CONTENTS

Preliminary Information ................................................................. 35
Summary of AQF Qualifications in TLI10 Transport and Logistics Training Package (Version 4.2) ............................... 35
Units of competency and their prerequisites in TLI10 Transport and Logistics Training Package (Version 4.2) ........................................... 39
Imported Units of Competency in TLI10 Transport and Logistics Training Package (Version 4.2) ......................................................... 75
Summary mapping ........................................................................... 85
Overview of Training Packages ......................................................... 99
Historical Information ...................................................................... 106
TLI10 Transport and Logistics Training Package (Version 4) .................. 112
Assessment Guidelines ...................................................................... 113
Competency Standards ...................................................................... 129
Qualifications Framework ................................................................. 134
TLI10 Version 4 Sector and Qualifications Pathways ............................ 143
TLI10 Version 4.2 Skill Sets ................................................................. 153
TLI11210 Certificate I in Warehousing Operations ............................... 156
TLI11310 Certificate I in Logistics ...................................................... 161
TLI121210 Certificate II in Driving Operations .................................. 167
TLI121311 Certificate II in Rail Infrastructure .................................... 177
TLI121413 Certificate II in Stevedoring ............................................ 186
TLI121610 Certificate II in Warehousing Operations ......................... 193
TLI121710 Certificate II in Road Transport Yard Operations (Freight Handler) ............................................................... 200
TLI121810 Certificate II in Logistics ................................................... 207
TLI121911 Certificate II in Track Protection ...................................... 213
TLI122013 Certificate II in Shunting ................................................... 219
TLI122113 Certificate II in Rail Track Vehicle Driving ....................... 224
TLI122213 Certificate II in Tram or Light Rail Infrastructure ............... 230
TLI122313 Certificate II in Rail Customer Service ............................... 235
TLI122413 Certificate II in Furniture Removal ................................... 240
TLI131210 Certificate III in Driving Operations ................................. 245
TLI131310 Certificate III in International Freight Forwarding (Operator) ........................................................................ 262
TLI131410 Certificate III in Rail Driving .............................................. 267
TLI131610 Certificate III in Warehousing Operations .......................... 273
TLI131710 Certificate III in Mobile Crane Operations ......................... 281
TLI131811 Certificate III in Rail Track Surfacing ................................. 287
TLI131913 Certificate III in Mechanical Rail Signalling ..................... 292
TLI132111 Certificate III in Rail Structures ........................................ 299
TLI132310 Certificate III in Electric Passenger Train Guard ................ 305
TLI132410 Certificate III in Logistics .................................................. 310
TLI132511 Certificate III in Rail Infrastructure .................................... 311
TLI132611 Certificate III in Rail Signalling ......................................... 317
TLI132711 Certificate III in Track Protection ...................................... 327
TLI132813 Certificate III in Rail Yard Coordination ............................. 333
TLI132913 Certificate III in Tram or Light Rail Infrastructure ............... 338
TLI133013 Certificate III in Heritage Locomotive Assistant or Steam Locomotive Fireman .................................................. 343
TLI133113 Certificate III in Rail Customer Service .............................. 354
TLI133213 Certificate III in Terminal Train Driving ............................ 359
TLI133313 Certificate III in Furniture Removal ................................... 365
TLISS00018 Installing Transoms Skill Set ......................................................... 372
TLISS00016 Install Mechanical Equipment Skill Set ........................................ 379
TLISS00015 Handsignaller Skill Set ................................................................. 391
TLISS00013 Examining Timber Structures Skill Set ......................................... 396
TLISS00012 Examining Steel Structures Skill Set ............................................. 402
TLISS00011 Examining Concrete/Masonry Structures Skill Set .......................... 405
TLISS00010 Electric/Track Welding Skill Set .................................................. 413
TLISS00008 Decommission Mechanical Signalling Infrastructure and Interlocking
   Equipment Skill Set ....................................................................................... 427
TLISS00007 Coordinate Multiple Work Groups Skill Set .................................... 434
TLISS00006 Control Rail Traffic Through Worksite Skill Set ............................ 441
TLISS00005 Conduct Track Protection Skill Set ................................................. 450
TLISS00004 Blocking Protection Skill Set ......................................................... 459
TLISS00003 Aluminothermic Welding Skill Set ............................................... 466
TLISS00002 Accessing the Rail Corridor Skill Set ............................................ 471
TLISS00001 Access and Move a Track Vehicle Within a Defined Worksite Skill Set 477
TLISS00009 Driving Instructor Skill Set ............................................................ 484
TLISS00008 Integrated Logistics Support Inventory Controller Skill Set .............. 493
TLISS00007 Diploma of Materiel Logistics ....................................................... 505
TLISS00006 Diploma of Logistics .................................................................... 513
TLISS00005 Diploma of Deployment Logistics ................................................. 522
TLISS00004 Diploma of Rail Operations Management ...................................... 533
TLISS00003 Aluminothermic Welding Skill Set ............................................... 543
TLISS00002 Accessing the Rail Corridor Skill Set ............................................ 550
TLISS00001 Access and Move a Track Vehicle Within a Defined Worksite Skill Set 555
TLISS00000 Aluminothermic Welding Skill Set ............................................... 563
TLISS00000 Access and Move a Track Vehicle Within a Defined Worksite Skill Set 572
TLISS00000 Aluminothermic Welding Skill Set ............................................... 577
TLISS00000 Accessing the Rail Corridor Skill Set ............................................ 579
TLISS00000 Accessing the Rail Corridor Skill Set ............................................ 581
TLISS00000 Accessing the Rail Corridor Skill Set ............................................ 583
TLISS00000 Aluminothermic Welding Skill Set ............................................... 585
TLISS00000 Control Rail Traffic Through Worksite Skill Set ............................ 587
TLISS00000 Aluminothermic Welding Skill Set ............................................... 589
TLISS00000 Aluminothermic Welding Skill Set ............................................... 591
TLISS00000 Accessing the Rail Corridor Skill Set ............................................ 593
TLISS00000 Accessing the Rail Corridor Skill Set ............................................ 595
TLISS00000 Accessing the Rail Corridor Skill Set ............................................ 597
TLISS00000 Accessing the Rail Corridor Skill Set ............................................ 599
TLISS00000 Accessing the Rail Corridor Skill Set ............................................ 601
TLISS00000 Accessing the Rail Corridor Skill Set ............................................ 603
TLISS00000 Accessing the Rail Corridor Skill Set ............................................ 605
TLISS00000 Accessing the Rail Corridor Skill Set ............................................ 607
TLISS00000 Accessing the Rail Corridor Skill Set ............................................ 609
TLISS00000 Accessing the Rail Corridor Skill Set ............................................ 611
TLISS00000 Accessing the Rail Corridor Skill Set ............................................ 613
TLISS00000 Accessing the Rail Corridor Skill Set ............................................ 615
TLISS00000 Accessing the Rail Corridor Skill Set ............................................ 617
TLISS00022 International Freight Forwarding Skill Set .................................................. 619
TLISS00023 Light On-track Equipment Operation Skill Set ........................................... 621
TLISS00024 Logistics Configuration Management Skill Set ........................................... 623
TLISS00025 Logistics Executive Management Skill Set ................................................ 625
TLISS00026 Logistics Inventory Controller Skill Set .................................................... 627
TLISS00027 Logistics Product Management Skill Set .................................................... 629
TLISS00028 Logistics Sustainment Management Skill Set .............................................. 631
TLISS00029 Logistics Sustainment Practitioner Skill Set ............................................... 633
TLISS00030 Lookout Working Skill Set ...................................................................... 635
TLISS00031 Maintain Aerial Signal/Telecommunication Lines and Cables Skill Set ... .... 637
TLISS00032 Maintain Bridge Bearings Skill Set ............................................................ 639
TLISS00033 Maintain Mechanical Equipment Skill Set ................................................ 641
TLISS00035 Minor Track Equipment Operation Skill Set .............................................. 643
TLISS00036 Mobile Crane Operations Supervisor Skill Set .......................................... 645
TLISS00037 Open Road Operator Skill Set ................................................................... 647
TLISS00038 Operate Signalling/Point Control Equipment Skill Set .............................. 649
TLISS00039 Plan Track Possessions Protection Skill Set .............................................. 651
TLISS00040 Rail Adjustment Skill Set ........................................................................... 653
TLISS00041 Rail Infrastructure Induction Skill Set ....................................................... 655
TLISS00043 Repairing Concrete/Masonry Structures Skill Set .................................... 657
TLISS00044 Repairing Steel Structures Skill Set ......................................................... 659
TLISS00045 Repairing Timber Structures Skill Set ..................................................... 661
TLISS00046 Road Safety Skill Set ................................................................................. 663
TLISS00047 Road Tunnel Operator Skill Set ................................................................ 665
TLISS00049 Suburban Network Train Driver Assistant Skill Set .................................. 667
TLISS00050 Track Grinding Skill Set ............................................................................ 669
TLISS00051 Track Inspection Skill Set ........................................................................... 671
TLISS00052 Track Lubrication Skill Set ....................................................................... 673
TLISS00053 Track Occupancy Protection Skill Set ...................................................... 675
TLISS00054 Track Patrol Skill Set ................................................................................ 677
TLISS00055 Travel Medium/Heavy On-track Equipment Skill Set ............................... 679
TLISS00056 Travel Track Vehicle Under Block Working Conditions Skill Set ............ 681
TLISS00057 Travel Track Vehicle Under Occupancy Authority Skill Set .................... 683
TLISS00060 Ultrasonic Points and Crossings Testing Skill Set .................................... 685
TLISS00061 Ultrasonic Rail Testing Skill Set ................................................................ 687
TLISS00062 Certify Rolling Stock Skill Set ................................................................ 689
TLISS00063 Move Rolling Stock Within Defined Limits Skill Set ................................. 691
TLISS00064 Rail Maintainer Skill Set ............................................................................ 693
TLISS00065 Tram or Light Rail Turnout Construction Skill Set .................................... 695
TLISS00066 Tram or Light Rail Turnout Installation Skill Set ....................................... 697
TLISS00067 Submerged Arc Welding Skill Set ............................................................. 699
TLISS00068 Tram or Light Rail Track Inspection Skill Set ............................................ 701
TLISS00069 Tram or Light Rail Track Sweeping Skill Set ............................................ 703
TLISS00070 Mentoring Skill Set .................................................................................... 705
TLISS00071 Lead Shunter Skill Set ............................................................................... 707
TLISS00072 Compiler Classifier Skill Set ..................................................................... 709
TLISS00073 Furniture Removal Pre-Packer Skill Set .................................................. 711
TLISS00074 Furniture Removal Team Leader Skill Set .............................................. 713
TLISS00075 International Furniture Removal Packer and Wrapper Skill Set ............. 715
TLISS00076 Introduction to the Waste Industry Skill Set ............................................. 717
TLISS00077 Rail Operations Safeworking Skill Set .................................................... 719
TLISS00078 Rail Signal Panel Operation Skill Set ....................................................... 721
TLISS00079 Stevedoring Clerical Skill Set .................................................................... 723
TLISS00080 Stevedoring Crane Operations Skill Set .................................................. 725
TLISS00081 Stevedoring Equipment Controller Skill Set ............................................. 727
TLISS00082 Stevedoring Equipment Operations/Light Load Shifting Skill Set .............. 729
TLISS00083 Stevedoring Gantry Crane Operations Skill Set .................................. 731
TLISS00084 Stevedoring Operation Induction and Safety Skill Set ............................. 733
TLISS00085 Stevedoring Reefer Skill Set .................................................................. 735
TLISS00086 Stevedoring Ship Mounted Crane Operations Skill Set ......................... 737
TLISS00087 Stevedoring Team Leader Skill Set ......................................................... 739
TLISS00088 Tow Truck Driver Skill Set ...................................................................... 741
TLISS00089 Train Buffet Operation Skill Set ............................................................. 743
TLISS00090 Waste Industry Off-Sider Skill Set ......................................................... 745
TLISS00091 Stevedoring Equipment Operations/Specialised Load Shifting Skill Set .... 747
AHC0851 Manage Occupational Health and Safety (OHS) processes ....................... 749
BSBHRM405A Support the recruitment, selection and induction of staff .................... 757
BSBHRM513A Manage workforce planning ............................................................. 765
BSBMGT402A Implement operational plan .................................................................. 771
BSBPMG416A Apply project procurement procedures ............................................... 779
BSBREL402A Build client relationships and business networks ................................. 789
BSBWHS303A Participate in WHS hazard identification, risk assessment and risk control798
BSBWHS501A Ensure a safe workplace .................................................................. 808
BSBWORS02B Ensure team effectiveness ................................................................. 816
BSBWRK411A Support employee and industrial relations procedures ....................... 824
CPPSEC5001A Establish and maintain an Occupational Health and Safety system ....... 832
FPICOT3261 Transport forestry logs using trucks ..................................................... 842
HLTCSD306D Respond effectively to behaviours of concern ................................... 855
MARC1001A Carry out shore-based mooring and untying operations ...................... 862
MARE1001A Communicate during shore-based mooring and untying operations ....... 870
MARF1004A Follow work health and safety, and emergency procedures during.......

shock-based mooring operations .............................................................................. 878
PSPGOV205B Participate in workplace change ......................................................... 885
PSPHRM504A Implement workforce planning and succession strategies ................... 891
PSPPROC505A Manage procurement risk ............................................................... 901
PSPSEC602A Manage security awareness ............................................................... 910
PUAWE005B Operate as part of an emergency control organisation .......................... 917
SITHFAB201 Provide responsible service of alcohol ................................................ 924
SITXCOM401 Manage conflict ................................................................................ 936
SITXFS201 Manage hygienic practices for food safety ............................................. 944
SITXMPR404 Coordinate marketing activities ......................................................... 953
TAEASS402A Assess competence .......................................................................... 961
TAED404A Mentor in the workplace ....................................................................... 973
TAETAS501B Undertake organisational training needs analysis .............................. 980
TLIA1001A Secure cargo ......................................................................................... 986
TLIA1002A Connect and disconnect reefer units ....................................................... 994
TLIA2009A Complete and check import/export documentation .............................. 1001
TLIA2011A Package goods ....................................................................................... 1010
TLIA2012A Pick and process orders ......................................................................... 1018
TLIA2013A Receive goods ....................................................................................... 1026
TLIA2014A Use product knowledge to complete work operations ............................ 1034
TLIA2020A Replenish stock ...................................................................................... 1042
TLIA2021A Despatch stock ...................................................................................... 1050
TLIA2022A Participate in stocktakes ........................................................................ 1058
TLIA2041A Manually sort mail and parcels ............................................................ 1066
TLIA2042A Despatch mail ......................................................................................... 1074
TLIA2043A Consolidate mail .......................................................... 1082
TLIA2044A Carry out delivery operations .............................................. 1090
TLIA2045A Process international parcels and letters ............................... 1098
TLIA2046A Process parcels and letters ................................................ 1107
TLIA2047A Stream mail .................................................................... 1116
TLIA2048A Carry out border clearance functions .................................... 1124
TLIA2049A Apply specialist permit requirements as part of customs broking activities 1132
TLIA2050A Lash and unlash cargo and containers .................................. 1141
TLIA3002A Maintain container/cargo records ....................................... 1150
TLIA3004A Process receipt and delivery of containers and cargo ............ 1158
TLIA3008A Transfer cargo ................................................................ 1166
TLIA3010A Coordinate goods to bond premises .................................... 1174
TLIA3015A Complete receival/despatch documentation .......................... 1181
TLIA3016A Use inventory systems to organise stock control ................. 1189
TLIA3017A Identify products and store to specifications .......................... 1197
TLIA3018A Organise despatch operations ............................................. 1206
TLIA3019A Organise receival operations ............................................. 1214
TLIA3023A Coordinate stocktakes ...................................................... 1222
TLIA3024A Organise warehouse records operations ............................... 1230
TLIA3026A Monitor storage facilities ................................................... 1238
TLIA3038A Control and order stock ..................................................... 1247
TLIA3039A Receive and store stock ........................................................ 1255
TLIA3050A Apply GST legislation as part of customs broking activities .... 1263
TLIA3053A Carry out customs valuation .............................................. 1271
TLIA3054A Classify commodities for the import and export of goods through customs 1280
TLIA3055A Coordinate terminal/wharf equipment operations .................. 1289
TLIA4005A Check and evaluate records and documentation ..................... 1298
TLIA4006A Organise and monitor terminal/wharf operations ................. 1305
TLIA4025A Regulate temperature controlled stock ................................. 1313
TLIA4028A Assess and monitor optimum stock levels ............................. 1321
TLIA4030A Organise cargo for export .................................................. 1329
TLIA4031A Consolidate freight ............................................................ 1337
TLIA4032A Organise transport of freight or goods .................................. 1344
TLIA4033A Organise international transport of freight ............................ 1352
TLIA4040A Implement and monitor stevedoring regulations ..................... 1359
TLIA4051A Carry out quarantine procedures ......................................... 1367
TLIA4052A Carry out customs clearance practices .................................. 1376
TLIA4055A Classify complex commodities for the import and export of goods through customs .................................................. 1386
TLIA4056A Carry out complex customs valuation .................................... 1396
TLIA4062A Implement safety stock systems .......................................... 1405
TLIA4063A Coordinate stevedoring clerical functions ............................ 1412
TLIA5029A Plan and manage storage of dangerous goods and hazardous substances .. 1420
TLIA5035A Manage international freight transfer ................................... 1430
TLIA5058A Manage facility and inventory requirements .......................... 1440
TLIA5059A Plan and organise the international forwarding of freight by sea and multimodal transport ................................................. 1447
TLIA5060A Plan and organise the international forwarding of freight by air transport 1460
TLIA5061A Plan and organise the international forwarding of freight by road and rail transport ......................................................... 1473
TLIB0117A Assist with preparation of a train prior to operation ................. 1486
TLIB0127A Certify rolling stock prior to handover ................................ 1495
TLIB0128A Conduct pre-movement checks on motive power units .......... 1499
TLIB0132A Start up and shut down a single locomotive ........................................... 1504
TLIB0124A Clean transportation units and facilities for passenger use .................... 1511
TLIB0128A Maintain and use hand tools ................................................................. 1520
TLIB0130A Undertake general site maintenance ..................................................... 1527
TLIB0131A Clean up plant, equipment and worksite ............................................. 1535
TLIB0180A Use, clean and maintain towing equipment ......................................... 1543
TLIB0193A Clean equipment and restore worksite .................................................. 1552
TLIB2001A Check and assess operational capabilities of equipment ...................... 1560
TLIB2003A Carry out vehicle servicing and maintenance ..................................... 1568
TLIB2004A Carry out vehicle inspection ................................................................ 1575
TLIB2008A Carry out inspection of trailers ............................................................ 1582
TLIB2009A Check conveyor operational status ....................................................... 1588
TLIB2022A Diagnose and rectify minor faults ....................................................... 1597
TLIB2023A Provide sanitation and water services support to passenger transportation units .............................................................. 1605
TLIB2029B Use and maintain minor mechanical equipment ............................... 1612
TLIB2034A Maintain poles and associated hardware ........................................... 1620
TLIB2073A Clean road tankers ............................................................................... 1629
TLIB2079A Set up and secure a towing situation .................................................... 1638
TLIB2081A Repair timber structures ..................................................................... 1647
TLIB2082A Repair steel structures ......................................................................... 1655
TLIB2083A Maintain bridge bearings ..................................................................... 1663
TLIB2084A Carry out routine maintenance of structures ....................................... 1671
TLIB2085A Apply track fundamentals .................................................................... 1679
TLIB2086A Apply awareness of structures fundamentals ...................................... 1687
TLIB2090A Use communication systems in a taxicab .......................................... 1695
TLIB2091A Measure and record track geometry ................................................... 1703
TLIB2092A Operate minor mechanical equipment ............................................... 1710
TLIB2096A Repair concrete/masonry structures .................................................... 1718
TLIB2097A Install and maintain guard rails ............................................................. 1726
TLIB2104A Identify, diagnose and rectify faults on electric passenger trains ........ 1733
TLIB2111A Assist with testing train braking system on electric passenger train .... 1740
TLIB2119A Carry out maintenance of trailers ....................................................... 1747
TLIB2121B Maintain rail joints ................................................................................ 1754
TLIB2122A Apply awareness of fundamentals of rail operations in yards or sidings 1761
TLIB2125A Apply awareness of tram or light rail track fundamentals .................. 1767
TLIB2130A Diagnose and rectify minor faults on on-track vehicles ...................... 1774
TLIB2131A Prepare train ........................................................................................ 1781
TLIB2133A Test medium/heavy track vehicle braking system .............................. 1787
TLIB3002A Test equipment and isolate faults ....................................................... 1792
TLIB3005A Carry out maintenance of vehicles designed to carry special loads ..... 1800
TLIB3006A Carry out inspection of vehicles designed to carry special loads .......... 1808
TLIB3011A Set up and rig crane for lift .................................................................... 1815
TLIB3012A Plan job and set up work areas ............................................................ 1823
TLIB3013A Maintain mobile cranes ........................................................................ 1832
TLIB3014A Load and unload wheeled or tracked crane ......................................... 1841
TLIB3015A Undertake site inspection .................................................................... 1849
TLIB3016A De-rig, pack and store tools and equipment ........................................ 1857
TLIB3017A Assemble and dismantle boom or jib ................................................... 1864
TLIB3018A Conduct full train examination .............................................................. 1872
TLIB3019B Test train braking system ..................................................................... 1881
TLIB3020A Visually inspect stationary train ............................................................ 1889
TLIB3021A Conduct train roll-by inspection ........................................................... 1897

## Version 2

### Release date: February 2012

The following changes have been undertaken in this new version of TLI10 Transport and Logistics Training Package:

### The following qualifications have had minor changes to the elective units:

<table>
<thead>
<tr>
<th>Code</th>
<th>Qualification Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>TLI10410</td>
<td>Certificate I in Transport and Logistics (Rail Operations)</td>
</tr>
<tr>
<td>TLI11210</td>
<td>Certificate I in Warehousing Operations</td>
</tr>
<tr>
<td>TLI11310</td>
<td>Certificate I in Logistics</td>
</tr>
<tr>
<td>TLI20410</td>
<td>Certificate II in Transport and Logistics (Rail Operations)</td>
</tr>
<tr>
<td>TLI21210</td>
<td>Certificate II in Driving Operations</td>
</tr>
<tr>
<td>TLI21510</td>
<td>Certificate II in Furniture Removal</td>
</tr>
<tr>
<td>TLI21610</td>
<td>Certificate II in Warehousing Operations</td>
</tr>
<tr>
<td>TLI21710</td>
<td>Certificate II in Road Transport Yard Operations (Freight Handler)</td>
</tr>
<tr>
<td>TLI21810</td>
<td>Certificate II in Logistics</td>
</tr>
<tr>
<td>TLI31210</td>
<td>Certificate III in Driving Operations</td>
</tr>
<tr>
<td>TLI31510</td>
<td>Certificate III in Stevedoring</td>
</tr>
<tr>
<td>TLI31610</td>
<td>Certificate III in Warehousing Operations</td>
</tr>
<tr>

The following imported units have been removed from the Training Package:

- CPCCCO2004A Carry out concrete work
- CPCCSF2004A Place an fix reinforcement materials

The following skill sets have been added to the Training Package:
- TLI Decommission Mechanical Signalling Infrastructure and Interlocking Equipment Skill Set
- TLI Light On-Track Equipment Operation Skill Set
- TLI Minor Track Equipment Operation Skill Set
- TLI Stevedoring Operation Induction and Safety Skill Set
- TLI Travel Medium/Heavy On-Track Equipment Skill Set
- TLI Suburban Network Train Driver Assistant Skill Set.

The following skill sets have been revised in this version of the Training Package:
- TLI Access and Move a Track Vehicle within a Defined Worksite Skill Set
- TLI Access the Rail Corridor Skill Set
- TLI Aluminothermic Welding Skill Set
- TLI Blocking Protection Skill Set
- TLI Conduct Track Protection Skill Set
- TLI Control Rail Traffic through Worksite Skill Set
- TLI Electric Track Welding Skill Set
- TLI Flashbutt Welding Skill Set
- TLI Handsignaller Skill Set
- TLI Install Transoms Skill Set

The following skill sets have been removed from the Training Package:

- Minor Plant Operation Skill Set  
- Rail Plant Operation Skill Set  
- Turnout Building Skill Set  
- Turnout Maintaining Skill Set.  

The following pathways charts have been added to the Training Package:

- Certificate IV in Driving Operations Pathways  
- Driving Instruction Pathways  
- International Freight Forwarding Pathways  
- Light and Heavy Rail Operations Pathways  
- Rail Network Pathways  
- Track Protection Pathways.  

The following pathways charts have been revised in this version of the Training Package:

- Certificate III in Driving Operations Pathways  
- Logistics Pathways  
- Rail Infrastructure Pathways.

Special Conditions (Waiver)

For the sake of clarity, where the license refers to "the work", in addition to meaning the work in its entirety this term shall also mean "extracts of the work". Extracts of the work carry with it the respective licence, and is thus “partitioned”.

The details of the relevant licence conditions are available on the Creative Commons website (www.creativecommons.org.au) as is the full legal code. The document must be attributed as the TLI10 TRANSPORT AND LOGISTICS TRAINING PACKAGE Release 4.2.

Disclaimer

This work is the result of wide consultations with Australian industry participants. It is a collaborative view and does not necessarily represent the view of Department of Industry or any specific body. For the sake of brevity it may omit factors which could be pertinent in particular cases.

While care has been taken in the preparation of this Training Package, Department of Industry and the original developer do not warrant that any licensing or registration requirements specified here are either complete or up-to-date for your State or Territory. Department of Industry and the original developer do not accept any liability for any damage or loss (including indirect and consequential loss) incurred by any person as a result of relying on the information contained in this Training Package.

The Commonwealth, through the Department of Industry, does not accept any liability to any person for the information or advice (or the use of such information or advice) which is provided in this material or incorporated into it by reference. The information is provided on the basis that all persons accessing this material undertake responsibility for assessing the relevance and accuracy of its content. No liability is accepted for any information or services which may appear in any other format. No responsibility is taken for any information or services which may appear on any linked websites.
Preliminary Information

Important note to users

Training Packages are not static documents; they are amended periodically to reflect the latest industry practices and are version controlled. It is essential that the latest version is always used.

Check the version number before commencing training or assessment

This Training Package is Version 4.2 – check whether this is the latest version by going to (http://www.training.gov.au/) and locating information about the Training Package. Alternatively, contact Transport and Logistics Industry Skills Council (http://www.tlisc.org.au) to confirm the latest version number.

Explanation of version number conventions

The primary release Training Package is Version 1. When changes are made to a Training Package, sometimes the version number is changed and sometimes it is not, depending on the extent of the change. When a Training Package is reviewed it is considered to be a new Training Package for the purposes of version control, and is Version 1. Do not confuse the version number with the Training Package’s national code (which remains the same during its period of endorsement).

Explanation of the review date

The review date (shown on the title page and in the footer of each page) indicates when the Training Package is expected to be reviewed in the light of changes such as changing technologies and circumstances. The review date is not an expiry date. Endorsed Training Packages and their components remain current until they are reviewed or replaced.

Summary of AQF Qualifications in TLI10 Transport and Logistics Training Package (Version 4.2)

### Overview

There are 61 qualifications in the TLI10 Transport and Logistics Training Package (Version 4) at the following AQF levels:

- 3 at AQF 1 Certificate I
- 12 at AQF 2 Certificate II
- 21 at AQF 3 Certificate III
- 16 at AQF 4 Certificate IV
- 7 at AQF 5 Diploma
- 2 at AQF 6 Advanced Diploma

### Qualifications by sector are as follows:

- Pathways certificate – 1 qualification
- Warehousing – 4 qualifications
- Road transport– 5 qualifications
Units of competency and their prerequisites in TLI10 Transport and Logistics Training Package (Version 4.2)

This table lists all of the qualifications in the TLI10 Transport and Logistics Training Package Version 4.2.

Imported Units of Competency in TLI10 Transport and Logistics Training Package (Version 4.2)

The TLI10 Transport and Logistics Training Package (Version 4.2) has imported units of competency from other Training Packages. Please check the relevant Assessment Guidelines of the source Training Package by accessing the national training website www.training.gov.au (TGA) or a physical copy regarding any special conditions which may apply to the assessment of imported units of competency. For up-to-date versions of the following units, refer to www.training.gov.au or the respective Industry Skills Councils.

</tbody>
</table>

Where any of the units listed above are used to form a qualification or Skill Set they do not count as units imported under the following packaging rule:

up to 2 suitable units (aligned at AQF xx) drawn with appropriate contextualisation from either other Transport and Logistics Certificate xx qualifications, or other relevant endorsed Training Packages.

**Summary mapping**

**Mapping of TLI10 Transport and Logistics Training Package Version 4.2 to TLI10 Transport and Logistics Training Package Version 4.1**

All units of competency previously listed in TLI10 Version 4.1 as ‘not carried forward’ have been reinstated in TLI10 Version 4.2.
Mapping of TLI10 Transport and Logistics Training Package Version 4.1 to TLI10 Transport and Logistics Training Package Version 4.0

This table shows the relationship between qualifications and units of competency that have changed in the TLI10 Transport and Logistics Training Package Version 4.1 and the qualifications and units of competency in the TLI10 Transport and Logistics Training Package Version 4.0.

Legend:  
E = Equivalent  
N = Not Equivalent

**Overview of Training Packages**

**What is a Training Package?**
A Training Package is an integrated set of nationally endorsed competency standards, assessment guidelines and Australian Qualifications Framework (AQF) qualifications for a specific industry, industry sector or enterprise.

Each Training Package:

- provides a consistent and reliable set of components for training, recognising and assessing peoples skills, and may also have optional support materials
- enables nationally recognised qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training which suits individual and industry requirements
- encourages learning and assessment in a work-related environment which leads to verifiable workplace outcomes.

**How do Training Packages fit within the National Skills Framework?**

The National Skills Framework applies nationally, is endorsed by the Ministerial Council for Vocational and Technical Education, and comprises the Australian Quality Training Framework 2013, AQTF (Version 2013), and Training Packages endorsed by the National Skills Standards Council (NSSC).

**How are Training Packages developed?**

Training Packages are developed by Industry Skills Councils or enterprises to meet the identified training needs of specific industries or industry sectors. To gain national endorsement of Training Packages, developers must provide evidence of extensive research, consultation and support within the industry area or enterprise.

**How do Training Packages encourage flexibility?**

Training Packages describe the skills and knowledge needed to perform effectively in the workplace without prescribing how people should be trained.

Training Packages acknowledge that people can achieve vocational competency in many ways by emphasising what the learner can do, not how or where they learned to do it. For example, some experienced workers might be able to demonstrate competency against the units of competency, and even gain a qualification, without completing a formal training program.

With Training Packages, assessment and training may be conducted at the workplace, off-the-job, at a training organisation, during regular work, or through work experience, work placement, work simulation or any combination of these.

**Who can deliver and assess using Training Packages?**

Training and assessment using Training Packages must be conducted by a Registered Training Organisation (RTO) that has the qualifications or specific units of competency on its scope of registration, or that works in partnership with another RTO, as specified in the AQTF (Version 2013).
Training Package Components

Training Packages are made up of mandatory components endorsed by the NQC, and optional support materials.

Training Package endorsed components

The nationally endorsed components include the Competency Standards, Assessment Guidelines and Qualifications Framework. These form the basis of training and assessment in the Training Package and, as such, they must be used.
**Overview of Training Packages**

**Competency standards**

Each unit of competency identifies a discrete workplace requirement and includes the knowledge and skills that underpin competency as well as language, literacy and numeracy; and occupational health and safety requirements. The units of competency must be adhered to in training and assessment to ensure consistency of outcomes.

**Assessment guidelines**

The Assessment Guidelines provide an industry framework to ensure all assessments meet industry needs and nationally agreed standards as expressed in the Training Package and the AQTF (Version 2013). The Assessment Guidelines must be followed to ensure the integrity of assessment leading to nationally recognised qualifications.

**Qualifications framework**

Each Training Package provides details of those units of competency that must be achieved to award AQF qualifications. The rules around which units of competency can be combined to make up a valid AQF qualification in the Training Package are referred to as the ‘packaging rules’. The packaging rules must be followed to ensure the integrity of nationally recognised qualifications issued.

**Training Package Support Materials**

The endorsed components of Training Packages are complemented and supported by optional support materials that provide for choice in the design of training and assessment to meet the needs of industry and learners. Training Package support materials can relate to single or multiple units of competency, an industry sector, a qualification or the whole Training Package. They tend to fall into one or more of the categories illustrated below.
Training Package support materials are produced by a range of stakeholders such as RTOs, individual trainers and assessors, private and commercial developers and Government agencies.

**Training Package, Qualification and Unit of Competency Codes**

There are agreed conventions for the national codes used for Training Packages and their components. Always use the correct codes, exactly as they appear in the Training Package, and with the code always before the title.

**Training Package codes**

Each Training Package has a unique five-character national code assigned when the Training Package is endorsed, for example XYZ08. The first three characters are letters identifying the Training Package industry coverage and the last two characters are numbers identifying the year of endorsement.

**Qualification codes**

Within each Training Package, each qualification has a unique eight-character code, for example XYZ10108. Qualification codes are developed as follows:

- the first three letters identify the Training Package;
- the first number identifies the qualification level (noting that, in the qualification titles themselves, arabic numbers are not used);
- the next two numbers identify the position in the sequence of the qualification at that level; and
- the last two numbers identify the year in which the qualification was endorsed. (Where qualifications are added after the initial Training Package endorsement, the last two numbers may differ from other Training Package qualifications as they identify the year in which those particular qualifications were endorsed.)

**Unit of Competency codes**

Within each Training Package, each unit of competency has a unique code. Unit of competency codes are assigned when the Training Package is endorsed, or when new units of competency are added to an existing endorsed Training Package. Unit codes are developed as follows:

- a typical code is made up of 12 characters, normally a mixture of uppercase letters and numbers, as in TLIR4012A
- the first three characters signify the Training Package (TLI10 Transport and Logistics Training Package) – in the above example and up to eight characters, relating to an industry sector, function or skill area, follow
- the last character is always a letter and identifies the unit of competency version. An ‘A’ at the end of the code indicates that this is the original unit of competency. ‘B’, or another incremented version identifier means that minor changes have been made. Typically this would mean that wording has changed in the range statement or evidence guide, providing clearer intent
- where changes are made that alter the outcome, a new code is assigned and the title is changed.
Training Package, Qualification and Unit of Competency Titles
There are agreed conventions for titling Training Packages and their components. Always use the correct titles, exactly as they appear in the Training Package, and with the code always placed before the title.

Training Package titles
The title of each endorsed Training Package is unique and relates the Training Packages broad industry coverage.

Qualification titles
The title of each endorsed Training Package qualification is unique. Qualification titles use the following sequence:

- first, the qualification is identified as either Certificate I, Certificate II, Certificate III, Certificate IV, Diploma, Advanced Diploma, Vocational Graduate Certificate, or Vocational Graduate Diploma;
- this is followed by the words ‘in’ for Certificates I to IV, and ‘of’ for Diploma, Advanced Diploma, Vocational Graduate Certificate and Vocational Graduate Diploma;
- then, the industry descriptor, for example Telecommunications; and
- then, if applicable, the occupational or functional stream in brackets, for example (Computer Systems).

For example:

- TLI21610 Certificate II in Warehousing Operations
- TLI32410 Certificate III in Logistics Operations.

Unit of Competency titles
Each unit of competency title is unique. Unit of competency titles describe the competency outcome concisely, and are written in sentence case.

For example:

- TLIA1001A Secure cargo
- TLIB3006A Carry out inspection of vehicles designed to carry special loads.

Below is an explanation of the unit of competency identifier and the relevance of the numbers.
Overview of Training Packages

Field of competency
Sequence number of the unit

TLIA2011A Package Goods

This identifies the Training Package
A QF level where unit first appears (even though the unit may be included in qualifications at varying levels)

Historical Information

TLI10 Transport and Logistics Training Package (Version 1.1)

TLI10 Transport and Logistics Training Package (Version 1.1) is the outcome of an extensive review and redevelopment process.

Profile of the Australian Transport and Logistics Industry

A snapshot

Transport and Logistics is often referred to as the ‘backbone’ of the Australian economy. It directly affects every part of the economy and everyone’s standard of living – from what we buy, to the price we pay for goods, to how we get from place to place. The transport and logistics network comprises ports, roads, railways, freight terminals, airports, and distribution and materials handling centers. Because of its integration within the economy and the embedded nature of its functions, the relative ‘health’ of the Transport and Logistics Industry is often considered a barometer for the overall strength of the economy. The industry is characterised by diversity of mode, size, freight type, ownership, location, employees’ skills and infrastructure requirements. Transport and logistics involves almost every type of occupation, from crews of vehicles, trains, vessels and aircraft to staff involved in engineering, infrastructure, tourism, hospitality, security, retailing, warehousing, administration and IT.

Industry overview

As global markets continue to recover, Australia’s future success depends on achieving higher levels of productivity growth in all areas of the economy. The Transport and Logistics Industry is a significant contributor to the nation’s prosperity through the efforts of its 1.2 million-strong workforce and through the vital role it plays in underpinning the competitiveness of all other industries. The Australia to 2050 report highlights the impact of infrastructure investment on lifting economic growth. This was underscored by announcements of increased Commonwealth Government investment, totaling $36 billion, in roads, railways and ports. The success of these projects will depend on access to highly skilled people across a broad range of transport and logistics capabilities in the construction and operational phases. Infrastructure has emerged as a key national priority, with renewed focus on long-term planning and the identification of inefficiencies and bottlenecks. Regulatory reform has been aimed at ensuring the coordination of all levels of government to build an efficient, safe, sustainable, accessible and competitive transport system. Initiatives include the creation of single national regulators for heavy vehicles, rail safety and maritime safety.

Australia’s freight task in 2020 will be double that of 2006. By 2050, it will be tripled. Capacity constraints and congestion are already evident, which means that delivering transport and logistics services will become increasingly difficult for the 165,000+ enterprises in the industry. The flow-on effect of this to other industries is significant; an efficient Transport and Logistics Industry allows other industries to maintain competitiveness through efficient supply chain and transport systems.
The industry continues to examine its impact on the environment, including ways that this can be reduced through the adoption of more sustainable practices. Conservative estimates put employment growth in transport and logistics at an average 1.3 per cent a year until 2013–14. The all-industries rate for the same period is one per cent. These figures were calculated before the infrastructure projects were announced, making it likely that employment demands in transport and logistics will be higher than the projection. The skills base and labor pool in Australia’s Transport and Logistics Industry will need to increase in size and capability if it is to respond to the challenges arising from the productivity agenda and population growth.

**Logistics Management, Road Transport and Warehousing**

Improvement to Australia’s economic productivity will depend on a well integrated transport system that ensures safe and efficient mobility of people and goods. The economic, social and environmental consequences of congested and capacity-constrained supply chains are well documented. The expected productivity growth of the Commonwealth Government’s $36 billion investment in roads, railways and ports will only be realised if the transport and logistics workforce is able to respond to the skill demands of this investment.

**Occupations in Skill Demand**

- Truck Driver (General Freight, Delivery, Multi-Combination, Dangerous Goods Tanker)
- Transport/Logistics Manager
- Bus Driver
- Forklift Operator
- Warehouse Administrator
- Supply and Distribution Manager
- Driving Instructor

**Rail**

The Australian Rail sector employs more than 40,000 people directly and another 60,000 indirectly. An efficient, effective and safe rail system is required to meet Australia’s short and long-term transport needs. Rail competes nationally and internationally to attract, develop and retain essential staff to ensure continuing services and meet increasing demand. The Australian Government has announced the establishment of a single national rail safety regulator to address the disjointed, state-based arrangements currently in place. The introduction of a single national system could lead to productivity and capacity gains of up to 30 per cent.

**Occupations in Skill Demand**

- Train Driver/Locomotive Driver (particularly heavy haulage)
- Railway Track Worker
- Signalling Technician/Operator
- Rail Engineer
- Rail Plant Driver/Operator

**Ports**
Ports form important logistical hubs whose value-adding processes drive economic growth. To be internationally competitive, Australia’s ports need to be efficient. This requires a highly skilled and flexible workforce to cope with existing demand and to attract and sustain future business growth. At present there are 120,000 Maritime Security Identification Card (MSIC) holders operating in Australian ports, which includes mariners, truck drivers, oil and gas rig employees and stevedores. Gaining the full benefits that ports can provide is a constant challenge because of skilled labor shortages and capacity constraints in some ports.

**Occupations in Skill Demand**
- Harbour Master
- Stevedore (in particular Forklift Operator, Gantry Crane Operator)
- Marine Pilot
- Safety and Environment Manager
- Launch Coxswain
- Port Engineer
- Hydrographer

**Impacts on Training Package Development**

Increased customer requirements, outsourcing, industry reform, competitive pressures, safety requirements, new technologies, environmental considerations, and regulatory and licensing requirements have all been addressed in the development of TLI10 Version 2. Relevant units have been modified in accordance with these influences to reflect the current business environment and to equip learners with the skills and knowledge to handle challenges arising from their effects. In particular, the influence of regulatory and licensing requirements and reforms to the Transport and Logistics Industry are covered in greater detail below.

**Applicable regulatory requirements**

The Transport and Logistics Industry is tightly regulated by a range of international, national and state/territory conventions, codes and legislation. These regulations, licence arrangements and codes of practice pertain to many different aspects of operations including safety, health, hygiene, security, anti-discrimination, equal employment opportunity, quarantine, and customs and immigration. Examples of regulations relevant to various standards in the Training Package include but are not limited to:

- relevant state/territory roads and traffic authority driving regulations and licence/permit requirements including mass and loading regulations and state/territory oversize/mass pilot/escort permit requirements
- fatigue management regulations and codes of practice
- relevant state/territory road rules

Australian, international and state/territory regulations and codes of practice for the handling, storage and transport of dangerous goods and hazardous substances, including:

- Australian and International Dangerous Goods Codes
- Australian Marine Orders and the International Maritime Dangerous Goods Code
- IATA Dangerous Goods by Air regulations
- Australian and International Explosives Codes
- relevant state/territory authority regulations
- quarantine regulations administered by the Australian Quarantine and Inspection Service (AQIS)
- customs regulations (export/import/bond requirements)
- state/territory rail industry safeworking codes and regulations
- relevant state/territory rail safety Act
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- relevant state/territory water use regulations.

Persons employed in the Transport and Logistics Industry need to fulfil competency and training requirements as detailed in the regulations relevant to their occupation. Persons assessed as complying with these requirements are usually provided with some form of certification by the respective authorities. These are certificates required by the relevant state/territory or Australian legislation or international code or convention before a person can be allowed to work in the occupation covered under the legislation. These certificates should not be confused with national educational qualifications that are issued by Registered Training Organisations.

While in the Transport and Logistics Industry there is a close relationship between the regulatory certificates and the National VET qualifications, they are issued by different organisations under different legislative authority.

**Reforms and regulatory requirements**

It should be noted that regulatory requirements are usually subject to ongoing review and improvement. There are also many national initiatives to improve consistency and cooperative arrangements across state/territory regulatory requirements. Given the dynamic nature of these reforms and improvements, it is important that Registered Training Organisations access and interpret current regulatory requirements from the relevant regulatory authorities and adjust their training and assessment resources and processes to suitably incorporate and accommodate any pertinent changes to regulatory requirements.

**Training Package Review Methodology**

The broad processes for the review of the Transport and Logistics Training Package are indicated in Figure 1. They included:

**Desktop research drawing from a range of information sources**

Including:

- the existing version of the Transport and Logistics Training Package (i.e. TLI10 Transport and Logistics Training Package Version 2)
- transport and logistics regulations, certification requirements and codes of practice
- trends and developments in the organisation of the Transport and Logistics Industry
- international trends and developments in Transport and Logistics training
- guidelines for Training Package development
- continuous improvement register
- related developments in higher education and schools
- related Training Packages (e.g. tourism, hospitality, business management, engineering)
- existing approved courses for transport and logistics occupations.

**Industry and VET consultation processes**
Including:

- consultative forums of key stakeholders at key stages of the project
- individual consultative meetings as required
- maintenance of an issues register to track inputs and suggested changes received from stakeholders
- meetings with the equity adviser appointed to the review to ensure that all equity requirements had been fulfilled
- meetings with representatives of the various transport and logistics regulatory authorities to ensure that all proposed changes were consistent with regulatory requirements
- development of schedules of agreed changes to guide the consultants and the project steering committee
- reference groups of industry advisers established by the review steering committee to assist the consultants in reviewing, drafting and editing of competency units and qualifications
- posting of draft new and revised units of competency on the TLIISC website for review and comment by stakeholders.

Validation and editing of final products

Including:

- validation meetings to confirm that agreed changes had been made and to identify any further adjustments necessary
- desktop analysis to confirm the Employability Skills are appropriately incorporated into the Transport and Logistics Training Package
- checks to ensure that the revised Training Package meets the requirements laid out in the Training Package Development Handbook
- final editing and proofreading of the units of competency that comprise the revised Transport and Logistics Training Package.

Figure 1: TLI10 Transport and Logistics Training Package Review and Redevelopment Process
TLI10 Transport and Logistics Training Package (Version 4)

TLI10 Transport and Logistics Training Package (Version 4) is the outcome of TLISC continuous improvement process.

Objectives/Background

The projects for the TLI10 Transport and Logistics Training Package Version 4 are separated into the relevant sectors. The key objectives for the work on this version of TLI10 are to the:

Logistics Sector:
Furniture Removal
During the development of the new Certificate III in Furniture Removal, it was identified that there would also be a requirement to review the existing Certificate II in Furniture Removal. This further review led to the redevelopment of a small number of existing units, the development of new units, and realignment of some units, to better reflect current job roles and functions. To further support career pathways in the furniture removal industry, three new Skill Sets have been developed. These units, Skill Sets and qualifications were developed in consultation with industry stakeholders, ensuring they meet industry’s requirements.

Bus & Coach Operations
The development of the new Diploma identified the requirement to create new units for operational managers within the Bus & Coach industry. There are a number of applicable roles across the industry with a common focus on the management of the movement of passengers. As well as developing three new units, a number of specific units from other Training Packages have been included. The qualification and units were developed in consultation with relevant stakeholders to ensure appropriate alignment to existing job roles and the needs of industry.

Customs Broking
Customs Broking is a licenced occupation, which although it has previously been aligned to eleven units of competency within the TLI10 Training Package, it hadn't been structured as a qualification outcome. To align the new qualification to the Customs Broking job role, fifteen new units were developed, recognising contemporary work practices, systems and regulatory requirements. The qualification was developed in consultation with industry stakeholders, including Australian Customs and the Dept of Agriculture Fisheries and Forestry. There is further support for career pathways through the added development of a Skill Set for Classifier/Compilers.

Road Transport:
Waste Driving Operations
During a review of qualification support for Waste industry driver’s it was identified that there were a range of specific requirements due to vehicle equipment types, safety factors and waste handling & identification. This led to the development of eleven units for the new Waste Driving Operations qualification. The qualification also includes all classes of heavy vehicle licencing and driving units. Developed in consultation with industry stakeholders, the new units and qualification plus two new Skill Sets, support clearer career pathways within the Road Transport Industry.
Ports: Stevedoring
Following a review of the Certificate II in Stevedoring in 2012, a clear need was identified to review the Certificate III in Stevedoring. The intent of the review was to increase the coverage of the qualification across the range of Stevedoring job roles at this level. This work saw the development of two new units and the addition of four new job groups to the already existing two, providing a total of six. An additional nine new Skill Sets were also developed to support career movement across organisations and the sector. This increased breadth and depth responds to the needs of industry, following extensive consultation with stakeholders.

Assessment Guidelines

Introduction

These Assessment Guidelines provide the endorsed framework for assessment of units of competency in this Training Package. They are designed to ensure that assessment is consistent with the Australian Quality Training Framework (AQTF) Essential Standards for Initial and Continuing Registration. Assessments against the units of competency in this Training Package must be carried out in accordance with these Assessment Guidelines.

Assessment System Overview

This section provides an overview of the requirements for assessment when using this Training Package, including a summary of the AQTF requirements; licensing and registration requirements; and assessment pathways. Quality assessment underpins the credibility of the vocational education and training sector. The Assessment Guidelines of a Training Package are an important tool in supporting quality assessment.

Assessment within the National Skills Framework is the process of collecting evidence and making judgements about whether competency has been achieved to confirm whether an individual can perform to the standards expected in the workplace, as expressed in the relevant endorsed unit of competency.

Assessment must be carried out in accordance with the:

- benchmarks for assessment
- specific industry requirements
- principles of assessment
- rules of evidence
- assessment requirements set out in the AQTF.

Benchmarks for Assessment

The endorsed units of competency in this Training Package are the benchmarks for assessment. As such, they provide the basis for nationally recognised Australian Qualifications Framework (AQF) qualifications and Statements of Attainment issued by Registered Training Organisations (RTOs).
Industry Requirements

Where necessary, Industry requirements additional to the Training Package Assessment Guidelines can be inserted here. This may include advice on:

- the context in which assessment is conducted,
- industry workplace conditions and expectations,
- realistic simulated work environments that are acceptable to industry; and
- in general terms, of suitable/current resources and equipment.

Principles of Assessment

All assessments carried out by RTOs are required to demonstrate compliance with the principles of assessment:

- validity
- reliability
- flexibility
- fairness
- sufficiency.

These principles must be addressed in the:

- design, establishment and management of the assessment system for this Training Package
- development of assessment tools, and
- the conduct of assessment.

Validity

Assessment is valid when the process is sound and assesses what it claims to assess. Validity requires that:

a) assessment against the units of competency must cover the broad range of skills and knowledge that are essential to competent performance

b) assessment of knowledge and skills must be integrated with their practical application

c) judgement of competence must be based on sufficient evidence (that is, evidence gathered on a number of occasions and in a range of contexts using different assessment methods). The specific evidence requirements of each unit of competency provide advice on sufficiency.

Reliability

Reliability refers to the degree to which evidence presented for assessment is consistently interpreted and results in consistent assessment outcomes. Reliability requires the assessor to have the required competencies in assessment and relevant vocational competencies (or to assess in conjunction with someone who has the vocational competencies). It can only be achieved when assessors share a common interpretation of the assessment requirements of the unit(s) being assessed.

Flexibility
To be flexible, assessment should reflect the candidate’s needs; provide for recognition of competencies no matter how, where or when they have been acquired; draw on a range of methods appropriate to the context, competency and the candidate; and support continuous competency development.

**Fairness**

Fairness in assessment requires consideration of the individual candidate’s needs and characteristics, and any reasonable adjustments that need to be applied to take account of them. It requires clear communication between the assessor and the candidate to ensure that the candidate is fully informed about, understands and is able to participate in, the assessment process, and agrees that the process is appropriate. It also includes an opportunity for the person being assessed to challenge the result of the assessment and to be reassessed if necessary.

**Sufficiency**

Sufficiency relates to the quality and quantity of evidence assessed. It requires collection of enough appropriate evidence to ensure that all aspects of competency have been satisfied and that competency can be demonstrated repeatedly. Supplementary sources of evidence may be necessary. The specific evidence requirements of each unit of competency provide advice on sufficiency. Sufficiency is also one of the rules of evidence.

**Rules of Evidence**

The rules of evidence guide the collection of evidence that address the principles of validity and reliability, guiding the collection of evidence to ensure that it is valid, sufficient, current and authentic.

**Valid**

Valid evidence must relate directly to the requirements of the unit of competency. In ensuring evidence is valid, assessors must ensure that the evidence collected supports demonstration of the outcomes and performance requirements of the unit of competency together with the knowledge and skills necessary for competent performance. Valid evidence must encapsulate the breadth and depth of the unit of competency, which will necessitate using a number of different assessment methods.

**Sufficient**

Sufficiency relates to the quality and quantity of evidence assessed. It requires collection of enough appropriate evidence to ensure that all aspects of competency have been satisfied and that competency can be demonstrated repeatedly. Supplementary sources of evidence may be necessary. The specific evidence requirements of each unit of competency provide advice on sufficiency.

**Current**

In assessment, currency relates to the age of the evidence presented by a candidate to demonstrate that they are still competent. Competency requires demonstration of current performance, so the evidence collected must be from either the present or the very recent past.

**Authentic**

To accept evidence as authentic, an assessor must be assured that the evidence presented for assessment is the candidate’s own work.

**Assessment Requirements of the Australian Quality Training Framework**
Assessment leading to nationally recognised AQF qualifications and Statements of Attainment in the vocational education and training sector must meet the requirements of the AQTF as expressed in the AQTF 2010 Essential Standards for Registration. The AQTF 2010 Essential Standards for Initial and Continuing Registration can be downloaded from <www.training.com.au>.

The following points summarise the assessment requirements.

Registration of Training Organisations
Assessment must be conducted by, or on behalf of, an RTO formally registered by a State or Territory Registering Body in accordance with the AQTF. The RTO must have the specific units of competency and/or AQF qualifications on its scope of registration.

Quality training and assessment
Each RTO must provide quality training and assessment across all its operations. See the AQTF 2010 Essential Standards for Initial and Continuing Registration, Standard 1.

Assessor competency requirements
Each person involved in training and assessment must be competent for the functions they perform. See the AQTF 2010 Essential Standards for Initial and Continuing Registration, Standard 1 for assessor (and trainer) competency requirements. See also the AQTF 2010 Users’ Guide to the Essential Standards for Registration – Appendix 2.

Assessment requirements
The RTOs assessments, including RPL, must meet the requirements of the relevant endorsed Training Package. See the AQTF 2010 Essential Standards for Initial and Continuing Registration.

Assessment strategies
Each RTO must have strategies for training and assessment that meet the requirements of the relevant Training Package or accredited course and are developed in consultation with industry stakeholders. See the AQTF 2010 Essential Standards for Initial and Continuing Registration.

National recognition
Each RTO must recognise the AQF qualifications and Statements of Attainment issued by any other RTO. See the AQTF 2010 Essential Standards for Initial and Continuing Registration.

Access and equity and client outcomes
Each RTO must adhere to the principles of access and equity and maximise outcomes for its clients. See the AQTF 2010 Essential Standards for Initial and Continuing Registration.
Monitoring assessments

Training and/or assessment provided on behalf of the RTO must be monitored to ensure that it is in accordance with all aspects of the AQTF 2010 Essential Standards for Initial and Continuing Registration.

Recording assessment outcomes

Each RTO must manage records to ensure their accuracy and integrity. See the AQTF 2010 Essential Standards for Initial and Continuing Registration.

Issuing AQF qualifications and Statement of Attainment

Each RTO must issue AQF qualifications and Statements of Attainment that meet the requirements of the current AQF Implementation Handbook and the endorsed Training Packages within the scope of its registration. An AQF qualification is issued once the full requirements for a qualification, as specified in the nationally endorsed Training Package are met. A Statement of Attainment is issued when an individual has completed one or more units of competency from nationally recognised qualification(s)/course(s). See the AQTF and the edition of the AQF Implementation Handbook—available on the AQF Council website <www.aqf.edu.au>.

Licensing/Registration Requirements

This section provides information on licensing/registration requirements for this Training Package, with the following important disclaimer.

Licensing and registration requirements that apply to specific industries, and vocational education and training, vary between each state and territory, and can regularly change. The developers of this Training Package, and DEST, consider that the licensing/registration requirements described in this section apply to RTOs, assessors or candidates with respect to this Training Package. While reasonable care has been taken in its preparation, the developers of this Training Package and DEST cannot guarantee that the list is definitive or accurate at the time of reading; the information in this section is provided in good faith on that basis.

Contact the relevant state or territory department(s) to check if the licensing/registration requirements described below still apply, and to check if there are any others with which you must comply. For further information contact:

Transport and Logistics Industry Skills Council
Level 4, 411 Collins Street
Melbourne VIC
Phone: 03 9604 7200
Email: tlisc@tlisc.org.au
Web: www.tlisc.org.au

Requirements for assessors
In order to conduct assessment for statutory licensing or other industry registration requirements, assessors must meet the requirements outlined in the following chart, in addition to the AQF requirements.

**Licensing**

**Licensing authorities**

Licensing authorities across Australia have actively participated in the development of this Training Package and it is envisaged that over time the state and territory licensing requirements in a number of occupations will be aligned with the units of competency and qualifications in this Training Package. There is no one ‘national’ licence for the sector or any of its functions. Certification responsibilities and systems are administered by state legislation and may differ between states and territories.

The developers of this Training Package, together with DIISRTE, consider that the licensing/registration requirements described in this section apply to RTOs, assessors or candidates with respect to this Training Package. While reasonable care has been taken in its preparation, the developers of this Training Package and DIISRTE cannot guarantee that the list is definitive or accurate at the time of reading; the information in this section is provided in good faith on that basis.

In order to conduct assessments for statutory licensing or other industry registration conditions, assessors may need to meet additional requirements. While RTOs may have information on the licensing requirements for their particular state or territory, these requirements may change over time and differ between state and territory jurisdictions. Users of this Training Package are therefore advised to consult the relevant licensing authority in their state or territory to determine the specific licensing requirements.

The regulatory authorities for the Dangerous Goods and High Risk Licensing, Customs Broking, Taxi and Heavy Vehicle Licensing at the time of publication of this Training Package are:

**Dangerous Goods and High Risk Licensing**

Pathways

The competencies in this Training Package may be attained in a number of ways including through:

- formal or informal education and training
- experiences in the workplace
- general life experience, and/or
- any combination of the above.

Assessment under this Training Package leading to an AQF qualification or Statement of Attainment may follow a learning and assessment pathway, or a recognition pathway, or a combination of the two as illustrated in the following diagram.
Each of these assessment pathways leads to full recognition of competencies held – the critical issue is that the candidate is competent, not how the competency was acquired. Assessment, by any pathway, must comply with the assessment requirements set out in the Assessment Guidelines of the Training Package, the AQTF and, where relevant, the Australian Qualifications Framework.

**Learning and assessment pathways**

Usually, learning and assessment are integrated, with evidence being collected and feedback provided to the candidate at anytime throughout the learning and assessment process. Learning and assessment pathways may include structured programs in a variety of contexts using a range of strategies to meet different learner needs. Structured learning and assessment programs could be: group-based, work-based, project-based, self-paced, action learning-based; conducted by distance or e-learning; and/or involve practice and experience in the workplace.

Learning and assessment pathways to suit Australian Apprenticeships have a mix of formal structured training and structured workplace experience with formative assessment activities through which candidates can acquire and demonstrate skills and knowledge from the relevant units of competency.

**Credit pathways**

*Credit* is the value assigned for the recognition of equivalence in content between different types of learning and/or qualifications which reduces the volume of learning required to achieve a qualification.

Credit arrangements must be offered by all RTOs that offer Training Package qualifications. Each RTO must have a systematic institutional approach with clear, accessible and transparent policies and procedures.

Competencies already held by individuals can be formally assessed against the units of competency in this Training Package, and should be recognised regardless of how, when or where they were acquired, provided that the learning is relevant to the unit of competency outcomes.

**Recognition of Prior Learning**

Recognition of Prior Learning (RPL) is an assessment process which determines the credit outcomes of an individual application for credit.

The availability of Recognition of Prior Learning (RPL) provides all potential learners with access to credit opportunities.

The recognition of prior learning pathway is appropriate for candidates who have previously attained skills and knowledge and who, when enrolling in qualifications, seek to shorten the duration of their training and either continue or commence working. This may include the following groups of people:

- existing workers
- individuals with overseas qualifications
- recent migrants with established work histories
• people returning to the workplace
• people with disabilities or injuries requiring a change in career.

As with all assessment, RPL assessment should be undertaken by academic or teaching staff with expertise in the subject, content of skills area, as well as knowledge of and expertise in RPL assessment policies and procedures.

Assessment methods used for RPL should provide a range of ways for individuals to demonstrate that they have met the required outcomes and can be granted credit. These might include:

• questioning (oral or written)
• consideration of a portfolio and review of contents
• consideration of third party reports and/or other documentation such as documentation such as articles, reports, project material, papers, testimonials or other products prepared by the RPL applicant that relate to the learning outcomes of the relevant qualification component
• mapping of learning outcomes from prior formal or non-formal learning to the relevant qualification components
• observation of performance
• participation in structured assessment activities the individual would normally be required to undertake if they were enrolled in the qualification component/s.

In a Recognition of Prior Learning (RPL) pathway, the candidate provides current, quality evidence of their competency against the relevant unit of competency. This process may be directed by the candidate and verified by the assessor. Where the outcomes of this process indicate that the candidate is competent, structured training is not required. The RPL requirements of the AQTF must be met.

As with all assessment, the assessor must be confident that the evidence indicates that the candidate is currently competent against the endorsed unit of competency. This evidence may take a variety of forms and might include certification, references from past employers, testimonials from clients, work samples and/or observation of the candidate. The onus is on candidates to provide sufficient evidence to satisfy assessors that they currently hold the relevant competencies. In judging evidence, the assessor must ensure that the evidence of prior learning is:

• authentic (the candidate’s own work);
• valid (directly related to the current version of the relevant endorsed unit of competency);
• reliable (shows that the candidate consistently meets the endorsed unit of competency);
• current (reflects the candidate’s current capacity to perform the aspect of the work covered by the endorsed unit of competency); and
• sufficient (covers the full range of elements in the relevant unit of competency and addresses the four dimensions of competency, namely task skills, task management skills, contingency management skills, and job/role environment skills).

**Credit transfer**

*Credit transfer is a process which provides learners with agreed and consistent credit outcomes based on equivalences in content between matched qualifications.*

This process involves education institutions:
• mapping, comparing and evaluating the extent to which the defined learning outcomes and assessment requirements of the individual components of one qualification are equivalent to the learning outcomes and assessment requirements of the individual components of another qualification
• making an educational judgment of the credit outcomes to be assigned between the matched components of the two qualifications
• setting out the agreed credit outcomes in a documented arrangement or agreement, and
• publicising the arrangement/agreement and credit available.

Combination of pathways
Credit may be awarded on the basis of a combination of credit transfer plus an individual RPL assessment for additional learning. Once credit has been awarded on the basis of RPL, subsequent credit transfer based on these learning outcomes should not include revisiting the RPL assessment but should be based on credit transfer or articulation or other arrangements between providers.
Where candidates for assessment have gained competencies through work and life experience and gaps in their competence are identified, or where they require training in new areas, a combination of pathways may be appropriate.
In such situations, the candidate may undertake an initial assessment to determine their current competency. Once current competency is identified, a structured learning and assessment program ensures that the candidate acquires the required additional competencies identified as gaps.

Assessor Requirements
This section identifies the specific requirements on the vocational competence and experience for assessors, to ensure that they meet the needs of industry and their obligations under AQTF, and clarifies how others may contribute to the assessment process where one person alone does not hold all the required competencies.

Assessor competencies
The AQTF 2010 specifies mandatory competency requirements for assessors. For information, Standard 1, Element 1.4 from the AQTF 2010 Essential Standards for Registration follows:

<table>
<thead>
<tr>
<th>1.4</th>
<th>Training and assessment are conducted by trainers and assessors who:</th>
</tr>
</thead>
<tbody>
<tr>
<td>a.</td>
<td>have the necessary training and assessment competencies as determined by the National Quality Council or its successors, and</td>
</tr>
<tr>
<td>b.</td>
<td>have the relevant vocational competencies at least to the level being delivered or assessed, and</td>
</tr>
<tr>
<td>c.</td>
<td>can demonstrate current industry skills directly relevant to the training/assessment being undertaken, and</td>
</tr>
<tr>
<td>d.</td>
<td>continue to develop their Vocational Education and Training (VET) knowledge</td>
</tr>
</tbody>
</table>
Designing Assessment Tools
This section provides an overview on the use and development of assessment tools.

Use of assessment tools
Assessment tools provide a means of collecting the evidence that assessors use in making judgements about whether candidates have achieved competency. There is no set format or process for the design, production or development of assessment tools. Assessors may use prepared assessment tools, such as those specifically developed to support this Training Package, or they may develop their own.

Using prepared assessment tools
If using prepared assessment tools, assessors should ensure these relate to the current version of the relevant unit of competency. The current unit of competency can be checked on the National Register <www.training.gov.au>.

Developing assessment tools
When developing their own assessment tools, assessors must ensure that the tools:
- are benchmarked against the relevant unit or units of competency;
- are reviewed as part of the validation of assessment strategies required under the AQTF; and
- meet the assessment requirements expressed in the AQTF 2010 Essential Standards for Initial and Continuing Registration.

A key reference for assessors developing assessment tools is TAE10 Training and Education Training Package.

Language, literacy and numeracy
The design of assessment tools must reflect the language, literacy and numeracy competencies required for the performance of a task in the workplace and not exceed these expectations.

Conducting Assessment
This section details the mandatory assessment requirements and provides information on equity in assessment including reasonable adjustment.

Mandatory assessment requirements
Assessments must meet the criteria set out in the AQTF 2010 *Essential Standards for Initial and Continuing Registration*. For information, the mandatory assessment requirements from Standard 1 from the AQTF 2010 *Essential Standards for Initial and Continuing Registration* are as follows:

1.5 Assessment, including Recognition of Prior Learning (RPL):

a) meets the requirements of the relevant Training Package or accredited course
b) is conducted in accordance with the principles of assessment and the rules of evidence
c) meets workplace and, where relevant, regulatory requirements
d) is systematically validated.

**Assessment of Employability Skills**

Employability Skills are integral to workplace competency. As such, they must be considered in the design, customisation, delivery and assessment of vocational education and training programs in an integrated and holistic way, as represented diagrammatically below.
Employability Skills are embedded within each unit of competency, and an Employability Skills Summary is available for each qualification. Training providers must use Employability Skills information in order to design valid and reliable training and assessment strategies. This analysis could include:

- reviewing units of competency to locate relevant Employability Skills and determine how they are applied within the unit
- analysing the Employability Skills Summary for the qualification in which the unit or units are packaged to help clarify relevant industry and workplace contexts and the application of Employability Skills at that qualification outcome
- designing training and assessment to address Employability Skills requirements.

The National Quality Council has endorsed a model for assessing and reporting Employability Skills, which contains further suggestions about good practice strategies in teaching, assessing, learning and reporting Employability Skills. The model is available from <http://www.training.com.au>.

The endorsed approach includes learners downloading qualification specific Employability Skills Summaries for Training Package qualifications from an online repository at <http://employabilityskills.training.com.au>.

Employability Skills are reported on each qualification using the following statement on the qualification testamur: "A summary of the Employability Skills developed through this qualification can be downloaded from <http://employabilityskills.training.com.au>.

Access and equity

An individual's access to the assessment process should not be adversely affected by restrictions placed on the location or context of assessment beyond the requirements specified in this Training Package: training and assessment must be bias-free.

Under the rules for their development, Training Packages must reflect and cater for the increasing diversity of Australia’s VET clients and Australia’s current and future workforce. The flexibilities offered by Training Packages should enhance opportunities and potential outcomes for all people so that we can all benefit from a wider national skills base and a shared contribution to Australia’s economic development and social and cultural life.

Reasonable adjustments

It is important that education providers take meaningful, transparent and reasonable steps to consult, consider and implement reasonable adjustments for students with disability. Under the Disability Standards for Education 2005, education providers must make reasonable adjustments for people with disability to the maximum extent that those adjustments do not cause that provider unjustifiable hardship. While ‘reasonable adjustment’ and ‘unjustifiable hardship’ are different concepts and involve different considerations, they both seek to strike a balance between the interests of education providers and the interests of students with and without disability.
An adjustment is any measure or action that a student requires because of their disability, and which has the effect of assisting the student to access and participate in education and training on the same basis as students without a disability. An adjustment is reasonable if it achieves this purpose while taking into account factors such as the nature of the student’s disability, the views of the student, the potential effect of the adjustment on the student and others who might be affected, and the costs and benefits of making the adjustment.

An education provider is also entitled to maintain the academic integrity of a course or program and to consider the requirements or components that are inherent or essential to its nature when assessing whether an adjustment is reasonable. There may be more than one adjustment that is reasonable in a given set of circumstances; education providers are required to make adjustments that are reasonable and that do not cause them unjustifiable hardship. The Training Package Guidelines provides more information on reasonable adjustment, including examples of adjustments. Go to <www.innovation.gov.au/Skills/Documents/AssesGuidelines.pdf>.

Further Sources of Information

The section provides a listing of useful contacts and resources to assist assessors in planning, designing, conducting and reviewing of assessments against this Training Package.

General resources
Australian Quality Training Framework (AQTF) and AQTF 2010 Users’ Guide to the Essential Standards for Registration –
For general information and resources go to http://www.training.com.au/
The National Register is an electronic database providing comprehensive information about RTOs, Training Packages and accredited courses www.training.gov.au

Assessment resources
Registered training organisations (RTOs) are at the forefront of vocational education and training (VET) in Australia. They translate the needs of industry into relevant, quality, client-focused training and assessment.
RTOs should strive for innovation in VET teaching and learning practices and develop highly flexible approaches to assessment which take cognisance of specific needs of learners, in order to improve delivery and outcomes of training.
Resources can be accessed free of charge from:
Transport and Logistics Industry Skills Council (TLISC)

Competency Standards

What is Competency?
The broad concept of industry competency concerns the ability to perform particular tasks and duties to the standard of performance expected in the workplace. Competency requires the application of specified skills, knowledge and attitudes relevant to effective participation in an industry, industry sector or enterprise.
Competency covers all aspects of workplace performance and involves performing individual tasks; managing a range of different tasks; responding to contingencies or breakdowns; and, dealing with the responsibilities of the workplace, including working with others. Workplace competency requires the ability to apply relevant skills, knowledge and attitudes consistently over time and in the required workplace situations and environments. In line with this concept of competency Training Packages focus on what is expected of a competent individual in the workplace as an outcome of learning, rather than focussing on the learning process itself.
Competency standards in Training Packages are determined by industry to meet identified industry skill needs. Competency standards are made up of a number of units of competency each of which describes a key function or role in a particular job function or occupation. Each unit of competency within a Training Package is linked to one or more AQF qualifications.

Contextualisation of Units of Competency by RTOs
Registered Training Organisations (RTOs) may contextualise units of competency in this endorsed Training Package to reflect required local outcomes. Contextualisation could involve additions or amendments to the unit of competency to suit particular delivery methods, learner profiles, specific enterprise equipment requirements, or to otherwise meet local needs. However, the integrity of the overall intended outcome of the unit of competency must be maintained.
Any contextualisation of units of competency in this Training Package must be within the bounds of the following advice:

- RTOs must not remove or add to the number and content of elements and performance criteria.
- RTOs can include specific industry terminology in the range statement.
- Any amendments and additions to the range statement made by RTOs must not diminish the breadth of application of the competency, or reduce its portability.
- RTOs may add detail to the evidence guide in areas such as the critical aspects of evidence or required resources and infrastructure – but only where these expand the breadth of the competency and do not limit its use.

Components of Units of Competency
The components of units of competency are summarised below, in the order in which they appear in each unit of competency.

Unit title
The unit title is a succinct statement of the outcome of the unit of competency. Each unit of competency title is unique, both within and across Training Packages.

Unit descriptor
The unit descriptor broadly communicates the content of the unit of competency and the skill area it addresses. Where units of competency have been contextualised from units of competency from other endorsed Training Packages, summary information is provided. There may also be a brief second paragraph that describes its relationship with other units of competency, and any licensing requirements.

Employability skills
This sub-section contains a statement that the unit contains Employability skills.

Pre-requisite units (optional)
If there are any units of competency that must be completed before the unit, these will be listed.

Application of the unit
This sub-section fleshes out the unit of competency’s scope, purpose and operation in different contexts, for example, by showing how it applies in the workplace.

Competency field (Optional)
The competency field either reflects the way the units of competency are categorised in the Training Package or denotes the industry sector, specialisation or function. It is an optional component of the unit of competency.

Sector (optional)
The industry sector is a further categorisation of the competency field and identifies the next classification, for example an elective or supervision field.

Elements of competency
The elements of competency are the basic building blocks of the unit of competency. They describe in terms of outcomes the significant functions and tasks that make up the competency.

**Performance criteria**

The performance criteria specify the required performance in relevant tasks, roles, skills and in the applied knowledge that enables competent performance. They are usually written in passive voice. Critical terms or phrases may be written in bold italics and then defined in range statement, in the order of their appearance in the performance criteria.

**Required skills and knowledge**

The essential skills and knowledge are either identified separately or combined. *Knowledge* identifies what a person needs to know to perform the work in an informed and effective manner. *Skills* describe the application of knowledge to situations where understanding is converted into a workplace outcome.

**Range statement**

The range statement provides a context for the unit of competency, describing essential operating conditions that may be present with training and assessment, depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts. As applicable, the meanings of key terms used in the performance criteria will also be explained in the range statement.

**Evidence guide**

The evidence guide is critical in assessment as it provides information to the Registered Training Organisation (RTO) and assessor about how the described competency may be demonstrated. The evidence guide does this by providing a range of evidence for the assessor to make determinations, and by providing the assessment context. The evidence guide describes:

- conditions under which competency must be assessed including variables such as the assessment environment or necessary equipment;
- relationships with the assessment of any other units of competency;
- suitable methodologies for conducting assessment including the potential for workplace simulation;
- resource implications, for example access to particular equipment, infrastructure or situations;
- how consistency in performance can be assessed over time, various contexts and with a range of evidence; and
- the required underpinning knowledge and skills

**Employability Skills in Units of Competency**

The detail and application of Employability Skills facets will vary according to the job-role requirements of each industry. In developing Training Packages, industry stakeholders are consulted to identify appropriate facets of Employability Skills which are incorporated into the relevant units of competency and qualifications.
Employability Skills are not a discrete requirement contained in units of competency (as was the case with Key Competencies). Employability Skills are specifically expressed in the context of the work outcomes described in units of competency and will appear in elements, performance criteria, range statements and evidence guides. As a result, users of Training Packages are required to review the entire unit of competency in order to accurately determine Employability Skills requirements.

**How Employability Skills relate to the Key Competencies**

The eight nationally agreed Employability Skills now replace the seven Key Competencies in Training Packages. Trainers and assessors who have used Training Packages prior to the introduction of Employability Skills may find the following comparison useful.

<table>
<thead>
<tr>
<th>Employability Skills</th>
<th>Mayer Key Competencies</th>
</tr>
</thead>
<tbody>
<tr>
<td>Communication</td>
<td>Communicating ideas and information</td>
</tr>
<tr>
<td>Teamwork</td>
<td>Working with others and in teams</td>
</tr>
<tr>
<td>Problem solving</td>
<td>Solving problems</td>
</tr>
<tr>
<td></td>
<td>Using mathematical ideas and techniques</td>
</tr>
<tr>
<td>Initiative and enterprise</td>
<td>Collecting, analysing and organising information</td>
</tr>
<tr>
<td></td>
<td>Planning and organising activities</td>
</tr>
<tr>
<td>Planning and organising</td>
<td>Collecting, analysing and organising information</td>
</tr>
<tr>
<td></td>
<td>Planning and organising activities</td>
</tr>
<tr>
<td>Self-management</td>
<td></td>
</tr>
<tr>
<td>Learning</td>
<td></td>
</tr>
<tr>
<td>Technology</td>
<td>Using technology</td>
</tr>
</tbody>
</table>

When analysing the above table it is important to consider the relationship and natural overlap of Employability Skills. For example, using technology may involve communication skills and combine the understanding of mathematical concepts.

