
- maintaining confidentiality
- communicating with a diverse workforce including listening, questioning, clarifying, negotiating and managing conflict
- responding to diversity, including gender and disability
- identifying future learning and development requirements
- applying time management
- recordkeeping
- applying procedures relating to occupational health and safety and environment in the context of performance management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to performance management such as:
  - equal employment opportunity
  - grievance procedures
  - disciplinary procedures
  - code of conduct
  - privacy legislation
  - freedom of information.
  - organisation's performance management system
  - organisation's learning and development system
  - impact of learning and development opportunities on performance
  - remuneration systems
  - equity and diversity principles
  - public sector legislation such as occupational health and safety and environment in the context of performance management
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- **Pre-requisite** unit that must be achieved prior to this unit: N\textit{i}l
- **Co-requisite** unit that must be assessed with this unit: N\textit{i}l
- **Co-assessed units** that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV505A Promote diversity
  - PSPGOV507A Undertake negotiations
  - PSPGOV508A Manage conflict
  - PSPGOV511A Provide leadership
  - PSPGOV512A Use complex workplace communication strategies
  - PSPGOV516A Develop and use emotional intelligence
  - PSPGOV518A Benchmark performance
  - PSPLEGN501B Promote compliance with legislation in the public sector
  - PSPOHS501A Monitor and maintain workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- performance management in a range of (3 or more) contexts (or occasions, over time)
**EVIDENCE GUIDE**

**Resources required to carry out assessment**

These resources include:

- legislation, policy, procedures and protocols relating to performance management
- performance management processes
- access to previous performance assessments
- case studies and workplace scenarios to capture the range of situations likely to be encountered when managing performance

**Where and how to assess evidence**

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing performance, including coping with difficulties, irregularities and breakdowns in routine
- performance management in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include a combination of 2 or more of:

- demonstration
- observation
- portfolios
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

**For consistency of assessment**

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments
Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

**Workgroup may include**
- an existing team
- group formed for a special purpose or project
- business unit

**Organisational directions may relate to**
- strategic plan
- business plan
- operational plan
- sector-wide requirements
- organisational capability framework
- succession planning

**Information affecting the workgroup/organisation may include**
- legislation
- plans
- industrial awards and agreements
- organisation policies, plans, procedures and protocols
- performance management system
- quality standards
- efficiency indicators
- capability frameworks
- leadership capabilities
- standards/conditions outlined in performance contracts
RANGE STATEMENT

Performance standards may include
- selection criteria
- best practice standards
- quality standards
- organisational practice standards
- competencies
- service level standards
- standards in codes of ethics/conduct/confidentiality
- standards in legislation/regulations/policy/guidelines
- agreed goals and outcomes at workgroup (business) and organisation (strategic) level

Appraisal processes may include
- 360° feedback
- performance data
- supervisor/employee feedback
- peers
- client/customer feedback
- assessor feedback
- evaluation of job position statement against current job role
- validation feedback
- feedback from subject matter experts
- results of training needs analyses for workgroup/individual
- previous performance and development plans with agreed goals
RANGE STATEMENT

Legislation, policy and procedures may include

- State/Territory and Commonwealth legislation and regulations such as:
  - public sector management acts
  - privacy legislation
  - freedom of information
  - equal employment opportunity, anti-discrimination and harassment legislation
  - employment legislation
  - occupational health and safety legislation.
  - ethics and accountability standards
  - public sector standards
  - organisational policy, procedures and protocols
  - international legislation/codes of behaviour
  - enterprise bargaining agreements
  - award conditions/requirements
  - strategic and business plans

Learning and development opportunities may include

- formal course participation
- on-the-job training
- work experience
- staff exchanges
- mentoring
- coaching
- external study
- conference and seminar attendance
- induction
- job rotation
- higher duties
- work shadowing opportunities

Competency field

Working in Government
PSPGOV524A Interpret data and related statistics

Modification History
Not applicable.

Unit Descriptor

This unit covers the interpretation of data and related statistics. It includes interpreting graphs or tables, interpreting data and its summarised highlights, interpreting a range of official statistics in a policy environment, presenting statistical results and guiding others in the interpretation of data.

In practice, interpreting data and related statistics may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, working safely, conducting research and analysis, etc.

This is one of 5 units of competency in the Working in Government Competency Field that deal with statistics. Related units are:

- PSPGOV520A Scope statistical data collection
- PSPGOV521A Collect statistical data
- PSPGOV522A Process statistical data
- PSPGOV523A Interrogate and analyse statistical data

This is a new unit of competency, added to the Working in Government Competency Field of the Training Package in 2004.

Application of the Unit
Not applicable.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.
Employability Skills Information

Employability skills  This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.  Together, performance criteria specify the requirements for competent performance. Text in *italics* is explained in the Range Statement following.

Elements and Performance Criteria

**ELEMENT** | **PERFORMANCE CRITERIA**
--- | ---

1. Interpret a graph or table

| 1.1 Reports based on the data are written which identify relevant relationships within the data |
| 1.2 Row and column percentages are calculated from a table |
| 1.3 A table/graph is interpreted in accordance with data reflected |

2. Interpret data and its summarised highlights

| 2.1 Data summaries and trends are defined and explained in a manner suited to the audience |
| 2.2 Survey data is interpreted according to *accepted standards* |
| 2.3 Data is interpreted and its highlights are summarised |
| 2.4 Interpretation is verified with a suitably qualified person |

3. Interpret a range of official statistics in a policy environment

| 3.1 Data summaries and trends are identified and explained |
| 3.2 *Statistical tests* are interpreted and this interpretation explained |
| 3.3 The sampling method/survey design is critiqued |
| 3.4 Interpretation of the data is undertaken in such a way as to inform decision making |
| 3.5 Interpretation is verified with a suitably qualified person |
| 3.6 The shortcomings of statistical applications in the policy environment are identified |
ELEMENT

4. Present statistical results

PERFORMANCE CRITERIA

4.1 Data is *presented* in tables, charts and maps so that the reader does not misconstrue it

4.2 Glossaries, technical notes and referencing are included where required

4.3 Reports that include *statistical concepts*, tables, charts and maps are prepared and presented in accordance with organisational policy and procedures

4.4 *Findings* are presented in a way that is most appropriate for the audience

4.5 Charts are used appropriately in presentations for the variables being charted and conform to *accepted standards*

5. Guide others in the interpretation of data

5.1 Data summaries and trends are clearly defined and communicated to staff involved in the project

5.2 Report findings are presented in a way that is most appropriate for the audience

5.3 The assumptions on which the interpretation is based are communicated in accordance with audience needs
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to statistical work
- explaining the results of an analysis in writing
- constructing graphs, tables and maps using software
- using presentation software
- communicating with diverse audiences including explaining, interpreting, presenting results
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of statistical interpretation

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to statistical work
- summary statistics
- statistical tests and related assumptions
- different methodologies and related assumptions
- the quality of a statistic
- sources of error including standard error
- data collection methodologies
- sources of expertise within the organisation
- 'how numbers relate' or the associations between statistics
- the ethical issues associated with presenting statistical results
- intellectual property issues and how they might relate to the data
- confidentiality issues relating to the data
- relevant style manuals
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of statistical work
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- **Pre-requisite unit** that must be achieved prior to this unit: Nil
- **Co-requisite unit** that must be assessed with this unit: Nil
- **Co-assessed units** that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV503B Coordinate resource allocation and usage
  - PSPGOV504B Undertake research and analysis
  - PSPGOV520A Scope statistical data collection
  - PSPGOV521A Collect statistical data
  - PSPGOV522A Process statistical data
  - PSPGOV523A Interrogate and analyse statistical data
  - PSPLEGN501B Promote compliance with legislation in the public sector

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- interpretation of data and related statistics in a range of (3 or more) contexts (or occasions, over time)
EVIDENCE GUIDE

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to interpretation of statistics
- tools/equipment for interpreting and explaining statistics
- case studies and workplace scenarios to capture the range of situations likely to be encountered when undertaking statistical interpretation

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when interpreting data and related statistics, including coping with difficulties, irregularities and breakdowns in routine
- interpretation of data and related statistics in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses
EVIDENCE GUIDE

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and/or apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Accepted standards for survey data may include

- showing awareness of data accuracy and reliability
- identifying other related issues, such as sample size

Statistical tests include

- equivalence of means and proportions
- tests of association and prediction

Data presentation may include

- the use of footnotes, caveats and references.

Statistical concepts include

- the results of statistical tests
- trends over time
- statistical associations
- variability
- sampling error

Presentation of findings may include

- a mix of text, tables, charts, maps etc
RANGE STATEMENT

Accepted standards for charts may include

- appropriately labelled
- appropriate scale selection
- clear formatting

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to public sector environment
- using a range of communication methods with diverse strategic networks including consultation, liaison, negotiation, building influence and reputation, transparency
- using formal and informal industry communication channels
- responding to diversity, including gender and disability
- resolving conflict in a strategic networking context
- applying procedures relating to occupational health and safety and environment in the context of strategic networking

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to work in a public sector environment
- local/national/international public sector structures/protocols
- industry/professional communication channels and networks
- principles of interpersonal, group and inter-agency communication
- principles of conflict resolution in a strategic context
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of strategic networking

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- **Pre-requisite unit** that must be achieved **prior** to this unit: Nil
- **Co-requisite unit** that must be assessed with this unit: Nil
- **Co-assessed units** that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC601B Maintain and enhance confidence in public service
  - PSPGOV601B Apply government systems
  - PSPGOV605A Persuade and influence opinion
  - PSPLEGN601B Manage compliance with legislation in the public sector
  - PSPMNGT604B Manage change
  - PSPMNGT605B Manage diversity
  - PSPMNGT609B Formulate business strategies
  - PSPMNGT613A Develop partnering arrangements

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- strategic networks established/maintained in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to the public sector environment
- organisational charts
- case studies and workplace scenarios to capture the range of situations likely to be encountered when establishing and maintaining strategic networks
EVIDENCE GUIDE

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when establishing and maintaining strategic networks, including coping with difficulties, irregularities and breakdowns in routine
- strategic networks established/maintained in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.
Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

**Networks may include**
- formal or informal networks
- circulation lists
- e-networks
- bulletin boards
- virtual communities
- mailing lists

**Key stakeholders may include**
- officers from other government organisations
- Ministerial advisers
- community members
- council members
- industry representatives
- professional associations
- international public sector staff
- international associations

**Unit Sector(s)**
Not applicable.

**Competency field**

PSPGOV605A Persuade and influence opinion

Modification History
Not applicable.

Unit Descriptor

Unit descriptor
This unit covers high-level workplace communication for working at a senior level with internal and external clients, colleagues and other staff. It includes preparing for high-level communication, critically analysing and responding to opinions, persuading and influencing others, and reflecting on and honing communication strategies.

In practice, persuading and influencing others may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government systems, managing change, managing diversity, etc.

This is one of 5 units of competency in the Working in Government Competency Field that deal with communication. Related units are:
PSPGOV202B Use routine workplace communication techniques
PSPGOV312A Use workplace communication strategies
PSPGOV412A Use advanced workplace communication strategies
PSPGOV512A Use complex workplace communication skills
This is a new unit of competency, added to the Working in Government Competency Field of the Training Package in 2004

Application of the Unit
Not applicable.

Licensing/Regulatory Information
Not applicable.
Pre-Requisites
Not applicable.

Employability Skills Information
Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *italics* is explained in the Range Statement following.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Prepare for high-level communication | 1.1 *Communication objectives* are clarified, those to be *present* are confirmed and communication *mode* is identified  
1.2 Analysis is undertaken to anticipate the likely attitudes of and positions to be taken by those present on the matters under discussion  
1.3 *Communication styles* of those to be present are considered and their effect on the tone and likely direction/progress of the discussion is assessed  
1.4 Critical self-evaluation of communication strengths and vulnerabilities is undertaken and compared with other participant/s knowledge, styles and likely approaches in planned encounters  
1.5 Subject matter is researched/organised, key messages to be conveyed are distilled and tactics planned to utilise personal strengths and maximise outcomes for the organisation in accordance with *legislation, policy and guidelines* |
ELEMENT

PERFORMANCE CRITERIA

2. Critically analyse and respond to opinions

2.1 Others are listened to critically and responsively to evaluate complex levels of meaning in spoken communication and to identify impartiality, bias or unsupported argument

2.2 Tone, style, non-verbal elements and points of view of speakers are noted and their use in influencing and affecting particular outcomes is considered

2.3 Reaction to speakers and their point of view is analysed to identify and manage emotional triggers and maintain objectivity

2.4 Opposing/challenging views are welcomed and examined for their value in achieving the same ends

2.5 Communication is examined for subtext, significant inclusions and exclusions, socio-cultural values, attitudes and assumptions

2.6 Complex concepts and ideas are explored to clarify understanding, and to challenge and justify interpretations based on underlying assumptions, beliefs and values

3. Persuade and influence others

3.1 Communication approach is chosen and used to maximise effect with the given audience

3.2 Sustained points of view are asserted with determination and conviction

3.3 Content and approach are modified when speaking to an unresponsive audience, and diversions and unexpected questions handled confidently

3.4 A variety of verbal and non-verbal behaviour is used to explain abstract ideas and expand on complex issues to maintain listener interest

3.5 Complex questions and arguments are responded to quickly and saliently, backed by reasoned explanation

3.6 Disagreements or conflicting personalities are handled objectively and agreements are negotiated where possible, concluding with positive summaries of achievement
ELEMENT

4. Reflect on and hone communication strategies

PERFORMANCE CRITERIA

4.1 Feedback from others is obtained, outcomes are assessed and underlying interactions and motivations analysed

4.2 Own vulnerability to emotional and other seductive appeals is analysed dispassionately

4.3 Lessons learnt are articulated and used to underpin future interactions

4.4 *Sophisticated language structures and features* that influence audiences to a preferred point of view are developed and practised

4.5 Creative and innovative communication strategies are explored and practised for a range of workplace applications in accordance with organisational requirements
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to communication in the public sector
- analysing and using language structures and features that influence the interpretation of spoken communication
- interacting responsively, critically and confidently with both familiar and unfamiliar groups on specialised topics in formal and informal workplace situations
- speaking with confidence and listening evaluatively and critically
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of high-level communication

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to communication in the public sector
- the power and effect of spoken language
- stylistic devices and their ethical use for calculated effect
- the ways in which socio-cultural factors, language features and structures, and non-verbal elements combine to influence the interpretation of spoken communication
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of high-level communication

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.
EVIDENCE GUIDE

Units to be assessed together

- **Pre-requisite units** that must be achieved prior to this unit: Nil
- **Co-requisite units** that must be assessed with this unit: Nil
- **Co-assessed units** that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  
  PSPETHC601B Maintain and enhance confidence in public service
  PSPGOV601B Apply government systems
  PSPGOV602B Establish and maintain strategic networks
  PSPGOV604A Foster leadership and innovation
  PSPLEGN601B Manage compliance with legislation in the public sector
  PSPMNGT604B Manage change
  PSPMNGT605B Manage diversity
  PSPMNGT606B Manage quality client service
  PSPMNGT613A Develop partnering arrangements
  PSPMNGT614A Facilitate knowledge management
  PSPOHS602A Manage workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- opinion influenced in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to public sector communication
- current theory and practice on influencing skills for the public sector
- case studies and workplace scenarios to capture the range of situations likely to be encountered when persuading and influencing opinion
EVIDENCE GUIDE

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when persuading and influencing opinion, including coping with difficulties, irregularities and breakdowns in routine
- opinion influenced in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.
Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in italics in the Performance Criteria is explained here.

**Communication objectives may include**

- share information
- brief Minister
- reach consensus
- shape opinion
- influence policy
- represent the organisation's position
- represent the business unit's interests in internal negotiations
- resolve differences
- negotiate a joint position/compromise
- build reputation (of self and organisation)
- market services

**Those to be present may include**

- peers
- colleagues
- those senior or junior to the position
- staff from other agencies
- senior executives/chief executive
- ministerial liaison personnel
- Minister
- Minister's chief of staff

**Mode of communication may include**

- telephone
- teleconference
- video conference
- Internet (online forums)
- face-to-face
- one-on-one, or in a group
- forum, seminar or conference
RANGE STATEMENT

Communication styles may include

- inter-cultural, equity or diversity considerations
- consultative
- collaborative
- competitive
- confrontational
- soft
- passive
- assertive
- aggressive
- reasonable
- bombastic
- humorous

Organisation of subject matter may include

- identifying features, advantages and benefits and aligning evidence/examples
- anticipating likely disagreements and structuring material to address these

Legislation, policy and guidelines may include

- State/Territory and Commonwealth legislation, regulations, policies, guidelines and standards relating to exchange of information in the public sector, such as:
  - ethics and accountability guidelines/codes of practice
  - information security standards
  - principles of equal employment opportunity, equity and diversity
  - freedom of information and privacy acts
  - intellectual property guidelines and policy
  - fraud standards
  - professional liability requirements

Reaction to speakers may include

- own reaction
- others present
RANGE STATEMENT

Communication approach may include

- catering to political sensitivities
- working within government processes and operational frameworks
- balancing intellectual debate and action
- considering wider organisational/public sector issues
- using language calculated to appeal emotionally to a particular audience, such as humorous, serious, cajoling, authoritarian
- speaking with confidence and authority
- covering cultural, ethnic, diversity or equity considerations
- selecting a communication style appropriate to the occasion/audience such as consultative, collaborative, assertive, reasonable etc.

Verbal and non-verbal behaviour may include

- inclusive language, ideas and information
- congruent speech and body language
- speaking with confidence
- impartiality
- responsiveness
- drawing on different sources of information

Sophisticated language structures and features may include

- use of metaphors and similes
- use of analogy, imagery and other comparisons
- stylistic devices such as using pronounced downward inflection to convey 'the final word', or upward inflection to invite opinion/agreement
- use of passive voice
- using personal names repeatedly to convey intimacy or sincerity
- using 'we' rather than 'I' to infer corporate rather than personal position
- tone, style and point of view
- rhetorical devices
- irony

Employability skills  This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *italics* is explained in the Range Statement following.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Prepare for high-level written communication | 1.1 *Communication objectives* are clarified, stakeholders are identified and political or other sensitivities are determined  
1.2 Research is undertaken to anticipate the likely attitudes of and positions of *stakeholders* on the matter/s under consideration  
1.3 Subject matter is researched/organised, key messages to be conveyed are distilled and tactics are planned to utilise written materials to maximise outcomes for the organisation in accordance with *legislation, policy and guidelines* |
2. Critically analyse other positions

2.1 Other positions are considered critically to evaluate complex levels of meaning in written communication and to identify impartiality, bias or unsupported argument

2.2 Written materials are examined for subtext, significant inclusions and exclusions, socio-cultural values, attitudes and assumptions

2.3 Complex concepts and ideas are explored to clarify understanding, and justify, or challenge interpretations based on underlying assumptions, beliefs and values

2.4 Evidence is compared and contrasted and sources referred to are evaluated for reliability and authenticity

2.5 Evidence is used to test other positions and draw conclusions about their validity and strengths

3. Prepare persuasive written communication

3.1 Communication approach is chosen and used to positively influence and remove barriers to understanding for the given audience

3.2 Risk assessment is undertaken and risk management is implemented in relation to document preparation and content

3.3 Input information/documents provided by others are analysed for fit with the chosen approach and to ensure consistency of values, attitudes and opinions

3.4 Information is synthesised and complex documents are prepared in accordance with organisational requirements, legislation, policy and procedures

3.5 Feedback from others is obtained on the documents' effectiveness for the purpose intended, outcomes are assessed and lessons learnt are articulated and used to underpin future writing

3.6 Feedback is provided to contributors of information/documents to improve future input in a manner that provides learning opportunities for the contributors
Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- reading and writing at a level to cope with a range of complex and sensitive workplace materials
- critically analysing and synthesising information to compose complex written documents
- researching other pertinent information, such as supporting/opposing position papers
- refining content, structure and sequence according to the required purpose of written material
- analysing and using language structures and features that influence the interpretation of written communication
- using spelling, punctuation and grammar for workplace documents at an experienced level
- providing feedback on other people's work in ways suited to the diversity of the workplace, including creation of learning opportunities to improve research/document input
- cross-cultural communication requirements
- implementing ergonomic requirements for office work
- complying with environmental policies such as those relating to paper use/wastage/recycling

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to written communication in the public sector such as privacy, freedom of information, information security, confidentiality, copyright, intellectual property
- critical analysis of complex information in a government context
- politically and culturally sensitive documents
- organisational requirements for complex written documents
- government style manual requirements
- persuasive written language devices and their ethical use for calculated effect
- the ways in which socio-cultural factors, language features and structures combine to influence the interpretation of written information
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of preparing complex/sensitive written materials
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- **Pre-requisite units** that must be achieved prior to this unit: Nil
- **Co-requisite units** that must be assessed with this unit: Nil

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses
EVIDENCE GUIDE

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in italics in the Performance Criteria is explained here.

Communication objectives may include:

- influencing opinion
- share information
- brief Minister
- reach consensus
- shape opinion
- influence policy
- represent the organisation's position
- represent the business unit's position
- build reputation (of self and organisation)
- market services
- obtain funding
RANGE STATEMENT

Stakeholders may include

- all those individuals and groups both inside and outside the government that have some direct interest in government conduct, actions, products and services, such as:
  - employees at all levels of the public sector
  - government
  - Ministers
  - clients
  - the public
  - other public sector organisations
  - other jurisdictions
  - union and association representatives
  - boards of management
  - international governments
  - international bodies
  - community groups
  - non-government organisations
  - special interest groups
  - key individuals of influence

Organisation of subject matter may include

- identifying features, advantages and benefits and aligning evidence/examples
- anticipating likely disagreements and structuring material to address these

Legislation, policy and guidelines may include

- State/Territory and Commonwealth legislation, regulations, policies, guidelines and standards relating to high-level written communication in the public sector, such as:
  - ethics and accountability guidelines/codes of practice
  - information security standards
  - principles of equal employment opportunity, equity and diversity
  - confidentiality
  - freedom of information
  - privacy
  - intellectual property
  - fraud standards
  - copyright
  - risk management
RANGE STATEMENT

Communication approach may include

- consideration of wider organisational/public sector issues
- consideration of political sensitivities
- language calculated to appeal emotionally to a particular audience, such as authoritative, serious, informal, informative
- cultural, ethnic, diversity or equity considerations
- working within government processes and operational frameworks
- consultative
- collaborative
- assertive
- reasonable

Complex documents may include

- Cabinet submissions
- briefing papers
- speeches
- media briefs
- position papers
- discussion papers
- business cases
- reports
- public policy strategies
- justification for policy development
- policy guidance
RANGE STATEMENT

Organisational requirements may include

- use of plain English
- style formats
- acknowledgements
- particular terminology to be used/not used:
  - acronyms
  - technical terms
  - bureaucratic language
  - abbreviations.
- requirements for minimising jargon in written materials
- requirements for written material to take account of cultural, ethnic, religious or language differences, disabilities, etiquette
- guidelines for illustrative items
- standards for references, acknowledgements, citations, footnotes, endnotes
- use of particular communication channels
- private or confidential materials
- embargoed material
- politically sensitive materials
- security standards for government information

PSPHR620A Manage organisational development

Modification History
Not applicable.

Unit Descriptor

Unit descriptor
This unit covers management of organisational development in order to facilitate optimal performance by the business unit(s) or the organisation as a whole. It includes determining organisational development needs and opportunities, and planning and implementing intervention strategies.

In practice, managing organisational development overlaps with other generalist and specialist workplace activities such as managing change, managing diversity, managing policy implementation, facilitating workforce effectiveness, etc.

This unit replaces PSPHR610A Design and implement an organisational development strategy. The units are not equivalent. The revised unit has additional requirements and no longer covers evaluation of an intervention strategy. Evaluation is addressed in PSPMNGT611A Manage evaluations, added to the Management Competency field of the Training Package in 2004.

Application of the Unit

Employability skills  This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.  Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.
### Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Determine organisational development needs and opportunities | 1.1 An *environmental scan* is undertaken to determine internal and external factors which will impact on organisational performance  
1.2 A consultation process is agreed with *stakeholders* in line with *organisational policy and legislation*  
1.3 Ethical principles are applied in consulting with key stakeholders  
1.4 Information gathered through consultative processes is analysed and presented to a diverse stakeholder base and options are determined  
1.5 Recommendations are made to management on a proposed *organisational development strategy*, resourcing implications, risk assessment and timeframes |
| 2. Plan intervention strategies | 2.1 *Intervention strategies* that support the organisation's strategic goals and stakeholder responses are agreed  
2.2 The organisation's culture and legislative and policy framework are considered in developing the strategies  
2.3 Feedback is obtained from stakeholders and is used to redevelop/redefine the strategies prior to implementation  
2.4 Strategies are developed to embody the principles of natural justice, equity and fairness  
2.5 Information and advice are provided to facilitate effective implementation, monitoring and evaluation of intervention strategies |
| 3. Implement an intervention strategy | 3.1 Resources are obtained and deployed to implement the strategy, and reports on progress are provided on a regular basis  
3.2 Facilitation and advice are provided to *champion* required changes using a range of *communication* strategies to suit a diverse workforce and support implementation of the strategy  
3.3 Systems are developed and used to monitor the effectiveness of the strategy and to determine necessary adjustments  
3.4 Procedures are developed to allow the *business unit* self-sufficiency in continuing implementation  
3.5 Legislative and policy requirements are complied with in implementing the strategy |
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- engaging in effective consultation with stakeholders using a variety of words and language structures to explain complex ideas to different audiences
- undertaking project management and evaluation
- undertaking counselling and negotiation
- using effective leadership involving systems and people
- analysing and explaining complex, formal documents and assisting others to apply them in the workplace
- preparing written advice and reports requiring reasoning and precision of expression
- undertaking training, coaching, mentoring and facilitation
- applying public relations strategies
- responding to diversity, including gender and disability
- applying occupational health and safety, environmental and sustainability procedures relevant to organisational development and change management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- a range of evaluation methodologies related to organisational development
- change management strategies
- employee involvement strategies
- employment relations in the context of organisational development
- organisational learning
- equal employment opportunity, equity and diversity principles
- human resource policies and practices
- human resource strategy and planning
- industry trends
- jurisdictional legislation applying to organisational development including occupational health and safety and environmental and sustainability requirements
- needs analysis techniques in the context of organisational development
- organisational policies and procedures
- organisational development theory and practices including national and/or international good practice models and conceptions of organisation development
- organisational culture and dynamics
- organisational planning - vision, mission, values, goals
REQUIRED SKILLS AND KNOWLEDGE

the concept of diversity and its integration within and across all human resource functions and areas

the relationships between human resource functions
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- Pre-requisite units that must be achieved prior to this unit: Nil
- Co-requisite units that must be assessed with this unit: Nil

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

- PSPETHC601B Maintain and enhance confidence in public service
- PSPGOV601B Apply government systems
- PSPGOV604A Foster leadership and innovation
- PSPGOV605A Persuade and influence opinion
- PSPHR603B Provide advisory and mediation services
- PSPHR615A Manage human resource development strategies
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPMNGT604B Manage change
- PSPMNGT605B Manage diversity
- PSPMNGT608B Manage risk
- PSPMNGT611A Manage evaluations

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- organisational development managed in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, organisational policies and procedures
- workplace scenarios and case studies to capture the range of situations likely to be encountered when managing organisational development
EVIDENCE GUIDE

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing organisational development, including coping with difficulties, irregularities and breakdowns in routine
- organisational development managed in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities

The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

**Sources of information for environmental scan may include**
- statistical analyses
- interviews with stakeholders
- surveys
- focus groups interviews
- research on existing programs
- solicited and unsolicited feedback
- organisational reviews
- workforce management data
- work level standards

**Stakeholders may include**
- all those individuals and groups both inside and outside the organisation that have some direct interest in the organisation's behaviour, actions, products and services including:
  - users of the human resource service
  - employees at all levels of the organisation
  - strategic planners
  - executive
  - decision makers
  - other public sector organisations
  - inter-agency forums
  - union and association representatives
  - boards of management
  - government
  - Ministers
  - clients

**Organisational policy and legislation may**
- Commonwealth and State/Territory legislation including equal employment opportunity, anti-discrimination and
RANGE STATEMENT

include

- employment law
- public sector management legislation
- national and international codes of practice and standards
- the organisation's policies and practices
- government policy
- codes of conduct
- codes of ethics
- public sector standards
- security policy and procedures
- sustainability/environmental standards

Organisational development strategies may be developed and applied to

- the human resource business unit
- one or more of the business units within the organisation
- the entire organisation

Intervention strategies may include

- business planning
- performance incentives
- business re-engineering
- rewards and recognition awards schemes
- market testing
- organisational skills profiling
- team enhancement
- quality management
- organisational culture development
- individual enhancement/coaching/mentoring
- learning and development activities
- workforce planning
- succession planning

Championing required changes may include

- consulting
- advising
- leading
- persuading
- influencing
RANGE STATEMENT

- communicating
- facilitating
- assisting
- developing and delivering awareness/briefing sessions

Communication may include:
- email
- intranet
- web site
- face-to-face
- pamphlets
- newsletters
- manuals

Business unit may refer to:
- a program
- sub-program
- cost centre
- area
- division
- branch
- production unit or section located within the organisation

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| **1. Analyse resource requirements** | 1.1 Resource bids are developed in line with outputs identified in business plans  
1.2 Key *stakeholders* are consulted in determining the nature and level of *resources* required  
1.3 Analysis of resource requirements is used to identify proposed costs and benefits  
1.4 Opportunities to share resources across *business units* within the organisation are identified |
| **2. Develop resource plans to support achievement of business unit objectives** | 2.1 Resource plans are developed that detail the acquisition and allocation of resources, and the relationship to *business strategies*, contingencies, plans, programs and processes  
2.2 Internal resourcing capabilities and external resourcing requirements are identified  
2.3 Procedures for the evaluation of resource allocation are identified in resource plans  
2.4 Processes for managing changing government priorities are included in resource plans  
2.5 Approval for resource plans is obtained from senior management  
3.1 Resources are allocated in accordance with relevant *legislation*, *organisational policy and practices*  
3.2 Resource allocation is managed to enable achievement of business unit objectives  
3.3 Resources are negotiated and obtained within required timeframe to enable achievement of business unit objectives  
3.4 Systems are developed and implemented to enable timely and accurate monitoring and review of resource usage  
3.5 Efficient use of *technology* is incorporated into work practices |
| **3. Allocate resources to achieve stated business objectives** | 4.1 Procedures to review resource allocation against business unit objectives are developed and implemented  
4.2 Compliance with program and project budgets is monitored and corrective action is recommended and actioned where necessary  
4.3 Reports are prepared that clearly indicate the level of performance achieved and any action taken to adjust or rectify procedures in meeting service and product delivery standards |
| **4. Review and report on resource usage** |  

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations, policies, procedures and guidelines relating to resource management in the public sector
- using effective consultation and negotiation with stakeholders
- writing reports requiring reasoning and precision of expression
- communicating using complex exchange of oral information
- responding to diversity, including gender and disability
- applying budgeting and financial management
- applying occupational health and safety and environmental strategies to resource management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- resource plans
- financial management and budgetary processes in the organisation
- business strategies
- risk management concepts
- organisational goals, policies and procedures
- equal employment opportunity, equity and diversity principles
- jurisdictional legislation and guidelines applicable to resource management, including occupational health and safety and environment
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- **Pre-requisite units** that must be achieved prior to this unit: Nil
- **Co-requisite units** that must be assessed with this unit: Nil
- **Co-assessed units** that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

  - PSPETHC601B Maintain and enhance confidence in public service
  - PSPGOV601B Apply government systems
  - PSPGOV602B Establish and maintain strategic networks
  - PSPLEGN601B Manage compliance with legislation in the public sector
  - PSPMNGT610A Manage public sector financial resources
  - PSPPOL603A Manage policy implementation

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- management of resources in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- procedures and protocols
- jurisdictional legislation and guidelines applicable to resource management
- workplace information such as resource allocations, resource plans
- workplace scenarios and case studies to capture the range of situations likely to be encountered when managing resources

Where and how to assess evidence

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing resources, including coping with
EVIDENCE GUIDE

difficulties, irregularities and breakdowns in routine
• management of resources in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:
people with disabilities
people from culturally and linguistically diverse backgrounds
Aboriginal and Torres Strait Islander people
women
young people
older people
people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:
case studies
portfolios
projects
questioning
scenarios
authenticated evidence from the workplace and/or training courses

For consistency of assessment
Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments
Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

*Stakeholders may include* all those individuals and groups both inside and outside the organisation that have some direct interest in the organisation's behaviour, actions, products and services such as:
- other public sector organisations
- union and association representatives
- boards of management
- government

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.  Together, performance criteria specify the requirements for competent performance. Text in bold italics is explained in the Range Statement following.
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Establish the risk management context | 1.1 The nature and extent of business unit activity, its objectives and outcomes are established within the organisational context  
1.2 The strategic and risk management context are identified in accordance with organisational requirements  
1.3 Stakeholders are identified and consulted to ensure their views, concerns and needs are taken into account in the risk management process  
1.4 Criteria for risk assessment are determined in accordance with legislation, policy and procedures  
1.5 Risk management criteria are determined to provide guidance on balancing risk, costs, benefits and opportunities  
1.6 Risk management criteria are monitored, reviewed and adjusted to ensure opportunities and current and emerging trends are reflected |
| 2. Plan for risk management | 2.1 Sources of risk are investigated and potential, perceived and actual risks are identified and consulted upon to ensure full coverage  
2.2 Risks are analysed and documented in consultation with stakeholders, and levels of risk are determined as the basis for risk management planning in a specific activity  
2.3 Risk management methods/techniques/tools are selected and modified as necessary to evaluate risks to determine those that are acceptable and those that are unacceptable  
2.4 Risk treatment options are identified for unacceptable risks and preferred risk treatment approaches are determined  
2.5 A risk management plan is developed and communicated to key stakeholders to ensure clarity and achievement of objectives throughout the activity's life cycle |
| 3. Manage risk | 3.1 Activity is managed in accordance with agreed risk management plan  
3.2 Performance is reviewed, variance is analysed and risk responses are initiated to achieve objectives with minimal disruption and conflict  
3.3 Internal and external risks to outcomes are monitored and remedial actions are initiated to achieve business unit objectives |
| 4. Evaluate the risk management plan | 4.1 A valid and reliable evaluation methodology is developed and implemented  
4.2 Outcomes are reviewed and analysed to assess the effectiveness of current risk management strategies  
4.3 Evaluation is used to monitor existing risks, identify new risks |
ELEMENT PERFORMANCE CRITERIA

and identify any trouble spots

4.4 A variety of information, including the perspectives of key stakeholders, is obtained and utilised

4.5 Recommendations on enhancements to the plan are formulated and acted upon to inform subsequent risk management processes

4.6 The outcomes of evaluation are communicated to relevant personnel
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to risk management
- researching and analysing the wider context affecting the organisation
- assessing and evaluating risks
- monitoring and reviewing risks and risk treatments
- using communication and consultation with a diverse range of stakeholders
- applying problem solving using conceptual and reasoning skills
- using formal language and style for written plans
- engaging in discussion using exchange of complex oral information
- using a variety of words and language structures to explain complex, formal documents
- and assisting others to apply them in the workplace
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of risk management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to risk management
- Australian and New Zealand standards - Risk management AS/NZS 4360:1999 or as revised
- international standards such as SIRCA 8001:2003
- Guidelines for managing risk in the Australian and New Zealand public sector - HB 143:1999 or as revised
- risk management cycle
- the relationship of risk to context - how the context may define the risks
- the importance of consultation and communication at every stage of the risk management cycle
- legal requirements related to the activity
- whole-of-life considerations
- approval processes
- range of evaluation methodologies
- the diversity of risks in the public sector
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the
REQUIRED SKILLS AND KNOWLEDGE

context of risk management
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- **Pre-requisite** units that must be achieved prior to this unit: *Nil*
- **Co-requisite** units that must be assessed with this unit: *Nil*

**Co-assessed units** that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

- PSPETHC601B Maintain and enhance confidence in public service
- PSPGOV601B Apply government systems
- PSPGOV602B Establish and maintain strategic networks
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPMNGT602B Manage resources

RANGE STATEMENT

self-insurers
clients
suppliers
contractors
service providers
community organisations
the public

Risk management

- is a logical and systematic process of identifying, analysing, evaluating, treating, and monitoring risks related to any strategy plan, process, program or procedure that will enable the organisation to minimise losses and maximise opportunities
- may be considered in relation to an organisation's:
  - people
  - assets and physical environment
  - reputation and image
  - legal issues
  - business continuity
  - finances

may include written procedures to ensure staff know:

- what
- how
- when, and
- by whom, action is to be taken to treat risks in the organisation

Risk evaluation criteria

are used to rank risks and decide whether they are acceptable or not affected by:

- legal requirements
- perceptions of internal/external stakeholders
- cost-benefit analysis, for example, cost of risk management being less than financial cost if the risk occurred

Legislation, policy and procedures may include

- Commonwealth and State/Territory legislation relating to risk management
- national and international codes of practice and standards, such as SIRCA 8001:2003
- the organisation's risk management policies and practices
- codes of conduct/codes of ethics

Australian and New Zealand standards - Risk management AS/NZS
RANGE STATEMENT

4360:1999 or as revised

- Guidelines for managing risk in the Australian and New Zealand public sector - HB 143:1999 or as revised
- professional standards for risk management, for example CPRM - certified practising risk manager
- jurisdictional policies, guidelines and web sites, for example www.riskmanagement.qld.gov.au

Sources of risk may include human behaviour
technology/technical issues
occupational health and safety
legal
political
property/equipment
environmental
financial/market
natural events

Risks may be internal
external
random
real
perceived

Risks may include physical injury or death
failure of machinery or equipment
breaches of security
fraud
litigation
client dissatisfaction
unfavourable publicity

Analysis of risks includes likelihood of risks:
almost certain
likely
possible
RANGE STATEMENT

unlikely

rare

consequences of risks:

insignificant

minor

moderate

major

catastrophic

current control measures

Documentation of analysis may include a table showing all risks, any existing controls, likelihood of occurring, consequences and subsequent level of risk.

Level of risk may be:

low, treated with routine procedures

moderate, with specific responsibility allocated for the risk, and monitoring and response procedures implemented

high, requiring action, as it has potential to be damaging to the organisation

extreme, requiring immediate action, as the potential could be devastating to the organisation

Methods/techniques/tools may include:

- computer modelling
- sensitivity analysis
- structured interviews
- statistical data
- questionnaires
- fault trees
- analysis of consequences - loss of money, time, labour, intangibles

Acceptable risks are those which an organisation has determined have the least potential for harm

not necessarily insignificant

Risks may be acceptable because:

the risk level is so low that it does not warrant spending time and money to treat it

the risk is low and the benefits outweigh the cost of treating it

the opportunities presented are much greater than the threat

Unacceptable risks are those which an organisation has determined have the most potential...
RANGE STATEMENT

for harm

Options for treating risks may include

- avoiding the risk, for example, by terminating the activity or conducting it in another way (these actions may have different risks attached)
- controlling the risk, by reducing the likelihood of the risk occurring, the consequences of the risk, or both
- transferring the risk, for example, by arranging insurance, contracting some or all of the activity to another organisation or person, etc
- retaining the risk, and making contingency plans/funds allocation for covering any loss or other negative effect from the risk

Risk management plan may include

- sources of risk and risk events
- analysis of risks - likelihood, consequences and risk levels
- prioritised list of unacceptable risks
- treatment options selected
- person/s responsible for implementing treatment options
- resources required
- performance measures
- timeframe for implementation
- timetable for review of plan

Evaluation methodology may include

- observations
- physical inspections
- incident reports
- questionnaires
- interviews with stakeholders
- regular reviews of risk treatment procedures
- repeat of the risk management process

Elements and Performance Criteria Pre-Content
Elements are the essential outcomes of the unit of competency.  Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. **Contribute to financial bids and estimates** | 1.1 Organisational initiatives requiring the preparation of bids and estimates are identified in accordance with resource constraints and organisational needs  
1.2 Information for bids/estimates is substantiated, contains logical assumptions and takes account of strategic plans, government policies and priorities  
1.3 Information for bids/estimates is prepared in accordance with government budgetary requirements including a timeframe to meet critical submission dates  
1.4 Documentation to support bids/estimates is prepared in accordance with budget guidelines |
| 2. **Allocate funds** | 2.1 Budgets are approved and financial resources are allocated according to organisational priorities/business plan  
2.2 Allocations are made in accordance with organisational policy and procedures and take account of any statutory requirements or constraints  
2.3 Audit trails are maintained to ensure accurate tracking and to identify variances between agreed and actual allocations  
2.4 Financial allocation is monitored against organisational objectives and priorities and corrective action is taken as required in accordance with organisational policy and procedures |
| 3. **Manage budgets** | 3.1 Budget management is undertaken that meets the financial accountability requirements of the organisation  
3.2 Expenses are monitored against budget and authorised in accordance with financial delegation and organisational financial controls  
3.3 Financial reports are obtained and provided in accordance with organisational requirements  
3.4 Expenses are monitored through analysis of financial information/reports and problems are resolved or referred in accordance with organisational procedures and financial delegation  
3.5 Expenditure is aligned with service delivery milestones/expectations  
3.6 Changes to the budget are negotiated to account for potential under-spending, delays in service/program delivery, overruns and unneeded line items in accordance with organisational policy and procedures |
| 4. **Report on financial** | 4.1 Requirements for financial management and reporting are identified in accordance with the public sector financial |

activities | management framework

4.2 Financial management and reporting are undertaken in accordance with organisational requirements and public sector financial management policy and procedures
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- preparing information and reports requiring precision of expression
- meeting formatting and process requirements for bids and estimates and linkages to strategic plans
- monitoring financial information
- interpreting and signing off on financial reports
- interpreting organisational information in financial terms
- adjusting communication to suit different audiences
- using cross-cultural communication relating to financial management - across professional cultures such as accounting, IT, arts, policy areas
- responding to diversity, including gender and disability
- accessing information and legislation electronically or in hard copy
- applying environmental, sustainability and occupational health and safety procedures relating to working in the public sector

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- financial management principles
- legislation, policies and processes relating to public sector financial management, such as conflicts of interest, procurement, value for money
- the organisation's financial accountability mechanisms
- corporate governance requirements
- internal controls and why they are used
- delegations and why the public sector uses them
- public sector financial management framework (detailed knowledge) and the relationship between the elements of the framework
- documents that make up the financial management framework
- legislation related to working in the public sector such as equal employment opportunity, environmental, sustainability and occupational health and safety requirements
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together
- **Pre-requisite** unit/s that must be achieved prior to this unit: *Nil*
- **Co-requisite** unit/s that must be assessed with this unit: *Nil*
- **Co-assessed unit/s** that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments
Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

*Bids may include*
- program discretionary bids
- program, sub-program, section, business unit bids
- portfolio managed bids

*Estimates may include*
- budget estimates
- additional estimates
- forward estimates
- long-term estimates
- forecasts

*Information may include*
- historical information
- cost-benefit analysis
- staff requirements
- contractual information
- efficiency/sustainability requirements

*Budgetary requirements may include*
- zero-based budgeting
- accrual budgeting
- activity-based costing/management
- output-based budgeting
- top-down/bottom-up approach
- base plus increment

*Supporting documentation may include*
- phasing for liability and expenditure/cash flow implications
- impact statements
- reasons for major variations to financial guidance
- staffing resources

*Budgets may include*
- capital expenses
- recurrent expenses
- staffing costs
- cash flow
- forward estimates

*Corrective action may include*
- re-prioritising activities
- funds transfer
- re-phasing liability/expenditure

*Delegations are*
- functions or powers (under an act) assigned to others
RANGE STATEMENT

- limited to specified powers or amounts
- made to persons in specified positions

Financial controls should

- identify, record and measure revenue, expenses, assets, liabilities and equity
- ensure assets are safeguarded and used to avoid waste, extravagance, loss and misuse
- ensure liabilities are not incurred without proper authority
- ensure correct valuation, cut-off, presentation and disclosure of financial balances and transactions
- be linked to the organisation’s risk management strategy

Financial reports may include

- program, sub-program, section, business unit financial reports
- accrual reports
- monthly/quarterly financial reports including cost/unit, costs incurred compared with share of program delivered
- annual reports

Elements of the public sector financial management framework may include

- internal controls
- segregation of duties
- delegations
- corporate governance requirements
- service level agreements
- internal and external reporting
- risk management

Public sector financial policies and procedures may include

- financial management acts and regulations
- financial administration and audit acts
- Treasury guidelines
- public sector finance standards
- financial management benchmarking studies
- the organisation’s:
  - financial management practice manual
  - delegation manual
  - budget manual/instructions
  - style manual
  - quality manual
  - government financial policy statements

Unit Descriptor

Unit descriptor
This unit covers the exploration of opportunities for government organisations to develop partnering arrangements with the private sector and to proceed to formal agreement based on evaluation to ensure the public interest is fully protected. It includes exploring partnering opportunities, assessing feasibility, establishing partnering arrangements and fostering productive partnering relationships.

In practice, development of partnering arrangements may overlap with other generalist or specialist public sector workplace activities such as applying government systems, establishing and maintaining strategic networks, planning procurement, managing risk etc.

This is one of two units dealing with partnering arrangements. The second unit is an imported unit, CHCCD19A Establish and maintain community, government and business partnerships from the Community Services Training Package which may be used in Diploma or Advanced Diploma qualifications.

This is a new unit of competency, added to the Management Competency field of the Training Package in 2004.

Application of the Unit
Not applicable.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.
Employability Skills Information

Employability skills  This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.  Together, performance criteria specify the requirements for competent performance. Text in bold italics is explained in the Range Statement following.

