# UEEEL0015 Manage large electrical projects

Release: 1

#### **UEEEL0015** Manage large electrical projects

#### **Modification History**

Release 1. This is the first release of this unit of competency in the UEE Electrotechnology Training Package.

# Application

This unit involves the skills and knowledge required to manage large electrical projects.

It includes identifying the scope of the project; managing safety, budget variation, personnel, resources and critical path timelines; and completing documentation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

#### Pre-requisite Unit

UEECD0007 Apply work health and safety regulations, codes and practices in the workplace

#### **Competency Field**

Electrical

## **Unit Sector**

Electrotechnology

#### **Elements and Performance Criteria**

ELEMENTS		PERF	ORMANCE CRITERIA
Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	Identify the scope of the project	1.1	Work health and safety (WHS)/occupational health and safety (OHS) processes and workplace procedures for a given work area are identified, obtained and applied
		1.2	Project deliverables and budget are identified from project planning, relevant documentation and discussions with relevant person/s

- 1.3 Measurable outcomes are identified to evaluate the project on completion from project planning and relevant documentation
- 1.4 Plant, materials and skills required to meet project outcome are identified from project planning and relevant documentation
- 1.5 Processes and workplace procedures are developed for managing contract variations from discussions with relevant person/s and in accordance with contractual agreement
- 2 Manage project within 2.1 WHS/OHS requirements, workplace procedures and programs are implemented and monitored scope
  - 2.2 Achievement of project outcomes is delegated to relevant person/s involved in the project
  - 2.3 Risk events are identified and project plan strategies implemented to ensure the outcomes are achieved to a safety and quality standard in accordance with contractual agreement and workplace procedures
  - 2.4 Procurement processes are monitored to ensure supply of plant and materials in accordance with workplace procedures
  - 2.5 Project progress is monitored in accordance with schedule, quality requirements and budget
  - 2.6 Conflict issues on worksite, between stakeholders, clients and regulators are identified and managed in accordance with workplace procedures
  - 2.7 Variations are managed in accordance with workplace procedures and contractual agreement
  - 2.8 Project records are maintained and progress reports written and forwarded to all relevant person/s
  - 3.1 Project outcomes, plan, implemented risk strategies, contract variations, safety record and budget are evaluated in accordance with contractual agreement and workplace procedures
    - 3.2 Project completion and acceptance is sought from relevant person/s with relevant documentation in accordance with workplace procedures

Complete project and

relevant documentation

3

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# **Range of Conditions**

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the UEE Electrotechnology Training Package Companion Volume Implementation Guide.

# **Unit Mapping Information**

This unit replaces and is equivalent to UEENEEG169A Manage large electrical projects.