**Explicitly embedding Employability Skills in units of competency**

This Training Package seeks to ensure that industry-endorsed Employability Skills are explicitly embedded in units of competency. The application of each skill and the level of detail included in each part of the unit will vary according to industry requirements and the nature of the unit of competency. Employability Skills must be both explicit and embedded within units of competency. This means that Employability Skills will be:
- embedded in units of competency as part of the other performance requirements that make up the competency as a whole
- explicitly described within units of competency to enable Training Packages users to identify accurately the performance requirements of each unit with regards to Employability Skills.

This Training Package also seeks to ensure that Employability Skills are well-defined and written into units of competency so that they are apparent, clear and can be delivered and assessed as an essential component of unit work outcomes.

Sample unit of competency components showing Employability Skills

The following table shows the sequence of a unit of competency, and each cell contains text taken from a range of units. It provides examples of where and how various Employability Skills could be embedded in each component. Please note that in the example, the bracketed Employability Skills are provided for clarification only and would not be present in units of competency within this Training Package.

<table>
<thead>
<tr>
<th>Unit Title</th>
<th>Give formal presentations and take part in meetings (Communication)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Unit Descriptor</td>
<td>This unit covers the skills and knowledge required to promote the use and implementation of innovative work practices to effect change. (Initiative and enterprise)</td>
</tr>
<tr>
<td>Element</td>
<td>Proactively resolve issues. (Problem solving)</td>
</tr>
<tr>
<td>Performance Criteria</td>
<td>Information is organised in a format suitable for analysis and dissemination in accordance with organisational requirements. (Planning and organising)</td>
</tr>
<tr>
<td>Range Statement</td>
<td>Software applications may include email, internet, word processing, spreadsheet, database or accounting packages. (Technology)</td>
</tr>
<tr>
<td>Required Skills and Knowledge</td>
<td>Modify activities depending on differing workplace contexts, risk situations and environments. (Learning) Work collaboratively with others during a fire emergency. (Teamwork) Instructions, procedures and other information relevant the maintenance of vessel and port security. (Communication)</td>
</tr>
<tr>
<td>Evidence Guide</td>
<td>Evidence of having worked constructively with a wide range of community groups and stakeholders to solve problems and adapt or design new solutions to meet identified needs in crime prevention. In particular, evidence must be obtained on the ability to: • assess response options to identified crime-prevention needs</td>
</tr>
</tbody>
</table>
and determine the optimal action to be implemented in consultation with relevant others, design an initiative to address identified issues. *(Initiative and enterprise).*

Employability Skills Summaries and units of competency

An Employability Skills Summary exists for each qualification. Summaries include broad advice on industry expectations with regard to Employability Skills at the qualification level. Summaries should be used by trainers and assessors to assist in identifying the Employability Skills requirements contained within units of competency.

Qualifications Framework

What is the Australian Qualifications Framework?

The AQF provides a comprehensive, nationally consistent framework for all qualifications in post-compulsory education and training in Australia. In the vocational education and training (VET) sector it assists national consistency for all trainees, learners, employers and providers by enabling national recognition of qualifications and Statements of Attainment.

Training Package qualifications in the VET sector must comply with the titles and guidelines of the AQF. Endorsed Training Packages provide a unique title for each AQF qualification which must always be reproduced accurately.

Qualifications

Training Packages can incorporate the following eight AQF qualifications.

Certificate I in ...
Certificate II in ...
Certificate III in ...
Certificate IV in ...
Diploma of ...
Advanced Diploma of ...
Vocational Graduate Certificate of ...
Vocational Graduate Diploma of ...

On completion of the requirements defined in the Training Package, a Registered Training Organisation (RTO) may issue a nationally recognised AQF qualification. Issuance of AQF qualifications must comply with the advice provided in the *Australian Qualifications Framework, Second Edition, January 2013* and the *AQTF Essential Conditions and Standards for Initial Registration and Essential Conditions and Standards for Continuing Registration*.

Statement of Attainment
A Statement of Attainment is issued by a Registered Training Organisation when an individual has completed one or more units of competency from nationally recognised qualification(s)/course(s). Issuance of Statements of Attainment must comply with the advice provided in the current AQF Implementation Handbook and the AQTF Essential Conditions and Standards for Initial Registration and Essential Conditions and Standards for Continuing Registration.

Under the AQTF (Version 2013), RTOs must recognise the achievement of competencies as recorded on a qualification or Statement of Attainment issued by other RTOs. Given this, recognised competencies can progressively build towards a full AQF qualification.

AQF Guidelines and Learning Outcomes

The AQF Implementation Handbook provides a comprehensive guideline for each AQF qualification. A summary of the learning outcome characteristics and their distinguishing features for each VET related AQF qualification is provided below.

| Certificate I |
| Characteristics of Learning Outcomes |

Breadth, depth and complexity of knowledge and skills would prepare a person to perform a defined range of activities most of which may be routine and predictable.

Applications may include a variety of employment related skills including preparatory access and participation skills, broad-based induction skills and/or specific workplace skills. They may also include participation in a team or work group.

Distinguishing Features of Learning Outcomes

Do the competencies enable an individual with this qualification to:

- demonstrate knowledge by recall in a narrow range of areas
- demonstrate basic practical skills, such as the use of relevant tools
- perform a sequence of routine tasks given clear direction
- receive and pass on messages/information.
Certificate II

Characteristics of Learning Outcomes

Breadth, depth and complexity of knowledge and skills would prepare a person to perform in a range of varied activities or knowledge application where there is a clearly defined range of contexts in which the choice of actions required is usually clear and there is limited complexity in the range of operations to be applied.

Performance of a prescribed range of functions involving known routines and procedures and some accountability for the quality of outcomes.

Applications may include some complex or non-routine activities involving individual responsibility or autonomy and/or collaboration with others as part of a group or team.

Distinguishing Features of Learning Outcomes

Do the competencies enable an individual with this qualification to:

- demonstrate basic operational knowledge in a moderate range of areas
- apply a defined range of skills
- apply known solutions to a limited range of predictable problems
- perform a range of tasks where choice between a limited range of options is required
- assess and record information from varied sources
- take limited responsibility for own outputs in work and learning.
Certificate III

Characteristics of Learning Outcomes

Breadth, depth and complexity of knowledge and competencies would cover selecting, adapting and transferring skills and knowledge to new environments and providing technical advice and some leadership in resolution of specified problems. This would be applied across a range of roles in a variety of contexts with some complexity in the extent and choice of options available.

Performance of a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the section of equipment, services or contingency measures and within known time constraints.

Applications may involve some responsibility for others. Participation in teams including group or team co-ordination may be involved.

Distinguishing Features of Learning Outcomes

Do the competencies enable an individual with this qualification to:

- demonstrate some relevant theoretical knowledge
- apply a range of well-developed skills
- apply known solutions to a variety of predictable problems
- perform processes that require a range of well-developed skills where some discretion and judgement is required
- interpret available information, using discretion and judgement
- take responsibility for own outputs in work and learning
- take limited responsibility for the output of others.
Certificate IV

Characteristics of Learning Outcomes

Breadth, depth and complexity of knowledge and competencies would cover a broad range of varied activities or application in a wider variety of contexts most of which are complex and non-routine. Leadership and guidance are involved when organising activities of self and others as well as contributing to technical solutions of a non-routine or contingency nature.

Performance of a broad range of skilled applications including the requirement to evaluate and analyse current practices, develop new criteria and procedures for performing current practices and provision of some leadership and guidance to others in the application and planning of the skills. Applications involve responsibility for, and limited organisation of, others.

Distinguishing Features of Learning Outcomes

Do the competencies enable an individual with this qualification to:

- demonstrate understanding of a broad knowledge base incorporating some theoretical concepts
- apply solutions to a defined range of unpredictable problems
- identify and apply skill and knowledge areas to a wide variety of contexts, with depth in some areas
- identify, analyse and evaluate information from a variety of sources
- take responsibility for own outputs in relation to specified quality standards
- take limited responsibility for the quantity and quality of the output of others.
Diploma

Characteristics of Learning Outcomes

Breadth, depth and complexity covering planning and initiation of alternative approaches to skills or knowledge applications across a broad range of technical and/or management requirements, evaluation and co-ordination.

The self directed application of knowledge and skills, with substantial depth in some areas where judgment is required in planning and selecting appropriate equipment, services and techniques for self and others.

Applications involve participation in development of strategic initiatives as well as personal responsibility and autonomy in performing complex technical operations or organising others. It may include participation in teams including teams concerned with planning and evaluation functions. Group or team coordination may be involved.

The degree of emphasis on breadth as against depth of knowledge and skills may vary between qualifications granted at this level.

Distinguishing Features of Learning Outcomes

Do the competencies or learning outcomes enable an individual with this qualification to:

- demonstrate understanding of a broad knowledge base incorporating theoretical concepts, with substantial depth in some areas
- analyse and plan approaches to technical problems or management requirements
- transfer and apply theoretical concepts and/or technical or creative skills to a range of situations
- evaluate information, using it to forecast for planning or research purposes
- take responsibility for own outputs in relation to broad quantity and quality parameters
- take some responsibility for the achievement of group outcomes.
### Advanced Diploma

**Characteristics of Learning Outcomes**

Breadth, depth and complexity involving analysis, design, planning, execution and evaluation across a range of technical and/or management functions including development of new criteria or applications or knowledge or procedures.

The application of a significant range of fundamental principles and complex techniques across a wide and often unpredictable variety of contexts in relation to either varied or highly specific functions. Contribution to the development of a broad plan, budget or strategy is involved and accountability and responsibility for self and others in achieving the outcomes is involved.

Applications involve significant judgement in planning, design, technical or leadership/guidance functions related to products, services, operations or procedures.

The degree of emphasis on breadth as against depth of knowledge and skills may vary between qualifications granted at this level.

**Distinguishing Features of Learning Outcomes**

Do the competencies or learning outcomes enable an individual with this qualification to:

- demonstrate understanding of specialised knowledge with depth in some areas
- analyse, diagnose, design and execute judgements across a broad range of technical or management functions
- generate ideas through the analysis of information and concepts at an abstract level
- demonstrate a command of wide-ranging, highly specialised technical, creative or conceptual skills
- demonstrate accountability for personal outputs within broad parameters
- demonstrate accountability for personal and group outcomes within broad parameters.
Vocational Graduate Certificate

Characteristics of competencies or learning outcomes

- The self-directed development and achievement of broad and specialised areas of knowledge and skills, building on prior knowledge and skills.
- Substantial breadth and complexity involving the initiation, analysis, design, planning, execution and evaluation of technical and management functions in highly varied and highly specialised contexts.
- Applications involve making significant, high-level, independent judgements in major broad or planning, design, operational, technical and management functions in highly varied and specialised contexts. They may include responsibility and broad-ranging accountability for the structure, management and output of the work or functions of others.
- The degree of emphasis on breadth, as opposed to depth, of knowledge and skills may vary between qualifications granted at this level.

Distinguishing features of learning outcomes

- Demonstrate the self-directed development and achievement of broad and specialised areas of knowledge and skills, building on prior knowledge and skills.
- Initiate, analyse, design, plan, execute and evaluate major broad or technical and management functions in highly varied and highly specialised contexts.
- Generate and evaluate ideas through the analysis of information and concepts at an abstract level.
- Demonstrate a command of wide-ranging, highly specialised technical, creative or conceptual skills in complex contexts.
- Demonstrate responsibility and broad-ranging accountability for the structure, management and output of the work or functions of others.
### Vocational Graduate Diploma

**Characteristics of competencies or learning outcomes**

- The self-directed development and achievement of broad and specialised areas of knowledge and skills, building on prior knowledge and skills.
- Substantial breadth, depth and complexity involving the initiation, analysis, design, planning, execution and evaluation of major functions, both broad and highly specialised, in highly varied and highly specialised contexts.
- Further specialisation within a systematic and coherent body of knowledge.
- Applications involve making high-level, fully independent, complex judgements in broad planning, design, operational, technical and management functions in highly varied and highly specialised contexts. They may include full responsibility and accountability for all aspects of work and functions of others, including planning, budgeting and strategy development.
- The degree of emphasis on breadth, as opposed to depth, of knowledge and skills may vary between qualifications granted at this level.

**Distinguishing features of learning outcomes**

- Demonstrate the self-directed development and achievement of broad and highly specialised areas of knowledge and skills, building on prior knowledge and skills.
- Initiate, analyse, design, plan, execute and evaluate major functions, both broad and within highly varied and highly specialised contexts.
- Generate and evaluate complex ideas through the analysis of information and concepts at an abstract level.
- Demonstrate an expert command of wide-ranging, highly specialised, technical, creative or conceptual skills in complex and highly specialised or varied contexts.
- Demonstrate full responsibility and accountability for personal outputs.
- Demonstrate full responsibility and accountability for all aspects of the work or functions of others, including planning, budgeting and strategy.
TLI10 Version 4 Sector and Qualifications Pathways

There are many pathways into and through occupations within the Transport and Logistics Industry. These occupations are subject to a wide range of state, territory, national and international regulatory requirements, codes and licences.

For many of the occupations it is necessary to hold a certificate of competency or at least to have completed specific certification requirements before you can be employed when required to operate particular types of equipment. These certification requirements include educational requirements (e.g. the educational qualifications contained in this Training Package) but also involve a range of other requirements such as medical certificates, radio operator certificates, etc. For many occupations in the Transport and Logistics Industry, the achievement of an educational qualification is only a partial fulfilment of the regulatory requirements that must be demonstrated by a person seeking a certificate of competency from the relevant state or territory regulatory or safety authority.

The information described in Figures 2:10 are examples of Sector and Certificate Pathways. The information describes the pathway relationships between the ‘education pathways’ and is not intending to provide information on the diverse range of occupations and positions in the Transport and Logistics Industry.

Users of the Transport and Logistics Training Package are therefore encouraged to access the pertinent documents from the relevant authorities to understand the various regulated occupations in the Transport and Logistics Industry, the full certification requirements for each, and the availability of Australian Apprenticeships and VET in Schools.

TLI10 Version 4.2 Skill Sets

Definition
Skill sets are defined as single units of competency, or combinations of units of competency from an endorsed Training Package, which link to a licence or regulatory requirement, or defined industry need.

Wording on Statements of Attainment
Skill sets are a way of publicly identifying logical groupings of units of competency which meet an identified need or industry outcome. Skill sets are not qualifications. Where skill sets are identified in a Training Package, the Statement of Attainment can set out the competencies a person has achieved in a way that is consistent and clear for employers and others. This is done by including the wording ‘these competencies meet [insert skill set title or identified industry area] need’ on the Statement of Attainment. This wording applies only to skill sets that are formally identified as such in the endorsed Training Package. See Australian Qualifications Framework, Second Edition January 2013 for advice on wording on Statements of Attainment. <http://www.aqf.edu.au/resources/aqf/>.

Skill Sets in this Training Package
This section provides information on skill sets within this Training Package, with the following important disclaimer: Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. The skill sets within this Training Package are as follows:

Logistics
- TLISS00019 Integrated Logistics Support (ILS) Practitioner Skill Set
- TLISS00020 Integrated Logistics Support Inventory Controller Skill Set
- TLISS00021 Integrated Logistics Support Management Skill Set
- TLISS00024 Logistics Configuration Management Skill Set
- TLISS00025 Logistics Executive Management Skill Set
- TLISS00026 Logistics Inventory Controller Skill Set
- TLISS00027 Logistics Product Management Skill Set
- TLISS00028 Logistics Sustainment Management Skill Set
- TLISS00029 Logistics Sustainment Practitioner Skill Set
- TLISS00070 Mentoring Skill Set

Rail
- TLISS00001 Access and Move a Track Vehicle within a Defined Worksite Skill Set
- TLISS00002 Accessing the Rail Corridor Skill Set
- TLISS00003 Aluminothermic Welding Skill Set
- TLISS00004 Blocking Protection Skill Set
- TLISS00005 Conduct Track Protection Skill Set
- TLISS00006 Control Rail Traffic through Worksite Skill Set
- TLISS00007 Coordinate Multiple Work Groups Skill Set
- TLISS00008 Decommission Mechanical Signalling Infrastructure and Interlocking Equipment Skill Set
- TLISS00010 Electric Track Welding Skill Set
- TLISS00011 Examining Concrete or Masonry Structures Skill Set
- TLISS00012 Examining Steel Structures Skill Set
- TLISS00013 Examining Timber Structures Skill Set
- TLISS00014 Flashbutt Welding Skill Set
- TLISS00015 Handsignaller Skill Set
- TLISS00016 Install Mechanical Equipment Skill Set
- TLISS00017 Install Minor Structures Skill Set
- TLISS00018 Install Transoms Skill Set
- TLISS00023 Light On-Track Equipment Operation Skill Set
- TLISS00030 Lookout Working Skill Set
- TLISS00031 Maintain Aerial Signal or Telecommunication Lines and Cables Skill Set
- TLISS00032 Maintain Bridge Bearings Skill Set
- TLISS00032 Maintain Mechanical Equipment Skill Set
- TLISS00035 Minor Track Equipment Operation Skill Set
- TLISS00038 Operate Signalling or Point Control Equipment Skill Set
- TLISS00039 Plan Track Possessions Protection Skill Set
- TLISS00040 Rail Adjustment Skill Set
- TLISS00041 Rail Infrastructure Induction Skill Set
- TLISS00043 Repairing Concrete or Masonry Structures Skill Set
- TLISS00044 Repairing Steel Structures Skill Set
- TLISS00045 Repairing Timber Structures Skill Set
- TLISS00049 Suburban Network Train Driver Assistant Skill Set
- TLISS00050 Track Grinding Skill Set
- TLISS00051 Track Inspection Skill Set
- TLISS00052 Track Lubrication Skill Set
- TLISS00053 Track Occupancy Protection Skill Set
- TLISS00054 Track Patrol Skill Set
- TLISS00055 Travel Medium or Heavy On-Track Equipment Skill Set
- TLISS00056 Travel Track Vehicle Under Block Working Conditions Skill Set
- TLISS00057 Travel Track Vehicle Under Occupancy Authority Skill Set
- TLISS00060 Ultrasonic Points and Crossings Testing Skill Set
- TLISS00061 Ultrasonic Rail Testing Skill Set
- TLISS00062 Certify Rolling Stock Skill Set
- TLISS00063 Move Rolling Stock Within Defined Limits Skill Set
- TLISS00064 Rail Maintainer Skill Set
- TLISS00065 Tram or Light Rail Turnout Construction Skill Set
- TLISS00066 Install Tram or Light Rail Turnout Installation Skill Set
- TLISS00067 Submerged Arc Welding Skill Set
- TLISS00068 Tram or Light Rail Track Inspection Skill Set
- TLISS00069 Tram or Light Rail Track Sweeping Skill Set
- TLISS00071 Lead Shunter Skill Set
- TLISS00077 Rail Operations Safeworking Skill Set
- TLISS00078 Rail Signal Panel Operation Skill Set
- TLISS00089 Train Buffet Operations Skill Set

Road Transport

- TLISS00009 Driving Instructor Skill Set
• TLISS00022 International Freight Forwarding Skill Set
• TLISS00036 Mobile Crane Operations Supervisor Skill Set
• TLISS00037 Open Road Operator Skill Set
• TLISS00046 Road Safety Skill Set
• TLISS00047 Road Tunnel Operator Skill Set
• TLISS00072 Compiler/Classifier Skill Set
• TLISS00073 Furniture Removal Pre-Packer Skill Set
• TLISS00074 Furniture Removal Team Leader Skill Set
• TLISS00075 International Furniture Removal Packer and Wrapper Skill Set
• TLISS00076 Introduction to the Waste Industry Skill Set
• TLISS00088 Tow Truck Driver Skill Set
• TLISS00090 Waste Industry Off-Sider Skill Set

**Stevedoring**

• TLISS00084 Stevedoring Operation Induction and Safety Skill Set
• TLISS00079 Stevedoring Clerical Skill Set
• TLISS00080 Stevedoring Crane Operations Skill Set
• TLISS00081 Stevedoring Equipment Controller Skill Set
• TLISS00082 Stevedoring Equipment Operations/Light Load Shifting Skill Set
• TLISS00091 Stevedoring Equipment Operations/Specialised Load Shifting Skill Set
• TLISS00083 Stevedoring Gantry Crane Operations Skill Set
• TLISS00085 Stevedoring Reefer Skill Set
• TLISS00086 Stevedoring Ships-Based Crane Operations Skill Set
• TLISS00087 Stevedoring Team Leader Skill Set
TLI11210 Certificate I in Warehousing Operations

Modification History
Not Applicable

Description
Rationale:
A general qualification for the Warehousing and Storage Industry. Successful completion will require competency in units that relate to work defined as aligned at AQF Level 1. Breadth, depth and complexity of knowledge and skills would prepare a person to perform a defined range of activities, most of which may be routine and predictable.

<td>• Monitor and anticipate problems that may occur in the course of warehousing operations including hazards and risks and take</td>
</tr>
</tbody>
</table>
**Employability Skill**  

**Industry/enterprise requirements for this qualification include:**

- appropriate action to report or resolve the problems within limits of responsibility
- Recognise hazards and risks in a range of warehousing situations and take appropriate precautions
- Use mathematics to carry out various basic calculations related to warehousing operations.

**TLI11210 Certificate I in Warehousing Operations (continued)**

**Employability Skill**  

**Industry/enterprise requirements for this qualification include:**

**Initiative and enterprise**

- Modify activities dependent on differing situations and contingencies that may arise during warehousing operations
- Take appropriate initiatives in a range of operational situations such as those above
- Respond appropriately to any changes in equipment, standard operating procedures and the working environment.

**Planning and organising**

- Follow and apply operational and emergency plans, systems and procedures
- Check own compliance with regulations and codes of practice
- Implement the workplace security and safety management systems
- Check own operational performance
- Collect and interpret basic information needed in the course of warehousing operations
- Organise and plan own work activities
- Manage time and priorities in the course of warehousing operations.

**Self management**

- Interpret and apply regulations and instructions
- Establish and follow own work plans and schedules
- Check own work performance.

**Learning**

- Adapt own competence in response to any changes in warehousing operations
- Update own knowledge and skills required for warehousing activities.
Employability Skill

Industry/enterprise requirements for this qualification include:

Technology

- Use equipment and materials required during warehousing operations
- Follow and apply operational and servicing instructions for equipment used during warehousing operations
- Follow and apply OH&S procedures when using warehousing equipment and facilities.

Packaging Rules

Requirements for completion of the qualification:
A successful assessment outcome for a total of 10 units of competency comprising:

- the 2 core units, listed below

plus

- 8 elective units which may be taken from the elective units listed below, or may include up to 3 units drawn with appropriate contextualisation from qualifications at the same level or one higher in this Training Package or any other endorsed Training Package or accredited course.

Modification History
Release 4. This is the fourth release of this qualification in TLI10 Transport and Logistics Training Package Version 4.0.

In Release 4:
- 3 units have been added to the licensing or industry units list
- 1 unit has been added to the general elective units.

Release 4 is equivalent to previous release.

Description
Rationale:
This qualification is designed for driving operation job roles within the Transport and Logistics Industry. Successful completion of the qualification will require competence in units of competency that relate to the job role requirements defined as aligned at AQF Level 2. Successful completion of the licensing units within the qualification must align with licensing and regulatory requirements applicable to driving and state/territory regulatory requirements.

Job roles:
Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:
- Express Driver
- Pick up and Delivery
- Courier
- Taxi Truck Driver
- Priority
- Taxicab Driver
- Tow Truck Driver.

Pathways Information
Not Applicable.

Licensing/Regulatory Information
Refer to Description.
Entry Requirements

There are no entry requirements for this qualification.

Employability Skills Summary

Employability Skills Summary for TLI21210 Certificate II in Driving Operations

The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. This table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

<table>
<thead>
<tr>
<th>Employability Skill</th>
<th>Industry/enterprise requirements for this qualification include:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Communication</td>
<td>• Use communication systems and procedures used in relation to driving within the road transport industry</td>
</tr>
<tr>
<td></td>
<td>• Read and follow relevant, instructions, manuals, notices and signs applicable in relation to the role of driving within the road transport industry</td>
</tr>
<tr>
<td></td>
<td>• Speak clearly and directly on matters related to their role in relation to driving within the road transport industry</td>
</tr>
<tr>
<td></td>
<td>• Listen to and interpret verbal information related to their role in relation to driving within the road transport industry</td>
</tr>
<tr>
<td></td>
<td>• Complete documents as part of duties, including completion of relevant forms</td>
</tr>
<tr>
<td></td>
<td>• Recognise and interpret non-verbal signs, signals and behaviour</td>
</tr>
<tr>
<td></td>
<td>• Use relevant communication equipment.</td>
</tr>
<tr>
<td>Teamwork</td>
<td>• Participate in the resolution of any interpersonal conflicts that may arise during driving within the road transport industry</td>
</tr>
<tr>
<td></td>
<td>• Avoid and prevent the harassment of others in the workplace</td>
</tr>
<tr>
<td></td>
<td>• Collaborate with others within the role of driving within the road transport industry</td>
</tr>
<tr>
<td></td>
<td>• Work with persons of different ages, gender, race, religion, political persuasion, etc.</td>
</tr>
<tr>
<td>Problem solving</td>
<td>• Identify and solve or report problems arising in the course of driving within the road transport industry</td>
</tr>
<tr>
<td></td>
<td>• Recognise problems that may occur in the course driving within the road transport industry and take appropriate action to report or resolve the problems within limits of responsibility</td>
</tr>
<tr>
<td></td>
<td>• Recognise hazards and risks in a range of on road and depot situations and take appropriate precautions.</td>
</tr>
</tbody>
</table>
Initiative and enterprise
- Respond appropriately to any changes in equipment, standard operating procedures and the working environment.

Planning and organising
- Follow and apply operational and emergency plans, systems and procedures
- Comply with applicable road safety regulations and codes of practice
- Follow and apply workplace security and safety management systems and safeworking requirements
- Collect and interpret information needed in the course of driving within the road transport industry within limits of responsibility
- Manage time within the job role of driving within the road transport industry.

Self management
- Interpret and apply applicable instructions and procedures
- Follow work plans and schedules
- Check own work performance.

Learning
- Participate in updating of own knowledge and skills required for driving activities, in response to any changes in the processes and equipment used in the road transport industry.

Technology
- Operate equipment and tools required as part of the job role of driving within the transport and logistics industry
- Follow and apply operational and servicing instructions for equipment used as part of the job role of driving within the transport and logistics industry
- Follow and apply the applicable safeworking requirements and WHS/OHS procedures when as part of the job role of driving within the transport and logistics industry.
Packaging Rules

Requirements for achievement of the qualification
A successful assessment outcome for a total of 18 to 19 units of competency (depending on the group selected) comprising:

- 6 core units listed below

plus

- at least one licensing or industry unit relevant to the vehicle type applicable to the job role listed below

plus

- all units within one of the selected group (job roles) listed below

plus

- 6 elective units which may be taken from the elective units listed below, or may include up to 3 units which may be drawn with appropriate contextualisation from this Training Package, and/or from Certificate II qualifications in other relevant nationally endorsed Training Package or accredited course.

TLI21311 Certificate II in Rail Infrastructure

Modification History
Release 3. This is the third release of this qualification in TLI10 Transport and Logistics Training Package Version 4.0.

Imported units updated.

Release 3 is equivalent to previous release.

Description
Please note: RTO to insert unit group selected from the group choice below on the testamur

Rationale:
This is a general qualification for a person engaged in basic operations within the rail infrastructure environment undertaking a range of tasks involving known routines and procedures, and taking some responsibility for the quality of work outcomes.

Job roles:
Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

Rail infrastructure - Track Work:
- Track Worker
- Track Installer
- Track Maintainer.

Rail infrastructure - Structures:
- Structures Maintainer.

Rail infrastructure - Track Surfacing:
- Plant Operator
- Mobile Plant Operator
- Way Gang Driver.

Pathways Information
Not Applicable.
Licensing/Regulatory Information
Not Applicable.

Entry Requirements
Not Applicable.
## Employability Skills Summary

### Employability Skills Summary for TL21311 Certificate II in Rail Infrastructure

The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. This table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

<table>
<thead>
<tr>
<th>Employability Skill</th>

</table>
organising

- Comply with applicable rail and safety regulations and codes of practice
- Follow and apply workplace security and safety management systems and safeworking requirements
- Collect and interpret information needed in the course of the construction and/or maintenance of rail infrastructure within limits of responsibility
- Manage time in the course of construction and/or maintenance of rail infrastructure.

Self management

- Interpret and apply applicable instructions and procedures
- Follow work plans and schedules
- Check own work performance.

Learning

- Participate in updating of own knowledge and skills required for rail activities, in response to any changes in the processes and equipment used in the construction and/or maintenance of rail infrastructure.

Technology

- Operate equipment and tools required during the construction and/or maintenance of rail infrastructure
- Follow and apply operational and servicing instructions for equipment used during the construction and/or maintenance of rail infrastructure
- Follow and apply the applicable safeworking requirements and work health and safety (WHS)/occupational health and safety (OHS) procedures when using rail equipment and facilities.
Packaging Rules

Requirements for achievement of the qualification

A successful assessment outcome for a total of 16 units of competency (depending on the group) comprising:

- 8 core units listed below

plus

- all units from one specialist elective group listed below: A, B or C

plus

- 2 elective units from the general elective units listed below if selecting Group A or C or 3 if selecting Group B or, all of which may be drawn with appropriate contextualisation from any currently endorsed national Training Package or accredited course, provided that the units contribute to the vocational outcome of the qualification

Where imported units are selected, care must be taken to ensure that all prerequisite units specified in the unit are complied with.

TLI21413 Certificate II in Stevedoring

Modification History
Release 2. This is the second release of this qualification in TLI10 Transport and Logistics Training Package Version 4.0.
In Release 2:

- 3 units have been added to the general elective units.
- Release 2 is equivalent to the previous release.

Description
Rationale:
This qualification is for those engaged in stevedoring within the transport and logistics industry who undertake a range of tasks involving known routines and procedures, and take some responsibility for the quality of work outcomes.
Successful achievement of the licensing units within the qualification must align with applicable licensing and regulatory requirements.

Job roles:
Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Stevedore.

Pathways Information
Not applicable.

Licensing/Regulatory Information
Successful achievement of the licensing units in the qualification must align with applicable licensing and regulatory requirements.

Entry Requirements
Not applicable.
Employability Skills Summary

Employability Skills Summary for TLI21413 Certificate II in Stevedoring

The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. This table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

<table>

</tbody>
</table>
|                     | • Respond appropriately to any changes in equipment, standard...
operating procedures and the working environment

**Planning and organising**
- Follow and apply operational and emergency plans, systems and procedures
- Comply with applicable regulations and codes of practice
- Collect and interpret information needed in the course of stevedoring operations
- Manage time and priorities in the course of stevedoring activities

**Self management**
- Interpret and apply regulations and instructions applicable to stevedoring operations
- Follow work plans and schedules
- Check own work performance

**Learning**
- Adapt own competence in response to any changes in stevedoring operations
- Participate in updating own knowledge and skills required for stevedoring activities

**Technology**
- Use equipment and tools required during stevedoring operations
- Follow and apply operational and servicing instructions for equipment used during stevedoring operations
- Follow and apply WHS/OHS procedures when using stevedoring equipment and facilities
Packaging Rules

Requirements for achievement of the qualification
A successful assessment outcome for a total of **16 units of competency** comprising:

- **8 core units** listed below
  
- **5 technical elective units** from the **Group A technical elective units** listed below
  
- **3 elective units** from the **general elective units** listed below. Alternatively **up to 3 units** from any remaining Group A technical elective units or, with appropriate contextualisation, from this Training Package or any currently endorsed national Training Package or accredited course.

Where imported units are selected, care must be taken to ensure that all prerequisites specified in the unit are complied with.

</table>
Employability Skill | Industry/enterprise requirements for this qualification include:
--- | ---
**Initiative and enterprise** | • Modify activities dependent on differing situations and contingencies that may arise during warehouse operations  
• Take appropriate initiatives in a range of diverse operational situations such as those above  
• Respond appropriately to any changes in equipment, standard operating procedures and the working environment.
**Planning and organising** | • Follow and apply operational and emergency plans, systems and procedures  
• Check own compliance with regulations and codes of practice  
• Implement the workplace security and safety management systems  
• Check own operational performance  
• Collect and interpret information needed in the course of warehousing operations  
• Organise and plan own work activities  
• Manage time and priorities in the course of road transport operations.
**Self management** | • Interpret and apply regulations, standard operating procedures and instructions  
• Establish and follow own work plans and schedules  
• Monitor and evaluate own work performance.
**Learning** | • Adapt own competence in response to any changes in warehousing and storage operations  
• Assist others in the workplace to develop their competence  
• Update own knowledge and skills required for warehousing and storage activities.
**Technology** | • Use the equipment and materials required during warehousing and storage operations  
• Follow and apply operational and servicing instructions for equipment used during warehousing and storage operations  
• Follow and apply OH&S procedures when using warehousing and storage equipment and facilities.
Packaging Rules

Requirements for completion of the qualification:
A successful assessment outcome for a total 15 units of competency, comprising:

- 2 core units listed below

plus

- 13 elective units which may be taken from the elective units listed below or may include up to 3 units drawn with appropriate contextualisation from qualifications at the same level or one higher in this Training Package or any other endorsed Training Package or accredited course.

Where imported units are selected, care must be taken to ensure that all pre-requisites specified are complied with.

TLI21810 Certificate II in Logistics

Modification History
Release 3 - Two imported units updated to current version. Equivalent.

Description

Rationale:
A qualification for those engaged in logistics operations support within the Transport and Logistics Industry undertaking a range of tasks involving known routines and procedures, and taking some responsibility for the quality of work outcomes. Successful completion of the licensing units within the qualification must align with applicable licensing and regulatory requirements.

Job roles:
Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Logistics Support Officer
- Logistics Clerk

Modifications to this document version:

- **Release 1** - This is the first release of this qualification in TLI10 Transport and Logistics Training Package Version 3.0.

Description

**Rationale:**
This is a general qualification for a person driving a medium/heavy rail track vehicle from one location to another over main line track. It involves a broad range of skilled applications in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

**Job roles:**
Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Track Vehicle Operator/Driver
- Track Machine Driver

codes of practice

- Follow and apply workplace security and safety management systems and safeworking requirements
- Collect and interpret information needed in the course of rail track vehicle driving within limits of responsibility
- Manage time when driving rail track vehicles.

Self management

- Interpret and apply applicable instructions and procedures
- Follow work plans and schedules
- Check own work performance.

Learning

- Participate in updating of own knowledge and skills required for rail track vehicle driving, in response to any changes in the processes and equipment used in rail track vehicle driving.

Technology

- Operate equipment and use tools required during rail track vehicle driving
- Follow and apply operational and servicing instructions for equipment used during rail track vehicle driving
- Follow and apply the applicable safeworking requirements and OH&S procedures when using equipment and facilities.
Packaging Rules

Requirements for completion of the qualification:
A successful assessment outcome for a total of 17 units of competency comprising:

- **11 core units** listed below

  plus

- **6 elective units** from the general elective units listed below. Alternatively, **up to 3 units** may be drawn with appropriate contextualisation from any currently endorsed national Training Package or accredited course, provided that the unit contributes to the vocational outcome of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisites specified in the unit are complied with.

Clean equipment and restore worksite  
Check and assess operational capabilities of equipment  
Apply track fundamentals  
Measure and record track geometry  
Diagnose and rectify minor faults on on-track vehicles  
Test medium/heavy track vehicle braking system |
| **C** Vehicle Operation     | TLIC2054B, TLIC0083A, TLIC0084A, TLIC2074A | Access rail track to run track vehicle within defined worksite  
Access rail track to travel track vehicle under occupancy authority  
Access rail track to travel track vehicle/s under block working conditions  
Couple and uncouple track maintenance vehicles |
| **D** Load Handling         | TLID1001A | Shift materials safely using manual handling methods |
| **E** Communication and Calculation | TLIE2008A, TLIE2031A | Process workplace documentation  
Use communication systems for on-track vehicle operations |
| **F** Safety Management    | TLIF2006A, TLIF2018A, TLIF3058A, TLIF3091A | Apply accident-emergency procedures  
Operate firefighting equipment  
Apply safeworking rules and regulations to rail functions  
Apply awareness of dangerous goods and hazardous materials requirements |
<p>| <strong>I</strong> Customer Service      | TLII4022A | Identify and meet customer requirements |
| <strong>K</strong> Technology            | TLIK2010A | Use infotechnology devices in the workplace |
| <strong>S</strong> Construction and     | TLIS2030A | Carry out track ballasting |</p>

TLI22213 Certificate II in Tram or Light Rail Infrastructure

Modification History
Release 1 - This is the first release of this qualification in TLI10 Transport and Logistics Training Package Version 3.0.

Description
Rationale:
This is a general qualification for a person engaged in basic operations within the tram/light rail infrastructure environment undertaking a range of tasks involving known routines and procedures, and taking some responsibility for the quality of work outcomes.

Job roles:
Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:
- Tram Infrastructure Track Worker Level 1-3
- Light Rail Track Worker.

Pathways Information
Not applicable.

Licensing/Regulatory Information
Not applicable.

Entry Requirements
Not applicable.
## Employability Skills Summary

### Employability Skills Summary for TLI22213 Certificate II in Tram or Light Rail Infrastructure

The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. This table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

<table>

TLI22413 Certificate II in Furniture Removal

Modification History
Release 1. This is the first release of this qualification in TLI10 Transport and Logistics Training Package Version 4.0.

This qualification replaces but is not equivalent to TLI21510 Certificate II in Furniture Removal because:
- 2 units have been moved from the core units to the general elective units
- 2 units have been replaced in the core
- core units have been reduced from 9 units to 7 units
- 2 units have been removed from the general elective units
- 10 units have been added to the general elective units.

Description
Rationale:
This qualification is designed for furniture removal job roles within the transport and logistics industry. Successful achievement of the qualification will require competence in units of competency that relate to the job role requirements defined as aligned at AQF Level 2.

Job roles:
The TLI22413 Certificate II in Furniture Removal qualification is aligned to the following defined role:
- Furniture Removalist.

organising

- Comply with applicable regulations and codes of practice
- Follow and apply workplace security and safety management systems and safeworking requirements
- Collect and interpret information needed in the course of furniture removal operations
- Manage time and priorities in the course of furniture removal operations.

Self management

- Interpret and apply applicable regulations and instructions
- Follow work plans and schedules
- Check own work performance.

Learning

- Adapt own competence in response to any changes in furniture removal operations
- Participate in updating own knowledge and skills required for furniture removal operations.

Technology

- Operate equipment required during furniture removal operations
- Follow and apply operational and servicing instructions for equipment used during furniture removal operations
- Follow and apply work health and safety (WHS)/occupational health and safety (OHS) procedures when using furniture removal equipment and facilities.
Packaging Rules

Requirements for achievement of the qualification
A successful assessment outcome for a total of **12 units of competency** comprising:

- **7 core units** listed below

plus

- **5 elective units** from the **general elective units** listed below. Alternatively **up to 3 units** from the TLI10 Transport and Logistics Training Package or any other nationally endorsed Training Package or accredited training course, however, the elective units selected must contribute to the vocational outcomes of the qualification and align with the job role.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified in the unit are complied with.

TLI31210 Certificate III in Driving Operations

Modification History

Release 5. This is the fifth release of this qualification in TLI10 Transport and Logistics Training Package Version 4.0.

In Release 5:
- 5 units have been added to the licensing or industry units list
- 3 units have been removed from the general elective units
- 2 units have been added to the general elective units.
- This release is equivalent to the previous release.

Description

Rationale:
This qualification is designed for driving operation job roles within the Transport and Logistics Industry. Successful completion of the qualification will require competence in units of competency that relate to the job role requirements defined as aligned at AQF Level 3. Successful completion of the licensing units within the qualification must align with licensing and regulatory requirements applicable to driving and state/territory regulatory requirements.

Job roles:
Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:
- Line Haul Driver
- Local Heavy General Freight Driver
- Interstate Driver.

Pathways Information
Not Applicable.

Licensing/Regulatory Information
Refer to Description.

Entry Requirements
There are no entry requirements for this qualification.
Employability Skills Summary

Employability Skills Summary for TLI31210 Certificate III in Driving Operations
The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. This table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

<table>
<thead>
<tr>
<th>Employability Skill</th>
<th>Industry/enterprise requirements for this qualification include:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Communication</td>
<td>• Use communication systems and procedures used in driving within the road transport industry</td>
</tr>
<tr>
<td></td>
<td>• Read and interpret relevant regulations, instructions, manuals, notices and signs applicable to their role of driving operations within the road transport industry</td>
</tr>
<tr>
<td></td>
<td>• Speak clearly and directly on matters related to driving operations within the road transport industry</td>
</tr>
<tr>
<td></td>
<td>• Complete documents as part of duties, including completion of relevant forms</td>
</tr>
<tr>
<td></td>
<td>• Recognise and interpret non-verbal signs, signals and behaviour</td>
</tr>
<tr>
<td></td>
<td>• Use relevant communication equipment.</td>
</tr>
<tr>
<td>Teamwork</td>
<td>• Assist in the resolution of any interpersonal conflicts that may arise during driving operations within the road transport industry</td>
</tr>
<tr>
<td></td>
<td>• Avoid and prevent the harassment of others in the workplace</td>
</tr>
<tr>
<td></td>
<td>• Collaborate with others within the job role of driving operations within the road transport industry</td>
</tr>
<tr>
<td></td>
<td>• Work with persons of different ages, gender, race, religion, political persuasion, etc.</td>
</tr>
<tr>
<td>Problem solving</td>
<td>• Identify and solve or report problems arising during the job role of driving operations within the road transport industry</td>
</tr>
<tr>
<td></td>
<td>• Recognise problems that may occur in the within the job role of driving operations within the road transport industry and take appropriate action to report or resolve the problems within limits of responsibility</td>
</tr>
<tr>
<td></td>
<td>• Recognise hazards and risks in a range of driving operation situations within the road transport industry.</td>
</tr>
<tr>
<td>Initiative and enterprise</td>
<td>• Respond appropriately to any changes in equipment, standard operating procedures and the working environment.</td>
</tr>
<tr>
<td>Planning and organising</td>
<td>• Follow and apply operational and emergency plans, systems and procedures</td>
</tr>
<tr>
<td></td>
<td>• Comply with applicable road safety regulations and codes of...</td>
</tr>
</tbody>
</table>
practice
- Follow and apply workplace security and safety management systems and safeworking requirements
- Collect and interpret information needed during driving operations within the road transport industry within limits of responsibility
- Manage time in the job role of driving operations within the road transport industry.

Self management
- Interpret and apply applicable regulations and instructions
- Follow work plans and schedules
- Check own work performance.

Learning
- Participate in updating of own knowledge and skills required for driving operations and working within the road transport industry, in response to any changes in the processes and equipment used road transport industry.

Technology
- Operate equipment and tools required during driving operations within the road transport industry
- Follow and apply operational and servicing instructions for equipment used during driving operations within the road transport industry
- Follow and apply the applicable safeworking requirements and WHS/OHS procedures during driving operations within the road transport industry.
Packaging Rules

Requirements for completion of the qualification
A successful assessment outcome for a total of 18 to 20 units of competency (depending on the group) comprising:

- **6 core units** listed below

plus

- at least **one licensing or industry unit** relevant to the vehicle type applicable to the job role listed below

plus

- **all units** within one of the selected **group (job roles)** listed below: A, B, C, D E, F, G, H, I, K, L

plus

- **6 general elective units** which may be selected from the general elective units listed below, or may include up to **3 units** drawn with appropriate contextualisation from this Training Package, and/or from Certificate III qualifications in other relevant nationally endorsed Training Package or accredited course.

Where imported units are selected, care must be taken to ensure that all pre-requisites specified are complied with.

Core Units

</table>
problems within limits of responsibility

- Recognise hazards and risks in a range situations and take appropriate precautions.

**Initiative and enterprise**

- Respond appropriately to any changes in equipment, standard operating procedures, regulatory, legislation and the working environment.

**TLI31310 Certificate III in International Freight Forwarding (Operator) (continued)**

**Planning and organising**

- Follow and apply operational and emergency plans, systems and procedures
- Comply with applicable customs regulations and codes of practice
- Follow and apply workplace security and safety management systems and safeworking requirements
- Apply legislative security applications as it applies to the job role within international freight forwarding
- Collect and interpret information needed in the course of the job role within the international freight forwarding industry within limits of responsibility
- Manage time within the job role of international freight forwarding.

**Self management**

- Interpret and apply applicable instructions and procedures
- Follow work plans and schedules
- Check own work performance.

**Learning**

- Participate in updating of own knowledge and skills required for working within international freight forwarding, in response to any changes in the processes and regulations used in international freight forwarding.

**Technology**

- Operate equipment and tools required as part of the job role within international freight forwarding
- Follow and apply operational instructions for equipment used as part of the job role within international freight forwarding
- Follow and apply the applicable safeworking requirements and OH&S procedures when as part of the job role of within international freight forwarding.

**Packaging Rules**

**Requirements for completion of the qualification:**
A successful assessment outcome for a total of 13 units comprising:
- **6 core units** listed below

plus

- **7 elective units** which may be taken from the elective units listed below, or may include up to **2 units** drawn with appropriate contextualisation from this Training Package, and/or from Certificate III qualifications in other relevant endorsed Training Package or accredited course.

Where imported units are selected, care must be taken to ensure that all pre-requisites specified are complied with.

**TLI31310 Certificate III in International Freight Forwarding (continued)**

TLI31410 Certificate III in Rail Driving

Modification History
Not Applicable

Description

Rationale:
This is a general qualification for a person who drives a light rail train, tram or operates a monorail within a metropolitan or suburban transport environment. It involves a broad range of skilled applications applied in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles:
Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Tram Driver
- Light Rail Driver
- Monorail Operator

</tr>
</tbody>
</table>
• Avoid and prevent the harassment of others in the workplace
• Work with persons of different ages, gender, race, religion, political persuasion, etc.

TLI31410 Certificate III in Rail Driving (continued)

Problem solving
• Identify and solve or report problems arising in the course of rail driving
• Monitor and anticipate problems that may occur in the course of rail driving and take appropriate action to report or resolve the problems within limits of responsibility
• Identify and control hazards and risks in a range of rail situations related to rail driving and take appropriate precautions
• Use mathematics to solve various calculations related to rail driving.

Initiative and enterprise
• Modify activities dependent on differing rail situations and contingencies
• Take appropriate initiatives in a range of operational situations
• Respond appropriately to any changes in equipment, standard operating procedures and the working environment.

Planning and organising
• Follow and apply operational and emergency plans, systems and procedures
• Monitor systems and procedures for compliance with regulations and codes of practice
• Implement the workplace security and safety management systems
• Monitor and evaluate operational performance and compliance
• Collect and interpret information needed in the course of rail driving
• Manage time and priorities in the course of rail driving.

Self management
• Interpret and apply regulations and instructions
• Evaluate own work performance.

Learning
• Contribute to learning and assessment activities in the workplace
• Assist others to adapt to any changes in workplace systems, equipment, procedures and the workplace operating environment
• Assist in the instruction, coaching or mentoring of
others in the workplace
• Contribute to the assessment of the competence of others in the workplace
• Assist in the creation of a learning environment in the rail industry workplace
• Adapt own competence in response to any changes in the processes and equipment used in rail driving
• Update own knowledge and skills required for rail driving.

TLI31410 Certificate III in Rail Driving (continued)
Technology
• Use equipment and materials required during rail driving
• Follow and apply operational and servicing instructions for equipment used during rail driving
• Follow and apply OH&S procedures when using rail equipment and facilities.

Packaging Rules
Requirements for completion of the qualification:
A successful assessment outcome for a total of 16 units of competency (depending on the group selected) comprising:
• 8 core units listed below

plus
• 5 units from the selected group listed below

plus
• 3 elective units which should be taken from the elective units listed below or may include up to 6 units drawn with appropriate contextualisation from any currently endorsed Training Package or accredited course.

Where the choice of a unit from another currently endorsed National Training Package or accredited course is made, this unit must contribute towards the vocational outcome of the qualification.
Where imported units are selected, care must be taken to ensure that all pre-requisites specified are complied with.

Employability Skill

**Industry/enterprise requirements for this qualification include:**

- risks and take appropriate action to report or resolve the problems within limits of responsibility
- Identify and control hazards and risks in a range of warehousing situations and take appropriate precautions
- Use mathematics to solve various calculations related to warehousing operations.

**Initiative and enterprise**

- Modify activities dependent on differing warehousing situations and contingencies
- Take appropriate initiatives in a range of operational situations such as those above
- Respond appropriately to any changes in equipment, standard operating procedures and the working environment.

**Planning and organising**

- Follow and apply operational and emergency plans, systems and procedures
- Monitor systems and procedures for compliance with regulations and codes of practice
- Implement the workplace security and safety management systems
- Monitor and evaluate operational performance and compliance
- Collect and interpret information needed in the course of warehousing operations
- Organise and plan own work activities
- Manage time and priorities in the course of warehousing operations.

**Self management**

- Interpret and apply regulations and instructions
- Establish and follow own work plans and schedules
- Evaluate own work performance.

**Learning**

- Contribute to learning and assessment activities in the workplace
- Assist others to adapt to any changes in workplace systems, equipment, procedures and the workplace operating environment
- Assist in the instruction, coaching or mentoring of others in the workplace
- Contribute to the assessment of the competence of others in the workplace
- Assist in the creation of a learning environment in the warehouse and storage workplace
- Adapt own competence in response to any changes in warehousing operations
- Update own knowledge and skills required for warehousing activities.
Employability Skill: Technology

Industry/enterprise requirements for this qualification include:

- Use equipment and materials required during warehousing operations
- Follow and apply operational and servicing instructions for equipment used during warehousing operations
- Follow and apply OH&S procedures when using and servicing warehousing equipment and facilities.
Packaging Rules

Requirements for completion of the qualification:
A successful assessment outcome for a total of 18 units of competency comprising:

- 2 core units listed below

plus

- 16 elective units which may be taken from the elective units listed below, or up to 3 units may be drawn with appropriate contextualisation from qualifications at the same level or one higher in this Training Package or any other endorsed Training Package or accredited course.

Where imported units are selected, care must be taken to ensure that all pre-requisites specified are complied with.

TLI31710 Certificate III in Mobile Crane Operations

Modification History
Release 3 - Imported units updated to current versions. Equivalent.

Description
Rationale:
This qualification is designed for mobile crane operation job roles within the Transport and Logistics and other industries. Successful completion of the qualification will require competence in units of competency that relate to the job role requirements defined as aligned at AQF Level III. Successful completion of the high risk work and heavy vehicle licensing unit within the qualification must align with licensing and regulatory requirements applicable to relevant national, state and territory regulatory requirements.

Pathways Information

Refer to Description
Entry Requirements

Entry requirements:
There are no entry requirements for this qualification.

Employability Skills Summary

Employability Skills Summary for
TLI31710 Certificate III in Mobile Crane Operations
The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. This table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

<table>
<thead>
<tr>
<th>Employability Skill</th>
<th>Industry/enterprise requirements for this qualification include:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Communication</td>
<td>• Implement and monitor communication systems and procedures required for mobile cranes operations</td>
</tr>
<tr>
<td></td>
<td>• Read and interpret relevant regulations, instructions, signs and labels applicable to the supervision of mobile cranes operations</td>
</tr>
<tr>
<td></td>
<td>• Speak clearly and directly on matters related to mobile cranes operations</td>
</tr>
<tr>
<td></td>
<td>• Listen to and interpret verbal information related to mobile cranes operations</td>
</tr>
<tr>
<td></td>
<td>• Write documents as part of duties, including completion of relevant forms, timesheets, service logs and incident reports</td>
</tr>
<tr>
<td></td>
<td>• Negotiate issues with others in the course of mobile cranes operations</td>
</tr>
<tr>
<td></td>
<td>• Recognise and interpret non-verbal signs, signals and behaviour</td>
</tr>
<tr>
<td></td>
<td>• Use relevant communication equipment and methods.</td>
</tr>
<tr>
<td>Teamwork</td>
<td>• Collaborate with others in the course of mobile cranes operations</td>
</tr>
<tr>
<td></td>
<td>• Provide leadership to other personnel in the mobile cranes workplace</td>
</tr>
<tr>
<td></td>
<td>• Motivate others in the workplace</td>
</tr>
<tr>
<td></td>
<td>• Assist others in the workplace to achieve and maintain competence</td>
</tr>
<tr>
<td></td>
<td>• Assist in the resolution of any interpersonal conflicts that may arise during mobile cranes operations</td>
</tr>
<tr>
<td></td>

</tbody>
</table>
Employability Skill | Industry/enterprise requirements for this qualification
--- | ---
Problem solving | - Identify and solve or report problems arising in the course of mobile cranes operations
- Monitor and anticipate problems that may occur in the course of mobile cranes operations including hazards and risks and take appropriate action to report or resolve the problems within limits of responsibility
- Identify and control hazards and risks in a range of mobile cranes operational situations and take appropriate precautions
- Use mathematics to solve various calculations related to mobile cranes operations.

Initiative and enterprise | - Modify activities dependent on differing mobile cranes operational situations and contingencies
- Take appropriate initiatives in a range of operational situations such as those above
- Respond appropriately to any changes in equipment, standard operating procedures and the working environment.

Planning and organising | - Follow and apply operational and emergency plans, systems and procedures
- Monitor systems and procedures for compliance with regulations and codes of practice
- Implement the workplace security and safety management systems
- Monitor and evaluate operational performance and compliance
- Collect and interpret information needed in the course of mobile cranes operations
- Organise and plan own work activities
- Manage time and priorities in the course of mobile cranes operations.

Self management | - Interpret and apply regulations and instructions
- Establish and follow own work plans and schedules
- Evaluate own work performance.

Learning | - Contribute to learning and assessment activities in the workplace
- Assist others to adapt to any changes in workplace systems, equipment, procedures and the workplace operating environment
- Assist in the instruction, coaching or mentoring of others in the workplace
- Contribute to the assessment of the competence of others in the workplace
- Assist in the creation of a learning environment in the
Employability Skill

Industry/enterprise requirements for this qualification include:

- Adapt own competence in response to any changes in mobile cranes operations.

Technology

- Use equipment and materials required during mobile cranes operations
- Follow and apply operational and servicing instructions for equipment used during mobile cranes operations
- Follow and apply OH&S procedures when using and servicing mobile cranes and associated equipment

Packaging Rules

Requirements for completion of the qualification:
A successful assessment outcome for a total of 16 units of competency comprising:

- **8 core units** listed below

  plus

- **3 core** high risk work licensing units, listed below

  plus

- **5 elective units** which may be taken from the elective units listed below, or may include up to **3 imported units** which may be selected from the remaining elective units or from qualifications at the same level or one higher in this Training Package or any other endorsed Training Package or accredited course.

Where imported units are selected care must be taken to ensure that all pre-requisites specified in the unit are complied with.

The following units have prerequisites:

- CPCCCM2010B Work safely at heights
- CPCCCM3003A Work safely around power sources, services and assets
- HLTFA412A Apply advanced first aid

Licensing requirements will apply to this unit of competency depending on the regulatory requirements of each jurisdiction.

- CPCCOHS1001A Work safely in the construction industry

Requirements for completion of HRW license units within this qualification:
To comply with the National Standards for High Risk Work there is a requirement to complete the high risk work license TLILIC3006A Licence to operate a non-slewing mobile crane (greater than 3 tonnes capacity) before commencing TLILIC3008A Licence to operate a slewing mobile crane (up to 20 tonnes).

Completion of the licensing units is a requirement, however applying for a high risk work license for TLILIC3006A Licence to operate a non-slewing mobile crane (greater than 3 tonnes capacity) is not a requirement if TLILIC3008A Licence to operate a slewing mobile crane (up to 20 tonnes) licence is being applied for as this licence covers the TLILIC3006A Licence to operate a non-slewing mobile crane.

TLI31811 Certificate III in Rail Track Surfacing

Modification History
Changes to core and elective units. Packaging rules updated. Equivalent.

Description
Rationale:
This is a general qualification for a person engaged in the installation and maintenance of mechanical rail track and the operation of track surfacing and other track equipment. It involves a broad range of skilled applications in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles:
Job roles and titles vary across different sectors. A possible job title relevant to this qualification includes:
- Rail track surfacer.

Pathways Information

</tr>
</tbody>
</table>
appropriate precautions

- Use mathematics to solve various calculations related to working on mechanical rail signalling

**Initiative and enterprise**

- Modify activities dependent on differing situations and contingencies
- Take appropriate initiative in a range of operational situations
- Respond appropriately to changes in equipment, standard operating procedures and the work environment

**Planning and organising**

- Follow and apply operational and emergency plans, systems and procedures
- Monitor systems and procedures for compliance with regulations and codes of practice
- Implement workplace security and safety management systems
- Monitor and evaluate operational performance and compliance
- Collect and interpret information needed in the course of working on mechanical rail signalling
- Manage time and priorities in the course of working on mechanical rail signalling

**Self management**

- Interpret and apply regulations and instructions
- Evaluate own work performance

**Learning**

- Contribute to learning and assessment activities in the workplace
- Assist others to adapt to changes in workplace systems, equipment, procedures and the workplace operating environment
- Assist in the instruction, coaching or mentoring of others in the workplace
- Contribute to the assessment of competence of others in the workplace
- Assist in the creation of a learning environment in the rail industry workplace
- Adapt own competence in response to changes in the processes and equipment used when working on mechanical rail signalling
- Update own knowledge and skills required for working on mechanical rail signalling

**Technology**

- Use equipment and materials required when working on mechanical rail signalling
- Follow and apply operational and servicing instructions for equipment used when working on mechanical rail signalling
- Follow and apply OH&S procedures when using rail equipment and facilities
Packaging Rules

Requirements for completion of the qualification
A successful assessment outcome for a total of 18 units of competency comprising:

- **11 core units** listed below

plus

- **7 elective units** from the general elective units listed below. Alternatively, **up to 3 units**
  may be drawn with appropriate contextualisation from any currently endorsed national
  Training Package or accredited course, provided that the unit contributes to the vocational
  outcome of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisites specified
in the unit are complied with.

TLI32111 Certificate III in Rail Structures

Modification History

Release 2 - One unit updated to current version. Equivalent.
Release 1 - Changes to core and elective units. Packaging rules updated. Equivalent.

Description

*Please note RTO to insert unit group selected from the group choice below on the testamur*

**Rationale:**
This is a general qualification for a person engaged in the rail infrastructure environment who performs tasks involving checking and repairing structures through a broad range of skilled applications in a wide variety of contexts. It may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

**Job roles:**
Job roles and titles vary across different sectors. Possible job titles relevant to the groups listed below (job roles) include:

- Steel/Concrete/Masonry Structures Maintenance
  - Senior structures maintainer

- Timber Structures Maintenance
  - Senior structures maintainer

Entry Requirements

The entry requirement for this qualification is TLI21311 Certificate II in Rail Infrastructure (Structures) or relevant industry experience gained by working in the rail infrastructure (structures) environment.

Employability Skills Summary

Employability Skills Summary for:
TLI32111 Certificate III in Rail Structures

The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. The table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

</tbody>
</table>
Monitor and anticipate problems that may occur in the course of inspection and/or maintenance operations on rail structures and take appropriate action to report or resolve the problems within limits of responsibility

Identify and control hazards and risks in a range of rail infrastructure situations and take appropriate precautions

Use mathematics to solve various calculations related to inspection and/or maintenance operations on rail structures

Initiative and enterprise

Modify activities dependent on differing rail infrastructure situations and contingencies

Take appropriate initiative in a range of operational situations

Respond appropriately to changes in equipment, standard operating procedures and the work environment

Planning and organising

Follow and apply operational and emergency plans, systems and procedures

Implement workplace security and safety management systems

Monitor and evaluate operational performance and compliance

Collect and interpret information needed in the course of inspection and/or maintenance operations on rail structures

Organise and plan work activities

Manage time and priorities in the course of inspection and/or maintenance operations on rail structures

Self management

Interpret and apply procedures and instructions

Establish and follow own work plans and schedules

Evaluate own work performance

Learning

Assist others to adapt to changes in workplace systems, equipment, procedures and the workplace operating environment

Assist in the instruction, coaching or mentoring of others in the workplace

Contribute to the assessment of competence of others in the workplace

Participate in updating own knowledge and skills required for inspecting and/or maintaining rail structures

Technology

Use equipment and materials required during inspection and/or maintenance operations on rail structures

Follow and apply operational and servicing instructions for equipment used during inspection and/or maintenance operations on rail structures

Follow and apply OH&S procedures when using and servicing rail equipment and facilities
Packaging Rules

Requirements for completion of the qualification:
A successful assessment outcome for a total of 11 units of competency comprising:

- 6 core units listed below

plus

- all 3 Group A specialist elective units or all 2 Group B specialist elective units listed below

plus

- the remaining elective units, which are to be chosen as follows:

  2 units from the general elective units listed below if Group A is chosen, or
  3 units from the general elective units listed below if Group B is chosen
  up to 2 elective units may be drawn with appropriate contextualisation from any currently endorsed national Training Package or accredited course, provided that the unit contributes to the vocational outcome of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisites specified in the unit are complied with.

TLI32310 Certificate III in Electric Passenger Train Guard

Modification History
Release 2 - Two imported units updated to current versions. Equivalent.

Description
Rationale:
This is a general qualification for a person engaged in the duties of an electric passenger train guard within a metropolitan train system. It involves a broad range of skilled applications applied in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

### Employability Skill

**Problem solving**
- Identify and solve or report problems arising in the course of performing the duties of a guard on electric passenger trains.
- Monitor and anticipate problems that may occur in the course of performing the duties of a guard on electric passenger trains and take appropriate action to report or resolve the problems within limits of responsibility.
- Identify and control hazards and risks in a range of situations related to performing the duties of a guard on electric passenger trains and take appropriate precautions.
- Use mathematics to solve various calculations related to performing the duties of a guard on electric passenger trains.

**Initiative and enterprise**
- Modify activities dependent on differing situations and contingencies.
- Take appropriate initiatives in a range of operational situations.
- Respond appropriately to any changes in equipment, standard operating procedures and the working environment.

**Planning and organising**
- Follow and apply operational and emergency plans, systems and procedures.
- Monitor systems and procedures for compliance with regulations and codes of practice.
- Implement the workplace security and safety management systems.
- Monitor and evaluate operational performance and compliance.
- Collect and interpret information needed in the course of performing the duties of a guard on electric passenger trains.
- Manage time and priorities in the course of performing the duties of a guard on electric passenger trains.

**Self management**
- Interpret and apply regulations and instructions.
- Evaluate own work performance.

**Learning**
- Contribute to learning and assessment activities in the workplace.
- Assist others to adapt to any changes in workplace systems, equipment, procedures and the workplace operating environment.
- Assist in the instruction, coaching or mentoring of others in the workplace.
- Contribute to the assessment of the competence of others in the workplace.
- Assist in the creation of a learning environment in the rail industry workplace.
- Adapt own competence in response to any changes in the processes and equipment used in performing the duties of a
Employability Skill

Industry/enterprise requirements for this qualification include:
- guard on electric passenger trains
- Update own knowledge and skills required for performing the duties of a guard on electric passenger trains.

Technology

- Use equipment and materials required when performing the duties of a guard on electric passenger trains
- Follow and apply operational and servicing instructions for equipment used when performing the duties of a guard on electric passenger trains
- Follow and apply OH&S procedures when using rail equipment and facilities.

Packaging Rules

Requirements for completion of the qualification:
A successful assessment outcome for a total of 20 units of competency comprising:
- 13 core units listed below
  plus
- 7 elective units which should be taken from the elective units listed below or may include up to 3 units drawn with appropriate contextualisation from any currently endorsed national Training Package or accredited course.

Where the choice of a unit from another currently endorsed national Training Package or accredited course is made, this unit must contribute towards the vocational outcome of the qualification.
Where imported units are selected, care must be taken to ensure that all pre-requisites specified are complied with.

TLI32410 Certificate III in Logistics

Modification History
Release 3 - Imported units updated to current versions. Equivalent.

Description
Rationale:
A qualification for those engaged in logistics operations within the Transport and Logistics Industry. It involves a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the selection of equipment, services or contingency measures and within known time constraints. It may also include responsibility for coordinating the work of others.
Successful completion of the licensing units within the qualification must align with applicable licensing and regulatory requirements.

Job roles:
Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Logistics Administration Officer
- Logistics Service Clerk

TLI32511 Certificate III in Rail Infrastructure

Modification History
Changes to core and elective units. Packaging rules updated. Equivalent.
Description

*Please note RTO to insert unit group selected from the group choice below on the testamur*

**Rationale:**
This is a general qualification for a person engaged in the rail infrastructure environment who performs tasks involving a broad range of skilled applications in a wide variety of contexts. It may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

**Job roles:**
The Certificate III in Rail Infrastructure qualification is aligned to the following defined roles:

**Group A: Rail Infrastructure – Track Maintenance**
- Senior track maintainer
- Ganger

**Group B: Rail Infrastructure – Track Construction**
- Senior track installer
- Ganger

**Group C: Rail Infrastructure – Turnout Construction**
- Specialist track installer
- Special ganger

**Group D: Rail Infrastructure – Track Welding**
- Track welder

**Group E: Rail Infrastructure – Track Examination**
- Track examiner

**Group F: Rail Infrastructure – Rail Testing**
- Rail tester

**Group G: Rail Infrastructure – Timber/Composite Turnout Construction**
- Turnout builder
- Points and crossings builder

**Group H: Rail Infrastructure – Concrete/Steel Turnout Construction**
- Turnout builder
- Points and crossings builder

**Group I: Rail Infrastructure – Track Drainage Maintenance**
- Track drainage maintainer

Entry Requirements

The entry requirement for this qualification is TLI21311 Certificate II in Rail Infrastructure (Track Work) or relevant industry experience gained by working in the rail infrastructure environment.

Employability Skills Summary

Employability Skills Summary for:
TLI32511 Certificate III in Rail Infrastructure

The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. The table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

<table>
<thead>
<tr>
<th>Employability Skill</th>
<th>Industry/enterprise requirements for this qualification include:</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Communication</strong></td>
<td>• Implement and monitor communication systems and procedures required for construction and/or maintenance operations on rail infrastructure</td>
</tr>
<tr>
<td></td>
<td>• Read and interpret relevant procedures, instructions, signs and labels applicable to the supervision of construction and/or maintenance operations on rail infrastructure</td>
</tr>
<tr>
<td></td>
<td>• Speak clearly and directly on matters related to construction and/or maintenance operations on rail infrastructure</td>
</tr>
<tr>
<td></td>
<td>• Listen to and interpret verbal information related to construction and/or maintenance operations on rail infrastructure</td>
</tr>
<tr>
<td></td>
<td>• Write and complete basic documents as part of duties</td>
</tr>
<tr>
<td></td>
<td>• Negotiate issues with others in the course of construction and maintenance operations on rail infrastructure</td>
</tr>
<tr>
<td></td>
<td>• Recognise and interpret non-verbal signs, signals and behaviour</td>
</tr>
<tr>
<td></td>
<td>• Use relevant communication equipment</td>
</tr>
<tr>
<td><strong>Teamwork</strong></td>

<td>• Identify and solve or report problems arising in the course of construction and/or maintenance operations on rail infrastructure</td>
</tr>
</tbody>
</table>
Monitor and anticipate problems that may occur in the course of construction and/or maintenance operations on rail infrastructure and take appropriate action to report or resolve the problems within limits of responsibility.

Identify and control hazards and risks in a range of rail infrastructure situations and take appropriate precautions.

Use mathematics to solve various calculations related to construction and/or maintenance operations on rail infrastructure.

Modify activities dependent on differing rail infrastructure situations and contingencies.

Take appropriate initiative in a range of operational situations, such as those above.

Respond appropriately to changes in equipment, standard operating procedures and the work environment.

Follow and apply operational and emergency plans, systems and procedures.

Implement workplace security and safety management systems.

Monitor and evaluate operational performance and compliance.

Collect and interpret information needed in the course of construction and/or maintenance operations on rail infrastructure.

Organise and plan work activities.

Manage time and priorities in the course of construction and/or maintenance operations on rail infrastructure.

Interpret and apply procedures and instructions.

Establish and follow own work plans and schedules.

Evaluate own work performance.

Assist others to adapt to changes in workplace systems, equipment, procedures and the workplace operating environment.

Assist in the instruction, coaching or mentoring of others in the workplace.

Contribute to the assessment of the competence of others in the workplace.

Participate in updating own knowledge and skills required for rail infrastructure construction and/or maintenance activities.

Use equipment and materials required during construction and/or maintenance operations on rail infrastructure.

Follow and apply operational and servicing instructions for equipment used during construction and/or maintenance operations on rail infrastructure.

Follow and apply OH&S procedures when using and servicing rail equipment and facilities.
Packaging Rules

Requirements for completion of the qualification:
A successful assessment outcome for a total of 11 units of competency comprising:

- **5 core units** listed below

plus

- **all specialist elective units** from one of the **selected groups** (A – I) listed below

plus

- a minimum of 2 general elective units and up to 4 general elective units (depending on the specialist elective (job role) group that was selected) from the general elective units listed below; up to 2 of these electives may be drawn with appropriate contextualisation from any currently endorsed national Training Package or accredited course, provided that the units contribute to the vocational outcome of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisites specified in the unit are complied with.

Core units:

TLI32611 Certificate III in Rail Signalling

Modification History
Release 2 - One unit updated to current version. Equivalent.
Release 1 - New qualification

Description
Rationale:
This is a general qualification for a person engaged in the controlling of rail traffic movements and operations within a defined or local area. It involves a broad range of skilled applications applied in a wide variety of contexts, which may involve application of some discretion and judgment in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles:
This includes but is not limited to the following job roles:
- Signaller
- Area controller
- Yard controller

signalling operations and take appropriate action to report or resolve them within limits of responsibility

- Identify and control hazards and risks in a range of situations related to rail signalling and take appropriate precautions
- Use mathematics to solve various calculations related to rail signalling

**Initiative and enterprise**

- Modify activities dependent on differing situations and contingencies
- Take appropriate initiative in a range of operational situations
- Respond appropriately to changes in equipment, standard operating procedures and the working environment

**Planning and organising**

- Follow and apply operational and emergency plans, systems and procedures
- Monitor systems and procedures for compliance with regulations and codes of practice
- Implement the workplace security and safety management systems
- Monitor and evaluate operational performance and compliance
- Collect and interpret information needed in the course of rail signalling operations
- Manage time and priorities in the course of rail signalling operations

**Self management**

- Interpret and apply regulations and instructions
- Evaluate own work performance

**Learning**

- Contribute to learning and assessment activities in the workplace
- Assist others to adapt to changes in workplace systems, equipment, procedures and the workplace operating environment
- Assist in the instruction, coaching or mentoring of others in the workplace
- Contribute to the assessment of competence of others in the workplace
- Assist in the creation of a learning environment in the rail industry workplace
- Adapt own competence in response to changes in the processes and equipment used in rail signalling
- Update own knowledge and skills required for rail signalling operations

**Technology**

- Use equipment and materials required during rail signalling operations
- Follow and apply operational and servicing instructions for equipment used during rail signalling operations
- Follow and apply OH&S procedures when using rail equipment and facilities

TLI32813 Certificate III in Rail Yard Coordination

Modification History
Release 1 - This is the first release of this qualification in TLI10 Transport and Logistics Training Package Version 3.0.

Description
Rationale:
This is a general qualification for a person engaged in the rail yard or terminal environment who performs tasks involving a broad range of skilled applications applied in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles:
The TLI32813 Certificate III in Rail Yard Coordination qualification is aligned to the following defined roles:

- Yard Coordinator
- Terminal Coordinator.

enterprise

- Take appropriate initiatives in a range of operational situations such as those above
- Respond appropriately to any changes in equipment, standard operating procedures and the working environment.

Planning and organising

- Follow and apply operational and emergency plans, systems and procedures
- Implement the workplace security and safety management systems
- Monitor and evaluate operational performance and compliance
- Collect and interpret information needed in the course of shunting or yard/terminal operations
- Organise and plan work activities
- Manage time and priorities in the course of shunting or yard/terminal operations.

Self management

- Interpret and apply procedures and instructions
- Establish and follow own work plans and schedules
- Evaluate own work performance.

Learning

- Assist others to adapt to any changes in workplace systems, equipment, procedures and the workplace operating environment
- Assist in the instruction, coaching or mentoring of others in the workplace
- Contribute to the assessment of the competence of others in the workplace
- Participate in the updating of own knowledge and skills required for shunting or yard/terminal operations.

Technology

- Use equipment and materials required during shunting or yard/terminal operations
- Follow and apply operational and servicing instructions for equipment used during shunting or yard/terminal operations
- Follow and apply OH&S procedures when conducting shunting or yard/terminal operations.
**Packaging Rules**

**Requirements for completion of the qualification**

A successful assessment outcome for a total of **18 units** of competency comprising:

- **12 core units** listed below
  
  plus

- **6 elective units** from the **general elective units** listed below. Alternatively, **up to 3 units** may be drawn with appropriate contextualisation from any currently endorsed national Training Package or accredited course, provided that the unit contributes to the vocational outcome of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisites specified in the unit are complied with.

TLI32913 Certificate III in Tram or Light Rail Infrastructure

Modification History
Release 1 - This is the first release of this qualification in TLI10 Transport and Logistics Training Package Version 3.0.

Description
Rationale:
This is a general qualification for persons engaged in the tram/light rail infrastructure environment who perform tasks involving a broad range of skilled applications applied in a wide variety of contexts, which may involve application of some discretion and judgment in selecting equipment, services or contingency measures. It may also include responsibility for coordinating the work of others.

Job roles:
The TLI32913 Certificate III in Tram or Light Rail Infrastructure qualification is aligned to the following defined roles:

- Tram Infrastructure Track Worker Level 4
- Light Rail Track Worker.

Pathways Information
Not applicable.

Licensing/Regulatory Information
Not applicable.
Entry Requirements
The entry requirements for this qualification are:

- TLI22913 Certificate II in Tram or Light Rail Infrastructure or
- equivalent vocational experience working within the rail infrastructure environment.