Elements and Performance Criteria

<table>
<thead>

<td>PERFORMANCE CRITERIA</td>
</tr>
<tr>
<td>---------</td>
<td>----------------------</td>
</tr>
</tbody>
</table>
| **1. Explore partnering opportunities** | 1.1 Rigorous assessment is undertaken to establish the potential for private sector involvement in the delivery of public sector services or infrastructure  
1.2 Need, affordability and priority for private sector partnering are determined to ensure the public interest is fully protected  
1.3 The service/infrastructure requirement to be provided through a partnering arrangement is identified, benefits to the community are confirmed and potential partners are identified |
| **2. Assess feasibility** | 2.1 A full feasibility study is conducted that includes environmental analysis, social impact and cost-benefit analysis to confirm the merits of partnering options for financing, delivery and value for money  
2.2 A full assessment of risk is conducted, including the risks and costs the government would be prepared to retain  
2.3 A detailed assessment of costs and potential revenue streams is undertaken and a comparison is undertaken with the costs associated with public sector provision  
2.4 Community stakeholders are consulted to provide input in the feasibility and planning stages of any partnering arrangement |
| **3. Establish partnering arrangements** | 3.1 Detailed requirements are determined for the partnering arrangement in accordance with government policy and priorities  
3.2 Procurement options are investigated, including a full public tender process, in accordance with legislative and organisational requirements  
3.3 Contracts are arranged that specify partnering duration, outputs, benefits and performance incentives, if any, in accordance with government policy and procedures  
3.4 Risk is allocated to whichever party is best able to manage it and an accountability structure and approval process is developed  
3.5 Government approvals are obtained and contractual arrangements are entered into in accordance with organisational policy and procedures |
| **4. Foster productive partnering relationships** | 4.1 Reasons/benefits for the partnering arrangement, roles, limitations and expectations are affirmed throughout the life of the relationship  
4.2 Ongoing communication is used to confirm vision, agreed goals, outcomes, measures of performance, agreed accountabilities and the limits of the arrangement for both parties  
4.3 Ethical standards and public sector accountabilities are maintained and, when necessary, explained to partners in a |
ELEMENT PERFORMANCE CRITERIA

manner suited to their requirements

4.4 Strategies for solving problems and dealing with conflict are agreed and used in accordance with organisational policy and procedures to build trust/mutual respect for the benefit of both parties

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- establishing and fostering trusting, ongoing relationships with individuals and businesses
- using a range of communication styles to suit different audiences and purposes
- explaining complex and formal policies and concepts to a variety of audiences
- responding to diversity, including gender and disability
- applying workplace safety procedures to partnering activities
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- probity
- public sector ethics and accountability
- public sector values and codes of conduct
- government/agency policies and procedures relating to public private partnering
- relationship contracting with the private sector
- relationship management in the context of partnering
- management of expectations in the context of partnering
- principles of cultural awareness and cross-cultural communication
- equal employment opportunity, equity and diversity principles
- workplace safety issues relating to public private partnering
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- Pre-requisite units that must be achieved prior to this unit: Nil
- Co-requisite units that must be assessed with this unit: Nil
- Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPGOV601B Apply government systems
  - PSPGOV602B Establish and maintain strategic networks
  - PSPPROC604A Plan for strategic procurement outcomes
  - PSPMNGT608B Manage risk

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- development of 1 significant long-term partnering arrangement or a number of (2 or more) smaller arrangements

Resources required to carry out assessment

These resources include:

- workplace scenarios or case studies
- government partnering policy, principles and practices
- legislation related to public private partnering arrangements
- public sector values and codes of conduct
- relationship contracts
- government requirements for value for money, public benefit testing
- public sector comparator

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when developing partnering arrangements, including coping with difficulties, irregularities and breakdowns in routine
- development of 1 significant long-term partnering arrangement
EVIDENCE GUIDE

or a number of (2 or more) smaller arrangements

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments
Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

**Partnering with the private sector may include**

- harnessing private sector management skills, innovation and efficiencies
- significant private sector involvement in provision of infrastructure or service need
- qualitative risk transfer to the private sector
- long-term output based contract arrangements
- relationship contract
- community input into specifications

**Potential partners will consist of**

- an identifiable market of private sector bidders prepared to compete for the partnering opportunity

**Value for money may be achieved where**

- the project size justifies the transaction and management costs
- there is a defined measurable service delivery function or output mechanism
- there is scope within the project delivery for the optimisation and the allocation of manageable risk to the private sector, delivering a cost-effective outcome
- there is scope for sector private sector innovation, value adding and/or cost reductions in the delivery and operation of the service
- there is real value in transferring responsibility for the operational and maintenance phase of the project to the private sector
- there is an identifiable market of private sector bidders prepared to compete for the opportunity to deliver the project

**Stakeholders may include**

- all those individuals and groups both inside and outside the organisation that have some direct interest in the organisation's behaviour, actions, products and services such as:
  - employees at all levels of the organisation
  - community
  - clients
  - other public sector organisations
  - private sector
  - non-government organisations
  - union and association representatives
RANGE STATEMENT

- boards of management
- government
- Ministers

Requirements for the partnering arrangement may include

- statement of benefits
- specified outputs
- contract term
- risk assessment and management plan
- accountability structure
- performance incentives
- operational or management efficiencies
- optimally developed relationship contract
- best value for money
- responsible use of public and private resources
- probity
- transparency
- fair appeals process
- market sounding
- financing options

Risk management may include

- acceptance of risks
- avoidance of risks
- minimisation of risks

PSPMNGT615A Influence workforce effectiveness

Modification History
Not applicable.

Unit Descriptor
Unit descriptor
This unit covers the competency to ensure the effectiveness of the workforce, whether staff or contractors, in promoting the attainment of strategic objectives. It includes providing leadership to individuals and work teams, creating a cooperative work environment, capitalising on workplace emotions, motivating the workforce to achieve quality results, and delegating work to achieve strategic objectives, and managing up.

In practice influencing workforce effectiveness occurs in the context of other generalist or specialist work functions such as managing performance, managing diversity, managing change, managing client service etc.

This unit is one of a series of 4 units of competency relating to working with others, located in the Competency fields of Working in Government and Management. Related units are:

PSPGOV302B Contribute to workgroup activities
PSPGOV404B Develop and implement work unit plans
PSPGOV511A Provide leadership

This unit replaces PSPMNGT601A Facilitate workforce effectiveness. The units are not equivalent as elements dealing with emotional intelligence and managing up have been added.

Application of the Unit

</table>

ELEMENT

1. Provide leadership to individuals and work teams

PERFORMANCE CRITERIA

1.1 The vision and strategic goals of the organisation that impact on the work area are identified and promoted

1.2 Workforce members are regularly consulted on business objectives, plans and operational issues to minimise role ambiguity and uncertainty

1.3 Roles, functions, responsibilities and work goals are defined in accordance with organisational requirements, and are communicated and agreed

1.4 Opportunities are provided for workforce members to clarify aspects of particular tasks, resolve issues and seek feedback or further direction

1.5 Encouragement is provided to develop new and innovative practices, procedures, processes, technologies and strategies in line with corporate values, vision and goals

1.6 Leadership is provided appropriate to changing priorities and situations and takes account of the specific needs of a diverse workforce

2. Create a cooperative work environment

2.1 Cooperation in the work environment is actively facilitated through balanced and fair work allocation and recognition of all contributions

2.2 Teams and individuals are encouraged to find styles of working which are consistent both with team and individual competencies, preferences and business unit objectives

2.3 Conflict management strategies are used to facilitate a cooperative work environment

2.4 Cooperative and productive relationships with individuals and teams are established

2.5 Leadership style and guidance that take into account the differing needs and background of a diverse workforce are used

3. Monitor and respond to workplace emotions

3.1 Emotional strengths and triggers are identified for self and others in the workplace, and communication, client service or work allocations are tailored to take account of these

3.2 Self-reflection and feedback is used to identify the effect on others of own emotions, and emotional control is exerted to model positive workplace behaviour

3.3 Opportunities are provided for others to express their thoughts and feelings, and emotions are taken into account in decision making to maintain a positive emotional climate in the workplace

3.4 Assistance is provided to others to identify the effect of emotions in the workplace and to develop and use their own emotional intelligence to build productive relationships and

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

delegating work to others
counselling and resolving conflict in teams
using team building strategies
using facilitation, negotiation and consultation requiring exchanges of complex oral information
using consensual decision making skills
keeping check of emotions when challenges arise, maintaining composure, perceiving the emotional motivators that drive individuals and groups in the workplace and engaging those motivators, where appropriate, to optimize organisational performance
using a variety of words and language structures to explain complex ideas to different audiences
interpreting and explaining complex, formal documents and assisting others to apply them in the workplace
responding to diversity, including gender and disability
applying occupational health and safety strategies relevant to managing and working with others in a public sector workplace

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

organisational goals, policies and procedures
equal employment opportunity, equity and diversity principles
the relationship between effective human resource functions and the attainment of business unit objectives
human resource policies and practices
emotional intelligence principles and strategies
group processes and facilitation techniques
team building strategies
the organisation's career and human resource development strategies, programs and plans
conflict resolution strategies
jurisdictional legislation applicable to management and human resource management functions
occupational health and safety issues relevant to managing and working with others in

a public sector workplace

environmental and sustainability issues relevant to managing and working in a public sector environment
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- **Pre-requisite units** that must be achieved prior to this unit: Nil
- **Co-requisite units** that must be assessed with this unit: Nil
- **Co-assessed units** that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC601B Maintain and enhance confidence in public service
  - PSPGOV601B Apply government systems
  - PSPGOV602B Establish and maintain strategic networks
  - PSPLEGN601B Manage compliance with legislation in the public sector
  - PSPPOL603A Manage policy implementation

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- workforce effectiveness influenced in a range of (3 or more) contexts (or occasions, over time) such as working with staff, clients and contractors

Resources required to carry out assessment

These resources include:

- procedures and protocols
- public sector policies and legislation such as those dealing with: human resource management and development workforce capability
- case studies and workplace scenarios to capture the range of situations likely to be encountered when influencing workforce effectiveness

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be
EVIDENCE GUIDE

encountered when facilitating workforce effectiveness, including coping with difficulties, irregularities and breakdowns in routine

- workforce effectiveness influenced in a range of (3 or more) contexts (or occasions, over time) such as working with staff, clients and contractors

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments
Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in italics in the Performance Criteria is explained here.

Workforce members may include employees, consultants, external contractors, job rotation staff, trainees.

Leadership refers to the process of influencing others to engage in work behaviours that facilitate the attainment of the business unit's strategic objectives.

Business unit may refer to a program, sub-program, cost centre, area, division, branch, production unit or section located within the organisation.

Emotional strengths may include ability to monitor and control negative emotions, recognise and respond to others’ emotional states, see beyond an immediate emotional reaction to the real cause, rather than responding to the emotions on face value.

Identification of emotions may need to take account of the varying cultural expressions of emotion.

Others in the workplace may include management staff, clients, contractors.
RANGE STATEMENT

*Emotions may include*  
anger  
anxiety  
apprehension  
caring  
confidence  
depression  
elation  
enthusiasm  
excitement  
fear  
happiness  
inadequacy  
joy  
nervousness  
over-confidence  
pride  
stress  
under-confidence  
unhappiness

*Development of emotional intelligence may occur through*  
mentoring  
shadowing  
coaching  
training  
simulation

*Emotional intelligence is*  
widely recognised as the ability of an individual to monitor their own and others’ emotions in a social or work environment, to discriminate among the emotions and to use the information to guide their thinking and actions  
characterised by self-awareness (personal), self-management (personal), social awareness (social) and relationship management (social)

*Team building strategies may include*  
defining and clarifying objectives/work area plans
RANGE STATEMENT

strengthening communication processes
clarifying ground rules and behavioural expectations
fostering creativity
offering constructive feedback
providing facilitated meetings
recognising achievements

Others may include
superiors
reportees

**Best practice models may include**  
- state, national and international models

**Legislation, organisational policies and practices may include**  
- Commonwealth and State/Territory legislation including equal employment opportunity and anti-discrimination law  
- national and international codes of practice and standards  
- environmental/sustainability standards  
- the organisation’s policies and practices  
- government policy  
- codes of conduct

**Stakeholders may include**  
- all those individuals and groups both inside and outside the organisation that have some direct interest in the organisation's behaviour, actions, products and services, such as:  
  - employees at all levels of the organisation  
  - other public sector organisations  
  - union and association representatives  
  - boards of management  
  - government  
  - Ministers

**Strategic priorities may be**  
- objectives in key result areas identified through the organisation's strategic planning process that have the highest priority rating demanding immediate action

**Unit Sector(s)**

Management
PSPPM401B Design simple projects

Modification History
Not applicable.

Unit Descriptor
This unit covers the planning and development of simple, generally low risk projects that may be small scale and managed by one person or by a person with a small team. It includes identifying project requirements, preparing a business case, preparing the project plan and establishing project infrastructure. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of Procurement and Contract Management.

In practice, project planning and development overlaps with other generalist and specialist work activities such as applying government processes, using resources, developing work plans, gathering information, etc.

When this unit is completed in conjunction with PSPPM402B Manage simple projects and PSPPM403B Close simple projects, the three units together are equivalent to the eight private sector Business Services project management competencies: BSBPM401A - BSBPM408A inclusive.

This unit, and unit PSPPM405A Administer simple projects, are mutually exclusive. One or the other, but not both, may contribute to a qualification.

This unit replaces and is equivalent to PSPPM401A Develop a project.

Application of the Unit
Not applicable.

Licensing/Regulatory Information
Not applicable.
Pre-Requisites
Not applicable.

Employability Skills Information
Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.
### Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Identify project requirements | 1.1 A rationale for the project is outlined that identifies the purpose, outcomes and likely benefits for the user/s  
1.2 Stakeholders are identified and their input is obtained at the planning stage to ensure the project proposal and its objectives are required and achievable  
1.3 The project environment is assessed and environmental issues are addressed in the project proposal  
1.4 Project parameters are determined and a project proposal is completed to organisational standards and within guidelines  
1.5 The project proposal is structured so it is compatible with organisational objectives and other organisational projects, and is designed in accordance with the organisation's policies and procedures and in consultation with specialists to meet user/client requirements |
| 2. Prepare business case | 2.1 Research and analysis is undertaken to identify impacts and risks, constraining factors and alternate options  
2.2 Options and solutions are identified, advice is obtained and recommendations are made in accordance with the strategic direction of the organisation/work unit  
2.3 A report is prepared that demonstrates a business case for the project in accordance with organisational requirements  
2.4 Approvals for the project proposal are obtained in accordance with organisational policy and procedures |
| 3. Prepare project plan | 3.1 Project scope is determined in terms of objectives, outcomes and project deliverables  
3.2 Specialists are consulted where necessary, to advise on potential risks, and options to manage risks are investigated and recorded in the project plan  
3.3 Each of the parameters identified in the proposal are addressed in the project plan in consultation with relevant parties and appropriate approvals are sought and recorded  
3.4 Project management tools are utilised for planning in accordance with project requirements  
3.5 Project outputs are determined that are measurable and achievable and indicators to monitor the performance of the project are developed, under guidance, and agreed by relevant parties in accordance with organisational policy and procedures |
| 4. Establish project infrastructure | 4.1 An implementation strategy is developed in accordance with the project plan and organisational guidelines, and presented to stakeholders to gain project support  
4.2 Terms of reference and project infrastructure requirements for |
ELEMENT PERFORMANCE CRITERIA

set-up and implementation of the project are clarified in the implementation strategy in accordance with the project plan

4.3 Resources are obtained to set up the project office, and roles and responsibilities are assigned to team members and stakeholders as agreed in the project plan

4.4 Processes identified for monitoring, evaluating and reporting performance against project objectives are established in accordance with the project plan
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

detailing requirements, writing recommendations and preparing plans requiring precision of expression

negotiating timelines, roles and responsibilities with stakeholders or team members

communicating with stakeholders or team members using a range of communication styles to suit different audiences and purposes

responding to diversity, including gender and disability

using project management tools

applying workplace safety procedures in line with project planning requirements

accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

legislation, organisational policies and procedures that may impact on the project and management of the project, for example:

public sector codes of ethics/conduct

occupational health and safety and environment requirements

quality standards

risk management

financial management

procurement

human resources

equal employment opportunity, equity and diversity principles

organisational project approval processes

scheduling

change management

project planning methods for small scale or low risk projects

project management tools to suit the projects planned

principles relating to the planning phase of project management for small scale or low risk projects
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- **Pre-requisite units** that must be achieved prior to this unit: Nil
- **Co-requisite units** that must be assessed with this unit: Nil
- **Co-assessed units** that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPGOV402B Deliver and monitor service to clients
  - PSPGOV403B Use resources to achieve work unit goals
  - PSPGOV405B Provide input to change processes
  - PSPGOV408A Value diversity
  - PSPGOV411A Deal with conflict
  - PSPGOV412A Use advanced workplace communication strategies
  - PSPGOV416A Monitor performance and provide feedback
  - PSPGOV422A Apply government processes
  - PSPLEGN401A Encourage compliance with legislation in the public sector
  - PSPOHS401B Implement workplace safety procedures and programs
  - PSPPROC409A Receive and select offers
  - PSPPROC410A Administer contracts
  - PSPPM402B Manage simple projects
  - PSPPM403B Close simple projects

- **Excluded units** that may not contribute to the same qualification as this unit:
  - PSPPM405A Administer simple projects

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
EVIDENCE GUIDE

- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- design of simple projects in a range of (2 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project management
- workplace project documentation
- scenarios and case studies
- documented information and/or examples of the assessee's personal work
- project management tools

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when planning projects, including coping with difficulties, irregularities and breakdowns in routine
- design of simple projects in a range of (2 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses
EVIDENCE GUIDE

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.
Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Stakeholders may include

- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee
- end user
- supplier/service provider

Project parameters include

- project scope - outcomes, objectives, project deliverables
- feasibility
- skills required for project team
- people required for project including specialist expertise
- communications including reporting requirements
- risks associated with project including people, environment, resources, technology change during the life of the project, if applicable
- steering committee arrangements
- timeframe and milestones
- cost
- resources for project
- acquisition/procurement
- organisational structure for project
- project quality control and operational flexibility
- project governance structure
- monitoring through staged rollout
- project delivery requirements
- pilot outcomes
RANGE STATEMENT

- intellectual property
- integration of project within organisation
- transition arrangements
- change management
- project evaluation

Policies and procedures may include

- government legislation (Federal, State and Local) affecting organisation's administration such as:
  - public sector management acts
  - financial management and accounting legislation and regulations
  - privacy legislation
- government and organisational guidelines and procedures relating to:
  - project governance
  - resourcing
  - security
  - strategic plans
  - recruitment
  - risk management
  - procurement guidelines
  - designation approvals
  - industrial agreements

Specialists may include

- legal
- technical
- financial
- other functional areas
- other relevant agencies
- logistics
RANGE STATEMENT

Constraining factors may include:
- political
- industrial
- legislative
- technical
- financial
- resourcing
- social and cultural considerations
- cultural change management (internal)
- security/privacy
- environmental
- logistic support

Analysis report will contain:
- cost-benefit analysis

Approval may be required from:
- project sponsor/funding body
- business owner of the project
- program manager
- line manager
- project governance office/personnel in the organisation
- chief executive officer, manager or management representative
- customer or client

Project scope is defined by:
- objectives - aims/goals for doing the project
- outcomes - measurable benefit achieved from the utilisation of the outputs delivered by the project
- outputs/project deliverables - the services/products delivered by the project

Options to manage risks may include:
- acceptance
- avoidance
- minimisation
- transfer
- strategies
- flexibility
- empathy
- emotional intelligence

Project plan will include some or all of:
- acquisition strategies
- budget and financial management strategy
- contract management
- cost estimates
- evaluation criteria
- expected outcomes/measurable benefits of the project
RANGE STATEMENT

- facilities
- inclusions and exclusions from project
- information/communication strategy
- intellectual property strategies
- milestones
- objectives
- outputs/project deliverables and their acceptance criteria
- people plan including human resource management and human resource development
- performance criteria/indicators
- project control mechanisms
- project implementation strategy
- project governance strategy
- purpose
- quality assurance
- quality control
- quality standards for project
- rationale
- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)
- risk management
- schedule management
- financial management
- communication, including reporting
- resources management
- logistics management
- scope management
- change management
- quality management
- people management
- occupational health and safety management

Project parameters may include

- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
RANGE STATEMENT

- Gantt and bar charts
- Program Evaluation and Review Technique (PERT) charts
- Critical Path Method
- cost schedule control system
- logistics support analysis
- life cycle cost analysis
- spreadsheets
- recording systems - electronic and manual
- staffing levels/need for recruitment action and training
- equipment and technical support
- resource requirements including travel, finance etc
- project office accommodation
- management infrastructure

Project infrastructure may include

Elements and Performance Criteria Pre-Content
Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
ELEMENT | PERFORMANCE CRITERIA
--- | ---
1. Implement start-up activities | 1.1 The project plan is updated with confirmed information for key dates and activities, resources and project governance details in accordance with the project implementation strategy
1.2 Project stakeholders' understanding of and agreement to fulfil the project requirements and their roles and responsibilities are confirmed
1.3 Required systems are established and maintained throughout the project in accordance with the project plan
1.4 A working knowledge of project management tools is used to facilitate integration of project activities and achievement of project outcomes

2. Coordinate project implementation | 2.1 Integration and management of project activities are handled in accordance with the project plan
2.2 Stakeholder input and expectations are managed and their commitment is maintained throughout the life of the project in accordance with organisational policy and procedures and the project plan
2.3 Disagreements and disputes are resolved or referred to a higher authority in accordance with organisational policy and procedures
2.4 Project change proposals are received and changes are recommended/made in accordance with the project plan, and documented in accordance with policy and procedures

3. Monitor project | 3.1 All aspects of the project are continually monitored and corrective action is taken as necessary to maintain progress in accordance with the project plan
3.2 Consultation and reporting mechanisms are applied in accordance with the communication plan when dealing with management, staff and/or contractors, steering committee members or other stakeholders
3.3 Project governance plans and any related contracts are monitored, reviewed and amended as appropriate, and results are reported in accordance with the communication plan
3.4 Project progress is monitored against agreed milestones in accordance with the project plan to provide a measure of performance throughout the life of the contract
3.5 Programmed review of objectives and achievement is implemented in accordance with the project plan

4. Arrange project follow-up activities | 4.1 Project deliverables are analysed against specifications, performance standards and project objectives, under broad guidance, and the results are reported to stakeholders
4.2 An initial support package or product manual is produced, if
ELEMENT

PERFORMANCE CRITERIA

required, to provide guidance for stakeholders who will be required to apply the project results

4.3 The support package includes options for stakeholders to take account of environmental and cultural factors in applying project results

4.4 Operational and support authorities are consulted to research any testing/trialling/building requirements resulting from the project, and evaluation of any recommendations are included in the project report
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:
leading and mentoring people to achieve project deliverables
maintaining agreement of stakeholders and team members to timelines, roles and responsibilities
communicating with stakeholders and team members using a range of communication styles to suit different audiences and purposes
responding to diversity, including gender and disability
using project management tools applicable to small scale or low risk projects
applying ethical decision making and problem solving related to project management of small scale or low risk projects
writing recommendations and preparing implementation support packages requiring precision of expression
applying workplace safety procedures in line with project requirements
accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:
legislation, organisational policies and procedures that may impact on project management, for example:
  public sector codes of ethics/conduct
  occupational health and safety and environment requirements
  project governance requirements
  quality standards
  risk management
  procurement guidelines
human resources
  equal employment opportunity, equity and diversity principles
  project management tools to suit a range of small scale or low risk projects
  project management principles
  organisational and political context
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- **Pre-requisite units** that must be achieved prior to this unit: Nil

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in italics in the Performance Criteria is explained here.

Stakeholders may include
- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee members
- end user
- supplier/service provider

Project plan will include some or all of
- acquisition strategies
- budget and financial management strategy
- contract management
- cost estimates
- evaluation criteria
- expected outcomes/measurable benefits of the project
- facilities
- inclusions and exclusions from project
- information/communication strategy
- intellectual property strategies
- milestones
- objectives
- outputs/project deliverables and their acceptance criteria
- people plan including human resource management and human resource development
- performance criteria/indicators
- project control mechanisms
- project implementation strategy
- project governance strategy
RANGE STATEMENT

- purpose
- quality assurance
- quality control
- quality standards for project
- rationale
- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)
- government legislation (Federal, State and Local) affecting organisation's administration such as:
  - public sector management acts
  - financial management and accounting legislation and regulations
  - privacy legislation
  - government and organisational guidelines and procedures relating to:
    - project governance
    - resourcing
    - security
    - strategic plans
    - recruitment
    - risk management
    - procurement guidelines
    - designation approvals
    - industrial agreements

Policy and procedures may include

- government legislation (Federal, State and Local) affecting organisation's administration such as:

Management of project wind-down may include

- risks
- issues
- assets
- consultants
- project team
- support staff

Documentation may include

- project completion report
- supplier performance reports
- whole-of-life support plans
- transfer documents
- financial reports and acquittals

Approvals may be

- project sponsor/funding body
RANGE STATEMENT

required from

- business owner of the project
- program manager
- line manager
- project governance office/personnel in the organisation
- chief executive officer, manager or management representative
- customer or client

Competency field

Competency field Project Management
PSPPM504A Carry out complex project activities

Modification History
Not applicable.

Unit Descriptor

Unit descriptor
This unit covers the work activities required to carry out complex project activities or multiple projects simultaneously. Typically this work is undertaken by project officers who are required to work on projects for multiple clients, or all aspects of larger projects. They are sometimes responsible for all the project deliverables, and at other times they work in teams on aspects of a number of projects. Contract management requirements are not included, as this aspect is addressed by units of competency within the Competency field of Procurement and Contract Management.

The unit includes reviewing and confirming requirements of each project/activity, organising and undertaking project activities, managing the progress of multiple projects/activities and finalising projects/activities.

In practice, conducting complex project activities overlaps with other generalist and specialist work activities such as acting ethically, coordinating resource allocation and usage, developing client services, undertaking research and analysis, etc.

This is a new unit of competency, added to the Project Management Competency field of the Training Package in 2004.

Application of the Unit
Not applicable.

Licensing/Regulatory Information
Not applicable.
Pre-Requisites
Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in bold italics is explained in the Range Statement following.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
ELEMENT

1. Review and confirm project requirements

   1.1 Limits of own responsibility and reporting requirements are confirmed for each of the projects/project activities assigned

   1.2 Information and supporting materials for each project/project activity are obtained in accordance with project requirements, organisational policy and procedures

   1.3 Project plans are analysed and requirements, timeframes, roles, responsibilities and stakeholder involvement are confirmed for each

   1.4 Project management procedures and controls are confirmed in accordance with each project plan, and any required changes are negotiated according to the project plan change management strategy

   1.5 Project plans are updated with confirmed information for milestones, resources, team members and steering committee details

2. Organise and undertake project activities

   2.1 Personal work plans are prepared to assign activities, timeframes and milestones for all projects/project activities to a single planning management framework to meet the progress requirements for each project/project activity

   2.2 Where project requirements cannot be accommodated and clashes occur, negotiations are conducted with project managers and/or supervisory staff to find a compromise satisfactory to all stakeholders

   2.3 Project tasks are accomplished in accordance with project plans and any changes are managed in accordance with the approved project change strategy

   2.4 Project data is captured and recorded in accordance with project requirements

   2.5 Specialist advice and support are provided to project managers, steering committees and stakeholders as required to achieve project objectives

3. Manage progress of multiple projects/activities

   3.1 Project management tools are used for integration and timing of project activities and achievement of project outcomes

   3.2 Risks to progress and achievement of project objectives are anticipated and reported to project management for action in accordance with risk management plans

   3.3 Completion of project activities and progress against targets and milestones are monitored and corrective action is taken if needed, in accordance with project plans and in consultation with project managers

   3.4 Problem solving to find innovative solutions to project problems or unplanned-for contingencies is undertaken in consultation with project management
4. Finalise project activities

<table>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- managing the logistics of dealing with multiple projects/activities, masters and milestones
- managing self, time and costs
- using project management tools
- negotiating changes to timelines, roles and responsibilities
- communicating with project managers and other stakeholders using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- recording information, writing recommendations and preparing reports requiring complex language structures and precision of expression
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on projects and management of the projects, for example:
  - public sector codes of ethics/conduct
  - occupational health and safety and environmental and sustainability standards
  - project governance requirements
  - quality standards
  - risk management
  - procurement
  - financial management
  - human resources
  - equal employment opportunity, equity and diversity principles
  - principles of project management
  - project management tools to suit the combination of projects/activities carried out
  - risk management strategies for carrying out multiple projects
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- **Pre-requisite units** that must be achieved prior to this unit: Nil
- **Co-requisite units** that must be assessed with this unit: Nil
- **Co-assessed units** that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  
  PSPETHC501B Promote the values and ethos of public service
  PSPGOV502B Develop client services
  PSPGOV503B Coordinate resource allocation and usage
  PSPGOV504B Undertake research and analysis
  PSPGOV505A Promote diversity
  PSPGOV507A Undertake negotiations
  PSPGOV512A Use complex workplace communication strategies
  PSPPROC501A Manage contract risk
  PSPPROC502A Establish contract management arrangements
  PSPPROC503A Manage contract performance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- complex project activities carried out in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project management
- workplace project documentation
- scenarios and case studies
- examples of project management tools

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal
EVIDENCE GUIDE

work practice and replicates the range of conditions likely to be encountered when conducting multiple project activities, including coping with difficulties, irregularities and breakdowns in routine

- complex project activities carried out in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments
Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

**Policy and procedures may include**

- government legislation (Federal, State and Local) affecting organisation's administration such as:
  - public sector management acts
  - financial management and accounting legislation and regulations
  - privacy legislation
  - government and organisational guidelines and procedures relating to:
    - project governance
    - resourcing
    - security
    - strategic plans
    - recruitment
    - risk management
    - procurement guidelines
    - designation approvals
    - industrial agreements
    - environmental and sustainability standards

**Project plans will include some or all of**

- acquisition strategies
- budget and financial management strategy
- contract management
- cost estimates
- evaluation criteria
- expected outcomes/measurable benefits of the project

- information/communication strategy
- intellectual property strategies
- milestones
- objectives
- occupational health and safety plan
- outputs/project deliverables and their acceptance criteria
- people plan including human resource management and human
RANGE STATEMENT

resource development
- performance criteria/indicators
- project control mechanisms
- project implementation strategy
- project governance strategy
- purpose
- quality assurance
- quality control
- quality standards for project
- rationale
- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)

**Stakeholders may include**
- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee members
- end user
- supplier/service provider

**Project data may include**
- research data
- quality data including trials or test results
- draft materials
- samples, prototypes, models
- project outcomes
- record of time spent on project and progress in completing project
- correspondence
- financial data including costs, expenditure, income generated, purchases
RANGE STATEMENT

Project management tools may include
- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
  - Gantt and bar charts
  - Program Evaluation and Review Technique (PERT) charts
- Critical Path Method
- cost schedule control system
- logistics support analysis
- life cycle cost analysis
- spreadsheets
- recording systems - electronic and manual

Risk management may include
- removing the risk
- transferring the risk
- minimising the risk
- accepting the risk
- preparing a contingency plan
- keeping reserves

Consultation with project managers may also include
- steering committees
- project sponsors
- business owners of the projects
- program managers
- specialist project management office
- chief executive officer, manager or management representative
- funding body representatives
- customers or clients

Solutions to problems may include
- reducing costs
- researching and applying more efficient methods of completing project tasks
- seeking further resources to meet deadline
- negotiating an extension of deadline or redefining completion or quantities or quality of outcomes
- sharing of ideas to gain improvements to work undertaken within the project
- outsourcing aspects of the project
- changing roles and responsibilities within project team

</tr>
</thead>
</table>
| 1. Identify relevant policy | 1.1 *Work situations* that are shaped by government or organisation policy are identified in accordance with public sector guidelines  
1.2 *Policy* relating to particular work situations is identified and located |
| 2. Implement policy | 2.1 Policy to be implemented is interpreted under direction to identify and plan for change in work practices  
2.2 The implications of policy for individual work practices are identified, and practices are confirmed/adjusted to reflect policy requirements in accordance with organisational procedures  
2.3 Others affected by policy requirements are supported to accommodate those requirements  
2.4 Policy is implemented to support achievement of outcomes intended in specific work areas |
| 3. Monitor and report on policy implementation | 3.1 Information that will assist with the evaluation of the effectiveness of policy implementation is gathered, recorded and reported under direction in accordance with organisational procedures  
3.2 *Information* that will assist with the evaluation of the impact of policy implementation on organisational outcomes is gathered, recorded and reported under direction in accordance with organisational procedures |
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- reading complex and formal documents such as policy and legislation and providing information on their application
- researching and providing information
- preparing written reports requiring accuracy of expression and language and structures suited to the intended audience
- working with legislation drafters and legal advisers
- writing guidelines in plain English
- working as a member of a team to consult on and prepare policy guidelines
- adjusting communication to suit different audiences
- responding to diversity, including gender and disability
- gathering and analysing policy feedback
- accessing policies and legislation electronically or in hard copy
- identifying and addressing the environmental and occupational health and safety implications of policy/s being implemented

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- practices and procedures for developing policy guidelines
- policy feedback mechanisms
- current organisation policies
- whole of government policies and international policy obligations that impact on organisation policy
- organisation and government procedures and protocols
- public sector code/s of ethics and code/s of conduct
- equal employment opportunity, equity and diversity principles
- environmental and occupational health and safety implications of policy/s being implemented
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- **Pre-requisite units** that must be achieved prior to this unit: *Nil*
- **Co-requisite units** that must be assessed with this unit: *Nil*
- **Co-assessed units** that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to, public sector generalist and specialist units in the Certificate IV in Government.

Choice from the following is recommended:

- PSPGOV402B Deliver and monitor service to clients
- PSPGOV403B Use resources to achieve work unit goals
- PSPGOV408A Value diversity
- PSPGOV422A Apply government processes
- PSPREG407B Produce formal record of interview
- PSPREG410B Give evidence
- PSPPROC409A Receive and select offers

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- policy implementation supported in a range of (2 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- relevant policy and legislation
- public sector standards, procedures and protocols
- policy guidelines

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when supporting policy implementation, including coping with difficulties, irregularities and breakdowns in routine
EVIDENCE GUIDE

- policy implementation supported in a range of (2 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

### Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Interpret and advise on public policy | 1.1 *Policy* is analysed and interpretations on its intent and implications are *provided* in accordance with organisational procedures  
1.2 Interpretive advice is provided on the relevant acts, regulations, procedures, codes of practice, standards and guidelines related to policy, in accordance with organisational procedures  
1.3 Written interpretations are provided, supported by defensible evidence and reflect consideration of their intended use and consequences in accordance with legislative requirements  
1.4 Policy advice is communicated in a manner that addresses the requirements of users  
1.5 Policy questions referred by policy staff are resolved or consultative mechanisms are used to gain additional clarification or opinions |
| 2. Provide input to policy evaluation and review | 2.1 Policy feedback data is captured and analysed to identify strengths, weaknesses, and any implementation issues in accordance with organisational requirements  
2.2 Both planned and unintentional outcomes of policy implementation are analysed and feedback is provided against the evaluation criteria in the policy implementation plan  
2.3 A comparison of the intended versus actual outcomes of policy implementation is prepared and provided in accordance with organisational procedures  
2.4 The internal and external environments are monitored for policy implications, and strategies are prepared to respond to potential or impending *policy changes* in accordance with organisational requirements  
2.5 Recommendations for continuous improvement, termination or succession of policies are prepared in accordance with organisational requirements |
Required Skills and Knowledge

REQUiRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements
Look for evidence that confirms skills in:
- reading and evaluating complex and formal documents such as policy and legislation
- researching, analysing and presenting information
- preparing written reports requiring precision of expression and language and structures suited to the intended audience
- working as a member of an inter-agency team to consult on and validate policy
- adjusting communication to suit different audiences
- responding to diversity, including gender and disability
- dealing with different points of view and dissenting stakeholders
- accessing policies and legislation electronically or in hard copy
- identifying and addressing the environmental and occupational health and safety implications of policy/s being developed

Knowledge requirements
Look for evidence that confirms knowledge and understanding of:
- policy development processes and practices in the public sector
- current policies underpinning the work area
- government procedures and protocols
- public sector code/s of ethics and code/s of conduct
- principles of community engagement in policy development
- equal employment opportunity, equity and diversity principles
- environmental and occupational health and safety implications of policy/s being developed
Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- **Pre-requisite unit**: that **must** be achieved **prior** to this unit: Nil
- **Co-requisite unit**: that **must** be assessed with this unit: Nil
- **Co-assessed units**: that **may** be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPMNGT604B Manage change
  - PSPMNGT605B Manage diversity
  - PSPMNGT606B Manage quality client service
  - PSPMNGT608B Manage risk
  - PSPOHS602A Manage workplace safety
  - PSPPROC602B Direct the management of contracts

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- provision of policy advice in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- public sector policy and legislation
- public sector standards, procedures and protocols
- precedents for policy interpretation
- policy evaluation guidelines

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when advising on policy, including coping with difficulties, irregularities and breakdowns in routine
- provision of policy advice in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as
EVIDENCE GUIDE

literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments
Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in italics in the Performance Criteria is explained here.

Policy may include

- public policy
- public sector policy
- central agency policy
- organisation policy relevant to any aspect of an organisation's business, such as policies relating to:
  - core business
  - client services
  - business structure
  - human resources
  - administration
  - financial management
  - work practices
  - training
  - information technology
  - technical/professional requirements
  - legal requirements

Policy advice may be provided to

- government
- Ministers
- other public sector organisations
- community groups
- the public
- policy developers
- internal policy staff
- other staff

Consultative mechanisms may include

- discussion with other policy managers
- seeking clarification from the policy developer
- seeking legal opinion
- workplace consultative committees

Policy changes may be caused by

- machinery of government changes
- a shift to designing policy around a set of government priorities not organisational structures/individual agencies
- a focus on whole of government policies
- changes to legal risks
RANGE STATEMENT

- emphasis on policy research focused on the mid to long term, as well as that developed to meet immediate needs of government
- national or international events such as:
  - change in government
  - changes in government policy
  - changes in strategic direction
  - changes in legislation
  - changes in the policies of other governments
  - changing social trends
  - economic/technological change

</table>
| 1. Interpret and communicate requirements of policy | 1.1 The expected outcomes of policy implementation are identified and explained to staff in a manner suited to their levels of understanding, experience and *specific needs*  
1.2 *Policy* is interpreted relative to workplace responsibilities and accountabilities  
1.3 The impact on *work activities* of policy implementation is communicated to staff  
1.4 Staff are assisted with the interpretation of policy and its application to their work  
1.5 Policy and its implications are explained to other stakeholders using language and materials to suit their current level of knowledge, experience and specific needs |
| 2. Implement policy | 2.1 Potential or impending policy changes are identified and strategies are prepared to accommodate and communicate those changes  
2.2 Work plans are prepared in consultation with staff and management to ensure that policy is implemented as intended  
2.3 Staff performance is monitored to ensure that it complies with policy and corrective action is taken as necessary  
2.4 Staff are assisted in adjusting to changes in accordance with their needs and experience |
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- interpreting complex and formal documents such as policy and legislation, and assisting others to apply them in the workplace
- using communication to suit different audiences
- responding to diversity, including gender and disability
- accessing legislation and codes of ethics electronically or in hard copy
- preparing work plans requiring attention to detail and the interpretation and application of complex language and/or concepts
- providing leadership to the workgroup in the interpretation and implementation of policy
- identifying and addressing the environmental and occupational health and safety implications of the policy/s to be implemented

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- range and type of policies relating to the public sector
- public sector code/s of ethics and code/s of conduct
- organisation and government procedures
- equal employment opportunity, equity and diversity principles
- environmental and occupational health and safety implications of policy/s being implemented
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- Pre-requisite units that must be achieved prior to this unit: Nil
- Co-requisite units that must be assessed with this unit: Nil
- Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPMNGT604B Manage change
  - PSPMNGT605B Manage diversity
  - PSPMNGT606B Manage quality client service
  - PSPMNGT608B Manage risk
  - PSPOHS602A Manage workplace safety
  - PSPPROC602B Direct the management of contracts

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- management of policy implementation in a range of (2 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- relevant policy and legislation
- public sector standards, procedures and protocols
- policy guidelines

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing the implementation of policy, including coping with difficulties, irregularities and breakdowns in routine
- management of policy implementation in a range of (2 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as
EVIDENCE GUIDE

literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments
Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Specific needs may include

- educational level
- preferred language
- literacy or numeracy
- cultural background
- ethnicity
- gender
- preferred interpersonal approach
- physical ability
- thinking/learning styles
- work experience
- working styles

Policy may include

- government policy
- organisation policy

Work activities may include

- processes
- outcomes
- priorities
- client services
- core business
- service delivery mode/s
- organisational structure

Unit Descriptor

| Unit descriptor                        | This unit covers the expenditure of public monies for simple purchasing that requires simple and routine purchasing tasks to be undertaken under supervision. Goods and services are of low value or low risk, and purchasing is in accordance with government policy, public accountability requirements and organisational procedures. The unit includes planning for and undertaking procurement, and receiving goods and services. In practice, undertaking basic procurement may overlap with other generalist or specialist work activities, such as working effectively in the organisation, upholding the values of public service or local government, complying with legislation, and using resources and financial systems. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | This unit applies to those who undertake purchasing as part of their role, whether as an initiator of a purchase or as an approver. This unit may not be appropriate for those who have a significant role in procurement. |

Licensing/Regulatory Information

**Elements and Performance Criteria Pre-Content**

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. **Plan for basic procurement of goods or services.** | 1.1. *Delegation/limit of authority* for basic procurement of goods or services is confirmed.  
1.2. Procurement requirements are researched, confirmed and clarified as necessary with *relevant personnel*.  
1.3. Most suitable *option for acquiring goods or services* is determined in accordance with legislation, policy and procedures, and value for money considerations.  
1.4. Approval processes for procurement options are identified.  
1.5. *Risk planning* is conducted for the procurement activity in accordance with procedures, delegation and guidelines. |
| 2. **Undertake procurement.** | 2.1. Approvals are obtained as necessary for procurement of goods or services in accordance with organisational policy and procedures.  
2.2. Quotations are obtained if necessary in accordance with legislation, policy and procedures, and any conflict of interest is declared and resolved in accordance with organisational policy and procedures.  
2.3. Suppliers or service providers are assessed and selected on the basis of *best value for money*.  
2.4. Procurement is initiated or orders are placed in accordance with selected procurement option.  
2.5. Procurement is conducted in accordance with the organisation's probity and governance requirements.  
2.6. Procurement is conducted in line with the organisation's *financial management system*. |
| 3. **Receive goods or services.** | 3.1. Goods are received or provision of services is accepted in accordance with procurement requirements.  
3.2. Quality assurance processes are implemented to ensure goods or services meet procurement specifications and outcomes required.  
3.3. Action is taken to resolve non-compliance with specifications within limits of own authority, or is referred according to organisational policy and procedures.  
3.4. Receipt of goods or services is *confirmed* and accounts are processed for payment according to organisational procedures. |
<table>

### Required Skills and Knowledge

#### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- **communication skills to:**
  - write and communicate procurement requirements in unambiguous terms
  - consult and negotiate with providers
  - provide feedback
- **teamwork skills to:**
  - work independently or under direction as appropriate to the situation
  - respond to diversity
  - refer issues to the correct person
- **problem-solving skills to:**
  - assess procurement options and select the most suitable option
  - assess goods and services against specifications
- **initiative and enterprise skills to apply OHS and environmental requirements to basic procurement requirements**
- **planning and organising skills to apply risk-management processes**
- **self-management skills to apply codes of conduct, codes of practice and standards of individual behaviour**
- **learning skills to keep up-to-date with relevant procurement legislation, policies and procedures**
- **technology skills to:**
  - operate organisational IT systems
  - use electronic procurement templates

#### Required knowledge

- **commonwealth, state or territory, and local government procurement guidelines, including environmental purchasing guidelines**
- **organisation's code of conduct, codes of practice and standards of individual behaviour relating to procurement of goods and services, in particular identifying and managing conflict of interest, gifts and inappropriate relationships with providers**
- **procurement options and methods**
- **probity and ethical issues**
- **procedures for receipt and payment of goods or services, including credit card procedures**
- **procurement approval procedures**
- **financial and government accountability requirements**
- **equal employment opportunity, equity and diversity principles**
**REQUIRED SKILLS AND KNOWLEDGE**

- public sector legislation and guidelines, including OHS and environment
## Evidence Guide

**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>Competency must be demonstrated by undertaking basic procurement of goods or services consistently in accordance with legislative and organisational requirements.</th>
</tr>
</thead>
<tbody>
<tr>

## EVIDENCE GUIDE

| quotation evaluation plans, selection reports, credit card purchase documents, approvals obtained, simple budgets, invoices paid, other financial documents and other documentation prepared by the candidate in a range of contexts | feedback from peers or supervisors on actions taken to monitor and review contract performance |

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.

### Guidance information for assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC301B Uphold the values and principles of public service
- PSPGOV301B Work effectively in the organisation
- PSPGOV305B Access and use resources and financial systems
- PSPGOV309A Address client needs
- PSPGOV312A Use workplace communication strategies
- PSPLEGN301B Comply with legislation in the public sector
**Range Statement**

</tr>
<tr>
<td></td>
<td>3.2. Records of disposal activity are maintained for audit and evaluation purposes according to policy and practice.</td>
</tr>
<tr>
<td>4. Evaluate asset disposal.</td>
<td>4.1. Disposal of assets is evaluated against expected outcomes, including forecast market value of assets, and is documented according to policy and guidelines.</td>
</tr>
</tbody>
</table>
## Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

### Required skills

- **communication skills to:**
  - prepare documentation and audit trail for disposed assets
  - communicate and network with a range of audiences, such as clients, suppliers, stakeholders and end users
  - provide feedback

- **teamwork skills to:**
  - work independently or under direction as appropriate to the situation
  - model team leadership approaches if appropriate
  - respond to diversity
  - refer issues to the correct person

- **problem-solving skills to:**
  - read complex, formal documents, such as legislation and guidelines and apply them to asset disposal
  - make judgements to provide maximum return from asset disposal

- **planning and organising skills to:**
  - manage projects relating to asset disposal
  - manage financial and other resources in the context of asset disposal
  - research information about asset disposal

- **self-management skills to:**
  - apply workplace safety and environmental and sustainability procedures in the context of asset disposal
  - apply probity requirements in relation to the disposal of assets

- **learning skills to keep up-to-date with relevant procurement legislation, policies and procedures**

- **technology skills to:**
  - operate organisational IT systems
  - use electronic procurement templates

### Required knowledge

- commonwealth, state or territory, and local government procurement guidelines
- requirements of financial rules and regulations relating to asset disposal
- legal aspects of disposals
- disposal approval processes
- implications of particular contracting agreements for asset disposal
- implications of asset disposal for whole-of-life considerations
**REQUIRED SKILLS AND KNOWLEDGE**

- options for government disposal
- risk management procedures for disposal of assets
- disposal requirements for special categories of assets
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to disposal of assets
- legislation, policy and procedures relating to asset disposal, including occupational OHS, environmental, sustainability and corporate social responsibility considerations
## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>Competency must be demonstrated in the ability to dispose of assets consistently and in accordance with legislative and organisational requirements.</th>

<td>• develop a strategy for the disposal of assets that considers all relevant disposal options</td>
</tr>
<tr>
<td></td>
<td>• develop a disposal strategy, which may be from a template</td>
</tr>
<tr>
<td></td>
<td>• implement a disposal strategy</td>
</tr>
<tr>
<td></td>
<td>• review the disposal activity and make recommendations about improvements that could be implemented in future disposals</td>
</tr>
<tr>
<td></td>
<td>• act within own delegations and refer issues to higher authority when necessary.</td>
</tr>
</tbody>
</table>

### Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.

### Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to disposing of assets
- codes of conduct and codes of practice
- workplace scenarios and case studies relating to a range of procurement activities associated with disposal of assets
- case studies that incorporate dilemmas, and probity requirements relating to disposal of assets.

### Method of assessment

The following assessment methods are suggested:

- questions to assess understanding of relevant legislation and procedures
EVIDENCE GUIDE

- review of strategies and approaches adopted for disposal of assets
- review of disposal plans, plans for disposing of specific classes of assets, budgets, contracts, risk assessments and other documentation prepared by the candidate in a range of contexts
- review of stakeholder engagement approaches adopted by the candidate.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.

