**Assessment Requirements for UEEDV0012
Set up and configure the wireless
capabilities of communications and data
storage devices**

Release: 1

Assessment Requirements for UEEDV0012 Set up and configure the wireless capabilities of communications and data storage devices

Modification History

Release 1. This is the first release of this unit of competency in the UEE Electrotechnology Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least two separate occasions and include:

- correcting programming anomalies
- dealing with unplanned events
- entering functions and parameters correctly
- entering operating instructions
- identifying operating anomalies of device installation
- identifying required operating functions and parameters
- obtaining and checking tools, equipment and testing devices required to carry out work
- preparing to enter operating instructions
- verifying device operation
- testing device operation and completing reports.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- operating principles at sub-system level
- programming functions
- relevant device functions and parameters
- relevant manufacturer specifications
- relevant job safety assessments or risk mitigation processes
- relevant tools, equipment and testing devices
- relevant workplace documentation
- relevant workplace policies and procedures.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated suitable workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, facilities and equipment currently used in industry
- resources that reflect current industry practices in relation to setting up the wireless capabilities of communications and data storage devices
- applicable documentation, including workplace procedures, equipment specifications, regulations, codes of practice and operation manuals.