Employability Skills Summary
Employability Skills Summary for TLI32913 Certificate III in Tram or Light Rail Infrastructure
The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. This table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

Employability Skills Summary

Employability Skills Summary for TLI33013 Certificate III in Heritage Locomotive Assistant or Steam Locomotive Fireman

The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. This table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

**Employability Skill**  **Industry/enterprise requirements for this qualification include:**

**Communication**
- Implement and monitor communication systems and procedures required for heritage rail operations on mainlines and/or private tracks
- Read and interpret relevant procedures, instructions, signs and labels applicable to heritage rail operations on mainlines and/or private tracks
- Speak clearly and directly on matters related to heritage rail operations on mainlines and/or private tracks
- Listen to and interpret verbal information related to heritage rail operations on mainlines and/or private tracks
- Write/Complete basic documents as part of duties
- Negotiate issues with others in the course of heritage rail operations on mainlines and/or private tracks
- Recognise and interpret non-verbal signs, signals and behaviour
- Use relevant communication equipment.

**Teamwork**
- Work effectively with others in the course of heritage rail operations on mainlines and/or private tracks
- Motivate others in the workplace
- Assist others in the workplace to achieve and maintain competence
- Assist in the resolution of any interpersonal conflicts that may arise during heritage rail operations on mainlines and/or private tracks
- Avoid and prevent the harassment of others in the workplace
- Work with persons of different ages, gender, race, religion, political persuasion, etc.

**Problem solving**
- Identify and solve or report problems arising in the course of heritage rail operations on mainlines and/or private tracks
- Monitor and anticipate problems that may occur in the course of heritage rail operations on mainlines and/or private tracks and take appropriate action to report or resolve the problems within limits of responsibility
- Identify and control hazards and risks in a range of heritage
rail situations and take appropriate precautions

- Use mathematics to solve various calculations related to heritage rail operations on mainlines and/or private tracks.

**Initiative and enterprise**

- Modify activities dependent on differing rail operating situations and contingencies
- Take appropriate initiatives in a range of operational situations such as those above
- Respond appropriately to any changes in equipment, standard operating procedures and the working environment.

**Planning and organising**

- Follow and apply operational and emergency plans, systems and procedures
- Implement the workplace security and safety management systems
- Monitor and evaluate operational performance and compliance
- Collect and interpret information needed in the course of heritage rail operations on mainlines and/or private tracks
- Organise and plan work activities
- Manage time and priorities in the course of heritage rail operations on main lines and/or private tracks.

**Self management**

- Interpret and apply procedures and instructions
- Establish and follow own work plans and schedules
- Evaluate own work performance.

**Learning**

- Assist others to adapt to any changes in workplace systems, equipment, procedures and the workplace operating environment
- Assist in the instruction, coaching or mentoring of others in the workplace
- Contribute to the assessment of the competence of others in the workplace
- Participate in the updating of own knowledge and skills required for heritage rail operations on mainlines and/or private tracks.

**Technology**

- Use equipment and materials required during heritage rail operations on mainlines and/or private tracks
- Follow and apply operational and servicing instructions for equipment used during heritage rail operations on mainlines and/or private tracks
- Follow and apply OH&S procedures when using and servicing heritage rail equipment and facilities.

TLI33213 Certificate III in Terminal Train Driving

Modification History
Release 1. This is the first release of this qualification in TLI10 Transport and Logistics Training Package Version 4.0.

Description
Rationale:
This is a general qualification for a person engaged in terminal train driving.

Achievement of this qualification requires the application of a broad range of knowledge and skills in varied contexts to undertake skilled work within a terminal train driving environment.

This qualification requires the skills and knowledge to:
- interpret and act on available information
- apply and communicate known solutions to a variety of predictable problems and to deal with unforeseen contingencies using known solutions
- provide technical information to a variety of specialist and non-specialist audiences
- undertake routine and some non-routine tasks in a range of skilled operations.

These skills and knowledge will be applied to known routines, methods, procedures and time constraints while taking responsibility for own outputs.

Job roles:  
The TLI33213 Certificate III in Terminal Train Driving qualification is aligned to the following defined roles:
- Terminal Operator
- Terminal Train Driver
- Yard Terminal Driver.

Pathways Information

**Planning and organising**
- Follow and apply operational and emergency plans, systems and procedures
- Monitor systems and procedures for compliance with regulations and codes of practice
- Implement the workplace security and safety management systems
- Monitor and evaluate operational performance and compliance
- Collect and interpret information needed in the course of terminal train driving activities
- Organise and plan own work activities
- Manage time and priorities in the course of terminal train driving activities.

**Self management**
- Interpret and apply regulations and instructions
- Establish and follow own work plans and schedules
- Evaluate own work performance.

**Learning**
- Contribute to learning and assessment activities in the workplace
- Assist others to adapt to any changes in workplace systems, equipment, procedures and the workplace operating environment
- Assist in the instruction, coaching or mentoring of others in the workplace
- Contribute to the assessment of the competence of others in the workplace
- Assist in the creation of a learning environment in the rail industry workplace
- Adapt own competence in response to any changes in the processes and equipment used in terminal train driving activities
- Update own knowledge and skills required for terminal train driving activities.

**Technology**
- Use equipment and materials required during terminal train driving activities
- Follow and apply operational and servicing instructions for equipment used during terminal train driving activities
- Follow and apply WHS/OHS procedures when using and
servicing rail equipment and facilities.

Packaging Rules

Requirements for achievement of the qualification
A successful assessment outcome for a total of 17 units of competency comprising:

- 11 core units

plus

- 6 general elective units which may be selected from the general elective units listed below. Alternatively, up to 3 units appropriate to the job role may be selected from the TLI10 Transport and Logistics Training Package or other relevant nationally endorsed Training Package or accredited course.

Where imported units are selected, care must be taken to ensure that all prerequisites specified in the unit are complied with.

TLI33313 Certificate III in Furniture Removal

Modification History
Release 1. This is the first release of this qualification in TLI10 Transport and Logistics Training Package Version 4.0.

Description
Rationale:
This qualification is designed for furniture removal job roles within the transport and logistics industry. Successful achievement of the qualification will require competence in units of competency that relate to the job role requirements defined as aligned at AQF Level 3.

Job roles:
The TLI33313 Certificate III in Furniture Removal qualification is aligned to the following defined roles:

- Furniture Removalist
- Team Leader.

Pathways Information
Not applicable.

Licensing/Regulatory Information
Not applicable.

Entry Requirements
Not applicable.
## Employability Skills Summary

### Employability Skills Summary for TLI33313 Certificate III in Furniture Removal

The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. This table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

<table>
<thead>
<tr>
<th>Employability Skill</th>
<th>Industry/enterprise requirements for this qualification include:</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Communication</strong></td>
<td>• Implement and monitor communication systems and procedures required for furniture removal operations</td>
</tr>
<tr>
<td></td>
<td>• Read and follow relevant regulations and instructions applicable to furniture removal operations</td>
</tr>
<tr>
<td></td>
<td>• Speak clearly and directly on matters related to furniture removal operations</td>
</tr>
<tr>
<td></td>
<td>• Listen to and interpret verbal information related to furniture removal operations</td>
</tr>
<tr>
<td></td>
<td>• Write documents as part of duties, including completion of relevant forms and incident and accident reports</td>
</tr>
<tr>
<td></td>
<td>• Negotiate issues with others in the course of furniture removal operations</td>
</tr>
<tr>
<td></td>
<td>• Recognise and interpret non-verbal signs, signals and behaviour</td>
</tr>
<tr>
<td></td>
<td>• Use relevant communication equipment.</td>
</tr>
<tr>
<td><strong>Teamwork</strong></td>
<td>• Participate in the resolution of any interpersonal conflicts that may arise during furniture removal operations</td>
</tr>
<tr>
<td></td>
<td>• Avoid and prevent the harassment of others in the workplace</td>
</tr>
<tr>
<td></td>
<td>• Collaborate with others in the course of furniture removal operations</td>
</tr>
<tr>
<td></td>
<td>• Work with persons of different ages, gender, race, religion, political persuasion, etc.</td>
</tr>
<tr>
<td></td>
<td>• Provide leadership to other personnel in the furniture removal workplace</td>
</tr>
<tr>
<td></td>
<td>• Motivate others in the workplace</td>
</tr>
<tr>
<td></td>
<td>• Assist others in the workplace to achieve and maintain competence</td>
</tr>
<tr>
<td><strong>Problem solving</strong></td>
<td>• Identify and solve or report problems arising in the course of furniture removal operations</td>
</tr>
<tr>
<td></td>
<td>• Monitor and anticipate problems that may occur in the course of furniture removal operations including hazards and risks and take appropriate action to report or resolve the problems within limits of responsibility</td>
</tr>
</tbody>
</table>
Recognise hazards and risks in a range of situations and take appropriate precautions
Use mathematics to carry out calculations related to furniture removal operations.

**Initiative and enterprise**
Modify activities dependent on differing furniture removal situations and contingencies
Take appropriate initiatives in a range of operational situations such as those above
Respond appropriately to any changes in equipment, standard operating procedures and the working environment.

**Planning and organising**
Follow and apply operational and emergency plans, systems and procedures
Comply with applicable regulations and codes of practice
Follow and apply workplace security and safety management systems and safeworking requirements
Monitor and evaluate operational performance and compliance
Collect and interpret information needed in the course of furniture removal operations
Organise and plan own work activities
Manage time and priorities in the course of furniture removal operations.

**Self management**
Interpret and apply applicable regulations and instructions
Establish own work plans and schedules
Evaluate own work performance.

**Learning**
Contribute to learning and assessment activities in the workplace
Assist others to adapt to any changes in workplace systems, equipment, procedures and the workplace operating environment
Assist in the instruction, coaching or mentoring of others in the workplace
Assist in the creation of a learning environment in the furniture removal workplace
Adapt own competence in response to any changes in furniture removal operations
Update own knowledge and skills required for furniture removal activities.

**Technology**
Use equipment and materials required during furniture removal operations
Follow and apply operational and servicing instructions for equipment used during furniture removal operations
Follow and apply work health and safety (WHS)/occupational health and safety (OHS) procedures when using furniture
removal equipment and facilities.
Packaging Rules

Requirements for achievement of the qualification
A successful assessment outcome for a total of 12 units of competency comprising:

- 4 core units listed below

plus

- 8 elective units from the general elective units listed below. TLI33413 Certificate III in Waste Driving Operations

Modification History
Release 1. This is the first release of this qualification in TLI10 Transport and Logistics Training Package Version 4.0.

Description
Rationale:
This qualification is designed for waste driving job roles within the transport and logistics industry. Successful achievement of the qualification will require competence in units of competency that relate to the job role requirements defined as aligned at AQF Level 3.

Job roles:
The TLI33413 Certificate III in Waste Driving Operations qualification is aligned to the following defined role:

- Waste Vehicle Driver.

Pathways Information
Not applicable.

Licensing/Regulatory Information
Not applicable.

Entry Requirements
Not applicable.
# Employability Skills Summary

**Employability Skills Summary for TLI33413 Certificate III in Waste Driving Operations**

The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. This table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

<table>
<thead>
<tr>
<th>Employability Skill</th>
<th>Industry/enterprise requirements for this qualification include:</th>
</tr>
</thead>
</table>
| **Communication**   | • Use communication systems and procedures used in driving and operating a waste vehicle  
                      • Read and interpret relevant regulations, instructions, manuals, notices and signs applicable to the role of waste driving operations  
                      • Speak clearly and directly on matters related to waste driving operations  
                      • Complete documents as part of duties, including completion of relevant forms  
                      • Recognise and interpret non-verbal signs, signals and behaviour  
                      • Use relevant communication equipment. |
| **Teamwork**        | • Assist in the resolution of any interpersonal conflicts that may arise during waste driving operations.  
                      • Avoid and prevent the harassment of others in the workplace.  
                      • Collaborate with others within the job role of waste driving operations.  
                      • Work with persons of different ages, gender, race, religion, political persuasion, etc. |
| **Problem solving** | • Identify and solve or report problems arising during the job role of waste driving operations  
                      • Recognise problems that may occur in the job role of waste driving operations and take appropriate action to report or resolve the problems within limits of responsibility  
                      • Recognise hazards and risks in a range of waste driving operation situations. |
| **Initiative and enterprise** | • Respond appropriately to any changes in equipment, standard operating procedures and the working environment. |
| **Planning and organising** | • Follow and apply operational and emergency plans, systems and procedures  
                          • Comply with applicable road safety regulations and codes of practice |
Follow and apply workplace security and safety management systems and safeworking requirements
Collect and interpret information needed during waste driving operations within limits of responsibility
Manage time in the job role of waste driving operations.

Self management
- Interpret and apply applicable regulations and instructions
- Follow work plans and schedules
- Check own work performance.

Learning
- Participate in updating own knowledge and skills required for waste driving operations in response to any changes in the processes and equipment used.

Technology
- Operate equipment and tools required during waste driving operations
- Follow and apply operational and servicing instructions for equipment used during waste driving
- Follow and apply the applicable safeworking requirements and work health and safety (WHS)/occupational health and safety (OHS) procedures during waste driving operations.
Packaging Rules

Requirements for achievement of the qualification
A successful assessment outcome for a total of 19 units of competency comprising:

- 12 core units listed below

plus

- at least one licensing or industry unit relevant to the vehicle type applicable to the job role, listed below

- 6 elective units from the general elective units listed below. Alternatively up to 2 units from the TLI10 Transport and Logistic Training Package or any other nationally endorsed Training Package or accredited training course, however, the elective units selected must contribute to the vocational outcomes of the qualification and align with the job role

Where imported units are selected, care must be taken to ensure that all prerequisites specified in the unit are complied with.

TLI33513 Certificate III in Stevedoring

Modification History

Release 2. Minor edits were made to include relevant information.
Release 1. This is the first release of this qualification in TLI10 Transport and Logistics Training Package Version 4.0.

This qualification replaces but is not equivalent to TLI31510 Certificate III in Stevedoring because:

- total number of units required to achieve the qualification has been increased by 3 units from 9 units to 13 units
- 4 core units are now required
- 3 new units have been developed and added to Group E and Group F specialist elective units and the general elective units
- 4 units have been added to the specialist elective groups.

Description

*Please note RTO to insert unit group selected from the group choice below on the testamur*

Rationale:
Not Applicable.

Job roles:
The TLI33513 Certificate III in Stevedoring is aligned to the following defined roles:

- Clerical
- Crane Operations
- Equipment Controller
- Equipment Operations
- Reefer
- Team Leader.

Pathways Information

Not applicable.

Licensing/Regulatory Information

Not applicable.
Entry Requirements

Entrants to the TLI33513 Certificate III in Stevedoring must have achieved the 8 core units in the TLI21413 Certificate II in Stevedoring.
## Employability Skills Summary

### Employability Skills Summary for TLI33513 Certificate III in Stevedoring

The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. This table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

<tr>
<td></td>
<td>• Complete documents as part of duties, including relevant forms</td>
</tr>
<tr>
<td></td>
<td>• Recognise and interpret non-verbal signs, signals and behaviour</td>
</tr>
<tr>
<td></td>
<td>• Use relevant communications equipment.</td>
</tr>
<tr>
<td><strong>Teamwork</strong></td>
<td>• Assist in resolving interpersonal conflicts that may arise during operations within the Stevedoring Industry</td>
</tr>
<tr>
<td></td>
<td>• Avoid and prevent the harassment of others in the workplace</td>
</tr>
<tr>
<td></td>
<td>• Collaborate with others within job role within the Stevedoring Industry</td>
</tr>
<tr>
<td></td>
<td>• Work with persons of different ages, gender, race, religion, political persuasion.</td>
</tr>
<tr>
<td><strong>Problem solving</strong></td>
<td>• Identify and solve or report problems arising during job role within the Stevedoring Industry</td>
</tr>
<tr>
<td></td>
<td>• Recognise problems that may occur in job role of Stevedoring Industry and take appropriate action to report or resolve problems within limits of responsibility</td>
</tr>
<tr>
<td></td>
<td>• Recognise hazards and risks in a range of situations within the Stevedoring Industry.</td>
</tr>
<tr>
<td><strong>Initiative and enterprise</strong></td>
<td>• Respond appropriately to any changes in equipment, standard operating procedures and the working environment.</td>
</tr>
<tr>
<td><strong>Planning and organising</strong></td>
<td>• Apply and undertake operational and emergency plans, systems and procedures</td>
</tr>
</tbody>
</table>
- Comply with applicable road safety regulations and codes of practice
- Apply workplace security and safety management systems and safeworking requirements
- Collect and interpret information needed during driving operations within the Stevedoring Industry within limits of responsibility
- Manage time in job role within the Stevedoring Industry.

Self management
- Apply applicable regulations and instructions
- Follow work plans and schedules
- Check own work performance.

Learning
- Participate in updating own knowledge and skills required for working within the Stevedoring Industry in response to any changes in the processes and equipment used in the Stevedoring Industry.

Technology
- Operate ancillary equipment and tools required during operations within the Stevedoring Industry
- Apply operational and servicing instructions for equipment used during operations within the Stevedoring Industry
- Apply applicable safeworking requirements and work health and safety (WHS)/occupational health and safety (OHS) procedures within the Stevedoring Industry.
Packaging Rules

Requirements for achievement of the qualification
A successful assessment outcome for a total of 13 units of competency comprising:

- **4 core units** listed below

  plus

- **4 or 5 specialist elective units** from Group A, B, C, D, E or F listed below

  plus

- **4 or 5 general elective units**, which may be selected from the general elective units listed below or may include up to 2 units, which may be selected from the TLI10 Transport and Logistics Training Package or other relevant nationally endorsed Training Package or accredited course, however, the selected units must contribute to the vocational outcomes of the qualification. Selection of general elective units must not include units from the selected specialist elective group.

Where imported units are selected, care must be taken to ensure that all pre-requisites specified in the unit are complied with.

Core Units

<table>
<thead>
<tr>
<th>Field</th>
<th>Unit</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>E</td>
<td>TLI2008A</td>
<td>Process workplace documentation</td>

TLI41210 Certificate IV in Transport and Logistics (Road Transport - Car Driving Instruction)

Modification History
Release 2 - One imported unit updated to current version. Equivalent.

Description
Rationale:
A qualification for the Transport and Logistics Industry. This qualification has been structured to align with applicable car driving licensing and regulatory requirements for each state or territory. Successful completion will require competency in units that relate to work defined as aligned at AQF Level 4.
Performance of a broad range of skilled applications including requirements to evaluate and analyse current practices, develop new criteria and procedures for performing current practices, and provision of some leadership and guidance to others in the application and planning of the skills.

Pathways Information
Not Applicable

Licensing/Regulatory Information
Refer to Description
Entry Requirements

Entry requirements:

1. Possess a current, full and unrestricted Australian Car Driver Licence.

2. Fulfil all of the relevant state or territory regulatory requirements.

2. The instructor's language, literacy and numeracy skills are expected to be equivalent to level 3 of the National Reporting System, which identifies adult English language, literacy and numeracy language indicators of competence. Writing Learners (trainee instructors) will be able to communicate relationships between ideas through selecting and using grammatical structures and notations that are appropriate to the purpose. Oral Communication Learners will be able to participate in short transactions, using basic generic structures; to establish, maintain and develop relationships; explore issues and problem solve. Numeracy and Mathematics Learners will be able to select and apply a range of mathematical strategies to solve problems in a number of contexts that are familiar and may be interrelated. They will also be able to reflect on and question the rationale and appropriateness of the purpose, process and outcomes of a mathematical activity and use symbols and diagrams to communicate mathematically.

Employability Skills Summary

Employability Skills Summary for TLI41210 Certificate IV in Transport and Logistics (Road Transport - Car Driving Instruction)

The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. This table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

<table>
<thead>
<tr>
<th>Employability Skill</th>
<th>Industry/enterprise requirements for this qualification include:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Communication</td>
<td>• Establish and implement communication systems and procedures required for car driver instruction</td>
</tr>
<tr>
<td></td>
<td>• Listen to and interpret verbal information related to car driver instruction</td>
</tr>
<tr>
<td></td>
<td>• Read and interpret relevant regulations, instructions, signs and labels applicable to car driver instruction</td>
</tr>
<tr>
<td></td>
<td>• Speak clearly and directly on diverse and complex matters related to car driver instruction</td>
</tr>
<tr>
<td></td>
<td>• Write documents as part of duties, including completion of relevant forms, maintenance schedules and accident and incident reports</td>
</tr>
<tr>
<td></td>
<td>• Negotiate complex issues with others in the course of car driver instruction</td>
</tr>
</tbody>
</table>
Employability Skill

Industry/enterprise requirements for this qualification include:

- Recognise and interpret non-verbal signs, signals and behaviour
- Use relevant communication equipment.

Teamwork

- Motivate clients to practise required safe car driving behaviours
- Collaborate with others in the course of car driver instruction
- Manage the resolution of interpersonal conflicts that may arise during car driver instruction
- Manage the avoidance and prevention of harassment of others in the workplace
- Manage persons of different ages, gender, race, religion, political persuasion, etc.

Problem solving

- Identify and solve or report complex problems arising in the course of car driver instruction
- Monitor and anticipate problems that may occur in the course of car driver instruction and take appropriate action to report or resolve the problems within limits of responsibility
- Manage the control of hazards and risks in a range of complex and diverse situations that may arise during car driver instruction
- Use mathematics to solve problems, such as various calculations related to a wide range of road transport operations and related car driver instruction tasks.

Initiative and enterprise

- Modify activities dependent on differing instruction situations and contingencies
- Take appropriate initiatives in a diverse range of operational and instructional situations
- Manage response to any changes in equipment, standard operating procedures and the working environment.

Planning and organising

- Implement and monitor operational and emergency plans, systems and procedures
- Implement and monitor systems and procedures for maintaining compliance with regulations and codes of practice
- Monitor the implementation of the workplace security and safety management systems (where applicable)
- Monitor and evaluate operational performance and compliance
- Collect and interpret information needed during car driver instruction
- Organise and plan own activities
- Manage time and priorities in the course of car driver instruction.

Self management

- Interpret and apply relevant regulations and instructions
- Establish and follow own work plans and schedules
- Evaluate and monitor own work performance.
Employability Skill

Industry/enterprise requirements for this qualification include:

Learning

- Organise learning and assessment activities for clients
- Manage adaptation of clients in the workplace to any changes in road transport systems, equipment and procedures and the workplace operating environment
- Instruct, coach or mentor others in the workplace as required
- Contribute to the assessment of the competence of clients
- Adapt own competence in response to any changes in car driving instruction activities
- Update own knowledge and skills required for car driving instruction activities.

Technology

- Use equipment and systems required during car driving instruction activities
- Implement and monitor operational and maintenance procedures and systems for equipment used during car driving instruction
- Implement and monitor the application of OH&S procedures when supervising the use of car driving instruction equipment and facilities.
Packaging Rules

Requirements for completion of the qualification:

- Fulfil requirements of current existing relevant transport and logistics safety regulations prior to issuance of a Car Driving Instructor Licence
- A successful assessment outcome for a total 11 core units, comprising:

<table>
<thead>
<tr>
<th>Field</th>

TLI41310 Certificate IV in Transport and Logistics (Road Transport - Heavy Vehicle Driving Instruction)

Modification History
Not Applicable

Description
Rationale:
A qualification for the Transport and Logistics Industry. This qualification has been structured to align with applicable heavy vehicle driving licensing and regulatory requirements for each state or territory. Successful completion will require competency in units that relate to work defined as aligned at AQF Level 4. Performance of a broad range of skilled applications including requirements to evaluate and analyse current practices, develop new criteria and procedures for performing current practices, and provision of some leadership and guidance to others in the application and planning of the skills.

Pathways Information
Not Applicable

Licensing/Regulatory Information
Refer to Description
Entry Requirements

Entry requirements:

1. Possess a current, full and unrestricted Australian Light Rigid Driver Licence/Endorsement (as a minimum). Learners (trainee instructors) must hold the licence/endorsement pertinent to the relevant vehicle category being: Light Rigid, Medium Rigid, Heavy Rigid, Heavy Combination or Multi-Combination.

2. Fulfil all of the relevant state or territory regulatory requirements.

3. The instructor's language, literacy and numeracy skills are expected to be equivalent to level 3 of the National Reporting System, which identifies adult English language, literacy and numeracy language indicators of competence. Writing Learners (trainee instructors) will be able to communicate relationships between ideas through selecting and using grammatical structures and notations that are appropriate to the purpose. Oral Communication Learners will be able to participate in short transactions, using basic generic structures; to establish, maintain and develop relationships; explore issues and problem solve. Numeracy and Mathematics Learners will be able to select and apply a range of mathematical strategies to solve problems in a number of contexts that are familiar and may be interrelated. They will also be able to reflect on and question the rationale and appropriateness of the purpose, process and outcomes of a mathematical activity and use symbols and diagrams to communicate mathematically.

2. Fulfil all of the relevant state or territory regulatory requirements.
3. The instructor's language, literacy and numeracy skills are expected to be equivalent to level 3 of the National Reporting System, which identifies adult English language, literacy and numeracy language indicators of competence.

Writing Learners (trainee instructors) will be able to communicate relationships between ideas through selecting and using grammatical structures and notations that are appropriate to the purpose.

Oral Communication Learners will be able to participate in short transactions, using basic generic structures; to establish, maintain and develop relationships; explore issues and problem solve.

Numeracy and Mathematics Learners will be able to select and apply a range of mathematical strategies to solve problems in a number of contexts that are familiar and may be interrelated. They will also be able to reflect on and question the rationale and appropriateness of the purpose, process and outcomes of a mathematical activity and use symbols and diagrams to communicate mathematically.

Employability Skills Summary

Employability Skills Summary for TLI41410 Certificate IV in Transport and Logistics (Road Transport - Motorcycle Riding Instruction) (continued)

The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. This table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

<table>
<thead>
<tr>
<th>Employability Skill</th>
<th>Industry/enterprise requirements for this qualification include:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Communication</td>
<td>• Establish and implement communication systems and procedures required for rider instruction</td>
</tr>
<tr>
<td></td>
<td>• Listen to and interpret verbal information related to rider instruction</td>
</tr>
<tr>
<td></td>
<td>• Read and interpret relevant regulations, instructions, signs and labels applicable to</td>
</tr>
</tbody>
</table>
Employability Skill | Industry/enterprise requirements for this qualification include:
--- | ---
rider instruction | • Speak clearly and directly on diverse and complex matters related to rider instruction
• Write documents as part of duties, including completion of relevant forms, maintenance schedules and accident and incident reports
• Negotiate complex issues with others in the course of rider instruction
• Recognise and interpret non-verbal signs, signals and behaviour
• Use relevant communication equipment.

Teamwork | • Motivate clients to practise required safe rider behaviours
• Collaborate with others in the course of rider instruction
• Manage the resolution of interpersonal conflicts that may arise during rider instruction
• Manage the avoidance and prevention of harassment of others in the workplace
• Manage persons of different ages, gender, race, religion, political persuasion, etc.

Problem solving | • Identify and solve or report complex problems arising in the course of rider instruction
• Monitor and anticipate problems that may occur in the course of rider instruction and take appropriate action to report or resolve the problems within limits of responsibility
• Manage the control of hazards and risks in a range of complex and diverse situations that may arise during rider instruction
• Use mathematics to solve problems, such as various calculations related to a wide range of road transport operations and related rider instruction tasks.

Initiative and | • Modify activities dependent on differing instruction
### Employability Skill: Industry/enterprise requirements for this qualification include:

**Enterprise**
- situations and contingencies
  - Take appropriate initiatives in a diverse range of operational and instructional situations
  - Manage response to any changes in equipment, standard operating procedures and the working environment.

**Planning and Organising**
- Implement and monitor operational and emergency plans, systems and procedures
- Implement and monitor systems and procedures for maintaining compliance with regulations and codes of practice
- Monitor the implementation of the workplace security and safety management systems (where applicable)
- Monitor and evaluate operational performance and compliance
- Collect and interpret information needed during rider instruction
- Organise and plan own activities
- Manage time and priorities in the course of rider instruction.

**Self management**
- Interpret and apply relevant regulations and instructions
- Establish and follow own work plans and schedules
- Evaluate and monitor own work performance.

---

### TLI41410 Certificate IV in Transport and Logistics (Road Transport - Motorcycle Riding Instruction) (continued)

**Employability Skill**

**Learning**
- Organise learning and assessment activities for clients
- Manage adaptation of clients in the workplace to any changes in road transport systems, equipment and procedures and the workplace operating environment
- Instruct, coach or mentor others in the workplace as required
- Contribute to the assessment of the competence of clients
- Adapt own competence in response to any changes in riding instruction activities
Employability Skill

Industry/enterprise requirements for this qualification include:
- Update own knowledge and skills required for riding instruction activities.

Technology
- Use equipment and systems required during riding instruction activities
- Implement and monitor operational and maintenance procedures and systems for equipment used during riding instruction
- Implement and monitor the application of OH&S procedures when supervising the use of riding instruction equipment and facilities.

Packaging Rules

Requirements for completion of the qualification:
- Fulfil requirements of current existing relevant transport and logistics safety regulations prior to issuance of a Motorcycle Riding Instructor Licence/Endorsement
- A successful assessment outcome for a total 8 core units, comprising:

<tr>
<td></td>
<td>• Undertake consultation with affected and interested parties</td>
</tr>
<tr>
<td></td>
<td>• Use effective spoken and written communication.</td>
</tr>
</tbody>
</table>

| **Teamwork**        | • Ensure participation in regular meetings and forums         |
|                     | • Provide and receive feedback in a constructive manner       |
|                     | • Recognise individual differences in the workplace, value these differences and adjust own behaviour to account for these differences |
• Seek assistance to manage clients' expectations when necessary
• Use a variety of verbal and non-verbal communication techniques
• Use team work principles and strategies.

TLI41510 Certificate IV in Materiel Logistics (continued)

Employability Skill Industry/enterprise requirements for this qualification include:

Problem solving
• Analyse and probe
• Analyse, interpret and clearly define issue/s
• Apply known solutions to a variety of predictable problems
• Negotiate stakeholders’ requirements, and document and incorporate within the proposed advice
• Obtain information required and analyse in accordance with professional standards
• Represent ideas in appropriate format
• Research issue/s and seek advice of relevant personnel to clarify findings that are unclear.

Initiative and enterprise
• Apply known solutions to a variety of predictable problems
• Make notes of observations
• Voice personal view to the review process.

Planning and organising
• Calculate level of risk compared to the established risk evaluation criteria and determine it to be acceptable or unacceptable
• Identify all possible sources of risk which may impact on the situation or objectives, and record in accordance with workplace procedures and guidelines
• Identify, plan and implement logistics options
• Identify relevant policy, legislation and regulations to meet organisation information requirements
• Observe, receive and clarify circumstances that require the provision of advice.

Self management
• Apply duty of care
• Apply personal behaviour that shows sensitivity to the differences between colleagues
• Comply with professional codes of practice (as applicable) and ethical standards
• Evaluate critically an operational situation by listening, observing and clarifying information with supervisor
• Follow instructions/directives and report information.
TLI41510 Certificate IV in Materiel Logistics

Employability Skill

Industry/enterprise requirements for this qualification include:

Learning
- Learn about federal and state/territory legislation, regulations within legislation, government policy, organisation policy
- Learn about materiel logistics processes
- Learn about risk management terminology and language in accordance with relevant standards (such as risk, hazard, risk assessment, risk management and risk treatment, residual risk, treatment plans, risk evaluation criteria)
- Use procedures.

Technology
- Use appropriate information technology and software
- Use specialised information sources
- Manage data and records.

Packaging Rules

Requirements for completion of the qualification:
A successful assessment outcome for a total 17 units, comprising:
- 4 core units listed below
- 3 units from the logistics elective units listed below
- 4 units from the technical elective units listed below
- 6 general elective units which may be taken from any remaining logistics or technical elective units listed below, from the general elective units listed below, or may include up to 3 units drawn with appropriate contextualisation from Certificate IV or Diploma qualifications in this or other relevant endorsed Training Package or accredited course.

Where imported units are selected, care must be taken to ensure that all pre-requisites are complied with.

**NOTES**

BSB units have been imported from the BSB07 Business Services Training Package.
PSP units have been imported from the PSP04 Public Sector Training Package.
TLI41610 Certificate IV in International Freight Forwarding (Senior Operator)

Modification History
Release 3. This is the third release of this qualification in TLI10 Transport and Logistics Training Package Version 4.1.
In Release 3:
- TLIA4057A Analyse, advise on and carry out integrated border clearance transactions, has been superseded by TLIX4036A Analyse, advise on and carry out integrated border clearance transactions.

Description
Rationale:
This qualification is designed for international freight forwarding job roles within the International Freight Forwarding Industry. Successful completion of the qualification will require competence in units of competency that relate to the job role requirements defined as aligned at AQF Level IV.

</thead>
</table>
| **Communication**   | • Use and implement communication systems and procedures used within international freight forwarding  
|                     | • Read and interpret relevant regulations, instructions, manuals, notices and signs applicable to their role within international freight forwarding  
|                     | • Speak clearly and directly on matters related to international freight forwarding  
|                     | • Listen to and interpret verbal information related to their role in relation to the freight forwarding industry  
|                     | • Complete and check documents as part of duties, including completion of relevant forms  
|                     | • Recognise and interpret non-verbal signs, signals and behaviour  
|                     | • Use relevant communication equipment.  |
| **Teamwork**        | • Manage interpersonal conflicts that effect the operations of international freight forwarding  
|                     | • Assist in the resolution of any interpersonal conflicts that may arise during the operations of international freight forwarding  
|                     | • Avoid and prevent the harassment of others in the workplace  
|                     | • Collaborate with others in the course of the operations within international freight forwarding  
|                     | • Work with persons of different ages, gender, race, religion, political persuasion, etc.  |
| **Problem solving** | • Identify and solve or report problems arising within international freight forwarding operations  
|                     | • Recognise problems that may occur within international freight forwarding operations  |
and take appropriate action to report or resolve the problems within limits of responsibility
- Recognise hazards and risks in a range of international freight forwarding situations and take appropriate precautions.

TLI41610 Certificate IV in International Freight Forwarding (Senior Operator) (continued)

Initiative and enterprise
- Respond appropriately to any changes in equipment, standard operating procedures and the working environment
- Apply advanced product knowledge to take the initiative in completing urgent forwarding activities
- Manage complex forwarding projects using a combination of initiative, enterprise and product knowledge.

Planning and organising
- Manage operation and compliance of international freight forwarding regulations and legislative documentation
- Follow and apply operational and emergency plans, systems and procedures
- Comply with applicable customs and international freight forwarding regulations and codes of practice
- Follow and apply workplace security and safety management systems and safeworking requirements
- Collect and interpret information needed in the course of international freight forwarding within limits of responsibility
- Manage time of self and others within the job role of international freight forwarding.

Self management
- Interpret and apply applicable regulations and instructions
- Follow work plans and schedules
- Check own work performance.

Learning
- Participate in updating of own knowledge and skills required international freight forwarding, in response to any changes in the processes and equipment used in international freight forwarding.

Technology
- Operate equipment and tools required during the job role of international freight forwarding
• Follow and apply operational and servicing instructions for equipment used within international freight forwarding
• Follow and apply the applicable safeworking requirements and OH&S procedures when using international freight forwarding equipment and facilities.

Packaging Rules

Requirements for completion of the qualification:
A successful assessment outcome for a total of 13 units of competency comprising

• 6 core units listed below

TLI41710 Certificate IV in Stevedoring Operations

Modification History
Release 4 - One new unit - TLIM4004A - added to elective units. Equivalent.

Description
Rationale:
A qualification for those engaged in operational roles within a stevedoring environment. It involves a broad range of skilled applications including requirements to evaluate and analyse current practices, develop new criteria and procedure for performing current practices, and provision of some leadership and guidance to others in the application and planning of the skills. Successful completion of the licensing units within the qualification must align with applicable licensing and regulatory requirements.

Job roles:
Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:
- Stevedore Shift Foreperson
- Stevedore Charge Foreperson

</tbody>
</table>
Employability Skill | Industry/enterprise requirements for this qualification include:
--- | ---
Initiative and enterprise | - Manage the control of hazards and risks in a range of complex and diverse situations that may arise during stevedoring operations
- Use mathematics to solve problems such as various calculations related to a wide range of stevedoring operations.
- Modify activities dependent on differing stevedoring situations and contingencies
- Take appropriate initiatives in a diverse range of operational situations such as those above
- Manage the response to any changes in equipment, standard operating procedures and the working environment.
Planning and organising | - Implement and monitor operational and emergency plans, systems and procedures
- Implement and monitor systems and procedures for maintaining compliance with regulations and codes of practice
- Monitor the implementation of the workplace security and safety management systems (where applicable)
- Monitor and evaluate operational performance and compliance
- Collect and interpret information needed when supervising stevedoring operations
- Organise and plan own supervisory activities
- Manage time and priorities in the course of stevedoring operations.
Self management | - Interpret and apply relevant regulations and instructions
- Establish and follow own work plans and schedules
- Evaluate and monitor own work performance.
Learning | - Organise learning and assessment activities for others in the workplace
- Manage adaptation of others in the workplace to any changes in stevedoring systems, equipment and procedures and the workplace operating environment
- Instruct, coach or mentor others in the workplace as required
- Contribute to the assessment of the competence of others in the workplace
- Contribute to the creation of a learning environment in the workplace
- Adapt own competence in response to any changes in stevedoring operations
- Update own knowledge and skills required for stevedoring supervisory activities.
Technology | - Use complex equipment and systems required during stevedoring operations
Employability Skill | Industry/enterprise requirements for this qualification include:
--- | ---
 | • Implement and monitor operational and maintenance procedures and systems for equipment used during stevedoring operations
 | • Implement and monitor the application of OH&S procedures when supervising the use of stevedoring equipment and facilities.

TLI41810 Certificate IV in Warehousing Operations

Modification History
Release 3 - TLIM4004A added to electives. Equivalent.

Description
Rationale:
A general qualification for the Warehousing and Storage Industry. Successful completion will require competency in units that relate to work defined as aligned at AQF Level 4. Performance of a broad range of skilled applications including requirements to evaluate and analyse current practices, develop new criteria and procedure for performing current practices, and provision of some leadership and guidance to others in the application and planning of the skills.

</tbody>
</table>
Employability Skill

Industry/enterprise requirements for this qualification include:

- appropriate action to report or resolve the problems within limits of responsibility
- Manage the control of hazards and risks in a range of complex and diverse situations that may arise during warehousing operations
- Use mathematics to solve problems such as various calculations related to a wide range of warehousing operations.

Initiative and enterprise

- Modify activities dependent on differing warehousing situations and contingencies
- Take appropriate initiatives in a diverse range of operational situations such as those above
- Manage the response to any changes in equipment, standard operating procedures and the working environment.

Planning and organising

- Implement and monitor operational and emergency plans, systems and procedures
- Implement and monitor systems and procedures for maintaining compliance with regulations and codes of practice
- Monitor the implementation of the workplace security and safety management systems (where applicable)
- Monitor and evaluate operational performance and compliance
- Collect and interpret information needed when supervising warehousing operations
- Organise and plan own supervisory activities
- Manage time and priorities in the course of warehousing operations.

Self management

- Interpret and apply relevant regulations and instructions
- Establish and follow own work plans and schedules
- Evaluate and monitor own work performance.

Learning

- Organise learning and assessment activities for others in the workplace
- Manage adaptation of others in the workplace to any changes in warehousing and storage systems, equipment and procedures and the workplace operating environment
- Instruct, coach or mentor others in the workplace as required
- Contribute to the assessment of the competence of others in the workplace
- Assist in creating a learning environment in the workplace
- Adapt own competence in response to any changes in warehousing operations
- Update own knowledge and skills required for warehousing supervisory activities.

Technology

- Use complex equipment and systems required during
Employability Skill

• Manage the response to any changes in equipment, standard operating procedures and the working environment.

**Planning and organising** | • Implement and monitor operational and emergency plans, systems and procedures
• Implement and monitor systems and procedures for maintaining compliance with regulations and codes of practice
• Monitor the implementation of the workplace security and safety management systems (where applicable)
• Monitor and evaluate operational performance and compliance
• Collect and interpret information needed when supervising mobile cranes operations
• Organise and plan own supervisory activities
• Manage time and priorities in the course of mobile cranes operations.

**Self management** | • Interpret and apply relevant regulations and instructions
• Establish and follow own work plans and schedules
• Evaluate and monitor own work performance.

**Learning** | • Organise learning and assessment activities for others in the workplace
• Manage adaptation of others in the workplace to any changes in mobile cranes systems, equipment and procedures and the workplace operating environment
• Instruct, coach or mentor others in the workplace as required
• Contribute to the assessment of the competence of others in the workplace
Employability Skill

Industry/enterprise requirements for this qualification include:

- Assist in creating a learning environment in the workplace
- Adapt own competence in response to any changes in mobile cranes operations
- Update own knowledge and skills required for mobile cranes supervisory activities.

Technology

- Use complex equipment and systems required during mobile cranes operations
- Implement and monitor operational and maintenance procedures and systems for equipment used during mobile cranes operations
- Implement and monitor the application of OH&S procedures when supervising the use of mobile cranes and related equipment.

Packaging Rules

Requirements for completion of the qualification:
A successful assessment outcome for a total of 18 units of competency comprising:

- 8 core units listed below
- 2 core high risk licence units and 1 elective high risk work license unit, listed below
- 7 elective units which may be taken from the elective units listed below, or may include up to 3 imported units which may be selected from qualifications at the same level or one higher in this Training Package or any other endorsed Training Package or accredited course.

Requirements for completion of units within this qualification:
Where imported units are selected care must be taken to ensure that all pre-requisites specified in the unit are complied with.

The following units have pre-requisite:

- CPCCCM2010B Work safely at heights
- CPCCCM3003A Work safely around power sources, services and assets
- CPCCLRIG3002A Licence to perform rigging intermediate level
- HLTFA412A Apply advanced first aid

Licensing requirements will apply to this unit of competency depending on the regulatory requirements of each jurisdiction.
- CPCCOHS1001A Work safely in the construction industry

Requirements for completion of HRW license units within this qualification:
To comply with the National Standards for High Risk Work there is a requirement to complete the high risk work license for TLILIC3006A Licence to operate a non slewing mobile crane (greater than 3 tonnes capacity) before commencing the selected slewing mobile crane license unit.
Completion of the licensing units is a requirement; however applying for a high risk work license for TLILIC3006A Licence to operate a non slewing mobile crane (greater than 3 tonnes capacity) is not a requirement if the selected mobile slewing crane licence is being applied for as this licence covers the TLILIC3006A Licence to operate a non slewing mobile crane.

### Employability Skills Summary for TLI42010 Certificate IV in Logistics

The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. This table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

<table>
<thead>
<tr>
<th>Employability Skill</th>
<th>Industry/enterprise requirements for this qualification include:</th>
</tr>
</thead>
</table>
| **Communication**   | • Establish and implement communication systems and procedures required for activities involved in the transport and logistics industry  
                      • Listen to and interpret verbal information related to activities particularly when clarifying and confirming work requirements and receiving operational feedback  
                      • Read and interpret relevant work requirements, policies, procedures, applicable to activities involved in transport and logistics industry  
                      • Speak clearly and directly on diverse and complex matters when sharing data, requirements and procedures relevant to operations, communicating operational details to internal and external stakeholders and providing support and feedback to others  
                      • Write documents to audience needs as part of duties, including when preparing risk assessment and plans, communicating with internal and external stakeholders, contributing to the documentation of specifications and tenders, and preparing information to contribute to technical reports  
                      • Share information when preparing and obtaining necessary resources, to manage work activities and to ensure understanding of objectives and work plans  
                      • Responsibly negotiate complex issues with others to resolve conflicts and to obtain the resources necessary to achieve objectives  
                      • Use numeracy effectively to understand operational and costing data, to perform calculations and to contribute to estimates of resource requirements  
                      • Recognise and interpret non-verbal signs, signals and behaviour  
                      • Establish and use networks involvement in business or professional networks and to build relationships to provide benefits for the team and organisation. |
| **Teamwork**        | • Work as an individual and a team member in a range of situations when planning and conducting operations, maintaining strong working relationships, ensuring safety, coordinating activities and resolving conflicts within team |
Employability Skill

Industry/enterprise requirements for this qualification include:

- Provide leadership to staff
- Motivate others in the workplace
- Collaborate with others in the course of activities involved in the transport and logistics industry
- Define a role as part of a team including identifying the strengths of team members, understanding relationships between team members and understanding the roles and relationship between and among manager, team leaders, supervisors, etc.
- Manage the avoidance and prevention of harassment of others in the workplace
- Work with persons of different ages, gender, race, religion, political persuasion, etc.

Problem solving

- Develop practical solutions for problems arising in the course of activities including assessing hazards and ensuring there are plans or processes to manage identified risks, monitoring issues which arise in the course of operations and adjust activities and to creating, implementing and applying risk management systems
- Monitor and anticipate problems that may occur in the course of activities involved in the transport and logistics industry including hazards and risks and take appropriate action to report or resolve the problems within limits of responsibility
- Solve problems in teams including allocating roles and responsibilities in response to changes in environment or circumstances, coordinating requirements and issues, and evaluating and monitoring performance
- Show independence and initiative in identifying problems and solving them
- Resolve customer concerns in relations to complex project issues including resolving contract issues, meeting quality requirements and meeting deadlines.

Initiative and enterprise

- Modify activities dependent on differing work situations and contingencies
- Take appropriate initiatives in a diverse range of operational situations such as those above
- Recognise and respond to changes in internal an external operating environments
- Contribute to and manage continuous improvement processes
- Be creative in approaches to change and innovation, in response to conflicts in coordination and allocation of resources and in both in encouraging input from staff and interactions between and amongst staff and teams
- Value input from staff
Employability Skill

Industry/enterprise requirements for this qualification include:

- Manage the response to any contingencies and changes in equipment, standard operating procedures and the working environment.
- Implement and monitor operational and emergency plans, systems and procedures
- Allocate people and other resources to tasks including adapting allocations to cope with contingencies, delegating tasks and responsibilities to capable staff and clearly defining responsibilities
- Prepare scope of work and work plans for self and team members
- Implement and monitor systems and procedures for maintaining compliance with regulations and codes of practice
- Monitor the implementation of the workplace security and safety management systems (where applicable)
- Monitor, evaluate and report on operational performance and compliance
- Collect, analyse, interpret and organise information needed when supervising activities involved in the transport and logistics industry
- Be resourceful in planning for and assessing risk
- Ensure feedback and other data contribute to improvements in operational effectiveness
- Manage time and priorities in the course of activities involved in the transport and logistics industry.

Planning and organising

- Interpret and apply relevant regulations and instructions
- Establish and follow own work plans and schedules
- Evaluate and monitor own work performance
- Take responsibility for meeting own objectives
- Have confidence in own vision and goals
- Develop trust and confidence in staff and customers
- Maintain effective networks.

Self management

- Organise learning and assessment activities for others in the workplace
- Manage adaptation of self and others in the workplace to any changes in systems, equipment and procedures and the workplace operating environment
- Be open to new ideas and change and in particular facilitate and support change processes with staff and apply previous experience and feedback in formulating improvements to practice
- Provide opportunities for instruction, coaching and mentoring others in the workplace as required

Learning
### Employability Skill

**Industry/enterprise requirements for this qualification include:**

- Contribute to the assessment of the competence of others in the workplace
- Contribute to the creation of a learning community in the workplace
- Adapt own competence in response to any changes in activities involved in the transport and logistics industry
- Update own knowledge and skills required for activities involved in the transport and logistics industry.

### Technology

- Use complex equipment and IT systems required during activities involved in the transport and logistics industry
- Apply a range of basic IT skills
- Use IT to organise and access data including the monitoring of logistics processes, the tracking of items and the recording and reporting of system status
- Applying IT as a management tool to store and organise data
- Implement and monitor operational and maintenance procedures and systems for equipment used during activities involved in the transport and logistics industry
- Implement and monitor the application of OH&S procedures when using IT and office equipment and facilities.
Packaging Rules

Requirements for completion of the qualification:
A successful assessment outcome for a total of 14 units of competency comprising:

- 1 core unit listed below

plus

- 7 technical elective units from the selected list below

plus

- 6 elective units which may be taken from the elective units listed below, the remaining technical elective units listed below, or may include up to 3 units drawn with appropriate contextualisation from this Training Package, and/or other relevant nationally endorsed Training Package or accredited course.

Where imported units are selected, care must be taken to ensure that all pre-requisites specified are complied with.

Core unit:

### Field

#### Customer Service
- **Field Unit**: TLII4001A Coordinate quality customer service

#### Resource Management
- **Field Unit**: TLIL4030A Control furniture warehouse
- **Field Unit**: TLIL4070A Work effectively in the transport and logistics industry
- **Field Unit**: TLIL4078A Coordinate fleet control logistics

#### Administration and Finance
- **Field Unit**: TLIP4003A Implement, maintain and evaluate dangerous goods transport procedures within the workplace
- **Field Unit**: TLIP4013A Implement and monitor logistics planning process
- **Field Unit**: TLIP4038A Monitor a supply chain operation
- **Field Unit**: TLIP4039A Monitor transport operations
- **Field Unit**: TLIP4040A Monitor warehouse operations

#### Contract Procurement
- **Field Unit**: TLIR4001A Monitor supplier performance
- **Field Unit**: TLIR4002A Source goods/services and evaluate contractors
- **Field Unit**: TLIR4003A Negotiate a contract
- **Field Unit**: TLIR4008A Implement and supervise stocktaking procedures
- **Field Unit**: TLIR4009A Implement purchasing systems
- **Field Unit**: TLIR4010A Plan purchasing
- **Field Unit**: TLIR4012A Conduct international purchasing
- **Field Unit**: PSPPROC411A Plan procurement

#### Environment
- **Field Unit**: TLIU3011A Implement and monitor environmentally sustainable work practices

### Elective units:

#### Handling Cargo/Stock
- **Field Unit**: TLIA4005A Check and evaluate records and documentation

#### Load Handling
- **Field Unit**: TLID1001A Shift materials safely using manual handling methods

TLI4211 Certificate IV in Driving Operations

Modification History
Release 3. This is the third release of this qualification in TLI10 Transport and Logistics Training Package Version 4.0.
In Release 3:
- 5 units have been added to the licensing or industry units list
- 1 unit has been removed from the general elective units
- 1 unit has been added to the general elective units.

This release is equivalent to the previous release.

Description
Please note RTO to insert unit group selected from the group choice below on the testamur

Rationale:
This is a qualification for driving operation job roles in the transport and distribution industry. Successful completion of the qualification will require competence in units of competency that relate to the job role requirements defined as aligned at AQF level 4. Successful completion of the licensing unit in the qualification must align with licensing and regulatory requirements applicable to driving and state or territory regulatory requirements.

Job roles:
The TLI42111 Certificate IV in Driving Operations qualification is aligned to the following defined roles:
Group A: Driving Operations – Fuel Tanker
- Fuel tanker driver

Group B: Driving Operations – LP Gas Tanker
- LP gas tanker driver

Group C: Driving Operations – Chemical Tanker
- Chemical tanker driver

Group D: Driving Operations – Heavy Recovery
- Heavy recovery driver

Pathways Information
Not applicable.

**Licensing/Regulatory Information**

Refer to Description.

**Entry Requirements**

Not applicable.
### Employability Skills Summary

**Employability Skills Summary for TLI42511 Certificate IV in Traffic Operations**

The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. This table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

<table>
<thead>
<tr>
<th>Employability Skill</th>
<th>Industry/enterprise requirements for this qualification include:</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Communication</strong></td>
<td>• Use communication systems and procedures used in driving in the road transport industry</td>
</tr>
<tr>
<td></td>
<td>• Communicate effectively with customers and regulators</td>
</tr>
<tr>
<td></td>
<td>• Read, interpret and understand regulations, instructions, manuals, notices and signs applicable to role of driving operations in the road transport industry</td>
</tr>
<tr>
<td></td>
<td>• Speak clearly and directly on matters related to driving operations in the road transport industry</td>
</tr>
<tr>
<td></td>
<td>• Complete documents as part of duties, including completing relevant forms</td>
</tr>
<tr>
<td></td>
<td>• Recognise and interpret non-verbal signs, signals and behaviour</td>
</tr>
<tr>
<td></td>
<td>• Use relevant communication equipment</td>
</tr>
<tr>
<td><strong>Teamwork</strong></td>
<td>• Assist in the resolution of interpersonal conflicts that may arise during driving operations in the road transport industry</td>
</tr>
<tr>
<td></td>
<td>• Avoid and prevent the harassment of others in the workplace</td>
</tr>
<tr>
<td></td>
<td>• Collaborate with others in the job role of driving operations in the road transport industry</td>
</tr>
<tr>
<td></td>
<td>• Work with persons of different ages, gender, race, religion, political persuasion, etc.</td>
</tr>
<tr>
<td><strong>Problem solving</strong></td>
<td>• Identify and solve or report problems arising during the job role of driving operations in the road transport industry</td>
</tr>
<tr>
<td></td>
<td>• Recognise problems that may occur in the job role of driving operations in the road transport industry and take appropriate action to report or resolve them within limits of responsibility</td>
</tr>
<tr>
<td></td>
<td>• Recognise hazards and risks in a range of driving operation situations in the road transport industry</td>
</tr>
<tr>
<td><strong>Initiative and enterprise</strong></td>
<td>• Respond appropriately to changes in equipment, standard operating procedures and the work environment</td>
</tr>
<tr>
<td><strong>Planning and organising</strong></td>
<td>• Apply and undertake operational and emergency plans, systems and procedures</td>
</tr>
<tr>
<td></td>
<td>• Comply with applicable road safety regulations and codes of practice</td>
</tr>
</tbody>
</table>
- Apply and undertake workplace security, safety management systems and safeworking requirements
- Collect and interpret information needed during driving operations in the road transport industry within limits of responsibility
- Manage time in the job role of driving operations in the road transport industry

**Self management**
- Apply and undertake applicable regulations and instructions
- Follow work plans and schedules
- Check own work performance

**Learning**
- Participate in updating own knowledge and skills required for driving operations and working in the road transport industry, in response to changes in the processes and equipment used in the road transport industry

**Technology**
- Operate ancillary equipment and tools required during driving operations in the road transport industry
- Apply operational and servicing instructions for equipment used during driving operations in the road transport industry
- Apply and undertake applicable safeworking requirements and WHS/OHS procedures during driving operations in the road transport industry
Packaging Rules

Requirements for completion of the qualification
A successful assessment outcome for a total of 10 to 12 units of competency (depending on the specialist group chosen), comprising:

- **3 core units** listed below
  
  plus
  
  - **at least 1 licensing or industry unit** listed below relevant to the vehicle type applicable to the job role
  
  plus
  
  - **all units in one specialist elective group** listed below (job roles): A, B, C or D
  
  plus
  
  - **5 general elective units** which may be taken from the general elective units listed below, or may consist of up to 2 units drawn with appropriate contextualisation from qualifications at the same level or one higher in this Training Package or any other currently endorsed national Training Package or accredited course.

Where imported units are selected care must be taken to ensure that all prerequisites specified in the unit are complied with.

Core Units

TLI42211 Certificate IV in Rail Network Control

Modification History
Release 2 - One imported unit updated to current version. Equivalent.
Release 1 - New qualification.

Description
Rationale:
This is a qualification for a person engaged in the control of rail networks. The job entails the performance of a broad range of skilled applications, including high-level decision making processes, evaluating and analysing current practices, developing new criteria and procedures for performing current practices, and providing leadership and guidance to others in the application of the skills and knowledge.

Job roles:
Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:
- Train controller
- Network controller
- Area controller.

Pathways Information
Not applicable.

Licensing/Regulatory Information
Not applicable.

Entry Requirements
Not applicable.
Employability Skills Summary

Employability Skills Summary for TLI42211 Certificate IV in Rail Network Control

The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. The table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

Employability Skill  Industry/enterprise requirements for this qualification include:

Communication
- Establish and implement communication systems and procedures required for rail operations
- Listen to and interpret verbal information related to controlling rail networks
- Read and interpret relevant regulations, instructions, signs and labels applicable to rail operations
- Speak clearly and directly on diverse and complex matters related to controlling rail networks
- Write documents as part of duties, including completing relevant forms, maintenance schedules, and accident and incident reports
- Negotiate complex issues with others in the course of controlling rail networks
- Recognise and interpret non-verbal signs, signals and behaviour
- Use relevant communication equipment

Teamwork
- Provide leadership to rail operations personnel
- Motivate others in the workplace
- Collaborate with others in the course of controlling rail networks
- Manage the resolution of interpersonal conflicts that may arise when controlling rail networks
- Manage the avoidance and prevention of harassment of others in the workplace
- Manage persons of different ages, gender, race, religion, political persuasion, etc.

Problem solving
- Identify and solve or report complex problems arising in the course of controlling rail networks
- Monitor and anticipate problems that may occur in the course of controlling rail networks, including hazards and risks, and take appropriate action to report or resolve them within limits of responsibility
- Manage the control of hazards and risks in a range of complex and diverse situations that may arise when controlling rail networks
- Use mathematics to solve problems, such as various calculations related to a wide range of rail operations
Initiative and enterprise

- Modify activities dependent on differing situations and contingencies when controlling rail networks
- Take appropriate initiative in a diverse range of operational situations
- Manage the response to changes in equipment, standard operating procedures and the work environment

Planning and organising

- Implement and monitor operational and emergency plans, systems and procedures
- Implement and monitor systems and procedures for maintaining compliance with regulations and codes of practice
- Monitor the implementation of the rail security and safety management systems, where applicable
- Monitor and evaluate operational performance and compliance
- Collect and interpret information needed when controlling rail networks
- Organise and plan own activities
- Manage time and priorities in the course of controlling rail networks

Self management

- Interpret and apply relevant regulations and instructions
- Establish and follow own work plans and schedules
- Evaluate and monitor own work performance

Learning

- Assist in the organisation of learning and assessment activities for others in the workplace
- Manage adaptation of others in the workplace to changes in rail systems, equipment and procedures and the workplace operating environment
- Instruct, coach or mentor others in the workplace as required
- Contribute to the assessment of competence of others in the workplace
- Assist in creating a learning environment in the workplace
- Adapt own competence in response to changes in rail operations
- Update own knowledge and skills required for network control activities

Technology

- Use complex equipment and systems required when controlling rail networks
- Implement and monitor operational and maintenance procedures and systems for equipment used when controlling rail networks
- Implement and monitor the application of OH&S procedures when using rail equipment and facilities
Packaging Rules

Requirements for completion of the qualification:
A successful assessment outcome for a total of **15 units** of competency comprising:

- **10 core** units listed below

plus

- **5 elective units** from the elective units listed below, which may include up to 3 units drawn with appropriate contextualisation from any currently endorsed national Training Package or accredited course, provided that the units contribute to the vocational outcome of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisites specified in the unit are complied with.

TLI42311 Certificate IV in Rail Infrastructure

Modification History
New qualification.

Description

Please note RTO to insert unit group selected from the group choice below on the testamur
Rationale:
This is a qualification for a person engaged in the provision of infrastructure construction and/or maintenance activities on rail networks. The job entails the performance of a broad range of skilled applications, including high-level decision making process, evaluating and analysing current practices, developing new criteria and procedures for performing current practices, and providing leadership and guidance to others in the application of the skills and knowledge.

Job roles:
This qualification is suitable for a variety of job roles in the fields of:
Rail Track Working, Rail Track Surfacing or Rail Structures
Job roles and titles vary across different sectors. Possible job titles relevant to the listed fields include:
- Special ganger
- Leading hand
- Team leader
- Work group leader
- Supervisor
- Possession officer

Track Protection
Possible job titles relevant to this field include:
- Principal protection officer (PPO)

Pathways Information
Not applicable.

Licensing/Regulatory Information
Not applicable.
Entry Requirements

The entry requirement for this qualification is successful completion of one of the following:

- TLI31811 Certificate III in Rail Track Surfacing
- TLI31911 Certificate III in Mechanical Rail Signalling
- TLI32111 Certificate III in Rail Structures
- TLI32511 Certificate III in Rail Infrastructure
- TLI32711 Certificate III in Track Protection
- relevant industry experience gained by working in the rail infrastructure environment.

Employability Skills Summary

Employability Skills Summary for TLI42311 Certificate IV in Rail Infrastructure

The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. The table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

### Employability Skill

#### Industry/enterprise requirements for this qualification include:

**Communication**
- Establish and implement communication systems and procedures required for construction and/or maintenance operations on rail infrastructure
- Listen to and interpret verbal information related to construction and/or maintenance operations on rail infrastructure
- Read and interpret relevant regulations, instructions, signs and labels applicable to construction and/or maintenance operations on rail infrastructure
- Speak clearly and directly on diverse and complex matters related to construction and/or maintenance operations on rail infrastructure
- Write documents as part of duties, including completing relevant forms, maintenance schedules, and accident and incident reports
- Negotiate complex issues with others in the course of construction and/or maintenance operations on rail infrastructure
- Recognise and interpret non-verbal signs, signals and behaviour
- Use relevant communication equipment

**Teamwork**
- Provide leadership to rail operations personnel
- Motivate others in the workplace
- Collaborate with others in the course of construction and/or maintenance operations on rail infrastructure
- Manage the resolution of interpersonal conflicts that may arise when involved in the construction and/or maintenance operations on rail infrastructure
• Manage the avoidance and prevention of harassment of others in the workplace
• Manage persons of different ages, gender, race, religion, political persuasion, etc.

**Problem solving**
• Identify and solve or report complex problems arising in the course of construction and/or maintenance operations on rail infrastructure
• Monitor and anticipate problems that may occur in the course of construction and/or maintenance operations on rail infrastructure, including hazards and risks, and take appropriate action to report or resolve them within limits of responsibility
• Manage the control of hazards and risks in a range of complex and diverse situations that may arise during construction and/or maintenance operations on rail infrastructure
• Use mathematics to solve problems, such as various calculations related to a wide range of rail activities

**Initiative and enterprise**
• Modify activities dependent on differing situations and contingencies during construction and/or maintenance operations on rail infrastructure
• Take appropriate initiative in a diverse range of operational situations
• Manage the response to changes in equipment, standard operating procedures and the work environment

**Planning and organising**
• Implement and monitor operational and emergency plans, systems and procedures
• Implement and monitor systems and procedures for maintaining compliance with regulations and codes of practice
• Monitor the implementation of the rail security and safety management systems, where applicable
• Monitor and evaluate operational performance and compliance during construction and/or maintenance operations on rail infrastructure
• Collect and interpret information needed during construction and/or maintenance operations on rail infrastructure
• Organise and plan own activities
• Manage time and priorities in the course of construction and/or maintenance operations on rail infrastructure

**Self management**
• Interpret and apply relevant regulations and instructions
• Establish and follow own work plans and schedules
• Evaluate and monitor own work performance

**Learning**
• Organise learning and assessment activities for others in the workplace
• Manage adaptation of others in the workplace to changes in rail systems, equipment and procedures and the workplace environment
• Instruct, coach or mentor others in the workplace as required
• Contribute to the assessment of competence of others in the workplace
• Assist in creating a learning environment in the workplace
• Adapt own competence in response to changes in rail operations
• Update own knowledge and skills required for network control activities
Technology

- Use complex equipment and systems required during construction and/or maintenance operations on rail infrastructure
- Implement and monitor operational and maintenance procedures and systems for equipment used during construction and/or maintenance operations on rail infrastructure
- Implement and monitor the application of OH&S procedures when using rail equipment and facilities
Packaging Rules

Requirements for completion of the qualification:
A successful assessment outcome for a total of 13 units of competency comprising:

8 core units listed below

plus

- 3 specialist elective units in Group A or Group B below

plus

- 2 general elective units from the elective units listed below, or drawn with appropriate contextualisation from any currently endorsed national Training Package or accredited course, provided that the unit contributes to the vocational outcome of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisites specified in the unit are complied with.

Core units:

TLI42413 Certificate IV in Rail Safety Management

Modification History
Release 1 - This is the first release of this qualification in TLI10 Transport and Logistics Training Package Version 3.0.

Description
Rationale:
This is a general qualification for the management of safety within the rail industry. Successful completion of this qualification requires demonstration of a broad range of skilled applications within the rail safety environment. It also requires the skills and knowledge to evaluate and analyse current practices; develop new criteria and procedures, and provide some leadership and guidance to others in their application.

Job roles:
The TLI42413 Certificate IV in Rail Safety Management is aligned to the following defined role:

- Rail Safety Manager.

Use mathematics to solve problems such as various calculations related to a wide range of rail operations.

Modify activities dependent on differing rail situations and contingencies.

Take appropriate initiatives in a diverse range of operational situations such as those above.

Manage the response to any changes in equipment, standard operating procedures and the working environment.

Implement and monitor operational and emergency plans, systems and procedures.

Implement and monitor systems and procedures for maintaining compliance with regulations and codes of practice.

Monitor the implementation of the rail security and safety management systems (where applicable).

Monitor and evaluate operational performance and compliance.

Collect and interpret information needed when supervising rail safety management activities.

Organise and plan own supervisory activities.

Manage time and priorities in the course of rail safety management activities.

Interpret and apply relevant regulations and instructions.

Establish and follow own work plans and schedules.

Evaluate and monitor own work performance.

Organise learning and assessment activities for others in the workplace.

Manage adaptation of others in the workplace to any changes in rail systems, equipment and procedures and the workplace operating environment.

Instruct, coach or mentor others in the workplace as required.

Contribute to the assessment of the competence of others in the workplace.

Assist in creating a learning environment in the workplace.

Adapt own competence in response to any changes in safety management requirements.

Update own knowledge and skills required for rail safety management activities.

Use complex equipment and systems required during rail safety management activities.

Implement and monitor operational and maintenance procedures and systems for equipment as part of rail safety management activities.

Implement and monitor the application of OH&S procedures.
when supervising the use of rail equipment and facilities.

TLI42513 Certificate IV in Traffic Operations

Modification History
Release 1 - This is the first release of this qualification in TLI10 Transport and Logistics Training Package Version 3.0.

Description

Rationale:
This qualification is designed for traffic operations job roles within the transport and logistics industry. Successful completion of the qualification will require competence in units of competency that relate to the job role requirements defined as aligned at AQF Level IV.

Job roles:
The TLI42513 Certificate IV in Traffic Operations qualification is aligned to the following defined roles:

- Tunnel Road Operator
- Open Road Operator.

Pathways Information
Not applicable.

Licensing/Regulatory Information
Not applicable.

Entry Requirements

</table>
| **Communication**   | • Use communication systems and procedures used within the Traffic Operations industry  
                      • Communicate effectively with customers and regulators  
                      • Read and interpret and understand regulations, instructions, manuals, notices and signs applicable to their role within the Traffic Operations industry  
                      • Speak clearly and directly on matters related to operating within the Traffic Operations industry  
                      • Complete documents as part of duties, including completion of relevant forms  
                      • Recognise and interpret non-verbal signs, signals and behaviour  
                      • Use relevant communication equipment. |
| **Teamwork**        | • Assist in the resolution of any interpersonal conflicts that may arise during operations within the Traffic Operations industry  
                      • Avoid and prevent the harassment of others in the workplace  
                      • Collaborate with others within the job role within the Traffic Operations industry  
                      • Work with persons of different ages, gender, race, religion, political persuasion, etc. |
| **Problem solving** | • Identify and solve or report problems arising during the job role within the Traffic Operations industry  
                      • Recognise problems that may occur in the job role of Traffic Operations industry and take appropriate action to report or resolve the problems within limits of responsibility  
                      • Recognise hazards and risks in a range of situations within the Traffic Operations industry. |
| **Initiative and enterprise** | • Respond appropriately to any changes in equipment, standard operating procedures and the working environment |
| **Planning and organising** | • Apply and undertake operational and emergency plans, systems and procedures  
                               • Comply with applicable road safety regulations and codes of practice  
                               • Apply and undertake workplace security and safety |
management systems and safeworking requirements

- Collect and interpret information needed during driving operations within the Traffic Operations industry within limits of responsibility
- Manage time in the job role within the Traffic Operations industry.

Self management

- Apply and undertake applicable regulations and instructions
- Follow work plans and schedules
- Check own work performance.

Learning

- Participate in updating of own knowledge and skills required for working within the Traffic Operations industry, in response to any changes in the processes and equipment used in the Traffic Operations industry.

Technology

- Operate ancillary equipment and tools required during operations within the Traffic Operations industry
- Apply operational and servicing instructions for equipment used during operations within the Traffic Operations industry
- Apply and undertake the applicable safeworking requirements and OH&S procedures within the Traffic Operations industry.
Packaging Rules

Requirements for completion of the qualification
A successful assessment outcome for a total of 14 units of competency comprising:

- 7 core units listed below
  
- all units within Group A or Group B as listed below
  
- 2 elective units which may be taken from the general elective units listed below.
  Alternatively, up to 2 units appropriate to the job role may be drawn from a Certificate III, Certificate IV or Diploma qualifications in this Training Package or other relevant nationally endorsed Training Package or accredited course.

Where imported units are selected, care must be taken to ensure that all prerequisites specified in the unit are complied with.

TLI42613 Certificate IV in Train Driving

Modification History

Release 1. This is the first release of this qualification in TLI10 Transport and Logistics Training Package Version 4.0.

Description

Rationale:
This is a general qualification for a person engaged in driving a train.

Achievement of this qualification requires the application of a broad range of specialised knowledge and skills in varied contexts to undertake skilled work within a train driving environment.

This qualification requires the skills and knowledge to:

- identify, analyse, compare and act on information from a range of sources
- apply and communicate technical solutions of a non-routine or contingency nature to a defined range of predictable and unpredictable problems
- guide activities and provide technical advice in the area of work.

These skills and knowledge will be applied to specialised tasks or functions in known or changing contexts with responsibility for own functions and outputs.

Job roles:
The TLI42613 Certificate IV in Train Driving qualification is aligned to the following defined roles:

- Electric Passenger Train Driver
- Freight Train Driver
- Heavy Haul Train Driver
- Locomotive Driver
- Train Driver.

Pathways Information

<td>• Implement and monitor operational and emergency plans,</td>
</tr>
</tbody>
</table>
organising systems and procedures
- Implement and monitor systems and procedures for maintaining compliance with regulations and codes of practice
- Monitor and evaluate operational performance and compliance
- Organise and plan own supervisory activities
- Manage time and priorities in the course of train driving activities.

Self management
- Interpret and apply relevant regulations and instructions
- Establish and follow own work plans and schedules
- Evaluate and monitor own work performance.

Learning
- Instruct, coach or mentor others in the workplace as required
- Contribute to the assessment of the competence of others in the workplace
- Assist in creating a learning environment in the workplace
- Adapt own competence in response to any changes in rail operations
- Update own knowledge and skills required for rail supervisory activities.

Technology
- Use complex equipment and systems required during train driving activities
- Implement and monitor operational and maintenance procedures and systems for equipment used during train driving activities
- Implement and monitor the application of WHS/OHS procedures when supervising the use of rail equipment and facilities.
Packaging Rules

Requirements for achievement of the qualification
A successful assessment outcome for a total of 21 units of competency comprising:

- 13 core units

plus

- 5 specialist elective units from Group A, B, C, D or E

plus

at least 3 general elective units which may be selected from the general elective units listed below, units not selected from Group A, B, C, D or E or alternatively, up to 2 units appropriate to the job role may be selected from the TLI10 Transport and Logistics Training Package or other relevant nationally endorsed Training Package or accredited course.

Where imported units are selected, care must be taken to ensure that all prerequisites specified in the unit are complied with.

TLI42713 Certificate IV in Tram/Light Rail Control

Modification History
Release 1. This is the first release of this qualification in TLI10 Transport and Logistics Training Package Version 4.0.

Description
Rationale:
This is a qualification for a person engaged in the control of tram/light rail networks. The job entails performing a broad range of skilled applications, including high-level decision making-processes, evaluating and analysing current practices, developing new criteria and procedures for performing current practices, and providing leadership and guidance to others in the application of the skills and knowledge.

Job roles:
- Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:
  - Light Rail Controller
  - Tram Controller.

Pathways Information
Not applicable.

Licensing/Regulatory Information
Not applicable.

Entry Requirements
Not applicable.
## Employability Skills Summary

### Employability Skills Summary for TL42713 Certificate IV in Tram/Light Rail Control

The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. This table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

<table>
<thead>
<tr>
<th>Employability Skill</th>
<th>Industry/enterprise requirements for this qualification include:</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Communication</strong></td>
<td>• Establish and implement communication systems and procedures required for tram/light rail operations</td>
</tr>
<tr>
<td></td>
<td>• Listen to and interpret verbal information related to controlling rail networks</td>
</tr>
<tr>
<td></td>
<td>• Read and interpret relevant regulations, instructions, signs and labels applicable to tram/light rail operations</td>
</tr>
<tr>
<td></td>
<td>• Speak clearly and directly on diverse and complex matters related to controlling tram/light rail networks</td>
</tr>
<tr>
<td></td>
<td>• Write documents as part of duties, including completing relevant forms, maintenance schedules, and accident and incident reports</td>
</tr>
<tr>
<td></td>
<td>• Negotiate complex issues with others in the course of controlling tram/light rail networks</td>
</tr>
<tr>
<td></td>
<td>• Recognise and interpret non-verbal signs, signals and behaviour</td>
</tr>
<tr>
<td></td>
<td>• Use relevant communication equipment</td>
</tr>
<tr>
<td><strong>Teamwork</strong></td>
<td>• Provide leadership to tram/light rail operations personnel</td>
</tr>
<tr>
<td></td>
<td>• Motivate others in the workplace</td>
</tr>
<tr>
<td></td>
<td>• Collaborate with others in the course of controlling tram/light rail networks</td>
</tr>
<tr>
<td></td>
<td>• Manage the resolution of interpersonal conflicts that may arise when controlling tram/light rail networks</td>
</tr>
<tr>
<td></td>
<td>• Manage the avoidance and prevention of harassment of others in the workplace</td>
</tr>
<tr>
<td></td>
<td>• Manage persons of different ages, gender, race, religion, political persuasion, etc.</td>
</tr>
<tr>
<td><strong>Problem solving</strong></td>
<td>• Identify and solve or report complex problems arising in the course of controlling tram/light rail networks</td>
</tr>
<tr>
<td></td>
<td>• Monitor and anticipate problems that may occur in the course of controlling tram/light rail networks, including hazards and risks, and take appropriate action to report or resolve them within limits of responsibility</td>
</tr>
<tr>
<td></td>
<td>• Manage the control of hazards and risks in a range of complex and diverse situations that may arise when controlling</td>
</tr>
</tbody>
</table>
tram/light rail networks

- Use mathematics to solve problems, such as various calculations related to a wide range of tram/light rail operations

**Initiative and enterprise**

- Modify activities dependent on differing situations and contingencies when controlling tram/light rail networks
- Take appropriate initiative in a diverse range of operational situations
- Manage the response to changes in equipment, standard operating procedures and the work environment

**Planning and organising**

- Implement and monitor operational and emergency plans, systems and procedures
- Implement and monitor systems and procedures for maintaining compliance with regulations and codes of practice
- Monitor the implementation of the tram/light rail security and safety management systems, where applicable
- Monitor and evaluate operational performance and compliance
- Collect and interpret information needed when controlling tram/light rail networks
- Organise and plan own activities
- Manage time and priorities in the course of controlling tram/light rail networks

**Self management**

- Interpret and apply relevant regulations and instructions
- Establish and follow own work plans and schedules
- Evaluate and monitor own work performance

**Learning**

- Assist in the organisation of learning and assessment activities for others in the workplace
- Manage adaptation of others in the workplace to changes in tram/light rail systems, equipment and procedures and the workplace operating environment
- Instruct, coach or mentor others in the workplace as required
- Contribute to the assessment of competence of others in the workplace
- Assist in creating a learning environment in the workplace
- Adapt own competence in response to changes in tram/light rail operations
- Update own knowledge and skills required for network control activities

**Technology**

- Use complex equipment and systems required when controlling tram/light rail networks
- Implement and monitor operational and maintenance procedures and systems for equipment used when controlling
tram/light rail networks
- Implement and monitor the application of OH&S procedures when using tram/light rail equipment and facilities

Packaging Rules

Requirements for achievement of the qualification
A successful assessment outcome for a total of 12 units of competency comprising:
- 8 core units listed below

plus
- 4 elective units from the elective units listed below, which may include up to 2 units drawn with appropriate contextualisation from any currently endorsed national Training Package or accredited course, provided that the units contribute to the vocational outcome of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisites specified in the unit are complied with.