**Guidance information for assessment**

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC401A Uphold and support the values and principles of public service
- PSPGOV417A Identify and treat risks
- PSPGOV421A Exercise delegations
- PSPLEGN401A Encourage compliance with legislation in the public sector
- PSPPROC411A Plan procurement
- PSPPROC412A Develop and distribute requests for offers
- PSPPROC413A Select providers and develop contracts
- PSPPROC414A Manage contracts.
**Range Statement**

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Legislation and policies may include: | • Commonwealth or state and territory legislation, including legislation that may apply specifically to disposal activities, such as environmental, hazardous materials, cultural and heritage  
• council rules and by-laws  
• organisational policies and practices  
• probity guidelines |
|---|---|
| Options for disposal may include: | • controlled reclamation  
• public sale  
• auction  
• tenders  
• private treaty  
• trade-in  
• pre-priced sales  
• transfer to another government organisation  
• agents and brokers  
• conversion to training aids  
• destruction  
• transfer to museums  
• donation |
| Special categories of assets may include: | • reusable and recyclable items  
• information technology equipment  
• vehicles  
• heritage and cultural interest items  
• arms and controlled defence and related goods  
• security classified material  
• intellectual property  
• staff housing  
• stores located overseas  
• buildings for removal  
• goods and services forfeited to the government  
• dangerous goods and hazardous materials |
### RANGE STATEMENT

**Stakeholders** may include:

- end users, customers or clients, and sponsors
- current or potential providers or suppliers
- technical or functional experts or advisers
- commonwealth, state or territory, and local government departments
- own organisation
- other public sector organisations
- employees, unions and staff associations
- industry bodies
- local communities
- lobby groups
- special user groups

Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. **Interpret procurement requirements.** | 1.1. Consultation is undertaken with **stakeholders** to determine whether viable alternatives to procurement exist that address identified business need, to define and clarify requirements, and to justify the procurement decision.  
1.2. Scoping of procurement requirements is conducted identifying outcomes, objectives and logistics/supply chain factors.  
1.3. **Market analysis** is conducted to identify factors that may impact on procurement decisions.  
1.4. **Procurement approvals and appropriations** are confirmed for whole-of-life of the activity.  
1.5. **Information on sources of supply** is accessed to determine possible providers and any conflict of interest is identified and resolved.  
1.6. Planned provider contract arrangements are specified in accordance with **legislation, policy and probity requirements**.  
1.7. **Issues and opportunities** are investigated for integration into procurement activity. |
| 2. **Plan procurement activities.** | 2.1. Procurement requirement that meets legislative, policy and probity requirements is outlined from transition to close-out.  
2.2. Opportunities to obtain stakeholder input at all stages of the procurement process are actively planned.  
2.3. **Resource requirements** are confirmed and committed in a timely manner and responsible authorities are nominated.  
2.4. Strategies for briefing potential bidders are included when required, are practical and meet probity requirements of fairness and impartiality, public sector standards and organisational protocols.  
2.5. Consideration is given to environmental and sustainability practices along with corporate social responsibility practices at all stages of the procurement process. |
<p>| 3. <strong>Develop procurement plans.</strong> | 3.1. <strong>Procurement approval documentation</strong> and <strong>procurement plan</strong> are developed and approved which contain relevant detail about the procurement process and desired business outcomes, according to |</p>

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Stakeholders may include: | • end users, customers or clients, and sponsors  
| | • current or potential providers or suppliers  
| | • technical or functional experts or advisers  
| | • commonwealth, state or territory, and local government  
| | • the organisation  
| | • other public sector organisations  
| | • employees, unions and staff associations  
| | • industry bodies  
| | • local communities  
| | • lobby groups and special user groups  
| | • experts, including financial, legal, technical, commercial and probity. |

| Market analysis may include: | • structure of market  
| | • 'players' in the market  
| | • market capability  
| | • market maturity  
| | • market strength  
| | • factors or conditions that may affect supply  
| | • supplier positioning and referencing  
| | • supplier viability analysis  
| | • potential impact of intended contracting activity. |

| Procurement approvals and appropriations may require: | • ministerial authorisation  
| | • compliance with instructions or finance circulars  
| | • CEO or board authorisation  
| | • confirmation by chief financial officer  
| | • delegate approval  
| | • budget approval  
| | • business case approval  
| | • special consideration if they concern:  
| | • long-term travel deals  
| | • long-term computer deals  
| | • long-term lease deals |
## RANGE STATEMENT

| Information on sources of supply may include: | • Yellow Pages  
• buyers guides, supplier brochures and advertisements  
• purchasing contract awareness service  
• suppliers' previous histories and files  
• peer, supplier and customer networks  
• computer-aided purchase of computers  
• newspapers, journals, bulletins or directories  
• government gazettal notices  
• internet. |
| Legislation, policy and probity requirements may include: | • commonwealth or state and territory legislation  
• equal employment opportunity and anti-discrimination law  
• commonwealth, and state or territory government procurement guidelines  
• organisational policies and practices  
• probity guidelines  
• codes of conduct, codes of practice and standards of individual behaviour relating to procurement  
• security and confidentiality  
• risk management  
• environmental, sustainability and corporate social responsibility principles. |
| Issues and opportunities may include: | • risk sharing  
• cost sharing  
• cost escalation  
• intellectual property rights  
• knowledge management  
• corporate knowledge  
• libraries and archives  
• capital equipment and asset ownership  
• value engineering  
• value management  
• innovation  
• continuous improvement  
• future organisational requirements  
• quality  
• whole-of-life considerations  
• organisational integration and cooperation. |
| Resource requirements | • facilities  
• information technology |
### RANGE STATEMENT

| May include: | • personnel  
• budget support equipment  
• use of contractor staff  
• professional service providers  
• risk assessment. |
|---|---|
| **Procurement approval documentation** may include: | • business case  
• justifications  
• delegate submissions. |
| **Procurement plan** may include: | • formal documented procurement plan, either using an organisational template or not using a template  
• procurement strategy  
• acquisition strategy  
• leasing strategy. |
| **Probity risks** may include: | • corruption  
• fraud  
• conflict of interest (actual, perceived or potential)  
• unfair treatment of providers or potential providers  
• misuse of resources  
• misuse of information  
• manipulation of the marketplace. |

| Competency field | Procurement and Contract Management |
PSPPROC412A Develop and distribute requests for offers

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the competencies required to develop and disseminate a request for offers to fulfil procurement requirements. It includes specifying the requirement, developing the formal request for offer documents and developing the offer evaluation plan.

In practice, developing and distributing requests for offers overlaps with other generalist and specialist public sector and local government work activities, such as upholding and supporting the values and principles of public service, identifying and treating risks, exercising delegations, applying government processes, encouraging compliance with legislation in the public sector or local government, planning procurement, selecting providers and managing contracts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | The unit applies to those who plan, prepare and develop formal requests for offers, including those who specialise in procurement. |

Licensing/Regulatory Information

Not applicable.
Pre-Requisites
Not applicable.

Employability Skills Information

| Employability skills | This unit contains employability skills. |

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. **Specify procurement requirement.** | 1.1. Scoping of requirement is undertaken to identify outcomes, objectives and *practical requirements*.  
1.2. Statement of requirement is prepared that meets organisational requirements for format and content and is acceptable to *stakeholders*.  
1.3. Needs of clients, end users and other stakeholders are considered and incorporated into statement of requirement.  
1.4. Procurement outcome is fair to, and achievable by, potential providers.  
1.5. Planned provider contract arrangements are specified according to policy and guidelines.  
1.6. *Standards of performance* and *codes of practice*, incentives, disincentives and performance measures are specified. |
| 2. **Develop request for offers.** | 2.1. *Request for offers* and contractual conditions suitable for procurement activity are developed and clarified with clients, providers and/or experts as necessary.  
2.2. Contractual conditions suitable for procurement activity are developed and clarified with clients, providers and/or experts as necessary.  
2.3. When possible and appropriate, *input* on content of request for offer documents and proposed contractual conditions is obtained from market according to probity requirement of impartiality.  
2.4. Approvals to approach marketplace are obtained according to organisational policy and procedures.  
2.5. Records relating to documenting request, and seeking, processing and closing *offers*, are maintained according to organisational procedures and legal requirements. |
| 3. **Develop offer evaluation plan.** | 3.1. *Offer evaluation plan*, including *criteria for evaluation*, is developed, documented and approved prior to releasing formal request documentation to the market.  
3.2. Where used, *specialist expertise* is arranged to evaluate offers and the structure and membership of evaluation panel.  
3.3. Offer evaluation plan complies with *probity requirements*, in particular impartiality and |

<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 4. Manage distribution and receipt of offers. | 4.1. Request for offers is disseminated according to organisational procedures and guidelines, and public sector standards.  
4.2. Briefings and clarification of information in the request for offer are undertaken as required according to procurement plan, organisational procedures and guidelines, public sector standards and probity requirements of fairness and impartiality.  
4.3. Offers are received according to organisational procedures and guidelines, and public sector standards.  
4.4. Requests for offers and closing offers are disseminated in line with probity issues.  
4.5. Late offers and non-conforming bids are dealt with according to procurement plan and request for offer documentation. |
## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- **Communication skills to:**
  - consult with stakeholders, specialists and providers involving complex oral and written exchanges of information
  - read complex documents, such as contracts, legislation and guidelines
  - write requests for offers, which may include complex style and language expressed in unambiguous terms
  - provide feedback

- **Teamwork skills to:**
  - work independently or under direction as appropriate to the situation
  - model team leadership approaches if appropriate
  - respond to diversity
  - refer issues to the correct person

- **Problem-solving skills to:**
  - apply probity requirements in specifying and developing requests for offers, providing briefings and information, and receiving offers
  - apply OHS requirements (where safety or security may be an issue) when developing requests for offers

- **Initiative and enterprise skills to:**
  - apply the content of complex documents, such as contracts, legislation and guidelines
  - apply OHS, environmental, sustainability and corporate social responsibility practices in the context of developing requests for offers

- **Planning and organising skills to:**
  - manage the release of documents to stakeholders
  - keep up-to-date with relevant procurement legislation, policies and procedures

- **Technology skills to:**
  - operate organisational IT systems
  - use electronic procurement templates

### Required knowledge

- **Commonwealth, state or territory, and local government legislation, policies, practices and guidelines:**
  - relating to requests for offers, including environmental purchasing and corporate social responsibility guidance
  - such as OHS and equity and diversity

<th>EVIDENCE GUIDE</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</td>
</tr>
</tbody>
</table>

## Overview of assessment

Competency must be demonstrated in the development and distribution of requests for offers; performed consistently and in accordance with legislative and organisational requirements.

## Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- consult with stakeholders to develop a specification suited to the particular procurement being completed
- develop request for offer documentation, using templates where available
- develop offer evaluation plans with suitable evaluation criteria and evaluation process, using templates where available
- manage the release of requests for offers to industry
- manage the receipt of responses from industry
- apply probity principles relevant to this stage of the procurement process

### Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.

## Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to procurement of goods and services
- codes of conduct and codes of practice
- workplace scenarios and case studies relating to a range of procurement activities associated with developing and distributing requests for offers
- case studies that incorporate dilemmas, and probity requirements relating to developing and distributing requests for offers

## Method of assessment

The following assessment methods are suggested:

- questions to assess understanding of relevant legislation and procedures
## EVIDENCE GUIDE

- review of strategies and approaches adopted for developing and distributing requests for offers
- review of requests for offers (including specifications), offer evaluation plans, industry briefs, risk assessments and other documentation prepared by the candidate in a range of contexts
- review of stakeholder engagement strategies used by the candidate.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.

### Guidance information for assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC401A Uphold and support the values and principles of public service
- PSPGOV417A Identify and treat risks
- PSPGOV421A Exercise delegations
- PSPLEGN401A Encourage compliance with legislation in the public sector
- PSPPROC411A Plan procurement
- PSPPROC413A Select providers and develop contracts
- PSPPROC414A Manage contracts.
Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Practical requirements may include:
- phases or stages of the procurement activity
- timeframes
- expertise needed
- facilities needed
- software and other tools needed

Stakeholders may include:
- end users, customers or clients, and sponsors
- current or potential providers or suppliers
- technical or functional experts or advisers
- commonwealth, state or territory, and local government
- the organisation
- other public sector organisations
- employees, unions and staff associations
- industry bodies
- local communities
- lobby groups and special user groups

Standards of performance and codes of practice may include:
- value for money
- quality measures
- benchmarks
- milestones and timeframes
- performance indicators
- codes of practice and standards of behaviour

Requests for offers may include invitations to submit:
- tenders
- proposals
- quotations
- expressions of interest

Input may be obtained through:
- exposure of draft request for offer
- request for information
- industry comment process

Offers may include:
- tenders
- written quotations
- proposals
### Requests for offers

Requests for offers may include invitations to submit:

- tenders
- proposals
- quotations
- expressions of interest
- expressions of interest

### Offer evaluation plan

Offer evaluation plan should:

- be consistent with public sector and organisational legislation, policy and guidelines, such as:
  - commonwealth or state and territory legislation, including:
  - equal employment opportunity and anti-discrimination
  - risk management
  - security and confidentiality
  - council rules and by-laws
  - commonwealth, and state or territory government procurement guidelines, including environmental purchasing, access and equity, social justice guidelines
  - organisational policies and practices
  - environmental, sustainability and corporate social responsibility principles
- include practical and measurable criteria for selecting the provider and explanation of process that will be used to make selection

### Criteria for evaluation

Criteria for evaluation may include:

- value for money
- demonstrated capacity to deliver outcomes
- available expertise
- project management expertise to deliver the outcomes on time and within budget
- meeting specific policy requirements, such as buying locally and environmental sustainability
- innovation

### Specialist expertise

Specialist expertise may include:

- financial
- legal
- technical and user representatives
- commercial
- probity
- logistics

### Probity requirements

Probity requirements may include:

- accountability
- transparency
- confidentiality
### Requests for offers

Requests for offers may include invitations to submit:

- tenders
- proposals
- quotations
- expressions of interest

- managing conflict of interest
- impartiality
- are maintained to:
- ensure conformity to processes
- facilitate accountability
- ensure proponents are treated in a fair and equitable manner
- encourage commercial completion
- preserve public and private sector confidence in government processes

### Offers are received:

Offers are received:

- using a variety of forms, including:
  - traditional paper-based tender responses
  - computer disk
  - electronic, such as internet, email, facsimile, and electronic tendering system

- by a variety of delivery methods, including:
  - post
  - courier
  - by hand
  - electronic lodgement

### Probity issues

Probity issues may include:

- equity of access to tender documents
- fairness in provision of information
- decisions about when to accept or reject late tenders
- inappropriate assistance to prepare a tender
- conflict of interest.

# Evidence Guide

## EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

Competency must be demonstrated in the ability to select providers and develop contracts consistently in accordance with legislative and organisational requirements.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- apply recognised offer evaluation methodologies to select a preferred provider
- make provider selections in accordance with the offer evaluation plan, procurement plan and relevant policy and legislation
- work with subject matter experts, such as legal, financial, commercial and technical
- adhere to probity requirements
- make written recommendations about suppliers to delegates and higher management
- act within the scope of own delegations
- keep appropriate records
- debrief relevant stakeholders about their performance.

### Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.

### Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to selecting providers and developing contracts
- codes of conduct and codes of practice
- workplace scenarios and case studies relating to a range of procurement activities associated with selecting providers and developing contracts
- case studies that incorporate dilemmas, and probity requirements relating to selecting providers and developing contracts

### Method of assessment

The following assessment methods are suggested:

- questions to assess understanding of relevant legislation and procedures
## EVIDENCE GUIDE

- review of strategies and approaches adopted for selecting providers and developing contracts
- review of selection reports, approvals and sign-offs, negotiation plans, draft contracts, final contracts, risk assessments and other documentation prepared by the candidate in a range of contexts
- review of stakeholder engagement approaches adopted by the candidate

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.

### Guidance information for assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC401A Uphold and support the values and principles of public service
- PSPGOV417A Identify and treat risks
- PSPGOV421A Exercise delegations
- PSPLEGN401A Encourage compliance with legislation in the public sector
- PSPPROC411A Plan procurement
- PSPPROC412A Develop and distribute requests for offers
- PSPPROC414A Manage contracts.
## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Offers** may include:
- delivery of goods for use or into store
- provision of services
- maintenance agreements
- leasing agreements
- consultancies
- research and development
- infrastructure assets

**Evaluation:**
- must include:
  - processing offers
  - determining value for money
  - checking and investigating
  - collating information
  - comparative statements
  - accountability
  - may include staged procurement

**Probity requirements:**
- may include:
  - accountability
  - transparency
  - confidentiality
  - managing conflict of interest
  - impartiality
- are maintained to:
  - encourage conformity to processes
  - facilitate accountability
  - ensure proponents are treated in a fair and equitable manner
  - encourage commercial completion
  - preserve public and private sector confidence in government processes

**Allocation of business** may include:
- single successful contractor
- multiple successful contractors
- standing offer (panel)
RANGE STATEMENT

- multiple contracts as a result of a single request for offer

**Contracts** may include:
- memoranda of understanding and memoranda of agreement
- in-house option directives
- common use arrangements and standing offers
- inter and intra-government agreements
- service level agreements
- deeds of agreement

Unit Descriptor

| Unit descriptor | This unit covers the ability to manage contracts. It includes undertaking preparations, establishing and maintaining contract management arrangements, monitoring and maintaining contract performance, and completing and reviewing contracts. In practice, managing contracts overlaps with other generalist and specialist public sector work activities, such as upholding and supporting the values and principles of public service and local government, identifying and treating risks, exercising delegations, applying government processes, encouraging compliance with legislation in the public sector or local government, planning procurement, developing and distributing requests for offers and selecting providers. Those who specialise in procurement are catered for by the units PSPPROC503B, PSPPROC504B, PSPPROC505A and PSPPROC506A, which address in depth the aspects of contract management performed by those who specialise in procurement. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | This unit applies to those who are not specialist contract managers, but manage contracts as part of their role rather than as their primary role. |
Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information

| Employability skills | This unit contains employability skills. |

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
Elements and Performance Criteria

### Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

- communication skills to:
  - consult and negotiate with contractors and stakeholders, involving complex oral and written exchanges of information
  - network, within probity boundaries, with diverse stakeholders and contractors
  - read complex documents, such as contracts, legislation and guidelines
  - provide feedback
- teamwork skills to:
  - work independently or under direction as appropriate to the situation
  - model team leadership approaches if appropriate
  - respond to diversity
  - refer issues to the correct person
- problem-solving skills to apply simple supply chain management and supplier issues management to the process of contract management
- initiative and enterprise skills to:
  - apply the content of complex documents, such as contracts, legislation and guidelines
  - apply OHS, environmental, sustainability and corporate social responsibility practices in the context of contract management
- planning and organising skills to manage contract documentation
- learning skills to keep up-to-date with relevant procurement legislation, policies and procedures
- technology skills to:
  - operate organisational IT systems
  - use electronic procurement templates

**Required knowledge**

- commonwealth, state or territory, and local government legislation, policies, practices and guidelines:
  - relating to contract management, including environmental purchasing and corporate social responsibility guidance
  - such as OHS and equity and diversity
- organisational procurement policies, practices and approval processes
- contract performance management
- privacy and confidentiality issues
- probity principles and issues
### REQUIRED SKILLS AND KNOWLEDGE

- codes of conduct, codes of practice and standards of individual behaviour relating to managing contracts and relationships with contractors
- whole-of-life considerations relating to the ownership, operation and disposal/completion of the goods or services
- equal employment opportunity
- financial and accounting issues relevant to the contract
## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>Competency must be demonstrated in the ability to manage contracts consistently in accordance with legislative and organisational requirements.</th>
</tr>
</thead>
</table>
| Critical aspects for assessment and evidence required to demonstrate competency in this unit | Assessment must confirm the ability to:  
- develop a contract management strategy in consultation with key stakeholders  
- develop a suitable contract management plan, using templates if available  
- implement the contract management plan  
- manage the performance of contractors  
- provide contractors with performance feedback  
- manage contract disputes to achieve prompt resolution and refer to higher authority when necessary  
- review contracts throughout to identify opportunities for continuous improvement  
- act within own delegations and refer issues to higher authority when necessary  
- uphold probity standards in all dealings with contractors. |

### Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.

### Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:
- legislation, policy, procedures and protocols relating to procuring goods and services and managing contracts  
- codes of conduct and codes of practice  
- workplace scenarios and case studies relating to a range of procurement activities associated with managing contracts  
- case studies that incorporate dilemmas, and probity requirements relating to managing contracts.

### Method of assessment

The following assessment methods are suggested:
### EVIDENCE GUIDE

- questions to assess understanding of relevant legislation and procedures
- review of strategies and approaches adopted for managing contracts
- review of contract management plans, contracts, contract variations, contractor performance reports, contract closure documents and other documentation prepared by the candidate in a range of contexts
- review of stakeholder engagement approaches adopted by the candidate.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.

### Guidance information for assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC401A Uphold and support the values and principles of public service
- PSPGOV417A Identify and treat risks
- PSPGOV421A Exercise delegations
- PSPLEGN401A Encourage compliance with legislation in the public sector
- PSPPROC411A Plan procurement
- PSPPROC412A Develop and distribute requests for offers
- PSPPROC413A Select providers and develop contracts.
## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Contracts** may include:
- memoranda of understanding and memoranda of agreement
- in-house option directives
- common use arrangements/standing offers
- inter and intra-government agreements
- letters of intent
- licensing agreements.

**Specialists** may include:
- procurement and contracting
- corporate finance
- outsourced procurement or contracting advisers
- legal advisers
- functional/business
- technical
- business owner of the contract
- OHS
- environmental
- audit and probity
- appropriate cross-government department experts.

**Stakeholders** may include:
- end users, customers or clients, and sponsors
- current or potential providers or suppliers
- technical or functional experts or advisers
- commonwealth, state or territory, and local government
- the organisation
- other public sector organisations
- employees, unions and staff associations
- industry bodies
- local communities
- lobby groups and special user groups.

**Key contract clauses** may include:
- specifications
- variations
- insurances
- notices
**RANGE STATEMENT**

- disputes
- intellectual property
- privacy
- confidentiality
- milestones
- payments
- breaches
- penalties
- expected standards of behaviour.

**Risks** may include:

- contractor inability to meet agreements
- end user or buyer inability to meet obligations
- limited number of suppliers
- corruption risks
- probity risks.

**Contract management strategy** may include:

- formal contract management plan
- contract management checklist
- setting up routines
- checking quality assurance systems
- transferring legal responsibility
- avoiding implied acceptance of varied conditions through non-enforcement of contractual obligations
- applying environmental, sustainability and corporate responsibility principles.

Contract management strategy may be obtained from:

- procurement/contracting area
- specialist contract managers
- central agencies, such as state supply boards, and contract and management services
- finance area
- legal advisers
- outsourced providers of contracting services.

**Communication strategies** may include:

- setting regular times to talk, meet or check on progress
- protocols for dealing with other stakeholders
- emergency contact arrangements
- diary system to monitor milestones, timeframes, receipt of deliverables, etc.
- strategies for ensuring information flow at critical stages of the contract.

**Monitoring and control measures** may include:

- inspections
- tests
- audits
## RANGE STATEMENT

- reviews
- meetings
- progress reports
- verifications
- identification of non-conformances
- corrective actions.

### Contract variations may include:

- change of scope
- change in prices
- change in quantity
- change to specifications
- negotiation of new terms and conditions
- dissolution of contracts
- in writing
- verbal variations, confirmed in writing
- variations by action/inaction.

### Disputes may include:

- disputes over:
  - requirements
  - delivery schedules
  - price changes
  - additional tasking
  - payment schedules
  - complaints from third parties.

### Techniques available to resolve disputes include:

- conference
- negotiation
- mediation
- expert determination
- arbitration
- resort to contractual conditions
- legal considerations.

### Negotiation of issues may include:

- contract variations
- continuous improvement
- innovations
- non-compliance
- consequences.

### Review may include:

- planning process
- evaluation considerations at each stage of the contract
- sources and methods of gathering data
- role of audit trails, where applicable
- measuring outputs
RANGE STATEMENT

- meeting client needs
- considering new and different ways of delivering the service or product in the future
- strategies for continuous improvement.

Unit Sector(s)
Not applicable.

Competency field

| Competency field | Procurement and Contract Management |
PSPPROC503B Manage contract performance

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the competency required by people whose primary role is contract management to implement strategies that ensure effective contract performance. It includes managing the business relationship, performance of the contract, and contract issues; and implementing a communication strategy.

In practice, managing contract performance may overlap with other public sector and local government generalist and specialist work activities, such as promoting the values and ethos of public service or local government, undertaking negotiations, promoting compliance with legislation in the public sector, finalising contracts, managing procurement risk, planning to manage a contract, planning for procurement outcomes and making procurement decisions.

PSPPROC414A Manage contracts is the appropriate unit for people undertaking contract management as a minor part of their work role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | This unit applies to those who may or may not have had involvement in the procurement process preceding execution of the contract. |

Licensing/Regulatory Information

## Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

### Required skills

- **communication skills to:**
  - consult and negotiate with contractors and stakeholders, involving complex oral and written exchanges of information
  - network, within probity boundaries, with contractors and stakeholders
  - read complex documents, such as contracts, legislation and guidelines
  - write management reports and keep records of meetings, liaison, notes and follow-up actions
  - provide feedback

- **teamwork skills to:**
  - build effective working relationships with contractors and stakeholders, within probity boundaries
  - model effective team management approaches
  - respond to diversity
  - refer issues to the correct person

- **problem-solving skills to:**
  - resolve disputes, conflict and complaints
  - make judgements about when to refer disputes, conflict and complaints to others
  - apply understanding of supplier issues/supply chain management in the context of contract management

- **initiative and enterprise skills to:**
  - apply the content of complex documents, such as contracts, legislation and guidelines
  - apply OHS, environmental, sustainability and corporate social responsibility practices in the context of contract management

- **planning and organising skills to:**
  - manage contract documentation
  - plan and organise contract meetings, reports and reviews

- **learning skills to keep up-to-date with:**
  - best practice examples in procurement practice
  - relevant procurement legislation, policies and procedures

- **technology skills to:**
  - operate organisational IT systems
  - use electronic procurement templates
REQUIRED SKILLS AND KNOWLEDGE

Required knowledge

- commonwealth, state or territory, and local government legislation, policies, practices and guidelines:
  - relating to contract management, including environmental purchasing and corporate social responsibility guidance
  - such as OHS and equity and diversity
- organisational procurement policies, practices and approval processes
- contract management for a range of contractual situations
- privacy and confidentiality issues
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to management of contracts and relationships with contractors
- whole-of-life considerations
- financial and accounting issues relevant to the contract
- legal aspects of negotiation
- aspects of law of contracts, trade practices law and commercial law relevant to the management of contracts relating to complex procurement
- equal employment opportunity relevant to the management of contracts
- OHS requirements relevant to the management of contracts
- environmental, sustainability and corporate social responsibility principles relevant to the management of contracts
## Evidence Guide

**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

Competency must be demonstrated in managing contract performance consistently in accordance with legislative and organisational requirements.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- develop and implement an appropriate contract management plan, using templates where available
- develop and implement an appropriate transition plan, using templates where available
- develop and maintain a sound business relationship with contractors within probity guidelines, upholding probity standards in all dealings with them
- manage contractor performance so that goods and services are delivered according to the contract
- provide the contractor with performance feedback
- deal promptly and proactively with contract issues and disputes and refer to higher authority when this is not possible
- communicate effectively with internal and external stakeholders about the operation of the contract.

### Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.

### Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to procuring goods and services and managing contracts
- codes of conduct and codes of practice
- workplace scenarios and case studies relating to a range of procurement activities associated with managing contract performance
- case studies that incorporate dilemmas and probity requirements relating to managing contract performance.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Probity principles:**
- may include:
  - accountability
  - transparency
  - confidentiality
  - managing conflict of interest
  - impartiality
- are maintained to:
  - ensure conformity to processes
  - facilitate accountability
  - ensure proponents are treated in a fair and equitable manner
  - encourage commercial completion
  - preserve public and private sector confidence in government processes.

**Legislation, policy and public sector standards**
- may include:
  - financial management legislation
  - government procurement, purchasing and contracting legislation, policy and guidelines
  - council rules and by-laws
  - public sector standards
  - codes of conduct, codes of practice and standards of individual behaviour
  - cross-cultural and social justice issues
  - environmental and sustainability policies
  - corporate social responsibility policies.

**Formal and informal mechanisms**
- may include:
  - non-confrontational interaction
  - hospitality
  - formal contract variations
  - formal negotiations
  - formal and informal meetings
  - regular and *ad hoc* reporting
  - review processes.

**Contract management**
- risk management plan
### RANGE STATEMENT

**Plan** may include:
- contingency plan
- communication and public relations plan
- human resource management plan
- disposal plan
- contract review plan
- setting up routines
- quality assurance systems
- arrangements for transfer of legal responsibility
- insurances
- strategies to avoid implied acceptance of varied conditions through non-enforcement of contractual obligations
- environmental/green procurement, sustainability and corporate social responsibility principles.

**Contracts** may include:
- formal written contracts
- standing offers (panels)
- multi-use lists and similar arrangements
- inter and intra-government agreements
- letters of intent
- memoranda of understanding and memoranda of agreement
- licensing agreements
- in-house option directives.

**Risks** may include:
- supplier inability to meet obligations
- end user or buyer inability to meet obligations
- scope creep
- client requirements not fully understood
- becoming too dependent on a single supplier
- disruption to continuity and consistency of service if too many suppliers are selected
- other environmental influences
- corruption risks
- probity risks.

**Variation to agreements** may arise from:
- change of scope
- negotiation of new terms and conditions
- dissolution of contracts
- inability to deliver.

**Early signs of under-performance** may be detected through:
- tracking milestones
- regular meetings
- meeting records and follow-up
# RANGE STATEMENT

- file management and audit trail
- stakeholder surveys on performance
- ongoing review of deliverables.

**Actions taken to improve performance** may include:

- discussion with contractor
- regular interaction
- ongoing performance feedback
- provision of support
- expert advice.

**Disputes** may include:

- disputes over:
  - requirements
  - delivery schedules
  - price changes
  - additional tasking
  - payment schedules
  - complaints from third parties
  - formal and informal.

Techniques available to resolve disputes include:

- conference
- negotiation
- mediation
- arbitration
- resort to contractual conditions
- litigation.

**Negotiation of issues** may include:

- contract variations
- continuous improvement
- innovations
- non-compliance
- consequences.

**Actions** as a result of unresolved conflict may include:

- mediation
- court action
- termination of contract.

**Communication strategies** may include:

- clear communication
- understanding the needs of the service provider and the client
- setting regular times to talk, meet or check on progress
- protocols for dealing with other stakeholders
- emergency contact arrangements
- diary system to monitor milestones, timeframes, receipt of deliverables, etc.
- strategies for ensuring information flow at critical points.

</thead>
</table>
| 1. **Complete contracts.** | 1.1. *Contracts* due to expire are reviewed to determine future requirements, and options for meeting those requirements are canvassed in sufficient time for decision making and transition to occur.  
1.2. Strategies are implemented to manage closure, renewal of contracts, or transition to a new contract according to organisational guidelines, probity requirements and public sector standards.  
1.3. Contracts are finalised, amended, cancelled or terminated according to contractual arrangements.  
1.4. Consultation is undertaken with contractor, and a contract completion report is issued addressing the performance of contractor and contract manager according to organisational requirements and public sector standards. |
| 2. **Implement contract review strategy.** | 2.1. *Timing of contract review* is determined to ensure a smooth transition to post-contract arrangements.  
2.2. *Contract review* is undertaken covering contract management, contractor performance relevant to measures at each stage of the contract, user satisfaction and audit results.  
2.3. Where measures or outcomes are not met in full, variances are documented and explained.  
2.4. Review report is prepared documenting outcomes against plans, final costs, user satisfaction, lessons learnt and any shortcomings in contract planning, management policies and procedures.  
2.5. Recommendations for improvement are made and supported with evidence, as a result of lessons learnt. |
**Required Skills and Knowledge**

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- Communication skills to:
  - Consult and negotiate with contractors and stakeholders, involving complex oral and written exchanges of information
  - Write review and closure reports
  - Make recommendations about improvements to the contract management process
  - Provide feedback

- Teamwork skills to:
  - Model effective team management approaches
  - Respond to diversity
  - Refer issues to the correct person

- Problem-solving skills to finalise outstanding issues so the contract can be closed

- Initiative and enterprise skills to identify improvements to the contract management process of contract management

- Planning and organising skills to:
  - Manage contract closure documentation
  - Plan and organise contract closure meetings, reports and reviews

- Learning skills to keep up-to-date with:
  - Best practice examples in procurement practice
  - Relevant procurement legislation, policies and procedures

- Technology skills to:
  - Operate organisational IT systems
  - Use electronic procurement templates

#### Required knowledge

- Commonwealth, state or territory, and local government legislation, policies, practices and guidelines:
  - Relating to contract finalisation and review, including environmental purchasing and corporate social responsibility guidance
  - Such as OHS and equity and diversity

- Organisational procurement policies, practices and approval processes

- Contract finalisation and review for a range of contractual situations

- Privacy and confidentiality issues, including the requirement to appropriately classify information to ensure transparency as well as to treat bids as commercial-in-confidence
## REQUIRED SKILLS AND KNOWLEDGE

- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to finalising contracts
- information, knowledge management and record keeping for official or historical records
- equal employment opportunity
- financial and accounting issues relevant to the contract
- aspects of contract law, trade practices law and commercial law relevant to the finalisation of contracts relating to complex procurement
# Evidence Guide

**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th><strong>Overview of assessment</strong></th>
<th>Competency must be demonstrated in the ability to finalise contracts consistently in accordance with legislative and organisational requirements.</th>
</tr>
</thead>
</table>
| **Critical aspects for assessment and evidence required to demonstrate competency in this unit** | Assessment must confirm the ability to:  
- develop and implement an appropriate review strategy for contracts that are ending  
- complete relevant contract closure processes  
- ensure appropriate records have been kept  
- apply contract review techniques  
- make written recommendations for improvements to the procurement process based on review results  
- uphold probity standards in all dealings with contractors. |

**Consistency in performance**

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.

| **Context of and specific resources for assessment** | The unit of competency is to be assessed in the workplace or a simulated workplace environment.  
Access may be required to:  
- legislation, policy, procedures and protocols relating to procuring goods and services, and managing and finalising contracts  
- codes of conduct and codes of practice  
- workplace scenarios and case studies relating to a range of procurement activities associated with finalising contracts  
- case studies that incorporate dilemmas, and probity requirements relating to finalising contracts. |
|--------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| **Method of assessment** | The following assessment methods are suggested:  
- questions to assess understanding of relevant legislation and procedures  
- review of strategies and approaches adopted for finalising contracts  
- review of contract management plans, contracts, contract variations, contractor performance reports, contract closure |
## EVIDENCE GUIDE

| Guidance information for assessment | plans, transition plans, risk assessments and other contract finalisation documentation prepared by the candidate in a range of contexts  
- review of stakeholder engagement approaches adopted by the candidate.  

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate. |

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.  

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:  
- PSPETHC501B Promote the values and ethos of public service  
- PSPGOV507A Undertake negotiations  
- PSPLEGN501B Promote compliance with legislation in the public sector  
- PSPPROC503B Manage contract performance  
- PSPPROC505A Manage procurement risk  
- PSPPROC506A Plan to manage a contract  
- PSPPROC507A Plan for procurement outcomes  
- PSPPROC508A Make procurement decisions. |
Range Statement

<table>
<thead>
<tr>
<th>RANGE STATEMENT</th>
</tr>
</thead>
<tbody>
<tr>
<td>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</td>
</tr>
</tbody>
</table>

**Contracts** may include:
- formal written contracts
- standing offers (panels)
- multi-use lists and similar arrangements
- inter and intra-government agreements
- letters of intent
- memoranda of understanding and memoranda of agreement
- licensing agreements
- in-house option directives.

**Timing of contract review** may include:
- periodically throughout the contract
- when performance issues arise
- prior to contract completion
- concurrently with contract renewal process
- after the contract is completed.

**Contract review** may include:
- planning process
- evaluation considerations at each stage of contract
- sources and methods of gathering data
- role of audit trails
- measuring outputs
- key performance indicators and their review
- meeting client needs
- innovation
- strategies for continuous improvement.

**Variances** may include:
- change of scope
- negotiation of new terms and conditions
- strategies for dealing with contractor performance
- dissolution of contract.

PSPPROC506A Plan to manage a contract

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the ability to establish arrangements for contract management. It includes confirming contract requirements, preparing a contract management plan, and implementing contract strategies and contractual arrangements. In practice, planning to manage a contract may overlap with other public sector and local government generalist and specialist work activities, such as promoting the values and ethos of public service or local government, undertaking negotiations, promoting compliance with legislation in the public sector, managing contract performance, finalising contracts, managing procurement risk, planning for procurement outcomes and making procurement decisions. PSPPROC414A Manage contracts is the appropriate unit for people undertaking contract management as a minor part of their work role. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | This unit applies to those whose primary role is contract management, and who may or may not have had involvement in the procurement process preceding execution of the contract. |

Licensing/Regulatory Information
Not applicable.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- **communication skills to:**
  - consult and negotiate with contractors and stakeholders
  - network, within probity boundaries, with contractors and stakeholders
  - develop a written contract management plan and sub-plans
  - read complex documents, such as contracts, legislation and guidelines
  - provide feedback
- **teamwork skills to:**
  - model effective team management approaches
  - respond to diversity
  - refer issues to the correct person
- **problem-solving skills to:**
  - apply OHS requirements in the context of contract management
  - apply understanding of supplier issues and supply chain management in the context of procurement risk management
- **initiative and enterprise skills to:**
  - apply the content of complex documents, such as contracts, legislation and guidelines
  - apply OHS, environmental, sustainability and corporate social responsibility practices in the context of planning for contract management
- **planning and organising skills to manage and update the contract management plan and sub-plans**
- **learning skills to keep up-to-date with:**
  - best practice examples in procurement practice
  - relevant procurement legislation, policies and procedures
- **technology skills to:**
  - operate organisational IT systems
  - use electronic procurement templates

### Required knowledge

- **commonwealth, state or territory, and local government legislation, policies, practices and guidelines:**
  - relating to contract management, including environmental purchasing, sustainability and corporate social responsibility guidance relevant to the contract
  - such as OHS and equity and diversity
### REQUIRED SKILLS AND KNOWLEDGE

- organisational procurement policies, practices and approval processes
- contract management planning for a range of contractual situations
- privacy and confidentiality issues
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to management of contracts and relationships with contractors
- whole-of-life considerations
- financial and accounting issues relevant to the contract
- equal employment opportunity relevant to the contract
- OHS requirements relevant to the contract
## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

Competency must be demonstrated in the ability to plan to manage a contract consistently in accordance with legislative and organisational requirements.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- develop a contract management strategy in consultation with key stakeholders
- develop a contract management plan suited to more complex contracts, using templates if available, which may include sub-plans such as risk, transition and probity
- implement the contract management strategy and the contract management plan
- develop and maintain a sound business relationship with internal and external stakeholders
- manage the performance of contractors to ensure the effective delivery of value for money outcomes under the contract
- manage more complex contract disputes to achieve prompt resolution and refer to higher authority when necessary
- review contract throughout to identify opportunities for continuous improvement
- act within own delegations and refer issues to higher authority when necessary.

### Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.

### Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to procuring goods and services and managing contracts
- codes of conduct and codes of practice
- workplace scenarios and case studies relating to a range of procurement activities associated with planning to manage a contract
- case studies that incorporate dilemmas, and probity

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential italicised conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Legislation, public sector standards and organisational requirements may include: | • financial management legislation  
• government procurement, purchasing and contracting legislation, policy and guidelines  
• ethics standards  
• codes of conduct and codes of practice  
• environmental purchasing. |
| --- | --- |
| **Probity** principles: | • may include:  
• accountability  
• transparency  
• confidentiality  
• managing conflict of interest  
• impartiality  
• are maintained to:  
• ensure conformity to processes  
• facilitate accountability  
• ensure proponents are treated in a fair and equitable manner  
• encourage commercial completion  
• preserve public and private sector confidence in government processes. |
| **Other considerations** may include: | • corporate governance  
• intellectual property  
• privacy  
• freedom of information requirements  
• public liability insurance considerations. |
| **Contracts** may include: | • formal written contracts  
• standing offers (panels)  
• multi-use lists and similar arrangements  
• inter and intra-government agreements  
• letters of intent  
• memoranda of understanding and memoranda of agreement |
## RANGE STATEMENT

<table>
<thead>
<tr>

---
PSPPROC603C Divest strategic assets

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the competencies required to dispose of high risk and high value government assets, such as government businesses, property, strategic infrastructure, intellectual property and other high value items. It includes identifying strategic assets for disposal, developing a disposal plan for divesting strategic assets, divesting the assets and evaluating the divestment activity. In practice, divesting strategic assets may occur in the context of other generalist and specialist work activities, such as maintaining and enhancing confidence in public service or local government, establishing and maintaining strategic networks, managing compliance with legislation in the public service or local government, managing risk, developing a business case, planning for strategic procurement, coordinating strategic procurement, negotiating strategic procurement and managing strategic contracts. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | This unit applies to people who may have to organise or carry out the divestment of strategic assets as part of their role. |

Licensing/Regulatory Information
Not applicable.
### Pre-Requisites

<table>
<thead>
<tr>
<th>Prerequisite units</th>
</tr>
</thead>
</table>

### Employability Skills Information

| Employability skills | This unit contains employability skills. |

### Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. **Identify strategic assets for divestment.** | 1.1. *Strategic assets* are identified and delineated for divestment in accordance with *legislation*, *government objectives*, *policies*, *practice* and probity requirements.  
1.2. Disposal plans developed at the time of purchase are identified and examined.  
1.3. Potential market value of assets is determined and substantiated. |
| 2. **Develop a disposal plan for divesting strategic assets.** | 2.1. Business case to commence the divestment strategy is developed which includes examination of *options* for disposal and explanation of the recommended strategy.  
2.2. Continuing government or organisational obligations post-divestment are identified and strategies are developed to address them.  
2.3. *Disposal plan* is developed.  
2.4. Disposal plan is evaluated and modified prior to approval, if required.  
2.5. *Required approvals* are obtained according to organisational policy and procedures. |
| 3. **Implement disposal plan.** | 3.1. Approved disposal plan is actioned.  
3.2. Business case is developed, based on prices offered and according to disposal plan.  
3.3. Negotiations are conducted and finalised according to the plan. |
| 4. **Evaluate divestment activity.** | 4.1. Disposal plan, immediate outcome of divestment, and long-term outcomes for service provision and government are evaluated.  
4.2. Recommendations are made for future divestment. |
**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

### Required skills

- **Communication skills to:**
  - consult and negotiate with stakeholders
  - network, within probity boundaries, with stakeholders
  - build and manage effective working relationships
  - write business cases, disposal plans, reports, submissions and other complex documents
  - read complex documents, such as contracts, legislation and guidelines
  - provide feedback

- **Teamwork skills to:**
  - manage strategic relationships
  - model effective management and leadership approaches
  - respond to diversity
  - refer issues to the correct person

- **Problem-solving skills to apply decision-making processes or methodologies**

- **Initiative and enterprise skills to:**
  - identify and assess divestment options for strategic assets
  - apply OHS, environmental, sustainability and corporate social responsibility practices in the context of divesting strategic assets

- **Planning and organising skills to manage financial and other resources**

- **Learning skills to keep up-to-date with:**
  - best practice examples in strategic procurement
  - relevant procurement legislation, policies and procedures

- **Technology skills to:**
  - operate organisational IT systems
  - use electronic procurement templates

### Required knowledge

- **Commonwealth, state or territory, and local government legislation, policies, practices and guidelines:**
  - relating to divesting strategic assets
  - such as OHS and equity and diversity, and environment

- **Commonwealth, state or territory, and local government disposal guidelines, policies and practices**

- **Financial rules and regulations relating to divestment of strategic assets**

- **Legal requirements of government strategic asset disposal**
REQUIRED SKILLS AND KNOWLEDGE

- implications of divestment of service provision
- whole-of-life considerations
- disposal approval processes
- probity principles and issues
- codes of practice, codes of conduct and standards of individual behaviour relating to asset divestment
- law of contract relating to strategic asset disposal
- trade practices law relating to strategic asset disposal
- commercial law relating to divesting strategic assets
- environmental, sustainability and corporate social responsibility principles relevant to the disposal of strategic assets
## Evidence Guide

<tr>
<td></td>
<td>• implement a disposal plan</td>
</tr>
<tr>
<td></td>
<td>• review the disposal activity and make recommendations about improvements that could be implemented in future disposals of strategic assets</td>
</tr>
<tr>
<td></td>
<td>• act within own delegations and refer issues to higher authority when necessary.</td>
</tr>
</tbody>
</table>

#### Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.

<table>
<thead>
<tr>
<th>Context of and specific resources for assessment</th>
<th>The unit of competency is to be assessed in the workplace or a simulated workplace environment.</th>

</table>
### EVIDENCE GUIDE

<table>
<thead>
<tr>
<th>Evidence</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>strategic disposal plans, disposal budgets, disposal tender documentation, formal sign-offs and approvals, and other documentation prepared or reviewed by the candidate in a range of contexts</td>
</tr>
<tr>
<td></td>
<td>• review of stakeholder engagement approaches adopted by the candidate.</td>
</tr>
</tbody>
</table>

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Candidates for this qualification must demonstrate a high level of understanding and practical workplace application of underpinning knowledge. Questioning techniques should suit the language and literacy levels of the candidate.

### Guidance information for assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC601B Maintain and enhance confidence in public service
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPMNGT607B Develop a business case
- PSPMNGT608B Manage risk
- PSPMNGT609B Formulate business strategies
- PSPPM601B Direct complex project activities
- PSPPROC606B Negotiate strategic procurement
- PSPPROC607A Manage strategic contracts.
## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Strategic assets** may include:

- property, including housing:
  - listed properties
  - highly polluted properties
  - high-end military equipment
  - strategic infrastructure
  - intellectual property
  - high value items, e.g. computer mainframes
  - government businesses.

**Legislation, government objectives, policies and practice** may include:

- commonwealth, state and territory, and local government legislation and regulations
- council rules and by-laws
- national competition policy
- sectoral or organisational policies on:
  - procurement
  - disposal
  - human resource management
  - severance, transfer and redeployment
  - environmental legislation and policy
  - broad government policies, including Minister's public announcements and party platforms.

**Options** for divestment may include:

- sale of business or business assets
- sale of business with strategic assets leased
- employee buy-out
- tender
- auction.

**Disposal plan** takes account of:

- human resources
- industrial relations issues
- service continuity
- government policies
- environmental, sustainability and corporate social responsibility principles.

**Required approvals** may

- Minister

PSPPROC604B Plan for strategic procurement

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the ability to plan for highly complex, innovative, sophisticated and often long-term strategic procurement within established guidelines, policies and procedures. This may involve high-level capability development for government.

Strategic procurement is high risk, often involving political elements. The unit includes conducting a procurement business analysis, defining procurement requirements, and justifying procurement expenditure.

In practice, planning for strategic procurement may occur in the context of other generalist and specialist work activities, such as maintaining and enhancing confidence in public service or local government, establishing and maintaining strategic networks, managing compliance with legislation in the public service or local government, managing risk, developing a business case, coordinating strategic procurement, negotiating strategic procurement and managing strategic contracts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | This unit applies to those in specialist procurement and contracting. |

Licensing/Regulatory Information
Not applicable.
### Pre-Requisites

| Prerequisite units |

### Employability Skills Information

| Employability skills | This unit contains employability skills. |

### Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. **Conduct procurement business analysis.** | 1.1. Organisation’s corporate procurement plan, procurement-related expenditure, associated levels of risk and supply markets are analysed.  
1.2. *Procurement* profile is prepared that identifies past and projected *procurement expenditure* and associated levels of *risk*.  
1.3. *Supply positioning* is undertaken, categorising goods and services by their relative expenditure and difficulty of securing supply, to assist in the development of procurement objectives.  
1.4. *Supplier preferencing* is used to identify how *suppliers* view the organisation as a client.  
1.5. *Other factors likely to affect strategic procurement* are identified and documented according to organisational requirements.  
1.6. Due diligence is undertaken to investigate existing relationships with suppliers, notably coordinated procurement contracts (CPCs) or coordinated procurement opportunities. |
| 2. **Define procurement requirements.** | 2.1. Procurement requirements are determined through consultation and negotiation with *stakeholders* and experts and defined to reflect *organisational needs*.  
2.2. Accountability measures are identified and incorporated into procurement plans according to organisational policy and guidelines.  
2.3. *Appropriations* to fund strategic procurement are obtained in accordance with legislative and organisational policy and procedures.  
2.4. Approvals to address procurement requirements are obtained according to organisational policy and procedures. |
| 3. **Justify procurement expenditure.** | 3.1. Business case is developed with stakeholders to determine viability of proposed procurement expenditure.  
3.2. Reasons for procurement requirement, timeframes and expected whole-of-life costs and benefits are established in the business case.  
3.3. Output specification is developed with stakeholders to assist in achieving procurement outcomes. |
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

**Required skills**

- communication skills to:
  - consult and negotiate with stakeholders
  - network, within probity boundaries, with stakeholders
  - build and manage effective working relationships
  - write business cases, plans, reports, submissions and other complex documents
  - read complex documents, such as contracts, legislation and guidelines
  - provide feedback

- teamwork skills to:
  - manage strategic relationships
  - model effective management and leadership approaches
  - respond to diversity
  - refer issues to the correct person

- problem-solving skills to:
  - apply decision-making processes or methodologies
  - apply understanding of supplier issues and supply chain management in the context of strategic procurement

- initiative and enterprise skills to:
  - identify and assess strategic procurement options and alternatives
  - apply OHS, environmental, sustainability and corporate social responsibility practices in the context of strategic procurement

- planning and organising skills to:
  - undertake research and business analysis
  - manage financial and other resources

- learning skills to keep up-to-date with:
  - best practice examples in strategic procurement
  - relevant procurement legislation, policies and procedures

- technology skills to:
  - operate organisational IT systems
  - use electronic procurement templates

**Required knowledge**

- commonwealth, state or territory, and local government legislation, policies, practices and guidelines:
  - relating to strategic procurement
## REQUIRED SKILLS AND KNOWLEDGE

- such as OHS and equity and diversity
- organisational procurement policies, practices and approval processes
- aspects of law of contract, trade practices law, and commercial law relating to strategic procurement
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to procurement decisions
- government procurement environment
- legal requirements of government procurement
- implications of particular procurement arrangements
- whole-of-life considerations
- cultural issues relating to strategic procurement and industry development in certain industry sectors
- relationship management at all personnel levels
- environmental, sustainability and corporate social responsibility principles relevant to strategic procurement
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Competency must be demonstrated in the ability to plan for strategic procurement consistently in accordance with legislative and organisational requirements.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- prepare procurement profiles and supplier profiles
- conduct procurement analysis of own organisation's buying requirements
- consult with procurement stakeholders to inform the development of procurement requirements
- use results of procurement analysis to develop procurement requirements
- define strategic procurement requirements
- prepare complex business cases or other documents to justify procurement decisions and expenditure.

Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.

Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to planning for strategic procurement
- codes of conduct and codes of practice
- long-term government policy papers, such as White Papers
- strategic procurement plans and direction statements
- workplace scenarios and case studies relating to a range of strategic procurement and disposal activities.

Method of assessment

The following assessment methods are suggested:

- questions to assess understanding of relevant legislation and procedures
- review of strategies and approaches adopted for planning
## EVIDENCE GUIDE

for strategic procurement
- review of strategic procurement plans, business cases, procurement justifications, budgets, supplier analysis, market analysis, risk assessment, tender documentation, formal sign-offs and approvals, and other documentation prepared or reviewed by the candidate in a range of contexts
- review of stakeholder engagement approaches adopted by the candidate.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Candidates for this qualification must demonstrate a high level of understanding and practical workplace application of underpinning knowledge. Questioning techniques should suit the language and literacy levels of the candidate.

### Guidance information for assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:
- PSPETHC601B Maintain and enhance confidence in public service
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPMNGT607B Develop a business case
- PSPMNGT608B Manage risk
- PSPMNGT609B Formulate business strategies
- PSPPM601B Direct complex project activities
- PSPPROC605B Coordinate strategic procurement
- PSPPROC606B Negotiate strategic procurement
- PSPPROC607A Manage strategic contracts.
Range Statement

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Procurement may include: | • public private partnerships (PPP)  
|                          | • leasing or buying  
|                          | • short-term or long-term arrangements  
|                          | • sole or multiple suppliers  
|                          | • maintenance and support arrangements  
|                          | • incentive contracting  
|                          | • firm or variable pricing regimes  
|                          | • franchising  
|                          | • research and development  
|                          | • pre-qualification of suppliers  
|                          | • standing orders  
|                          | • standard form agreements  
|                          | • common use contracts  
|                          | • facilities management  
|                          | • prime contractor and subcontractor  
|                          | • gain sharing/open book  
|                          | • alliencing  
|                          | • coordinated procurement  
|                          | • whole of government procurement  
|                          | • cooperative procurement. |

| Procurement expenditure may include: | • products purchased  
|                                       | • quantities  
|                                       | • suppliers  
|                                       | • locations  
|                                       | • types, values and volumes of transactions. |

| Risk may include: | • goods and services critical to the organisation  
|                  | • product-related risk  
|                  | • organisation-related risk  
|                  | • supplier-related risk  
|                  | • market-related risk  
|                  | • national security risk |
### Procurement expenditure may include:

- products purchased
- quantities
- suppliers
- locations
- types, values and volumes of transactions.

### Supply positioning results in four categories:

- easy to secure supply and low relative expenditure
- easy to secure supply and high relative expenditure
- difficult to secure supply and low relative expenditure
- difficult to secure supply and high relative expenditure.

### Supplier preferencing may categorise clients as:

- nuisance account
- development potential
- exploitable
- core business.

### Suppliers may include:

- commercial companies
- international companies
- other public sector organisations
- other governments, including commonwealth, state or territory, local and international
- non-profit organisations
- in-house.

### Other factors likely to affect strategic procurement may include:

- value of business involved
- complexity of marketplace
- capacity of market
- strategic and tactical issues
- political influence
- political imperatives and strategies
- budgetary constraints
- collaborative arrangements
- Australian industry involvement requirements
- environmental issues
- extent of competition
- protection of both parties
- value for money considerations
- degree of dependency of organisation programs on the procurement
- where and why the need arises and for which unit or location
- level of risk, complexity and sensitivity of the procurement
### Procurement expenditure may include:
- products purchased
- quantities
- suppliers
- locations
- types, values and volumes of transactions.

### Stakeholders may include:
- end users, customers or clients, and sponsors
- current or potential providers or suppliers
- technical or functional experts or advisers
- commonwealth, state or territory, and local government
- international governments
- the organisation
- other public sector organisations
- employees, unions and staff associations
- industry bodies
- local communities
- lobby groups and special user groups.

### Organisational needs may include:
- political directives
- commonwealth, and state or territory, and local government needs
- responses to government White Papers, for example on long-term capability of the public sector to deliver government policy objectives.

### Appropriations may require:
- delegates
- ministerial authorisation
- compliance with instructions or finance circulars
- confirmation by chief financial officer
- special consideration if they concern:
  - long-term travel deals
  - long-term computer deals
**Procurement expenditure** may include:

- products purchased
- quantities
- suppliers
- locations
- types, values and volumes of transactions.

- long-term lease deals
- issuing indemnities.

# Evidence Guide

## EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

Competency must be demonstrated in the ability to coordinate strategic procurement consistently in accordance with legislative and organisational requirements.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- use recognised methodologies to conduct market research and analysis
- undertake activities to influence supply markets, within probity and other guidelines
- undertake industry development activities consistent with government policy
- consider and select procurement methodologies that reflect the complexity and risks of the strategic procurement being undertaken
- develop performance measures for application during the procurement process
- review procurement performance using performance measures
- implement continuous improvement to procurement processes.

### Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.

### Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to coordinating strategic procurement
- codes of conduct and codes of practice
- long-term government policy papers, such as White Papers
- strategic procurement plans and direction statements
- workplace scenarios and case studies relating to a range of strategic procurement and disposal activities.
### EVIDENCE GUIDE

#### Method of assessment

The following assessment methods are suggested:

- questions to assess understanding of relevant legislation and procedures
- review of strategies and approaches adopted for coordinating strategic procurement
- review of strategic procurement plans, supplier analysis, market analysis, market development plans or activities, risk assessments, procurement methodologies or procurement approaches, formal sign-offs and approvals, and other documentation prepared or reviewed by the candidate in a range of contexts
- review of stakeholder engagement approaches adopted by the candidate.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Candidates for this qualification must demonstrate a high level of understanding and practical workplace application of underpinning knowledge. Questioning techniques should suit the language and literacy levels of the candidate.

#### Guidance information for assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC601B Maintain and enhance confidence in public service
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPMNGT607B Develop a business case
- PSPMNGT608B Manage risk
- PSPPM601B Direct complex project activities
- PSPPROC604B Plan for strategic procurement
- PSPPROC606B Negotiate strategic procurement
- PSPPROC607A Manage strategic contracts.
## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Procurement** may include:

- public private partnerships (PPP)
- leasing or buying
- short-term or long-term arrangements
- sole or multiple suppliers
- maintenance and support arrangements
- incentive contracting
- firm or variable pricing regimes
- franchising
- research and development
- pre-qualification of suppliers
- standing orders and deeds of standing orders
- standard form agreements
- common use contracts
- facilities management
- prime contractor and subcontractor
- gain sharing/open book
- coordinated procurement
- whole of government procurement
- cooperative procurement.

**Commercial and policy factors** may include:

- value or market share of business involved
- complexity of marketplace
- degree of dependency of organisation programs on the procurement
- extent of competition
- capture and assessment of identified risks
- protection of both parties
- value for money
- basis of due performance
- broader governmental policies that may affect the market or industry sector
- competitive neutrality
- environmental, sustainability and corporate social responsibility principles.
### Markets may include:
- local
- national
- international
- regional.

### Suppliers may include:
- commercial companies
- other public sector organisations
- other governments, including commonwealth, state or territory, local and international
- non-profit organisations
- in-house.

### Criteria for assessment of supplier capability may include:
- financial viability/capacity, including insurances
- past performance and infrastructure
- skills and experience of key personnel
- quality accreditations
- earned value performance management
- adequacy of proposed methodology and approach
- technical merit of the proposed goods or service
- industrial relations record
- willingness to work towards common goals
- observance and promotion of OHS requirements
- technical and contractual compliance
- compliance with commonwealth, state and territory policies regarding discrimination, workplace relations, environmental, sustainability and corporate social responsibility
- compliance with codes of conduct, codes of practice and expected standards of behaviour.

### Market development strategies may include:
- market management, including development of key supply markets where these markets are not meeting the organisation's needs
- supplier development, including identification of new local suppliers, development of the capabilities of existing suppliers and development of new products
- reverse marketing
- tactics to increase skill levels of suppliers, particularly in dealing with government
- creating the supplier environment
- communicating changes
- procurement strategies, including splitting contracts, short-term development contracts, inviting companies to work together where each has skills.
**Stakeholders** may include:
- end users, customers or clients, and sponsors
- current or potential providers or suppliers
- technical or functional experts or advisers
- commonwealth, state or territory, and local government
- the organisation
- other public sector organisations
- employees, unions and staff associations
- industry bodies
- local communities
- lobby groups and special user groups.

**Whole-of-life considerations** may include:
- benchmarks of expected financial performance
- calculations of discounted cash flows
- net present value
- return on investment
- transition costs in establishing initial contract
- transition costs in renewing or extending contract
- net return or cost on disposal of assets.

**Teams** may include:
- financial
- legal
- technical
- functional
- engineering
- scientific and research
- human resource
- commercial or business
- consultants.

**Performance measures** may include:
- purchase price reduction
- cost reduction
- value of additional negotiated benefits
- improvement in payment terms
- improved warranties
- cost-saving measures
- new sources of supply
- substitute goods and services
- improved supplier performance
- reduction of demand
- improved access to market information for early identification of supply problems
- improved supply chain efficiencies
- reduction if risk exposure
- improved supplier attitude
eliminating supply monopolies
improved participation of local suppliers.

**Range of procurement activities** may include:

- easy to secure supply and high relative expenditure
- easy to secure supply and low relative expenditure
- difficult to secure supply and low relative expenditure
- difficult to secure supply and high relative expenditure.

PSPPROC606B Negotiate strategic procurement

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the ability to negotiate strategic procurement agreements within established guidelines, policies and procedures. It includes planning and preparing for negotiation, and undertaking and finalising the negotiation process for strategic procurement. In practice, negotiating strategic procurement may occur in the context of other generalist and specialist work activities, such as maintaining and enhancing confidence in public service or local government, establishing and maintaining strategic networks, managing compliance with legislation in the public service or local government, managing risk, developing a business case, planning for strategic procurement, coordinating strategic procurement, and managing strategic contracts. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | This unit applies to those in specialist procurement and contracting. |

Licensing/Regulatory Information
Not applicable.

Pre-Requisites

| Prerequisite units |  |
**Employability Skills Information**

| Employability skills | This unit contains employability skills. |

**Elements and Performance Criteria Pre-Content**

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| **1. Plan and prepare for strategic procurement negotiations.** | 1.1. Input and advice are obtained from key stakeholders and the procurement and negotiating context is identified.  
1.2. Information is gathered on suppliers and a best alternative to negotiating an agreement is developed.  
1.3. Objectives, targets and bottom line position are determined for negotiations.  
1.4. Composition of negotiating team and limits on negotiators’ authority are determined according to organisational policy and procedures.  
1.5. Negotiation process, timeframes and strategies are determined to suit complexity of procurement and supplier characteristics.  
1.6. Negotiation plan/directive is developed that identifies negotiation roles of team members, lead negotiator, negotiating styles, tactics and boundaries/limits of authority to suit the procurement activity.  
1.7. Negotiation plan is authorised and signed off according to organisational policy and procedures. |
| **2. Undertake strategic procurement negotiations.** | 2.1. Negotiations are opened, supplier tactics identified, and issues and options explored to identify mutually compatible interests.  
2.2. Minor and major issues are dealt with and concessions to terms and conditions are negotiated to improve overall value for money of the procurement.  
2.3. Concessions are made such that agreements remain consistent with original intentions and with procurement, organisational objectives and probity requirements.  
2.4. If negotiations stall, tactics are used to break deadlocks and continue negotiations according to negotiation plan and organisational policy and procedures.  
2.5. Negotiations are conducted and an offer is made in accordance with legislative requirements, organisational policy and procurement guidelines. |
| **3. Finalise strategic procurement negotiations.** | 3.1. Negotiations are closed and agreements are finalised according to procurement guidelines.  
3.2. Where agreement is not possible immediately, |
<table>

<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>communication channels are kept open while additional support, arguments and supporting evidence are obtained.</td>
</tr>
<tr>
<td>3.3.</td>
<td>Where agreement is not possible and the best alternative is to be pursued instead, negotiations are terminated in a way that preserves the relationship with the supplier for possible future business and deters the possibility of legal liability.</td>
</tr>
<tr>
<td>3.4.</td>
<td>Where agreements may have wider implications for procurement and the organisation, those implications are considered and necessary consultation is carried out.</td>
</tr>
<tr>
<td>3.5.</td>
<td>Details and outcomes of negotiations are documented according to organisational policy and procedures.</td>
</tr>
</tbody>
</table>
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult and negotiate with stakeholders
  - achieve negotiation outcomes desired by the organisation
  - network, within probity boundaries, with stakeholders
  - build and manage effective working relationships
  - write business cases, plans, reports, submissions and other complex documents
  - read complex documents, such as contracts, legislation and guidelines
  - provide feedback
- teamwork skills to:
  - manage teams of expert negotiators in functions such as finance, legal, technical and engineering
  - manage strategic relationships
  - model effective management and leadership approaches
  - respond to diversity
  - refer issues to the correct person
- problem-solving skills to:
  - identify and apply strategies and tactics for breaking deadlocks during a negotiation
  - apply decision-making processes or methodologies
  - identify and resolve strategic procurement issues
  - apply understanding of supplier issues and supply chain management in the context of strategic procurement
- initiative and enterprise skills to:
  - identify and assess negotiation approaches to yield results
  - apply OHS, environmental, sustainability and corporate social responsibility practices in the context of strategic procurement
- planning and organising skills to:
  - undertake research and business analysis
  - manage financial and other resources
  - manage procurement projects
- learning skills to keep up-to-date with:
  - best practice examples in strategic procurement
  - relevant procurement legislation, policies and procedures
- technology skills to:
REQUIRED SKILLS AND KNOWLEDGE

- operate organisational IT systems
- use electronic procurement templates

Required knowledge

- commonwealth, state or territory, and local government legislation, policies, practices and guidelines:
  - relating to strategic procurement, including environmental purchasing guidance
  - such as OHS and equity and diversity
- organisational procurement policies, practices and approval processes
- aspects of law of contract, trade practices law, and commercial law relating to negotiation of strategic procurement arrangements
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to negotiation
- government procurement environment
- legal requirements of government contracting
- financial rules and regulations
- implications of particular contracting arrangements
- whole-of-life considerations
- cultural issues relating to strategic procurement and industry development
- relationship management at all personnel levels
- environmental, sustainability and corporate social responsibility principles relevant to strategic procurement
# Evidence Guide

## EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

Competency must be demonstrated in the ability to negotiate for strategic procurement consistently in accordance with legislative and organisational requirements.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- prepare negotiation plans (or similar) for strategic procurements
- implement negotiation plans
- respond flexibly, but within the boundaries of the plan, to issues, deadlocks and other situations that arise during negotiations
- finalise strategic procurement negotiations with an agreement that captures the negotiated positions of all parties
- act within own delegations and promptly escalate issues to higher authority when required
- uphold high standards of public sector ethics and behaviour when negotiating with potential suppliers.

**Consistency in performance**

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.

### Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to negotiating strategic procurement
- codes of conduct and codes of practice
- long-term government policy papers, such as White Papers
- strategic procurement plans and direction statements
- workplace scenarios and case studies relating to a range of strategic procurement and disposal activities.

### Method of assessment

The following assessment methods are suggested:

- questions to assess understanding of relevant legislation and procedures
EVIDENCE GUIDE

- review of strategies and approaches adopted for planning for strategic procurement
- review of negotiation process used, negotiation plans, negotiation directives, contracts or other agreements reached, notes from negotiations, risk assessments, formal sign-offs and approvals, and other documentation prepared or reviewed by the candidate in a range of contexts
- review of stakeholder engagement approaches adopted by the candidate.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Candidates for this qualification must demonstrate a high level of understanding and practical workplace application of underpinning knowledge. Questioning techniques should suit the language and literacy levels of the candidate.

Guidance information for assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC601B Maintain and enhance confidence in public service
- PSPGOV601B Apply government systems
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPMNGT607B Develop a business case
- PSPMNGT608B Manage risk
- PSPPM601B Direct complex project activities
- PSPPROC604B Plan for strategic procurement
- PSPPROC605B Coordinate strategic procurement
- PSPPROC607A Manage strategic contracts.
## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Stakeholders may include: | • end users, customers or clients, and sponsors  
|                          | • current or potential providers or suppliers  
|                          | • technical or functional experts or advisers  
|                          | • commonwealth, state or territory, and local government  
|                          | • the organisation  
|                          | • other public sector organisations  
|                          | • employees, unions and staff associations  
|                          | • industry bodies  
|                          | • local communities  
|                          | • lobby groups and special user groups.  |

| Procurement may include: | • public private partnerships (PPP)  
|                          | • leasing or buying  
|                          | • short-term or long-term arrangements  
|                          | • sole or multiple suppliers  
|                          | • maintenance and support arrangements  
|                          | • incentive contracting  
|                          | • firm or variable pricing regimes  
|                          | • franchising  
|                          | • research and development  
|                          | • pre-qualification of suppliers  
|                          | • standing orders  
|                          | • standard form agreements  
|                          | • common use contracts  
|                          | • facilities management  
|                          | • prime contractor and subcontractor  
|                          | • gain sharing/open book  
|                          | • coordinated procurement  
|                          | • whole of government procurement  
|                          | • cooperative procurement.  |

### Procurement and negotiating context may include:

| • nature of procurement in terms of:  
|  • risk  
|  • expenditure  |

---
## RANGE STATEMENT

- complexity
- nature of supply market, such as:
  - fully competitive
  - dominated by a few large suppliers
  - sole supplier
  - unsophisticated suppliers
- rural and remote issues
- one-off negotiation versus need to maintain long-term relationship
- existing relationship with supplier, including:
  - previous negotiations
  - supplier's business approach to government as client
  - state of current relationship
- political or community sensitivities
- skill and experience of negotiating team
- balance of power in the negotiations.

### Negotiating team

- financial
- legal
- technical
- functional
- engineering
- scientific and research
- human resource
- commercial or business.

### Negotiating styles

- competitive
- accommodating
- avoidance
- compromising
- collaborative.

### Terms and conditions

- technical support aspects, such as:
  - warranties
  - life-cycle support
  - maintenance agreements
- financial aspects, such as:
  - deposits
  - payment terms
  - discounts
  - payment schedules
  - travel costs
### RANGE STATEMENT

- cancellation penalties
- risk management aspects
- management information
- government support
- timeframes
- performance incentives and penalties
- general matters, such as subcontracting
- contract price.

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Manage contract establishment. | 1.1. Requirements of *contracts and strategic initiatives* are discussed, clarified and agreed by all parties.  
1.2. Responsibilities for establishing and carrying out procedures are assigned to achieve contract outcomes.  
1.3. Effective communication strategies and processes are established and implemented to assist ongoing communication between internal and external *stakeholders* and contractors.  
1.4. Relationship management is undertaken of all levels of personnel involved in procurement and contract management, within probity boundaries.  
1.5. Strategic relationships are established and managed within probity boundaries to improve procurement capability and performance.  
1.6. Risk management plans are updated according to organisational policy and procedures. |
| 2. Manage contract performance. | 2.1. Progress of contracts is *monitored* against set targets and performance measures to ensure success of procurement activities.  
2.2. Should monitoring find that set targets, performance measures and probity requirements are not being met, action is taken to rectify performance in a timely manner.  
2.3. Advice and support are provided to solve problems, make improvements and maintain progress.  
2.4. Disputes are managed promptly according to contractual conditions to achieve resolution and maintain contract performance and progress.  
2.5. Opportunities to continuously improve procurement outcomes are sought and negotiated with contractors.  
2.6. Approvals are provided or gained for *contract variations* that are negotiated and agreed between the parties.  
2.7. Opportunities are provided for stakeholders and contractors to have input into and receive feedback on progress during the performance of the contract.  
2.8. Internal and external stakeholders are engaged as necessary throughout the life of the contract to maintain progress. |
<p>| 3. Manage contract | 3.1. Evaluation of contract performance is undertaken |</p>

# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- **Communication skills to:**
  - consult and negotiate with stakeholders
  - network, within probity boundaries, with stakeholders
  - build and manage effective working relationships
  - write business cases, plans, reports, submissions and other complex documents
  - read complex documents, such as contracts, legislation and guidelines
  - provide feedback

- **Teamwork skills to:**
  - manage teams of expert negotiators in functions such as finance, legal, technical and engineering
  - manage strategic relationships
  - model effective management and leadership approaches
  - respond to diversity
  - refer issues to the correct person

- **Problem-solving skills to:**
  - apply decision-making processes or methodologies
  - identify and resolve strategic contract management issues
  - apply understanding of supplier issues and supply chain management in the context of managing strategic contracts

- **Initiative and enterprise skills to:**
  - identify, assess and implement opportunities for performance improvement
  - apply OHS, environmental, sustainability and corporate social responsibility practices in the context of managing strategic contracts

- **Planning and organising skills to:**
  - undertake research and business analysis
  - manage financial and other resources
  - manage strategic procurement contracts, contract management plans and sub-plans

- **Learning skills to keep up-to-date with:**
  - best practice examples in strategic procurement
  - relevant procurement legislation, policies and procedures

- **Technology skills to:**
  - operate organisational IT systems
  - use electronic procurement templates
### REQUIRED SKILLS AND KNOWLEDGE

#### Required knowledge

- commonwealth, state or territory, and local government legislation, policies, practices and guidelines:
  - relating to managing strategic contracts, including environmental purchasing guidance
  - such as OHS and equity and diversity
- organisational procurement policies, practices and approval processes
- aspects of law of contract, trade practices law, and commercial law relating to managing strategic contracts
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to management of contracts and relationships with contractors
- government procurement environment
- legal requirements of government contracting
- financial rules and regulations
- implications of particular contracting arrangements
- whole-of-life considerations
- procurement management processes
- cultural issues relating to contract management and industry development
- relationship management at all personnel levels
- environmental, sustainability and corporate social responsibility principles relevant to managing strategic contracts

### Range Statement

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Contracts and strategic initiatives** may include:
- non-traditional procurement and finance activities
- strategic procurement activities, such as industry development
- in-house option directives
- inter and intra-government agreements
- memoranda of understanding and memoranda of agreement
- public private partnerships (PPP)
- purchases from suppliers
- coordinated procurement arrangements
- whole of government procurement arrangements
- cooperative procurement arrangements.

**Stakeholders** may include:
- end users
- customers or clients
- sponsors
- current or potential providers or suppliers
- technical or functional experts or advisers
- commonwealth, state or territory, and local government
- the organisation
- other public sector organisations
- employees, unions and staff associations
- industry bodies
- local communities
- lobby groups and special user groups.

**Monitoring** may involve:
- progress meetings and regular progress reports from contractor
- visits to contractor's premises
- provision of samples
- tests and verification
- independent audit
- end-user feedback.

**Contract variation** may
- targets
- performance measures
**RANGE STATEMENT**

PSPPROC704A Influence and define strategic procurement

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the ability to formulate an organisation's strategic procurement goals and take action to gain support for strategic procurement directions. It includes ensuring that the organisation's strategic procurement direction is aligned with that of the government. In practice, influencing strategic procurement directions may overlap with other public sector or local government generalist and specialist work activities, such as providing strategic direction, influencing strategic policy, leading and influencing ethical practice in the public sector or local government, and undertaking strategic risk management. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | This unit applies to those in specialist procurement and contracting. |

Licensing/Regulatory Information
Not applicable.

Pre-Requisites

| Prerequisite units |  |
**Employability Skills Information**

| Employability skills | This unit contains employability skills. |

**Elements and Performance Criteria Pre-Content**

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. **Formulate strategic procurement goals.** | 1.1. *Procurement direction is determined* through open and ethical consultation with organisation's governing body and *stakeholders*.  
1.2. Strategic procurement goals are formulated that are consistent with organisation's business plan, strategic direction, mission and values, and take into account the requirements, expectations and interests of organisation's governing body and stakeholders.  
1.3. Strategic procurement goals are developed that support the ethos of the organisation and accurately reflect its role in its environment.  
1.4. Strategic procurement *goals are developed* that support and align with the policy expectations of government for the organisation.  
1.5. Strategic procurement goals are reviewed to ensure that opportunities and current and emerging trends are reflected.  
1.6. Strategic procurement goals are used to guide procurement processes that deliver best *value for money*. |
| 2. **Gain support for strategic procurement direction.** | 2.1. Strategic procurement goals are presented to stakeholders in such a way as to gain their support.  
2.2. Where stakeholder interests are in conflict, realistic and rational compromises are found that balance interests and acknowledge concerns.  
2.3. Where less than full support is obtained, consequences for the organisation are identified and steps are taken to minimise potential problems.  
2.4. Ongoing consultation with stakeholders is maintained to ensure support for and ownership of the organisation's strategic procurement goals.  
2.5. Outcomes of the consultation process are recorded and considered before procurement decisions are reached. |
## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- **communication skills to:**
  - consult and negotiate with stakeholders at the highest levels of organisations and the community
  - engage in strategic networking, within probity boundaries, with key stakeholders
  - build and manage effective working relationships
  - convey complex ideas to a wide range of audiences
  - persuade and influence, within probity boundaries, stakeholders and decision makers
  - read, write and approve business cases, plans, reports, submissions and other high level complex documents

- **teamwork skills to:**
  - provide leadership within the organisation
  - manage strategic relationships
  - manage teams of expert negotiators in functions such as finance, legal, technical and engineering
  - respond to diversity
  - refer issues to the correct person

- **problem-solving skills to:**
  - apply decision-making processes or methodologies
  - identify and resolve strategic procurement issues
  - apply understanding of supplier issues and supply chain management in the context of strategic procurement

- **initiative and enterprise skills to:**
  - identify, assess and implement opportunities for performance improvement
  - apply OHS, environmental, sustainability and corporate social responsibility practices in the context of strategic procurement

- **planning and organising skills to:**
  - undertake research and business analysis relating to strategic procurement and high level business issues
  - manage financial and other resources
  - manage strategic procurement systems, processes and policies

- **learning skills to keep up-to-date with:**
  - best practice examples in strategic procurement
  - relevant procurement legislation, policies and procedures
### REQUIRED SKILLS AND KNOWLEDGE

- technology skills to:
  - operate organisational IT systems
  - use electronic procurement templates

### Required knowledge

- commonwealth, state or territory, and local government legislation, policies, practices and guidelines:
  - relating to strategic procurement, including environmental purchasing guidance
  - such as OHS and equity and diversity
- organisational procurement policies, practices and approval processes
- government procurement environment
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to strategic procurement
- financial rules and regulations relating to strategic procurement
- legal requirements of government procurement and contracting
- competition theory as it relates to strategic procurement
- supply chain principles
- strategic industry development
- strategic procurement planning processes
- procurement best practice standards
- equal employment opportunity
- environmental, sustainability and corporate social responsibility principles relevant to strategic procurement
EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

Competency must be demonstrated in the ability to influence and define strategic procurement consistently in accordance with legislative and organisational requirements.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- formulate strategic procurement goals in line with organisation's business direction and government policy imperatives
- reflect the organisation's ethos in its strategic procurement goals
- encourage wide input into the development of strategic procurement goals and direction
- encourage consideration of innovation and new opportunities in procurement direction for the organisation
- publicise organisation's strategic procurement goals and direction
- work effectively with disagreement between stakeholders
- use recognised approaches to gain support for the strategic procurement direction established for the organisation
- demonstrate effective implementation of goals even when full support is not gained.

Candidates for this qualification must demonstrate a high level of understanding of underpinning knowledge and the ability to apply this to practical workplace situations.

### Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to procuring goods and services and managing contracts at the strategic level
- codes of conduct and codes of practice
- long-term government policy papers, such as White Papers
- strategic procurement plans and direction statements
- published performance audits or similar relating to strategic procurement issues
- workplace scenarios and case studies relating to a range of
### EVIDENCE GUIDE

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Determining procurement direction** may be influenced by:

| • stakeholder needs and intentions |
| • end user requirements |
| • government policies |
| • Australian industry involvement requirements |
| • potential provider/supplier base |
| • industry development requirements |
| • disposal of assets |
| • probity requirements |
| • environmental, sustainability and corporate social responsibility issues. |

**Stakeholders** may include:

| • end users |
| • customers or clients |
| • sponsors |
| • potential providers or suppliers |
| • current providers or suppliers |
| • technical or functional experts or advisers |
| • commonwealth, state or territory, and local government |
| • the organisation |
| • other public sector organisations |
| • employees, unions and staff associations |
| • industry bodies |
| • local communities |
| • lobby groups and special user groups. |

**Developed goals:**

| • are challenging, realistic, achievable and measurable |
| • encourage members of the organisation to be creative and innovative within procurement guidelines. |

**Value for money** may include:

<p>| • fitness for purpose |
| • whole-of-life costs |
| • fair and reasonable market prices |
| • timely delivery |
| • post-delivery support |</p>

PSPPROC705A Establish strategic procurement context

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit covers the competencies required to establish the broad context in which strategic procurement takes place. It includes undertaking environmental analysis; analysing, developing and monitoring procurement capability; influencing and developing strategic industries; and establishing and managing risk exposure. It also includes understanding the government and political context for strategic procurement.

In practice, establishing the strategic procurement context may overlap with other public sector generalist and specialist work activities, such as providing strategic direction, influencing strategic policy, leading and influencing ethical practice in the public sector or local government, and undertaking strategic risk management.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | This unit applies to those in specialist procurement and contracting. |

Licensing/Regulatory Information
Not applicable.

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. **Analyze the procurement environment.** | 1.1. Knowledge of the legal, political and financial environment is applied to establish *strategic context*.  
1.2. Relationship between the organisation and its procurement environment is examined and defined.  
1.3. Existing and potential *stakeholders* and their strengths and weaknesses are identified.  
1.4. Strengths, weaknesses, opportunities and threats are identified using information that is up-to-date, reflects emerging and predicted trends, and takes account of the possible future procurement interests and activities of the organisation and government directions.  
1.5. Organisation's procurement strategies and plans are adjusted in light of information gathered, and comparative targets are identified.  
1.6. Any case for possible *collaboration* with other organisations is supported by evidence, analysed for risks, and is consistent with organisational plans and future directions. |
| 2. **Analyze procurement capability.** | 2.1. Organisation's strengths, weaknesses, opportunities and threats are considered in light of internal and/or external *factors* and organisation's strategic procurement goals.  
2.2. Analyses of organisational capability take into account possible future procurement interests and activities of the organisation, its strategic industries, collaborators, requirements of government and other organisations.  
2.3. Suggestions for improvements to existing organisational structures and procurement systems are made that are realistic and achievable and will aid achievement of the procurement mission statement and strategies drawn from both internal and external stakeholders.  
2.4. Consultation on proposed improvements is undertaken with those affected, in time for their views to be taken into account.  
2.5. Proposed improvements are justified on the basis of known internal and external factors, and take into account stakeholder needs and expectations. |
<p>| 3. <strong>Develop and</strong> | 3.1. Improvements to develop <em>procurement capability</em> |</p>

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Candidates for this qualification must demonstrate a high level of understanding and practical workplace application of underpinning knowledge. Questioning techniques should suit the language and literacy levels of the candidate.

**Guidance information for assessment**

Sufficient evidence must be gathered to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- BSBFIM701A Manage financial resources
- BSBINN801A Lead innovative thinking and practice
- BSBREL701A Develop and cultivate collaborative partnerships and relationships
- PSPETHC701A Lead and influence ethical practice in the public sector
- PSPMNGT703A Lead and influence change
- PSPMNGT704A Undertake enterprise risk management
- PSPPROC704A Influence and define strategic procurement direction
- PSPPROC706A Evaluate and improve strategic procurement performance.
## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential italicised conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### Strategic context may include:
- financial
- operational
- competitive
- political
- public perception or image
- social
- cultural
- client
- legal aspects of organisation's functions
- nature of supplier market
- environmental and sustainability issues
- corporate social responsibility.

#### Stakeholders may include:
- end users
- customers or clients
- sponsors
- potential providers or suppliers
- current providers or suppliers
- technical or functional experts or advisers
- commonwealth, state or territory, and local government
- the organisation
- other public sector organisations
- employees, unions and staff associations
- industry bodies
- local communities
- lobby groups and special user groups.

#### Collaboration may include:
- public private partnerships (PPP)
- strategic financing arrangements
- build, own, operate and transfer type arrangements
- cooperative procurement opportunities with other public sector organisations
- lead agency arrangements.

#### Factors may include:
- value of business
### RANGE STATEMENT

- complexity of marketplace
- capacity of market
- supply chain
- political influence
- political imperatives
- budgetary constraints
- collaborative arrangements
- Australian industry involvement requirements
- environmental issues
- extent of competition
- value for money considerations
- degree of dependency of organisation on procurement
- where and why the need arises and for which unit or location
- level of risk, complexity and sensitivity of the procurement
- new capability or replacement/enhancement of existing resources
- intellectual property ownership
- policy requirements or changes, e.g. ethical and social.

PUACOM007B Liaise with other organisations

Modification History
Not applicable.

Unit Descriptor

This unit covers the competency to develop networks and relationships and liaise effectively with other organisations.

Application of the Unit

The application of this unit in the workplace - the environments, complexities and situations involved - will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

This text will be useful for the purposes of job descriptions, recruitment advice or job analysis; where possible, it will not be too job specific to allow other industries to import it into other Training Packages, where feasible.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites

PUACOM005B Foster a positive organisational image in the community (Fire specific)

| **1. Establish networks and relationships** | 1.1 Formal and informal networks are established to support ongoing and future liaisons and collaboration  
1.2 Relationships are developed and used in a way which provides identifiable benefits to the organisation from shared expertise, information and/or resources  
1.3 Participation in regular meetings and forums supports mutual cooperation  
1.4 Consultation with affected and interested parties is undertaken to support the organisational goals and objectives |
| **2. Communicate and interact with other organisations** | 2.1 Information is provided to other organisations in a clear, concise and comprehensive manner  
2.2 Communication with other organisations is conducted in accordance with organisational policy and procedures  
2.3 Information from other organisations is gathered to inform the improvement of services and to avoid duplication of effort |
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- chairing meetings
- networking and developing relationships
- public speaking
- using networks effectively

Required Knowledge

- awareness of role and responsibilities of other organisations
- chairing meetings
- knowledge of current practices and procedures for communicating in the workplace
- meeting protocols and procedures
- organisation's confidentiality requirements
- organisational policy and procedures relating to liaison with other organisations
- role

Evidence Guide

EVIDENCE GUIDE
## EVIDENCE GUIDE

| Critical aspects for assessment and evidence required to demonstrate competency in this unit | It is essential for this unit that competence be demonstrated as follows:  
Networks and relationships developed and used effectively  
All information provided is accurate and clear |
|---|---|

### Consistency in performance
Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

| Context of and specific resources for assessment | Context of assessment  
On the job or in a simulated work environment  
Specific resources for assessment  
No special requirements |
|---|---|

| Guidance information for assessment | Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package. |
**Range Statement**

**RANGE STATEMENT**

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. *Bold italicised* wording in the Performance Criteria is detailed below.

Co-requisite Unit/s  Nil
PUADEFVH001A Conduct recovery vehicle operations in a field environment

Modification History
Not applicable.

Unit Descriptor

Unit Descriptor
This unit covers the competency required to undertake recovery of broken down vehicles and equipment, requiring the operation of specialist recovery vehicles and equipment.

Recovery involves dispatching the recovery vehicle to an incident site, retrieving disabled equipment and moving to a place of repair.

This unit does not cover the extraction of the disabled equipment by winching techniques, which is covered by PUADEFVH002A Extract disabled equipment using winching techniques in a field environment.

Application of the Unit

Application of the Unit
This unit includes the skills and knowledge to lead a small team to recover vehicles and equipment. Specialist recovery vehicles and equipment includes the operation of towing, lifting and winching equipment.

Personnel must be capable of assessing recovery situations in remote environments and tasking personnel to complete operations in isolation from supervision or support.

Licensing/Regulatory Information

<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. **Prepare for recovery tasks** | 1.1 Orders and instructions are received and confirmed  
1.2 *Recovery vehicle and equipment* are checked and prepared for deployment in accordance with *workplace procedures*  
1.3 Resources required for operational tasks are confirmed and organised  
1.4 Recovery crew is briefed on task in accordance with workplace procedures  
1.5 Identified problems/shortfalls are reported to appropriate personnel in accordance with workplace procedures so corrective action can occur prior to deployment  
1.6 Occupational health and safety (OH&S) requirements and recognised safety precautions are applied throughout operation in accordance with standard procedures  
1.7 Environmentally sustainable work practices are identified, assessed and implemented where feasible |
| 2. **Deploy on recovery tasks** | 2.1 Recovery vehicle is deployed to recovery site in accordance with workplace procedures  
2.2 Liaison with disabled equipment stakeholders is conducted to ensure everyone is aware of recovery procedures |
<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 3. Recover disabled equipment | 3.1 *Equipment casualty faults* are diagnosed, where possible, to ensure recovery actions are the most efficient and cost effective  
3.2 Recovery situation is *assessed* in accordance with workplace procedures to determine recovery method  
3.3 *Safety risks associated with recovery task* are assessed and measures to ensure a safe working environment are implemented in accordance with workplace procedures  
3.4 *Briefing of on site personnel* is conducted and tasks are allocated and supervised  
3.5 *Recovery tasks* are completed in accordance with workplace procedures  
3.6 *Minor problems* are dealt with in accordance with workplace procedures  
3.7 *Major incidents* outside scope of own capabilities are reported to appropriate personnel |
| 4. Transport disabled equipment | 4.1 Disabled equipment is secured to recovery vehicle in accordance with manufacturer's instructions and workplace procedures  
4.2 Stability and braking capability of recovery vehicle is tested to ensure it is safe to transport disabled equipment  
4.3 Recovery vehicle is driven to maintenance facility  
4.4 *Unforseen incidents* are managed as they occur |
ELEMENT | PERFORMANCE CRITERIA
--- | ---
5. **Finalise recovery tasks** | 5.1 Equipment casualty is handed over to owner or recovered further in accordance with workplace procedures
| 5.2 Documentation, including reports and returns, are completed in accordance with workplace procedures
| 5.3 Maintenance is supervised and conducted in accordance with workplace procedures
| 5.4 Faulty equipment is reported and actions are taken in accordance with workplace procedures
| 5.5 Recovery crew is debriefed as required
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- allocate appropriate materials and personnel to tasks
- communicate effectively in the workplace
- direct, brief, coordinate and monitor personnel
- interpret instructions and directions
- operate specialist recovery vehicles and equipment
- perform basic mathematical calculations
- solve task specific problems

Required Knowledge

- basic vehicle mechanical principles
- basic engineering principles including:
  - material capabilities
  - theory of levers and pulleys
  - characteristics and capabilities of recovery vehicles and equipment
- functions and responsibilities of team members
- maintenance requirements and procedures
- organisational OH&S procedures relevant to field recovery operations
- recovery methods and procedures
- reporting requirements and procedures
- safety precautions associated with tasks

Evidence Guide

EVIDENCE GUIDE
## EVIDENCE GUIDE

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:
- take into account the characteristics of both the equipment casualty and recovery equipment when determining suitable recovery methods
- perform a lift/tow recovery of a light and a medium/heavy rigid vehicle
- perform a trailer recovery involving a medium/heavy rigid vehicle (or equivalent).

### Consistency in performance

Competency should be demonstrated across a variety of situations within the workplace.

### Context of and specific resources for assessment

**Context of assessment**
Competency should be assessed in a field environment.

**Specific resources for assessment**
Access is required to:
- recovery vehicle, associated equipment and crew
- actual or simulated vehicle/equipment casualties
- specific workplace operating procedures and publications.
Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

| Recovery vehicle and equipment may include | Hand tools |
|                                          | Lifting and recovery equipment |
|                                          | Material handling equipment |
|                                          | Personal protective equipment |
|                                          | Recovery vehicle variants and associated equipment |
|                                          | Workshop equipment |

| Workplace procedures may include | Australian Standards |
|                                | Briefs |
|                                | Duty statements |
|                                | Legislative requirements |
|                                | Manufacturers' handbooks, industry specifications and technical instructions |
|                                | OH&S regulations |
|                                | Organisational policies and procedures |
|                                | Procedure manuals |
|                                | Relevant state/territory or federal legislation |
|                                | Standard operating procedures |
|                                | Written or verbal instructions |

| Equipment casualty faults may include | Damaged driveline |
|                                      | Electrical system faults |
|                                      | Engine/transmission faults |
|                                      | Fuel system faults |

| Assessment of the recovery situation may include | Available resources to conduct recovery |
|                                                | Capabilities of recovery vehicle and equipment |
|                                                | Environmental conditions |
|                                                | Faults within equipment casualty |
|                                                | Size and weight of equipment casualty |

| Safety risks associated with | Environmental conditions |
### RANGE STATEMENT

**recovery tasks may include**

- Equipment failures including:
  - breakage of cables and chains
  - component failure
  - Exhaust fumes
  - Exposure to hazardous substances
  - Fatigue
  - Manual handling of equipment
  - Road hazards
  - Unpredictable reaction to applied force

**Briefing of on site personnel may include**

- Communication procedures
- Emergency procedures
- Recovery method
- Safety requirements

**Recovery tasks may include**

- Lifting
- Towing
- Winching

**Minor problems may include**

- Avoidable damage to equipment casualty during recovery operations
- Minor malfunctions and breakages within recovery equipment
- Unforeseen minor hazards

**Major incidents may include**

- Major malfunctions and/or breakages within recovery vehicles or equipment
- Requirements for recovering equipment casualty exceeding capabilities of recovery vehicle
- Rollover or major damage to equipment casualty
- Serious injuries to on site personnel

**Unforeseen incidents may include**

- Flat tyre
- Loose load
- Loss of load
- Traffic accident
- Vehicle breakdown

PUADEFVH002A Extract disabled equipment using winching techniques in a field environment

Modification History
Not applicable.

Unit Descriptor
This unit covers the competency required to assess equipment and vehicles requiring recovery and to employ suitable winching techniques and procedures to extricate casualties utilising specialist recovery vehicles equipped with motorised winching equipment.

Application of the Unit
This unit applies to the operation of winching equipment capable of extracting a range of vehicles and equipment. Winching may be necessary to extract vehicles and equipment which have become bogged or broken down and due to terrain or environmental factors, cannot be extracted by other means.

Typically, winching operations are conducted by individuals acting independently or in charge of a small team, isolated from assistance or supervision.

Licensing/Regulatory Information

Corequisite Unit/s

Co-requisite Unit/s  Nil
PUAOPE001B Supervise response

Modification History
Not applicable.

Unit Descriptor
This unit covers the competency to supervise a response by a small team to incidents and may include the use of aircraft, which are time critical and/or potentially threatening to life, property or the environment.

The unit includes the competency to proceed to the incident, assess the incident, and plan and implement an operational response and post-response activities.

Application of the Unit
The application of this unit in the workplace - the environments, complexities and situations involved - will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

This text will be useful for the purposes of job descriptions, recruitment advice or job analysis; where possible, it will not be too job specific to allow other industries to import it into other Training Packages, where feasible.

Licensing/Regulatory Information
Not applicable.
Pre-Requisites

Prerequisite Unit/s

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| **1. Receive incident response request** | 1.1 Requests for response are received and dealt with in accordance with *organisational policy* and guidelines  
1.2 Relevant incident information is obtained and assessed to enable personnel to make appropriate preparations  
1.3 An appropriate response is determined according to the type of incident and information available in accordance with organisational policies and procedures  
1.4 The location of the incident and the most appropriate route to the incident are ascertained |
| **2. Proceed to incident** | 2.1 Personnel, equipment and *transport* resources are dispatched promptly, consistent with the nature of the incident and the information available  
2.2 Communication is established and maintained  
2.3 An appropriate route to the incident is followed to minimise response time  
2.4 *En-route hazards* are recognised and negotiated to minimise risk  
2.5 Multi-vehicle response is conducted in accordance with the organisation's procedures |
| **3. Assess the incident** | 3.1 Observations are made en route to assist with *incident* assessments  
3.2 Assigned personnel's arrival at the incident is confirmed according to organisational policies and procedures  
3.3 *Communication* with on-site personnel is established  
3.4 An initial assessment of the incident is carried out promptly  
3.5 *Hazards* or potential hazards are assessed and minimised or controlled  
3.6 Assigned *resources* to deal with the incident are established at the earliest opportunity  
3.7 The need for additional resources is identified and resources requested in accordance with organisational policy and procedures  
3.8 Hazards are monitored during the incidents and changes in the situation acted upon |
<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 4. Plan and implement an operational response to the incident | 4.1 A safe and effective operational environment is established and maintained in accordance with occupational health and safety guidelines and organisation's policies and procedures  
4.2 Incident information is communicated to assigned personnel clearly, accurately and in a timely manner  
4.3 Incident plan is developed based on available information and organisational procedures  
4.4 Strategies and tactics are determined and tasks allocated to appropriate personnel  
4.5 An incident plan is implemented, continually monitored, reported and reviewed in the light of additional information and communicated in accordance with the organisation's policies and procedures  
4.6 Leadership and supervision are provided to ensure that performance and practice are to operational standards  
4.7 Appropriate equipment and materials are deployed to deal with the incident  
4.8 Changes in the incident plan are communicated to relevant personnel and organisations |
| 5. Conclude operation | 5.1 Incident is terminated in accordance with the organisation's procedures  
5.2 Incident records of incident actions and decisions are maintained in accordance with the organisation's requirements  
5.3 Incident assessment is conducted in accordance with the organisation's requirements |
| 6. Supervise post-response activities | 6.1 Equipment cleaning, repair, storage and replenishment is supervised  
6.2 Debriefing requirements are met  
6.3 Post operation reports are prepared to organisation's requirements  
6.4 Welfare of team members is monitored and appropriate action taken |
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse an incident
- assess risks and apply safe work practices
- communicate effectively
- conduct an incident assessment
- conduct briefings and debriefings for aircraft based work
- deploy personnel and equipment to deal with the incident
- for aircraft based work the ability to work in an aircraft for an extended period
- make decisions
- respond promptly to an incident
- use communication equipment

Required Knowledge

- hazards/potential hazards and their effects
- knowledge of current navigational practices to perform navigation
- knowledge of current practices to perform conduct briefings and debriefings
- organisational policies and procedures relating to operations

Evidence Guide

EVIDENCE GUIDE
# EVIDENCE GUIDE

| Critical aspects for assessment and evidence required to demonstrate competency in this unit | It is essential for this unit that competence be demonstrated in implementation of an appropriate strategy to deal effectively with the incident |
| Context of assessment | Consistency in performance |
| Evidence should be gathered over a period of time in a range of actual or simulated workplace environments |

| Context of and specific resources for assessment | Evidence of competent performance should be obtained by observing an individual in responding to and dealing with an actual or simulated incident operation and supplemented by appropriate questions |
| Specific resources for assessment | Assessment of this competency will require access to relevant transport, communication and emergency equipment |

| Guidance information for assessment | Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package |
Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. *Bold italicised* wording in the Performance Criteria is detailed below.

| Incidents may include                       | fires           |
|                                            | public disorder |
|                                            | crime           |
|                                            | flood           |
|                                            | storms          |
|                                            | accident         |
|                                            | hazardous materials incidents |
|                                            | rescues          |

| Transport may include                      | on-road          |
|                                            | off-road         |
|                                            | aviation         |
|                                            | maritime         |

| En route hazards may include               | smoke            |
|                                            | crowds           |
|                                            | traffic          |
|                                            | unauthorised redirection |
|                                            | prevailing weather |
|                                            | road conditions  |
|                                            | terrain          |
|                                            | debris           |
|                                            | tidal flow       |
|                                            | spot fires       |
|                                            | restricted areas |
|                                            | wires            |
|                                            | masts/aerials    |
|                                            | other aircraft   |
|                                            | interference to communications |
### RANGE STATEMENT

| Hazardous conditions may include                                    | adverse weather and fire behaviour  
|                                                                   | after-dark operations               
|                                                                   | difficult terrain                   
|                                                                   | dangerous goods and substances       
|                                                                   | time pressure                       
|                                                                   | level of visibility                  
|                                                                   | structural collapse                  
| Incident assessment may include                                    | type and size of incident           
|                                                                   | risk to life                        
|                                                                   | property and environment             
|                                                                   | hazards/no go areas                  
|                                                                   | climatic and weather conditions      
|                                                                   | capability of assigned personnel     
|                                                                   | adequacy of allocated equipment      
|                                                                   | information gathered from existing plans/databases 
|                                                                   | forecasts and meteorological profiles 
|                                                                   | crowds gathering                     
|                                                                   | installed fire protection            
|                                                                   | type of building                     
|                                                                   | building construction                
|                                                                   | persons trapped                     
|                                                                   | exposures                           
|                                                                   | access                              
| Resources may include                                              | aircraft (rotary and fixed wing)    
|                                                                   | personnel trained for the task       
|                                                                   | specialised personnel                
|                                                                   | protective clothing                  
|                                                                   | equipment                            
|                                                                   | materials                            
|                                                                   | navigation aids                      
|                                                                   | maps                                |
RANGE STATEMENT

aide memoirs
pumps
appliances
specialist appliances

Communications equipment may include
radio (eg VHF aeronautical)
television
computer
facsimile
pager
mobile data terminal
audible alarms/whistles

Communications may include
ground to air
hand signals
distress signal units
whistles
verbal and written instructions
radio
television
mobile phone

Incidents may include
life threatening situations
protection of property and the environment
armed offenders
explosive devices

Incident plan may include
incident objectives or goals
roles and responsibilities of personnel
resource requirements and limitations
communication procedures
strategies and tactics to be employed
contingency arrangements
planning checklists
flight plans
## RANGE STATEMENT

### Welfare of team members may include
- Emergency landing areas for aircraft
- Physical stress
- Physiological stress
- Physical needs such as refreshments
- Fatigue
- Relief

### Organisational policy, procedures, requirements and guidelines may vary between sectors and organisations and may include
- Legislation relevant to the operation/incident/response
- Legislation relevant to the organisation
- Operational
- Corporate and strategic plans
- Operational procedures
- Operational performance standards
- Organisational personnel practices and guidelines
- Organisational quality standards
- Interagency liaison
- Civil Aviation Orders and requirements
- Search and rescue time/procedures/action
- Incident management systems

### When dealing with aircraft response, performance may be affected by
- Task
- Range
- Engine type-piston
- Turbine
- Wing configuration
- Twin/single engine
- Load capacity
- Airstrip length requirements
- Pilot ability
- Weather
- Fire behaviour
- Terrain

### When dealing with aircraft, suitability may be affected
- Visibility
RANGE STATEMENT

by

range
speed
take off capability
communications system availability
pilot local knowledge

When dealing with aircraft, supervising of aircraft management procedures includes

temporary restricted airspace
aircraft separation-vertically and horizontally
height separation
direction
inbound/outbound calls
Fire Common Traffic Advisory Frequency (F-CTAF)

Unit Sector(s)

Not applicable.

