UEP40318 Certificate IV in ESI Generation Maintenance - Electrical Electronics

Release 2

UEP40318 Certificate IV in ESI Generation Maintenance - Electrical Electronics

Modification History

Release 2. This is the second release of this qualification in the Electricity Supply Industry - Generation Sector Training Package. The following modification has been made:

- UEPMNT415 Diagnose and repair faults in complex refrigeration and air conditioning equipment and UEPMNT434 Diagnose and repair faults in wind turbine control systems and UEPMNT345 Install electronic equipment and UEPMNT319 Maintain and test fixed fire protection systems and UEPMNT426 Maintain electronic instrumentation equipment and UEPMNT362 Maintain wind turbine control systems and UEPMNT413 Modify electronic electrical equipment and UEPMNT429 Modify electronic instrumentation equipment and UEPMNT424 Monitor efficiency of thermal steam cycle power plant and UEPMNT416 Overhaul electrical generator and UEPMNT352 Test and commission electronic electrical equipment and UEPMNT431 Test and commission electronic instrumentation equipment and UEPMNT441 Test and commission power plant inverter systems and UEPMNT436 Test and commission wind turbine control systems and UEPMNT432 Write programs for control systems deleted due to zero enrolment.

Release 1. This is the first release of this qualification in the UEP - Electricity Supply Industry - Generation Sector Training Package.

Qualification Description

Participants gaining this qualification will be able to manufacture, fit, assemble, erect, operate, test, find and diagnose faults and alter and repair electrical and electronic equipment including instrumentation systems. It does not include installation of any electrical wiring systems within an electrical installation as prescribed in current industry standards.

Functions can include maintenance planning and scheduling as well as electrical wiring work if it is associated with assembling, maintaining, terminating or altering the wiring between electrical components within power generating plant or machinery. It also includes the supervision of others and the coordination of work activities.

Electrical equipment means any appliance, article, accessory, wire, fitting, cable, conduit or apparatus that generates, uses, conveys or controls, or that is intended to generate, use, convey or control, electricity above extra low voltage.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

A total 1280 weighting points comprising 820 core weighting points, plus 460 elective weighting points from the general elective units listed below.

Choose a total of 460 weighting points from the elective units list below of which between 0 and 220 weighting points can be taken from Group A. A total of 220 weighting points can be selected from Group B. Between 240 and 460 weighting points may be taken from Group C, you may select all your elective units from this group.

Up to 220 weighting points of the general elective units Group A, may be selected, with appropriate contextualisation, from any relevant nationally endorsed Training Package or accredited course, provided that selected units contribute to the vocational outcome of the qualification. Previously assigned weighting points are listed in UEP CVIG, if not listed weighting points will be 10 points unless directed from the ESI Generation Industry Reference Committee (IRC). The general elective units must contribute to the vocational outcomes of the qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Where a prerequisite unit is attached to a unit, it is identified by this symbol ⊐.

Core units	Weighting points
UEENEEE101A Apply Occupational Health and Safety regulations, codes and practices in the workplace	20
UEENEEE102A Fabricate, assemble and dismantle, utilities industry components ⊐ UEENEEE101A Apply Occupational Health and Safety regulations, codes and practices in the workplace	40
UEENEEE104A Solve problems in D.C. circuits ⊐ UEENEEE101A Apply Occupational Health and Safety regulations, codes and practices in the workplace	80
UEENEEE105A Fix and secure electrotechnology equipment ⊐ UEENEEE101A Apply Occupational Health and Safety regulations, codes and practices in the workplace	20