TLI50210 Diploma of Materiel Logistics

Modification History
Not Applicable

Description
Rationale:
A qualification for those working in materiel sustainment and integrated logistics management roles.
Successful completion will require the self-directed application of knowledge and skills, with substantial depth in some areas where judgement is required in planning and selecting appropriate equipment, services and techniques for self and others. Applications involve participation in the development of strategic initiatives as well as personal responsibility and autonomy in performing complex technical operations or organising others. It may include participation in teams, including those concerned with planning and evaluation functions. Group or team coordination may be involved.

Job roles:
Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:
- Materiel Logistics Manager (Integrated Logistics Support)
- Materiel Logistics Manager (Materiel Sustainment)

</tr>
<tr>
<td></td>
<td>• Recognise individual differences in the workplace, value</td>
</tr>
<tr>
<td></td>
<td>these differences and adjust own behaviour to account for</td>
</tr>
<tr>
<td></td>
<td>these differences</td>
</tr>
</tbody>
</table>
• Task staff to collect and collate information using standard procedures.

TLI50210 Diploma of Materiel Logistics (continued)

Employability Skill Industry/enterprise requirements for this qualification include:

Problem solving
• Analyse circumstances, and interpret and clearly define issue/s
• Analyse information to modify and update plans and prioritise tasks in accordance with plans and policy
• Conduct research related to issue/s and seek the advice of relevant personnel to clarify findings that are unclear
• Negotiate stakeholders’ requirements, and document and incorporate within proposed advice
• Obtain information required and analyse in accordance with professional standards.

Initiative and enterprise
• Solve problems and make decisions
• Translate research and analysis into clear advice to stakeholders.

Planning and organising
• Develop plans covering materiel management activities in accordance with instructions, policy and procedures
• Identify relevant policy, legislation and regulations to meet organisational information requirements
• Manage resources in accordance with the organisation’s policy and procedures
• Obtain information and identify situation to permit accurate assessment of the problem
• Review training and operational planning requirements to enhance future operations
• Terminate operation in accordance with operational standards.

Self management
• Apply concepts of due diligence
• Apply principles of duty of care
• Comply with professional codes of practice (as applicable) and ethical standards
• Ensure personal behaviour shows sensitivity to the differences between colleagues
• Maintain a calm approach under stress
• Manage communications within and between teams and organisations
• Participate as a team member
• Provide and receive feedback in a constructive manner.

TLI50210 Diploma of Materiel Logistics (continued)
Learning
- Learn about federal and state/territory legislation, regulations within legislation, government policy, organisation policy related to materiel logistics
- Learn about principles of risk management, locally used information management and communications systems, available resources, their capabilities, and access to them
- Learn about logistics requirements and industry capability.

Technology
- Access electronic or manual recording procedures
- Implement information management systems and maintain to provide accurate records
- Maintain management documentation
- Use appropriate information technology and software
- Use specialised information sources
- Use telephone systems, satellite phones, internet or intranet links.

Packaging Rules
Requirements for completion of the qualification:
A successful assessment outcome for 16 units of competency comprising:
- 4 core units listed below

plus
- 5 units from the integrated logistics support elective units (Group A) listed below or 5 units from the materiel sustainment electives (Group B) listed below

plus
- 4 units from the logistics elective units listed below

plus
- 3 general elective units which may be taken from the general elective units listed below, or may include up to 3 units drawn with appropriate contextualisation from Certificate IV, Diploma or Advanced Diploma qualifications in this or other relevant endorsed Training Package or accredited course.

Where imported units are selected, care must be taken to ensure that all pre-requisites are complied with.

### Elective units (continued):

| R Contract Procurement | BSBPMG509A | Manage project procurement |
|                        | PSPPROC412A | Develop and distribute requests for offers |
|                        | PSPPROC413A | Select providers and develop contracts |
|                        | PSPPROC414A | Manage contracts |
|                        | PSPPROC506A | Plan to manage a contract |
|                        | PSPPROC503B | Manage contract performance |
|                        | PSPPROC504B | Finalise contracts |

| U Environment | TLIU4001A | Implement and monitor environmental protection policies and procedures |

### NOTES
BSB units have been imported from the BSB07 Business Services Training Package. PSP units have been imported from the PSP04 Public Sector Training Package.
TLI50310 Diploma of International Freight Forwarding

Modification History
Release 3. This is the third release of this qualification in the TLI10 Transport and Logistics Training Package Version 4.0. Minor correction – unit code version corrected. Release 3 is equivalent to the previous release.

Description
Rationale:
A qualification for those working in advanced international freight forwarding roles. Successful completion will require the self-directed application of knowledge and skills, with substantial depth in some areas where judgement is required in planning and selecting appropriate equipment, services and techniques for self and others. Applications involve participation in the development of strategic initiatives as well as personal responsibility and autonomy in performing complex technical operations or organising others. It may include participation in teams, including those concerned with planning and evaluation functions. Group or team coordination and training may be involved.
The Diploma of International Freight Forwarding qualification is aligned to the following four job role specialisations:
- **Group A** International Freight Forwarders with responsibilities for managing own and work group activities
- **Group B** International Freight Forwarders specialising in special transport services including dangerous goods
- **Group C** International Freight Forwarders with work group and training responsibilities
- **Group D** International Freight Forwarders with responsibilities in a range of work contexts

Employability Skills Summary

Employability Skills Summary for TLI50310 Diploma of International Freight Forwarding

The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. This table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

Employability skill

Communication • Communicate effectively with managers, staff, customers, suppliers and the global freight forwarding network in the course of international freight forwarding
• Listen to and interpret complex verbal information related to international freight forwarding including the clarification and confirmation of work requirements and the receiving of operational feedback
• Read and interpret documentation such as applicable regulations, policy documents, contracts, insurance documents, plans, technical data, signage, labels, safety management systems, tenders, etc.
• Speak clearly and directly on diverse and complex matters related to international freight forwarding including sharing data, requirements and procedures relevant to operations, issuing clear and timely instructions, communicating operational details to internal and external stakeholders, and providing support and feedback to staff
• Write complex documents including communicating with internal and external stakeholders and preparing risk assessment reports and freight forwarding project plans, specifications, tenders and reports
• Responsibly negotiate complex issues with others in the course of international freight forwarding including resolving conflict, obtaining resources necessary to achieve objectives, creating and finalising contracts, and negotiating processes and procedures appropriate to statutory and legal requirements
• Recognise and interpret non-verbal signs, signals and behaviour
• Establish and implement organisation's information and communication systems and procedures
• Establish and use global and local networks including active involvement in business or professional networks and the building of relationships to provide benefits for the team and organisation
• Use numeracy effectively to understand operational and costing data, prepare budgets, perform calculations, determine costs, forecast resource requirements, and audit performance.

TLI50310 Diploma of International Freight Forwarding (continued)
Employability skill

Industry/enterprise requirements for this qualification include:

**Teamwork**
- Provide leadership to staff
- Manage the resolution of any interpersonal conflicts that may arise in the course of international freight forwarding
- Motivate staff
- Provide opportunities for staff to achieve and maintain competence
- Coach, mentor and give feedback to staff
- Provide information, instruction, training and supervision
- Manage the avoidance and prevention of harassment of others in the workplace
- Ensure the active participation of team members in meeting goals and objectives
- Collaborate with staff and others in the course of international freight forwarding
- Work collaboratively with contractors, carriers and customers in the context of international freight forwarding
- Define a role as part of a team including identifying the strengths of team members, understanding relationships between team members and understanding the roles and relationship between and among manager, team leaders, supervisors, etc.
- Work with staff and other persons of different ages, gender, race, religion, political persuasion, etc.

**Problem solving**
- Develop practical solutions for problems arising in the course of international freight forwarding including assessing hazards and ensuring there are alternative plans or processes to manage identified risks; monitoring issues which arise in the course of operations; and creating, implementing and applying risk management systems
- Manage hazards and risks in complex and diverse situations that may occur in the course of international freight forwarding
- Solve problems in teams including allocating roles and responsibilities in response to changes in environment or circumstances, coordinating requirements and issues, and evaluating and monitoring performance
- Show independence and initiative in identifying problems and solving them
- Resolve customer concerns in relation to complex project issues including resolution of contract issues and the achievement of quality requirements and deadlines
- Test assumptions, taking the context of data and circumstances into account
- Audit and review systems and plans
- Use applicable mathematics to solve complex problems related to international freight forwarding.

TLI50310 Diploma of International Freight Forwarding (continued)
Industry/enterprise requirements for this qualification include:

**Employability skill**

**Initiative and enterprise**
- Modify activities dependent on differing work situations and contingencies
- Take appropriate initiatives in complex and diverse situations such as those above
- Recognise and respond to changes in internal and external operating environments
- Contribute to and manage continuous improvement processes
- Be creative in approaches to change and innovation, in response to conflicts in coordination and allocation of resources, and in both in encouraging input from staff and interactions between and amongst staff and teams
- Translate ideas into action including applying consultative processes, developing plans, applying new technologies and concepts and gaining the support of internal and external stakeholders
- Value input from staff
- Manage the response to any contingencies and changes in equipment, standard operating procedures and the working environment.

**Planning and organising**
- Establish operational and emergency plans, systems and procedures for the organisation
- Allocate people and other resources to tasks including adapting allocations to cope with contingencies, delegating tasks and responsibilities to capable staff, and clearly defining responsibilities
- Establish and implement systems and procedures for maintaining compliance with applicable regulations and codes of practice
- Establish and implement workplace security and safety management systems (where applicable)
- Monitor, evaluate and report on operational performance and compliance
- Collect, analyse, interpret and organise information needed during international freight forwarding activities
- Prepare scope of work and work plans for self and team members
- Be resourceful in planning for and assessing risk
- Ensure feedback and other data contribute to improvements in operational effectiveness
- Manage time and priorities in the course of international freight forwarding activities
- Ensure feedback and other data contribute to improvements in operational effectiveness.

**TLI50310 Diploma of International Freight Forwarding (continued)**

**Employability skill**

Industry/enterprise requirements for this qualification include:
Employability skill

Industry/enterprise requirements for this qualification include:

Self management

- Interpret and apply relevant regulations and instructions
- Operate in accordance with the code of ethics for international freight forwarders
- Establish and follow own work plans and schedules
- Evaluate and monitor own work performance
- Take responsibility for meeting own objectives
- Have confidence in own vision and goals
- Develop trust and confidence in staff and customers
- Maintain effective networks.

Learning

- Organise learning and assessment activities for others in the workplace
- Manage adaptation of self and others in the workplace to any changes in systems, equipment and procedures and the workplace operating environment
- Be open to new ideas and change, and in particular facilitate and support change processes with staff and apply previous experience and feedback in formulating improvements to practice
- Provide opportunities for instruction, coaching and mentoring others in the workplace as required
- Contribute to the assessment of the competence of others in the workplace
- Encourage the creation of a learning community in the workplace
- Identify training needs for personnel and ensure that delegated tasks provide individuals with opportunities for development
- Adapt own competence in response to any changes in international freight forwarding processes
- Update own knowledge and skills required for international freight forwarding activities.

Technology

- Use complex equipment and Information and Communications Technology (ICT) systems required during freight forwarding and related logistics activities involved in international freight transport
- Apply a range of basic ICT skills
- Use ICT to organise and access data including the monitoring of freight forwarding and logistics processes, the tracking of international freight, and the recording and reporting of project status
- Applying ICT as a management tool to store and organise data
- Implement and monitor operational and maintenance procedures and systems for equipment used during international freight forwarding projects
- Implement and monitor the application of OH&S procedures when using ICT and office equipment and facilities.
Packaging Rules

Requirements for completion of the qualification:
A successful assessment outcome for 14 units of competency comprising:
- 9 core units listed below

plus
- 5 elective units which may be taken from the elective units listed below for one of the four specialisations. Note that in the case of Group D, this may include up to 2 units drawn with appropriate contextualisation from qualifications in this or other relevant endorsed Training Package and accredited course.

Where imported units are selected, care must be taken to ensure that all pre-requisites are complied with.

Core units:

<table>

TLI50410 Diploma of Logistics

Modification History
Release 3 - One new unit - TLIM4004A - added to general electives. Imported units updated to current versions. Equivalent.

Description
Rationale:
A general qualification for the integrated management of logistics. Successful completion will require the self-directed application of knowledge and skills, with substantial depth in some areas where judgement is required in planning and selecting appropriate equipment, services and techniques for self and others. Applications involve participation in the development of strategic initiatives as well as personal responsibility and autonomy in performing complex technical operations or organising others. It may include participation in teams, including those concerned with planning and evaluation functions. Group or team coordination may be involved. Successful completion of the licensing units within the qualification must align with applicable licensing and regulatory requirements.

Job roles:
Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:
- Logistics Manager

TLI50510 Diploma of Deployment Logistics

Modification History
Release 3 - One imported unit updated to current version. Equivalent.

Description
Rationale: A qualification for those working in deployment logistics management roles. Successful completion will require the self-directed application of knowledge and skills, with substantial depth in some areas where judgement is required in planning and selecting appropriate equipment, services and techniques for self and others. Applications involve participation in the development of strategic initiatives as well as personal responsibility and autonomy in performing complex technical operations or organising others. It may include participation in teams, including those concerned with planning and evaluation functions. Group or team coordination may be involved.

Job roles: Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:

- Logistics Manager (Deployed Operations)

Employability Skills Summary

Employability Skills Summary for TLI50510 Diploma of Deployment Logistics

The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. This table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

<table>
<thead>
<tr>
<th>Employability Skill</th>
<th>Industry/enterprise requirements for this qualification include:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Communication</td>
<td>• Communicate effectively with managers, staff, clients and stakeholders in the course of deployment logistics management</td>
</tr>
<tr>
<td></td>
<td>• Listen to and interpret complex verbal information related to deployment logistics management including the clarification and confirmation of work requirements and the receiving of operational feedback</td>
</tr>
<tr>
<td></td>
<td>• Read and interpret applicable regulations, legislation, policy documents, strategic plans, technical data, signage, labels, safety management systems, tenders, contracts, project plans, related to deployment logistics</td>
</tr>
<tr>
<td></td>
<td>• Speak clearly and directly on diverse and complex matters related to deployment logistics management including sharing data, requirements and procedures relevant to operations, issuing clear and timely instructions, communicating operational details to internal and external stakeholders, and providing support and feedback to staff</td>
</tr>
<tr>
<td></td>
<td>• Write complex documents including communicating with internal and external stakeholders and preparing risk assessment reports and plans, project plans, specifications, tenders and technical reports</td>
</tr>
<tr>
<td></td>
<td>• Responsibly negotiate complex issues with others in the course of deployment logistics management including resolving conflict, obtaining resources necessary to achieve objectives, creating and finalising contracts, and negotiating processes and procedures appropriate to statutory and legal requirements</td>
</tr>
<tr>
<td></td>
<td>• Recognise and interpret non-verbal signs, signals and behaviour</td>
</tr>
<tr>
<td></td>
<td>• Establish and implement organisation's communication systems and procedures</td>
</tr>
<tr>
<td></td>
<td>• Establish and use networks including active involvement in business or professional networks and the building of relationships to provide benefits for the team and organisation</td>
</tr>
<tr>
<td></td>
<td>• Use numeracy effectively to understand operational and costing data, prepare budgets, perform calculations, forecast</td>
</tr>
</tbody>
</table>
Employability Skill | Industry/enterprise requirements for this qualification include:
--- | ---
| resource requirements, and audit performance. |  
Teamwork |  
- Provide leadership to staff  
- Manage the resolution of any interpersonal conflicts that may arise in the course of deployment logistics management  
- Motivate staff  
- Provide opportunities for staff to achieve and maintain competence  
- Coach, mentor and give feedback to staff  
- Provide information, instruction, training and supervision  
- Manage the avoidance and prevention of harassment of others in the workplace  
- Ensure the active participation of team members in meeting goals and objectives  
- Collaborate with staff and others in the course of deployment logistics management  
- Work collaboratively with stakeholders in the context of deployment logistics management  
- Define a role as part of a team including identifying the strengths of team members, understanding relationships between team members and understanding the roles and relationship between and among manager, team leaders, supervisors, etc.  
- Work with staff and other persons of different ages, gender, race, religion, political persuasion, etc.  
Problem solving |  
- Develop practical solutions for problems arising in the course of deployment logistics management including assessing hazards and ensuring there are plans or processes to manage identified risks, monitoring issues which arise in the course of operations and creating, implementing and applying risk management systems  
- Manage hazards and risks in complex and diverse situations that may occur in the course of deployment logistics management  
- Solve problems in teams including allocating roles and responsibilities in response to changes in environment or circumstances, coordinating requirements and issues, and evaluating and monitoring performance  
- Show independence and initiative in identifying problems and solving them.  
- Resolve stakeholder concerns in relations to complex project issues including resolution of contract issues and the achievement of quality requirements and deadlines
Employability Skill

Industry/enterprise requirements for this qualification include:

- Test assumptions taking the context of data and circumstances into account
- Review systems and plans
- Use applicable mathematics to solve complex problems related to deployment logistics management.

Initiative and enterprise

- Modify activities dependent on differing work situations and contingencies
- Take appropriate initiatives in complex and diverse situations such as those above
- Recognise and respond to changes in internal an external operating environments
- Contribute to and manage continuous improvement processes
- Be creative in approaches to change and innovation, in response to conflicts in coordination and allocation of resources and in both in encouraging input from staff and interactions between and amongst staff and teams
- Translate ideas into action including applying consultative processes, developing plans, applying new technologies and concepts and gaining the support of internal and external stakeholders
- Value input from staff
- Manage the response to any contingencies and changes in equipment, standard operating procedures and the working environment.

Planning and organising

- Establish operational and emergency plans, systems and procedures for the organisation
- Allocate people and other resources to tasks including adapting allocations to cope with contingencies, delegating tasks and responsibilities to capable staff and clearly defining responsibilities
- Establish and implement systems and procedures for maintaining compliance with applicable regulations and codes of practice
- Establish and implement workplace security and safety management systems (where applicable)
- Monitor, evaluate and report on operational performance and compliance
- Collect, analyse, interpret and organise information needed during deployment logistics management activities
- Prepare scope of work and work plans for self and team members
- Be resourceful in planning for and assessing risk
Employability Skill

Industry/enterprise requirements for this qualification include:

- Ensure feedback and other data contribute to improvements in operational effectiveness
- Manage time and priorities in the course of deployment logistics management
- Ensure feedback and other data contribute to improvements in operational effectiveness.

Self management

- Interpret and apply relevant regulations and instructions
- Establish and follow own work plans and schedules
- Evaluate and monitor own work performance
- Take responsibility for meeting own objectives
- Have confidence in own vision and goals
- Develop trust and confidence in staff, customers and stakeholders
- Maintain effective networks.

Learning

- Organise learning and assessment activities for others in the workplace
- Manage adaptation of self and others in the workplace to any changes in systems, equipment and procedures and the workplace operating environment
- Be open to new ideas and change and in particular facilitate and support change processes with staff and apply previous experience and feedback in formulating improvements to practice
- Provide opportunities for instruction, coaching and mentoring others in the workplace as required
- Contribute to the assessment of the competence of others in the workplace
- Encourage the creation of a learning community in the workplace
- Identify training needs for personnel and ensure that delegated tasks provide individuals with opportunities for development
- Adapt own competence in response to any changes in deployment logistics management processes
- Update own knowledge and skills required for deployment logistics management activities.

Technology

- Use complex equipment and IT systems required during deployment logistics management activities
- Apply a range of basic IT skills
- Use IT to organise and access data including the monitoring of deployment logistics processes, the tracking of items and the recording and reporting of system status
- Applying IT as a management tool to store and organise data
Employability Skill | Industry/enterprise requirements for this qualification include:
--- | ---
 | • Implement and monitor operational and maintenance procedures and systems for equipment used during deployment logistics management activities
 | • Implement and monitor the application of OH&S procedures when using IT and office equipment and facilities.
Packaging Rules

Requirements for completion of the qualification:
A successful assessment outcome for 15 units of competency comprising:

- 4 core units listed below

plus

- 5 units from the integrated deployment logistics elective units listed below

plus

- 6 general elective units which may be taken from the general elective units listed below, any remaining integrated deployment logistic elective units, or may include up to 4 units drawn with appropriate contextualisation from this Training Package and/or other relevant nationally endorsed Training Package or accredited course.

Where imported units are selected, care must be taken to ensure that all pre-requisites are complied with.

Core units:

<table>
<thead>
<tr>

**NOTES**
BSB units have been imported from the BSB07 Business Services Training Package.
PSP units have been imported from the PSP04 Public Sector Training Package.
PUA units have been imported from PUA00 Public Safety Training Package.
SIT units have been imported from the SIT07 Tourism, Hospitality and Events Training Package.
Modification History
Release 1. This is the first release of this qualification in TLI10 Transport and Logistics Training Package Version 4.0.

Description
Rationale:
This is a general qualification for the management of rail operations. This qualification requires the self-directed application of knowledge and skills, with substantial depth in some areas where judgement is required in planning and selecting appropriate equipment, services and techniques for self and others. Application involves participation in the development of strategic initiatives as well as personal responsibility and autonomy in performing or organising others to carry out complex technical operations. It may include participation in teams, including those concerned with planning and evaluation functions. Group or team coordination may be involved.

Job roles:
Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:
- Network Controller
- Passenger Services Manager
- Rail Freight Manager
- Rail Operations Manager
- Rail Maintenance Manager.

Pathways Information
Not applicable.

Licensing/Regulatory Information
Not applicable.

Entry Requirements
Not applicable.
Employability Skills Summary

Employability Skills Summary for TLI50613 Diploma of Rail Operations Management

The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. This table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

<table>
<thead>
<tr>
<th>Employability Skill</th>

</tr>
<tr>
<td></td>
<td>• Use numeracy effectively to understand operational and costing data, prepare budgets, perform calculations, forecast resource requirements, and audit performance.</td>
</tr>
</tbody>
</table>
Teamwork

- Provide leadership to staff
- Manage the resolution of any interpersonal conflicts that may arise in the course of rail operations management
- Motivate staff
- Provide opportunities for staff to achieve and maintain competence
- Coach, mentor and give feedback to staff
- Provide information, instruction, training and supervision
- Manage the avoidance and prevention of harassment of others in the workplace
- Ensure the active participation of team members in meeting goals and objectives
- Collaborate with staff and others in the course of rail operations management
- Work collaboratively with suppliers and clients in the context of supply chain management
- Define a role as part of a team including identifying the strengths of team members, understanding relationships between team members and understanding the roles and relationship between and among manager, team leaders, supervisors, etc.
- Work with staff and other persons of different ages, gender, race, religion, political persuasion, etc.

Problem solving

- Develop practical solutions for problems arising in the course of rail operations management including assessing hazards and ensuring there are plans or processes to manage identified risks, monitoring issues which arise in the course of operations and creating, implementing and applying risk management systems
- Manage hazards and risks in complex and diverse situations that may occur in the course of rail operations management
- Solve problems in teams including allocating roles and responsibilities in response to changes in environment or circumstances, coordinating requirements and issues, and evaluating and monitoring performance
- Show independence and initiative in identifying problems and solving them
- Resolve customer concerns in relations to complex project issues including resolution of contract issues and the achievement of quality requirements and deadlines
- Test assumptions taking the context of data and circumstances into account
- Audit and review systems and plans
- Use applicable mathematics to solve complex problems related to rail operations management.
**Initiative and enterprise**

- Modify activities dependent on differing work situations and contingencies
- Take appropriate initiatives in complex and diverse situations such as those above
- Recognise and respond to changes in internal and external operating environments
- Contribute to and manage continuous improvement processes
- Be creative in approaches to change and innovation, in response to conflicts in coordination and allocation of resources and in both in encouraging input from staff and interactions between and amongst staff and teams
- Translate ideas into action including applying consultative processes, developing plans, applying new technologies and concepts and gaining the support of internal and external stakeholders
- Value input from staff
- Manage the response to any contingencies and changes in equipment, standard operating procedures and the working environment.

**Planning and organising**

- Establish operational and emergency plans, systems and procedures for the organisation
- Allocate people and other resources to tasks including adapting allocations to cope with contingencies, delegating tasks and responsibilities to capable staff and clearly defining responsibilities
- Establish and implement systems and procedures for maintaining compliance with applicable regulations and codes of practice
- Establish and implement workplace security and safety management systems (where applicable)
- Monitor, evaluate and report on operational performance and compliance
- Collect, analyse, interpret and organise information needed during rail operations management activities
- Prepare scope of work and work plans for self and team members
- Be resourceful in planning for and assessing risk
- Ensure feedback and other data contribute to improvements in operational effectiveness
- Manage time and priorities in the course of rail operations management
- Ensure feedback and other data contribute to improvements in operational effectiveness.

**Self management**

- Interpret and apply relevant regulations and instructions
- Establish and follow own work plans and schedules
- Evaluate and monitor own work performance
- Take responsibility for meeting own objectives
- Have confidence in own vision and goals
- Develop trust and confidence in staff and customers
- Maintain effective networks.

**Learning**

- Organise learning and assessment activities for others in the workplace
- Manage adaptation of self and others in the workplace to any changes in systems, equipment and procedures and the workplace operating environment
- Be open to new ideas and change and in particular facilitate and support change processes with staff and apply previous experience and feedback in formulating improvements to practice
- Provide opportunities for instruction, coaching and mentoring others in the workplace as required
- Contribute to the assessment of the competence of others in the workplace
- Encourage the creation of a learning community in the workplace
- Identify training needs for personnel and ensure that delegated tasks provide individuals with opportunities for development
- Adapt own competence in response to any changes in rail operations management processes
- Update own knowledge and skills required for rail operations management activities.

**Technology**

- Use complex equipment and IT systems required during rail operations management activities involved in transport, rail operations, freight forwarding and customs broking
- Apply a range of basic IT skills
- Use IT to organise and access data including the monitoring of rail operations processes, the tracking of items and the recording and reporting of system status
- Applying IT as a management tool to store and organise data
- Implement and monitor operational and maintenance procedures and systems for equipment used during rail operations management activities involved in transport, rail operations, freight forwarding and customs broking
- Implement and monitor the application of OH&S procedures when using IT and office equipment and facilities.
Packaging Rules

Requirements for achievement of the qualification
A successful assessment outcome for a total of 14 units of competency comprising:

- **8 core units** listed below

plus

- **2 specialist elective units** from one of the **Groups A–H** listed below

plus

- **4 general elective units**

  The general elective units may be selected from the general elective list or units not already selected from Group A, B, C, D, E, F, G, H. Two of these general elective units may be selected from any other TLI10 Transport and Logistics Training Package qualification or Skill Set, any other Training Package or state/territory accredited course; the general elective units selected must contribute to the vocational outcomes of the qualification.

TLI50713 Diploma of Bus and Coach Operations

Modification History
Release 1. This is the first release of this qualification in TLI10 Transport and Logistics Training Package Version 4.0.

Description
Rationale:
This qualification is designed for bus and coach operations job roles within the transport and logistics industry. Successful achievement of the qualification will require competence in units of competency that relate to the job role requirements defined as aligned at AQF Level 5.

Job roles:
The TLI50713 Diploma of Bus and Coach Operations qualification is aligned to the following defined roles:
- Fleet Manager
- Operations Manager
- Passenger Service Delivery Manager
- Service Delivery Manager.

Pathways Information
Not applicable.

Licensing/Regulatory Information
Not applicable.

Entry Requirements
Not applicable.
### Employability Skills Summary

**Employability Skills Summary for TLI50713 Diploma of Bus and Coach Operations**

The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. This table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

<table>
<thead>
<tr>
<th>Employability Skill</th>
<th>Industry/enterprise requirements for this qualification include:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Communication</td>
<td>• Communicate effectively with managers, staff, clients and suppliers in the course of bus and coach operations management</td>
</tr>
<tr>
<td></td>
<td>• Listen to and interpret complex verbal information related to bus and coach operations management including clarifying and confirming work requirements and receiving operational feedback</td>
</tr>
<tr>
<td></td>
<td>• Read and interpret applicable regulations, policy documents, strategic plans, technical data, signage, labels, safety management systems, tenders, contracts, project plans, etc.</td>
</tr>

</tr>
<tr>
<td></td>
<td>• Write complex documents including communicating with internal and external stakeholders and preparing risk assessment reports and plans, project plans, specifications, tenders and technical reports</td>
</tr>
<tr>
<td></td>
<td>• Responsibly negotiate complex issues with others in the course of bus and coach operations management including resolving conflict, obtaining resources necessary to achieve objectives, creating and finalising contracts, and negotiating processes and procedures appropriate to statutory and legal requirements</td>
</tr>
<tr>
<td></td>
<td>• Recognise and interpret non-verbal signs, signals and behaviour</td>
</tr>
<tr>
<td></td>
<td>• Establish and implement organisation's communication systems and procedures</td>
</tr>
<tr>
<td></td>
<td>• Establish and use networks including active involvement in business or professional networks and the building of relationships to provide benefits for the team and organisation</td>
</tr>
<tr>
<td></td>
<td>• Use numeracy effectively to understand operational and costing data, prepare budgets, perform calculations, forecast</td>
</tr>
</tbody>
</table>
resource requirements and audit performance.

**Teamwork**

- Provide leadership to staff
- Manage the resolution of any interpersonal conflicts that may arise in the course of bus and coach operations management
- Motivate staff
- Provide opportunities for staff to achieve and maintain competence
- Coach, mentor and give feedback to staff
- Provide information, instruction, training and supervision
- Manage the avoidance and prevention of harassment of others in the workplace
- Ensure the active participation of team members in meeting goals and objectives
- Collaborate with staff and others in the course of bus and coach operations management
- Work collaboratively with suppliers and clients in the context of bus and coach operations management
- Define a role as part of a team including identifying the strengths of team members, understanding relationships between team members and understanding the roles and relationship between and among managers, team leaders, supervisors, etc.
- Work with staff and other persons of different ages, gender, race, religion, political persuasion, etc.

**Problem solving**

- Develop practical solutions for problems arising in the course of bus and coach operations management including assessing hazards and ensuring there are plans or processes to manage identified risks, monitoring issues that arise in the course of operations and creating, implementing and applying risk management systems
- Manage hazards and risks in complex and diverse situations that may occur in the course of bus and coach operations management
- Solve problems in teams including allocating roles and responsibilities in response to changes in environment or circumstances, coordinating requirements and issues, and evaluating and monitoring performance
- Show independence and initiative in identifying problems and solving them
- Resolve customer concerns in relations to complex project issues including resolution of contract issues and the achievement of quality requirements and deadlines
- Test assumptions taking the context of data and circumstances into account
- Audit and review systems and plans
Initiative and enterprise

- Use applicable mathematics to solve complex problems related to bus and coach operations management.
- Modify activities dependent on differing work situations and contingencies.
- Take appropriate initiatives in complex and diverse situations such as those above.
- Recognise and respond to changes in internal and external operating environments.
- Contribute to and manage continuous improvement processes.
- Be creative in approaches to change and innovation in response to conflicts in coordination and allocation of resources and in encouraging input from staff and interactions between and among staff and teams.
- Translate ideas into action including applying consultative processes, developing plans, applying new technologies and concepts and gaining the support of internal and external stakeholders.
- Value input from staff.
- Manage the response to any contingencies and changes in equipment, standard operating procedures and the working environment.

Planning and organising

- Establish operational and emergency plans, systems and procedures for the organisation.
- Allocate people and other resources to tasks including adapting allocations to cope with contingencies, delegating tasks and responsibilities to capable staff and clearly defining responsibilities.
- Establish and implement systems and procedures for maintaining compliance with applicable regulations and codes of practice.
- Establish and implement workplace security and safety management systems (where applicable).
- Monitor, evaluate and report on operational performance and compliance.
- Collect, analyse, interpret and organise information needed during bus and coach operations management activities.
- Prepare scope of work and work plans for self and team members.
- Be resourceful in planning for and assessing risk.
- Ensure feedback and other data contribute to improvements in operational effectiveness.
- Manage time and priorities in the course of bus and coach operations management.
- Ensure feedback and other data contribute to improvements in operational effectiveness.
Self management

- Interpret and apply relevant regulations and instructions
- Establish and follow own work plans and schedules
- Evaluate and monitor own work performance
- Take responsibility for meeting own objectives
- Have confidence in own vision and goals
- Develop trust and confidence in staff and customers
- Maintain effective networks.

Learning

- Organise learning and assessment activities for others in the workplace
- Manage adaptation of self and others in the workplace to any changes in systems, equipment and procedures and the workplace operating environment
- Be open to new ideas and change and in particular facilitate and support change processes with staff and apply previous experience and feedback in formulating improvements to practice
- Provide opportunities for instruction, coaching and mentoring others in the workplace as required
- Contribute to the assessment of the competence of others in the workplace
- Encourage the creation of a learning community in the workplace
- Identify training needs for personnel and ensure that delegated tasks provide individuals with opportunities for development
- Adapt own competence in response to any changes in bus and coach operations management processes
- Update own knowledge and skills required for bus and coach operations management activities.

Technology

- Use complex equipment and IT systems required during bus and coach operations management activities
- Apply a range of basic IT skills
- Use IT to organise and access data including monitoring bus and coach operations processes, tracking items and recording and reporting system status
- Apply IT as a management tool to store and organise data
- Implement and monitor operational and maintenance procedures and systems for equipment used during bus and coach operations management activities
- Implement and monitor the application of work health and safety (WHS)/occupational health and safety (OHS) procedures when using IT and office equipment and facilities.
Packaging Rules

Requirements for achievement of the qualification
A successful assessment outcome for a total of **12 units of competency** comprising:

- **2 core units** listed below

  plus

  - **10 elective units** from the **general elective units** listed below. Alternatively **up to 2 units** from the TLI10 Transport and Logistics Training Package or any other nationally endorsed Training Package or accredited training course, however, the elective units selected must contribute to the vocational outcomes of the qualification and align with the job role.

Where imported units are selected, care must be taken to ensure that all prerequisites specified in the unit are complied with.

- Use qualitative data and analysis
- Use technology to access legislation and guidelines
- Use telephone contact and/or electronic mail.
Packaging Rules

Requirements for completion of the qualification:
A successful assessment outcome for 14 units made up of:

- **6 core units** listed below
  
  plus
  
- **2 units** from the logistics elective units listed below
  
  plus
  
- **6 general elective units** which may be taken from the general elective units listed below or the remaining logistics elective, or may include up to 2 units drawn with appropriate contextualisation from this Training Package or other relevant endorsed Training Package or accredited course.

Where imported units are selected, care must be taken to ensure that all pre-requisites are complied with.

NOTES
BSB units have been imported from the BSB07 Business Services Training Package.
PSP units have been imported from the PSP04 Public Sector Training Package.
TLI60210 Advanced Diploma of Deployment Logistics

Modification History
Release 2 - One imported unit updated to current version. Equivalent.

Description
Rationale:
A qualification for those providing leadership and strategic direction in the planning and management of deployment logistics. Successful completion will require the application of a significant range of fundamental principles and complex techniques across a wide and often unpredictable variety of contexts in relation to either varied or highly specific functions. Contribution to the development of a broad plan, budget or strategy is involved and accountability and responsibility for self and others in achieving the outcomes is involved. Significant judgement is required in planning, design, technical or leadership/guidance functions related to products, services, operations or procedures.

Job roles:
Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include:
- Deployment Logistics Program Manager
- Deployment Logistics Senior Manager
- Deployment Logistics Executive Manager

## Employability Skills Summary

**Employability Skills Summary for TLI60210 Advanced Diploma of Deployment Logistics**

The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. This table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

<table>
<thead>
<tr>
<th>Employability Skill</th>
<th>Industry/enterprise requirements for this qualification include:</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Communication</strong></td>
<td>• Communicate effectively with managers, staff, clients and stakeholders in the course of advanced deployment logistics management</td>
</tr>
<tr>
<td></td>
<td>• Clarify the ethical aspects of decisions, actions and advice</td>
</tr>
<tr>
<td></td>
<td>• Listen to and interpret complex verbal information related to advanced deployment logistics management including the clarification and confirmation of work requirements and the receiving of operational feedback</td>
</tr>
<tr>
<td></td>
<td>• Read and interpret applicable regulations, legislation, policy documents, strategic plans, technical data, signage, labels, safety management systems, tenders, contracts, project plans, related to advanced deployment logistics</td>
</tr>
<tr>
<td></td>
<td>• Speak clearly and directly on diverse and complex matters related to advanced deployment logistics management including sharing data, requirements and procedures relevant to operations, issuing clear and timely instructions, communicating operational details to internal and external stakeholders, and providing support and feedback to staff</td>
</tr>
<tr>
<td></td>
<td>• Write complex documents including communicating with internal and external stakeholders and preparing risk assessment reports and plans, project plans, specifications, tenders and technical reports</td>
</tr>
<tr>
<td></td>
<td>• Responsibly negotiate complex issues with others in the course of advanced deployment logistics management including resolving conflict, obtaining resources necessary to achieve objectives, creating and finalising contracts, and negotiating processes and procedures appropriate to statutory and legal requirements</td>
</tr>
<tr>
<td></td>
<td>• Recognise and interpret non-verbal signs, signals and behaviour</td>
</tr>
<tr>
<td></td>
<td>• Establish and implement organisation's communication systems and procedures</td>
</tr>
<tr>
<td></td>
<td>• Establish and use networks including active involvement in business or professional networks and the building of relationships to provide benefits for the team and organisation</td>
</tr>
<tr>
<td></td>
<td>• Use numeracy effectively to understand operational and costing data, prepare budgets, perform calculations, forecast resource</td>
</tr>
</tbody>
</table>
Employability Skill

**Teamwork**

Industry/enterprise requirements for this qualification include:

- Provide leadership to staff
- Manage the resolution of any interpersonal conflicts that may arise in the course of advanced deployment logistics management
- Motivate staff
- Provide opportunities for staff to achieve and maintain competence
- Coach, mentor and give feedback to staff
- Provide information, instruction, training and supervision
- Manage the avoidance and prevention of harassment of others in the workplace
- Model ethical conduct and reinforce in others
- Ensure the active participation of team members in meeting goals and objectives
- Collaborate with staff and others in the course of deployment logistics management
- Work collaboratively with stakeholders in the context of advanced deployment logistics management
- Define a role as part of a team including identifying the strengths of team members, understanding relationships between team members and understanding the roles and relationship between and among manager, team leaders, supervisors, etc.
- Work with staff and other persons of different ages, gender, race, religion, political persuasion, etc.

**Problem solving**

- Develop practical solutions for problems arising in the course of advanced deployment logistics management including assessing hazards and ensuring there are plans or processes to manage identified risks, monitoring issues which arise in the course of operations and creating, implementing and applying risk management systems
- Manage hazards and risks in complex and diverse situations that may occur in the course of advanced deployment logistics management
- Solve problems in teams including allocating roles and responsibilities in response to changes in environment or circumstances, coordinating requirements and issues, and evaluating and monitoring performance
- Show independence and initiative in identifying problems and solving them.

**Problem solving (continued)**

- Resolve stakeholder concerns in relations to complex project issues including resolution of contract issues and the achievement of quality requirements and deadlines
- Test assumptions taking the context of data and circumstances
Employability Skill

Industry/enterprise requirements for this qualification include:

- Review systems and plans
- Use applicable mathematics to solve complex problems related to advanced deployment logistics management.
- Modify activities dependent on differing work situations and contingencies
- Take appropriate initiatives in complex and diverse situations such as those above
- Recognise and respond to changes in internal and external operating environments
- Contribute to and manage continuous improvement processes
- Be creative in approaches to change and innovation, in response to conflicts in coordination and allocation of resources and in both in encouraging input from staff and interactions between and amongst staff and teams
- Translate ideas into action including applying consultative processes, developing plans, applying new technologies and concepts and gaining the support of internal and external stakeholders
- Value input from staff
- Manage the response to any contingencies and changes in equipment, standard operating procedures and the working environment.

Planning and organising

- Establish operational and emergency plans, systems and procedures for the organisation
- Allocate people and other resources to tasks including adapting allocations to cope with contingencies, delegating tasks and responsibilities to capable staff and clearly defining responsibilities
- Establish and implement systems and procedures for maintaining compliance with applicable regulations and codes of practice
- Establish and implement workplace security and safety management systems (where applicable)
- Establish network links with key stakeholders and build strategic relationships
- Monitor, evaluate and report on operational performance and compliance
- Collect, analyse, interpret and organise information needed during advanced deployment logistics management activities
- Prepare scope of work and work plans for self and team members
- Be resourceful in planning for and assessing risk
- Ensure feedback and other data contribute to improvements in operational effectiveness
Employability Skill

Industry/enterprise requirements for this qualification include:

- Manage time and priorities in the course of advanced deployment logistics management
- Ensure feedback and other data contribute to improvements in operational effectiveness.

Self management

- Interpret and apply relevant regulations and instructions
- Establish and follow own work plans and schedules
- Evaluate and monitor own work performance
- Take responsibility for meeting own objectives
- Have confidence in own vision and goals
- Develop trust and confidence in staff, customers and stakeholders
- Employ a range of leadership styles to facilitate intercultural management and to manage diverse teams
- Maintain effective networks.

Learning

- Organise learning and assessment activities for others in the workplace
- Manage adaptation of self and others in the workplace to any changes in systems, equipment and procedures and the workplace operating environment
- Foster and manage change, and in particular facilitate and support change processes with staff and apply previous experience and feedback in formulating improvements to practice
- Provide opportunities for instruction, coaching and mentoring others in the workplace as required
- Contribute to the assessment of the competence of others in the workplace
- Encourage the creation of a learning community in the workplace
- Identify training needs for personnel and ensure that delegated tasks provide individuals with opportunities for development
- Adapt own competence in response to any changes in advanced deployment logistics management processes
- Update own knowledge and skills required for advanced deployment logistics management activities.

Technology

- Use complex equipment and IT systems required during advanced deployment logistics management activities
- Apply a range of basic IT skills
- Use IT to organise and access data including the monitoring of advanced deployment logistics processes, the tracking of items and the recording and reporting of system status
- Applying IT as a management tool to store and organise data
- Implement and monitor operational and maintenance procedures and systems for equipment used during advanced deployment logistics management activities
Employability Skill  Industry/enterprise requirements for this qualification include:

- Implement and monitor the application of OH&S procedures when using IT and office equipment and facilities.
Packaging Rules

Requirements for completion of the qualification:
A successful assessment outcome for 12 units of competency comprising:

- **3 core units** listed below

plus

- **4 units** from the integrated deployment logistics elective units listed below

plus

- **5 general elective units** which may be taken from the general elective units listed below, any remaining integrated deployment logistic elective units, or may include up to 3 units drawn with appropriate contextualisation from this Training Package and/or other relevant nationally endorsed Training Package or accredited course.

Where imported units are selected, care must be taken to ensure that all pre-requisites are complied with.

FDF units have been imported from the FDF03 Food Processing Industry Training Package.
PSP units have been imported from the PSP04 Public Sector Training Package.
TLIPC110 Certificate I in Transport and Logistics (Pathways)

Modification History
Not Applicable

Description
Rationale:
A cross-sector certificate utilising units in the Transport and Logistics Training Package which provides a pathway for those who have had limited access to formal vocational and education training, including young unemployed, early school leavers and students at risk, older unemployed people, Indigenous groups, geographically disadvantaged, and people with intellectual and/or physical disabilities. It is also designed to assist Year 9 and 10 students as a framework for a structured workplace learning program, and to develop employability and technical skills required by those commencing a career in the Transport and Logistics Industry.

Breadth, depth and complexity of knowledge and skills would prepare a person to perform a defined range of activities, most of which may be routine and predictable.

# Employability Skills Summary

## Employability Skills Summary for TLIPC110 Certificate I Transport and Logistics (Pathways)

The following table contains a summary of the employability skills as identified by the Transport and Logistics Industry for this qualification. This table should be interpreted in conjunction with the detailed requirements of each unit of competency packaged in this qualification. The outcomes described here are broad industry requirements that may vary depending on packaging options.

<table>
<thead>
<tr>
<th>Employability Skill</th>
<th>Industry/enterprise requirements for this qualification include:</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Communication</strong></td>
<td>• Use communication systems and procedures required for applicable basic transport and logistics operations</td>
</tr>
<tr>
<td></td>
<td>• Read and interpret relevant regulations, instructions, signs and labels applicable to basic transport and logistics operations</td>
</tr>
<tr>
<td></td>
<td>• Speak clearly and directly on matters related to basic transport and logistics operations</td>
</tr>
<tr>
<td></td>
<td>• Write basic documents as part of duties, including completion of relevant forms and incident reports</td>
</tr>
<tr>
<td></td>
<td>• Recognise and interpret non-verbal signs, signals and behaviour</td>
</tr>
<tr>
<td></td>
<td>• Use relevant communication equipment.</td>
</tr>
<tr>
<td><strong>Teamwork</strong></td>
<td>• Assist in the resolution of any interpersonal conflicts that may arise during applicable basic transport and logistics operations</td>
</tr>
<tr>
<td></td>
<td>• Avoid and prevent the harassment of others in the workplace</td>
</tr>
<tr>
<td></td>
<td>• Collaborate with others in the course of applicable basic transport and logistics operations</td>
</tr>
<tr>
<td></td>
<td>• Work with persons of different ages, gender, race, religion, political persuasion, etc.</td>
</tr>
<tr>
<td><strong>Problem solving</strong></td>
<td>• Identify and solve or report problems arising in the course of applicable basic transport and logistics operations</td>
</tr>
<tr>
<td></td>
<td>• Monitor and anticipate problems that may occur in the course of applicable basic transport and logistics operations including hazards and risks and take appropriate action to report or resolve the problems within limits of responsibility</td>
</tr>
</tbody>
</table>
Employability Skill  

Industry/enterprise requirements for this qualification include:

- Recognise hazards and risks in a range of applicable basic transport and logistics situations and take appropriate precautions
- Use mathematics to carry out basic calculations related to applicable transport and logistics operations.

TLIPC110 Certificate I Transport and Logistics (Pathways) (continued)

Employability Skill  

Industry/enterprise requirements for this qualification include:

Initiative and enterprise

- Modify activities dependent on differing situations and contingencies that may arise during applicable basic transport and logistics operations
- Take appropriate initiatives in a range of operational situations such as those above
- Respond appropriately to any changes in equipment, standard operating procedures and the working environment.

Planning and organising

- Follow and apply operational and emergency plans, systems and procedures
- Check own compliance with regulations and codes of practice
- Implement the workplace security and safety management systems
- Check own operational performance
- Collect and interpret basic information needed in the course of applicable basic transport and logistics operations
- Organise and plan own work activities
- Manage time and priorities in the course of applicable basic transport and logistics operations.

Self management

- Interpret and apply regulations and instructions
- Establish and follow own work plans and schedules
- Check own work performance.

Learning

- Adapt own competence in response to any changes in applicable basic transport and logistics operations
- Update own knowledge and skills required for relevant basic transport and logistics operations.
Employability Skill | Industry/enterprise requirements for this qualification include:
--- | ---
Technology | - Use equipment and materials required during basic transport and logistics operations
 | - Follow and apply operational and servicing instructions for equipment used during basic transport and logistics operations
 | - Follow and apply OH&S procedures when using relevant transport and logistics equipment and facilities.

Packaging Rules

Requirements for completion of the qualification:
A successful assessment outcome for a total 7 units aligned at AQF 1 comprising:

- 3 core Pathways units
  - TLIPC1001A Demonstrate care and apply safe practices at work
  - TLIPC1002A Adapt to work requirements in the transport and logistics industry
  - TLIPC1003A Apply effective work practices
- 1 core industry/technical unit to be chosen from the following Project Units:
  - TLIPC1004A Complete courier delivery operations
  - TLIPC1005A Complete small store operations
- The 'project' unit means that competency is to be achieved over the course of the program and it should be delivered through integration with other units of competency, rather than a stand alone learning program. Integrated project units represent evidence of a set of related activities with a measurable outcome which may be a product, a service or an operation, with a beginning, middle and an end and may be achieved within a real or simulated working environment.

The technical units from the industry core units are designed for use only in a Pathways qualification or skill set. They should not be used in other instances as replacements for units that have direct job outcomes.

- 3 units from Training Packages within the Transport and Logistics Industry Skills Council (TLISC) or from another ISC or accredited course at AQF Levels 1 or 2.

For example, units could be selected from the Project Unit A or B options below:

<table>
<thead>
<tr>
<th>Project Unit A</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>TLIC1051A</td>
<td>Operate commercial vehicle</td>
</tr>
<tr>
<td>TLIC2012A</td>
<td>Ride courier/delivery motorcycle</td>
</tr>
</tbody>
</table>
### Project Unit A

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>TLIC1013A</td>
<td>Ride courier/delivery bicycle</td>
</tr>
<tr>
<td>TLIH2001A</td>
<td>Interpret road maps and navigate pre-determined routes</td>
</tr>
<tr>
<td>TLII1002A</td>
<td>Apply customer service skills</td>
</tr>
</tbody>
</table>

### Project Unit B

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>TLIA2013A</td>
<td>Receive goods</td>
</tr>
<tr>
<td>TLIA2020A</td>
<td>Replenish stock</td>
</tr>
<tr>
<td>TLIA2021A</td>
<td>Despatch stock</td>
</tr>
<tr>
<td>TLIA2022A</td>
<td>Participate in stocktakes</td>
</tr>
<tr>
<td>TLID1001A</td>
<td>Shift materials safely using manual handling methods</td>
</tr>
<tr>
<td>TLID1002A</td>
<td>Shift a load using manually-operated equipment</td>
</tr>
<tr>
<td>TLII1002A</td>
<td>Apply customer service skills</td>
</tr>
</tbody>
</table>
TLISS00001 Access and Move a Track Vehicle Within a Defined Worksite Skill Set

Modification History
Release 3 - This is the third release of this skill set in TLI10 Transport and Logistics Training Package Version 3.0.
Units revised. Equivalent to previous version of the skill set.

Description
This skill set targets anyone required to access rail track to run track vehicle within a defined worksite as part of their job role. It is not aligned to any specific qualification and while it can be achieved separately, it is intended for use by track vehicle operators.

Pathways Information

Licensing/Regulatory Information
Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.
Skill Set Requirements

A total of 2 units of competency must be completed.

<table>
<thead>
<tr>
<th>Unit/s</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>TLIC2054B</td>
<td>Access rail track to run track vehicle within defined worksite</td>
</tr>
<tr>
<td>TLIF2080C</td>
<td>Safely access the rail corridor</td>
</tr>
</tbody>
</table>

Target Group

This is a skill set used in track vehicle operations within the general rail infrastructure environment where a track vehicle is to be moved within a defined worksite.

Suggested words for Statement of Attainment

These competencies from the TLI10 Transport and Logistics Training Package (Version 3) meet the needs of track vehicle operation duties. The competencies are drawn from a nationally endorsed Training Package, and provide the skills and knowledge for a person working as a track vehicle operator within the general rail infrastructure environment.
TLISS00002 Accessing the Rail Corridor Skill Set

Modification History

Release 3
This is the third release of this skill set in TLI10 Transport and Logistics Training Package Version 3.0.
Unit revised. Equivalent to previous version of the skill set.

Description

This skill set targets anyone required to access the rail corridor; it is not aligned to any specific qualification and can be achieved separately.

Pathways Information

Licensing/Regulatory Information

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.
Skill Set Requirements

A total of 1 unit of competency must be completed.

<table>
<thead>
<tr>
<th>Unit/s</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>TLIF2080C</td>
<td>Safely access the rail corridor</td>
</tr>
</tbody>
</table>

Target Group

This is a skill set providing a basic induction to the rail corridor. It is intended for anyone who is required to access the rail corridor and/or rail danger zone as part of their job role.

Suggested words for Statement of Attainment

This competency from the TLI10 Transport and Logistics Training Package (Version 3) meets the needs of persons working within the rail environment. The competency is drawn from a nationally endorsed Training Package, and provides the skills and knowledge for a person accessing the rail infrastructure corridor.
TLISS00003 Aluminothermic Welding Skill Set

Modification History
Not Applicable

Description
Not Applicable

Pathways Information
This skill set is additional to Certificate II Rail Infrastructure and targets those rail track workers who will carry out aluminothermic welding.

Licensing/Regulatory Information
Not Applicable
Skill Set Requirements

A total of 2 units of competency must be completed.

<table>
<thead>
<tr>
<th>Unit/s</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>TLIW3015A</td>
<td>Weld rail using aluminothermic welding process</td>
</tr>
<tr>
<td>TLIW3035A</td>
<td>Heat and cut materials using oxy-LPG equipment for the rail industry</td>
</tr>
</tbody>
</table>

Target Group

This is a skill set covering the role of aluminothermic welder within the general rail infrastructure environment.

Suggested words for Statement of Attainment

These competencies from the TLI10 Transport and Logistics Training Package (Version 2) meet the needs of aluminothermic welding operation. The units of competency are drawn from a nationally endorsed Training Package, and provide the skills and knowledge for a person working as an aluminothermic welder within the general rail infrastructure environment.
TLISS00004 Blocking Protection Skill Set

Modification History
Release 3
This is the third release of this skill set in TL10 Transport and Logistics Training Package Version 3.0.
Units revised. Equivalent to previous version of the skill set.

Description
This skill set targets anyone required to implement track blocking protection as part of their job role as a protection officer; it is not aligned to any specific qualification and can be achieved separately.

Pathways Information

Licensing/Regulatory Information
Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.
Skill Set Requirements

A total of 3 units of competency must be completed.

Target Group

This is a skill set used in the role of protection officer or anyone required to implement track blocking protection within the general rail infrastructure environment.

Suggested words for Statement of Attainment

These competencies from the TLI10 Transport and Logistics Training Package (Version 3) meet the needs of protection officer duties. The competencies are drawn from a nationally endorsed Training Package, and provide the skills and knowledge for a person working as a protection officer operating within the general rail infrastructure environment.
TLISS00005 Conduct Track Protection Skill Set

Modification History
Release 3
This is the third release of this skill set in TLI10 Transport and Logistics Training Package Version 3.0.
Units revised. Equivalent to previous version of the skill set.

Description
This skill set targets anyone required to carry out a track protection assessment as part of their job role; it is not aligned to any specific qualification and can be achieved separately.

Pathways Information

Licensing/Regulatory Information
Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.
Skill Set Requirements

A total of 2 units of competency must be completed.

<td>Perform lookout duties</td>
</tr>
</tbody>
</table>

Target Group

This is a skill set covering the role of lookout within the general rail infrastructure environment.

Suggested words for Statement of Attainment

These competencies from the TLI10 Transport and Logistics Training Package (Version 3) meet the needs of lookout working. The competencies are drawn from a nationally endorsed Training Package, and provide the skills and knowledge for a person working as a lookout operating within the general rail infrastructure environment.
TLISS00031 Maintain Aerial Signal/Telecommunication Lines and Cables Skill Set

Modification History
Not Applicable

Description
Not Applicable

Pathways Information
This skill set targets anyone who is required to maintain aerial signal/telecommunication lines and cables. It is not aligned to any specific qualification and can be achieved separately however is expected that the person requiring this skill set would also work on electrical signalling equipment as a major activity.

Licensing/Regulatory Information
Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.
Skill Set Requirements

A total of 1 unit of competency must be completed.

<table>
<thead>
<tr>
<th>Unit/s</th>
</tr>
</thead>
<tbody>
<tr>
<td>TLIB3058A</td>
</tr>
<tr>
<td>Maintain aerial signal/telecommunication lines and cables</td>
</tr>
</tbody>
</table>

Target Group

This is a skill set used by persons required to maintain aerial signal/telecommunication lines and cables within a rail infrastructure environment once it has been isolated by an authorised and qualified electrical technician.

Suggested words for Statement of Attainment

This competency from the TLI10 Transport and Logistics Training Package meets the needs of maintaining aerial signal/telecommunication lines and cables. The competency is drawn from a nationally endorsed Training Package, and provides the skills and knowledge for a person maintaining aerial signal/telecommunication lines and cables operating within the general rail infrastructure environment.
TLISS00032 Maintain Bridge Bearings Skill Set

Modification History
Not Applicable

Description
Not Applicable

Pathways Information
This skill set is to be undertaken in addition to the Certificate II in Rail Infrastructure (Structures) and targets those workers who will also maintain bridge bearings.

Licensing/Regulatory Information
Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.
Skill Set Requirements

A total of 1 unit of competency must be completed.

Unit/s

TLIB2083A Maintain bridge bearings

Target Group

This is a skill set covering a role which includes carrying out maintenance of bridge bearings within the general rail infrastructure environment.

Suggested words for Statement of Attainment

This competency from the TLI10 Transport and Logistics Training Package (Version 2) meets the needs for maintaining bridge bearings. The competency is drawn from a nationally endorsed Training Package, and provides the skills and knowledge for a person working within the general rail infrastructure environment who is required to maintain bridge bearings.
TLISS00033 Maintain Mechanical Equipment Skill Set

Modification History
Not Applicable

Description
Not Applicable

Pathways Information
This skill set targets anyone who is required to maintain mechanical signalling and/or locking and interlocking equipment within a rail environment. It is not aligned to any specific qualification and can be achieved separately however is expected that the person requiring this skill set would also work on electrical signalling, locking or interlocking equipment as a major activity.

Licensing/Regulatory Information
Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.
Skill Set Requirements

A total of 3 units of competency must be completed.

<table>

</tbody>
</table>
Target Group
This is a Skill Set providing training for an open road operator. It is intended for use by those employed in the job role of an open road operator within the road systems of Australia.

Suggested words for Statement of Attainment
These competencies from the TLI10 Transport and Logistics Training Package Version 4.0 and HLT07 Health Training Package meet the needs of open road operators. The units of competency are drawn from nationally endorsed Training Packages and provide the skills and knowledge for a person working in the open road operator environment.
TLISS00038 Operate Signalling/Point Control Equipment Skill Set

Modification History

Release 3
This is the third release of this skill set in TLI10 Transport and Logistics Training Package Version 3.0.
Units revised. Equivalent to previous version of the skill set.

Description

This skill set targets anyone required to operate stand alone signalling and/or point control equipment as part of their job role. It is not aligned to any specific qualification and while it can be achieved separately it is unlikely to be used outside of a more complex job role.

Pathways Information

Licensing/Regulatory Information

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.
Skill Set Requirements

A total of 2 units of competency must be completed.

<table>
<thead>

</tr>
</tbody>
</table>

Target Group

This skill set provides a basic introduction to road safety on the road for those interacting with other road users. It is intended for use by year 10 through to year 12 students to equip them with a broader knowledge of the underpinning concepts of road use and road safety. This skill set may support other road safety or road use programs.

Suggested words for Statement of Attainment

The skill set competencies meet the needs of year 10 through to year 12 students. The competencies are drawn from a nationally endorsed Training Package, and provide the basic knowledge for a person who requires road safety and road use training.
TLISS00047 Road Tunnel Operator Skill Set

Modification History
Release 4. This is the fourth release of this Skill Set in TLI10 Transport and Logistics Training Package Version 4.0.
In Release 4 pathways information has been updated to include the TLI42513 Certificate IV in Traffic Operations. This release is equivalent to the previous release of the Skill Set.

Description
This Skill Set targets anyone who is required to carry out the duties of a tunnel operator within a road traffic control centre.

Pathways Information
This Skill Set contributes to the TLI42513 Certificate IV in Traffic Operations within the TLI10 Transport and Logistics Training Package Version 4.0.

Licensing/Regulatory Information
Readers should ensure they have also read the part of the Training Package that outlines licensing and regulatory requirements.

TLISS00084 Stevedoring Operation Induction and Safety Skill Set

Modification History

Release 1. This is the first release of this Skill Set in TLI10 Transport and Logistics Training Package Version 4.0.

This Skill Set replaces but is not equivalent to TLISS00048 Stevedoring Operation Induction and Safety Skill Set because:

- total number of units required has increased by 1 unit, from 4 to 5 units
- 1 unit has been removed
- 2 units have been added.

Description

Not applicable.

Pathways Information

This Skill Set contributes to the TLI21413 Certificate II in Stevedoring in the TLI10 Transport and Logistics Training Package Version 4.0.

Licensing/Regulatory Information

Readers should ensure they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of 6 units of competency must be attained.

Units

- TLID1001A  Shift materials safely using manual handling methods
- TLIF1001A  Follow occupational health and safety procedures
- TLIF2006A  Apply accident-emergency procedures
- TLIF2010A  Apply fatigue management strategies
- TLIL1001A  Complete workplace orientation/induction procedures
Target Group
Those required to perform stevedoring roles.

Suggested words for Statement of Attainment
These competencies from the TLI10 Transport and Logistics Training Package Version 4.0 meet the needs of new employees commencing stevedoring tasks in the stevedoring industry.

Custom Content Section
Not applicable.
TLISS00085 Stevedoring Reefer Skill Set

Modification History
Release 1. This is the first release of this Skill Set in TLI10 Transport and Logistics Training Package Version 4.0.

Description
Not applicable.

Pathways Information
This Skill Set contributes to the TLI33513 Certificate III in Stevedoring in the TLI10 Transport and Logistics Training Package Version 4.0.

Licensing/Regulatory Information
This Skill Set contributes to the TLI33513 Certificate III in Stevedoring in the TLI10 Transport and Logistics Training Package Version 4.0.

| 1. Develop OHS policies and procedures | 1.1. An OHS business plan and program is developed for the enterprise in consultation with designated personnel and/or management.  
1.2. OHS responsibilities and duties are clearly defined, allocated and included in job descriptions and duty statements for all relevant positions.  
1.3. Financial and human resources for implementation of OHS policies and procedures are identified, sought and/or provided as required.  
1.4. Information on the OHS system and procedures for the area of responsibility is provided and explained in a form which is readily understood by employees. |
| 2. Establish and maintain processes to ensure the participation of all employees in the application of OHS | 2.1. Consultation processes are established and maintained with employees and their representatives in accordance with relevant legislation and according to enterprise guidelines.  
2.2. Issues raised through participation and consultation are dealt with and resolved promptly and effectively in accordance with enterprise procedures for issue resolution.  
2.3. Information about the outcomes of participation and consultation is provided in a manner readily accessible to employees. |
| 3. Establish and maintain procedures for identifying hazards | 3.1. Existing and potential hazards within the area of responsibility are identified and confirmed in accordance with legislation, Codes of Practice, and trends identified from the OHS records system.  
3.2. A procedure for ongoing identification of hazards is developed and integrated within systems of work and procedures.  
3.3. Activities are appropriately monitored to ensure that this procedure is adopted effectively throughout areas of managerial responsibility.  
3.4. Hazard identification is addressed at the planning, design and evaluation stages of any change in the workplace to ensure that new hazards are not created. |
| 4. Establish and maintain procedures for assessing risks | 4.1. Risks associated with identified hazards are assessed in accordance with safe work practices, with information derived from workplace OHS records and industry wide information, and with relevant OHS legislation and Codes of Practice.  
4.2. A procedure for ongoing assessment of risks is developed and integrated within systems of work and |

</table>
| hazardous events | 6.2. Plans and procedures which control the risks associated with hazardous events and meet any legislative requirements as a minimum, are developed in consultation with appropriate emergency services.  
6.3. Appropriate information and training is provided to employees to enable implementation of correct emergency procedures.  
6.4. Adequate numbers of workers are trained in First Aid to ensure that first aid is applied to preserve life and minimise injury. |
| 7. Establish and maintain an OHS safety induction and training program | 7.1. An OHS induction program is developed to meet the occupational health and safety needs of new employees.  
7.2. An OHS training program is developed as part of supervisors and employee's general training. |
| 8. Establish and maintain a system for OHS records | 8.1. A system for keeping OHS records is established and monitored to allow identification of patterns of occupational injury and disease in the enterprise.  
8.2. Records are regularly updated and used to evaluate the effectiveness of the enterprise OHS program. |
| 9. Evaluate the enterprise OHS system and related policies, procedures and programs | 9.1. The effectiveness of the OHS system and related policies, procedures and programs is assessed according to enterprise aims with respect to OHS.  
9.2. Improvements to the OHS system are developed and implemented to ensure more effective achievement of enterprise aims.  
9.3. Compliance with OHS legislation and Codes of Practice is assessed to ensure that legal OHS standards are maintained as a minimum. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- develop OHS policies and procedures which demonstrate enterprise commitment to OHS
**REQUIRED SKILLS AND KNOWLEDGE**

- establish and maintain arrangements to ensure the involvement of all employees in the management of OHS
- establish and maintain procedures for identifying hazards
- establish and maintain procedures for assessing risks
- establish and maintain procedures for controlling risks
- establish and maintain enterprise procedures for dealing with hazardous events
- establish and maintain an OHS safety induction and training program
- establish and maintain a system for OHS records
- evaluate the enterprise OHS system and related policies, procedures and programs
- analyse recorded data to determine where the OHS program can better meet enterprise and employee needs
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- data and documentation for industry injury statistics
- significant hazards and areas of risk in the workplace
- all relevant OHS legislation and Codes of Practice consistent with the hierarchy of OHS risk control and its implementation for hazards in land-based industries
- risk control measures
- hierarchy of risk controls
- relevant management systems and procedures
- public safety issues.
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<td></td>
<td>- review the enterprise OHS system based on an analysis of OHS records, related policies, procedures and programs and make changes in response to review.</td>
</tr>
</tbody>
</table>

### Context of and specific resources for assessment

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

### RANGE STATEMENT
RANGE STATEMENT

The range statement relates to the unit of competency as a whole.

The enterprise OHS program includes:

- the full range of hazards that workers are exposed to (or are likely to be exposed to) in the workplace.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to execute tasks associated with the recruitment cycle. Performance of the work described in this unit will be underpinned by in-depth knowledge of the work of the organisation, and how recruitment and selection practices fit with other human resources functions.

Application of the Unit

This unit applies to those with a supporting role in recruitment, selection and induction functions who work under the direction of a human resources manager.

Individuals at this level would not necessarily have staff reporting to them, although this may be the case.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

**Required Skills and Knowledge**

*This section describes the skills and knowledge required for this unit.*

**Required skills**

- communication skills to:
  - use networks to source suitable applicants
  - actively listen to what is being said in interviews
  - advise on the outcomes of the selection process
  - support line managers in recruitment and selection functions
- literacy skills to:
  - work with job descriptions to devise suitable questions for interviews
  - make job offers and prepare letters for unsuccessful applicants
  - review legislation to ensure requirements are reflected in job descriptions
- organising and scheduling skills to arrange interviews and venues
- technology skills to:
  - advertise jobs
  - communicate with applicants and new appointments
  - maintain information in the human resources information system.

**Required knowledge**

- documentation required for recruitment, selection and induction
- human resources functions, human resources life cycle and the place of recruitment and selection in that life cycle
- principles of equity and diversity and relevant legislation
- range of interviewing techniques and other selection processes and their application.
## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| **Job descriptions** may include: | attributes  
| | competencies required by staff  
| | job or person specifications  
| | job title and purpose of position  
| | necessary skills and knowledge  
| | required qualifications  
| | selection criteria  
| | tasks or duties associated with the position.  

| **Policies** may include: | anti-discrimination  
| | diversity  
| | equal employment opportunity (EEO)  
| | privacy and confidentiality.  

| **Legislation, codes and national standards** may include: | award and enterprise agreements, and relevant industrial instruments  
| | relevant industry codes of practice  
| | relevant legislation from all levels of government that affects business operation, especially in regard to WHS and environmental issues, EEO, industrial relations and anti-discrimination.  

| **Workplace health and safety considerations** may include: | establishing and maintaining WHS training, records and induction processes  
| | performance against WHS legislation and organisation’s WHS system, especially policies, procedures and work instructions.  

| **Workforce strategies** may include: | targets for specific groups to ensure workforce diversity in, for example:  
| | age  
| | ethnicity  
| | experience  
| | gender  
| | other forms of differences, such as learning styles, personality types, working styles, etc.  
| | targets for specific qualifications, capabilities or attributes  
| | recruiting for new strategic directions.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to plan workforce strategies to achieve organisational goals and objectives.

It includes assessing factors that may affect the supply of workers, aligning workforce objectives with business plans, and designing strategies and succession plans to ensure a competent and appropriately diverse workforce is available to meet anticipated changes. The unit covers the research associated with labour markets and the requirement to match organisational needs with employee skills and commitment.

Application of the Unit

This unit applies to human resources managers or staff members with a role in a policy or planning unit that focuses on workforce planning.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.
## Elements and Performance Criteria Pre-Content

<table>
<thead>
<tr>
<th>Element</th>
<th>Performance Criteria</th>

</tbody>
</table>
### Elements and Performance Criteria

| 1. Research workforce requirements | 1.1 Review current data on staff turnover and demographics |
| | 1.2 Assess *factors that may affect workforce supply* |
| | 1.3 Establish the organisation's *requirements for a skilled and diverse workforce* |
| 2. Develop workforce objectives and strategies | 2.1 Review organisational strategy and establish aligned *objectives* for the modification or retention of the workforce |
| | 2.2 Define whether staff turnover is unacceptable and if so consider strategies to address the turnover |
| | 2.3 Define objectives to retain required skilled labour |
| | 2.4 Define objectives for workforce diversity and cross-cultural management |
| | 2.5 Define strategies to source skilled labour |
| | 2.6 Communicate objectives and rationale to relevant stakeholders |
| | 2.7 Obtain agreement and endorsement for objectives and establish targets |
| | 2.8 Develop contingency plans to cope with extreme situations |
| 3. Implement initiatives to support workforce planning objectives | 3.1 Implement action to support agreed objectives for recruitment, training, redeployment and redundancy |
| | 3.2 Develop and implement strategies to assist workforce to deal with organisational change |
| | 3.3 Develop and implement strategies to assist in meeting the organisation's workforce diversity goals |
| | 3.4 Implement succession planning system to ensure desirable workers are developed and retained |
| | 3.5 Implement programs to ensure workplace is an employer of choice |
| 4. Monitor and evaluate workforce trends | 4.1 Review workforce plan against patterns in exiting employee and workforce changes |
| | 4.2 Monitor labour supply trends for areas of over- or under-supply in the external environment |
| | 4.3 Monitor effects of labour trends on demand for labour |
| | 4.4 *Survey organisational climate* to gauge worker satisfaction |
| | 4.5 Refine objectives and strategies in response to internal and external changes and make recommendations in response to global trends and incidents |
| | 4.6 Regularly review government policy on labour demand and |
supply
4.7 Evaluate effectiveness of change processes against agreed objectives

Required Skills and Knowledge
This section describes the skills and knowledge required for this unit.

Required skills

- communication and leadership skills to:
  - explain the need for change
  - gain senior management support for workforce planning initiatives
- literacy skills to read and write reports and succinct workforce plans
- numeracy skills to work with data and predictions about labour supply information
- analytical skills to review data according to the needs of the organisation
- technology skills to:
  - communicate with key stakeholders
  - support HR functions, including data collection and managing information according to legislation and organisational policies.

Required knowledge

- current information about external labour supply relevant to the specific industry or skill requirements of the organisation
- industrial relations relevant to the specific industry
- labour force analysis and forecasting techniques.
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

|                                                                          | • generational  
|                                                                          | • learning styles  
|                                                                          | • race  
|                                                                          | • religious beliefs  
|                                                                          | • sexuality  
|                                                                          | • workers' background, including cultural and linguistic background.  
| Objectives may include:                                                  | • becoming an employer of choice  
|                                                                          | • specific objectives for the organisation on recruitment, training, redeployment and redundancy  
|                                                                          | • triple bottom line.  
| Organisational climate surveys may include:                              | • employee opinion surveys  
|                                                                          | • employee satisfaction surveys  
|                                                                          | • systems for checking how staff perceive the organisation and its function.  

Unit Sector(s)

Workforce Development – Human Resource Management
BSBMGT402A Implement operational plan

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit describes the performance outcomes, skills and knowledge required to implement the operational plan by monitoring and adjusting operational performance, producing short term plans for the department/section, planning and acquiring resources and providing reports on performance as required. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | Frontline managers are actively engaged in planning activities to achieve the measurable, stated objectives of the team and the organisation. This key role is carried out to provide safe, efficient and effective products and services to customer satisfaction within the organisation's productivity and profitability plans. At this level, work will normally be carried out within routine and non routine methods and procedures, which require planning, evaluation, leadership and guidance of others. |

Licensing/Regulatory Information

</table>
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- coaching and mentoring skills to provide support to colleagues
- literacy skills to access and use workplace information, and to prepare reports
- planning and organising skills to monitor performance and to sequence work of self and others to achieve planned outcomes.