Corequisite Unit/s

Co-requisite Unit/sNil
RIIBEF402A Supervise on-site operations

Modification History
Not applicable.

Unit Descriptor
This unit covers the supervision of on-site operations in the resources and infrastructure industries. It includes managing on-site safety, communicating regularly with others, diagnosing and solving routine and non-routine problems, controlling work programs to ensure objectives are met, coordinating work of the team and maintaining operating records. Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors. Relevant information must be sourced prior to application of the unit.

Application of the Unit
This unit is appropriate for those working in a supervisory role or as a technical specialist, at worksites within:
- Civil construction
- Coal mining
- Drilling
- Extractive industries
- Metalliferous mining

Licensing/Regulatory Information
Refer to Unit Descriptor.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.
## Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Manage on-site safety</td>
<td>1.1. Access, interpret and apply compliance documentation relevant to the work activity&lt;br&gt;1.2. Relay safety rules and regulations, legislation and specific site instructions to team&lt;br&gt;1.3. Conduct camp, site and equipment safety audits as required&lt;br&gt;1.4. Identify hazards on worksite&lt;br&gt;1.5. Determine a range of preventative measures for potential work hazards on site&lt;br&gt;1.6. Communicate procedures for the use of personal protective equipment and installed safety equipment clearly to the team&lt;br&gt;1.7. Provide clear instructions to all team in emergency drills and their application&lt;br&gt;1.8. Establish methods for contacting all necessary medical services&lt;br&gt;1.9. Provide site safety and/or equipment safety induction training as required to new personnel and visitors to the worksite&lt;br&gt;1.10. Complete occupational health and safety records for work area accurately in accordance with workplace/company requirements</td>
</tr>
<tr>
<td>2. Communicate regularly with client, team, and other relevant parties</td>
<td>2.1. Brief team and other relevant parties regularly of up to date scope of activities&lt;br&gt;2.2. Maintain a good working relationship with landholder/client&lt;br&gt;2.3. Honour confidentiality clauses in contract&lt;br&gt;2.4. Communicate progress, problems encountered/anticipated and results regularly to client/supervisor as required&lt;br&gt;2.5. Maintain regular communication by radio/telephone or other means to report progress and/or request information or assistance</td>
</tr>
<tr>
<td>3. Diagnose and solve routine and non-routine problems</td>
<td>3.1. Confirm the existence and immediate effects/potential effects of the problem by investigation&lt;br&gt;3.2. Identify a clear and accurate definition of</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>---</td>
<td>---</td>
</tr>
<tr>
<td></td>
<td>the problem</td>
</tr>
<tr>
<td></td>
<td>3.3. Identify the preferred option after an analysis of available information and formulate <strong>action plans</strong></td>
</tr>
<tr>
<td></td>
<td>3.4. Obtain additional equipment, contractors and/or advice as needed</td>
</tr>
<tr>
<td></td>
<td>3.5. Outline any contingency plans</td>
</tr>
<tr>
<td></td>
<td>3.6. Organise alternative duties for teams if problems cause hold-ups in production</td>
</tr>
<tr>
<td></td>
<td>3.7. Implement the preferred option</td>
</tr>
<tr>
<td><strong>4. Control work program to ensure objectives are met</strong></td>
<td>4.1. Monitor work progress regularly and take corrective action if necessary</td>
</tr>
<tr>
<td></td>
<td>4.2. Ensure availability of materials is consistent with work schedules and appropriate to the requirements of the task</td>
</tr>
<tr>
<td></td>
<td>4.3. Allocate specific tasks to make effective use of team</td>
</tr>
<tr>
<td></td>
<td>4.4. Prepare alternative plans if required</td>
</tr>
<tr>
<td></td>
<td>4.5. Implement alternative plans as required to meet work program objectives</td>
</tr>
<tr>
<td><strong>5. Coordinate work of the team</strong></td>
<td>5.1. Make all members of the team aware of their roles and responsibilities in the work plan</td>
</tr>
<tr>
<td></td>
<td>5.2. Set operational targets in consultation with team, and check at regular intervals</td>
</tr>
<tr>
<td></td>
<td>5.3. Provide assistance when requested, to meet operational targets</td>
</tr>
<tr>
<td></td>
<td>5.4. Acquire resources required to support changing work requirements</td>
</tr>
<tr>
<td></td>
<td>5.5. Allot work loads and required resources in accordance with modified work plans</td>
</tr>
<tr>
<td></td>
<td>5.6. Communicate agreed time lines for tasks to team</td>
</tr>
<tr>
<td><strong>6. Maintain operating records</strong></td>
<td>6.1. Determine range of <strong>records</strong>, reports and their required frequency</td>
</tr>
<tr>
<td></td>
<td>6.2. Keep daily running records to facilitate the completion of necessary documentation</td>
</tr>
<tr>
<td></td>
<td>6.3. Complete logs, records and shift reports with numbers, quantities, dates and succinct descriptions</td>
</tr>
<tr>
<td></td>
<td>6.4. Note variations to contract requirements on log and discuss with originator and management if possible</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>---</td>
<td>---</td>
</tr>
<tr>
<td>6.5.</td>
<td>Complete required written <em>reports</em> and submit/distribute</td>
</tr>
<tr>
<td>6.6.</td>
<td>Take accurate measurements as required and record as required</td>
</tr>
</tbody>
</table>

### Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

#### Required skills

Specific skills are required to achieve the performance criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes the ability to carry out the following as required to supervise on-site operations:

- apply legislative, organisation and site requirements and procedures for supervision of on-site operations
- reading and writing ability
- communication ability to train and instruct, receive and pass on information
- hazard identification and risk assessment skills
- delegation and people management skills
- problem solving skills
- record keeping and logging skills
- counselling

#### Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes knowledge of the following as required to supervise on-site operations:

- operational and maintenance procedures
- fault finding and troubleshooting techniques
- team work
- communication systems, processes and procedures (e.g. two way radio)
- graphical representation (e.g. maps, diagrams, and their uses for interpretation and prediction)
- required documentation (e.g. requisition forms, daily log reports)
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Critical aspects for assessment and evidence required to demonstrate competency in this unit</td>
<td>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</td>
</tr>
<tr>
<td></td>
<td>• knowledge of the requirements, procedures and instructions for supervision of on-site operations</td>
</tr>
<tr>
<td></td>
<td>• implementation of requirements, procedures and techniques for the safe, effective and efficient completion of supervision of on-site operations</td>
</tr>
<tr>
<td></td>
<td>• working with others to plan, prepare and conduct on-site operations</td>
</tr>
<tr>
<td></td>
<td>• evidence of the consistent successful supervision of on-site operations</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Context of and specific resources for assessment</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>• This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills.</td>
<td></td>
</tr>
<tr>
<td>• Assessment of this competency requires typical resources normally used in a resources and infrastructure sector environment. Selection and use of resources for particular worksites may differ due to the site circumstances.</td>
<td></td>
</tr>
<tr>
<td>• The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job.</td>
<td></td>
</tr>
<tr>
<td>• Customisation of assessment and delivery environment should sensitively accommodate</td>
<td></td>
</tr>
<tr>
<td>Cultural diversity.</td>
<td></td>
</tr>
<tr>
<td>---------------------</td>
<td></td>
</tr>
<tr>
<td>• Aboriginal people and other people from a non English speaking background may have second language issues.</td>
<td></td>
</tr>
<tr>
<td>• Where applicable, physical resources should include equipment modified for people with disabilities. Access must be provided to appropriate learning and/or assessment support when required.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Method of assessment</th>
</tr>
</thead>
<tbody>
<tr>
<td>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical applications using more than one of the following assessment methods:</td>
</tr>
<tr>
<td>• written and/or oral assessment of the candidate's required knowledge</td>
</tr>
<tr>
<td>• observed, documented and/or first hand testimonial evidence of the candidate's:</td>
</tr>
<tr>
<td>• implementation of appropriate requirements, procedures and techniques for the safe, effective and efficient achievement of required outcomes</td>
</tr>
<tr>
<td>• consistent achievement of required outcomes</td>
</tr>
<tr>
<td>• first hand testimonial evidence of the candidate's:</td>
</tr>
<tr>
<td>• working with others to undertake and complete the supervision of on-site operations</td>
</tr>
<tr>
<td>• provision of clear and timely instruction and supervision by the individual of those involved in the conduct of the on-site operations</td>
</tr>
</tbody>
</table>

<table>

</table>
### Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<table>
<thead>
<tr>
<th>Compliance documentation may include:</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>legislative, organisation and site requirements and procedures</td>
<td></td>

old mine workings
- fishing
- loss of penetration
- sudden loss of pump pressure

**Action plans** to solve problems are prepared according to:
- objectives
- resource requirements
- coordination and feedback requirements
- safety requirements and risk assessment priority requirements
- company operating procedures

**Records** may include:
- daily operations reports
- petty cash records
- records of other purchases, i.e. accounts/credit cards
- time sheets
- plant and vehicle logs
- maintenance records

**Reports** may include:
- operations reports
- evaluation of sites
- evaluation of equipment
- injury and accident reports

RIICBS312A Conduct bitumen tanker operations

Modification History
Not applicable.

Unit Descriptor
This unit covers the conduct of bitumen tanker operations in the civil construction industry. It includes planning and preparing, setting up the tanker for operations, loading tanker, transferring materials, emptying tanker, carrying out operator maintenance, cleaning up. Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors. Relevant information must be sourced prior to application of the unit.

Application of the Unit
This unit is appropriate for those working in an operational role at worksites within:
- Civil construction

Licensing/Regulatory Information
Refer to Unit Descriptor.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Plan and prepare | 1.1. Access, interpret and apply *compliance documentation* relevant to the work activity  
1.2. Obtain and confirm *safety requirements* from the *site* safety plan and organisational policies and procedures, and apply to the allotted task  
1.3. Select plant, *tools and equipment* to carry out tasks consistent with the requirements of the job, check for serviceability and rectify or report any faults  
1.4. Identify, confirm and apply *environmental protection requirements* from the project environmental management plan |
| 2. Set up tanker for operation | 2.1. Carry out pre-operational checks on *bitumen tanker*  
2.2. Fill ancillary tanks and ensure adequate *materials* are available to perform tanker operations  
2.3. Check tanks to prevent contamination  
2.4. Obtain load details, including correct amount of any additives |
| 3. Load tanker | 3.1. Check previous load details for compatibility  
3.2. Load tank with the prescribed amount of material  
3.3. Add and mix additives to specifications  
3.4. Check temperature of the material to ensure compliance with manufacturer’s specifications  
3.5. Measure, calculate and record material quantities and additives  
3.6. Heat materials in accordance with manufacturer’s/suppliers’ instructions |
| 4. Transfer materials | 4.1. Set up transfer site according to Austroads Bitumen Sealing Safety Guide  
4.2. Confirm transfer procedures with depot supervisor/sprayer driver  
4.3. Transfer materials in accordance with organisational procedures  
4.4. Record details of transferred materials |
5. **Empty tanker**
   - 5.1. Empty tank into storage or waste in accordance with environmental plan
   - 5.2. Clean tank interior in accordance with organisation instructions or Austroads Bitumen Sealing Safety Guide

6. **Carry out operator maintenance**
   - 6.1. Inspect for faults in accordance with manufacturer's specifications and organisational requirements
   - 6.2. Carry out routine operational servicing and lubrication tasks
   - 6.3. Maintain equipment condition reports and records

7. **Clean up**
   - 7.1. Clear work area and dispose of or recycle materials in accordance with project environmental management plan
   - 7.2. Clean, check, maintain and store plant, tools and equipment
# Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

## Required skills

Specific skills are required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes the ability to carry out the following, as required to conduct bitumen tanker operations:

- apply legislative, organisation and site requirements and procedures for conducting bitumen tanker operations
- organise work activities
- select and use relevant tools and equipment safely
- identify and report on hazards related to the worksite and work activity
- communicate effectively to receive and clarify work instructions

## Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes knowledge of the following, as required to conduct bitumen tanker operations:

- bituminous materials
- site and equipment safety requirements
- bituminous materials and their characteristics
- processes for heating bitumen
- operational, maintenance and basic diagnostic procedures
- materials safety data sheets and materials handling methods
- treatment for bitumen burns
- quality requirements and environmental systems and standards
- handling and safe use of bitumen hoses
- civil construction terminology
- JSAs/safe work method statements
**Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>

| Context of and specific resources for assessment | • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated |
environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills.

- Assessment of this competency requires typical resources normally used in a resources and infrastructure sector environment. Selection and use of resources for particular worksites may differ due to the site circumstances.
- The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job.
- Customisation of assessment and delivery environment to sensitively accommodate cultural diversity.
- Aboriginal people and other people from a non English speaking background may have second language issues.
- Where applicable, physical resources should include equipment modified for people with disabilities. Access must be provided to appropriate learning and/or assessment support when required.

Method of assessment

This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:

- written and/or oral assessment of the candidate's required knowledge
- observed, documented and/or first hand testimonial evidence of the candidate's:
  - implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes
  - consistent achievement of required outcomes
  - first hand testimonial evidence of the candidate's:

### Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Relevant compliance documentation** may include:

- legislative, organisational and site requirements and procedures
- manufacturer's guidelines and specifications
- Australian standards
- Employment and workplace relations legislation
- Equal Employment Opportunity and Disability Discrimination legislation
- graphical instructions, signage, work schedules/plans/specifications, work bulletins, charts and hand drawings, memos, maps, materials safety data sheet (MSDS) and diagrams or sketches
- safe work procedures or equivalent related to the bitumen tanker operations
- regulatory/legislative requirements pertaining to the bitumen tanker operations
- instructions issued by authorised organisational or external personnel
- relevant Australian standards and Austroads
- AAPA advisory notes and code of practice
- quality requirements including, but not be limited to: dimensions, tolerances, standards of work and material standards as detailed in the project drawings, specifications and project documentation to meet client satisfaction

**Safety requirements** may include:

- OHS requirements in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan, including protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, bitumen hoses, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances
- safe parking practices including ensuring access
ways are clear, equipment or machinery is away from overhangs and refuelling sites, safe distance from excavations, secured from unauthorised movement and in accordance with legal requirements and the Austroads Bitumen Sealing Safety Guide instructions

- safe operating procedures including recognising and preventing hazards associated with traffic, uneven/unstable terrain, poles, underground and overhead services, bridges, buildings, obstructions, structures, facilities, dangerous materials, other machines, personnel, traffic control, working in proximity to others, worksite visitors and the public

- recognising hazards and risks including hazards associated with hot bitumen products, uneven/unstable terrain, trees, fires, overhead and underground services, bridges, building, excavations, traffic, embankments, cuttings, structures and hazardous materials

- emergency procedures related to equipment operation including emergency shutdown and stopping, extinguishing equipment fires, bitumen burns and may include organisational First Aid requirements, evacuation and refinery/depot safety procedures

| Site may include: | • roadways  
| | • car parks  
| | • container yards  
| | • hard stands  
| | • manufacturer's depots and refineries |

| Tools and equipment may include: | • bitumen tankers  
| | • bitumen transfer hoses  
| | • rags, basic tool kits,  
| | • volume correction tables  
| | • earthing equipment  
| | • end shields  
| | • LPG gas bottles  
| | • lighters |

| Environmental protection requirements may include: | • organisational/project environmental management plan  
| | • waste management  
| | • water quality protection  
| | • noise |
Bitumen tanker refers to:
- vehicles which are purpose built, self contained units and have the capability to load, unload, heat, transfer and circulate materials using their own pumping and heating systems
- tankers which may be truck mounted, semi trailers, towed or any other purpose built mechanically operated tanker

Materials may include:
- bitumen
- cutback bitumen and polymer modified binders (PMB)
- kerosene and distillate
- multi-grade bitumen
- bitumen emulsions
- adhesion agents

Unit Sector(s)
Bituminous Surfacing

Competency field

</table>
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

**Required skills**

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to carry out measurements and calculations:

- locate, interpret and apply relevant information
- comply with site safety plan, OHS regulations and State/Territory legislation applicable to workplace operations
- comply with organisational policies and procedures including quality requirements
- complete measurements, calculations and determination of quantities for at least three different projects of varying complexity
- calculate each of the following using a realistic civil construction task for example:
  - length
  - perimeter
  - circumference
  - area
  - volume
  - number
  - ratio
  - percentage
  - conversion of metres to millimetres and millimetres to metres
  - measure using a rule or tape measure five separate tasks within 1mm accuracy
- use operational tools and equipment safely and effectively
- communicate and work effectively and safely with others

**Required knowledge**

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to carry out measurements and calculations:

- site and equipment safety requirements
- measuring, calculating, geometry and determination of quantities
- tolerances
- calculators
- company procedures
- project quality requirements
- communication devices
- processes for care of measuring equipment
- civil construction terminology
- JSA's/Safe work method statement
Evidence Guide

| 1. Identify types of drawings and their functions | 1.1. Identify the main types of plans and drawings used in the industry  
1.2. Identify the key functions of each type of drawing  
1.3. Recognise and adhere to quality requirements of company operations  
1.4. Identify environmental controls from the job plans, specifications and environmental plan |
| 2. Recognise amendments | 2.1. Check title panel to verify latest amendments to drawing  
2.2. Check amendments to specifications to ensure currency of information |
| 3. Recognise commonly used symbols and abbreviations | 3.1. Recognise civil construction symbols and abbreviations  
3.2. Locate and correctly interpret legend on project drawings, symbols and abbreviations |
| 4. Locate and identify key features on a site plan | 4.1. Achieve orientation of the plan with the site  
4.2. Identify and locate key features of the site  
4.3. Gain access to site and identify services, main features, contours and datum |
| 5. Read and interpret job specifications | 5.1. Job specifications are identified from drawings, notes and descriptions  
5.2. Standards of work, finishes and tolerances are identified from the project specifications  
5.3. Material attributes are identified from specifications |
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to read and interpret plans and specifications:

- apply legislative, organisation and site requirements and procedures
- speaking clearly and directly, listening carefully to instructions and information
- applying teamwork to a range of situations, particularly in a safety context
- solving problems such as recognising clear discrepancies between the documents (map, plan, specifications) and the actual site and taking action to correct these
- showing initiative in adapting to changing work conditions or contexts particularly when working across a variety of work areas
- managing time, particularly in organising priorities and planning work
- taking responsibility for self organisation of work priorities
- applying mathematical skills, including basic calculations of heights, areas, volumes and grades
- showing a willingness to learn and to use a range of mediums to learn
- using workplace technology including the use of communication systems and the reporting/recording of results

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to read and interpret plans and specifications:

- features of plans and elevations including direction, scale, key, contours, symbols and abbreviations
- commonly used civil construction symbols and abbreviations
- the processes for application of scales in plan preparation/interpretation
- techniques for orienting/confirming the orientation of a plan
- key features of formal job specifications
- site and equipment safety requirements
- project quality requirements
- basic calculations of heights, areas, volumes and grades
- civil construction terminology
- drawing conventions
- JSA’s/Safe work method statement
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Prepare for work | 1.1. Access, interpret and apply *compliance documentation* relevant to the work activity  
1.2. Obtain and confirm *safety requirements* from the *site* safety plan and organisational policies and procedures, and apply to the allotted task  
1.3. Identify, obtain and implement *signage* requirements from the project *traffic* management plan  
1.4. Select plant, *tools and equipment* to carry out tasks consistent with the requirements of the job, check for serviceability and rectify or report any faults  
1.5. Identify *environmental protection requirements* from the project environmental management plan, and confirm and apply to the allotted task |
| 2. Dig small excavations by hand | 2.1. Confirm the location and specifications of the intended excavation on the ground before commencing work  
2.2. Identify service markers or taped areas  
2.3. Determine or confirm location of *underground services* to avoid damage or interference  
2.4. Use hand tools correctly to dig post holes, small pits and trenches safely and to the required dimensions  
2.5. Undertake trench collapse prevention procedures, where excavation is in unstable ground  
2.6. Place barricades around the *excavation* |
| 3. Complete and isolate the excavation | 3.1. Clean loose material out of excavation using hand tools  
3.2. Check excavation for confirmation with the specification or work instruction |
| 4. Clean up | 4.1. Clear loose material away from the edge of excavation  
4.2. Clear work area and dispose of or recycle materials in accordance with project environmental management plan |
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes the ability to carry out the following, as required to carry out manual excavation:

- apply legislative, organisation and site requirements and procedures for carrying out manual excavation
- organise work activities
- select and use relevant tools and equipment safely
- identify and report on hazards related to the worksite and work activity
- communicate effectively to receive and clarify work instructions

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes knowledge of the following, as required to carry out manual excavation:

- types, uses, limitations and maintenance requirements of manual excavation tools
- basic principles of soil technology for civil works
- basic trench collapse prevention techniques including benching and battering
- site safety requirements
- site isolation and traffic control responsibilities and authorities

cultural diversity.
- Aboriginal people and other people from a non English speaking background may have second language issues.
- Where applicable, physical resources should include equipment modified for people with disabilities. Access must be provided to appropriate learning and/or assessment support when required.

| Method of assessment | This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:
- written and/or oral assessment of the candidate's required knowledge
- observed, documented and/or first hand testimonial evidence of the candidate's:
  - implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes
  - consistent achievement of required outcomes
  - first hand testimonial evidence of the candidate's:
    - working with others to undertake and complete the manual excavation |

| Guidance information for assessment | Consult the SkillsDMC User Guide for further information on assessment including access and equity issues. |
### Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### Relevant compliance documentation may include:
- legislative, organisational and site requirements and procedures
- manufacturer's guidelines and specifications
- Australian standards
- Employment and workplace relations legislation
- Equal Employment Opportunity and Disability Discrimination legislation

#### Safety requirements may include:
- OHS requirements in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan including: protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances
- safe operating procedures including recognising and preventing hazards associated with high voltage power lines, uneven/unstable terrain, trees, overhead service lines, bridges, surrounding buildings, obstructions, structures, facilities, dangerous materials, recently filled trenches, other machines, personnel, traffic control, working at heights, working in proximity to others, worksite visitors and the public
- safe parking practices including ensuring access ways are clear, equipment/machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement
- recognising hazards and risks including uneven/unstable terrain, trees, fires, overhead and underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials
- emergency procedures related to equipment
| **Site conditions may include:** | • dry  
• wet  
• mud  
• dust  
• varying day/night visibility |
| **Signage may include:** | • escort vehicle  
• highway traffic signs  
• site safety signage  
• temporary signage for the benefit of motorists and pedestrians  
• traffic conditions signage |
| **Traffic conditions may include:** | • congested urban environments  
• low traffic rural areas  
• off-road un-trafficked areas  
• buildings  
• parking sites  
• pedestrian areas |
| **Tools and equipment may include:** | • picks  
• crow-bars  
• shovels  
• hand augers  
• string lines  
• pegs  
• levels  
• tape measures  
• jack hammers  
• scabblers |
| **Environmental protection requirements may include:** | • organisational/project environmental management plan  
• waste management  
• water quality protection  
• noise  
• vibration  
• dust and clean-up management |
| **Underground services may include:** | • power  
• water  
• gas  
• telephone |

RIICCM207A Spread and compact materials manually

Modification History
Not applicable.

Unit Descriptor
This unit covers the manual spreading and compacting of materials in the civil construction industry. It includes planning and preparing, conducting compaction machine operational checks, spreading and compacting materials, and cleaning up. Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors. Relevant information must be sourced prior to application of the unit.

Application of the Unit
This unit is appropriate for those working in an operational role at worksites within:
- Civil construction

Licensing/Regulatory Information
Refer to Unit Descriptor.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Plan and prepare | 1.1. Access, interpret and apply *compliance documentation* relevant to the work activity  
1.2. Obtain and confirm *safety requirements* from the site safety plan and organisational policies and procedures, and apply to the allotted task  
1.3. Identify, obtain and implement signage requirements from the project traffic management plan  
1.4. Select plant and *tools and equipment* to carry out tasks consistent with the requirements of the job, check for serviceability and rectify or report any faults  
1.5. Identify *environmental protection requirements* from the project environmental management plan, and confirm and apply to the allotted task |
| 2. Conduct compaction machine operational checks | 2.1. Carry out pre-start, start-up and shutdown procedures in accordance with manufacturer's and/or site specific requirements  
2.2. Check machine controls and functions for serviceability, and rectify or report any faults |
| 3. Spread and compact materials | 3.1. Conduct *basic field identification test* and identify material type  
3.2. Direct trucks to required location for loading/dumping  
3.3. Direct delivered/relocated *materials* to correct location  
3.4. Check manufactured material for segregation  
3.5. Conduct field test to ensure material moisture is suitable  
3.6. Direct machine operator to spread materials to specified levels  
3.7. Finish materials by hand to specified levels  
3.8. Consolidate materials into layers by hand held mechanical compaction equipment  
3.9. Conduct field test to ensure compaction has |
### Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

#### Required skills

Specific skills are required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes the ability to carry out the following, as required to spread and compact materials manually:

- apply legislative, organisation and site requirements and procedures for manually spreading and compacting materials
- organise work activities
- select and use relevant tools and equipment safely
- identify and report on hazards related to the worksite and work activity
- communicate effectively to receive and clarify work instructions

#### Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes knowledge of the following, as required to spread and compact materials manually:

- basic principles of soil technology for civil works
- basic soil compaction theory including the effects of moisture and mechanical interlock
- hand operated mechanical compaction machine types, characteristics, technical capabilities and limitations
- site and equipment safety requirements
- site isolation and traffic control responsibilities and authorities
- project quality requirements
- civil construction terminology
- practical field tests for moisture content, shrinkage and compaction
- JSAs/safe work method statement

---

| Clean up | 4.1. Clear work area and dispose of or recycle materials in accordance with project environmental management plan  
4.2. Clean, check, maintain and store tools and equipment t |

1.5. *Check levelling equipment* for serviceability within specified tolerances, and report any faults  
1.6. Identify *environmental protection requirements* from the project environmental management plan, and confirm and apply to the allotted task |
| 2. Establish offsets for civil works | 2.1. Establish offset and recovery pegs from survey controls to specified plans and drawings to meet project requirements  
2.2. Re-establish earthwork and pavement control lines from offsets and/or recovery pegs in accordance with plans, drawings and specifications  
2.3. Establish drainage offsets from survey control |
| 3. Set up and use levelling device | 3.1. Identify *heights* to be transferred/established from project plans or instructions  
3.2. Set up and use levelling instruments correctly in accordance with standard operating procedures and manufacturer's guidelines  
3.3. Transfer heights from the known to the required  
3.4. Document results of *levelling procedure* and close them out to organisational |
4. Clean up

4.1. Clear work area and dispose of or recycle materials in accordance with project environmental management plan

4.2. Clean, check, maintain and store tools and equipment.

**Required Skills and Knowledge**

This section describes the skills and knowledge required for this unit.

**Required skills**

Specific skills are required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes the ability to carry out the following, as required to carry out basic leveling:

- apply legislative, organisation and site requirements and procedures for carrying out basic levelling
- organise work activities
- select and use relevant tools and equipment safely
- identify and report on hazards related to the worksite and work activity
- communicate effectively to receive and clarify work instructions
- apply basic mathematical techniques associated with levelling

**Required knowledge**

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes knowledge of the following, as required to carry out basic leveling:

- basic civil construction processes
- civil construction plan, symbols and construction terminology
- levelling device types, characteristics, technical capabilities and limitations
- levelling techniques related to essential tasks
- basic mathematical techniques associated with levelling
- site and equipment safety requirements
- site isolation and traffic control responsibilities and authorities
- project quality requirements
- civil construction terminology
- JSAs/safe work method statement

**7.5. Clean screens safely before movement, where applicable** |
|   | **8. Clean up**  
**8.1. Clear work area and dispose of or recycle materials in accordance with project environmental management plan**  
**8.2. Clean, check, maintain and store tools and equipment** |
## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

Specific skills are required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes the ability to carry out the following, as required to carry out concrete work:

- apply legislative, organisation and site requirements and procedures for carrying out concrete work
- organise work activities
- select and use relevant tools and equipment safely
- identify and report on hazards related to the worksite and work activity
- communicate effectively to receive and clarify work instructions

### Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes knowledge of the following, as required to carry out concrete work:

- site and equipment safety requirements
- steel reinforcement characteristics
- concrete characteristics and properties
- concreting principles
- structural technology
- formwork
- equipment types, characteristics, technical capabilities and limitations
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- materials safety data sheet and materials handling methods
- project quality requirements
- civil construction terminology
- JSAs/safe work method statement
### Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>

<tr>
<td>• Where applicable, physical resources should include equipment modified for people with disabilities. Access must be provided to appropriate learning and/or assessment support when required.</td>
<td></td>
</tr>
</tbody>
</table>

**Method of assessment**

This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:

- written and/or oral assessment of the candidate's required knowledge
- observed, documented and/or first hand testimonial evidence of the candidate's:
  - implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes
  - consistent achievement of required outcomes
  - first hand testimonial evidence of the candidate's:
    - working with others to undertake and complete concrete work

**Guidance information for assessment**

Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<table>
<thead>
<tr>
<th>Relevant compliance documentation may include:</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>• legislative, organisational and site requirements and procedures</td>
<td></td>
</tr>
<tr>

<td></td>
</tr>
</tbody>
</table>

Safety requirements may include:

- OHS requirements in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan including: protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances
- safe operating procedures including recognising and preventing hazards associated with high voltage power lines, uneven/unstable terrain, trees, overhead service lines, bridges, surrounding buildings, obstructions, structures, facilities, dangerous materials, recently filled trenches, other machines, personnel, traffic control, working at heights, working in proximity to others, worksite visitors and the public
- safe parking practices including ensuring access ways are clear, equipment/machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement
- recognising hazards and risks including uneven/unstable terrain, trees, fires, overhead and underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials
- emergency procedures related to equipment operation including emergency shutdown and stopping, extinguishing equipment fires, organisational First Aid requirements and evacuation

</tbody>
</table>
### Concreting work

- shutters
- brushes

- site slabs and may include footpaths
- repairing of kerb and channel
- gully pits
- culvert end structures
- foundations
- head walls
- wing walls
- aprons
- plinths
- drains
- hardstands

### Environmental protection requirements

- organisational/project environmental management plan
- waste management
- water quality protection
- noise
- vibration
- dust and clean-up management

### Formwork

- steel shutters
- timber
- plywood

### Materials

- concrete
- steel reinforcing
- formwork components
- curing agents
- plastic membranes
- water
- sand

### Reinforcing fabric and bars

- mesh
- reinforcement bars
- ligatures

### Cast-ins

- services and fixtures tied to the reinforcement

### Place concrete

- wheelbarrows
- pumping equipment
- kibble
• chute
• tremmie
• truck placed
• shovelling
• vibrating

**Avoiding segregation** may include:

- minimising the height of a vertical drop
  - using a tremmie
  - using the flexible hose of a concrete pump

**Finish** may include:

- steel trowel
- mechanical trowelling machine
- broom finished,
- wood float
- bull float
- brushed

**Curing** may include:

- flooding
- coating with a membrane
- applied moisture
- steam
- curing agents
- plastic sheeting

RIIHAN301B Operate elevating work platform

Modification History
Not applicable.

Unit Descriptor
This unit covers the operation of elevating work platforms in the resources and infrastructure industries. It includes planning and preparing for operations, working from the platform, carrying out maintenance and cleaning up. The work required in this unit relates to the National Standard for High Risk Work. Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories and industry sectors. Relevant information must be sourced prior to application of the unit.

Application of the Unit
This unit is appropriate for those working in an operational role at worksites within:

- Civil construction
- Coal mining
- Drilling
- Extractive industries
- Metalliferous mining

Licensing/Regulatory Information
Refer to Unit Descriptor.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

Specific skills are required to achieve the performance criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes the ability to carry out the following as required to operate an elevating work platform:

- apply legislative, organisation and site requirements and procedures for elevating work platforms
- apply operational safety requirements
- identify hazards and potential hazards
- apply hand-eye coordination to control functions
- access, interpret and apply technical information relating to the planning and operation of an elevating work platform to perform work requirements
- maintain equipment records
- use relevant hand tools
- apply environmental constraints and procedures
- dispose of environmentally sensitive oils, fluids and materials

### Required knowledge

Specific knowledge is required to achieve the performance criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes knowledge of the following as required to operate elevating work platforms:

- the appropriate National Certification Standards
- site and equipment safety requirements
- equipment characteristics, technical capabilities and limitations
- elevating work platform operational procedures
- basic geological and survey data related to elevating work platforms
- site environmental requirements and constraints related to elevating work platforms
**Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

- Where applicable, physical resources should include equipment modified for people with disabilities. Access must be provided to appropriate learning and/or assessment support when required. |
## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Compliance documentation may include: | • legislative, organisation and site requirements and procedures  
• manufacturer's guidelines and specifications  
• Australian standards  
• Employment and Workplace Relations legislation  
• Equal Employment Opportunity and Disability Discrimination legislation |
| Work requirements may include: | • shift briefings  
• handover details  
• work orders  
• equipment to be used  
• nature and scope of tasks  
• load details  
• achievement targets  
• working conditions  
• site lighting arrangements  
• defects on equipment  
• hazards and potential hazards  
• coordination requirements |
| Safety information and procedures may include: | • legislation and regulations  
• relevant Australian standards  
• management plans  
• OHS policy  
• code of practice  
• manufacturer's instructions  
• safe working or job procedures (or equivalents) |
| Specific safety requirements may include: | • control and safety of raising and lowering booms  
• slewing and telescoping  
• deployment of outriggers  
• stabilisers  
• preparation of safety harnesses and blocking |
| Pre-operational checks may include: | • selection of stable base  
• avoidance of obstacles and hazards  
• identification of load  
• inspection and certification of equipment  
• management of permits and tags |
|-----------------------------------|--------------------------------------------------------------------------------|
| Site hazards may include:         | • power lines  
• facilities  
• trees  
• other equipment  
• overhead service lines  
• dangerous materials  
• bridges  
• underground services  
• surrounding buildings  
• recently filled trenches  
• obstructions  
• structures  
• weather |
| Elevating work platform may be titled locally: | • EWP  
• cherry pickers  
• skyworkers  
• scissor lift  
• trailer-mounted lifts  
• sky-cranes  
• boom lift |
| Note: the definition of equipment to be covered by this unit will need to be made by the site in accordance with appropriate legislative and regulatory requirements, which may vary with industry sector and with jurisdiction. |
| Emergency situations may include: | • loss of power  
• failure of controls  
• equipment fires |
| Minor operator maintenance procedures are those: | • established and authorised for the site |
| Note: depending on the site requirements, there may be circumstances in which operators do not perform these functions. |

RIIMPO317A Conduct roller operations

Modification History
Not applicable.

Unit Descriptor
This unit covers the conducting roller operations in the civil construction industry. It includes: planning and preparing; conducting machine pre-operational checks; selecting, removing and fitting attachments; operating and relocating the machine; and carrying out operator maintenance and clean up.

Application of the Unit
This unit is appropriate for those working in mobile plant operator roles, at worksites within:
- Civil construction

Licensing/Regulatory Information
Refer to Unit Descriptor.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>

</table>
6.2. Conduct inspection and fault finding  
6.3. Remove and replace defective parts safely and effectively  
6.4. Carry out regular *programmed maintenance* tasks |
| 7. Clean up | 7.1. Clear work area and dispose of or recycle *materials*  
7.2. Clean, check, maintain and store plant, *tools and equipment* |
# Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

## Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct roller operations:

- apply legislative, organisation and site requirements and procedures
- apply legislative, organisation and site requirements and procedures
- apply site and equipment safety requirements
- apply attachment and roller operating techniques
- interpret drawings and sketches

## Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to conduct roller operations:

- roller types, characteristics, technical capabilities and limitations
- basic principles of soil technology for civil works
- basic principles of soil compaction
- site and equipment safety requirements
- rolling/compacting techniques related to essential tasks
- processes for interpreting drawings and sketches
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- materials safety data sheet and materials handling methods
- project quality requirements
- civil construction terminology
- methods of changing machine attachments
- safe operating techniques in all terrain
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage
- levelling techniques
- JSA's/Safe work method statement
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

</tr>
</tbody>
</table>
The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job.

Customisation of assessment and delivery environment to sensitively accommodate cultural diversity.

Aboriginal people and other people from a non English speaking background may have second language issues.

Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances.

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and/or assessment support when required.

### Method of assessment

This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:

- written and/or oral assessment of the candidate's required knowledge
- observed, documented and/or first hand testimonial evidence of the candidate's:
  - implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes, which are to include operations performed in a minimum of three different soil types and include the mandatory tasks of:
    - compaction to pattern and density
    - sealing and finishing
    - the removal and fitting of at least one attachment
    - consistently achieving the required outcomes
### Guidance information for assessment

- first hand testimonial evidence of the candidate's:
  - working with others to undertake and complete roller operations in the civil construction industry

Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.
### Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

</tbody>
</table>

#### A roller:
- is a self propelled or towed machine used for the primary purpose of compacting a variety of types of construction materials
- it may be rubber tyred, smooth drum, padded drum or grid/open face type and achieves compaction by one or a combination of the following compactive methods: static weight, kneading, vibration and impact
- a grid roller is utilised to breakdown oversized construction materials
- padded drums may include sheepsfoot, padfoot, tamping foot or wedge foot

#### Types of rollers may include:
- self propelled pneumatic tyred; self propelled smooth drum vibratory roller; self propelled padded drum vibratory roller; self propelled smooth drum roller (including 3 pointers); self propelled double drum vibratory roller; towed pneumatic multi-tyred roller; towed grid roller; towed smooth drum vibratory roller; towed padded drum vibratory roller.

#### Roller operations are to include:
- compacting materials to pattern and density, sealing and finishing
- earthworks, pavement, bitumen and asphalt works

#### Work instructions may include:
- plans, specifications, quality requirements and operational details
- quality requirements may include: dimensions, tolerances, standards of work and material
| Safety requirements may be from the site safety plan and organisational policies and procedures and include: | • protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances  
• safe operating procedures to recognise hazards and prevent risks associated with underground and overhead services, other machines, personnel, restricted access barriers, traffic control, working at heights, working in proximity to others, worksite visitors and the public  
• emergency procedures, including: emergency shutdown and stopping, extinguishing fires, organisational First Aid requirements and evacuation  
• hazards and risks, which may include: uneven/ unstable terrain, trees, fires, overhead and underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials |
| Environmental protection requirements are obtained from project environmental management plan and may include: | • organisational/project environmental management plan, waste management, water quality protection, noise, vibration, dust and clean-up management |
| Attachments are to include: | • scraper bars and may include interchangeable drums, spray bars, wheel/drum brooms, drag brooms, padded drum attachments and blades |
| Roller controls and functions include: | • implements or other attachments, brakes and manoeuvrability |
| Safe parking practices is to include: | • ensuring access ways are clear, equipment/ machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement |
| Programmed maintenance is to include: | • cleaning, authorised servicing and the monitoring, recording and reporting of faults |
| Programmed maintenance may | • authorised minor replacements and the |
include:

| provision of assistance to maintenance personnel during maintenance and repair activities |

Materials may include:

| materials may include but are not limited to clays, silts, stone, gravel, mud, rock, sand, topsoil, blended materials and bituminous mixes |
| rock types may include metamorphic, igneous and sedimentary |

Tools and equipment are to include:

| hand tools and maintenance equipment relevant to the particular roller |

Not applicable.

Unit Descriptor
This unit covers the conducting backhoe/loader operations in the civil construction industry. It includes: planning and preparing; conducting machine pre-operational checks; operating backhoe/loaders; lifting, carrying and placing materials; selecting, removing and fitting attachments; relocating the backhoe/loaders; carrying out machine operator maintenance; and cleaning up.

Application of the Unit
This unit is appropriate for those working in mobile plant operator roles, at worksites within:
- Civil construction

Licensing/Regulatory Information
Refer to Unit Descriptor.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Plan and prepare | 1.1. Access, interpret and apply *compliance documentation* relevant to conduct *backhoe/loader tasks*  
1.2. Obtain, confirm and apply *work instructions* to the allotted task  
1.3. Obtain, confirm and apply *safety requirements* to the allotted task  
1.4. Identify, obtain and implement signage requirements from the project traffic management plan  
1.5. Select plant, *tools and equipment* to carry out tasks that are consistent with the requirements of the job, check them for serviceability and rectify or report any faults  
1.6. Identify, confirm and apply *environmental protection requirements* from the project environmental management plan, to the allotted task |
| 2. Conduct machine pre-operational checks | 2.1. Carry out *pre-start, start-up, park and shutdown procedures*  
2.2. Check machine controls and functions, including implements or other attachments, brakes and manoeuvrability for serviceability and rectify or report any faults |
| 3. Operate backhoe/loader | 3.1. Identify site hazards associated with backhoe/loader operations and use safe operating techniques to minimise risk  
3.2. Identify and apply operating techniques for backhoe/loader to achieve optimum output in accordance with design specifications while achieving specified tolerances  
3.3. Operate machine to work instructions |
| 4. Lift, carry and place materials | 4.1. Conduct *communication* practices associated with transportation and lifting of *materials*  
4.2. Select and attach slings and lifting gear in accordance with safe working load requirements  
4.3. Establish weight of load |

### Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

#### Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct backhoe/loader operations:

- apply legislative, organisation and site requirements and procedures
- apply site and equipment safety requirements
- apply techniques for calculating safe working loads
- apply backhoe/loader techniques related to essential tasks
- interpret drawings and sketches
- apply operational, maintenance and basic diagnostic procedures
- apply site isolation and traffic control responsibilities and authorities
- interpret materials safety data sheet and materials handling methods
- apply project quality requirements
- use civil construction terminology
- apply methods of changing machine attachments
- apply safe operating techniques in all terrain
- carry out basic earthworks calculations
- apply levelling techniques
- interpret JSA's/Safe work method statement

#### Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to conduct backhoe/loader operations:

- backhoe/loader types, characteristics, technical capabilities and limitations
- basic principles of soil technology for civil works
- site and equipment safety requirements
- techniques for calculating safe working loads
- backhoe/loader techniques related to essential tasks
- processes for interpreting drawings and sketches
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- materials safety data sheet and materials handling methods
- project quality requirements
- civil construction terminology
- methods of changing machine attachments
• safe operating techniques in all terrain
• basic earthworks calculations
• civil construction activity sequences of road construction, earthworks and drainage
• levelling techniques
• JSA’s/Safe work method statement
# Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## Overview of assessment

<table>
<thead>
<tr>
<th>Critical aspects for assessment and evidence required to demonstrate competency in this unit</th>
<th>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

## Context of and specific resources for assessment

- This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills.
- The assessment environment should not
disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job.

- Customisation of assessment and delivery environment to sensitively accommodate cultural diversity.
- Aboriginal people and other people from a non English speaking background may have second language issues.
- Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances.
- Where applicable, physical resources should include equipment modified for people with disabilities.
- Access must be provided to appropriate learning and/or assessment support when required.

<table>
<thead>
<tr>
<th>Method of assessment</th>
</tr>
</thead>
<tbody>

**A backhoe/loader is:**
- a self-propelled wheeled machine with a main structural support designed to carry both a front-mounted bucket loading mechanism and a rear-mounted backhoe

**Backhoe/loader tasks are to include:**
- mixing materials, stripping/spreading topsoils and materials, trench excavation, backfilling, lifting and carrying materials, loading dump trucks, wagons, hoppers, chutes and cutting/boxing

**Backhoe/loader tasks may include:**
- scrub clearing, ripping, compacting, cutting, batters and benches, rock breaking, demolition and any activities associated with the attachments listed

**A skid steer loader is:**
- a self-propelled wheeled machine in which steering is accomplished by skidding or reversing the wheels or tracks on one side of the machine. It has an integral front-mounted bucket-supporting structure and linkage, which loads or excavates through forward motion of the machine, and lifts, transports and discharges material

**Skid steer loader may include:**
- compacting, truck excavation, lifting and carrying materials, cutting batters and benches, rock breaking and any activities associated with attachments listed

**Skid steer loader tasks are to include:**
- stripping/ spreading topsoil and materials, backfilling, lifting, loading vehicles, excavations, mixing materials and site clean
| **Work instructions** may include: | • plans, specifications, quality requirements and operational details  
• quality requirements may include but not be limited to dimensions, tolerances, standards of work and material standards as detailed in the project drawings, specifications and project documentation to meet client satisfaction |
| **Safety requirements** are to be: | • in accordance with State or Territory legislation and regulations, organisational safety policies and procedures, and project safety plan |
| **Safety requirements** may include: | • protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances  
• personal protective equipment is to include that prescribed under legislation, regulation and workplace policies and practices  
• safe operating procedures which are to include but not be limited to recognising and preventing hazards associated with underground and overhead services, other machines, personnel, restricted access barriers, traffic control, working at heights, working in proximity to others, worksite visitors and the public  
• safe parking practices which is to include but not be limited to ensuring access ways are clear, equipment/ machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement  
• hazards and risks may include but not be limited to uneven/unstable terrain, trees, fires, overhead and underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials  
• emergency procedures related to this unit are to include but may not be limited to emergency shutdown and stopping, extinguishing fires, organisational First Aid requirements and evacuation |
| **Tools and equipment** are to | • hand tools and maintenance equipment |
include: relevant to the particular loader and may include lifting equipment

<table>
<thead>
<tr>
<th>Environmental requirements are to include:</th>

| Context of and specific resources for assessment | • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. |
The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job.

