UEECD0053 Write specifications for computer systems engineering projects

Release: 1

UEECD0053 Write specifications for computer systems engineering projects

Modification History

Release 1. This is the first release of this unit of competency in the UEE Electrotechnology Training Package.

Application

This unit involves the skills and knowledge required to write specifications for computer systems engineering projects.

It includes preparing specifications to meet client expectations, consulting with relevant person/s and/or information sources, and documenting design with approval of relevant person/s.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Cross Discipline

Unit Sector

Electrotechnology

Elements and Performance Criteria

PERFORMANCE CRITERIA	
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare specification requirements	1.1 Work health and safety (WHS)/occupational health and safety (OHS) requirements and workplace procedures for a given work area are identified, obtained and applied
	1.2 Techniques for specification writing are reviewed and

	applied in accordance with workplace procedures
	1.3 Scope of the specification is determined using formal evaluation/survey processes
	1.4 Criteria from related works impacting specification are determined from relevant documentation, site visits and/or discussions with relevant person/s
2 Write specification	2.1 Specification is developed with scenarios/requirements in consultation with relevant person/s and in accordance with relevant industry standards
	2.2 Specification is developed in collaboration with relevant design professionals and contractors involved in the project
	2.3 Relevant person/s required for the project is identified and their roles specified in accordance with specification scope
	2.4 Specification is reviewed in accordance with specification scope inputs and adjusted to rectify anomalies
	2.5 Specification is developed in accordance with workplace procedures
3 Obtain approval of specification	3.1 Specification is presented and discussed with relevant person/s
	3.2 Alterations to the specification resulting from the discussion are negotiated with relevant person/s in accordance with workplace procedures
	3.3 Specification is finalised and approval obtained from relevant person/s

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work

environment.

Non-essential conditions may be found in the UEE Electrotechnology Training Package Companion Volume Implementation Guide.

Developing specifications for medium-sized computer systems engineering project must include all the following attributes:

- safety requirements met
- client expectations established
- cost-effective solutions pursued and assured
- design and technical requirements documented

Unit Mapping Information

This unit replaces and is equivalent to UEENEEE070B Write specifications for computer systems engineering projects.