Required knowledge

- principles and techniques associated with:
  - contingency planning
  - methods for monitoring and reporting on performance
  - monitoring and implementing operations and procedures
  - problem identification and methods of resolution
  - relevant budgeting and financial analysis, interpretation and reporting requirements
  - resource management systems at the tactical implementation level
  - resource planning and acquisition
  - tactical risk analysis including identification and reporting requirements.
Evidence Guide

Range Statement

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| **Resource requirements** may refer to: | - goods and services to be purchased and ordered  
| | - human, physical and financial resources - both current and projected  
| | - stock requirements and requisitions |

| **Relevant personnel, colleagues and specialist resource managers** may include: | - colleagues and specialist resource managers  
| | - managers  
| | - occupational health and safety committees and other people with specialist responsibilities  
| | - other employees  
| | - people from a wide range of social, cultural and ethnic backgrounds, and people with a range of physical and mental abilities  
| | - supervisors |

| **Operational plans** may refer to: | - organisational plans  
| | - tactical plans developed by the department or section to detail product and service performance |

| **Key performance indicators** may refer to: | - measures for monitoring or evaluating the efficiency or effectiveness of a system, and which may be used to demonstrate accountability and to identify areas for improvements |

| **Contingency planning** may refer to: | - contracting out or outsourcing human resources and other functions or tasks  
| | - diversification of outcomes  
| | - finding cheaper or lower quality raw materials and consumables  
| | - increasing sales or production  
| | - recycling and re-use  
| | - rental, hire purchase or alternative means of procurement of required materials, equipment and stock  
| | - restructuring of organisation to reduce labour |
### RANGE STATEMENT

| **costs** | • risk identification, assessment and management processes  
|          | • seeking further funding  
|          | • strategies for reducing costs, wastage, stock or consumables  
|          | • succession planning  

### Consultation processes may refer to:

- mechanisms used to provide feedback to the work team in relation to outcomes of consultation  
- meetings, interviews, brainstorming sessions, email/intranet communications, newsletters or other processes and devices which ensure that all employees have the opportunity to contribute to team and individual operational plans

### Organisation's policies, practices and procedures may include:

- organisational culture  
- Standard Operating Procedures  
- organisational guidelines which govern and prescribe operational functions, such as the acquisition and management of human and physical resources  
- undocumented practices in line with organisational operations

### Performance systems and processes may refer to:

- informal systems used by frontline managers for the work team in the place of existing organisation-wide systems  
- formal processes within the organisation to measure performance, such as:  
  - feedback arrangements  
  - individual and teamwork plans  
  - KPIs  
  - specified work outcomes

### Designated persons/groups may include:

- other affected work groups or teams and groups designated in workplace policies and procedures  
- those who have the authority to make decisions and/or recommendations about operations such as workplace supervisors, other managers

### Systems, procedures and records

- databases and other recording mechanisms for ensuring records are kept in accordance with
RANGE STATEMENT

may include:

- organisational requirements
- individual and team performance plans
- organisational policies and procedures relative to performance

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to assist with procurement for a project. It involves identifying procurement requirements, assisting with supplier selection, conducting procurement activities, and assisting with procurement finalisation activities for the project.
Application of the Unit

This unit applies to a project practitioner working in a project support role.

The individual may be operating in a large or small organisation and applying skills in the context of enterprise projects.

The project practitioner may be part of a project team under the direction of a project manager, or may work as part of a smaller scale self-directed team.

This unit has generic application to a range of industries and organisations and a range of projects, from simple to complex.

In the context of this unit a project is defined as involving:

- a practical and comprehensive project plan
- a documented communications strategy
- a detailed project budget
- strategic engagement with stakeholders
- a risk, issues and change-management methodology
- a quality plan with assurance and control processes
- a supportive team-based environment.

The functions performed in project work, where formal project management methodology is not the main focus, are covered by BSBPMG522A Undertake project work.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- interpersonal skills to communicate effectively with contractors and suppliers about contract performance and obligations
- literacy skills to read and interpret contracts and procurement documentation
- numeracy skills to calculate and confirm procurement specifications
- planning and organising skills to participate in contract and procurement management.

Required knowledge

- broad legal contractual obligations of each party to supply arrangement
- procurement-management policy, processes and procedures as applied to project management
- project procurement-management tools and techniques
- types of supply contracts.
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| Guidance information for assessment | Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended. |
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Procurement requirements may include: | • product and service definitions  
| | • quality specifications  
| | • resource identification  
| | • supply and delivery requirements  
| | • supply and engagement metrics, including:  
| |  • employment equity  
| |  • environmental  
| |  • intellectual property  
| |  • legal  
| |  • licences, permits and certifications  
| |  • security  
| |  • work health and safety (WHS)  
| | • work breakdown structure.  
| Delegated authority may be: | • subject to frequent change in a multi-disciplinary environment  
| | • under limited guidance and supervision  
| | • within agreed authorisation and limits  
| | • within established organisational framework, procedures and routines.  
| Procurement-management plan may include: | • acquisition criteria  
| | • contract administration  
| | • contract closure processes  
| | • general conditions of contract  
| | • organisational procurement policy and procedures  
| | • preferred suppliers  
| | • procurement-management processes  
| | • procurement statements of work  
| | • product and quality specifications  
| | • project resource requirements  
| | • supplier selection criteria  
| | • statement of works  
| | • type of supply and contract arrangements.  
| Procurement documentation | • assets and disposal actions |
**BSBPMG416A Apply project procurement procedures**

<table>
<thead>
<tr>

**Suppliers may include: ..................................................................................................................**

- consultant
- contractor
- subcontractor
- vendor.

**Probity and project governance constraints may include: ........................................................................**

- ethical behaviours
- limits of authority
- organisational policy and procedures
- prescribed decision escalation.

**Contractual documentation may include: ..................................................................................................**

- terms and conditions of contract
- type of supply contract:
  - cost plus
  - fixed price contract
  - good and services quotation
  - time and material.

**Procurement activities may include: .......................................................................................................**

- audit of environmentally sustainable supply practices
- collaborating with agencies and alliances
- conducting transfer and disposal actions
- confirming details and obtaining additional information about quotes
- formally receipting goods and services
- identifying WHS issues
- liaising with client, contractors, subcontractors and other stakeholders
- maintaining registers and lists
- obtaining approvals
- obtaining quotes from potential suppliers
- planning, specifying and/or conducting test and acceptance procedures
- processing payment documentation
- providing formal notice of delivery of goods and services
- providing quotes to potential clients.

<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Initiate interpersonal communication with clients | 1.1. Identify and use preferred client communication styles and methods  
1.2. Establish rapport with clients using verbal and non-verbal communication processes  
1.3. Investigate and act upon opportunities to offer positive feedback to clients  
1.4. Use open questions to promote two-way communication  
1.5. Identify and act upon potential barriers to effective communication with clients  
1.6. Initiate communication processes which relate to client needs, preferences and expectations |
| 2. Establish client relationship management strategies | 2.1. Develop client loyalty objectives focussing on the development of long term business partnerships  
2.2. Assess client profile information to determine approach  
2.3. Develop client loyalty strategies to attract and retain clients in accordance with the business strategy  
2.4. Identify and apply client care and client service standards |
| 3. Maintain and improve ongoing relationships with clients | 3.1. Develop strategies to obtain ongoing feedback from clients to monitor satisfaction levels  
3.2. Develop strategies to elicit feedback which provide information in a form that can be used to improve relationships with clients  
3.3. Obtain feedback to develop and implement strategies which maintain and improve relationships with clients |
| 4. Build and maintain networks | 4.1. Allocate time to establish and maintain business contacts  
4.2. Participate in business associations and/or professional development activities to establish and maintain a network of support for the business and to enhance personal knowledge of the market  
4.3. Establish communication channels to exchange information and ideas  
4.4. Provide, seek and verify information to the network |
# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- Communication skills to determine client needs and preferences through active listening and presenting ideas clearly and precisely
- Culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- Interpersonal skills to establish rapport, and to build and maintain relationships with clients.

### Required knowledge

- Key provisions of relevant legislation from all forms of government, codes of practice and national standards that may affect aspects business operations, such as:
  - Anti-discrimination legislation
  - Consumer laws including appropriate state/territory legislation
  - Ethical principles
  - Marketing code of practice
  - Privacy laws
  - Trade Practices Act
- Marketing communications concepts and processes
- Principles and techniques for effective communication and networking
- Sources of business related networks.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Preferred client communication styles and methods** may include:
- email
- face-to-face
- mail
- phone

**Verbal communication** may include:
- articulation
- clarity of speech
- feedback
- language
- listening skills
- open questions
- questioning skills
- voice modulation
- voice projection

**Non-verbal communication** may include:
- active listening
- body language
- body orientation
- clothing
- colour
- distance
- facial expression
- grooming
- gestures
- music
- posture
- sound
- touching
- voice

**Barriers to effective communication** may include:
- acting on false assumptions and stereotypes
- cultural differences not being addressed
- educational differences not being addressed
- failure to prominently display contact details in all communications provided to the client
### RANGE STATEMENT

- inappropriate word choice
- ineffective non-verbal communication
- lack of ‘contact us’ forms or pages on websites
- lack of distribution of reply paid cards or envelopes in mail outs
- lack of voice modulation and articulation
- limited opening hours of call centres or office
- not listening actively
- organisational factors
- physical, personal, gender and age differences not being addressed

#### Client loyalty strategies

- access to dedicated staff
- added value offers
- anniversary offers
- client clubs
- client reward schemes
- credit or discount facilities
- dedicated or private facilities
- discounts
- formal letter of thanks
- frequent purchaser programs
- handwritten note thanking the client
- offering promotional items
- phone call thanking client for the business
- regular recontact with best clients
- thank you gifts and promotions

#### Client care and client service standards

- accuracy of billing
- accuracy of product/service descriptions, specifications in marketing communications
- complaint resolution times
- incidences of stock outs and back orders
- on-hold times
- order delivery standards such as:
  - whether right product or service was delivered
  - delivered to right person or address
  - delivered on time
  - politeness, helpfulness and grooming of delivery staff
  - delivery vehicles parked properly
### RANGE STATEMENT

</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This Unit first released with <em>BSB07 Business Training Package version 7.0.</em></td>
</tr>
</tbody>
</table>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to participate in identifying work health and safety (WHS) hazards, assessing WHS risks, and controlling WHS risks to maintain a healthy and safe workplace.

Application of the Unit

This unit applies to individuals who assist with the identification of workplace hazards and the assessment of WHS risks as part of their WHS responsibilities, which are in addition to their main duties.

*NOTE:* The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

</table>
### Elements and Performance Criteria

| 1. Participate in workplace hazard identification | 1.1 Participate in selecting hazard identification methods suitable for the workplace, as appropriate  
1.2 Use selected methods to identify, report and record hazards according to workplace procedures and WHS Acts, regulations and codes of practice  
1.3 Provide information and assistance to persons conducting hazard identification |
|-------------------------------------------------|--------------------------------------------------------------------------------------------------|
| 2. Participate in WHS risk assessment | 2.1 Participate in selecting suitable risk assessment methods for the workplace, as appropriate  
2.2 Use selected methods to assess and record risks according to workplace procedures and WHS Acts, regulations and codes of practice  
2.3 Provide information and assistance to persons conducting risk assessments |
| 3. Promote and support worker consultation and participation in hazard identification and risk assessment | 3.1 Advise workers of, and consult them about, hazard identification and risk assessment activities according to workplace WHS consultation and participation policies, procedures and processes  
3.2 Encourage workers to participate appropriately in these activities according to workplace WHS consultation and participation policies, procedures and processes  
3.3 Advise workers of, and consult them about, the results and outcomes of these activities according to workplace WHS consultation and participation policies, procedures and processes |
| 4. Participate in developing, selecting and implementing WHS risk controls | 4.1 Obtain workplace records of the outcomes of hazard identifications and risk assessments, and use them to participate in developing risk control options  
4.2 Apply knowledge of WHS Acts, regulations, codes of practice, other sources of information and guidelines, and workplace policies, procedures and processes to identify duty holders  
4.3 Participate in selecting risk control options using appropriate criteria  
4.4 Identify and report factors impeding successful implementation of selected risk controls  
4.5 Participate in developing a risk control implementation and evaluation plan  
4.6 Provide information about the implementation and evaluation |
<table>
<thead>
<tr>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - contribute effectively to hazard identification and risk assessment activities
  - communicate with people from a range of backgrounds and with a range of abilities
- literacy skills to:
  - participate in hazard identification and risk assessment activities, and to record the results and outcomes of these activities
  - communicate risk control activities to workers, health and safety committees, health and safety representatives, managers, supervisors, and persons conducting businesses or undertakings (PCBUs) or their officers
- organisational and time-management skills to sequence tasks and meet timelines
- planning skills to choose appropriate methods for hazard identification and risk assessment
- research skills to:
  - identify sources of, and obtain information about, relevant WHS hazards
  - help workplace parties to obtain information about hazards.

Required knowledge

- basic principles of incident causation and injury processes
- concept of hazards, risks and risk factors
- hazard identification and risk assessment methods
- internal and external sources of WHS information and data, and how to access them
- organisational design and structure
- organisational WHS policies, procedures, processes and systems
- range of WHS hazards that may be present in the workplace, the harm they can cause and how this harm occurs
- relevant commonwealth and state or territory WHS Acts, regulations, codes of practice, standards and guidance material, and other relevant publications
- risk control options for different hazards and work situations
- risk control requirements as specified in WHS Acts, regulations, codes of practice, standards and guidance material, other relevant publications, workplace conditions and organisational WHS policies, procedures, processes and systems
- types of hazard and risk registers
- WHS legislative requirements about:
  - communication, consultation and participation
  - notification of incidents
  - recordkeeping
  - specific hazard identification and risk assessment methods
- workplace communication processes.
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>

| | • relevant Acts, regulations, codes of practice, licensing requirements and standards  
| | • relevant internal and external data files  
| | • appropriate computer resources needed to manage the identification and rectification of breaches in compliance requirements. |

<table>
<thead>
<tr>
<th>Method of assessment</th>
<th>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</th>
</tr>
</thead>
</table>
| | • analysis of responses to case studies and scenarios  
| | • demonstration of applying hazard identification, risk assessment and risk control techniques in the workplace  
| | • direct questioning combined with review of |
| portfolios of evidence and third-party reports of on-the-job performance by the candidate |
| oral or written questioning to assess knowledge of consequences and likelihood of risks associated with hazards in the workplace |
| review of research into WHS hazards and their associated risks |
| review of information provided to individuals and parties about selected risk controls |
| assessment of documentation completed when identifying hazards, assessing risks and developing risk control options. |

**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- other BSB07 WHS units.
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Persons conducting hazard identification and risk assessments may include: | • health and safety representatives  
• internal or external consultants and WHS specialists  
• PCBUs or their officers  
• WHS entry permit holders  
• WHS inspectors  
• workers  
• workplace assessors with experience in language or disability issues. |
|---|---|
| Risk control options may include: | • actions taken to eliminate risks entirely  
• actions taken to minimise risks by:  
  • eliminating the hazard  
  • substituting the hazard with something safer  
  • isolating the hazard  
  • reducing the risk through engineering controls  
  • reducing the level of harm by improving administrative controls, such as changing policies, procedures and processes or providing training  
  • using personal protective equipment (PPE), such as:  
    • clothing and footwear  
    • face and eye protection  
    • hand protection  
    • head protection  
    • hearing protection  
    • respiratory protection. |
| Duty holders may include: | • as specified in WHS Acts:  
  • PCBUs or their officers  
  • workers  
  • other persons at a workplace. |
<p>| Appropriate criteria may include: | • relevant sections of WHS Acts, regulations, and codes of practice |</p>

</tr>
</tbody>
</table>

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to establish, maintain and evaluate the organisation’s work health and safety (WHS) policies, procedures and programs in the relevant work area according to WHS legislative requirements.

Application of the Unit

This unit applies to managers working in a range of contexts. It takes a systems approach and addresses compliance with relevant legislative requirements.

Those who have or are likely to have responsibility for WHS as part of their broader management role should undertake this unit.

The unit is relevant for people with obligations under WHS legislation, for example persons conducting a business or undertaking (PCBU's) or their officers (as defined by relevant legislation).

NOTE: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.
Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>Elements and Performance Criteria</th>
<th>1. Establish and maintain a WHS management system</th>
<th>1.1 Locate, adapt, adopt and communicate WHS policies that clearly define the organisation’s commitment to complying with WHS legislation</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>1.2 Identify duty holders and define WHS responsibilities for all workplace personnel according to WHS legislation, policies, procedures and programs</td>
<td></td>
</tr>
<tr>
<td></td>
<td>1.3 Identify and approve financial and human resources required by the WHS management system (WHSMS)</td>
<td></td>
</tr>
<tr>
<td>2. Establish and maintain effective and compliant participation arrangements for managing WHS</td>
<td>2.1 Work with workers and their representatives to set up and maintain participation arrangements according to relevant WHS legislation</td>
<td></td>
</tr>
<tr>
<td></td>
<td>2.2 Appropriately resolve issues raised through participation and consultation arrangements according to relevant WHS legislation</td>
<td></td>
</tr>
<tr>
<td></td>
<td>2.3 Promptly provide information about the outcomes of participation and consultation to workers and ensure it is easy for them to access and understand</td>
<td></td>
</tr>
<tr>
<td>3. Establish and maintain procedures for effectively identifying hazards, and assessing and controlling risks</td>
<td>3.1 Develop procedures for ongoing hazard identification, and assessment and control of associated risks</td>
<td></td>
</tr>
<tr>
<td></td>
<td>3.2 Include hazard identification at the planning, design and evaluation stages of any change in the workplace to ensure that new hazards are not created by the proposed changes and existing hazards are controlled</td>
<td></td>
</tr>
<tr>
<td></td>
<td>3.3 Develop and maintain procedures for selecting and implementing risk controls according to the hierarchy of control and WHS legislative requirements</td>
<td></td>
</tr>
<tr>
<td></td>
<td>3.4 Identify inadequacies in existing risk controls according to the hierarchy of control and WHS legislative requirements, and promptly provide resources to enable implementation of new measures</td>
<td></td>
</tr>
<tr>
<td></td>
<td>3.5 Identify requirements for expert WHS advice, and request this advice as required</td>
<td></td>
</tr>
<tr>
<td>4. Evaluate and maintain a WHS management system</td>
<td>4.1 Develop and provide a WHS induction and training program for all workers as part of the organisation’s training program</td>
<td></td>
</tr>
<tr>
<td></td>
<td>4.2 Use a system for WHS recordkeeping to allow identification of patterns of occupational injury and disease in the organisation, and to maintain a record of WHS decisions made, including reasons for the decision</td>
<td></td>
</tr>
<tr>
<td></td>
<td>4.3 Measure and evaluate the WHSMS in line with the organisation’s quality systems framework</td>
<td></td>
</tr>
</tbody>
</table>
4.4 Develop and implement improvements to the WHSMS to achieve organisational WHS objectives
4.5 Ensure compliance with the WHS legislative framework so that, as a minimum, WHS legal requirements are achieved

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical and problem solving skills to examine relevant workplace information and data to identify hazards, and to assess and control risks
- communication skills to consult with staff and to promote a safe workplace
- information technology skills to store and retrieve relevant workplace information and data
- literacy skills to adapt and communicate WHS policies that reflect WHS legislative requirements
- problem-solving skills to deal with complex and non-routine difficulties.

Required knowledge

- hazard identification and risk-management processes
- hierarchy of risk control
- in-house and WHS legislative reporting requirements
- relevant WHS Acts, regulations and codes of practice that apply to the business operation.
Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

### Overview of assessment

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- detailed knowledge and application of all relevant WHS Acts, regulations and codes of practice
- establishing and maintaining arrangements for managing WHS within the organisation's business systems and practices
- identifying requirements for expert WHS advice.

**Context of and specific resources for assessment**

Assessment must ensure access to:

- appropriate documentation and resources normally used in the workplace.

**Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- analysis of responses to case studies and scenarios
- assessment of written reports
- demonstration of techniques
- direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate
- review of WHS policies, information provided on the WHSMS, and information about the outcomes of participation and consultation provided to workers
- oral or written questioning to assess knowledge of WHS and WHS legislation
- evaluation of WHS induction and training
- review of WHS recordkeeping system.

**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| WHS legislation may include: | • applicable commonwealth and state or territory WHS Acts, regulations and codes of practice  
| | • common law duties to meet general duty of care requirements  
| | • WHS legislative and regulatory requirements for:  
| | • effectively managing hazards  
| | • establishing consultation arrangements, including those for health and safety representatives and health and safety committees  
| | • providing information and training, including training in safe operating procedures; procedures for workplace hazards; hazard identification, risk assessment and risk control; and emergency and evacuation procedures  
| | • WHS legislative, regulatory and other requirements for the maintenance and confidentiality of records of occupational injury and disease. |

| Duty holders may include: | • as specified in WHS Acts:  
| | • officers  
| | • PCBUs or their officers  
| | • workers  
| | • other persons at a workplace. |

| Control of associated risks may include: | • administrative  
| | • as specified in WHS Acts, regulations and codes of practice  
| | • counselling/disciplinary processes, such as those associated with alcohol and other drugs  
| | • education about alcohol and other drugs work-related issues  
| | • engineering  
| | • hazard elimination  
| | • housekeeping and storage  
| | • issue resolution  
| | • personal protective equipment |
| **purchasing of supplies and equipment** | • audit and inspection reports  
• consultation, such as:  
  • meetings of health and safety committees  
  • work team meeting agendas, including WHS items and actions  
• first aid/medical post records  
• hazardous chemicals registers  
• induction, instruction and training  
• manufacturer and supplier information, including dangerous goods storage lists  
• plant and equipment maintenance and testing reports  
• workers’ compensation and rehabilitation records  
• workplace environmental monitoring records. |

**WHS recordkeeping** may relate to:

| workplace inspections, including plant and equipment. |

Regulation, Licensing and Risk – Work Health and Safety
BSBWOR502B Ensure team effectiveness

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit describes the performance outcomes, skills and knowledge required to facilitate all aspects of teamwork within the organisation. It involves taking a leadership role in the development of team plans, leading and facilitating teamwork and actively engaging with the management of the organisation. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement. |

Application of the Unit

| Application of the unit | This unit applies to managers and addresses the need for managers to facilitate work teams and to build a positive culture within work teams. The unit takes a systematic and planned approach to developing teams. It includes the soft skills as well as more structured approaches to the management of teams. At this level, work will normally be carried out within complex and diverse methods and procedures which require the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies. |

<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Establish team performance plan | 1.1. Consult team members to establish a common understanding of team purpose, roles, responsibilities and accountabilities in accordance with organisational goals, plans and objectives  
1.2. Develop performance plans to establish expected outcomes, outputs, key performance indicators and goals for work team  
1.3. Support team members in meeting expected performance outcomes |
| 2. Develop and facilitate team cohesion | 2.1. Develop strategies to ensure team members have input into planning, decision making and operational aspects of work team  
2.2. Develop policies and procedures to ensure team members take responsibility for own work and assist others to undertake required roles and responsibilities  
2.3. Provide feedback to team members to encourage, value and reward individual and team efforts and contributions  
2.4. Develop processes to ensure that issues, concerns and problems identified by team members are recognised and addressed |
| 3. Facilitate teamwork | 3.1. Encourage team members and individuals to participate in and to take responsibility for team activities, including communication processes  
3.2. Support the team in identifying and resolving work performance problems  
3.3. Ensure own contribution to work team serves as a role model for others and enhances the organisation’s image for all stakeholders |
| 4. Liaise with stakeholders | 4.1. Establish and maintain open communication processes with all stakeholders  
4.2. Communicate information from line manager/management to the team  
4.3. Communicate unresolved issues, concerns and problems raised by team members and follow-up with line manager/management and other relevant stakeholders  
4.4. Evaluate and take necessary corrective action regarding unresolved issues, concerns and problems raised by internal or external stakeholders |
### Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to explain team goals, to address team conflict and to build an environment of trust
- planning and organisational skills to keep team on track and focussed on work outcomes.

#### Required knowledge

- group behaviour
- strategies for mentoring and coaching to informally guide and instruct team members
- issue resolution
- strategies for gaining consensus.

## Overview of assessment

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:
- range of techniques that can be used to build work teams, strengthen communications in the team and resolve issues
- methods for engaging with stakeholders and obtaining advice from outside the work team, to ensure team is focussed and on track
- knowledge of group behaviour.

## Context of and specific resources for assessment

Assessment must ensure:
- access to appropriate documentation and resources normally used in the workplace.

## Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:
- analysis of responses to case studies and scenarios
- assessment of written reports
- demonstration of team building techniques
- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- observation of performance in role plays
- review of performance plans developed for work team
- review of policies and procedures developed to ensure team members take responsibility for own work.

## Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:
- other units from the Diploma of Management.
**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| **Consultation** may refer to: | • conducting meetings, interviews, brainstorming sessions, email/intranet communications, newsletters or other processes and devices which ensure that all employees have the opportunity to contribute to team and individual performance plans  
• mechanisms used to provide feedback to the work team in relation to outcomes of consultation |
| **Accountabilities** may refer to: | • responsibilities as defined in position descriptions, codes of conduct/behaviour, duty statements or similar  
• statement of conduct outlining responsibilities/actions/performance |
| **Performance plans** may refer to: | • individual performance plans linked to team goals  
• team plans based on work assignments and responsibilities |
| **Outcomes, outputs, key performance indicators** may refer to agreed: | • changes in work roles and responsibilities  
• improved individual and team, performance and participation  
• improvements to systems, operations  
• measures for monitoring and evaluating the efficiency or effectiveness of systems or services  
• quality standards and expectations  
• targets for productivity improvements such as reduced downtime, higher production levels, decreases in absenteeism  
• targets for training and development |
| **Support** may include: | • Coaching  
• Mentoring  
• Training and development opportunities  
• Clarification of roles and expectations |

| Release 1 | This version first released with *BSB07 Business Services Training Package Version 8.0.*  
Replaces BSBWRK410A Implement industrial relations procedures. |

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to work with employee and industrial relations policies and procedures. The unit covers communicating and implementing employee relations policies and procedures that meet statutory and legislative requirements, assisting in dealing with employee relations conflicts and issues, and generally working towards a harmonious industrial relations climate in the workplace.

Application of the Unit

This unit applies to those who support the organisation/employer in dealing with employee relations in the workplace.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

</tbody>
</table>
## Elements and Performance Criteria

| 1. Communicate and implement organisation’s employee relations policies and procedures | 1.1 Source and disseminate *relevant legislation, agreements, policies and procedures* to relevant *persons and groups*
| | 1.2 Implement agreements, policies and procedures according to site, *enterprise and statutory requirements*  
| | 1.3 Support workplace strategies to effectively communicate with relevant persons and groups on employee relations  
| | 1.4 Promote the organisation’s employee relations procedures to relevant persons and groups  
| | 1.5 Represent the organisation appropriately in discussions with key stakeholders |
| 2. Assist in minimising industrial relations conflict | 2.1 Monitor the implementation of industrial relations policies and procedures  
| | 2.2 Process documentation and report to *management* and other relevant parties about potential industrial relations conflicts  
| | 2.3 Support managers to contain industrial relations conflicts and deal with grievances and disputes, within limits of own authority  
| | 2.4 Work with employees to resolve personal grievances and prevent escalation of industrial relations conflicts  
| | 2.5 Work under supervision to source specialist *industrial relations expertise* |
| 3. Enhance employee relations | 3.1 Trial and implement strategies to monitor the implementation of the organisation’s employee relations policies and procedures  
| | 3.2 Implement strategies to facilitate feedback on the industrial climate  
| | 3.3 Implement strategies to strengthen relationships with relevant persons and groups  
| | 3.4 Provide information and feedback to management on employee relations  
| | 3.5 Provide information and advice to relevant persons and groups |
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- literacy and verbal communication skills to:
  - present information in clear and accessible ways
  - review complex documents from a range of sources
- negotiation and conflict-resolution skills to:
  - deal with sensitive information
  - resolve issues
- technology skills to use human resources information systems according to access and security guidelines.

Required knowledge

- grievance resolution policy and procedures
- employee and industrial relations policies and procedures, such as:
  - enterprise agreements
  - enterprise and workplace bargaining
- legislation, codes of practice and national standards relevant to role of employee representatives and employee organisations, for example:
  - equal employment opportunity (EEO) and anti-discrimination
  - international industrial relations systems where work undertaken has an international focus or context
  - workplace health and safety (WHS)
  - relevant federal, state and territory industrial relations systems and legislation.
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Unit Descriptor
Unit descriptor
This unit of competency specifies the outcomes required to manage an Occupational Health and Safety (OHS) system to ensure compliance with legislative requirements relating to security operations. It requires the ability to establish policies and procedures for the implementation of OHS in the workplace ensuring ongoing consultative processes. It also requires an ability to evaluate the effectiveness of the OHS system to identify procedural improvements.

This unit may form part of the licensing requirements for persons engaged in security operations in those states and territories where these are regulated activities.

Application of the Unit
Application of the unit
This unit of competency has wide application in a range of managerial roles in the security industry. Work is performed under minimal supervision and competency requires a high level of judgement and decision-making. The knowledge and skills described in this unit are to be applied within relevant legislative and organisational guidelines.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and/or the range statement. Assessment of performance is to be consistent with the evidence guide.
### Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1 Establish an OHS system. | 1.1 **OHS system** is developed which clearly states commitment to OHS and compliance with **legislative requirements**.  
1.2 **OHS roles and responsibilities** for all employees are defined.  
1.3 Financial and human resources for the effective operation of the OHS system are established and implemented.  
1.4 OHS induction and **training program** is developed and made available to all employees.  
1.5 System for **OHS record keeping** is established and maintained to allow identification of **hazard, risk** and injury patterns.  
1.6 **OHS information and procedures** are communicated and explained to all employees in an accessible format in accordance with legislative requirements. |
| 2 Establish participative arrangements for OHS. | 2.1 **Consultative processes** are established and maintained to ensure maximum OHS vigilance and compliance of all employees.  
2.2 OHS issues raised through participation and consultation are acknowledged and resolved promptly.  
2.3 Feedback from OHS consultation and any changes to procedures are **recorded** and communicated promptly to all employees. |
| 3 Establish procedures for managing hazards and risks. | 3.1 Procedures for **identifying hazards** and **managing risks** are developed in accordance with legislative requirements.  
3.2 Hazard identification is addressed at the planning, design and evaluation stages of any change in workplace to ensure new hazards are not created.  
3.3 Procedures for selection and implementation of risk control measures in accordance with the hierarchy of control are developed and maintained.  
3.4 Inadequacies in procedures for hazard identification and risk control are identified and new measures promptly established. |
| 4 Evaluate system effectiveness. | 4.1 Evaluation of the OHS system is undertaken using **verifiable evidence**.  
4.2 Improvements to the OHS system are developed and implemented to achieve organisational OHS objectives.  
4.3 Compliance with the OHS legislative framework is continually assessed to ensure that legal obligations are met. |
ELEMENT | PERFORMANCE CRITERIA
--- | ---
4.4 All OHS documentation is maintained in accordance with legislative requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge and their level required for this unit.

Required skills

- access and use workplace information
- active listening
- adapt personal communication style to a variety of situations
- analyse and evaluate information and data
- coaching and mentoring to provide support to colleagues
- communicate in a clear and concise manner
- consultation
- effectively work with teams and individuals
- negotiation
- numeracy skill to calculate resources and costings
- planning
- reading to interpret complex information
- relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- research, analyse and interpret information from a variety of people and reporting
- solve problems to deal with complex and non routine difficulties
- use a range of communications equipment
- use technology to research, analyse and report information
- writing to develop complex reports.

Required knowledge

- applicable OHS licensing and legislative compliance requirements
- application of the hierarchy of control
- approved communication terminology and call signs
- available support agencies and the types of services offered
- difference between negative and positive language
- differences between written and spoken English
- how to read and use body language to gain confidence of others
- how to record information which may be used for legal purposes
- how to safeguard confidential information
REQUIRED SKILLS AND KNOWLEDGE

- how to use business equipment to present information
- intervention points for expert OHS advice
- negotiation techniques
- non conformance reporting requirements
- OHS implications relating to use of guard dogs, apprehension or arrest of persons, use of firearms, use of restraints, handcuffs, batons and spray
- organisational standards for the presentation and maintenance of written information
- power plays and how they are used in conflict situations
- principles and practices of effective OHS management
- principles and techniques associated with modelling safe work practices, hazard identification and risk management
- principles of AS/NZS 4360: 2004 Risk management
- tactical response measures
- use of force guidelines.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of:

- managing organisational compliance with applicable OHS legislation and licensing, and implementing consultative arrangements to ensure individual and team OHS awareness and compliance
- developing a comprehensive OHS system which maximises implementation of OHS policies and procedures
- conducting an evaluation of the OHS system and using the findings together with consultation processes as the basis for implementing improvements
- establishing systems for ensuring OHS records and information meet legal compliance requirements.

Context of and specific resources for assessment

Context of assessment includes:

- a setting in the workplace or environment that simulates the conditions of performance described in the elements,
performance criteria and range statement.

Resource implications for assessment include:

- access to a registered provider of assessment services
- access to a suitable venue and equipment
- access to plain English version of relevant statutes and procedures
- assessment instruments including personal planner and assessment record book
- work schedules, organisational policies and duty statements.

Reasonable adjustments must be made to assessment processes where required for people with disabilities. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

**Method of assessment**

This unit of competency should be assessed using questioning of underpinning knowledge and skills.

**Guidance information for assessment**

Assessment processes and techniques must be culturally appropriate and suitable to the language, literacy and numeracy capacity of the candidate and the competency being assessed. In all cases where practical assessment is used, it should be combined with targeted questioning to assess the underpinning knowledge.

Oral questioning or written assessment may be used to assess underpinning knowledge. In assessment situations where the candidate is offered a choice between oral questioning and written assessment, questions are to be identical.

Supplementary evidence may be obtained from relevant authenticated correspondence from existing supervisors, team leaders or specialist training staff.

**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**OHS system may**

- counter terrorism
- designated OHS personnel and committees
include:

- designing safe operations and systems of work
- duty of care requirements
- emergency and evacuation policies and procedures
- incorporation of expert OHS advice as required
- injury management and workers compensation
- issue resolution and conflict negotiation processes
- mechanisms for obtaining updated information (e.g., health effects of hazards, technical developments in risk control, changes to legislation, security alerts and industry trends)
- mechanisms for updating OHS policies and procedures
- planning and implementing changes to security operations and tactical response strategies
- procedures for maintenance and storage of equipment and weapons
- procedures for purchasing of materials and equipment
- procedures, timeframes and accountabilities for reporting OHS issues
- provision of counselling and stress management processes
- provision of OHS information and training
- provisions for first aid equipment and response
- restraint and apprehension of persons
- security licensing requirements
- system for communicating OHS information to individuals and teams
- use of firearms, handcuffs, batons and spray
- use of force guidelines.

Legislative requirements may relate to:

- anti-discrimination and diversity
- Australian standards, codes of practice and regulations
- award and enterprise agreements
- duty of care
- evidence collection
- licensing arrangements and certification requirements
- OHS issue resolution
- relevant commonwealth, state and territory OHS legislation, codes of practice and regulations
- roles and responsibilities of OHS representatives and committees
- trade practices
- use of force.
- fire wardens
- first aid officers
- general duty of care
- OHS chain of command

OHS roles and responsibilities may include:
Training program may include:

- OHS committee representatives
- OHS officers
- safe workplace practices.

OHS record keeping may relate to:

- audit and inspection reports
- consultation processes (eg OHS Committee meeting papers)
- equipment maintenance and testing reports
- first aid or medical post records
- hazardous substances register
- identifying records required under OHS legislation (eg, major accident and injury notifications, certificates, licenses, dangerous goods storage register)
- manufacturer and supplier information relating to security equipment
- records of induction, instruction and training
- workers compensation and rehabilitation records
- workplace environmental monitoring records.

Hazard relates to:

- any thing (including an intrinsic property of a thing) or situation with the potential to cause injury or harm.

Risk relates to:

- the chance of something happening that will have an impact on objectives.

Security risks may include:

- biological hazards
- chemical spills
- electrical faults
- explosives
- injury to personnel
- noise, light, heat, smoke
- persons carrying weapons
- persons causing a public nuisance
- persons demonstrating suspicious behaviour
- persons suffering from emotional or physical distress
- persons under the influence of intoxicating substances
- persons with criminal intent
- persons, vehicles and equipment in unsuitable locations
• suspicious packages or substances
• terrorism
• violence or physical threats.

**OHS information and procedures may relate to:**

• application of organisational OHS policies and procedures
• back-up
• compliance with applicable legislation, standards and regulations related to OHS
• current security industry risks and alerts
• identified hazards
• outcomes of risk assessment and control processes
• procedures for evacuation, application of first aid and emergency response
• processes for raising OHS issues
• tactical response
• up-to-date OHS issues and industry safety trends
• use of force
• use of restraints, handcuffs, batons, spray and firearms.

**Consultative processes may include:**

• establishment and use of OHS committees and other committees
• establishment and use of OHS representatives and first aid officers
• involvement of individuals and teams in OHS management activities (e.g., OHS inspections, audits, environmental monitoring, risk assessment and control, emergency simulations)
• mechanisms for employees to raise OHS issues
• provision of regular OHS bulletins, notices and information.

**OHS records may relate to:**

• first aid and medical post records
• hazardous substances registers
• health surveillance and monitoring of work environment
• identified hazards and risks
• industry warnings and security alerts
• maintenance and testing reports
• manufacturer and supplier information, including materials safety data sheets and dangerous goods storage lists
• OHS audits and inspections
• OHS instruction and training
• OHS issues which have been raised and reported
• reports of accidents and injury
• workers compensation and rehabilitation records.

**Procedures for**

• consultation
identifying hazards may include:
- continuous monitoring of work environment
- debrief and review of security incidents
- regular informal and informal discussions with colleagues
- regular inspections of equipment and work area
- review of OHS records.

Managing risks may involve:
- application of the hierarchy of control
- complying with safe operating procedures for equipment
- correct selection, use, storage and maintenance of Personal Protective Equipment (PPE)
- evacuation
- maintaining vigilance, awareness and observation in the work environment
- OHS communication and reporting
- requests for back-up support or instructions
- safe lifting and manual handling
- security of documents, cash, equipment and persons
- use of fire safety equipment
- use of reasonable force.

Verifiable evidence may include:
- auditable documentation and reports
- employee and client questionnaires
- number of hazards, accidents, injuries or near misses
- quality assurance data
- records of complaints and actions taken for resolution.

FPICOT3261 Transport forestry logs using trucks

Modification History
Replaces FPICOT3226B, Not Equivalent

Unit Descriptor

This unit describes the outcomes required to drive log trucks to or from a forestry harvesting site, facilitate log loading and unloading, and deliver logs to their intended destination according to organisational procedures and regulations.

General workplace legislative and regulatory requirements apply to this unit. Specific licences and certification may be required, subject to enterprise requirements.

Application of the Unit

The unit involves transporting forestry logs using trucks in a variety of work settings, including forest environments, landings, log dumps, saw mills, wood chip mills, veneer mills, board/plywood mills and other settings, such as farms and agriculture.

The skills and knowledge required for competent workplace performance are to be used within the scope of the person’s job and authority.

Licensing/Regulatory Information

</table>
| **1. Prepare to transport logs** | 1.1. Appropriate work/occupational health and safety (WHS/OHS), environmental and organisational policies and procedures relevant to transporting forestry logs using trucks are identified and followed  
  1.2 Logging sites and logs to be transported are identified from schedules, work orders or harvesting site personnel  
  1.3. Coupe map is located and examined for truck access areas  
  1.4. Work order and/or schedules are reviewed and clarified with appropriate personnel, as required  
  1.5. Truck, ancillary equipment, accessories and/or configuration requirements relevant to work order and load build are located and availability is confirmed  
  1.6. Transportation documentation required to comply with legislation related to driving hours, load limits and dimensions is received and checked |
| **2. Establish route for log truck** | 2.1. Route is selected and its suitability to enter and exit coupe is confirmed with appropriate personnel to ensure minimal environmental impact and site protection  
  2.2. Transport routes are communicated and confirmed with appropriate personnel to ensure the most efficient, safe, secure and legal movement of forestry logs  
  2.3. Information on height, width and load limits of road infrastructure, environmental constraints and other restrictions are adhered to, where necessary  
  2.4. Time required to transport logs is estimated and confirmed with relevant personnel accounting for fatigue management legislation and guidelines |
| **3. Facilitate log truck loading** | 3.1. Access is identified and manoeuvring approach established with worksite personnel for loading areas  
  3.2. Truck and/or configuration are positioned to avoid site and equipment hazards and to maximise load safety and security while loading  
  3.3. Log positioning equipment is placed and checked for planned loading, and is reset if necessary  
  3.4. Safe loading procedures are agreed to with relevant worksite |
ELEMENT  | PERFORMANCE CRITERIA
--- | ---
 | personnel and monitored to ensure load meets transport regulatory requirements
3.5. Communication between driver and machine operators is established and maintained to determine safe location when loading logs
3.6. Load is checked and feedback provided to loader operator, as required, to ensure safe transport
4. Secure logs prior to transport | 4.1. Load is secured with sufficient number and type of securing devices as per loading guidelines and transport regulatory requirements
4.2. Logs are re-tensioned as required
4.3. Overhang warning devices and signage are fitted to load to comply with transport regulatory requirements
5. Transport logs | 5.1. Logs are transported following planned or modified route with consideration for road surfaces, conditions and fatigue management legislation and guidelines
5.2. Condition of roads and tracks is monitored, and unexpected ground, water, vegetation or other environmental conditions are reported to appropriate personnel
5.3. Truck is operated and driven to manufacturer specifications and legislative requirements using primary and subsidiary controls as appropriate to conditions
5.4. Truck gauges and warning devices are monitored through observation of performance to detect operating faults
5.5. Operating faults are identified, recorded and reported, and responded to as necessary according to organisational requirements to ensure equipment is safely operated within manufacturer specifications and safety regulations
5.6. Periodic load safety checks are conducted and load is re-tensioned according to statutory requirements and road conditions
5.7. Communication methods with other drivers and road users are established and operated during log transport to inform location of truck and possible hazards
5.8. Communication channels are kept open in line with organisational arrangements to ensure location is known at all times so that timely emergency assistance can be provided if required
6. Complete log transport operations for unloading | 6.1. Site procedures for unloading are established with appropriate personnel and site inductions are completed
6.2. Truck is directed to and manoeuvred into planned position for unloading
ELEMENT PERFORMANCE CRITERIA

6.3. Truck is parked in designated area as instructed by appropriate personnel to avoid site and equipment hazards

6.4. Truck and trailer are shut down and truck is secured according to manufacture specifications and site requirements

6.5. Load is inspected for log movement and provision is made to support logs that cannot be controlled when released

6.6. Safe location and safe unloading zones are identified and adhered to when removing logs according to site unloading procedures

6.7. Securing devices for load restraint are released in correct sequence for truck, trailer and/or load configuration

6.8. Log shifting process and truck operations, including faults, are recorded and reported to appropriate personnel

6.9. Workplace records and documentation are completed and maintained according to workplace procedures

6.10. Truck and trailer are made safe for return journey to coupe
Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Required skills

- Technical skills to:
  - use and maintain relevant tools, machinery and equipment
  - efficiently and safely transport forestry logs using trucks
- Communication skills to:
  - use appropriate communication and interpersonal techniques with colleagues and others
  - use skills, including questioning, active listening, asking for clarification, and seeking advice when required
- Literacy skills to:
  - record and report workplace information, including log books, incident reports, and transport routes
  - maintain documentation
- Numeracy skills to:
  - calculate load sizes
  - record and estimate weights
  - calculate work and rest times
  - calculate load restraint requirements
- Problem-solving skills to:
  - identify problems and equipment faults
  - demonstrate appropriate response procedures
  - determine appropriate haulage routes
  - Map reading skills to interpret coupe and road transport maps

Required knowledge

- WHS/OHS, environmental, and organisational policies, procedures and established safe practices relevant to the full range of processes for the transport of forestry logs using trucks
- Environmental protection requirements, including noise levels, emissions, damage to habitat, safe disposal of waste material, and minimisation of carbon emissions
- Environmental risks and hazards associated with the transport of forestry logs using trucks
- Energy efficient practices, including minimising fuel consumption
- Scheduling and routing procedures
- Transport regulatory requirements relating to the transport of forestry logs
- Truck capabilities and capacities
- Statutory road regulations
- Load restraint standards and techniques
- Safe log loading and unloading methods and techniques, including load restraint
- Established communication channels and protocols
- Fatigue management legislation and guidelines
- Problem identification and resolution strategies and common fault finding techniques
- Types of tools and equipment used for the transport of forestry logs, and procedures for their safe use, operation and maintenance
- Safe manual handling techniques and/or equipment
- Applicable fall from heights regulations and compliance requirements
- Appropriate mathematical procedures for calculating load sizes, estimating and recording weights, load restraint requirements, and work and rest times
- Procedures for recording and reporting workplace information
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to provide evidence that they can safely transport forestry logs using trucks according to organisational requirements.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to, and satisfy, all of the requirements of the elements of this unit and include demonstration of:

- following appropriate WHS/OHS, environmental and organisational policies and procedures relevant to transporting forestry logs using trucks
- planning forestry log movement in line with organisational requirements
- observing and facilitating loading and unloading log truck to organisational requirements
- securing forestry logs prior to transport according to legislative and organisational requirements
- following legal requirements as well as organisational policies and procedures relevant to transporting forestry logs
- completing documentation required by workplace personnel to complete the movement of forestry logs.

Context of and specific resources for assessment

- Competency is to be assessed in the workplace
- Assessment is to occur under standard and authorised work practices, safety and environmental constraints
- Assessment of required knowledge, other than confirmatory questions, will usually be conducted in an off-site context
- Assessment is to comply with relevant regulatory or Australian Standards requirements
- The following resources should be made available:
  - workplace location
  - materials and equipment relevant to undertaking work applicable to this unit
  - specifications and work instructions

Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the FPI11 Training Package
- Assessment methods must confirm consistency and accuracy of performance (over time and in a range of
workplace relevant contexts) together with application of required knowledge

- Assessment must be by direct observation of tasks, with questioning on required knowledge and at least one other type of evidence i.e. third party report and it must also reinforce the integration of employability skills
- Assessment methods must confirm the ability to access and correctly interpret and apply the required knowledge
- Assessment may be applied under project-related conditions (real or simulated) and require evidence of process
- Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances
- Assessment may be in conjunction with assessment of other units of competency relevant to the industry sector, workplace and job role
- The assessment environment should not disadvantage the candidate
- Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender or language backgrounds other than English
- Where the participant has a disability, reasonable adjustment may be applied during assessment
- Language and literacy demands of the assessment task should not be higher than those of the work role

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

RANGE STATEMENT

Work/occupational health and safety (WHS/OHS) requirements: are to be in accordance with applicable commonwealth, state or territory legislation and regulations, and organisational safety policies and procedures, and may
RANGE STATEMENT

include:

- personal protective equipment and clothing
- safety equipment
- first-aid equipment
- fire-fighting equipment
- fatigue management
- hazard and risk control
- elimination of hazardous materials and substances
- safe forest practices, including required actions relating to forest fire
- manual handling, including shifting, lifting and carrying
- chain of responsibility

Environmental requirements may include:

- legislation
- organisational policies and procedures
- energy efficiency
- workplace practices

Organisational requirements may include:

- legal
- organisational and site guidelines
- policies and procedures relating to own role and responsibility
- quality assurance
- procedural manuals
- quality and continuous improvement processes and standards
- WHS/OHS, emergency and evacuation procedures
- ethical standards
- recording and reporting requirements
- equipment use, maintenance and storage requirements
- environmental management requirements (waste disposal, recycling and reuse guidelines)

Work orders may include:

- instructions for equipment allocation and usage, location and intended activity to designated personnel
- supervisors
- suppliers
- clients
- colleagues
- managers
- schedulers
RANGE STATEMENT

**Truck** may include:
- rigid or articulated log trucks
  the following:
  - semi-trailers
  - jinkers
  - quad-dogs
  - B doubles
  - two-bay skeletal trucks

**Ancillary equipment** may include:
- safety fittings
- load restraint devices
- head boards
- cab guards

**Accessories** may include:
- tools
- records
- first aid kits
- fire extinguishers
- binders
- chains
- personal protective equipment

**Configuration** is to include:
- a truck and trailer combination

**Load build:** is to include positioning of logs on truck so as to avoid:
- uneven weight distribution
- instability or uncontrolled collapse of the load
during loading or unloading

must also take into account:
- requirements for trailer rigidity
- turning clearance
- overhang
- projection above stanchions
- crowning
- weight distribution on truck and trailer axles
- contact with bolsters, stanchions and other logs

**Transportation documentation may include:**
- transport permits
- gazette notices
- information booklets
- maps

**Communication** may include:
- verbal and non-verbal language
- active listening
- questioning to clarify and confirm understanding
RANGE STATEMENT

- use of positive, confident and cooperative language
- use of language and concepts appropriate to individual social and cultural differences
- control of tone of voice
- body language

**Road infrastructure** may include:
- sealed or unsealed roads
- established tracks

**Environmental constraints** may include:
- soil type
- access
- slope
- weather conditions

**Other restrictions** may include:
- load height
- weight
- overhang

**Log positioning equipment** may include:
- bolsters
- slippers
- stanchions
- chocks

**Securing devices may include:**
- dogs and chains
- binders/straps
- webbing
- lashings and winches
- auto-tensioning devices

**Overhang warning devices may include:**
- flags
- lights
- reflectors
- signs

**Environmental conditions** may include:
- soil and water protection
- ground hazards and obstacles
- wind and dust
- fog and rain

**Primary controls** may include:
- power
- brakes
- steering
- speed
- position
- load reaction
- gear selection

**Subsidiary controls** may include:
- differential lock
RANGE STATEMENT

Gauges and warning devices may include:

- centre tyre inflation (CTI) power dividers
- alarms
- lights
- buzzers

Records and reports: may include:

- scheduling and coordination outcomes
- log movement
- despatch outcomes
- storage locations
- quality outcomes
- hazards
- incidents
- equipment malfunctions

may be:

- manual
- work diary
- computer-based system
- other appropriate organisational communication system

Re-tensioning is to include:

- re-tightening of the chains, binders and other load restraint devices

Communication methods may include:

- two-way radio
- hands-free mobile phones

Unit Descriptor

Descriptor

This unit of competency describes the skills and knowledge required to respond effectively to behaviours of concern in clients and others.

These skills are associated with handling difficult incidents rather than managing ongoing behaviours.

Application of the Unit

Application

The unit will be suitable for work roles such as Security Officers, Care Assistance Workers and others exposed to behaviours of concern.

Application of this unit should be contextualised to reflect any requirements, issues and practices specific to each workplace.

3.4 Seek advice and assistance from legitimate sources as and when appropriate |
Required Skills and Knowledge
REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:
The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role
This includes knowledge of:
- Client issues needing to be referred to an appropriate health professional
- OHS issues relating to difficult and challenging behaviour
- Organisation's reporting processes

Essential skills:
It is critical that the candidate demonstrate the ability to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role
This includes the ability to:
- Effectively use techniques for monitoring own service area including client satisfaction
- Foresee and respond quickly and effectively to contingencies
- Identify when assistance is required
- Interpret and follow the instructions and guidance of health professionals involved with the care of client
- Maintain duty of care
- Maintain personal safety and the safety of others
- Monitor and/or maintain security equipment
- Remain alert to potential incidents of difficult or challenging behaviour
- Remain calm and positive in adversity
- Speak in a firm, diplomatic and culturally appropriate manner
- Think and respond quickly and strategically
- Use literacy skills in reading, writing and oral communication to fulfil job role in a safe manner and as specified by the organisation, including:
  - understand symbols used in OHS signs
REQUIRED SKILLS AND KNOWLEDGE

- read workplace safety pamphlets or procedure manuals and labels
- use appropriate verbal and non-verbal communication styles
- ask questions
- provide clear information
- listen to and understand workplace instructions and clarify when necessary
- apply literacy skills as required in English or a community language.
- Use numeracy skills to complete basic arithmetic calculations such as addition, subtraction, multiplication, division to recording numbers
- Use problem solving skills to:
  - effectively utilise available resources
  - prioritise workload
- Work with others and display empathy with client and relatives

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate this competency unit:

- The individual being assessed must provide evidence of specified essential knowledge as well as skills
- This unit is most appropriately assessed in the workplace (simulating difficult or challenging behaviour) or in a simulated workplace and under the normal range of work conditions
- This unit can be assessed independently, but holistic assessment practice is encouraged with other related units of competency
- Assessment may be conducted on one occasion but should include a diverse range of sources of difficult and challenging behaviours, as may be expected in the workplace
- A diversity of assessment tasks is also essential for holistic assessment
EVIDENCE GUIDE

Access and equity considerations:

- All workers in the health industry should be aware of access and equity issues in relation to their own area of work.
- All workers should develop their ability to work in a culturally diverse environment.
- In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people.
- Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Planned responses may be based on:

- Established organisation procedures
- Knowledge of individual persons and underlying causes
- Own ability and experience
RANGE STATEMENT

Difficult or challenging behaviours may include:
- Aggression
- Confusion or other cognitive impairment
- Intoxication
- Intrusive behaviour
- Manipulation
- Noisiness
- Self-destructive
- Verbal offensiveness
- Wandering

Strategies for dealing with challenging behaviours may include:
- Diversional activities
- Following established emergency response procedures
- Referring to appropriate personnel eg supervisor, security officer

Selection of strategies for dealing with challenging behaviours may be based on:
- Established procedures and guidelines
- Potential effect on different parties, clients, staff and others
- The nature of the incident

Organisation policies and procedures may include:
- Debriefing of staff involved in incident
- Incident reporting and documentation
- Operational guidelines for handling incidents and/or cases involving difficult and challenging behaviour

Unit Sector(s)
Not Applicable
MARC1001A Carry out shore-based mooring and untying operations

Modification History
Release 1
This is the first release of this unit.
This unit replaces and is equivalent to TDMMR5607A Carry out shore-based mooring and untying operations.

Unit Descriptor
This unit involves the skills and knowledge required to carry out shore-based mooring and untying operations according to relevant requirements and regulations.

Application of the Unit
This unit applies to people working in the maritime industry under supervision as a shore-based lines person.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
Elements and Performance Criteria

1 Prepare a berth

1.1 Relevant documentation and records are identified and accessed as required

1.2 Positioning information is obtained, checked and confirmed as accurate

1.3 Bridge marker is set

1.4 Briefing is obtained and interpreted on any issues related to mooring or untying operation

1.5 Communications equipment is prepared and set to correct channels

1.6 Berth conditions are checked and made clear and ready for mooring

1.7 Portainer cranes are correctly positioned for berthing of vessel

1.8 Safety concerns are communicated to pilot of vessel with due care not to interfere with tug and vessel communications

2 Receive heaving line from mooring launch

2.1 First line is received from mooring launch according to operational procedures and pilot directions

2.2 Assistance is provided in pulling mooring line ashore and making it fast to applicable bollard

2.3 Required precautions and safety procedures are followed during receival operations

3 Receive heaving lines from vessel

3.1 First lines are received and are made fast to appropriate bollards

3.2 Where possible, two headlines and two sternlines are made available each to two different bollards

3.3 Spring lines from forward and aft are received from vessel and are attached to applicable bollards

3.4 Additional lines are received from vessel and attached to applicable bollards

4 Return heaving line to vessel

4.1 Vessel crew are made aware of planned heaving line return operations

4.2 Lines are returned according to operational procedures

4.3 Required precautions and safety procedures are followed during heaving line return operations
5 Land a gangway

5.1 Precautions are taken to ensure all personnel are well clear of vicinity of gangway

5.2 Vehicle is used to locate gangway in correct position in a safe and efficient manner

6 Untie and let go vessel

6.1 Vessel crew is made aware of intentions to let go

6.2 Singling up processes are carried out according to operational procedures and required safety precautions

6.3 Due care is taken during singling up processes to ensure aft springs and stern lines are kept clear of propeller

6.4 Due care is taken when waiting for order for remaining lines to be released to stand clear of remaining lines because of strain to which lines may be subjected

6.5 Once order is given, remaining lines are released according to operational procedures and required safety precautions

6.6 When vessel crew inadvertently heaves on a line being handled by shore-side team, line is let go immediately

6.7 Required precautions and safety procedures are followed during untying operations
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

**Required Skills:**

- Communicate effectively with other personnel when mooring and untying a vessel using standard nautical terms
- Comply with relevant maritime regulations and International Maritime Organization (IMO) Conventions and Codes, including the relevant sections of the Australian Maritime Safety Authority (AMSA) Marine Orders as they apply to mooring and untying operations on ocean-going vessels
- Follow work instructions
- Handle rope appropriately and correctly:
  - storing and caring for ropes and lines
  - tying knots such as bowline, reef knot, overhand knot, figure of eight knot, sheet bend and clove hitch
  - applying a chain stopper to a wire rope
  - heaving on a line in collaboration with other members of a mooring team
  - applying a stopper to a synthetic fibre rope
  - applying a chain stopper to a natural cordage rope
  - attaching a line to a bollard or bitt with all lines in correct order such as up through the eye
  - flaking down a rope
  - forming a bight
- Identify and correctly use:
  - various types of ropes, steel wires and mooring equipment
  - personal protective equipment (PPE)
- Implement port and vessel security procedures
- Interpret and follow procedures for mooring and untying operations, including safety instructions and precautions
- Recognise dangers and hazards before and during mooring operations, and take appropriate action to report and/or rectify them
- Recognise problems that may occur during mooring operations and take appropriate action to report and/or resolve them
- Take proper care of ropes and mooring equipment
- Work effectively as a member of a mooring and untying team

**Required Knowledge:**

- Communication techniques and equipment required during mooring and untying operations
• Dangers associated with mooring systems:
  • being hit by a line being thrown down from a vessel
  • stepping inside the bight of a line
  • being struck by a parting line
  • mixing rings and wire rope
  • falling off the edge of the wharf into the water
  • back strain from carrying a line, heaving on a line or heaving on a line with one hand
  • ‘snap back’ when a synthetic line breaks
  • trip hazards such as crane lines

• Factors that affect mooring and untying operations, including the effects of wind, weather, tides, sea conditions, currents, draft changes and surges from passing vessels on mooring and untying operations

• Hazards and problems, and appropriate preventative and remedial action and solutions

• Maritime regulations applicable to mooring and untying vessels

• Methods for mooring and untying a vessel, including all required rope handling techniques and precautions

• Operational characteristics of different types of lines, equipment and facilities used in mooring and untying operations

• Operational procedures and layouts of various types of shore-side loading and discharging terminals and wharves

• PPE required for use during mooring and untying operations

• Procedures for assessing stresses on lines and gear used in mooring and untying operations

• Relevant sections of STCW 95 and AMSA Marine Orders

• Relevant manufacturer guidelines relating to use of machinery, including instructions on equipment capability and limitations

• Relevant work health and safety (WHS)/occupational health and safety (OHS) codes of practice, policies and procedures

• Standard nautical terms in relation to mooring activities and related equipment

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, the required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the Elements, Performance Criteria, Required Skills, Required Knowledge and include:
- initiating timely action in response to defects or damage
- being aware of own ability and limits to rectify irregularities and faults
- following all orders carefully and systematically
- ensuring behaviour reflects relevant current legislative and regulatory requirements.

**Context of and specific resources for assessment**

Performance is demonstrated consistently over time and in a suitable range of contexts.

Resources for assessment include access to:

- industry-approved marine operations site where carrying out shore-based mooring and untying operations can be conducted
- tools, equipment and PPE currently used in industry
- relevant regulatory and equipment documentation that impacts on work activities
- range of relevant exercises, case studies and/or other simulated practical and knowledge assessments
- appropriate range of relevant operational situations in the workplace.

In both real and simulated environments, access is required to:

- relevant and appropriate materials and equipment
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

**Method of assessment**

Practical assessment must occur in an:

- appropriately simulated workplace environment and/or
- appropriate range of situations in the workplace.

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate to this unit:

- direct observation of the candidate carrying out shore-based mooring and untying operations
- direct observation of the candidate applying relevant WHS/OHS requirements and work practices.

**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

In all cases where practical assessment is used it should be combined with targeted questioning to assess Required Knowledge.

Assessment processes and techniques must be appropriate to the language and literacy requirements of the work being performed and the capacity of the candidate.
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below.

Relevant documentation and records may include:
- Mooring and untying plans, procedures, checklists and instructions
- Relevant maritime authority instructions
- Relevant sections of maritime regulations concerning mooring and untying operations
- Reports and records of mooring operations or any safety incident
- Rope and equipment manufacturer instructions and procedures
- Safety instructions and procedures

Bridge marker must include:
- At night, vehicle with flashing hazard light positioned on bridge marker
- Flag

Issues related to mooring or untying operations may include:
- Bollard numbers
- Special circumstances

Made clear and ready for mooring may include:
- Removing obstructions
- Stopping any work that creates excessive dust or noise

Safety precautions may include:
- Checking:
  - own personal fitness and medical wellbeing
  - whereabouts of edge of wharf
  - whereabouts of other members of mooring/untying team
- Confirming availability of a personal flotation device upon arrival at mooring operation
- Keeping work area hazard-free
- Obtaining and using required PPE (such as safety footwear, safety helmet, suitable gloves, safety vest and reflective braces, personal collar insert for flotation device)
- Removing rings from fingers to avoid them being caught on steel wire ropes
- Wearing suitable clothing
Unit Sector(s)
Not applicable.

Competency Field
Equipment Operations
MARE1001A Communicate during shore-based mooring and untying operations

Modification History

Release 1
This is the first release of this unit.
This unit replaces and is equivalent to TDMME907A Communicate during shore-based mooring and untying operations.

Unit Descriptor

This unit involves the skills and knowledge required to communicate effectively with others involved in mooring and untying vessels.

Application of the Unit

This unit applies to people working in the maritime industry under supervision as a shore-based linesperson.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
# Elements and Performance Criteria

**1 Prepare to communicate with others during mooring and untying operations**

1.1 Prior to mooring or untying activities, all radios and other communication equipment are checked to confirm they are functioning correctly

1.2 *Safety precautions* are followed

1.3 *Relevant documentation and records* are identified and accessed as required

**2 Check all communication equipment**

2.2 Batteries are checked to confirm they are operational and fully charged

2.3 Faulty communication equipment is reported, rectified or replaced

2.4 Radios are set to operate on channels required for *mooring or untying operations*

**3 Communicate with others during mooring and untying operations**

3.1 Correct *communication* is maintained throughout mooring and untying operations with *others involved in mooring and untying vessels*

3.2 Clear and concise verbal communication is used and appropriate action is taken to confirm that other person/s concerned have correctly heard and interpreted the communication

3.3 Radio communication is conducted using required procedures and protocols

3.4 Appropriate methods are used to communicate with foreign crews on vessels

3.5 Any safety concerns are promptly and clearly communicated to pilot prior to and during, mooring and untying operations

3.6 Due care is taken when using radio communication equipment not to interfere with operational communication between tug crews and pilot of vessel
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required Skills:

- Check functioning of radios and communication equipment
- Communicate effectively with others when mooring and untying a vessel
- Comply with relevant maritime regulations and IMO Conventions and Codes, including the relevant sections of Australian Maritime Safety Authority (AMSA) Marine Orders as they apply to mooring and untying operations on ocean-going vessels
- Follow work instructions
- Identify and correctly use various types of radios and other relevant communication equipment
- Implement port and vessel security procedures
- Interpret and follow procedures for communicating with others during mooring operations
- Recognise and adapt appropriately to cultural differences in the workplace, including modes of behaviour, interactions and communication with others
- Recognise problems that may occur when communicating with others during mooring and untying operations and take appropriate action to report and resolve them
- Take proper care of radios and communication equipment
- Test and recharge batteries used in radios and other communication equipment

Required Knowledge:

- Basic principles and procedures for marine radio communication:
  - by day or night
  - in normal and emergency situations
  - under any permissible conditions of weather
  - at a range of shore-side terminals and wharves
- Communication techniques and equipment required during mooring and untying operations, including protocols for radio use
- Factors that affect communication during mooring and untying operations, such as effects of noise, faulty equipment, discharged batteries, wind, weather
- Maritime regulations applicable to communication during mooring and untying of vessels
- Operational characteristics of different types of radios and other forms of communication equipment used in mooring and untying operations
- Practices and procedures for communicating with others during mooring operations
- Purpose of silence periods when operating radio equipment
- Radio calling and replying procedures
- Relevant manufacturer instructions relating to use of radios and other communication equipment
- Relevant maritime and radio communication regulations
- Relevant port and vessel security procedures, including operating radio communication channel instructions
- Relevant work health and safety (WHS)/occupational health and safety (OHS) codes of practice, policies and procedures
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, the required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the Elements, Performance Criteria, Required Skills, Required Knowledge and include:

- initiating timely action in response to defects or damage
- being aware of own ability and limits to rectify irregularities and faults
- following all orders carefully and systematically
- ensuring behaviour reflects relevant current legislative and regulatory requirements.

Context of and specific resources for assessment

Performance is demonstrated consistently over time and in a suitable range of contexts.

Resources for assessment include access to:

- industry-approved marine operations site where communicating during shore-based mooring and untying operations can be conducted
- tools, equipment and personal protective equipment currently used in industry
- relevant regulatory and equipment documentation that impacts on work activities
- range of relevant exercises, case studies and/or other simulated practical and knowledge assessments
- appropriate range of relevant operational situations in the workplace.

In both real and simulated environments, access is required to:

- relevant and appropriate materials and equipment
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

Method of assessment

Practical assessment must occur in an:

- appropriately simulated workplace environment and/or
- appropriate range of situations in the workplace.

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate to this unit:

- direct observation of the candidate communicating during shore-based mooring and untying operations
• direct observation of the candidate applying relevant WHS/OHS requirements and work practices.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

In all cases where practical assessment is used it should be combined with targeted questioning to assess Required Knowledge.

Assessment processes and techniques must be appropriate to the language and literacy requirements of the work being performed and the capacity of the candidate.
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below.

Safety precautions may include:
- Checking:
  - own personal fitness and medical wellbeing
  - whereabouts of edge of wharf
  - whereabouts of other members of mooring/untying team
- Confirming availability of a personal flotation device upon arrival at mooring operation
- Keeping work area hazard-free
- Obtaining and using required personal protective equipment (such as safety footwear, safety helmet, suitable gloves, safety vest and reflective braces, personal collar insert for flotation device)
- Removing rings from fingers to avoid them being caught on steel wire ropes
- Wearing suitable clothing

Relevant documentation and records may include:
- Mooring and untying plans, procedures, checklists and instructions
- Relevant maritime authority instructions
- Relevant sections of maritime regulations concerning mooring and untying operations
- Reports and records of mooring operations or any safety incident
- Rope and equipment manufacturer instructions and procedures
- Safety instructions and procedures

Mooring or untying operations may include:
- Landing a gangway
- Preparing a berth
- Receiving heaving line from:
  - a launch
  - a vessel
- Returning heaving line to a vessel
- Untying and letting go a vessel
- Working:
  - by day or night
  - in normal and emergency situations
  - under any permissible conditions of weather
  - at various shoreside terminals and wharves

Communication may include:
- Oral communication with mooring supervisor or Master and
include: other members of mooring or untying team
  - VHF radio between:
    - tug crew and pilot on vessel
    - tug crew and mooring launch crew
    - mooring launch crew and pilot on vessel
  - radio between mooring supervisor (shore-side) and:
    - pilot on vessel
    - mooring personnel (bow)
    - mooring personnel (stern)

Others involved in mooring and untying vessels may include:
  - Mooring launch crew
  - Mooring master or supervisor
  - Mooring team
  - Pilot and crew on vessel being moored or untied and tug
  - Tug crew
  - Vessel crew

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required Skills:

- Communicate effectively with other personnel when mooring and untying a vessel
- Handle rope appropriately and correctly:
  - storing and caring for ropes and lines
  - tying knots such as bowline, reef knot, overhand knot, figure of eight knot, sheet bend and clove hitch
  - applying a chain stopper to a wire rope
  - heaving on a line in collaboration with other members of a mooring team
  - applying a stopper to a synthetic fibre rope
  - applying a chain stopper to a natural cordage rope
  - attaching a line to a bollard or bitt with all lines in correct order such as up through the eye
  - flaking down a rope
  - forming a bight
- Identify and correctly use:
  - PPE
  - various types of ropes, steel wires and mooring equipment
- Interpret and follow WHS/OHS and safety management procedures for mooring and untying operations, including safety instructions and precautions
- Recognise dangers and hazards before and during mooring operations, and take appropriate action to report and rectify them
- Recognise safety-related problems that may occur during mooring operations, and take appropriate action to report and resolve them
- Record and report safety incidents and emergencies
- Work safely as a member of a mooring and untying team

Required Knowledge:

- Dangers associated with mooring duties:
  - being hit by a line being thrown down from a vessel
  - stepping inside the bight of a line
  - being struck by a parting line
  - mixing rings and wire rope
  - falling off the edge of the wharf into the water
  - back strain from carrying a line, heaving on a line or heaving on a line with one hand
  - 'snap back' in the event of a synthetic line breaking
  - trip hazards such as crane lines
- Hazards and safety-related problems that may occur during mooring and untying operations, and appropriate preventative and remedial action and solutions
- Methods for safely mooring and untying ocean-going vessels
- Procedures for calculating stresses on lifting gear used in cargo handling operations
- Relevant documentation and records:
  - mooring and untying plans, procedures, checklists and instructions
  - relevant sections of maritime regulations concerning mooring and untying operations
  - rope and equipment manufacturer instructions and procedures
  - safety instructions and procedures
  - instructions of relevant maritime authorities
  - reports and records of safety incidents or emergencies
- Relevant port and vessel safety and security requirements and regulations
- Relevant WHS/OHS legislation, codes of practice, policies and procedures
- Reporting requirements for safety incidents or emergencies that occur during mooring or untying operations
- Safety instructions for using ropes and other equipment during mooring and untying operations
- Safety management procedures for mooring and untying ocean-going vessels

**Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, the required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the Elements, Performance Criteria, Required Skills, Required Knowledge and include:

- working systematically with required attention to detail and safety requirements
- promptly reporting and/or rectifying hazards, safety incidents or emergencies.

**Context of and specific resources for assessment**

Performance is demonstrated consistently over time and in a suitable range of contexts.

Resources for assessment include access to:

- industry-approved marine operations site where following work health and safety, and emergency procedures during shore-based mooring operations can be conducted
• tools, equipment and personal protective equipment currently used in industry
• relevant regulatory and equipment documentation that impacts on work activities
• range of relevant exercises, case studies and/or other simulated practical and knowledge assessments
• appropriate range of relevant operational situations in the workplace.

In both real and simulated environments, access is required to:

• relevant and appropriate materials and equipment
• applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

Method of assessment

Practical assessment must occur in an:

• appropriately simulated workplace environment and/or
• appropriate range of situations in the workplace.

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate to this unit:

• direct observation of the candidate following work health and safety, and emergency procedures during shore-based mooring operations
• direct observation of the candidate applying relevant WHS/OHS requirements and work practices.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

In all cases where practical assessment is used it should be combined with targeted questioning to assess Required Knowledge.

Assessment processes and techniques must be appropriate to the language and literacy requirements of the work being performed and the capacity of the candidate.
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below.

Ropes and equipment must include:
- Radios
- Ropes and heaving lines provided by shore
- Shackles
- Wires

Mooring and untying operations may include:
- Landing a gangway
- Preparing a berth
- Receiving heaving line from:
  - a launch
  - a vessel
- Returning heaving line to a vessel
- Untying and letting go a vessel
- Working:
  - by day or night
  - in normal and emergency situations
  - under any permissible conditions of weather
  - at various shoreside terminals and wharves

Hazards may include:
- Crane movement
- Faulty communications equipment
- Inadequate lighting
- Ship mooring lines and wires in poor condition
- Wharf traffic

Personnel may include:
- Mooring:
  - launch and crew
  - supervisor
  - personnel (bow)
  - personnel (stern)
- Pilot
- Tug crew/s
- Vessel crew

Safety precautions may include:
- Checking:
  - own personal fitness and medical wellbeing
  - whereabouts of edge of wharf
  - whereabouts of other members of mooring/untying team
- Confirming availability of a personal flotation device upon arrival at mooring operation
- Keeping work area hazard-free
• Obtaining and using required personal protective equipment (such as safety footwear, safety helmet, suitable gloves, safety vest and reflective braces, personal collar insert for flotation device)
• Removing rings from fingers to avoid them being caught on steel wire ropes
• Wearing suitable clothing
• Ensuring ropes and equipment have been tested and are in good condition
• Placing warning signage in appropriate places
• Testing equipment prior to operation

Hazard minimisation procedures may include:

Personal protective equipment may include:

• Personal collar insert for flotation device
• Reflective braces
• Safety:
  • footwear
  • helmet
  • vest
• Suitable gloves

Unit Descriptor

This unit covers participation in the change process within a workgroup. It includes suggesting options for change and contributing to the implementation of change. In practice, participating in workplace change may overlap with other generalist or specialist public sector work activities such as working effectively in the public sector, communicating with others, using resources, handling information, using technology, etc. This is one of 6 units of competency in the Working in Government and Management Competency Fields that deal with change. Related units are:

- PSPGOV306B Implement change
- PSPGOV405B Provide input to change processes
- PSPGOV514A Facilitate change
- PSPMNGT604B Manage change
- PSPMNGT703A Lead and influence change

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.
Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in **bold italics** is explained in the Range Statement following.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Suggest options for change | 1.1 Possible changes to aspects of operational work which could improve efficiency and effectiveness are identified and suggested.  
1.2 Advantages, disadvantages and consequences of proposed suggestions are considered and discussed with the workgroup.  
1.3 Other workgroup members’ input is accepted and considered in suggesting options for change. |
| 2. Contribute to the implementation of change | 2.1 Specific changes in own routine operations and procedures are implemented as required in accordance with legislation, policy and procedures.  
2.2 *Changes* are made in response to directions to achieve service standards and identified outcomes.  
2.3 Available resources and supports are accessed to assist in changing own work practices.  
2.4 Personal responses to change are discussed with the workgroup.  
2.5 Effects upon others of own actions/reactions to change are considered.  
2.6 Support mechanisms to assist with the implementation of change are identified and accessed as required. |
Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- working in a team in a way that demonstrates consideration of the effect of change on others and the effect of one's own reaction to change on others
- communicating with team members on issues and personal reactions to change
- implementing change as required
- accessing assistance for coping with change
- responding to diversity, including gender and disability
- applying public sector legislation such as occupational health and safety, and environment in the context of change

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- personal response to change
- impact of change as it affects individuals and groups
- public sector legislation, policy and guidelines
- environmental and sustainability guidelines
- workgroup practices and service standards
- equal employment opportunity, equity and diversity principles
- occupational health and safety and environmental impact of change including stress, and stress management
Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: Nil
- *Co-requisite* units that must be assessed with this unit: Nil
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPGOV201B Work in a public sector environment
  - PSPGOV202B Use routine workplace communication techniques
  - PSPGOV203B Deliver a service to clients
  - PSPGOV204B Access and use resources
  - PSPGOV206B Handle workplace information
  - PSPGOV207B Use technology in the workplace
  - PSPGOV208A Write routine workplace materials

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- participation in workplace change in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to change in the public sector
- case studies and workplace scenarios to capture the range of situations likely to be encountered when participating in workplace change

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when participating in workplace change, including coping with difficulties, irregularities and breakdowns in routine
- participation in workplace change in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as
literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

**For consistency of assessment**

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.
Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in **bold italics** in the Performance Criteria is explained here.

| Legislation, policy and procedures may include: | • Commonwealth, State/Territory and Local Government legislation  
• government policy  
• public sector code of ethics  
• national standards specific to service delivery area  
• the organisation’s policies and practices  
• environment and sustainability policies  
• organisational code of conduct  
• specific work unit/business area policy and procedures |
| --- | --- |
| Change in the workplace may include: | • organisational change  
• implementation of new/revised work practices  
• sustainability practices  
• technology change in the workplace  
• work location  
• structural and functional change  
• client base  
• staffing changes  
• job role changes  
• work priorities  
• shared services environment  
• machinery of government changes  
• legislative change |

Unit Descriptor

This unit covers workforce planning and succession to underpin the organisation's strategic and business decisions. It includes, conducting workforce analysis and assisting with workforce planning and succession management.