Customisation of assessment and delivery environment to sensitively accommodate cultural diversity.

Aboriginal people and other people from a non English speaking background may have second language issues.

Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances.

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and/or assessment support when required.

Method of assessment

This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:

- written and/or oral assessment of the candidate's required knowledge
- observed, documented and/or first hand testimonial evidence of the candidate's:
  - implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes, including:
    - in a minimum of two different soil types; and
    - to include the mandatory tasks of loading, bulk excavation, backfilling, trench excavation, stockpiling, battering and benching
  - consistently achieving the required outcomes
  - first hand testimonial evidence of the candidate's:
    - working with others to undertake and
| Guidance information for assessment | Consult the SkillsDMC User Guide for further information on assessment including access and equity issues. |
## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Relevant compliance documentation may include: | legislative, organisation and site requirements and procedures |
| | manufacturer's guidelines and specifications |
| | Australian standards |
| | codes of practice |
| | Employment and workplace relations legislation |
| | Equal Employment Opportunity and Disability Discrimination legislation |

An excavator is:
- a self-propelled crawler or wheeled machine with an upper structure capable of a minimum of 360 degree rotation which excavates, elevates, swings and discharges material by the action of a bucket fitted to the boom and arm or telescoping boom, without moving the chassis or undercarriage during any part of the working cycle of the machine
- are to include tracked and may include wheeled excavators

### Excavator operations tasks are to include:
- loading, bulk excavation, backfilling, trench excavation, stockpiling, battering and benching

### Excavator operations tasks may include:
- compacting materials, demolition, rock breaking, removal of trees and ripping, lifting materials, cutting/boxing, laying pipes, cut and fill, mixing materials, stripping/spreading topsoil and materials

### Work instructions may include:
- plans, specifications, quality requirements and operational details
- quality requirements may include but not be limited to dimensions, tolerances, standards of work and material standards as detailed in the project drawings, specifications and project documentation to meet client satisfaction

### Safety requirements are to be:
- in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan
### Safety requirements

Safety requirements may include:

- protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances
- personal protective equipment is to include that prescribed under legislation, regulation and workplace policies and practices
- safe operating procedures which are to include but not be limited to recognising and preventing hazards associated with underground and overhead services, other machines, personnel, restricted access barriers, traffic control, working at heights, working in proximity to others, worksite visitors and the public
- safe parking practices which is to include but not be limited to ensuring access ways are clear, equipment/machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement
- hazards and risks may include but not be limited to uneven/unstable terrain, trees, fires, overhead and underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials
- emergency procedures related to this unit are to include but may not be limited to emergency shutdown and stopping, extinguishing fires, organisational First Aid requirements and evacuation

### Tools and equipment

Tools and equipment are to include:

- hand tools and maintenance equipment relevant to the particular loader

### Environmental requirements

Environmental requirements are to include:

- organisational/project environmental management plan, waste management, water quality protection, noise, vibration, dust and clean-up management

### Communications practices

Communications practices are to include:

- verbal instructions and fault reporting and may include 2-way radio, hand signals, mobile phone, site specific instructions, written instructions or instructions related to job/task
- on site meeting processes may include notification/scheduling (time, place, purpose),
<table>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct wheeled front end loader operations:

- apply legislative, organisation and site requirements and procedures
- apply site and equipment safety requirements
- apply techniques for calculating safe working loads
- apply front end loader and attachment operating techniques related to essential tasks
- interpret drawings and sketches
- apply operational, maintenance and basic diagnostic procedures
- apply site isolation and traffic control responsibilities and authorities
- interpret materials safety data sheets and apply materials handling methods
- apply project quality requirements
- use civil construction terminology
- apply methods of changing machine attachments
- apply safe operating techniques in all terrain
- carry out basic earthworks calculations
- apply levelling techniques
- apply JSA's/Safe work method statement

### Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to conduct wheeled front end loader operations:

- front end loader types, characteristics, technical capabilities and limitations
- basic principles of soil technology for civil works
- site and equipment safety requirements
- techniques for calculating safe working loads
- front end loader and attachment operating techniques related to essential tasks
- processes for interpreting drawings and sketches
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- materials safety data sheets and materials handling methods
**REQUIRED SKILLS AND KNOWLEDGE**

- project quality requirements
- civil construction terminology
- methods of changing machine attachments
- safe operating techniques in all terrain
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage
- levelling techniques
- JSA’s/Safe work method statement
# Evidence Guide

<table>
<thead>
<tr>
<th>EVIDENCE GUIDE</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</td>
</tr>
</tbody>
</table>

## Overview of assessment

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions for conducting wheeled front end loader operations
- implementation of requirements, procedures and techniques for the safe, effective and efficient completion of wheeled front end loader operations, including:
  - in a minimum of two different soil types; and
  - to include the mandatory tasks of mixing materials, stripping/spreading topsoil and materials, loading, cutting/boxing, backfilling, lifting and carrying materials
- working with others to undertake and complete wheeled front end loader operations that meet all of the required outcomes
- consistent timely completion of wheeled front end loader operations that safely, effectively and efficiently meet the required outcomes

**Context of and specific resources for assessment**

- This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills.
- The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Relevant compliance documentation may include:
- legislative, organisation and site requirements and procedures
- manufacturer’s guidelines and specifications
- Australian standards
- codes of practice
- Employment and workplace relations legislation
- Equal Employment Opportunity and Disability Discrimination legislation

A wheeled front end loader is:
- a self-propelled wheeled machine with an integral front-mounted bucket-supporting structure and linkage with integral quick coupler
- it loads or excavates through forward motion of the machine, and lifts, transports and discharges material

Front end loader tasks are to include:
- mixing materials, stripping/spreading topsoil and materials, loading, cutting/boxing, backfilling, lifting and carrying materials

Work instructions may include:
- plans, specifications, quality requirements and operational details
- quality requirements may include but not be limited to dimensions, tolerances, standards of work and material standards as detailed in the project drawings, specifications and project documentation to meet client satisfaction

Safety requirements are to be:
- in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan

Safety requirements may include:
- protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances
### RANGE STATEMENT

- personal protective equipment is to include that prescribed under legislation, regulation and workplace policies and practices
- safe operating procedures which are to include but not be limited to recognising and preventing hazards associated with underground and overhead services, other machines, personnel, restricted access barriers, traffic control, working at heights, working in proximity to others, worksite visitors and the public
- safe parking practices which is to include but not be limited to ensuring access ways are clear, equipment/machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement
- hazards and risks may include but not be limited to uneven/unstable terrain, trees, fires, overhead and underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials
- emergency procedures related to this unit are to include but may not be limited to emergency shutdown and stopping, extinguishing fires, organisational First Aid requirements and evacuation

<table>
<thead>
<tr>
<th>Tools and equipment are to include:</th>
<th>• hand tools and maintenance equipment relevant to the particular loader</th>
</tr>
</thead>
<tbody>
<tr>
<td>Environmental requirements are to include:</td>
<td>• organisational/project environmental management plan, waste management, water quality protection, noise, vibration, dust and clean-up management</td>
</tr>
<tr>
<td>Communications practices are to include:</td>
<td>• verbal instructions and fault reporting and may include two way radio, hand signals, mobile phone, site specific instructions, written instructions or instructions related to job/task</td>
</tr>
<tr>
<td></td>
<td>• on site meeting processes may include notification/scheduling (time, place, purpose), task discussions and local coordination of procedural and operational issues</td>
</tr>
<tr>
<td>Materials may include:</td>
<td>• clays, silts, stone, gravel, mud, rock, sand, topsoil, blended materials, organic materials,</td>
</tr>
</tbody>
</table>
### RANGE STATEMENT

<table>
<thead>
<tr>
<th>Typical construction site materials/waste and bituminous mixes</th>
</tr>
</thead>
<tbody>
<tr>
<td>• rock types may include metamorphic, igneous and sedimentary</td>
</tr>
</tbody>
</table>

**Attachments** are to include:

- a bucket (general purpose or multipurpose)

**Attachments** may include:

- rippers/scarifiers
- and/or other attachments approved by the manufacturer

**Operator maintenance** is to include:

- cleaning, authorised servicing and the monitoring, recording and reporting of faults

*It may also include* the conduct of authorised minor replacements and the provision of assistance to maintenance personnel during maintenance and repair activities

RIIMPO322A Conduct civil construction tracked front end loader operations

Modification History
Not applicable.

Unit Descriptor
This unit covers conducting tracked front end loader operations in the civil construction industry. It includes: planning and preparing; conducting machine pre-operational checks; operating the machine; lifting, carrying and placing materials; relocating the machine; carrying out machine operator maintenance; and cleaning up.

Application of the Unit
This unit is appropriate for those working in mobile plant operator roles, at worksites within:
- Civil construction

Operator license issued by OHS authority may be required in some states or territories and tracked loaders must be registered to drive and operate on public roads.

Licensing/Regulatory Information
Refer to Unit Descriptor.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.
Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |

### Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

#### Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct tracked front end loader operations:

- apply legislative, organisation and site requirements and procedures
- apply site and equipment safety requirements
- apply techniques for calculating safe working loads
- apply front end loader and attachment operating techniques related to essential tasks
- interpret drawings and sketches
- apply operational, maintenance and basic diagnostic procedures
- apply site isolation and traffic control responsibilities and authorities
- interpret materials safety data sheets and apply materials handling methods
- apply project quality requirements
- use civil construction terminology
- apply methods of changing machine attachments
- apply safe operating techniques in all terrain
- carry out basic earthworks calculations
- apply levelling techniques
- apply JSA's/Safe work method statement requirements

#### Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to conduct tracked front end loader operations:

- tracked front end loader types, characteristics, technical capabilities and limitations
- basic principles of soil technology for civil works
- site and equipment safety requirements
- techniques for calculating safe working loads
- front end loader and attachment operating techniques related to essential tasks
- processes for interpreting drawings and sketches
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- materials safety data sheets and materials handling methods
- project quality requirements
- civil construction terminology
- methods of changing machine attachments
- safe operating techniques in all terrain
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage
- levelling techniques
- JSA’s/Safe work method statement
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

    - are to include the mandatory tasks of mixing materials, stripping/spreading topsoil and materials, loading, cutting/boxing, backfilling, lifting and carrying materials
  - consistently achieving the required outcomes
  - first hand testimonial evidence of the candidate's:
    - working with others to undertake and complete the tracked front end loader operations

- language, literacy and numeracy demands of assessment should not be greater than those required on the job.
- Customisation of assessment and delivery environment to sensitively accommodate cultural diversity.
- Aboriginal people and other people from a non English speaking background may have second language issues.
- Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular work sites may differ due to site circumstances.
- Where applicable, physical resources should include equipment modified for people with disabilities.
- Access must be provided to appropriate learning and/or assessment support when required.
| Guidance information for assessment | Consult the SkillsDMC User Guide for further information on assessment including access and equity issues. |
**Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Relevant compliance documentation may include: | • legislative, organisation and site requirements and procedures  
• manufacturer's guidelines and specifications  
• Australian standards  
• codes of practice  
• Employment and workplace relations legislation  
• Equal Employment Opportunity and Disability Discrimination legislation |

RIIMPO326A Conduct civil construction water cart operations

Modification History
Not applicable.

Unit Descriptor
This unit covers conduct water cart operations in the civil construction industry. It includes: planning and preparing; conducting machine pre-operational checks; operating the water cart; loading, transporting and distributing water; carrying out driver maintenance; and cleaning up.

Application of the Unit
This unit is appropriate for those working in mobile plant operator roles, at worksites within:
- Civil construction

Water carts must be registered to drive and operate on public roads.

Licensing/Regulatory Information
Refer to Unit Descriptor.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| **1. Plan and prepare**      | 1.1. Access, interpret and apply *compliance documentation* relevant to water cart operations  
                                  1.2. Obtain, confirm and apply *work instructions* to the allotted task  
                                  1.3. Obtain, confirm and apply *safety requirements* to the allotted task  
                                  1.4. Obtain, identify and implement signage requirements from the project traffic management plan  
                                  1.5. Select plant, *tools and equipment* to carry out tasks that are consistent with the requirements of the job, check them for serviceability and rectify or report any faults  
                                  1.6. Identity, confirm and apply *environmental protection requirements* from the project environmental management plan, to the allotted task |
| **2. Conduct machine**       | 2.1. Carry out pre-start, start-up, park and shutdown procedures  
                                  2.2. Check water cart controls and functions, including implements or other attachments, brakes and manoeuvrability for serviceability and report or rectify any faults |
| **pre-operational checks**   |                                                                                                                                                       |
| **3. Operate water cart**    | 3.1. Identity site hazards associated with water cart operations and use safe operating techniques to minimise risk  
                                  3.2. Manage engine power to ensure efficiency of water cart platform movements and to minimise damage to the engine and gears  
                                  3.3. Coordinate engine power with gear selection to ensure smooth transition and operation within torque range  
                                  3.4. Operate water cart platform to work instructions  
                                  3.5. Constantly monitor *road/traffic conditions* and ensure no injury to people or damage to property, equipment, loads and facilities  
                                  3.6. Bring vehicle to a halt smoothly, |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

**Required skills**

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct water cart operations:

- apply legislative, organisation and site requirements and procedures
- apply site and equipment safety requirements
- apply safe operating techniques in all terrain
- apply practical field tests for moisture content
- apply levelling techniques
- apply processes for interpreting engineering drawings and sketches
- apply operational, maintenance and basic diagnostic procedures
- apply site isolation and traffic control responsibilities and authorities
- interpret materials safety data sheets and apply materials handling methods
- apply project quality requirements
- use civil construction terminology
- apply JSA's/Safe work method statement requirements

**Required knowledge**

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to conduct water cart operations:

- water cart types, characteristics, technical capabilities and limitations
- pumps and pumping system operations
- water distribution systems types, characteristics, technical capabilities and limitations
- basic dust suppression theory
- the causes and effects of surge and sway in bulk fluid loads
- site and equipment safety requirements
- safe operating techniques in all terrain
- civil construction activity sequences of road construction, earthworks and drainage
- practical field tests for moisture content
- levelling techniques
- basic soil types and characteristics
- basic soil compaction theory including the effects of moisture content and mechanical interlock
- processes for interpreting engineering drawings and sketches
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- materials safety data sheets and materials handling methods
- project quality requirements
- civil construction terminology
- JSA's/Safe work method statement
# Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## Overview of assessment

<table>
<thead>
<tr>
<th>Critical aspects for assessment and evidence required to demonstrate competency in this unit</th>
<th>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• knowledge of the requirements, procedures and instructions for conducting water cart operations</td>
</tr>
<tr>
<td></td>
<td>• implementation of requirements, procedures and techniques for the safe, effective and efficient completion of water cart operations, including:</td>
</tr>
<tr>
<td></td>
<td>• over not less than three shifts, and</td>
</tr>
<tr>
<td></td>
<td>• to include the mandatory tasks stated in the Range Statement and include:</td>
</tr>
<tr>
<td></td>
<td>• the loading and transporting of water</td>
</tr>
<tr>
<td></td>
<td>• pressure and gravity discharging of water evenly in civil construction compaction operations in a minimum of two different soil types to meet moisture content requirements</td>
</tr>
<tr>
<td></td>
<td>• pressure and gravity distribution of water into two separate water storage facilities/receptacles</td>
</tr>
<tr>
<td></td>
<td>• dust suppression operations</td>
</tr>
<tr>
<td></td>
<td>• working with others to undertake and complete water cart operations that meet all of the required outcomes</td>
</tr>
<tr>
<td></td>
<td>• consistent timely completion of water cart operations that safely, effectively and efficiently meet the required outcomes</td>
</tr>
</tbody>
</table>

## Context of and specific resources for assessment

- This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency...
management skills and job role environment skills.
- The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job.
- Customisation of assessment and delivery environment to sensitively accommodate cultural diversity.
- Aboriginal people and other people from a non English speaking background may have second language issues.
- Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances.
- Where applicable, physical resources should include equipment modified for people with disabilities.
- Access must be provided to appropriate learning and/or assessment support when required.

**Method of assessment**

This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:

- written and/or oral assessment of the candidate's required knowledge
- observed, documented and/or first hand testimonial evidence of the candidate's:
  - implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes, including:
  - the loading and transporting of water
  - pressure and gravity discharging of water evenly in civil construction compaction operations in a minimum of two different soil types to meet moisture content requirements
  - pressure and gravity distribution of water into two separate water storage facilities/receptacles
- dust suppression operations
- consistently achieving the required outcomes
- first hand testimonial evidence of the candidate's:
  - working with others to undertake and complete water cart operations

**Guidance information for assessment**

Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.
## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

### Relevant compliance documentation

May include:

- legislative, organisation and site requirements and procedures
- manufacturer's guidelines and specifications
- Australian standards
- codes of practice
- Employment and workplace relations legislation
- Equal Employment Opportunity and Disability Discrimination legislation

### Water carts

May be:

- purpose built vehicles or other vehicle/plant platforms being used for the purpose

### Water cart functions are to include:

- loading, transporting, discharging and distribution of water

### Work instructions

May include:

- plans, specifications, quality requirements and operational details
- quality requirements may include but not be limited to dimensions, tolerances, standards of work and material standards as detailed in the project drawings, specifications and project documentation to meet client satisfaction

### Safety requirements

Are to be:

- in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan

### Safety requirements may include:

- protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances
- personal protective equipment is to include that prescribed under legislation, regulation and workplace policies and practices
- safe operating procedures which are to include but not be limited to recognising and preventing hazards associated with underground and overhead services, other
machines, personnel, restricted access barriers, traffic control, working at heights, working in proximity to others, worksite visitors and the public

- safe parking practices which is to include but not be limited to ensuring access ways are clear, equipment/machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement
- hazards and risks may include but not be limited to uneven/unstable terrain, trees, fires, overhead and underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials
- emergency procedures related to this unit are to include but may not be limited to emergency shutdown and stopping, extinguishing fires, organisational First Aid requirements and evacuation

<table>
<thead>
<tr>
<th>Tools and equipment are to include:</th>
<th>• hand tools and maintenance equipment relevant to the particular water cart</th>
</tr>
</thead>
<tbody>
<tr>
<td>Environmental requirements are to include:</td>
<td>• organisational/project environmental management plan, waste management, water quality protection, noise, vibration, dust and clean-up management</td>
</tr>
<tr>
<td>Road/traffic conditions include:</td>
<td>• road standards, traffic flow, distance and load</td>
</tr>
<tr>
<td>Water cart loading tasks are to include:</td>
<td>• loading from standpipes and/or purpose built pressure loading points and loading from water sources where water must be pumped from the source</td>
</tr>
<tr>
<td>Discharging water means:</td>
<td>• the movement of water from the water cart by either pressure pumping or gravity feed through pipes, lines and nozzles and/or spray bars</td>
</tr>
<tr>
<td>Discharging tasks are to include:</td>
<td>• the spraying of water in civil construction compaction operations by pressure means and by gravity means</td>
</tr>
<tr>
<td>Discharging tasks may include:</td>
<td>• dust suppression, stabilisation operations, fire fighting support and road maintenance</td>
</tr>
<tr>
<td>Distribution of water means:</td>
<td>• the movement of water from the water cart into another form of water storage area/receptacle</td>
</tr>
</tbody>
</table>
**Distribution tasks are to include:**
- pressure and gravity discharge into another storage facility which may include the filling of water tanks, water points and/or fire points

**Discharge and distribution systems includes:**
- pumps, lines and nozzles

**Communications practices are to include:**
- verbal instructions and fault reporting and may include 2-way radio, hand signals, mobile phone, site specific instructions, written instructions or instructions related to job/task
- on site meeting processes may include notification/ scheduling (time, place, purpose), task discussions and local coordination of procedural and operational issues

**Materials may include:**
- clays, silts, stone, gravel, mud, rock, sand, topsoil, blended materials, organic materials, typical construction site materials/waste and bituminous mixes
- rock types may include metamorphic, igneous and sedimentary

**Attachments may include:**
- ripper/tyne, auger, tilt bucket, rock breaker, buckets, lifting device, vibrating compaction plate and compaction wheel

**Operator maintenance is to include:**
- cleaning, authorised servicing and the monitoring, recording and reporting of faults

**It may also include**
- the conduct of authorised minor replacements and the provision of assistance to maintenance personnel during maintenance and repair activities

Co-requisite units
Not applicable.
RIIOHS202A Enter and work in confined spaces

Modification History
Not applicable.

Unit Descriptor
This unit covers the entering and working in confined spaces in resources and infrastructure industries. It includes planning and preparing for entry of confined spaces, entry and working in confined spaces, exiting confined spaces and cleaning up.

Application of the Unit
This unit is appropriate for those working in confined spaces (enclosed or partially enclosed) for the purpose of carrying out work or inspections and also is appropriate for those performing sentry or stand-by person roles, at worksites within:

- Civil construction
- Coal mining
- Drilling
- Extractive industries
- Metalliferous mining
- General construction

Licensing/Regulatory Information
Refer to Unit Descriptor.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.
Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. </thead>
</table>
| 1. Plan and prepare for entering and working in confined spaces | 1.1. Access, interpret and apply compliance documentation relevant to entering and working in confined spaces  
1.2. Obtain, confirm and apply work instructions relevant to the allotted task  
1.3. Obtain, confirm and apply safety requirements relevant to the allotted task  
1.4. Obtained authorisation (entry permit) to enter the confined space is in accordance with regulatory requirements  
1.5. Confirm the emergency response procedure is with the stand-by person  
1.6. Identify, obtain and implement signage and barrier requirements as required by the project plan  
1.7. Select tools and equipment to carry out tasks that are consistent with the requirements of the job and check them for serviceability and rectify or report any faults  
1.8. Identify, confirm and apply to the allotted task the environmental protection requirements from the project environmental management plan  
1.9. Position rescue equipment as required by the entry permit close to the point of entry |
| 2. Enter and work in the confined space | 2.1. Gain access to the confined space  
2.2. Ensure that the atmosphere is tested and monitored for harmful elements in accordance with procedures  
2.3. Apply tagging and lock-out procedures as required  
2.4. Enter the confined space according to agreed procedure  
2.5. Maintain communication with the stand-by person  
2.6. Comply with entry permit requirements while carrying out designated work in confined space  
2.7. Monitor and adhere to allocated entry time |
### Exit confined space

3.1. Exit confined space according to agreed procedure  
3.2. Recover tools, equipment and materials from the confined space  
3.3. Conduct inspection of the confined space  
3.4. **Secure access** according to site procedures  
3.5. Remove tagging and lock-out according to site procedures  
3.6. Complete confined space entry permit

### Clean up

4.1. Clear work area and dispose of or recycle materials in accordance with project environmental management plan  
4.2. Clean, check, maintain and store *tools and equipment* in accordance recommendations and standard work practices  
4.3. Remove, clean and store barriers and signs
## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to enter and work in confined spaces:

- apply legislative, organisation and site requirements and procedures
- apply operational, maintenance and basic diagnostic procedures
- apply materials handling methods
- use atmospheric monitoring devices
- interpret JSAs/Safe work method statements

### Required knowledge

Specific knowledge is required to achieve the performance criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following as required to enter and work in confined spaces:

- site and equipment safety requirements
- confined space entry and exit procedures, risks and regulations
- air contaminants and toxic gases
- breathing apparatus limitations
- equipment types, characteristics, technical capabilities and limitations
- site isolation and site control responsibilities and authorities
- materials safety data sheets (MSDS)
- project quality requirements
- industry terminology
- state and territory interpretations of a confined space

RIIOHS204A Work safely at heights

Modification History
Not applicable.

Unit Descriptor
This unit covers working safely at heights in resources and infrastructure industries. It includes: identifying the work requirements, work procedures and instructions for the task; accessing and installing equipment; performing work at heights; and cleaning up the work area.

Application of the Unit
This unit specifies the competency required to undertake safe working practices when working at heights or depths.
This unit is appropriate for those working in operational roles, at worksites within:

- Civil construction
- Coal mining
- Drilling
- Extractive industries
- Metalliferous mining

Licensing/Regulatory Information
Refer to Unit Descriptor.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.
## Elements and Performance Criteria Pre-Content

<table>
<thead>
<tr>
<th>Elements describe the essential outcomes of a unit of competency.</th>
<th>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</th>
</tr>
</thead>

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Identify work requirements | 1.1. Access, interpret and apply *compliance documentation* relevant to working safely at heights  
1.2. Identify the scope of the task  
1.3. Adhere to *OHS requirements* associated with working safely at heights, and the workplace environment throughout the work  
1.4. Inspect site to determine layout and physical condition, condition of structures, prevailing weather conditions, equipment requirements and potential hazards  
1.5. Identify and document scope of the task and proposed work practices/activities  
1.6. Identify, select and check safety equipment for serviceability  
1.7. Identify, manage and report potential risks and hazards |
| 2. Identify work procedures and instructions for the task | 2.1. Select materials, *tools and equipment*, including personal safety equipment, and check for serviceability  
2.2. Inspect/install fall protection and perimeter protection equipment ensuring adequacy for work and conformance to regulatory requirements  
2.3. Identify approved methods of moving tools and equipment to work area and minimise potential hazards associated with tools at heights  
2.4. Install *safety system* in accordance with requirements  
2.5. Select and install appropriate signs and barricades |
| 3. Access and install equipment | 3.1. Correctly fit, adjust and anchor fall protection and associated equipment  
3.2. Make appropriate arrangements to install required equipment  
3.3. Use recommended methods to access work area for people, tools and equipment  
3.4. Place tools and materials to eliminate or minimise the risk of items being knocked |
| 4. Perform work at heights | 4.1. Check access from ground to work area to ensure it is safe and in accordance with requirements  
4.2. Keep fall equipment in place and adjusted appropriately to all for movement during work  
4.3. Undertake manual handling of materials and equipment in accordance with requirements  
4.4. Locate materials and equipment ensuring that they are safely secured and distributed  
4.5. Check safety system periodically for compliance with requirements and procedures  
4.6. Monitor risk control measures to ensure that they are effective and appropriate to the task and work environment  
4.7. Reassess risk control measures, as required, in accordance with changed work practices and/or site conditions and undertake alterations |
| --- | --- |
| 5. Clean up work area | 5.1. Dismantle safety system in accordance with sequence and remove from worksite  
5.2. Clear work area and dispose of or recycle materials  
5.3. Clean, check, maintain and store tools and equipment |
### Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

#### Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to work safely at heights:

- apply legislative, organisation and site requirements and procedures
- access, interpret and apply technical and safety information
- apply diagnostic/faultfinding techniques
- apply environmental requirements
- apply isolation procedures
- work in varying weather conditions

#### Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to work safely at heights:

- the names and functions of equipment, components and materials
- equipment manufacturer's instructions and specifications
- safe shifting and handling of tools and materials
- statutory and regulatory authority requirements
- the nature of work undertaken at heights
- heights safety systems
- the processes of providing for safe working practices
- safety equipment/systems and considerations to facilitate working safely at heights
- safe work methods
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>

<tr>
<td>• Aboriginal people and other people from a non English speaking background may have second language issues.</td>
<td></td>
</tr>
</tbody>
</table>
**Method of assessment**

This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:

- written and/or oral assessment of the candidate's required knowledge
- observed, documented and/or first hand testimonial evidence of the candidate's:
  - implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes
  - consistently achieving the required outcomes
  - first hand testimonial evidence of the candidate's:
    - working with others to undertake and complete work safely at heights

**Guidance information for assessment**

Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Relevant compliance documentation may include: | legislative, organisation and site requirements and procedures |
| | manufacturer's guidelines and specifications |
| | Australian standards |
| | code of practice |
| | Employment and workplace relations legislation |
| | Equal Employment Opportunity and Disability Discrimination legislation |

| OHS requirements may include those associated with: | protective clothing and equipment |
| | use of tools and equipment |
| | workplace environment and safety |
| | handling of materials |
| | use of fire fighting equipment |
| | use of First Aid equipment |
| | hazard control |
| | hazardous materials and substances |

| Hazards may include: | falling objects |
| | removal of scaffold components |
| | inappropriate carrying of materials on ladders |
| | excessive bending or twisting in different work situations |

| Tools and equipment may include: | fall protection |
| | perimeter protection |
| | signage and barricades |
| | ladders |
| | lifting/load shifting equipment including: |
| | hand trolleys |
| | rollers |
| | forklifts |
| | chain blocks |
| | hoists |
| | jacks |
| | scaffolds |
### Safety systems may include:
- elevated work platforms
- lifting equipment (such as cranes)
- scaffolds
- handrails
- foot walks
- kickboards
- safety harness
- harness fixing points

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to control traffic with a stop-slow bat:

- apply legislative, organisation and site requirements and procedures

### Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to control traffic with a stop-slow bat:

- site and equipment safety requirements
- traffic controlling
- traffic management plans
- traffic control signage and barricades
- radio operations
- equipment types, characteristics, technical capabilities and limitations
- operational and maintenance procedures for equipment
- site isolation and traffic control responsibilities and authorities
- affects of travel speed and vehicle mass on stopping distances
- quality requirements
- JSAs/Safe work method statement
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

### Relevant compliance documentation

- legislative, organisation and site requirements and procedures
- manufacturer’s guidelines and specifications
- Australian standards
- code of practice
- Employment and workplace relations legislation
- Equal Employment Opportunity and Disability Discrimination legislation

### Work instructions

- plans
- specifications
- quality requirements
- operational details
- safe work procedures or equivalent
- regulatory/legislative requirements
- manufacturers’ specifications and instructions
- organisation work specifications and requirements
- instructions issued by authorised organisational or external personnel
- relevant Australian Standards

### Safety requirements

- those included in compliance documentation
- personal protective equipment
- safe operating procedures, including recognising and preventing hazards associated with:
  - uneven/unstable terrain
  - trees
  - pits
  - poles
  - trip hazards
  - dirt mounds
  - overhead services
- underground services
- bridges
- surrounding buildings
- obstructions
- structures
- facilities
- fires
- excavations
- traffic
- embankments
- cuttings
- hazardous materials
- recently filled trenches
- other machines
- personnel
- restricted access barriers
- traffic control
- working in proximity to others
- worksite visitors and the public
- safe parking practices, including:
  - ensuring access ways are clear
  - equipment/machinery is away from overhangs and refuelling sites
  - safe distance from excavations
  - secured from unauthorised access or movement

**Signage and devices** are to include:
- temporary warning signs
- regulatory and traffic cones

**Signage and devices** may include:
- vehicle mounted signs and flashing lights
- guide signs
- warning signs
- barriers
- hazard markers
- bollards
- arrow boards

**Tools and equipment** are to include:
- radio
- stop-slow bat
- high visibility vest
- traffic cones
- signage
### Tools and equipment

RIIOHS302A Implement traffic management plan

Modification History
Not applicable.

Unit Descriptor
This unit covers the competency required to implement a traffic management plans in the civil construction industry. It includes: planning and preparing; setting out, monitoring and closing down the traffic guidance scheme; and cleaning up.

Application of the Unit
These traffic management plans include those for public and private roads, parking areas and restricted access construction sites. This unit is appropriate for those working in a operational roles, at worksites within:
• Civil construction

Licensing/Regulatory Information
Refer to Unit Descriptor.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
| Elements describe the essential outcomes of a unit of competency. |
| Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

## Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

### Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to implement a traffic management plan:

- apply legislative, organisation and site requirements and procedures

### Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to implement a traffic management plan:

- site and equipment safety requirements
- state and territory traffic management legislation
- requirements set down by the Manual for Uniform Traffic Control Devices
- potential hazards
- traffic controlling
- traffic management plans
- basic signalling
- signs and devices
- radio operations
- equipment types, characteristics, technical capabilities and limitations
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- processes for the calculation of travel speed
- quality requirements
- civil construction terminology
- JSAs/Safe work method statement
## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions for implementing of traffic management plans
- implementation of requirements, procedures and techniques for the safe, effective and efficient implementing of traffic management plans, which are to include:
  - complying with State/Territory regulations on three separate live traffic projects, and
  - one project controlling site construction vehicles
- working with others to undertake and complete the traffic management plans that meet all of the required outcomes
- consistent timely implementation of traffic management plans that safely, effectively and efficiently meets the required outcomes

### Context of and specific resources for assessment

- This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills.
- The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job.
- Customisation of assessment and delivery environment to sensitively accommodate cultural diversity.
- Aboriginal people and other people from a non English speaking background may have second language issues.
- Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances.
- Where applicable, physical resources should include equipment modified for people with disabilities.
- Access must be provided to appropriate learning and/or assessment support when required.

### Method of assessment

This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:

- written and/or oral assessment of the candidate's required knowledge
- observed, documented and/or first hand testimonial evidence of the candidate's:
  - implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes
  - consistently achieving the required outcomes
  - first hand testimonial evidence of the candidate's:
    - working with others to implement traffic management plans

### Guidance information for assessment

Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Provide information to the work group | 1.1. Access, interpret and apply *compliance documentation* relevant to applying the site risk management system  
1.2. Accurately explain relevant compliance documentation to the work group  
1.3. Provide information on the *organisation’s risk management policies, procedures and programs* to the work group in an accessible manner  
1.4. Regularly provide and clearly explain information about *identified hazards* and the outcomes of *risk assessment* and control to the work group |
| 2. Apply and monitor participative arrangements | 2.1. Explain the importance of effective consultative mechanisms in managing risk to the work group  
2.2. Conduct and monitor consultative procedures to facilitate participation of work groups in managing work area hazards  
2.3. Promptly deal with issues raised through *consultation* in accordance with *organisational consultation procedures*  
2.4. Record and promptly communicate the outcomes of consultation over risk management issues to the work group |
| 3. Apply and monitor the procedures for providing training | 3.1. Systematically identify *risk management training needs* in line with organisational requirements  
3.2. Make arrangements, in consultation with relevant individuals, to meet risk management training needs of team members.  
3.3. Provide workplace learning opportunities and coaching and mentoring assistance to facilitate team and individual achievement of identified training needs  
3.4. Identify and report costs associated with provision of training for work team for inclusion in financial planning |
| 4. Apply and monitor procedures | 4.1. *Identify and report hazards and risks* in the |
| **for identifying hazards and assessing risks** | work area in accordance with risk management and related *policies* and procedures  
4.2. Action team members hazard reports promptly in accordance with organisational procedures |
|---|---|
| **5. Apply and monitor the procedures for controlling risks** | 5.1. Apply procedures for *controlling risk* using the hierarchy of controls and organisational requirements  
5.2. Identify and report inadequacies in existing risk control measures in accordance with hierarchy of controls  
5.3. *Monitor* outcomes of reported inadequacies where appropriate to ensure a prompt organisational response |
| **6. Apply and monitor the procedures for maintaining records** | 6.1. Ensure accurate completion and maintenance of *risk management records* of incidents in the work area in accordance with organisational requirements  
6.2. Use aggregate information and data from work area records to identify hazards and monitor risk control procedures in work area |
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to apply site risk management systems:

- apply analyse skills to identify hazards and assess risks in the work area
- apply data analysis skills including:
  - incident monitoring
  - environmental monitoring
  - evaluation of effectiveness of risk control measures
- apply assessment skills to assess resources required to apply risk control measures
- apply literacy skills for comprehending documentation and interpreting risk management requirements
- apply coaching and mentoring skills to provide support to colleagues
- demonstrate the ability to relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to apply site risk management systems:

- relevant legislation from all levels of government that effect business operations
- legal responsibilities of employers, supervisors and employees in the workplace
- site policies and procedures relating to hazard management, fire emergency, evacuation, incident and accident investigation and reporting
- relevance of consultation as a key mechanism for improving workplace risk management
- principles and practices of risk management
- characteristics and composition of the workgroup
### Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>Critical aspects for assessment and evidence required to demonstrate competency in this unit</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</td>
</tr>
<tr>
<td></td>
<td>• knowledge of the requirements, procedures and instructions to apply the site risk management system</td>
</tr>
<tr>
<td></td>
<td>• implementation of appropriate procedures and techniques for the safe, effective and efficient application of the site risk management system</td>
</tr>
<tr>
<td></td>
<td>• working with others to plan, prepare and apply the site risk management system</td>
</tr>
<tr>
<td></td>
<td>• provision of clear and timely instruction and supervision by the individual of those involved in applying the site risk management system</td>
</tr>
<tr>
<td></td>
<td>• evidence of the consistent successful application of the site risk management system</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Context of and specific resources for assessment</th>
</tr>
</thead>
<tbody>
<tr>
<td>• This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills.</td>
</tr>
<tr>
<td>• Evidence for assessment is best gathered using the outcomes of products and processes in the workplace</td>
</tr>
<tr>
<td>• The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job</td>
</tr>
<tr>
<td>• Customisation of assessment and delivery</td>
</tr>
</tbody>
</table>
environment to sensitively accommodate cultural diversity.

- Aboriginal people and other people from a non English speaking background may have second language issues.
- Assessment of this competency requires typical resources normally used in a resources and infrastructure sector environment. Selection and use of resources for particular worksites may differ due to the site circumstances.
- Where applicable, physical resources should include equipment modified for people with disabilities.
- Access must be provided to appropriate learning and/or assessment support when required.

Method of assessment

This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:

- written and/or oral assessment of the candidate's required knowledge
- observed, documented and/or first hand testimonial evidence of the candidate's:
  - implementation of appropriate procedures and techniques for the safe, effective and efficient achievement of the required outcomes
  - consistently achieving the required outcomes
  - first hand testimonial evidence of the candidate's:
    - working with others to plan, prepare and apply the site risk management system
    - provision of clear and timely instruction and supervision by the individual of those involved in the applying of the site risk management system

Guidance information for assessment

Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.
## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| **Compliance documentation** | • legislative, organisation and site requirements and procedures  
| may include: | • manufacturer's guidelines and specifications  
| | • Australian standards  
| | • code of practice  
| | • Employment and workplace relations legislation  
| | • Equal Employment Opportunity and Disability Discrimination legislation  

| **Organisation's risk management policies, procedures and programs** may include: | • risk management policy  
| | • site procedures and work instructions for hazard identification  
| | • site procedures and work instructions for risk assessment, selection and implementing of risk control measures  
| | • site incident (accident) investigation requirements  
| | • site risk audits and investigations requirements  
| | • site consultative arrangements for employees in work area  
| | • site hazard report procedures  
| | • site operating procedures and instructions  
| | • site emergency and evacuation procedures  
| | • site purchasing policies and procedures  
| | • site plant and equipment maintenance and use instructions  
| | • site hazardous substances use and storage procedures and work instructions  
| | • site dangerous goods transport and storage procedures and work instructions  
| | • site OHS arrangements for on site contractors, visitors and members of the public  
| | • site First Aid provisions/medical practitioner contacts and attention instructions  
| | • site access procedures and instructions  

<table>
<thead>
<tr>
<th><strong>Risk management</strong> is:</th>
<th>• the culture, processes and structure that are directed towards the effective management of potential opportunities and adverse risk</th>
</tr>
</thead>
</table>
| **Risk management** may be applied to: | • statutory compliance  
• OHS  
• environment  
• quality  
• property security  
• business risks, such as:  
• credit management  
• capital expenditure  
• sales and marketing  
• finance and accounting |
| **Risk management processes are:** | • the systematic application of management policies, procedures and practices to the task of establishing the context, identifying, analysing, evaluating, treating, monitoring and communicating risk |
| **Hazard** is: | • a source of potential harm or a situation with a potential to cause loss |
| **Hazards identification** may occur through activities such as: | • workplace inspections in area of responsibility  
• consulting work team members  
• housekeeping  
• risk audits and review of audit reports  
• daily informal employee consultation and regular formal employee meetings  
• checking equipment before and during work  
• review of health, safety, environmental, quality and other risk related records |
| **Risk assessment** is: | • the overall process of risk analysis and risk evaluation |
| **The policy is:** | • the statement of overall intent and direction of the organisation in respect of the specific area of managerial responsibility |
| **Consultation** would typically include: | • regulatory authorities  
• tenderers  
• project managers  
• contractors  
• employees  
• community  
• customers  
• suppliers |
| Organisational consultation procedures | • formal and informal meetings  
| | • health and safety committees  
| | • other committees, such as, planning and purchasing  
| | • involvement of employees in management and planning meetings  
| | • early response to employee suggestions, requests, reports and concerns put forward to management  
| | • counselling/disciplinary processes  |

| Risk control | • the selection and implementation of appropriate options for dealing with risk  |

| Procedures for controlling risk | • removing the cause of the risk at its source (eliminating the hazard)  
| | • selecting control measures in accordance with the hierarchy (i.e. work through the hierarchy from most effective to least effective)  
| | • job/process/workplace re-design  
| | • consultation with employees and their representatives  |

| Monitoring | • checking, supervising, observing critically, or recording the progress of an activity, action or system on a regular basis in order to identify change  |

| Risk management records | • audit and inspection reports  
| | • hazard registers  
| | • risk analysis records  
| | • risk treatment reports  
| | • minutes of meetings (risk management, occupational health and safety, environmental etc)  
| | • induction, instruction, training and assessment  
| | • manufacturer's and supplier's information  
| | • dangerous goods and hazardous substances registers  
| | • plant and equipment maintenance and testing reports  
| | • workers compensation and rehabilitation records  
| | • First Aid/medical records  
| | • major incident and emergency response instructions  
| | • emergency contact lists  |

</thead>
<tbody>
<tr>
<td>First Release</td>
<td>This is an updated unit, based on and equivalent to SIRPDIS002A Deliver prescription medicines to customers outside the pharmacy.</td>
</tr>
</tbody>
</table>

Unit Descriptor
This unit describes the performance outcomes, skills and knowledge required to plan and carry out home delivery of dispensed medications and other pharmacy products to community pharmacy customers.

Application of the Unit
This unit applies to pharmacy assistants and dispensary assistants who work in community pharmacies.

A person undertaking this role is required to work under the supervision and direction of a pharmacist.

Licensing/Regulatory Information
All relevant federal, state or territory legislation, Pharmacy Board of Australia Guidelines, and established practice and quality assurance standards are to be met.

Pre-Requisites
SIRCHCS201 Support the supply of Pharmacy Medicines and Pharmacist Only Medicines

Employability Skills Information
This unit contains employability skills.
Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>

</tbody>
</table>

1. Confirm customer delivery requirements.
   1.1. Identify pharmacy products to be delivered to customer.
   1.2. Identify prescription items required.
   1.3. Confirm customer details.
   1.4. Confirm delivery information with the customer.

2. Prepare and plan prescription deliveries.
   2.1. Confirm that items are ready for delivery.
   2.2. Liaise with a pharmacist to confirm method of providing customer advice.
   2.3. Prepare items for delivery to meet handling and storage requirements.
   2.4. Confirm that delivery documentation is accurate and complete.
   2.5. Use available aids to plan the most efficient delivery route.
   2.6. Schedule deliveries to suit requirements of the pharmacy and customers.

3. Distribute medicine to customers outside the community pharmacy.
   3.1. Verify customer or agent identity and any special delivery instructions.
   3.2. Explain information provided on medicines and, where instructed by the pharmacist, question to confirm customer or agent’s understanding.
   3.3. Request a dated signature as evidence of receipt of goods.
   3.4. Arrange for pharmacist follow-up in situations requiring additional assistance or therapeutic advice.
   3.5. Finalise the sales transaction if appropriate.

4. Reconcile delivered items and records.
   4.1. Reconcile medicines and other items collected for delivery with items distributed.
   4.2. Reconcile cash payment with the value of items sold.
   4.3. Complete delivery documentation and records.
   4.4. Follow pharmacy procedures to make alternative arrangements where unplanned factors have prevented delivery of medications.
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - confirm that the person receiving medicines and delivery information is authorised to do so
  - confirm that the person receiving medicines is not a child
  - explain information contained on cautionary and advisory labels in a level of English suited to customer communication requirements
  - question to confirm that the customer correctly understands the information provided
  - invite further questions from the customer
  - seek direction from the dispensing pharmacist
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication

- literacy skills to:
  - follow pharmacy procedures
  - check prescription information
  - read directions and maps to locate addresses and plan efficient delivery routes

- planning and organising skills to:
  - plan delivery routes to achieve efficient delivery outcomes
  - arrange for a customer to make contact with a pharmacist where more detailed support or advice is required

- problem-solving skills to respond to situations where no authorised person is available to receive items

Required knowledge

- pharmacy procedures relating to:
  - delivery of prescription items to customers outside the pharmacy
  - response to unavailability of the customer or an authorised agent to accept delivery
  - responding to customer questions
  - arranging for a pharmacist to provide follow-up therapeutic advice and information to the customer
  - protecting security of self, product and cash
  - response in the event of theft, loss or accident

- product and delivery:
  - charges
  - payment options and procedures

- privacy principles as they relate to home delivery of medicines

- label information, such as:
- dosage regimen, e.g. dose time in relation to food
- frequency
- duration of treatment
- special storage requirements, e.g. cold chain
- role boundaries and responsibilities and circumstances under which referral to a pharmacist or other pharmacy staff is required
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- apply pharmacy procedures when delivering dispensed medicines and other products outside the pharmacy
- provide information in ways appropriate to customer needs and demonstrate relevant techniques to confirm understanding
- apply correct storage and transport conditions and any special delivery requirements for dispensed items
- recognise and arrange follow-up contact, in situations requiring referral to a pharmacist.

Context of and specific resources for assessment

Assessment must ensure that competency is:

- demonstrated over a period of time and observed by the assessor or the technical expert working in partnership with the assessor as described in the assessment
- demonstrated in a real workplace environment that meets relevant industry standards and which may include client interruptions and involvement in other related activities normally expected in the pharmacy.

Assessment must ensure access to:

- a range of customers or their agents with different locations and delivery requirements who are typical of the customer base
- dispensed items and other products for delivery to the customer or their agent
- dispensed items requiring special handling
- delivery documentation and record-keeping systems
- payment systems
- relevant documentation, such as:
  - customer details
  - delivery checklists
  - maps or location information
  - pharmacy procedures
  - real or simulated prescriptions
  - CMI.
Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate:
  - preparing for deliveries
  - delivering items to customers outside the pharmacy
  - completing documentation and records relevant to delivering prescription and other pharmacy items
  - seeking direction from the dispensing pharmacist
- review of portfolios of evidence and third-party workplace reports of on-the-job performance
- role plays to:
  - confirm communication skills that meet diverse customer requirements
  - demonstrate understanding of contingency management procedures
  - written or oral questions appropriate to the language and literacy level of the learner to test relevant underpinning knowledge.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Pharmacy products** may include:
- prescription medicines
- Pharmacy Medicines (S2)
- non-scheduled pharmacy products.

**Customer** may include people:
- from a range of social, cultural and ethnic backgrounds and with varying mental and physical abilities
- in their own home or contacting the pharmacy by phone
- in residential care settings
- with special needs, such as:
  - the elderly
  - infants
- who are:
  - drug or alcohol affected
  - emotionally unstable
  - mentally unstable
  - physically unwell.

**Customer details** may include:
- patient name
- delivery address
- telephone number
- suitable delivery times
- specific location advice.

**Delivery information** may include:
- items on the prescriptions to be dispensed
- other products required
- estimated delivery time
- persons authorised to accept delivery
- payment method.

**Ready for delivery** may include:
- assembled items are complete, clearly and correctly labelled, and match customer requirements
- a pharmacist has verified dispensed items
- required information and advice accompanies the items
- items are packaged appropriately to protect customer privacy and product integrity.

**Handling and storage** requirements may include:
- temperature control and cold chain items
- light-sensitive items
- heat-sensitive items.
Delivery documentation may include:

- prescription documentation to be signed by customer or agent
- self-care and health information
- other information supplied by a pharmacist
- delivery check sheets
- customer location details.

Information provided on medicines may include:

- pharmacy labels
- cautionary and advisory labels
- additional information or advice prepared by a pharmacist
- information provided by the supplier
- self-care and health information
- Consumer Medicine Information (CMI).

SITXCOM003A Deal with conflict situations

Modification History
Not applicable.

Unit Descriptor
Unit descriptor
This unit describes the performance outcomes, skills and knowledge required to resolve conflict situations with customers and colleagues. It also describes the resolution of escalated complaints. The unit covers the conflict resolution skills required to address conflicts that may arise in day-to-day work situations. It does not cover formal negotiation, counselling or conducting mediation.

This unit builds on the basic skills and knowledge found in other units that address communication, such as SITXCOM001A Work with colleagues and customers.

Application of the Unit
Application of the unit
This unit describes a complex communication skill to apply when resolving conflicts and complaints that may arise in the course of daily work. It applies to those working within the service industries in the full range of industry sectors and environments.

The unit applies mainly to senior operational personnel or supervisors and managers who operate autonomously and take responsibility for resolving conflicts and complaints.

Licensing/Regulatory Information
Not applicable.
Pre-Requisites

Prerequisite units  Nil

Employability Skills Information

Employability skills  The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Identify conflict situations.</td>
</tr>
<tr>
<td>1.1</td>
<td>Identify potential for conflict quickly and take swift and tactful action to prevent escalation.</td>
</tr>
<tr>
<td>1.2</td>
<td>Identify quickly situations where personal safety of customers or colleagues may be threatened and organise appropriate assistance.</td>
</tr>
<tr>
<td>1.3</td>
<td>Identify and use resources to assist in managing conflict where appropriate and according to organisation policy and procedures.</td>
</tr>
</tbody>
</table>
2 Resolve conflict situations.

2.1 Take responsibility for finding a solution to the conflict within scope of individual responsibility.

2.2 Deal with conflict sensitively, courteously and discreetly and take steps to minimise impact on other colleagues and customers.

2.3 Use effective communication skills to assist in management of the conflict.

2.4 Encourage all points of view, acknowledge them and treat them with respect.

2.5 Establish and agree on the nature and details of the conflict with all parties and assess the impact of the situation on them.

2.6 Determine possible options to resolve the conflict and promptly analyse and decide on the best solution in agreement with all parties, taking into account any organisation constraints.

2.7 Use accepted conflict resolution techniques to manage the conflict situation and develop solutions.

2.8 Complete any necessary documentation accurately and legibly within time constraints.

3 Evaluate conflict situations.

3.1 Seek and provide feedback on the conflict and its resolution where possible with the parties involved.

3.2 Evaluate and reflect on the situation and effectiveness of the solution.

3.3 Determine possible causes of workplace conflict and provide input for workplace enhancement and improvements.
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- communication skills to determine details and causes of the conflict through observation, questioning and active listening
- conflict resolution skills and strategies incorporating communication skills of:
  - assertiveness
  - listening
  - non-verbal communication
  - language style
  - problem-solving
  - negotiation
- ability to follow procedures for handling complaints.

The following knowledge must be assessed as part of this unit:

- types of conflict that typically occurs and typical causes
- conflict theory, including signs, stages, levels, factors involved and results
- group processes and roles people play
- organisational structures, and workplace cultures and policies
- organisation policy and procedures on conflicts and complaints, including any reporting requirements
- relevant regulatory, industrial and legislative requirements related to the handling of disputes, dealing with drug or alcohol-affected persons, situations where customers must be refused entry, ejection from premises and security provision.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.
EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- knowledge of conflict resolution techniques
- ability to apply conflict resolution techniques to resolve a range of different conflict situations in contexts appropriate to the job role and workplace.

Context of and specific resources for assessment

Assessment must ensure:

- activities that allow the candidate to address a range of commonly-occurring conflict situations that may be found in the workplace relating to the usual work roles of the candidate, such as handling customer complaints in a restaurant, resolving disputes with colleagues over work aspects, or dealing with contractors or suppliers who fail to meet obligations; for those undertaking generic pre-employment training, assessment must cover a range of industry contexts to allow for a broad range of vocational outcomes
- interaction with others to demonstrate appropriate interpersonal skills for resolving conflicts.
EVIDENCE GUIDE

Methods of assessment
A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate demonstrating complaint handling or negotiation skills, either in the workplace or through role-plays
- case studies to analyse and resolve conflict situations arising in various work contexts
- written or oral questions to assess underpinning theories related to conflict resolution
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SITXCCS002A Provide quality customer service
- SITXMGT001A Monitor work operations
- SITXHRM005A Lead and manage people
- SITXHRM007A Manage workplace diversity.

Assessing employability skills
Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.
RANGE STATEMENT

Conflict situations may relate to:

- customer complaints
- conflict among work colleagues
- refused entry
- drug or alcohol-affected persons
- ejection from premises
- problems or faults with a service or product
- delays or poor timing of product or service supply
- misunderstandings or communication barriers
- difficult or demanding customers
- customers with different or special needs or expectations.

Situations where personal safety of customers or colleagues may be threatened and assistance required may involve:

- drug or alcohol-affected persons
- people with guns or arms
- situations where someone has been or may be hurt
- people who appear to be violent or are threatening
- situations where customers refuse to leave or be pacified.

Customers or colleagues may be from a range of cultural backgrounds and may include:

- workmates
- hospitality or tourism customers
- outside contractors
- suppliers.

Resources to assist in managing conflict may include:

- senior staff
- other staff members
- internal security staff or police
- counsellors.
RANGE STATEMENT

Communication skills include:
- listening and active listening
- questioning techniques, such as asking the right question to elicit the other parties' needs
- asking questions to gain information, clarify ambiguities and adequately understand requirements
- rephrasing and repeating questions, requests and statements to confirm that they have been correctly understood
- empathising with the colleague or customer's situation while upholding organisation policy
- assertiveness
- non-verbal communication and recognition of non-verbal signs
- ability to speak clearly to be understood and use appropriate language, style and tone.

Organisation constraints may include:
- costs and budgets
- organisation policy on refunds or exchange
- lack of availability of replacement items, services or tickets.

Conflict resolution techniques may include:
- problem-solving
- negotiation
- use of appropriate communication skills.

Causes of workplace conflict may include:
- poor communication
- lack of information
- changes to practices and procedures
- cultural misunderstanding
- lack of empathy
- complaints
- workplace problems and issues.

Unit Sector(s)

Competency field

Communication and Teamwork
SITXEVT018B Develop a transport strategy for an event

Modification History
Not applicable.

Unit Descriptor
Unit descriptor  This unit describes the performance outcomes, skills and knowledge required to identify the transport needs for an event and develop an appropriate transport strategy.

Application of the Unit
Application of the unit  This unit applies to individuals organising events in any industry context. It is particularly relevant in the community, cultural, sporting and tourism sectors where event management is a key activity. This unit has particular application in the transport industry, where transport companies may be called upon to work on the development of an event transport strategy.

The unit does not cover the specialist skills required to manage and monitor large transport fleets, as these roles are undertaken by individuals working as transport specialists.

Licensing/Regulatory Information
Not applicable.

3 Develop transport logistics plan.  
3.1 Develop and document specific procedures to address transport operational requirements, considering potential new and improved approaches if appropriate.  
3.2 Identify critical tasks and allocate responsibilities and timelines.  
3.3 Allocate transport resources to maximise efficient use of space, cost effectiveness and profitability.  
3.4 Integrate human resource requirements into the logistics plan and liaise with appropriate colleagues.  
3.5 Develop and articulate contingency and critical incident procedures within the logistics plan.  
3.6 Provide briefings and relevant information to those involved in provision of transport services and to other stakeholders.  

4 Evaluate transport strategies.  
4.1 Evaluate efficiency and effectiveness of the transport strategy based on agreed evaluation criteria.  
4.2 Ensure outcomes of evaluation are incorporated into future event preparations.
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- planning and organisational skills to develop and manage transport logistics
- research and critical thinking skills to source and analyse information on transport options
- communication and negotiation skills to consult with stakeholders and negotiate arrangements with suppliers
- contingency management skills to address transport problems
- literacy skills to develop complex plans and documents for the management of event transport
- numeracy skills to work within event budgets and develop different scenarios for consideration.

The following knowledge must be assessed as part of this unit:

- broad event management process and role of transport planning in relation to other event management functions
- types of events that require the development of dedicated transport strategies
- sources of specialist assistance for complex transport planning
- different transport alternatives for consideration in the planning process
- general operational knowledge of the various transport options, including private and public variations for air and land transport
- technology and equipment used for coordination of transport services
- legislation, regulations and industry codes that affect transport planning
- risk management issues associated with event transport
- resource requirements for a transport strategy, including financial, human and physical resources
- efficient use of combined transport options to maximise use of space and profitability for event operations
- environmental access and site impacts and minimal impact practices to be considered in coordinating suitable transport options.

Evidence Guide

EVIDENCE GUIDE
EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- ability to analyse transport needs for an event and develop resource and cost efficient strategies and transport logistics plans
- knowledge of the factors to be considered when developing an event transport strategy and the particular risk and contingency management issues
- demonstration of skills through the development of a transport strategy and logistics plan for at least one complex event.

Context of and specific resources for assessment

Assessment must ensure:

- use of current information and resource options to develop the strategy
- involvement of and interaction with stakeholders and suppliers as part of the planning process.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- evaluation of event transport strategies and operational plans prepared by the candidate
- case studies to assess candidate's ability to develop transport strategies for a range of different events
- questions to assess detailed knowledge of different event transport issues and options
- review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.
EVIDENCE GUIDE

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Key event information may include:

- general nature of event
- event management structures
- level of government involvement
- location
- dates and times
- duration
- number and type of activities, such as sport or individual programmed events
- numbers attending
- scope of physical staging elements.
RANGE STATEMENT

**Event stakeholders** may include:
- organising committees
- media
- participants, competitors and delegates
- officials
- spectators or audiences
- VIPs
- volunteers and paid staff
- authorities, such as local government, emergency services and roads authorities.

**Specialist assistance** may include:
- transport experts
- local authorities
- emergency services.

**Authorities** may include:
- local government
- state government, such as state roads authorities
- land management and protection agencies
- emergency services, including police, ambulance and fire service
- other industry bodies, such as certifying bodies.

**Transport options and resources** may include:
- public transport system, including:
  - trains
  - bus network
  - ferries
  - light rail and trams
- private transport system, including:
  - airlines
  - coach services
  - taxis
  - hire cars, minibuses and limousines
  - private vehicles
  - charter services
  - dedicated disabled transport, including taxis and buses
  - animal transport.
RANGE STATEMENT

*Transport issues and risks* may relate to:

- general nature of location, such as major metropolitan, regional, country or remote
- restricted access
- road surface or terrain
- distance between event venues
- distance between event venues and other facilities such as accommodation and service centres
- distance between accommodation providers and venues
- traffic issues, such as peak periods and traffic regulations
- environmental sensitivity of access areas and the event site itself.

*Broader event management constraints and issues* may include:

- overall event management structures
- specific event objectives
- budget
- human resources
- other staging requirements
- factors external to the event, such as other events
- requirements to manage minimal impact to the natural environment of access to and the site itself.

*Evaluation criteria* may relate to:

- efficient use of combined transport options to maximise use of space and profitability for the event operator
- service quality
- environmental targets
- financial targets
- attendance targets
- time targets for movement of people and equipment.
RANGE STATEMENT

Procedures to address transport operational requirements may relate to:

- contacting relevant authorities for information and permission
- available transport and timetables
- contingency and backup transport options
- security
- vehicle refuelling
- parking
- pick-up and drop-off procedures
- human resource requirements, including marshals, guides and drivers
- training requirements
- adequate provision for buses
- emergency services presence and access
- arrival of clients - dump or trickle
- adequate provision for disabled people.

Human resource requirements may include:

- drivers
- guides
- volunteers
- marshals
- interpreters
- on-site supervisors.

Contingency and critical incident procedures may relate to:

- equipment breakdown
- traffic problems
- adverse weather
- event staff sickness
- internal and external delays to event.

Briefings and relevant information may include:

- summary procedures
- emergency contact details
- contingency procedures
- maps and other geographical information, including route maps between venues and sites and information for venues, sites and local area.

<td>2.3 Identify and report deviations according to organisation policy and significance of deviation.</td>
</tr>
</tbody>
</table>
ELEMENT | PERFORMANCE CRITERIA
--- | ---
2.4 | Investigate appropriate options for more effective management of deviations.
2.5 | Advise *appropriate colleagues* of budget status in relation to targets, within agreed timeframes.

3 | Identify and evaluate options for improved budget performance.
3.1 | Assess existing costs and resources and proactively identify areas for improvement.
3.2 | Discuss desired budget outcomes with relevant colleagues.
3.3 | Undertake appropriate *research to investigate new approaches to budget management*.
3.4 | Define and communicate clearly the benefits and disadvantages of new approaches.
3.5 | Take account of impacts on customer service levels and colleagues in developing new approaches.
3.6 | Present recommendations for *budget management* clearly and logically to the appropriate person or department.

4 | Complete financial and statistical reports.
4.1 | Complete all required *financial and statistical reports* accurately and within designated timelines.
4.2 | Produce clear and concise information to enable informed decision making.
4.3 | Forward reports promptly to the appropriate person or department.
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- research, critical thinking and problem-solving skills to investigate and develop options for potential budget performance improvements
- communication skills to discuss budget requirements and to seek and provide feedback
- literacy skills to interpret a wide range of business and financial documents, and to create accurate budget reporting and recommendations documentation
- numeracy skills to interpret and use budget figures in day-to-day work operations, and to develop budget estimates and scenarios for performance improvement.

The following knowledge must be assessed as part of this unit:

- knowledge and understanding of budgets, specifically how a budget is structured and how to interpret a budget
- any legislative requirements in relation to disbursement of funds and record keeping
- techniques related to maximising budget performance relevant to the organisation or industry sector
- budgeting terminology relevant to a specific industry context
- financial reporting procedures and cycles relevant to the organisation or industry sector.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.
EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- knowledge of basic budget principles and structures
- budgeting terminology relevant to a specific industry context
- ability to monitor budgeted income and expenditure and to identify ways of improving budget performance
- understanding of the main types of budgets that apply in the specific organisation or industry context
- management of and reporting on a budget for a specific project or operational area over a period of time so that the monitoring and implementation aspects of managing finances within a budget can be assessed.

Context of and specific resources for assessment

Assessment must ensure:

- use of figures and data that reflect the realistic financial operating conditions of industry.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- evaluation of financial reports detailing financial performance of projects or activities conducted by the candidate
- evaluation of reports produced by the candidate detailing the processes undertaken to manage finances within a budget
- case studies and problem-solving to assess application of the principles of budget management to different situations
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SITXFIN005A Prepare and monitor budgets.
EVIDENCE GUIDE

Assessing employability skills  Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

**Budgets** may include:
- cash budgets
- departmental budgets
- wage budgets
- project budgets
- purchasing budgets
- sales budgets
- cash flow budgets
- budgets for micro, small, medium or large businesses.

**Appropriate colleagues** may include:
- operational staff
- managers
- internal or external financial specialists.
RANGE STATEMENT

Research to investigate new approaches may include:

- discussions with existing suppliers
- sourcing new suppliers
- evaluating staffing and rostering requirements
- reviewing operating procedures
- potential roster changes.

Financial and statistical reports may relate to:

- daily, weekly and monthly transactions and reports
- break-up by department
- occupancy
- sales performance
- commission earnings
- sales returns
- yield management
- commercial account activity.

Sector      Cross-Sector

Competency field

Competency field Finance
SITXFSA001A Implement food safety procedures

Modification History
Not applicable.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to handle food safely during the storage, preparation, display, service and disposal of food within a range of service industry operations. It requires the ability to follow predetermined procedures as outlined in an organisation food safety program.

This unit is one of three hierarchical units describing varying levels of participation in food safety processes:

- SITXOHS002A Follow workplace hygiene procedures
- SITXFSA001A Implement food safety procedures
- SITXFSA002A Develop and implement a food safety program.

Food safety is nationally legislated by the Food Standards Australia New Zealand Act 1991 which provides for the operation of a statutory authority known as Food Standards Australia New Zealand.

The Australia New Zealand Food Standards Code (the Code) developed by this authority contains an individual standard for food safety practices. This unit of competency complies with the legislative requirements for food safety and safe food handling practices as outlined in the Code.

The legislative requirement for a business to comply with the national standard for food safety practices, along with training and certification requirements, differ between state and territory governments.

In some cases food handlers and especially designated food safety supervisors, may be required to formally achieve competence in implementing safe food handling practices through a registered training organisation that must use this unit as the basis for their training.
Application of the Unit

Application of the unit

This unit has application to hospitality, commercial catering and retail venues where food is stored, prepared, displayed, served and disposed of. It applies to venues that operate a permanent or temporary kitchen or smaller food preparation area, including restaurants, cafes, clubs, hotels, attractions, events and conference venues, fast food restaurants, retail food outlets such as sandwich shops and food court outlets. It would apply to tour operators involved in the preparation and service of food at temporary sites.

Other industries will need to access industry-specific food safety units of competency.

Safe food handling practices are based on policies and procedures outlined in an organisation food safety program. The program and its procedures would normally be based on the hazard analysis and critical control points (HACCP) method but this unit can apply to other food safety systems.

This unit applies to frontline operational personnel who work under supervision and guidance and operate within predefined organisational food safety procedures. This function is undertaken by a diverse range of people, such as cooks, chefs, catering staff and kitchen hands, food and beverage attendants, cafe and fast food outlet cooking crew and sales people, and owner-operators of small business catering operations or retail food outlets.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units

This unit must be assessed after the following prerequisite unit:

- SITXOHS002A Follow workplace hygiene procedures.
Employability Skills Information

Employability skills

The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- operation of equipment, especially how to calibrate, use and clean a temperature probe and how to identify faults
- literacy skills to read and interpret relevant components of organisation food safety program, including policies, procedures and flow charts that identify critical control points and to complete basic documentation relating to monitoring food safety
- numeracy skills to take and record temperatures and to calculate times.

The following knowledge must be assessed as part of this unit:

- basic understanding of federal, and state or territory food safety legislative compliance requirements, contents of national codes and standards that underpin regulatory requirements, and local government food safety regulations and inspection regimes
- working knowledge of relevant components of the organisation food safety program, especially policies, procedures, product specifications and the use of any monitoring documents
- consequences of failure to observe food safety policies and procedures
- basic understanding of HACCP principles, procedures and processes
- critical control points for the specific food production system and the predetermined methods of control, especially time and temperature controls used in the storage, preparation, display, service and disposal of food
- meaning of hazardous foods, especially as described by local legislation and national food codes
- high risk customer groups (those who may have a higher than average risk of harm from food contamination), such as:
  - children or babies
  - pregnant women
  - aged persons
  - people with immune deficiencies or allergies
- methods of food storage, production, display, service and disposal for the industry sector and food business, especially appropriate temperature levels for each of these processes
- broad understanding of the main types of safety hazards and contamination that may be found in the main food types handled by the industry sector and food business
- broad understanding of the conditions for development of microbiological contamination for the main food types handled by the industry sector and food business
- broad understanding of the appropriate environmental conditions, including temperature controls, for the storage of the main food types handled by the industry sector and food business
REQUIRED SKILLS AND KNOWLEDGE

- temperature danger zone for the main food types handled by the industry sector and food business and the two-hour and four-hour rule
- principles and methods of safe food handling
- choice and application of cleaning, sanitising and pest control equipment and materials.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- ability to access and interpret safe food handling procedures and consistently apply these during day-to-day food handling activities
- knowledge of critical control points and methods of food hazard control for each critical point
- project or work activities that show the candidate's ability to apply safe food handling practices on multiple occasions across a range of different food handling circumstances to ensure consistency in the application of food safety procedures.
EVIDENCE GUIDE

Context of and specific resources for assessment

Assessment must ensure:

- access to a fully equipped industry-realistic food preparation environment, such as a commercial kitchen, catering production line, or food preparation area of a food outlet using the full range of equipment currently used in the service industries to store, prepare, display, serve and dispose of food
- access to current regulatory documents distributed by key federal, state or territory, and local government agencies, such as plain English legislative publications, and codes and standards outlining food safety requirements
- access to a food safety program inclusive of policies and procedures
- use of real ingredients and food items.

Methods of assessment

A range of assessment methods should be used to assess the practical skills and knowledge required to implement food safety procedures. The following examples are appropriate for this unit:

- direct observation of the candidate completing tasks in the food handling facility according to food safety policies and procedures
- case studies to assess ability to react to a range of incidents where hazards have not been controlled
- oral or written questions to assess knowledge of food safety legislative requirements, policies and procedures
- oral or written questions to assess knowledge of food hazards and methods of controlling hazards
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- any commercial cookery, commercial catering, patisserie, Asian cookery or food and beverage unit directly involving food preparation.
EVIDENCE GUIDE

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Policies and procedures may relate to:

- food receiving, storage, preparation, display, service and disposal
- methods of food hazard control for each critical point
- systematic monitoring of hazard controls and record keeping
- personal hygiene, suitable dress and personal protective equipment and clothing
- record maintenance
- corrective actions when hazards are found not to be under control
- pest control
- cleaning and sanitation
- equipment maintenance.
RANGE STATEMENT

Food hazards may be:

- anything related to food, including work practices and procedures, that have a potential to harm the health or safety of a person
- actual or potential
- chemical, microbiological or physical
- any food contaminated with chemical or microbiological elements
- foods highly susceptible to microbiological contamination
- food containing bacteria, moulds and yeast
- food containing broken glass, metal or foreign objects
- food containing chemicals and natural poisons
- insects and vermin
- processes where food is vulnerable to contamination including:
  - requirements for food to be touched by hand
  - requirements for re-thermalisation or defrosting
  - displays of food and buffets
  - working with temperatures that promote the rapid growth of micro-organisms.

Critical control points are those where there is high risk of contamination or food spoilage, including:

- receiving
- storing
- preparing
- processing
- displaying
- packaging
- serving
- transporting
- disposing.
RANGE STATEMENT

**Food safety monitoring** may involve:
- monitoring and recording temperature of cold and hot storage equipment
- monitoring and recording food temperatures using a temperature probe
- checking and recording that food is stored within appropriate time limits of receipt of goods
- visual examination of food for quality review
- bacterial swabs and counts
- chemical tests.

**Incidents where food hazards are found not to be under control** may include:
- food poisoning
- customer complaints
- misuse of single use items
- stocks of out-of-date foodstuffs
- spoilt or contaminated food
- unclean equipment
- existence of pests and vermin.

**Food types** may include:
- eggs
- dairy
- meat and fish
- fruit and vegetables
- dried goods
- frozen goods.

**Food prepared, served and sold to customers under other conditions** may involve:
- displaying any type of food for self-service, such as:
  - buffets
  - salad bars
  - condiments
  - tea and coffee
  - providing drink dispensing equipment
  - pre-packaging food items
  - displaying and selling pre-packaged food.
RANGE STATEMENT

Ensuring the safety of food served and sold to customers under other conditions may involve:

- supervising the display of food to prevent contamination by customers
- removing contaminated food without delay
- providing separate serving utensils for each dish
- providing protective barriers
- displaying food under temperature control
- using packaging materials suitable for use on the particular foodstuff
- ensuring that packaging is not damaged during packaging or display process
- ensuring that damaged packaging does not allow contamination.

Items intended for single use may include:

- disposable cutlery, e.g. plastic or wooden spoons or stirrers
- disposable plates, mugs, cups and bowls
- individually packaged sugars
- individually packaged condiments, e.g. tomato sauce
- individually packaged jams and spreads
- individually packaged serves of coffee, tea and whitener
- face wipes and serviettes.

Maintenance to ensure cleanliness and safe operation of equipment may involve:

- removal of food waste
- removal of grease
- removal of dirt
- removal of animal or pest waste and cleaning of affected area
- recalibration of measurement and temperature controls.

Food identified for disposal may be:

- subject to recall
- not safe, or suspected of not being safe, for consumption
- destroyed
- disposed of so that it cannot be used for human consumption
- returned to supplier.
Unit Sector(s)

Sector: Cross-Sector

Competency field

Competency field: Food Safety
SITXOHS002A Follow workplace hygiene procedures

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to apply good hygiene practices within a range of service industry operations. It requires the ability to follow predetermined procedures, identify and control simple hazards and take particular hygiene measures to ensure the non-contamination of food and other items that might put customers, colleagues and self at a health risk.

This unit is one of three hierarchical units describing varying levels of participation in food safety processes:

- SITXOHS002A Follow workplace hygiene procedures
- SITXFSA001A Implement food safety procedures
- SITXFSA002A Develop and implement a food safety program.

Food safety is nationally legislated by the Food Standards Australia New Zealand Act 1991 which provides for the operation of a statutory authority known as Food Standards Australia New Zealand. The Australia New Zealand Food Standards Code (the Code) developed by this authority contains an individual standard for food safety practices. A large component of that standard deals with the health and hygiene of food handlers. This unit of competency complies with the legislative requirements for food safety and hygiene practices as outlined in the Code.

The legislative requirement for a business to comply with the national standard for food safety practices, along with training and certification requirements, differs between state and territory governments.

In some cases food handlers, especially designated food safety supervisors, may be required to formally achieve competence in hygiene practices through a registered training organisation that may use this unit as the basis for their training.
Application of the Unit

Personal hygiene practices underpin a range of service industry activities. They are particularly important within a food safety regime, but can also apply to housekeeping activities and anywhere where poor hygiene could provide a contamination risk. Poor hygiene practices can risk the health of customers, colleagues and self.

For the purposes of food safety, this unit only has application to hospitality, commercial catering and retail venues where food is stored, prepared, displayed and served. It will apply to any venue that operates a permanent or temporary kitchen or smaller food preparation area, such as restaurants, cafes, clubs, hotels, attractions, events and conference venues, fast food restaurants, retail food outlets such as sandwich shops and food court outlets. It would apply to tour operators involved in the preparation and service of food at temporary sites.

Other industries will need to access industry-specific food safety units of competency.

This unit applies to frontline operational personnel who work under close supervision and guidance from others during the normal course of their daily activities. They would be required to apply little discretion and judgement because they operate within predefined organisational hygiene procedures. Personal hygiene practices apply to all personnel operating at all levels within the service industries, such as kitchen hands, cooks, chefs, catering staff, food and beverage attendants, housekeeping and, laundry staff, sandwich hands, cafe and fast food outlet cooking crew and sales people and owner-operators of small business catering operations or retail food outlets.

Licensing/Regulatory Information

Prerequisite units  Nil

Employability Skills Information

Employability skills  The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Follow hygiene procedures and identify hygiene hazards.</td>
<td>1.1 Access and follow hygiene procedures and policies correctly and consistently according to organisation and legal requirements to ensure health and safety of customers and colleagues.</td>
</tr>
<tr>
<td></td>
<td>1.2 Identify and report poor organisation practices that are inconsistent with hygiene procedures.</td>
</tr>
<tr>
<td></td>
<td>1.3 Identify hygiene hazards that may affect the health and safety of customers, colleagues and self.</td>
</tr>
<tr>
<td></td>
<td>1.4 Take action to remove or minimise the hazards within</td>
</tr>
</tbody>
</table>
ELEMENT | PERFORMANCE CRITERIA
--- | ---
 | scope of individual responsibility and according to organisation and legal requirements.
 | Promptly report hygiene hazards to appropriate person for follow up where control of hazard is beyond the scope of individual responsibility.
 | Report any personal health issues.
 | Report any personal health issues that are likely to cause a hygiene risk.
 | Report incidents of food contamination that have resulted from the personal health issue.
 | Do not participate in food handling activities where there is a risk of food contamination as a result of the health issue.
 | Prevent food and other item contamination.
 | Maintain clean clothes, wear required personal protective clothing and only use organisation-approved bandages and dressings to prevent contamination to food.
 | Ensure that no clothing or other items worn contaminate food.
 | Prevent unnecessary direct contact with ready to eat food.
 | Do not allow food to become contaminated with any body fluids or tobacco product from sneezing, coughing, blowing nose, spitting, smoking or eating over food or food preparation surfaces.
 | Maintain the use of clean materials and clothes and safe and hygienic practices to ensure that no cross-contamination of other items in the workplace occurs.
 | Wash hands at appropriate times and follow hand washing procedures correctly and consistently according to organisation and legal requirements.
 | Wash hands using appropriate facilities.
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- communication skills to verbally report hygiene hazards and poor organisation practice
- literacy skills to read and interpret relevant organisation policies, procedures and diagrams that identify good hygiene practices.

The following knowledge must be assessed as part of this unit:

- very basic understanding of federal, and state or territory food safety legislative compliance requirements, contents of national codes and standards that underpin regulatory requirements, and local government food safety regulations
- working knowledge of organisation personal hygiene policies and procedures
- ramifications of failure to observe hygiene policies and procedures
- broad understanding of the general hazards in handling food, linen, laundry and garbage, including major causes of contamination and cross-infection
- sources and effects of microbiological contamination of food and other items that would require protection in the industry sector and business
- basic understanding of the choice and application of cleaning and sanitising equipment and materials.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.
EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- ability to access and interpret hygiene procedures and consistently apply these during day-to-day activities
- understanding of the importance of following hygiene procedures and of the potential implications of disregarding those procedures
- project or work activities that show the candidate's ability to apply good hygiene practices on multiple occasions in a range of different operational circumstances to ensure consistency in the application of hygiene procedures.

Context of and specific resources for assessment

Assessment must ensure:

- access to current regulatory documents distributed by key federal, state or territory, and local government agencies such as plain English legislative publications, codes and standards outlining food safety requirements
- access to hygiene policies and procedures
- project or work activities that show candidates' ability to apply good hygiene practices within the context of the particular industry sector in which they are working or seeking work; for those undertaking generic pre-employment training, assessment must cover a range of industry contexts to allow for a broad range of vocational outcomes
- use of real products, materials and equipment.
EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate carrying out work tasks that involve following hygiene procedures
- oral and written questions about hygiene principles and practices, policies and procedures
- oral or written questions to assess knowledge of food hygiene legislative requirements
- case studies to assess ability to react to a range of incidents where hygiene hazards exist
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SITHACS005A Prepare rooms for guests
- SITHACS007A Launder linen and guest clothes
- SITXFSA001A Implement food safety procedures.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.
RANGE STATEMENT

Hygiene procedures may relate to:

- personal hygiene
- safe and hygienic handling of food and beverages
- regular hand washing
- correct food storage
- suitable dress and personal protective equipment and clothing
- avoidance of cross-contamination
- hygienic cleaning practices to avoid cross-contamination
- use of cleaning equipment, clothes and materials to avoid cross-contamination
- safe handling and disposal of linen and laundry
- appropriate handling and disposal of garbage
- cleaning and sanitising
- procedures documented in the organisation food safety program
- procedures covered by staff training programs
- procedures required by the national food safety code.

Poor organisation practices may include:

- poor personal hygiene practices
- poor food handling practices that may result in the contamination of food
- poor cleaning practices that may result in cross-contamination of food and other items
- practices inconsistent with the organisation's food safety program
- outdated practices not in keeping with current organisation activities.
RANGE STATEMENT

**Hygiene hazards** may include:
- contaminated food
- vermin
- airborne dust
- items such as linen, tea towels and towels that may be contaminated with human waste, such as blood and body secretions
- dirty equipment and utensils
- contaminated garbage
- use of practices not in keeping with current organisation activities
- colleagues without appropriate training or understanding of good hygiene practices, policies and procedures
- equipment not working correctly, such as fridge and temperature probes.

**Health issues** may relate to:
- food-borne diseases
- airborne diseases
- infectious diseases.

**Other items worn** may include:
- hair accessories
- jewellery
- watches
- bandages.

**Cross-contamination of other items in the workplace** may involve:
- infected linen
- items such as linen, tea towels and towels that may be contaminated with human waste, such as blood and body secretions
- dirty equipment and utensils
- spreading bacteria from bathroom or bedroom areas to kitchen areas in an accommodation facility.
RANGE STATEMENT

*Washing hands at appropriate times* might include:

- immediately before working with food
- immediately after handling raw food
- before commencing or recommencing work with food
- immediately after using the toilet
- immediately after smoking, coughing, sneezing, blowing the nose, eating, drinking, and touching the hair, scalp or any wound.

*Appropriate facilities* for hand washing may include:

- warm running water
- soap
- single use towels
- designated hand washing sink.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to plan and organise the assessment process, including recognition of prior learning (RPL), in a competency-based assessment system. It also includes the development of simple assessment instruments.

Application of the Unit

This unit typically applies to assessors and workplace supervisors with assessment planning responsibilities; and trainers or other assessors responsible for planning assessment, including RPL. The unit is suitable for those with an existing assessment strategy which documents the overall framework for assessment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

**Required skills**

- cognitive interpretation skills to:
  - interpret competency standards and other assessment documentation, including material relating to reasonable adjustment
  - identify opportunities for integrated competency assessment
  - contextualise competency standards to the operating assessment environment, including RPL
  - consider access and equity needs of diverse candidates
- technology skills to use appropriate equipment and software to communicate effectively with others
- research and evaluation skills to:
  - obtain competency standards, assessment tools and other relevant assessment resources
  - research candidate characteristics and any reasonable adjustment needs
  - evaluate feedback, and determine and implement improvements to processes
- literacy skills to read and interpret relevant information to design and facilitate assessment and recognition processes
- communication skills to discuss assessment, including RPL processes with clients and other assessors
- interpersonal skills to:
  - demonstrate sensitivity to access and equity considerations and candidate diversity
  - promote and implement equity, fairness, validity, reliability and flexibility in planning an assessment processes.

**Required knowledge**

- ethical and legal requirements of an assessor
- competency-based assessment, including:
  - work focused
  - criterion referenced
  - standards based
  - evidence based
- different purposes of assessment and different assessment contexts, including RPL
- how to read and interpret the identified competency standards as the benchmarks for assessment
- how to contextualise competency standards within relevant guidelines
- four principles of assessment and how they guide the assessment process
- purpose and features of evidence, and different types of evidence used in competency-based assessments, including RPL
- rules of evidence and how they guide evidence collection
- different types of assessment methods, including suitability for collecting various types of evidence
• assessment instruments and their purpose; different types of instruments; relevance of different instruments for specific evidence-gathering opportunities.
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| Context of and specific resources for assessment | Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided. Assessment must ensure access to training products, such as training packages and accredited course documentation. |

| Method of assessment | Guidance information for assessment |
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Purposes of assessment/ RPL may include: | Recognising current existing competence of candidates  
|                                            | Determining if competence has been achieved following learning  
|                                            | Establishing candidate progress towards achievement of competence  
|                                            | Determining language, literacy and numeracy needs of candidates  
|                                            | Certifying competence through a qualification or Statement of Attainment  
|                                            | Licensing or regulatory requirements. |

| Context of assessment/ RPL may include: | Environment in which the assessment/RPL will be carried out, including real or simulated workplace  
|                                        | Opportunities for collecting evidence in a number of situations  
|                                        | Relationships between competency standards and:  
|                                        | Evidence to support RPL  
|                                        | Work activities in the candidate’s workplace  
|                                        | Learning activities  
|                                        | Who carries out the assessment/RPL. |

| Organisational, legal and ethical requirements may include: | Assessment system policies and procedures  
|                                                           | Assessment strategy requirements  
|                                                           | Reporting, recording and retrieval systems for assessment, including RPL  
|                                                           | Quality assurance systems  
|                                                           | Business and performance plans  
|                                                           | Access and equity policies and procedures  
|                                                           | Collaborative and partnership arrangements  
|                                                           | Defined resource parameters  
|                                                           | Mutual recognition arrangements  
|                                                           | Industrial relations systems and processes, awards, and enterprise agreements  
|                                                           | Australian Quality Training Framework  
|                                                           | Registration scope  
|                                                           | Human resources policies and procedures  
|                                                           | Legal requirements, including: |
- anti-discrimination
- equal employment opportunity
- job role, responsibilities and conditions
- relevant industry codes of practice
- confidentiality and privacy requirements
- OHS considerations, including:
  - ensuring OHS requirements are adhered to during the assessment process
  - identifying and reporting OHS hazards and concerns to relevant personnel.

**Benchmarks for assessment/RPL** may include:
- criterion against which the candidate is assessed or prior learning recognised, which may be:
  - competency standard/unit of competency
  - assessment criteria of course curricula
  - performance specifications of an enterprise or industry
  - product specifications.

**Types of evidence** may include:
- direct
- indirect
- supplementary.

**Rules of evidence** ensure that evidence collected is:
- valid
- sufficient
- authentic
- current.

**Assessment methods** are the particular techniques used to gather evidence and may include:
- direct observation, for example:
  - real work/real time activities at the workplace
  - work activities in a simulated workplace environment
- structured activities, for example:
  - simulation exercises and role-plays
  - projects
  - presentations
  - activity sheets
- questioning, for example:
  - written questions, e.g. on a computer
  - interviews
  - self-assessment
  - verbal questioning
  - questionnaires
  - oral or written examinations (applicable at higher AQF levels)
- portfolios of evidence, for example:
- collection of work samples compiled by candidate
- product with supporting documentation
- historical evidence
- journal or log book
- information about life experience
- review of products, for example:
  - testimonials and reports from employers and supervisors
  - evidence of training
  - authenticated prior achievements
  - interview with employer, supervisor, or peer.

**Assessment plan** may include:

- overall planning document describing:
  - what is to be assessed
  - when assessment is to take place
  - where assessment is to take place
  - how assessment is to take place.

**Simple assessment instruments** may include:

- instruments developed by an assessor as part of formative or summative assessment activities, including:
  - profiles of acceptable performance measures
  - templates and proformas
  - specific questions or activities
  - evidence and observation checklists
  - checklists for the evaluation of work samples
  - recognition portfolios
  - candidate self-assessment materials
  - instruments developed elsewhere that have been modified by the assessor for use with a particular client group.

**Available assessment instruments** may include:

- commercially available instruments
- those created by others inside the registered training organisation.

**Map assessment** means:

- showing a clear relationship between the evidence and the requirements of the unit.

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>1. Prepare for assessment</th>
<th>1.1 Interpret <em>assessment plan</em> and confirm organisational, legal and ethical requirements for conducting assessment with relevant people</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>1.2 Access and interpret relevant <em>benchmarks for assessment</em> and nominated <em>assessment tools</em> to confirm the requirements for evidence to be collected</td>
</tr>
<tr>
<td></td>
<td>1.3 Arrange identified material and physical resource requirements according to assessment system policies and procedures</td>
</tr>
<tr>
<td></td>
<td>1.4 Organise <em>specialist support</em> required for assessment</td>
</tr>
<tr>
<td></td>
<td>1.5 Explain, discuss and agree details of the assessment plan with candidate</td>
</tr>
<tr>
<td>2. Gather quality evidence</td>
<td>2.1 Use agreed <em>assessment methods</em> and instruments to gather, organise and document evidence in a format suitable for determining competence</td>
</tr>
<tr>
<td></td>
<td>2.2 Apply the principles of assessment and rules of evidence in gathering quality evidence</td>
</tr>
<tr>
<td></td>
<td>2.3 Determine opportunities for evidence gathering in actual or simulated activities through consultation with the candidate and relevant personnel</td>
</tr>
<tr>
<td></td>
<td>2.4 Determine opportunities for integrated assessment activities and document any changes to assessment instruments where required</td>
</tr>
<tr>
<td>3. Support the candidate</td>
<td>3.1 Guide candidates in gathering their own evidence to support recognition of prior learning (RPL)</td>
</tr>
<tr>
<td></td>
<td>3.2 Use appropriate communication and interpersonal skills to develop a professional relationship with the candidate that reflects sensitivity to <em>individual differences</em> and enables two-way <em>feedback</em></td>
</tr>
<tr>
<td></td>
<td>3.3 Make decisions on reasonable adjustments with the candidate, based on candidate’s needs and characteristics</td>
</tr>
<tr>
<td></td>
<td>3.4 Access required specialist support in accordance with the assessment plan</td>
</tr>
<tr>
<td></td>
<td>3.5 Address any OHS risk to person or equipment immediately</td>
</tr>
<tr>
<td>4. Make the assessment decision</td>
<td>4.1 Examine collected evidence and evaluate it to ensure that it reflects the evidence required to demonstrate competence</td>
</tr>
<tr>
<td></td>
<td>4.2 Use judgement to infer whether competence has been demonstrated, based on the available evidence</td>
</tr>
<tr>
<td></td>
<td>4.3 Make assessment decision in line with agreed assessment procedures and according to agreed assessment plan</td>
</tr>
<tr>
<td></td>
<td>4.4 Provide clear and constructive feedback to candidate regarding</td>
</tr>
</tbody>
</table>
| 5. Record and report the assessment decision | 5.1 Record assessment outcomes promptly and accurately  
5.2 Complete and process an assessment report according to agreed assessment procedures  
5.3 Inform other relevant parties of the assessment decision according to confidentiality conventions |
| 6. Review the assessment process | 6.1 Review the assessment process in *consultation* with relevant people to improve own future practice  
6.2 Document and record the review according to relevant assessment system policies and procedures |
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analysis and interpretation skills to:
  - break down competency standards
  - interpret assessment tools and other assessment information, including those used in RPL
  - identify candidate needs
  - make judgements based on assessment of available evidence
- observation skills to:
  - recognise candidate’s prior learning
  - determine candidate’s performance
  - identify when candidate may need assistance during the assessment processes
- research and evaluation skills to:
  - access required human and material resources for assessment
  - access assessment system policies and procedures
  - access RPL policies and procedures
  - evaluate evidence
  - evaluate assessment process
- cognitive skills to:
  - weigh up the evidence and make a judgement
  - consider and recommend reasonable adjustments
- decision-making skills to:
  - recognise a candidate’s prior learning
  - make a decision on a candidate’s competence
- literacy skills to:
  - read and interpret relevant information to conduct assessment
  - prepare required documentation and records or reports of assessment outcomes in required format
- communication and interpersonal skills to:
  - explain the assessment, including RPL process
  - give clear and precise instructions
  - ask effective questions
  - provide clarification
  - discuss process with other relevant people
  - give appropriate feedback
  - discuss assessment outcome
  - use language appropriate to candidate and assessment environment
  - establish a working relationship with candidate.
Required knowledge

- competency-based assessment, including:
  - vocational education and training as a competency-based system
  - criterion-referenced assessment as distinct from norm-referenced assessment
  - competency standards as the basis of qualifications
  - structure and application of competency standards
  - principles of assessment and how they are applied
  - rules of evidence and how they are applied
  - range of assessment purposes and assessment contexts, including RPL
  - different assessment methods, including suitability for gathering various types of evidence, suitability for content of units, and resource requirements and associated costs
  - reasonable adjustments and when they are applicable
  - types and forms of evidence, including assessment instruments that are relevant to gathering different types of evidence used in competency-based assessment, including RPL
  - potential barriers and processes relating to assessment tools and methods
  - assessment system, including policies and procedures established by the industry, organisation or training authority
- RPL policies and procedures established by the organisation
- cultural sensitivity and equity considerations
- relevant policy, legislation, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the vocational education and training sector, such as:
  - copyright and privacy laws in terms of electronic technology
  - security of information
  - plagiarism
  - training packages and competency standards
  - licensing requirements
  - industry and workplace requirements
  - duty of care under common law
  - recording information and confidentiality requirements
  - anti-discrimination, including equal employment opportunity, racial vilification and disability discrimination
  - workplace relations
  - industrial awards and enterprise agreements
- OHS responsibilities associated with assessing competence, such as:
  - requirements for reporting hazards and incidents
  - emergency procedures
  - procedures for use of relevant personal protective equipment
  - safe use and maintenance of relevant equipment
- sources of OHS information.

**Evidence Guide**

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>Evidence of the ability to:</th>
</tr>
</thead>
</table>
| **Critical aspects for assessment and evidence required to demonstrate competency in this unit** | - assess competence of a number of candidates within the vocational education and training context against different units of competency or accredited curricula, following the relevant assessment plan  
- assess at least one candidate for RPL  
- consider reasonable adjustment and the reasons for decisions in at least one assessment  
- cover an entire unit of competency and show:  
  - the application of different assessment methods and instruments involving a range of assessment activities and events  
  - two-way communication and feedback  
  - how judgement was exercised in making the assessment decision  
  - how and when assessment outcomes were recorded and reported  
  - assessment records and reports completed in accordance with assessment system and organisational, legal and ethical requirements  
  - how the assessment process was reviewed. |

| Context of and specific resources for assessment | Evidence must be gathered in the workplace whenever possible. Where no workplace is available, a simulated workplace must be provided. |
| Method of assessment |  |
| Guidance information for assessment |  |
**Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Assessment plan may include: | • overall planning, describing:  
|  | • what is to be assessed  
|  | • when assessment is to take place  
|  | • where assessment is to take place  
|  | • how assessment is to take place. |

| Benchmarks for assessment: | • refer to a criterion against which the candidate is assessed  
|  | • may be a competency standard/unit of competency, assessment criteria of course curricula, performance specifications, or product specifications. |

| Assessment tools include: | • the learning or competency unit(s) to be assessed  
|  | • the target group, context and conditions for the assessment  
|  | • the tasks to be administered to the candidate  
|  | • an outline of the evidence to be gathered from the candidate  
|  | • the evidence criteria used to judge the quality of performance (i.e. the assessment decision-making rules)  
|  | • the administration, recording and reporting requirements  
|  | • the evidence of how validity and reliability have been tested and built into the design and use of the tool. |

| Specialist support may include: | • assistance by third party, such as carer or interpreter  
|  | • support from specialist educator  
|  | • provision of developed online assessment activities  
|  | • support for remote or isolated candidates and assessors  
|  | • support from subject matter or safety experts  
|  | • advice from regulatory authorities  
|  | • assessment teams and panels  
|  | • support from lead assessors  
|  | • advice from policy development experts. |

| Assessment methods include: | • particular techniques used to gather different types of evidence, such as:  
|  | • direct observation |
- structured activities
- oral or written questioning
- portfolios of evidence
- review of products
- third-party feedback.

### Individual differences may include:

- English language, literacy and numeracy barriers
- physical impairment or disability
- intellectual impairment or disability
- medical condition that may impact on assessment, such as arthritis, epilepsy, diabetes and asthma
- learning difficulties
- mental or psychological disability
- religious and spiritual observances
- cultural images and perceptions
- age
- gender.

### Feedback may include:

- ensuring assessment/RPL process is understood
- ensuring candidate concerns are addressed
- enabling questions and answers
- confirming outcomes
- identifying further evidence to be provided
- discussing action plans
- confirming gap training needed
- providing information regarding available appeal processes
- suggesting improvements in evidence gathering and presentation.

### Consultation may involve:

- moderation with other assessors, or training and assessment coordinators
- discussions with client, team leaders, managers, RPL coordinators, supervisors, coaches and mentors
- technical and subject experts
- English language, literacy and numeracy experts.

### Unit Sector(s)

Assessment
Custom Content Section

Not applicable.
TAEDEL301A Provide work skill instruction

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit describes the performance outcomes, skills and knowledge required to conduct individual and group instruction and demonstrate work skills, using existing learning resources in a safe and comfortable learning environment. The unit covers the skills and knowledge required to determine the success of both the training provided and one’s own personal training performance. It emphasises the training as being driven by the work process and context. |

Application of the Unit

| Application of the unit | This unit supports a wide range of applications across any workplace setting and so can be used by any organisation. Its use is not restricted to training organisations. |

Licensing/Regulatory Information
Not applicable.