In practice, workforce planning overlaps with other generalist and specialist workplace activities such as promoting ethical behaviour and compliance with legislation, capitalising on diversity, initiating projects, providing client service.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.
Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.
# Elements and Performance Criteria

## ELEMENT 1. Conduct workforce analysis

1.1 In-depth analysis is conducted of current workforce practices, numbers, deployment, diversity and competencies to provide a baseline for workforce planning and management.

1.2 Workforce data is analysed and when required benchmarked against comparable data, trends are identified and interventions are suggested to address developments that do not support the organisation's strategic or business directions.

1.3 Labour market and industry analysis is undertaken to identify factors and trends that may impact on the organisation and the implications of these for workforce planning and management.

1.4 Scenario planning or other forecasting tools are used to predict and assess likely futures for the organisation with their associated implications and risks.

1.5 The results of workforce analysis are presented in objective and unbiased terms and reported in a form and language to suit the intended audience of the presentation.

1.6 The results of workforce analysis are contributed to corporate decision making about projected future workforce requirements.

## ELEMENT 2. Contribute to workforce planning

2.1 Information and advice is provided to managers on all aspects of workforce planning according to their requirements for business planning/outcomes.

2.2 Workforce planning tools are developed/provided to managers, and assistance is given in their use and the analysis of outcomes.

2.3 Solutions are developed and suggested for current and future workforce planning and management issues in accordance with organisational requirements.

2.4 Consultancy services are provided to develop the human resource aspects of organisational and business unit plans to ensure the right numbers of appropriately diverse and skilled staff are available for future needs.

2.5 Managers are assisted to question current work practices and structures and to prepare workforce plans to translate future business requirements into actionable human resource strategies.

## ELEMENT 3. Assist with succession management

3.1 The critical role of succession planning in managing the organisation's intellectual capital is communicated to managers and staff in ways suited to their level of understanding or experience.

3.2 A succession management strategy is developed and candidate pools are identified for imminent and longer term future
ELEMENT PERFORMANCE CRITERIA

vacancies in accordance with *legislation, policy and procedures* and business unit needs.

3.3 **Succession processes** are developed and agreed and the succession management strategy is implemented to meet organisational requirements.

3.4 The results of workforce analysis and planning are used to assist managers to undertake succession planning to identify requirements and manage transition when staff leave the organisation or business unit.
Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- analysing information and trends
- consulting, negotiating and advising on workforce planning and succession management
- leading and influencing in relation to workforce analysis and planning
- applying problem solving
- using a variety of words and language structures to explain ideas to different audiences
- interpreting and explaining data and assisting others to apply the outcomes in the workplace
- preparing written advice and reports requiring reasoning and precision of expression
- responding to diversity, including gender and disability
- applying occupational health and safety procedures and sustainability practices in the context of implementing workforce planning and succession strategies

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- data analysis
- forecasting and planning
- scenario planning
- strategic thinking and analysis
- organisational business planning cycle and processes
- organisational goals, policies and procedures related to workforce planning and analysis
- equal employment opportunity, equity and diversity principles
- standard and content requirements of workforce analysis and planning reports
- jurisdictional legislation applying to human resources, including freedom of information, privacy, confidentiality, occupational health and safety and environment and sustainability practices
Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- Pre-requisite units that must be achieved prior to this unit: Nil
- Co-requisite units that must be assessed with this unit: Nil
- Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV502B Develop client services
  - PSPGOV505A Promote diversity
  - PSPGOV507A Undertake negotiations
  - PSPGOV511A Provide leadership
  - PSPGOV512A Use complex workplace communication strategies
  - PSPLEGN501B Promote compliance with legislation in the public sector
  - PSPPM501B Design complex projects
  - PSPPM502B Manage complex projects

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- workforce planning and succession strategies implemented in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policies and procedures
- workplace scenarios and case studies
- forecasting models
- workforce data for analysis
- workforce planning guidelines and other relevant workplace materials

Where and how to

Valid assessment of this unit requires:
assess evidence

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when implementing workforce planning and succession strategies, including coping with difficulties, irregularities and breakdowns in routine
- workforce planning and succession strategies implemented in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments
Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in **bold italics** in the Performance Criteria is explained here.

**Workforce diversity data** may include:
- age
- gender
- diversity profile
- competency profile
- qualifications

**Workforce data** may include:
- absenteeism
- age profile of staff
- complaints
- conference leave
- costs associated with under-staffing
- current functions, services and workplace practices
- grievances
- hard to fill jobs
- learning and development
- leave - annual, sick, recreation, personal
- leave without pay
- number, gender and diversity of staff at each classification level and across business units
- permanent versus temporary versus contract workforce
- recruitment and retention
- staff nearing retirement
- staff retention rates
- staff satisfaction/dissatisfaction
- staff turnover
- study leave
- sustainability practices
- use of employee assistance program
- vacancies

**Scenario planning** is:
- a process for outlining the possible future as far as the organisation is concerned and developing a plan for dealing with that future. The uncertainty of both the forecasting process and the future itself may make it desirable to draw up a number of different scenarios. It is often advantageous
to assign a degree of probability to a range of competing scenarios, for example, optimistic (best case scenario) or pessimistic (worst case scenario)

**Results** may include:
- matrix of required skills

**Managers** may include:
- line managers
- business unit managers
- senior executives

**Aspects of workforce planning** may include:
- downsizing
- human resource forecasts
- job redesign
- labour market projections
- organisational design
- recruitment
- retention strategies
- skill set availability
- succession planning
- supply and demand forecasting
- sustainability/environmental practice requirements
- workforce capability requirements

**Future workforce planning and management issues** may include:
- future workforce requirements (size and skill set)
- projected labour shortages
- projected skill shortages
- interventions to address projected shortages
- over-supply
- hard to recruit jobs
- retention of skilled staff
- diverse workforce composition
- environmental and sustainability practices

**Succession planning** is:
- ‘... more than fingerling a slate of replacements for certain positions. It is a deliberate and systematic effort to project leadership requirements, identify a pool of high potential candidates, develop leadership competencies in those candidates through intentional learning experiences, and then select leaders from among the pool of potential leaders’ National Academy of Public Administration, Washington (1997)

**Succession planning strategy** may include:
- inclusion of future development opportunities in position descriptions to encourage future progression

**Candidate pools** may be
- leadership assessment activities
identified through:

**Legislation, policy and procedures** may include:

- Commonwealth and State/Territory legislation including equal employment opportunity, anti-discrimination and privacy law
- national and international codes of practice and standards
- the organisation's policies and practices
- government policy
- environmental/sustainability policies
- codes of ethics/conduct

**Succession processes** may include:

- expressions of interest
- formal interview process
- acceptance into a candidate pool
- learning and development
- shadowing
- coaching
- mentoring

**Unit Sector(s)**

Human Resource Management.
PSPPROC505A Manage procurement risk

Modification History
PSPPROC505A Release 2: Layout adjusted. No changes to content.
PSPPROC505A Release 1: Primary release.

Unit Descriptor
This unit covers the ability to manage risks associated with all stages of procurement. It includes assessing risk, and preparing, implementing and reviewing a risk management plan. In practice, managing procurement risk may overlap with other public sector and local government generalist and specialist work activities, such as promoting the values and ethos of public service or local government, undertaking negotiations, promoting compliance with legislation in the public sector, managing contract performance, finalising contracts, planning to manage a contract, planning for procurement outcomes and making procurement decisions. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit
The unit applies to those in specialist procurement who plan for procurement risks across all stages of the procurement cycle.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.
Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.
### Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Assess risk | 1.1. *Legislation, policies*, business processes and resources impacting on the contract are identified.  
1.2. Procurement outcomes and internal inputs necessary for effective performance are identified.  
1.3. Critical success factors necessary for the achievement of procurement outcomes are identified and confirmed.  
1.4. Non-trivial *procurement risks* relating to the procurement activity are identified.  
1.5. Potential *probity risks* are identified.  
1.6. Causes of risk are analysed and their potential impact is determined.  
1.7. Likelihood and consequences of risks are determined and *risk assessments* are developed. |
| 2. Prepare risk management plan | 2.1. Preliminary *risk management* plan is developed that addresses risks identified in planning phase of procurement activity.  
2.2. Risks that will be accepted and those requiring *treatment* are identified.  
2.3. Treatments that reduce risks to an acceptable level are designed according to organisational requirements.  
2.4. Plan for implementing new treatments, additional *risk controls* or modifications to existing controls is developed.  
2.5. Risk level is re-checked at key points during procurement process, and risk management plan is reviewed and adjusted to cover procurement activity risks not already identified. |
| 3. Implement and review risk management plan | 3.1. Risk controls and treatments are implemented according to the treatment plan.  
3.2. Risk management plan is implemented, and regularly reviewed and revised to include potential or emerging risks during the life of the procurement activity.  
3.3. Review results are used to improve risk treatments and controls. |
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - write risk management plans using templates or a recognised risk management methodology
  - interpret complex, formal documents
  - make verbal and written recommendations about the management of procurement and contracting risks
  - provide feedback
- teamwork skills to:
  - model effective team management approaches
  - respond to diversity
  - refer issues to the correct person
- problem-solving skills to analyse risks associated with procurement and contract using a recognised risk management methodology
- initiative and enterprise skills to identify procurement risks and opportunities using a recognised risk management methodology
- planning and organising skills to manage and update the risk management plan
- learning skills to keep up-to-date with:
  - best practice examples in procurement practice
  - relevant procurement legislation, policies and procedures
- technology skills to:
  - operate organisational IT systems
  - use electronic procurement templates

Required knowledge

- commonwealth, state or territory, and local government legislation, policies, practices and guidelines:
  - relating to contract risk management
  - such as OHS and equity and diversity
- organisational procurement policies, practices and approval processes
- risk management procedures
- probity principles and issues, particularly as they relate to probity risks
- codes of conduct, codes of practice and standards of individual behaviour relating to the procurement process
- risks associated with financial and accounting issues relevant to procurement and contract management
- supplier issues and supply chain management in the context of procurement risk management
- aspects of law of contracts, trade practices law and commercial law relevant to risk
management relating to complex procurement
- OHS requirements relevant to procurement and contract management
- equal employment opportunity relevant to procurement and contract management
- environmental, sustainability and corporate social responsibility principles relevant to procurement and contract management
Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Competency must be demonstrated in the ability to manage procurement risk consistently in accordance with legislative and organisational requirements.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- use recognised risk management methodologies to identify and assess risks for all stages of a procurement activity
- prepare a risk management plan for a procurement activity, using templates where available
- implement risk management plans
- review and revise risk management plans to reflect the changing procurement context and environment during the procurement activity
- liaise and consult with stakeholders to ensure that risks are appropriately identified and managed
- make recommendations to higher management about options for the management of procurement risks.

Consistency in performance

Competency should be demonstrated by providing evidence of undertaking a range of relevant work tasks in an actual or simulated procurement environment on at least two separate occasions.

Context of and specific resources for assessment

The unit of competency is to be assessed in the workplace or a simulated workplace environment.

Access may be required to:

- legislation, policy, procedures and protocols relating to procuring goods and services and managing procurement risk
- codes of conduct and codes of practice
- workplace scenarios and case studies relating to a range of procurement activities associated with managing procurement risk
- case studies that incorporate dilemmas and probity requirements relating to managing procurement risk.

Method of assessment

The following assessment methods are suggested:

- questions to assess understanding of relevant legislation and procedures
- review of strategies and approaches adopted for managing
procurement risk

- review of risk assessments, risk management plans, contract management plans, contracts, probity plans, budgets, transition plans and other documentation prepared by the candidate in a range of contexts
- review of stakeholder engagement approaches adopted by the candidate.

In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Questioning techniques should suit the language and literacy levels of the candidate.

**Guidance information for assessment**

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- PSPETHC501B Promote the values and ethos of public service
- PSPGOV507A Undertake negotiations
- PSPLEGN501B Promote compliance with legislation in the public sector
- PSPPROC503B Manage contract performance
- PSPPROC504B Finalise contracts
- PSPPROC506A Plan to manage a contract
- PSPPROC507A Plan for procurement outcomes
- PSPPROC508A Make procurement decisions.
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Legislation and policies may include:
- commonwealth or state and territory legislation, including equal employment opportunity and anti-discrimination law
- council rules and by-laws
- national and international codes of practice and risk management standards
- organisational policies and practices
- government policy
- codes of conduct and codes of practice
- national competition policy.

Procurement risks may include:
- contextual and environmental factors
- too many or too few potential suppliers
- unsophisticated marketplace
- timeframes for procurement too short
- inappropriate method of procurement used
- inadequate budget and other resources
- inappropriate form of contract selected
- supplier inability to meet obligations
- end user or buyer inability to meet obligations
- unclear contract terms and conditions
- contractual disputes
- factors outside the control of either party, such as global health pandemic, failure of third-party businesses or natural disasters
- implications if dependence on one supplier, versus risks in lack of continuity and consistency of services provided
- changes to government policy.

Probity risks may include:
- corruption
- fraud
- conflict of interest (actual, perceived or potential)
- unfair treatment of providers or potential providers
- misuse of resources
- misuse of information
- manipulation of the marketplace.
**Risk assessments**

Differentiate between risks that have:

- high impact/consequence/likelihood
- low impact/consequence/likelihood.

**Risk management**

Is often considered in relation to an organisation's:

- people
- assets and physical environment
- reputation and image
- legal issues
- business continuity
- finances
- stated outcomes.

**Risk treatments**

May include those that:

- avoid risk
- transfer risk
- reduce likelihood
- reduce consequence
- partially reduce assessed risk level so that risk can be accepted.

**Risk controls**

May include:

- legislation
- government policies and guidance
- organisational policies, processes and procedures
- standardised documentation and templates
- hierarchy of controls, such as fraud control plans and security plans
- staff skills and knowledge.

Unit Descriptor

This unit covers activities required in promoting and disseminating the organisation’s approach to security management internally and to external clients and the broader community. It includes disseminating the security strategy, championing security awareness and marketing security management both inside and outside the organisation.

In practice, managing security awareness may overlap with other generalist or specialist public sector workplace activities such as managing compliance with legislation and ethics requirements, managing risk, networking, implementing policy, managing change.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.
Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Disseminate security policy | 1.1 Profile of security management is raised to highest level to indicate its key focus in the organisation.  
1.2 Security standards for the organisation are articulated in a manner suited to the level and experience of staff.  
1.3 Ways in which the security policy and plan contribute to the achievement of organisational corporate goals are articulated.  
1.4 Roles and responsibilities of key people in the organisation regarding implementation of security measures are articulated.  
1.5 Dissemination methods take account of various audiences and information is presented in a way that meets particular audience needs. |
| 2. Champion security awareness | 2.1 Leadership and motivation are provided in highlighting the role of security processes as integral to effective management practices.  
2.2 Methods underpinning the championing of security awareness are based on an in-depth understanding of the organisation's culture and structure, and the nature of both internal and external clients.  
2.3 A positive tone is set in the organisation regarding security through engendering trust and confidence in security measures.  
2.4 Guidelines for the establishment of formal and informal networks are established to nurture cooperative and ethical client relationships. |
| 3. Market security management inside and outside the organisation | 3.1 Potential activities to promote security and its importance to the overall objectives of the organisation are identified and assessed in relation to the security policy and plan in place.  
3.2 Implementation is coordinated with management and key stakeholders who play a role in implementation.  
3.3 Shared ownership of security processes is encouraged through ongoing consultation and information sharing.  
3.4 Promotion activities are organised to raise stakeholder awareness of both the ethical and financial aspects of security and to facilitate endorsement of the concept and practice of security management.  
3.5 Trends are monitored in order to ensure currency in the organisation's security measures. |
Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying leadership
- synthesising and articulating broader policy issues
- using a range of communication, negotiation and presentation styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- applying occupational health and safety and environmental procedures in the context of managing security awareness

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- corporate plan and strategic directions of the organisation
- structure and core business activities of the organisation
- organisation's security policy and plans
- external expectations placed on the organisation by external stakeholders such as government
- the incorporation of constraints imposed by the culture of the organisation and operational factors into security management issues and practices
- organisational change practices
- public sector legislation, policies and procedures including anti-discrimination and diversity legislation, occupational health and safety, and environment in the context of security management
Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- **Pre-requisite** units that must be achieved prior to this unit: *Nil*
- **Co-requisite** units that must be assessed with this unit: *Nil*
- **Co-assessed units** that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC601B Maintain and enhance confidence in public service
  - PSPGOV601B Apply government systems
  - PSPGOV602B Establish and maintain strategic networks
  - PSPLEGN601B Manage compliance with legislation in the public sector
  - PSPMNGT604B Manage change
  - PSPMNGT608B Manage risk
  - PSPPOL603A Manage policy implementation
  - PSPSEC601A Define information systems framework

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- management of security awareness in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy and procedures relating to government security management
- security guidelines and standards
- public sector values and codes of conduct
- case studies and workplace scenarios to capture the range of security awareness situations likely to be encountered

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions
likely to be encountered when managing security awareness, including coping with difficulties, irregularities and breakdowns in routine

- management of security awareness in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

**For consistency of assessment**

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments
Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in bold italics in the Performance Criteria is explained here.

Information may include:
- instructions
- guidelines
- case briefings
- research outcomes
- outcomes of analyses

Stakeholders may include:
- relevant government Ministers
- agency staff and senior management
- agency clients
- contractors and consultants
- suppliers and customers
- industry associations
- other agencies with a mandate for security management
- law enforcement agencies
- prosecution agencies
- internal/external audit

Trends are monitored through:
- research of national and international material
- surveys
- data matching
- internal and external networks
- information on security breaches
- aggregated national data relating to government security

Unit Descriptor

This unit covers the competency required to implement the emergency response specified in the workplace emergency procedures or specified by a person at a higher level in the emergency control organisation.

People who undertake this work will be working within the command, control and coordinate structure of the emergency control organisation.

This unit has been developed to cover the broad range of emergencies and workplaces as considered in Australian Standard 3745-2010.

Application of the Unit

This unit applies to employees in the workplace within all industries and in all contexts.

This unit places responsibility on individual employees who are delegated responsibility as part of an emergency control organisation to participate in the preparation of workplace emergency procedures; alert and report potential workplace emergencies; evaluate the need to evacuate a work area; prepare for an evacuation; and assist people who may require assistance in accordance with workplace emergency procedures.

The knowledge and skills gained through the completion of this unit may be applied by employees across all industries.

Licensing/Regulatory Information

Not applicable.
Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where *bold italicised* text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. **Respond to emergency reports, signals and warnings** | 1.1 *Emergency reports, signals and warnings* are identified and appropriate action is taken.  
1.2 Emergency situations and possible further development are assessed and relevant action is taken according to workplace emergency procedures.  
1.3 Arrangements are made for people who may require assistance.  
1.4 *Emergency stations* are attended and operated according to workplace emergency procedures.  
1.5 Suitable *identification* is worn according to workplace emergency procedures and relevant standards. |
| 2. **Initiate and control initial emergency response** | 2.1 *Initial emergency response* is initiated and carried out according to the workplace emergency procedures or authorised instruction.  
2.2 Evacuated areas are checked according to workplace emergency procedures.  
2.3 Results of the evacuation of an area are reported to the *relevant person* according to the workplace emergency procedures.  
2.4 People are accounted for appropriately after the evacuation and the results are reported to the relevant person according to the workplace emergency procedures.  
2.5 Persons not accounted for are reported in accordance with workplace emergency procedures. |
| 3. **Anticipate the further development of emergencies** | 3.1 Emergency responses are based on the emergency management plan, taking into account the current situation and possible further development.  
3.2 Possible further development of emergency situations is continually assessed, reported to the relevant person and acted on according to workplace emergency procedures. |
| 4. **Assist with post initial response** | 4.1 Emergency evacuation or alternative action is completed before any *post initial response activities* are undertaken.  
4.2 Post initial response activities are conducted under the control of the relevant person and are consistent with the workplace emergency plan. |
Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- ability to relate to a range of people from a range of cultural, linguistic, social and ethnic backgrounds, and a range of physical and intellectual abilities
- apply methods of accounting for people
- assist people who need assistance
- carry out a search pattern within an area
- communicate clearly by the means specified in the workplace emergency procedures
- contribute to emergency management planning
- exercise leadership within a workplace emergency context
- use equipment assigned to assist with implementing the workplace emergency procedures

Required Knowledge

- arrangements for evacuating people who need support
- assessing and anticipating the progress of emergencies that might reasonably be expected in the workplace
- command, control and coordinate function of the emergency control organisation
- context of own role within the workplace emergency procedures
- emergency assessment and reporting procedures
- emergency reporting signals, alarms, warnings and procedures
- emergency response and operating procedures
- members of the emergency control organisation and their roles and responsibilities
- evacuation priorities
- hazard identification
- precautions to be taken during emergencies and during an evacuation
- methods of accounting for people during and after emergencies
- methods of summoning first aid to occupants or visitor injured during an emergency evacuation
- need to keep the relevant person informed of the developing situation
- post initial response emergency activities
- responses to meet the various situations
- workplace procedures
Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to respond to emergency reports, signals and warnings appropriately; to supply clear directions under emergency conditions; to make decisions appropriate to the situation; to keep others appropriately informed; to respond according to the workplace emergency procedures; and to take on a leadership role consistent with the emergency control organisation.

Consistency in performance

Competency should be demonstrated over time with a range of emergencies that could be expected in the workplace.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or in a simulated workplace.

Specific resources for assessment

Access to scenarios that reflect a range of emergency situations that may be expected in the workplace.
Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

**Emergency reports, signals and warnings** may include:
- audible/visual alarms
- audible or vibrating pagers
- coded or uncoded public address announcements
- e-mail
- screen alerts
- stench alarms
- verbal alert

**People who may require assistance** may include:
- babies and children
- people with a mobility, intellectual, visual, auditory or sensory impairment, either temporary or permanent, who require assistance during an emergency response
- people from diverse cultural and linguistic backgrounds
- people who are injured
- people who are not able to comprehend the instructions given
- pregnant women
- the elderly

**Emergency stations** may include:
- assembly or marshalling points
- designated telephone or intercom
- designated muster points
- emergency control point
- master emergency control point
- warden’s inter-communication point (WIP) phones

**Identification** may include:
- armbands
- helmets, caps, hats
- uniforms
- tabards, vests or other distinguishing/distinctive clothing

**Initial emergency response** may include:
- to evacuate
- not to evacuate
- to partially evacuate
- advice or requests for emergency services
- alternative evacuation
- lateral evacuation
- any guidance from emergency response team
- designated assembly area
- evacuation routes and destination
- not to re-enter the evacuated area until directed by emergency personnel
- shelter in place/lockdown
- relocating or providing welfare services for evacuated persons
- restricting entry to danger areas
- searching floors or areas
- supplying emergency equipment
- use of response equipment

**Relevant person** may include:
- emergency control organisation members
- emergency services personnel
- people with overall evacuation control responsibility or a person delegated with this responsibility
- police, fire and emergency services

**Post initial response activities** may include:
- assisting with recovery activities
- assisting with authorised restoration of normal activity
- participating in debriefing
- providing advice
- requests for emergency services or specialist response team
- relocating or providing welfare services for evacuated persons
- restricting entry to danger areas
- security
- supplying emergency equipment
- checking the welfare of evacuees

**Unit Sector(s)**

<td>1.0</td>
<td>Replaces and is equivalent to SITHFAB009A Provide responsible service of alcohol.</td>
</tr>
</tbody>
</table>

Unit Descriptor
This unit describes the performance outcomes, skills and knowledge required to responsibly sell or serve alcohol.

Application of the Unit
Responsible practices must be undertaken wherever alcohol is served or sold, including where alcohol samples are served during on-site product tastings. This unit, therefore, applies to any workplace where alcohol is served or sold, including all types of hospitality venues, retail liquor outlets and wineries, breweries and distilleries.

This unit applies to all levels of sales personnel involved in the sale, service and promotional service of alcohol in licensed premises. Those selling or serving alcohol may include food and beverage attendants; retail liquor sales persons; winery, brewery and distillery cellar door staff and supplier sales representatives. It also applies to security staff who monitor customer behaviour and to the licensee who is ultimately responsible for RSA management.
Licensing/Regulatory Information

The unit incorporates the knowledge requirements, under state and territory liquor licensing law, for employees engaged in the sale or service of alcohol. Certification requirements differ across states and territories. In most cases all people involved in the sale, service and promotional service of alcohol in licensed premises must be certified in this unit. This can include the licensee and security staff. This unit covers the Responsible Service of Alcohol (RSA) skill and knowledge requirements common to all States and Territories. Some legislative requirements and knowledge will differ across borders. In some cases after completion of this unit, state and territory liquor authorities require candidates to complete a bridging course to address these specific differences. Those developing training to support this unit must consult the relevant state or territory liquor licensing authority to determine any accreditation arrangements for courses, trainers and assessors.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.
Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

1. Sell or serve alcohol responsibly.
   1.1 Sell or serve alcohol according to provisions of relevant state or territory legislation, licensing requirements and responsible service of alcohol principles.
   1.2 Provide **accurate information** to customers on alcoholic beverages according to organisation or house policy and government legislation, including types, strengths, standard drinks and the alcoholic percentages of a range of frequently sold alcoholic beverages.
   1.3 Assist customers with information on the range of non alcoholic beverages available for purchase.
   1.4 Identify **issues** related to the sale and service of alcohol to different types of customers, especially **those at risk**, and incorporate them into sales or service.

2. Assist customers to drink within appropriate limits.
   2.1 Prepare and serve **standard drinks** or **samples** according to industry requirements.
   2.2 Encourage customers courteously and diplomatically to drink within appropriate limits.
   2.3 Recognise **erratic drinking patterns** as an early sign of possible intoxication and take appropriate action.
   2.4 Monitor emotional and physical state of customers for signs of intoxication and ill effects of illicit or other drug usage.
   2.5 Where appropriate, offer food and non alcoholic beverages.
   2.6 Politey decline requests for alcohol to be dispensed in a manner that is **irresponsible, or which encourages the rapid or excessive consumption of alcohol**, and advise customers of the reasons for the refusal.

3. Assess alcohol affected customers and identify customers to whom sale or service must be refused.
   3.1 Assess intoxication levels of customers using a number of methods, including observing **changes in behaviour**, observing emotional and physical state, and monitoring noise levels and drink purchases.
   3.2 When assessing intoxication, take into account **factors** that may affect individual responses to alcohol.
   3.3 Identify customers to whom sale or service must be
refused according to state and territory legislation, including minors, those purchasing on behalf of minors, intoxicated persons, and persons affected by the consumption of illicit and other drugs.

3.4 Where appropriate, request and obtain acceptable proof of age prior to sale or service.

4. Refuse to provide alcohol.

4.1 Refuse service in a polite manner and state reasons for the refusal.

4.2 Speak to intoxicated customers in a suitable and consistent manner, minimising confrontation and arguments and point out signage.

4.3 Provide appropriate assistance to customers when refusing service.

4.4 Where appropriate, give customers a verbal warning and ask them to leave the premises according to organisation or house requirements, the specific situation and provisions of state or territory legislation and regulations.

4.5 Use appropriate communication and conflict resolution skills to handle difficult situations.

4.6 Refer difficult situations beyond the scope of individual responsibility to the appropriate person.

4.7 Promptly identify situations that pose a threat to the safety or security of colleagues, customers or property, and seek assistance from appropriate colleagues according to organisational policy.
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication to:
  - provide complex information on responsible service of alcohol laws in a way that is readily understood by customers
  - speak firmly and clearly with intoxicated customers
  - deal with customers sensitively, courteously and discreetly using non-confrontational language
- critical thinking skills to assess intoxication levels of customers
- initiative and enterprise skills to offer food and non-alcoholic beverages to assist customers
- learning skills to continuously update knowledge of changing responsible service of alcohol laws and regulations
- literacy skills to:
  - read and interpret documents such as identification (ID) cards, proof of age cards, driver’s licences, statutory signage, warning signs and wording within advertising or promotional material, in-house policies and procedures and any general plain English regulatory and advisory information issued by local, or state and territory liquor licensing authorities
- numeracy skills to measure and calculate standard drinks or samples and calculate blood alcohol levels to determine alcohol consumption
- problem-solving skills to:
  - identify customers to whom sale or service must be refused
  - identify intoxicated persons and refuse service
  - identify situations that pose a safety threat and seek assistance from appropriate colleagues
- teamwork skills to share customer information with team members to ensure proper responsible service of alcohol practices within the organisation.

Required knowledge

- public interest reasons for implementation of responsible service of alcohol practices, including:
  - government and community concern with alcohol misuse and abuse
  - crime, violence and anti-social behaviour associated with alcohol abuse
- impact of excessive drinking on:
  - local neighbourhood and community
  - premises and staff
  - customers
  - particular types of customers who may be at heightened risk such as young people, pregnant women and minors
• government agencies such as the local police, health facilities and road authority
• key agencies and how to source relevant information on laws, regulations and codes of practice or conduct
• current promotional and strategic community education campaigns developed and conducted by agencies and industry groups
• effects of alcohol on:
  • emotional state
  • health
  • physical alertness
• factors that affect individual responses to alcohol, including:
  • gender
  • weight
  • general health
  • rate of consumption
  • food intake
  • other substances taken
• time for effects of alcohol to be registered
• standard drinks and acceptable measures of alcohol
• indicators of intoxication, including ways of assessing intoxication of customers
• ways of assessing customers affected by the consumption of illicit and other drugs
• principles of harm minimisation and strategies to minimise the harm associated with liquor abuse:
  • strategies laid down in legislation and codes of conduct developed by government agencies or industry groups
  • organisational policies that are designed to reduce the harm associated with liquor abuse
• the key provisions of liquor laws and regulations at a depth relevant to the scope of job responsibility within licensed premises, including the following list that expresses general statements about requirements of liquor legislation and information that must be customised for each State or Territory:
  • legislative definition of intoxication; intoxicated person and unduly intoxicated
  • role of individual staff members and supervisors or managers in providing responsible service of alcohol, including seller or server duty of care and liability
  • requirement to adopt and use statutory signage on the premises for the entire range of circumstances applicable to the organisation
  • requirements for mandatory content of any warning signs and wording within advertising or promotional material of any form, such as print advertising or internet sales
  • requirements for the remote sale and delivery of alcohol sales generated via the telephone, fax, email or mail
  • requirements for proof of age and obligations to minors under local legislation
  • provisions for retaining and reporting falsified proof of age documents
• provisions for requiring someone to leave the premises
• transportation options
• barring procedures
• opening and closing hour provisions
• requirements for monitoring noise and disturbances in and around licensed premises
• requirements laid down in codes of practice or conduct developed by government agencies or industry groups
• requirements described by an in-house policy, standard or code of practice or conduct
• training and record keeping requirements
• banned or undesirable products
• personal and business implications of breaching any laws, regulations, government or industry-driven codes of practice or conduct
• offences and penalties relating to offences
• legal restrictions on alcohol use customised to state or territory legislation, including intoxication provisions of liquor licensing laws
• legal drink and drive limits.
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- responsibly sell or serve alcohol on multiple occasions to customers
- satisfy the legal requirements for responsible sale or service of alcohol for the local state or territory law
- follow organisational policies and procedures for the responsible service of alcohol
- demonstrate knowledge of:
  - reasons for and benefits of responsible service of alcohol
  - principles of responsible service of alcohol and harm minimisation
  - the key provisions of liquor laws and regulations at a depth relevant to the scope of job responsibility within licensed premises
  - the ramifications of non-compliance with the law and industry codes for the organisation, licensee and individual staff members.

Context of and specific resources for assessment

Assessment must ensure use of:

- a real or simulated workplace
- a range of industry equipment to demonstrate standard drink measures or samples
- relevant and current publications, signage, information and plain English fact sheets distributed by government regulators and industry bodies.

Method of assessment

A range of assessment methods should be used to assess the practical skills and knowledge required to sell or serve alcohol responsibly.

The following examples are appropriate for this unit:

- role-plays or case studies simulating customers, intoxicated patrons and alcohol that allow assessment of the individual’s ability to:
  - interact with customers and explain organisational legal requirements to sell or serve alcohol responsibly
- explain in-house policies for the service of alcohol
- refuse service to people to whom alcohol cannot be served
- speak to intoxicated customers to minimise confrontation
- case studies and problem-solving activities to assess the individual’s ability to respond to:
  - situations where customers are engaging in erratic drinking patterns
  - signage deficiencies
  - situations that pose a safety threat
- written or oral questioning to assess knowledge of legislation and all other knowledge components of this unit
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the individual.

**Guidance information for assessment**

The assessor should design integrated assessment activities to holistically assess this unit with other units relevant to the industry sector, workplace and job role, for example:

- SITHFAB202 Operate a bar
- SITHFAB302 Conduct a product tasting for alcoholic beverages
- SITHFAB303 Prepare and serve cocktails
- SITHFAB304 Provide advice on beers, spirits and liqueurs
- SITHFAB305 Provide advice on Australian wines
- SITHFAB306 Provide advice on imported wines
- SITHFAB307 Provide table service of food and beverage.
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Accurate information** may be provided to customers:

- by use of fact sheets and advertising material that comply with legislative requirements
- by use of mandatory signage
- verbally.

**Issues** may include:

- demeanour and mood
- familiarity with specific customers
- perceived effects of illicit and other drug usage
- perceived health status
- physical stature
- social context.

**Those at risk** may include:

- Aboriginal and Torres Strait Islanders
- minors
- people affected by the consumption of illicit and other drugs
- people from non-English speaking backgrounds
- women
- young customers.

**Standard drinks** should be measured using:

- appropriate nip measures
- appropriately sized sample glasses
- electronic dispensing and measuring devices.

**Samples** may include tastings of any item for sale in a:

- brewery
- distillery
- hospitality venue
- retail liquor outlet
- winery.

**Erratic drinking patterns** may include:

- mixing a wide range of drink types
- drinking quickly and asking for more immediately
- ordering more than one drink for self-consumption
- mixing alcohol consumption with consumption of prescription or illicit
drugs

- consistently returning to the tasting site to request more samples
- ordering multiple samples
- ordering large samples
- ordering ‘triple shots’ or extra large drinks.

Requests for drinks to be dispensed in a manner that is **irresponsible, or which encourages the rapid or excessive consumption of liquor** include:

- jugs of spirits and mixers
- large samples
- laybacks
- multiple samples for self-consumption
- rocket fuel
- shooters
- test tubes
- yard glasses.

**Changes in behaviour** may involve the customer becoming:

- aggressive
- disorderly
- quarrelsome
- violent.

**Factors** include:

- food intake
- gender
- general health
- other substances taken, especially illicit and other drugs
- rate of consumption
- weight.

**Proof of age** includes:

- current drivers licence
- passport
- photo card
- proof of age card.

**Intoxicated** denotes:

- drunk
- those to whom service may be refused due to excessive consumption of alcohol
- ‘unduly intoxicated’ may also be used in some state or territory legislation.

**Signage** may include:

- signs produced in-house that comply with wording required by legislation
- standard promotional signs issued by the relevant state or territory licensing authority
- warning notices within any form of advertising.
Appropriate assistance may include:

- assisting the customer to connect with their designated driver
- offering alternatives to alcohol, including food
- offering to sell or serve non-alcoholic drinks
- organising transport for customers wishing to leave
- providing information on taxis.

Communication and conflict resolution skills may include:

- using open and non-aggressive body language
- using a number of strategies to diffuse a situation, such as taking the person away from an audience or blaming the refusal on the ‘law’
- monitoring the reactions of other customers
- picking early warning signs and intervening before the person is intoxicated
- not using physical touch or body language
- remaining calm and using tactful language.

Unit Descriptor
This unit describes the performance outcomes, skills and knowledge required to resolve complex or escalated complaints and disputes with internal and external customers and colleagues. It requires the ability to use effective conflict resolution techniques and communication skills to manage conflict and develop solutions. It does not cover formal negotiation, counselling or mediation.

Application of the Unit
This unit applies to all tourism, travel, hospitality and event sectors. The unit applies mainly to senior operational personnel, supervisors and managers who operate with some level of independence and use discretion and judgement to resolve conflicts.

Licensing/Regulatory Information
No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites
Not applicable.
Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

1. Identify conflict situations.
   1.1 Identify potential for conflict and take swift and tactful action to prevent escalation.
   1.2 Identify situations where personal safety of customers or colleagues may be threatened and organise appropriate assistance.
   1.3 Identify and use resources to assist in managing conflict.

2. Resolve conflict.
   2.1 Take responsibility for finding a solution to conflict.
   2.2 Establish and agree on the nature and details of conflict with all parties and assess impact.
   2.3 Deal with conflict sensitively, courteously and discreetly.
   2.4 Minimise impact on other colleagues and customers.
   2.5 Use effective conflict resolution techniques and communication skills to manage the conflict and develop solutions.
   2.6 Encourage all points of view, acknowledge them and treat them with respect.
   2.7 Identify and evaluate the impact of conflict on business reputation and legal liability.
   2.8 Evaluate options to resolve the dispute taking into account any organisational policies and constraints.
   2.9 Implement the best solution and complete required documentation.

3. Evaluate conflicts and resolutions.
   3.1 Communicate with the parties involved to seek and provide feedback on conflict and its resolution.
   3.2 Evaluate and reflect on the situation and effectiveness of the solution.
   3.3 Determine possible causes of workplace conflict and provide input for workplace enhancement and improvements.
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to deal with conflict sensitively, courteously and discreetly through use of conflict resolution techniques
- critical thinking skills to analyse and decide on the best resolution for conflict
- initiative and enterprise skills to consider and suggest changes to workplace practices to avoid future conflict
- literacy skills to:
  - research sources of internal and external assistance to resolve the conflict
  - write reports, including comprehensive details of the conflict, the parties involved, discussions with all parties and the resolution
- problem-solving skills to identify and resolve conflicts and minimise impact on other colleagues and customers
- self-management skills to take responsibility for conflict outcomes
- teamwork skills to discuss and resolve conflicts between team members.

Required knowledge

- types of conflict in the tourism, travel, hospitality and event industries, typical causes and resolutions
- conflict theory, including signs, stages, levels, factors involved and results
- conflict resolution and communication techniques, including:
  - assertiveness
  - active listening
  - non-verbal communication
  - language style
  - negotiation
  - use of appropriate communication
- organisational policies and procedures for complaint, conflict and dispute resolution.
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- resolve different workplace conflicts using a range of conflict resolution and communication techniques
- demonstrate knowledge of commonly occurring conflict situations in the workplace and the stages of conflict.

Context of and specific resources for assessment

Assessment must ensure use of:

- a real or simulated tourism, hospitality or event industry environment where conflicts occur
- current commercial policies and procedures for complaint, conflict and dispute resolution
- others with whom the individual can interact to resolve conflicts.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation, using role plays, of the individual resolving conflicts using a range of communication techniques
- use of simulated activities to assess participation in conflicts involving:
  - customers refusing to leave or be pacified
  - drug or alcohol-affected persons
  - people who appear to be violent or are threatening
- use of problem-solving activities so the individual can analyse and find solutions for various conflicts arising in the workplace
- written or oral questioning to assess knowledge of:
  - types of conflict
  - conflict theory
  - conflict resolution and communication techniques
  - content of policy and procedures for refunds or exchange
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the
Guidance information for assessment

The assessor should design integrated assessment activities to holistically assess this unit with other units relevant to the industry sector, workplace and job role, for example:

- BSBDIV501A Manage diversity in the workplace
- SITHACS201 Provide porter services
- SITHACS303 Provide accommodation reception services
- SITTTGDE303 Lead tour groups
- SITTTGDE401 Coordinate and operate tours
- SITXCCS302 Provide club reception services
- SITXCCS303 Provide service to customers
- SITXCCS401 Enhance the customer service experience
- SITXHRM503 Monitor staff performance.
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Conflict** may relate to:

- customers whose special needs or expectations have not been met
- delays or poor timing of product or service supply
- difficult or complex customer complaints
- difficult or demanding customers
- disputes or arguments among work colleagues
- drug or alcohol-affected persons
- ejection from premises
- escalated customer or staff complaints leading to disputes
- human resource issues:
  - counselling
  - incorrect pay
  - job duties
  - lack of competence
  - worker mistakes
  - rosters
  - dismissals
  - misunderstandings or communication barriers
  - problems or faults with a service or product
  - refused entry.

**Situations** may involve:

- customers refusing to leave or be pacified
- drug or alcohol-affected persons
- people who appear to be violent or are threatening
- people involved in physical violence
- people with guns or arms
- situations where someone has been or may be hurt.

**Customers or colleagues** may include:

- internal or external customers
- those from a range of social and cultural backgrounds
- outside contractors
- suppliers
- workmates.

**Resources** may include:

- counsellors
- internal security staff
- mediators
- other staff members
Conflict resolution techniques may include:

- police
- senior staff.

Communication skills may include:

- negotiation
- use of appropriate communication skills.

Policies and constraints may include:

- complaints
- customer service
- disputes
- exchanges
- refunds
- staff grievance
- costs and budgets
- lack of availability of replacement products or services
- organisational policy on refunds or exchange.

Causes of workplace conflict may include:

- changes to practices and procedures
- complaints
- cultural misunderstanding
- lack of empathy
- lack of information
- poor communication
- rostering issues
- workplace systems.

Unit Descriptor
This unit describes the performance outcomes, skills and knowledge required to use personal hygiene practices to prevent contamination of food that might cause food-borne illnesses. It requires the ability to follow predetermined organisational procedures and to identify and control food hazards.

Application of the Unit
This unit applies to all tourism, hospitality and catering organisations with permanent or temporary kitchen premises or smaller food preparation or bar areas. This includes restaurants, cafes, clubs, hotels, bars, tour operators, attractions, function, event, exhibition and conference caterers, educational institutions, aged care facilities, correctional centres, hospitals, defence forces, cafeterias, kiosks, canteens, fast food outlets, residential caterers, in-flight and other transport caterers. It applies to food handlers which can be any person who directly handles food or food contact surfaces food such as cutlery, plates and bowls. People at many levels use this skill in the workplace during the course of their daily activities, including cooks, chefs, caterers, kitchen stewards, kitchen hands, bar and food and beverage attendants and sometimes room attendants and front office staff.

Licensing/Regulatory Information
Food handlers must comply with the requirements contained within the Australia New Zealand Food Standards (ANZFS) Code (the Code). In some states and territories businesses are required to designate a food safety supervisor who is required to be certified as competent in this unit through a registered training organisation.
Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.
Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

1. Follow hygiene procedures and identify food hazards.
   1.1 Follow organisational **hygiene procedures**.
   1.2 Promptly report **unsafe practices** that breach hygiene procedures.
   1.3 Identify **food hazards** that may affect the health and safety of customers, colleagues and self.
   1.4 Remove or minimise the hygiene hazard and report to appropriate person for follow up.

   2.1 Report any personal **health issues** likely to cause a hygiene risk.
   2.2 Report incidents of food contamination resulting from personal health issues.
   2.3 Cease participation in food handling activities where a health issue may cause food contamination.

3. Prevent food contamination.
   3.1 Maintain clean clothes, wear required personal protective clothing and only use organisation-approved bandages and dressings.
   3.2 Prevent food contamination from clothing and **other items worn**.
   3.3 Prevent unnecessary direct contact with ready to eat food.
   3.4 Avoid **unhygienic personal contact** with food or **food contact surfaces**.
   3.5 Avoid **unhygienic cleaning practices** that may cause food-borne illnesses.

4. Prevent cross contamination by washing hands.
   4.1 **Wash hands at appropriate times** and follow hand washing procedures consistently.
   4.2 Wash hands using **appropriate facilities**.
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to verbally report hygiene hazards and poor organisational practice
- literacy skills to comprehend workplace documents or diagrams that interpret the content of:
  - organisational food safety program
  - hygiene and food safety procedures
  - Hazard Analysis and Critical Control Points (HACCP) practices
- problem-solving skills to identify and report hygiene hazards.

Required knowledge

- basic aspects of national, state or territory food safety laws, standards and codes. This would include:
  - meaning of contaminant, contamination and potentially hazardous foods as defined by the Code
  - hygiene actions that must be adhered to by businesses to avoid food-borne illnesses
  - employee responsibility to participate in hygienic practices
  - reasons for food safety programs and what they must contain
  - role of local government regulators
  - ramifications of failure to observe food safety law and organisational policies and procedures
- basic aspects of HACCP method of controlling food safety
- for the specific industry sector and organisation:
  - major causes of food contamination and food-borne illnesses
  - sources and effects of microbiological contamination of food
  - workplace hygiene hazards when handling food and food contact surfaces
  - basic content of organisational food safety program
  - the contents of hygiene and food safety procedures
  - hygienic work practices for individual job roles and responsibilities.
## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:
- integrate the use of predetermined hygiene procedures and food safety practices within day-to-day food handling work functions
- integrate, into daily work activities, knowledge of the basic aspects of food safety standards and codes and the ramifications of disregarding this.

#### Context of and specific resources for assessment

Assessment must ensure use of:
- an operational commercial food preparation area, bar or kitchen with the fixtures, large and small equipment and workplace documentation defined in the Assessment Guidelines; this can be a:
  - real industry workplace
  - simulated industry environment such as a training kitchen servicing customers
- food ingredients and ready to eat food items
- current plain English regulatory documents distributed by the national, state, territory or local government food safety authority
- the Code
- current commercial food safety programs, policies and procedures used for the management of food safety.

### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate using hygienic work practices during an integrated assessment of operative functions, such as cleaning and tidying bars, cooking at a camp site, preparing meals in a commercial kitchen, storing unused foodstuffs
- use of problem-solving exercises so the individual can respond to a range of situations where food hazards exist
- written or oral questioning to assess knowledge of the content of hygiene procedures and food safety standards and codes
- review of portfolios of evidence and third-party workplace
reports of on-the-job performance by the individual.

Guidance information for assessment

The assessor should design integrated assessment activities to holistically assess this unit with other units relevant to the industry sector, workplace and job role, for example:

- SITXFSA201 Participate in safe food handling practices
- SITXFSA202 Transport and store food
- any commercial cookery, commercial catering, patisserie, Asian cookery or food and beverage unit involving food preparation.
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Hygiene procedures**:

- may cover:
  - cleaning and sanitising practices to avoid contamination of food
  - food storage
  - handling and disposal of garbage
  - personal hygiene
  - regular hand washing
  - safe and hygienic handling of food and beverages
  - safe handling and disposal of linen and laundry
  - suitable dress and personal protective equipment and clothing
  - use of cleaning equipment, clothes and materials to avoid contamination of food

- may be:
  - covered by staff training programs
  - documented in the organisational food safety program
  - required by the national food safety code.

**Unsafe practices** may include:

- being asked to participate in unhygienic work practices
- food handling practices that may result in the contamination of food
- ignoring the direction of:
  - hygiene signage
  - supervisors
  - managers
- lack of:
  - required hygiene signage
  - training in hygiene procedures
  - outdated practices not in keeping with current organisational procedures
  - poor personal hygiene and cleaning practices that may result in cross-contamination of food and other items
  - practices inconsistent with organisational food safety program
  - seeing others using unhygienic work practices
  - use of broken or malfunctioning equipment.
Food hazards may include:

- airborne dust
- colleagues without appropriate training or understanding of good hygiene practices, policies and procedures
- contaminated food
- contaminated garbage
- dirty equipment and utensils
- equipment not working correctly, such as fridge and temperature probes
- items, such as linen, tea towels and towels that may be contaminated with human waste, such as blood and body secretions
- use of practices not in keeping with current organisational activities
- vermin.

Health issues may relate to:

- airborne diseases
- food borne diseases
- infectious diseases.

Other items worn may include:

- bandages
- hair accessories
- jewellery
- watches.

Unhygienic personal contact may involve:

- transferring micro-organisms by:
  - blowing nose
  - coughing
  - drinking
  - eating
  - scratching skin and hair
  - sneezing
  - spitting
  - touching wounds
  - transmitting tobacco products by smoking.

Food contact surfaces may include:

- chopping boards
- containers
- cooking utensils
- crockery
- cutlery
- glassware
- pots and pans
- sinks
- workbenches.

Unhygienic cleaning

- cleaning food contact surfaces with linen, tea towels and
practices may involve: towels that may be contaminated with human waste:
- blood
- body secretions
- faeces
- using dirty:
  - cleaning cloths
  - tea towels
- spreading bacteria from bathroom or bedroom areas to mini-bar or kitchen areas in an accommodation facility.

Wash hands at appropriate times might include:
- before commencing or recommencing work with food
- immediately after:
  - handling raw food
  - smoking, coughing, sneezing, blowing the nose, eating, drinking, and touching the hair, scalp or any wound
  - using the toilet.

Appropriate facilities for hand washing may include:
- designated hand washing sink
- liquid soap
- single use towels
- warm running water.

</tbody>
</table>

Unit Descriptor
This unit describes the performance outcomes, skills and knowledge required to plan and coordinate a range of marketing and promotional activities at an operational level. The unit incorporates knowledge of marketing principles.

Application of the Unit
This unit applies to all industry sectors, and to individuals who take responsibility for coordinating marketing activities within the parameters of an established marketing strategy. People working independently with limited supervision undertake this role. This could include marketing coordinators or managers and owner-operators of small businesses.

Licensing/Regulatory Information
No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites
Not applicable.
Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Not applicable.

Elements and Performance Criteria
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

1. Plan and organise marketing activities.
   1.1 Plan marketing activities according to marketing plan or other organisational systems.
   1.2 Identify, analyse and incorporate relevant market information and legal, ethical and sustainability issues into short term planning.
   1.3 Confirm target markets and marketing medium.
   1.4 Evaluate potential and suitability of marketing opportunities that arise.
   1.5 Proactively seek and evaluate innovative marketing opportunities, including use of new technologies and media.
   1.6 Develop and implement action plans to address operational details.

2. Undertake a general public relations role.
   2.1 Establish and conduct positive relationships with industry and media colleagues.
   2.2 Use networks to support marketing activities.
   2.3 Develop public relations resources as required, including media releases and industry or media support materials.

3. Review and report on marketing activities.
   3.1 Review activities according to agreed evaluation methods and incorporate results into future planning.
   3.2 Prepare reports according to organisational policy and required timeframes.
   3.3 Present current and clear market intelligence to inform sales and marketing planning.
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to establish and conduct positive business relationships
- critical thinking skills to evaluate the potential of different marketing activities
- initiative and enterprise skills to proactively identify and respond to new opportunities
- literacy skills to:
  - interpret market trend information and marketing plans
  - develop detailed action plans for marketing activities
  - prepare media releases and marketing reports
- numeracy skills to work within marketing budgets
- planning and organising skills to coordinate diverse and unpredictable operational details
- problem-solving skills to proactively identify and respond to potentially complex implementation challenges
- self-management skills to take responsibility for the quality and outcomes of marketing activities
- technology skills to work with current web based marketing technologies.

Required knowledge

- content and structure of marketing plans
- key marketing principles, including the marketing management process and the four Ps - product, place, price and promotion
- industry structure and interrelationships, industry networks and information sources
- industry and market knowledge appropriate to the sector and organisation, including:
  - distribution and marketing networks, especially those that support the product or service being promoted, including e-business options and major promotional events
  - commission structures
  - current customer and market trends and preferences
- features, benefits and practical application of marketing activities commonly used in the service industries, including:
  - advertising
  - familiarisations
  - in-house promotions
  - public relations
  - social media
  - trade and consumer shows
  - signage and display
- legal issues that impact on the marketing of products and services, including consumer protection provisions
- ethical considerations for marketing activities, including:
• appropriate use of images and text
• protection of children
• targeting of particular groups in the community
• sustainability considerations for marketing activities, including:
  • reducing waste of printed materials
  • sustainability as a marketing tool.
## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the ability to:

- plan and coordinate multiple and different marketing activities for an operation, product or service
- integrate knowledge of the relevant industry, including structure and interrelationships, industry networks, information sources, and distribution and marketing networks
- integrate knowledge of the types of marketing activities used in the relevant industry sector and major industry promotional events
- demonstrate knowledge of marketing principles and their application to practical workplace activities.

**Context of and specific resources for assessment**

Assessment must ensure use of:

- real or simulated products or services for which the individual can conduct marketing activities
- current information and communications technology used by industry for marketing activities
- marketing plans and operational marketing documents, such as action plans and marketing reports.

**Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- evaluation of marketing activities planned and conducted by the individual, including reports on lessons to be learned for future activities
- evaluation of critiques prepared by the individual about industry marketing activities
- use of case studies to assess the application of marketing knowledge to different industry situations
- written or oral questioning to assess knowledge of marketing principles, structure of the industry, industry interrelationships, distribution networks and legal compliance issues
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the individual.
Guidance information for assessment

The assessor should design integrated assessment activities to holistically assess this unit with other units relevant to the industry sector, workplace and job role, for example:

- SITXMPR403 Plan and implement sales activities.
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Marketing activities** may include:
- advertising
- display and signage
- events
- familiarisations:
  - media
  - trade
- industry and public relations activities
- market research
- product development within scope of individual responsibility
- web-based and social media activities.

**Information** to be incorporated into the planning process may include:
- competitive activity
- financial statistics
- marketing reports
- marketplace trends
- sales reports.

**Legal, ethical and sustainability issues** may relate to:
- consumer law and trade practices
- work health and safety obligations
- resource conservation
- targeting of particular groups
- ways of presenting information.

**Potential and suitability** of promotional activities may relate to:
- consistency with overall marketing direction
- exposure to be achieved
- matching of attendees to target markets
- resource considerations:
  - financial
  - human
- timing of the activity or event.

**Operational details** may include:
- administrative and procedural requirements
- availability of promotional materials
- available technology
- contracting of other services, such as display
- equipment requirements.
- need for external assistance
- potential for cooperative approaches
- public relations implications
- staffing requirements and briefings
- strategies to ensure maximum benefits
- travel arrangements.

**Required Skills and Knowledge**

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- **analysis and interpretation skills to:**
  - break down competency standards
  - interpret assessment tools and other assessment information, including those used in RPL
  - identify candidate needs
  - make judgements based on assessment of available evidence
- **observation skills to:**
  - recognise candidate's prior learning
  - determine candidate's performance
  - identify when candidate may need assistance during the assessment processes
- **research and evaluation skills to:**
  - access required human and material resources for assessment
  - access assessment system policies and procedures
  - access RPL policies and procedures
  - evaluate evidence
  - evaluate assessment process
- **cognitive skills to:**
  - weigh up the evidence and make a judgement
  - consider and recommend reasonable adjustments
- **decision-making skills to:**
  - recognise a candidate's prior learning
  - make a decision on a candidate's competence
- **literacy skills to:**
  - read and interpret relevant information to conduct assessment
  - prepare required documentation and records or reports of assessment outcomes in required format
- **communication and interpersonal skills to:**
  - explain the assessment, including RPL process
  - give clear and precise instructions
  - ask effective questions
  - provide clarification
  - discuss process with other relevant people
  - give appropriate feedback
  - discuss assessment outcome
<table>
<thead>
<tr>
<th>REQUIRED SKILLS AND KNOWLEDGE</th>
</tr>
</thead>
<tbody>
<tr>
<td>• use language appropriate to candidate and assessment environment</td>
</tr>
<tr>
<td>• establish a working relationship with candidate</td>
</tr>
</tbody>
</table>

**Required knowledge**

- competency-based assessment, including:
  - vocational education and training as a competency-based system
  - criterion-referenced assessment as distinct from norm-referenced assessment
  - competency standards as the basis of qualifications
  - structure and application of competency standards
  - principles of assessment and how they are applied
  - rules of evidence and how they are applied
  - range of assessment purposes and assessment contexts, including RPL
  - different assessment methods, including suitability for gathering various types of evidence, suitability for content of units, and resource requirements and associated costs
  - reasonable adjustments and when they are applicable
  - types and forms of evidence, including assessment tools that are relevant to gathering different types of evidence used in competency-based assessment, including RPL
  - potential barriers and processes relating to assessment tools and methods
  - assessment system, including policies and procedures established by the industry, organisation or training authority
- RPL policies and procedures established by the organisation
- cultural sensitivity and equity considerations
- relevant policy, legislation, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the vocational education and training sector, such as:
  - copyright and privacy laws in terms of electronic technology
  - security of information
  - plagiarism
  - training packages and competency standards
  - licensing requirements
  - industry and workplace requirements
  - duty of care under common law
  - recording information and confidentiality requirements
  - anti-discrimination, including equal employment opportunity, racial vilification and disability discrimination
  - workplace relations
  - industrial awards and enterprise agreements
- OHS responsibilities associated with assessing competence, such as:
## REQUIRED SKILLS AND KNOWLEDGE

- requirements for reporting hazards and incidents
- emergency procedures
- procedures for use of relevant personal protective equipment
- safe use and maintenance of relevant equipment
- sources of OHS information
# Evidence Guide

## EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:
- assess competence of a number of candidates within the vocational education and training context against different units of competency or accredited curricula, following the relevant assessment plan
- assess at least one candidate for RPL
- consider reasonable adjustment and the reasons for decisions in at least one assessment
- cover an entire unit of competency and show:
  - the application of different assessment methods and tools involving a range of assessment activities and events
  - two-way communication and feedback
  - how judgement was exercised in making the assessment decision
  - how and when assessment outcomes were recorded and reported
  - assessment records and reports completed in accordance with assessment system and organisational, legal and ethical requirements
  - how the assessment process was reviewed.

### Context of and specific resources for assessment

Evidence must be gathered in the workplace whenever possible. Where no workplace is available, a simulated workplace must be provided.

### Method of assessment

### Guidance information for assessment

For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).
## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Assessment plan** may include:
- overall planning, describing:
  - what is to be assessed
  - when assessment is to take place
  - where assessment is to take place
  - how assessment is to take place.

**Benchmarks for assessment**:
- refer to a criterion against which the candidate is assessed
- may be a competency standard/unit of competency, assessment criteria of course curricula, performance specifications, or product specifications.

**Assessment tools** may include:
- both the instrument and the procedures for gathering and interpreting evidence in accordance with designated assessment methods
- instruments to be used for gathering evidence, such as:
  - profile of acceptable performance measures
  - templates and proformas
  - specific questions or activities
  - evidence and observation checklists
  - checklists for evaluating work samples
  - candidate self-assessment materials
- procedures, information and instructions for the assessor and candidate relating to the use of assessment instruments and assessment conditions.

**Specialist support** may include:
- assistance by third party, such as carer or interpreter
- support from specialist educator
- provision of developed online assessment activities
- support for remote or isolated candidates and assessors
- support from subject matter or safety experts
- advice from regulatory authorities
- assessment teams and panels
- support from lead assessors
- advice from policy development experts.
### RANGE STATEMENT

| **Assessment methods** include: | • particular techniques used to gather different types of evidence, such as:  
| | • direct observation  
| | • structured activities  
| | • oral or written questioning  
| | • portfolios of evidence  
| | • review of products  
| | • third-party feedback. |

| **Individual differences** may include: | • English language, literacy and numeracy barriers  
| | • physical impairment or disability  
| | • intellectual impairment or disability  
| | • medical condition that may impact on assessment, such as arthritis, epilepsy, diabetes and asthma  
| | • learning difficulties  
| | • mental or psychological disability  
| | • religious and spiritual observances  
| | • cultural images and perceptions  
| | • age  
| | • gender. |

| **Feedback** may include: | • ensuring assessment/RPL process is understood  
| | • ensuring candidate concerns are addressed  
| | • enabling questions and answers  
| | • confirming outcomes  
| | • identifying further evidence to be provided  
| | • discussing action plans  
| | • confirming gap training needed  
| | • providing information regarding available appeal processes  
| | • suggesting improvements in evidence gathering and presentation. |

| **Consultation** may involve: | • moderation with other assessors, or training and assessment coordinators  
| | • discussions with client, team leaders, managers, RPL coordinators, supervisors, coaches and mentors  
| | • technical and subject experts  
| | • English language, literacy and numeracy experts. |

| 1. Develop a mentoring plan | 1.1. Identify scope and boundaries of the mentoring relationship according to organisational procedures  
1.2. Establish *ground rules* and negotiate realistic expectations  
1.3. Establish and maintain confidentiality of the relationship in accordance with *legislation, policy and procedures* |
| 2. Facilitate mentoring relationship | 2.1. Develop learner's confidence, self-esteem, respect and trust in the mentoring relationship  
2.2. Share personal experiences and knowledge with the person being mentored according to agreed objectives  
2.3. Support the person being mentored to develop and use skills in problem solving and decision making  
2.4. Use personal and professional networks to assist the person being mentored  
2.5. Provide information, guidance and constructive guidance to enhance engagement in the workplace  
2.6. Use *techniques for resolving differences* without damaging the relationship, and obtain assistance according to organisational policy and procedures |
| 3. Monitor mentoring relationship | 3.1. Provide planning assistance and guidance as requested by the person being mentored in a form and style to suit their requirements  
3.2. Provide feedback to the person being mentored on progress towards achieving the expectations and goals of the mentoring process  
3.3. Recognise and discuss changes in the mentoring relationship with appropriate stakeholders  
3.4. Negotiate and manage closure of the mentoring arrangement once objectives have been met |
| 4. Evaluate effectiveness of mentoring | 4.1. Establish and discuss *benefits* gained from the mentoring process  
4.2. Reflect on and articulate the personal benefits gained from providing mentoring  
4.3. Identify and report the outcomes of the mentoring arrangement and the *benefits to the organisation* according to organisational policy and procedures to improve the mentoring system or program |
# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- planning and time-management skills to mentor in a workplace
- oral communication and language skills to motivate learners
- organisational skills to provide guidance and feedback to individuals
- interpersonal skills to:
  - engage in relationship building, including building trust and maintaining confidentiality
  - respond to diversity, including gender and disability
- communication skills to use a range of communication strategies, including listening, questioning, and giving and receiving feedback
- initiative and enterprise skills to apply procedures relating to OHS and environmental legislation in the context of workplace mentoring

### Required knowledge

- relevant policy, legislation, codes of practice and national standards likely to impact on the provision of workplace mentoring
- training contracts and responsibilities of employer, registered training organisation (RTO) and funding body
- training plans and responsibilities
- training products and strategies for learning
- mentoring methodologies and strategies
- acceptable behaviour in the mentoring relationship
- equal employment opportunity, equity and diversity principles
- OHS relating to the work role, including:
  - hazards relating to the industry and specific workplace
  - reporting requirements for hazards and incidents
  - specific procedures for work tasks
  - safe use and maintenance of relevant equipment
  - emergency procedures
  - sources of OHS information
## Evidence Guide

### Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

| Overview of assessment | Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated. |

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

<table>
<thead>
<tr>
<th>Critical aspects for assessment and evidence required to demonstrate competency in this unit</th>
<th>Evidence of the ability to:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- prepare a mentoring plan between the mentor and learner that reflects the scope and substance expected within a plan prepared for a learner undertaking a contracted apprenticeship or traineeship</td>
</tr>
<tr>
<td></td>
<td>- facilitate at least three mentoring sessions</td>
</tr>
<tr>
<td></td>
<td>- provide information on sessions, including comments and notes from both mentor and learner.</td>
</tr>
</tbody>
</table>

### Context of and specific resources for assessment

| Context of and specific resources for assessment | Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided. |

### Method of assessment

### Guidance information for assessment

| Guidance information for assessment | For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au). |
# Range Statement

<table>
<thead>
<tr>
<th>RANGE STATEMENT</th>
</tr>
</thead>
<tbody>
<tr>
<td>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</td>
</tr>
</tbody>
</table>

### Mentoring

- long-term focus on personal growth and learning
- wide range of learning oriented to:
  - support
  - guidance in personal or career growth
  - relationship, not just a procedure or activity
  - one person professionally assisting the career development of another.

### Ground rules

- training for mentoring partners
- mentoring agreement
- active involvement of both partners in the mentoring process.

### Legislation, policy and procedures

- commonwealth and state or territory legislation and regulations, such as:
  - privacy legislation
  - equal employment opportunity, anti-discrimination and harassment legislation
  - OHS legislation
  - user choice
  - organisational policy, procedures and protocols.

### Techniques for resolving differences

- finding a mutually beneficial solution
- self-disclosure
- inviting discussion
- providing explanations
- accessing assistance.

### Mentoring relationship

- informal workplace development program
- formal mentoring process associated with a contracted apprenticeship or traineeship, involving a formal training plan.

### Stakeholders

- trainee or apprentice
- manager or supervisor
- RTO
- learning support services, including assistive technology
RANGE STATEMENT

<table>
<thead>
<tr>
<th>and diagnostic testing</th>
</tr>
</thead>
<tbody>
<tr>
<td>funding organisation</td>
</tr>
<tr>
<td>supplier of learning resources</td>
</tr>
</tbody>
</table>

**Benefits** may include:

- insights into organisational culture, attitudes and expected behaviours
- supportive environment in which successes and failures can be evaluated
- networking opportunities
- development of workplace competence and self-confidence
- recognition and job satisfaction
- mutual respect.

**Benefits to the organisation** may include:

- increased productivity
- new competencies in the person being mentored
- staff motivation
- more committed, involved and responsible learners.

TAETAS501B Undertake organisational training needs analysis

Modification History

Version    Comments
TAETAS501B  Released with TAE10 Training and Education Training Package version 2.0

Unit Descriptor
This unit describes the performance outcomes, skills and knowledge required to undertake a training needs analysis (TNA) to identify the training and assessment needs of an organisation.

Application of the Unit
This unit typically applies to those working in roles that require them to work with organisations to identify training needs.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.
Elements and Performance Criteria Pre-Content

<table>

</thead>
<tbody>
<tr>
<td></td>
<td>3.2 Provide the organisation with <strong>options</strong> for meeting identified training needs</td>
</tr>
<tr>
<td></td>
<td>3.3 Obtain feedback and comments from the organisation on the suitability and sufficiency of advice and recommendations</td>
</tr>
<tr>
<td></td>
<td>3.4 Use legal requirements to process, complete and present final report to the organisation</td>
</tr>
</tbody>
</table>
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- cognitive skills to analyse and interpret research and conceptualise and synthesise issues around training needs
- communication and interpersonal skills to consult with client and relevant people, to discuss client needs and provide observations and recommendations for training development
- literacy skills to critically evaluate information and prepare reports providing advice and recommendations
- negotiation and facilitation skills for research, presenting and discussing recommendations and obtaining feedback
- numeracy skills to analyse data and present statistical information
- problem solving skills to apply effective approaches to training needs
- research skills to collect information around training needs, including observation and consultation.

Required knowledge

- competency standards and Training Packages/accredited courses
- Australian Quality Training Framework (AQTF) requirements and standards
- risk identification and management strategies
- industry and enterprise knowledge
- evaluation and research methodologies
- relevant social, political, economic and technological developments
- principles of intellectual property
- training and development strategies
- change management concepts/strategies
- occupational health and safety (OHS) relating to undertaking an organisational training needs analysis.
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Objectives may include:
- improved individual learning outcomes for new or existing staff
- access to government training incentives and funding
- productivity improvement
- developing administration and records management systems
- compliance with, or knowledge of, legislative or government regulatory requirements
- individualised organisational training and skill requirements.

Options may include:
- developing in-house capacity to meet identified needs
- identifying training and/or assessment organisations to meet needs
- identifying specific units of competency, qualifications/courses to meet needs
- consultancy services.

TLIA1001A Secure cargo

Modification History
Not Applicable

Unit Descriptor
This unit involves the skills and knowledge required to secure cargo including preparing to secure cargo/containers, lashing and unlashing cargo, protecting cargo from weather, and packing and unpacking cargo. It may apply in cargo securing contexts in the stevedoring, transport, distribution and allied industries. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit
Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the securing of cargo.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements to the securing of cargo as part of work activities in the stevedoring, transport, distribution and allied industries.

Licensing/Regulatory Information
Refer to Unit Descriptor

Pre-Requisites
Not Applicable
Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1 Prepare to secure cargo/containers | 1.1 Work area is prepared and maintained in accordance with the national standards, safety codes and site operating procedures  
1.2 Unsafe work practices and/or equipment are reported to appropriate personnel  
1.3 Appropriate protective clothing, equipment and fittings are selected  
1.4 Formwork is erected where no lashing points exist  
1.5 Lashing plan is read and interpreted |
| 2 Lash and unlash cargo | 2.1 Work is conducted in accordance with industry standards, statutory requirements, safety codes, site operating requirements and any special requirements of the cargo  
2.2 Lashing points are identified and appropriate fittings and lashing equipment are used for each lashing point  
2.3 Cargo is lashed and secured to lashing points ensuring the correct spread of lashings and that lashings are secured, attached and tensioned  
2.4 Tensioners are securely fastened  
2.5 When unlashing, fittings are released, disconnected and removed from the cargo  
2.6 Lashing equipment is placed in designated storage areas or cleared from work area  
2.7 Lashing/unlashing operations ensure no injury to personnel or damage to machinery or cargo  
2.8 Lashing is completed in accordance with lashing plan |
| 3 Protect cargo from weather | 3.1 Cargo is covered/uncovered safely ensuring appropriate covering and lashing, no injury to personnel or damage to cargo or equipment  
3.2 Work is conducted in accordance with the requirements of national standards, safety codes and site operating procedures |
| 4 Pack and unpack cargo | 4.1 Damaged cargo is identified and reported following enterprise procedures  
4.2 Cargo is sorted and stacked prior to packing or after unpacking, ensuring the stack is in the correct location, in accordance with national standards, safety codes, and site operating procedures  
4.3 Cargo is identified through the interpretation of marks or numbers  
4.4 Tight stow of cargo is maintained  
4.5 Cargo is handled ensuring no injury to personnel or damage to cargo or equipment |
Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Procedures for managing and controlling hazardous situations when carrying out work activities
- The marking and numbering systems for cargo
- Problems that may occur when securing cargo or freight and appropriate action that can be taken to resolve the problems
- Focus of operation of work systems, equipment, management and site operating systems for the securing of cargo or freight
- Workplace procedures and policies for the securing of cargo or freight
- Australian and international standards, codes and regulations relevant to the securing of cargo or freight including the Australian and International Dangerous Goods Codes
- Relevant bond, quarantine or other legislative requirements
- Relevant handling and safety codes
- Relevant OH&S and environmental procedures and regulations

Required skills:

- Communicate effectively with others when securing cargo or freight
- Read and interpret instructions, procedures, information and labels relevant to securing cargo or freight
- Identify cargo, container and goods, coding, ADG and IMDG markings and where applicable emergency information panels
- Interpret and follow operational instructions and prioritise work
- Receive, acknowledge and send messages with available communications equipment
- Complete documentation related to the securing of cargo or freight
- Work collaboratively with others when securing cargo or freight
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
Required skills:

- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Identify, select and use relevant equipment, processes and procedures when securing cargo or freight
- Operate and adapt to differences in cargo handling equipment in accordance with standard operating procedures
- Use the lashing and protection equipment
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment,
EVIDENCE GUIDE

and

- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:
- in a range of work environments
- by day or night

Customers may be:
- internal or external

Workplaces may comprise:
- large, medium or small worksites

Work may be conducted in:
- limited or restricted spaces
- exposed conditions
- controlled or open environments
- at height
- in a workbox or workcage

Cargo may include:
- goods with specialist requirements, including temperature controlled goods and dangerous goods

Lashing equipment for containers may include:
- twistlocks
- pelican hooks
- lashing rods (bars)
- turn handles (keys)
- bottle screws
- bridging clamps
RANGE STATEMENT

Securing equipment may include:
- cones
- chocks
- racks
- lashings
- ropes
- chains

Covers may include:
- rain and dust covers

Hazards in the work area may include exposure to:
- chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials

Personnel in work area may include:
- workplace personnel
- site visitors
- contractors
- official representatives

Personal protective equipment may include:
- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- protective clothing
- high visibility clothing
- full arrest safety harness

Communication in the work area may include:
- phone
- radio
- oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Information/documents may include:
- goods identification numbers and codes
- manifests, bar codes, and container identification/serial number
- Australian and international codes of practice and regulations relevant to the securing of cargo
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- operations manuals, job specifications and induction documentation
- manufacturers specifications for equipment
RANGE STATEMENT

- workplace procedures and policies
- supplier and/or client instructions
- dangerous goods declarations and material safety data sheets (where applicable)
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian standards and certification requirements
- quality assurance procedures
- emergency procedures

Applicable regulations and legislation may include:

- relevant codes and regulations for the securing of cargo
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
  - Australian and International Dangerous Goods Codes
  - Australian Marine Orders and the International Maritime Dangerous Goods Code
  - IATA Dangerous Goods by Air regulations
  - Australian and International Explosives Codes
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- marine orders
- relevant Australian standards and certification requirements
- relevant state/territory OH&S and environmental protection legislation
- workplace relations regulations
- workers compensation regulations

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
Elements and Performance Criteria

**ELEMENT** | **PERFORMANCE CRITERIA**
---|---
1 Plug/unplug reefer units to power sources | 1.1 Reefer units are plugged/unplugged safely in accordance with workplace procedures
1.2 Reefer units are checked to be running correctly after being plugged in
1.3 Problems with the operation of reefer units are identified and reported to appropriate personnel in accordance with workplace procedures
1.4 Faults in reefer units are investigated and reported in accordance with workplace procedures
1.5 Reefer units are unplugged as required and cables are cleared from units

2 Attach/detach clip-on units | 2.1 Clip-on units are attached/detached safely in accordance with the regulatory and code of practice requirements and workplace procedures
2.2 Problems with the operations of clip-on units are identified and reported to appropriate personnel

Required Skills and Knowledge

**REQUIRED KNOWLEDGE AND SKILLS**

This describes the essential knowledge and skills and their level required for this unit.