Pre-Requisites

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- **verbal and non-verbal communication techniques, such as:**
  - asking relevant and appropriate questions
  - providing explanations
  - demonstrating
  - using listening skills
  - providing information clearly
- **safety skills to implement OHS requirements, by acting and responding safely in order to:**
  - identify hazards
  - conduct prestart-up checks if required
  - observe and interpret learner behaviour that may put people at risk
- **time-management, skills to:**
  - ensure all learning objectives are covered
  - pace learning
- **reflection skills in order to:**
  - identify areas for improvement
  - maintain personal skill development
- **literacy skills to:**
  - complete and maintain documentation
  - read and follow learning programs and plans
  - read and analyse learner information
- **technology skills to operate audio-visual and technical equipment**
- **interpersonal skills to:**
  - engage, motivate and connect with learners
  - provide constructive feedback
  - maintain appropriate relationships
  - establish trust
  - use appropriate body language
  - maintain humour
  - demonstrate tolerance
  - manage a group
  - recognise and be sensitive to individual difference and diversity
- **observation skills to:**
  - monitor learner acquisition of new skills, knowledge and competency
### REQUIRED SKILLS AND KNOWLEDGE

**requirements**
- assess learner communication and skills in interacting with others
- identify learner concerns
- recognise learner readiness to take on new skills and tasks

**Required knowledge**
- learner characteristics and needs
- content and requirements of the relevant learning program and/or delivery plan
- sources and availability of relevant learning resources and learning materials
- content of learning resources and learning materials
- training techniques that enhance learning and when to use them
- introductory knowledge of learning principles and learning styles
- key OHS issues in the learning environment, including:
  - roles and responsibilities of key personnel
  - responsibilities of learners
  - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency procedures
  - risk controls for the specific learning environment
# Evidence Guide

**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## Overview of assessment

Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.

## Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- carry out a minimum of three training sessions, involving demonstrating and instructing particular work skills for different groups; with each session addressing:
  - different learning objectives
  - a range of techniques and effective communication skills appropriate to the audience.

## Context of and specific resources for assessment

Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.

## Method of assessment

## Guidance information for assessment

For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).
### Range Statement

#### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Learner characteristics may include: | • language, literacy and numeracy levels
|   | • learning styles
|   | • past learning and work experiences
|   | • specific needs
|   | • workplace culture.

| Safe learning environment may include: | • exit requirements
|   | • personal protective equipment
|   | • safe access
|   | • safe use of equipment.

| Instruction and demonstration objectives may include: | • competencies to be achieved
|   | • generic and technical skills, which may be:
|   |   • provided by the organisation
|   |   • developed by a colleague
|   |   • individual or group objectives
|   |   • learning outcomes.

| Learning resources may include: | • any material used to support learning, such as:
|   |   • learner and user guides
|   |   • trainer and facilitator guides
|   |   • example training programs
|   |   • specific case studies
|   |   • professional development materials
|   |   • assessment materials
|   |   • a variety of formats
|   |   • those produced locally
|   |   • those acquired from other sources.

| Learning materials may include: | • handouts for learners
|   | • materials sourced from the workplace, e.g. workplace documentation, operating procedures, and specifications.

| Details may include: | • location and time
|   | • outcomes of instruction or demonstration
RANGE STATEMENT

- reason for instruction or demonstration
- who will be attending instruction session.

**OHS procedures** may include:
- emergency procedures
- hazards and their means of control
- incident reporting
- use of personal protective equipment
- safe work practices
- safety briefings
- site-specific safety rules.

**Delivery techniques** may include:
- coaching
- demonstration
- explanation
- group or pair work
- providing opportunities to practise skills and solve problems
- questions and answers.

**Coaching** may include:
- learning arrangements requiring immediate interaction and feedback
- on-the-job instruction and 'buddy' systems
- relationships targeting enhanced performance
- short-term learning arrangements
- working on a one-to-one basis.

**Measures** may include:
- informal review or discussion
- learner survey
- on-the-job observation
- review of peer coaching arrangements.

## Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Establish effective work environment for learning | 1.1. Establish and agree upon objectives and scope of the work-based learning  
1.2. Analyse work practices and routines to determine their effectiveness in meeting established learning objectives  
1.3. Identify and address *OHS implications* of using work as the basis for learning |
| 2. Develop a work-based learning pathway | 2.1. Address *contractual requirements* and responsibilities for learning at work  
2.2. Arrange for integration and monitoring of external learning activities with the *work-based learning pathway*  
2.3. Obtain agreement from relevant personnel to implement the work-based learning pathway |
| 3. Establish the learning-facilitation relationship | 3.1. Identify context for learning and individual’s learning style  
3.2. Select appropriate technique or process to facilitate learning and explain the basis of the technique to learner  
3.3. Develop, document and discuss *individualised learning plan* with learner  
3.4. Access, read and interpret documentation outlining the OHS responsibilities of the various parties in the learning environment  
3.5. Monitor supervisory arrangements appropriate to learner's levels of knowledge, skill and experience to provide support and encouragement and ensure learner's health and safety |
| 4. Implement work-based learning pathway | 4.1. Sequence introduction of workplace tasks, activities and processes to reflect the agreed work-based learning pathway  
4.2. Explain objectives of work-based learning and the processes involved to learner  
4.3. Encourage learner to take responsibility for learning and to self-reflect  
4.4. Develop techniques that facilitate learner's transfer of skills and knowledge |
| 5. Maintain and develop the learning/facilitation | 5.1. Prepare for each session  
5.2. Structure learning activities to support and reinforce new learning, build on strengths, and identify areas |
<table>
<thead>

</tbody>
</table>
## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- oral communication and language skills to:
  - motivate the learner
  - transfer skills and knowledge
- interpersonal skills to maintain appropriate relationships
- observation skills to monitor individual progress
- literacy skills to:
  - read and interpret organisational documents, legal documents and contracts
  - complete and maintain documentation
- organisational skills to provide guidance and feedback to individuals
- communication skills, including:
  - using effective verbal and non-verbal language
  - using critical listening and questioning techniques
  - giving constructive and supportive feedback
  - assisting learners to paraphrase advice or instructions back to the trainer/facilitator
  - providing clear and concrete options and advice
  - using appropriate industry/profession terminology and language
  - ensuring language, literacy and numeracy used is appropriate to learners

### Required knowledge

- systems, processes and practices within the organisation where work-based learning is taking place
- operational demands of the work and impact of changes on work roles
- organisational work culture, including industrial relations environment
- systems for identifying skill needs
- introductory knowledge of different learning styles and how to encourage learning in each, for example:
  - visual learners
  - audio learners
  - kinaesthetic learners
  - theoretical learners
- relevant policy, legislation, codes of practice and national standards that may affect training and assessment in the vocational education and training sector
- OHS relating to the work role, including:
  - hazards relating to the industry and specific workplace
<table>

# Evidence Guide

## EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:
- prepare and facilitate work-based learning
- provide evidence of a minimum of two examples of developing work-based learning pathways, that include:
  - identifying needs for learning
  - analysing work practices, work environment and work activities
  - organising and allocating work in a way that reflects learning needs and provides effective learning opportunities through work processes
- provide a minimum of two examples of a learning facilitation relationship being conducted:
  - with different individuals
  - demonstrating communication skills and flexibility
  - demonstrating one or more of the processes or techniques identified.

### Context of and specific resources for assessment

Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.

Assessment must ensure access to information about work activities.

### Method of assessment

### Guidance information for assessment

For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

</tr>
<tr>
<td>• having a range of other intervention referrals ready when needed</td>
</tr>
<tr>
<td>• honesty</td>
</tr>
</tbody>
</table>
## RANGE STATEMENT

- fairness to others.

**Impact** may be:

- successful achievement, rate of achievement, or lack of achievement of identified goals
- achievement of other outcomes as a result of the relationship
- development of new goals
- new or increased motivation to learn
- greater capacity to learn
- increase in learner's self-confidence.

**Self-evaluation and reflection** may include:

- asking critical questions about:
  - own ability
  - what worked or didn't work
  - how the relationship building process could be improved
- reviewing records and journals on sessions and critically evaluating own performance
- reviewing feedback from learner and identifying critical aspects and areas for improvement.

TAEDES401A Design and develop learning programs

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit describes the performance outcomes, skills and knowledge required to conceptualise, design, develop and review learning programs to meet an identified need for a group of learners. The unit addresses the skills and knowledge needed to identify the parameters of a learning program, determine the design, outline the content and review its effectiveness. |

Application of the Unit

| Application of the unit | This unit typically applies to a trainer or facilitator who designs or develops learning programs. A learning program can be discrete, providing a planned learning approach that relates to specific learning and training needs, or it may form part of the learning design for a qualification. |

Licensing/Regulatory Information
Not applicable.

Pre-Requisites

| Prerequisite units | | | | |
## Employability Skills Information

<table>
<thead>
<tr>
<th>Employability skills</th>
<th>This unit contains employability skills.</th>
</tr>
</thead>
</table>

## Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Define parameters of the learning program | 1.1. Clarify *purpose* and type of learning program with key stakeholders  
1.2. Access and confirm the competency standards and *other training specifications* on which to base the learning program  
1.3. Identify language, literacy and numeracy requirements of the program  
1.4. Identify and consider characteristics of the target learner group |
| 2. Work within the vocational education and training (VET) policy framework | 2.1. Access relevant *VET policies* and frameworks, and apply to work practices  
2.2. Identify changes to training packages and accredited courses and apply these to program development  
2.3. Conduct work according to organisational quality assurance policies and procedures |
| 3. Develop program content | 3.1. Research, develop and document specific subject matter content according to agreed design options  
3.2. Evaluate existing learning resources for content relevance and quality  
3.3. Specify assessment requirements of the learning program |
| 4. Design structure of the learning program | 4.1. Break the learning content into manageable segments and document timeframe for each segment  
4.2. Determine and confirm *delivery strategies* and required assessment methods and tools  
4.3. Document complete learning program in line with organisational requirements  
4.4. Review complete program with key stakeholders and adjust as required  
4.5. Ensure a safe learning progression by analysing risks in the learning environment and including a risk control plan |
## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- organisational skills to ensure resources are available and suitable
- evaluation skills to determine the time required for each learning segment and the overall timelines of the learning program
- cognitive skills to develop the learning program content and design its structure
- language and literacy skills to read and interpret a range of documentation, including technical and subject matter documents, references and texts

#### Required knowledge

- information about training package developers and course accreditation agencies responsible for specific learning program parameters
- training packages and relevant competency standards to be used as the basis of the learning program
- other performance standards and criteria to be used as the basis of the learning program, where relevant
- distinction and relationship between a training package/accredited course, learning strategy and learning program, where linked
- different purposes and focus of learning programs
- sound knowledge of learning principles
- instructional design principles relating to different design options for learning program design and structure
- availability and types of different relevant learning resources, learning materials and pre-developed learning activities
- methodology relating to developing and documenting new learning activities and related learning materials
- different delivery modes and methods
- relevant policies, legal requirements, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the VET sector
- relevant OHS knowledge relating to the work role, and OHS considerations that need to be included in the learning program
**Evidence Guide**

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Purpose** may include:
- developing vocational competency or vocational skills
- developing language, literacy and numeracy skills
- developing general education
- meeting legislative, licensing and registration requirements, such as OHS requirements.

**Other training specifications** may include:
- curriculum specifications
- product specifications
- organisational work requirements and training needs
- induction needs
- language, literacy and numeracy development needs
- regulatory and licensing requirements.

**Vocational education and training policies** may include:
- policies and procedures set by national organisations, such as the National Quality Council
- Australian Quality Training Framework
- other relevant policies.

**Delivery strategies** may include:
- focus of delivery in terms of size and type of group
- context of delivery, for example:
  - in the workplace
  - in a training room
  - in a community setting
- mode of delivery, for example:
  - face-to-face
  - online
  - blended delivery mode
- delivery methods, for example:
  - lock-step, learner-paced and mixed
  - interactive, participative and collaborative
  - blended delivery methods.

UEGNSG601A Assess the operational capability of gas safety equipment on tankers

Modification History
Not Applicable

Unit Descriptor

Unit Descriptor 1) This Unit covers the assessment of the gas and safety equipment on a tanker for the distribution of LPG. It includes assessing the equipment, identifying faults, using standard operating procedures, liaising with appropriate persons, conducting inspections and tests tankers/vehicles as is detailed in the National Road Transport competency standards TDTC407A and TDTC597A. Tankers include heavy rigid or heavy combination truck.

Application of the Unit

Application of the Unit 3) This competency standard shall apply to work sites where the distribution of liquefied petroleum gas occurs.

Licensing/Regulatory Information

License to practice 3.1) The skills and knowledge described in this unit are not subject to licence regulation other than those directly related to Occupational Health and Safety, gas/electricity/water industry safety and compliance, industrial relations, environmental protection, telecommunications, anti discrimination and training. Commonwealth, State/Territory or Local Government legislation and regulations may exist that limits the age of
License to practice

3.1) operating certain equipment.

Pre-Requisites

Prerequisite Unit(s) 2)

Competencies 2.1)

Granting of competency in this unit shall be made only after competency in the following unit(s) has/have been confirmed:

Nil

Employability Skills Information

Refer to the Evidence Guide

Elements and Performance Criteria Pre-Content

5) Elements describe the essential outcomes of a competency standard unit

Performance Criteria describe the required performance needed to demonstrate achievement of the element.

Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Prepare to assess gas and safety equipment on tankers in accordance with requirements and standard operating procedures</td>
</tr>
<tr>
<td>1.1</td>
<td>Work instructions are received and confirmed according to standard operating procedures</td>
</tr>
<tr>
<td>1.2</td>
<td>Relevant requirements and established procedures to be followed for the work to be performed are discussed with all persons to establish and confirm the work schedule</td>
</tr>
</tbody>
</table>
ELEMENT | PERFORMANCE CRITERIA
---|---
1.3 | OHS, environmental and sustainable energy policies and procedures to be followed for the work to be performed are received and confirmed
1.4 | Suggestions to assist with the assessing the operational capability of gas safety equipment on tankers are made to others involved in the work
1.5 | Hazards are identified, OHS risks assessed and control measures are prioritised, implemented and monitored including emergency exits kept clear according to established procedures
1.6 | Scope of responsibility under the relevant work permit is received and confirmed according to requirements and established procedures with relevant persons where applicable
1.7 | Resources including equipment and tools are visually inspected and personal protective equipment required for the job are obtained and in working order according to established procedures
1.8 | All components of the tanker and associated equipment are checked and the relevant responsibilities associated with First Aid and other related work safety procedures at the worksite are confirmed in accordance with requirements and established procedures.
1.9 | Client issues are referred to appropriate persons in accordance with industry community standards
1.10 | Inspection procedures are carried out according to manufacturer's specifications and the work schedule for a quality outcome and to minimise risk and damage to property, commerce and individuals in accordance with established procedures
<table>

</table>
ELEMENT | PERFORMANCE CRITERIA
--- | ---
3 Complete assessment and report results of inspection and testing of gas safety equipment on tankers | 3.1 Work undertaken is checked against work schedule and anomalies reported to authorised persons in accordance with established procedures

3.2 Accidents and incidents are actioned and reported to authorised persons in accordance with established procedures

3.3 Work site is rehabilitated, cleaned up and made safe in accordance with given instructions and established procedures

3.4 Tools, equipment and any surplus resources and materials are, where appropriate, cleaned, checked and returned to storage in accordance with established procedures

3.5 Results of inspection and testing are accurately recorded and appropriate persons are notified of work completion according to established procedures

3.6 Clear reference is made to any items which may affect future operational outcomes and work completion records, report forms and data sheets are completed accurately in accordance with given instructions and established procedures

---

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

6) This describes the essential skills and knowledge and their level, required for this unit.

Evidence shall show that knowledge has been acquired of safe working practices for assessing the operational capability of gas safety equipment on tankers. The extent of the essential knowledge and associated skills required is given in Volume 2 Part 2.2.

- **G 2.1.1** Working in the gas sector
- **G 2.1.2** Identify roles of statutory authorities
REQUIRED SKILLS AND KNOWLEDGE

G 2.1.3 Identify employment roles and responsibilities
G 2.1.4 Apply relevant OHS regulations, policies and procedures
G 2.1.5 Maintain safe, clean and healthy workplace
G 2.1.6 Work safely with hazardous materials and equipment
G 2.1.7 Apply safe manual handling techniques in the workplace
G 2.1.8 Control traffic at the work site
G 2.1.9 Respond to emergency and accident situations
G 2.1.10 Apply relevant environmental legislation, regulations and codes of practice
G 2.1.11 Protect and maintain the environment
G 2.1.12 Communicate in the workplace
G 2.1.13 Communicate effectively in a team
G 2.1.14 Read and interpret workplace documents
G 2.1.15 Complete routine workplace forms, memos and reports
G 2.1.16 Identify requirements of work activity
G 2.1.17 Apply basic planning skills
G 2.1.18 Conduct tasks to complete work activity
G 2.1.19 Review work activity
G 2.1.20 Customer relations
G 2.1.21 Problem solving
G 2.1.22 Confined spaces
G 2.6.1 Occupational Health and Safety for working with LPG gas
REQUIRED SKILLS AND KNOWLEDGE

G 2.6.2 Diagnose and rectify faults for LPG
G 2.6.3 Operate equipment within its limitations
Evidence Guide

EVIDENCE GUIDE

8) The Evidence Guide forms an integral part of this Unit and shall be used in conjunction with all components parts of the unit and performed in accordance with the Assessment Guidelines of this Training Package.

Overview of Assessment

8.1) Longitudinal competency development approaches to assessment, such as Profiling, require data to be reliably gathered in a form that can be consistently interpreted over time. This approach is best utilised in Apprenticeship programs and reduces assessment intervention. It is the Industry’s preferred model for apprenticeships. However, where summative (or final) assessment is used it is to include the application of the competency in the normal work environment or, at a minimum, the application of the competency in a realistically simulated work environment. It is recognised that, in some circumstances, assessment in part or full can occur outside the workplace. However, it must be in accord with Industry and Regulatory policy in this regard.

Methods chosen for a particular assessment will be influenced by various factors. These include the extent of the assessment, the most effective locations for the assessment activities to take place, access to physical resources, additional safety measures that may be required and the critical nature of the competencies being assessed.

The critical safety nature of working with electricity, electrical equipment, gas or any other hazardous substance/material carries risk in deeming a person competent. Hence, sources of evidence need to be 'rich' in nature so as to minimise error in judgment.

Activities associated with normal every day work have a bearing on the decision as to how much and how detailed the data gathered will contribute to its 'richness'. Some skills are more critical to safety and operational requirements while the same skills may be more or less frequently practiced. These points are raised for the assessors to consider when choosing an assessment method and developing assessment instruments. Sample assessment instruments are included for Assessors in the Assessment Guidelines of this Training Package.
EVIDENCE GUIDE

Critical aspects of evidence required to demonstrate competency in this unit

8.2) Before the critical aspects of evidence are considered all prerequisites shall be met.

Evidence for competence in this unit shall be considered holistically. Each element and associated Performance Criteria shall be demonstrated on at least two occasions in accordance with the 'Assessment Guidelines UEG06'. Evidence shall also comprise:

- A representative body of Performance Criteria demonstrated within the timeframes typically expected of the discipline, work function and industrial environment. In particular this shall incorporate evidence that shows a candidate is able to:
  - Implement Occupational Health and Safety workplace procedures and practices including the use of risk control measures as specified in the Performance Criteria and range
  - Apply sustainable energy principles and practices as specified in the Performance Criteria and range
  - Demonstrate an understanding of the essential knowledge and associated skills as described in this unit to such an extent that the learner's performance outcome is reported in accordance with the preferred approach; namely a percentile graded result, where required by the regulated environment
  - Demonstrate an appropriate level of skills enabling employment
  - Conduct work observing the relevant Anti discrimination legislation, regulations, polices and workplace procedures
  - Demonstrate performance across a representative range of contexts from the prescribed items below.

D  At least one occasion

Deal with an unplanned event by drawing on essential knowledge and associated skills to provide appropriate solutions incorporated in the holistic assessment with the above listed items

Context of and specific resources for assessment

8.3) This unit should be assessed as it relates to normal work practice using procedures, information and resources typical of a workplace. This should include:

- OHS policy and work procedures and instructions.
- Suitable work environment, facilities, equipment and materials to undertake actual work as prescribed by this Competency Standard Unit.
- Appropriate environmental regulation and work practices.
- Appropriate organisational requirements.
- Appropriate work environment, equipment and tools.

In addition to the resources listed above, in Context of and specific resources for assessment, evidence should show demonstrated competency in assessing the operational capability of gas safety equipment on tankers.

Assessment of this competency must also be undertaken in either an actual workplace or under a simulated work environment. Assessment must also integrate the Key Competencies.
EVIDENCE GUIDE

Method of assessment 8.4)
This Competency Standard Unit shall be assessed by methods given in Volume 1, Part 3 'Assessment Guidelines'.

Note:
Competent performance with inherent safe working practices is expected in the Industry to which this Competency Standard Unit applies. This requires that the specified Essential Knowledge and Associated Skills are assessed in a structured environment which is primarily intended for learning/assessment and incorporates all necessary equipment and facilities for learners to develop and demonstrate the essential knowledge and associated skills described in this unit.

Concurrent assessment and relationship with other units 8.5)
There are no recommended concurrent assessments with this unit, however in some cases efficiencies may be gained in terms of learning and assessment effort being concurrently managed with allied Competency Standard Units where listed.

- UEGNSG102A Carry out work activities in a utilities industry work environment
- UEGNSG103A Comply with workplace OHS procedures and practices
- UEGNSG104A Comply with environmental policies and procedures
- UEGNSG105A Establish the work site
EVIDENCE GUIDE

Key Competencies  8.6) Evidence that particular Key Competencies have been achieved within this Competency Standard Unit is in the context of the following Performance Criteria of evidence. See Volume 2, Part 4 for an explanation of Key Competencies and levels of this Training Package.

<table>
<thead>

</tr>
<tr>
<td>3 Reflecting on the outcome and process of work task</td>
<td>Refer to the following Performance Criteria for examples of application: 3.1; 3.6</td>
</tr>
<tr>
<td>4 Interacting and understanding of the context of the work task</td>
<td>Refer to the following Performance Criteria for examples of application: 1.2; 2.5; 2.8; 3.3</td>
</tr>
<tr>
<td>5 Planning and organising the meaningful work task</td>
<td>Refer to the following Performance Criteria for examples of application: 1.4; 1.5; 1.7</td>
</tr>
<tr>
<td>6 Performing the work task in non-routine or contingent situations</td>
<td>Refer to the following Performance Criteria for examples of application: 2.6; 2.7</td>
</tr>
</tbody>
</table>
Range Statement

RANGE STATEMENT

7) This relates to the competency standard unit as a whole providing the range of contexts and conditions to which the Performance Criteria apply. It allows for different work environments and situations that will affect performance.

This Competency Standard Unit shall/may be demonstrated in relation to assessing the operational capability of gas safety equipment on tankers.

The following constants and variables included in the element/Performance Criteria in this unit are fully described in the Definitions Section of this volume and form an integral part of the Range Statement of this unit:

Equipment (2)
Faults
Standard operating procedures (2)
Appropriate persons (2)
Inspection and testing (2)
Tankers
Requirements
Established procedures

Unit Sector(s)

Not Applicable

Literacy and numeracy skills

2.2) Participants are best equipped to achieve this unit if they have reading, writing and numeracy skills indicated by the following scales. Description of each scale is given in Volume 2, Part 3 'Literacy and Numeracy'

Reading 3    Writing 3    Numeracy 3
Competency Field

4) LPG.
UEGNSG603B Load, unload and exchanging gas cylinders

Modification History
Not applicable.

Unit Descriptor

1) Scope:

1.1) Descriptor

This Competency Standard Unit covers the loading, unloading and exchanging of approved gas cylinders as per legislative requirements as used for distribution. Included are persons; tools and equipment; materials used in loading and exchanging; for the discharging of LPG by road tanker for the distribution. Persons involved in this standard are site manager; clerical persons; supervisors; other road tanker operators. Tools, of gas cylinders; appropriate delivery area at a terminal or customer location.

Application of the Unit

2) This competency standard shall apply to work sites where the distribution of liquefied petroleum gas occurs.

Licensing/Regulatory Information

3) The skills and knowledge described in this unit are not subject to licence regulation other than those directly related to Occupational Health and Safety, gas/electricity/water industry safety and compliance, industrial relations, environmental protection, telecommunications, anti discrimination and training. Commonwealth, State/Territory or Local Government
License to practice 3)

legislation and regulations may exist that limits the age of operating certain equipment.

Pre-Requisites
Prerequisite Unit(s) 4)

Competencies 4.1)

Granting of competency in this unit shall be made only after competency in the following unit(s) has/have been confirmed:

Nil

Literacy and numeracy skills 4.2)

Participants are best equipped to achieve this unit if they have reading, writing and numeracy skills indicated by the following scales. Description of each scale is given in Volume 2, Part 3 ‘Literacy and Numeracy’

Reading 3  Writing 3  Numeracy 3

Employability Skills Information
Employability Skills 5)

This unit contains Employability Skills

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this unit of competency is packaged will assist in identifying Employability Skill requirements.
Elements and Performance Criteria

6) Elements describe the essential outcomes of a competency standard unit. Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

8) This describes the essential skills and knowledge and their level, required for this unit.

Evidence shall show that knowledge has been acquired of safe working practices for loading, unloading and exchanging gas cylinders.

All knowledge and skills detailed in this unit should be contextualised to current industry practices and technologies.

KS01-G603  Load, discharge cylinder delivery vehicle

G 2.1.1 Work in the gas sector

Evidence shall show an understanding of how work is conducted in the Gas Industry, specifically:

- The Gas Industry in Australia
- Australian gas resources
- Types of gas and uses
- Combustion.

G 2.1.2 Identify roles of statutory authorities

Evidence shall show an understanding of the roles of statutory authorities (government agencies, both State and Federal) that operate in the Gas Industry, including identifying:

- Statutory bodies
- Roles of statutory bodies
- Employer and employee responsibilities to statutory bodies.

G 2.1.3 Identify employment roles and responsibilities

Evidence shall show an understanding of the roles of major groups in the Gas Industry, that is employers and employees, including:

- The role of the employer
- Industry associations
- Employer obligations to safety
- Identification of disadvantaged and minority groups in Australian society
- Employers obligations to persons from disadvantaged
and minority groups

- Employers obligations to occupational health and safety
- The role of commonwealth and state training regulatory authorities and industry skills councils and state training advisory bodies
- Roles and responsibilities of gas industry employees
- The employment contract
- Working to safety requirements
- Work according to lawful commands
- Belonging to employee organisations
- How to work with people from disadvantaged and minority groups
- Understanding the employees obligations to occupational health and safety
- Sources of support.

G 2.1.4 Apply relevant OHS regulations, policies and procedures

Evidence shall show an understanding of the basic workplace health and safety legislation and how this applies to individuals in a Gas Industry workplace, indicated by the following:

- Employer's responsibilities to relevant OHS legislation
- Employee's responsibilities to OHS legislation and organisation's policies and procedures
- OHS policies and procedures at the worksite.
- Australian Standards, guidelines and codes of practice

G 2.1.5 Work safely in the gas industry by reducing risk and using correct PPE

Evidence shall show an understanding of how to work safely in the gas industry indicated by the ability to:

- Correctly interpret and comply with Safety Signs including workplace Hazards, Warnings and PPE requirements
- Correctly interpret gas markers
- Identify the correct PPE required for work in the Gas Industry
- Locate and comply with procedures for correctly checking, maintaining and storing PPE
- Apply the process of Hazard identification, Risk assessment and Control
- Complete Risk Assessment forms such as Work Permits and JHA’s, JSA’s, JSEA’s, SWM’s etc
- Report workplace hazards
G 2.1.6 Work safely with hazardous materials and equipment

Evidence shall show an understanding of what constitutes hazardous materials and the equipment and processes used to safely work with these indicated by the following:

- Identify hazardous materials and equipment
- Location and purpose of Material Safety Data Sheets (MSDS)
- Read, interpret and discuss MSDS
- Knowledge of methods for safe disposal of hazardous waste materials
- Read, interpret and discuss relevant manufacturer's specifications
- Use and dispose of hazardous materials and equipment safely
- Use of spill kits and PPE

G 2.1.7 Apply safe manual handling techniques in the workplace

Evidence shall show an understanding of manual handling and how to apply this knowledge to handling heavy and awkward objects in a Gas Industry workplace, specifically:

- Principles for managing manual handling
- Characteristics and types of safe manual handling
- Safe manual handling techniques
- Manual handling and risk management

G 2.1.8 Control traffic at the work site

Evidence shall show knowledge and skills in coordinating traffic flow at a workplace where traffic control is required, that is, where work is conducted on or near a road, indicated by the following:

- Read and interpret relevant traffic authority regulations for traffic control at a worksite
- Identify signs and devices required to control pedestrians and traffic at a worksite depending on traffic flow volumes
- Apply techniques for controlling pedestrians and traffic at various worksites
- Use procedures for monitoring traffic controls
- Set up and monitor pedestrian and traffic controls

G 2.1.9 Respond to emergency and accident situations

Evidence shall show knowledge and skills in dealing with emergency or accident situations at a Gas Industry workplace, indicated by the following:
• Situations of accidents and emergency
• Comply with procedures for accidents and incidents
• Correct use of emergency equipment and procedures for a fire
• Correct use of breathing apparatus
• Correct use of gas detectors/oxygen monitoring devices
• Correct use of emergency equipment and procedures for a gas leak or vapour emission
• Report emergencies and accidents

G 2.1.14 Read and interpret Gas Industry documents
Evidence shall show an ability to read and interpret Gas Industry documents indicated by the following:
• Understand and use signs, symbols terminology and legends as used in gas industry procedures and documents
• Identify, locate and implement gas industry standards, policies and procedures
• Interpret and read basic drawings and diagrams

G 2.1.15 Complete workplace forms, and reports
Evidence shall show an ability to complete routine Gas Industry forms, memos and reports either written or electronic, indicated by the following:
• Identify, locate, interpret and use workplace forms, and reports
• Enter the required information accurately on gas industry forms and reports

G 2.1.16 Identify requirements of work activity
Evidence shall show ability to:
• Clarify expected outcomes of a work activity in a Gas Industry workplace
• Receive, clarify and respond to verbal work instructions for work activity
• Interpret and discuss an organisation's policies, quality requirements and specifications for work activity

G 2.1.17 Apply basic planning skills
Evidence shall show a demonstrated ability to apply basic planning skills in a Gas Industry workplace, indicated by the following:
• Develop checklists of tasks
• Prioritise tasks
- Identify resources required to complete tasks safely and efficiently
- Identify resource or scheduling conflicts and apply solutions
- Develop time lines to complete tasks

G 2.1.18 Conduct tasks to complete work activities
Evidence shall show ability to organise the activities to complete a job in a Gas Industry workplace, indicated by the following:
- Locate and organise equipment, tools and machinery required to complete tasks safely and efficiently
- Complete tasks according to planned sequences and within appropriate timeframes
- Understand quality assurance and work according to established and standard operating procedures

G 2.1.19 Review work activities
Evidence shall show an ability to review work activities undertaken in a Gas Industry workplace, indicated by the following:
- Check work activities against a work plan
- Seek feedback on the outcome of work activities with appropriate persons
- Report outcomes of work activities in writing or orally according to enterprise procedures

G 2.1.20 Customer relations
Evidence shall show an understanding of the requirements for providing good customer relations to Gas Industry stakeholders, indicated by the following:
- Notify stakeholders of activities
- Communicate with stakeholders within scope of responsibilities
- Refer stakeholders to appropriate parties
- Demonstrate understanding of ring fencing requirements (if applicable)
- Keep the customer informed on job progress
- Provide good customer relations

G 2.1.21 Undertake problem solving
Evidence shall show an understanding of the requirements to undertake basic problem solving in a Gas Industry workplace, indicated by the following:
- Demonstrate problem solving and diagnostics
methodology

- Identify possible solutions
- Recommend probable solutions and
- Apply basic problem solving techniques

G 2.1.22 Operate in confined spaces

Evidence shall show an understanding of the requirements to recognise and operate in confined spaces in a Gas Industry workplace, indicated by the following:

- Knowledge of the requirements of Legislation, Regulations, Australian Standards and enterprise specific procedures for safe working in confined spaces
- Ability to recognise what a confined space is and the entry safety requirements
- Ability to understand and comply with manufacturers’ guidelines for the safe use of PPE used in confined spaces
- Understand how and when to use gas detectors for confined spaces entry
- Understand how and when to use breathing apparatus and rescue and recovery equipment

Note: A confined spaces entry ticket would satisfy and exceed the requirements of this EKAS clause

G 2.1.25 Protect the environment

Evidence shall show an understanding and ability to perform work in the gas industry in a manner that protects the environment indicated by the following:

- Understanding of the relevant Commonwealth/State/Territory environmental legislation, regulations and codes of practice
- Understanding of employee's and employer's responsibilities to relevant environmental legislation, regulations and codes
  - Understanding and compliance with enterprise procedures for flora control
  - erosion control
  - fauna control
  - the protection of indigenous and cultural heritage sites
- Understanding the role of regulatory bodies in monitoring environmental activities, risk and incident compliance
- Understanding community expectations for protecting the environment
- Correct use of environment protection procedures, records, inspections and incident reporting
- Identifying environmental hazards
- Assessing environmental risks
- Implementing environmental control measures
- Ability to respond to workplace environmental incidents

Note: Environmental damage can be caused by chemicals, oil, water contamination, carcinogenic agents, gases, dusts, waste contamination and noise

G 2.1.26 Communicate in the workplace
Evidence shall show an understanding and ability to communicate effectively in a Gas Industry work team indicated by the following:
- Effective use oral and written communications methods to achieve work related outcomes and solutions.
- Effectively receive, interpret and respond to workplace information and instructions
- Effectively convey and report work related information to fellow workers and customers
- Interact with fellow workers in a socially and culturally appropriate manner

G 2.6.1 Occupational Health and Safety for working with LPG
Evidence shall show an understanding of the specific OHS and working procedures required to work with LPG gas, indicated by awareness of:
- OHS and environmental legislation
- Australian Dangerous Goods Code (ADG)
- inspection procedures
- properties of LPG
- operational capacity of safety equipment on tankers
- standard operating procedures for dealing with LPG
- position and manoeuvrability of tankers
- appropriate ability to read meters
- and understanding of manufacturer's specifications
- out of gas procedures.

G 2.6.3 Operate equipment within its limitations
Evidence shall show an understanding of the specific knowledge required to operate equipment within its
limitation in the LPG environment, indicated by the following:

- identify and understand the equipment used in the transporting of LPG
- use equipment for storing and transporting LPG.

### Evidence Guide

#### EVIDENCE GUIDE

9) The Evidence Guide forms an integral part of this Competency Standard Unit and shall be used in conjunction with all components parts of this unit and performed in accordance with the Assessment Guidelines of this Training Package.

#### Overview of Assessment

9.1) Longitudinal competency development approaches to assessment, such as Profiling, require data to be reliably gathered in a form that can be consistently interpreted over time. This approach is best utilised in Apprenticeship programs and reduces assessment intervention. It is the Industry’s preferred model for apprenticeships. However, where summative (or final) assessment is used it is to include the application of the competency in the normal work environment or, at a minimum, the application of the competency in a realistically simulated work environment. It is recognised that, in some circumstances, assessment in part or full can occur outside the workplace. However, it must be in accord with Industry and Regulatory policy in this regard.

Methods chosen for a particular assessment will be influenced by various factors. These include the extent of the assessment, the most effective locations for the assessment activities to take place, access to physical resources, additional safety measures that may be required and the critical nature of the competencies being
assessed.

The critical safety nature of working with electricity, electrical equipment, gas or any other hazardous substance/material carries risk in deeming a person competent. Hence, sources of evidence need to be ‘rich’ in nature so as to minimise error in judgment.

Activities associated with normal every day work have a bearing on the decision as to how much and how detailed the data gathered will contribute to its ‘richness’. Some skills are more critical to safety and operational requirements while the same skills may be more or less frequently practiced. These points are raised for the assessors to consider when choosing an assessment method and developing assessment instruments. Sample assessment instruments are included for Assessors in the Assessment Guidelines of this Training Package.

Critical aspects of evidence required to demonstrate competency in this unit

9.2)

Before the critical aspects of evidence are considered all prerequisites shall be met.

Evidence for competence in this unit shall be considered holistically. Each element and associated Performance Criteria shall be demonstrated on at least two occasions in accordance with the ‘Assessment Guidelines — UEG11’. Evidence shall also comprise:
- A representative body of work performance demonstrated within the timeframes typically expected of the discipline, work function and industrial environment. In particular this shall incorporate evidence that shows a candidate is able to:
  - Implement Occupational Health and Safety workplace procedures and practices including the use of risk control measures as specified in the Performance Criteria and range
  - Apply sustainable energy principles and practices as specified in the Performance Criteria and range
  - Demonstrate an understanding of the essential knowledge and associated skills as described in this unit to such an extent that the learner’s performance outcome is reported in accordance with the preferred approach; namely a percentile graded result, where required by the regulated environment
  - Demonstrate an appropriate level of employability skills
  - Conduct work observing the relevant Anti discrimination legislation, regulations, polices and workplace procedures
  - Demonstrate performance across a representative range of contexts from the prescribed items below.

| D               | At Least One Occasion | Deal with an Unplanned Event by Drawing on Essential Knowledge and Associated Skills to Provide Appropriate Solutions Incorporated in the Holistic Assessment with the Above Listed Items |

**Context of and Specific Resources for Assessment**

This unit should be assessed as it relates to normal work practice using procedures, information and resources typical of a
workplace. This should include:

- OHS policy and work procedures and instructions.
- Suitable work environment, facilities, equipment and materials to undertake actual work as prescribed by this Competency Standard Unit.
- Appropriate environmental regulation and work practices.
- Appropriate organisational requirements.
- Appropriate work environment, equipment and tools.

In addition to the resources listed above, in Context of and specific resources for assessment, evidence should show demonstrated competency in loading, unloading and exchanging gas cylinders.

Assessment of this competency must also be undertaken in either an actual workplace or under a simulated work environment. Assessment must also integrate the employability skills in section 6.7 of this competency standard.

**Method of assessment**

9.4)

This Competency Standard Unit shall be assessed by methods given in Volume 1, Part 3 ‘Assessment Guidelines’.

Note: Competent performance with inherent safe working practices is expected in the Industry to which this Competency Standard Unit applies. This requires that the specified Essential Knowledge and Associated Skills are assessed in a structured environment which is primarily intended for learning/assessment and incorporates all necessary equipment and facilities for learners to develop and demonstrate the essential knowledge and associated skills described in this unit.

**Concurrent assessment and relationship with other units**

9.5)

There are no recommended concurrent assessments with this unit, however in some cases efficiencies may be gained in terms of learning and assessment effort being concurrently managed with allied Competency Standard Units where listed.
Range Statement

RANGE STATEMENT

10) This relates to the competency standard unit as a whole providing the range of contexts and conditions to which the Performance Criteria apply. It allows for different work environments and situations that will affect performance.

This Competency Standard Unit shall be demonstrated in relation to loading, unloading and exchanging gas cylinders.

The following constants and variables included in the element/Performance Criteria in this unit are fully described in the Definitions Section of this volume and form an integral part of the Range Statement of this unit:

Appropriate Persons
Tools, Equipment and Materials
Records/Documentation
Delivery Area
Loading and Unloading of Cylinders

Unit Sector(s)

Not applicable.
Competency Field

Competency Field 11) LPG.
UETTDRRF02B Perform pole top rescue

Modification History
Not applicable.

Unit Descriptor

1) Scope:

1.1) Descriptor

This Competency Standard Unit covers the performance of pole top rescue procedures as an emergency procedure required in the work place. It specifies the mandatory requirements of rescue from a pole top and how they apply in the context of transmission, distribution and rail work functions. It encompasses responsibilities for rescue, health, safety and risk management processes at all operative levels and adherence to safety practices as part of the normal way of doing work.

Application of the Unit

2) This competency standard unit shall be selected as part of an endorsed skill set for the purposes of refresher training and/or to meet regulatory and/or network requirements.

Delivery and assessment of this unit should be undertaken within regard to the requirements of License to Practice (1.2 above), Prerequisite Competencies and Literacy and Numeracy skills (2 above) and the recommendations for concurrent assessment and relationship with other units (9.5 below).

Practice in the workplace and during training is also subject to regulations directly related to occupational health and safety and where applicable contracts of training such as apprenticeships.

Note:
1. Compliance with permits may be required in various jurisdictions and typically relates to the operation of
plant, machinery and equipment such as elevating work platforms, powder operated fixing tools, power operated tools, vehicles, road signage and traffic control and lifting equipment. Permits may also be required for some work environments such as confined spaces, working aloft, near live electrical apparatus and site rehabilitation.

2. Compliance may be required in various jurisdictions relating to currency in First Aid, confined space, lifting, risk safety measures etc

**Licensing/Regulatory Information**

**License to practice**

3) The skills and knowledge described in this unit may require a licence/registration to practice in the work place subject to regulations for undertaking of electrical work. Practice in workplace and during training is also subject to regulations directly related to Occupational Health and Safety, electricity/telecommunications/gas/water industry safety and compliance, environmental protection, anti discrimination and training. Commonwealth, State/Territory or Local Government legislation and regulations may exist that limits the age of operating certain equipment.

ESI employees are required to maintain currency in this Unit for authorisation/approval to work on ESI Networks.

**Pre-Requisites**

**Prerequisite Unit(s)**

4) **Competencies**

4.1) Granting of competency in this unit shall be made only after competency in the following unit(s) has/have been confirmed.

Where pre-requisite pathways have been identified. All competencies in the Common Unit Group must be have been completed.

Common Unit Group
Prerequisite Unit(s)  

4) 

Unit Code      Unit Title  
HLTCSR201B      Perform CPR  

Literacy and numeracy skills  

4.2) 

Participants are best equipped to achieve this unit if they have reading, writing and numeracy skills indicated by the following scales. Description of each scale is given in Volume 2, Part 3 “Literacy and Numeracy”  

Reading 3  Writing 3  Numeracy 3  

Employability Skills Information  

Employability Skills 5)  

This unit contains employability skills  

Elements and Performance Criteria Pre-Content  

6) Elements describe the essential outcomes of a competency standard unit. Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Prepare to perform pole top rescue</td>
<td>1.1 Instruction in hazards and risk control measures for specific work functions and work areas are identified and obtained. (This will include the risk assessment and control measures taken by the individual performing the rescue).</td>
</tr>
<tr>
<td></td>
<td>1.2 Tools and emergency equipment are checked for safety, functionality and placed in an accessible location to facilitate response and rescue according to established procedures.</td>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

8) Essential Knowledge and Associated Skills (EKAS): This describes the essential skills and knowledge and their level, required for this unit.

Evidence shall show that knowledge has been acquired of pole top rescue equipment and procedures.

All knowledge and skills detailed in this unit should be contextualised to current industry practices and technologies.

KS01-TRF02B Pole Top Rescue

Evidence shall show an understanding of pole top rescue to an extent indicated by the following aspects:

T1 Emergency procedures for the pole top rescue of a victim encompassing:
- Inspection of rescue equipment
- Assessing hazards to rescuer, victim and others
- Isolation procedures where appropriate
- Knowledge of Safe Approach Distances (SAD’s) appropriate to Pole Top Rescue
- Involvement of external emergency services

T2 Emergency procedures for the skills for the pole top rescue of a victim encompassing:
- Placement of rescue equipment
- Controlling hazards to rescuer, victim and others
- Maintaining Safe Approach Distances (SAD’s) appropriate to Pole Top Rescue
- Practical demonstration of rescuing a person
- Removing victim to safe location / place of safety
Evidence Guide

EVIDENCE GUIDE

9) This provides essential advice for assessment of the competency standard unit and must be read in conjunction with the Performance Criteria and the range statement of the competency standard unit and the Training Package Assessment Guidelines.

The Evidence Guide forms an integral part of this Competency Standard Unit and shall be used in conjunction with all component parts of this unit and, performed in accordance with the Assessment Guidelines of this Training Package.

Overview of Assessment

9.1) In accordance with the National Refresher Training Recognition Protocol for the Electricity Supply Industry, this unit is identified as a Refresher Training unit and is only available for use by industry to meet industry protocols and regulatory requirements.

Industry has defined Refresher Training as:

“A competency confirmation event which may include training, the purpose of which is to compensate for or prevent deterioration in a previously achieved standard of performance”

Under the protocol and the applicable State or Territory legislative and regulatory requirements, Electricity Supply Industry employees are required to maintain currency in this Unit for authorisation/approval to work on ESI Networks.

Industry accepts that opportunities to practice emergency procedures are generally restricted to simulated exercises in a controlled environment during competency confirmation programs.

The critical safety nature of working with electricity, electrical equipment, gas or any other hazardous substance/material carries risk in deeming a person competent. Hence, sources of evidence need to be ‘rich’ in nature so as to minimise error in judgment.

Methods chosen for a particular assessment will be influenced by various factors. These include the extent of the assessment, the most effective locations for the assessment activities to take place, access to physical resources, additional safety measures that may be required and the critical nature of the competencies being assessed.

These points are raised for the assessors to consider when choosing an assessment method and developing assessment instruments.
An industry endorsed Learning Assessment Plan (LAP) has been developed to support this unit.

Critical aspects of evidence required to demonstrate competency in this unit

9.2) Before the critical aspects of evidence are considered all prerequisites shall be met.

Evidence for competence in this unit shall be considered holistically. Each element and associated Performance Criteria shall be demonstrated at each competency confirmation event.

- In accordance with State and Territory regulations and the “Assessment Guidelines – UET12”. Evidence shall also comprise:
  - A performance demonstrated within the timeframes typically expected of the rescue procedure. In particular the assessment of this unit shall confirm that a candidate is able to:
  - Implement Occupational Health and Safety workplace procedures and practices including the use of risk control measures as specified in the Performance Criteria and range; and
  - Demonstrate an understanding of the essential knowledge and associated skills as described in this unit to such an extent that the learner’s performance outcome is reported in accordance with the preferred approach; namely a percentile graded result, where required by the regulated environment.
  - Demonstrated performance across a representative range of contexts from the prescribed items below:

<table>

### Context of and specific resources for assessment

This unit should be assessed as it relates to organisational rescue practice using procedures, information and resources typical of a workplace. This should include:

- OHS policy and work procedures and instructions.
- Suitable work environment, facilities, equipment and materials to safely undertake actual performance of pole top rescue procedures in the workplace.

In addition to the resources listed above, in Context of and specific resources for assessment, evidence should show demonstrated competency working in a realistic environment and a variety of conditions.

### Method of assessment

This Competency Standard Unit shall be assessed by methods given in Volume 1, Part 3 “Assessment Guidelines”.

Note:

Competent performance with inherent safe working practices is expected in the Industry to which this Competency Standard Unit applies. This requires that the specified essential knowledge and associated skills are assessed in a structured environment which is primarily intended for learning/assessment and incorporates all necessary equipment and facilities for learners to develop and demonstrate the essential knowledge and associated skills described in this unit.
9.5) Concurrent assessment and relationship with other units

For optimisation of training and assessment effort, competence in this unit is not recommended to be assessed concurrently with any other unit.
Range Statement

RANGE STATEMENT

10) This relates to the competency standard unit as a whole providing the range of contexts and conditions to which the Performance Criteria apply. It allows for different work environments and situations that will affect performance.

This Competency Standard Unit shall be demonstrated in relation to performing pole top rescue procedures in the workplace and will include the following:

Applying work procedures and instructions as they apply to risk control and personal safety measures.

Inspection and placement of rescue equipment to facilitate a prompt response and rescue from an incident at the pole top.

Applying rescue procedures as applicable to poles which may include: wood, spun concrete, steel/concrete, steel, and composites with cross arms which may include; wood, steel, and composites.

Accessing the pole top and placing, securing and attaching the rescue equipment/lowering device to the victim in accordance with workplace procedures.

Removing the victim from contact with any live conductors/apparatus where necessary in accordance with workplace procedures.

Lowering the victim to the ground and performing CPR if required in accordance with workplace procedures.

Facilitating treatment by medical professionals when and where required

The following constants and variables included in the element/Performance Criteria in this unit are fully described in the Definitions Section 1 of this volume and form an integral part of the Range Statement of this unit:

- Appropriate and relevant persons
- Assessing risk
- Assessment
- Authorisation
- Emergency
- Established procedures
- Fall prevention
- Hazards
- Identifying hazards
- Inspect
- Legislation
- Notification
- OHS practices
- OHS issues
- Permits and/or permits to work