**Required knowledge:**
- Australian and international standards, codes and regulations relevant to the connection and disconnection of reefer units
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the connection and disconnection of reefer units
- Focus of operation of work systems, equipment, management and site operating systems for the connection and disconnection of reefer units
- Problems that may occur when connecting and disconnecting reefer units and appropriate action that can be taken to resolve the problems
- Site layout and location of reefer units
- The marking and numbering systems for cargo

**Required skills:**
- Communicate effectively with others when connecting and disconnecting reefer units
Required skills:

- Read and interpret instructions, procedures, information and labels relevant to connecting and disconnecting reefer units
- Interpret and follow operational instructions and prioritise work when connecting and disconnecting reefer units
- Identify cargo, container and goods, coding, ADG and IMDG markings and where applicable emergency information panels
- Receive, acknowledge and send messages with available communication equipment
- Work collaboratively with others when connecting and disconnecting reefer units
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions in the operation of reefer units in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events when connecting and disconnecting reefer units
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when connecting and disconnecting reefer units
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Identify reefer units requiring clip-on units
- Identify, select and use relevant equipment, processes and procedures when connecting and disconnecting reefer units
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
EVIDENCE GUIDE

Unit

- the underpinning knowledge and skills
- relevant legislation and workplace procedures
- other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

1.3 Content requirements for each section of the documentation are applied  
1.4 Timelines for completion of documents are identified and noted  
1.5 Requirements for permits and other documentation (e.g. Quarantine) are identified and implications noted  
1.6 Procedures for obtaining clearances including AUTHORITY TO DEAL, Delivered into Home Consumption authorisation and Export Declaration Numbers (EDN) are identified and followed in accordance with the requirements of Customs and related legislation and workplace procedures  
1.7 Letters of credit are identified and implications of each noted  
1.8 Assistance is sought as required in identifying required documents and to commence process of assessing or completing these documents  
1.9 Lodge all documentation if required by legislation (e.g. CITES) |
| 2  
Complete documentation to meet legislative and workplace requirements | 2.1 Content requirements for each section of the documentation are identified and applied in accordance with the requirements of Customs and related legislation and workplace procedures  
2.2 Workplace procedures for authorisations are followed  
2.3 Data entry for documents are completed  
2.4 Problems arising in completing required documents are identified and assistance sought to resolve these in accordance with the requirements of Customs and related legislation and workplace procedures  
2.5 Actions are taken to meet deadlines  
2.6 Assistance is sought as required in completing required documents |
| 3  
Check documentation to ensure it meets legislative requirements | 3.1 Documents are collated and checked before forwarding to supervisor, manager or more senior personnel for checking within designated timelines in accordance with the requirements of Customs and related legislation and workplace procedures  
3.2 Declarations are checked to ensure they meet the requirements of Customs and related legislation and workplace procedures  
3.3 Letters of credit are checked to ensure they meet commercial, transport and overseas requirements  
3.4 Dangerous goods documentation is checked in accordance with the requirements of Customs and related legislation and workplace procedures |
**ELEMENT**

**PERFORMANCE CRITERIA**

3.5 Any revisions to documents are finalised and rechecked by self and supervisor, manager or more senior personnel prior to lodgement

4 Lodge documentation for processing

4.1 Documents are forwarded to relevant personnel in accordance with the requirements of Customs and related legislation and workplace procedures

4.2 Documents are filed, stored and retained in accordance with the requirements of Customs and related legislation and workplace procedures

---

**Required Skills and Knowledge**

**REQUIRED KNOWLEDGE AND SKILLS**

This describes the essential knowledge and skills and their level required for this unit.

**Required knowledge:**

- Australian and international standards, codes and regulations relevant to the import and export of cargo and freight
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the completion of import and export documentation
- Focus of operation of work systems, equipment, management and site operating systems for completing import/export cargo and freight documentation
- Problems that may occur when completing import and export documentation and appropriate action that can be taken to resolve the problems
- The Customs Act 1901 and related legislation
- Documentation requirements for the import and export of cargo and freight

**Required skills:**

- Communicate effectively with others when completing import and export documentation
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the import and export of cargo and freight
- Complete and/or assess accuracy of import and export documentation
- Work collaboratively with others when completing import and export documentation
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems when completing and/or assessing
Required skills:

import and export documentation in accordance with regulatory requirements and workplace procedures

- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use relevant communications, computing and office equipment when completing import and export documentation

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
  - identifying procedures required for documentation for import/export of goods
  - completing and checking documentation and records to meet relevant Customs legislation and related legislation and workplace requirements
  - providing customer/client service and work effectively with others
  - selecting and using appropriate workplace colloquial and technical language and communication technologies in the workplace context

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
  - In both real and simulated environments, access is
EVIDENCE GUIDE

required to:
- relevant and appropriate materials and equipment, and
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment
- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement
RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted in:
- a range of work environments
- by day or night

Customers may be:
- internal or external

Workplaces may comprise:
- large, medium or small worksites

Work may be conducted in:
- limited or restricted spaces
- exposed conditions
- controlled or open environments

Cargo may include:
- goods with specialist requirements, including temperature controlled goods and dangerous goods
- personal effects
- consignments imported/exported by parcels post
- consignments imported/exported by air freight
- consignments imported/exported by sea freight
- wildlife or wildlife products (living or non-living)
- goods with specialist requirements, including temperature controlled goods and dangerous goods
RANGE STATEMENT

Hazards in the work area may include exposure to:
- chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials

Consultative processes may involve:
- other employees and supervisors
- suppliers, customers and clients
- relevant authorities and institutions
- management and union representatives
- industrial relations and OH&S specialists
- other maintenance, professional or technical staff

Communication in the work area may include:
- phone
- electronic data interchange (EDI)
- fax
- email
- internet
- radio
- oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Information/documents may include:
- goods identification numbers and codes
- manifests, barcodes, and container identification/serial number
- relevant Customs legislation, related legislation including quarantine legislation, environment and conservation legislation and Australian and international codes of practice and regulations relevant to import/export of cargo
- Australian and international standards, regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- dangerous goods declarations and material safety data sheets (MSDSs) (where applicable)
- packing declaration
- timber treatment certificates
- cleanliness certificate
- handling instructions for cargo (especially for dangerous goods or temperature controlled goods)
- commercial invoices
- packing lists
- air waybill (AWB)
- certificates of origin
RANGE STATEMENT

- bills of lading (B/L) or sea waybills
- certificates of marine insurance, other insurance certificates
- quarantine treatment certificate
- transportation and warehousing instructions
- permits from regulatory bodies (Australian and international)
- financial documentation
- other documents specific to goods, country of origin/destination
- operations manuals, job specifications and induction documentation
- manufacturers specifications for equipment
- workplace procedures and policies
- supplier and/or client instructions
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian Standards and certification requirements
- quality assurance procedures
- emergency procedures
- relevant Customs and related legislation, including taxation legislation
- relevant standards and codes for the import/export of cargo
- quarantine legislation
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
  - Australian and International Dangerous Goods Codes
  - Australian Marine Orders and the International Maritime Dangerous Goods Code
  - IATA Dangerous Goods by Air regulations
  - Australian and International Explosives Codes
- workplace relations regulations
- equal opportunity legislation
- equal employment opportunity and affirmative action legislation

Applicable regulations and legislation may include:

Unit Descriptor
Unit Descriptor
This unit involves the skills and knowledge required to package goods in accordance with regulatory and workplace requirements including selecting materials, packing and unwrapping products, and labelling packaged products/loads to the required labelling standards. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit
Application of the Unit
Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the packaging of goods.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements to the packaging of goods as part of work activities in the warehousing, distribution and/or storage industries.

| 1 Select materials and pack and unwrap products | 1.1 Packaging specifications and order packaging documentation are correctly interpreted  
1.2 Appropriate packaging technology suitable for the goods to be packed is selected  
1.3 Packaging materials are identified and matched to specifications  
1.4 Work plan ensures materials are used economically and that appropriate packaging is used that minimises loss and damage in transit or storage  
1.5 Work is planned in accordance with OH&S requirements  
1.6 Completed packed goods are stacked to minimise damage from within and outside |
| 2 Label packaged products/loads | 2.1 Workplace labelling standards are identified  
2.2 Appropriate goods handling, labelling and other identification symbols are utilised  
2.3 Invoices and picking slips are attached (where required)  
2.4 Workplace documentation is completed |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international codes and regulations relevant to the packaging of goods including the Australian Dangerous Goods Code (ADG Code)
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the packaging of goods
- Focus of operation of work systems, equipment, management and site operating systems for the packaging of goods
- Problems that may occur when packaging goods and appropriate action that can be taken to resolve the problems
- Documentation requirements for the packaging of goods
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles
Required skills:

- Communicate effectively with others when packaging goods
- Read and interpret instructions, procedures and labels relevant to the packaging of goods
- Complete documentation related to work activities when packaging goods
- Work collaboratively with others when packaging goods
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when packaging goods in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events that may occur when packaging goods
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of equipment when packaging goods
- Check operation of packaging equipment in terms of service schedule and standard operating procedures
- Select and use relevant communications, computing equipment and materials when packaging goods
- Estimate the size, shape and special requirements of goods and loads

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
EVIDENCE GUIDE

**Required Skills and Knowledge**

**REQUIRED KNOWLEDGE AND SKILLS**

This describes the essential knowledge and skills and their level required for this unit.

**Required knowledge:**

- Regulations relevant to the picking and processing of orders, including relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the picking and processing of orders
- Focus of operation of work systems, equipment, management and site operating systems for the picking and processing of orders
- Problems that may occur when picking and processing an order and appropriate action that can be taken to resolve the problems
REQUIRED KNOWLEDGE AND SKILLS

- Documentation and record requirements when picking and processing an order
- Equipment used during picking and processing operations and the precautions and procedures that should be followed in its use
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when picking and processing orders
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures, signs and labels relevant to the picking and processing of orders
- Complete documentation related to picking and processing orders
- Identify relevant stock and goods coding and labelling, including ADG and IMDG markings
- Work collaboratively with others when picking and processing orders
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions when picking and processing orders in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events when picking and processing orders
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when picking and processing orders
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use relevant equipment and communications technology when picking and processing orders
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Estimate the size, shape and special requirements of goods/loads

Evidence Guide

Unit Descriptor

Unit Descriptor
This unit involves the skills and knowledge required to use product knowledge to complete work operations in accordance with workplace requirements including identifying products in a subsection of a warehouse or other storage area, examining quality and reporting on products, and using inventory and labelling systems to identify and locate products. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit
Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the identification, handling and storage of various categories of products/stock.

Work is performed under some supervision generally within a team environment. It involves the application of product knowledge and an understanding of relevant regulatory requirements to the handling and storage of various types of products/stock as part of work activities in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Employability Skills
This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
Elements and Performance Criteria

**ELEMENT** | **PERFORMANCE CRITERIA**
---|---
1. **Identify products in a subsection of a warehouse or other storage area** | 1.1 Products are identified against specified criteria in accordance with workplace procedures
1.2 Storage and handling characteristics are identified and applied consistently
1.3 Products are described to internal customers identifying features which may affect location, safety or storage requirements
2. **Examine quality and report on products** | 2.1 Products are inspected in accordance with workplace quality assurance procedures
2.2 Workplace procedures are followed to replace, return or dispose of stock/products which are not useable
2.3 Non-conforming products are recorded/reported in accordance with workplace procedures
3. **Use inventory and labelling systems to identify and locate products** | 3.1 Inventory and labelling systems are used to locate products within the workplace
3.2 Goods are physically located and identified

Required Skills and Knowledge

**REQUIRED KNOWLEDGE AND SKILLS**

This describes the essential knowledge and skills and their level required for this unit.

**Required knowledge:**

- Australian codes and regulations relevant to the products being identified, handled, transported, stacked and/or stored as part of work operations
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the identification, handling, stacking and storage of particular categories of products
- Focus of operation of work systems, equipment, management and site operating systems for the packaging of goods
- Categories or groups of products and the special handling, stacking and storage requirements for each
- Purpose and use of cataloguing and labelling systems
- Strategies to seek out sources of knowledge of products and use this information to inform work
- Types of equipment and storage areas appropriate for different types of goods including perishable, fragile, dangerous, composition/state goods
REQUIRED KNOWLEDGE AND SKILLS

- Documentation requirements including reports and records concerning damaged or contaminated goods
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when handling, transporting and storing products and providing information on products and services
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures, information and signs relevant to the handling, transporting and storing of products and the provision of information on products and services
- Identify containers and goods coding, ADG and IMDG markings and where applicable emergency information panels
- Complete documentation related to work activities
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Adapt to differences in products and services in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Select and use relevant communications, computing and load handling equipment
- Estimate the size, shape and special requirements of goods and loads

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement
EVIDENCE GUIDE

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:
- in a range of work environments
- by day or night

Customers may be:
- internal or external

Workplaces may comprise:
- large, medium or small worksites

Work may be conducted in:
- limited or restricted spaces
- exposed conditions
- controlled or open environments
RANGE STATEMENT

Goods may involve:
- special handling, location, storage and/or packaging requirements, including temperature controlled goods and dangerous goods

Inventory systems may be:
- automated
- manual
- paper-based
- computerised
- microfiche

Categories or groups of products/stock may include:
- small parts
- perishable goods
- overseas export
- dangerous goods
- refrigerated products
- temperature controlled stock
- fragile goods

Distinguishing identification criteria for products may include:
- shape
- size
- colour
- distinguishing features
- codes and product identification/serial numbers
- labels
- signs or other documentation
- locations

The characteristics of products/stock may include:
- small parts
- toxicity
- flammability
- form
- weight
- size
- state
- perishability
- fragility
- security risk

Labelling systems may include:
- batch code
- bar code
- identification numbering systems
- serial numbers
- symbols for safe handling
- ADG and HAZCHEM Codes

Communication in the work area
- phone
RANGE STATEMENT

may include:

- electronic data interchange (EDI)
- fax
- email
- internet
- RF systems
- oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Personal protective equipment may include:

- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- high visibility clothing

Consultative processes may involve:

- other employees and supervisors
- suppliers, customers and clients
- relevant authorities and institutions
- management and union representatives
- industrial relations and OH&S specialists
- other maintenance, professional or technical staff

Hazards in the work area may include:

- chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials
- oil or water on floor
- a fire or explosion
- damaged packaging or pallets
- debris on floor
- faulty racking
- poorly stacked pallets
- faulty equipment

Information/documents may include:

- goods identification numbers and codes
- manifests, picking slips, merchandise transfers, stock requisitions and bar codes
- codes of practice and regulations relevant to the identification, handling and stacking of goods
- Australian and international regulations and codes of practice for the handling, stacking and transport of dangerous goods and hazardous substances
- operations manuals, job specifications and induction
RANGE STATEMENT

documentation
- manufacturers specifications for equipment
- workplace procedures and policies
- supplier and/or client instructions
- dangerous goods declarations and material safety data sheets (where applicable)
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian standards and certification requirements
- quality assurance procedures
- emergency procedures

Applicable regulations and legislation may include:
- relevant codes and regulations for the packaging of goods
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
  - Australian and International Dangerous Goods Codes
  - Australian and International Explosives Codes
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- marine orders
- relevant state/territory OH&S and environmental protection legislation
- workplace relations regulations
- workers compensation regulations

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1 Participate in stock rotation activities | 1.1 Stock levels are counted against appropriate documentation  
1.2 Stock levels are recorded and reported  
1.3 Stocks are replenished, adjusted or rotated following workplace procedures  
1.4 Stock re-ordering processes are activated when appropriate  
1.5 Routine and non-routine problems with products or storage systems are reported following workplace procedures |
| 2 Interpret and fill replenishment request | 2.1 Order request documentation is interpreted  
2.2 Product(s) in order noted and workplace location(s) are identified  
2.3 Workplace and product knowledge is used to plan sequence of work  
2.4 Appropriate materials handling equipment is selected in accordance with workplace procedures and timeframes and OH&S regulations  
2.5 Required schedules for order movement and despatch or storage are identified |
| 3 Complete stock replenishment | 3.1 Products are sorted, assembled and consolidated in the appropriate storage areas  
3.2 Work is checked in accordance with company procedures  
3.3 Documentation and records are completed in accordance with workplace procedures |

## Required Skills and Knowledge

### REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

**Required knowledge:**

- Australian codes and regulations relevant to the replenishment of stock
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the replenishment of stock
- Focus of operation of work systems, equipment, management and site operating systems for the replenishment of stock
- Principles of operation and functions of stock control systems
- Computer records and documentation requirements for the replenishment of stock
REQUIRED KNOWLEDGE AND SKILLS

- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when replenishing stock
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the replenishment of stock
- Complete documentation related to the replenishment of stock
- Work collaboratively with others when replenishing stock
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when replenishing stock in accordance with regulatory requirements and workplace procedures
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in stock and equipment in accordance with standard operating procedures
- Select and use relevant communications, computing and office equipment when replenishing stock
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
EVIDENCE GUIDE

- relevant legislation and workplace procedures
- other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:

- perishable goods
- overseas export
- dangerous goods
- refrigerated products
- temperature controlled stock
- fragile goods

The characteristics of products/stock may include:  
- small parts
- toxicity
- flammability
- form
- weight
- size
- state
- perishability
- fragility
- security risk

Labelling systems may include:  
- batch code
- bar code
- identification numbering systems
- serial numbers
- symbols for safe handling
- ADG and HAZCHEM Codes

Hazards in the work area may include:  
- chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials
- oil or water on floor
- a fire or explosion
- damaged packaging or pallets
- debris on floor
- faulty racking
- poorly stacked pallets
RANGE STATEMENT

Communication in the work area may include:
- faulty equipment
- phone
- electronic data interchange (EDI)
- fax
- email
- internet
- RF systems
- oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Personal protective equipment may include:
- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- high visibility clothing

Consultative processes may involve:
- other employees and supervisors
- suppliers, customers and clients
- relevant authorities and institutions
- management and union representatives
- industrial relations and OH&S specialists
- other maintenance, professional or technical staff

Information/documents may include:
- goods identification numbers and codes
- manifests, picking slips, merchandise transfers, stock requisitions and bar codes
- codes of practice and regulations relevant to the identification, handling and stacking of goods
- Australian and international regulations and codes of practice for the handling, stacking and transport of dangerous goods and hazardous substances
- operations manuals, job specifications and induction documentation
- manufacturers specifications for equipment
- workplace procedures and policies
- supplier and/or client instructions
- dangerous goods declarations and material safety data sheets (where applicable)
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian standards and certification
RANGE STATEMENT

requirements
• quality assurance procedures
• emergency procedures

Applicable regulations and legislation may include:

• relevant codes and regulations for the packaging of goods
• Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
  • Australian and International Dangerous Goods Codes
  • Australian and International Explosives Codes
• licence, patent or copyright arrangements
• water and road use and licence arrangements
• export/import/quarantine/bond requirements
• relevant state/territory OH&S and environmental protection legislation
• workplace relations regulations
• workers compensation regulations

Competency Field

Competency Field A - Handling Cargo/Stock
TLIA2041A Manually sort mail and parcels

Modification History
Not Applicable

Unit Descriptor

This unit involves the skills and knowledge required to manually sort mail and parcels in accordance with workplace requirements, including carrying out required preparations of the work area, manually sorting mail and parcels, and finalising the required sorting processes. The sorting processes include accurately and efficiently organising mail and parcels into groups for further processing or distribution and containerising processed mail and parcels ready for transfer to the next processing or distribution point. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Work must be carried out in compliance with the regulations and workplace requirements pertaining to the processing of mail and parcels.

Work is normally performed under general supervision, usually in a team or outstation environment. It involves the application of workplace procedures and regulatory requirements to the manual sorting of mail and parcels as part of work activities in the postal and allied industries.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1 Prepare to sort mail and parcels manually | 1.1 Individual and work team priorities and responsibilities are identified and confirmed  
1.2 All OH&S and environment protection procedures and requirements for the workplace are identified, accessed and applied  
1.3 The availability of mail and parcels to be processed is identified and confirmed  
1.4 Mail and parcels to be processed are transferred to processing point  
1.5 Labels for identifying the destination of mail are created and affixed to trays |
| 2 Sort mail and parcels manually | 2.1 Internal operating procedures and standards are applied to the manual processing of parcels and mail  
2.2 Mail and parcels are inspected to ensure that all criteria have been met  
2.3 Mail and parcels are sorted accurately and correctly in compliance with priority for processing and manual sorting procedures  
2.4 Mail and parcels are handled safely to minimise risk of injury to people and damage to mail and parcels  
2.5 Mail and parcels that are damaged, underpaid, incorrectly classified, or are non-conforming items are identified, separated and re-processed in accordance with workplace procedures  
2.6 Legal requirements and workplace policies and procedures in relation to the security of mail and parcels are followed |
| 3 Complete process for manually sorting mail and parcels | 3.1 Mail and parcel sorting frames/bag racks are cleared down, and mail and parcel containers/bags are sealed and labelled in accordance with workplace procedures  
3.2 Mail and parcels are transferred to next processing or distribution point using appropriate shifting equipment and labels scanned as required  
3.3 Information required to complete records of mail and parcels processed is provided and recorded  
3.4 Excess equipment is removed and work area is prepared for next activity/shift |

Required Skills and Knowledge
REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

**Required knowledge:**

- Australian and international codes and regulations relevant to mail operations
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the manual sorting of mail and parcels
- Focus of operation of work systems, equipment, management and site operating systems for the manual sorting of mail and parcels
- Problems that may occur when manually sorting mail and parcels and appropriate action that can be taken to resolve/avoid the problems
- Requirements of mail sorting systems, operations and relevant equipment
- Hazards that may occur during the manual sorting of mail and parcels and ways of controlling the risks involved
- Site layout
- Relevant personal protective equipment and procedures for its use

**Required skills:**

- Communicate effectively with others when manually sorting mail and parcels
- Read and interpret instructions, procedures and labels relevant to the manual sorting of mail and parcels
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the manual sorting of mail and parcels
- Work collaboratively with others when manually sorting mail and parcels
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise during the manual sorting of mail and parcels in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events that may arise during the manual sorting of mail and parcels
- Plan own work including predicting consequences and identifying improvements
- Apply security and safety precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment and systems in accordance with standard
Required skills:

- operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Identify, select and use relevant equipment, processes and procedures when manually sorting mail and parcels

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
EVIDENCE GUIDE

- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:
- in a range of work environments
- by day or night

Workplaces may comprise:
- large, medium or small worksites

Operations may include:
- shiftwork

Customers may be:
- internal or external

Hazards may include:
- vehicular traffic and pedestrians
- dust and vapours
- hazardous or dangerous materials
- humidity, air temperature
- lighting conditions
- machinery/equipment moving parts
- noise

Weighing devices may be:
- mechanical
- automated
- weighbridge

Work priorities may be communicated through:
- briefings
- noticeboards
- announcements

Equipment may include:
- mail trays, tubs and bags
- sorting frame/bag rack
- scanners
- tipping belt
- knife
- pallet jack/maverick
RANGE STATEMENT

- powered lifters
- king fishers
- scales
- carousel
- Unit Load Device (ULD) and Wheeled Unit Load Device (WULD)
- Vertical Sorting Frame (VSF) and Vertical Sorting Division (VSD)
- ULD tipper
- conveyor belts
- strapping machine

Personal protective equipment may include:

- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- protective clothing
- high visibility clothing

Communication in the work area may include:

- phone
- fax
- email
- electronic data transfer (EDI)
- RF systems
- radio
- oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Information/documents may include:

- workplace policies, operating procedures and practices
- Management Operating System (MOS)
- Management Information System (MIS)
- sorting system information which may include:
  - postcode book, national sort plan and state sort plan
  - post guide
  - international postcode directory
  - labels chart
  - mail identification numbers, codes and labels
  - manifests, consignment notes, bar codes, mail and container identification
- quality assurance procedures
RANGE STATEMENT

- induction documentation
- competency standards and training materials
- job specifications and procedures
- award, enterprise bargaining agreement or other industrial arrangements
- manufacturers specifications
- codes of practice, including national standards for manual handling and the industry safety code
- supplier and or/client instructions
- HAZCHEM chart/material safety data sheets
- safety observation feedback program
- emergency procedures

Applicable regulations and legislation may include:

- relevant codes and regulations pertaining to mail operations
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- relevant state/territory OH&S and environmental protection legislation
- workplace relations regulations
- workers compensation regulations
- equal opportunity, equal employment opportunity and affirmative action legislation

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international codes and regulations relevant to mail operations
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the despatch of mail
- Focus of operation of work systems, equipment, management and site operating systems for the despatch of mail
- Problems that may occur when despatching mail and appropriate action that can be taken to resolve or avoid the problems
- Requirements of mail despatch systems, operations and relevant equipment
REQUIRED KNOWLEDGE AND SKILLS

- Safety and security hazards that may occur during the despatch of mail and ways of controlling the risks involved
- Relevant personal protective equipment and procedures for its use
- Site layout

Required skills:

- Communicate effectively with others when despatching mail
- Read and interpret instructions, procedures and labels relevant to the despatch of mail
- Complete documentation related to the despatch of mail
- Work collaboratively with others when despatching mail
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise the despatch of mail in accordance with regulatory requirements and workplace procedures
- Interpret and apply relevant agreements, codes of practice or other legislative requirements
- Apply safety and security precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Identify, select and use relevant equipment, processes and procedures when despatching mail

## Required Skills and Knowledge

### REQUIRED KNOWLEDGE AND SKILLS
REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international codes and regulations relevant to the mail operations
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the conduct of delivery operations
- Focus of operation of work systems, equipment, management and site operating systems for delivery operations
- Problems that may occur when conducting delivery operations and appropriate action that can be taken to resolve/avoid the problems
- Requirements of delivery systems, operations and relevant equipment
- Hazards that may occur during delivery operations and ways of controlling the risks involved
- Relevant personal protective equipment and procedures for its use
- Site layout

Required skills:

- Communicate effectively with others when conducting delivery operations
- Read and interpret instructions, procedures and labels relevant to delivery operations
- Complete documentation related to delivery operations
- Work collaboratively with others when conducting delivery operations
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when conducting delivery operations in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events that may occur when conducting delivery operations
- Apply safety and security precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Interpret and apply relevant agreements, codes of practice or other legislative requirements
- Plan own work including predicting consequences and identifying improvements
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
Required skills:

- Select and use required personal protective equipment conforming to industry and OH&S standards
- Identify, select and use relevant equipment, processes and procedures when conducting delivery operations

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
EVIDENCE GUIDE

- through activities in an appropriately simulated environment at the registered training organisation, and/or
- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:
- in a range of work environments
- by day or night

Workplaces may comprise:
- large, medium or small worksites

Facilities may be:
- within an airport environment

Customers may be:
- external (including international) or internal

Hazards may include:
- vehicular traffic and pedestrians
- uneven ground, steps, road surfaces
- light including UV
- animals, birds and insects
- noise
- varying traffic conditions
- hazardous or dangerous materials
- positions/status of letterbox or delivery point

Weighing devices may be:
- mechanical
- automated
- weighbridge

Work priorities may be communicated through:
- briefings
- noticeboards
- announcements

Personal protective equipment may include:
- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- protective clothing
- high visibility clothing
RANGE STATEMENT

Communication in the work area may include:
- phone
- fax
- email
- electronic data transfer (EDI)
- RF systems
- radio
- oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Information/documents may include:
- workplace policies, operating procedures and practices
- Management Operating System (MOS)
- Management Information System (MIS)
- sorting system information including:
  - postcode book, national sort plan and state sort plan
  - postal guide
  - international postcode directory
  - label charts
- quality assurance procedures
- induction documentation
- competency standards and training materials
- job specifications and procedures
- award, enterprise bargaining agreement or other industrial arrangements
- manufacturers specifications
- codes of practice, including national standards for manual handling and the industry safety code
- supplier and or/client instructions
- HAZCHEM chart/material safety data sheets
- safety observation feedback program
- emergency procedures

Applicable regulations and legislation may include:
- relevant codes and regulations pertaining to mail operations
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- relevant state/territory OH&S and environmental protection legislation
- workplace relations regulations
RANGE STATEMENT

- workers compensation regulations
- equal opportunity, equal employment opportunity and affirmative action legislation

Unit Descriptor
This unit involves the skills and knowledge required to prepare and process international parcels and letters for both air and surface movement in accordance with workplace requirements. The process includes all actions after receipt of parcels from the dock to delivery to the consolidation/despatch area. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit
Work must be carried out in compliance with the regulations and workplace requirements pertaining to the processing of mail and parcels.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements to the processing of international parcels and letters as part of work activities in the postal and allied industries.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1 Prepare to process international parcels and mail | 1.1 Individual and work team priorities and responsibilities are identified and confirmed  
1.2 All OH&S and environment protection procedures and requirements for the workplace are identified, accessed and applied  
1.3 The availability of parcels and mail for processing is identified and confirmed  
1.4 Parcels and mail received from streaming are segregated into airmail, economy air and surface categories  
1.5 Mail and parcels are weighed prior to processing |
| 2 Process air mail parcels and letters | 2.1 Internal operating procedures and standards are applied to the sorting of parcels and mail  
2.2 Parcels are handled safely to minimise risk of injury to people and damage to parcels and mail  
2.3 Airmail parcels are quarantined for the stipulated period  
2.4 Parcels and mail are sorted accurately and correctly by nation, in compliance with established priorities  
2.5 Parcels and mail are documented and placed in appropriate containers  
2.6 Completed bags are weighed and labels are generated and scanned  
2.7 Containers of parcels are moved to the consolidation/despatch area  
2.8 Excess equipment is removed and work area is prepared for next activity/shift  
2.9 International parcels and mail processes and surveys are conducted as required  
2.10 Mail and parcels incorrectly classified and non-conforming items are identified, separated and re-sorted |
| 3 Process economy air surface parcels | 3.1 Internal operating procedures and standards are applied to the sorting of parcels and mail  
3.2 Economy air and surface parcels and mail are held in temporary storage for the service standard time  
3.3 Parcels and mail are scanned and sorted accurately and correctly by nation in compliance with established practices  
3.4 Parcels and mail are documented and placed in containers  
3.5 Containers of parcels and mail are moved to the consolidation/despatch area using correct shifting equipment and labels  
3.6 Excess equipment is removed and work area is prepared for |
ELEMENT PERFORMANCE CRITERIA

next activity/shift

3.7 Information required to complete record of mail and parcels is provided and recorded

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international codes and regulations relevant to mail operations
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the processing of international parcels and letters
- Focus of operation of work systems, equipment, management and site operating systems for the processing of international parcels and letters
- Problems that may occur when processing international parcels and letters and appropriate action that can be taken to resolve/avoid the problems
- Requirements of international parcels processing systems, operations and relevant equipment
- Safety and security hazards that may occur during the processing of international parcels and letters and ways of controlling the risks involved
- Relevant personal protective equipment and procedures for its use
- Site layout

Required skills:

- Communicate effectively with others when processing international parcels and letters
- Read and interpret instructions, procedures and labels relevant to the processing of international parcels and letters
- Complete documentation related to the processing of international parcels and letters
- Work collaboratively with others when processing international parcels and letters
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when processing international parcels and letters in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events that may occur when processing international parcels and letters
Required skills:

- Interpret and apply relevant agreements, codes of practice or other legislative requirements
- Plan own work including predicting consequences and identifying improvements
- Apply safety and security precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to mail or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Identify, select and use relevant equipment, processes and procedures when processing international parcels and letters

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is
EVIDENCE GUIDE

required to:
- relevant and appropriate materials and equipment, and
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment
- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement
RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted: 
- in a range of work environments
- by day or night

Workplaces may comprise:
- large, medium or small worksites

Facilities may be:
- within an airport environment

Customers may be:
- external (including international) or internal

Hazards may include:
- vehicular traffic and pedestrians
- dust and vapours
- hazardous or dangerous materials
- humidity, air temperature
- lighting conditions
- machinery/equipment moving parts
- noise
- insects

Weighing devices may be:
- mechanical
- automated
RANGE STATEMENT

Work priorities may be communicated through:
- weighbridge
- briefings
- noticeboards
- announcements

Equipment may include:
- aircraft load containers (e.g. igloos, bags, cans)
- strapping machine
- sorting frames/shelves
- bins
- unit load device (ULD)
- wheeled unit load device (WULD)
- hoists
- tubs
- stillages
- flat trolleys
- bag racks
- mechanical handling equipment
- mechanical moving equipment
- ergonomic chairs
- computer equipment
- king fishers
- plastic and cardboard mail trays

Personal protective equipment may include:
- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- protective clothing
- high visibility clothing

Communication in the work area may include:
- phone
- fax
- email
- electronic data transfer (EDI)
- RF systems
- radio
- oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Information/documents may include:
- workplace policies, operating procedures and practices
RANGE STATEMENT
include:

- Management Operating System (MOS)
- Management Information System (MIS)
- manifests, consignment notes, bar codes, mail and container identification
- mail identification numbers, codes and labels
- machine/equipment operations manuals
- air and surface movement schedules
- international aviation codes (IATA)
- quality assurance procedures
- induction documentation
- competency standards and training materials
- job specifications and procedures
- award, enterprise bargaining agreement or other industrial arrangements
- manufacturers specifications
- codes of practice, including national standards for manual handling and the industry safety code
- supplier and or/client instructions
- HAZCHEM chart/material safety data sheets
- safety observation feedback program
- emergency procedures
- relevant codes and regulations pertaining to mail operations
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- relevant state/territory OH&S and environmental protection legislation
- workplace relations regulations
- workers compensation regulations
- equal opportunity, equal employment opportunity and affirmative action legislation

Applicable regulations and legislation may include:

- relevant codes and regulations pertaining to mail operations
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- relevant state/territory OH&S and environmental protection legislation
- workplace relations regulations
- workers compensation regulations
- equal opportunity, equal employment opportunity and affirmative action legislation

### Required Skills and Knowledge

**REQUIRED KNOWLEDGE AND SKILLS**
REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:
- Australian and international codes and regulations relevant to mail operations
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the processing of parcels and letters
- Focus of operation of work systems, equipment, management and site operating systems for the processing of parcels and letters
- Problems that may occur when processing parcels and letters and appropriate action that can be taken to resolve/avoid the problems
- Requirements of parcels processing systems, operations and relevant equipment
- Safety and security hazards that may occur during the processing of parcels and letters and ways of controlling the risks involved
- Relevant personal protective equipment and procedures for its use
- Site layout

Required skills:
- Communicate effectively with others when processing parcels and letters
- Read and interpret instructions, procedures and labels relevant to the processing of parcels and letters
- Complete documentation related to the processing of parcels and letters
- Work collaboratively with others when processing parcels and letters
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when processing parcels and letters in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events that may occur when processing parcels and letters
- Plan own work including predicting consequences and identifying improvements
- Interpret and apply relevant agreements, codes of practice or other legislative requirements
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
Required skills:

- Select and use required personal protective equipment conforming to industry and OH&S standards
- Identify, select and use relevant equipment, processes and procedures when processing parcels and letters

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
  - In both real and simulated environments, access is required to:
    - relevant and appropriate materials and equipment, and
    - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
EVIDENCE GUIDE

- through activities in an appropriately simulated environment at the registered training organisation, and/or
- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:
- in a range of work environments
- by day or night

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
Elements and Performance Criteria

**ELEMENT** | **PERFORMANCE CRITERIA**
--- | ---
1 Prepare to stream mail | 1.1 Individual and work team priorities and responsibilities are identified and confirmed  
1.2 All OH&S and environment protection procedures and requirements for the workplace are identified, accessed and applied  
1.3 Mail to be streamed is identified, accessed and prepared
2 Stream mail | 2.1 Internal operating procedures and standards are applied to the streaming of mail  
2.2 Mail is categorised and streamed accurately and correctly in compliance with priority for streaming  
2.3 Mail is handled safely to minimise risk of injury to people and damage to mail
3 Complete streaming of mail | 3.1 Mail containers are loaded onto appropriate mail movement device and labelled  
3.2 Information required to complete records of mail processed is provided and recorded  
3.3 Mail containers are transferred to next processing point using appropriate shifting equipment  
3.4 Excess equipment is removed and work area is prepared for next activity shift

Required Skills and Knowledge

**REQUIRED KNOWLEDGE AND SKILLS**

This describes the essential knowledge and skills and their level required for this unit.

**Required knowledge:**

- Australian and international codes and regulations relevant to mail operations
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the streaming of mail
- Focus of operation of work systems, equipment, management and site operating systems for the streaming of mail
- Problems that may occur when streaming mail and appropriate action that can be taken to resolve avoid the problems
- Requirements of mail streaming systems, operations and relevant equipment
- Hazards that may occur during the streaming of mail and ways of controlling the risks
REQUIRED KNOWLEDGE AND SKILLS
involved

- Relevant personal protective equipment and procedures for its use
- Site layout

Required skills:

- Communicate effectively with others when streaming mail
- Read and interpret instructions, procedures and labels relevant to the streaming of mail
- Complete documentation related to the streaming of mail
- Work collaboratively with others when streaming mail
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when streaming mail in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events when streaming mail
- Plan own work including predicting consequences and identifying improvements
- Interpret and apply relevant agreements, codes of practice or other legislative requirements
- Apply safety and security precautions and required action to minimise, control or eliminate hazards that may exist when streaming mail
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Identify, select and use relevant equipment, processes and procedures when streaming mail
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.
EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:

- in a range of work environments
RANGE STATEMENT

Unit Descriptor

This unit involves the skills and knowledge required to carry out basic border clearance functions in accordance with Customs and related legislation and workplace requirements. It includes creating import declarations for import clearance; resolving problems arising from lodgement of entries or import declarations; and undertaking post-entry amendments, where applicable. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

This unit applies to individuals working as a customs broker. Work must be carried out in compliance with the relevant Customs and related legislation and workplace requirements concerning the conduct of border clearance functions. Work is undertaken in a range of environments including small to large worksites in the customs broking and international freight forwarding industries. Work at this level is performed under supervision, generally within a collaborative team environment.

This unit is normally packaged at AQF II or above.

| 1 Create Integrated Cargo System (ICS) import declarations for import clearance | 1.1 Information required for ICS import declarations is determined  
1.2 Required information for ICS import declarations is prepared  
1.3 Staff delegated to prepare required information are supported to complete tasks accurately and in a timely manner  
1.4 Information is checked for accuracy  
1.5 Required information for ICS import declarations is collated and entered  
1.6 Questions relating to lodgement of the import declaration are reviewed |
| 2 Resolve problems arising from lodgement of entries or import declarations | 2.1 Progress of preparing import declarations for lodgement is monitored  
2.2 Problems arising before or after lodgement of the import declarations are identified and action is taken to address problems |
| 3 Undertake post-entry amendments (where applicable) | 3.1 Needs for amendments are confirmed as required  
3.2 Import declarations are amended in accordance with Customs and related legislation as well as workplace procedures and other regulatory requirements |

### Required Skills and Knowledge

**REQUIRED KNOWLEDGE AND SKILLS**

This describes the essential knowledge and skills and their level required for this unit.

**Required knowledge:**

- Customs legislation, other legislation and regulations relevant to border clearance functions
- Relevant OH&S and environmental procedures and regulations
- Requirements for completing relevant documentation
- Steps involved in planning work activities
- Functions and responsibilities of customs broker acting as a nominee, or sole trader
- Purpose and features of customs programs
- Role and authority of Customs and how it fits into the structure of government
- Range of customs duties and tariffs and how they are applied
- Problems that may occur when carrying out border clearance functions and appropriate action that can be taken to resolve problems
- Purpose of warehousing goods and obligations of warehouse proprietors to Customs
REQUIRED KNOWLEDGE AND SKILLS

- Factors comprising landed cost from commercial and customs documentation
- Procedures to be followed in the event of an emergency
- Cultural differences amongst customers, internal and external freight contacts and within customer service teams and their implications when carrying out border clearance functions
- Sources of information on new developments in border clearance operations

Required skills:

- Negotiate, communicate and liaise effectively with clients and others when carrying out border clearance functions
- Read and interpret instructions, procedures, information and signs relevant to the conduct of border clearance functions
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to work activities
- Operate work systems, equipment, management and site operating procedures for border clearance functions
- Work collaboratively with others
- Plan, organise and monitor own work activities
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Solve problems that arise during border clearances functions
- Adapt to new skill and knowledge requirements required due to the development of new border clearance operations
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and use relevant computer/communication/office equipment
- Identify import restrictions and prohibitions from relevant sources

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment
EVIDENCE GUIDE

guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
  - identifying required information after completion of import declarations
  - resolving problems arising from lodgement of entries
  - undertaking post-entry amendments
  - selecting and using the technology required for basic border clearance functions

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace

- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT
RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

New developments in border clearance operations may include:
- regulations
- processes
- systems
- technology
- types and packaging of goods

Information on new developments in border clearance operations may be obtained from:
- internal networks such as: own team, staff in other departments, support staff, managers, training staff, etc.
- external networks
- bulletins, journals, magazines, books, etc.
- internet websites
- internal and external training programs

Adaptability to new skill and knowledge requirements required due to the development of new border clearance operations may include:
- external training programs
- internal training programs
- reading independently
- coaching in the workplace
- online learning on a computer
- networking with relevant internal and external contacts

Depending on the organisation concerned, workplace procedures may be called:
- standard operating procedures (SOPs)
- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Communication in the work area may include:
- phone
- electronic data interchange (EDI)
- fax
- email
- internet
- RF systems
- oral, aural or signed communications

Consultative processes may involve:
- other employees and supervisors
- clients
- agents
- relevant authorities and institutions
- management and union representatives
- industrial relations and OH&S specialists

Documentation and records may include:
- Customs and related legislation
- other legislation related to border clearance functions
RANGE STATEMENT

- shipping documentation
- quarantine documentation
- permits to import and/or export
- Customs Notices
- commercial invoices and packing lists
- manifests, delivery notes, special clearances, consignment notes and authorised weighbridge certificates
- internal documentation used for border clearance functions
- operations manuals, job specifications and induction documentation
- manufacturers specifications for equipment
- client instructions
- industrial relations agreements or contracts
- regulations and codes of practice relevant to border clearance procedures including safeworking and local authority regulations and procedures
- relevant OH&S and environmental protection regulations
- workplace policies and procedures related to border clearance
- quality assurance procedures
- emergency procedures
- dangerous goods declarations and material safety data sheets, where applicable

Applicable legislation and regulations may include:

- Customs and related legislation
- privacy legislation
- export/import/quarantine/bond requirements
- relevant state/territory OH&S and environmental protection legislation
- workplace relations regulations
- equal opportunity legislation
- equal employment opportunity and affirmative action legislation

| **1 Identify required permits**  | 1.1 Goods requiring permits are identified  
                                          1.2 Correct permits are identified for import/export of goods  
                                          1.3 Goods and commodities restricted/prohibited for import/export under the laws of Australia and other countries are identified |
| **2 Assess permit applications** | 2.1 Permit application process is understood and followed by the applicant  
                                          2.2 Specialist expertise is engaged to clarify permit application process as required  
                                          2.3 Information required for permit application is gathered and documented  
                                          2.4 Other required documentation is identified and gathered  
                                          2.5 Liaison is undertaken with client as required to facilitate completion of permit application  
                                          2.6 Permit application is checked  
                                          2.7 Permit application and other required documentation is lodged  
                                          2.8 Client is kept informed about the application process and progress |
| **3 Facilitate gaining of permits** | 3.1 Problems arising with application are identified and addressed  
                                          3.2 Negotiations and discussions are entered into with clients, relevant personnel and permit issuing authorities to facilitate issuing of permits  
                                          3.3 Approved applications are reviewed to ensure compliance with client requirements  
                                          3.4 Permit requirements are communicated to clients  
                                          3.5 Application and permit documentation is stored in accordance with workplace and relevant regulatory requirements |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Customs, quarantine and other legislation relevant to the application of specialist permit requirements, including the Prohibited Import Regulations, Prohibited Export Regulations, Australian Dangerous Goods (ADG) Code and relevant wildlife conservation quarantine or other legislative requirements
REQUIRED KNOWLEDGE AND SKILLS

- Relevant sections of national and state or territory regulatory requirements and codes of practice
- Relevant OH&S and environmental procedures and regulations
- Workplace procedures and policies for the application of specialist permit requirements
- Relevant specialist permit procedures and guidelines
- Requirements for completing relevant documentation
- Focus of operation of work systems, equipment, management and site operating systems for the application of specialist permit requirements
- Problems that may occur when applying specialist permit requirements and appropriate action that can be taken to resolve the problems
- Code of practice for working collaboratively with others
- Steps involved in planning work activities
- Procedures to be followed in the event of an emergency
- Procedures for managing and controlling hazardous situations when carrying out work activities

Required skills:

- Negotiate, communicate and liaise effectively with customers and others when completing work activities
- Read and interpret instructions, procedures and information relevant to the specialist permit requirements
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to work activities
- Select and use relevant computer/communication/office equipment when applying specialist permit requirements
- Work collaboratively as part of a customs broking/freight forwarding team
- Plan and organise work activities when applying specialist permit requirements
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Modify activities depending on differing workplace contexts, risk situations and environments, including taking appropriate initiatives within allowable limits
- Solve problems that may arise when applying specialist permit requirements
- Present information using appropriate media and technology
- Identify, interpret and learn skills and knowledge required for new developments in relevant
Required skills:

- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
  - identifying required permits
  - facilitating the gaining of permits
  - communicating and negotiating with customers and agencies responsible for the issuing of permits

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
EVIDENCE GUIDE

- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Restricted/prohibited goods/commodities subject to quarantine and wildlife conservation regulations or other regulatory and/or permit requirements may include:

- livestock
- flora and fauna
- wines and spirits
- specified horticultural products
- plant and animal products from countries with known diseases, viruses and other contagious pathogens
- commodities containing ozone-depleting substances
- therapeutic goods and complementary medicines
- hazardous waste
- heritage and cultural items
- dangerous goods, explosives, firearms and ammunition
- imported foods
- industrial chemicals
- goods and materials that may be used to construct explosives or weapons of mass destruction (WMD) as determined by the Department of Foreign Affairs and Trade (DFAT)
- other commodities subject to Australian and overseas government regulations and requiring specialist permits

Information on relevant aspects of specialist permit requirements may include:

- wildlife conservation requirements, such as:
  - wildlife conservation in Australia
  - international treaties for wildlife conservation
  - export/import regulations for wildlife
  - permit validation for exports to the USA
  - acquittals and specimen export records (SER)
- quarantine permit requirements, such as:
  - quarantine treatment
RANGE STATEMENT

- AQIS approved premises
- cargo clearance
- pests and diseases
- plant quarantine
- animal quarantine
- plant and animal exports
- other specialist permit requirements, such as:
  - wines and spirits
  - prescribed amounts of cash
  - commodities containing ozone-depleting substances
  - requirements for Therapeutic Goods Administration Permits (TGP)
  - hazardous waste
  - heritage and cultural items
  - dangerous goods, explosives, firearms, ammunition, and chemical, biological and radioactive weapons materials and components and other prohibited imports and exports
  - imported food program and permit regulations
  - requirements of the National Industrial Chemicals Notification and Assessment Scheme (NICNAS)
  - regulations and permits pertaining to goods and materials that may be used to construct explosives or weapons of mass destruction (WMD) as determined by the Department of Foreign Affairs and Trade
  - dual use goods covered by the WMD Act

Agencies from which permits may be obtained may include:

- Australian Quarantine and Inspection Service
- Australian Custom Service
- Department of the Environment Water, Heritage and the Arts (DEWHA)
- Department of Agriculture, Fisheries and Forestry
- Department of Innovation, Industry, Science and Research
- Department of Health and Ageing
- Department of Defence
- Department of Foreign Affairs and Trade
- Australian Federal Police
- Australian Wine and Brandy Corporation
- Health Insurance Commission
- Wheat Export Authority
- Attorney Generals Department
RANGE STATEMENT

Checks made during permit application may include:
- accuracy checks
- checks for missing information
- checks for unfulfilled requirements
- whether supplementary documents are required

Depending on the organisation concerned, workplace procedures may be called:
- standard operating procedures (SOPs)
- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Communication in the work area may include:
- phone
- electronic data interchange (EDI)
- fax
- email
- internet
- RF systems
- oral, aural or signed communications

Consultative processes may involve:
- other employees and supervisors
- suppliers of specialist permits
- relevant authorities and institutions
- management and union representatives
- industrial relations and OH&S specialists

Documentation and records may include:
- regulations and codes of practice relevant to import and export procedures
- relevant OH&S and environmental protection regulations
- workplace policies and procedures related to specialist permit requirements
- quality assurance procedures
- emergency procedures
- operations manuals, job specifications and induction documentation
- dangerous goods declarations and material safety data sheets, where applicable
- goods manifest
- relevant Australian Standards and certification requirements
- other government documentation covering regulated trade (including online)
RANGE STATEMENT

Applicable regulations and legislation may include:

- relevant codes and regulations for the issuing of specialist permits
- Customs and related legislation
- export/import/quarantine/bond requirements
- Australian and international regulations and codes of practice for the transport of dangerous goods and hazardous substances
- other Australian legislation relating to restrictions and prohibitions on imports and exports and related permit requirements
- relevant state/territory OH&S and environmental protection legislation
- Customs Act 1901
- Environmental Protection and Biodiversity Conservation Act 1999
- workplace relations regulations
- equal opportunity legislation
- equal employment opportunity and affirmative action legislation
- workers compensation regulations

Competency Field

Competency Field A - Handling Cargo/Stock
TLIA2050A Lash and unlash cargo and containers

Modification History
Release 1 - New unit of competency

Unit Descriptor
This unit involves the skills and knowledge required to lash and unlash cargo and containers. It includes preparing to lash and unlash cargo and containers, implementing the container lashing plan, and completing lashing and unlashing operations.

Application of the Unit
This unit applies to people working in cargo and container lashing contexts in the stevedoring, transport, distribution and allied industries. Licensing, legislative, regulatory or certification requirements are applicable to this unit. Work must be carried out in compliance with the relevant regulations and workplace requirements concerning cargo and container lashing and unlashing. Work is performed under some supervision generally within a team environment.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
## Elements and Performance Criteria

| 1 Prepare to lash and unlash cargo and containers | 1.1 Work area and safety zones are prepared and maintained according to national standards, safety codes and site operating procedures |
| | 1.2 Work area hazards are identified and corrective action is taken prior to commencing lashing and unlashing operations |
| | 1.3 Relevant information and documentation are identified and accessed |
| | 1.4 Appropriate personal protective equipment, lashing equipment and fittings are selected |
| | 1.5 Work cage and/or working at height (WAH) requirements are identified and appropriate WAH equipment is selected |
| | 1.6 Marks, numbers and/or codes are used to identify cargo and containers |
| | 1.7 Cargo is sorted and stacked in correct location according to national standards, safety codes and site operating procedures |
| | 1.8 Containers are stowed according to stowage plan, and reefer containers are identified and connected according to ship procedures, national standards and safety codes |
| | 1.9 Damaged cargo and containers are identified, reported and dealt with according to site operating procedures |
| | 1.10 Potential unsafe work practices and/or equipment are reported to appropriate personnel |

| 2 Implement cargo and container lashing and unlashing procedures | 2.1 Cargo or container lashing and unlashing plan is accessed and read, and potential issues are clarified with supervisor |
| | 2.2 Procedures for managing and controlling hazardous situations when carrying out work activities are implemented |
| | 2.3 Safety procedures and safety zones are implemented when working with mobile equipment and cranes according to national standards, safety codes and site operating procedures |
| | 2.4 Work is conducted according to industry standards, statutory requirements, safety codes, site operating requirements, cargo and container requirements |
| | 2.5 Work cage and/or WAH is completed according to national standards, safety codes and site procedures |
| | 2.6 Appropriate and effective communication is maintained in work |
area

2.7 Cargo and container are lashed and unlashed according to site procedures, and cargo and containers are lashed and unlashed according to lashing and unlashing plan

2.8 Correct manual handling techniques are used when lashing and unlashing cargo and containers

2.9 Identified problems, faults and malfunctions are promptly reported and/or rectified according to regulatory requirements and workplace procedures

2.10 Contingency plans are implemented as required

3 Complete cargo and container lashing and unlashing operations

3.1 Cargo and container are covered and uncovered safely ensuring appropriate covering and lashing, no injury to persons in work area or damage to cargo, container and equipment

3.2 Lashing equipment and tools are cleared from work area and placed in designated storage areas

3.3 All safety equipment and radios are returned to designated area

3.4 Relevant documentation is completed and filed according to site operating procedures
Required Skills and Knowledge

This section describes the knowledge and skills required for this unit.

**Required knowledge:**

- Australian and international standards, codes and regulations relevant to securing, handling and transporting cargo and containers including:
  - Australian Dangerous Goods (ADG) Code
  - International Maritime Dangerous Goods (IMDG) Code
  - IATA Dangerous Goods by Air regulations
  - Australian and International Explosives Codes
  - Marine Orders
- Cargo and container marking and numbering systems
- Fatigue management techniques
- Focus of operation of work systems, equipment, management and site operating systems for lashing and unlashing cargo and containers
- Problems that may occur when lashing and unlashing cargo and containers, and appropriate action that can be taken to resolve them
- Relevant regulations and legislation:
  - export/import/quarantine/bond requirements
  - Marine Orders
  - relevant Australian standards and certification requirements
  - workplace relations regulations
  - workers compensation regulations
- Relevant occupational health and safety (OH&S) and environmental procedures and regulations
- Relevant workplace procedures and policies relating to lashing and unlashing cargo and containers

**Required skills:**

- Apply precautions and required action to eliminate, minimise or control hazards
- Communicate effectively with others when lashing and unlashing cargo and containers
- Identify cargo, containers and goods, coding (ADG and IMDG), markings and where applicable, emergency information panels
- Identify, select and use relevant equipment, processes and procedures when lashing and unlashing cargo and containers
- Interpret and follow operational instructions and prioritise work
- Modify activities depending on differing operational contingencies, risk situations and environments
- Monitor work activities in terms of planned schedule
- Operate and adapt to differences in cargo and container lashing and unlashing equipment
according to standard operating procedures

- Read and interpret instructions, procedures, information and labels relevant to lashing and unlashing cargo and containers
- Receive, acknowledge and send messages with available communications equipment
- Respond appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Select and use required:
  - personal protective equipment conforming to industry and OH&S standards
  - work cage and/or WAH personal protective equipment conforming to industry and OH&S standards
- Work collaboratively with others when lashing and unlashing cargo and containers
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the Elements, Performance Criteria, Required Skills, Required Knowledge and include:

- working by day and night
- working systematically with required attention to detail and without injury to self or others, or damage to goods or equipment
- applying appropriate fatigue management techniques as required
- being aware of own ability and limits to rectify irregularities or faults.

Context of and specific resources for assessment

Performance is demonstrated consistently over time and in a suitable range of contexts.

Resources for assessment include access to:

- range of relevant exercises, case studies and/or other simulated practical and knowledge assessments
- appropriate range of relevant operational situations in the workplace.

In both real and simulated environments, access is required to:

- relevant and appropriate materials and equipment
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

Method of assessment

Practical assessment must occur in an:

- appropriately simulated workplace environment using full size equipment, cargo and containers and/or
- appropriate range of situations in the workplace.

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate to this unit:

- direct observation of the candidate lashing and unlashing cargo and containers
- direct observation of the candidate applying relevant OH&S requirements and work practices.
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work area may include:
- At height
- Controlled or open environments
- Exposed conditions
- In a workbox or work cage
- Limited or restricted spaces

Information and documentation may include:
- Award, enterprise bargaining agreement, other industrial arrangements
- Container lashing and unlashing plan
- Dangerous goods declarations and safety data sheets (SDS)/material safety data sheets
- Emergency procedures
- Equipment manufacturer specifications
- Goods identification numbers and codes
- Manifests, bar codes, container identification/serial number
- Operations manuals, job specifications and induction documentation
- Quality assurance procedures
- Relevant Australian and international regulations and codes of practice for:
  - lashing and unlashing cargo and containers
  - handling and transporting dangerous goods and hazardous chemicals/substances
- Relevant Australian standards and certification requirements
- Supplier and/or client instructions
- Workplace procedures and policies

Personal protective equipment may include:
- Fall arrest safety harness
- Gloves
- High visibility clothing
- Protective clothing
- Safety glasses
- Safety headwear and footwear

Lashing equipment may include:
- Chains
- Chocks
- Fibre ropes
- Lashing bars
- Racks
Cargo and containers may include:
- Twistlocks
- Turnbuckles
- Webbing straps and ratchets
- Wire ropes
- Dangerous goods
- Freight
- Goods with special requirements
- Temperature controlled goods

Hazardous situations may include:
- Chemicals
- Dangerous or hazardous substances
- Falling objects
- Incorrect manual handling
- Movements of personnel, equipment, goods and materials
- Working at height

Appropriate and effective communication may include:
- Oral, aural, hand signals or signed communications
- Phone
- Radio

Lashing and unlashing cargo and containers must include:
- Identifying lashing points
- Using appropriate fittings and lashing equipment for each lashing point
- Securing cargo to lashing points ensuring correct spread of lashings and that lashings are secured, attached and tensioned
- Securely fastening tensioners
- Maintaining tight stow of cargo
- Releasing fittings, and disconnecting and removing them from cargo

Persons in work area may include:
- Contractors
- Non English speaking ship crew
- Official representatives
- Site visitors
- Workplace personnel

Unit Sector(s)
Not applicable.
Competency Field

A - Handling Cargo/Stock
TLIA3002A Maintain container/cargo records

Modification History
Not Applicable

Unit Descriptor

This unit involves the skills and knowledge required to maintain container/cargo records in accordance with workplace requirements, including processing container and/or cargo documentation; maintaining records of container/cargo movements; monitoring container/cargo, including reefer units, and maintaining records. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the maintenance of container/cargo records.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements to the maintenance of container/cargo records as part of work activities in the stevedoring, transport, distribution and allied industries.

</thead>
</table>
| 1 Process container/cargo documentation | 1.1 Container/cargo documentation is processed in accordance with workplace procedures and statutory authority requirements  
1.2 Movements of containers/cargo are recorded in accordance with workplace procedures and statutory authority requirements |
| 2 Maintain records of container/cargo movements | 2.1 Container/cargo records are updated each time containers/cargo are moved within the yard  
2.2 Containers/cargo are checked using markings to ensure correct identification when updating records |
| 3 Monitor container/cargo and maintain records | 3.1 Containers/cargo are monitored on a daily basis and the specified information recorded  
3.2 Problems with controlled systems on containers/cargo are reported on the appropriate forms and forwarded to the maintenance area  
3.3 Log cards on containers/cargo with controlled systems are checked on completion of monitoring and all unit or system breakdowns and/or faults are logged in the breakdown log diary in accordance with workplace procedures  
3.4 Movement of containers/cargo is monitored on a daily basis and the information recorded |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international standards, codes of practice and regulations relevant to the maintenance of container and cargo records including the Australian and International Dangerous Goods Codes
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the maintenance of container and cargo records
- Focus of operation of work systems, equipment, management and site operating systems for the maintenance of container and cargo records
- Problems that may occur when maintaining container and cargo records and appropriate action that can be taken to resolve the problems
- Relevant handling and safety codes
- Site layout and location of reefer units
REQUIRED KNOWLEDGE AND SKILLS

- The marking and numbering systems for cargo
- Relevant bond, quarantine or other legislative requirements

Required skills:

- Communicate effectively with others when maintaining container and cargo records
- Receive, acknowledge and send messages with available communications equipment
- Read and interpret instructions, procedures, information and labels relevant to the maintenance of container and cargo records
- Interpret and follow operational instructions and prioritise work when maintaining container and cargo records
- Identify cargo, container and goods, coding, ADG / IMDG markings and where applicable emergency information panels
- Work collaboratively with others when maintaining container and cargo records
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems when maintaining container and cargo records in accordance with regulatory requirements and workplace procedures
- Estimate size, shape and special requirements of loads
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts
EVIDENCE GUIDE

- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:
- in a range of work environments
- by day or night

Customers may be:
- internal or external

Workplaces may comprise:
- large, medium or small worksites

Work may be conducted in:
- limited or restricted spaces
- exposed conditions
- controlled or open environments

Containers/cargo may include:
- goods with specialist requirements, including reefer units and containers/cargo containing temperature controlled
RANGE STATEMENT

Information recorded during daily monitoring of reefers may include:
- temperatures
- water meter readings
- any faults in the operation of the reefer

Hazards in the work area may include exposure to:
- chemicals
- dangerous or hazardous substances
- movements of equipment, goods, materials and vehicular traffic

Personnel in work area may include:
- workplace personnel
- site visitors
- contractors
- official representatives

Communication in the work area may include:
- phone
- fax
- email
- electronic data transfer (EDI)
- RF systems
- radio
- oral, aural or signed communications

Personal protective equipment may include:
- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- protective clothing
- high visibility clothing

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Information/documents may include:
- goods identification numbers and codes
- manifests, bar codes, and container identification/serial number
- Australian and international codes of practice and regulations relevant to the maintenance of container/cargo records
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- operations manuals, job specifications and induction documentation
RANGE STATEMENT

- manufacturers specifications for equipment
- workplace procedures and policies
- supplier and/or client instructions
- dangerous goods declarations and material safety data sheets (where applicable)
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian standards and certification requirements
- quality assurance procedures
- emergency procedures
- relevant codes and regulations for the maintenance of container/cargo records
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
  - Australian and International Dangerous Goods Codes
  - Australian Marine Orders and the International Maritime Dangerous Goods Code
  - IATA Dangerous Goods by Air regulations
  - Australian and International Explosives Codes
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- marine orders
- relevant Australian standards and certification requirements
- relevant state/territory OH&S and environmental protection legislation
- workplace relations regulations
- workers compensation regulations

Applicable regulations and legislation may include:

Unit Descriptor
This unit involves the skills and knowledge required to process the receipt and delivery of containers and cargo in accordance with workplace requirements including checking the stacking/discharge list at commencement of a shift, assessing and planning container/cargo consolidation, allocating stack positions, identifying and checking containers/cargo, and checking and completing required documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit
Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the receipt and delivery of containers and cargo.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements to the processing of the receipt and delivery of containers and cargo as part of work activities in the stevedoring, transport, distribution and allied industries.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1 Check stacking/discharge list at commencement of shift | 1.1 Yard or terminal stacking/discharge lists are checked against container/cargo documentation and operational order of work, taking into account both ship and shore operations  
1.2 Stacking discharge lists are continually updated to reflect the correct location of containers and cargo |
| 2 Assess and plan container/cargo consolidation | 2.1 Yard or terminal plans are assessed and where appropriate consolidation of container/cargo within the yard or terminal is planned  
2.2 Consolidation plans are prepared to ensure efficiency of operations and efficient use of available yard/terminal space  
2.3 Final yard/terminal positions are obtained from consolidation plans and recorded |
| 3 Allocate stack positions | 3.1 Stack positions are allocated based on the nature of the container/cargo concerned and the requirements of yard/terminal operations  
3.2 Stacking plan is communicated to the relevant personnel in accordance with workplace procedures |
| 4 Identify and check containers/cargo | 4.1 Containers/cargo are identified and checked at the point of entry to the yard and prior to stacking  
4.2 Agreement between numbers and marks on container/cargo and shipping documentation is confirmed  
4.3 Cargo/containers are inspected and appropriate action is taken to report identified damage or defects in accordance with workplace procedures  
4.4 Stacking follows stacking plans and facilitates efficient movement within the yard |
| 5 Check and complete documentation | 5.1 Documentation is checked prior to performing completion procedures ensuring compliance with workplace procedures and regulatory requirements |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international standards, codes and regulations relevant to the processing of the
REQUIRED KNOWLEDGE AND SKILLS

- receipt and delivery of containers and cargo including the Australian and International Dangerous Goods Codes
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the processing of the receipt and delivery of containers and cargo
- Focus of operation of work systems, equipment, management and site operating systems for the receipt and delivery of containers and cargo

Unit Descriptor

This unit involves the skills and knowledge required to transfer cargo in accordance with workplace requirements including preparing for the transfer of the load, safely transferring the cargo using appropriate lifting equipment, finalising the transfer, and completing all required documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the transfer of cargo/freight.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements when transferring cargo as part of work activities in the stevedoring, transport, distribution and allied industries.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1 Prepare for load transfer | 1.1 Load characteristics are identified to determine any special handling or equipment requirements  
1.2 Location of load in yard and following transfer method is determined  
1.3 Pathway for load transfer is established consistent with workplace procedures noting obstacles and any particular safety precautions  
1.4 Working area is prepared in accordance with the national standards, safety codes, and site operating procedures  
1.5 Personal protective equipment and other safety equipment is assembled  
1.6 The Safe Working Load (SWL) or Working Load Limit (WLL) is calculated using formulae for the particular type of lifting equipment  
1.7 Lifting equipment is checked to determine safe working order for the transfer  
1.8 Unsafe equipment is reported to appropriate personnel |
| 2 Transfer cargo | 2.1 Cargo is steadied and secured using appropriate devices  
2.2 Load is lifted and shifted safely following national standards, safety codes and site operating procedures  
2.3 Load is transferred and set down ensuring no injury to personnel or damage to machinery or cargo |
| 3 Complete transfer | 3.1 Securing arrangements are released from load ensuring no injury to personnel or damage to machinery or cargo  
3.2 Relevant documentation is completed including reporting of damaged cargo in accordance with workplace reporting requirements  
3.3 Equipment is returned to store and work area returned to normal working condition |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international codes and regulations relevant to the transfer of cargo/freight
REQUIRED KNOWLEDGE AND SKILLS

including the Australian and International Dangerous Goods Codes

- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the transfer of cargo and freight
- Focus of operation of work systems, equipment, management and site operating systems for the transfer of cargo and freight
- Problems that may occur when transferring cargo/freight and appropriate action that can be taken to resolve the problems
- Relevant handling and safety codes
- Types of equipment used to transfer loads in terminals/wharves, their applications and procedures and precautions for their use
- Requirements for Safe Working Load (SWL) and Working Load Limit (WLL) of load shifting equipment
- The marking and numbering systems for cargo
- Relevant bond, quarantine or other legislative requirements

Required skills:

- Communicate effectively with others when transferring cargo and freight
- Read and interpret instructions, procedures, information and signs relevant to the transfer of cargo and freight
- Interpret and follow operational instructions and prioritise work when transferring cargo and freight
- Complete documentation related to work activities when transferring cargo and freight
- Receive, acknowledge and send messages with communications equipment whilst operating load transfer equipment
- Work collaboratively with others when transferring cargo and freight
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions when transferring cargo and freight in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events that may occur when transferring cargo and freight
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
Required skills:

- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of load transfer equipment
- Conduct checks on equipment used when transferring cargo and freight in terms of service schedule and standard operating procedures
- Identify, select and use relevant equipment, processes and procedures when transferring cargo and freight
- Estimate the size, shape and special requirements of loads

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
  - In both real and simulated environments, access is required to:
    - relevant and appropriate materials and equipment, and
EVIDENCE GUIDE

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
Elements and Performance Criteria

ELEMENT
1 Identify and list goods for bonding
2 Arrange transfer of goods to bond store
3 Prepare and issue bond list

PERFORMANCE CRITERIA
1.1 Goods are listed for bonding when not delivered or collected on completion of agreed storage period
1.2 Prior to listing for bonding, inspection is arranged with the Australian Customs Service for goods identified as surplus
1.3 Goods left after time advertised for collection are listed for bonding in accordance with workplace policy and Australian Customs Service requirements
2.1 Arrangements for the transfer of goods to bond store are made in accordance with regulatory requirements and workplace procedures
2.2 Carrier is notified of storage or yard location, marks and quantity
3.1 Bond list is prepared in accordance with workplace requirements and Australian Customs Service regulations
3.2 Bond list, endorsed with the relevant information, is issued to carrier

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international codes and regulations relevant to the coordination of goods to bond premises
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the coordination of goods to bond premises
- Focus of operation of work systems, equipment, management and site operating systems for coordination of goods to bond premises
- Problems that may occur when coordinating goods to bond premises and appropriate action that can be taken to resolve the problems

Required skills:

- Communicate effectively with others when coordinating the delivery of goods to bond premises
- Read and comprehend simple statements in English
Required skills:

- Read and interpret instructions, procedures and labels relevant to the coordination of goods to bond premises
- Complete documentation when coordinating the delivery of goods to bond premises
- Work collaboratively with others when coordinating the delivery of goods to bond premises
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems when coordinating the delivery of goods to bond premises in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events when coordinating the delivery of goods to bond premises
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and use relevant communications, computing and office equipment when coordinating goods to bond premises
- Select and use required personal protective equipment conforming to industry and OH&S standards

--- | ---
1 Analyse order to identify work requirements to fill order | 1.1 Order request documentation is interpreted
1.2 Product(s) in order are noted and workplace location(s) are identified
1.3 Workplace and product knowledge is used to organise documentation
1.4 Required schedules for order movement are identified and noted where required
1.5 Special aspects of the order such as dangerous/hazardous goods or temperature controlled goods are identified and information on required documentation procedures and relevant regulatory requirements is identified, accessed and interpreted
2 Follow workplace order documentation processes | 2.1 Workplace procedures for documentation of an order are identified
2.2 Workplace documentation is completed in accordance with workplace procedures and any relevant regulatory requirements
3 Finalise documentation | 3.1 Order is checked against schedule and order form
3.2 Workplace records are completed, and labels and appropriate documentation are attached in accordance with workplace procedures and any relevant regulatory requirements
3.3 Special transportation requirements are identified and conveyed to appropriate personnel
3.4 Where applicable, all required documentation requirements for dangerous goods and hazardous materials are completed in accordance with the relevant regulations and codes

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international codes and regulations relevant to the completion of receival/despatch documentation, including the ADG Code and relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the completion of receival/despatch documentation
- Focus of operation of work systems, equipment, management and site operating systems for
REQUIRED KNOWLEDGE AND SKILLS

the receiving and despatch of goods

- Problems that may occur when completing receival and despatch documentation and appropriate action that can be taken to resolve the problems
- Specifications and standards for the checking and inspection of received and despatched goods
- Documentation requirements for the receipt and despatch of goods
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when completing receival and despatch documentation
- Read and interpret instructions, procedures and labels relevant to the completion of receival and despatch documentation
- Complete receival and despatch documentation
- Identify containers and goods coding, ADG and IMDG markings and where applicable emergency information panels
- Work collaboratively with others when completing receival and despatch documentation
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems when completing receival and despatch documentation in accordance with regulatory requirements and workplace procedures
- Monitor work activities in terms of planned schedule
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and use relevant computer, communication and office equipment when completing receival and despatch documentation
- Estimate the size, shape and special requirements of goods and loads

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of
EVIDENCE GUIDE

unit

this unit and include demonstration of applying:
- the underpinning knowledge and skills
- relevant legislation and workplace procedures
- other relevant aspects of the range statement

Context of and specific resources for assessment

• Performance is demonstrated consistently over a period of time and in a suitable range of contexts
• Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
• In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

• Assessment of this unit must be undertaken by a registered training organisation
• As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
• Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:
- in a range of work environments
- by day or night

Customers may be:
- internal or external
RANGE STATEMENT

Workplaces may comprise:
- large, medium or small worksites

Work may be conducted in:
- limited or restricted spaces
- exposed conditions
- controlled or open environments

Received/despatched goods may involve:
- special handling and storage requirements, including temperature controlled goods, dangerous goods, explosives and hazardous substances

Problems that may occur when receiving/despatching goods include:
- damaged stock
- damaged pallets or packaging
- wrong stock
- error in paperwork
- poorly stacked stock
- incorrect quantity

Aspects of goods to be checked when receiving/despatching goods may include:
- correct type
- number
- condition
- quality
- packaging
- labelling
- dangerous goods declarations and marking (where applicable)

Hazards in the work area may include exposure to:
- chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials
- oil or water on floor
- a fire or explosion
- damaged packaging or pallets
- debris on floor
- poorly stacked pallets
- faulty equipment

Consultative processes may involve:
- other employees and supervisors
- suppliers, customers and clients
- drivers and agents
- relevant authorities and institutions
- management and union representatives
- industrial relations and OH&S specialists
- other maintenance, professional or technical staff

Communication in the work area may include:
- phone
- electronic data interchange (EDI)
RANGE STATEMENT

- fax
- email
- internet
- RF systems
- oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Personal protective equipment may include:

- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- high visibility clothing

Information/documents may include:

- goods identification numbers and codes
- manifests, picking slips, merchandise transfers, stock requisitions and bar codes
- codes of practice and regulations relevant to the receiving of goods
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- operations manuals, job specifications and induction documentation
- manufacturers specifications for equipment
- workplace procedures and policies
- supplier and/or client instructions
- dangerous goods declarations and material safety data sheets (where applicable)
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian standards and certification requirements
- quality assurance procedures
- emergency procedures
- relevant codes and regulations for the receiving of goods
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
  - Australian and International Dangerous Goods Codes
  - Australian Marine Orders and the International...
RANGE STATEMENT

Maritime Dangerous Goods Code
- IATA Dangerous Goods by Air Regulations
- Australian and international explosives codes
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- marine orders
- relevant state/territory OH&S and environmental protection legislation
- workplace relations regulations
- workers compensation regulations

Unit Sector(s)

Unit Descriptor
This unit involves the skills and knowledge required to use inventory systems to organise stock control in accordance with workplace requirements including identifying inventory and stock control systems in use in the workplace, using re-order procedures to maintain stock levels, organising cyclical stock counts, and reporting discrepancies or variances. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit
Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the use of inventory systems to organise stock control.
Work is performed under some supervision generally within a team environment. It involves the application of product knowledge and an understanding of relevant workplace procedures and regulatory requirements when using inventory systems to organise stock control as part of work activities in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information
Refer to Unit Descriptor

### Required Skills and Knowledge

**REQUIRED KNOWLEDGE AND SKILLS**

This describes the essential knowledge and skills and their level required for this unit.

**Required knowledge:**

- Australian codes and regulations relevant to the organisation of stock control
- Relevant OH&S and environmental protection procedures and guidelines
REQUIRED KNOWLEDGE AND SKILLS

- Workplace procedures and policies for the use of inventory systems to organise stock control
- Focus of operation of inventory systems, equipment, management and site operating systems for the control of stock
- Principles of operation and functions of inventory systems
- Applications of different types of inventory systems and stock management approaches
- Workplace processes for records management and the production of inventory reports
- Principles of operation and functions of inventory systems
- Computer records and documentation requirements for stock control, including forms, checklists and inventory reports
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when using inventory systems to organise stock control
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the use of inventory systems for the organisation of stock control
- Complete documentation related to the use of inventory systems to organise stock control
- Work collaboratively with others when using inventory systems to organise stock control
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems when using inventory systems to organise stock control in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Select and use relevant communications, computing and office equipment when using inventory systems to organise stock control

Evidence Guide
EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
  - In both real and simulated environments, access is required to:
    - relevant and appropriate materials and equipment, and
    - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT
RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted: • in a range of work environments
• by day or night

Customers may be: • internal or external

Workplaces may comprise: • large, medium or small worksites

Work may be conducted in: • limited or restricted spaces
• exposed conditions
• controlled or open environments

Goods may involve: • special handling, location, storage and/or packaging requirements, including temperature controlled goods and dangerous goods

Inventory systems may be: • automated
• manual
• paper-based
• computerised
• microfiche

Categories or groups of products/stock may include: • small parts
• perishable goods
• overseas export
• dangerous goods
• refrigerated products
• temperature controlled stock
• fragile goods

The characteristics of products/stock may include: • small parts
• toxicity
• flammability
• form
• weight
• size
• state
• perishability
• fragility
• security risk

Labelling systems may include: • batch code
• bar code
• identification numbering systems
• serial numbers
RANGE STATEMENT

Hazards in the work area may include:
- symbols for safe handling
- ADG and HAZCHEM Codes
- chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials
- oil or water on floor
- a fire or explosion
- damaged packaging or pallets
- debris on floor
- faulty racking
- poorly stacked pallets
- faulty equipment

Unit Descriptor

This unit involves the skills and knowledge required to apply product knowledge to the organisation of work operations including identifying and categorising products, matching products to locations based on specified criteria, and assisting individuals to solve stock identification and location problems. Licensing, legislative, regulatory or certification requirements may be applicable to this unit.

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the identification, handling and storage of various categories of products/stock.

Work is performed under some supervision generally within a team environment. It involves the application of product knowledge and an understanding of relevant regulatory requirements to the organisation of work operations in the warehousing, distribution and/or storage industries.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Identify and categorise products</td>
<td>1.1 Products are identified and categorised in terms of specified criteria in accordance with workplace procedures</td>
</tr>
</tbody>
</table>
| 2 Match products to locations based on specified criteria | 2.1 Locations for products are determined based on specified criteria  
2.2 Labels, inventory systems and other information sources are used to assist in the identification of products, handling and storage requirements |
| 3 Assist individuals to solve stock identification and location problems | 3.1 New stock items are identified and particular product information is brought to the attention of relevant personnel  
3.2 Stock queries are predicted and team members are assisted to locate and assimilate information relevant to these products  
3.3 Personnel are assisted with routine and non-routine stock enquiries with actions taken to update information of products for relevant personnel  
3.4 Personnel are encouraged to maintain and build product knowledge through accessing product information and the application of problem solving and information analysis skills |
| 4 Identify appropriate transfer and handling requirements | 4.1 Resources used to transfer different products through the storage zones are identified and evaluated  
4.2 Work in receival and despatch areas is supported by identification and reporting of variances  
4.3 Stock re-ordering is informed by knowledge of product source, frequency of pick destination (or seasonality) of products and potential for supply problems  
4.4 Relevant documentation is completed in accordance with workplace procedures |
| 5 Contribute to continuous improvement | 5.1 Knowledge of customer requirements is used to determine work design  
5.2 Potential problems are predicted and notified to appropriate personnel  
5.3 Opportunities for improvements to own work organisation are identified |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.
REQUIRED KNOWLEDGE AND SKILLS

Required knowledge:

- Australian codes and regulations relevant to the workplace activities
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies relevant to the application of product knowledge to the organisation of workplace operations
- Focus of operation of work systems, equipment, management and site operating systems
- Information on various categories or groups of products including their key characteristics and hazards and the special handling, stacking and storage requirements for each
- Product sources, destinations and potential problems
- Re-ordering procedures and just-in-time planning principles
- Requirements for workplace documentation, inventory systems and records
- Sources of product information
- Strategies to seek out sources of knowledge of products and use this information to inform work
- Types of equipment and storage areas appropriate for different types of goods including perishable, fragile, dangerous, composition/state goods
- Documentation requirements including reports and records concerning damaged or contaminated goods
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when organising workplace activities
- Access, read and interpret product information, policies and regulatory requirements relevant to workplace operations
- Complete documentation related to the organisation of work activities
- Work collaboratively with others when organising workplace activities
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when organising workplace activities in accordance with regulatory requirements and workplace procedures
- Use information on products/stock to determine, plan and organise processes used for receival, storage, goods movement, despatch, stock levels, re-ordering processes
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
Required skills:

- Operate and adapt to differences in products and services in accordance with standard operating procedures
- Organise and monitor the use of personal protective equipment conforming to industry and OH&S standards
- Select and use relevant communication, computing and office equipment when organising workplace activities

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- As a minimum, assessment of knowledge must be conducted through appropriate assessments using written/practical/oral assessments
- Practical assessment must occur:
  - through activities in an appropriately simulated
EVIDENCE GUIDE

environment, and/or

- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:

- in a range of work environments
- by day or night

## Required Skills and Knowledge

### REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

**Required knowledge:**

- Regulations relevant to the organising of despatch operations, including the ADG Code and relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the organising of despatch operations
- Focus of operation of work systems, equipment, management and site operating systems for the organising of despatch operations
- Problems that may occur when organising despatch operations and appropriate action that can be taken to resolve the problems
- Documentation and record requirements for despatch operations
- Equipment used during the organisation of despatch operations and the precautions and procedures that should be followed in its use
REQUIRED KNOWLEDGE AND SKILLS

- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when organising despatch operations
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the organising of despatch operations
- Complete documentation related to the organising of despatch operations
- Identify relevant stock and goods coding and labelling, including ADG and IMDG markings
- Work collaboratively with others when organising despatch operations
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when organising despatch operations in accordance with regulatory requirements and workplace procedures
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Select and use relevant equipment and communications technology when organising despatch operations
- Estimate the size, shape and special requirements of goods and loads

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the
EVIDENCE GUIDE

demonstrate competency in this unit

requirements of the elements and performance criteria of this unit and include demonstration of applying:

- the underpinning knowledge and skills
- relevant legislation and workplace procedures
- other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
  - In both real and simulated environments, access is required to:
    - relevant and appropriate materials and equipment, and
    - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:

- in a range of work environments
- by day or night
RANGE STATEMENT

Customers may be:
- internal or external

Workplaces may comprise:
- large, medium or small worksites

Work may be conducted in:
- limited or restricted spaces
- exposed conditions
- controlled or open environments

Goods to be despatched may involve:
- special handling, location, storage and/or packaging requirements, including temperature controlled goods, dangerous goods or hazardous substances

Problems that may occur when despatching an order include:
- wrong stock is despatched
- wrong carton for order
- incorrect location
- damaged stock
- no stock at location
- incorrect quantity
- failing to meet a special order requirement
- failing to meet customers delivery requirements

Special order requirements may include:
- pricing
- special packing
- specific size of carton
- special categories of stock

Hazards in the work area may include exposure to:
- chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials
- oil or water on floor
- a fire or explosion
- damaged packaging or pallets
- debris on floor
- faulty racking
- poorly stacked pallets
- faulty equipment

Communication in the work area may include:
- phone
- electronic data interchange (EDI)
- fax
- email
- internet
- RF communications
- barcode readers
- oral, aural or signed communications
RANGE STATEMENT

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Personal protective equipment may include:

- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- high visibility clothing

Consultative processes may involve:

- workplace personnel
- supervisors and managers
- customers/clients
- drivers and agents
- contractors
- official representatives

Information/documents may include:

- goods identification numbers and codes
- manifests, picking slips, merchandise transfers, stock requisitions and bar codes
- manufacturers specifications for equipment/tools
- workplace procedures and policies
- supplier and/or client instructions
- dangerous goods declarations and material safety data sheets (where applicable)
- codes of practice including the National Standards for Manual Handling and the Industry Safety Code
- relevant legislation, regulations and related documentation including the ADG Code
- award, enterprise bargaining agreement, other industrial arrangements
- standards and certification requirements
- quality assurance procedures
- emergency procedures

Applicable regulations and legislation may include:

- relevant codes and regulations pertaining to the organising of despatch operations
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
  - Australian and International Dangerous Goods Codes
  - Australian Marine Orders and the International Maritime Dangerous Goods Code
  - IATA Dangerous Goods by Air Regulations
RANGE STATEMENT

- Australian and international explosives codes
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- workplace relations regulations
- workers compensation regulations

Unit Descriptor

Unit Descriptor
This unit involves the skills and knowledge required to organise receival operations in accordance with workplace requirements including planning and organising receival operations, organising the storage of received stock, and completing all required documentation and records in accordance with workplace procedures and relevant regulatory requirements. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit
Work must be carried out in accordance with codes/regulations and workplace requirements relevant to the organisation of receival operations.

Work is performed under some supervision generally within a team environment. It involves the application of regulatory requirements and workplace procedures to the organisation of receival operations in the warehousing, distribution and/or storage industries.

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1 Plan and organise receival operations | 1.1 Knowledge of product characteristics and workplace procedures are applied to the analysis of the stock  
1.2 Resources including manual handling equipment, employee competencies, storage areas and goods management equipment are identified to match stock characteristics  
1.3 Deadlines are scheduled to enable receival of stock in storage zones  
1.4 Work processes are planned to meet specified deadlines |
| 2 Organise the storage of stock | 2.1 Employees, equipment and storage areas are allocated and supervised  
2.2 Individuals are informed of work requirements and deadlines  
2.3 Work processes are monitored to ensure that resources, both human and equipment, are maintained at productive levels and in accordance with workplace procedures and OH&S requirements  
2.4 Discrepancies in stocks are noted and reported in accordance with workplace procedures |
| 3 Complete documentation | 3.1 Documentation and records regarding receival operations are completed and filed/despatched in accordance with workplace procedures and relevant regulatory requirements |

## Required Skills and Knowledge

### REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

### Required knowledge:

- Regulations relevant to the organising of receival operations, including the ADG Code and relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the organising of receival operations
- Focus of operation of work systems, equipment, management and site operating systems for the organising of receival operations
- Problems that may occur when organising receival operations and appropriate action that can be taken to resolve the problems
- Documentation and record requirements for receival operations
- Equipment used during the organisation of receival operations and the precautions and
REQUIRED KNOWLEDGE AND SKILLS

- procedures that should be followed in its use
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when organising receival operations
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the organising of receival operations
- Complete documentation related to the organising of receival operations
- Identify relevant stock and goods coding and labelling, including ADG and IMDG markings
- Work collaboratively with others when organising receival operations
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when organising receival operations in accordance with regulatory requirements and workplace procedures
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Select and use relevant equipment and communication technology when organising receival operations
- Estimate the size, shape and special requirements of goods and loads

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.
EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:  
- in a range of work environments
RANGE STATEMENT

Goods to be received may involve:
- by day or night
- special handling, location, storage and/or packaging requirements, including temperature controlled goods, dangerous goods or hazardous substances

Problems that may occur when receiving an order include:
- wrong stock is received
- damaged stock
- damaged packaging or pallets
- incorrect quantity
- error in paperwork
- paperwork doesn't match goods
- delivered late
- poorly stacked stock
- incorrect quantity

Aspects of goods to be checked when goods are received may include:
- correct type
- number
- condition
- quality
- packaging
- labelling
- dangerous goods declarations and marking (where applicable)

Hazards in the work area may include exposure to:
- chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials
- oil or water on floor
- a fire or explosion
- damaged packaging or pallets
- debris on floor
- faulty racking
- poorly stacked pallets
- faulty equipment

Communication in the work area may include:

3.2 Required records are accessed and retrieved in accordance with workplace procedures |

## Required Skills and Knowledge

**REQUIRED KNOWLEDGE AND SKILLS**

This describes the essential knowledge and skills and their level required for this unit.

**Required knowledge:**

- Australian codes and regulations relevant to the organisation of warehouse records operations  
- Relevant OH&S and environmental protection procedures and guidelines  
- Workplace procedures and policies for the organisation of warehouse records operations  
- Focus of operation of record systems, equipment, management and site operating systems for the organisation of warehouse records  
- Principles of operation and functions of warehouse records systems  
- Principles of operation, functions and applications of different types of records systems  
- Requirements for accessibility, security and confidentiality of records  
- Computer records and documentation requirements for the organisation of warehouse records
REQUIRED KNOWLEDGE AND SKILLS

operations

- Problems that may occur when organising warehouse records operations and appropriate action that can be taken
- Housekeeping standards procedures required in the workplace
- Site layout

Required skills:

- Communicate effectively with others when organising warehouse records operations
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the organisation of warehouse records operations
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the organisation of warehouse records operations
- Work collaboratively with others when organising warehouse records operations
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions when organising warehouse records operations in accordance with regulatory requirements and workplace procedures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Select and use relevant communications, computing and office equipment when organising warehouse records operations

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.  Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
Elements and Performance Criteria

ELEMENT | PERFORMANCE CRITERIA
---|---
1 Determine site functions and operations | 1.1 Layout of storage facilities, work flow and activities undertaken in each zone are identified
1.2 Type of storage facilities, their purpose and (any) associated risk factors are identified
1.3 Inventory lists are accessed through record management system
1.4 Storage separations and co-storage applications are identified
2 Monitor storage operations | 2.1 Inventory data is confirmed to match goods/freight and applicable storage requirements
2.2 Storage areas are supervised to ensure movement of personnel and goods/freight are in accordance with workplace procedures
2.3 Storage facilities are checked to ensure appropriate operational capacity
2.4 Integrity of goods/materials are monitored to ensure appropriate quality is maintained
2.5 Discrepancies(changes to storage requirements and/or inventory lists are noted and action undertaken in accordance with workplace procedures
2.6 Appropriate action(s) are initiated in response to breaches of operational procedures or to an emergency/incident
2.7 Operational actions and investigative outcomes are documented in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian codes and regulations, permit and licence requirements relevant to the workplace activities
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies relevant to the monitoring of storage facilities
- Focus of operation of work systems, equipment, management and site operating systems
- Information on various categories or groups of products including their key characteristics and hazards and the special handling, stacking and storage requirements for each
- Types of storage areas and related equipment appropriate for different types of goods including perishable, fragile, dangerous, composition/state goods
REQUIRED KNOWLEDGE AND SKILLS

- Equipment applications, capacities, configurations, safety hazards and control mechanisms
- Requirements for workplace documentation reports and records
- Problems that may occur when monitoring storage facilities and appropriate action that can be taken
- Site layout
- Housekeeping standards and procedures required in the workplace

Required skills:

- Communicate effectively with others when monitoring storage facilities
- Read and interpret instructions, procedures, information and signs relevant to the monitoring of storage facilities
- Complete documentation related to the monitoring of storage facilities
- Work collaboratively with others when monitoring storage facilities
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions when monitoring storage facilities in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events related to the monitoring of storage facilities
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Use information on products and stock to determine, plan and organise processes used for the monitoring of storage facilities
- Select and use relevant communications, computing and office equipment when monitoring storage facilities
- Monitor performance of equipment
- Select and use required personal protective equipment conforming to industry and OH&S standards
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
  - In both real and simulated environments, access is required to:
    - relevant and appropriate materials and equipment, and
    - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement
RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:
- in a range of work environments
- by day or night

Customers may be:
- internal or external

Workplaces may comprise:
- large, medium or small worksites

Requirements for work may include:
- restricted spaces
- site restrictions and procedures
- use of safety and personal protective equipment
- communications equipment
- specialised lifting and/or handling equipment
- incident/accident breakdown procedures
- additional gear and equipment
- noise restrictions
- hours of operations
- authorities and permits

Work may be conducted in:
- restricted spaces
- exposed conditions
- controlled or open environments
- environments involving the movement of equipment, goods, materials and/or vehicular traffic

Goods may involve:
- special handling, location, storage and/or packaging requirements, including temperature controlled goods and dangerous goods

Modes of transfer may be:
- manual or motorised

Storage types may include but are not limited to:
- bin/binning systems
- rack refrigeration/freezers/cold rooms
- marked floor space
- containers
- racks and racking systems
- block/stacks
- pallets

Inventory systems may be:
- automated
- manual
- paper-based
- computerised
- microfiche
RANGE STATEMENT

Categories or groups of products/stock may include:
- small parts
- perishable goods
- overseas export
- dangerous goods
- refrigerated products
- temperature controlled stock
- fragile goods

The characteristics of products/stock may include:
- small parts
- toxicity
- flammability
- form
- weight
- size
- state
- perishability
- fragility
- security risk

Labelling systems may include but are not limited to:
- batch code
- bar code
- identification numbering systems
- serial numbers
- symbols for safe handling
- ADG and HAZCHEM Codes

Hazards in the work area may include:
- hazardous or dangerous materials
- contamination of, or from, materials being handled
- noise, light, energy sources
- stationary and moving machinery, parts or components
- service lines
- skills, leakages, ruptures
- dust/vapours
- oil or water on floor
- a fire or explosion
- damaged packaging or pallets
- debris on floor
- faulty racking
- poorly stacked pallets
- faulty equipment

Communication in the work area may include:
- phone
- electronic data interchange (EDI)
- fax
RANGE STATEMENT

- email
- internet
- RF systems
- oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Personal protective equipment may include:

- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- high visibility clothing

Consultative processes may involve:

- other employees and supervisors
- suppliers, customers and clients
- relevant authorities and institutions
- management and union representatives
- industrial relations and OH&S specialists
- other maintenance, professional or technical staff

Information/documents may include:

- goods identification numbers and codes
- manifests, picking slips, merchandise transfers, stock requisitions and bar codes
- codes of practice and regulations relevant to workplace operations
- Australian and international regulations and codes of practice for the handling, stacking and transport of dangerous goods and hazardous substances
- operations manuals, job specifications and induction documentation
- manufacturers specifications for equipment
- workplace procedures and policies
- supplier and/or client instructions
- dangerous goods declarations and material safety data sheets (where applicable)
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian standards and certification requirements
- quality assurance procedures
- emergency procedures
- codes and regulations relevant to the monitoring of storage
RANGE STATEMENT

legislation may include:

- Australian and international regulations and codes of practice for the storage of dangerous goods and hazardous substances, including:
  - Australian Dangerous Goods Code
  - Australian Explosives Code
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- marine orders
- relevant state/territory OH&S and environmental protection legislation
- workplace relations regulations
- workers compensation regulations

Unit Descriptor

This unit involves the skills and knowledge required to control and order stock for a workplace store in an enterprise/organisation in a transport, distribution, production, hospitality, retail or other relevant industry sector. It specifically covers maintaining stock levels and records, organising and administering stocktakes, identifying stock losses, processing stock orders, and following up orders. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Work must be carried out in compliance with the relevant codes of practice, regulations and workplace procedures for the control and ordering of stock in a workplace store.

Work is performed under general supervision, with some accountability and responsibility for self and others in achieving the prescribed outcomes. It involves the application of routine principles and procedures to efficiently control and order stock in a workplace store.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.
Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
## Elements and Performance Criteria

### 1. Maintain stock levels and records

1.1 Stock levels are monitored and maintained at levels prescribed by workplace specifications
1.2 Stock security systems are monitored and adjusted as required
1.3 Stock re-order cycles are maintained, monitored and adjusted as required
1.4 Colleagues are informed of their individual responsibilities in regard to recording of stock
1.5 Stock storage and movement records are maintained in accordance with workplace procedures
1.6 Stock performance is monitored and fast/slow moving items are identified and reported in accordance with workplace procedures

### 2. Organise and administer stocktakes

2.1 Stocktakes are organised at the appropriate time and responsibilities allocated to staff
2.2 Accurate reports on stocktake data are produced within designated timelines

### 3. Identify stock losses

3.1 Losses are accurately identified, recorded and assessed against potential loss as forecast on a regular basis
3.2 Identified losses are reported in accordance with workplace procedures
3.3 Avoidable losses are identified and reasons are established, and appropriate solutions are recommended and implemented to prevent future avoidable losses

### 4. Process stock orders

4.1 Orders for stock are accurately processed in accordance with workplace procedures
4.2 Stock ordering and recording systems are accurately maintained
4.3 Purchase and supply agreements are correctly used and appropriate details recorded
4.4 Negotiated purchase and supply agreements are recorded accurately and filed for retrieval

### 5. Follow up orders

5.1 Delivery process is monitored to meet agreed deadlines
5.2 Appropriate liaison is undertaken with colleagues and suppliers to ensure continuity of supply
5.3 Routine supply problems are followed up or referred to the appropriate person in accordance with workplace policy
5.4 Stock is distributed in accordance with agreed allocations

### 6. Complete documentation

6.1 All required records and documentation are completed in accordance with workplace procedures
Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant codes of practice and legislative requirements (for example dangerous goods regulations, health and hygiene regulations, etc.)
- Relevant OH&S and environmental procedures and regulations
- Principles of stock control
- Procedures for the ordering of stock
- Stock control documentation and systems used in workplace stores
- Interpretation of workplace specifications and orders for supplies
- Stock security systems
- Protocols and procedures for liaising with supplier representatives, drivers and colleagues using appropriate technology
- Systems for the completion of relevant records and documentation
- Problems that may occur when controlling and ordering stock and appropriate action that can be taken to resolve the problems
- Contacts and sources of information and documentation needed when controlling and ordering stock
- Site layout
- The purpose and procedures for the use of relevant personal protective equipment
- Customer service policies and procedures

Required skills:

- Communicate effectively with others when controlling and ordering stock
- Read and interpret instructions, procedures and labels relevant to the controlling and ordering of stock
- Complete documentation related to the controlling and ordering of stock
- Work collaboratively with others when controlling and ordering stock
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when controlling and ordering stock in accordance with regulatory requirements and workplace procedures
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and
Required skills:

- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Adapt to differences in stock and systems in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Select and use relevant communication and computing equipment when controlling and ordering stock

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
EVIDENCE GUIDE

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

This unit may apply to:

- any workplace store in an enterprise/organisation in a transport, distribution, production, hospitality, retail or other relevant industry sector (excluding work areas and organisations involving major and/or dedicated warehousing)

Suppliers may be:

- internal or external

Requirements for work may include:

- workplace protocols and procedures
- communications equipment
- workplace operations manuals
- relevant regulations, authorities and permits
- hours of operation
- relevant record keeping requirements
- workplace quality and customer service standards

Stock control and record systems may be:

- manual
- computerised

Stock may include but is not limited to:

- production materials
- packaging materials
- equipment and tools
- office and stationery supplies
- forms, brochures and documents
- vouchers and tickets
- merchandise for sale
RANGE STATEMENT

Consultative processes may involve:
- linen
- food and beverage supplies
- suppliers, representatives and drivers
- relevant authorities
- other employees and supervisors
- management
- other professional or technical staff

Communications systems may involve:
- telephone
- fax
- email
- electronic data transfer of information
- mail

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Personal protective equipment may include but is not limited to:
- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- high visibility clothing

Documentation/records may include:
- workplace protocols and procedures
- workplace specifications for the stock concerned
- relevant regulations
- supplier instructions
- operations manuals
- documentation including order forms, standard letters, etc.
- induction documentation
- delivery options
- relevant Australian and international standards, criteria and certification requirements
- communications technology equipment, oral, aural or signed communications
- quality assurance procedures
- emergency procedures
- relevant competency standards and training materials

Applicable procedures and codes may include:
- relevant regulations and codes of practice for receipt and storage of stock concerned
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods
RANGE STATEMENT

and hazardous substances, including:
• Australian and International Dangerous Goods Codes
• Australian and International Explosives Codes
• Australian and international standards and certification requirements

Competency Field
Competency Field A - Handling Cargo/Stock
TLIA3050A Apply GST legislation as part of customs broking activities

Modification History
Not Applicable

Unit Descriptor

This unit involves the skills and knowledge required to apply GST (Goods and Services Tax) legislation as part of customs broking activities. It includes assessing the applicability of GST and other relevant taxes; determining tax exemptions and taxes to be paid; and documenting the results of all tax determinations. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

This unit applies to individuals working as a customs broker. Work must be carried out in compliance with the relevant Customs and Australian Taxation Office related legislation and workplace requirements concerning the GST. Work is undertaken in a range of environments including small to large worksites in the customs broking and international freight forwarding industries. Work at this level is performed under some supervision, generally within a collaborative team environment.

This unit is normally packaged at AQF level III or above.

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Customs and other related legislation as they apply to the implementation of GST legislation, including A New Tax System (Goods and Services Tax) Act 1999 and associated regulations
- Relevant sections of national and state or territory regulatory requirements and codes of practice
- Relevant OH&S and environmental procedures and regulations
- Information on relevant aspects of GST legislation as they relate to customs broking and freight forwarding activities
- Sources of information on new developments in GST legislation as they relate to customs broking activities
- Focus of operation of work systems, equipment, management and site operating systems for
REQUIRED KNOWLEDGE AND SKILLS

the implementation of GST legislation as they relate to customs broking activities

- Problems that may occur when applying GST legislation and appropriate action that can be taken to resolve the problems
- Techniques to learn skills and knowledge required for new developments in GST legislation as they relate to customs broking activities
- Documentation requirements for the application of GST legislation as they relate to customs broking activities
- Steps involved in planning the work activities
- Procedures to be followed in the event of an emergency
- Procedures for managing and controlling hazardous situations when carrying out work activities

Required skills:

- Negotiate, communicate and liaise effectively with others when applying GST legislation as part of customs broking activities
- Read and interpret instructions, procedures and information relevant to the application of GST legislation as they relate to customs broking activities
- Plan and organise work activities
- Complete documentation related to work activities
- Work collaboratively with others as part of an operational team
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Operate relevant computer/communication/office equipment when applying GST legislation
- Enter information using appropriate media and technology
- Identify, interpret and learn new skills and knowledge required for new developments in GST legislation and related systems and technology
- Resolve problems which may arise when applying GST legislation
- Monitor work activities in terms of planned schedule
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment
EVIDENCE GUIDE

guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
  - determining applicability of GST and other relevant taxes
  - determining taxes
  - documenting tax assessments

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work
RANGE STATEMENT

environments and situations that may affect performance.

Information on relevant aspects of GST legislation as they relate to customs broking and freight forwarding activities may include:

- key features of the GST legislation
- GST system overview
- basic operation of the GST system
- roles and responsibilities of Australian Customs Service (Customs) and the Australian Taxation Office (ATO) as they relate to GST
- registration process
- GST accounting requirements
- GST-free goods and supplies
- GST input-taxed supplies
- GST collection and remittance
- special rules pertaining to GST requirements
- impact of GST on Customs functions
- calculations of GST on taxable importations
- transport and insurance costs attracting GST
- impact of GST on importers and exporters
- non-taxable importation

GST and related taxes refers to:
- Goods and Services Tax
- Wine Equalisation Tax (WET)
- Luxury Car Tax (LCT)
- other taxes on imported/exported goods and commodities

Allowable exemptions and specialised schemes refers to:
- government initiatives and schemes to promote exports of goods and services

Verification may be undertaken by:
- customs broker
- other experienced colleagues within the organisation

Documentation may be passed on to:
- colleagues for further processing
- manager for checking and verification
- customs broker

New developments in the application of GST legislation may include changes in:
- rates
- GST and customs legislation
- processes
- systems

Information on new developments in the application of GST legislation may be obtained from:
- internal networks such as: own operational team, staff in other departments, support staff, managers, training staff, etc.
- external networks such as: staff in Customs, ATO and various regulatory authorities, staff in other customs broking enterprises, etc.
RANGE STATEMENT

- bulletins, journals, magazines, books, etc.
- internet websites
- internal and external training programs

Techniques to learn skills and knowledge required for new developments in the application of GST legislation may include:

- external training programs
- internal training programs
- reading independently
- coaching in the workplace
- online learning on a computer
- networking with relevant internal and external contacts

Depending on the organisation concerned, workplace procedures may be called:

- standard operating procedures (SOPs)
- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Communication in the work area may include:

- phone
- electronic data interchange (EDI)
- fax
- email
- internet
- RF systems
- oral, aural or signed communications

Consultative processes may involve:

- other employees and supervisors
- relevant authorities and institutions
- management and union representatives
- industrial relations and OH&S specialists

Documentation and records may include:

- relevant documentation and guidance materials on A New Tax System (Goods and Services Tax) Act 1999 and Customs and other legislation as they relate to the implementation of GST legislation
- ATO rulings on GST
- Insurance documents
- Shipping documents
- Commercial invoices
- Customs and related legislation and procedures as they relate to calculation of GST as part of customs broking activities
- internal documentation used for the application of GST legislation as part of customs broking activities
- codes of practice and regulations relevant to the application of GST legislation as part of customs broking activities
RANGE STATEMENT

- operations manuals, job specifications and induction documentation
- manufacturers specifications for equipment
- workplace procedures and policies
- client instructions
- quality assurance procedures
- relevant OH&S and environmental protection regulations
- Customs and related legislation
- A New Tax System (Goods and Services Tax) Act 1999 and Customs and other legislation as they relate to the implementation of tax legislation as part of customs broking activities
- trade modernisation legislation
- other taxation legislation
- export/import/quarantine/bond requirements
- workplace relations regulations
- equal opportunity legislation
- equal employment opportunity and affirmative action legislation

Applicable legislation and regulations may include:

Unit Descriptor
This unit involves the skills and knowledge required to carry out customs valuation in accordance with Customs and related legislation and workplace requirements. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit
This unit applies to individuals working as a customs broker. Work must be carried out in compliance with the relevant Customs and related legislation and workplace requirements concerning customs valuation functions. Work is undertaken in a range of environments including small to large worksites in the customs broking and international trade industries. Work at this level requires some supervision, generally within a team environment.

This unit is normally packaged at AQF III or above.

| 2  | **Identify the import sales transaction contract for customs valuation purposes** |
| 2.1 | Importer and seller are identified |
| 2.2 | Relevant contract or contracts are identified |
| 2.3 | Terms of trade relevant to the contract are identified |

| 3  | **Determine the price and elements of adjusted price** |
| 3.1 | Components that constitute the price paid or payable are identified |
| 3.2 | The correct adjusted price deductions to be made taking into account relevant legislation and the terms of the relevant import sales transaction are determined |

| 4  | **Determine Price Related Costs** |
| 4.1 | Determination to related costs additions to be made taking into account relevant legislation and the terms of the relevant import sales transaction are determined |

| 5  | **Calculate customs value** |
| 5.1 | The date and place of export are determined in accordance with the Customs Act 1901 |
| 5.2 | Valuation elements against imported goods using factorisation are apportioned |
| 5.3 | Transaction value is calculated by applying applicable rate of exchange |
| 5.4 | The requirement for a valuation advice is identified |

| 6  | **Record valuation information on customs entry/ declaration in accordance with legislative requirements** |
| 6.1 | Valuation related fields on a customs declaration are identified |
| 6.2 | Valuation information is entered correctly on customs declaration |
| 6.3 | Calculations are checked for accuracy and verified as required |
| 6.4 | Completed documentation is retained by relevant personnel in the enterprise in accordance with the requirements of Customs and related legislation and workplace procedures |
| 6.5 | Post entry advice to the client is initiated where required |
| 6.6 | Relevant documentation is passed on to the client |
Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Customs and related legislation relevant to the determination of a customs valuation
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the conduct of a customs valuation
- Focus of operation of work systems, equipment, management and site operating systems needed for customs valuation processes
- Problems that may occur when carrying out customs valuations and appropriate action that can be taken to resolve the problems
- Information on relevant aspects of basic customs valuations
- Types of goods and related handling and documentation requirements including dangerous goods and hazardous substances
- Sources of information on new developments in custom valuation practices
- Ways of learning the skills and knowledge required for new developments in customs valuation practices
- Cultural differences amongst customers, internal and external contacts and within the operational team and their implications when carrying out customs valuations
- Documentation requirements for customs valuations
- Penalties and the infringement notice scheme as it applies to goods incorrectly valued
- Steps involved in planning the work activities

Required skills:

- Negotiate, communicate and liaise effectively with clients and others
- Read and interpret instructions, procedures and information relevant to the determination of customs valuations
- Identify, interpret and learn skills and knowledge required for relevant new developments in customs valuation practices
- Plan and organise work activities
- Complete documentation related to work activities
- Select and use relevant computer/communication/office equipment when carrying out customs valuations
- Enter information using appropriate technology when carrying out customs valuations
- Work collaboratively as part of an operational team
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
Required skills:

- Solve problems that may arise when determining customs valuations
- Modify activities depending on differing workplace contexts, risk situations and environments, including taking appropriate initiatives within allowable limits
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
  - applying the relevant valuation method
  - identifying the contract for customs valuation purposes
  - determining the price and elements of adjusted price
  - identifying elements of price related costs
  - calculating customs value
  - recording valuation information on customs entry/declaration
  - selecting and using the technology required to conduct customs valuations

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
EVIDENCE GUIDE

- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Information on the determination of relevant aspects of customs valuations may include:

- the principles, theories and history of the Australian valuation system with regard to the WTO valuation agreement and Customs and related legislation
- Customs Act 1901 and the Customs Regulations
- Transaction Value including:
  - import sales transaction
  - price
  - adjusted price
  - price related costs
  - production assists
  - royalties and licence fees/commissions
  - value on related amounts
  - related parties
  - rebates
  - arms length transactions
RANGE STATEMENT

Alternate valuation methods may include:
- contract of sale
- identical goods valuation
- similar goods valuation
- deductive goods method
- computed value method
- fall back method

INCOTERMS 2000 are:
- the ICC Official Rules for the Interpretation of Trade Terms, International Chamber of Commerce, 1999

Adjusted price may include:
- deductible financing costs
- post importation costs
- Australian inland freight and insurance
- deductible administrative costs
- overseas freight and insurance

Price related costs may include:
- production assist costs
- packing costs
- foreign inland freight and foreign inland insurance
- commissions
- royalties and licence fees
- proceeds of resale

Factorisation means:
- the apportionment of costs over a line value (each line of the invoice for which there is a separate classification)

Valuation Advice means:
- the completion and lodgement of request for official Valuation Advice with the Australian Customs Service

Post entry Valuation Advice may include:
- advising the client what options are available if there is disagreement with the customs value

Verification may include:
- other colleagues within the enterprise
- customs brokers

New developments in customs valuation practices including changes in:
- technology
- products
- regulations
- legislation
- processes
- systems

Information on new developments in customs valuation practices may be obtained from:
- internal networks such as: own operational team, staff in other departments, support staff, managers, training staff, etc.
- external networks such as: airline, shipping, road transport and storage, personnel, staff in bond stores; staff in various regulatory authorities; and equipment and systems suppliers
RANGE STATEMENT

- bulletins, journals, magazines, books, etc.
- internet websites
- internal and external training programs
- external training programs
- internal training programs

Ways of learning skills and knowledge required for new developments in customs valuation practices may include:

- reading independently
- coaching in the workplace
- online learning on a computer
- networking with relevant internal and external contacts

Depending on the organisation concerned, workplace procedures may be called:

- standard operating procedures (SOPs)
- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Communication in the work area may include:

- phone
- electronic data interchange (EDI)
- fax
- email
- internet
- RF systems
- oral, aural or signed communications

Consultative processes may involve:

- other employees and supervisors
- relevant authorities and institutions
- management and union representatives
- industrial relations and OH&S specialists

Documentation and records may include:

- Customs Act 1901 and related legislation
- World Trade Organisation Valuation Agreement
- Australian Customs Manual on Valuation and Preference
- Integrated Cargo System (ICS) user manuals
- goods identification numbers and codes
- manifests, delivery notes, special clearances, consignment notes, authorised weighbridge certificates, and special clearances
- internal documentation used for customs valuation
- operations manuals, job specifications and induction documentation
- manufacturers specifications for equipment
RANGE STATEMENT

- workplace procedures and policies
- client instructions
- award, enterprise bargaining agreement, other industrial arrangements
- quality assurance procedures
- emergency procedures

Applicable rules, legislation and regulations may include:

- Customs Act 1901 and related legislation
- World Trade Organisation Valuation Agreement
- privacy legislation
- export/import/quarantine/bond requirements
- workplace relations regulations
- equal opportunity legislation
- equal employment opportunity and affirmative action legislation
- relevant state/territory OH&S and environmental protection legislation

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Customs and related legislation relevant to the classification of commodities for the import and export of goods through customs
- Relevant OH&S and environmental protection procedures and guidelines
- Customs and workplace procedures and policies for the classification of commodities for the import and export of goods through customs
- Focus of operation of work systems, equipment, management and site operating systems for the classification of commodities for the import and export of goods through customs
- Problems that may occur when classifying commodities for the import and export of goods through customs and appropriate action that can be taken to resolve the problems
- Information on relevant aspects of the classification of commodities for the import and export of goods through customs
- Types of goods and related classification and documentation requirements
- Sources of information on new developments in the classification of commodities for the import and export of goods through customs
- Ways of learning the skills and knowledge required for new developments in the classification of commodities for the import and export of goods through customs
- Cultural differences amongst customers, internal and external freight contacts and within the operational team and their implications when providing customs classification services
- Documentation and recording requirements for the classification of commodities for the import and export of goods through customs
- Steps involved in planning the work activities

Required skills:

- Communicate effectively with others when classifying commodities for the import and export of goods through customs
- Locate, read and interpret instructions, procedures and information relevant to the classification of commodities for the import and export of goods through customs
- Plan and organise work activities when classifying commodities for the import and export of goods through customs
- Select and use relevant computer/communication/office equipment when classifying commodities for the import and export of goods through customs
Required skills:

- Enter information using appropriate technology
- Work collaboratively as part of an operational team
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Modify activities depending on differing workplace contexts, risk situations and environments, including taking appropriate initiatives within allowable limits
- Solve problems that may arise when classifying commodities for the import and export of goods through customs
- Take responsibility for classifying commodities for the import and export of goods through customs
- Identify, interpret and learn skills and knowledge required for relevant new developments in the classification of commodities for the import and export of goods through customs
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Locate the resources necessary for the classification of goods
- Record work outcomes

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
  - locating resources necessary for the classification of commodities for the import and export of goods
  - utilising classification tools as directed
  - selecting and using the technology required to classify commodities for the import and export of goods
  - completing classification in accordance with legislation

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
EVIDENCE GUIDE

- a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
- access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Information on relevant aspects of the classification of commodities for the import and export of goods through customs may include:

- the reasons for the Customs Tariff Act 1995 and for the imposition of duty on imported goods
- the content of the Customs Tariff Act 1995 and the various sections within the Act as they relate to the classification of commodities for the import and export of goods through customs
- the schedules of the tariff and comparisons between the sub-heading structures at various levels in order to arrive at correct classification and duty rates
- the Rules for the Interpretation of the Harmonized System and the Australian Customs Tariff Act 1995
- comparisons and differences between the various rules for
**RANGE STATEMENT**

- tariff classification purposes
- the principles of classification in the identification of goods for tariff purposes and their application to the classification of commodities for the import and export of goods through customs
- the legal notes to the tariff and the context of each note and the application of this context to the classification of commodities for the import and export of goods through customs
- the applications of the various aids available to the classification process

Where goods for classification are not available, sample of goods may be in the form of:

- photographic (still, video or electronically transmitted image)
- a written description including technical drawings

Resources to classify goods includes:

- Australian Harmonized Export Classification Book (ISBN 0 642 4772 3)
- the combined Customs Tariff Act 1995
- precedents database
- dictionaries
- trade or technical publications
- Harmonized System Explanatory Notes (HSEN)

Examples of previous related classifications include:

- candidate's and colleagues' previous classifications
- examples from texts and reference materials

Client consultation may be required where:

- characteristics of goods cannot be determined from available information or require clarification in relation to use, function, context (as a component of another item)

Assistance may include:

- advice from supervisor or manager, more experienced colleagues, customs brokers, training staff, technical experts
- using reference material within organisation, training providers, professional libraries, trade journals
- consulting technical experts in the industry, professional association or a training provider

New developments in the classification of commodities may relate to changes in:

- technology
- regulations
- processes
- systems

Information on new developments in the classification of commodities for the import and export of goods may be obtained from:

- internal networks such as: own work team, staff in other departments, support staff, managers, training staff, etc.
- external networks such as: staff in various regulatory authorities
RANGE STATEMENT

from: • bulletins, journals, magazines, books, etc.
     • internet websites
     • internal and external training programs

Ways of learning skills and knowledge required for new developments in the classification of commodities for the import and export of goods may include:
• external training programs
• internal training programs
• reading independently
• coaching in the workplace
• online learning on a computer
• networking with relevant internal and external contacts

Depending on the organisation concerned, workplace procedures may be called:
• standard operating procedures (SOPs)
• company procedures
• enterprise procedures
• organisational procedures
• established procedures

Communication in the work area may include:
• phone
• electronic data interchange (EDI)
• fax
• email
• internet
• RF systems
• oral, aural or signed communications

Consultative processes may involve:
• other employees and supervisors
• personnel in relevant authorities and institutions
• management and union representatives
• industrial relations and OH&S specialists

Documentation and records may include:
• Customs and related legislation
• dictionaries
• trade or technical publications
• Harmonized System Explanatory Notes (HSEN)
• manifests, delivery notes, special clearances, consignment notes, authorised weighbridge certificates, and special clearances
• internal documentation
• operations manuals, job specifications and induction documentation
• manufacturers specifications for relevant equipment
• workplace procedures and policies
• supplier and/or client instructions
• quality assurance procedures
• extrinsic material (as defined in the Acts Interpretation
RANGE STATEMENT

Applicable legislation and regulations may include:

- Customs and related legislation
- Other legislation related to importing and exporting of goods
- Export/import/quarantine/bond requirements
- Relevant state/territory OH&S and environmental protection legislation
- Australian Harmonized Export Classification Book
- Workplace relations regulations
- Equal opportunity legislation
- Equal employment opportunity and affirmative action legislation
- Customs Tariff Act 1995

Unit Sector(s)

Not Applicable

Competency Field

Competency Field A - Handling Cargo/Stock
TLIA3055A Coordinate terminal/wharf equipment operations

Modification History
Release 1. This is the first release of this unit.

Unit Descriptor
This unit involves the skills and knowledge required to coordinate terminal/wharf equipment operations in accordance with workplace requirements. It includes identifying, assessing and managing potential risks; monitoring work performance and progress; monitoring the status of pending work; solving problems and making decisions; completing all shift requirements; and preparing for the next shift. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit
Work must be carried out in compliance with the relevant standards, regulations and workplace requirements concerning terminal/wharf operations. Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements in coordinating terminal/wharf equipment operations as part of work activities in the stevedoring, transport, distribution and/or allied industries.

Licensing/Regulatory Information
Refer to Unit Descriptor.

Pre-Requisites
Nil

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Required Skills and Knowledge

This section describes the knowledge and skills required for this unit.

**Required knowledge:**

- Australian and international standards, codes and regulations relevant to operating terminals/wharves including the Australian and International Dangerous Goods Codes
- Cargo marking and numbering systems
- Container terminal operations management systems
- Focus of operation of work systems, equipment, management and site operating systems for organising and monitoring terminal/wharf operations
- Problems that may occur when coordinating terminal/wharf operations and appropriate action that can be taken to resolve these problems
- Relevant bond, quarantine or other legislative requirements
- Relevant handling and safety codes
- Relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- Site layout
- Workplace procedures and policies for organising and monitoring terminal/wharf operations

**Required skills:**

- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Communicate effectively with others when coordinating terminal and wharf operations
- Complete documentation related to coordinating terminal and wharf operations
- Efficiently and effectively maintain container terminal tracking operations systems
- Estimate size, shape and special requirements of loads
- Identify cargo, container and goods, coding, Australian Dangerous Goods (ADG)/International Maritime Dangerous Goods Code (IMDG) markings and where applicable emergency information panels
- Identify, select and use relevant equipment, processes and procedures when coordinating terminal and wharf operations
- Implement contingency plans
- Modify activities depending on operational contingencies, risk situations and environments
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Promptly report and/or rectify identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures
• Read and interpret instructions, procedures, information and labels relevant to coordinating terminal and wharf operations
• Receive, acknowledge and send messages with appropriate communications equipment
• Select and use required personal protective equipment conforming to industry, WHS/OHS and Australian standards
• Work collaboratively with others when coordinating terminal and wharf operations
• Work systematically with required attention to detail without injury to self or others or damage to goods or equipment
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the Elements, Performance Criteria, Required Skills, Required Knowledge and include demonstration of applying:

- required knowledge and skills
- relevant legislation and workplace procedures
- other relevant aspects of the range statement.

Context of and specific resources for assessment

Performance is demonstrated consistently over time and in a suitable range of contexts.

Resources for assessment include access to:

- a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
- an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

- relevant and appropriate materials and equipment, and
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Practical assessment must be undertaken by a registered training organisation.

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests.

A range of assessment methods should be used to assess practical skills and knowledge.

Practical assessment must occur in an:

- appropriately simulated environment at the registered training organisation, and/or
- appropriate range of situations in the workplace.
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:  
- by day or night
- in a range of work environments

Customers may be:  
- external
- internal

Workplaces may comprise:  
- large
- medium
- small worksites

Work may be conducted in:  
- controlled or open environments
- exposed conditions
- limited or restricted spaces

Account may be taken of the following conditions in relation to operational safety (depending on the operational context of the terminal/wharf concerned):  
- degree of visibility
- obstacles
- organisational and statutory operating requirements
- other traffic
- ship/vehicle/rail movements
- site and nature of loads
- stacking area
- surface condition of work area
- tidal movement
- weather conditions

Hazards in the work area may include exposure to:  
- chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials

Personnel in work area may include:  
- contractors
- site visitors
- official representatives
- workplace personnel

Personal protective equipment may include:  
- gloves
- high visibility clothing
- protective clothing
- safety glasses
- safety headwear and footwear
- two-way radios

Communication in the work area may include:  
- electronic data transfer (EDI)
- email
- fax
oral, aural or signed communications
phone
radio
radio frequency (RF) systems

Workplace procedures may include:
company procedures
enterprise procedures
established procedures
organisational procedures

Information/documents may include:
Australian and international codes of practice and regulations relevant to organising and monitoring terminal/wharf operations
Australian and international regulations and codes of practice for handling and transporting dangerous goods and hazardous substances
award, enterprise bargaining agreement, other industrial arrangements
dangerous goods declarations and safety data sheets (SDS)/material safety data sheets (MSDS)
emergency procedures
goods identification numbers and codes
manifests, bar codes, and container identification/serial number
manufacturer specifications for equipment
operations manuals, job specifications and induction documentation
quality assurance procedures
relevant Australian Standards and certification requirements
supplier and/or client instructions
workplace procedures and policies

Applicable regulations and legislation may include:
Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
Australian and International Dangerous Goods Codes
Australian Marine Orders and the International Maritime Dangerous Goods Code
Australian and International Explosives Codes
export/import/quarantine/bond requirements
licence, patent or copyright arrangements
Terminal management systems or computerised management systems may include:

- marine orders
- relevant Australian standards and certification requirements
- relevant codes and regulations for terminal and wharf operations
- relevant state/territory WHS/OHS and environmental protection legislation
- water and road use and licence arrangements
- workplace relations regulations
- workplace relations regulations
- commercial available computer systems
- integrated computer systems
- internally developed computer systems
- Narvis Sparks
- SN4

Unit Descriptor
This unit involves the skills and knowledge required to check and evaluate records and documentation in accordance with regulatory and workplace requirements including checking documentation and analysing and evaluating records. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit
Work must be carried out in compliance with the relevant standards, regulations and workplace requirements concerning the documentation requirements for the local and international transport of cargo and containers.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements to the checking and evaluation of documentation for the local and international transport of cargo and containers as part of work activities in the stevedoring, transport, distribution and allied industries.

Licensing/Regulatory Information
Refer to Unit Descriptor

Pre-Requisites
Not Applicable
Employability Skills Information

Employability Skills
This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.
Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
Elements and Performance Criteria

**ELEMENT**

1. **Check documentation**

1.1 Documentation is checked to ensure its compliance with regulatory and workplace requirements

1.2 Documentation is checked on a regular basis, and the personnel responsible for documentation are advised of deadlines

1.3 Use of systems for the maintenance of records complies with regulatory and workplace requirements

2. **Analyse and evaluate records**

2.1 Records are analysed to identify unexpected deviations from plans or possible future problems with plant and equipment

2.2 Advice is provided to appropriate personnel when problems are identified

2.3 Security of records and documentation is maintained at all times with access being granted to authorised personnel in accordance with workplace procedures

Required Skills and Knowledge

**REQUIRED KNOWLEDGE AND SKILLS**

This describes the essential knowledge and skills and their level required for this unit.

**Required knowledge:**

- Australian and international standards, codes and regulations relevant to the documentation requirements for the local and international transport of cargo and containers including the Australian and International Dangerous Goods Codes
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for checking and evaluating documentation for the local and/or international transport of cargo and containers
- Focus of operation of work systems, equipment, management and site operating systems for checking and evaluating cargo/container transport documentation
- Problems that may occur when checking and evaluating documentation and appropriate action that can be taken to resolve the problems
- Types of cargo, containers and transport modes and the documentation requirements for each
- Site layout, loading/unloading plans and sequence sheets
- The marking and numbering systems for cargo
- Relevant bond, quarantine or other legislative requirements

**Required skills:**
Required skills:

- Communicate effectively with others when checking and evaluating transport documentation
- Read and interpret instructions, procedures and labels relevant to checking and evaluating transport documentation
- Receive, acknowledge and send messages with available communications equipment
- Identify cargo, container and goods, coding, ADG and IMDG markings and where applicable emergency information panels
- Work collaboratively with others when checking and evaluating transport documentation
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions when checking and evaluating transport documentation in accordance with regulatory requirements and workplace procedures
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Identify, select and use relevant equipment, processes and procedures when checking and evaluating documentation for the local and/or international transport of cargo and containers

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational
EVIDENCE GUIDE

situations in the workplace

• In both real and simulated environments, access is required to:
  • relevant and appropriate materials and equipment, and
  • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

• Assessment of this unit must be undertaken by a registered training organisation
• As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
• Practical assessment must occur:
  • through activities in an appropriately simulated environment at the registered training organisation, and/or
  • in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted in:

• a range of work environments
• by day or night

Customers may be:

• internal or external

Workplaces may comprise:

• large, medium or small worksites

Work may be conducted in:

• limited or restricted spaces
• exposed conditions
• controlled or open environments
• office environments

Cargo/freight may include:

• goods with specialist requirements, including temperature controlled goods and dangerous goods

Hazards in the work area may include exposure to:

• chemicals
• dangerous or hazardous substances
• movements of equipment, goods, materials and vehicular traffic
RANGE STATEMENT

Personnel in work area may include:
- workplace personnel
- site visitors
- contractors
- official representatives

Personal protective equipment may include:
- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- protective clothing
- high visibility clothing

Communication in the work area may include:
- phone
- fax
- email
- electronic data transfer (EDI)
- RF systems
- radio
- oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Information/documents may include:
- goods identification numbers and codes
- manifests, bar codes, and container identification/serial number
- Australian and international codes of practice and regulations relevant to the documentation requirements for the local and/or international transport of cargo and containers
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- operations manuals, job specifications and induction documentation
- manufacturers specifications for equipment
- workplace procedures and policies
- supplier and/or client instructions
- dangerous goods declarations and material safety data sheets (where applicable)
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian standards and certification
RANGE STATEMENT

Applicable regulations and legislation may include:

- quality assurance procedures
- emergency procedures
- relevant standards, codes and regulations relevant to the documentation requirements for the local and international transport of cargo and containers
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
  - Australian and International Dangerous Goods Codes
  - Australian Marine Orders and the International Maritime Dangerous Goods Code
  - IATA Dangerous Goods by Air regulations
  - Australian and International Explosives Codes
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- marine orders
- relevant Australian standards and certification requirements
- relevant state/territory OH&S and environmental protection legislation
- workplace relations regulations
- workers compensation regulations

Unit Sector(s)

Unit Descriptor

Unit Descriptor
This unit involves the skills and knowledge required to organise and monitor terminal/wharf operations in accordance with workplace requirements including organising equipment, machinery and personnel; identifying, assessing and managing potential risks; monitoring work performance and progress; monitoring the status of pending work; solving problems and making decisions; completing all shift requirements; and preparing for the next shift. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit
Work must be carried out in compliance with the relevant standards, regulations and workplace requirements concerning terminal/wharf operations.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements to the organisation and monitoring of terminal/wharf operations as part of work activities in the stevedoring, transport, distribution and/or allied industries.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.
Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1 Organise equipment, machinery and personnel | 1.1 Equipment, machinery and personnel are organised to facilitate the safe and efficient loading and unloading of the ship  
1.2 Liaison is maintained with supervisors to ensure the availability of adequate resources |
| 2 Identify, assess and manage potential risks | 2.1 Potential risks are identified and assessed and appropriate solutions are implemented in accordance with workplace procedures  
2.2 Potential risks to safe and efficient operations are removed from the work area or other arrangements are made to ensure conditions for safe work  
2.3 Supervisors are advised of potential risks and liaison is maintained until the risk has been removed |
| 3 Monitor work performance and progress | 3.1 Work performance and progress is monitored to ensure work is performed in accordance with established guidelines and procedures and that safe work practices are maintained  
3.2 Methods and procedures of work are monitored and refined in consultation with supervisors and operational personnel  
3.3 Work performance rates are monitored with delays minimised to ensure work program objectives are met  
3.4 Work practices are monitored to ensure compliance with national standards and safety codes  
3.5 Environmental conditions are monitored to ensure safe working conditions are maintained |
| 4 Monitor status of pending work | 4.1 The status of pending work is monitored, in order of priorities, taking into account the needs of the ship and the terminal/wharf |

## Required Skills and Knowledge

### REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

**Required knowledge:**

- Australian and international standards, codes and regulations relevant to the operation of terminals/wharves including the Australian and International Dangerous Goods Codes
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the organisation and monitoring of terminal/wharf operations
REQUIRED KNOWLEDGE AND SKILLS

- Focus of operation of work systems, equipment, management and site operating systems for the organisation and monitoring of terminal/wharf operations
- Problems that may occur when organising and monitoring terminal/wharf operations and appropriate action that can be taken to resolve the problems
- Relevant handling and safety codes
- Site layout
- The marking and numbering systems for cargo
- Relevant bond, quarantine or other legislative requirements

Required skills:

- Communicate effectively with others when organising and monitoring terminal and wharf operations
- Read and interpret instructions, procedures, information and labels relevant to organising and monitoring terminal and wharf operations
- Complete documentation related to organising and monitoring terminal and wharf operations
- Receive, acknowledge and send messages with appropriate communications equipment
- Identify cargo, container and goods, coding, ADG / IMDG markings and where applicable emergency information panels
- Work collaboratively with others when organising and monitoring terminal and wharf operations
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Identify, select and use relevant equipment, processes and procedures when organising and monitoring terminal and wharf operations
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Estimate size, shape and special requirements of loads
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace
Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted in:
- a range of work environments
- by day or night

Customers may be:
- internal or external

Workplaces may comprise:
- large, medium or small worksites

Work may be conducted in:
- limited or restricted spaces
- exposed conditions
- controlled or open environments

Account may be taken of the following conditions in relation to operational safety (depending on the operational context of the terminal/wharf concerned):
- organisational and statutory operating requirements
- surface condition of the work area
- stacking area
- degree of visibility
- weather conditions
- other traffic
- obstacles
- site and nature of loads
- ship/vehicle/rail movements
- tidal movement

Hazards in the work area may include exposure to:
- chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials

Personnel in work area may include:
- workplace personnel
- site visitors
- contractors
- official representatives

Personal protective equipment may include:
- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- protective clothing
- high visibility clothing

Communication in the work area may include:
- phone
- fax
- email
- electronic data transfer (EDI)

Unit Descriptor

This unit involves the skills and knowledge required to regulate temperature controlled stock in accordance with workplace requirements including identifying goods requiring temperature control, monitoring temperature of goods, and identifying and rectifying any identified problems in accordance with workplace procedures. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the regulation of temperature controlled stock.

Work is performed under some supervision generally within a team environment. It involves the application of product knowledge and an understanding of relevant regulatory requirements to the regulation of temperature controlled stock in the warehousing, distribution and/or storage industries.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1 Identify goods requiring temperature control | 1.1 Goods requiring temperature control are identified  
1.2 Temperature for short-term and long-term storage is selected to match product type  
1.3 Upper and lower limits for temperature control are identified  
1.4 Storage separations and co-storage applications are identified for products |
| 2 Monitor temperature | 2.1 Appropriate methods for determining temperature of goods are identified  
2.2 Storage areas are monitored for temperatures within range for products  
2.3 Products are monitored to ensure compliance with temperature storage requirements  
2.4 Short-term storage times are identified for transit goods |
| 3 Identify and rectify problems | 3.1 Implications of incorrect temperature are identified  
3.2 Damaged goods are identified and appropriate action is undertaken in accordance with enterprise procedures  
3.3 Causes of out-of-temperature range are identified  
3.4 Appropriate personnel are notified for problem rectification  
3.5 Goods handling procedures for maintenance of temperature control are identified and implemented |

## Required Skills and Knowledge

**REQUIRED KNOWLEDGE AND SKILLS**

This describes the essential knowledge and skills and their level required for this unit.

**Required knowledge:**

- Australian codes and regulations relevant to the regulation of temperature controlled stock
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the regulation of temperature controlled stock
- Focus of operation of work systems, equipment, management and site operating systems for the regulation of temperature controlled stock
- Special handling, stacking and storage requirements for temperature controlled stock
- Procedures for pre-cooling and snap freezing
- Problems that can occur when regulating temperature controlled stock and appropriate action that can be taken
REQUIRED KNOWLEDGE AND SKILLS

- Hazards when regulating and working with temperature controlled stock and appropriate action to control the risks involved
- Documentation requirements including reports and records concerning damaged or contaminated goods
- Housekeeping standards procedures required in the workplace
- Site layout

Required skills:

- Communicate effectively with others when regulating temperature controlled stock
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the regulation of temperature controlled stock
- Complete documentation related to the regulation of temperature controlled stock
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when regulating temperature controlled stock
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions when regulating temperature controlled stock in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events when regulating temperature controlled stock
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in stock and equipment in accordance with standard operating procedures
- Select and use relevant equipment, processes and procedures
- Check refrigeration equipment operation in terms of maintenance schedule and standard operating procedures
- Select and implement corrective actions to maintain temperature levels
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide
EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
  - In both real and simulated environments, access is required to:
    - relevant and appropriate materials and equipment, and
    - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT
RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:

- in a range of work environments
- by day or night

Customers may be:

- internal or external

Workplaces may comprise:

- large, medium or small worksites
- short-term and/or long-term temperature controlled areas

Work may be conducted in:

- restricted spaces
- exposed conditions
- controlled or open environments

Procedures for pre-cooling and snap freezing may include:

- automated
- spraying with liquid nitrogen
- immersion in a very cold refrigerant
- freezing in moving air at less than -30oC
- plate freezer with very low refrigerant temperatures

Hazards in the work area may include:

- contamination of, or from, materials being handled
- noise, light, energy sources
- service lines
- spills, leakages, ruptures
- cold pipes and chilling equipment
- dangerous or hazardous substances
- movements of equipment, goods and materials
- dust/vapours
- oil, water or ice on floor
- a fire or explosion
- damaged packaging or pallets
- debris on floor
- faulty racking
- poorly stacked pallets
- faulty equipment

Hazard management is consistent with:

- the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment

Requirements for work may include:

- site restrictions and procedures
- use of safety and personal protective equipment
- communications equipment
- specialised lifting and/or handling equipment
- incident/accident breakdown procedures
RANGE STATEMENT

- additional gear and equipment
- noise restrictions
- hours of operations
- authorities and permits

Communication in the work area may include:

- phone
- electronic data interchange (EDI)
- fax
- email
- internet
- radio
- RF systems
- oral, aural or signed communications

Consultative processes may involve:

- other employees and supervisors
- suppliers, customers and clients
- relevant authorities and institutions
- management and union representatives
- industrial relations and OH&S specialists
- other maintenance, professional or technical staff

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Personal protective equipment may include:

- gloves and protective clothing
- safety headwear and footwear
- safety glasses
- two-way radios
- high visibility clothing

Information/documents may include:

- goods identification numbers and codes
- manifests, picking slips, merchandise transfers, stock requisitions and bar codes
- codes of practice and regulations relevant to the identification, handling and stacking of goods
- operations manuals, job specifications and induction documentation
- manufacturers specifications for equipment
- workplace procedures and policies
- supplier and/or client instructions
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian standards and certification
RANGE STATEMENT

requirements
- quality assurance procedures
- emergency procedures

Applicable regulations and legislation may include:
- relevant codes and regulations for the regulation of temperature controlled goods
- relevant state/territory OH&S and environmental protection legislation
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- workplace relations regulations
- workers compensation regulations

Unit Sector(s)

Competency Field
Competency Field A - Handling Cargo/Stock
TLIA4028A Assess and monitor optimum stock levels

Modification History
Not Applicable

Unit Descriptor
This unit involves the skills and knowledge required to assess and monitor optimum stock levels in accordance with workplace requirements including assessing projected demand, assessing variables that impact upon optimum stock levels, determining optimum inventory levels, and monitoring optimum inventory levels. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit
Work must be carried out in compliance with the relevant regulations and workplace requirements concerning stock control operations.

Work is performed under general guidance on progress and outcomes of work. It requires the exercise of discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes within organisational policy and procedures. A range of opportunities may be used to develop the work area and to support the development of work systems and innovative strategies to deal with contingencies and to encourage the achievement of the organisation's goals and key performance objectives.

Work involves the application of product knowledge and an understanding of relevant workplace procedures and regulatory requirements when assessing and monitoring optimum stock levels as part of work activities in the warehousing, distribution and/or storage industries.

## Required Skills and Knowledge

**REQUIRED KNOWLEDGE AND SKILLS**

This describes the essential knowledge and skills and their level required for this unit.
REQUIRED KNOWLEDGE AND SKILLS

Required knowledge:

- Australian codes and regulations relevant to the optimisation of stock levels
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the assessment and monitoring of optimum stock levels
- Focus of operation of supply arrangements, resources, management and workplace operating systems
- Purpose and use of key information required when optimising stock levels, including supply requirements, supplier information, enterprise contract procedures, sales plan, and distribution times
- Workplace business policies and plans including procedures for maintenance of confidentiality
- Computer records/documentation requirements when assessing and monitoring optimum stock levels
- Problems that may occur when assessing and monitoring optimum stock levels and appropriate action that can be taken to resolve the problems
- Worksite layout and organisational structure

Required skills:

- Communicate effectively with others when assessing and monitoring optimum stock levels
- Read and interpret instructions, procedures, policies, procedures and instructions relevant to the assessment and monitoring of optimum stock levels
- Complete documentation related to the assessment and monitoring of optimum stock levels
- Work collaboratively with others when assessing and monitoring optimum stock levels
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions when assessing and monitoring optimum stock levels in accordance with regulatory requirements and workplace procedures
- Plan and organise resource availability including the competencies of individuals in a team or group
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and apply relevant technology, information systems and procedures when assessing and monitoring optimum stock levels
Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement
RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may involve:
- twenty-four hour operation
- in a range of work environments
- by day or night

Customers may be:
- internal or external

Workplaces may comprise:
- large, medium or small worksites

Work may be conducted in:
- limited or restricted spaces
- exposed conditions
- controlled or open environments

Work:
- applies to predominantly manual operations
- does not include a total computer generated purchasing system operation

Inventory benchmarks may be:
- periodic, monthly or annual

Lead times may vary in accordance with:
- type of transport mode(s)
- processing time
- regulatory requirements
- freight disputations
- customs regulations
- scarcity of resource

Information used when assessing and monitoring optimum stock levels may include:
- supply requirements
- supplier information
- workplace contract procedures
- sales plan
- distribution times

Consultative processes may involve:
- other employees and supervisors
- suppliers, customers and clients
- relevant authorities and institutions
- management and union representatives
- industrial relations and OH&S specialists
- other maintenance, professional or technical staff

Communication in the work area may include:
- phone
- electronic data interchange (EDI)
- fax
- email
- internet
- RF systems
RANGE STATEMENT

Inventory systems may be:
- oral, aural or signed communications
- automated
- manual
- paper-based
- computerised
- microfiche

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Information/documents may include:
- relevant workplace quality specifications, policies and procedures
- Australian regulations and codes of practice relevant to stock management
- manufacturers specifications and/or suppliers handling and storage advice
- supplier and/or client instructions
- workplace business policies and plans including procedures for maintenance of confidentiality
- operations manuals, job specifications and induction documentation
- ADG Code and associated regulations
- material safety data sheets
- relevant Australian standards and certification requirements
- conditions of service, legislation and industrial agreements including award details, enterprise bargaining agreement, other industrial arrangements
- emergency procedures

Applicable regulations and legislation may include:
- codes and regulations relevant to the optimisation of stock levels including the ADG Code
- relevant state/territory OH&S and environmental protection legislation
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- workplace relations regulations
- workers compensation regulations

Competency Field
Competency Field A - Handling Cargo/Stock
TLIA4030A Organise cargo for export

Modification History
Not Applicable

Unit Descriptor
This unit involves the skills and knowledge required to organise the export of cargo including confirming correct preparation of the consignment, organising the loading of the cargo and processing the documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit
Work must be carried out in compliance with the relevant codes of practice and regulations for the export of cargo.

It is performed under general supervision, with some accountability and responsibility for self and others in achieving the prescribed outcomes.

Work involves the application of routine freight forwarding principles and procedures to organise cargo for export.

Licensing/Regulatory Information
Refer to Unit Descriptor

Employability Skills Information

Employability Skills  This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.  Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
### Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1 Confirm correct preparation of consignment | 1.1 Consignment is checked to ensure that cargo is consistent with packing specification and is suitable for the type and method of transport  
1.2 Consignment is checked to ensure that labelling and marking of cargo conforms with domestic and international regulations and workplace requirements and that the packaging of cargo conforms to regulatory requirements and is appropriate for the method of transport  
1.3 Cargo is checked for dangerous goods or explosives and it is confirmed that, where applicable, packaging and labelling conform with the Australian and International Dangerous Goods or Explosives Codes  
1.4 Discrepancies in the composition or preparation of the cargo are noted and action is undertaken in accordance with workplace procedures |
| 2 Organise the loading of cargo | 2.1 Handling methods and equipment are selected which are suitable for the goods and transport method  
2.2 Goods transfer methods between modes of transport are selected where appropriate  
2.3 Procedures for the loading of cargo are organised in accordance with good practice requirements  
2.4 Established industry practice is followed in the organisation of the loading of cargo  
2.5 Employees, equipment and temporary storage areas (if required) are allocated and supervised  
2.6 Individuals are informed of work requirements, timelines and relevant personal protective equipment  
2.7 Work processes are monitored to ensure that resources, both human and equipment, are maintained at productive levels and within OH&S requirements |
| 3 Process documentation | 3.1 All relevant documentation is consolidated and checked for completion  
3.2 Dangerous goods declaration is obtained from consignor (if necessary)  
3.3 Discrepancies in documentation are identified and action is undertaken in accordance with workplace procedures  
3.4 Documents are filed/stored/forwarded in accordance with workplace procedures |
Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:
- Codes of practice and legislative requirements including local and international regulations relevant to the export of cargo
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- Relevant OH&S and environmental procedures and regulations
- Interpretation of client requirements
- Procedures for the identification and evaluation of information needed to organise the export of cargo
- Procedures for the calculation of weights, volumes and dimensions
- Procedures for the reviewing of transport options and availability of carriers
- Procedures for liaising with Australian and international contacts
- Procedures for batching, dating and numbering
- Procedures for the completion of consignment documentation
- Problems that may occur when when organising the export of cargo and appropriate action that can be taken
- Contacts and sources of information/documentation needed when organising the export of cargo
- Customer service policies and procedures

Required skills:
- Communicate effectively with others when organising the export of cargo
- Read and interpret instructions, procedures, information, labels and other documents relevant to the organisation of the export of cargo
- Complete documentation related to the organisation of the export of cargo
- Work collaboratively with others when organising the export of cargo
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when organising the export of cargo in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events that may arise when organising the export of cargo
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and
Required skills:

environments

• Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
• Operate and adapt to differences in cargo and systems in accordance with standard operating procedures
• Select and use relevant communications equipment when organising the export of cargo

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  • the underpinning knowledge and skills
  • relevant legislation and workplace procedures
  • other relevant aspects of the range statement

Context of and specific resources for assessment

• Performance is demonstrated consistently over a period of time and in a suitable range of contexts
• Resources for assessment include:
  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  • access to an appropriate range of relevant operational situations in the workplace
  • In both real and simulated environments, access is required to:
    • relevant and appropriate materials and equipment, and
    • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

• Assessment of this unit must be undertaken by a registered training organisation
• As a minimum, assessment of knowledge must be
EVIDENCE GUIDE

conducted through appropriate written/oral tests

- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Organisation of the cargo for export may include:
- movement of equipment, goods, materials and vehicular traffic

Customers may be:
- internal or external

Operations may be conducted:
- by day or night

Cargo to be exported may include:
- dangerous, hazardous, perishable, fragile, packaged goods or in liquid or solid form

Forms of documentation for the export of cargo may include:
- packing specifications and lists
- manifests
- invoices

Transport modes may include:
- air, sea or combinations

Requirements for work may include:
- site restrictions and procedures
- use of safety and personal protective equipment
- communications equipment
- specialised lifting and/or handling equipment
- incident/accident breakdown procedures
- authorities and permits
- hours of operations
- noise restrictions
- additional gear and equipment

Hazards may include:
- hazardous or dangerous materials
- contamination of, or from, materials being handled
- noise, light, energy sources
- stationary and moving machinery, parts or components
RANGE STATEMENT

- dust/vapours
- spills, leakages, ruptures
- service lines

Hazard management is consistent with:
- the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment

Established industry practice when planning procedures for the loading of cargo includes:
- available space is used efficiently
- goods are packed for ease of inspection and to meet delivery and customer requirements
- goods are secured ensuring no damage to contents
- weight and volume of consolidated cargo conforms to specifications
- dangerous goods are labelled in accordance with Australian and International Dangerous Goods Codes
- dangerous goods are packaged and labelled in accordance with their class and subsidiary risk

Consultative processes may involve:
- other employees and supervisors
- suppliers, potential customers and clients
- relevant authorities and institutions
- management and union representatives
- industrial relations and OH&S specialists
- other maintenance, professional or technical staff

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Information/documentation may include:
- Australian and international codes of practice and regulations relevant to export of cargo
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- operations manuals, job specifications and procedures and induction documentation
- Safe Working Limits (SWL) and Working Load Limits (WLL) of transport options
- workplace operating procedures and policies
- supplier and/or client instructions
- Australian and international standards, criteria and certification requirements
- communications technology equipment, oral, aural or
RANGE STATEMENT

Applicable procedures and codes may include:

- signed communications
- quality assurance procedures
- emergency procedures
- relevant competency standards and training materials
- relevant codes and regulations for the export of cargo
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
  - Australian and International Dangerous Goods Codes
  - Australian Marine Orders and the International Maritime Dangerous Goods Code
  - IATA Dangerous Goods by Air regulations
  - Australian and International Explosives Codes
  - relevant international and Australian state/territory road rules and transport regulations
  - relevant Australian and international standards and certification requirements
  - international transport regulations, codes and procedures
  - relevant state/territory OH&S legislation
  - relevant state/territory environmental protection legislation

Unit Descriptor

This unit involves the skills and knowledge required to consolidate freight including assessing the scope to consolidate freight, combining or consolidating multiple shipments of products into higher volume shipments, and the related preparation of consignment documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Work must be carried out in compliance with the relevant codes of practice and regulations for the carriage of freight.

It is performed under general supervision, with some accountability and responsibility for self and others in achieving the prescribed outcomes.

Work involves the application of routine principles and procedures to efficiently and effectively combine and consolidate freight prior to shipment.

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant codes of practice and legislative requirements including local and international freight regulations
- Relevant OH&S and environmental procedures and regulations
- Procedures for the calculation of volumes and dimensions
- Procedures for the identification and evaluation of information needed to facilitate the consolidation of freight
REQUIRED KNOWLEDGE AND SKILLS

- Procedures for planning the loading of freight
- Procedures for the completion of consignment documentation
- Problems that may occur when consolidating freight and appropriate action that can be taken
- Sources of information and documentation needed when consolidating freight
- Customer service policies and procedures

Required skills:

- Communicate effectively with others when consolidating freight
- Read and interpret instructions, procedures, information and labels relevant to the consolidation of freight
- Complete documentation related to the consolidation of freight
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when consolidating freight
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur during the consolidation of freight in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events that may occur during the consolidation of freight
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in freight and equipment in accordance with standard operating procedures
- Select and use required computer and communication equipment when consolidating freight
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the
EVIDENCE GUIDE

performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work
RANGE STATEMENT

Environments and situations that may affect performance.

Consolidation of freight may include:
- mixed products from multiple areas for shipment to a single customer
- the consolidation of smaller shipments

Requirements for work may include:
- freight forwarding protocols and procedures
- communications equipment
- workplace operations
- authorities and permits
- hours of operation
- relevant regulations

Information needed to facilitate the consolidation of freight may include:
- type, capacity and compatibility of cargo
- agreed delivery times and routing schedules
- pick-up and drop-off points
- specified carrier/mode of transport
- agreed cost structure

Established industry practice when planning procedures for the loading of cargo includes:
- available space is used efficiently
- goods are packed for ease of inspection and to meet delivery and customer requirements
- goods are secured ensuring no damage to contents
- weight and volume of consolidated cargo conforms to specifications

Consultative processes may involve:
- other employees and supervisors
- international and domestic agents, suppliers, clients
- relevant authorities and institutions
- management
- OH&S specialists
- other professional or technical staff

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

2.6 Discrepancies in freight are noted and action undertaken in accordance with workplace procedures |
| 3 Complete organisational process  | 3.1 Monitoring processes to track the movement of freight are implemented  
3.2 Reporting requirements are communicated to appropriate personnel  
3.3 Workplace documents and records are checked for completion and are filed/stored in accordance with workplace procedures |

## Required Skills and Knowledge

**REQUIRED KNOWLEDGE AND SKILLS**

This describes the essential knowledge and skills and their level required for this unit.
REQUIRED KNOWLEDGE AND SKILLS

Required knowledge:
- Codes of practice and legislative requirements relevant to the organisation of the transport of freight and goods
- Relevant OH&S and environmental procedures and regulations
- Procedures for the calculation/estimation of weight, volumes and dimensions
- Procedures for the identification and evaluation of information needed to facilitate the transport of freight
- Procedures for assessing storage and transport requirements and options
- Procedures for electing transport/storage equipment and systems
- Procedures for organising any required permits
- Procedures for coordinating the transfer and storage of goods including multi-modal transport
- Procedures for the completion of transport documentation
- Problems that may occur when organising the transport of freight and goods and appropriate action that can be taken
- Sources of information and documentation needed when organising the transport of freight and goods
- Customer service policies and procedures

Required skills:
- Communicate effectively with others when organising the transport of freight and goods
- Read and interpret instructions, procedures and labels relevant to the organisation of the transport of freight and goods
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the organisation of the transport of freight and goods
- Work collaboratively with others when organising the transport of freight and goods
- Establish effective working relationships with colleagues and clients
- Plan own work including prioritisation of work activities, predicting consequences and identifying improvements
